AROUND TOWN

ON SATURDAY EVENING some young men evidently under the influence of the ardent, attempted to force an entrance to the Ladies Academy. They were frightened away, however before their purpose was accomplished.

SOCIABLE—The young ladies of the Methodist Mission Band intend holding a sociable in the basement of that church on Monday evening next at 7 30. A short programme has been prepared and light refreshments will be served Admission 10 cents.

BAND CONCERT.—The Band of the Household Troops of the Salvation Army had a concert in Music Hall last evening The Band played in good form and several solos were sung by the bandsmen In spite of the bad weather the attendance was large

REMOVAL—Mr. T J. Horsler, has moved into his new store on Lower Main street The fine plate glass front shows to advantage the large and varied stock of cloths and his increased facilities for working will enable him to fill orders with despatch. This is now one of the finest stores in Lower Sackville.

TEMPERANCE LECTURE.—Mr. H. B. Hetherington, lecturer of the Grand Division, Sons of Temperance of New Brunswick will address a Gospel Temperance meeting in Bethel meeting house on Sunday evening next at 7 30 All are invited. Silver collection in aid of the lecture fund

Mr. GEO. DOBSON of the Enterprise Foundry Co. Sackville, has contracted with a party at Pictou to build him a schooner fit for the Green and fishing business. His many friends will be sorry to part with Mr. Dobson. The POST and his host of friends wish him success in his enterprise.

THE NEW DYNAMO of the Sackville Electric Light Co was put in operation for the first time last Saturday. The Dynamo, which embodies several improvements, was made by A. McPherson & Co. Oxford, from designs by Mr. Fred Harris, of the Electric Light Co.

CHURCH SERVICES.—Rev. Dr. Stewart will hold Divine service in Lingey Hall, on Sunday afternoon, at 3 o'clock. The public are cordially invited. Methodist services will be held on Sunday, March 30, at Andersonville 10 30 A M, at Cookville 3 P M—Methodist, Lower Sackville, 11 A M, F W. Harrison; 7 P M., W. I. Bartlett. Upper Sackville, 3 P. M. F. W. Harrison.

THE attention of the Halifax S. P. C. A. has been directed to the case of a young Sackville, N B., girl who is suffering with an internal complaint, in a boarding house on Upper Water street. She is without money or friends. The secretary had her removed to the hospital. The girl is of very respectable family, one brother being a barrister in New York, but through illness became almost destitute—*Halifax Recorder*.

THE PUBLIC are indebted to the ladies of the W. C T U. for the intellectual treat enjoyed in Music Hall on Tuesday evening. The lecturer, Mrs Laura Ormiston Chant, is a graceful fluent and at times eloquent speaker, and a devoted apostle of practical Christianity Her delineations of phases of English life were at times amusing, at times pathetic, and always interesting. Mrs. Chant is a woman of remarkable ability, and if she has any fault as a lecturer it is perhaps that she is rather too conscious of that fact.

Dorchester Penitentiary.

Warden Forster has returned from Ottawa where he was summoned by the Minister of Justice to meet a deputation of the Woodenware Manufacturers of the Dominion, who complained that their goods were being undersold by the goods manufactured by convict labor at the Maritime Penitenriary, and prayed that such manufactures be discontinued. Warden Forster, by direction of the Minister, had an interview with Mr. Eddy, of Hull, and his manager, who represented all the woodenware manufacturers in the Dominion, except the Company at Round Hill Annapolis Co. The result of the interview was that the Eddy Manufacturing Co. are to control the sale of all pails manufactured at the Dorchester Penitentiary for one year at a fixed price. There does not appear to have been much cause for alarm on the part of the manufacturers; for although the pails made at the Maritime Penitentiary are said to be the best manufactured in Canada, the supply would not go far toward satisfying the demand, as the annual out put of pails at the Penitentiary is only from 1500 to 1800 doz. The Penitentiary workshops also turn out, yearly, about 3000 nests of butter-tubs—three in a nest— and about 200 dozen wash-boards.

The number of prisoners in the Penitentiary, at present is 181—the largest number ever confined there at one time. During the winter, the prisoners have cut and hauled out 3700 posts or piles for renewing the stockade. This number is sufficient to renew two sides of the fence. The piles are 25 feet long and about seven inches in diameter at the small end. They are set in the earth to a depth of about six feet, and receive a coat of coal tar two feet below the surface and one foot above. One side of the stockade was renewed last summer and two other sides will be completed as soon as the frost is out of the ground. The remaining side has not decayed as rapidly as the others and is thought to be good for another year.

