BRITANNIA *LIFE ASSURANCE COMPANY.*

No. 1, Princess-street Bank, LONDON.

Capital—£1,000,000 Sterling.

THE Undersigned in giving notice of the REMOVAL of his OFFICE, to No. 46, Great St. James Street, begs leave (whilst thankfully mentioning the great and decided success of the above Institution in this Province), to inform the public (as some misunderstanding and misrepresentations have taken place on the subject), that the Rates of the Britannia are lower than those of any European, or *well Established Life Office*, doing business in this country, and subjoins below a statement of rates at the age of 30—of several other offices. He would also beg leave here to mention, that the BRITANNIA OFFICE was established for the purpose of granting an *immediate bonus* to parties desirous of assuring their lives, by not charging higher rates than *absolutely* required to render the business safe.

For those who wish to participate in profits, there are Tables combining both the Mutual and Proprietary principles, which are well deserving of the attention of the public.

The undersigned would, however, remark, that the opinion of many well versed in the subject of Life Assurance, is, that the choice of a Table which requires the smallest possible payment, compatible with safety, is the most advantageous.

J. H. MAITLAND,
Agent for Canada.

Prospectuses and Tables of Rates can be obtained at No. 46, Great St. James Street, or from any of the Agents, or Medical Referees throughout the Province.

ST. LAWRENCE ENGINE WORKS,
CANAL BASIN.

THE Subscribers are now prepared to fulfil, with accuracy and dispatch, any orders in the following Branches, with which they may be entrusted, viz.:—RIVER, LOCOMOTIVE and STATIONARY ENGINE WORK, of all descriptions, BOILER WORK and IRON BOAT BUILDING, on most approved modern principles, CASTINGS, IRON and BRASS, MILL WORK, of all descriptions, WATER WHEELS, BARK MILLS, BUILDERS' and ARCHITECTURAL CASTINGS, PATENT WINDLASSES, WINCHES, CRANE CASTINGS, &c., &c., furnished on most moderate terms; as they are putting up an entirely new Set of Wheels and other Patterns, their Gears, &c., will be of the most modern construction.

SMITH WORK, ENGINE, SHIP, JOBBING, &c., executed in a very superior manner, and at the shortest notice.

And they trust that any work coming from their Establishment will be unsurpassed for quality of material, and faithfulness of execution, and from the facilities which their situation affords, from its contiguity to the Canal, and possession of a water power, for driving the machinery, they can offer inducements to Steamboat Proprietors, and to the Public generally, both in the reduction of charges and the increased dispatch given to work, far superior to anything hitherto offered in this Province. In erecting New or repairing Old Engines, shipping and unshipping Boilers, Shafts, &c., the advantage of having the work immediately at the Shop Door, saving all labour of Cartage, Hauling, &c., will, they trust, be fully appreciated.

THIS COMPANY, which has been established 30 years, commenced with a subscribed Capital of $3,000,000, and was the first, 20 years ago, to offer to the Public two Scales of Premium—the lower, to insure only a fixed amount; the higher, entitling the Insurers to a participation in the profits.

Advantages offered to Insurers.

Very low Rates of Premium on Young Lives.

The security of a large realised and invested Capital.

Large Bonuses on Policies effected on the high Scale.

Prompt settlement of Losses.

The full value given for Policies when discontinued.

On Insurances for the Whole of Life: one-half of the Premiums, if desired, permitted to remain unpaid for the first seven years, as a loan at interest, and then to be paid, or to remain as a permanent Loan, at the option of the Insurer.

Loans upon Policies for the Whole of Life, after payment of three Premiums, in proportion to the value of same.

The acceptance of Naval, Military, Climate, and Special Risks of all kinds, on payment of a commensurate Premium. Age admitted on the Policy when issued, if desired, on proof of date of birth.

Permission for the Lives assured to reside in any part of Europe, without extra premium or special license, and to, at and from California, at a small extra premium.

Insurances, if required immediately, may be effected any day between the hours of 10 and 4.

