A FARM ANIMAL MEDICINE CHEST. Prof. Brown, a vetermary authority highly esteemed in England, in a late contribution to the Johnal of the Royal Agricultural Society, gives the following alphabetical list of remedies for home" veterinary treatment of farm animals. Save it; it will be convenient for reference ient for reference ?

A conite.—Tinctur (Fleming's,); action sedative; allays fever and externally relieves irritation. Dose: horse and ox, 10 to 30 drops; sheep, 5 drops; add water in proportion of a tablespoonful to each drop of tineture. For a lotion, use one tablespoonful of the tineture to a pint of water.

Alcohol, in the form of whisky, or brandy, or strong ale, is useful for cases in which the system requires to be temporarily roused from a state of depression. Doses: horse or ox, whisky or brandy, 4 to 8 tablespoonfuls; sheep, I to 3 tablespoonfuls. Strong ale, horse and ox, I pint; sheep, & pint; repeat two or three times a day.

Aloes. - A purgative for horse or ox. The ordinary aloetic mass and the solution should be kept at hand; both preparations must be obtained from a druggist. Dosos: horses, 4 to 6 drachms of the aloctic mass as an ordinary purgative. Ox, half a pint of the solution, usually given in combination with linsced-oil, in cases of continued constipation,

Ammonia Liniment .- Made by adding a strong solution of ammonia and oil of turpentine, an eighth part, to scap-liniment. A pint-bottle, carefully stoppered, should be kept at hand. The liniment is useful as an application for sore throat, and for all cases in which an external stimulant is necessary. Must be a pli d with the hand, and well

rubbed into the skin.

Areca Nat.—A useful worm medicine. The nuts should be kept in a stoppered bottle in a dry place. When required for use, the quantity should be grated by means of a nutmeg-grater. Doses: horse or ox, half an onnec to an onnec of the grated nut, mixed with the food, corn and bran. Sheep, two dracims; dog, half to one drachm.

Calves Cordial.—A form of chalk mixture for calves and sheep. To be prepared by a chemist, as follows: Prepared chalk, 2 ounces: powdered catechu. I ounce; ginger, one-half ounce; opinin, I drachm; peppermint water, 1 pint. Pose: calves, 2 to 4 tablespoonfuls: sheep, 1 to 2 tablespoonfuls. Carbolic Acid.—A powerful caustic and an-

tiseptic, ordinarily used in combination with fifty to one hundred parts of water, as an antiseptic lotion to unhealthy wounds, and for disinfection purposes,

Carbolised Cotton and Gauze, to be ob-

tained of the druggist. Valuable antiseptic application to wounds.

Castor-oil, also Lineard-oil - purgatives. Doses: horse or ox, 1 to 2 pints; sheep, four tablespoonfuls.

Colic Mixture. - Equal parts of laudanum and sweet spirits of nitre, and an eighth part of chloric ether. A half-pint bottle to be kept at hand. Dose: horse or ex, 3 to 4 tablespoonfuls in three parts of a pint of water.

Electuary, - A soft mass, compounded with honey or treacle; must be prepared by a druggist as follows: camphor, 2 ounces; powdered myrth, liquoriee roots, and nitre, of each, 8 ounces; extract of belladonna, 2 ounces; treacle, enough to make a soft paste. Dose : horse or ox, a portion of the size of half a walnut to be put at the back of the mouth two or three times a day with a piece of stick. Useful in colds, sore throat and influenza.

Ginger .- Stimulant : forms an essential part of all cordial powders for exciting appetite; may be given with strong ale in cases of prostration from over-work or disease. Dose: horse or ox, 1 to 2 tablespoonfuls of the powder in a pint of ale; sheep, one-fourth of the quantity.

Mercurial Ointment (blue), to be purchased

ready for use, valuable to promote the growth of hair, and in some forms of skin disease; only small quantities may be applied, Mercurial Ointment (red), biniode of mer-cury. A good form for blisters in cases of

fter anguin of tundans Nitre (nitrate of notash), diurctic and fever medicine. Dose: horse or ox, 2 tablespoonfuls daily in the drinking water, or half the

quantity in the food. Sheep, I teaspoonful in the food. Salts (Epsom or Glauber), common purgatives for cattle and sheep. Dose: ox, 12 to 16 ounces, dissolved in a wine bottle of hot A tablespoonful of ginger may be

added. Sheep 4 to 6 ounces. Salicylic Acid. - A valuable antiseptic, effective in the treatment of foot-and-mouth disease. Dose: 4 tablespoonfuls of the acid are to be put in an earthen vessel and dissolv-in a quart of boiling water; hot water is then to be added to make a gallon. This solution is to be used to syringe the feet and lave the mouth and nostrils, and also to wash the udder, and finally to sprinkle over the litter; half a pint of the solution may be added to the gallon of drinking water every day. The dry acid (powder) may be sprinkled on the feet after they have been syringed with the solution.

