Local and Other Matter.

—Robt. Iles and Norman Buckley, of Dalhousie, trapped a bear last week.

—Town incorporation was carried at Lunenburg 150 to 215, after a keen but quiet election.

—John Lockett has received a large stock of New Crop Raisins, Currants, Figs, etc. 11

—Our thanks are due Mr. Ernest Barnaby, of Granville, for a liberal donation of Gravenstein and King of Tompkin apples of a superior quality. They are unusually large and well colored.

UNCLE TOM'S CABIN.—Give "Uncle Tom's Cabin," which will be played in the Court House of this town to-night, a good house. The Company played in Amherst on the 24th, and the *Independent* makes most complimentary references thereto, such as "The actors carried the sympathies of the audience with them in every phase of the play. * * * * The orchestra delighted the audience with most exquisite music. * * * * The performances were excellent in every respect."

Show that a good company can be appreciated, and thus encourage others to come here.

ESCAPE.—A prisoner named Smith while being taken to Dorchester under the charge of Sheriff Morse of this county, succeeded in making his escape at Newport station. The Sheriff thinking his prisoner to be securely manacled, left him for a few minutes, while he stepped into another car, first requesting a fellow-passenger to keep an eye on the prisoner. After the Sheriff left the prisoner as the train was nearing Newport station asked permission to go into the water closet, which was granted. From there he succeeded in making his escape by means of the window, and made off in the darkness. The sheriff got off the train at the next station and drove back to Newport and made as thorough a search as circumstances would permit, but without avail. The Windsor *Tribune* says:—

"It was learned on Thursday that the prisoner had called upon Alexander Robertson, blacksmith, at Ardoise Hill at midnight, requesting him to cut the chains and manacles off, but this was refused and the man left and has not since been seen."

Some of Our Boys.

Mr. Chas. Hoyt, of the North Sydney Cable Telegraph Service, is in town on a visit to his mother. He is a son of the late Mr. Chas Hoyt, of this town. The latter left three sons, all of whom are holding responsible positions in the telegraph service. Henry, the eldest, is in New York, and Lewis, the youngest, is assistant superintendent in the office at North Sydney.

Mr. Joe. FitzRandolph returns home to Kansas City to-day. He is doing a good business there.

Our readers have no doubt been interested in the perusal of the well written letters of Mr. A. Troop, on his voyage to South America. His next letter, we expect, will be on his place of residence—Santiago, Chili. He has an excellent position there in the teaching profession.

Our boys are scattered far and wide, the world over, and it gives us pleasure to know that so many of them are occupying positions of trust and are a credit to the place of their birth.

Apple Report.

LONDON, E. C., 18th Oct, 1888.

DEAR SIR:—As yet no very large quantity of Apples has arrived on our market. Some good Baldwins to our consignment last week we succeeded in selling 14s. and 15s. per barrel. A shipment of Canadian Fall Apples has arrived this week and are just now selling, but most of the fruit is so out of condition the result of the sale will be no fair criterion of the value of sound good Apples. The "Stockholm City" is just due, and we shall have the pleasure of fully advising you of the result of the sale of her Apples.

Yours truly, JOHN S. TOWNSEND & Co.

—The taking of evidence at the inquest on the remains of Mrs. Selig, of Caledonia, was concluded last week. The full evidence of the witnesses is given in the *Gold Hunter*. At the last meeting of the Coroner and Jury, the following were examined:—Dr. C. T. Andrews, (the physician who extracted Mrs. Selig's teeth), Dr. Hartley S. Jacques, who made a *post mortem* examination of the remains, Elizabeth McLeod, who assisted in laying out the deceased, Berton Louis Selig, son of deceased, and Wm. Selig, the husband, was also asked some few questions.

