LIVERPOOL MARKETS, APRIL 23.

ASHES.—Retained 50 Ashes early in the week were exceedingly dull of sale; but during the last day or two they have been much sought for, and prices, which in some instances had receded, have recovered 2s 6d for firsts, have since rallied to 35s @ 35s 6d, which is the present value; 200 @ 200 bbls have been sold. Monckton Pearl Ashes are dull at 47s, at which price some trifling sales have been effected.

GRAIN.—There has been more business doing in Wheat, without any change in prices, and the market continues very firm. Oats are scarce and rather dearer. 3500 barrels of Flour, in bond, have been sold at 22s @ barrel for Stoneground, 22s 6d @ 23s Dunlap (sweet,) and 19s @ 20s 6d for American sort Flour.

SUGAR.—All descriptions of Sugars are in good demand, the sales in Plantation amounting to 1400 hhds, at rather higher rates, hhds. 500 bags Bengal at 49s @ 7s 6d, and 500 bags Manilla, out of second hands, at 50s 6d @ 51s @ cwt. Of Foreign Sugar there is but little offering, but 160 cases white Havana have been sold at 56s @ 58s 6d, with 25 cases of brown at 52s, and 1000 bags Payti, at 30s @ cwt. for fair quality.—Molasses too, have been in good request, and nearly 200 puncheons Jamaica and Trinidad have found buyers at 16s @ cwt.—The Jamaica Rum in bond amount to 800 puncheons, chiefly common Leewards, at 2s 3d @ 2s 3d, with a few pannels of Demerara at 3s 6d @ 3s 10d @ gallon.

TEA.—The first sale of Tea, the produce of the present season, took place yesterday at which there was a fair attendance, and the prices obtained were equal to the advanced rates established in the London market; of 2890 packages Congou, one-half sold at 1s 4d @ 2s 6d, the other, being of lower quality, was withdrawn. Of Souchong 1500 chests Canton Sort was chiefly bought in at 10½ @ 1s—150 Pekoe Bohea sold at 1s 2d @ 1s 3½d—100 boxes Caper at 2s—600 Twankay at 1s 10½ @ 2s 1d, some small Gunpowder brought 2s 2d, Gunpowder 4s 6d @ 4s 9d, and 365 boxes Orange Pekoe, of fine quality, 3s 6d @ 4s 3d @ lb. The quotations are altered in conformity. Considerable business has also been done by private treaty since the sale, on similar terms.

OILS AND TALLOW.—There is a fair demand for the common kinds of Olive Oil, but rather less doing in Gallipoli, the sales of the week amount to 70 tuns. The scarcity of Seal Oil has enabled holders to realize £46 @ £48 @ tun. Some sales have been made in Newfoundland Cod Oil at £37 10s @ £37 15s, but holders now demand £38 @ tun. About 150 tuns Palm Oil have been taken by the soap trade at £32 for Calabar, and £35 @ ton for Bonny.—Tallow is rather dull, and prices, owing to a decline in the London market, have receded 6d @ cwt.

It seems to be understood, that though the proposed measure for authorizing foreign Wheat to be ground in bond for exportation has been thrown out, the parties interested have not wholly lost the hope of succeeding in some measure of that kind, and at no very distant period. Their reliance is on the more favorable opinion which is now supposed to be entertained by the Agricultural Committee on the subject, arising out of the conviction they have arrived at, that the measure could not materially affect the agricultural interest, and might even be advantageous, under certain modifications, with advantage to them. When the deputation had a communication with the Board of Trade upon this matter in the latter end of last year, they were plainly given to understand that their only chance of success would be their making it in some way or other acceptable to the agricultural interest, whose claims the Government could not venture to resist, and the opposition from that quarter, of it first, at a great degree, to the law of last session. But Ministers also intimated a disposition for other measures with respect to which the landed gentry complain of the conduct of Mr Pelham. Perhaps, the Agricultural Committee, by which the bill was taken from the Agricultural Interest, would be in a better position to resist, and the opposition from that quarter, if it should be made, would be of a different nature from that which the Ministers have to encounter in the Commons. At all events, it is not improbable that the Committee will adopt some plan in view calculated to obviate their object, but this is an error. All that can be said is, that some communications have been made which have had some influence upon the Agricultural Committee, and that the Ministers and others with whom it originated, feel satisfied in the pursuit of the plan they had in view.—London Times, April 26.

Among the remarkable occurrences of the day, is the shipment of four hundred hogsheads of West India Muscovado Sugar from the ports of France, for the United States.
