St. Domingo.—Arrivals at the United States from this island report that the Revolution was progressing, that the rebels numbered twelve thousand men, and had taken possession of Anse d'Hainault, Anse a Veau, and Jeremie, and in the latter city have established a provisional government. A number of respectable Haytien merchants and other individuals have been imprisoned: Dr. Lovell, an American citizen is condemned to death. Business in consequence was at a complete stand, and no rates could be collected.

Fire.—A dwelling house near the Abodeau, belonging to Henry Gilbert, Esq., and occupied by two families, was entirely consumed by fire on Wednesday morning. It is understood a stove pipe was the cause.

Steamers.—Mr. Whitney's steamer *North America*, after having undergone extensive repairs and improvements, will resume her trips to Boston, about the 10th April next.—The fine new steamer *Herald*, which is now being fitted up for that purpose will commence plying in the Bay of Fundy about the same time.—The *New-Brunswick*, and other steamers for the river trade are having the necessary preparations made for a summer's campaign on the noble St. John.

Dreadful Murder.—Mr. Charles G. Corlies, who keeps a bowling saloon at 360, Broadway, N. York, was shot through the head a few minutes previous to seven o'clock on Monday evening 20th instant, within thirty feet of Broadway, and in one of the most frequented thoroughfares of that city.—The murderer had not been arrested. The diabolical deed is supposed to have been committed either by a woman who was seen speaking to him about the time, or that she was employed to arrest his attention while a hired assassin accomplished the murder. At present all is mere conjecture both as to the identity of the murderer, and the object for committing the act.

[*From the Royal Gazette, March 22*]

GOVERNMENT NOTICE.

His Excellency the Lieutenant Governor has been pleased to accept the resignation of the Hon. William Black, the Hon. George Shore, the Hon. Frederick P. Robinson, the Hon. William F. Odell, and the Hon. William Crane, as Executive Councillors, and to appoint the Hon. Hugh Johnston and the Hon. Edward B. Chandler, (provisionally,) as Members of the Executive Council.

By order of the Lieutenant Governor.
WM. F. ODELL,
Provincial Secretary's Office, March 21, 1843.

PROVINCIAL APPOINTMENTS.

Robert Payne, John Kerr, John Sandall, Gerardus Clowes Curman, James Dunn, James Moran, and James Gallagher, Esquires, to be Commissioners for the Alms House in the County of St. John.

Le Baron Drury, Esquire, to be High Sheriff of King's County, in place of Ass Davidson, Esquire, deceased.

William Alexander Black, Esquire, to be High Sheriff of the County of Kent, in place of Le Baron Drury, Esquire, appointed to King's County.—*Royal Gazette.*

Yesterday the Hon. Mr. Johnston took his seat in the Legislative Council, pursuant to Mandamus received by the mail on Tuesday: and it will be perceived, with the Hon. Mr. Chandler, has been sworn in provisionally a member of the Privy Council. Messrs. Wilmot and Hazen will not, we believe, take their seats until the close of the session, as the Bill which is temporarily in operation for vacating seats of members, requires their returning to their constituents. As that Bill however has been decided by the highest authority, to be unconstitutional, it will either be altered during the present session, or will become a dead letter, thro' the withholding of the Queen's assent if it is not disallowed.—*Sentinel.*

Quebec, March 22.

The thermometer this morning at sun rise, was down to ten degrees above zero, and it is still freezing in the shade, although the snow is melting in the sunshine. The ice bridge on the St. Lawrence is good, and will probably continue till the end of the month at least. Several of the Canadian farmers arrived in town this morning with fresh fish from the sea coast of the State of Maine.—*Gazette.*

An Indian who reached Three Rivers on Saturday, from Montashaug, a post occupied by the Hudson's Bay Company, states that very little snow had fallen in that direction this winter; when he left about seventeen days back, there was but four inches; within a few miles of Three Rivers he met with hordes of the *Original* or Moose Deer.—*Ib.*

His Excellency the Governor General's health has not improved since yesterday; and his strength has rather decreased.

Government House, 15th March, 1843.