Dr. Andrews in his evidence swore that he was averse to taking out the teeth all at once; wished to take out one or two at a time and without administering ether. He finally concluded to give the ether, owing to fear of offending the husband and wife. Said he only intended giving enough "just so she would lose herself;" but she required a large quantity. Said he persisted in extracting the teeth after she came out of the influence of the narcotic and requested him to desist, because it was his usual custom, as patients don't know what they are doing when they first come out. In regard to the hypodermic injection, he stated that he used Wyatt's preparation of ergot which was for the purpose of arresting hemorrhage. Said he had no idea of any morphine being in the woman's system. After describing his attempts to restore her to sensibility with Minard's Liniment, pricking with a needle, etc., he said:—

"Waited an hour or two—both of us in an excited state of mind—going in and out of the room. Suddenly the peculiar sound ceased, peculiar to an apoplectic state. Went in and thought I saw an improvement in her breathing and pulse, but none in sensibility. I then told Selig, rest is what she required, let us take some ourselves. I had no idea of morphine or any narcotic in her system. Had I thought there was morphine in her system, I would not have left her side—for that was the doctor's place. Had I known what I know now I would not have left her. I never saw a person die under the influence of morphine. I did not suppose that she was under its influence. The pocket-case in which I had all my hypodermic remedies has been missing since I was at that house on that day. Had I discovered the loss at that time I would have suspected that there was some connection between the condition in which she was then in, and the loss of the case because I had left her out of my sight plenty long enough for me not to be accountable for what might be in her system. All of my kit except my tooth instruments were at that house 24 hours previous to extracting the teeth. Selig had taken them up stairs, as he said, to keep them out of the way of the children. Selig woke me I suppose about 2 o'clock in the morning. Sitting on the edge of the bed he said "doctor, I think you had better come down, because there is a change in her breathing. I was at her bedside in less than a minute. In half a minute I was at her bedside. Was ahead of Selig, and before I could realize her condition, he called out from behind me, "My God, she is dead!" I said, "no, never." I put my ear to her chest, with my hand on her pulse, and found her perfectly dead and cold. She must have been dead some minutes. I think he thought she was dead before he came up. I said, "well, Will, it's too bad, she is." He then made arrangements systematically and coolly, and gave orders to the different domestics to have her laid out, I said, "Will, I don't know what to do, I'm so agitated that I don't feel able to help you. I will go across the lake and notify your brother Louis to come and help you."

In reply to questions by Mr. Naylor, Dr. A. said he made examination of the heart and could not help when doing so getting sounds of lungs, said the rattling of mucous or matter in the bronchial tubes disguised the normal sound. Found heart was not in normal condition, found a little valvular trouble, which might have been nervous, or might have been organic. Said according to his own experience she had no symptoms of an overdose of morphine, except unconsciousness. Said he did wrong to allow sympathy to get the better of his judgment in the giving of the ether.

Dr. Jacques in his evidence after describing condition of body and brain, said that in the chemical analysis made by Prof. Lawson, in which he assisted, of the piece of tissue of left arm, of the kidney, and of the spleen, they found nothing satisfactory in two first, but in the tissue of spleen found results consistent with the presence of morphia. The following is the conclusion of his evidence:—

"To Mr. Naylor.—From the symptoms, previous to death given by Dr. Andrews, of the post mortem examination made by myself, and the chemical analysis, I am of the opinion that morphia caused the death of Mrs. Selig.

To the Jury.—Without Dr. Andrews' evidence I would have come to the same conclusion. After hearing Dr. Andrews I was more certain, because it was described by a medical man. There was nothing that I found in the post mortem alone that would enable me to form an opinion as to the cause of death.

To Mr. Naylor.—From the superficial portion of the brain that I saw I could detect no anemia, but the contrary. A patient in a comatose state is in great danger. I do not consider it safe to leave a patient in that condition. I would not."

Mrs. McLeod in her evidence denied that Mr. Selig went about "calmly and coolly giving his orders" after his wife's death, said "he seemed to be too broken hearted to say anything or speak to anybody."

The jury after five hour's deliberation brought in the following verdict:—

"That Mary H. Selig, on the sixth day of September, in the year of our Lord eighteen hundred and eight-eight, came to her death at her house at Molega, in the county of Queens, by congestion of the brain and lungs, caused by an over dose of morphine, administered to her by Dr. Charles T. Andrews, of Bridgewater, in the county of Lunenburg, on the evening of the fifth of September, last past, without intent of causing death, and from such overdose of morphine the said Mary H. Selig came to her death, and not otherwise."

