Mr. A. C. Shaw has laid information before J. T. Mellish, J. P. for the county, against Alex. S. McPhee and Edward F. Lamont for perjury alleged to have been committed by them. The first old time snow storm of the season set in Friday afternoon and continued during the night until early next morning. The wind blew from several directions during the storm, veering from the northeast to northwest and west. The maximum velocity was forty-two miles, but at times a speed of sixty miles was attained. The snow was pretty much piled in banks of two and three feet in depth. The fall on the level was about eight inches.

It is rumored that the Shamrock lacrosse club will cross the Atlantic and meet all European teams.

Six ounces in front and three ounces behind is the weight of the shoes put on colts the first time shod at Palo Alto. This is an invariable rule.

Adolph Norseng, the famous Norwegian skater has at last arrived on this side, having reached New York on board the steamer Iceland from Copenhagen last week.

Maud S. is being jogged, and shows all her old-time freedom of action. She also goes absolutely sound, and her owner is much encouraged at the prospect of reducing her record.

The two-year-old filly Secret, by Harry Wilkes, dam Contest, owned by J. R. Lamy, of Amherst, died last week from inflamation. The colt was very promising and was valued at $500.

In 1885 aluminium was worth $90 a pound now it can be purchased for about 70 cents a pound. The manufacturers of paper rowing shells say they do not fear the competition of aluminium shells.

The five mile skating contest between Hagen and McCormick was won by the former, in 16 minutes 23½ seconds. McCormick's time was 16m., 24s. Hagen gave McCormick a handicap of half a lap.

Stamboul 2.07¼, the world's stallion king, has been sent to Terre Haute and is now in Budd Doble's stable. Mr. Harriman, the New Yorker who recently purchased the stallion has turned the horse over to Doble for the next year.

A London despatch says: James Aveling the well-known skating amateur champion, Thursday, at Lingay Fen, skated a mile with three sharp turns in 3m. 22 1-5s., beating the world's record and earning the first gold medal awarded by the National Skating Association.

The report that Harvard had ordered an aluminium shell from Galanaugh, in Philadelphia, has set Yale men to thinking. Galanaugh offers to guarantee that his shell will be 10 seconds faster than a cedar or a paper boat. The metal is only one twentieth of an inch thick, and the shell will be about 50 pounds lighter than one of cedar or of paper.

Six indoor bicycle records were smashed at the Exposition hall, Milwaukee, Wis., on the 3rd inst. E. W. Ballard lowered the half-mile record, 1.13 to 1.12; John S. Johnson lowered his own record of 2.30 for a mile to 2.26; Rhodes lowered the five mile record from 13.29 to 13.05; he also sandwitched in new records for two, three and four miles. The figures for each mile are: First mile, 2.35; two miles, 5.10; three miles, 7.44; Four miles, 10.25; five miles, 13.05.

Some time ago Pierre Lorillard wrote to Mr. Harper, the owner of Longfellow, saying that he wanted a foal by his horse, "brown in color and with a blaze in the face," and asked if he would try and breed him one, the price for the foal to be a secondary consideration. Mr. Harper is going to try and fill the strange and entirely novel order, and to that end he will have Longfellow bred to the imported filly Cinderella, owned by Dr. J. D. Neet, of Versailles, Ky., who has consented to the experiment. Breeding a colt to order is an innovation, and the outcome of the experiment will be watched with much interest by all horsemen.—New York Times.

The Prince Edward Island Futurity races are to be continued again this year. There are four stakes, viz: for foals of 1889, 1890, 1891 and 1892, the entrance for each being $12. One noteworthy and commendable change in the conditions is that the stakes will be open to all eligible horses owned in Nova Scotia and New Brunswick. Island horsemen will be especially pleased at this innovation. They have nothing to fear in meeting the speedy ones from our sister provinces. Past events have shown that our Island bred horses can successfully hold up their end in these meets and in some cases go one better, and may we not reasonably hope for a like order of things in the future. The races are to be trotted on Summerside Driving Park, on Tuesday, Sept. 14th.

Jos. F. Donoghue, the champion amateur skater, and his brother Jim have returned home to Newburg N. Y., from Minneapolis thoroughly disgusted with the Normania Skating club, which induced them to go out there on a despatch promising to match Joe with Norseng. After a month's stay and there being no signs of Norseng's coming from Norway to Minneapolis, or no assurance that he would arrive in a month, Donoghue requested the club to post a forfeit of only $250 and he would wait another month for Norseng. This the club declined to do. Donoghue had put in a month there at considerable outlay and wished in the event of no race taking place to meet expenses. Before leaving he claimed the professional championship of the world. Donoghue has posted a forfeit of $250 with the New York Herald to skate any man in the world, for $1000 a side, any distance from a quarter of a mile to one hundred miles, for the championship. He even states he will skate for fun. He prefers meeting Hagen.

