"SABRE-RATTLERS" ARE RESPONSIBLE FOR THE CONFLICT

Result of Six Years' Conspiracy in Germany.

David Star Jordan Says Revulsion Against War Exists.

[Special to The Advertiser.]

DETROIT, Mich., June 18.—"Whenever the German people take control of their Government, then there will be an end to international war," declared Dr. David Starr Jordan, former head of Leland Stanford University and noted pacifist, today. The present struggle, Dr. Jordan contends, is the result of six years of plotting and conspiracy by the sabre-rattlers of Germany.

Dr. Jordan resigned his place with the university to become a director of the Million-Dollar Peace Foundation, established by G. Edward Ginn. Mr. Ginn, a publisher, died a year ago.

At present, Dr. Jordan believes, there is hope for universal peace, not much, he conceded, but still hope that it will come eventually. World peace, he holds, is merely a matter of education. As proof he cites the increasing difficulty with which wars are begun.

Not Important.

As to the resignation of Bryan, Dr. Jordan had little to say, pleading a reluctance to discuss motives of which he was in ignorance. "There was nothing in the note of President Wilson to justify such action. The whole matter is not of importance—except that it is important to stop torpedoing. The only question is whether the Kaiser will lend his authority to Von Turpitz or to Von Jagow.

"The great danger in diplomacy is that some reply from an unfriendly diplomat will be taken as the attitude of a whole nation. The Franco-Prussian war was started because Bismarck cut out one-half of a telegram from France.

"Germany might write a disagreeable note, which would stir up the press of this country, and through the press the people, but there would be no difference in the situation.

Serious Division in Germany.

"In Germany there is a very severe division between such fire-eaters as Von Tirpitz and others on one side, and Von Jagow, a moderate and considerate man, on the other. Being in the struggle, the people are with the sabre-rattlers, but the great majority would bring about peace as soon as possible, if they could do that without discrediting the administration. The whole effort is to get out without this discredit.

"Should the people feel that the military administration had betrayed them, there would be a great revulsion. This revulsion exists now. Letters to me from friends tell of this. These letters are mailed in Switzerland. The Friedensfreunde is as strong for peace now as it ever was. This organization has held meetings, but these have had to be quiet. It can not be militant in its efforts for peace since such militancy would mean death."

Dr. Jordan explained that he did not want to be understood as saying that all of Germany favored peace, but that there was a great peace element in the country, though the people were following their leader "like sheep." He declared also that the feeling against war was strong in Austria, "That country having nothing to gain."

USE PINT JARS.—A request has been made that the members of the Mothers' Clubs of the city, who are preparing fruit, pickles and preserves for the wounded soldiers overseas, use pint jars only. Allowance to Wives of Men at the Front Has Been Cut Down

Duration of War and Number of Dependents Makes This Necessary, Say Those Who Administer the Fund—Some Complaints.

Mrs. Mary Murphy, 134 St. George street, wife of a private in the 18th Battalion, has written as follows to The Advertiser:

"I will thank you very much for a space in your valuable paper. I want to tell you the way I have been treated by the Patriotic Society since my husband went to the war. He is in France with the 18th Battalion. Before he left London the Patriotic Society sent a man down to investigate my needs, and that time they gave me $9.50 every two weeks. I am a delicate woman myself and have three girls. One is a feeble-minded girl (she is 17 years of age), one 14, the other 9 years." Mrs. Murphy states further that she was ill last month in the hospital; that the Patriotic Association only gave her $8 last month, and that owing to circumstances she has not been able to pay the past month's rent, due on Friday, June 19. The landlord, learning she could not pay, has given her three days' notice to leave, and forced her to sign a paper to turn over the $8 allowance of next month from the Patriotic Association. Mrs. Murphy has some fifty relatives serving the Empire in the present war.

Gets $48 a Month.

In addition to the patriotic fund allowance, she receives $20 a month separation allowance and $20 of her husband's pay, making a total income of $48 a month, which she declares to be inadequate.

When the case of Mrs. Murphy was brought to the attention of prominent administrators of the patriotic fund, the statement was made by them that the monthly allowances of 275 soldiers' wives had been cut down, and only six complaints received.

In April, a new Government regulation came into force, whereby, unless in a very exceptional case, the wife of a non-commissioned officer or private receives half of her husband's pay as well as the $20 separation allowance. In the case of a private, the compulsory amount is $16.50 a month, though it speaks well for the men who have enlisted in this district that the majority are turning over from $20 to $25 of their $33 to their wives.

Necessary To Reduce.

The Government's enactment has placed the majority of soldiers' wives in a fairly comfortable position. In view of the fact that the constitution of the Patriotic Association states that allowance is to be made only in case of need, and that demands upon the funds are continually increasing, with prospects of lengthening lists of beneficiaries, owing to the raising of further contingents, it has been deemed wise to reduce the allowances, notwithstanding the fact that the fund is in a sound condition at the present time.

