To Dye a Green.

For every pound of cloth add three and a half ounces of alum and one pound of fustic [illegible] (not boil) till the strength is out; soak the cloth till it [illegible] a good yellow, then remove the dyes and add the Chemic Blue by degrees, till you have the [illegible] color.

To Cure Hams.

To one thousand weight of hams, apply the following mixture, well rubbed on:—Five-eighths of a bushel of fine salt, four pounds of saltpetre, two ounces of red pepper, one-half gallon of molasses, one gallon of hickory ashes; let the hams be packed away for five weeks, with whole grains, then smoke for three or four weeks, with green hickory wood and tobacco stems, [illegible] smoked, cover them with pepper and ashes, and sew them up in bags to protect them from [illegible]

Shoulders.—Take a teaspoonful of cayenne pepper, a teaspoonful of finely powdered saltpetre mixed with a quarter of a pound of brown sugar, and rub the whole on the inside of the bone; lay them away with Liverpool rock salt, taking care to cover them well up; let them remain in salt four weeks, then hang up and smoke with green hickory every clear day for [illegible] weeks; when they should be taken down and buried in hickory ashes, and [illegible]

A Soap for Chapped Hands.

Take three ounces of palm oil, one ounce of mutton suet, one-half of an ounce of white curd soap; render down the suet, and work it well till it is as smooth as possible; then stirring the soap into it and work with the suet in a mortar. When it is thoroughly [illegible] add the palm oil, while it is simmering, and take it off the fire as soon as it is thoroughly mixed with the other ingredients. Pour the whole into a vessel and keep stirring it till it is cool, or the soap will separate. Perfume to your taste. Rub this well into the hands on going to bed (after having well washed and dried them,) then put on a pair of white kid gloves, and it will very shortly make them soft, and entirely prevent chapping. Applied to the face in the same way, substituting a piece of linen instead of gloves, it prevents chilblains.

To Make Hair Dyes.

The Liquid Hair Dyes in general use are nothing but solutions of Lunar Caustic (Nitrate of Silver) in water. They are certainly very [illegible] and dangerous [illegible] skin. The powder dyes are decidedly the best, as they do not [illegible] skin. [illegible] made as follows:—Wash any quantity of lemons, a pound and [illegible] by pouring a quantity of the clear juice on them, [illegible] quantity of soft water, [illegible] Dr. Gardner's Hair Wash.
