WEEKLY WEATHER SYNOPSIS.

Victoria Meteorological Office,
15th to 21st August, 1900.

At the commencement of the week an important and extensive storm area from the Pacific moved rapidly across Cariboo to the Territories. During its passage it caused strong westerly winds over the Straits and Gulf, and a heavy and sudden downpour of rain over the Lower Fraser river accompanied by thunderstorms. Rain also was general in Cariboo and Kootenay during this period. From this to Sunday, the 19th, the barometer remained comparatively high along the Coast, where the weather became mostly fair and cool. During Sunday a marked change occurred, the barometer rose over the interior of the province and fell along the Coast. This change caused the finest and warmest day [illegible] throughout British Columbia, winds blowing from the comparatively interior towards the sea. Monday and Tuesday another area appeared in Cariboo and eastward to Kootenay, accompanied by more rain, and, about Kamloops, thunderstorms. These heavy rains [illegible] ranges continue to be phenomenal at this season of the year, and have caused considerable damage, not only to the crops, but to the roads, in the form of washouts. The above mentioned storm areas as they travelled eastward across the Territories, caused numerous thunderstorms, in some cases extending as far as the Great Lakes.

In Victoria over 54 hours of bright sunshine were recorded, or an average of seven and a half hours per day. No rain occurred, while the highest temperature was 74 on the 19th, and the lowest 51 on the morning of the same day.

At New Westminster .78 inch of rain fell, .74 inch of this occurring during the above mentioned downpour. The temperature rose to 76 on the 19th and fell to 50 on the mornings of the 15th and 16th.

Kamloops reports a rainfall of one inch, highest temperature (74) on the 20th, and lowest temperature (50) on the same day.

As the reports from Barkerville were not continuous, owing to wire trouble upon several days, the exact rainfall cannot be given, but was doubtless over one inch.

Local News.

GLEANINGS OF CITY AND PROVINCIAL NEWS IN A CONDENSED FORM.

(From Tuesday's Daily.)

—Rev. Dr. Campbell and Wm. Gill are this week conducting the exercise promotion examinations of the employees in British Columbia of the inland revenue department.

—Mary Susanna Belford, infant daughter of Mr. and Mrs. Belford, died last evening at the family residence, Parry street. The funeral took place this afternoon at 4:30 o'clock.

—At 10 o'clock to-morrow morning the funeral of the late John Reinhard takes place from the B. C. Furnishing Company's parlors, Government street. Deceased was a native of Germany and 40 years of age.

—Information was yesterday received by Henry Croft, manager of the Lenora mine, Mount Sicker, that another rich strike had been made on this property, a large body of ore having been uncovered in what is known as the new lower tunnel. The company are now employing 185 men on the Lenora.

—Yesterday Mr. E. A. Harris placed on view in the ante-room of the Legislature a marble bust of Sir James Douglas for the inspection of the members. The bust is by Mr. Harris himself, and considering the fact that it was made entirely from old photographs is wonderfully true to the original.

—Robert Irvine, aged 55 years, and a native of Scotland, passed away on Saturday and his remains are being borne to the grave this afternoon. The funeral took place from the B. C. Furnishings Co.'s parlors, Government street. The pallbearers were Messrs. J. Somers, J. Irvine, J. Deans, A. Glendenning, H. King and E. Carlow.

—The committee of the S. P. C. A. held an adjourned meeting last evening, when the report of the secretary showed that 16 cases had been dealt with during the past month. A portion of the annual report was also considered. A meeting will be held on Monday next, when arrangements will be made for the annual meeting the following Wednesday.

—The park committee, accompanied by Engineer Topp and Mr. Mortimer, who is executing the granite work for the base of the Burn's memorial drinking fountain, went out to Beacon Hill park this morning and located the place where it will be erected, on the triangular ground east of the deer enclosure, the stake being driven by Park Commissioner John Hall. The work will be at once proceeded with under the supervision of the city engineer.

