The Weekly Monitor.

WEDNESDAY, MAY 21st, 1884.

FARMING OPPORTUNITIES IN CANADA.—The London *Mark Lane Express* draws the attention of British farmers to the advantages offered by the Maritime Provinces in the following terms:—

"Owing to the influences exercised by the opening up of the North West on the value of real estate in the older Provinces, it is said that exceptional opportunities exist now for men with capital, and for farmers to acquire improved holdings, with farm buildings and dwelling houses, at low prices and on easy terms of payment, in Quebec, Nova Scotia, New Brunswick and Ontario. The dairy and live-stock exports of the Dominion are almost entirely derived from these districts. The exports of cheese for 1883 were 63,340,938 lbs; those of butter, 8,162 729 lbs., eggs, 13,451,410 dozen. Other exports were—Horses, 13,800; cattle, 67,060; sheep, 368,662. The increase in cheese exports, which in 1871 amounted only to 8,000,000 lbs., is remarkable. The total value of the exports of agricultural produce of the Dominion for the year was $29,515,033 and of animals and their products, $21,165,418."

We understand that fifty thousand copies of a pamphlet containing immigration statistics referring to this Province are to be printed for distribution. Mr. C. J. Pittman, of Annapolis, is the Secretary of the N. S. Immigration Society, and it is mainly owing to his indefatigable efforts that this important work is about to be consummated. We learn that Mr. W. H. Banks, of Annapolis has the contract to do the printing.

— The great six days' walking match recently concluded in New York, is phenomenal in its character, from the fact that the pedestrian feat accomplished far excels any other ever attempted. The match may also be considered valuable from a scientific standpoint, as it serves to show, what a wonderful amount of endurance exists in a human being. The spectacle in itself may not have been a particularly edifying one; yet all nations the world over pay tribute to those who excel in athletic performances. True, it was a money making affair, and a great deal of betting was done; but there was one feature at least which was creditable, and which does not always mark other match races, i. e, it was a square honest contest for the mastery from first to last. Some few facts may be interesting. Fitzgerald, who stopped when he had travelled 610 miles, with several hours to spare to complete the six days, was the winner. He is the tallest man of the party, being 5 ft, 10½ inches tall, round shouldered, and very slouchy in appearance. During the entire race he touched no alcoholic stimulants whatever. His best previous performance was 532 miles. Rowell, who was only eight miles behind him at the finish, is 5 ft. 6 inches tall. His gait is a dog trot, he being the first to discover that this mode of locomotion, is both more speedy and requires less exertion than to walk. Other pedestrians have all copied from him in this particular. About the middle of the race he led Fitzgerald by several miles; but towards the last he lost the lead. This is ascribed in some measure to a lame ankle. His backers feel confident that he can beat Fitzgerald, and have put up $5,000 to decide the matter. Rowell believes there is virtue in a small quantity of alcoholic liquors. His best previous record is 556 miles. The smallest man in the race was Robt. Vint. His height is only 5 ft. 3 in.; his physical appearance by no means muscular, and the last man one would suppose to be able to stand the wear and tear of a six days' walking match. His best previous record is, however, 578 miles; but on this occasion he only scored about 530 miles, taking fifth place. One of the competitors, entered for the race, was a fine physical specimen of an Indian from the plains. He was not any match at all for the pale faces, and made a remarkably poor exhibition, as far as pedestrianism was concerned. This serves to show what a systematic course of training will do towards muscular developement and staying power. The Indian had no other training we understand than his ordinary life on the plains. The following tables will show the number of miles travelled each day, and the number of hours and minutes each day spent in sleeping and eating by the leaders of the match:—

MILES TRAVELLED EACH DAY.

Fitzgerald,	126;	106;	109;	111;	88;	73.
Rowell,	135;	105;	105;	94;	85;	77.

TIME OFF TRACK.

Fitzgerald,	3.22;	4.16;	4.25;	4.06;	5.37;	8.33.
Rowell,	2.41;	4.57;	3.43;	5.19;	6.35;	8.37.

At the conclusion of the race the men, though of course very tired, were by no means thoroughly exhausted. The excitement over the whole race was intense, and thousands upon thousands of all grades of society went to witness it. Fairly good order was maintained.

Fitzgerald received $11,050, and Rowell $4,300; the tail man of the race got $600.

