the river known as the Long Reach. The St. John came through the Falls on Sunday morning, for the purpose of repairing the damage she sustained, but which we understand is not very serious.—*Ib.*

The Woodstock *Sentinel* states, that during a thunder storm on Saturday the 23d ult., two oxen were killed by lightning on the farm of Mr. Brower, near that place, and Mr. Brower's son thrown a distance of ten or twelve feet from the window at which he was standing; he was not, however, permanently injured.

"THE BRITISH NORTH AMERICAN."—Mr. Croskill, late Queen's Printer at Halifax, has issued a prospectus for publishing, shortly, in that city, a weekly newspaper, under the above title. "The publication of this Journal, (says the prospectus) will take place *For America*, immediately after the arrival of every steamer from Europe; and *for Europe*, immediately before the departure of every steamer from America. It will thus convey the *latest intelligence* from the old world to subscribers in North America; and from all parts of this continent, by telegraph, up to the latest hour from Halifax, to subscribers in Europe.—The price of the paper will be 20s. per annum, in advance."

We rejoice in observing the name of another native of Halifax added to the list of our townsmen who have acquired distinction in the military profession, by gallantry and proficiency. Major John Eardley Wilmot Inglis, 32nd Foot, son of the Lord Bishop of Nova Scotia, was promoted to the rank of Lieut. Colonel, on the 7th inst. in reward of his services in the East Indies. But few so young have attained so high a place. The advancement he has so honorably won shows that the post of honor is accessible to a colonist as a native of Great Britain, in the service of his Sovereign.—*Halifax Recorder.*

The Surveying Steamer *Columbia*, Commander Shortland, arrived at Halifax on the 25th ult. in 26 days from Plymouth.

The Montreal *Pilot* rejoices to learn that our Most Gracious Sovereign, as a special mark of favour, has signified her pleasure to become sponsor to the infant son of Lord and Lady Elgin, on whom she requests may be conferred the baptismal names of Alexander Victor.

The same paper mentions a circumstance, which we are unwilling to credit. It is, that Lady Elgin will be compelled to discontinue her daily drives round the Mountain, she having been insulted on two different occasions by ruffians, *in the garb of gentlemen!* who followed her carriage, cracking their whips, and hooting after her.—*Quebec Gazette.*

JAMAICA.—Papers from this Island, to the 23d May, represent affairs there as wearing a most discouraging aspect. The agriculturists bemoan the state of their crops in consequence of the prevalence of dry weather. The seasonable rains which usually accompany the month of May in that climate, had not visited the country up to the date above mentioned; and it is intimated that, if June should be equally inauspicious, great suffering would be inevitable through the failure of the native crops. Commercial men, too, are saddened by the stagnation of trade. "The foreign trade," says the *Morning Journal* of the latest date, "has dwindled into insignificance, and the island has for some time past afforded evidence the most conclusive of the diminished and diminishing means of the inhabitants generally." We notice, by a financial statement published in the papers, that the Revenue of Jamaica continues to decline. The Import Duties for the April quarter were less by £2000 than those of the January quarter; and the decrease on the half-year ending 5th April last, as compared with 1848, amounted to the large sum of £12,232. The island debt is accumulating rapidly.—A public meeting, called by the most influential inhabitants, was to take place in Spanish Town on the 24th ult., for the purpose of considering the effect produced on Jamaica by the non-observance of the Slave Trade Treaties with Spain and Brazil. Bishop Spencer would take the Chair on that occasion.—*Nova Scotian.*

RAILROAD IN MEXICO.—The National Intelligencer publishes an official notification from President Herrera, of Mexico, announcing that Congress has conferred on the government the power to contract for a Railroad from Vera Cruz to the city of Mexico, and thence to the Pacific—the road to be commenced in two and finished in fifteen years from the close of the contract. Among the privileges granted are—exclusive monopoly to the road and branches for fifty years; no duties required on its materials and fuel; grant of public land for the track where the road runs through such lands; extension of the monopoly if the road is built beyond the yellow fever country in two years, &c. The contract is to be awarded to those whose proposals are most advantageous, and the notification is to be extensively circulated in Europe and America.

[FROM LATE AMERICAN PAPERS.]

THE CHOLERA.—There were one hundred and fifty deaths from cholera at Cincinnati on the 25th—of which one hundred and thirty were foreigners, mostly Germans and Irish. On the 26th, ninety-eight cholera interments were reported. A despatch dated 28th says the cholera is fearfully increasing. The weather was wet and the atmosphere oppressive.

At St. Louis on the 25th there were reported 110 interments in the eight cemeteries—88 by cholera. The previous week's interments exceeded 700.

At Norfolk, during the week ending 26th, there were forty-six cases and fourteen deaths. Nine cases and two deaths were reported at Buffalo on the 26th. At Richmond, Va., 26th, ten cases and four deaths reported.

The disease has broken out with considerable virulence at Rondout, N. Y. From Sunday noon to Monday evening, ten deaths occurred, and on Tuesday six deaths were reported.

The cholera prevails to a limited extent in several towns in New Jersey. At Camden there were three deaths in one day in the early part of the week.

The cholera is making sad havoc in Mexico. In Saltillo, thirty or forty persons were dying daily.—*Boston Journal, 26th.*

On Monday last week there were 47 new cases of cholera, and 25 deaths, reported at New-York; on Tuesday 73 new cases, and 38 deaths; on Wednesday 43 new cases, and 24 deaths; on Thursday, 60 new cases, and 29 deaths; on Friday, 30 cases and 18 deaths.

In Philadelphia, 64 new cholera cases, and 22 deaths, were reported for the forty-eight hours ending at 2 P. M. on Thursday last.

