### HOLSTEINS SELLING WELL IN BRITISH COLUMBIA

Holstein cattle are holding a very high place in the dairy industry of British Columbia, and there is a keen demand for these animals. The Colony Stock Farm at Coquitlam, which has an established reputation throughout the entire west, is spreading around the offspring from many of its best ones. Some very heavy sales have recently taken place from the farm, and which have gone as the foundation stock for several new herds.

W. Ferrell, of Vancouver, secured from the Coquitlam people four two-year-old heifers Friend Korndyke (14893), Colony Segis Belle (20605), Nanuete Pauline (17156) and Clothilde of Westboro 3rd's Jennie (3306). Later in the summer Mr. Farrell also purchased Pietie Estate Dora (24537). This cow has produced 19,565 lbs. milk at 275.8 lbs. butter in R.O.P. She has two daughters with two-year-old records of over 600 lbs. He also secured Colony Victoria Poem, whose dam, Minnie Rooker Poem, has a 100-lb. per day record; Colony Grebegga Korndyke who is also out of a 100 lbs. dam; Colonev Orrise Korndyke, Colony Butter Queen, and last but not least for his herd sire he secured Colony Prince Posch Paul (16961). This young bull is sired by the Toronto champion, Pieter Abbekerk Mercena and out of the great four-year-old cow, Madam Posch Pauline (9291). These animals will make the foundation of an excellent herd as every female is from a tested dam.

Another big sale just reported by the Colony Farm is of eight head to Rev. Andrew Macdonald, of Ladysmith, B.C. These animals are as follows: Sire—Colony Francopis King; he was bred by S. Nye, of New York, and out of a two-year-old that gave over 15,000 lbs. milk in 12 months. The females in this sale,—Lakeside Model Veeman De Kol (14881), 20.56 lbs. butter in seven days as a four-year-old; Homestead De Kol Colantha, with a seven-day record of 20.56 as a three-year-old; Donc'iffe Axe De Kol (15250), Colony Korndyke Segis (14179), Miranda Douglas Segis (24177), Doralivay (14841) and Colony Sadie Korndyke (36318).

Wm. Bason, of Ladner, B.C. has just secured from the Colony Farm the great show bull calf, Colony Sir Colantha Aaggie (9835).

Even with all these heavy sales the big herd at Coquitlam is still increasing. They have just started testing Princess Hengerveld and on December 15th she gave 95 lbs. milk. She is in excellent condition and should be good for 100 lbs. By June 1914, the Colony Farm expect to have two cows that will go over the 100 lbs. of milk in 24 hours, with one that gives promise of reaching the 40-lb. standard.

So great has been the demand in British Columbia for choice Holsteins that the Colony Farm has no more females for sale, and only a few young bulls from some of their choice cows, which will go out at reasonable prices as their stables are full.

### RECORD PRICE FOR GRADE COWS

Johnston Bros., of Huntingdon, Que., write that at their recent sale of pure-bred and grade Holsteins the following remarkable prices were realized for grades. Every grade cow in the herd brought over $100, and one reached the record of $275. The latter was pronounced a "peach." She had bright straight crosses of pure-bred blood in her veins, and was of fine dairy type. She would average 60 lbs. of milk a day for 300 days, allowing a 65-day rest for the benefit of herself and offspring.

The pure-bred cows were of good dairy type, with promise of being deep milkers, but they were young, three being two-year-olds and one a four-year-old. The following are the averages made at this sale:

Pure-bred cows averaged $340.
Pure-bred yearlings averaged $220.
Pure-bred calves averaged $130.
Grade cows averaged $160.
Grade yearlings averaged $56.
Grade calves averaged $35.

W. A. CLEMONS, Secretary, C.H.-F.B.A.

Homestead Susie Colantha the three-year-old heifer owned by Laidlaw Bros., and exhibited at Guelph, has a high day record of 91.4 lbs. of milk and 35.98 lbs. for the week. She is a daughter of Dutchland Colantha Sir Abbekirk, and out of Princess Susie Malahide.

### NOT LATELY

The young lady was painting—sunset, red, with blue streaks and green dots. The old rustic—at a respectful distance—was watching.

"Ah," said the fair artist looking up suddenly, and pretending she hadn't known he was there all the time, "perhaps to you, too, nature has opened her sky-pictures once be more? Have you seen the lambent flame of dawn leaping across the livid east; the red-stained, sulfurous islets floating in the lakes of fire in the west; the ragged clouds at midnight, black as a raven's wing, blotting out the shuddering moon?"

"No, mum," replied the rustic, shortly; "not since I gave up drinkin'."—Sacred Heart Review.

If Get —Sent

Just send us your name and say what you're going to do, we will put in your hand information that will be of great value to you if you are going to build new buildings or repair an old one. You can't afford to put up any kind of building that was good enough in former years when wood and labor were cheap. Why do you suppose modern buildings are so much better made? Simply because, "Metallic" building materials make better buildings, cost less in the first place and are cheapest in the long run.

You should know more about the "Metallic" way of building—you'll find that at no greater cost you can build better buildings with "Metallic" materials than in any other way.

The information is sent you entirely free—though it is worth a great deal of money to you to know the facts in this book. Ask for Eastlake Book 00.
