SOME MINING STOCKS RISE.

War Eagle, Republic and Payne All Advance--Something re Toronto and Western.

A DESCRIPTION OF ATHABASCA.

Transactions and Closing Quotations on the Mining Exchanges —General Mining News.

Some of the high priced mining stocks were strong yesterday. War Eagle rose 4 points, Republic 4½ and Payne 3 points. Dardanelles is rising.

Toronto and Western.

The reason for the strength of the Toronto and Western stock is the approaching flotation of the Sirdar mine and adjoining locations at $1,000,000. This capitalization will be divided into one million shares of $1. Of this 250,000 shares will be in the treasury, and 100,000 of this will be sold at par to erect a stamp mill. The remaining 150,000 will be kept for further development, and 750,000 shares will be the price paid by the Sirdar Company to the Toronto and Western for the purchase of these properties. Of these 750,000 shares 600,000 will be divided into dividends to the holders of Toronto and Western stock. As the treasury shares are to be sold at $1 this would make the dividend at the rate of $3 per share. Besides the Sirdar property the Toronto and Western owns 11,000 acres, and its policy is to continue as a parent company to float subsidiary companies.

Mikado Gold Bricks.

Mr. N. Macmillan, manager of the Mikado mine, arrived in town yesterday morning by steamer Sport, Capt. Thompson, bringing with him gold bricks weighing over 50 pounds, valued at $13,600.—Rat Portage News.

He Believes in Seine River.

Mr. Frank D. Fowler, who is shortly to open up some Seine River properties for St. Paul capitalists, recently spoke to The St. Paul News-Tribune in very glowing terms of Northwestern Ontario's gold fields, and especially of the Foley, Ferguson, Golden Star, A. D. 2, Decca, Olive, Alice A. and Lucky Coon mines. Referring to the Swede boys' property, he said:

"I made three examinations of this property during the summer of 1897, at which time only the most meagre development had been done, in the shape of a cut on E. 237. At that time I took 40 samples from right across the cut, and 23 of them showed free gold in the pan. The samples from this cross-cut had an average panning value of from $12 to $15 a ton right across the entire 15 feet. Some of the samples went as high as $100 a ton. I found further that the belt in which this cut was made was approximately four rods in width and that it extended over a length of four miles. I found moreover that it extended west to the Olive. As to the permanency of these deposits, I believe the presence of so much copper pyrites justifies one in making the most sanguine statements. I think I speak conservatively when I say that this location warrants the expenditure of a large sum of money for development, and from the surface conditions I can say that a small mill can be supplied with sufficient ore from the cross-cuts to supply ample money for development."

In Pass Camp.

One of the coming camps of the Boundary district of British Columbia is Pass Camp, which lies about eight miles to the north of Greenwood City. The camp is reached by following the Summit road via Eholt. The ores in the camp occur in very large bodies, and good values in copper and gold have been obtained at the surface. Arrangements are being made for the extensive development of some of the most promising of the properties in this camp. Among the best known of these is the Rambler, owned by the Everett and Spokane Company. A preliminary 40-foot tunnel, run to cross-cut the ledge, is all in ore. Karl Nelson will open the Golden Giant and Northern Belle, on which there is already a promising looking 90-foot tunnel. James Estep will work the Number 3, and the Side Hill Star will also be developed."

Details About the Athabasca.

The May issue of The British Columbia Mining Record, just to hand, devotes considerable space to a description of the Athabasca mine at Nelson, B.C. It prints four columns of reading matter, together with half a dozen cuts, showing the position of the mine, exterior and interior of the stamp mill, tramways, etc.

The property consists of the following propositions: Athabasca, Algoma, Manitoba, Alberta, Triangle Fraction, Ruby Fraction, Loretto Fraction and Rose Fraction. The group was located in 1895 and taken over in April of last year by "The Athabasca Gold Mine Company, Limited," with a capital of £200,000 in £1 shares, and offices at 46 Queen Victoria-street, London, England. The mine lies on Morning Mountain, 2700 feet above the town of Nelson, and the mill is located in Give-Out Creek, about 1300 feet below the mine.

Up to the present time only two veins have been worked to any extent, and both have been opened by the same tunnel, which is now in 700 feet, the last 300 feet of which have been on No. 2 vein. At the present time there is said to be at least 500 feet of good stoping ground between this point and the surface. For the distance of 300 feet, as opened by the tunnel, the vein has proven to be continuous, varying from six to 24 inches in width and carrying persistently gold values varying between $40 and $100 per ton. The vein comes away cleanly from both walls and consists of a bluish quartz gangue carrying heavy galena, zinc blende and ordinary iron pyrites, with free gold often visible. The zinc appears to be the richest gold-bearing sulphide and clean samples from it will assay over $300 to the ton and sometimes much higher.