—The funeral of the late Myles Thomas took place yesterday afternoon from the parlors of the B. C. Funeral & Furnishing Co. at 2 o'clock. Services were conducted by the Rev. J. Jenns at 2.15 at the St. John's church. The following gentlemen acted as pallbearers: Messrs. R. Porter, sr., R. Borthwick, A. Graham, G. Wynne, sr., J. Dooley and T. Mitchell. The deceased was a well-known resident of Victoria, and had worked for many of the different butchers and cattlemen of the city.

—The new dog patrol wagon has been completed by John Meston, and this morning started on its initial tour of the city, under the careful eye of the pound-keeper, after having been inspected by the purchasing agent and declared satisfactory. It is a neat four-wheeled wagon with specially arranged sides of wire netting, and has a self-closing door in the back. This vehicle will greatly facilitate the duties of the pound-keeper, but as to whether it will prove a boon to wandering canines is a different question.

—Although yesterday was the day set as the last for the reception of tenders for the construction of Victoria's new rifle range, it is expected that the time will be extended as a number of contractors have recently consulted the plans with a view to forwarding tenders. Only yesterday two contractors examined the specifications and signified their intention of tendering for the work. As the department of militia and defence will be anxious to obtain as many quotations as possible on the work, Col. Benson expects that the time will be extended.

(From Wednesday's Daily.)

—The public works department are calling for tenders for the erection of a new post office at Kamloops.

Tenders are being called for by the department of public works, Ottawa, for the erection of a postoffice at Rossland. Tenders will be received up till Monday, September 10th. The conditions may be seen in the advertising columns of this paper.

—"Salmon continues in good demand, and the market is firmer for all grades, especially for Alaska, which has advanced 6d. during the week," says the London Grocers' Gazette of July 28th. "The packers on the Fraser river have advanced quotations, and, it is stated, are declining to transact business except at full rates, and then only for limited quantities. The Aristides has arrived this week with 52,709 cases, but this quantity has been practically disposed of, and there is very little, if any, left in first hands. Appearances seem to indicate a dearth of supplies in the near future. Large sales have been made forward. The packing of Alaska has only just begun, and it is likely to be a good one, as usual. Demand for ½-pound tins has fallen off, but there will be no reduction in price from the present limit."

(From Thursday's Daily.)

—The funeral of the late John Reinhardt took place yesterday from the parlors of the B. C. Funeral & Furnishing Co. The religious services were conducted by the Rev. Otto St. Meltzer. The pallbearers were: Messrs. N. Gowen, C. Zoelle, H. Siebenbaum and L. Hafer.

—Mr. Justice Martin leaves on the steamer Queen to-morrow for his duties in the Porcupine district. He will preside at the first Assize court at Atlin, to be held on the 28th, and will thence proceed to Porcupine as special commissioner to adjudicate upon the disputes there arising out of the staking of claims under the United States law. Louis J. Seymour, court stenographer, will accompany His Honor as secretary.

—A farewell entertainment was given to A. Hibbs by the young people of Victoria West Methodist church on Monday evening. An address was presented by Miss Thorpe on behalf of those present, eulogizing the recipient for the faithful and excellent work he had accomplished in connection with the church. Several other addresses were also given, and a pleasant evening was spent. Mr. Hibbs left on Tuesday for Kamloops, where he takes charge of the shoemaking department of the Coqualeetza Industrial Institute.

—At the recently held monthly meeting of the S.P.C.A. the report to be submitted at the annual meeting of the local organization on Tuesday was considered. It shows that a large number of cases have been dealt with during the past year, but that which causes considerable anxiety is the fact that many of the cases reveal more refined cruelty than the society have hitherto had to deal with. As many as sixteen cases were brought under notice during the past month and this certainly indicates that the work of the society is not likely to decline. The annual meeting promises to be of a particularly interesting character and it is to be hoped that the public will show their sympathy with the work by their attendance at this session. Among those who will speak will be the Lieut.-Governor, Bishop Perrin, J. C. Brown, president of the provincial society; E. B. Paul and C. J. South, secretary of the provincial society. The meeting will be called at 8 o'clock and Mayor Hayward will preside.

