TO ISSUE STOCK FOR A MILLION

The Montreal Street Railway Plans To Wipe Out Its Floating Debt.

Montreal, Jan. 13. — The directors of the Montreal Street Railway Company have decided to ask the authorization of the shareholders to issue $1,000,000 new stock, and a special meeting of the shareholders has been called for Wednesday, Jan. 29, at noon, for that purpose. This was the important announcement made tonight by Hon. Senator Forget, president of the company. It is proposed to issue the new stock at 125, or at a premium of 25 per centum over the par value, and the stock will be allotted pro rata to shareholders of record at a date to be hereafter decided. It is also announced that the directors have sold in London $2,300,000 4½ per cent debenture bonds, due in 1922, at 92 7-8, and the shareholders will also be asked at the special meeting to authorize the issue and sale of these bonds.

It is the intention of the directors to use the proceeds to extinguish the floating indebtedness of the company, amounting to some $1,800,000, which, according to the last annual statement, includes $300,000 of bonds due on March 1, $1,000,000 notes sold in England last June, and $500,000 owing the Bank of Montreal. After the paying off of the floating indebtedness, there will be a balance of some $500,000, which will be available for the improvement and extension of the system. The authorized capital of the company is $18,000,000, of which $9,000,000 has been issued, so that, including the new issue, the paid-up capital will be $10,000,000.

TO BUILD A TEMPLE

Christian Scientists Purchase a Site in Toronto for $250,000.

[Special to The Advertiser.]

Toronto, Jan. 14.—The First Church Christian Scientists intend to build a $150,000 temple, and have purchased the D. D. Mann property, corner St. George street and Lowther avenue, having a frontage of 200 feet; $250,000 is the price.

A street car, crowded with passengers, had a thrilling escape this morning at Degrassi street. The gates were lowered to hold the car until the Montreal flyer went past, but the street car continued on its way, smashing the gates. The train fortunately stopped in time to avert a disaster.

HARLAN NOT TO QUIT

Justice Says With Emphasis He Will Remain Out of Politics.

Washington, Jan. 13.—Justice Harlan of the supreme court of the United States, who caused something of a sensation by his assertion before the Navy League that he would have the United States make an appropriation of $50,000,000 a year for ten years to build the biggest navy in the world, said today he had no thought of going into politics.

"My work is upon the bench," he said, with some emphasis, "and I have not had any thought of becoming a candidate for a political office."

This denial followed a rumor in Washington that Justice Harlan might retire from the bench, as he could do under the law, and enter the political arena, perhaps as one of the candidates for the presidency.

OTTAWA HAS DEFICIT

Capital City Runs Behind $20,884 in 1907.

Ottawa, Jan. 13. — The financial statement of the city of Ottawa for the past year has been completed and the deficit in the form of a balance of expenditure over revenue is placed at $20,884 64. The total revenue was $683,537 14, and the expenditure $704,421 78. The showing is accounted for by overdrafts of committees, unprovided for outlays and underestimating of certain expenditures. The amount of outlays above estimates is $49,132. On the other hand, a surplus of $27,800 was carried over from last year. Pending the issue of a debenture no provision has been made for the $14,000 spent during the year on the subway, nor has the interest on the temporary loan been provided.

An examination of the financial situation as now presented makes it very evident that the board of control will have a rather difficult job in providing for the needs of Greater Ottawa and maintaining the efficiency of corporation services without increasing slightly the civic rate of taxation or at least levying the half mill authorized hospital rate.

Mr. Crockett, of Fredericton, N.B., the defendant in the famous Emerson-Crockett criminal libel case, has been discharged from custody. The indictment was quashed yesterday.

After a search of two years' duration, Alexander Irgnilio has been arrested in Toronto charged with killing two other Italians at Mineola, L.I., on Christmas Day, 1905.

The floor space of St. Peter's, Rome, is 227,000 square feet, the greatest of any cathedral in the world.

JAPAN AND U. S. DRIFTING APART

The Negotiations On Emigration Question at Critical Stage—Are Not Forcing Issue.

Tokio, Jan. 13.—Incoming cablegrams, indicating an overwhelming sentiment in America in favor of an exclusion bill, are causing much uneasiness, among leaders of all shades of politics, who have repeatedly expressed the conviction that the Americans did not desire to discriminate against Japanese and would accept the attitude of the Japanese Government as evidence of its sincere desire not to embarrass the American Government, and at the same time save the "amour propre" of the Japanese.

Uneasiness has been intensified by the delay of a reply from Washington to the Japanese note of Dec. 31.

Relations Are Strained.

Washington, Jan. 13.—Negotiations between the United States and Japan have reached a serious stage. While war as an eventuality is not seriously apprehended, largely because of Japan's unpreparedness, it is known that the historic friendly relations are strained almost to the point of breaking. The official denial given at the state department of cabled reports of demands having been made upon Japan are literally true in a diplomatic sense, but the denial, in a measure, is an exasion.

The "oral representations" and the exchange of "memoranda," reduced to plain English, mean just this: Ambassador O'Brien, acting under instructions, has, since reaching his post last October, been attempting to secure from the Japanese Government satisfactory assurances that under the pledge given at the time of the passage of the immigration law last February the Japanese Government would assist in restricting the emigration to this country of objectionable Japanese labor.

