T.B.C. Fivepin League.

There was a doubleheader rolled in the Toronto Bowling Club Fivepin League last night, Canalites winning two out of three games from Rexalites, while the Neophytes also annexed the odd game from All Stars. In the first named encounter "Ping" Strong had all his Canalites working well excepting himself, the worries of manager no doubt telling on that worthy during the most trying pinches. In the Neophyte-All Star engagement "Bobby" Bain, new manager of the latter, got away to a bad start, by dropping the first two games, the second by only nine pins, while the last game was just as close, but withe the "Little Scot" putting his team over a winner with just 4 pint pins up. In this battle Fleming for Neophytes was high roller, and Dr. Cardwell of Brooklyn divided honors in nearly pulling the last game out of the fire. Score:

Square Pianos 50c a Week.

To make an immediate clearing of an accumulated stock of square pianos, Ye Olde Firme of Heintzman & Co., Ltd., 193, 195, 197 Yonge street, will dispose of these at a fraction of original prices—$50 to $150—on promise of purchaser to pay fifty cents a week. The lot includes pianos of Chickering, Steinway, Miller, Heintzman & Co., and others.

Pounds and Pounds.

A motorist who had the misfortune to knock down and slightly injure a pedestrian agreed to pay the bill for medical attendance, and to compensate the man for loss of employment during the time he was ill. Ultimately an account for £20 was submitted to him, and, tho considering it heavy, he paid it.

"How much of this money goes to the doctor, my man?" he asked.

"Only 10 shillings," was the grudging admission. "The remainder is for lost wages."

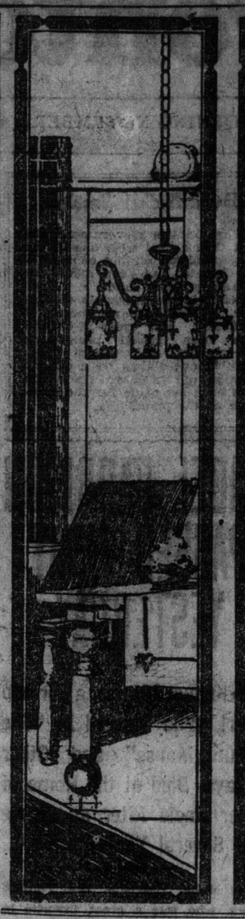
"Do you usually get paid at the rate of five pounds per week?"

"Yes sir, I does."

Tho very much inclined to question his statement, the motorist said nothing just then, but made inquiries in the village next day, and learned that the man only worked on Saturdays, and was kept all the rest of the week by his long-suffering wife.

"But the rascal swore to me that his earnings were five pounds a week!" cried the indignant motorist.

"Well, that's true in a sense, sir," was the reply. "He works one day a week in a grocery store, and they give him five pounds o' sugar instead o' money for his services!"



Artistic Fixtures and Gas—

ELABORATE fixtures are dependent for their effectiveness on the quality of the illuminant used. If the fixture be composed of Art Glass the light must be white to ensure a harmonious blending of the colors.

Gas sheds an intense white light, and when used in artistic fixtures makes them an ideal setting for an efficient and reliable illuminant. You get a steady white light, no eye strain, no flickering.

At our Adelaide Street showroom we carry an immense stock of all kinds of gas fixtures. They come in all sizes, designs and prices. We cordially invite you to look over our assortment, and are assured that you will see something that will solve your light problem. Gas Fixtures and Portables make excellent Christmas gifts.

First Buffalo Robes As Indians Made.

Out in Western Kansas old plainsmen are still seen frequently driving into town covered with a buffalo overcoat in the winter time, says The Kansas City Journal, but, nevertheless, buffalo robes are becoming scarce and in a few years will entirely disapper.

There was a time when Kansas furnished buffalo robes for the world. It was the Kaw Indians who first marketed them. Later, manufacturers, seeing the vast profit in them, made them by the thousands and supplied the world. But the manufactured or patent tanned robes did not last as long as the robes tanned by the Indians. In fact, it is said that the robes now in service were those tanned by these Indians many years before the white man began to tan them.

The Indian women did the tanning. They fastened the green hides to a set of frames just like grandmother used to fasten her quilts to, when she made them. The squaws would then take a blunt instrument, resembling a hoe, and work off all the flesh and membrane from the hide. They called it "fleshing." Then they would rub the skin for several days with a heavy, smooth-surfaced club, until all the grease had been driven out of the hide.

They used no chemicals at all in tanning. Only hides from buffaloes killed late in the winter were used in making robes, as the fur was then heaviest.

Before the Kaws threw the robes on the market they used them in making moccasins and winter clothing, also for covering for their teepees. But when a market was established for them and the Indians would get real money, or real food, or real whisky for them, buffalo teepees soon disappeared from the reservation.