AN ENJOYABLE FUNCTION.

Successful Garden Party in Aid of Sanctuary Fund of St. Andrew's R. C. Cathedral.

The spacious and beautiful grounds adjoining the residence of W. J. Macauley, on Rockland avenue, were thrown open to the public yesterday afternoon for the purpose of assisting Bishop Orth and the clergy in the collection of funds in aid of the parish under their charge. The ladies of the Altar Society made preparations for the reception of guests, and the decorations on the broad drives and throughout the well kept lawns were commented on most favorably by the large number of ladies and gentlemen present. Electric lights, kindly placed by the Hinton Electric Company, Japanese lanterns and flags were placed in all parts of the grounds, and the scene during the evening was enlivened by the merry laughter of the throng; interspersed with music furnished by B. Bantly and an orchestra of local musicians. Bishop Orth received the visitors in a large marquee, and the Lieutenant-Governor, with Mayor Hayward, were among the patrons of the fete. Mrs. Lester, a lady of the school of occult science, occupied a tent, and added, in a material way, to the financial success of the afternoon and evening by inspecting the lines on the palms of love lorn maiden and their swains. The musical programme consisted of solos by Mrs. Sheldon, Miss Sehl, W. J. Cave and instrumental selections by Mr. Bantly's orchestra and F. Victor Austin. The fine weather and hospitality of the committee of ladies added in a great measure to the success of the gathering. At the conclusion of the party a hearty vote of thanks was tendered Mr. and Mrs. Macauley for their generosity in assisting the charitable object for which the entertainment was held. The ladies of the Altar Society desire to thank the ladies and gentlemen who tendered their services and took part in the musical portion of the programme.

The soothing and healing properties of Chamberlain's Cough Remedy, its pleasant taste and prompt and permanent cures, have made it a great favorite with the people everywhere. For sale by Henderson Bros., wholesale agents, Victoria and Vancouver.

Derangement of the liver, with constipation, injures the complexion, induces pimples, sallow skin. Remove the cause by using Carter's Little Liver Pills. One a dose. Try them.

Advocated Amendments

To the Municipal Clauses Act Proposed by the Victoria City Council.

Further Power Asked of Legislature--Increasing Authority of Medical Officers.

At the meeting of the municipal committee of the Legislative Assembly, City Solicitor J. M. Bradburn advocated the appended amendments suggested by the legislative committee of the Victoria City Council. These are of a very important character, and a careful perusal will show that some of the amendments sought for in particular deal very forcibly with matters now almost diurnally before the consideration of the municipal authorities. Among these will be noticed the clause empowering the health officer with more extended authority than he at present holds in taking action to prevent the outbreak of any contagious disease. It is proposed to amend:

2. Section 50 of chapter 144 of the revised statutes of 1887, by adding thereto the following sub-section:

"(170.) For imposing a special rate, not exceeding three cents per foot frontage per month, upon the occupiers of all stores and premises of every kind fronting upon any street within the municipality, for the purpose of defraying the cost of watering such streets, the council to be at liberty to make any such rate payable by monthly payment or instalments, and payable whether or not any such watering shall, in the opinion of the council, rendered unnecessary by wet weather, and the council shall be at liberty to add any amount to the said cost of such watering, not exceeding ten per cent. of such cost, and to allow or deduct such added amount from all payments that shall be made to the city treasurer or collector, or other person to be named in such by-law, within seven days of the day when such payments respectively shall become payable."

4. Section 79 of the said act is sought to be repealed, and the following substituted therefor:

"79. In city municipalities no by-law to which the assent of the electors is necessary before the final passing thereof shall be valid or of any effect unless the vote polled in favor thereof be at least three-fifths of the vote polled."

