Brookdale Stock Farm

OFFERS

Four very choice registered Holstein cows, to freshen before December 1st, all good, large, straight cows in good condition. Price, $250, at Phillipsville Sta., C.N.R. Also four fine large heifers, rising 3 years of age. First calves due in November and December, all in calf to a brother to May Echo Sylvia, for $200 each. Also 56 heifers from 10 to 24 months of age. Some bred, some not, for $150 each. And a very choice young bull Sir Lyons Netherland No. 36269, born October 20, 1917, sire, Sir Riverdale May Echo Lyons 29136, son of May Echo Verbel, dam of May Echo Sylvia, world's record milk cow, and dam of the $106,000 bull calf. The dam of this calf is Brookdale Korndyke Netherland No. 11746, a 19-lb. 3-year-old granddaughter of Pontiac Korndyke, the greatest producing sire in the world. He is marked just right, and will crate him and deliver any place in Ontario or Quebec for $250.00. Will send extended pedigree on request. Two other bull calves, born in April, 1918, by same sire for $200.00, from tested dams.

WM. C. STEVENS - - - Phillipsville, Ont.

20,000 LB. BREEDING

I am offering three daughters of Pontiac Korndyke Plus. He is sired by Inka Sylvia Beets Posch, the sire of May Echo Sylvia and his dam is Plus Pontiac Artis, 21.56 lbs. butter in 7 days, 20,811 lbs. milk and 1,044.46 lbs. butter for one year, the champion four-year-old of Canada for yearly work,—the only cow in Canada to produce over 20,000 lbs. milk in one year and average 4 per cent test.

Heifer No. 1.—Born Feb. 14th, 1917, bred July 9th, 1918. Dam gave 20,120 lbs. milk in 1 year.

Heifer No. 2.—Born Sept. 23rd, 1916, bred Feb. 13th, 1918. Dam gave 13,407 lbs. milk in one year as a 2-year-old and is a daughter of the 20,120 lbs. cow above.

Heifer No. 3.—Born Oct. 6th, 1916, bred Feb. 18th, 1918. Dam, Spink Lady DeKol, 18.86 lbs. butter in 7 days and 14,970 lbs. milk in 1 year as a 2-year-old.

Also others of equal breeding. Write or come and see them. Prices right.

W. LEMON - - - - Lynden, Ont.

His 2 Nearest Dams Average 38.82

His dam, sire's dam, grand sire's dam and great grand sire's dam, average 35.69 lbs. butter in seven days, and over 112 lbs. milk in one day, which is not equalled by any other bull in Canada.

His name is ORMSBY JANE BURKE. His services may be hired by YOU. Cows and heifers in calf to him for sale. If you need a HOLSTEIN BULL write us.

R. M. HOLTBY, R. R. No. 4, PORT PERRY, Ont.

Look Over This Fellow

He is the makings of a splendid sire—Sired by SIR RIVERDALE ECHO LYONS, whose four sisters average over 100 lbs. per day, including MAY ECHO SYLVIA, world's champion milk producer with 41 lbs. butter, and whose two sisters, dam, dam's sister and grand-dam have records of over 700 lbs. milk in 7 days. His sire was head of the big Alliston herd at Chesterville. His dam has a 26-lb. butter record with 511 lbs. milk in 7 days, and a 20 days' record of 2,314 lbs. milk and 96.33 lbs. butter. This fellow has breeding records and splendid type. Our price is $130—at 8 months old.

COUGHLIN BROS. - R. R. NO. 9 - PETERBORO', ONT.

FORSTERCREST FARM

offers Holstein Friesian bulls from six months to a year old; one over a year, a choice son of a granddaughter of LULU Keyes, 36.6 lbs. butter in 7 days. His dam won special for best Holstein, any age, at Jarvis fair, 1917. Where can you beat this for $135?

