LONDON, Dec. 3, midnight.—The Bill for the tax of one per cent, on incomes, to defray the expenses of the Abyssinian war, passed the house of Commons to-night. Parliament will adjourn on the 7th inst.

☞ No additional particulars of the cyclone at Bombay have been received.

The meeting of the colliers at Exeter Hall to-night was very large. Another meeting was held at the same time in Trafalgar Square. Many speeches were made, and resolutions were enthusiastically adopted, expressing their determination not to submit to the regulation, and to persist in the strike until the law is abolished. The movement creates quite a social revolution in this city.

A despatch from Gibraltar announces the arrival of that fortress of admiral Farragut, and the United States squadron under his command.

LONDON, Nov. 4.—Further particulars of the disastrous cyclone which recently occurred in India have been received here. At Calcutta the loss of life and property was fearful. It is estimated that in that city and neighborhood alone one thousand persons perished. Thirty thousand huts and habitations were utterly destroyed.

LONDON, Nov. 4.—A second instalment of the correspondence between the British and American Governments in regard to the Alabama claims, has been laid before the House of Commons by the Foreign Office. Lord Stanley, in a despatch to Mr. Ford, the present Chargé D'Affaires at Washington, says England will never consent to submit to the arbitration of a foreign power claims, involving her right to recognize belligerents. This right he insists, is purely a question of English law. He repeats his offer to submit to arbitration the Alabama claims, and refer all other demands for indemnity to the decision of a mixed Commission.

INTERCOLONIAL RAILROAD BILL.

(By telegraph to the Globe.)

OTTAWA, Dec. 4.

The printed preamble recites a joint declaration of the Provinces that the construction of the railway is essential to the consolidation of Union, an obligation imposed by the Confederation Act and the Imperial Guarantee Act. The termini of the railway are declared to be Rivere du Loup, in Canada, and Truro in Nova Scotia. The railway is declared to be a public work belonging to the Dominion, and to be made with a guage of five feet six inches. The construction of the railway, and the management until completed, to be under four Commissioners appointed by Government, holding office during pleasure. The Chief Engineer to be appointed is to have a general superintendence of the works, under instructions from the Commissioners.

The Commissioners may appoint a secretary, engineers, surveyors, and other officers required—the Commissioners to have power to explore and survey the country between the termini and Gesaly—exercise power to enter lands, &c. necessary to the construction of the road, and generally all powers conferred upon railway companies by any Act which may be passed for consolidation and regulation of the general clauses relating to railways. The Commissioners to build the railway by tender, and contract after plans and specifications are duly advertised, accepting tenders of such contractors as appear possessed of sufficient skill, experience, and resources to carry on the work, but are not oblized to accept the lowest tender, and to make no contract involving an expense of ten thousand dollars or upwards, unless sanctioned by Governor in Council. Contracts to be guarded by such securities and certain provisions for retaining part of the contract money as may appear necessary for the protection of the public, and securing the due performance of the contract. No money to be paid on contract, except on certificate of chief engineer that work has been done; certificate to be approved of by the Commissioners. No member of Parliament to hold any of the emoluments nor any contract under the Commissioners. The Governor, or person appointed by him, to have power to inspect contracts and proceedings of commissioners at all times. The Governor in Council to fix the salaries of the Commissioners and chief engineer, and approve all other salaries awarded by the Commissioners, subject in all cases, to a revision and confirmation of Parliament at the first session thereafter. The Government may suspend the work at any time until the next meeting of Parliament. The Commissioners to be paid by the Receiver-General all moneys required for the progress of the work as may be ordered by the Governor in Council, and to furnish quarterly accounts, or oftener, if required, to the Receiver-General, of all expenditures and liabilities. When any part of the railway is completed, the Government may make arrangements for the working of it for a period until the end of the next session of Parliament. The naval and military forces may pass over the road when required, the commander of the forces, or the chief naval officer, under terms to be agreed upon.

The balance of the Bill is the same as the resolutions already published.

☞ Wife complainingly: I haven't more than a third of the bed. Husband (triumphantly): That's all the law allows you.

☞ Woman is a delusion, madam!" exclaimed a crusty old bachelor to a witty young lady. "And men are always hugging some delusion or other," was the quick retort.

☞ "Oh, pa, Mr. Smith was here this morning, and when ma told him you would not be home till late, he said her lips were like honey, and that he wished he were a bee, and then he kissed her. They gave me a stick of candy not to tell any one, but I don't think they'd mind you, you're so well acquainted with me."

DETROIT, Dec. 4.—The propellor Portsmouth is ashore on Middle Island, Lake Huron. She has been stripped and abandoned. She was covered with ice and it was found impossible to move her. The schooner Two Fannies, with lumber from Chicago, is ashore near Alpena, on Lake Huron, and lies in a very dangerous position.