Section 67 of chapter 144 to be amended by adding the following proviso by way of sub-section:

"Provided always that any municipal council may for any purpose within the jurisdiction of the council borrow moneys by hypothecating or pledging with any banker, or other person willing to advance the same, the debentures, bonds or obligations, lawfully issued by such municipal council under the provisions of this act, and which may for the time being remain unsold, but so that any such borrowed moneys shall be repaid out of the proceeds of the said debentures, bonds or obligations when sold, and the council may out of the funds of the municipality pay interest upon such borrowed moneys."

Sub-section 17, of section 245 of chapter 144, is proposed to be amended by striking out on the fourth line the words "expenses hereof," and substituting in lieu thereof the words 'whole of the expenses thereof (notwithstanding that the council may propose to contribute to such expenses by way of allowance, rebate or otherwise)."

Section 151 of chapter 144, as amended by chapter 35, section 14, of 1898, to be amended by adding after the words "upon payment of," on the 17th line, the words "a proportion of the legal costs of and incidental to the obtaining of such order and,"

And by adding at the end of such section 151 the following:

"The legal costs of and incidental to the obtaining of such order shall be a charge upon the lands and properties sold, and the judge may direct the same to be taxed, and by such confirming order shall apportion the proportion of such costs to be charged upon each of the lands and properties sold, having regard to the relation the purchase price which each of the lands and properties shall bear to the total purchase price of the whole of such lands and properties."

Section 152, as enacted by section 15 of chapter 35 of 1898, to be amended by adding after the words "legal interest thereon," on the 14th line, the words "and also by paying the proportion of the legal costs charged upon the lands or properties under the preceding section of this act."

Section 153, chapter 144, as enacted by section 16 of chapter 78 of 1898, to be amended by adding after the words "on payment of," in the 3rd line of section 153, the words "the proportion of the legal costs charged upon the land or property under section 151 and."

Section 60 of chap. 144 is to be amended by adding the following as sub-section:

"A judge of the Supreme Court may upon the certificate of the medical health officer or any person fulfilling that function appointed by any municipality stating that there exists in his judgment serious apprehension of an epidemic breaking out within the municipality or of the spreading of any contagious disease of a serious character, and that there exists a real necessity for urgency, and upon the evidence by affidavit of such medical health officer or other person as aforesaid as to the existence of the nuisance and the danger to the public safety or health, make the like declaration as in this section contemplated and may thereupon order any or all of the works, matters and things in this section referred to to be done and performed, and the judge may by such order further name the time within which the same shall be obeyed or complied with, and by whom, and in default of compliance may order such works or any of them to be done under the direction of the said medical health officer and by the same or a further order may determine who shall bear and pay the costs of the said works, and the expenses incidental thereto, and the cost of any application made under this sub-section."

Section 50 of chap. 144 to be amended by adding to the sub-sections thereof the following:

"118a. For giving to the medical health officer such further powers as the council may deem essential the management and superintendence of the execution of all works, matters and things which under this act the council may from time to time have directed or required or may direct and require to be done, made or performed, by any by-law now made or hereafter to be made in pursuance of sub-sections 28, 44, 67 to 75 inclusive, and sub-sections 97 and 100 and 161 hereof, and the council may define the extent of the authority and the duties of such medical health officer or medical officer of health and may fix the additional salary or other remuneration and the terms upon which he shall retain his office or perform the same. The council may direct payment to him of such additional or special remuneration for extra services rendered."

Sub-section 115 of sec. 50 of chap. 144 to be amended by adding the words after "rent" on the fourth line "calculated according to the frontage of the properties on the land or roadway through which such sewer is laid, having regard to the total cost of maintenance and repairs of all the sewers in the city."

Sub-section 157 of sec. 50 of chap. 144 to be amended by adding at the end thereof:

"Such rent to be calculated according to the frontage of the properties on the roadway or street whereon such house is situate, having regard to the total cost of maintenance and repair of all the sewers in the city."

Chap. 144 to be amended by adding the following section:

"109a. No debenture or other instrument in the nature of a security or obligation for the payment of money issued by a municipality under this or any amending act shall be the subject of taxation, and no person by reason of his holding or owning any such debenture or other instrument shall be liable in respect of the same to taxation under the Assessment Act or any act which may be hereafter passed imposing taxes upon personal property."