Ottawa, Oct. 28.—Judge Patterson, of the supreme court of judicature of Ontario, has been appointed a judge of the supreme court of Canada, vice Henry, deceased.

—We have been shown a petrified potato which was found on the farm of John Kinney, Esq., Weymouth. It was taken from a piece of land where potatoes were planted some twenty-seven years ago, and is quite a curiosity.

Jacksonville, Fla., Oct. 23.—The epidemic is slowly ebbing out Many new cases are reported daily. The type is much milder and deaths rare. All the volunteer corps of visiting physicians will depart for their homes on Thursday. The resident physicians can now handle the epidemic easily. New cases 33; deaths 1.

The Whitechapel Murder.

A HORRIBLE STORY.

LONDON, Oct. 18.—The mass of absurd theories, false clues and unlimited arrests of the wrong men, which have almost turned the pursuit of the Whitechapel murderer into a burlesque, were relieved to-night by a genuine sensation. Mr. George Lusk, a builder, is the head of a Whitechapel Vigilance Committee. Late on Tuesday night the parcel post delivery left a box at his house. Upon opening it he discovered a meaty substance which smelt very strong and which he judged to be the half of a kidney belonging to some animal. Inclosed in the box was the following letter:

"I send you half of the kidne I took from one of the women. I preserved it for you. T'other piece I fried and ate. It was very nice. I may send you the bloody knif that took it out if you only wate a whil longer."

Mr. Lusk at first regarded the whole thing as a joke. But remembering that such an organ had been taken from the Mitre square victim, he took the box to the London Hospital. Dr. Openshaw examined the inclosure yesterday, and said that it certainly came from a full-grown woman, and had been divided longitudinally. To-day the box and the letter were taken to Scotland Yard, and the detectives are trying to find out in what postal district the parcel was handed in for mail. The handwriting of the letter in the box bore no resemblance to the handwriting of the letters of "Jack the Ripper," found some weeks ago.

Nova Scotia Central.

A few weeks ago a subscriber forwarded a statement showing that the first sod of the Nova Scotia Central was turned at Lunenburg on the 10th of August 1877 by Mrs. Eisenhauer wife of Mr. Jas. Eisenhauer, M. P. for this constituency. The statement also points out the fact that addresses were made by the Rev. Messrs Owen, Duff, Rogers, Roth and Ellis as well as by the Hon. H. A. N. Kaulback, Mr. Edwin Kaulback, and Mr. Grant, one of the contractors. It is also shown that the Lunenburg band was in attendance, playing a selection after each address. Then three cheers were given for the parties concerned in the enterprise, three for the Queen, three for the President of the United States, three for the Ladies of Lunenburg and three for the workmen present, after which the band played the national anthem and Messrs. Abraham Zink and James Smith son of Casper, turned the sod with the plow. Since the aforesaid formality was tendered an expectant public, 11 years and some months have passed away and yet no railroad. But the "no railroad" cry will soon cease to be a pleasure to the enemies of the Nova Scotia Central as well as a humiliation to those who have for 11 long years anxiously awaited the completion of the road between Lunenburg and Middleton.

On Friday last the steamer Netherholm arrived at Bridgewater with a load of steel rails and reliable authority informs us that the work of putting down rails from Bridgewater to Lunenburg and from Bridgewater to New Germany will be commenced without an hour's delay, sufficient rails being on hand now to complete 40 miles of road, while other ships are now on the way with enough to complete the entire line. A practical railroad engineer who traveled throughout Nova Scotia this season, has stated that the road bed of the Nova Scotia Central is as good as any in Canada, being of a much higher character than contracted for, and the road when completed will be one of the best in the country. It now goes without saying that the entire line will be finished and open for business by early Summer.—*Lunenburg Progress.*

