Rec'd 23 Aug

A trial of power between two of the Louisville engines is reported by the Journal, which says—"Water was thrown through 1200 feet of hose, up an inclined plane of 76 feet, through a 1½ in. nozzle. The greatest distance thrown by the Washington was 120 feet 2 inches; by the Relief, 137 feet 4 inches.

An idea may be formed of the difficulties which the British army have to encounter in India, from the extent of the country over which they have to travel. From Cabul to Bombay it is 1301 miles; from Cabul to Calcutta 1766; from Jellalabad to Calcutta, 1630.

☞ The Decay of the Teeth and Gums arises from various causes; but, principally, it may be attributed to *early neglect. ill health, and the use of Toot's Powders containing mineral and other deleterious acids, which give a momentary whiteness to the teeth, while they corrode the enamel!*—The extreme prevalence of this last cause is too well known to need comment. To this fact, indeed, is principally to be attributed the long Botanical Research which was happily terminated by the most felicitous discovery ever given to the world for the Preservation of the TEETH, GUMS, and BREATH, viz.—ROWLAND'S ODONTO, or PEARL DENTIFRICE. This Powder now occupies a distinguished place at the Toilets of the Sovereigns and Nobility throughout Europe, while the general demand for it at once announces the favour in which it is held by the public at large. *See Advertisement.*
