DRUNK THREW STONE AT HER

Fanny Capes, 19 Years Old, Lying at Point of Death in the City Hospital.

JOHN WATTS FELL 31 FT. TO GROUND

Beach Residents Want Amendment to T. & H. Charter, Acquired From Niagara Central.

Hamilton, Sept. 20.—(Special.)—Fanny Capes, a nineteen-year-old daughter of Thomas Capes, 39 East Wood-street, is lying in the City Hospital at the point of death, as the result of a terrific blow from a big stone. She was with several other girls watching a gang of boys who were teasing John Mulholland, a man with a long police court record, who was floundering about the streets with a pail of beer. In his drunken fury Mulholland chased the girls into Mrs. Marcey's back yard at 167 Bold-street. When Mrs. Marcey went to close the gate on him he picked up a big stone and threw it at her. It missed the woman, but caught the Capes girl, who was standing near, on the left side of the head, tearing the upper part of the ear from the head and making another deep cut in the skull. She fell senseless on the ground and did not recognize any one till this afternoon, after the doctors had performed an operation. Mulholland was placed under arrest about 10 o'clock Saturday night by Detectives Campbell, Bleakley and Miller. At first he declared to the police that he did not throw the stone, but afterwards said he threw it, but did not intend to hit anybody. He is about thirty years old.

Burned by Live Wire.

While working 31 feet above the ground on a pole Saturday afternoon at Sherman-avenue, near the G. T. R. tracks, John Watts, 81 North John-street, came in contact with the main wire of the Cataract Power Company. He was badly burned, but managed to get free, and dropped to the ground below. He broke his arm in the fall.

Foot Crushed.

A big chunk of iron ore fell 30 feet onto the foot of Robert Hall, 678 East King-street, this afternoon at the smelting works. His foot was terribly crushed.

Finished Recruiting.

Saturday evening the officers of the new 91st Highland Regiment finished their task of recruiting. They have 527 men from whom to choose 210. Drill for the recruits will commence next Thursday at the drill hall.

Beach Residents Protest.

At a meeting of the Beach residents in the Council chamber Saturday night a resolution was adopted asking the senate to amend the charter of the Toronto & Hamilton Railway to provide that the new line should use the right of way of the G. T. R. City Solicitor Mackelcan, Reeve Carscallen of Saltfleet and Adam Zimmerman were appointed to go to Ottawa to present the resolution to the senate. The beach people are afraid they are fighting in a hopeless cause, as the promoters of the road have acquired the charter granted to the Niagara Central Railway, which gives them power to lay a track over the beach.

Fire Loss $1000.

Shortly before 9 o'clock Saturday night fire broke out in the frame coal sheds of J. B. Fairgrieve, near the Stuart-street yards of the G. T. R. The flames had worked their way along fully half the length of the shed, which is almost two hundred feet long, before the firemen were called out, but they were in control of the situation in about half an hour. Two or three small shanties belonging to the G. T. R. were scorched, too. The loss will be about $1000.

Police Caught Fourteen.

The police crusade against crap shooting is on in dead earnest. To-day Constables Libke, Campaign and Nichol surprised a gang of 50 on the G. T. R. tracks behind the Jockey Club. They got the names of fourteen and they will be summoned before the magistrate Tuesday on two charges—one of trespass and the other of gambling.

Death of Mrs. Alex. Dunn.

Mrs. Dunn, wife of ex-Ald. Dunn, 265 York-street, died to-day at noon. She had been ill for some months. She was 52 years of age. The funeral will be held Tuesday afternoon.

Died Suddenly.

Richard W. Catchpole, 12 Grove-street, died suddenly this afternoon at the age of 45 years. Yesterday afternoon he was stricken down with paralysis, which proved fatal about 3 o'clock this afternoon.

No Clue Yet.

The police have no clue to the burglars who got into the office of the Empire Tobacco Company, 23 South John-street, Saturday morning, and carried off grips full of premiums, like gold watches and fountain pens. R. Morris, the manager, does not know the loss yet, but estimates it at $1000.

Made in Canada Exhibition.

The Made-in-Canada Exhibition at the drill hall closed Saturday evening. The attendance was very large. The ladies who ran it will have a handsome surplus.

Happenings.

Thomas Burrows will have quite a sale Monday afternoon at 64 South Hess-street of a nice piano and a lot of good furniture, crockery, etc.

Stock Yards Hotel is on the direct route to Deering and Hamilton S. and I. Co., by the new Ferrie-street bridge. ed

10 Cents. Is it too much to pay for a position?

A situation advertisement in The Toronto World—largest circulation, greatest advertising medium.

