

his customers, who make purchases of twenty cents or upward, which entitle them to the services of a physician. A tea merchant in the English metropolis supplies medical service to the purchaser of every pound of tea. Is medicine a profession or a trade? or is it merely a "premium" designed to enliven trade?—*Physician and Surgeon.*

ARRANGEMENTS have been completed with the Canadian Medical Practice Exchange Office to have a full page detail of its offerings and opportunities appear each month among our advertisements. (See p. xiii. this issue.) It is a matter of congratulation that this necessary and important department of medical affairs is conducted by one possessing such recognized business ability, Dr. W. E. Hamill. We recommend our readers to avail themselves of his assistance when occasion requires.

BAILY & FAIRCHILD Co. of New York take pleasure in announcing to the medical profession the establishment of "The Doctor's Story Series," to be issued quarterly at \$2.00 a year, 50 cents a number. Each number will consist of a complete work of fiction by medical authors. Only such works as are of established value will be reproduced in this popular form. King's "Stories of a Country Doctor" will be issued January, 1896, to be followed in March by Dr. Phillips' novel "Miskel," and later by a new novel now in preparation by the same author.

FASHION IN MEDICINE.—There has been a fashion in antiseptics. First, carbolic acid held sway; it was dethroned by iodoform, and it was displaced by corrosive sublimate, which is now the rage. Fatal results in cases—death by poisoning—was the cause of the disuse of carbolic acid and iodoform, and it will not be long before corrosive sublimate is abandoned. Listerine is a powerful antiseptic and non-poisonous, and can be used *ad libitum* either externally or internally without fear of dangerous results. It is indicated in all cases where an antiseptic is required. As a dressing for wounds and washing out the ear in purulent inflammation of that organ specialists declare it to be valuable. In irrigating sinuses and washing out cavities and abscesses, and in vaginal and urethral injections it has been found useful. In consumption, cancer, diphtheria, scarlet fever and infectious diseases it has been found remedial. It has been tried and commended by the principal surgeons and physicians of the United States.
