ad heard the evidence. It was proposed to lter the law so as to provide that the officer hould not declare his decision in public, but hat he should report to the Minister of Marine.

The resolution was adopted and a bill ounded upon it introduced.

MUTUAL LIFE ASSOCIATIONS.

Sir LEONARD TILLEY moved the House nto committee on the resolution declaring, that it is expedient to amend the Consoli- ated Insurance Act of 1877 with respect to ompanies transacting the business of life nsurance under the titles of 'Co-operative Life Insurance Companies,' 'Mutual Benefit Associations,' and the like." It was pro- posed to make the following require- ments regarding the various companies: First—The directors should be known to the eople and shown to be men who could be elied upon. This would be secured by re- uiring the company to be incorporated in Canada. Secondly—They should be required o give a statement of their accounts. If these ere satisfactory the Minister of Finance hould be empowered to exempt the company rom the operations of the Insurance Act as egarded the deposit. Thirdly—The financial tatements should be published in the annual eport of the Superintendent of Insurance as n additional safeguard. The Government, y these provisions, accepted no responsibi- ty but that of refusing to exempt where the ompany appeared to be badly mismanaged r attended with fraud.

The resolution was passed in committee, nd a bill founded upon it was introduced.

COAL MEASURES.

Hon. Mr. COSTIGAN introduced a resolu- ion declaring it expedient to provide that all ontracts for the sale and delivery of coal hall be made for such sale and delivery by eight, and that all sales of coal shall be by eight. He explained that the object was to eet the difficulty in the Maritime Provinces here in some places coal was sold by mea- ure, and where in consequence a purchaser

*Continued on Fifth Page.*

"Six Months' Trial Free."

To convince the public and prove to the eptical that the spirometer is the best in- rument ever invented for the treatment of iseases of the air passages, and that it is all have ever claimed for it, any one suffering rom bronchitis, catarrh, catarrhal deafness, sthma, or consumption, who will call at 173 hurch street this week and consult the sur- eons of the International Throat and Lung nstitute, can have a spirometer on trial, to e paid for at the end of six months or soon- if satisfied with the results. Consulta- ons, advice, and spirometer free—the medi- ne alone to be paid for. I do this to show he confidence I have in the treatment and to onvince the medical profession and others ho are still sceptical (notwithstanding the housands of testimonials I have published), hat the spirometer which I have invented, nd the medicines and treatment prescribed by he surgeons of the International Throat and ung Institute, are curing and will cure a arger per cent. of these diseases than any ther treatment in the world. This offer holds ood for this week. Dr. M. Souvielle, ex- ide Surgeon of the French Army.

TORONTO.

We, the undersigned Druggists, take plea- ure in certifying that we have sold DR. WISTAR'S BALSAM OF WILD CHERRY for any years, and know it to be one of the dest as well as one of the most reliable reparations in the market for the cure of OUGHS, COLDS, and THROAT and LUNG OMPLAINTS. We know no article that gives greater satisfaction to those who use it, and we do not hesitate to recommend it.

# PROOF POSITIVE

## Something that All Who Suffer Should Read.

BRANTFORD, Ont., Nov. 19th, 1883.

**To Whom it may Concern**—This is to certify that I have been a sufferer from catarrh, nervous debility, liver complaint, and kidney disease, and as a consequence of catarrh I became very hoarse and lost my voice so that I could scarcely speak above a whisper. I had spent hundreds of dollars without any relief until I applied to Drs. K. & K., who have removed my troubles so far that I scarcely feel anything wrong, and I am confident that I shall soon be well.

GEORGE B. GRANTHAM.

BAY CITY, Mich.

**To Whom it may Concern**—Eight years ago I was attacked with cerebral and spinal anæmia, and was near death's door. in fact several of my neighbours were attacked with the same disease and all died. I was thought to be beyond help when Dr. J. D. Kergan was called from a distant city, and with characteristic promptness responded to our call, took the case in hand, and after making two or three visits and by following carefully the doctor's directions I was restored to my former health. I have been acquainted long and intimately with Dr. J. D. Kergan, and as a gentleman and a physician of great skill I most heartily recommend him to any and all who may need medical aid.

A. J. RICHARDS,
Pastor M. E. Church.

CHATHAM, Ont.