THE SOO CRISIS

Continued From Page 1.

listed to once more set our industries going, and that for their rehabilitation Mr. Clergue would be mainly responsible.

Property Worth $30,000,000.

The Consolidated Lake Superior Power Company, which is the corporate name of the owners of the industrial properties at both the American and the Canadian Soo, which that promoting Maine Yankee genius of his generation, Francis H. Clergue, built up since 1894, when he conceived the idea of harnessing and turning to commercial uses some of the 180,000 horse power of the rapids in the St. Mary's River, have approximately $30,000,000 of tangible property at the two Soos. The company owes $5,050,000 and some interest to the so-called Speyer & Co. syndicate of New York, which is guaranteed by a blanket mortgage covering everything but the street railways and the ferries. It also owes some $2,500,000 or so of construction and other sorts of claims, and about $1,500,000 to Messrs. Berwind, Rea and McCaig, who advanced that amount to the company since the financial troubles first hit it last spring.

Not Dismantled.

If Speyer & Co. care to put up $7,000,000 more they will not only be the owners of everything, but will have sufficient working capital in the treasury to start up all or the plants and do business on the scale that Mr. Clergue's master mind contemplated when he was building and building until the people of the Soos didn't believe he would ever stop. If some other people pay Speyer & Co.'s morigage and put up $7,000,000, why, the property will be theirs. Of one thing the people feel assured; that is, that none of the plants is likely to be dismantled. They have warrant for so believing. The best experts have reported that it is feasible to make practically every one of them profitable, and they have indicated ways that it may be done.

Move to Force Things.

The order to close down is regarded as a deliberate move to force things to an issue. Every concern that wasn't shut down before the final smash has been making money. The wood pulp mill has been turning out 75 tons of pulp daily, and couldn't keep up with the orders. An order for 500 tons was secured only a few weeks ago from Japan, and that remains unfilled.

The American Soo isn't particularly affected, except some merchants, and the American employes who work in the mills on the Canadian side. The big 40,000 horse power canal, two and a half miles long, that with the power house cost $5,000,000, has been repaired at a cost of $50,000, and is now ready for work. The Union Carbide Company, which is said to be owned by New York and Chicago gas companies, has a force of 500 men busy completing its 600 feet long factory and installing machinery in this building, and in half of the 1200 feet long power building. The order to shut down doesn't affect this company, for it is independent and has no other relations with the Lake Superior Consolidated, except to buy 20,000 of the 40,000 horse power of the canal for which it contracts to pay $16 per hydraulic horse power as distinguished from the power generated from the water by electricity, or $200,000 annually.

Paying Plants.

The Lake Superior Consolidated owns no industries on the American side except the street car system, but it has been recently equipping a paper plant in a part of the power house, where from the scraps of the pulp mills 15 tons of butchers' coarse paper would be manufactured daily.

The great big plants on the Canadian side that have been showing a balance on the right side are the pulp mill, the retort plant and the soda factory. The pulp mill has been running to its full capacity of 75 tons a day. In connection with it there is a sulphite fibre mill of 50 tons daily capacity, but this has been idle. The machinery was sufficiently complete to be profitable. At the retort plant, 6000 bushels of charcoal, 1600 gallons of wood alcohol, and 10 tons of acetate of lime was produced every 24 hours.

Fifteen hundred woodsmen have been employed cutting material for the retort plant and for the pulp mills on the company's lands. These also are now idle. At the soda factory three tons of caustic soda and six and one-half tons of bleaching soda have been the daily product. Two other of the smaller of the profitable concerns at the Canadian Soo have been the veneer mill, cutting 50,000 square feet of veneering daily, and the sawmill, which has been turning out 100,000 feet daily.

Biggest Money Maker.

The biggest money maker has been the Helen Mine at Michipicoten, which Mr. Clergue bought for $500.

So far this season about 250,000 tons have been shipped to lower lake ports, and but for yesterday's order the season's shipment would have reached 300,000 tons, which was netting the company 30 cents per ton, or $90,000 for the season. Only last week Mark Hanna bought 10,000 tons of the ore. The intention has been to operate the mine all winter. There are 3,000,000 tons of ore in sight. Not far from it is the Grace gold mine, that has been earning an average of $3000 of pin money each month for the company.

