#### Chicago Gossip.

Marshall, Spader & Co. wired J. G. Beaty, King Edward Hotel, at the close of the market:

Wheat—Despite the dulness, wheat has ruled relatively strong. All months showing a moderate advance. Receipts northwest have been less than expected. Foreign news quite bullish. Argentine shipments proving exceedingly small. Russian famine area reported increasing and Antwerp higher up equal to 1¼c to 1⅞c. The northwest was the best seller and there was more or less selling by local crowd, who bought early; offerings, however, were well absorbed. As some reaction appears in order after our recent gradual decline, advise taking profits, but with a view of replacing your lines on any fair setback.

Ennis & Stoppani wired to J. L. Mitchell, McKinnon Building:

Wheat—Sentiment in wheat has been quite bullish all day, but the character of the news would indicate that it was prepared for a purpose. The report that 5,000,000 bushels had been sold by Duluth exporters the past two days was very freely distributed and many of the local traders placed confidence in the same. It developed later, however, that Northwestern houses were quietly disposing of wheat, purchased the past few days and careful investigation revealed the fact that no wheat had been sold for export from the point mentioned above this week. The amount indicated probably total sales of the Durum variety on the crop. Foreign markets were generally some higher in response to our firmness of yesterday, but so far as the real situation is concerned no change was in evidence. The position of the market is not a strong one and we believe that this advance is temporary, created to serve the purpose of certain interests and that prices will react to below 70c.

Corn and Oats—Coarse grains opened firm, but were subjected to considerable realizing on the part of recent buyers, who were desirous of securing profits. This fact brought about some recession, but at no time could the undertone be called other than steady to firm. The failure of frost to materialize as anticipated exerted some influence on corn.

Provisions were firm, with sentiment in favor of long side.

Melady & Co. had the following at the close of the market:

Wheat—Cables strong. Argentine shipments smaller than anticipated, receipts below the estimates and firm outside markets all had the effect of causing strength in the Chicago market. The pressure seems off the market, and altho the cable demand is still poor, we think that present low prices discount any unfavorable features that exist. We are favorable to the long side of wheat and recommend purchases of December wheat on all the weak spots.

Winnipeg—Strong, but not on any legitimate export business. We cannot advise purchases of Manitoba wheats until we see a good export demand, and meantime would sell it on hard spots.

Corn—Market dull, but steady. There is no feature to this trade. We are favorable to the purchase of corn on the recessions.

Oats—Opened strong, but on estimates of liberal receipts to-morrow, and profit taking by those who bought some days ago caused a slight setback. Buy these oats on the weak spots.

#### New York Dairy Market.

New York, Sept. 14.—Butter—Steady. Receipts, 6832; street, price extra creamery, 25c to 25¼c; official prices, creamery, common to extra, 19c to 24½c; state dairy, common to fancy, 17c to 24c; renovated, common to extra, 15½c to 22c; western factory, common to firsts, 15½c to 19c; western imitation, creamery, firsts, 19c to 20c.

## B. C. PACKERS DECLARES ANOTHER DIVIDEND.

World Office, Friday, Sept. 14.

Another dividend of 7 per cent. was announced on British Columbia Packers' preferred stock to-day. The decision of the directors came as a surprise, owing to the general belief that the salmon industry had not had a prosperous season. This company paid one of the back dividends last May, and is still owing two on the cumulative preferred shares. One of the directors of the company, spoken to to-day, stated that the company was in excellent financial condition, having about $500,000 of working capital. "The catch during the present season was not large," he stated, in answer to a query, but it was sufficiently good to permit of the dividend on the preferred stock, and leave a favorable balance." Quotations for the stock advanced about four points on the news, and buying of three hundred shares was reported from Montreal. The pack this season was only about 140,000 cases, while the average previous lean years produced 200,000 cases. From this it is inferred that the dividend for the future should be ensured under almost any circumstances. Business in regular listed issues continues dull, but curb securities are reported more active. Among the specialties to-day were Nipissing mines, which advanced three points to 12 1-2; Canadian Oil, for which 90 was bid, against 87 Thursday, and Tri-City preferred, which sold at 96, a rise of one-half a point.

## CONDITIONS OF TRADE CONTINUING FAVORABLE

### What the Mercantile Agencies Find to Report in State of Country's Affairs.

New York, Sept. 14.—Bradstreet's to-morrow will say: "Trade, crop and industrial reports are still almost uniformly favorable. An immense business is being done in the west and Northwest, the southern jobbing trade shows expansion and inability to get adequate supplies of many lines of goods is the main subject of complaint at eastern markets. September, like August, appears to be scoring heavy gains over the corresponding month a year ago. Official crop reports confirm previous public and private advices of very large, if not record, yields, but price and traffic conditions are a bar to free movement.

