To assist in meeting the demand for agricultural laborers in Ontario during the season of 1917, H. A. Macdonell, director of colonization of the department of lands, forests and mines, is sending a number of agents to points in the United States to attract men to this province for the coming season. A year ago this experiment met with considerable success, and the results amply justified the enterprise of the department.

In order that the services may be of real benefit to the farmers of the province it will be necessary for those desiring this class of help to agree to accept the services of such as early as February 1st if possible, and to notify the director of colonization, parliament buildings, Toronto, accordingly. Those engaging help early will escape the inevitable scarcity following the spring rush.

While it is expected that the supply of men available will be in excess of what it was last year, there is no doubt the number who respond will be more or less limited and it is most desirable that the farmers should cooperate with the department in making the endeavor this year a complete success.

Any more horses than are actually required to do the work on the farm should be considered as luxuries unless some profit may be derived from keeping them.

FARMERS OF ONTARIO

The Honorable the Minister of Lands, Forests and Mines is sending a number of agents to the bordering States for the purpose of inducing FARM HANDS to come over to ONTARIO.

Farmers requiring help during the season of 1917 are requested to communicate at once with Mr. H. A. Macdonell, Director of Colonization, Parliament Buildings, Toronto.

WHEAT ADVANCES ON HEAVY BUYING

Purchases for Export Account Continues in a Substantial Volume.

GOOD SNOW COVERING

Prospects for the Coming Crop Continue to Show Improvement.

Special to The Toronto World.

Chicago, Jan. 16.—Buying by influential interests and covering by shorts made the wheat market strong from the start today. Considerable export business was closed on the preceding day's decline and there was further purchasing for foreign concerns today. Argentine houses took futures, helping to lighten prices. Profit-taking caused only moderate setbacks, the offerings being well taken. The weekly snow map of the government showed that the winter crop had a fair to good covering generally. A great deal of moisture has fallen in various parts of the belt recently, and no suffering of importance is now noted. Announcement by the Baltimore and Ohio that its embargo on shipments of grain to go abroad by way of Baltimore would be lifted at once was a favorable factor.

Canada's "Visible" Large.

The visible supply in the United States, according to "Bradstreet's," is 65,449,000 bushels, a decrease of 3,664,000 bushels for the week, and compares with 83,775,000 bushels a year ago; in Canada it is 95,002,000 bushels an increase of 595,000 bushels for the week, and compares with 93,149,000 bushels last year.

Advices from abroad said that the shipping situation was being relieved. Argentina reported the arrival of an increased number of bottoms, with vessel rates tending downward. Shipments from Australia are increasing, and they are free from America. The belief prevailed that provision has been made for the continuation of fair exports from this side.

Large houses bought corn, which was strong. Alarming crop advices from Argentina were a factor, and it was presumed that some of the purchasing here today was for the account of interests in that country. The weather, however, was unsettled, with indication of rain. Only a small yield is expected in Argentina. The demand from the continent is good.

Oats also moved upward on excellent buying. Foreigners took futures. The visible supply in the United States and Canada is 76,817,000 bushels, a decrease of 2,691,000 bushels for the week, and compares with 82,741,000 bushels last year. Little is being sent from Argentina. Reserves there are light. The continent continues to absorb.

After the close sales for export were estimated as follows:

Wheat, 700,000 bushels; corn, 400,000 bushels, and oats, 1,400,000 bushels.
