MEDICAL.

CONSUMPTION
CAN BE CURED.

Ontario Pulmonary Institute
135 Church street, (opposite Metropolitan church), TORONTO, ONT.
M. HILTON WILLIAMS, M. D.,
Graduate of Victoria College, Toronto, and member of the College of Physicians and Surgeons of Ontario.
Proprietor.
The only Institute of the kind in the Dominion of Canada.
Permanently established for the cure of all the various diseases of the Head, Throat and Chest, viz: Catarrh, Throat Diseases, Bronchitis, Asthma, Consumption, Catarrhal Ophthalmia (Sore Eyes), and Catarrhal Deafness. Also Diseases of the Heart. Nearly 40,000 cases successfully treated during the past 16 years by our new system of Medicated Inhalation, combined with proper constitutional remedies for the blood, etc.
CHRONIC LARYNGITIS.
Laryngitis, like nearly all affections of the throat and nose, usually begins with a severe cold, and is must always attended with hoarseness. It is more frequent a more extension of catarrh of some throat than an original disease, the irritation escaping down and fixing itself upon the delicate organism of this part, and then gradually journeying onward to the lungs. When it occurs as a consequence of catarrh or sore throat the symptoms are comparative y mild. There may be pain, but it is more common to find only a sense of tickling, which provokes cough. Many complain of a sensation as of "something tickling there," to get rid of which they keep up a r sping effort to clear the windpipe. The voice is always more or less affected, being rough in the early stage, but more feeble aft r the disease is established. There is often a slight tendency over that prominence of the neck known as the "Apple of Adam" (Pomum Adum), a heat and a sense of tightness, and frequently some slight difficulty in swallowing.
In this form the disease is simple and readily removed in a few weeks. In all cases it must be treated by the direct application of astringents and alternatives by inhalation to the affected parts. Like catarrh and granular sore throat it is a local affection and can only be cured by local treatment. There is no use of torturing the unoffending stomach for an inflamed condition of the vocal chords of the larynx. Change of air is equally unavailing, for there is no climate without dust and draughts of air sufficient to feed and keep the disease alive. The inhaling instrument charged with such sedative, alternative and astringent medicine as may be indicated by the stage of disease must be used morning and evening and every night before going to bed, and the larynx fumigated by warm, sedative vapors. Treated by these means there are few cases of Chronic Laryngitis which are not readily curable.
Inhalation is the only system which will cure these diseases, and yet the treatment of the two are entirely different. In the one we must allay the irritation, while in the other we must stimulate a healthy action.
This will convince us of the necessity of fully understanding the system of Medicated Inhalation in the treatment of the various diseases of the pulmonary organs, for when properly applied there is no system of medicine to be compared to it.
Those who desire treatment should spend no time in writing; if you can come to the Institute this month or this week it may be of the greatest possible value to you; it may be the turning point of your disease for fatality or recovery. Later in the season probably you cannot come more conveniently nor as well.
Consultation free, and prices within the reach of all.
The very best of references given from those already cured. If impossible to call personally at the Institute, write for a "List of Questions," and "Medical Treatise." Address
ONTARIO PULMONARY INSTITUTE,
135 Church street, Toronto, Ont. 246

ELECTRIC NECKLACES.

MOTHERS!
MOTHERS
Don't give your babies injurious medicine when they suffer from the effect of getting teeth. Why not use one of Norman's Electric Teething Necklaces, which will quiet and soothe the child without injuring it in the least? Ask your druggist for Norman's. Take no other. Price 50c. 146

THE EASTERN TROUBLES.

RUSSIA SATISFIED WITH THE LANDING OF BRITISH TROOPS.

Proceedings at the Conference—Arabi Entrenching Himself—The Latest News from Europe.