**Drs. K. & K.** cured me of dyspepsia, with which I had been troubled for 33 years. I had been declared incurable by the leading doctors of London, Chatham, and Toronto. My symptoms were:—Fullness in the stomach after eating, constant and bitter eructations and belching of gas, distress in liver, pain under shoulder blades, yellowish skin and whites of eyes, furred tongue with red centre and cracked edges, cramps in stomach which attacked me in spasms, and were followed by most intense headache, cold feet and hands. I was very nervous, was troubled with frightful dreams, and awoke in the morning exhausted and unrefreshed. I had become a hypochondriac, constantly feared an imaginary evil, and was so despondent that my friends often feared that I would take my own life. After four months' treatment by the Drs. K. & K. I was cured, and am now perfectly well. I wake in the morning and wonder why I am free from pain, and after each meal I am astonished that I remain comfortable. In short, *I am cured*, and any dyspeptic knows what that means.

GEO. JOHNSON.

LANSING, Mich.

**Drs. K. & K.** have cured me of a complaint which made my life unbearable; now I feel like singing and dancing all the time. My unfortunate stomach was the cause of all my aches and pains. I was tired all the time. Sometimes ate voraciously, and at other times loathed the sight of food. Had intense pain between my shoulders and in liver, and was constantly belching wind. I was always despondent, and could not for the life of me collect my thoughts. I was also troubled with general debility and intense pain in the top of my head, and with catarrh, which caused a constant dropping down my throat. That is four months ago, and already, thanks to Drs. K. & K., I am well, really, truly well. I am only 21, and, thanks to them, look forward to such a happy life, for I am just going to be married. I weigh 137 pounds, which is 25 pounds more than when I commenced their treatment, and am, I think, a very fair specimen of what Drs. K. & K. can do if they have but half a chance.

HELEN SIBLEY.

PRESCOTT, Ont., Nov. 15, 1883.

**Drs. K. & K.**—GENTS:—I desire to express my gratitude to you for the great benefits I received from the use of your medicines, convinced that, with the blessing of God, I owe my life to your skill. Being in a most pitiable condition, badly broken down, nervous system shattered, unable to do the least work for six months, my friends thought I was sinking with consumption, a constant cough, pains in the back and limbs, chills, nervous debility and exhaustion, foretold approaching death. After trying several local physicians and many kinds of patent medicines without any benefit, but getting worse, I decided to try your skill; and now, after three months' treatment, I feel that I am a strong man again, aged 28, and able to work hard on the farm. I would advise the afflicted everywhere to apply to you and not give up hope, even after other doctors fail to cure. With my permission to publish this, I am,

Yours, &c.,
A. W. NEWMAN.

**Life Looks Bright to Me.**

**Dr. I. D. Boardman**, editor of the Petersburgh (Mich.) *Bulletin*, says:—"My health having become undermined when fighting for the Union, I was attacked in '79 by consumption in its worst form. I had severe pains in the left breast, a dry hacking cough, night sweats, daily fevers and frequent violent bleeding from the lungs. I also suffered from indigestion, heart disease, and general debility, and was greatly emaciated. In '81 I was told that I must soon die by all the local physicians, and in despair applied to Drs. K. & K. I was then a complete wreck. Their first month's treatment set me on my feet; in four months I was cured. I am now in good health, life looks bright to me, I bid fair to live and work for years, and I owe all this to Drs. K. & K."

*From the Acton (Ont.) Free Press of March 6th, 1884:*—

Our readers doubtless remember genial Steve Galbraith, once publisher of this paper, as whole-souled and honest a fellow as ever "shoved" a pencil, who had a friend in every man he met, and who hadn't an enemy in the world. Though still a young man Steve has seen much of the world in his capacity of "newspaper man" and has been as near to getting an insight into the mysteries of the future as ever yet fell to the lot of a mortal. Two years ago he was manager of the Flint (Mich.) *Democrat*, one of the leading country papers of the States. Overwork and the exposure he had undergone during his reportorial life brought on consumption. At Christman, 1882, Steve was a pretty sick man. He was given up by all the local doctors as "dying of consumption," one physician told him he had "a week to live." He was reduced to a skeleton and constantly spit blood, while cough racked him day and night. In this extremity he applied to the "Drs. K. & K." and is now well and strong. Three months of their treatment set him on his feet, and he is to-day the same active man he was when he edited the Acton *Free Press*. He calls himself "a walking advertisement for Drs. K. & K." and the land is full of such proofs of the skill of these famous specialists. There is a lot of foolish prejudice against their way of doing business, but as far as we can see the most important thing is: "Do they cure?" If they do they have a right to let people know it, and that they "do cure where others fail" an old friend, Steve Galbraith, and thousands of others will testify.

