GOSSIP

IMPERIAL STOCK FARM

This grand farm comprises nearly 200 acres and is one of the best farms in Brant County, Ont. It lies about three miles north west of Harley station on the Brantford and Tillsonburg branch of the G. T. R. On this farm is to be seen one of the oldest established herds of Holsteins in Canada. When this breed was not as popular as it is to-day, W. H. Simons, the genial proprietor of this herd, saw a great future for it. He steadily built up a herd on producing lines until he got together one of the best herds in Canada. He is ever alive to the importance of having good sires, at the head of the herd. The present sire, Tidy Aberkirk Mercena Posh (4391), C.H.B., the sire of the bulls that are offered in this issue, is not only a grand individual, fit for any showing, but he is built upon dairy lines from the ground up. His dam, Tidy Pauline Dekol, produced 25.85 lbs of butter in 7 days; grand dam Tidy Aberkirk, 27.23 lbs; while two sisters, Tidy Aberkirk Dekol, 28.34 lbs; and Tidy Pauline Dekol 2nd, produced 23 lbs at 5 years old. His sire's dam, Mercena 3rd, produced 27.65 lbs of butter in 7 days, and 113 lbs in 30 days. G. D. Altje Posh 4th, holds the world's champion two days' public record, 8.6 lbs of butter, and the dam of the world's champion, 2 year old Alta Posh, 27 lbs in 7 days. The list includes the seven nearest relatives, which average 26.19 lbs of butter each. Young bulls by such a richly bred sire, and from dams that are mostly in the official record, should be eagerly sought after. Most of the Toronto and London prize winners shown by Mr. Simmons so successfully, are still in the herd, some of which are dams of bulls now offered. Anyone wanting a richly bred bull at a reasonable price, should take advantage of this opportunity, as the maxim that "Like begets like," is as true to-day as ever it was.

AMATITE is a self-reliant roofing. You don't have to go out and coat it every few months or patch it up to stop leaks. After it is laid you can go off and forget about it and it will stay at its post and do its duty year after year. A booklet about it and a sample may be had for the asking from the Paterson Manufacturing Co., L'td, Toronto, Montreal, Winnipeg, St. John, N.B., Halifax, N.S.

OF VALUE TO HORSEMEN.—Do you turn your horse out for the winter? If so, we want to call your attention to a very important matter. Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gombault's Caustic Balsam applied as per directions, just as you are turning the horse out, will be of great benefit; and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care or attention, but does its work well and at a time when the horse is having a rest. Of course it can be used with equal success while horses are in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder.
