BRUNSWICK?

Resident Now Living in
at Our Problems.

get the sheepskin. Some of them do but there are also the usual proportwho would have been better at home the sheep.

e college men of any country set a ard which others follow, because from colleges we get the men who swell the s of our professions. It is, therefore, rst importance that a province shall well the men who are her students when the provinces down by the ntic seaboard realize that fact, and, zing it, work with all the might that them toward the furtherance of their ational schemes, as proposed by ghtful men in council together and fully considered by them, then, and before, may they expect to make any rence in the numbers who are booking s for the west-bound train.

aving the colleges, take the public ols. Vancouver's schools are a revelato eastern people. Each school is ted on a block of city property, and Vancouver a block of city property us as much money as would set the versity of New Brunswick far on the to real big things. These grounds are d up with basketball equipment, tennis ts, and gardens, where grow vegetables se in the kitchen, which is a feature very school in the city. Flowers also den the heart of the school children, they are proud of their gardens and d of their schools. Painting is taught he lower grades, sewing to the older ren, and the writer has a personal aintance with a child of a city school every day after domestic science lescomes home and makes some new and table dish for the family supper, which has learned to make in school. This splendid training for the girls in the ols; the boys have manual training, both these divisions will go far to ing successful citizens, either at home public life, for Vancouver.

the King Edward High school, a h at very slight cost is served at noon clean and attractive lunch room, fitted n the basement. It is expected very tly that the board will provide free hes for the school children. Besides regular school work, which the curricu provides, there is a class in shorthand typewriting, which may be taken as pecial course, so that the would-be ographer in Vancouver, without the nse of a business course at a commerschool, may take it at High school.

ancouver can teach the east something the way of generosity to her schoolhers, also. If a teacher is ill, the ol board provides a substitute up to nty days. The substitute is paid $3.25 day for her work, which may surprise teachers in New Brunswick, some of m earn $230 a year. The Vancouver ol system is demonstrating more and e the necessity and wisdom of paying the school teachers, because the mari e provinces are losing and we are gain every year the graduates of their col s and normal schools.

hese are the facts. What is to be e? It is obvious that something must done, or New Brunswick will not have y more fifty millions to spend on her lic works. Let me suggest that through press of New Brunswick you show the slators of your province that you want r schools looked after, that you want provincial university to have "a fair w," and a fair show means, of course, t your university must have money, be e east and west alike realize that oney makes the mare go." It is up to e Brunswick now to make the mare go, he straws which show the direction of wind point out that some day New nswick will be past history in the ch of progress which is going on in ada.

wo maritime universities in the past made a striking campaign for funds, where did they come for them? To west. We dined both representatives Vancouver. Two years ago, a town in north of New Brunswick was ruined erly by fire, and its people left homeless. ey they had to have. Some of it they from the west, some of it from their erican neighbors. Yet the government fifty millions to spend on public works! t out here in the west a story has got ut that there came from a New Brunsk philanthropist, high in office in the vince, to the relief of his suffering fels in Campbellton, a box of old silk s and dress coats. Where is the philhropy of the east? Where is its gensity, when such things are possible? t same town, by its sturdy energy, has wn all Canada what it could do in the of well-nigh insurmountable obstacles, in its struggle for existence, success beyond belief, has exhibited the cheeroptimism and loyal determination to ceed, that is generally accredited to the t, and rightly so, for it is this quality t makes for success, whether in east or t, and so far the west has been a cess.

ampbellton is a live example of what east can do, and if the legislators of w Brunswick are at all far sighted, they recognize the accomplishment of mpbellton on the Restigouche, and do it something splendid, that the rest of still loyal to our native province, ugh living afar off, will see that the vince which we basely deserted can still on without us, and when the roll of Canadian provinces is called, New nswick will be there, active and strong the rest, though not so big, to say: "We e done what we could."

