PRIZE LISTS AT EXHIBITION SHOW KEEN COMPETITION IN MANY CLASSES.

Cattle, Sheep, Swine, Flowers, and Other Departments Inspected by the Judges—The Results of Their Deliberations in Prizes and Diplomas.

St. John's 1902 exhibition went out in a blaze of glory Saturday night after a run of six days in the course of which the attendance broke all preceding records. Saturday's figures, while not up to the mark of the other days, was still far larger than most days of other years, 7,622 people passing the turnstiles.

The comparative statement of this year's attendance with other years shows as follows:—

	1902.	1900.	1899.	1898.	1897.
1st day ...	16,000	2,012	690	1,207	3,381

Prize Cattle Parade.

Saturday's programme was an especially good one. In the afternoon all the prize winning cattle were paraded around the ring and they received much favorable comment from the large number of spectators assembled in the grandstand.

The Lukens and the vaudeville show in amusement hall received their quota of applause at every performance, while the man with the moving pictures in the smaller hall crowned King Edward and kept Mont Pelee in eruption from 10 a. m. to 10 p. m. for the edification and amusement of large numbers.

The pyrotechnic display in the evening was the best of the week, the weather conditions were favorable for a good fireworks show and T. W. Hand, president of the fireworks company, of Hamilton, directed the exhibition.

In the main building everything was in full running order until 10 o'clock. One or two exhibitors made an attempt to dismantle their booths before that hour but they were promptly stopped by Manager Hubbard, who insisted that everything should remain in place until the last minute of the show.

To Manager Hubbard is given credit for the success which has attached to the fair. He has worked incessantly and in his labors has been greatly assisted by his energetic staff.

F. M. Sclanders, who has been Mr. Hubbard's right hand man throughout, made a valuable assistant to his chief. He was particularly courteous to the press representatives and by his unremitting attentions to them lightened their labors considerably.

In the position of superintendent of buildings, William Taylor proved the right man in the right place. He had the location and particulars of every exhibit in the buildings and on the grounds at his fingers' ends and it would be hard to find a better official.

Mr. Dorman, the eagle-eyed custodian of the press gate, proved a good investment for the directors. He would let no one pass without the proper credentials and was thus responsible for turning many a stray quarter into the coffers of the association.

The judges in the various classes as well as the other members of the staff all worked hard and acquitted themselves well. The press room was in charge of Gavin Irvine, who looked after the newspaper representatives in thorough painstaking fashion and the appearance of that room was a credit to him.

Milking Competition.

The milking competition closed on Saturday afternoon. There were four competitors: Logan Bros., of Amherst Point, with a splendid Holstein; H. S. Pipes & Sons, of Amherst, with a Jersey; Fred S. Black, of Amherst, with an Ayrshire, and Walter McMonagle, of Sussex, with a grade Ayrshire.

The competition ran for 48 hours with two or three milkings a day, as might be required. The scoring was based as follows: One point for every pound of milk; 20 points for every pound of fat; four points for every pound of solid not fat; one point for every 10 days in milk after the first 20 days; 10 points to be deducted for each per cent of fat below three per cent.

The scoring was as follows:—

Logan Bros., Amherst Point, first, score 214.61.

H. S. Pipes & Sons, Amherst, second; score 175.56.

Fred S. Black, Amherst, third; score 162.07.

W. H. McMonagle, Sussex, fourth; score 102.78.

Mr. McMonagle missed one milking which accounts for his low score.

Judging has continued steadily and the following award are made, additional to those already published:—