CONSTANTINOPLE, Aug. 11—At the conference yesterday the Russian representative asked an explanation of the action of the British occupying Suez. Dufferin replied that the step was taken in consequence of military necessity and in order to save the town from destruction and pillage. The English draft of the military convention shows that England, while accepting Turkish co-operation, is prepared to do the work unassisted.

Turkish journals are assuming a friendly tone towards England.

The Sheik ul Islam has prohibited Ulemas from preaching in favor of Arabi.

THE SUEZ CANAL.

The assent of England to the proposal of the Italian ambassador for temporary internal protection of the Suez canal is coupled with a reservation making exception in cases of force, Majuir, which means practically that if the internal police are organized to guard the canal they shall not interfere with the military operations.

Despite the earnest efforts of Dufferin to secure such conference action as would allow the continuance of England's military supervision of Egypt and the Suez canal, the conference to-day issued a protocol signed by all the ambassadors for the joint international supervision of the canal.

Nothing has been definitely arranged yet regarding the Anglo-Turkish military convention. After Said Pasha conveyed to Dufferin the views of the porte thereon, Dufferin communicated to Said the convention as drafted by Lord Granville. A favorable result of the negotiations is expected. The last sitting of the conference will probably be held on Monday.

A NEW EGYPTIAN MINISTRY.

ALEXANDRIA, Aug 11.—It is stated that formation of a new ministry will probably be announced to-day, with Cheriff Pasha, prime minister. Most of the present ministers, excepting Roghbe Pasha, will remain in office. Suleima Pasha will take the portfolio of minister of education, and Sherea Pasha that of minister of religion. They are both partisans of Arabi.

It is stated Arabi has executed the governor of Bohera.

An Egyptian trooper of the khedive's guard was taken prisoner while attempting to cross the Ramleh lines yesterday. A paper written in Arabic was found on him, and the probability is that he was

MAKING FOR ARABI'S CAMP.

Owing to the withdrawal of the enemy from points near Ramleh the greater part of the naval brigade has been withdrawn from the water there.

Arabi is constructing within five thousand yards of Ramleh a formidable redan and embankment 30 feet high.

The Superb fired shells at the works to-day, four of which burst in close proximity to the rebels.

DEPARTURE OF BRITISH TROOPS.

LONDON, Aug 11.—The second battalion royal Irish regiment of foot, 750 strong, left Chatham for Portsmouth to-day, on their way to Egypt. Great enthusiasm was manifested at their departure. This completes the departure of troops from Chatham. The despatch of men from Southampton has also finished for the present. A squadron of household cavalry has been ordered to Cyprus to form a depot from which to forward men to the front. The second army corps will be brought to its full strength in readiness to support the corps already abroad if necessary.

THE MILITARY CONVENTION.

A correspondent at Constantinople says that Lord Dufferin has submitted to Said Pasha a draft of the military convention proposed by Great Britain.

Gen. Adye will command all the land forces in Egypt until Wolseley arrives. Gen. Alison will shortly take over the post of chief of the intelligence department for the British and Indian contingents. The main body of British troops will remain on the transports until Wolseley arrives. This will leave him free to effect a landing elsewhere than Alexandria if he thinks fit.

RUSSIA PLEASED.

The News Constantinople correspondent says that the Russian representative in the conference expressed satisfaction with Dufferin's explanations in regard to the landing of the British at Suez.

The St. John's ambulance association intends to send a corps of trained nurses to Alexandria under the direction of Viscountess Strangford.

A Miner's Riot.

PITTSBURG, Pa., Aug. 11—A riot occurred at the Camp Hill mines, on the Panhandle road to-day, resulting in the injury of a more or less serious nature to about fifty of the rioters. It appeared that one hundred and fifty strikers armed with grab-hooks laid in wait for the non-union men numbering fifty, who are employed in the mines, and made a desperate attack on them. The sheriff was called upon and soon had a posse of deputies at the scene of the disturbance.

