EVEN THE CITY COUNCIL.

Rev. Mr. Milligan's Glowing Views—The Ministers in Session.

The Ministerial Association met yesterday morning in its usual force, Rev. James Grant in the chair, and Rev. William Frizzell acting as secretary. Little business was done. Rev. Mr. Chambers, a missionary in Asia Minor, and others were admitted as corresponding members. Rev. Principal Sheraton of Wycliffe College read an able paper on "Progress in Theology." He showed the tendencies towards a rationalistic school, viewing religion of all kinds as an evolution from the original bestiality of man, and involving a pantheistic conception, and towards a sacerdotal school, which is really the rationalistic view adapted to purposes of controversy, and a favorite with Roman Catholic theologians. In it the Bible is more or less superseded, and the church takes the place of Christ as the centre of all religion and worship. Both these Principal Sheraton criticised, advancing that they lose sight of the distinction between the objective revelation contained in the scriptures and the subjective appreciation of them by man. Men have worshipped long before they have been able to define exactly what it was they worshipped, and the Roman Catholic Church here falls into error in accepting the testimony and opinions of the Fathers as absolute, thus ignoring the fact that men's understanding develops as the ages go by.

In the discussion Rev. G. M. Milligan took occasion to speak of the theocratic system of government as the only true one, and said that it was what would come. "Even the City Council will be so governed!" cried Mr. Milligan ecstatically, and the applause showed how deeply the reverend gentlemen felt upon the subject.

THE SUPERINTENDENT STAYS.

Ald. Bailey's Motion Defeated—Work in the Waterworks Committee.

The Waterworks Committee met yesterday. Ald. Bailey's motion that the services of Superintendent Hamilton be dispensed with was struck out. It was decided to lay a water main in front of the exhibition stables. The superintendent suggested that water be supplied to builders free, but the committee decided to leave the rate as it was at so much per barrel.

Fred Doty's tender for the plant at the St. Alban's pumping station was accepted at $2720.

FOR HINDOO WIDOWS.

The Ramabai Circle Holds Its Annual Meeting—A Good Showing.

The annual meeting of the Toronto Ramabai Circle was held yesterday, and the library of the Y.M.C.A. was crowded with ladies. Mr. W. Hamilton Cassells was in the chair and Revs. D. J. Macdonnell, J. V. Smith and Elmore Harris and Mr. W. H. Howland were present. The treasurer's statement showed a cash balance of $31.83 ready for application to the work. The secretary's report glanced at Ramabai's work in connection with her school for girls, especially child-widows in Poona, which now numbers 43, and at the recent acquisition of a building of their own. This will cost in all some $14,000. Turning to the home organization the secretary stated that there are 59 Ramabai circles on this continent, three being in Canada; these contribute $4600 a year, and private beneficence brings the total up to some $6000. Satisfaction was expressed with the work done and progress made.

Rev. D. J. Macdonnell moved the adoption of the secretary's report in a neat speech and Mr. W. H. Howland seconded the motion. The election of the following ladies to office was moved and seconded by Revs. J. V. Smith and Elmore Harris: President, Mrs. J. L. Brodie; secretary, Miss M. E. Carty; treasurer, Mrs. Hart.

After a hymn sung by Miss Caven and a few words from the chairman the meeting adjourned.

Coroners' Ways.

Editor World: From time to time there have appeared in the columns of The World and other daily papers strictures on the peculiar manner in which coroners discharge the duties of their offices, and the said articles point out very properly the useless and wasteful expenditure of public money to carry on these investigations, which are entirely unnecessary in many cases; and it would seem that some coroners think themselves above the act of Parliament governing the duties of their office. The coroner's act says distinctly that unless the coroner has just reason to suspect foul play he is not called on to hold an inquest. But it is not very difficult to find a probable reason why coroners are so anxious to hold inquests. It is simply because they generally are doctors themselves and want to give a couple of M.D.'s a chance to hold an autopsy and play baseball with the remains of some poor unfortunate creature, whose only fault was he died suddenly, or may be a house may have fallen on him. If a house would only fall on some of these irreprensible coroners, it would, indeed, be a blessing, for it would have a tendency to teach them that while it is necessary to have coroners, it is not at all necessary for coroners to make themselves a nuisance to the community at large, or that they have not any right to relegate to themselves functions foreign to their office. The absurdity of the thing can best be illustrated by going back to the time when Birchall was hanged. On that occasion, if I am properly informed, something like a dozen ambitious followers of Esculapius were standing at attention, with scalpel in hand, waiting for their prey. Hanging may not be a natural death, but it is quite natural for a man to die by hanging, or up a house falling on him, and the breach of the proprieties by making sausage meat of the remains of the poor victim will only prove the idiocy of those who make the exaction. W. MEPHAM.

A Fuel Saving Device.

An improvement on the ordinary method of fitting up steam boilers has just been patented by Mr. William Adams, a Toronto inventor. The patent is in the shape of a check and heat distributor, and so distributes the heat that a saving in fuel of 25 and 30 per cent. is effected. Mr. Adams showed The World an unsolicited testimonial from a prominent firm stating that the application of his system to their boiler had resulted in a saving of over 50 per cent. in fuel.

The improvement can be applied to any boiler. Mr. Adams has secured the contracts for putting in a large number of boilers in the city. Numerous inquiries are being received at Mr. Adams' office, 119 Bleecker-street, and the new system will doubtless be in great demand.