"Prices of staples show great strength, all things considered, and are in fact at the highest level yet touched. Railway earnings are heavy, those for August gaining 13 per cent.—a new high record for that month. Warm weather is a bar to activity in retail trade.

"Business failures for the week number 164, against 121 last week and 188 in the like week of 1905, 167 in 1904, 170 in 1903 and 152 in 1902.

"The Canadian wheat crop, which is of fine quality, has begun to move earlier than usual. Wholesale trade is good for the season, millinery, hardware, building material and heavy dry goods noting more activity. Collections are rather irregular, but retailers expect good trade and more prompt collections very shortly. Business is relatively most active in the newer provinces. A good domestic demand for dairy products is noted. The trade in cattle is large and profitable. A heavy movement of grain and flour is expected to Asia. Prices very generally are strong. Failures for the week number 17, as against 14 last week and 32 in this week a year ago."

R. G. Dun & Co.'s weekly review of trade to-morrow will say:

"The volume of trade continues beyond precedent for the period, and there are no important labor struggles to impede progress. Autumn distribution is very heavy, traders as a rule preparing for needs far into the future, while mercantile collections are quite as prompt as could be expected in view of the tight money market. There is some uncertainty in primary markets for cotton goods owing to the expectation of lower prices in response to cheaper raw material, but as yet no concessions are offered. Demand for woolen fabrics is also somewhat irregular. Other leading industries report great activity and strength. Prices of commodities rose during August in the aggregate, dairy and garden products supplying most of the advance. Compared with the position a year ago, the advance is four per cent. Railway earnings for the first week of September exceeded the figures of 1905 by 7.9 per cent. Foreign commerce for the last week at this port showed a loss of $158,646 in exports, while imports increased $3,549,311, as compared with the same week last year.

"Failures this week numbered 174 in the United States, as against 194 last year; and 26 in Canada, compared with 29 a year ago."

#### LOCAL FRUIT MARKET.

Friday's market was a heavy one and at close considerable stock was still in the hands of the commission men. What served in a measure to complicate the situation and render the space somewhat limited was the fact that large quantities of the peaches were shipped in upright baskets, which admitted of no economy in space. This is said to be due to the fact of a famine in the ordinary peach baskets, caused by the closing down of the Williams basket factory at Thorold. Last year the firm turned out 800,000 baskets and the loss is likely to be somewhat serious. Their place is being supplied by American baskets, which are required to pay a duty. The general opinion of the Toronto commission men is that this type of baskets will never become popular. The market yesterday cannot be said to have shown any particular change in any respect; if anything peaches were a trifle firmer.

#### Yonge Street Property Deal.

Negotiations have just been completed by Mr. N. B. McKibbin, real estate broker, 34 Victoria-street, in conjunction with Mr. George A. Case of East King-street, for the lease for a term of years of 119-121 Yonge-street to Mr. Wm. Karrys, who intends to open a combined cigar store and shoe shine parlor at this address, as soon as possession can be had. The rental is in the neighborhood of $6500 a year, which is one of the best figures yet obtained for property in the neighborhood. This is another indication that business is prosperous and going ahead in this part of Yonge-street.

## WAS EDUCATED IN CANADA.

### "Florodora" Beauty, Deserted by Husband, Has Local Connections.

Chicago, Sept. 14.—Francis A. Cuddihy, son of a reputed wealthy Boston family, is held in the criminal court on a charge of wife abandonment. His bride of little more than a year makes the complaint. Prior to her marriage she was Lillian Hallihan, a member of the famous Florodora Sextet.

Miss Hallihan is a daughter of a New York contractor, and was educated in a convent in Canada, which was under the jurisdiction of her grand-uncle, Archbishop Lynch of Ontario. She left the convent to go on the stage, where her beauty won her a place in the famous sextet.

Cuddihy saw her on the stage in Boston and fell madly in love with her. He followed her to New York, won her consent, and the young couple appeared in a driving rain at the city hall and besought the janitor to get an alderman to officiate. No alderman was in the building, but Alderman Isaac Marks was located in a Park-row building, and thither the young couple hastened and were wed.

Just a week later, Cuddihy, who was president of the J. J. Cuddihy Stone Company of Boston, filed a petition in bankruptcy.