Stoppage of U. S. Mail Matter in Britain

WASHINGTON, Aug. 11.—A somewhat spirited correspondence is passing between the postal authorities of Great Britain and the chief postoffice inspector of the United States in regard to the stoppage of delivery of certain mail matter arriving in Great Britain from the United States. The British postoffice authorities not only prohibit the circulation through the mail of American newspaper containing matter adjudged by them to be inimical to the interests of that government but also intercept registered letters and packages suspected of containing seditious information or dangerous preparations.

A Gigantic Fraud.

MONTREAL, Aug 11—It has been discovered that J. S. Hunter, notary, is behind $100,000 in his accounts as agent of Mrs. Charles Phillips, a wealthy old widow. Hunter was an old and trusted member of the family and had full management of the vast estate. He lived in regal style. There is great excitement over the reports of his defalcations. There is no longer any doubt of their truth, at which people hold their breath, as the accused was held in such high esteem and considered so honorable a man. Mrs. Hunter is prostrated with affliction at the wreck of her husband's career. The local papers have only short and vague references to the matter, but the main facts are getting abroad. There are rumors of warrants being issued, but these cannot be traced to any good foundation.

BIG FIRE AT QUEBEC.

A Large Number of Families Burned Out—The Losses as far as Known.

QUEBEC, Aug. 12.—A large fire broke out in St. Sauveur adjoining the city at about 1 a.m., originating in a stable in rear of Dion's manufactory of self-raising flour on Savageau street. In about an hour some twenty houses were destroyed on Savageau and St. Valier streets, involving a loss of many thousands of dollars. The water supply is poor and the fire may spread extensively. The fire originated about 200 yards from the city limits and the wind is in the direction of the city. If it crosses into St. Roch's suburbs one third of the city may go. At present the fire is mid way but at the line is St Ours street, about 100 feet wide, which will likely serve as a cut to the fire. The properties burnt so far as known are on Savageau street: McHugh, laborer, loss $500; Blouin, butcher, loss $1000; Dion, flour, loss $2500; Lapointe Pilot, two houses, $3000; LaBrecque, milkman, $2000; and a few others. On St Valier street, Leclerc, shoemaker, insured Royal and Queen for $5000; Misses Caston, Guay & Vallancourt, booksellers, tenants; Nolet, notary; Girouay, carriage-maker; N. Ruel, painter; Gagnon, cabinet-maker; Pagean swing machines; Plampdon, dry goods. A few houses on Demorse and Bagot streets are burning. It is impossible to give details now without returning to the scene two miles away.

ARRESTS IN IRELAND.

Stephen J. Meany in the Toils—A Journalistic Inquisition.

CLAREMORRIS, Aug. 11—Scrap Nally, one of the defendants in the Irish state trials at Dublin in January, 1881, was arrested last night under the Curfew clause in the repression act. Nally had just arrived from Balla. he will appear before the magistrate to-day.

DUBLIN, Aug. 11—Henry George, arrested at Athenry yesterday, was liberated to-day. The police accused him of associating with suspects.

Stephen Meany, correspondent of the New York Star, was arrested at Ennis this morning under the repression act.

NEW YORK, Aug. 11.—Stephen Meany arrested in Ireland to-day is a political ticket of leave man. The managing editor of the Star cabled Minister Lowell that as Meany was an American citizen and engaged on a legitimate mission his release should be at once demanded.

The Commercial's Dublin says: It is the purpose of the government to prevent the transmission to America of all reliable information regarding the situation in Ireland, hence the arrest of George and Meany. All news hereafter sent abroad will have to undergo the supervision of the government and all will be colored to suit those in authority.

Meany has been released on giving bail for his good behavior for six months.

Parnell and the Philadelphia League.

LONDON, Aug. 11—Parnell last night sent the following to the president of the land league at Buffalo: "I strongly disapprove of the action of the Philadelphia land league. It ought to be reversed."

General Ignatief Arrested.