Founder, President and Medical Superintendent of the Drs. K. & K. U. S. Medical and Surgical Association.

### THE NEED OF SPECIALISTS.

TO THE PEOPLE OF TORONTO.

That there is urgent need of "Specialists" none but the most ignorant or bigoted will question, for it is absurd to suppose that the general practitioner whose time is, or should be, wholly taken up in attending upon acute cases, has the time, even if he had the opportunity, to obtain that experience in chronic diseases and deformities which is so necessary to their successful treatment. For years before our organization that need had been widely felt. For centuries had those who suffered, as only those who are continually racked by bodily pain can suffer, felt that for them the science of medicine, as commonly practiced, had no relief, that in the face of their diseases the doctor was powerless, that the practising surgeon could not alleviate their deformities. Humanly, they turned against a profession which could not aid them; humanly, they forgot what the physician could do in what he could not do; humanly, they sought from whoever promised them relief the HEALTH AND STRENGTH which had been denied them. The quack and the charlatan grew and flourished, prospering upon the hard earnings or the squandered wealth of those who, whether rich or poor, sought to recover that health which is the richest blessing this life can give. The medical profession, wrapped up in itself, let THIS MONSTROUS WRONG go unchecked, merely ostracising those who were "pariahs" from the beginning, while it failed to remove the evils from its own methods which were the foundation of quackery. While the world moved the "schools" stood still. Mighty minds indeed forged ahead and by their wonderful genius delved into the hidden secrets of death and disease, but their teachings fell on ears closed against them, their weapons fell into handschained by ethics and fettered by the code

Things were in this condition when six years ago, our association was organized. Its founders were physicians of recognized skill and surgeons of unquestioned standing. Their action was the result of long and matured consideration. They had weighed carefully the course which they intended to pursue; they had recognized the difficulties which they would have to encounter, the enmities which they would arouse on every hand. They knew that the gates of professional intercourse would be closed against them, but they relied upon the PROGRESSIVE SPIRIT of the nineteenth century for their final triumph and they counted, not in vain, on the support of the press. They had knowledge, they had skill, they had experience, they had all that should be necessary to insure success. There was need of them and they succeeded.

To-day our Association stands upon an established basis and is recognized as a POWER IN THE MEDICAL WORLD. We have proved conclusively by the thousands of cures which have rewarded our exertions that our staff is not only capable but skillful in the specialties which we exclusively treat.

With the medical profession we have no quarrel. In the day of our success we can afford to forgive the rancor with which it persecuted us in our weakness, and we have died even the friendship of some of its most advanced members, who recognize that their place is at the bedside of acute cases, cures and referring cases of our specialties, and who send to us such of their cases as have passed into our province. For such and for all who strive as we do for THE RELIEF OF SUFFERING we have ever the right hand of friendship and brotherhood; but for those who, blinded by bigotry and incapable of seeing good in anything but their own narrow bygone methods, seek to injure us by falsehoods and calumny, we have nothing but scorn and contempt. The cases which come to us are only those which other physicians have failed to cure, for were all acute diseases cured none could become chronic. It is the failures of the profession which come to us and from them we win our triumphs. We have declared "WAR TO THE KNIFE" against disease, and day by day we are growing stronger as one after another the foremost men in the medical world join us. All over the world our creed that "whatever cures is good" is enlisting mighty support. Honourable as well as famous men in every country are being constantly added to the Honour Roll of Medical Progress, for Virchow, of Germany, and Gull and Kidd, of England, following the late Marion Sims of our own land, have defied "ethics," announced that they will hereafter be free from all barbaric customs and seek, as we do, the good of mankind regardless of the "code." We would therefore claim the continued patronage of the public, which we have won by the best of titles—the right of success. That we have no superiors and few equals in our specialties is our boast, NEVER TO FAIL in the successful treatment of chronic diseases or deformities is our ambition. Respectfully yours,

DRS. K. & K.,
U. S. Medical & Surgical Association,
of Detroit, Mich., U.S.A.