The Pamphlets published by this Company fully set forth the merits of Life Insurance; and copies thereof may be had, *gratis*, on application to the Agent, who is also prepared to furnish every information that intending Insurers may require.

FREDERICK R. STARR, Esq.,
General Agent for the B. N. A. Colonies.

THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the Rates of Premium quite as LOW as security to the Assured, and safety to the Office, will admit of.

The following are some of the advantages offered by this Society:—

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One half of the Premium for the first five years may be paid by the Assured's own Note. These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured.

Insurers can at all times demand, as a right, a Loan to the extent of two-thirds the amount of Premium they have paid—upon deposit of their Policy, and guaranteeing it will be kept in force. This important advantage removes the fear so many entertain of being obliged, through pecuniary embarrassment, to let their Policies lapse, and at a time such a provision is absolutely needed for their families.

No Charge for Stamp Duty, nor for Medical Examination.

The Bonuses divided *Annually*, either in Cash, Reduction of Premium, or in addition to the sum Assured, whichever of these *three* ways the Assured may *each* year desire, after being a Policy holder for Four Years, at which period a Bonus is payable for the Four Years—Annually afterwards.

THIRTY DAYS allowed after each Payment of Premium becomes due, without Forfeiture of Policy.

The General Agency for the British North American Colonies being established in Montreal, RISKS will be accepted by the General Agent and Temporary Policies at once granted.

The Local Board meet regularly at the Office, and by them the business of the Colonies conducted, thereby affording to the Assured every facility.

LOANS will be Granted, and LOSSES PAID, at the General Agency, without referring to London.

Pamphlets, Blanks, and all requisite information, may be had on application at the MONTREAL OFFICE, or to the AGENTS throughout the Province, through whom proposals for Assurance will be transmitted.

THE REFORM CLUB BANQUET TO LORD PALMERSTON.

This banquet was held on Saturday evening at the Reform Club-house, and passed off with all possible éclat, the whole scene being brilliant and exciting in the extreme. The dining-room only admitted of about two hundred living guests, and among these were Baronet Osborne, M.P., chairman, Lord Palmerston, Lord James Stuart, M.P., Lord Sudeley, Lord Ebrington, M.P., Right Hon. C. d'Eyncourt, M.P., Sir Charles Napier, Lord Marcus Hill, M.P., W. Jackson, M.P., Sir John Walmsley, M.P., W. Brown, M.P., Earl Yarborough, L. Heyworth, M.P., and J. A. Yates. After the usual preliminary toasts, the chairman proposed the health of Lord Palmerston, which was drunk with "all the honours."

