Frost in Alberta.

Alex. Cavanagh of the Board of Trade had a wire yesterday morning announcing frost the previous night all thru Alberta. "If it was general in Alberta," said Mr. Cavanagh, "you may depend upon it that frost also touched parts of Saskatchewan. Winnipeg wheat is up a cent a bushel from the opening, but I took on a little even on this advance, as I believe that our good western wheat will be badly wanted this year.

A Bull on All Cereals.

"The Ontario farmers are not going to be anxious to sell their grain this year," was the statement made by John Clark of Orangeville at the Board of Trade yesterday. "They are all well fixed, have money in the bank and will need a lot of their own crops for feed this year, owing to the short hay crop and lack of pasture. I am offering 40 cents a bushel for all the new oats offering at Orangeville, but I am getting mighty few at this price and they are likely to go up to 50c before the deliveries will come out. You can write me down a bull on all cereals during the coming winter. On our own farm the oats threshed out less than 15 bushels to the acre."

ST. LAWRENCE MARKET.

Receipts of farm produce were 20 loads of hay, 2 loads of straw, several loads of potatoes, and a few dressed hogs.

Hay—Thirty loads sold at $16 to $17, and one load at $17.50 per ton, all of which was new.

The butter and egg markets are firm with deliveries about equal to the demand.

Chicago Gossip.

Marshall, Spader & Co. to J. G. Beaty at the close:

Market ruled rather heavy to-day and sold 1¼c to 1⅜c under yesterday early, followed by a rally of about ½c. Pit crowd in general are bearish, and inclined to selling side, but run to cover on appearance of any good buying. Considerable long wheat came out early from commission houses on stop orders. On break some of best sellers early were good buyers. Both buying and selling here for northwest account. News from northwest somewhat mixed. Foreign news bullish.

Ennis & Stoppani wired to J. L. Mitchell at the close:

Wheat—After opening weak and lower on liquidation, induced by more favorable weather reports in the northwest, the tendency changed and during the remainder of the session prices ruled higher, final figures being practically unchanged from yesterday's close. Foreign markets were irregular, but in the main showed strength. The northwestern prospects are not at all of a glowing character and with the weather conditions which at present obtain in western Canada, we can see no reason for doubting the inherent strength, which, during the past few days has manifested itself in spasmodic upheavals and which may at any time, when telegraphic communication with all points becomes more perfectly restored, result in a genuine bull market.

Corn and Oats—Averaged lower, being influenced chiefly by reports of larger country acceptances of corn on last night's bids and continued liquidation by the longs. The market, however, absorbed all offerings well and we think will gradually work higher.

Charles W. Gillett to Peter J. Morgan:

Wheat—Liverpool cables showed an advance of ⅜c for wheat this morning, as compared with ⅜c decline in our market yesterday, but the temper of the locals was bearish and the market early developed weakness. On every rally over 96c for December offerings were large and a lot of long what was sold out before full details of weather conditions in Canada were at hand. The Minneapolis curb to-night is ⅝c higher and should Liverpool cables to-morrow reflect the bullish Russian news to-day our wheat will sell higher. There was good buying of futures to-day and the market has been relieved of its load in the long wheat, which was sold out on the early break.

Corn—Further beneficial rains over the corn belt caused a break of about a cent, and the selling by holders was general. Crop advices from the southwest were slightly better, but from Iowa and Indiana they are worse. In Iowa corn is bringing 60c. Nebraska is selling more freely, but the demand is good and accumulations are not probable. Corn seems to have had its break and will sell higher.

Oats—Sold off with other grains, but failed to recover, as did corn and wheat. We doubt if prices will be allowed to go materially lower.

HORSEBREEDERS WANT INSPECTION OF STUDS

Legislation to Improve Quality of Stock Advocated—Evils of Syndicating.

A report of the inspectors appointed by the government to investigate the question of improving the quality of horses bred in the province has been submitted to the minister of agriculture and printed in pamphlet form.

Information was asked of these inspectors on the following subjects:

What conditions have affected the quality and number of stallions and brood mares in certain sections, and, if the effect is for good, whether the same conditions can be applied to other sections? What class of horses can most profitably be raised in different sections? The system of syndicating; the views of horsemen as to the advisability of a stallion inspection act; suggestions from those interested as to what can be done to improve conditions.