VIENNA, Aug. 11—A telegram from Czernowitz is published here reporting the arrival there of several Russian merchants, who state that General Ignatief has been arrested at Kamenetz and sent under escort to St. Petersburg.

Suicide of a Reporter.

CHICAGO, Aug. 11.—Newton McMillan, a reporter on the Daily News, shot himself yesterday, probably fatally. It is believed that despondency, because of his inability to gratify expensive tastes on a reporter's salary, was the cause.

A Notorious Woman's Legacy.

NEW ORLEANS, Aug. 11.—Hattie Hamilton, one of the most notorious women in New Orleans, died at Old Point Comfort on Wednesday. She left five hundred thousand dollars to her business agent, a leading merchant.

Yellow Fever in the South.

BROWNSVILLE, Tex., Aug. 11.—There were about 20 new cases of Yellow fever here to-day, all Mexicans. No deaths. There are about 500 cases in Matamoras; two deaths last 24 hours. There are five cases of fever 7 miles up the river at Cortinas Ranch.

Socialists Punished.

BERLIN, Aug. 11.—Bebel Liebknecht, and Hazenclever, socialists, have been condemned by the Leipsic court to two months imprisonmant for excessive abuse and insult to the Federal council. Liebknecnt and Hazenclever are members of the German Reichstag.

Texas Cattle Fever.

CHICAGO, Aug. 11.—The secretary of the Pleuro-Pneumonia commission states that the Texas cattle fever has been advancing southward. It is believed by those best informed that it has been spreading northward till now it has broken out in Pennsylvania.

Bradstreet's Weekly Report.

NEW YORK, Aug. 11.—There were 95 failures reported to Bradstreet's Journal during the past week, 10 less than in the preceding week and 21 more than in the corresponding week last year. Canada reports 10 increase. Special telegrams from trade centres and agricultural regions indicate that nothing has occurred to mar the favorable prospects for good fall trade and abundant crops referred to last week. Rains in the south have menaced the cotton but serious damage has not yet been done. The iron strikers are showing signs of defeat.

Depredations by Apaches.

TUCSON, Aug. 11.—Advices to the 8th report the Apache depredations in the vicinity of Ures fearful. Over two hundred warriors are in the Magatan mountains and make daily raids on the valleys in small bodies, burning crops, houses, and murdering the inhabitants. During the past twelve days 45 persons have been murdered within a radius of 25 miles of Ures. The Indians are all armed with Winchester rifles and use a cartridge stamped U. S. The Mexicans are poorly armed with muzzle loaders. The country is terrorized and business paralyzed.

Don't Want a Duke.

From the Stratford Beacon

The rumor is revived that the Duke of Albany (Prince Leopold) will be the Marquis of Lorne's successor at Rideau hall. We would prefer to see a sturdy British commoner appointed than any marquis, duke an' a' that.

THE AVERAGE FOR AUGUST

MONTHLY REPORT OF THE BUREAU OF INDUSTRIES.

The Condition of the Growing Crops—Wheat, Barley and Oats—Returns for the Province and the County.

The report of the bureau of industries for August contains statistics of the live stock of the province as returned by school section districts on May 31, and tabulated by counties and county groups. It also reviews the condition of crops on the 1st of the month, the progress of haying and harvesting operations at that date, farm labor and the rate of wages, and the state of pastures and live stock in relation to meat supply and dairy produce.

The month of July was very favorable for hay-making, the weather being steady and the temperature moderate, and the bulk of the crop has been saved in excellent order. Clover recovered to some extent from the serious damage done to it by winter exposure and spring frosts, but in the most favored localities the yield does not exceed one ton per acre and the general average is much less. Timothy and mixed grasses were very heavy, and the uniform report from all sections is that no better crop has been gathered in twenty years.