Lord Palmerston was received with loud cheers, and every demonstration of enthusiasm. He said—When I think of the honourable and flattering reception I have met with from you this day; and when I think of the terms—so far exceeding anything which I feel conscious of deserving—in which my humble and gallant friend has been pleased to propose the toast, I am sensible of the truth of what you must have often heard, that it is far more easy to find arguments with which successfully to repel one's opponents than it is to find words adequately to express one's feelings and great kindness to one's friends. [Cheers.] It is said, indeed, that out of the fullness of the heart the mouth speaketh; but, my lords and gentlemen, the heart may be too full to allow the tongue its proper utterance. [The noble lord was here much affected.] Gentlemen, you have met here to-day not only to testify kind and friendly feelings to one individual; but you have met also, I apprehend, to record by a public demonstration your opinion as to great and leading principles of public policy. [Cheers.] I am entitled to infer that the principles of policy which have guided the Government, of which I have the honour to be a member, in their administration of the foreign relations of this country have been such generally speaking, in general terms, as you have thought deserving of your approbation. Those principles of policy may be described in a few words. The guiding object of the policy of the Government with regard to our foreign relations have been the interests of England [loud cheers]—interests which have their beginning in the well-being of every other country. In regard to this country it is needless for me to say that it ought to be the first object of those who have the charge of her foreign relations to maintain unimpaired its honour, its dignity, and its rights. It is also their duty to protect our fellow subjects in whatever foreign land they may be. [Vehement cheering.] We are eminently a traveling, an inquiring, a commercial nation. There is no part of the great ocean, which occupies so vast a portion of the globe, on whose bosom our ships and our merchandize are not found to float. There is no land, however distant or however near—however civilized or however barbarous—in which Englishmen are not found, for the purposes of recreation or of health, in the pursuit of science or of commerce, or in the nobler and higher avocation of shedding through the regions of darkness the light of the Christian faith. [Cheers.] I contend that these fellow-subjects of ours are entitled, wherever they may be, to think that they are under the guardianship of the watchful eye of this country [cheers], and to assume that England will either protect them from wrong, or, if wrong is done, that her power will obtain for them redress. [Cheers.] I have said that the interest of England is not only that we should ourselves participate in these objects, but also that we rejoice in the well-being of all other nations. The days are gone by, at least in this country, when men thought, when nations imagined, that their own prosperity was to be promoted by the adversity of their neighbours. [Cheers.] We glory in our own wealth—in [illegible] which we occupy. [Cheers.] [illegible] say, as those who have endeavoured to thwart our policy unanimously assert we say, that we ought to go like knights-errant of civilization to force our institutions upon other countries, to excite discontent, to encourage disturbances. Such is no part of the duty of the Government of England; but when we see nations endeavouring, in conjunction with their own Governments, to improve their constitutions—when we see nations, sensible of the evils under which they suffer, endeavouring rationally, temperately, and calmly to improve their condition, they deserve at least our sympathy [cheers;] and if other powers, with different impressions and views, should endeavour to interfere to prevent the development of liberty; my conviction is that the Government of England will always be supported and backed by the people of England in throwing their weight into the scale, and endeavouring thus to redress the balance. And I am persuaded, gentlemen, that this may often be done without endangering the continuance of peace. Do not imagine that we are less sensible than any other men in the country of the value and importance of peace. Don't imagine that we think lightly of the calamities of war—of the interruptions which war opposes to all improvements, social, political, and commercial. Do not imagine that we are insensible to those great reasons which ought to deter the Government of this country from involving, without absolute necessity, the people with whose destinies they are charged in all the miseries and calamities of war. [Cheers.] But do not let the people of this country imagine that every angry word which may fall from another Government is immediately to be followed by a blow. [Loud cheers and laughter.] Do not let the people of this country believe that every angry demonstration of dissatisfaction, whether diplomatic or otherwise (laughter and cheers,) that may come from a gentleman whose policy and views have been thwarted by the views and policy of England must inevitably lead to hostilities with this nation.—Anxious as the people of this country are—and so their honor be it spoken, I believe no people in the world are more anxious than they are to preserve peace and avoid war with any country whatever, yet, believe me, there is no other country which is not so disinclined—and that for the best of all reasons—to go to war with England as England can be to go to war with them. This consciousness of strength—this feeling of the national power, ought never to tempt the Government or the people of England to commit anything that is unjust or wrong; but it ought at least to bow us up in pursuing the cause of justice and honor, and induce us not lightly to give way to apprehensions founded on no real ground. [Loud cheers.] I feel that we may be proud, and reasonably proud, of the country in which we have the good fortune to be born. [Cheers.] It seems to me that this British nation is destined under Providence to bear an honourable part in promoting and maintaining the civilization of mankind. [Loud cheers.] It is from this hive that the swarm has proceeded—that living and active swarm which has covered with the works of its constructive industry the wilds or primeval forests of North America; there is no land, however remote, in which Englishmen have not introduced the arts of civilization and the blessings of Christianity; and here in this land, where we are at home, we feel proud to think that we hold out to the civilized nations of the world an example of internal organization, of amicable and progressive improvement, of apparent and conviction that in the improvement and reform of our ancient institutions you give them strength, and do not overthrow or destroy them—may that this country hold out to those different nations of the world an example worthy of the imitation of every statesman, and worthy also of the admiration of the wisest philosophers. Gentlemen, I again thank you most heartily for the generous reception which you have conferred upon me, but I beg to assure you, though my words fall far short of my feelings, and infinitely below the very distinguished distinction I have received at your hands, that the recollection of this day will be impressed on my memory to