The largest plant that hasn't been earning anything is the steel rail mill, 1600 feet long, which is more than twice as long as the national capitol at Washington, and that cannot be run to its capacity short of $10,000 a day, the greater part of which would be wages. It contains as fine machinery as money can buy, but it is a desolate looking place these days. That Messrs. Berwin, Rea and McCaig have faith in it is evidenced by the fact that altho the mill has been idle for a year they have put up over $1,000,000 to build two blast furnaces adjoining, and the money or its equivalent has been paid for 135,000 tons of soft coal that has been shipped here by water this season to be used in the furnaces and the mill. This and one in Nova Scotia are the two principal steel rail mills in Canada, and the Dominion government has agreed to give a bounty of $7 a ton on steel rails as soon as these two companies show that they can produce certain results. But the price of steel rails is declining, and that is a condition that must be taken into account. Should the Grand Trunk Railway's trans-continental project go, it would be a good thing for the steel mill. To determine how the steel mill can be made to pay a profit is one of the problems for the reorganizers.

The Lake Superior Consolidated Company owns a nickel mine in the Sudbury district. One of the nearly finished plants at the Canadian Soo, representing an outlay of several hundred thousand dollars, was for the treating of this ore. It is a converter with a capacity of 400 tons daily.

WORSE THAN EVER BEFORE.

Sault Ste. Marie, Mich., Sept. 20.—(N. W. Despatch.)—The shutting down of the Consolidated Lake Superior Company's plants, shutting off $7000 a day in wages alone, has caused a panic in the Canadian Soo, which is in a worse condition than ever before in its history. Many people are preparing to leave that city at once, while merchants are curtailing their stocks and preparing in every way to get thru the winter in the best possible manner with the least expense.

In many streets whole rows of houses are deserted and "To rent" or "For sale" signs are to be seen in large numbers. Little groups of men stand about on the corners and in solemn tones discuss the situation in Consolidated, and the afflictions which they fear are about to fall on the city. Every face looks as if its wearer had lost his last friend and never expected to gain another.

In addition to this, the police department is swearing in a large number of deputies, including all the conductors and motormen of the street railway lines. All this has served to stir up the anxieties of the people.

A special train left last night up the Algoma Central Railroad for the purpose of bringing in the 1600 or more men employed in the woods and mines. They are expected to-morrow, and not a man of them will have a penny with which to buy food or lodging. The company will pay the men in cheques, which will be good for nothing until money has been raised and deposited.

The feeling of the people is that, with so large a number of men turned loose in the city, hungry and ugly, and with no money, the situation will be dangerous. A guard has been placed around the office of the paymaster of the company, and the people are making desperate efforts to arrange means for feeding and housing the men until they can be taken out of town.

FATE SETTLED TO-DAY.

New York, Sept. 20.—The future of the $100,000,000 Consolidated Lake Superior Company, which controls a dozen or more industries, including steel mills, traction systems, ferries, railways, pulp and paper mills and light and power companies on or near the Sault Ste. Marie is likely to be determined at the meeting of the full board of directors in this city to-morrow.

A director said yesterday that while hope was still entertained, the outlook was dark, and that the prospects were that a reorganization would be deemed best in view of the forced closing of the plants for lack of money.

The company was organized in 1897 as the American Lake Superior Company, and gradually enlarged its scope until it had a capital of $99,686,000 and controlled the Lake Superior Power Company, capital $2,000,000; Michigan Lake Superior Power Company, bonded debt, $3,500,000; Sault Ste. Marie Pulp and Paper Company, capital $2,000,000; Togona Water and Light Company, capital $200,000; Algoma Central Railway, capital $10,000,000; the North Shore and Manitoulin Railway, capital $10,000,000; the International Transit Company, capital $150,000; the Trans-St. Mary's Traction Company, capital $400,000; the Algoma Commercial Company, capital $10,000,000; the Algoma Steel Company, capital, $20,000,000, and the British American Express Company, capital $100,000. The Algoma Railway runs to the company's many mines in the Michipicoton iron ranges, and in all some 4000 men were employed.

The organizers and directors of the company include E. J. Berwind, C. E. Orvis, Charles H. Tweed, Charles Macdonald, S. M. Prevost, Samuel Rea, H. A. Berwind and James S. Swartz. F. H. Clergue, the Canadian promoter and president of the company, was succeeded recently by Cornelius Shields.

The company paid dividends on the preferred stock until December last, when they were suspended owing to money embarrassments, which were temporarily relieved in March by a loan of $5,050,000 from a syndicate headed by Speyer & Co. This loan was to have been taken up in July, but was not, and a bond issue plan to pay it and provide working capital also failed. Money was needed urgently, and as a clause in the Speyer agreement prohibited liens an executive committee consisting of Mr. Berwind, H. K. McHarg and Samuel Rae opened negotiations for a permanent funding loan with institutions, including the Equitable Trust Company of this city. The negotiations, it is understood, have met with so little success that all but the ferry, light and traction plants of the company closed down on Friday, and a directors' meeting was called for to-morrow.