Throughout the western half of the province fall wheat has been remarkably heavy, but it has not escaped the dangers incident to a late season of ripening. Owing to a rank growth of straw and occasional rain storms, the crop lodged badly in many localities just as the grain was beginning to harden, and about the same time, unfortunately, it was struck with rust. As a consequence the sample is not generally as good as was looked for; it is lacking in plumpness and color. The worst effects from those causes are reported from the loamy lands of the southwestern counties—from Essex and the basins of the Thames and Sydenham rivers. In some sections the whole crop has been reaped and saved in good condition, but the bulk of it was either standing or in shock when work was interrupted last week by a rain storm of several days' duration. Late reports say that in many fields the grain has sprouted, but the full extent of damage will not be known for some time. The storm was local, and confined chiefly to the western counties. In the Georgian Bay counties a large acreage has been saved in good order, and the sample is prime. In the Lake Ontario and St. Lawrence and Ottawa counties the crop was badly winter-killed, and what remains will yield less than an average. In the east Midland counties a good crop will be harvested, but not equal to last year's. In the Lake Erie counties, where some grain has been threshed, it is found to yield from 20 to 30 bushels per acre, and correspondents in all counties west of Toronto estimate the yield at not less than 20 bushels per acre. Spring wheat in the eastern part of the province, where it is extensively grown, gives promise of an abundant harvest, but in some districts it is being attacked by the midge, the Hessian fly and rust. It will be ready for reaping generally about the 20th of this month.

Barley is everywhere a heavy crop and a large acreage has been grown, especially in the Lake Ontario and East Midland counties. The grain is uniformly plump and of good color, with a few exceptions where it ripened too rapidly owing to the drought, or where it lodged or rusted. In the western counties the yield is good, but the harvesting season has been unfavorable.

There is a large area under oats, and with the one exception of the Georgian bay counties the crop is reported good all over. The estimates of correspondents range from 35 to 60 bushels per acre. Peas are a good crop in all the northern counties, but elsewhere they have been injured by the bug.

The corn crop is everywhere pronounced a failure. The season has been too wet and cold for it, and though it has made good growth during the past three weeks there is little chance now of its attaining to half an average crop. Beans are chiefly grown in the counties of Kent, Norfolk, Brant and Renfrew. They are generally reported good, but in some localities the crop is worthless.

Potatoes were injured by too much rain early in the season, and later on by the drought. The beetle, too, is about as troublesome as ever. Turnips, mangolds and carrots have only partially come up and a good crop is rare; turnips especially are late, and are badly injured by the fly.

The fruit crop is poor in all the best fruit-growing districts. Apples are good only in the Lake Ontario and River St. Lawrence counties, and there they will not be more than half a crop. Peaches and plums are almost a total failure, pears and grapes are fairly good, and small fruit alone is abundant.

Pastures were good throughout June and the first half of July, but recently they have become parched and bare in many parts of the province. This has been especially the case in the Lake Ontario counties, where in some districts cattle had to be given extra fodder. For this purpose soiling came in good where it could be availed of. Fat cattle are scarce, particularly in the finer classes suitable for export, and there is a disposition to force young cattle prematurely into the market. The dairying interest is less flourishing now than it was earlier in the season, and the milk supply is falling off. The recent rains, however, will doubtless make the pastures good again.

Farm laborers have been scarce, and the demand for them was increased by the general heaviness of the harvest. Wages ran from $1 50 to $2.50 per day, and from $25 to $40 per month with board, and even at these high figures it was difficult to procure men.