Chocolate Manufactory.—A new establishment for the manufacture of Chocolate has been set in operation in Dartmouth, by Messrs. Mott, and we think with every prospect of encouragement. A good article at a reasonable rate will always find a ready market; and from the specimen we have proved of Messrs. Motts Chocolate, it is not too much to say, that the former object has been realized. The Chocolate, Cocoa Paste, and Prepared Cocoa, are excellent, and we are assured that these preparations can be manufactured fully cheaper compared with quality, than any imported from the United States. We have no doubt when the article is known in the adjacent Provinces, that it will meet with rapid sale—and that the enterprise will be well supported.—*Halifax Times.*

We cheerfully endorse the opinions of our cotemporary of the Times, as expressed above. We have tested the preparations of Messrs. Mott, and think them equal to any article of the kind imported into the Country. We commend the manufacturers to the patronage of the public.—*Nov. Scotian.*

Melancholy Accident.—The schooner Fair Lady, of Sable River, County of Shelburne, Ira Pride, master, with three young men belonging to that place, John R. Spearwater, (eldest son of Peter S. Spearwater, Esq., M. P. P.) Elijah Pride, and Jas. F. Richardson, left Canso on the 10th of last November, where they had been on a mackarel and trafling voyage, for Halifax, but has never since been heard of, and the weather being very boisterous, it is supposed they foundered and that all persons perished. She had been spoken off Liscomb's Harbour, on the 30th of the month. What renders this accident more painful is that Ira Pride, the master, was the only son of an aged widow, and left a wife and two children—the second one born since he was lost. John R. Spearwater's mother was laying a corpse in the house, and was buried on the same day, it is supposed he found a watery grave. Elijah Pride was the youngest son of Mr. Wm. Pride, and was the hope of his parents in their old age. James Richardson was the son of Mr. James Richardson, of Jones's Harbour, owner of the vessel.—*Ib.*

The Late Earthquake.—*Point Petre.*—A St. Croix paper of Feb. 16th, says: The mouth of the harbour of Point Petre, which before the event, was capable of admitting ships of the heaviest burthen, became completely choked up and forever rendered impassible by rocks being forced up from the bottom of the sea. The vessels which were at the time in port, will, it is feared, never be got out—among them many large ships from France, and other vessels from America.

Severe Storm.—New York city was visited on Thursday night by one of the most violent storms that has taken place there, in the month of March, for many years. The wind blew a perfect tempest. The snow fell to the depth of nearly two feet or three inches. The narrow streets are said to be nearly impassable to vehicles drawn by horses. Much damage was done in several parts of the city. A house was blown down, and a woman and child killed, and several children and a man dangerously wounded. The man was dug out of the ruins the next morning. The building that was blown down was undergoing repairs. It fell over on to a small wooden tenement, crushing it and its inmates. It was a most unfortunate disaster. A man was found in another street, in a snow-drift, quite dead—probably from exposure.

The Great Western sailed from New York on Thursday afternoon, and must have encountered this storm when about twenty miles out from Sandy Hook.

Foreign Coin.—Previous to the adjournment of Congress, an act was passed which renders legal, a tender of money in the gold coins of France and England. The coin of France is to be of not less than eight hundred and ninety-nine thousandths in fineness, at ninety-two cents and nine-tenths of a cent per pennyweight; that of England not less than nine hundred and fifteen and a half in fineness, at ninety-four cents and six tenths of a cent per pennyweight; silver coins were likewise legalized, as the Spanish pillar dollars and the dollars of Mexico, Peru and Bolivia of not less than eight hundred and ninety-seven thousandths in fineness and four hundred and fifteen grains in weight, at one hundred cents each.

Also, five franc pieces of France, of not less than nine hundred thousandths in fineness, and three hundred and eighty-four grains in weight, at ninety-three cents each.—*New York Evening Post.*

An Old Subscriber.—We had a call yesterday, from a Gentleman from Granby, 92 years of age, who stated that he had been a subscriber to the Courant for *seventy years!* We have frequently had occasion to allude to old subscribers to our paper, but we doubt whether there are any living who have taken it for so long a time as the gentleman above referred to.—*Con. (Hartford) Courant.*

Passengers from New Orleans have been brought to this City for the extraordinary fare of $15 in the cabin. Stage fare to Philadelphia is $10; and contingencies of $5, and we have 2300 miles travel for 30 dollars.

