MARKET RETAINS HEALTHY TONE

Continued From Page 18.

being almost no purchases for export. Deliveries of produce here are fairly large.

Montreal reports say trade generally holds a steady tone. While the volume is not large for this time of the year, it is of fair proportion, and promises to keep up well for the balance of the season. The movement of wholesale lines is generally satisfactory. Sorting orders for all lines of drygoods are quite good, and excellent orders for heavy lines are being received from travelers on their routes. Values show little change, altho cottons and woollens show firmness. The business moving in hardware continues satisfactory. The demand for heavy goods is moderately active, and in building supplies trade is brisk. Repeated advances in linseed oil have been followed by higher prices for prepared paint. The features in groceries are a pronounced shortage in the tomato pack, and higher prices for rice, tapioca and salmon. Country trade is good in some districts and indifferent in others, and these conditions are reflected in collections.

Winnipeg reports say wholesalers there are busy sending out shipments of fall and winter goods. The sorting trade is exceedingly heavy, due to the fact that early purchases of fall goods were light. Travelers out are also sending in excellent winter business. The demand for staple groceries is brisk. Receipts of wheat are large, but the grades are not up to those of earlier inspections. Export business is quiet. Fall hardware is active. Prices on harvesting tools have advanced. Collections are fair to good.

440 Square Miles

Timber Limits

On Georgian Bay, Ontario

To be Sold by Auction in Blocks of 5 to 36 Square Miles

On account of their President and principal shareholders being engaged in other large enterprises, and not having the time to give to them all, THE PARRY SOUND LUMBER COMPANY, Limited, have decided to sell by Public Auction, to be held in the rotunda of the Board of Trade in the City of Toronto on the

Seventh Day of December, 1910,

all of the timber lands, mills and town property situated in the Town of Parry Sound, also Tug, Scow and Full Camp Equipment for five camps. Ontario Timber Limits

TO BE SOLD

comprise some 440 square miles of licensed and deeded pine, hemlock, spruce, birch and other timber. The licenses from the Ontario Government include all timbers, and are not restricted for time. Government dues are as follows:

Saw Logs, White Pine, $1.50 per M. ft. B.M.
Saw Logs, Hemlock, Tamarac and other woods, 75c. per M. ft.

The timber is situated in the Townships of McDougall, Foley, McKellar, Monteith, Carling, Christie, Shawanaga, Burpee, McConkey, Mills Allen, Secord, Falconbridge and Street.

The Canadian Pacific, Canadian Northern and Grand Trunk Railways run through the limits, which makes some of the parcels offered for sale particularly desirable for small mill owners.

A circular giving full information, maps, terms and conditions of sale will be furnished upon application to

PRES. SHAUGHNESSY HERE TALKS OF TORONTO PLANS

No Present Intention of Abandoning Union Station—Program For King Street Property.

Sir Thomas Shaughnessy, president of the C. P. R., arrived from Montreal yesterday morning with several other officers of the company. He spent the day in making an exhaustive tour of the city, visiting all the freight terminals and other property of the company. He left in the evening for Victoria Harbor, where he will inspect the new elevator and terminal, after which he will proceed to the west to go over the company's transcontinental lines.

Seen by The World, Sir Thomas said: "I have found a wonderful increase in the size, importance and prosperity of Toronto, and it is, of course, in line with this growth that greatly enlarged facilities will be required in the near future. The C. P. R. has invested immense sums in real estate in the city in the last few months, and we expect to spend still greater sums in improvements in the immediate future. Our plans for the city are still in course of preparation, but unfortunately we have not been able to complete them as soon as we had hoped, otherwise Mr. McNicoll would have accompanied me on he present trip, and we should have been able to make them public. While they remain in an unfinished state, I fear I cannot disclose any part of our propositions; we hope, however, to have them ready within a short time."

Mum as to Viaduct.

Asked if the viaduct case, which will probably come before the privy council in November, had any bearing on the company's Toronto plans, he replied: "The whole subject of the viaduct is necessarily sub rosa, being a case before the courts, and I do not feel at liberty to express myself on it; but it will not affect our general scheme to any great extent, and I think it will do no harm for us to submit our proposition to the city as soon as it is completed.

The company had no present intention, Sir Thomas said, of abandoning a union station with the Grand Trunk in the present locality. "In fact," he said, "the C. P. R., the Grand Trunk, and the City of Toronto are under an agreement to maintain a union station, and this agreement has still fifty years to run. The only way it could be dissolved would be by mutual consent of all three parties involved."

The expropriated properties on West King-street would not be taken over by the company at once, as serious work could not be begun until possession of the government house property was obtained. At the most, a small proportion of the land would be taken over during the next year. Meantime, there was no intention of abandoning North Toronto as a passenger station, and it was more probable that the latter would be further enlarged and improved in the future.