The statistics of live stock are as complete as they could be obtained. No estimates have been made of thoroughbreds for sections for which returns were not received, owing to the difficulty of finding an average. It is certain that the full number has not been reported, but it is almost equally certain that some animals entered in the schedules of farmers as thoroughbreds would never obtain registration in a herd book. Following are the returns for the province and for the county of York:

HORSES.	The Province.	The County.
Working horses	339,481	15,704
Breeding mares	72,065	4,041
Unbroken horses	100,504	4,819
CATTLE		
Thoroughbreds	23,297	950
Working oxen	14,245	147
Milch cows	680,651	20,879
Store cattle, over 2 years	272,871	6,798
Other cattle	617,001	16,157
Total milch cows, all breeds	687,037	21,119
" cattle, all classes and breeds	1,608,056	44,084
SHEEP.		
Coarse woolled, 1 year and over	941,744	30,485
Coarse woolled, under 1 year	686,610	22,773
Fine woolled, 1 year & over	158,022	4,502
" " under 1 year	131,364	3,556
PIGS.		
One year and over	257,406	2,225
Under one year	600,589	31,901
POULTRY.		
Number of turkeys	317,784	14,215
" geese	538,922	27,205
" other fowls	4,521,889	180,621

The weather report, which is furnished by the Meterological office, is a register of important facts for the farmer. The addition of eight sunshine recorders to the two heretofore in use will add materially to the value of future reports.

A POLITICAL CATECHISM.

From the Stratford Advertiser.

Q. What is a tory?

A. A man whose motto is: "God save the king, the constitution and the tories."

Q. What is a conservative?

A. One who wishes to conserve old laws, old political systems and worships royalty.

Q. What is a liberal conservative?

A. One who pins his faith to Sir John A's coat tails.

Q. What is a reformer?

A. A follower of Blake and Mackenzie. One who wants to reform all abuses in church and state.

Q. What is the difference between a reformer and a radical?

A. The former would lop off the decayed branches, the latter pull the tree up by the roots.

Q. Which is the party of purity?

A. Both need scrubbing. The dirt is deeper than the skin.

Q. Are they in any respect alike?

A. Yes, both are pure in their own eyes and both are equally greedy of office.

Q. What is the average politician?

A. A mean, tricky, servile, fawning, blatent, domineering, unscrupulous fellow.

Q. How much would the country suffer were he exiled to Siberia?

A. It would be relieved of the biggest nuisance in it.

Q. Then you have no faith in politicians?

A. None whatever. I consider a man a fool who has.

Q. Can't a better state of things be brought about in the political world?

A. I think it might.

Q. How?

A. The press could do a good deal in that direction.

Q. Do you think the press wants reforming?

A. I do.

Q. In what respects?

A. It needs to come back to truth and fair play. Every newspaper scribe thinks he is at liberty to abuse, misrepresent and lie upon a political opponent. Then the people need political instruction. Comparatively few of them understand the merits of any political questions agitating the public mind; and the political organs, many of which are as ignorant as the people themselves, take care not to enlighten them. I'll be bound to say that nineteen out of every twenty who voted at the last election could give no intelligent reason for the political faith that is in them. The press is corrupt and in bondage to party. Party controls it. Water can rise no higher than its level, and as the press is the creature of party, its aims and moral tone can rise no higher than party.

THE FATE OF THE BLONDE BANK CLERK.

A blonde bank clerk went to the island swimming bath on Wednesday afternoon and as the result of his peregrination in the liquid blue the young ladies who were there would like to ask him the following questions:

How the blonde bank clerk with the rimless glass liked the ducking he received from the members of the young ladies swimming class?

If his clothes were worthy of inspection on his reaching the bank?

If the water was cold and didn't make him shivaw?

If his awful brow indicated pent up anger?

If he will ever again appear in his best on the banks to ogle the girls during their bathing hour?

If he has a thorough and honest opinion as to the pleasures of a bath?

If the young ladies were long in determining how to get rid of him?

If the decision was unanimous?

$6.50 A TON.

As a general thing the coal men of Toronto form a happy family. They hold their regular meetings, fix the price, settle what their answer shall be to the great conundrum, Who Pays the Duty? We bow graciously to one another's wives when passing. But for some days—ever since Wednesday's World appeared—there has been a *movement*. Somebody was cutting. The dealers have a great hobby for buggies and fast horses and yesterday they were all driving round like mad. Those who hadn't a buggy took the street cars