Voyage of Discovery to China.—H. M. S Samarang, Captain Sir E. Belcher, which arrived here on Sunday morning, sailed on Thursday night on her voyage of discovery and scientific enquiry to the China Sea and the eastward coast of Asia. The Samarang came to this port for the purpose of receiving one of those beautiful instruments, invented by our townsman, R. W. Fox, Esq., for ascertaining the dip of the needle and the magnetic intensity of the earth, either on shore or at sea, with a degree of accuracy which is given by no other instrument. Although this arises in a great measure from the principles applied by its talented inventor, yet much is due to the surprising delicacy of the workmanship of Mr. William George, of this town, who has constructed these instruments for the Government expeditions and observatories in most parts of the world. During his stay, Sir Edward Belcher has been employed with Mr. Robert Fox in an extensive series of magnetic experiments, both on board the Samarang and on shore, by which the correctness of the instruments has been determined, and the variation of the needle at Falmouth found now to be 25 deg. 8 W., the dip being 69 deg 1. The manner in which this expedition has been fitted out is in the highest degree creditable to the Government. No expense has been spared in furnishing the gallant commander with instruments of the most accurate kind. It may be interesting to state that the Samarang is to proceed to the Cape of Good Hope, when the experiments tried at Falmouth will be repeated, as they will also at Singapore and Hong Kong. She then proceeds to survey the entire coast of China and the adjacent islands. She is to visit Japan, and to trace the Asiatic continent as far north as Kamschatka. Her officers are instructed to collect all the objects of natural history they can; and for the purpose of ensuring the strictest fidelity as to the general aspect of the coasts and country, and for preserving illustrative views of the several places to which the Samarang may proceed, Sir E. Belcher is furnished with a most complete set of Daguerreotype and Calotype apparatus, in the successful use of which he has been receiving instructions from Mr. Robert Hunt, Secretary to the Royal Cornwall Polytechnic Society, whose attention to these arts has well qualified him to do so.—*Falmouth Packet.*

Among the 'on dits' in circulation at the leading political clubs, is that Sir James Graham, Secretary of State for the Home department, is likely to be selected to succeed Lord Ellenborough as Governor General of India. We mention the rumor, but vouch not for its correctness; still the circulation of the report is in circles which ought to command the best information.—*Morning Herald.*

Militia.—The militia regiments for the different counties of England, it is said, will be raised early in the course of the ensuing spring, and a ballot will take place, when they will be regularly embodied, and called out for twenty eight days' training and exercise. Preparations are already making to carry this object into effect.

The culture of coffee, which, about fifty years ago was unknown throughout the whole continent of South America, now produces, in Brazil alone, the enormous quantity of 135,000,000lb, or something more than one-half of what annually finds its way from all quarters into the European markets.

The number of horned cattle in the United Kingdom is estimated at 7,000,000, that of sheep at 32,000,000. Taking the former to be worth £10 each the latter 25s., the total value will be £110,000,000.

Since the new the new tariff has come into operation nearly 1000 bullocks have been landed at the port of Southampton from France and Spain. It is expected that, before the spring has passed, the number will be doubled, as arrangements have been made for larger importations than have hitherto taken place.

Melancholy.—We are informed that the schooner Mary Jane, of and for Grand Manan, from Halifax, was driven ashore during the night of Friday the 17th instant, in the snow storm, at Long Island Bay (Grand Manan) a short distance from the residence of the master, Capt. Daniel Gatcomb, and, melancholy to relate, all on board were drowned! It is supposed the crew consisted of three persons, one of whom was Mr. Sidney Bancroft, of Grand Manan, and as some female wearing apparel has been found on the shore, it is conjectured there was a woman passenger on board. The wreck of the schooner was discovered the next morning, broken in two near Capt Gatcomb's dwelling, and sundry articles belonging to the deceased were picked up. Capt. G's body was found on Monday. He was well known as an industrious honest man, and his loss will be severely felt by a large family, who have been suddenly called upon to lament their bereavement.—Mr. Bancroft, we understand, was also a deserving man, and has left a family.—*Courier.*

AMERICAN NEW'S LETTER AND EUROPEAN INTELLIGENCER.

Enlarged to the extent of Ten additional Columns.

THE above Newspaper, now enlarged Ten additional columns, which was established in July, 1842, is regularly published at Liverpool expressly for transmission by every Steam-ship sailing from any port in Britain to any port in the United States, and its leading feature is to give, *at one glance*, an account of every important event that has occurred in Great Britain, Europe, or Asia, in the interval between the sailing of each steam-ship, whether in politics or commerce—a correct and comprehensive Shipping List, in which will be found a faithful record of the arrival and departure of American vessels at and from all the British, European, and Asiatic ports—together with notices of such casualties or disasters as may from time to time occur—a complete Prices Current, in which the greatest care is taken to give the *latest* reports of the various descriptions of American produce, from the most unquestionable sources—thus combining, in *one* sheet, a Newspaper, Shipping List, and a Prices Current.

The annual subscription to Charles Willmer's American News Letter is 12s. 6d. sterling. Orders and Subscriptions will be received at any of Messrs.