the latest hour of my existence, and that if in any portion of my public life I shall feel hesitation or doubt, the recollection not only of the kindness which you have exhibited to me this day, but of the handsome and generous support which I have received—(loud cheers)—the recollection of the handsome and generous support which I have received from your hands in moments of great personal and official difficulty—(loud cheers)—will encourage me and support me in the discharge of my duty; and this you may depend on, that so long as this country has the good fortune to be represented by such men as I see around me, and so long as the people of this country are animated by the generous and patriotic feelings which have led you here to-day, there is no danger that any Government of England will shrink from the performance of their duty, and there never can be fear for the fortunes of our country. (The noble lord resumed his seat amid enthusiastic cheering.)

The health of her Majesty's Ministers was then given by Lord James Stuart, M.P. Lord John Russell being absent from indisposition, the honour was acknowledged by the Attorney-General. "The members of the House of Commons who supported Mr. Roebuck's motion," was spoken to by the Solicitor General, and a sentiment applied to the House of Lords by Lord Canoys. "Civil and Religious Liberty," connected with the name of Baron Rothschild, was drunk and acknowledged, after which Lord Palmerston gave the health of the chairman. After drinking the health of Lady Palmerston, the company separated.

"The Clear Grits, having dropped Mr. Baldwin and Mr. Price, they bawl for Marshall S. Bidwell and Dr. Rolph. The latter returned some time ago to the country; the former has not yet come back; but that there is surprise and disappointment in the Clear Grits to find that their future leader should be invested with some degree of calm, and, therefore, by they promulgate, that the Government should not be willing to receive Bidwell back.

"Mr. W. L. Mackenzie would have answered their purpose sufficiently well; but that they are Annexationists at heart, and Mr. Mackenzie having lost great personal experience of the United States Government, has declared himself openly against the scheme, and, to do him justice, he is an honest man."—*Montreal Gazette, 13th instant.*

Our contemporary must hold but a contemptible opinion of the Clear Grit party, when he imputes their coolness towards Mr. W. L. Mackenzie to his presumed opposition to Annexation; and we have yet to learn that that person has earned for himself, either here or in the United States, the reputation of "an honest man," though our contemporary vouches for the fact. Mr. W. L. Mackenzie has written bitterly against the United States since the Annexation movement in Canada commenced; and it is a toss up, whether his animosity is assumed in order to qualify him self for office, or be the fruit of an old grudge he owes the Republicans for the well-merited castigation he suffered at their hands for his treachery towards Jesse Hoyt. Marshall S. Bidwell is a gentleman and a man of honor, and, as such, would spurn an alliance with the "honest man" of our contemporary.

Coldness and rickery on the part of the Cabinet—such open plunder of the public purse by the disciples of the Hincks and Drummond School—such violations of the executive faith, and such flagrant acts of injustice, of which Mr. Stanton's name furnishes a memorable example—that we are quite prepared to learn that William Lyon Mackenzie has become a Cabinet Minister. The demoralising influence of a profligate executive must have penetrated the very core of society, when we find a journal, once so chary of its good name, guaranteeing an honesty suspected on both sides of the Line.