Santonine, used to expel worms, one of the most effective agents for this purpose. Dose: horse, 15 grains, with 3 drachms of aloes, to be given in the morning before feeding, and repeated after two days.

Sulphur (Flower of sulphur), a very valuable alternative. Dose: horse or ox, a tablespoonful, with a teaspoonful of nitre, may be given in the food once a day; sheep, quarter of the quantity. Sulphur mixed with any common oil forms an excellent dressing for mange or surfeit in animals.

Turpentine, Oil of.—Stimulant to the skin. Internally used to expel worms, useful in "husk in calves." Dose: a tablespoonful daily in half a pint of a mixture of milk and eggs. Lambs, one quarter of the quantity, Vascline. -- Emollient to the skin, effective in irritation of the surface, chapped heels, mud-fever, especially if mixed with an eighth part of trisnitrate of bismuth or carbonate of

lead (white lead), or oxide of zinc. Zinc, Chloride of (Sir William Burnett's disinfecting fluid), mixed with fifty to one hundred parts of water, may be used for the purposes for which carbolic acid is employed.

POULTRY NOTES.

BY FANNY FIELD IN "PRAIRIE FARMER." "Which breed is the best to keep for eggs

alone ?" is one of the conundrums that I find in my letter box this week.

That depends on what you are going to do with the eggs after you get them. The writer believes that the Hamburgs will lay a greater number of eggs in a year than fowls of any other breed, and if I were keeping fowls, especially for producing eggs for a country market, I would keep some variety of the Hamburg family. Their eggs are small, but in most markets—especially in the West, and more especially at country stores each has its admirers who claim that their lavorites have some special good qualities not possessed by the rest of the Hamburg tribe, but the truth of the matter is, there is

little difference except in looks. My second choice would be the Leghorns. They are somewhat larger than the Ham- absence of light.

burgs and lay larger eggs, but when compared with the "Rocks," both eggs and fowls are small. Leghorns are also non-sitters, and one variety of the family is as good as another, except that the rose-combed varieties are the best for the poultry raiser who lives where the winters are severe. Leghorns do better than Hamburgs when confined to yards, but as they are naturally very active, they do best when on free range. But if I were keeping fowls, especially for eggs for a city market, or for private customers, I would keep Plymouth Rocks, or Brahmas, or Houkeep Plymouth Rocks, or Branmas, or Hou-dans, or something that would lay good-sized eggs—such eggs as I would like to buy. The Rocks and Brahmas lay eggs, that for size and quality, suit private customers much better than Hamburg and Leghorn eggs; will hatch and rear their chicks, and will do well in confinement. The Houdans are of medium size, non-sitters, and great layers of large, white eggs, but like all the small, non-sitting breeds, are very active, and in order to do their best must have all creation, or as much of it as they choose, for a foraging ground. And right here let me say to Mr. Blew, that I am not acquainted with any breed of fowls, large or small, that would prosper if " crowded into pens of two hundred each," and if he has any idea of attempting to keep Leghorns that way he had better give it up. It requires a good deal of poultry knowledge to make two hundred fowls pay even when divided into flocks of twenty-five, and each flock in a separate yard, but when it comes to crowding two hundred fowls under one roof and into one yard, no amount of poultry knowledge or any other knowledge could make them pay. If kept altogether in one yard I would not board two hundred Leghbors one mouth for all the eggs they would have now years. lay in one year.

The cost of keeping fowls varies according to the climate, cost of food in different localities, etc., but the cost of keeping the different breeds in laying time her, we set out at once to return to my post does not vary so much as the breeders of the far away over the mountains." When that smaller varieties would have us believe. It mountain ride was over they found that Mr. costs more to grow the large breeds to the laying age than it does the smaller ones, but after they reach that age there is but little difference in the amount of food necessary to keep fowls of the different breeds in laying time, the "poultry authorities" who tell us that the Leghorns and other small breeds "eat only a quarter as much" as the larger breeds, to the contrary, notwithstanding.