An effort will be made at the meeting to find a plan for the rehabilitation of the company. It has no bonds excepting small issues on subsidiary companies, and it is understood that the Speyer syndicate took the securities of the subsidiary companies as collateral for its loan. In the event of a failure to repay the loan the Speyer syndicate, which, it is said, includes Kuhn, Loeb & Co., Blair & Co., and Boston and Philadelphia Trust Companies, would in the ordinary course offer the underlying securities at auction, and the buyer would come into the control of the properties against which the bonds are issued. Speyer & Co. refused yesterday to state what action they had taken, or intended to take, but it is believed a statement will be made for the syndicate to-morrow.

The stocks of the Lake Superior Company were largely held in Philadelphia, where their decline to 1-2 for the common and 4 for the preferred has caused losses of millions of dollars.

HIS LIVER DIDN'T WORK

And Dreadful Headaches and Depression Followed—Cured by

Ferrozone

Mr. Lionel S. Lascelle of Strathcona had a trying time with liver complaint, but wisely used Ferrozone in time. He says: "My liver got sluggish and torpid, and made me feel about half-dead. When I got up in the morning I was as tired as if I hadn't slept at all. My head ached, and specks swam before my eyes incessantly. If I bent over or did any stooping work I would be in a perfect whirl in two minutes. I felt depressed and out of sorts, and only got relief from Ferrozone. It went right to work, and before long cured me. I feel ever so much improved in health since using Ferrozone, which I strongly recommend for the kidneys and liver."

Mr. Edward E. Moncrief of Springfield says: "For years I was subject to frequent attacks of liver complaint, and no remedy ever cured like Ferrozone. When my head ached fit to split, and I felt drowsy and sick, Ferrozone relieved quickly. I used Ferrozone two months after being cured, and haven't been bothered since.

When it comes to curing liver and kidney ills you can't beat Ferrozone. It has a specific action on these organs, and at once puts them in a strong, healthy condition. Ferrozone isn't the kind that just relieves—it cures, and cures thoroughly. Ferrozone prevents a return of further trouble, and costs only 50c a box, or six boxes for $2.50. All druggists, or by mail from The Ferrozone Company, Kingston, Ont. Get a supply to-day.

EGG-LAYING CONTEST.

Chicago, Sept. 20.—The Tribune says: Australian hens are still being beaten on their own ground by the three pens of American fowls which Miller Purvis of Chicago caused to be entered in the egg laying competition at the Hawkesbury Agricultural College, near Sydney. Seventy pens of six hens each are competing.

It was learned yesterday that the invading flocks hold first, third and seventh places in the competition, which started last April and will continue until March. With a record of 270 eggs in the first four months, six hens from Nebraska lead their nearest Australian competitors by thirty eggs.

At the end of the present contest another competition will be inaugurated with 100 pens entered, ten from the United States, ten from England, three from Canada, three from New Zealand and the rest from Australia.

NEWS FROM THE WEST.

Winnipeg, Man., Sept. 20.—Sir Thos. Shaughnessy, president of the C. P. R., Lady Shaughnessy, N. B. Angus and party, left here for the west to-day.

Members of the Chambers of Commerce congress party who passed thru Winnipeg yesterday for the east express great delight with their western trip.

White Pup, chief of the North Blackfeet Indians, died yesterday at Gleichen.

Broken Tooth Saves Boy.

Vineland, N. J., Sept. 20.—To a broken front tooth eight-year-old Lester Hall owes his life, for under the treatment he is now receiving he may recover from a severe case of lockjaw. The boy stepped upon a broken bottle three weeks ago and cut a gash in his heel. Bandaged at home, the wound was thought to be healing nicely, but in a few days was badly swollen. A physician called to look at it discovered a large sliver of glass in the cut, and soon the dread tetanus set in. The boy's jaws became firmly locked, but the doctor found that one tooth had been broken off, and thru this orifice liquid nourishment was injected. The little fellow has been kept alive for two weeks. Meantime tetanus serum has been used with good effect.

Body in Thief-Proof Box.

New Haven, Conn., Sept. 20.—The body of Bronson B. Tuttle of Naugatuck, which was buried last week, was placed in a coffin enclosed in a burglar proof metallic box, so constructed that once the lid was shut and the locks snapped into place the box could not be opened without much work or the use of dynamite. The lid is fastened by twelve automatic locks and bars, and to open the box it would be necessary to saw thru every bar. This work could only be done by hand and would require all of twenty-four hours. As another precaution against grave robbers, a watchman sleeps under a tent near the grave.

