our beloved province, the most trying evil that ever affected it or any other country. He likewise showed the purposes to which the money that is raised by the different branches of the league is put. The following resolutions were unanimously adopted:—

Moved by Mr. Wm. Symington, seconded by the Rev. O. G. Cullamore, and *Resolved*, That the traffic in intoxicating liquors is the prolific source, from which emanates a very large proportion of the destitution, immorality and crime which is prevalent in our country.

Moved by the Rev. O. G. Cullamore, seconded by Mr. Wm. Symington, and *Resolved*, that this meeting approves of moral suasion in the advancement of the Temperance cause, it is nevertheless their candid and deliberate opinion, that apart from the interference of the Legislature, with the Liquor traffic, it is inadequate as a remedy for national intemperance.

Moved by Mr. Stephen Yates, seconded by the Rev. O G. Cullamore, and *Resolved* That as union is strength, & co-operation in the Temperance cause is necessary to success, we form ourselves into an association to be styled the "Colborne Union Branch of the Canadian Prohibitory Liquor Law League," and to be guided by its constitution

The following persons were appointed as officers and Committee to carry out in the most efficient manner the objects of the League, with authority to add to their number.

President, Mr. Stephen Yates, Vice-President, Robt. Campbell; Treasurer, Robt. Shannon; Secretary, Wm. Symington.

Committee: George Neaves, William Elliott, John Campbell, Hugh Moreland, and James Jones.

Further Resolved, That the Committee now named be authorized to expend any portion of the funds necessary for promoting the objects of the association.

That the proceedings of this Meeting be published in the Huron *Signal* and the *Spirit of the Age*

WM. SYMINGTON, Sec'y.

Colborne, 27th Dec., 1853.

To the Editor of the Huron Signal.

SIR,—It may not be unacceptable to your readers in the rural settlements of Huron, who welcome the weekly visits of your journal, as those of a domestic friend, to find in your columns at this season of general festivities and merry-makings, a reference to one domestic scene of deep and effecting interest.

The writer has no means of ascertaining whether the religious element is ordinarily exhibited in the same way. Yet, if it be not, the example may fairly be admitted to be worthy of imitation. In this view of the matter, the parties concerned will be the first to impute the motive of this publication, to the one here claimed for it, namely: an humble tribute of worth, and a desire to encourage to similar observances.

The facts are briefly these:—On Sabbath evening last, being the first day of the New Year, the amiable and respected Laird of Gladswood in the Township of McKillop, and the oldest inhabitant in that florishing settlement, Archibald Dickson, Esq., gathered around him in a domestic re-union, the various members of his extensive family connexion to the second and third generations. Independently of the adult portion of the crowded assembly, no fewer than *twenty-four* juveniles of both sexes enrololed him as their grandsire, and wished him a happy New Year. After a plentiful and luxurious repast, several hours were most agreeable spent in the recitation and singing of "psalms, hyms and spiritual songs," on the part of boys and girls, in prayer, reading the scriptures and religious conversation on that of the parents and grand-parents. Everything was in strict keeping with the sacredness of the day and the solemnity of the meeting. What spectacle more pleasing than that of a family so circumstanced, blending the ties of consanguinity in the holier and more enduring sympathies of christian love! May the time soon come when every family shall have an alter erected to the Gods of the families of the whole earth, and who from the vitality of personal and family religion there shall go forth the true principles of our national prosperity, co-incident with our material and industrial interests certainly not subversive of them.

I remain Mr. Editor,

ALIQUIS.

Goderich, January 4th, 1854.

FIRE AT QUEBEC.

We were informed by special telegraph despatch from Quebec, Saturday evening, that a whole block at the foot of Mountain Street Lower Town, including the Quebec *Gazette* office, and the store of Messrs. Shaw & Torrance, was destroyed by fire on the night of Friday The fire broke out in the grocery store, and was not discovered until about 2 A M. The printers had been at work in the *Gazette* office at 12, and all was right when they left.

It was supposed that the origin of the fire was otherwise than accidental. Every thing in the two buildings was entirely destroyed, including Mr. Middleton'book store, printing office and bindery. It is supposed that the insurance is considerable. We are sorry to learn the misfortune that has befallen Mr. Middleton, but have no doubt that the old *Gazette* will rise like a phœnix from its ashes, more rigorous than ever. — *Globe.*

PROPOSALS AN INLAND SEA.— The interior of Australia, a barren and sandy desert, has been found to be considerably below the surface of the sea. It is now proposed to employ British convicts in cutting a narrow canal from the ocean to the desert, a distance of about 250 miles, when it is expected that the rush of water would be so great as to widen the canal and cause the formation of an inland sea almost as large as the Mediterranean. to the incalculable benefit of a vast extent of territory at present wholly useless.

THE SOAP PLANT.—From a paper read before the Boston Society of Natural History, it appears that the soap plant grows all over California. The leaves make appearance about the middle of November, or about six weeks after the rainy season has fully set in; the plant never grows more than a foot high, and the leaves and stock drop entirely off in May, though the bulbs remain in the ground all summer without decaying. It is used to wash with, in all parts of the country, and by those who know its virtues, it is preferred to the best of soap. The method of using it is merely to strip off the husk, dip the clothes into the water, and rub the bulb on them. It makes a thick lather, and smells not unlike brown soap. The botanical name of the plant is Phalangium pomardanum. Besides this plant, the bark of a tree is also used in South America, for the purpose of washing. Several other plants have been used in different countries as a substitute for soap.

BOOTS & SHOES.

MADE BY B. GREEN,

West Street, Goderich, at the sign of the Swinging Boot.

LADIES and Gentlemen listen to the news Green still makes up first rate Boots & Shoes And as they're good, why should we draw back, So now for his shop—hurrah, clear the track!

His Boots keep our feet from wet and from cold, By wearing the same you will live to be old; Besides they last long, why should we draw back, So now for his Shop—hurrah, clear the track!

He has lived in this Town these two years more,
Thanks his friends for their custom, it increased "galore,"
The work being good, why should we draw back, So now for Green's Shop—hurrah, clear the track!

Two journeymen wanted.