150 OFFER TO MAKE MUNITIONS

Many London Men Ready To Go Overseas Have Registered With Local Representatives of Special Agents.

Nearly 150 men from London up to the present have made application for positions in British munition factories, which William Wyndham, the special agent sent out from England, is here to fill.

E. H. Johnston, barrister, and James Hussey, president of the Trades and Labor Council, are receiving applications here, and the former already has forwarded upwards of 75 to Mr. Wyndham, while the latter has sent in more than 50, and has had to refuse a number of applicants because his stock of application forms had run out.

Mr. Wyndham at present is in Western Canada, but he is expected to return to the east shortly to make the necessary arrangements for transporting accepted applicants to Great Britain. The men accepted must be out of employment, so that their loss will not embarrass Canadian manufacturers.

SCHOOL SCRAP BOOKS MUCH APPRECIATED

Lieut. Butler Thanks Inspector Edwards For Them.

Lieut. Chester Butler, writing from Nuneham, England, under date of June 3, to Inspector Edwards says: "I am getting along splendidly, and my leg is getting stronger every day. I hope soon to be able to walk without a cane. The muscles were very badly torn, and of course, that takes some time to heal. The bullet is still in my leg, and the doctors are going to leave it there, as the wound is a very clean one. It is quite warm here, but not nearly so warm as it was in Belgium on April 23. Your letter was the first intimation I had that Bob Watt and Dick Whetter are prisoners. I saw Dick at the front a number of times. The scrap books which the school children sent us at the front were splendid, and were greatly appreciated by all."

Lieut. Butler sends a small photo taken on a battlefield, showing a house that had been wrecked by shells, and in the foreground a huge hole torn by a "Jack Johnson."

FRENCH AVIATOR WORSTED GERMAN

In Air Duel, Brings Down the Enemy Machine—Slightly Wounded.

[Canadian Press.]

Paris, June 19.—The following official account of an engagement between a French and a German aeroplane was given out in Paris this afternoon:

"An enemy aeroplane, having been observed over our lines at Aspach, near Thann, in Upper Alsace, one of our aviator sergeants took wing and mounted in thirty minutes to a height of 10,500 feet. At this altitude he engaged his enemy with a machine gun.

German Hit.

"To this fire the German replied with his machine gun, and one of his bullets struck the motor of the French machine. The sergeant again ascended to a position above his adversary and fired three bands of cartridges. During the third round the German aviator was seen by the Frenchman suddenly to throw his arms into the air. His machine then began to fall, and it came down like a stone inside our lines.

Machine Riddled.

"The French aviator came down under control. Once on the ground he examined his machine. He found that bullets fired by his antagonist had perforated his cylinder, penetrated the steel shield at the back of the motor, and riddled his sails. The Frenchman himself was slightly wounded in the neck."

BOY SCOUTS VOW THEY WILL NEVER LET OLD FLAG FALL

Determined Little Troop Trudges in the Rain Shouting Battle-Song.

"We'll never let the old flag fall." Colborne street residents and passers-by last night received this gratifying assurance from an intrepid band of Boy Scouts who, all undaunted by the rain, marched along, heads erect, to the wall of a couple of bugles and poundings of a pair of drums. A dozen or sixteen dogs wagged along in the parade as if well aware of the patriotic nature of the occasion and the serious responsibilities they were assuming. In the midst of a medley of tunes and a variety of wierd noises, a fixed intention was made known to the public. Those thirty, more or less, Scouts are prepared to make all enemies walk the plank.

SARNIA WILL OFFER TO BUY POWER CO., PAYING $155,000

Imperial City Moves For Municipal System.

Street Lighting System at Present Belies City's Slogan.

[Special to The Advertiser.]

SARNIA, June 18.—Engineer Jeffries of the hydro-electric commission has placed his figures before the city council in connection with his estimate of the cost of bringing Niagara power into this city. The figures were secured by the engineer after he had made a general survey of the conditions in the city and valued the plant of the Sarnia Gas and Electric Company, which is at present supplying the city with light and power.

To Cost City $175,000.

He estimates that the plant of the electric company is worth $155,000 and that by taking it over, the city of Sarnia would be able to instal the hydro here for $175,000. If the city wished to go ahead and instal the hydro and not bother the local company, it would cost about $120,000, for the plant and equipment, but then the city would have the opposition of the present company, which would not shut down its plant, but would likely lower prices and compete for the business.

City Offers to Buy.

The city council has decided to offer the local company the sum of $155,000 for its plant and equipment. If the offer is accepted the citizens will be given a chance to vote on the matter.

At the present time Sarnia is not lighted to any great degree, in spite of the slogan, "Sarnia Lights the Way," but if power can be secured at a cheap rate the aldermen will favor the streets being lighted in the latest and most modern manner.