Whether it be owing to the superior qualifications of President Fillmore, consequent upon his long training in Civil legislation, or that the political gladiators in the Congress have wearied of the profitless combats which they have for months prolonged, the last mails from Washington have borne testimony to a facility of settling the vexed questions connected so intimately with Slavery, which is as satisfactory as it has been unexpected. Nearly all the points upon which the opposing Northern and Southern sections of the Confederation were at issue, are either solved, or in process of solution. Utah has been admitted unsullied with reproach of prolonging human servitude; Texas, which vapoured and menaced the peace of the South, has succumbed in the face of the calm resolves of the President. She no longer asserts a territorial jurisdiction over New Mexico; she consents to a limitation of her boundaries, and pockets ten millions of dollars for her imaginary loss of soil. There yet remain New Mexico and California; but respecting their fate all apprehension has ceased, and we may take it for granted that the strongest positions of the enemy having been carried, future legislation regarding the admission of these territories into the Union, becomes mere matter of detail. From the first blush of the campaign, and throughout the shifting and varying scenes which waited upon the debates, even when members of Congress were marked as arming for a physical vindication of their political opinions on the floor of the House, we never wavered in our conviction that the calm, solid sense, and high intellectual qualities of Northern minds, would carry the Republic in safety through the storm and struggle. President Fillmore, during his brief occupation of office, has witnessed the dispersion of the clouds which hovered so ominously over the country, closing prematurely in gloom the life of the distinguished soldier who preceded him. He has passed triumphantly over the rocks and shoals which lurked around the vessel of State, and led the last Cabinet to the brink of despair; and whether he be indebted for his good fortune to the astuteness of his policy, or the prestige of his reputation as a Statesman, he may be counted amongst the list of the lucky Rulers in the Republic. The foreign policy of the United States is on the eve of a fresh trial of diplomacy—perhaps an appeal to arms. The Portuguese dispute has become complicated and obstinate, and the national honor has become involved in the issue; but Webster is a tower of strength in the time of trouble, and his voice in the Cabinet is again potent.

The Executive nominations to superintend the Industrial Exhibition are not satisfactory. Gentlemen, who have contributed nothing are foisted upon the list—they cover the minor, because it costs them nothing, and the shadow of a knighthood flits in the dim note. According to our political creed, the Executive ought to have no place in the nomination. The contributors to the general facilities are those who should, in common fairness, confer the post of honor. What would be thought of the Executive usurping the privilege the Stockholders of the Montreal Bank enjoy in the election of a President. The confidence of the people is rarely misplaced. The Executive is always swayed by intrigue and noisy brawlers, stepping in, while unpretending merit is of no political value.

St. Johns Railway.

We believe we may state, that the Laprairie and St. Johns Railway have so far proceeded in their extension project—that the contract for the work has been signed. The Company have adopted a timely precaution in looking towards Rouse's Point for future traffic, at least we presume that they are not insensible to the importance of carrying their extension in that direction.—The Caughnawaga controversy is in full vigor, but none of the writers seem to remember that mid-winter in Canada involves a total cessation of trade. The American travellers are all housed during winter, and none move about, except from necessity—how then is the risky steam-boat-ferry to be supported?

We understand that an American gentleman, a resident of Louisiana, attracted by the beauty of Montlandin, made a proposition to the proprietor to purchase the place, offering some $20,000. The salubrity of our Lower Canadian climate, its freedom from endemic disease, and its coolness, during the Summer months, as compared with the United States, must render it attractive to the opulent American families.

The Wheat crops in this District are superior to anything we have had for years; they look luxuriant and abundant. The potato stalks show symptoms of discoloration, but the tubers are, as yet, safe. Hay has been selling as low as $3 per 1,800 lbs.—new crop.

Grand Operatic Concert.—Mademoiselle Euphrasie Borghese gives a Grand Operatic Concert at the Theatre Royal this evening, in conjunction, assisted by the celebrated German Pianist, Mr. Charles Wells. The Programme includes some very choice pieces, never before presented to a Montreal audience.

CANADIAN AFFAIRS.

(FROM OUR OWN CORRESPONDENT.)

Toronto, August 13, 1850.