C

WIRELESS OPERATORS MUST BE ON DUTY CONTINUOUSLY

Washington, July 17—The conference rt on the new wireless law framed from lessons of the Titanic disaster and rering wireless operators on duty contntly aboard ships, was adopted by the se today and now requires only the sident's signature to make it law. The asure requires all vessels carrying fifty more passengers to have at least two reless operators and that they be on y continuously. It is further required t the wireless apparatus be powerful ough to receive and transmit messages least 100 miles and that each vessel ve an auxiliary power supply independ of the ships main electric plant to ntain communication.

WANTED

WANTED—One first class male teacher, and one first or second class female teacher, for the school at Sunny Brae, Moncton (N. B.) Apply, stating salary and giving references to R. W. McKenzie, secretary. 7282-7-24. s. w.

WANTED—Second class female teacher for District No. 5, Lorne, Victoria county; state salary wanted and apply to W. H. Miller, secretary to trustees, Nictaw, Victoria county, N. B. 1068 tf.

WANTED—A first class male (preferred) or female teacher. Apply, stating salary and experience, Scott D. Guptill, Grand Harbor, Grand Manan.

WANTED—Second or third class female teacher for Hastings, Parish of Alma, Albert Co. Apply, stating salary, to Wesley Kinnie, Secretary Trustees, Hastings. 7248-7-27

WANTED—Second or third class female teacher for coming term. Apply, stating salary, to Thos. A. Fowlie, Canaan Forks, Queens Co., N. B. 7173-7-20

WANTED—A first class female teacher, for school district No. 9, parish of Hampstead, Queens Co., Apply, stating salary to W. J. Nickerson, secretary to school trustees, Hibernia, N. B. 7109-7-31 s w

WANTED—A second class male or female teacher for School District No. 8, Parish of Gordon, for the coming term. Apply to R. M. Gillespie, stating salary, Birch Ridge, Vic. Co., N. B. 7076-7-24

WANTED—A second class female teacher, school district No. 1, Kars. Apply, Elliott Vanwart, Tennants Cove, Kings Co., Stating salary expected. 6863-7-24.

WANTED—Young women to work in a training school as nurses for the insane. Address P. O. Box 1178, Worcester, Mass. 6492-8-24 s.w.

SCOVILS want both women and girls to work in their clothing factory at plain sewing and machine work. No experience required, weekly wages paid while learning. Scovil Bros. Ltd., 198 Union street. 627-t.f.

WANTED—A competent maid to act as nurse and assist with light house work. Apply to Mrs. Manning Doherty, 26 Coburg street. 12-3-t.f.

AGENTS WANTED

WANTED IMMEDIATELY — Reliable agents; good pay weekly; outfit free; exclusive stock and territory. Our agencies are valuable. For particulars write Pelham Nursery Company, Toronto, Ont. sw

RELIABLE representative wanted, to meet the tremendous demand for fruit trees throughout New Brunswick at present. We wish to secure three or four good men to represent us as local and general agents. The special interest taken in the fruit-growing business in New Brunswick offers exceptional opportunities for men of enterprise. We offer a permanent position and liberal pay to the right men. Stone & Wellington, Toronto, Ont. sw

FOR SALE

AT Passkeag, N. B., one and a half miles from I. C. R. station, 150 acres, 80 in timber land; good soil and well watered. Two large barns and seven room house. One mile to school and post office. For terms, address A. M. Mathews, 146 Chandler street, Boston, Mass. 8-17

SITUATIONS VACANT

STUDY OSTEOPATHY--Profession not overcrowded. Better your social standing and increase your income. Write for catalogue. Massachusetts College of Osteopathy, 15 Craigie street, Cambridge, Mass. 5900-9-7

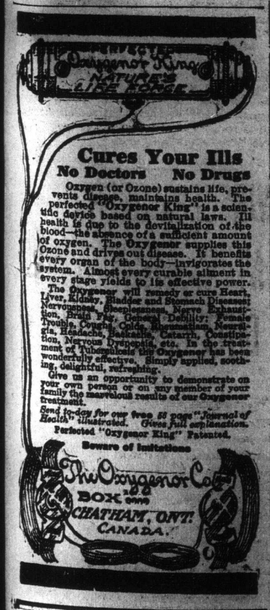
45 Successful Years—the Last Year the Best of the 45

Thoroughness and progressiveness have always been the dominating ideas in the management of this college; showiness and superficiality the rocks to be avoided. Our reward has been ample and satisfying.