A despatch to the *Chronicle* further says:—Several vessels are daily expected via Boston with cargoes of rails, and without a doubt the company will have at least thirty five or forty miles of track laid by December. They have contracted for four new locomotives of Roger's make, and one of them will be here the first of next month. Their ballast cars and flat cars are all in readiness for work. Building operations on the station grounds are moving briskly along. A handsome freight depot is already nearly completed. Foundations for machine shops and a turn-table are being laid, and the stone masons are busily engaged in cutting and trimming granite for the new passenger depot in which the company's offices will be. This depot-building is to be three stories high, the first story of which will be of native stone with granite trimmings. Although not much has been said about it, the company have had over four hundred men employed during the past summer, and much work has been done. Handsome stone culverts have taken the place of wooden structures, and it is safe to say that when the road is completed it will be one of the best equipped, and with regard to permanency, one of the first-class roads of the Province. The people of Lunenburg county will have cause to be proud of their fine railroad.

Important to Working Men.

Artisans, mechanics and laboring men are liable to sudden accidents and injuries, as well as painful cords, stiff joints and lameness. To all thus troubled we would recommend Hagyard's Yellow Oil, the handy and reliable pain cure for outward or internal use.

Correspondence.

We do not hold ourselves responsible for the opinions of our correspondents.

(*For the Monitor.*)

I am really at a loss to know why your correspondent "E" persists in badgering me with questions upon the subject of free trade, when I distinctly stated in a former letter that I believed it to be the only true fiscal policy. I wish "E" to distinctly understand that I consider myself under no obligation to answer his questions, as they are, at least, in this case, irrelevant and unmeaning. He is far more doughty than Goldsmith's Irish Schoolmaster, and I am perfectly willing he should have the last word. If he feels sore about being "hoodwinked" in the "A" and "E" controversy, I cannot help it. As to the amount of products that Nova Scotia sends to the coast of Africa, and what quantity goes either west or east of a certain meridian, I never stopped to inquire. Free trade with the United States, and all the world, if we can get it, is what I would like to see, and am willing to rest my argument upon what free trade has already done, rather than by using a multitude of words, fine phrases and statistical calculations, make that apparently weak, which is in reality strong. The term "false free trader" as used by "E," I excuse, as he is evidently troubled with a *cacoethes scribendi*, and I wish him to enjoy it. It seems to do him a great deal of good, and can do me no harm.

As "E" is an adept at quotations he cannot complain if I indulge in one. It is not from "Buckle," or the "history of civilization," but an authority quite as well known:—When the disciple John saw one casting out devils he wished his Divine Master to forbid him, because he followed not after Him. The Master's answer was, "Forbid him not, for he that is not against us, is for us." And again, from an eminent writer:—"No man was ever written down, but by himself."

Thankful, Mr. Editor, for space, I am truly yours, OBSERVER.

Wilmot, Oct. 27th, 1888.

Ottawa, Oct. 28.—The minister of justice has commuted to imprisonment for life the sentence of Farley, the circus employee, who was sentenced to death at Peterboro, for murdering another circus man.

Ottawa, Oct. 25.—Small-pox is spreading in the country districts north of Toronto and the people are getting alarmed. Eleven cases are reported in North Gwillimburg township. The disease is said to have been spread by parties who attended the Toronto exhibition.

"SAM SLICK."—The Toronto *Empire* in a report of proceedings of the Literary Institute says:—"The literary programme opened with a masterly essay on Judge Haliburton, by Mr. J. Carter Troop, in a purely Canadian humorist, and the best of his kind."

San Francisco, Oct. 23.—The fruit and wheat crops in Santa Cruz, Alameda and San Joaquin counties have been enormously damaged by forest fires. In Santa Cruz County some of the largest red wood forests have been destroyed. In San Joaquin County thousands of cattle have been roasted. A cabin at Router's ranch was burned, the flames leaping a canon 500 feet wide.

—The post mortem on the remains of the unfortunate Montreal girl, Emma Gereaux, shown that the treatment she received when criminally assaulted accelerated her death, but the doctors agree in attributing the immediate cause to typhoid fever and complications of other ailments. A man named Fred Salanger has been arrested charged with being implicated in the outrage, making the third arrest in connection with the case.

