Susu for Fogo Service.

Fred. H. Ellis & Co. have purchased the S.S. Susu, which was stranded at Little Bay last fall and later refloated by Captain Porter. She has been at the dock pier for several weeks, repairs having been made to the hull, engines and cabins, and she is now in first-class condition. It is understood that the Susu will take up the mail and passenger service on the Fogo route as soon as ice conditions permit.

Newfoundlander Dies Abroad.

Silas Partridge Knight, inventor of an electrotyping process for making copper plates for fine printing, died yesterday at his home, 63 Seventh avenue. He was 98 years old and one of the oldest members of the Independent Order of Odd Fellows in the United States. Mr. Knight was born at St. John's, Nfld., on Jan. 21, 1821. He invented his electrotyping process at Boston and came to Brooklyn with it in 1852. He succeeded in having an electrotyping department installed at Harper Brothers and Co., in Manhattan, and was a superintendent with that firm for forty years. Mr. Knight attributed his long life to temperance in habits and food, together with vigorous exercise. His wife, Lydia Gunderson, died in Brooklyn twenty years ago. Mr. Knight is survived by a son and three daughters.—Brooklyn Standard Union, Saturday, June 14th, 1919.

Obituary.

H. C. MORRIS.

Miss Nellie Morris, 73 Long's Hill, received the sad news of the death of her brother H. C. (Charlie) Morris, at Halifax on Monday last, following an operation for appendicitis, from Archdeacon Armitage. The deceased who was well known in St. John's, was for many years an official of the Marine and Fisheries department, subsequently going to Halifax, Nova Scotia in which city he won for himself the esteem of all with whom he came in contact. The late Mr. Morris was the eldest son of Captain Stephen and Margaret Morris, both of whom entered into rest years ago. The only surviving near relatives are a sister (Nellie) and a brother, (George). The body will be brought to St. John's for interment in the Church of England Cemetery where the wife and adopted daughter of the deceased are buried.

To the bereaved brother and sister the **Telegram** offers sincere condolences.

Road Still Unimproved.

Some time ago we directed the attention of the Municipal Council to the wretched condition of that portion of Torbay Road nearest Torbay, which had then been covered with a soft loam instead of gravel or sand. The cabmen found it very difficult in passing over this road, when at its best. Now, however, that so much rain has fallen, the condition there bad best be left to the imagination—it beggars description. If the Inspector whose duty it is to see to this matter is a godly man, he will lose no time in having improvements made, for the amount of tall language that is heard in there nowdays has turned the green grass of the surrounding fields quite black. In a civilized community this should not be.

DISEASED GUMS AND TEETH.

Of all the poison taken into the blood, the germs and pus contributed by the diseased gums and teeth are the most destructive to the human system. If every red blood cell is forced to fight against numbers of germs to the cell, the blood cannot attend to the building up of the body, and if allowed to continue the system is bound to break down and eventually you are an invalid. Kidney, stomach, heart trouble, rheumatism and many other diseases are brought on by diseased gums and teeth.

EXAMINATION FREE.