On Saturday afternoon the Buffalo visitors left us, amidst the mutual regrets of both parties, in the interchange of national courtesies. They were certainly lionized during their stay; and, could they have remained till Monday, they would have visited the Theatre on Saturday night. Indeed nothing was omitted for their entertainment and gratification. A steamer was chartered to bring them; quarters were provided for them at the hotels, principally at the North American; a new building, unfinished in the interior, had to be fitted up for the ball at great cost; then there was a special review of the 71st regiment; next, Lord Elgin's rustic entertainment, which cost him £600 or £700; at the Parliament built in the Legislative Council Chamber. The assenting to Bills, by the bye, was a very tedious process. There was a fearful pile on the table; 107, if I count them rightly. The ceremony of "assenting" is not only taciturn on the part of the Governor-General, but he remains perfectly motionless, giving no recognition of assent whatever. His Excellency sat like a statue on the Throne. The Clerk took up the Bills, one by one, and prefaced the reading of the title by saying: "Bill passed by the Legislative Council and Assembly of this Province." He then handed it to the Speaker, who, holding it up in his right hand, bowed to His Excellency—who, as I have already stated, made no sign of recognition—saying: "In Her Majesty's name, His Excellency the Governor-General doth assent to this Bill." What the Americans thought of this Royal mode of assenting, of course they would hardly like to say at that particular moment, and under the circumstances. The proceeds of the ball will fall very far short of defraying the expense of the whole affair. From a rough calculation, I think the deficit cannot be less than £600 or £700. But the effects of this visit will be valuable above all pecuniary considerations. A kindly feeling will be created—has been created—between the two cities, which will extend in some measure to the furthest bounds of both countries.

I learn, from a reliable source, that the Government has in hand at this time £393,000. With the command of such an amount of spare cash, it is not surprising that they could see no particular necessity for Retrenchment. A too large revenue never fails to foster extravagance in a Government; and, on this account, it was unfortunate for the country that the Tariff of 1849 was adopted.

There is a rumor this morning that Lord Elgin is going Home this Fall. It comes from a source that causes me to look upon it as entitled to some credit. I have never placed confidence in rumors of this kind before, as at last they had nothing better than probability to support them. In the present instance, however, I have traced the rumor to a source that ought to be well informed on the subject.

Hincks is looking shead. He has accepted the appointment of Chairman to the University Endowment Commission. The office is to be a paid one, and I suppose the salary will not be less than £500 a year. To perform the duties properly, it will require the whole time of the Chairman, who is the working man of the Board. So that, in prospect of a political reverse, this appointment is not altogether despicable. If Mr. Hincks does not, as soon as other engagements shall permit, intend to apply himself to the duties of his new office, the appointment ought not to have been made; and it would be difficult to conceive a reason for its having been either offered or accepted. We may, therefore, reasonably conclude, that Mr. Hincks fully realises the possibility of a not very distant contingency, that shall remove him from the arena of politics.

On the last day of the Session, several Ministerial Members, who see the necessity of looking to their seats, or the close of their assured Parliamentary career drawn nigh, addressed a letter to Mr. Baldwin, representing the ungenial course the Administration has pursued, and how they, by supporting the policy, have done much to sacrifice their popularity with their constituents. They also intimate, that, unless a different course be taken, they will be obliged to come out in opposition next Session. Of the Members who joined in this note, I have heard the names of Ferguson, Burritt, Bell, Hall, and Johnson. Bell, I am aware, has very good reason for doing something to conciliate his constituents, whose confidence his obsequious conduct has entirely forfeited. The secret of the matter is, that he got his brother the Registrar of the County, and a Post Office for another, as in duty bound, he therefore sups the Ministry a little thick and thin ever since. He now turns round upon his patrons with a very bad grace. His case is but a sample of a large class; the ingratitude on his part may perhaps be somewhat exceptional. The threatened secession of several Members of the Ministerial party in a body, is an event which no Minister can afford to treat with indifference, and which, in this case, is proof of the unpopularity of the Ministerial policy in the country.