## A NEW DEPARTURE.

*HEALTH ASSURANCE.*

## DRS. K. & K. GUARANTEE CURES.

Our unparalleled success in the past justifies us in announcing that after March 1, 1884, we will guarantee, by written contract (not otherwise) to cure patients or return the price of treatment. Our Association owns over $100,000 worth of property that would be subject to execution and sale to satisfy legal demands; we are therefore, good for the fulfilment of our contracts. We have always done a straightforward, honourable business, but in the past have always refused to guarantee cures. We will now continue to treat patients by the month without guarantee, and will also enter into written contracts (with all who desire such arrangement) to cure for a stipulated price. Remember! This is not a scheme to get large prices for medicine, for we furnish all remedies and instruments and appliances of every kind necessary to the successful treatment of each and every case, and return every dollar paid us if the patient is not cured according to written contract. Responsible corporations issue life insurance policies and faithfully fulfill all their contracts, because they base their transactions on the known percentage of deaths under various circumstances and conditions. By our extensive experience we know the percentage of cures that will result from our treatment of the different diseases in their various stages and complications, and we are thereby enabled to guarantee cures on a scientific basis. We invite you to come and investigate our facilities and our responsibility in order that you may decide for yourselves. A consultation costs nothing. Our facilities are unsurpassed. We employ forty-three of the most skilled, experienced, and successful physicians and surgeons; we have a large and well-appointed Invalid's House at Wyandotte, Mich., with accommodation for 250; elegantly furnished rooms for guests and invalids. We have the famous Michigan White Sulphur Springs, whose waters have effected over 10,000 cures; we have the most elegant and completely equipped offices in the world, supplied with every modern instrument and appliance surgical and electrical; our success is unparalleled in the history of medical practice. The Drs. K. & K. U. S. Medical and Surgical Association, organized 1878, incorporated 1882. J. D. Kergan, M.D., President and Medical Superintendent; Hon. Moses W. Field, Treasurer; F. B. Smith, M.D., Resident Physician at Sanitarium; W. W. Kergan, Secretary; J. C. Kennedy, M.D., Principal of The Drs. K. & K. Surgeons and Business Superintendent. Our offices are located at K. & K. Block, Detroit, Mich.; 163 Elm street, Cincinnati, O.; 631 Fourth avenue, Louisville, Ky.; and at St. Louis, Mo. Every chronic disease and deformity that effects man, woman, or child successfully treated and cures guaranteed under written contract. Special facilities for the performance of all surgical operations. Call and consult free.

At the American Hotel, Toronto, or write to Detroit, Mich.

ANNUAL

# VISIT TO TORONTO.

## SURGEONS OF THE Drs. K. & K.

WILL BE AT THE

## American Hotel, Toronto,

FROM

*MONDAY NEXT, MARCH 17th,*

TO

*SATURDAY NIGHT, APRIL 12th.*

IF YOU ARE SICK OR DEFORMED, CALL ON THEM.

WE DO NOT ADVERTISE IN THE *WORLD*.

## PUBLIC CAUTION.

**The Drs. K. & K. are the originators of the system by which chronic diseases are treated by a combination of specialists, thus affording to the patient the benefit of vast experience and combined talent. Their wonderful cures prove the success and truth of their theory, and have caused many imitators to appear, who claim to possess the same advantages. All medical firms, wherever situated, who follow the above plan are either offshoots from or imitators of Drs. K. & K., and the public are hereby warned against consulting any physician who cannot produce a certificate from the above famous association. If you cannot call at the American Hotel, write to Drs. K. & K., Detroit, Mich.**

If you suffer from Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Apoplexy, Diabetes, Epilepsy, Heart Disease, General and Nervous Debility, Female Weakness, or any Uterine Trouble, Paralysis, Rheumatism, Dropsy, Gastritis, Bright's Disease, Ulcers, Abscesses, Cancer, Neuralgia, Club Foot, Bow Legs, Knock-Knees, Hare-Lip, Rupture, Cross-Eye, Pannus, Cataract, Varicose Veins, Varicocele, Tumor, Fistula, Spinal Curvative, Potts' Disease, Polypus, Stone, or any other Chronic Disease or Deformity,

## DRS. K. & K.

REMOVE THE CAUSE AND CURE WHERE OTHERS FAIL.

