GENERAL MOTORS MAKES NEW HIGH

Motor Stocks Feature New York Trading by General Advances.

Associated Press Despatch.

New York, June 26. — Constructive forces assumed control of the price movement in today's market, lifting it out of the narrow trading area in which it has been fluctuating all week by staging a series of bullish demonstrations in the motors, public utilities, tobaccos and selective specialties.

Pools resumed activity in the low-priced issues on the theory that the high call money rates were only temporary and due to heavy demand for funds in connection with mid-year settlements.

General Motors assumed the leadership of the motor group by advancing 3 points to a new high record at 84. Net gains of 1 to 3 points also were recorded by Nash Motors, Mack Truck, Stewart-Warner, Stromberg Carburetor, Willys-Overland, Packard Motors and White Motors.

American Can led the standard industrials by moving up more than 5 points to 190½. United States Steel common and Baldwin closed fractionally higher at 115½ and 111½ respectively.

The rails moved steadily upward in response to the publication of additional favorable May earnings statements. Special buying of Canadian Pacific, which moved up over 4 points to 145, was based on the recommendation for the merging of that road with the Canadian National Railways by a special railroad committee of the Canadian Senate. Net gains of a point or more were registered by Rock Island, Delaware and Hudson, New Orleans, Texas and Mexico, and Texas and Pacific.

Call money opened at 4½ per cent, the highest renewal rate since April 1, and then advanced to 5, closing at the top figure.

Contrasting price movements characterized the foreign exchange market. Demand ruled sterling ruled slightly higher around $4.85⅞, but French francs and Italian lire each broke about 10 points to new low records for the year at 4.54½c and 3.60c respectively.

CANADIAN PACIFIC GAINS IN TORONTO

Net Advance of 2 1-4 Points—Davies "A" Shares in Demand.

Canadian Press Despatch

Toronto, June 26.—Davies "A" and Canadian Pacific Railway shares, together with Canadian Salt, showed most strength in today's quiet trading on the Toronto stock exchange. Davies "A" and Canadian Salt have been inactive for some time. Canadian Pacific Railway touched a high point of 144, and the close was up at 143 a net advance of 2¼ points on the day.

Scarcity of Davies shares at current prices has been noticed for some time. A transaction was put through recently at 24, and this is the low point for the current year. On today's market two broken lots came out at 24½, after which several board-lot transactions were made at 25. A high point was reached at 25¼, and the close was at 25 to 26. Canadian Salt had a sharp decline early in the week when the shares went ex-dividend. Very little stock changed hands on this reaction, and today's advance was even steeper than the recent decline. A limited amount of stock came out at 135, an advance of 8 points. The market closed at 130 bid.

Mackay common receded from its extreme high point at 130 established earlier in the week, but transactions were made on a limited scale at 129¼ to 129½. Mackay preferred was up to 69, within ½ point of the high mark of the year.

Dominion Canners, which was ex-dividend $7, changed hands in small lots at 102, which represents no change. The preferred was almost equally quiet at 106 to 106½, with the close at the former price.

Other price changes included American Salesbook common, up ¾; Atlantic Sugar preferred, off ¼; British Columbia Packing, up ½; F. N. Burt common, up ½; Canada Bread common, off 1; Pure Gold, up ½; Twin City, off ¾; Bank of Commerce, up 1; Nova Scotia, up 3, and Union, up ½ point.

Sales of stocks for the day totalled 1,694 listed and 4,756 unlisted shares.

WINNIPEG WHEAT TRADING IS LIGHT

Demand Increases and Fractional Advance Made at Closing.

Canadian Press Despatch

Winnipeg, June 26.—Light offerings and increased demand from exporters and millers had a distinct influence on sentiment in the wheat pit here today, resulting in fractional closing advances, with July at $1.64⅞ and October at $1.38¾. The sentiment following an early decline was less bearish. While there was an increased inquiry, the trade volume was not large, and "shorts" were reported covering up for over the week-end. There was further evidence of spreading buying Winnipeg October against sales of Chicago September and December.

The coarse grain markets all held steady, following generally the trend of wheat, but trade volume was not exceptionally big.

Notwithstanding a good demand for cash wheat in all grades, there was very little business transacted, as holders of stocks were not in accord with the spreads. Canadian millers bought carlot offerings of the contract grades, while shippers were buying lower grades. Spreads were unchanged to fractionally higher.

Lack of Stocks hampered trading in cash coarse grains.
