DAMAGED EMPRESS SAILS ON TUESDAY

C. P. R. Officials State Britain will Carry Full Cargo — Is Perfectly Seaworthy After Temporary Repairs.

Montreal, August 3.—Officials of the local offices of the C. P. R. stated today that the Empress of Britain will sail on Tuesday next for Liverpool. At that port she will discharge her cargo, and then go into dry dock for permanent repairs. Work on the temporary repairs at Quebec has proceeded rapidly, and so successful have they been that it has been found that the Empress will be able to make the voyage with her full 2,500 tons of cargo.

The temporary repairing work has been done by the George C. Davies Company, of Levis. Rafts were floated around the bow of the vessel, and the tons of steel plates of the Helvetia were removed. The twenty-two foot hole in the prow was then filled with timber and cement. The Empress on her voyage will be perfectly seaworthy, but as an additional precaution will proceed under very little steam.

She will probably be passed in mid-ocean by her sister ship, the Empress of Ireland which sails on Friday with a large number of passengers.

OBITUARY.

Mrs. Margaret M. Barton.

The death occurred in Montreal on Saturday of Mrs. Margaret M. Barton, wife of Melbourne Barton, formerly of this city. Mrs. Barton was 33 years of age and is survived by her husband and three children. She was the daughter of Mr. and Mrs. Samuel Orr, of St. Andrew's street and besides her parents leaves a brother and two sisters. Her brother is John Orr, of No. 1 Engine Company, and the sisters are Mrs. F. W. Emms, of Fredericton and Miss Jessie Orr, of this city. The deceased was a very popular young woman and leaves many friends here who will extend their sympathy to her husband and relatives in their sad bereavement. The body will be brought to this city for burial, arriving today at noon.

Mrs. Catherine McCaffrey.

A well known old resident of this city died in Malden, Mass., on Friday evening in the person of Mrs. Catherine McCaffrey, widow of the late John McCaffrey, formerly of St. John. Mrs. McCaffrey had lived many years in this city but went to Malden about six years ago to make her home with her daughter, Mrs. James E. Kelly where she died. She had been ailing for some time, but up to a few weeks ago it was not thought that her illness would result fatally. Besides her daughter in Malden, she is survived by one brother and two sisters, all in St. John. The brother is Henry Gallagher and the sisters, Miss M. A. Gallagher and Mrs. M. Ryan. The body will be brought to St. John for burial and the funeral will be from Mr. Gallagher's residence, 50 Waterloo street.

Miss Edna Cunningham.

The death occurred on Sunday morning at eight thirty of Edna Augusta Cunningham in the 17th year of her age. The deceased was a daughter of Henry B. Cunningham, of 39 Hilyard street and besides her parents is survived by one sister, Jessie, and one brother, Glen, both at home. The late Miss Cunningham was a graduate of the St. John High School and a prominent member of the Portland Street Methodist church where she took a great interest in Sunday school work. Of a bright, sunny disposition, she greatly endeared herself to her many friends all of whom sympathize with the bereaved family. The late Miss Cunningham had been sick but a short time and her death comes as a surprise to her many friends.

Bad Complexions Are Now Easily Discarded
(From The Beauty Seeker.)
Every woman has it in her own hands to possess a beautiful and youthful complexion. No matter how soiled, faded or coarse the cuticle, ordinary mercolized wax will actually remove it, and Nature will substitute a skin as soft, clear and lovely as a child's. The action of the wax is not drastic, but gentle and agreeable. Minute particles of scarf skin come off day by day, yet no evidence of the treatment is discernible, other than the gradual complexional improvement. One ounce of mercolized wax procurable at any drugstore, suffices for most cases. It is put on at bedtime like cold cream and taken off in the morning with warm water. It is a certain method of discarding tan, freckles, sun spots, liver spots, moth patches, blackheads and pimples.
Wrinkles can be treated with benefit by bathing the face in a lotion prepared by dissolving 1 ounce powdered saxolite in ½ pint witch hazel. Instantaneous results are secured.

MAY ROBSON AT THE OPERA HUUSE

Famous Comedienne Opens an Engagement Tonight in "A Night Out."

MAY ROBSON.

May Robson is an actress of exceptional ability and in her new play, A Night Out, she has every opportunity to develop that fund of clear-cut humor and that world of brilliant and thrilling pathos that has made her famous on both sides of the Atlantic. She will impersonate a young old woman, free from affectation, possessing a keen sense of humor, and being fond of excitement. She persuades her two grandsons whom she adores, into all sorts of extravagance, and a visit to a well known Broadway restaurant is the climax of her adventure.

Miss Robson's appearance here is an event which will not be surpassed in importance by any theatrical offering this season and her international reputation and ability warrants the most earnest support from those who seek the best in the play and player.

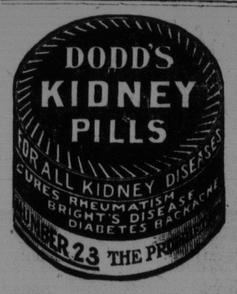
Farm Laborers.

Thousands upon thousands of farm laborers will be wanted in Western Canada this year, in fact more helpers than ever before. The crops are larger, and consequently the demand for labor will be greater. The annual farm laborers' excursions will leave Aug. 12th and 28th. See advertisement.



REGULATIONS OF MEDICAL PRACTICE MADE UNIFORM NOW

Doctors Passing Examination of Central Board May Register in Any Province in Canada.