St. John's cool summer weather makes study during the warmest months just as pleasant as at any other time.

Students can enter at any time.

S. KERR,
Principal



After putting buttered paper in the cake pans, sprinkle just a little flour. This will keep the cakes from sticking.

THIS FROM BORDEN'S ALLY

Montreal, July 17—Writing in Le Devoir tonight under the heading The Annexation Spectre, Why French-Canadians No Longer Fear It, Henry Bourassa argues that for long his countrymen fought against annexation but are beginning to believe their efforts stupid, seeking vainly for gratitude from their English-speaking compatriots.

He declared that in the United States the French language and the Roman Catholic faith would be as safe as in Canada and that the French-Canadians in the American union are not constantly insulted by the Orange order.

MRS. S. J. KING DIES IN NEW YORK

Wednesday, July 17.

Word received here last evening told of the death of Hannah Sneden King, widow of Stephen J. King, at one time post office inspector for New Brunswick. Mrs. King was the sister of E. T. C. Knowles and Joseph Knowles, of this city. The death occurred at noon yesterday in New York, where she has been residing for some time. She is survived by two children.

REAL ESTATE

Hiram Webb, electrician, of this city, has just sold through Alfred Burley & Co. a fine 200 acre farm on the Washademoak Lake to Captain Robinson, a retired sea captain. The new owner will take possession immediately and build a new house on the property.

The property transfers recorded since the 12th inst. were as follows:

Alfred Burley to A. J. Mulcahey, property on Strait Shore road.

R. M. Rive to Nita Gillespie, property on Brussels street.

R. B. Sears et al to G. E. Sears et al, property on corner of Germain and Princess streets.

Kate, wife of L. B. Connor, to P. M. Higgins, property at Simonds.

R. W. Ellis et al to James Ellis, property at Simonds.

An agreement has been recorded between W. B. Tennant and G. E. Barbour, for extension of option. The consideration named is $500.

THREE MEN DROWNED

Fredericton, N. B., July 17—News has been received here of a double drowning accident which occurred near Forest City, parish of North Lake on Thursday last. Three young men, Charles Graham, aged twenty-seven; Llewellyn Kinney, aged eighteen and Everett Farrel, were canoeing on North Lake when the craft upset, Farrell was the only one to reach the shore. He was a fair swimmer and managed to get hold of the canoe. His companions went down with scarcely a struggle.

Search was immediately begun for the bodies but they were not found until Saturday afternoon. They were locked in each others arms. The sad affair has cast a deep gloom over the community.

MARRIAGES

JOST-HALEY—At Lingley, July 15, 1912, by Rev. Frederick S. Porter, Leslie Gordon Jost to Helen Avis Haley, of St. John. At home, Neilsonville (P. Q.)

HINCHCLIFFE-JOHNSTON—At Lawrence (Mass.), June 25, by the Rev. H. G. Wallace, pastor of the Advent Christian church, Albert E. Hinchcliffe to Ethel L. Johnston, formerly of Golden Grove.

DEATHS

COOKSON—In this city on the 16th inst., Hazel Spurr, eldest daughter of William A. and Kate Cookson. (Amherst papers please copy.)

DR. GEORGE PARKIN'S RECIPROCITY SCHEME

London, July 16—At a luncheon of the American Women's Society in London today Dr. George Parkin, organizing represenative of the Rhodes Scholarship Trust, said he had approached J. Pierpont Morgan, Andrew Carnegie and other wealthy Americans with a plan for duplicating the Rhodes scholarship scheme in such a way that English students could be sent to American universities. Dr. Parkin said: "Such a plan would notify all other nations that 'Hands across the Sea' means something."