A BIG BOODLER.—*Cleveland, Ohio, October* 23.—The greatest excitement prevails here in financial and business, as well as social circles over the reported defalcation of city treasurer, Thomas Axworthy. Axworthy left the city on September 25, going direct to New York city, from where he is said to have left for Montreal. Investigation so far develops shortage of the city funds of over $383,000 and it is thought that further investigation will increase the amount.

—The provision markets this week show rising prices in many articles of food. All grades of cured beef have increased 50 cents and $1 per barrel. Porto Rico sugar and Antigua molasses have risen slightly. Among the advances made in country produce are: eggs, 2 cents a dozen; fresh hogs, ½ cent a pound; hams and bacon, 2 cents a pound; and butter is slightly higher. Turnips sell for 80 cents and $1 a barrel; turkeys for 12½ cents and 13 cents per pound.—*Chronicle.*

HALIFAX MARKETS.—The following quotations are dated Oct. 26th, and are furnished us by Messrs. Mumford Bros., Argyle St. Butter, choice dairy, per lb., 19; butter in rolls, in boxes, per lb., 19 to 20; eggs per doz., 20; beef, quarters, 5 to 7; hogs, lb., 8; mutton, by carcass, 5 to 6; lamb, by carcass, 6 to 6½; veal, by carcass, 4; fowls and chickens, 40 to 50; apples, bbl., $1.00 to $2.50; oats, bush., 50; parsnips, bbl., $1.25; carrots, bbl., $1.25; hay ton, $12.00; wool skins, each, 50 to 55; potatoes, bbl., $1 to $1.10; hams and bacon, per lb., 10 to 12; turkeys, per lb., 12½; partridges, per pair, 30 to 35; turnips, per lb., 80 to 90; geese, each, 50 to 60; ducks, pairs, 50 to 60; rabbits, pair, 10.

—I have been sick with liver and kidney disease which brought on night sweats and general debility for over two years, most of the time was confined to my bed. A doctor attended me, but failed to cure me. After a while I tried many patent medicines that are recommended for the above diseases which failed also. By advice I procured and took three bottles of Dr. Norton's Dock Blood Purifier and it cured me. I now enjoy the best health I have enjoyed for twenty years.

MRS. S. D. MACOMBER.

Avondale, Hants Co. N. S.

RESCUE THE FALLEN.—Capt. Lelley of the Rescue Home for fallen women, Toronto, gave a graphic description of his work in the Salvation Army barracks, at St. John last week. Only three years have passed since the Rescue home was established in Toronto but the work done is described as marvellous. The way the army reaches fallen women, said the speaker is, "we go to the houses of ill repute and ask for admittance." In some cases we were successful but in others at first failed to get in. Now we are always welcomed by the girls. When we get in we pray with them and try to point them to the right path. We have in the home at one time over twenty-five girls, most of whom are to-day trying to save their unfortunate sisters and are meeting with a great measure of success."

Rev. Mr. Wentworth then gave a description of the work done in St. John by four young ladies who visit Sheffield street once or twice per week and are doing a grand work.

Drifting to Death.

San Francisco, Oct. 28.—The whaling barque S. A. Howland brings the news that thirteen whalers are shut in the ice about 20 miles from Herald Island, almost the identical place where the Jeannette was first caught. On board the vessel were between 500 and 600 men. With their catch, the vessels represent $525,000. There is little hope of their escape. The catch was very poor until the latter part of August when the whalers becoming desperate took great risks in running up little coves in the ice after whales. They caught several, but suddenly the ice came in and before they could escape 13 vessels were hemmed in. On Sept. 26th, a relief party was sent out from Fox Island, with wood and clothes, in the whaling steamers, but a storm set in and the relief could not reach the imprisoned whalers. At last accounts the vessels were drifting westward toward the Siberian coast, following the course of the unfortunate barque Napoleon three years ago from which only one man escaped after two years of almost incredible hardship.

On the Platform.

Public speakers and singers are often troubled with sore throat and hoarseness and are liable to severe bronchial attacks which might be prevented and cured by the use of Hagyard's Pectoral Balsam—the best throat and lung remedy in use.

