Truth for the Million.
A great number of parties, (including the medical physicians of the Province,) who doubted as to the efficacy of these waters, whilst placed them high in the estimation of the public, induced some other proprietors of several springs, to try to put their waters into footing with the Plantagenet. Nothing is more absurd than this. These other waters have been known to the public in Canada for fifty years, and in that time have they done? Have they anything to show for the patronage they have received from the public? How have they stood since the Plantagenet came into the field? It is now only three years since the Plantagenet Waters were introduced to the Public, and in that short space of time has become of other Springs, which have been before them? Can any amount of puffing make the public believe that they deserve to be mentioned in the same breath with the Plantagenet Spring? It may be safely said that no one drop of any other Water. Their inferiority is so great, and they are comparatively so worthless, that they have declared that they would not pay twenty-five pounds, (which is the price for Plantagenet Water, than for the best of them. Yet all these Springs have a great advantage in being over the Plantagenet, in as much as they are near Montreal, and are accessible; (if they wish seeking,) in all classes without distinction.
The great cause of this preference is the distinctive character of the Plantagenet Water, and more especially its solidity of body, and the glutinous quality it possesses, which distinguishes it in a remarkable degree from all other waters. It is superior pour and thin in comparison with it, and is now in becoming general among the most eminent physicians of the Province.
Of the numerous testimonies in favor of the Plantagenet Water, and more particularly its efficacy in the cure of Gravel, Dropsy, Stone, Gout, Rheumatism, Dyspepsia, Liver Complaint, Nervous Debility, Diseases of the Urinary Organs, Diseases of the Skin, Scurvy, Scrofula, Cancer, Eruptions, Pimples, Blotches, Ringworm, Tetter, Salt Rheum, Scald Head, Sore Eyes, Sore Throat, Mercurial Disease, Dropsy, Female Complaints