The general features of the vein are, on the one hand, that it is small, that it lies flat and is frequently faulted; on the other, that its values are persistently maintained at a high level throughout the entire length of the developments, that it breaks easily from the walls, and that as depth is attained it is pitching more steeply. If this increase of pitch should be maintained the cost of mining will be greatly diminished.

At the mine the development has hitherto be carried on by hand, assisted where possible by the use of steam drills. The ore is trammed from the tunnel on a short tramway to an ore bin with a capacity of 80 tons, which is at the head of an inclined tramway, which takes it by gravity to a second ore bin within 100 feet of the mill. The mill is a 10-stamp Fraser & Chalmers, driven by water power from Give-Out Creek.

From what has been said of the character of the ore it will have been surmised that the milling of the same presents some difficulties. Fairly satisfactory results have, however, been achieved, and a close study is being made of what is needed for a more perfect recovery. As soon as this is clear additional machinery will be erected.

The following results of the March run are a fair sample of the work of the mine: In that month the mill ran 30 days and seven hours, and crished 465 tons. The result was bullion recovered to the value of $8157 and concentrates valued at $2125, making a total of $10,282. The average value recovered, including bullion and concentrates, was $22 to the ton for the month of March. The April mill runs gave over $23 to the ton.

The Gold Hills Company.

At the meeting of the directors of the above company, held yesterday, Mr. Hugh Sutherland was elected to a seat on the board to represent the McKenzie-Mann interest.

A New Mining Firm for Hamilton.

Cleversley & Co. have opened up offices at 64 King-street east, Hamilton, where all kinds of mining stocks can be obtained and disposed of. Having personally examined the principal mines in B.C., they can give valuable information to their clients. If you have any stocks you desire to purchase or sell, write them before going elsewhere; they are thoroughly reliable, and will make big money for you. Their advice regarding the immediate advance in White Bear, Victory-Triumph and Minnehaha made large sums for their many clients. Write them for information.

Messrs. Currie & Kiteley, in their daily review on mining shares, say: We still consider that the cheaper stocks offer the best chance of profit for a quick turn. White Bear, Silver Bell, Northern Belle and B. C. Gold Fields should show a point or two to present investors. For permanent investment, to be held for dividends, Winnipeg, Minnehaha and Hammond Reef are the safest and surest. Send for our weekly confidential letter. It will pay you. We buy and sell all mining shares on commission on the Toronto Mining and Industrial Exchange (Mining Section of the Board of Trade).

The Iron Mask.

Rossland Miner: Work on the Iron Mask has been somewhat interfered with during the progress of the trial of the great suit, but is now going on favorably. The force in the mine, which is now about 40, will be increased at once and very shortly be doubled, and active shipments will be made from this time on. The vein now in dispute in the courts between the Centre Star and the Iron Mask people is only a small part of the property, as the management claims to have five other veins larger and richer than the one in dispute. The ore that is now being shipped, and that will be shipped in much larger quantities in the future, is rich and the smelter returns are satisfactory in every respect.

Republic Mining Camp.

The following extract is taken from The Republic Miner of May 6. In an article headed "The Great Canadian Invasion, Why Millions Are Coming Over the Line Into Republic Camp," the writer deals with those who have been responsible for bringing the camp into notice, and after reciting the names of large operators, the following words occur:

"Then follow a number of brokers who have had a great influence in exciting and maintaining the movement towards Republic among the Canadians. Among these are Gainsha & Sons of Spokane, the senior member of the firm having spent all of the late winter in Toronto and Montreal; Bolster & Gooderich of Spokane, both of whom are Canadians, and who have acted wisely in handling only stocks of the best repute among their countrymen; C. D. Rand of Spokane, another Canadian who has extensive connections across the line; De Lashmutt & Rutter, C. F. Clough & Co., Charles Liftchild & Co. and N. B. Buckler of Spokane, being also on the list of houses who have cultivated the Canadian fields successfully. Here in Republic we have H. L. Percy, who does a large Canadian business through his correspondent in Toronto, E. Gartley Parker. Parker, by the way, is perhaps the most extensive advertiser of Republic stocks in Toronto or Montreal. He was formerly in Rossland, and is an Englishman by birth."

ONTARIO CABINET MEETS.

Negotiations for the Surrender of the Power Monopoly at Niagara Have Been Closed, as Stated.

The Ontario Cabinet was in council yesterday afternoon, all the members being present excepting Hon. Messrs. Dryden and Davis. The Attorney-General stated that the business was entirely of a routine nature.

The disposal of the printing contract will not likely come up until two weeks hence. The figures in connection with the Government printing, with the purpose of obtaining statistical details for the past five years, are being collected, and details are being very thoroughly investigated.