—Rev. E. B. Moore, (Methodist), in a response to a request of the W. C. T. U., delivered, last Sunday evening, what proved to be the most eloquent and impressive temperance sermon heard in Truro this season. The reputation of the Rev. gentleman as a pulpit orator is fast increasing.—*Enterprise.*

A FOUL MURDER.—*London*, October 26.—Two beautiful daughters of a gamekeeper have been found murdered near Leskau, Moravia. The breasts of one of the girls were severed, while the other girl was pinned to the ground with a spike driven through the abdomen. The motive of the crime is supposed to have been jealousy.

—Another log raft is to be built on the Joggins shore during the coming winter, says the St. John *Globe*. Mr. H. R. Robertson has about closed a contract with parties in River Herbert to build and float a raft, 600 ft. long, to contain about 20,000 sticks. The raft must be launched in July next. Mr. Robertson expects to leave for the Pacific slope in a few weeks. He will be there a few months, initiating the people into his system of rafting, and will then return to St. John.

Praiseworthy.

"Last summer I was entirely laid up with liver complaint. A friend advised me to use Burdock Blood Bitters; I did so, and four bottles cured me. I cannot praise this remedy too much" John H. Rivers, Orr Lake, Ont.

MESSRS. C. C. RICHARDS & Co.

Gents,—I took a severe cold, which settled in my throat and lungs and caused me to entirely lose my voice. For six weeks I suffered great pain and discomfort, and tried numerous remedies. My wife advised me to try MINARD'S LINIMENT and the effect was magical, for after only three doses and an outward application, my voice returned and I was able to speak in the Army that night, a privilege I had been unable to enjoy for six weeks. These facts can be verified by numbers of people in this town.

CHARLES PLUMMER.

Yarmouth.

Marriages.

OWEN—FARISH.—On Monday, 24th inst., at Holy Trinity Church, Yarmouth, by the Rev. J. O. Ruggles, J. M. Owen, barrister, of Annapolis, to Isabella Anne, only daughter of James Farish, M. D., of Yarmouth.

CHARLTON—CHUTE.—At Berwick, Oct. 24th, by Rev. E. O. Read, assisted by the Rev. J. Clark, Thos. R. Charlton, of South Williamston, to Rose L., daughter of Silas Chute, of Berwick.

Deaths.

BENT.—At Morristown, Oct. 17th, William O. Bent, aged 31.

ACHILLES.—On the 22nd Oct., at Parker's Cove, Mrs. Margaret Achilles, wife of Rev. Henry Achilles, aged 68 years and 8 months.

RUGGLES.—At Upper Clements, on Tuesday, 16th inst., Timothy H. Ruggles, son of Josiah Ruggles, aged 23.

SMITH.—At Bridgetown, on Thursday, Oct. 25th, of consumption, Jenkie Rice, beloved wife of Mr. Godfrey Smith, in the 39th year of her age. She was a worthy member of the Baptist church, and her death will be much felt. She leaves a husband and a daughter.

PARKER.—At Melvern Square, on the 25th inst., Mary wife of the Rev. Obed Parker, in the 90th, year of her age.

DITMARS.—At Clements West, October 22, after a short and painful illness, Edwin A., son of Jacob W. Ditmars, Esq., of Clements, aged 29 years and 5 months, leaving a wife and one child to mourn their loss.

—A marriage, which excited curiosity, took place on Saturday at Fredericton, N. B. A young man and woman walked over the bridge from Fredericton to St. Mary's and were quietly united by a clergyman of the latter place. The young lady is a sixteen-year-old student of the provincial normal school. She is still attending that institution.

NEW STEEL STEAMER

"YARMOUTH"

YOU ARRIVE AT BOSTON NEXT DAY IN TIME FOR DINNER.

That is the Reason why so many go by this Route.

Geo. E. Corbitt, Agent.

June 13th, 1888. 6m ON STEAMER "EVANGELINE."

What is in a Name?

There is everything in a name. The concentrated efforts of a lifetime all lie crystalized in a name. For thirty years our name has been before you and we, in that time, have endeavored to gain a name for HONEST WORK and FAIR DEALING. This fall finds us with a MORE COMPLETE AND MAGNIFICENT STOCK than Ever. We invite inspection.

J. E. SANCTON.

W. H. MILLER!