Whose Ox is Gored

(Boston Transcript).

The sittings of the British court are finished, and though Lord Mersey's report has not yet been submitted, he has pretty definitely indicated what its tenor will be. And what is the difference in the two results? To any one who has carefully followed the procedure of the two courts, the one difference, the one superiority of the English inquiry, was one of manner. In substance the conclusions reached on both sides of the Atlantic are strikingly alike. One of the rubs in the American inquiry was the "highhanded" manner in which Mr. Ismay was treated. Before Lord Mersey Mr. Ismay was handled without gloves. The same embarrassing questions as to his responsibility for the Titanic's speed were put to him, and, what was not attempted by Senator Smith, his candor was frankly impugned by Lord Mersey and the attorney-general. He was obliged to admit that the Titanic's speed had been, if not planned, at least "discussed" ashore, before she sailed. And for all his denials of responsibility for the Titanic's speed while aboard of her, Sir Ernest Shackleton, the noted Antarctic explorer, frankly acknowledged his view on the witness stand that Atlantic captains, if not actually instructed to speed through ice, know that "if they do not make their passage, it is not so good for them."

But, again like Senator Smith's report, that of Lord Mersey will avoid personal charges. The speed of the boat is condemned; so is the insufficiency of lifeboats. Lord Mersey has hinted at some mild censure for Captain Smith, though it is against British practice to pass judgment on the dead. There will be a stinging reprimand for Captain Lord, of the Californian. The British court may go more fully into the reform of shipping regulations, for that is its province since the bulk of maritime traffic is under British auspices. But in the main Lord Mersey will be found to have departed very little from the general conclusions reached by Senator Smith's much berated committee—whose conduct "endangered the comity of nations." Very evidently it makes a good deal of difference to the father of a bad boy whether the urchin is flogged by an outraged neighbor or by himself.

The 12th at Deer Island.

Deer Island, July 16—Eureka Lodge, L. O. L., held a grand celebration at Lord's Cove on the 12th, when Orangemen from Riverside, Wilson's Island and Chocolate Beach attended. An excursion steamer, the Viking, arrived from St. Stephen with a number of visitors, including the Calais Band and the Thistle baseball team, both of which afforded much amusement during the day. In a game with the home team, the Crescents, the visiting team was defeated by the score of 13-9.

Sports were held in the afternoon, including a running race won by Alver Stuart, of Lord's Cove, and a motor boat race won by Campobello and Angus Holland.

A procession was held and more than 300 Orangemen were in line. The parade was headed by the St. George's Band and George A. Lambert, who was mounted on a white horse and represented King William.

Speeches were heard during the day from Rev. C. A. Brown, who chose for his subject a review of the Battle of the Boyne; Foster C. Calder and a visiting clergyman from Milltown. An address was also given by Rev. J. H. Pudding, pastor of the Baptist churches here. The meeting was presided over by Black Knight Charles A. Stuart.

Two Preferences.

(Toronto Star).

Though he is a consistent total abstainer, Mr. Foster seems to have become intoxicated by the atmosphere of banquets. He expresses the opinion that the agreement with the West Indies could not have been made if it had not been for the victory of Sept. 21, 1911. The victory of June 23, 1896, resulted in the British preference, which, as a measure for increasing British trade, surpasses the West Indian agreement as the St. Lawrence river surpasses the Humber. It is praiseworthy for Mr. Foster to make a beginning with the West Indies, but it is only a beginning, and there is danger of making it ridiculous by too vigorous a use of the sounding brass and the tinkling cymbals. It affects a volume of trade which is only a small fraction of that affected by the British preference, and the preference is only one-fifth, instead of one-third. Mr. Foster will be wise if he does not invite such comparisons.

Recreant Haultain

(Toronto Globe.)