### BENEFIT MY SUFFERING SISTERS!

Mrs. Geo. M. Franklin, 65 Hunter street, Hamilton, Ont., suffered from torpid liver, congested kidneys, ulceration and falling of the womb, weakness and palpitation of the heart, dyspepsia, and catarrh. She complained of pains in the left side small of back, and between shoulders; nervousness and billiousness; pain over kidneys, headache, and cold feet; inability to sleep on the left side; back very weak, feeling as "if there was a load against it" in the morning; ached from small of back to knees; often felt as if her heart would stop, and as if she would smother. Had also every symptom of female weakness. After her case had been abandoned as hopeless by several physicians, she took treatment of the Drs. K. & K., who speedily CURED her. She says: "Benefit my suffering sisters by publishing the facts of my case."

### AT HARD, SOLID WORK.

Garrison Shadd, of North Buxton, Ont., was operated on for fistula in December, 1882, by the Drs. K. & K. His recovery was complete and rapid. In November, 1883, he wrote:—"I am permanently cured of the fistula for which you treated me, and have been at hard, solid work most of the season."

### AS BRISK AS A BEE.

Mrs. S. J. Finnie, Oshawa, Ontario Co., Ont., 66 years old, previous to Sept. last had considered her diseases—Rheumatism and Dropsy—incurable. After one month's treatment by the Drs. K. & K., she writes:—"My disease is quite gone and so are the wandering pains in my limbs. I am as brisk as a bee and feel better than I have in ten years."

### A WALKING ADVERTISEMENT.

Miss Hattie Cameron, a school teacher of Kemptville, Ont., had suffered for three years from a most annoying and painful eruption on her face and nose. Unable to obtain relief at home, she took treatment of the Drs. K. & K. She now says:—"In April, 1883, I commenced treatment and was soon entirely cured. I have been a walking advertisement for Drs. K. & K. since I commenced to improve, for everyone thought my face was spoilt for life."

### EQUALLED MY MOST SANGUINE EXPECTATIONS.

Mrs. A. H. Skillin, Ames, Ouray Co., Colorado, had been terribly afflicted with scrofula, inflammation, catarrh, liver complaint, and female weakness. Since her 10th year she had large bunches on her neck, blotches and pimples on her face, and swollen glands. She suffered constantly from chills and fever, heartburn, weak back, sleeplessness, costiveness, catarrhal discharge from the nose and throat, headache, and other very distressing symptoms. Weary and hopeless, she regarded herself as incurable, but was persuaded by friends to try the Drs. K. & K. She wrote in October last:—"I am at last well and strong, and thank Drs. K. & K. The remedies have equalled my most sanguine expectations, and I feel most grateful for the wonderful benefit I have received."

### MAY YOU LIVE LONG ON EARTH TO DO GOOD.

Mrs. Eliza Clutz, Novi, Oakland Co., Mich., had been troubled many years by an erysipelatous condition of the blood, complicated with indigestion and slight female weaknesses. She had dull, heavy pains after eating, belched wind constantly, felt weak, was very restless at night, had frequent headache, aching pain in small of back and the eruption of the skin known as hives. After one month's treatment by the Drs. K. & K. she wrote them:—"I am quite cured, no doctor round here could help me, but your medicine is so good and I know it; I feel its good effects in good health. I thank the good Lord for sending us such good doctors, and may you live long on the earth to do good."

### TRY THE SAME WAY.

Mrs. Fred. Shipp, of Bellevue, Eaton Co., Mich., late of Jonesville, Hillsdale Co., suffered greatly from female weakness and general nervous debility. She could obtain no relief from her local physicians, and commenced Drs. K. & K.'s at least resort. She took one month's treatment, and nine months afterwards wrote them as follows:—"Not having been troubled with my former diseases since I took treatment with you, and not having enjoyed as good health in five years as since I took your treatment, I consider myself cured, and recommend any diseased afflicted to try the same way of obtaining relief."

### A DIFFICULT PERSON TO DOCTOR.

Mrs. Orson Wallace, of Canton, St. Lawrence Co., N.Y., is 65 years of age, and suffered for many years from nervous debility, spinal weakness, catarrh, torpid liver and kidneys and hypochondria. Her bodily suffering and mental misery were alike very great, particularly so as she was unable to sleep at night, and was always fearful of some impending evil. In this extremity she consulted Drs. K. & K., and, after two months' treatment she wrote them:—"I am wonderfully improved in every particular. I am a very difficult person to doctor, and can take very little medicine, but yours all agreed with me all the time. I have improved more rapidly under your treatment than ever before, and you are welcome to publish these few lines.

