WEAKLY BOYS AND GIRLS.

What is to Become of Them? What Can Be Done for Them?

Give the boy and girl a chance. Give them education. Give them lofty ideals of life. Give them opportunities liberally to conduce to their welfare and prosperity, but above all give them the rich heritage of HEALTH.

Undoubtedly the struggle for existence grows keener year by year. If only the strong win by strenuous effort, surely the weak must fall by the wayside. Thousands of our boys and girls are growing up without health. Pale, easily tired, listless in mind, inert in body, what chance have they to succeed in life? Yet the prizes to be won are great; but are they to fall into the hands of the weak? The experience that accompanies success rests upon the brow of the strong.

You have doubtless heard of Ferrozone. Some of your neighbors have been made well by it. But it has not occurred to you to employ it for the development of health of the boy and girl that sit around your own table. A few words, then, as to how Ferrozone acts:

First, it markedly improves the appetite. Assimilation is stimulated, and quickly an abundance of rich red blood is supplied, providing nutrition for the whole body. Ferrozone gives color to the cheeks because of the abundance of rich red blood, and the elasticity of spirit and power of endurance are the simple results of the improvement in the character of the blood supply, and because it has fed the nerves and improved the power of the whole muscular system.

It is undeniable that interest in life grows in proportion to the strength to seize its fruits or to enjoy its pleasures. Success is in a direct ratio to the possession of the ability to do things.

In any form of weakness or disease dependent on the impairment of vital force, whether it be deficient blood formation or a starved condition of the nerves, or a lack of brain vigor, Ferrozone is a positive remedy for striking at the very root of strength production; by providing an abundance of blood, it possesses a value superior to any other preparation known.

Clearly, then, to give a boy or girl a chance is in many cases to give them Ferrozone. Anything that increases vitality as Ferrozone does is a veritable boon to the young, upon whose physical ability depends the character of the work in which they are at present engaged, and this in turn determines not only the place they shall occupy in future, but the measure of power they are destined to wield.

Ferrozone is sold by all dealers.

No Change in Hawkesbury Strike.

Ottawa, April 13.—(Special.)—There is little change in the situation at Hawkesbury. R. L. Blackburn did not start the mills running this morning, which will serve as a deterrent to those of the strikers who favored opening down the mill by force. The 100 non-union men or more who have been operating one of the small mills since the strike began, are now idle, and will probably remain so until a settlement is reached. The strikers are orderly, but the more aggressive of them are threatening all sorts of things if they do not receive concessions demanded. The strikers leading the mills is open to public traffic, and no attempt to block the passage has been made since Saturday. The strikers and others are anxiously waiting the arrival on the scene of Mr. W. L. McKenzie King, Deputy Minister of Labor, who is expected to have some influence in effecting a settlement of affairs.

J. Johnston, a lad, was arrested for indiscriminate shooting on the old belt line near the Humber. He was fined $5 and costs, with a warning from Magistrate Ellis yesterday.

Mrs. Wm. Bingley, Grand Tracadie, P.E.I., Has a Very Trying Experience, but Thanks to

MILBURN'S HEART AND NERVE PILLS

She has been restored to perfect health.

She writes: "About seven months ago I was badly run down in health and became very weak. I was troubled with fluttering of the heart and shortness of breath. When lying down at night I was almost afraid to go to sleep for fear I would never wake up. When I arose in the morning I would feel a little better, but as soon as I started to work my heart would start fluttering, my head would become dizzy, faint weak spells would come over me and it seemed as if black objects were floating before my eyes. I was growing worse every day until I got a box of Milburn's Heart and Nerve Pills. When the box was half gone I could feel that they had done me good and by the time it was finished I was in excellent health and would advise all sufferers from heart and nerve troubles to try them."