Service With Hamilton.

"The running of a passenger train from Hamilton to North Toronto," said Sir Thomas, "has been under consideration for some time, but we don't want to make any definite decision until the Islington cut-off is finished. You never can tell what accidents may happen to delay the completion of a piece of work such as that." The train referred to by Sir Thomas would probably be No. 40 from Buffalo and Hamilton, which now arrives at the Union Station at 9.15 p.m., and No. 27, which leaves the Union Station at 7.00 a.m. By running these trains over the Islington cut-off, the North Toronto-Montreal train could have its terminus in Hamilton instead of in West Toronto, as at present, and would enable passengers to go from Hamilton, or possibly Buffalo, to Montreal without change.

Regarding the rumor of a second great freight terminal at Lambton, a duplicate of that at West Toronto, Sir Thomas said: "I think our improvements in that quarter will probably be more in the way of enlargements of our present facilities. It is possible that our yards will reach to Lambton in time, but they will likely be a natural continuation of the West Toronto yards. It is always better to enlarge an old thing than to make a new one; for example you would rather enlarge the size of The World, to meet increased requirements, than start a scond paper."

PENALTIES FOR HOTELMEN

Who Sell Liquor to Drunken Men—Temperance Society's Request.

The West End Christian Temperance Society have passed on a resolution requesting the police comissioners to call upon the police in future when making arrest for drunkenness and disorderly conduct to ascertain the name of the saloonkeeper or hotelkeeper who sold the drink causing the intoxication, and that the legislature be requested to enact an amendment to the License Act, so that the party arrested shall be questioned on oath by the magistrate as to who sold him the liquor, and, on the same being fully established, the saloonkeeper shall be fined for the first offence $25, and double for each and every subsequent offence proven, and the proceeds of such fine, when prisoner is sent to jail, be paid to the wife and family. Also that three such offences shall constitute sufficient ground as to prevent a renewal of license to such license holder or premises where the liquor was sold.

May Be an Enquiry.

KINGSTON, Oct. 7.—The Trades and Labor Council by resolution has expressed regret at its unwittingly being the cause, to a certain extent, of Prof. John Marshall being compelled to resign from Queen's. It also heartily endorsed the stand taken by Mr. Marshall as the only one open to a man of his calibre.

It is understood that an investigation will be demanded by friends into the causes alleged to have necessitated the resignation.

Lost Gold Mine Located Again.

BIGSBEE, Ariz., Oct. 7.—Mexican officials at Cananea announced the rediscovery of the old Santa Fe-Teresa Gold Mine, one of the few really "lost" mines of the southwest, which was known to have been worth millions of dollars, and which has been lost for many years. The main shaft is well preserved.

The Mexican Government is now making arrangements to take charge of the mine.

Cobalt—Advances by From One to Two Points in Active Mining Issues.—Cobalt

Cobalts Regain Buoyant Tone After Slight Early Recession

Mining Stock Prices Marked Up Again, Advances Running Thruout List—Rochester Regains All Its Loss.

World Office,
Friday Evening, Oct. 7.

A slight disposition to sag lower was displayed by certain of the active mining issues early in to-day's session at the local mining exchanges, but this was entirely dissipated by the heavy purchases which came into the market and served to inspire another outbreak of bullish enthusiasm, which resulted in prices being marked up higher in various instances.

The early part of the trading was remarkable only for its listlessness as compared with yesterday's strenuous dealings, but the market did not take long to wake up again, and on the afternoon board the advances which were made rivaled those of the preceding session.

The feature of the operations was the excellent demand for stocks which came into evidence when the market showed symptoms of heaviness, prospective purchasers evidently taking advantage of the attitude of marking time to pick up securities, in the idea that prices would work higher without much further delay.

As soon as forcible buying came in evidence, the stocks which were most in demand resumed their upward march and the result was that good advances were recorded before the buying movement was satiated. Little Nipissing led the advance, selling up to 27 1-8, or nearly a point above yesterday's high. Beaver, Right of Way, Cobalt Lake and Peterson Lake also changed hands above previous records.

Rochester was the mark for a drive early in the day, the shares being thrown overboard by holders, and selling off to 12 1-2. The reactionary tone did not hold, however, and in common with the rest of the market the stock advanced on the afternoon board, regaining all its loss, with a little more in addition.

An all round firmness characterized the mining list at the close of the session, the undertone being buoyant and the demand for stocks good. Public interest has broadened materially even during the last few days, and, underlying conditions being healthy, further advances seem highly probable.

Only One Will Fly.

CHICAGO, Oct. 7.—Only one aviator, Eugene Ely, will make the attempt to fly from Chicago to New York for the $20,000 prize offered by The Chicago Evening Post and The New York Times. The managers at a meeting this afternoon decided to delay Ely's start until Sunday.