R. R. BROCK, - R. R. NO. 5, - SIMCOE, ONTARIO.

MARKET REVIEW AND FORECAST

TORONTO, Oct. 7.—The rainest September in 50 years interfered with both farm work and general business. Wholesale and retail business men report that the dull weather cut into the volume of their trade very considerably. Certainly it interfered with the marketing of grain and other farm products. It has also made the clover seed harvest, the getting in of potatoes and the filling of silos, unusually difficult. Clover plants were rather thin in stand, but the heads were well filled. Silo filling is now proceeding actively and prospects are away ahead of last year, both as to quantity and quality. With an improvement in the corn crop and plenty of straw available, fodder supplies are on the whole sufficient, even in spite of the shortage of hay. Fall plowing generally is about half through and a great number of tractors in Ontario have helped materially in getting this work turned over.

The price of Ontario wheat has been reset at $2.26 at Montreal. Corn is cheaper at Chicago. Coarse grains are in demand at firm prices. Hay has advanced $1 a ton. Eggs are up to 50 cents at country points. Cheese and butter have both advanced. The cattle market was again easy.

WHEAT.

Cancelling all its previous orders the Board of Grain Supervisors, on October 3rd, ordered that the price of No. 2 Quebec wheat should be $2.26 per bushel, basis in store, Montreal. To arrive at the price at shipping point, it is necessary to deduct one cent a bushel to cover cost of putting wheat in store, local freight charges, based on shortest through mileage to Montreal. Eastern millers may pay licensed buyers a maximum of one cent a bushel for wheat for them. Another order makes the price of Ontario No. 2 wheat $2.26 a bushel, with same regulations as regards the price at shipping point. This is a reduction of five cents a bushel from the price set in a recent order. No explanation is given for the change in price. The fixed prices on Western wheat are still as follows:—

Manitoba Wheat—In store, Fort William, nominal (not including 2½c tax); No. 1 northern, $2.24½; No. 2 northern, $2.21½; No. 3 northern, $2.17½; No. 4 wheat, $2.11½.

COARSE GRAINS.

There is a good enquiry for Ontario oats, but dull weather and the necessity of making good use of the bright weather has interfered with deliveries, which are not ample for the demand. Western oats, too, are quiet. Barley is a little stronger, with very little being offered at, at present prices, it is about as cheap feed as can be had on the farm. Corn prices have dropped very considerably since Bulgaria dropped out of the struggle and October corn is quoted as low at $1.31¾ at Chicago. Quotations:—Oats, C.W., No. 2, 84c; No. 3, 80¼c; extra No. 1 feed, 80½c; No. 1 feed, 78¾c; Ontario oats, No. 2, 76c to 78c; No. 3, 75c to 77c; barley, malting, $1.08 to $1.13. At Montreal, oats, C.W., No. 3, are quoted at 97½c. There is a good steady demand for all lines of grain with barley quoted at 1 20c for feed up to $1.10½ for better grades.

MILL FEEDS.

Mill feeds meet with a steady demand at firm prices. Bran, $36.40; shorts, $41.40. At Montreal bran is quoted $37.25; shorts, $43.25; moulie, $68; barley feed, $62 to $63.

HAY AND STRAW.

The hay market is decidedly stronger and at Montreal the government has advanced its price $1 per ton. Bradstreets' report a good enquiry for Canadian hay on American account, but scarcity of cars curtails this trade. On the market No. 1 hay is quoted $30 to $31; mixed, $18 to $19 and straw, $9 to $9.50. Montreal quotes No. 2 hay at $19.

POTATOES AND BEANS.

The potato market is stronger, due partially to the weather and partially to the strong demand of the United States market. Ontario potatoes on this market are quoted $2.25 to $2.50, wholesale to the trade.

Prime Canadian beans are quoted per bushel, $6.50 to $7.50; foreign hand picked, $6.75 to $7. The Detroit market quotes beans for immediate and prompt shipment, $9 per cwt.

