

Listerine

**A Non-toxic, Non-irritant, Non-escharotic
Antiseptic.**

ABSOLUTELY SAFE, AGREEABLE AND CONVENIENT.

Listerine is a well-proven antiseptic agent—an antizymotic—especially useful in the management of catarrhal conditions of the mucous membrane, adapted to internal use, and to make and maintain surgically clean—aseptic—all parts of the human body, whether by spray, injection, irrigation, atomization, inhalation, or simple local application. : : ; : : : : : : : :

For diseases of the uric acid diathesis:

LAMBERT'S LITHIATED HYDRANGEA

A remedy of acknowledged value in the treatment of all diseases of the urinary system and of especial utility in the train of evil effects arising from a uric acid diathesis. A pamphlet of "Clippings" of editorials on this subject may be had by addressing:

Lambert Pharmacal Co., St. Louis, U. S. A.

Be sure of genuine Listerine by purchasing an original package.

We cannot too strongly impress upon the profession the importance of prescribing Scott's Emulsion at this time. Whenever cod liver oil is indicated, Scott's Emulsion should be recommended as against any other preparation of cod liver oil. The great scarcity of the pure oil itself and the consequent adulteration and mixture has filled the market with an endless number of worthless preparations. Scott's Emulsion, however, remains absolutely unchanged and its quality and purity are the same and will continue the same as for the past thirty years. Scott's Emulsion is the best because it is safe, reliable and effective.

SCOTT & BOWNE, Chemists, Toronto, Ont.