Sugar has gone up in price at the rate of 12½ cents on the hundred pounds for granulated, and 15 cents per hundred for yellow. The cause of the rise is an anticipated deficiency in the supply of the raw material. It is estimated there will be a shortage of 140,000 tons in the beet root crop, and that the West Indian cane crop will also fall below the average.

A slight shock of earthquake was felt up the river from Fredricton, N. B. one night last week. Houses for several miles along the river were quite severely shaken and the inmates all awakened, and ice in the river extending some distance and of nearly a foot's thickness was broken up so as to make it impassible for teams. No serious damage, however, other than this was caused.

A young lad named Trainor, son of Mr. Hugh Trainor, had the first fingers of his right hand badly mangled Friday by a circular saw in McKinnon & McLean's foundry. Unobserved by the workmen the boy was investigating the mysteries of the saw, which was motionless, when a belt shifted to start another portion of the machinery in the shop also set in motion, with the above result. The lad's father is an employe at the foundry.

The attorney-general of New Brunswick has issued his fiat for the writ of error in the graveyard insurance case. It is the first time in the history of that province in which this method has been adopted to save a person convicted of crime. When Judge Peters appears in court to sentence C. B. Welton and Dr. Randall the writ will be produced and the matters set forth therein will be argued before sentence can be delivered.

The first issue of St. John's new labor paper, The Workman, under new management and in a new form has been received. The Workman will in future champion the laboringman's cause and assert his rights through its eight pages of five columns each. The issue before us is replete with matter of interest to all, but more especially to the class in whose behalf it is published. Judging by its work in the past the cause of the horny-handed sons of toil will be ably defended while in the hands of The Workman.

John J. McMillan, aged about 23, eldest son of Mr. James McMillan of Corraville, Lot 53, was drowned while skating across Wenham lake, near Beverly, Mass., on the 28th ult. His body was brought home for interment, arriving at Georgetown on the Stanley, Thursday. The following day his remains were interred at the Cardigan Bridge Catholic cemetery. The deceased had been resident in the States a little over two years. His sorrowing parents have the deep sympathy of the community.

We regret to learn of the loss which Mr. Michael Devereaux, farmer, of New Haven, sustained while crossing the North River ice, last Wednesday. While on his way to the city and when some distance off Dockendorff's his team broke through. Mr. C. A. Hyndman, who witnessed the accident from the shore, quickly dispatched his employees to assist in extricating the animal, which was accomplished after great difficulty. The horse however died shortly after being pulled out. The ice on the rivers is not yet the safest for teams. Several teams broke through in different places last week.

There is considerable excitement over the action of the Westmoreland, N. B., county council in reducing the salary of Scott Act Inspector McCuaig to $5 and $1 for each conviction. This virtually means the tie up of all Scott Act prosecutions in the county. There has been growing dissatisfaction with the operating of the act, all receipts from fines being eaten up in legal expenses. Last year over $2,000 was collected in fines, but the inspector's bill overran that amount by $60 or $70, and as the council could not dismiss the inspector, they decided to clip his wings by fixing his salary and fees so low that he will not work. The council stood eight to six in favor of the change.

The steam fire engine Rollo is to be sold by the city.

He obtained a gun loaded with shot and slugs, placed the stock in the hall stove and the muzzle against his breast. Soon it exploded tearing a gaping wound in his body. He died in an hour. Deceased had been despondent for some time.

Miss Mary Gertrude Smith, of Fenwick, Cumberland, a bright little miss of three months, is probably an "Irish fixed" for grandmothers as any little girl in Nova Scotia, and is not badly off for grandfathers. She has two grandmothers, two great-grandmothers and one great-great-grandmother, and two grandfathers and two great-great grandfathers—in all nine grandparents living. Miss Smith is the seventh generation in descent from a Yorkshire family that came to America in 1775.

One of the interesting sights on the train from Augusta to Bangor Thursday afternoon was an abnormally fat woman, whose movements, were attended with much difficulty, and amused the other passengers greatly. She was a lady from the provinces who had been visiting at Richmond on the Kennebec, and was returning to Fredericton. When she moved down the aisle she swept all before her, and in going from one car to another she actually became wedged in the doorway, the united efforts of several men being required to push her through. No such weighty woman was ever seen on the road in Maine before, outside of a circus, and if she grows a bit fatter she will have to stay at home or else have a special derrick car with wide doors built for her accommodation.—(Bangor News.)

Mr. Bent's Lecture.