—D. A. Murray formerly of Dalhousie College has been appointed to an important position in the New York University.

—Lady Tilley, in accordance to her usual custom presented each member of the House at Fredericton with a bunch of shamrocks on St. Patrick's day.

LOCAL MATTERS.

A MEETING of the provincial school teachers will be held in Moncton June next.

MR. MARTIN DOWLING of Albert Co. and one of the old residents of Moncton died on the 24th.

MR EDGETT has commenced work on his new schooner at Moncton. She is to register 125 tons.

AMHERST TOWN COUNCIL has accepted the offer of the Canada Electric Co to light the streets for 1,500 per year.

MR. GANONG, of the Lamy, Amherst has put in an electric annunciator with 50 bells connecting the office with the rooms

VESSELS are in demand in Albert Co. At Waterside there are 1000 cords of wood and several cargoes of piles waiting to be shipped

MONCTON is to expend $2000 in laying asphalt sidewalks. The persons whose sidewalks are laid will pay one half the cost.

MARSHALL THIBIDEAU has resigned as chief of the Moncton Police His place has been filled by Mr. Charles Foster a former policeman,

JOSEPH PIMAGENO, an Italian laborer, was sent to the penitentiary for two years for stealing a watch and $25,00 from a workman at Tidnish

J R. LAMY has purchased the farm of the late S Freeman Bent, about three miles from Amherst, and will use it as a stock farm for his Jersey's and trotting stock.

AN EMPLOYE of the Moncton *Times* has discovered that Col. Bob Ingersoll, the infidel writer, stole a passage for his book from a sermon delivered in 1689

THE SUMNER Co of Moncton has purchased for the coasting trade with the United States the schooner Maud Pye, of Albert Co. She is a good carrier and cost the company $2800.

A PETITION against increased freight rates on the I. C R. and largely signed by merchants and others in Petitcodic, Salisbury and other points, has been forwarded to Ottawa.

MR. JOHN MURPHY, of Moncton owns a book printed in London in 1689. It contains many sermons preached by eminent clergymen of that day and is in a good state of preservation.

ABOUT 11 o'clock on Thursday night, the Amherst steam tannery owned by C. R Casey was almost entirely destroyed together with machinery and some stock. The loss is placed at $12,000. Insurance $7000.

THE DOG poisoner is abroad at Moncton and Dorchester again, at the latter place a valuable animal belonging to Mr. Chas. Hickman was killed. Mr. Hickman offers a reward of $100 for the apprehension of the criminal.

THE STUDENTS of St. Joseph's College, Memramcook, gave a concert on St Patricks evening. The programme was extensive, and with the drama Robert Emmet, was rendered in their usually good style

ON SATURDAY Dr McLean of Amherst removed a cataract from an eye of Mr. Thos Hatherley of Midgic which had been blind for 4 years. He was assisted by Dr. Campbell. The patient can now see as well as ever

ON THE 12th inst. Mr. and Mrs Amos Lawrence, of Southampton, celebrated the 50th anniversary of their marriage by a golden wedding. They were the recipents of many valuable presents and several congratulatory addresses.

ERNEST ACORN was tried before Judge Morse at Amherst on Saturday on the charge of forging the name of Charles Etter on a check drawn by Rhodes, Curry & Co. and obtaining the money He was sentenced to six months in jail.

MR CHARLES C. BLACK of Amherst a few days ago lost one of his stylish Black Pilot colts. It was taken suddenly ill and despite the efforts of Dr. Hall died It was one of his matched team and about one year ago cost him $100

CAPT. D S. HOWARD'S steam saw mill near Five Islands, Cumberland, was burned on the 11th inst. No insurance It is a heavy loss to Capt. Howard, who was lumbering largely and preparing to build two vessels.

PARRSBOR'S shipment of lumber this year is expected to be fully 32,000,000 feet. Coun. Upham has a fine stationary mill at work at Moose River, Messrs. Bentley and Melanson have portable mills in the vicinity which will cut a lot of logs

THE MONCTON and Coverdale Agricultural Society has decided to purchase land and erect permanent buildings for exhibition purposes. It has been decided to hold another exhibition next fall. The exhibition committee report a balance of $241.68 from the last fair.