If you are nervous or dyspaptic try Carter's Little Nerve Pills. Dyspepsia makes you nervous, and nervousness makes you dyspep-tie: either one renders you miserable and these little pills cure both.

TERRIBLE CRIMES REVEALED.

NASHVILLE, June 5.—A special from Clarksville, Tenn., gives the particulars of the cap-ture of a band of murderers and outlaws near Oakwood, Montgomery County. The persons were arrested by Sheriff D. W. Taylor, and are Ransom Morrow, bis two sons, William and Charles, William Outlaw and David Horn. The two latter were released on bonds of \$250 for appearance as witnesses against the Morrows, who are leaders of the gang. The operations of this gang hardly find parallel, except in the annals of the Bender family, and John A. Murrell's band. These men are charged with murder, arson, theft and other crimes. Ransom Morrow is nearly sixty years old and a deacon and leading church member, and so well has he covered all proofs of his horrible On the verge of a dark hole in the rear of this cave a day or two since the decomposed body of Overton, easily identified by his hat and clothes, was discovered. Dr. Peter Bellamy is the son-in law of Morrow. He was tried eight years ago for the murder of an old negro, Jesse Brown. He was acquitted by an ingenious defence, but statements of witnesses now come to hand show the deed was committed by Morrow at Bellamy's request. It seems that these human fiends have been suspected for some time, but have so terrorized the neighborhood that no charges have been brought. Several houses have been burned, and more than one person has disappeared under circumstances which now leave little doubt that they were victims of this happy, she exhausted her wit and sarcasm on gang. Outlaw and Horn, the two men held me and laughed that she might not ween as witnesses, have made a clean breast of the whole story, and told how Bill and Charlie Morrow described the manner in which they turn." marched Dick Overton into the cave with a double-barrelled shot-gun, and pushed his body into Hell's Hole. This hole is supposed although he saw death in her face he to be very deep, and, had not Overton's body refused her prayer that she might be allodged on the side, it would not have been found. It will be explored by officers. Dr. Bellamy, who is the son of a Methodist minister, is charged with robbing Bailey Winn's house. New facts regarding the monstrous All that he would promise was that "she cruelty of this gang are rapidly coming to light, and will furnish the most horrible history of crime yet known.

FRANCE AND MOROCCO. London, June 4.-M. Ordega, the French Minister to Morocco, has returned to Tangier from his visit to Paris. A friendly reception was accorded him, several tribes coming from Mussuhmans display a strong feeling in favour of France. The tribes are rallying about the Sheriff of Wazan. It is stated in Tangier that a movement is on foot through out Morocco which is likely to lead to results altogether unforescen. The Standard, discussing the outlook in Morocco, says:—English interest in French intrigues in Morocco is constantly increasing. Morocco commands the entrance to the Mediterranean from the Atlantic. It is a matter of great concern to England, as the master of India, who holds Morocco as much as who holds the Sucz Canal."

The latest craze among collectors is that of saving breakfast rolls of ladies of note, actresses, and for that matter also of distinguishd men, from which rolls a bite has previousy been taken and the remnant of which is then ticketed by the collector in this wise:
"This roll was bitten into by Miss So-and-So on May 12, 1884, while taking her coffee."

While Dr. W. Ebstein, a German physician, permits corpulent patients to cat rich food -- "an egg is an egg," and the size makes no like pate de fole gras, marrow and fat meat, difference about the price. Hamburgs are he strictly forbids potatoes, sugar, sweets of small, active, non-sitters, very healthy when all kinds, and while he prescribes black tea, allowed unrestricted liberty, but they seldom without sugar, he does not even allow much do well when confined to yards. There are bread. There must be no beer, of course, but ceveral different varieties of Hamburgs, and there may be three glasses a day of white wine. He allows bologna sausage.

> A resident of Ottawa, Canada, says he has discovered a compound, the principal ingre-dient of which is oyster shells, which will absorb daylight or gaslight and reflect in the

A POETS WIFE.

THE SAD STORY OF JOAQUIN MILLER'S DOMESTIC TROUBLES.