The weather last evening was not calculated to entrance anyone with the thought of leaving his home for the purpose of attending a lecture, no matter how interesting the subject or great the fame of the lecturer. Notwithstanding this fact, however, a good sized appreciative and intelligent audience assembled in St. Patrick's Hall to hear Mr. S. M. Bent, of the Summerside Journal, deliver his interesting paper on the life of one of the foremost of nature's noblemen—John Boyle O'Reilly. The paper was well written, showed careful study on the part of the writer, and was excellently delivered; and for upwards of an hour Mr. Bent held the rapt attention of his hearers. The early life, boyhood delights and the one youthful mistake of this patriot journalist, poet and philanthropist whose every thought of self was dwarfed by the sole idea of removing the fetters that circled his beloved country, and the bettering of her condition, were beautifully portrayed. His trial, prison life, both in the death dealing English prisons and in the penal colony, his romantic escape from the Australian bush to the free shores of America, and his afterwards rapid rise as one of the most brilliant stars in the literary firmament of this continent, and to the foremost place in the hearts of his Irish-American countrymen were dwelt upon and told in an interesting manner. The fruits of the pen, both in poetry and prose, of this generous hearted celt, who seemed only to live for the betterment of his fellow man, also received their due share of attention. At the close of the lecture a vote of thanks moved by Mr. Edward Hackett, Inspector of Fisheries, and seconded by Mr. John McSwain was tendered the lecturer, and suitably acknowledged.

Before and after the lecture several musical selections were rendered Mrs. P. Doyle and Miss May Carroll gave two piano duets, Messrs. R.E. Johnston and A. Gaudet a violin solo each and Mr. Chas. Bell Mr. Jas. Ready, and Miss Katie Trainor each a vocal solo.

Dr. Snell, the so called priest who abjured the Catholic faith, was the lay secretary of Mgr. Keane, of the Catholic University, Washington, but had never even studied theology. Snell had formerly been a Protestant, and has returned to his first love.

Basket Social.

Notwithstanding the inclemency of the weather and bad state of the roads the hall at Mount Stewart was the scene of a very pleasant time on the evening of Monday January 2nd when a literary entertainment and basket social were held. The hall was beautifully decorated and well filled with people of the village and surrounding country. At 7.30 the entertainment opened with the following programme which was carried out in a very creditable manner:

Miss Melvina Cheverie, presided at the organ. Opening Address by Rev. Mr. Gough. Chorus—"Moonlight on the Lake" Choir. Dialogue by Messrs. Cheverie, Logan, Egan. Song—"Comrades"—E. Douglas. Recitation—"Talking through their Hat"—Jos. F. Doyle. Dialogue—Frank Egan, Jessie Cheverie, Ethel McWilliams. Song—"Beautiful Dreamer"—Mrs. D. Birt. Instrumental Solo—R. McDonald, Dialogue by Jessie Cheverie, J. M. Egan and Eneas McDonald. Stump Speech—T. B. McEachern. Dialogue—Annie Cowan and W. A. Logan.

At the close of the entertainment Mr. R W. Macleod proceeded to auction the baskets in his usual satisfactory manner. The bidding was lively and the baskets were quickly disposed of at sums ranging from one dollar to four realizing a handsome sum of about seventy dollars which goes towards the laying of sidewalks. After replenishing the innerman with the good things provided, the seats were cleared away, and a most enjoyable time, of about three hours, was spent tripping the light fantastic toe, which brought the social to a close, all hands seemingly delighted with the night's entertainment.

A Bad Cold

If not speedily relieved, may lead to serious issues. Where there is difficulty of breathing, expectoration, or soreness of the throat and bronchial tubes, with a constantly irritating cough, the very best remedy is Ayer's Cherry Pectoral. It removes the phlegm, soothes irritation, stops coughing, and induces repose. As an emergency medicine, Ayer's Cherry Pectoral should be in every household.

"There is nothing better for coughs than Ayer's Cherry Pectoral. I use no other preparation."—Annie S. Butler, 109 Pond st., Providence, R. I.

"I suffered severely from bronchitis; but was

CURED BY

Ayer's Cherry Pectoral. It saved my life."—Geo. B. Hunter, Goose River, N. B.

"About a year ago I took the worst cold that ever a man had, followed by a terrible cough. The best medical aid was of no avail. At last I began to spit blood, when it was supposed to be all over with me. Every remedy failed, till a neighbor recommended Ayer's Cherry Pectoral. I took half a teaspoonful of this medicine, three times a day, regularly, and very soon began to improve. My cough left me, my sleep was undisturbed, my appetite returned, my emaciated limbs gained flesh and strength, and to-day, thanks to the Pectoral, I am a well man."—H. A. Bean, 28 Winter st., Lawrence, Mass.