THE MONCTON barque Petitcodiac is about due at Buenos Ayres from Cardiff with coal. This vessel made a good return to her Moncton owners a short time ago, and another dividend is expected as the result of her present trip.

WM. MCDONALD of Irishtown, near Moncton committed suicide on Thursday last by cutting his throat with a razor. He had been ill for some time and was very despondent and on that day, while his family were absent he made a horrible gash in his throat and died in a few minutes.

Says the *Times*:—Lumbering has been lively at Petitcodiac and adjoining localities of late, writes a correspondent. Humphrey & Trites have nearly 5,000,000 at their mill and on the brows; Mr. J. D. McLaughlin, at Pollett River, about 4,000,000; Mr. John Fownes, some 2,000,000 at his mill, North River platform; C. I. Keith, Butternut Ridge, about 3,000,000 at his mill; Wilson & McLaughlin, 1,500,000 at their mill, while other mills have altogether, some 3,000,000 more. This it will be seen that the lumbering done within a radius of 10 miles of Petitcodiac is quite extensive.

—The U. S. Government printing office is now engaged in filling one of the largest orders in its history. This is for 18,000,000 blanks for the use of the 40,000 enumerators of the 11th census, who will begin work in May. It will take 15,000 reams of paper, and 20 presses will have to be worked 22 hours each day for six weeks before the order will have been completed.

Agriculture and Dairying.

Continued from first page.

is in the soil for it to thrive on. The provided however that the plant food agriculture of the whole country needed changing: the conditions of the farmers have changed and we cannot now afford to follow the methods of our grand parents out of reverence to their memory. We must keep improving each year in method and in quality of the stock We cultivate too much land as a rule for the quantity of manure we have. It is better to work a small piece and have it very fertile than to go over a large area for the same quantity of crop. In speaking of draining the speaker said water was the medium for conveying the plant food from the soil to the plant where it is formed into food for man. Drainage regulates the supply of water in the soil and the water brings plant food from the air. Therefore if there is a passage through the soil for the water the plant food which would otherwise be carried over the surface would be left in the soil. Another value of drainage was that the passage of water through the soil loosened it and allowed the plant roots a better chance to search for food. In treating of the soil question he said many more cows could be kept when green fodder was grown and the soil suffered no loss of fertility. All plants require certain elements for growth and without these elements growth could not proceed. Ten are essential but seven are so abundant that we need not consider them Three elements namely, Nitrogen Phosphoric acid and Potash. we have to provide in the form of barn yard or other manure. We annually allow a large quantity of these materials to run away from the farm in the form of large coloured streams which run from unprotected manure piles where the rains leach the manure and take the only valuable part out of it. Then commercial fertilizers have to be bought at $40.00 per ton if large crops are expected.

Regarding the best breed for dairy purposes, one had to be guided by conditions, every breed possessed some quality which the others didn't. But in general terms he would recommend a person who wanted milk to use the Holsteins, but or Jersey or Guernsey, a combination with some beef, the Durham, Hereford and Devon; the Ayrshire was a hardy cow and suited general conditions well. In electing a cow the following points: should be required: — soft mellow skin (not necessarily thin) indicating good digestion, large barrel, long ramps with broad loin, long lean neck and large eyes. She must give more than she eats Test the cows frequently and sell the bad ones to the butchers. Have them doing their best work from November to March by making them calve in the fall, not milking from March to November when dairy products are cheap She should milk for 10 months in a year Fall calves invariably do better than spring ones Salt regularly every day with at least 4 oz per cow, and give as much water as the cow will take In cold weather it is better to water the cows inside. for when turned out they shiver in the cold and do not drink enough Men should do the milking and a low the women to attend to her womenly duties in the household and make home comfortable. Treat the cows kindly and they will give more milk.

