S. P. C. A.

Mr. E. J. Wetmore, of the S. P. C. A. who was on his way to St. John by boat Wednesday morning, had some trouble with Stanley A. Chase, who was loading cattle on the boat, and in the usual manner, "twisted the animal's tail," much to the indignation of Mr. Wetmore. We think that gentleman carried the matter to the extreme in this case, as it is utterly impossible to load or unload cattle without using some such means.

To Get at the Facts.

Regarding Hood's Sarsaparilla, ask the people who take this medicine, or read the testimonials often published in this paper. They will certainly convince you that Hood's Sarsaparilla possesses unequalled merit, and that Hood's Cures.

Miss Lettie Huntley

Is the sister of Mr. W. S. Huntley of Cortland, N. Y., a well known carpenter and builder. Her frank statement below gives only the absolute truth concerning her illness and marvelous recovery by the aid of Hood's Sarsaparilla. She says:

"C. I. Hood & Co., Lowell, Mass.:

"Dear Sir: Twelve years ago I began to have hemorrhages and four years ago became so low that the physicians told me

There Was No Hope

and I should soon die. I could not be moved from my bed. Under my face were napkins continually reddened with blood from my mouth. **I could eat nothing** and had no action of the bowels for a week. The doctors said the cause was ulcers in the stomach. At this time my mother said she wanted to make one more trial, and asked if I would take Hood's Sarsaparilla. I told her it would be

A Waste of Money

but finding it would comfort her, I began taking it. In a few days the bloating began to subside. I seemed to feel a little stronger, but thought it only fancy. I was so weak I could only take ten drops of Sarsaparilla at first. In two weeks I was able to sit up a few minutes every day. In a month **I could walk across the room.** One day I asked what they were to have for dinner, and said I wanted something hearty. My mother was so happy she cried. It was the

First Time I had Felt Hungry for Two Years

I kept on with Hood's Sarsaparilla and in six months was as well as ever in my life. It is now four years since I recovered, and I have not had a day's sickness since, nor any hemorrhage. If ever a human being thanked the good Lord on bended knees it was I. I know that Hood's Sarsaparilla, and that alone, unquestionably **Saved my Life.**"

Messrs. Sager & Jennings, the well known druggists of Cortland, say that Miss Huntley "is a highly respected lady; her statement of what

Hood's Sarsaparilla

Has done for her is worthy the highest confidence."

Reading.

SENIOR CLASS. Time, 1 hr.

I. State the bodily conditions necessary for the production of a good tone. What vocal exercises would you use to improve the clearness, pleasantness and power of the voice?

II. Underline the emphatic words of the following selection, and give reasons for your choice:—"To be or not to be? That is the question. Whether 'tis nobler in the mind to suffer the slings and arrows of outrageous fortune; or to take arms against a sea of troubles, and by opposing end them."

III. What inflections would you give on the underlined words of the following sentences? Mark the inflections on the printed paper over the words:—"Hear him, my lord; he's wondrous condescending. Mark the humility—of—shepherd—Norval." "All this dread order break,—for whom?—for thee?"

IV. How would it affect the meaning of the following question if (a) rising inflections were given on its two parts, or (b) rising on its first part and falling on the second? "Would the influence of the Bible even if it were not the record of a divine revelation, be to render princes more tyrannical, or subjects more ungovernable?"

5. What transitions in pitch, force, rate and quality would you make in reading the following passage?

"One touch to her hand, and one word in her ear,
When they reached the hall door, and the charger stood near;
So light to the croupe the fair lady he swung,
So light to the saddle before her he sprung;
'She is won! We are gone! over bank, bush and scaur;
They'll have fleet steeds that follow,' quoth young Lochinvar."

Algebra and Mechanics.

SENIOR CLASS. Time, 1 hr. 30 min.

N. B.—The work must be shown in full.

1. (a) Give a tabular classification of equations. OR, (b) Explain the two algebraic uses of the word "degree," and those of the word "root."

2. Solve $\sqrt[2]{(x^2-3x+11)}=x^2-3x+8$.

3. $\begin{cases} 4x^2-xy+2y^2=10. \\ 2x^2+3xy-2y^2=0. \end{cases}$

4. $xy=2$, and $x-xy+y=1$.

5. State in one or more forms the principle of the polygon of forces, and demonstrate it by a diagram with suitable explanation.

6. An iron plate in the form of an isosceles trapezoid A B C D, weighing 10 lbs., is supported at its centre of gravity. AB measures 8 inches, DC 12 inches, and the perpendicular distance between them, 16 inches. Weights of 6, 18, 8 and 16 lbs., are suspended from A, B, C, and D respectively. Find the centre of gravity of the whole, and the total weight on the support

7. A loaded wagon weighing 1000 lbs. is to be pulled up a slope 200 ft. long and 24 ft. high, by means of "blocks and tackle" consisting of a single rope passing around 2 fixed and 2 movable pulleys, acting parallel to the slope. Friction, etc., being disregarded, what force applied to the rope will just support the load?

Chemistry.

SENIORS, A1 and A2. Time, 1 hr. 45 min.

1. Account for the effervescence of soda water—for its turning blue litmus solution red—for its turning lime water milky (write the reaction and tell what the white substance is), for its becoming clear again when more soda water is put in. What in your opinion, must the composition of soda water be?

[Experiments referred to above to be performed in the presence of the class.]

2. Give the principal chemical and physical properties (separately) of silica, chalk, quick lime, oil of vitrol, carbonic anhydride, ammonia, quartz, ice, the carbonate radical; classify them as acids, bases, basic oxides, salts. etc., with reasons, and with the ordinary formulas of the first five, and the graphic formulas of the remainder.

3. (a) Describe the preparation of ammonia, and write and account for the reaction.

(b) Describe the elements of which calcined plaster of Paris is composed.

4. What name is common to the salts of nitric acid—of sulphuric acid—of carbonic acid—of hydrochloric acid?

Formulate two of each, and find the base, acid, basic oxide, and anhydride of one of them, showing work.

5. Write a reaction which will yield hydrogen; one which will yield oxygen; one which will yield carbonate of lime; two which will yield carbon dioxide only; one which will yield water only; two by which, together chlorine gas can be obtained from common salt; the one which takes the place when hydrochloric acid is put on chips of marble.

(Optional.)

6. (a) What are the products of the combustion of alcohol? Write the reaction.

How does the draught of a stove make the fire burn better? Account for the draught

(b) Write anything interesting you have learned this spring by actual observation, about any birds which are here yet, or any native shrubs or trees yet in bloom, and tell how you found out. Answer briefly, but definitely.
