DECLARING OF DIVIDENDS

SEVERAL BANKS MAKE HALF-YEARLY DECLARATIONS.

The Canadian Steamship and Railroad Route To and From Europe—A Gentlemen's Coal Dealers Meet—Toronto Stocks Dull—Wheat and Barley Down.

The directors of the Canadian Bank of Commerce met yesterday and declared the half-yearly dividend, payable on December 1st, at 3½ per cent.

The directors of the Ontario Bank met yesterday and declared the half-yearly dividend, payable on December 1st, at 3½ per cent.

The directors of the Standard Bank met yesterday and declared the half-yearly dividend, payable on December 1st, at 3½ per cent.

The Imperial Bank directors will meet on Thursday and make their half-yearly declaration. The dividend will probably be 4 per cent.

The Merchants' Bank will declare in a few days.

The Bank of Montreal directors made their half-yearly declaration on Friday last, at Montreal. The dividend was 3 per cent.

The dividends declared are the same as those declared at the first of the year. It was expected, on rather rumored, that the Standard would declare a half yearly dividend of 4 per cent, but, as is seen, such was not the case.

A prominent wholesale dry goods house furnishes The World with the following figures, which show the speed of the Canadian route to and from Europe and that of the United States route:

The "arrival" dates are the date on which the duty is paid in Toronto. It will be seen that there is not much difference in the time made, according to the figures, but up to now the United States route has a slight advantage through adopting a quicker notification system than the rival route. The goods over the Canadian route, however, actually arrive in Toronto sooner than those by the other route. But arrangements are being made to remedy little defects such as that of notification.

As it is the goods over the Canadian route arrive just as soon as those imported via the United States route. If both route the goods arrive in good order, but importers patronizing the Canadian route have the advantage of getting them carried cheaper.

A meeting of the coal trade section of the Board of Trade was held yesterday afternoon. Questions relating to the trade, such as the adaptability of different classes of horses to draw coal carts, the effect of increased rents and increased values of coal yards on the trade, were discussed. No change in the price of coal was made. At present the price is $5.75 a ton for egg and grate coal, and $5 a ton for stove and nut coal. In Montreal prices are $1 a ton higher—$6.75 for egg and grate coal, and $7 a ton for stove and nut coal.

The Canadian Bank of Commerce officials are annoyed at a deputch which has been going from one part of the country to another, stating that counterfeit $10 Commerce bills are in circulation. Manager Walker says that a newspaper in Nova Scotia started the rumor, and probably, he says, the newspaper referred to counterfeits on the old issue, which has been all recalled. The same despatch was sent to him in newspapers of different localities. The Detroit papers got a hold of it and a correspondent in Windsor telegraphed it to The World yesterday. Mr. Walker states that these are no counterfeit Commerce notes in circulation, so far as he is aware of, and in none of the 40 agencies have any been detected.

WHEAT OPERATORS CAUTIOUS.

CHICAGO, Oct. 23.—The general condition of the wheat market remains unchanged. A fair business was done, principally in May. Operators are not showing much inclination to touch December, excepting in way of effecting settlements. A prominent local trader was again credited with being a rather free seller to-day, but operators are disposed to act cautiously and look upon the operations of the trade in question with considerable distrust. The matter of fact is that the market of late has acted so contrary that they hesitate about trading, even in backing their own conclusions or views of the market. The feeling was weak and the close was lower. Corn was fairly active and decidedly weaker. Cash oats were firm and futures weak and lower. Provisions were fairly active.

FOR OLD PEOPLE!

In old people the nervous system is weakened, and this must be strengthened. One of the most prominent medical writers of the day, in speaking of the prevalence of rheumatic troubles among the aged, says: "The various pains, rheumatic or other, which old people often complain of, and which materially disturb their comfort, result from disordered nerves." There it is in a nutshell—the medicine for old people must be a nerve tonic. Old people are beset with constipation, flatulency, drowsiness, diarrhœa, indigestion, rheumatism, neuralgia.

These diseases are of nervous origin. Paine's Celery Compound, that great nerve tonic, is almost a specific in these disorders, and by its regulating influence on the liver, bowels, and kidneys, removes the disorders peculiar to old age. Old people find it stimulating to the vital powers, productive of appetite, and a promotor of digestion.

Sold by druggists, $1.00. Six for $5.00. Send for eight-page paper, with many testimonials from nervous, debilitated, and aged people, who bless Paine's Celery Compound.