(This amendment is respectfully submitted for consideration, to assist the negotiability of municipal bonds).

Sub-section (a) of section 180 of chap. 144 as enacted by sec. 18 of chap. 82 of 1899 to be amended by adding after the words "the Mayor," on the first line, the words: "who shall ex-officio be chairman of the board."

Section 223, of chap 144, as enacted by chap. 82 of 1899, to be amended by adding after the words "the Mayor," on the second line, the words: "who shall ex-officio be chairman of such board."

Section 150 of chap. 144 to be amended by adding the following sub-sections:

32A. For regulating the digging out of cellars and the construction and use of cellars and underground structures as dwellings, and the enforcement of sanitary conditions and requirements with respect to the same.

32B. For closing or filling up any cellar or under ground structure which may be dug or constructed in contravention of any by-law.

72A. For prevention after construction any alteration in the original plan of any building or erection or any portion thereof which shall at any time be occupied for dwelling purposes whereby the sanitary condition of such building or erection or any portion thereof would be prejudicially affected.

72B. For authorizing the pulling down or removal at the expense of the owner or tenant of the building or erection of any alteration existing or hereafter to be made in the original plan of any building or erection or any portion thereof which shall at any time be occupied for dwelling purposes, and by means of which alteration the sanitary condition of such building or structure or any portion thereof is prejudicially affected.

CHEMAINUS MYSTERY.

Body of Alfred Olsen, an Old Man, Found Up the Line.

On Monday evening the body of a man was found at Bennies's crossing, on the E. & N. railway, six miles the other side of Chemainus, by E. J. Conway, son of T. D. Conway, of the latter place. The remains were immediately removed to Chemainus and Coroner Davis notified. The body was subsequently identified as that of Alfred Olsen, and the circumstances have been deemed sufficiently suspicious to require a thorough investigation. An inquest will consequently be held on Saturday at Chemainus, which may unravel the mystery.

On Monday morning Olsen appeared at the E. & N. station in Nanaimo, and asked the agent if he would take charge of some money for him and forward it to Chemainus in charge of the conductor. He was informed that he could only send the money in the regular way, and was furnished an envelope to wrap the currency in, which amounted to something like $200, out of which he kept about $20. The package was sealed and addressed to himself at Chemainus. A few minutes later Olsen appeared at the ticket window and asked for a ticket to the above place. This was the last seen of him at Nanaimo.

It was afterwards learned that he had left the train at Ladysmith and started to walk to Chemainus. Mr. Conway found the body on his return from a trip to Ladysmith, having previously met Olsen while on his way out from Chemainus. Yesterday the station agent at Nanaimo, W. A. Wood, identified the body as that of the man who had transmitted the package from the Nanaimo station on Monday morning. The provincial police have the matter in hand, and it is understood a couple of suspects are being closely shadowed.

TROUBLESOME TO THE ARMY.

During the civil war, as well as in our late war with Spain, diarrhoea was one of the most troublesome diseases the army had to contend with. In many instances it became chronic and the old soldiers still suffer from it. Mr. David Taylor, of Wind Ridge, Greene Co., Pa., is one of these. He uses Chamberlain's Colic, Cholera and Diarrhoea Remedy, and says he never found anything that would give him such quick relief. It is for sale by Henderson Bros., wholesale agents, Victoria and Vancouver.

SECURED KOOTENAY ROAD.

American Line Reported to Have Obtained Possession of Important Canadian Connection.

"After a series of attempts extending over a period of two years it is announced that the Great Northern railway has secured control of the Kootenay Railway & Navigation Company, and will operate the same in connection with its own main line system," says yesterday's Post-Intelligencer. "The Kootenay line is a short line extending about twenty-six miles northward from Bonner's Ferry, on the main line of the Great Northern, to the southern extremity of Lake Kootenay, where it has communication with a line of freight steamers calling at all the lake ports and tapping the great Kootenay mining district.

