LOCAL TREATMENT FOR WOMEN'S DISORDERS

The health we enjoy depends very largely upon how the blood circulates in our bodies; in other words, if we have perfect circulation we will have perfect health.

There is a constant wearing out of the tissues in every part of the body. The blood flowing through the veins carries off this waste or dead matter, while the blood coming from the heart through the arteries brings the fresh new living tissue, the essence of the food we have digested, to replace what has been carried off. This constant wearing out and expelling of the dead matter and the replacing of it with new matter atom by atom, goes on day and night, until in about 7 years a complete change has been effected. Thus every man and woman has an entirely different body in every particle of it from what he or she had 7 years before.

It sometimes happens, however, from a variety of causes, that the blood becomes congested in certain portions of the body. This means that the blood vessels in these parts become weakened, and the circulation in that section of the body becomes sluggish and stagnant. The consequence is that the dead matter in that part of the body is only partially carried away, and that but little of the new, vital matter is introduced there to build up and strengthen the tissues and nerves.

This condition invariably exists in all cases of female disorders. The dead matter retained in the circulation, which should have been expelled, causes irritation and inflammation of the delicate membranes, and oppresses the nerve centres. This condition is the cause of the grievous physical and mental suffering which accompanies female troubles.

To obtain relief it is evident the first thing to be done is to get rid of the dead matter which is being held in the circulation. If this dead matter is allowed to remain there a species of blood poisoning will result and nature will endeavor to get rid of it by forming ulcers, tumors, etc.

The above explanation will also show why ORANGE LILY is successful in curing this condition. It is a local treatment, and is applied direct to the affected parts. Its curative elements are absorbed into the congested tissue, and from the very start the dead matter begins to be discharged. A feeling of immediate relief, both mental and physical, accompanies it, and the improvement is constant and positive. This feature of the expelling of the dead matter is always present to a greater or less extent, and in some cases it is so marked as to be amazing.

The case described in the following letter is not exceptional:

Dr. Coonley—I am thankful to Mrs. F. E. Currah, your Canadian representative, for my health restored by your wonderful remedy. I have found for 17 years, but not so bad until 3 years ago. Then I had a doctor, who told me I had a tumor, and could live no more than a year. If I went through operation I would not live through it. A year later I sent for him again, and he gave me up to die. My husband then sent for another doctor, who performed operation, and it did me much good. I doctored with him 3 or 4 months, but grew so bad again that I thought I could live no longer, and I began to long to go. One day my husband came home and threw a slip of paper to me with Mrs. Currah's address and told me a lady had advised him to write to her for a treatment that would cure me. I said it was too late, that I would die anyway. I did not lift a cup without hurting me. Then the first doctor told me I was worse than ever. However, my husband sent for ORANGE LILY, and the first treatment brought away one tumor. Others followed, until 7 tumors had been expelled, 3 large ones and 4 small ones. I know if it had not been for ORANGE LILY I would have died, for I could not live much longer. I would have thought it cheap at one hundred dollars for a month's treatment, instead of one dollar. It is worth its weight in gold.—MRS. GEO. LEWIS, Huntsville, Ont.

The above letter is published with Mrs. Lewis' permission. All letters received are treated as being sacredly confidential, but occasionally some patient is so grateful for being cured that she is willing to make the matter known for the benefit and encouragement of her suffering sisters.

ORANGE LILY is a positive, scientific remedy for all disorders of the female functions. As explained above these troubles are of local origin, and require local treatment. It is just as sensible to take medicine internally for female troubles as it would be to take medicine internally for a bruise, a boil or an ulcerated tooth. In all these cases some dead matter is retained, and the cure is effected by employing local methods for expelling the dead matter. ORANGE LILY has antiseptic, soothing and healing properties, and also tones up and invigorates blood vessels and nerves. I am so anxious that every suffering woman may satisfy herself, without cost to her, that ORANGE LILY is for her, that I hereby make the following

FREE TRIAL OFFER

I will send, without charge, to every reader of this notice who suffers from any of the troubles peculiar to women, if she will send me her address, a trial treatment of the ORANGE LILY treatment to last her ten days. In many cases this trial treatment is all that is necessary to effect a complete cure, and in every case it will give very noticeable relief. If you are a sufferer, you owe it to yourself, to your family and to your friends to take advantage of this offer. Address MRS. FRANCES E. CURRAH, Windsor, Ont.