— The Halifax *Herald* gives quite an extended notice of Prof. A. J. Eaton, who was referred to in our last. Of the Prof's. German studies the *Herald* say:—

The year and a half following Nov. 1878, Mr. Eaton spent in Leipzic studying German and classical philology, the latter chiefly under the celebrated Curtinas; and then returned to America to study for a year at Yale under the greatest of English and American philologists, Professor Witney. After another year or more of teaching as head master of the Woonsocket academy R. I., he returned to Leipzic where he has just now completed a further course of two years' study, giving his time to Greek, German, Sanskrit, and Latin, in the proportions of about 5 3 2 1. He has recently completed a translation of the whole body of Sanskrit literature known as the Righeda and enjoyed for two seasons the distinguished honor of being a member of Prof. Curtins' select grammatical society. On the first of March Mr. E. went to Paris and resided there three months, with the view of attaining greater proficiency in colloquial French. It is to be hoped that some Canadian college will be able to secure for him such a chair as his high scholarship, his strong and vigorous character, his commanding address and his educational powers as a teacher qualify him for.

— Judah P. Benjamin, the eminent English jurist is dead.

— A bill for legalizing marriage with a deceased wife's sister passed the British House of Commons on the 6th inst., by a vote of 238 to 121.

— Edward Robson, of Londonderry, according to the Winnipeg *Sun*, clears $220 in a week with a pick, shovel and wash pan, gold digging in the Selkirks.

— We would particularly invite our readers to read Mrs L. C. Wheelock's new advertisement this week. 11

Local and Other Matter.

—The foundation timbers of the frame of the new Rink building have been put in place.

—The boys propose to hold a cricket match on their own ground on Saturday next, the Queen's birthday.

—The last ray of hope for poor Amero has vanished. The Massachusetts Legislature has positively refused to recognize his claim of $1,000 damages.

—Rev. Mr. McGregor, of Halifax, will preach in the Presbyterian Church, of this town, next Sunday. Rev. Mr. Foreman has not yet arrived, although confidently expected to be here last Sunday, as announced.

— Just received a large invoice of Nails and Spikes. Ten penny Nails at $3 per keg, four penny at $3 50. Other sizes in same proportion, R. Shipley. 11.

— Hon. Mr. Fielding has resigned his position as a member of the Local Government. It was rumored that Mr. Pipes had also resigned, but this is incorrect.

—The Summerside, P. E. I. *Pioneer* says that the ice blockade in the Strait still continues, obstructing navigation, causing complete stagnation in business and giving a dejected appearance and bankrupt tone to everything connected with the trade.

— The promoters of the proposed Trotting Park, in Annapolis, commenced a survey on Saturday last of the location which is to be on Bay View Island.

—The Queen has expressed it as her wish that the celebration of her birthday be deferred for one month. The 28th of June has therefore been appointed for the United Kingdom.

—Toronto commences the celebration of its semi-centennial on the 30th of June to continue until July 5th. Elaborate preparations are being made for the event.

— We have received a neat volume, entitled "Transactions and Reports of the Fruit Growers Association and International Show Society of Nova Scotia." The frontispiece is an excellent portrait of the late President, Avard Longley Esq. The volume contains, in addition to the reports of the meetings of the Society, a department called the "Secretary's Drawer" which contains a number of valuable items of interest to fruit growers in general. The whole volume is well worth perusal, and reflects great credit on the Association, and the efficient and enterprising secretary, Mr. C. R. H. Starr.

— At the annual meeting of the Board of School Commissioners for Annapolis east, held at Lawrencetown on the 16th inst., the following resolution moved by W. H. Balcom, Esq., seconded by Edward Marshall, Esq., was unanimously adopted.

Whereas, Since the last meeting of this Board, H. B. Magee, Esq., one of our number has been removed by death,

Therefore resolved, That this Board record its regret that he will no longer assist in its deliberations, and further, that the sympathy and condolence of the Board be tendered to the widow and family of the deceased in their severe affliction.

FIRE.—The Paradise Cheese Factory with all its apparatus was totally consumed by fire, early on Saturday morning last. The cause of the fire remains shrouded in mystery. It was first discovered, about 3 o'clock a. m. The building was then completely enveloped in flames, and all that could be done was to watch it burn down. A belief is current that it was struck by lightning, as a heavy rain storm prevailed during the night, and there was no fire used during the day. As there is no insurance, the loss will be considerable to the shareholders.

Mr. James Hawkesworth, of this town, the foreman of the factory, also suffered quite a loss by having a considerable quantity of clothing burned up.

BOW LOSSE.—About 11 o'clock, on the morning of Friday the 9th inst., lightning struck the residence of Mr. Walter Graves, of this place, and played the most erratic freaks. The fluid entered through the top of the chimney, bringing it down to the chamber floor, passed through the stove pipe into the stove, shattering both stove and pipe; passed through the kitchen, breaking a stocking glass and some dishes and knocking Mrs. Graves (who was peeling potatoes for dinner) insensible; from thence the fluid passed into a back room, shattering a bed-post, then made its exit through the side of the house. Mrs. Graves suffered no further injury than the shock to her system and soon recovered consciousness.