THE QUEEN AND HER BUTCHER.—The Queen has taken a firm stand as to the price she will pay her butcher. The parties who supply the Royal Palaces have been authoritatively informed that they must accept eight pence half penny a pound for mutton, or the Queen's custom will be withdrawn. This is the result of an agitation that has lately been got up by the London press, and especially by the *Times*, as to the exorbitant charges of butchers. Not only the royal mutton but the workman's mutton has now been reduced to reasonable rates.

FIRE AND DROUTH.—Accounts from the western prairies complain of the enormous damage by the continued drouth, and the result of extensive fires. The earth is so dry that the surface burns like peat, reducing fertile tracts to a state of barrenness; the flames swept over the country, destroying everything in their course. When there is no fire, the ground is too hard to plough, and fall wheat has not been sown; streams and wells are dry, and men and beasts suffer for want of water.

☞ A Chinese almanac is a most extraordinary publication. The days for ploughing, building, travelling, and marrying are laid down in it with the greatest minuteness. The whole period of four seasons is divided into twenty-four solar terms, each possessing some characteristic name, and corresponding to the day on which the sun enters the first or fifteen degrees of one of the twelve signs of the zodiac.

A young lady school teacher of Indianapolis was lately endeavouring to impress upon her scholars the terrible effects of the punishment of Nebuchadnezzar. She told them that for seven years he ate grass like a cow. Just then a small boy asked—"Did he give milk?" We are not informed whether the teacher gave any further information to the small boy.

of Canada.

GENTLEMEN—
WE BEG to advise having admitted Mr. JOHN C MOORE, of Halifax, as a Partner to our Firm and have opened a branch of our business in that city where it will be our aim to serve our friends in Canada to the utmost of our power in the obtaining the best possible rates for Consignments—the extension of the manufacturing interests to the Lower Provinces—the importing thence on Commission their Fish, Oils, &c., and the dissemination of correct and unbiassed information respecting the market.
On Consignments to Halifax as well as Montreal we will, as heretofore, make liberal advances against shipments and Drafts may in all cases be made at the option of Consigners either on Montreal or Halifax.
The season being now at hand when the Cheese and Butter in the country must be marketed, we take this opportunity of tendering our services for its sale here or at either of the different principal points in the Lower Provinces or Great Britain, where we have first-class reliable Correspondents, who will do the very best that can possibly be done with Consignments—Cash advances on which will be made by us when required.

Sure to Regulate the Bowels.
Depend upon it, mothers, it will give rest to yourselves and
Relief and Health to your Infants.
We have put up and sold this article for years, and Can Say in Confidence and Truth of it what we have never been able to say of any other medicine—Never has it Failed in a Single Instance to Effect a Cure, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operation, and speak in terms of commendation of its magical effects and medical virtues. We speak in this matter "What we do Know," after years of experience, and Pledge our reputation for the fulfilment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion, relief will be found in fifteen or twenty minutes after the syrup is administered.
Full directions for using will accompany each bottle. None genuine unless the fac-simile of CURTIS & PERKINS, New York, is on the outside wrapper.

PARLOR IN A SLEIGH!
OR,
EASTMAN'S
PATENT COMBINED
FOOT STOVE
AND LANTERN.
ITS USES:
FIRST—FOR WARMTH.
In ten or fifteen minutes after the lamp is lit the stove is nicely warm, and then if put in a cutter or sleigh it will keep the feet comfortably warm while riding any distance; or if put under the feet in church it will keep them perfectly warm during services; or if troubled with cold feet in office or sitting-room, the Foot Stove will enable to get entirely rid of that trouble; or if your hands get cold while travelling, open the little door and you will find a nice little oven to warm them in two minutes.
2ND—FOR LIGHT.
While travelling at night if it is dark you will have a Lantern to show you the way; if you meet with an accident you will have a Lantern already lit to help you out of trouble; and when you come home at night with horses warm and sweaty you have not to leave them in the cold till you get a light—you have one with you—and it is so protected that you may cover it up in a hay mow and it will not set the barn on fire.
3RD—FOR SAVING.
It will save your hands and feet from suffering the bitter cold, which you have so often and painfully endured in the past. And hence it will save you from those repeated bad colds and big doctors' bills you have had to grapple with in the past. It will save you the trouble and expense of having to stop at every public house and warm while travelling and of having, on every such occasion, to expose your horses to the bitter cold; and it will save you the trouble and expense of buying a lantern every year or so; *for the Stove and Lantern is made of the most substantial material and last a lifetime.*
Lard, or Elephant Oil (not coal) is to be used. They may be purchased at the Hardware Stores at Goderich, Clinton and Seaforth, and at the principle stores throughout the County of Huron.
PRICE, $4.00.
Agents wanted in every Township to take and fill orders. A liberal commission offered for every Stove and Lantern sold.
For further particulars apply (post-paid) to J. W. YOKOM, SEAFORTH, who has bought the Right to manufacture and sell in Huron County.
Seaforth, Nov. 13 1867. w43.