The Philadelphia Board of Health have established dispensaries in that city and districts, where medicine can be had by the poor, at all hours, at the expense of the Board.

GREAT EDIFICE.—The State Capitol of Tennessee, at Nashville, is said to be one of the grandest edifices of the kind in the Union. It is two hundred and forty feet deep, by one hundred and thirty-five feet front, and will be supported by twenty-eight columns, each forty feet in height. The height of the building will be eighty feet. The Banner says that the whole building is to be constructed of stone and iron, inside as well as outside.

Ex-President Polk's remains, by the special request of the deceased, were consigned to the tomb by Masons, and with Masonic honors. After the fraternity had gone through with the customary ceremonies—both affecting and impressive—at his residence, the body was conveyed to the Methodist Church, and a funeral sermon delivered by the Rev. J. B. McFerrin.

The funeral services performed, the body was conveyed to the grave yard, accompanied by the masons, the city authorities, and a long train of mourning citizens, and deposited in the tomb with masonic forms, after a brief, but beautiful and appropriate address by Wilkins Tannehill, P. G. M., presiding officer of the fraternity. A benediction by the minister closed the ceremonies.

A proposal has been made in Boston to raise a subscription of $100 000 for the purchase and proper fitting of a vessel or vessels to go in search of Sir John Franklin and his companions.

Mr. Charles Stetson, of the Astor House in New-York, is about to visit St. Petersburg, Russia, for the purpose of establishing an extensive Hotel in the imperial city of the Czar of all the Russias.

PREMATURE INTERMENTS.—The Cincinnati Commercial states, that the remains of one of the victims of cholera, in that city, was placed in the vault of a grave-yard, where it remained about twenty-four hours, when, in the presence of friends and relatives, it was taken out for burial. Some of the relatives, desiring to look once more upon the form of the deceased, the coffin was opened by the sexton; and, awful to behold, the features of the corpse were found to be hideously distorted, his shroud torn, and his fingers—which were between his teeth—bitten and gnawed to the very bone. One of the most afflicting accompaniments of an epidemic is frequently to be found in a panic, which leads to results heart-rending as the circumstance thus related.

NEW YORK, June 29.

LATE FROM CALIFORNIA.—The mail by the Clyde at Mobile, has arrived.

The report of the troubles between Gen. Smith and his command and the people is confirmed. The idea of military rule is repulsed most decidedly.—Gen. Smith and a few of his troops have been driven on board the vessels of war in port, and the remainder have fled to the mines.

In consequence of the hostility of the people, and the impossibility of doing anything by force, Gen. Smith had determined to return home by the first opportunity.

San Francisco was completely in the hands of rowdies. The streets exhibited one continued scene of fighting. All peaceably disposed persons were in favor of Gen. Smith, and it was the universal opinion that he is not half sustained by the Home Government.

Affairs at the upper mines were in a most deplorable state. Several attacks had been made upon the miners by the Indians. The latter are represented as committing the most daring outrages, butchering all who come within their reach.

Many of the diggers were preparing to return, some of whom had been disappointed in their search for gold, and were desirous of turning their attention to other pursuits.

At the mines one half were Americans, one quarter Californians, and the remainder principally Peruvians and Chilians. The general idea among the Americans was that no foreigners should be allowed to dig gold.

It was almost certain that difficulties resulting in bloodshed would soon occur. The hatred between the Americans and foreigners was most intense.

The average sum collected at the mines does not exceed *five dollars per day*; and it is generally believed that he will be the luckiest man who returns home with good health. The expenses of living are enormous.—*Sun.*

The above statement sent on by telegraph from New Orleans of Gen. Smith and his troops at San Francisco being refugees on board the American ships, and that the soldiers were hunted down like wolves, &c., is generally discredited.—*Boston Journal, 29th.*

STEAMBOAT EXPLOSION.—*Montreal, June 28.*—The steamer Passport collapsed her boilers this morning, killing Demigrants, and scalding 15 other persons.

The anniversary of the Queen's Coronation was celebrated to-day. Salutes were fired by the garrison.

There have been five cases of cholera, to-day two of which proved fatal.

It is said that the Queen has written a letter to Sir Robert Peel, congratulating him on the successful *debut* of his son. The old gentleman and the young one kept the secret, but Mamma, with natural pride, let it out.

Garribaldi, the Roman commander, is described as a most picturesque warrior, the ideal of a brigand—eminently handsome, with a red blouse, broad belt full of pistols, wide brimmed hat, and green feather.

A country editor tells his subscribers that he has been compelled to adopt the cash system, but will continue to receive *potatoes* at par.

[From the Royal Gazette, June 27.]

PROVINCIAL APPOINTMENTS.—John C. Allen, Esquire, Barrister, &c., to be Reporter of the Decisions of the Supreme Court, in the room of D. S. Kerr, Esq., resigned.

Patrick Comerford to be Shipping Master, under the Act 12 Vic. cap. 50.

By His Excellency's Command.

FROM THE CHEROKEE COUNTRY.

Georgia, Feb. 17, 1848.

Opinion of Dr. J. B. Randall on the merit of Wistar's Balsam of Wild Cherry.

We have been induced, in consequence of the benefits received from this medicine, to add our testimony in favor of its extraordinary healing properties. We take great pleasure in stating, that we have frequently *used it ourself and administered it to others* during the past year, in cases of *obstinate coughs, colds, soreness of the chest, &c., and always with the most happy result.* We therefore cheerfully recommend to all afflicted with the above diseases, to TRY the Balsam of Wild Cherry.—*Marietta Helicon.*

None genuine without the written signature of I. BUTTS on the wrapper.—For sale by S. L. TILLEY, King Street St. John, N. B.
