WRANGLE IN COURTS OVER HANGMAN'S ROPE

Vienna, May 21—A curious dispute about a hangman's rope, which will have to be settled by the law courts, has arisen between the Hungarian hangman, Bali, and the public prosecutor at Temesvar, in Hungary. A murderer had just been hanged, and the hangman untied the rope and began to cut it into small pieces in order to sell these at an impromptu auction to the crowd waiting outside the prison.

The public prosecutor, however, who has to be present to witness an execution, ordered Bali to hand over the rope to him, because scandalous scenes amounting to a riot had occurred after a recent execution at Miskoloz, when the crowd fought among themselves for the grisly mementoes. The hangman refused to give up the rope on the ground that it was not only his perquisite but actually his own property, as he has to supply ropes at his own expense. The public prosecutor thereupon ordered a policeman to take it from him by force, which was done. Bali gave notice that he would bring an action for its recovery.

TO BUILD CONVICT PRISON HIGH UP IN THE ALPS

Geneva, May 21—What will be the first Alpine convict prison in Europe is about to be erected on the top of the Realp mountain; 5,060 feet high, in the Canton of Uri. The mountain belongs to the canton, thus obviating the necessity of buying a site, but apart from the question of economy the promoters of the scheme are of opinion that mountain air will be good for the health and spirits of the convicts, and more work will thus be obtained from them.

The cost is estimated to be about $400,000, and the project is subject to confirmation by the grand council, but this is practically certain to be accorded.

Change in City Government

Guelph, Ont., May 21—Alderman Carter gave notice of motion at last night's council meeting:

"I shall move that a by-law be introduced and submitted to the electors at the next municipal election, to provide for the election of a commission to take the place of the city council and the several boards of commissioners now managing the municipal business of the city."

FORTY THOUSAND DOLLARS ASKED FOR

Montreal's First Case Involving Rights Below Ground Surface

Montreal, May 21—For the first time in local court history, subterranean rights are involved in a suit over the erection of a St. Catherine street sky-scraper. In constructing the building, Contractor Labelle sank several piers twelve feet below the surface of the land, these piers varying from four feet square to ten feet by fourteen feet.

They were sunk in such a way that the centres, whereon rested the steel work supports, were flush with the dividing line between the defendant's and plaintiff's porperties.

Thus one-half of each pier rested on the neighboring property. The defendant contends that, in order to secure the necessary foundation for the steel work supports, he had to sink the piers so that the supports would rest in the centre. But the neighboring owner does not think so, and sets the damages at $40,000 in the case which opened this morning.

FIGHTING IN CUBA

Havana, May 21—General Evaristo Estenoz, one of the liberal leaders, and General Ivonet, are directing the movements of the negro insurgents in the province of Oriente, where the situation has become most serious, according to despatches received by the government.

A strong band of negroes assaulted the barracks of the rural guards at Manguito, near Gubtano, in the province of Oriente, but the rural guards were able to make a successful defence, although they lost two killed. The loss of the negroes has not been ascertained.

Hanna Not to Succeed Mabee

Toronto, May 21—A story published in a Toronto paper that Hon. W. J. Hanna is to be the successor to Judge Mabee has no foundation in fact. It is not true that any offer of the position has been made to Mr. Hanna. This was Sir James Whitney's answer to a report that the provincial secretary had been offered the position and would likely resign.

CARRIED TO JAIL ON HIS WEDDING DAY

Groom Tracked by Former Sweetheart and Thrashed in a Restaurant

Geneva, May 21—According to the St. Gall newspapers, a honeymoon was interrupted by a violent scene in a prominent restaurant at Bregenz, on Lake Constance.

After the wedding ceremony the happy couple escaped from their relations and friends and ordered a good lunch for two. When the dessert was served, a handsome young woman walked up to the bridegroom and accused him of jilting her, and also of taking a large sum of money from her by false promises of marriage.

On the bridegroom attempting to excuse himself, his former sweetheart became angry and thrashed him in the restaurant, taking way his money, watch and chain, and even his new wedding ring. Then she commanded him to follow her to the nearest police station, where she repeated her accusations, and on the bridegroom confessing to the facts, he was formally arrested.

The unfortunate young wife, who was so shocked by the terrible scene that she nearly fainted, was taken home to her parents.

COMPANY ORGANIZED TO CARRY ON SMUGGLING

Covers Wide Field of Operations And Pays Dividends

Geneva, May 21—Italian customs house officials have just discovered a large contraband "company," with headquarters in Milan and Lucerne, which regularly pays dividends secretly, and whose field of operation extends across a large tract of the Swiss-Italian frontier, from the shores of Lake Maggiore up to Lugano.

More than 1,000 persons are involved in the operations, and there have been many arrests recently, though some of those implicated have escaped from Italy by crossing the frontier into Switzerland, where, of course, they cannot be arrested. The contraband goods consisted chiefly of saccharine, sugar, and Swiss watches, which were smuggled across the frontier in trucks with the connivance of several railway employes.

THE WORK OF THE ST. JOHN RIVER COMMISSION

(Bangor Commercial)

The International St. John River commission was in session Friday and Saturday at Van Buren, and while there was no evidence taken the meeting of the commission was an important one, the members being given an opportunity to witness the sorting of logs on the river at the St. John Lumber Co's mills. It was the delay in the sorting of the logs of the spring drives that led to the bloodless "Van Buren War" of several years ago, and was the climax of a series of river difficulties that led to the appointment of the present commission by the governments of the United States and the Dominion of Canada to investigate the conditions and uses of the river. The commission started out to investigate the river in connection with its navigation for log driving purposes, but its authority was extended to a broader field and it was instructed to look into the question of the advisability and feasibility of conserving the waters of the river and the tributaries.

All the members of the commission were present at Van Buren Friday and Saturday: M. G. Teed, K. C., of St. John, chairman; Hon. John Keefe of St. John, Hon. George A. Murchie, of Calais, and Peter Charles Keegan, Esq., of Van Buren; A. J. Gregory, K. C., and W. P. Jones, K. C., counsel for the Canadian side, and Hon. O. F. Fellows of this city, counsel for the United States, were also present. The board of consulting engineers, which has been working in connection with the commission, making an important survey of the river in order to furnish the necessary data upon which the commission will base a large part of its report, was not represented.

The commission visited the plant of the St. John Lumber Co., and watched the work of sorting the logs of the drive as they passed through the sorting gaps and on down the river. In addition to that they made an inspection of the river from Woodstock to Van Buren.

It was arranged at this meeting to have another session in Van Buren. June 18. This will be an important meeting as the two consulting engineers, Hardy S. Ferguson of New York and S. J. Chapleau of Ottawa, are to file their report before the commission. This report will represent the result of many months' work done by a large engineering crew under the direction of M. H. Ranney of Mohawk, N. Y., who was field engineer for the commission.

The report will be filed at the meeting in June, but it is understood that the examination of the engineers will not be made until later, at a hearing, which is to be held in this city.