—Col. W. E. Starratt, of Maple Grove farm, Paradise, has built a dairy house with an ice house attached and provided himself with creamers and other appliances for the purpose of experimenting in the manufacture of a better class of butter than is usually supplied to the public. The Col. will furnish the Monitor with the results of his cream and butter tests at intervals.—He says: "I made a 3 day's test with 45 lbs of milk per day from high grade Jerseys, making a total of 135 lbs of milk for the three days, which gave me seven (7) lbs of butter after being worked. The milk was set in the creamers for about 11 hours each time, submerged in water in an ice-chest, at a temperature of 36 and 38 degrees, and the cream was churned perfectly sweet at 61° temperature."

The quality of the butter was delicious—we speak from experience. It is a noticeable fact, although we regret to say it of this fine agricultural county, that the greater part of the butter placed on sale at the stores is by no means what it should be, and a great deal of it is almost unfit for use. Improvement is much needed in this direction.

PROPERTY CHANGES.—We omitted to notice, as we should have done two or three weeks ago, the following property changes: Benj. Saunders, near Bridgetown, has sold his fine farm to Charles A. Saunders, of Clarence, for $6,000; the latter sold to John Saunders for about $3,000. The property sold by the first named gentleman was in the possession of his father and himself for a period of 80 years. Advancing years, and the loss of his only son some years ago, made it advisable to dispose of it, which he has done to a brother's son. He has bought the pleasant little property, belonging to Mrs. William Chipman, situate about half-a-mile from this town. Mrs. Chipman has removed to the United States.

—Capt D. R. Graves, has bought the farm of Saml. Engleson of Granville. The former sold his farm to Adolphus Foster, also of Granville.

—One of the best known farms in this vicinity, "Belle Farm," was sold by the owner, Samuel Fitzrandolph, to F. McLeod, of Halifax, last week, for $7,750.

"Belle Farm" has been in the possession of the Randolph family for nearly a century, coming first into their possession by an exchange of properties between Colonel Prince, the original owner, and Edward Fitzrandolph, (the great-grandfather of Samuel), then of Lawrencetown. It is however, but a portion of the original property, the boundaries of which, being from the river to the township line, running north and south, and from the west line of the Fowler property to the Walker brook, or the reabouts, running east and west. Later it was divided into three properties, which were deeded to Edward, John and Charles Fitzrandolph, respectively. The first named became the possessor of "Belle Farm," and at his death, bequeathed it to his son Samuel, who has disposed of it for the handsome figures mentioned above. It is a fine property, and is in an exceptionally pleasant situation. The material used in the construction of the picturesque old house on the property, is said to have been brought entirely from the United States.

Mr. Fitzrandolph will continue to occupy the farm until May ensuing.

— Rev. W. H. Warren, Baptist minister of this town, baptised five candidates in Currell's brook on Sunday last.

AHEAD AGAIN.—The first bunch of wild flowers of the season has been handed us by Miss May Phalen, the same little lassie, who brought us the first bunch last year.

— Some of the weirs along the Granville and Clements shores took fair hauls of herring during last week. This is very early for them to make their appearance.

— The following new Q. C's have been created for Nova Scotia, H. F. Grantham, Yarmouth; S. Blyth, Ingonish; J. P. Chipman, Kentville, B. H. Eaton, E. King, B. Gray, Halifax.

SHIPPING NOTES.—Schr. Ivica, Longmire, ar. from St. John on 14th inst., cld for same port on 16th inst.

Schr. A. M. Holt, Graves, ar. 16th inst, from St. John, cld. 19th inst., for Apple River with a load of brick.

— Moncton, N. B., is to have a $20,000 hotel. It will be erected by a company and when completed will be conducted by Mr. Coleman, now of the Barker House, Fredericton.

WANTED.—Hotels and summer boarding houses, to send in their names, terms, &c., for publication in our new folders. A prompt attention will much oblige T. S. WHITMAN, General Manager New England and Acadia S. S. Co. Annapolis, N. S. tf

—There is hardly an adult person living but is sometimes troubled with kidney difficulty, which is the most prolific and dangerous cause of all diseases. There is no sort of need to have any form of kidneys or urinary trouble if Hop Bitters is taken occasionally.

—We would call the attention of our readers to "Breech Loader's" letter in another column. We may state in this connection, that Messrs John Cox and S. S. Riggles, of this town, have already sown a small quantity of wild rice in one of the lakes in this vicinity.