The province was divided into eight districts, and the following inspectors were appointed: William Smith, Columbus; J. D. Graham, Toronto; John Gardhouse, Highfield; William Cain, Perth; H. G. Reed, Georgetown; John Bright, Myrtle; William Jones, Zenda; Peter Christie, M.P., Manchester; J. A. Boag, Ravenshoe; Thomas McMillan, Seaforth; William Mossip, St. Mary's; J. G. Clark, Ottawa; James Irving, Winchester; W. F. Kydd, Simcoe; Geo Gray, Newcastle; H. S. Arkell, Guelph; James Sinclair, Cannington; Arthur Thom, Elmira.

Meetings were held in all the districts, and in many instances the need of registration and inspection of stallions was pointed out and legislation along these lines advocated.

As regards syndicating, where a small syndicate of three, four or six persons agree to buy a horse and go to a good, reliable importer, the system was found to work all right. Suggestions were asked as to how to overcome the evil of syndicating stallions, but the inspectors got no satisfaction. In their opinion the people are not good enough judges to buy on their own judgment. Education is the most needful thing, and this can be partially done thru the farmers' institutes and thru the employment of good men as judges at agricultural fairs.

TREATMENT OF INSANE.

Dr. Willoughby Impressed by Munich, Germany, System.

Hon. Dr. Willoughby, who, with Dr. Clark, superintendent of Toronto Asylum, and Dr. Ryan, superintendent of Kingston Asylum, visited a number of asylums in Europe with the object of reporting on the best methods of dealing with the insane, will make a report, which may have an important bearing on legislation to be introduced next session.

In Munich, Germany, they visited a physchiatic clinic department in one of the hospitals where mental diseases are treated at their inception. In the majority of cases it has been found unnecessary to send the patient to the asylum.

The animal threw his weight against the iron bars, and they gave way.

Mrs. Hucke was at the front, and the beast alighted beside her, brushing against her with sufficient force to throw her to the ground. Then, with one blow of his paw, he crushed every rib in the woman's left side. Before anyone could interfere he sank his teeth into her hip, tearing out a piece of the flesh.

TRADING VERY NARROW PRICES ABOUT STEADY

Offerings in the Mining Markets Are Absorbed Without Injury to Prices.

World Office,
Wednesday Evening, Aug. 28.

Trading in the mining markets came to pretty much of a standstill to-day. The buying, except in two or three instances, was decidedly small, but the support was not overwhelmed with offerings, and bids were well maintained for the active issues thruout the entire trading. The continued strength of Nipissing on the New York curb is one of the favorable influences in the minds of the market, and the action of this stock is being watched as a guide to the trend of the general market. Most of the local weak spots have been weeded out, but to-day several lots of Amalgamated were liquidated at a nominal price. Private information is to the effect that the strike is practically ended. When this is definitely announced traders are of the belief that the market will give evidence of a generous appreciation of the fact.

New York Curb.

Charles Head & Co. report the following closing transactions and sales on the New York curb:

Charming Muskoka.

A nice side trip for exhibition visitors. A pretty ride via the Grand Trunk 11.20 a.m. train (the Muskoka Express), along Lakes Simcoe and Couchiching, and across the Severn River to Muskoka Wharf, the starting point of the Muskoka fleet. There is no more beautiful chain of lakes in America, and nearly a thousand islands are scattered among them. Good accommodation from $1 to $5 a day. Get a Grand Trunk booklet describing it, and don't fail to make side trip. Low excursion rate. City office, northwest corner King and Yonge-streets.

Six Cattle Poisoned.

LONDON, Aug. 28.—Six high class Jersey cows, pastured on the eastern outskirts of the city, are dead from arsenical poisoning.

There is a cutlery factory in the neighborhood, which uses arsenic. This is supposed to have got into a stream when the vats were being cleaned.

Teamsters Get Increase.

CHICAGO, Aug. 28.—Teamsters employed by Chicago packing houses have settled all differences with their employers. The men accepted a 65 hours week, excess of this to be paid for at the regular rates.
