the colony and of the parent state. To ren-
s interference just and prudent, it is indis-

it is necessary (under Mr. Wilmot's doc-
that a Governor should not act at all until all
successively should have been in power, and
should have had time to deliberate upon the
of all. It seems, therefore, absolutely neces-
that there should be a permanent officer of go-

Governor, (especially on his arrival,) might

administrations.

BRITISH CHURCH.—Pursuant to notice, a
g of several British residents took place at
nsul's, in College Place, on Monday even-
t, when the question was finally discussed,
siness of the meeting was opened by the
Consul, in a very clear and satisfactory man-
d after many of the gentlemen present had
their sentiments, a vote was taken that the
g approved of the plan of establishing a Bri-
urch in New York, for the use of residents,
nts, and strangers from Great Britain; and
mittee was then appointed to take measures
secuting the design without delay. It is not
ve, generally known that an Act of Parlia-
exists for empowering the British Govern-
to give a handsome donation towards the

of the officiating minister. The Committee
obably endeavour to avail themselves of this
tant assistance.—*N. Y. Albion.*

TUCKER.—The mission to Canada of Mr.

OREGON QUESTION.—We find the following
Washington Union, the official organ of the

not be his fault if our difference about Oregon
terminate in hostilities; but it will be his
and a fault which we are sure he would never

ntitles' and our sacred honor to any visionary

York has just passed an act incorporating the
can Atlantic Steam Navigation Company,

Carson's Patent Salting Instruments,

FOR SALTING AND CURING MEAT.

By the aid of this Instrument, persons in every clime can salt any quantity of meat thoroughly and instantly. With it a pressure is produced equal to 500 to 2000 pounds upon a square inch, which forces the brine through every part; consequently a large joint is equally salted in a few minutes; and as less salt is required, or sugar can be substituted the meat is rendered more tender, and the gelatinous and other nutritious properties are retained.

Valuable recipes for pickles and brine, also instructions for salting the different joints, supplied with each instrument.