"The output of ore hauled by the Kootenay Railway & Navigation Company, it is said, amounts to many thousand tons per day. In the past a goodly portion of this has been diverted to the smelters along the Canadian Pacific lines in that vicinity and the neighboring Rossland country.

"The first effort of the Great Northern to secure control of the short line, with which it has always had a sort of traffic arrangement, was about two years ago. The Canadian Pacific fearing the loss of the output, made overtures to the owners, which resulted in holding up the consummation of the Great Northern deal. Early last spring it was given out that the Great Northern road was again after the short line, and a few days later a dispatch from Canadian Pacific officials stated that road was about to begin a survey for a parallel line of road to compete with the Kootenay line of boats along the east shore of the lake. This, however, has never been done, and the line is now the property of the Great Northern.

"According to local advices the transfer of the road will be made in a few days. The Great Northern will operate its new acquisition as an independent line, but it is said, will make a through rate from the Kootenay on ore shipments.

"In the same connection it is said the road contemplates extending the railroad portion of their purchase eastward from the south of Lake Kootenay toward Fort Steele, tapping a very rich section of country just north of the Montana boundary. Regarding this part of the deal nothing official has been given out, but it is said this was the intention, had the transcontinental line secured the road a year ago, and there is no known reason why it should be changed now.

"The date set for turning over the Kootenay Railway & Navigation Company to the Great Northern is September 1st."

PERSONAL.

Among the passengers who returned on the steamer Amur from the north was Alf. Esnouf, a Victorian, who for the past two years has been casting in his lot in the metropolis of the north. Mr. Esnouf is highly satisfied with Dawson, and will return there over the ice in the latter part of the fall. Reports were being received constantly at Dawson of the Tanana diggings, and Mr. Esnouf was of the opinion that this would ultimately become a large camp. The Indian river strike continues to occupy the attention of northern argonauts, and the further development of this promises to disclose still more favorable showings. The majority of the Victorians in the north were doing well, George Askew, well known in athletic circles here, having a situation on the steamer Victorian. H. and C. Bailey, also of this city, are working on Sulphur creek. Mr. Esnouf brought information of a disaster to a scow load of goods en route from White Horse to Dawson, and owned by J. H. Falconer of Victoria. The craft had just about arrived at her destination when it was wrecked, a large quantity of the goods being lost.

* * *

J. F. Mahoney, of Dawson, who is registered at the Victoria, gives particulars of the shooting at Ketchikan reported in yesterdays Times. Dan Robinson, the man killed by United States Marshal Hassey, he says, had been drinking, and began trouble by attempting to administer a whipping to two klootchmen on the Ketchikan rancherie. Hassey interfered and a fight ensued, the former resisting arrest. An oar of a boat was secured by the former and with this Robinson broke Hassey's arm and otherwise injured him. Later Robinson procured a rifle and going to Hassey's house met his doom, the marshal on being again accosted having shot him through the back.

* * *

A. McIntosh, a mill owner of Cariboo, at the Dominion, reports that mining operations in that country are more active than ever. A new strike on the Horse Fly was recently made by Senator Campbell, which, he says, gives evidence of developing rich. It was struck at a depth of 500 odd feet.

* * *

Dominion Labor Commissioner Bremner paid Victoria a flying visit yesterday. He is on his way to Rossland, whether he is going to investigate the employment of Italian laborers.

CATARRH CHOKED HIM.

Insidious, Deep-Seated, Relentless Disease —Bound to Vanish Under the Dr. Agnew's Catarrhal Powder Treatment—Relief in Ten Minutes.

Mr. Benjamin F. Wonch, 31 McGee street, Toronto, says: "I was troubled with that insidious disease—catarrh—for many years. It became very deep-seated, and was rapidly growing worse, with disgusting discharges from my nostrils and the dropping in my throat almost choking me at times. I tried a dozen so-called catarrh cures without any relief, but after using a few bottles of Dr. Agnew's Catarrhal Powder I was completely restored, and I believe permanently cured from this loathsome disease."

