more especially when he has to stay
at one place for days from etc & have
giving the Indians instructions &
showing them how to do certain piece
of work. The Stables are all in
good order and are nearly all
fitted up with Manchurian
particularly the Stables on the West
portion of Reserve No 20. which in
some instances they have erected
Stable while working with in
out side. and they are very clean
and warm.

Doors are generally fitted but only
in few cases are they hung with
hinges as the Government issued
to furnish one but in all other cases
doors are made secured with wood
fastening which in my opinion
is better than iron hinges. No
Sheds are made all cattle being
Stabled.

Employment of Indians. Generally
the majority of the band have
been working now since last
treaty payment. Have thoroughly
succeeded in inducing on
the reserves to adopt the advice
given them. Last little work
has been done they only a few days
and this only to finish work
has kept the farmer busy
time to attend and see
cattle were properly cared