Joaquin Miller has made known to the world the tragedy of his home. It is a strange wild story, which he tells of the way in which he found and wood and won Minnie Myrtle, the nom de plume of his wife. For Mrs. Miller, like her husband, was a journalist, and it was her writings over that fanciful signature in the far western newspapers that first attracted his attention. He says:—"It was while I was riding Mossman and Miller's pony express from Walla Walla to Millersburg, in the mines of Idaho, in the summer of 1863, that I first was attracted by her writings in the newspapers. I wrote her and had replies. Then when I came down from the mountains and embarked in journalism she wrote to me and our letters grew ardent and full of affection. Then I mounted my horse and rode hundreds of miles through the valleys and over the mountains. till I came to the sea, at Port Oxford, then a flourishing mining town, and there first saw MINNIE MYRTLE.

Tall, dark and striking in every respect, the first Saxon woman I had ever addressed, had it all her own way at once. She knew nothing at all of my life except that I was an expressman and country editor. I knew nothing at all of hers, but I found her, with her kind, good parents, surrounded by brothers and sisters, and the pet and spoiled child of the mining and lumber camp. In her woody little world there by the sea she was literally worshipped by the rough miners and lumbermen, and the heart of the bright and merry girl was brimming full of romance, hope and happiness. I arrived on Thursday. On Sunvay next we were married! Oh, to what else but ruin and regret could such romantic folly lead? Procuring a horse for Miller's newspaper had been suppressed, and the newly-married pair were turned adrift on the world. They drifted first to San Fran-

having been added to the party, the trio set out with a party of friends for a mining camp further east:—"And what a journey was this of ours over the Oregon Sierras, driving the bellowing cattle in the narrow trail through the dense woods, up the steep, snowy mountains, down through the roaring canons! It was wild, glorious, fresh, full of hazard and adventure! Minnie had made a willow basket and swung it to her saddle horn, with the crowing and good-natured baby inside, looking up at her laughing as she leaped her horse over the fallen logs or made a full hand with whip and lasso slashing after the cattle. But when we descended the wooded mountains to the open plain on the castern side of the Sierras the Indians were ready to receive us, and we almost literally had to fight our way for the next week's journey every day and night. And this woman was one of the truest souls that ever saw battle." Reach-ing the mines at last Joaquin Miller settled down, studied, practised as a lawyer, was elected Judge and then the fever of poetic ambition coming strong upon him, he became "old and thoughtful" as he composed the Song of the Sierras.

HIS HEALTH failed him, he grew dull and self-absorbed, and "the merry-hearted and spoiled child of the mines" became impatient of the dull erimes that citizens have been afraid to bring accusations. It has been monotony of his study. She was not happy, and after a time the longing for the sea and the cold home coming strong upon her she his victims in a deep cave near his home. the old home coming strong upon her, she The facts leading to the discovery are these: took her two children and returned to her Last September Dick Overton, a negro, was employed on Morrow's farm. Morrow owed the broke his word—or at least postponed fulling his promise till a year had took her two children and returned to her lim S60, which the negro wanted, as he proposed to move to Alabama. He had some it was thought he had gone to Alabama, until a robbery a short time since led to a search of Bellamy's Cave," as this death hole is called.

On the warm of a dark hole in the most of the control of the most of the part of the control of the control of the most of the part of the control of the most of the part of the control of the control of the mines that she was, ever angry and impulsive, brought a suit for divorce. On this the poet says:—"This so put me to shame that I abandoned my plans, and in rare and discovering the control of and in rage and disappointment formed a collusion with her lawyer to give her a pretense of that which she professed to desire. The sham decree was announced to the world. And it was perhaps quite ten years before she by chance met some one who told her the truth. She had married, but at once left all, and came to me here. I had seen her form but once for nearly a dozen years. And such years! Let me not recite any of

THE HORRORS they hold in this connection; and yet I heard from her all the time, and while she wrote against me and did all that made my life so miserable, she did not really mean my ruin; but thinking me strong and prosperous and me and laughed that she might not weep. But in time she nearly drove me mad, and I left the country and proposed never to re-After a time, however, he came back to America, and she also returned to him. "I lowed to see her little girl, who for should see her daughter before she died," and with that she was perforce content. She had not long to wait. Winter wore on, April came. "Then they came to tell me, from her, that she was dying, and that I must keep my promise. The child came, and the good people, the gentle loving people who kept with her and eared for and loved and pitied her in these last days, said it was like religion to see them together, and that the dying woman in her last days was very, very happy.
And so Minnie Myrtle died last May in New York.

The sure effects of Ayer's Sarsaparilla are thorough and permanent. If there is a lurking taint of scrofula about you, Ayer's Sarsaperilla will dislodge it, and expel it from your system.