James Cullen, Pool's Island, N.F., writes: "I have been watching the progress of Dr. Thomas' Eclectric Oil since its introduction to this place, and with much pleasure state that my anticipations of its success have been fully realized. Having cured me of bronchitis and soreness of the chest, not a few of my rheumatic neighbors (in particular) pronounce it to be a medicine of its kind that has ever been placed before the public. Your medicine does not require any longer a sponsor, but if you wish me to act as such, I shall be only too happy to have my name connected with your prosperous child."

Lots of Insurance Done.

The Finance Committee of the Public School Board met yesterday afternoon and decided that the schools whose policies had expired should be reinsured in the following companies: Niagara-street School in the Northern for $4000, Manning-avenue in the Manchester Union for $6000, Dewson-street in the Royal for $4800, Gladstone-avenue for $1700 and Perth-avenue for $5000 in the Liverpool and London, the Jesse Ketchum or $5000 in the London Assurance. The other schools whose policies were due were reinsured. The committee also decided to grant $500 for concerts on Flower Day and Dominion Day.

Mr. W. H. McAlister, 206 Front-street, San Francisco, Cal., U.S.A., writes: "I used St. Jacobs Oil for rheumatism in the muscles of my arm and shoulder. It gave immediate and permanent relief. A member of my family used it for the same ailment with good results." The best.

The Dry Goods Excursion.

The committee in charge of the excursion met last night to make final arrangements. The subcommittee who visited Hamilton on Saturday reported a very long list of attractions in the sister city on the Queen's Birthday, the day of the excursion, amongst them being the St. George's Society annual fete and picnic, an event always looked forward to.

For the convenience of the West End citizens the Grand Trunk officials have consented for the special train to call at Queen's Wharf and Parkdale both going and returning.

Parmelee's Vegetable Pills contain Mandrake and Dandelion; they cure Liver and Kidney Complaints with unerring certainty. They also contain Roots and Herbs which have specific virtues truly wonderful in their action on the stomach and bowels. Mr. E. A. Cairncross, Shakespeare, writes: "I consider Parmelee's Pills an excellent remedy for Biliousness and Derangement of the Liver, having used them myself for some time."

New Specifications.

The Ashbridge's Bay Committee sat for a short time yesterday. The only business done was to instruct the City Solicitor and Acting City Engineer, together with the solicitor of the syndicate, to draw up new specifications for reclaiming the marsh.

Gossip From Chicago.

Kennett, Hopkins & Co. to R. Cochran: The market opened weak on lower cables and fine weather. It held steady till visible was posted. This showing a smaller decrease than expected and late cables being easier with predictions of a continuance of the fine weather a fresh drive was made near the close. Around 80½c a good demand was encountered. It is often said that there is little demand here for wheat, and the shipments would seem to bear out this statement, but while 8c premium over July for cash wheat it is far from being a drug. India shipments for the week are less than half what they were two weeks ago, and they are light from other quarters of the globe. It is quite certain that America will have to supply the great bulk of the foreign demand. The outlook for the next crop is not encouraging, and we can see little on which to sell wheat. Another month ought to show a considerable decrease. Corn and oats have been weaker on better weather, but first prices were the lowest of the day. Stocks are light. Receipts will be light. There is a good consumptive and shipping demand and crop prospects are far from good. The long side of the market for the present seems safest. Provisions rather easier in sympathy with other markets, but trade light and fluctuations small.

Walker & Co. to John J. Dixon & Co.: Wheat was dull, weak and lower, opened ⅜c from Saturday's close on weak cables and fine weather throughout the wheat country. Market was steady with no trade to speak of until visible was posted; the crowd had expected a big decrease, but only showed little over a million bushels, and they turned in and sold. Market dragging and easy until got to 80⅝c, when there was a stepped in and took all they could and held the market. If it had not been for his support the prices would have gone much lower; towards the close it had little reaction of ⅝c, holding steady. With fine weather for few days, receipts will increase and have weakening effect on prices. Corn—The weather was too much for the bulls and everybody who had corn long tried to find a market for it at opening; the result was 1½c break for Saturday's closing price. Receipts moderate; do not look for much decline just now. The receipts of hogs were away over estimates. The prices at the stock yards were 5c to 10c lower; this with weakness in grain caused a weak opening for provisions with the large offerings for both long and short account. There was a fairly good demand for pork and lard by the room traders and Cudahy, Armour & Raymond were also buying. If with all the bear influence and arguments the trade held today, prices could not be demoralized, we think it shows a strong situation and would work the long side.

Gulf From Gotham.

Henry Allen & Co. to John J. Dixon & Co.: The market has had a slight rally to-day. Conspicuous stocks have been under attack and some have yielded, but for most part the general list has been strong. The Northern Pacific snarl is still untangled. Insiders are still on the bear side to-day. The preferred stock sold at the lowest price it has touched in years. There has been a rally from the bottom, but this was caused largely by the covering of short contracts. There is no important support for the stock so far shown. One fact noticeable, however, is that commission houses are beginning to execute orders on the decreased price. Evidently outsiders are watching the market, and this is rather cheerful sign. It will soon be plain that recent reports from the west greatly exaggerated the damages by flood, and already there are assurances from high western officials that no rate war is probable. If some new unfortunate circumstance does not interfere the stock market is entitled to a rally.