— A gentleman is now in Halifax endeavoring to form a joint-stock company for the purpose of lighting Halifax with electric light. St. John city has formed a company, and one hundred lights are to be put in at once.

— Four natives of Annapolis have enjoyed the honor of Knighthood: viz., Sir Charles Darling, at one time Governor of Jamacia, Sir William Winnott, late Governor of the gold coast, Sir Fenwick Williams and Sir William J. Ritchie, Chief Justice of Canada.

— Some sentimentalist in speaking of the Grant & Ward failure says "that Gen. Grant has lost every cent he had in the world, *except a $250,000 trust bond*." This trust bond yields him about $17,000 a year income. Poor fellow. Less than 25 years ago Grant was a penniless ex-captain in the U. S. army, wandering around the streets of Galena.

—The National Division, Sons of Temperance of North America, is to meet in Halifax, July 9th. There will be about one hundred and fifty representatives in attendance, and it is expected they will remain in Halifax about five days. A committee is now busy making arrangements for their reception.

—The Railroad bridge over the St. John River is expected to be completed and open for traffic in October. The bridge will close the only gap that exists in the through railway route between the Maritime Provinces and New England. It will enable our fish to be shipped to Boston, New York and Chicago in the cars in which they are packed, thus saving them from the effects of transhipment at St. John.

— The Montreal *Witness* of the 15th inst., gives "a slight forecast of next winters fashions in furs." Now, this kind of thing is disagreeable. Just as we are emerging from a long, cold and dreary winter, and about to settle down to enjoy balmy days, to have our attention directed to next winter, and have to commence to calculate how we are going to pay for the latest "sweet thing in fur dolmans, etc.," is too much.

— Says the St. John *Sun*:—"Applications are being constantly made at the Boston offices of the steamship lines running to New Brunswick and Nova Scotia for information as to the chances available for securing houses and farms in the Provinces, most of the applicants being Provincialists, who, after living in the States for years, are desirous of returning to the land of their birth, in the hope that fortune may smile more freely on their labors than she has done in a foreign land."

— Last week a serious panic took possession of the great financial centre, Wall Street, New York. A number of the best known firms suspended, among whom were Fisk & Hatch and A. W. Dimock & Co. Several banks experienced heavy runs, and one or two temporarily stopped payment. Great uneasiness was felt for some time that a grand crash would result. The excitement has, however, now subsided, the stock market is recovering its normal tone, and a more secure feeling exists. Financial centres in the Dominion are scarcely affected at all.

— T. M. Lewis, Esq., the agent and lecturer of the Grand Division of the Sons of Temperance, will deliver an address in the Methodist Church, of this town, on Sabbath afternoon, the 25th inst. at 2 o'clock, on "The Parable of the ship." All are welcome; especially young men. A silver collection will be taken up, in aid of the Agency Fund, through which alone this department of the work is carried on.

The Halifax *Chronicle* says:—"His hearers will have an opportunity of listening to latest temperance facts and figures, delivered in an oratorical and impressive manner."

Mr. Lewis will also deliver addresses in Lawrencetown on Monday evening, 26th; Round Hill, Tuesday evening 27th and Annapolis, Wednesday 28th. He has just concluded a six months' circuit on the south shore of the Province, where his labors have been crowned with great success, and is now on his way to Yarmouth.

— The following instance of personal courage has just been reported from East Dalhousie. It seems that an enormous black bear,—weighing about four hundred pounds—had been committing great depredations among the sheep and calves on John Steddard's and neighboring farms. As the pursuit of a fierce animal of this kind, requires more than ordinary personal courage, Mr. W. B. Hill, of the Engineering corps of the Nictaux & Atlantic Railway, volunteered to rid the neighborhood of such an unwelcome visitor. On the evening of May 8th, Mr. Hill, learning that the bear was in the vicinity, started forth in pursuit. Arriving at a knoll—after tracking him some distance by the foot prints in the soft mud—he discovered Brain licking his paws, and alongside him the partially devoured carcass of a lamb. Taking aim he planted a bullet in the shoulder of the hairy monster, which rolled over growling furiously. Thinking he had succeeded in despatching him he walked up closer. When his hearship saw whose hand had sped the death-dealing bullet, he rose on his hind-quarters, preparing with his last ebbing drops of blood, to deal vengeance. But a quick snap shot with the second barrel of his trusty rifle sent the monster reeling to the earth.

Mr. Hill, on returning with the intelligence of his exploit, was received with open arms by all the fair daughters of the farm house. But with all the praise of prowess lavished upon him, he wears his honors gracefully.—Com.