For Mr. Haultain the bitterness of defeat will be all the greater because he chose to take his stand for party loyalty rather than principle. Mr. Haultain championed the cause of reciprocity in the Saskatchewan legislature a little over a year ago. He scorned, as he himself said, to sit at the feet of the Eastern Gamaliels who were opposing the policy of larger markets. In an evil moment Mr. Haultain came under the influence of Mr. Rogers and agreed to disown the reciprocity "heresy" and deliver the province to the federal Conservatives. He has failed, and by his attempt has forfeited the good-will of thousands of the pro-reciprocity Conservatives of Saskatchewan, who still refuse to "sit at the feet of the Eastern Gamaliels and study loyalty."

No C. P. R. Line, He Says.

Montreal, July 16—"We have never dreamed of building any railway to Moncton (N. B.)," said Vice-President McNicoll of the C. P. R., this morning, regarding a report that the railway had plans for the construction of a line via the Central railway to Chipman and then by G. T. P. to Moncton.

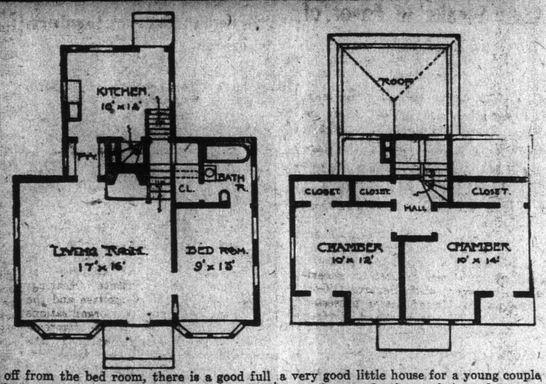
"No railway," he said, "can afford to build a line like that in opposition to the government."

For lemon cake filling, beat one egg, add a cupful of sugar and the juice and rind of one lemon. Cook in an enameled pan until rather thick. When cool, spread.

A paste of olive oil and salt smeared on spots on furniture and allowed to remain a few minutes and then rubbed off with a soft cloth will often remove the spots.

A UNIQUE CEMENT COTTAGE

DESIGNED BY CHAS. S. SEDGWICK, ARCHITECT.



A small cottage of five rooms, three on the first floor and two on the second, can be built for a sum not exceeding $1,200, without including heating or plumbing. The plan illustrated is just such a snug cottage. There is no waste room and no unnecessary detail. The size is 28 feet in width and the main part 17 feet deep with a kitchen extension 13 feet wide and 17 feet deep, this portion being only one story in height.

There is one large central chimney with fire place in the main living room and flue for kitchen in the rear. The living room is 17 feet in width and 16 feet in depth, the main stairs extend up on the right hand side of living room and a small section of steps lead up to the platform of stairs from kitchen, the stairs to basement are underneath. The front is symmetrical with two bay window projections and a central entrance.

The exterior is covered with metal lath and cemented with a "Pebble Dash" finish, the inside walls plastered and the house well finished, with hard wood in the first story and pine, stained, in the second story. The bath room is on the first story off from the bed room, there is a good full basement, and two good bed rooms in the second story with ample closets. This is a very good little house for a young couple convenient to do the work in and economical to build.

BRITISH PAPERS PRAISE SPEECH OF BORDEN'S

Consider It Important and Noteworthy—Some of the Editorial Views.

London, July 17—All the London journals today unite in calling Premier Borden's speech, most important and noteworthy, expressing as he did the opinion that it was not possible that the great dominion of the empire would be called on to take their share in the defence of that empire as a whole without having some voice in its policy.

The Westminster Gazette, the leading government evening paper says: Mr. Borden made a speech which definitely recognizes the coming of a new order in which the partnership of the dominions and Great Britain at present informal and unfettered, is likely to be consolidated on definite constitutional lines.

"The partner must have a voice in the policy of the firm which the ward had not in the policy of the trustees.

"Mr. Borden suggests to us that the imperial parliament, as at present constituted, does not meet this condition from which we infer he and his friends look forward to some development in our institutions which will meet the case.