A measure which has been long sought by the majority of the medical practitioners of the Dominion now becomes effective by the acceptance of the Canada Medical Amendment Act by all the provinces of Canada. The change in the Medical Act was introduced in the House in 1911 by Dr. T. G. Roddick of Montreal. It was favorably received by the medical men of the majority of the provinces of Canada, but met with strong opposition from the West. It passed the House, however, but has only become effective recently, inmuch as it could not come in force until its provisions were accepted by the enactment of legislation approving it by all the provinces.

The chief effect of the measure will be to enable practitioners of any province who pass the examinations of a central board which is to be created, to become registered in any other province of Canada. Thus a medical practitioner from New Brunswick who passes the central board examinations is ipse facto enabled to become registered in Nova Scotia or any other province without being required to pass the registration examinations of that province as was required before the present legislation went into force.

Will Pass Central Board.

For those who have completed their studies and are not yet registered it will be now possible to take the examinations of the central board instead of the provincial examinations for registration as formerly, thus enabling them to be registered in any province of Canada. Thus a New Brunswicker is not obliged in future to pass the provincial registraton examinations but may take those of the central board. These examnations will be held at central places throughout the Dominion. The provincial board, however, will still continue in existence for those who desire to pass the provincial registration examinations as formerly.

The council which is to be created according to the act and which is to be known as the Medical Council of Canada will be composed of three members appointed by the Governor-in-Council, each from a different province, two representatives of each province, one from each university or medical school having an arrangement with a university for the conferring of degrees in medicine and thre representatives of the homeopathic practitioners. The term of office is four years.

Owing to the fact that the provinces of Saskatchewan, Alberta and British Columbia cannot have university representation on the council an amendment was made by which two of the three members to be appointed by the governor in council are to represent these provinces.

As regards New Brunswick, the representatives from the province have already been named, Dr. W. W. White of St. John, and Dr. A. B. Atherton of Fredericton. This province, however, unlike Nova Scotia has no university representation inasmuch as medicine is not taught in any of the colleges here nor in the University of New Brunswick. Dalhousie in Halifax includes medicine in its courses and therefore is entitled to the university representation. The first meeting of the council will probably be held in the fall when the preliminary arrangements in connection with their work will be arranged.

FOUR ALARMS SUNDAY, ONE ON SATURDAY

Firemen Extinguished Three Slight Fires and One More Serious Blaze Yesterday—Responded to False Alarm.

The fire department had rather a busy time of it yesterday morning within a couple of hours. About 10.30 o'clock an alarm was sent in from box 122 for a slight fire caused by some gasoline burning in Mr. Patterson's garage in Indiantown.

About five minutes after the above alarm was sent in the department was called out by an alarm from box 45 for a slight blaze caused by some ashes in the furnace room of the Wm. Lewis & Sons' Bolt and Nut Works on Britain street. The damage was slight.

The apparatus had hardly arrived back at the stations when a small boy in Peter Dolan's house on Carleton street accidentally knocked over a lamp in the kitchen. The lamp exploded and caused quite a lot of smoke, but no other damage. Some person sent in an alarm from box 58 and when the firemen arrived the fire had been extinguished.

Shortly after noon fire was discovered about the chimney in the Ring house on Queen street, which is occupied by Harry McBeath. Before the fire could be extinguished a large section of the wall in the parlor had to be torn away and considerable damage was done. A still alarm had been sent in for this fire and No. 1 chemical engine responded with No. 2 hose. The firemen had to work for nearly an hour before the fire was located and extinguished.

Saturday night about nine o'clock a false alarm was sent in from box 36 on St. James street, near the City line in the West End.

PLEASANT EVENING AT SANDY POINT BEACH

The residents of the new summer colony at Sandy Point Beach enjoyed a very pleasant evening at H. Farmer's bungalow on Saturday night. A large crowd from the city came up in motor boats and greatly enjoyed the dancing and singing at the new resort. Frank Hamm entertained the company by his very clever impersonation of "Reuben Just Arrived in Town." When the party broke up at midnight everyone present voted the initial venture a very pleasant affair, and the residents intend to continue the series regularly until the season is over. Frank Best proved a very efficient floor master. Sandy Point is rapidly becoming a thriving summer resort, and its short distance from the city is bound to make it one of the most popular spots on the Kennebeccasis.

ANOTHER MODERN APARTMENT HOUSE

Montreal Real Estate Men Acquire Ried's Castle for Purpose—Building will Contain Twenty-four Apartments.

W. Ernest Bolton and I. M. Irving, real estate men from Montreal, who have purchased the Ried's castle on Mount Pleasant, were in the city on Saturday in connection with the remodelling of the property, and converting Ried's castle into an apartment house.

The plans which they have under consideration call for the entire remodelling of the present building and its conversion into what will be the largest and most up-to-date building of its kind St. John has yet boasted. The building was examined on Saturday by G. Mitchell, architect for the Norton Griffiths Company in Montreal, and other experts who accompanied Mr. Bolton to the city for the purpose. They found the interior of the building in excellent repair.

The exterior of the building will be remodelled so as to break the present monotony which the front presents. This will be effected by introducing colonial architecture into the scheme making the front more attractive. When completed the building will provide twenty-four apartments, thoroughly modern in design, and the whole building will be heated by a new and up-to-date heating system, one central heating plant being used for the entire building. The apartments will probably consist of six rooms. The plans and specifications for the work will be made immediately, and the building will be ready for occupancy next spring.

In addition to fitting up the building and beautifying the grounds, the remainder of the property will be laid out in building lots for residence and offered for sale. A landscape architect accompanied the party in their inspection of the property on Saturday and plans for the laying out of the lots will also be drawn shortly.