RESTORE SEAL HERDS IN FIFTEEN YEARS

Plan For Preservation at Pribyloff Group Recommended to United States Government

Washington, Jan. 27 — Representative Edward E. Townsend's plan for the preservation of the seal herds in the phibyloff group, in Alaska, has been accepted by the committee on foreign affairs of the house and will be presented to the house as an amendment to the bill recommended by the state department. The bill would limit the slaughter of male seals to 5,000 a year for five years; 7,000 a year for the next five years and 10,000 annually for a period of five years following. At the expiration of fifteen years new regulations are to be adopted.

The belief was expressed by experts and the committee that, at the end of fifteen years, the depleted seal herds will be restored to their old size. The United States forbids pelagic sealing and it is expected the proposed bill will demonstrate to Russia, Japan and Great Britain that pelagic sealing was responsible for the terrible slaughter and the consequent diminution of the herds.

PERSONAL AND SOCIAL NEWS OF THE WEEK IN ST. JOHN

Within the past eight days amateur theatricals have been to the fore. The splendid results achieved, artistically and financially, by the production, He's Not Such a Fool As He Looks, which took place at the Opera House last Friday and Saturday, clearly demonstrated to the public the heights to which those taking part might scale in future presentations, when more time could be spared for rehearsals. However, although the time of preparation was of necessity short, the drama was immensely enjoyed by large numbers of people. The specialties were daintily acted and the singing was without flaw, the song In the Shadows having made a decided impression as anyone will acknowledge who hears the catchy music whistled and sung everywhere about town. The Halifax amateurs have every reason to be pleased with their reception in St. John, crowded houses having greeted their fine performances at the Opera House of The Isle of Palms, the two first days of this week.

Outdoor sports have taken possession of society, now that "real winter" has come. The Thistle and St. Andrew's curling rinks are the mecca's towards which all the smart set now turn their steps, and it would repay those who have an idle hour to visit either of these rinks any morning between 10 and 12 a. m. There they will find women sweeping with the same energy as the housewives they left at home, and, needless to say, enjoying themselves very much more.

The good sleighing has tempted hostesses into giving sleighing parties, so that the tooting of horns, mingled with the sound of merry voices vibrate through the air during these clear starry nights.

The carnival at the Queen's Rink on Wednesday evening organized by the Loyalist Chapter of the Daughters of the Empire, was a pronounced success in every respect. The prize winners were as follows: A Durbar Princess, Miss Frances Robinson; most original costume, for ladies, Aviation, Miss Gladys Hegan; most patriotic costume, O Canada, Miss Marion Magee; best representation of "Canada," Miss Alice L. Fairweather; a second prize for same, Miss Muriel Gandy. Miss Fairweather's prize was donated by the Women's Canadian Club, Mayor Frink presenting the one awarded to Miss Gandy. A special prize was awarded by the Daughters of the Empire to Miss Portia McKenzie for her presentation of a duchess of the 15th century. The gentlemen who received prizes were: Mr. Hugh Mackay, Indian Warrior; most original costume, Mr. Alexander Fowler, Captain Cook; combination costume, two frogs, Mr. Arthur and Leslie Gandy. Mr. Roland Skinner was the winner of the guessing contest. Others who were commended for their costumes were Miss Ethel McAvity, representing the cement merger and Max Aitken; Miss Bessie Foster, as Joan of Arc; Miss Katie Hazen, as an Indian Princess; Miss Bertie Hegan, as Mrs. Jarley, 100 years ago; Mr. George Morrissey, as President Taft; and Mr. Barton Wetmore, as an Admiral. The judges were the Mayor and Mrs. Frink, Mr. and Mrs. E. A. Smith, Mrs. Inches, Dr. Margaret Parks, and Mr. George H. Hegan. A recital by the pupils of Miss Beatrice Price took place recently at the residence of Mrs. Ranney Murray, which was at once unique and interesting, inasmuch as the ages of the children, with but one exception, ranged from five to ten years, and that the children were entirely unaided in their efforts. The smallest tot accompanied one of the vocal performers on the piano, whilst another little one played an accompaniment to a violin solo rendered by another performer and so on throughout the programme of 18 numbers. It was really a remarkable exhibition. The juvenile class was composed of the following children: Miss Hortense Maher, Miss Olivia Gregory, the Misses Mary and Constance Murray and Master Sydney Murray. The children, who were afterwards refreshed with many confections, looked very "taking" in their pretty white frocks and velvet suits.