### BETTER IN EVERY WAY.

Mrs. Orvilla Heal, of London, Ont., was a great sufferer from nervous debility, inflammation of the womb, torpid liver, palpitation of the heart, catarrh and dyspepsia. Her system was utterly broken down, she was chilly all the time, gloomy and excitable, and complained of great pain in small of the back and between the shoulders. The following testimonial is the result of three months' treatment by Drs. K. & K.:—"As I owe my present good health to Drs. K. & K., I would like them to make use of the following testimonial. The pain in my back is entirely gone, also in the side and hips. Inflammation of the womb better than it has been the last three years, monthly changes more regular; do not have bearing down of the womb or pains through it like I used to. I am able to work with perfect ease, and have more strength and kept my weight better than I have before in five years; in fact, I am better in every way since their treatment. I would recommend all sufferers to try them before going to any other place."

### WONDERS NEVER CEASE.

Mr. Omar B. Dills, of Dewitt, Clinton Co., Mich., had suffered for four years from heart disease. He had frequent "dizzy" spells, dull aches in the back of the head and neck, and very feeble action of heart. He could obtain no relief from the local doctors, and at last applied to Drs. K. & K. for treatment. At the end of one month he reported himself entirely cured of all aches and pains. His wife wrote three months afterwards:—"I must again thank you. You have performed wonders in curing my husband."

### IN THE LAND OF THE LIVING.

Mrs. R. Cook, Homer, Calhoun Co., Mich., had been troubled for many years with dyspepsia and general debility. She was very nervous and could hardly sleep. Ate little, and that mostly Graham bread; had a gone feeling; a soreness, weight and pain in stomach; painful periods and faint weak spells. She was also very despondent. At once seemed almost hopeless, but after four months' treatment with Drs. K. & K. she writes them:—"I have received the greatest benefit from your treatment, and to-day I feel that had it not been for you I should not be in the land of the living. If I can be of any help to you in trying to induce others to call and consult you, I shall be most happy to do so. I hardly know how to thank you for what you have done for me.

### ADVICE TO THE SICK.

Mr. David Keillor, of Newry, Ont., consulted Drs. K. & K. for heart disease. Upon examination they found that his case was a most difficult one, being complicated with indigestion and liver complaint. It had been abandoned by several doctors. However, as they had cured many similar cases, they told him there was plenty of hope for him, and commenced treatment. He now gives them this testimonial:—"Fourteen months ago I took sick, and was confined to bed for several weeks. I employed four physicians, of whom one of them said I had strained my heart. I took treatment from them, but did not get any better. I tried patent medicines of different sorts, but did no good. A friend gave me Drs. K. & K.'s "Guide to Health," which I read over, and found my own symptoms. I then went to Detroit and consulted Drs. K. & K. on the 2nd of March, 1883. They examined my case and told me they could help me. I took treatment, steadily improved, and can now do a good day's work. I am more than satisfied with the treatment I received, and advise all who are sick to give them a trial. DAVID KEILLOR."

Ten thousand testimonials have been received from persons who have been cured at this famous Sanitarium. Send to Drs. K. & K., Detroit, Mich., for full information.

Situated on the line of the Canada Southern and Lake Shore Railroads, fifty miles north of Toledo, ten miles south of Detroit.

## INVALIDS' HOME.

## RIVER PARK HOTEL AND WHITE SULPHUR SPRINGS, WYANDOTTE, MICH.,

OWNED AND CONTROLLED BY DRS. K. & K.

The water of the Springs have never failed to cure Female Weakness, Rheumatism, Neuralgia, Liver Affections, Kidney Diseases, Dyspepsia, Catarrh, Scrofula, Paralysis, Skin Diseases, Piles, Nervous Debility, and many other complaints.—*Detroit Free Press.*

For solid home comfort and a thoroughly enjoyable time commend us to the River Park. There is one objection to it, however, which to many will be a vital one. Time passes just twice as quickly there as anywhere else we know of.—*Ottawa, Ont., Free Press.*

115 East 46th Street, New York.

Mrs. Hart's health has been excellent and her strength unusual since we left the Springs. We never tire talking about Wyandotte. TONY HART.

Among western watering places the River Park of Wyandotte with its White Sulphur Springs stands unrivalled. Its beautiful location, the healty properties of its waters, and the skill of its management, and of its professional staff have enabled it to distance all rivals.—TORONTO, Ont., MAIL.

Box 1,374, Jackson, Mich.

I am in love with the place, and most thankful for the benefit received there. (Mrs.) E. A. MANTLE.