COUNTRY HIDES.

Beef hides, green, 15c; part cured, 18c; cured, 19c to 20c; deacons or bob calf, $2 to $3; horsehides, country take-off, No. 1, $6.50 to $7; No. 2, $5 to $6; No. 1 sheepskins, $2.50 to $5. Horsehair, farmers' stock, 30c per lb.

EGGS AND POULTRY.

The Canadian markets generally continue very firm with a steady upward tendency. Consumption is reported good for the season. Egg circles are securing 50c to 52c in some cases and Toronto dealers report that they are paying 49c to 50c at country points for all, the eggs they can now secure. Storage eggs are coming on the market in larger quantities. In the Western provinces receipts are very light and storage is being drawn upon. It is now certain that the Allied Buying Commission will require all the available surplus of eggs. It is even suggested that if the Commission secures all of the eggs it wants, there will not be enough left for domestic use.

Receipts of dressed fowl have been heavy and the market is not at all steady.

	Live weight.	Dressed.
Hens, 4 lbs.	23c to 25c	26c to 00c
Hens, 4 and over..	26c to 28c	28c to 00c
Spring chickens ..	38c to 35c	35c to 00c
Roosters	16c to 18c	22c to 25c
Ducklings	20c to 00c	26c to 30c
Ducks	15c to 00c	00c to 00c
Turkeys	25c to 27c	30c to 00c

DAIRY PRODUCE.

Receipts of butter at Montreal for the week ending September 28, 1918, were 12,683 packages, an increase of 1,569 packages as compared with the previous week and an increase of 1,219 packages as compared with the same week last year. Receipts to date show an increase of 59,461 packages. The government has been very active in connection with the butter market in the past week. Its action in commandeering all of the October and a part of the November make, is merely a duplication, but not on quite so extensive a scale, of the action of the United States Food Administration when it commandeered a large percentage of all the butter in storage. The result of the Government's action is that storage supplies will have to be drawn on immediately to meet the domestic demand for creamery butter, and this in turn, will reduce the supplies available next winter, and give a very firm undertone to the market for the winter months. Dairy butter, which is not influenced by the recent order, seems to be due for a rise in price, and already Toronto wholesale dealers have advanced their prices at least a couple of cents. The Food Administration believes that their action should not materially increase the price of butter for domestic consumption, pointing out that the profits that packers may make on their stored butter is strictly limited by regulations of the Food Board. There is a danger here that, if prices are kept down, restraints on consumption, Food Board orders to the contrary, notwithstanding, may not be sufficient to preserve the supply for future use, and there will be a butter famine before spring.

The activity of the Canada Food Board was evidenced in another transaction recently when they seized and had a forced sale of 392,800 lbs. of creamery butter, which had been stored by the Dominion Fish and Fruit Company, Limited, of Quebec, which company, in spite of remonstrances from the Food Board, held a greater quantity of butter than was reasonably necessary to supply its own Canadian requirements. Creamery solids at Toronto are quoted from 45c to 46½c, and the same prices are being paid for prints. Dairy butter is quoted 38c to 40c. At Montreal, choicest creamery butter is quoted 48c to 48½c.

To date receipts of cheese at Montreal show a falling off of 44,878 boxes, as compared with the corresponding period of 1917, and for the week ending September 28, the decrease as compared with last year was 7,488 boxes. The action of the Dairy Produce Commission in increasing the price 2 cents a pound has been hailed with delight throughout the country and already has had its effect on country boards. The first board meeting following the increase was held at Peterboro, where the board was cleared for 24 9-16c. A firm market for the ensuing months is anticipated. Cheese has been moved out of the country more regularly this sum-

BONE SPAVIN

cured by Fleming's Spavin and Ringbone Paste, no matter how old the blemish. Full price refunded if it fails to cure either Bone Spavin, Ringbone or Sidebone. Fleming's Vest Pocket Veterinary Adviser sent free on request.