Husband Under Arrest.

East Sullivan, N. H., Sept. 20.—Officers to-day arrested Malachi Barnes, a farmer living just outside this village, whose wife was brutally assaulted last night, the assault being followed by a probably attack on Ashabel Dunton, a boarder, who, as a result, now lies at the point of death. Barnes was removed to the jail at Keene, where he is held on suspicion.

Killed Relative and Self.

Buffalo, N. Y., Sept. 20.—James Mears, 70 years old, to-day shot and fatally wounded his son-in-law, Michael Crotty, 35 years old, and then sent a bullet thru his own brain, dying instantly. Family quarrels were the cause of the crime.

What is home without music? The piano is the best musical instrument extant. The

HEINTZMAN & CO. PIANO

is a triumph of Canadian skill. It takes a leading place among the world's grandest instruments, and it furnishes pleasure for thousands of cultured Canadians.

YE OLDE FIRME OF

HEINTZMAN & CO., Limited

115-117 King St. West, Toronto, Canada.

RECEIVERSHIP.

Philadelphia, Pa., Sept. 20.—(Special.)—A meeting of directors of the Consolidated Lake Superior Company, to be held to-morrow in New York, is expected to bring another crisis in the affairs of the entangled corporation. The only way out for the company now seems to be a sale of the property to satisfy the claim of the syndicate headed by Speyer & Co., which advanced $5,050,000 several months ago to put the company on its feet. There have been rumors that Speyer & Co. are interested in the formation of a syndicate to organize a new company, and after a sale of the assets to let the Consolidated Lake Superior stockholders in again. Stockholders of the company will, however, doubtless carry the matter into the courts and press for a receivership, in which event any scheme for a new company would be of no avail.

NEW FIRE MASK.

Visor is of Mica, and Great Success Predicted.

London, Sept. 20.—A member of the Paris fire brigade has invented a new mask, which is said to be a great improvement over all previous ones. It can be fixed to an ordinary helmet and around the neck by straps.

The visor is of mica, protected by wire. In front of the mouth two pipes open, one furnishing fresh air and the other carrying off what has been breathed.

A reservoir worn on the back as a knapsack contains two compartments, one holding two steel jars filled with compressed air; the other bag, which is called the lung and which is connected by copper tubing with steel jars and special mechanism, admits compressed air only at nominal pressure to the lung, whence it is conveyed to the mouth.

The mask leaves the ears uncovered. An electric bell gives warning when the supply of air is running out. The apparatus weighs only twelve kilograms, and will be put into immediate use in the Paris fire brigade.

NUNS TO BE HEARD.

Paris, Sept. 20.—Among the arrivals is Dr. Thomas Barclay, appointed by the Canadian courts to examine the testimony in the suit of Mary Archer against the Sisterhood of the Sacred Heart, whose parent convents are situated in Paris. Miss Archer accuses the authorities of the sisterhood of incarcerating her in an insane asylum. As the vows of the order forbid members to leave the premises, the mother superior and other authorities will be submitted to examination here.

ASSASSINATION.

Syracuse, N. Y., Sept. 20.—The coroner's jury, which investigated the shooting of Orlando P. Dexter at Santa Clara, 40 miles from Malone, yesterday, reported that death was the result of a "gun shot wound by some party or parties unknown." There is no clue to the guilty persons. The body of Mr. Dexter was sent to New York to-day.

NEW JUDGES NAMED.

Ottawa, Sept. 20.—While the order-in-council has not been made, it is understood that J. L. Dowlin of Ottawa has been appointed junior court judge for Carleton to succeed the late Judge Mosgrove. Mr. Madden of Duroche and Madden, Napanee, will be appointed to succeed late Judge Wilkinson of Lennox County.

MEDAL FOR NORDICA.

Paris, Sept. 20.—Mme. Nordica has just received word from Herr von Possart, manager of the Prinz Regenten Theatre at Munich, that the Prince Regent of Bavaria has conferred upon her the gold medal for arts and sciences instituted by Ludwig II.

Six Miles Under Water.

Portage, Wis., Sept. 20.—The Wisconsin River reached a stage of 12.2 feet at the government lock at noon to-day, when the city levee on the west side of the river broke, and the entire district between the Wisconsin River bridge and the Baraboo River, covering a space of six miles, is one sea of water. Farm residences in the district are surrounded and hundreds of acres of potatoes, corn and millet are ruined.

Sir Mackenzie Bowell is a guest at the King Edward.

Good food promotes good health and good health is the fore-runner of good work. If you would have both your health and your work at their best, then eat the thoroughly good food