Japan Dodges the Issue.

Twice has he communicated to Secretary Root replies obtained from Count Hayashi, in which the Japanese Government attempts adroitly to dodge the issue.

Secretary Root has submitted to the Japanese Government, through Ambassador O'Brien, statistics prepared by the department of commerce and labor, showing that the immigration of the undesirable class of Japanese, since the Japanese Government gave its promise, has been monthly at least twice as large as before the promise was given, and during some months four times as large.

The presentation of cold statistics showing laxity, coupled with the intimation that congress may adopt more stringent measures, possibly an exclusion law, brought from the Japanese Government the second reply, which reached Secretary Root a few days ago in the form of a cablegram which cost several thousand dollars.

Can Give No Assurance.

Secretary Root is now preparing an answer, with the assistance of several experts in Oriental affairs. The Japanese Government will be informed that assurances cannot be given that an exclusion act will not be passed, but that the administration will exercise its influence to prevent such legislation, if possible, pending negotiations.

The issue in official circles in Japan has caused acute agitation, and because of the strained condition of affairs Secretary Root will not unnecessarily precipitate matters, with the battleship fleet so far from its base in the Pacific.

POSTMASTERS GET SALARY INCREASE

A Larger Remuneration Allowed Those Who Are Paid on a Commission Basis.

Ottawa, Jan. 13.—A circular sent out by the postoffice department will bring joy to the hearts of many postmasters throughout the Dominion. It announces an increase in remuneration for those postmasters whose salaries are based on the revenue of their offices. The general revision will be made as soon as possible, but as there are over 12,000 offices to be considered it will take some time to complete the work.

Salaries henceforth will be based on the following scale: Fifty per cent on the first $1,000 of revenue, 30 per cent on all over $1,000, and up to $10,000, and 20 per cent on all over $10,000 of revenue, the minimum salary to be $85.

An allowance, moreover, will be paid for night duty when a postmaster is required to be on duty after 9 p. m. or before 7 a. m. The minimum allowance for such extra work will be $10 and the maximum $100, according to the time employed and the work done.

In case of allowance for forward duty, the rate of remuneration will be 12½ per cent on the revenue of the offices for which direct or indirect forward duty is performed.

The allowance for rent, light and fuel has also been considered and is to be increased by 25 per cent. Therefore, if the postmaster is now receiving $100 under this head he will receive $125 under the new scale.

The regulations applying to the compensation of postmasters for the transaction of money order, savings bank and postal note business have been practically revolutionized. Henceforth four cents will be paid for each money order issued and one cent for each order paid.

Formerly postmasters were paid one-quarter of 1 per cent on the amount of foreign orders paid. This scale operated unfairly. While the work involved in the issue of a $1,000 order is no greater than the issue of a $5 order, the commission the postmaster received from the former was 25 cents and for the latter he received only 1¼ cents. The system of paying so much apiece for the issue and payments of orders will give the postmasters a somewhat better commission than they now receive.

As regards the savings bank business the remuneration will remain as heretofore.

In the matter of postal note business 1 cent will be paid for each note sold.

AIRSHIPS FOR JAPAN

Rumor That Number Have Been Purchasen in the French Capital.

Paris, Jan. 12.—The rumor that Japan has acquired a number of French-built airships already, and has ordered half a dozen more for use in connection with the army and navy, had been so persistent in Paris last week that I called today at the Japanese Embassy to inquire what was in the report.

It was there said that the only person competent to answer the question was the embassy's military attache, now absent from Paris. In this connection I later called upon M. Juliot, chief engineer of the great aeronautic establishment of Messrs. Lebaudy at Moisson, and asked if he had received any order from the Japanese. M. Juliot smilingly replied that he would rather not be quoted on the subject. He spoke freely, however, as to the role airships will play in any future international conflict.

"Any amateur can see," said M. Juliot, "what an important part a steerable balloon can take in military maneuvers on either land or sea. It would be more successful in scouting and reconnoitering operations than any other system yet devised.

"Moreover, with the present development of knowledge in the handling of such craft well in advance of technical improvement, they can even now be used as fearful engines of attack. For example, it would be perfectly possible now for a steerable balloon to carry a thousand pounds of explosives and drop them with great accuracy at any given point. Bridges for troops could thus be demoralized at little cost and little danger."

LATEST STOCK MARKET REPORTS

H. C. Becher, stockbroker, received the following by private wire from Bartlett, Frazier & Carrington today:

New York, Jan. 14. — Noon. — After a temporary lull and slight depression, stock trading revived in the earlier session, and New York Central went about par. This is just encouraging and simply explains a new condition of affairs whereby a railroad, both by increasing its obligations at the same increases the price of its stock. The sale of equipment notes is going very well, but it is depressing the balance of the note market. Anaconda and Amalgamated showed a good deal of strength and forced covering. Cast-Iron Pipe deferred its common dividend. This and some bad reports on earnings has temporarily depressed the industrials. Since the floatation of the equipment issues, equipment stocks have brightened up somewhat. Sales to noon, 431,000.