"We are glad this idea should be thrown out, and during the next few years hope to see it get into the thought and language of the self-governing communities."

The Times, summing up says at the end of a lengthy leader: "The essential point is that the British and dominion ministers should learn more to act together in the whole range of affairs which concern them both. The formal machinery for common action can be created more easily when once the practice is established."

The Pall Mall Gazette, commending on Mr. Borden's warning, says: "The empire has no organ of self-government capable of co-ordinating its strength and in placing its whole weight behind unified policy and action. Without such an organ imperialism can never be sound, real, or effective. Every thinking man knows it and the time has come when we must choose definitely between carrying our burden and laying it down."

PICTOU SUFFERS BY A $28,000 FIRE

Pictou, July 16—The plant of the Atlantic Milling Company was destroyed by fire on Sunday. The loss is placed at $28,000, with $13,000 insurance divided as followed:—

Western	$3,000
Norwich Union	3,000
Royal	2,200
Rimouski	2,000
Nova Scotia	1,000
Sweden Mutual	2,000

The fire had great headway before discovered and the efforts of the firemen were concentrated on saving Fullerton's woodworking factory adjoining. The firemen were successful in confining the fire to the milling company's building's. This business was started in Pictou five years ago by J. W. Smith of Durham, managing director of the company, who is now on a trip to Montreal.

The company will rebuild on a larger and probably more advantageous scale.

Invitation to Colliers.

Collier's Weekly is to be given an invitation to send a representative to St. John to investigate for himself the truth of damaging statements regarding this port which they published in a recent issue. As material prepared by anyone in St. John with a view to correcting these statements might be regarded with suspicion, the secretary of the Board of Trade is asking the publishers to send their own man to look into the matter.

TRIP TO OIL AND GAS WELLS WAS POSTPONED

Moncton, N. B., July 16—The thirty-second annual meeting of the New Brunswick Medical Society was opened in the I. O. O. F. hall this morning with a large number of medical men in attendance. The president, C. T. Purdy, of Moncton, presided. In his address he called attention to the death during the year of four members of the society, namely, Dr. L. J. Belliveau, of Shediac; Dr. Percy E. Butler, of McAdam; Dr. Oscar J. McCully, of Moncton, and Dr. Isaac Wilson Doherty, of Rexton. The delegates were extended a civic welcome by Major F. C. Robinson.

During the first session papers were read by Dr. G. R. J. Crawford, of St. John, and Dr. D. Townsend, of River Glade, the first being on Tubercular Laryngitis, and the latter on Tuberculosis, Its Diagnosis and Treatment.

This afternoon the election took place, resulting as follows: President, Dr. G. R. J. Crawford, St. John; first vice-president, Dr. G. C. Vanwart, Fredericton; second vice-president, Dr. G. W. Flemming, Petitcodiac; recording secretary, Dr. J. S. Bentley, St. John; corresponding secretary, Dr. F. H. Wetmore, Hampton; treasurer, Dr. Thomas Walker, St. John; trustees, Drs. T. E. Bishop, St. John; H. E. Gillmore, St. Martins; D. D. McDonald, Dorchester.

The Treatment of Sufautile Diarrhoea was next discussed by Drs. Thomas Walker, G. C. Vanwart and J. D. Lawson, of St. Stephen.

The trip to the oil and gas wells, planned for this afternoon at 4 o'clock, was postponed on account of a heavy storm.

At this evening's session Dr. G. G. Melvin, of St. John, read a paper on The Bacteriology of Typhoid and Its Allies. Other papers were read by Dr. Murray MacLaren, of St. John; Dr. J. Clarence Webster, of Chicago, and Dr. W. R. MacAnsland, of Boston. After the business session the delegates were banquetted at the Hotel Brunswick. The medical council submitted its report, which stated among other things that the number of candidates has markedly decreased since the inauguration of the five years' course. No graduates from Canadian colleges have appeared for examination the past two years. The medical register contains the names of 260.