THE DYNAMITE CONSPIRATORS.

LONDON, June 6.—On parliament reas-sembling after the Whitsuntide recess in the House of Commons, Mr. George Anderson, advanced liberal, member for Glasgow, asked if the government had made any representations to the authorities at Washington in re-

gard to dynamite outrages.

Lord Edward Fitzmaurice, under foreign secretary, requested that notice should be given of this question. The police are sparing no efforts to discover the persons who caused the recent explosions here. They have ascertained that certain men residing here who have been suspected have fled to America, Australia or France. Some of them, it is believed, have been implicated in the Phoenix Park murder. It is probable arrests will be

made shortly. Lord Granville has sent a note to Mr. Lowell to be delivered to Mr. Frelinghuysen relative to the open collection of money for the dynamiters.

The establishment of a crematory in New York is assured. Twenty-five thousand dol-lars has been subscribed, and the furnace will be built before the end of the present year.

TEA-TABLE GOSSIP.

A close observer tells us that when you see a man operating with a needle and thread on a trouser button you can easily tell whether he is single or married. If he uses a thimble he is married, but if he pushes the end of the needle against the wall and pulls it through the button with his teeth, you may safely bet that he is single.

"Yes," said Fogg, "Dr. Pillroller is a brave man, no doubt, but he carries his bravery too far. He is too handy, sir; never saw so rash a man. Called him to see Mrs. F, to-day, and he actually asked her to let him see her tongue! Fact, sir, I wouldn't have believed that any living man would have had the courage to meet that tongue of

MR. COX'S SOUBRIQUET.

HOW THE FUNNY MAN OF THE HOUSE BECAME TO BE CALLED "SUNSET."

The Hon. "Sunset" Cox in 1853 was editor of the Ohio Statesman, a newspaper published at Columbus, O. He earned the soubriquet by writing the following description of a sunset. It was printed in the Statesman, May 19, 1853:—
"What a stormful sunset was that of last

ight! How glorious the storm, and how glorious the setting of the sun! We do not remember ever to have seen the like on our round globe. The scene opened in the west, with a whole horizon full of golden interpenetrating luster, which colored the foliage and brightened every object in its own rich dyes. The colors grew deeper and richer, until the golden luster was transformed into a storm cloud, full of finest lightning, which leaped in dazzling zig-zags all around and over the city. The wind arose with fury, the slender shrubs and giant trees made obeisance to its majesty. Some even snapped before its force. The straw-berry beds and grass plots "turned up their whites" to see Zephyrus march by. As the rain came and the pools formed, and the gutters hurried away, thunder roared grandly, and the fire-bells caught the excitement and rung with hearty chorus. The south and east received the copious showers, and the west all at once brightened up in a long polished belt of azure worthy of a Sicilian sky. Presently a cloud appeared in the azure belt in the form of a castellated city. It became more vivid, revealing strange forms of peerless fancs and alabaster temples, and glories rare and grand in this mundane It reminds us of Wordsworth's plendid verse in his Excursion :

The appearance instantaneously disclosed Was of a mighty city—boldly say A wilderness of buildings—sinking far And self-withdrawn into a wondrous de Far sinking into splendor without end.

"But the city vanished only to give place to another isle, where the most beautiful forms of foliage appeared, imagining a paradise in the distant and purified air. The sun, wearied of the elemental commotion, sank beneath the green plains of the West. The 'great eve of heaven' went not down without a dark brow hanging over its departing night. The rich flush of the unearthly light had passed and the rain had ceased, when the solemn church bells, the laughter of children, out and joyous after the storm is heard, with the carol of hirds, while the forked and purple weapon of the skies still darted illumination around the Starling College, trying to rival its angels and leap into the dark windows. Candles were lighted. The piano strikes up. We feel that it is good to have a home-good to be on earth when such revelations of beauty and power may be made. And, as we cannot refrain from reminding our readers of everything wonderful in our city, we have begun and ended our feeble etching of a sunset which comes so rarely that its glory should be committed to immortal type.

CONSUMPTION CURED.

An old physician, retired from practice, hav ing had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections, also a positive and radical cure for Nervous Debility and all and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, this recipe, in German, French or English, with full directions for preparing or using. Sent by mail by addressing with stamp, naming this paper, W. A. Noves, 149 Power's Block, Rochester, N. Y.