Cobourg's Growth.

COBOURG, Oct. 7.—The assessment roll of the Town of Cobourg has been returned. There is an increased assessment of $112,000, and an increase in population of 375.

PROGRESSIVE WORK MAKES MACKENZIE A REAL MINE

Elk Lake Property Has High Silver Values, and is Rapidly Coming to Front.

ELK CITY, Oct. 4.—I visited the Mackenzie mine to-day, which is one of the working properties here. Under Mr. E. J. Rossiter this company has had faith enough in its property to keep on working, tho as yet they have done development work on only a comparatively small part of their acreage. When I visited the mine in the spring a vein had been discovered about ten yards from the No. 1 shaft. This was a calcite vein with a little aplite along the sides, and good silver values. An open cut has since been made along it, and at 20 feet depth native silver in leaf form has been struck.

No. 1 shaft is down about 70 feet, and will be lowered to 75 feet, when the management will drift into the new vein so as to cut it at this level, which it is expected will be done in about 15 days. This vein shows high silver assays.

The formation at the point of working is somewhat interesting. Between the shaft and the vein is a six inch slip of slate, which severs the vein. This latter is on both sides of the slate, not thru it. The slate formation at Cobalt is usually very deep rock, and not likely to cut out. Indeed it is more likely to widen out and make two contact veins with slate and gabbro, as the walls of one, and slate and diabase as walls of the other. The drift on the Mackenzie will be watched with considerable interest, as it is these tests of nature's peculiarities which give zest to mining work.

The Mackenzie is one of the most conservative and progressive mines in the Elk Lake district. The buildings are made of logs and are substantially erected. Progress up to the present has been necessarily slow and development has been confined to the one shaft. Work goes steadily on, and there is a great improvement from the state of the property in January last. It begins to look like a mine and now that the buildings are up, greater progress can be made with the underground work.

J. B. Spurr.

Too Good to Be True.

OTTAWA, Oct. 7.—The report published in certain papers that telegraph rates are to be reduced at the next session of parliament is not credited. It is pointed out that no resolution of parliament can reduce the rates of private companies. Two years ago all such concerns were put under the railway commissioners.

Died in Calgary.

BELLEVILLE, Oct. 7.—Jas. H. Mills, aged 68, for many years a popular business man of this city, died suddenly last evening at his home in Calgary, whither he moved in June last. Apoplexy was the cause of death.

Town Seized by Sheriff.

SYDNEY, N.S., Oct. 7.—The Town of Glace Bay has been seized by the sheriff of the county at the instance of the municipality of Cape Breton. Town property to the value of $16,000 was levied upon by Sheriff G. B. Ingraham, an amount due the county for the town's share of joint expenditure.

Col. Lamb to Inspect S. A.

LONDON, Oct. 7.—Colonel Lamb of the Salvation Army sails for Canada to-day on his annual inspection tour.

STEWART, B. C.

Cobalts Are Going Higher

The upward tendency of the Cobalt market is very pronounced, and several of the lower-priced stocks have made good profits for holders. We will give our clients, on application, information regarding a low-priced stock that should double in price in sixty days.

Watching Your Interests

Our Mr. Barr is in Cobalt to-day, visiting the mines in which our clients are chiefly interested. We will give you his opinion on his return, if you ask for it. In the meantime, we have no reason to suggest anything but the purchase of all the good listed Cobalts, as the tendency is for higher prices all round.

MARKET SHOWS SUBSTANCE

The upward movement continues in the stocks which we have advised in the last two weeks. Public buying of a large character has entered the market, and prices yesterday were strong. **Peterson Lake** has not yet advanced with the rest of the securities, and it should do so. We are in a bull market, and the only advice we can tender is to buy the good stocks. Those we advise purchases of are: **Right of Way, Peterson Lake, Beaver and Little Nipissing.**

Wetlaufer and **City of Cobalt** will bear careful watching, as we think they are promising for good advances.

Consult us for information on the Cobalt stocks.

Little Nip Making Good

Mr. Gordon, its manager, took a few prospective buyers on Wednesday last to see the wonderful showing at the mine. On their return yesterday morning the market made another advance in price. It is seldom you are allowed to see into a mine, but Mr. Gordon says you are welcome, and he can show you big value for your money.

We advise buying **Little Nipissing, Peterson Lake, Cobalt Lake and Rochester.**

COBALT STOCKS

On July 29th, 1910, we issued a circular letter on the principal mines of Cobalt and advised the purchase of same. The market for several of the stocks named has advanced, owing to the improved conditions at the mines. In this space we will give an up-to-date opinion from time to time on the prospects of the the principal mines, and in a short time we will issue another circular letter incorporating our latest information, and will be glad to mail a copy free on application.