At the evening session Dr. A. B. Atherton, Fredericton, and Dr. W. W. White, of St. John, were elected representatives to the Canada Medical Council which meets in Ottawa.

Disenchantment.

Once I met a dainty maiden,
Simple, girlish, wholesome, sweet,
All was modesty and coyness
From smooth hair to little feet.
Tho' no word as yet we'd spoken,
We walked slow along the shore
And each time I glanced down at her
I just loved her more and more.

Now I gazed out o'er the water,
Now up at the mountain peak,
But, tho' twice I had essayed it,
Didn't trust myself to speak.

"Do you think—?" I hesitated.
Drooped were lashes, lips a-pout—
What sweet thoughts her lips kept hidden
Could I only find them out!

"Would you—?" Now I clasped her fingers—
"Won't you—?" What an angel smile!
(Here there passed a summer boarder
Dressed in quite the latest style.
Hat tipped at a rakish angle,
Shoes with ribbons, flaring tie,
Spangled socks and jingling watch-fob—
Vexed, I heard the maiden sigh
As she watched this interruption)—
"Dear—sweet maid—my little lass—
Could you—? Would you—? Might I ever—?"
Shocked, I heard her say: "Some class!"

To make perfect stew of tough beef, cut it into small pieces, weighing about half an ounce, and cook for eight hours.

TO PURCHASE ORCHARD UP ST. JOHN RIVER

Board of Trade Company to Set Out About 2,000 Trees Next Spring.

Thursday, July 18.

The St. John Board of Trade Orchard Company has made another step towards the establishment of model fruit farms in the province. At a meeting yesterday it was decided to buy a farm of about fifty acres located within sixteen miles of the city and a short distance below Brown's Flat. The land is said to be ideal for the growing of apples and other similar fruits. The land is at present under crops but it will be taken over early in the fall and preparations will be made for setting out about 2,000 trees next spring.

The plan of providing these model fruit farms has been taken up by several boards of trade in the province and these farms will be under the direction of the government experts for six years and accurate accounts of the expenditure and income will be kept so that it can be shown just how successfully this kind of a farm can be operated in New Brunswick.

The Moncton board of trade has the matter under consideration also and it is expected that in a few days the Moncton board will also have acquired a site for a farm.

Members of the St. John company seem very enthusiastic over the land secured by them and it is believed that the farm will be successful from the start.

JELLY MAKING

CURRANT JELLY.

Use currants which are a little underripe. Cherry currants are best. A lighter jelly may be made from equal portions of red and white currants.

Pick over currants without removing the stems, wash and drain. Put a few in a granite dish and crush with a potate masher. Add a few more and crush; continue. Cook slowly until currants look white. Strain through a coarse enamel strainer, then strain through a bag made from a double thickness of cheesecloth. Do not squeeze the bag, but allow the juice to drop through. Measure juice, and boil five minutes. Add an equal measure of hot granulated sugar. Boil gently from three to five minutes, skim and pour into jelly glasses.

The syrup may be tested by putting a teaspoonful on a cold plate. If done, it should jelly slightly.

BLACKBERRY JELLY.

Use firm berries which are a little underripe. Wash quickly and carefully to avoid losing any of the juice.

SUCCESSFUL JELLY MAKING.

Use good fruit which is a little underripe.

Use the best granulated sugar.

Do not make large quantities of jelly at one cooking.

Heat the sugar in the oven before adding it to the fruit juice.

If the juice must be boiled down, always do so before the sugar is added.

The jelly will be clearer and finer if the fruit is simmered gently and not stirred during cooking.

Do not allow the syrup to boil rapidly, or crystals may appear in jelly.

Always make jelly on a bright, clear day.

Wash the jelly glasses in hot water and set them on a folded cloth rung out of hot water.

Set the jelly in a sunny window for twenty-four hours, then cover with melted paraffin and set in a dry, cool place.—Eldora Lockwood Dow in Woman's World for July.

A spoonful of oxgall to a gallon of water will set the colors of almost any goods soaked in it previous to washing.