Sold by Dean & Hiscocks and Hall & Co.

BUTTER RISING.

(Associated Press.)

New York, Aug. 22.—The wholesale price of fancy creamery butter has reached 21½ cents a pound. Since August 18th it has risen one and a half cents. This is partly due to the shrinkage in the milk supply caused by the long period of dry weather. Cheese has gone up from 9¾ to 10⅝ cents per pound.

Sporting News

LACROSSE.

THE NEW WESTMINSTER TEAM.

(Associated Press.)

Montreal, Aug. 21.—The members of the New Westminster lacrosse team, who arrived here yesterday, have created quite an impression in lacrosse circles. Experts are of the opinion that the Montreal team will have its hands full to-morrow afternoon to retain its laurels.

THE OAR.

HACKETT'S STATEMENT.

Vancouver, Aug. 21.—Before leaving for his home in Seattle this morning, Hackett, the oarsman who rowed Johnson here on Saturday, made an affidavit that he agreed, even before leaving Seattle, to throw the race. Several men who backed Hackett heavily have had the betting money returned to them to-day.

LACROSSE.

THE WESTERNERS WON.

Montreal, Aug. 22.—The New Westminster team's first Eastern match was played here to-day, and the Westerners established a favorable augury by defeating Montreal by a score of 5 to 2. A large number were in attendance, and the match was of a very interesting and exciting character. The style of play differed somewhat from that now in vogue here. Among the visitors conspicuous for excellent playing was Turnbull at centre. The teams lined up as follows:

Montreal.		Westminster.
Hamilton	Goal	Cheney
Murphy	Point	A. W. Gray
Taylor	Cover	W. S. Galbraith
Cameron	Defence	C. K. Snell
Haynes	Defence	L. Gifford
McKerrow	Defence	C. P. Peele
Caldwell	Centre	A. Turnbull
E. Christmas	Home	H. P. Latham
Irvine	Home	W. Gifford
Porteous	Home	F. Lynch
W. Christmas	Outside	G. Oddy
Day	Inside	S. Peele
Murphy	Captain	J. Mahoney

The other games are scheduled as follows:

Westminster vs. Quebec, August 25th.
Westminster vs. Shamrocks, of Montreal, August 29th.
Westminster vs. Capitals, of Ottawa, September 1st.
Westminster vs. Toronto, September 3rd.
Westminster vs. Tecumsehs, of Toronto, September 8th.

THE RETAIL MARKETS.

First of New Crop of Wheat Offered for Sale—Superabundance of Plums.

From the orchards of Vancouver Island fruit is coming into the market in a manner that suggests heavy crops. Plums are so plentiful that farmers are finding difficulty in disposing of all they have on hand, and the fact that prices have dropped to about half what apples are bringing is but further evidence of the glut of the market or of the lack of consumption. The past week has also been notable for the receipts of the first new wheat that has been offered for sale.

The current retail prices are as follows:

Flour—	
Ogilvie's Hungarian, per bbl.	$ 6.00
Lake of the Woods, per bbl.	6.00

Dressed Turkeys, per lb	20@ 25

amounting to $1,875. Terms cash.

A MOTHER TELLS HOW SHE SAVED HER LITTLE DAUGHTER'S LIFE.

I am the mother of eight children and have had a great deal of experience with medicines. Last summer my little daughter had the dysentery in its worst form. We thought she would die. I tried everything I could think of, but nothing seemed to do her any good. I saw by an advertisement in our paper that Chamberlain's Colic, Cholera and Diarrhoea Remedy was highly recommended and sent and got a bottle at once. It proved to be one of the very best medicines we ever had in the house. It saved my little daughter's life. I am anxious for every mother to know what an excellent medicine it is. Had I known it at first it would have saved me a great deal of anxiety and my little daughter much suffering. Yours truly, Mrs. Geo. F. Burdick, Liberty, R. I. For sale by Henderson Bros., wholesale agents, Victoria and Vancouver.