The matter of power from Niagara Falls did not come up at all at the meeting. The negotiations for the surrender of the monopoly held by the American company have been concluded, and are exactly as stated in The World a few days ago.

HOW TO KEEP YOUNG.

Chicago Scientists Have Experimented Successfully on an Old Dog and Some Humans.

Chicago, May 16.—The Tribune says: A discovery which, it is claimed, solves the problem of circumventing old age, has just been made public by Professors Joseph R. Hawley and Alexander C. Wiener of the Chicago Clinical School.

The return to youth, it is asserted, is produced by hypodermic injections of the lymphatic fluid of animals, particularly young goats. The discovery was made a year ago, and subsequent secret demonstrations of its efficacy are asserted. In one of his experiments at the school, Dr. Hawley administered hypodermic injections of the fluid from the lymphatic glands of a goat to a dog known to be 14 years old. The dog was watched carefully for two months; at the end of that time the animal was as lively as a puppy. A number of human beings, it is said, have been experimented on in Chicago in the same way, and with the same results.

POOR SEASON FOR FISH.

The Spawn of Many 'Lunge and Bass Will Be Lost.

Peterboro Examiner: The maskinonge and bass in the spring of the year make for the shallowest waters to deposit their spawn, and the 'lunge have left their spawn this season in places which will be dried up when the water falls, thus destroying all chances of propagation. This, therefore, will be a disastrous year for the propagation of the 'lunge. The bass are now going up to spawn and a like fate will befal them, as the waters are still above high-level mark. Those lakes with rockbound shores will, of course, suffer less than Chemong and others in that vicinity.

The Indians say that the water has dropped a foot and a half already, and the froggers state that they have found vast quantities of spawn in pools where the young will unquestionably perish.

47th Anniversary of Elm-St. S. S.

Next Sunday Rev. W. Lloyd, D. D., of New York city will preach the anniversary sermons of the Elm-street Methodist Church Sabbath School both morning and evening. Those who have heard Dr. Lloyd on a former occasion will be delighted to hear him again, and those who have not had the pleasure of hearing the eloquent divine will be pleased to sit under his magnetic power. Dr. Lloyd is a gentleman of rare ability, being in the front rank on the platform or pulpit. He will also lecture under the same auspices on the following Monday evening at 8 o'clock in the same church; subject, "The Eternal City, Rome," illustrated by stereopticon views, assisted by Mr. Whittemore. This will be a very instructive lecture and a rich treat, for the Doctor has quite recently visited Rome.

Conservatism in Ward 6.

A meeting of the Liberal-Conservative Association of Ward No. 6 will be held this evening at Sampson's Hall, corner Sheridan-avenue and Dundas-street, at 8 o'clock. This is the last regular monthly meeting of the season of the association, and all Conservatives of the district, whether members of the association or not, are invited to be present. Addresses will be delivered by Thomas Crawford, M.L.A.; J. J. Foy, M.L.A.; A. F. Campbell, ex-M.L.A., and others. An enjoyable and profitable evening is expected.

At the Assizes.

John Gowans was arraigned in the Criminal Assizes yesterday on a charge of criminal assault preferred by Ethel Seymour, a 15-year-old girl who lives at 288 Bathurst-street. The alleged offence is said to have been committed on Dec. 31 last. Counsel on both sides addressed the jury last evening. Mr. Justice Robertson will deliver his charge this morning.

The grand jury returned a true bill against Charles Yeomans, William Yeats and Thomas Graham on a similar charge.

Changes in Grand Trunk Officials.

J. Wilson of London has been appointed district superintendent of buildings and bridges of the Grand Trunk Railway, with headquarters in Toronto. J. Sheedy having resigned. W. Kirkpatrick of Hamilton has been appointed to Wilson's position, that of district inspector.

A CASE IN QUEBEC

A Montreal Man Finds a Way Out.

The Secret of Treating Diseases of the Bladder — "Worth Their Weight in Gold"—Dodd's Kidney Pills.

Montreal, May 16.—It was not generally known here until the publication of Mr. John H. Barber's statement that troubles of the bladder were closely connected with disordered kidneys. But since his remarkable cure by the use of Dodd's Kidney Pills reported recently the fact has excited much attention.

Mr. Barber said at the time: "I suffered for two years with bladder and kidney troubles, and could get nothing to give me relief.

"I suffered more than I can tell, till I began using Dodd's Kidney Pills. I used only a few boxes, but they made me a strong and healthy man.

"Dodd's Kidney Pills are worth their weight in gold."