567 Sussex Street, Ottawa, Ont., January 27th, 1884.

Drs. K. & K., Detroit Mich.:—Gentlemen,—I have been a nervous dyspeptic for 15 years, having been treated in Europe, Canada, and the United States with only temporary relief, I tried your treatment for the last, and am happy to say that it has proved satisfactory. I spent three months at your Sanitarium at Wyandotte, under the care of the celebrated Dr. Frank B. Smith, resident physician, whose talent and ability render him well adapted for the responsible position. My treatment consisted of Massage, electricity, with hot electric baths, and I may add, the disease that withstands this treatment must certainly be incurable. I returned home about three months ago, and I am well and happy. No more sleepless nights, no maddening neuralgia pains, no spasms of the heart or fasting days. My friends call me the "resurrection." I shall revisit the River Park with some friend next summer, not as an invalid, but for pleasure. It is decidedly all that is claimed to be as a pleasure resort. It certainly is a place "where the painter and poet might dream." How I long to return.

Yours respectfully, AGNES BECKETT.

RHEUMATISM—MIRACULOUS CURES.

I was taken to Wyandotte early in the winter, a cripple from Neuralgic Rheumatism; could not rest nor help myself. In one week's soaking in those strong sulphur waters, at a temperature of 107 degrees Fahrenheit, I was able to use every muscle without pain, and am now in perfect health. S. S. STEPHENSON, M.D., 81 Second street, Detroit.

Extract from letter written by Mr. Charles H. Norris, of Detroit, freight and passenger agent of Pennsylvania Railroad Company:—"The attack of rheumatism was so severe and my sufferings so great, I was utterly incapacitated for business, and in this condition, under the advice of my physicians, I visited the White Sulphur Springs at Wyandotte, Mich., and after bathing for three weeks at the Sanitarium, was able to return home completely restored to health, and I have not been troubled with rheumatism since."

Mineral, Electric, Turkish, Roman, Hot, Cold, Dip, and Shower Baths administered. The Swedish Movements, Calisthenics, and the famous Massage Treatment are successfully employed. Charges reasonable, location delightful, satisfaction certain. If you seek health, rest, and pleasure, write for further information to Drs. K. & K., Detroit, Mich., or call at the American Hotel.

WOMEN suffering from ailments peculiar to their sex; MEN suffering from the effects of exposure; OLD and YOUNG MEN suffering from the results of excess and indiscretion; PARENTS whose children inherit a scrofulous predisposition; those of ALL AGES AND BOTH SEXES who suffer from any chronic disease, from any deformity of any description, or from any Cancerous, Consumptive, Nervous, or Rheumatic Complaint, should consult them, and should write at once to Drs. K. & K., Detroit, Mich., or call at the American Hotel.

Send three two-cent stamps for illustrated books. You can write freely, all communications are confidential. Charges are reasonable. Consultation free.

DETROIT, MICH.

## SYMPTOMS:

The Signs by which we Know Disease.

### DYSPEPSIA.

Flatulence, heartburn, depression of spirits, giddiness and staggerings, sudden loss of vision, sudden loss of hearing, loss of sensation in any part, palpitation, irregularity of action of the heart, hot flushings of face, general cold perspirations, drowsiness, sleeplessness, extreme debility, retchings, asthma, or shortness of breath, cough, shiverings, either brief or prolonged, diarrhœa, constipation, acid risings, water brash, pain, even in distant organs, headache, excessive dryness or moisture of skin, more or less permanent in character, a chopped, furred, or peeled condition of the tongue, or all three co-existent, eruptions on the skin, spasm in throat or large intestine, pains in back, pains in either shoulder, burning sensation in palms of hands or soles of feet, tenderness of eyeballs, wateriness of eyes, piles, angina pectoris, sordes on teeth upon waking in the morning, epilepsy, chorea, several forms of insanity, sickening pulsation at the epigastrium.

☞ Over 5,000 CASES of DISEASES OF the DIGESTIVE ORGANS were cured in 1883 by DRS. K. & K. If you suffer write to them for testimonials and letters.

### SIGNS OF CONSUMPTION.

Cough, expectoration of mucus and of blood, difficulty of breathing, hoarseness, rapid pulse, loss of appetite and diarrhœa. The skin becomes transparent and pale, the veins are distinct, the face flushed at the least excitement, there is profuse perspiration and excessive sensitiveness to the least change of temperature. The fingers become clubbed, and the nails curved, while a pink-red line shows distinctly on the lower gum. EMACIATION AND FEVER are most conspicuous. The weight often diminishes one-third, and the temperature ranges in chronic cases from normal to 102 to 104 degrees.