Early Scotch Settlers in the Maritime Provinces was the subject chosen by Mrs. Smith for her address.

Specialist Did Skin Trouble No Good

Very Itchy and Disfiguring. Got a Little Cuticura Soap and Ointment and Was Cured.

"For two summers I suffered with skin trouble on my arms, and on my legs from my knees down. My arms were badly disfigured, and I kept them covered. It came like the hives, and was very itchy. I consulted a specialist, who gave me medicine, as well as an ointment, but seemed to do no good. It was beginning to appear on my face.

"I got a little Cuticura Ointment and some Cuticura Soap. The first touch of Ointment seemed to relieve, and before the Cuticura Ointment was finished I was cured. I have not the least sign of trouble. I think it would have spread over my whole body if Cuticura Soap and Ointment had not cured me. I am delighted with them, and do feel pleased to think I have something I have confidence in. I tell all my friends about them, and I think Cuticura Ointment is the best I ever saw." (Signed) M. J. Boddy, 75 McCaul St., Toronto, Dec. 22, 1910.

Cold-Sore Began to Heal With First Use of Cuticura Ointment.

"Cuticura Ointment cured a very bad cold-sore that gave me hours of severe pain and loss of sleep. I tried lots of other remedies but nothing did me any good till I tried Cuticura Ointment, and from the very first application it began to heal and now there is not even a scar left." (Signed) Mrs. W. Boyce, Mermaid Farm, P.E.I., Jan. 8, '11.

The Fate of Murderers

New York, Jan. 26—Joseph Roberts, a negro, was convicted of murder in the first degree this afternoon for the killing of I. Vogel, a jewelry salesman, on Dec. 5. The prisoner smiled when the foreman pronounced the verdict.

BUILD UP THE HOME INDUSTRIES

(Sussex Record)

Let us again repeat that there are scores of good investments to be made right in the Maritime Provinces. There are numerous sound manufacturing concerns who only want a little more capital to make extensive additions to their plants and thus give employment to hundreds of hands. If the people of the maritime provinces had been as liberal in supplying capital to home manufactures as they have been in assisting distant factories, through their investments in bank stocks and bond issues, we would be a more progressive section of the dominion than we are. The great trouble with maritime province industries has been to raise sufficient capital to enable them to work to advantage. There have been scores of promising factories forced into the receivers hands because of the lack of funds. Hundreds of thousands, yes millions of dollars have been lost by maritime province people in an effort to build industries hundreds of miles away from home. We believe that the time has arrived when we should take Sir Byron Walker's advice and get in on the ground floor of our own possibilities.

Lord Mayor of London as a title was first bestowed in 1354 by Edward III.

A SEVERE COLD DEVELOPED INTO PNEUMONIA.

Doctors Said He Would Not Live.

DR. WOOD'S NORWAY PINE SYRUP Cured Him.

Too much stress cannot be laid on the fact that when a person catches cold it must be attended to immediately, or serious results are liable to follow.

There is only one way to prevent pneumonia, and that is, to cure the cold just as soon as it appears.

Dr. Wood's Norway Pine Syrup will do this quickly and effectively.

Mr. Hugh McLeod, Esterhazy, Sask., writes:—"My little boy took a very severe cold, and it developed into pneumonia. The doctor said he would not live. I got some of your Dr. Wood's Norway Pine Syrup, and he began to improve. Now, he is a strong healthy child, and shows no sign of it coming back."

Dr. Wood's Norway Pine Syrup is put up in a yellow wrapper; three pine trees the trade mark; price 25 cents.