Hogs be ong to the dairy. The Maritime Provinces do not grow enough pork; they import too much a hog will make more out of a pound of grain than a steer will 4½ pound of chopped grain using in making a pound of pork They should be marketed weighing 200 lbs., the heavier they get beyond that it takes 20% more feed. Give the hog a clean dry place to sleep in and he will keep it so. Skim milk and buttermilk is the best feed for young pigs

To illustrate the subject of silage Prof. Robertson showed a chart explaining the relative merits of different varieties of corn for the silo Th half of the nutrition of green corn is in the leaves and ¼ each in stalk and husk. Cultivate in drills, ½ or ⅔ bushels of seeds per acre. The best varieties are found to be Pierce' Prolific, thorough bred, White Flint and Longfellow. In speaking of the silo he said one could be built for $70,00 and in filling, the corn should be wilted in the field for two days and cut or packed whole. no matter which. Tramp the edges well in filling and cover with about a foot of cut straw, no other weight is necessary A dry cow can be kept in winter for fourcents per day on silage

EVENING SESSION.

Prof. Robertson took as his subject, Creameries Cheese factories and Agriculture Education. He commenced by showing by means of a drawing of an udder how cow made milk from her food Milk he said was but elaborated blood; the change taking place while passing through the udder to the teats. The food was converted into blood which passed through a series of intricate ducts and glands and took the form of milk. The udder is under the control of a nervous cord and therefore the cow should never be excited nor abused. A cow "holds up" her milk by closing the valve at the top of the teat through the agency of this cord The Professor said it was a poor policy when the milk was held up to drive it down with a milk stool It seldom came well. Speaking of the fat of the milk he said the butter was in the form of minute globules so small that 1,000,000,000 of them were contained in a cubic inch. The last of a milking was richest because the larger globules came last. The average composition of milk is water 87 per cent, fat 3.75; casein or cheesey matter 3 80; albumen or flesh forming substance .75; Sugar 4.00 and ash .70 In making cheese the cosein and fat are removed and so take more off the land than butter Our country is adopted for cheese making in summer and butter in winter. Cooperative dairying is the better system. It has built up Ontario Agriculture so that Canadian cheese takes the best place in the English market. A cheese factory can be built and equipped for 500 cows for $2,000, and the cheese can be made for 2 or 2½ cents per pound; the larger the factory less in proportion The farmers throughout Ontario get 75 to 80cts per 100 lbs. and consider it pays well. A creamery for making the butter of 500 cows can be built and fitted for $1,500 to 2,200. One would hardly pay with the patronage of less than 300 cows The lecturer closed his address by a brief reference to Agricultural Education. Education does not consist in reading books, but in applying the information. It is the doing, not the knowing how to do that made a man educated. He strongly advised the farmers to take to literature bearing on their business, attend the farmers meetings and the grange and get all possible information on the work of the farm.

A hearty vote of thanks was accorded Prof. Robertson coupled with a wish that it would be the pleasure of the audience of listening to him again in the near future

—Christine Terhune Herrick has written a new series of household articles for *Harper's Bazar*. The series is entitled "Three Meals a Day," and the first paper will appear in the number to be published March 28th.

Dorchester.

—Mr. J. H. Hickman, Captain of the Dorchester Gun Club, entertain the members of the club to a wild-goose supper at Dorchester House, last Thursday evening An elaborate menu was served in the best style, and many are now regretting that they did not join the Gun Club last fall

—The household Corps of the Salvation army, with their band of 22 pieces, paraded the streets yesterday and last evening, and furnished some very creditable music, much enjoyed in Dorchester, where band music is now so seldom heard A project is being mooted of instituting another band here, it is not likely that another would receive very liberal patronage at the hands of the citizens

BORN.

At Middle Sackville, March 23rd to the wife of James Crane, a daughter.

MARRIED.

At Westmorland Point, March 5th at the residence of the bride's mother, by Rev. D. M Bliss Robert Duncan, of Banffshire, Scotland, to Mary Ellen, youngest daughter of the late Samuel Carter

Election Estimates !

Now that the returns are all in it would be interesting to note the composition of the new Local Government:

The following is the conclusion we have arrived at, after careful perusal of the enlightened, able and unprejudiced press of New Brunswick:

Anarchists,	3	Horse Thieves,	5
Burglars,	4	Would be Burglars if they had the pluck	6
Judas Iscariots	4	Forgers,	3
Highwaymen,	9	Murderers,	6

Arch Fiends, 1

In addition to the above, Premier Fielding of Nova Scotia has again unfurled the Annexation flag at Spring Hill. Under these circumstances we have decided to sell all our remaining stock of

Furs, Blankets, Overcoats, Ulsters,

UNDERWEAR,

And all Winter Goods at a small advance on cost.