If you suffer from the above symptoms write to Drs. K. & K., Detroit, Mich., who cure consumption where others fail.

### BRONCHITIS.

Fever, tightness of the chest, wheezing, severe cough and expectoration of a glairy mucus, which sometimes becomes heavy and thick, the tongue is foul, and there is headache, lassitude, and a sick, gone feeling, with a hacking, irritating cough, worse after active exercise, such as running upstairs.

### CATARRH.

Deafness, constant ringing in the head, weak eyes, enlarged tonsils, soreness of the throat, hacking and expectoration of mucus, discharge from the nostrils or down the throat, CONSTANT HEADACHE, OFFENSIVE BREATH, palpitation of the heart, indigestion, and stuffy feeling in the head.

☞ Over 6,000 cases of Disease of the Respiratory Organs were cured by Drs. K. & K. in 1883. If you suffer call at the American Hotel or write to them at Detroit, Mich.

### EPILEPSY.

Headache, dizziness, spectral illusions, giddiness, dimness of vision, fear and especially the peculiar sensation known as *Aura Epileptica*, embrace the most prominent premonitions.

Sometimes there is no warning, but the head is turned to one side or thrown back. Then, often with a scream, the person falls to the ground, and is violently convulsed. There is gnashing of the teeth, foaming at the mouth, and biting the tongue. The eyes are partly open and glaring. There is loss of consciousness. The skin is cold, the breathing almost suspended, and death seems about to take place, when gradually the alarming symptoms subside, the convulsive movements cease, and the epileptic is left in a state of drowsiness, from which recovery takes place with exhaustion and headache, but without any knowledge of what has occurred.

### NERVOUS DEBILITY.

Increased appetite or voracity (in early stages), uneasiness, sinking or faintness before taking food, followed by disgust or nausea afterwards, flushed face, colic, difficulty of breathing and cough, distension of stomach and intestines, muscular flaccidity, irregular action of the heart, apoplexy, diarrhœa, constipation, loss of substance, cadaverous appearance of skin, hollow or sunken eyes, extreme sensibility to cold, rheumatism, loss of hair, pulmonary catarrh, indolence or indisposition to exercise, lassitude, fatigue on slight exertion, confirmed debility, restlessness, sighing, sensation of congestion, want of energy, uncertainty of the voice, vertigo, want of purpose, dimness of sight, dullness of hearing, aversion to society, blushing, want of confidence, avoidance of conversation, desire for solitude, listlessness and inability to fix the attention on any particular subject, cowardice, depression of spirits, giddiness, loss of memory, excitability of temper, moroseness, trembling of the hands, sudden pallor, etc. The patient has a haggard, dejected appearance, is irritable and unsatisfied with present condition, and cold towards those who should be most dear to him, has an uncertain gait, fears imaginary dangers, lacks moral courage, is drowsy, and has dreams which cause sudden awakening from sleep.

☞ Drs. K. & K. positively cure ALL DISEASES which induce the ABOVE SYMPTOMS. They cured 5,000 cases of diseases peculiar to men in 1883. Give them a trial. They can cure you.

### SCROFULA.

A pale, bloated face, often fair, with a transparent whiteness of skin and a fine redness of the cheeks, pearly whiteness of the whites of the eyes threatening consumption, whites of the eyes red and inflamed, threatening dyspepsia; the eyelids are often watery, and run, or are red and inflamed; the teeth are liable to crack and decay early, or are foul and covered next to the gums with a greenish origlstry slime; the appetite is unnatural, sometimes bad, but often too good; the tongue is foul and the breath bad; nausea and sick headache, sour stomach, piles and constipation or diarrhœa are common; the flesh and muscles are flabby; the limbs are soft and full, but lack firmness; there is often considerable loss of flesh with general feebleness and debility; the powers and functions of the body and mind, though feeble, are often too early developed. A scrofulous child grows rapidly, the bones are often weak, crooked, and small, producing deformity for lack of symmetry; eruptions of the skin and scalp are very common; the glands of the neck, armpits, and other parts swell, and then inflame and ulcerate; there is always a want of robust and vigorous health. The principal affections of the skin