The cause of bladder trouble lies in the fact that the kidneys fail to dissolve the gritty particles brought in by the blood. These irritate the lining of the bladder, causing inflammation and if allowed to remain gather into a ball or "stone."

Therefore restore health to the kidneys first.

The grit is then dissolved in the kidneys and its further escape to the bladder cut off. This, then, is the secret that Mr. Barber solved so successfully.

Use Dodd's Kidney Pills and insure perfect health to the kidneys.

Everything else works in harmony once the kidneys are working perfectly. The blood is kept pure while the impurities are easily and freely drained from the system.

Dodd's Kidney Pills are for sale by all druggists at fifty cents a box, six boxes $2.50, or sent on receipt of price, by The Dodd's Medicine Co., Limited, Toronto, Ont.

EVERY DAY TRIUMPHS.

Every Time, Every Place, Every where.

DOAN'S KIDNEY PILLS TRIUMPH!

There's Proof of This in London, Ont.

Step by step onward.
Day by day confidence increases.
Success merits reward.
London people appreciate a good thing.
They praise it when they find it.
No praise too great for Doan's Kidney Pills.
The bad-back wonder-workers.
Backs that ache—ache no more.
Strength to weak backs has been restored.
It's just the same if they are lame—the lameness goes because it cannot stay.
Bad backs are but bad kidneys—that's why Doan's Kidney Pills cure them.
Easy to prove that this is so.
Here are two London ladies who want to say something for Doan and his Pills. One is Mrs. Jane Reding, 435 Gray-street. She says:
"I highly recommend Doan's Kidney Pills. I have had a weak and painful back for a long time, and until I took this reliable kidney medicine was unable to secure relief. They acted like magic, removing all my troubles and restoring me to health."
The other is Mrs. Taylor, 755 York-street, and she says:
"For years I have been afflicted with kidney troubles, but now am pleased to say that Doan's Kidney Pills which I got at Strong's drug store in February last cured me, removing the pain from my back, and restoring my kidneys to regular natural action."
Doan's Kidney Pills, 50c. a box, or 3 for $1.25 at all druggists. The Doan Kidney Pill Co., Toronto, Ont.
Ask for Doan's and refuse all others.

WILL LADY BUCKLEY ANSWER?

Titled Woman Said to Be in Canada Looking for Her Niece—A New York Romance.

New York, May 16.—In what manner Lady Buckley became separated from her niece remains to be learned. The odd part of the story is that the niece, finding herself friendless and resourceless in New York, answered an advertisement for a lady's maid, was hired as such, and is now a guest in the home of her erstwhile employers, while they are advertising for her aunt, says a morning paper. Here is the advertisement:

If Lady Buckley, who is in Canada, looking for her niece, will write to F., 56 East 77th-street, New York city, she will find her. Canada papers please copy.

Mr. and Mrs. James P. Heath probably looked up the Buckley family record before they gave full credence to the strange narrative of the prepossessing girl of 15 whom Mrs. Heath had selected from among those who had answered her advertisement for a lady's maid. Mr. Heath is the proprietor of a storage warehouse at No. 102 East 63rd-street. His home is at No. 56 East 77th-street, the address mentioned in the advertisement for Lady Buckley. Lady Buckley's niece—her name cannot be learned, because Mrs. Heath refuses to divulge it—had no references, but she mentioned the names of several well-known New York families, and so engaging was her personality that she secured the desired position.

TEN REASONS WHY The stock of the Rainy River Gold Mining Co is sure to be a winner for the subscribers
(1) The Directors are all active, experienced, careful business men.
(2) The Company own large areas of most carefully selected properties, with rich mineralization.
(3) The properties are all easily accessible from Rat Portage and convenient to railway and lake for operating and the shipment of ore to the custom mill.
(4) The immense ore bodies on the properties are free-milling, and in every instance (in the Sultana, Regina, Mikado, Sentinel and other mines in that camp) it has been proven that the ore maintains its character and becomes richer and veins grow wider with depth.
(5) The Company have broad powers and are mining, purchasing and developing properties, buying and selling prospects, mines, stocks, ores and minerals, operating as brokers and promoters, etc.
(6) The Company are building, for sale, as well as for their own use, one of the most complete, demonstrated ore mills now in the market.
(7) They have their own steamer for carrying on the work of prospecting, development and mining on properties scattered over the islands and shores of the Lake of the Woods.
(8) The Company will begin within a month shipping ore from several of their properties to the Keewatin custom mill.
(9) They expect to put one of their own new patent mills on at least two of their properties during the summer.
(10) There are ten more reasons as important as the above, but they are of little consequence to you, reader, unless you have stock in the Company.
OFFICES-- RAT PORTAGE, ONT. 54 YONGE STREET, TORONTO. 71 BROADWAY, NEW YORK.
