1863

The Snake Island Indians in 1857 numbered 134

They cultivate more land now than they did in 1857 - with proportionate stock which has been made the charge of Mr William Sun for agricult Society. The Young Indians of this Band are noted as good hunters and trappers and are often employed by white people to go with their canoe into the interior on hunting and fishing expeditions.

Many of them are very intemperate