A dreadful occurrence took place here on Saturday. The Rev. A. H. Rose, an Episcopal clergyman, cut his throat with his razor in his room at the Wellington Hotel. He was addicted to drink, and is supposed to have committed the rash act in a fit of *delirium tremens*. He came to Canada in 1846; occasionally preached in the Cathedral in this city, and at other places; wrote a work entitled *The Churchman in Canada*, the copyright of which he sold to a London publisher for £500. He had gone to Cincinnatti, where he had resided for some time, and had got a Church. He had returned here on a visit, I believe, where he had been about a week. He was a Scotchman by birth, and was well connected in England. The Editor of the *Foreign Quarterly Review* is a cousin of the unfortunate suicide; and I am not certain if Mr. Rose had not at one time the temporary conduct of the *Quarterly*, to which I know he was a contributor, as well as to *Bentley's Miscellany*. According to the verdict of the Coroner's Jury, the unfortunate man committed suicide in a fit of temporary insanity. X.

Some weeks since, we copied from a Trinidad paper, a statement that the governor of that colony, Lord Harris, had received orders to come Home to Canada, to replace His Excellency the Earl of Elgin, as Governor General of these Provinces. This news has received a confirmation, we are informed, by the reception of a letter by a gentleman of this city, to the effect that Lord Harris is actually engaged Elmsley Villa from the proprietor, now in England, as a residence, and that he may be expect d here in a very short period.—*Patriot.*

The report of Lord Elgin's recall, and of Lord Harris succeeding him, has been resumed on the authority of private letters from England. His Excellency, in the mean time, is about to take a trip up the Lakes, as far as Manitoulin and the Sault, in H. M.'s Iron Steamer *Mohawk*, Capt. Herbert, just come up for the purpose, from Kingston, and now waiting orders in our harbour. It is also said, that Her Excellency the Countess of Elgin and Kinnaird and family, are about to proceed, for the remainder of the season, to Staten Island, for change of air.—*Colonist.*

We learn from good authority that several spurious Bills (5s.) on the Bank of Montreal have been circulating in this region within a few days. These Bills are dated Wm. Lunn, President, Thomas Holmes, Cashier. Let all beware. It is seldom we find counterfeits in Upper Canada, but when they do occur, the friends of fair play must be on the watch.—*Oshawa Reformer.*

A Coroner's inquest was held in Hamilton, the other day, on the body of a man of the name of George Stewart, who came by his death in consequence of having a quantity of Lobelia, or Indian Tobacco, administered to him by a black man named Davies, an herb doctor. In accordance with the verdict of the Jury, the fellow was committed for manslaughter.

A Strange Metamorphosis.—Barnum, whose peculiar abilities as a curiosity hunter has gained for him a world-wide notoriety, has procured one of the strangest cases of metamorphosis ever presented for public exhibition. It is that of a colored man, who is undergoing a complete change of color, produced, according to his own statement, by the outward application of the juice extracted from a weed, the name of which he will not disclose. It appears that, while a Slave in the South, he discovered this weed, and, on further investigation, found that it possessed the peculiar property of completely changing the color of his skin from black to white.

When applied to any part of the body, it causes much pain, and gives the flesh a scaly appearance; so says the man himself. His arms, legs, and portions of his face and neck, are of a pure, natural white, presenting no perceptible difference in appearance to the skin of a white man. He will not reveal the name of his master, or what part of the South he made his escape from, alleging, as a reason, that he is liable, if discovered, to be retaken and carried back into slavery. The story he tells of himself is strange, and, if true, should receive the attention of the scientific. He expects to be completely changed in color in the course of a year.—*N. Y. Evening Post.*

France.

The violent attack of the *Moniteur du Soir* upon the National Assembly was disavowed on the 27th ult., in a manner so formal, emphatic, and distinct, by M. Baroche, in the name of the whole cabinet, that the house, after being irritated to an extreme pitch against the government, allowed itself to be suddenly disarmed of its anger, and pardoned the ministers by passing to the order of the day. The result of this memorable sitting cannot be considered final; for peace is never the result of reciprocal humiliation. The executive power was humbled by the suppliant attitude of Baroche, as soon as he found that neither silence nor defiance would be stonewalled. The Assembly is humbled by the impunity of an insolent attack in a journal under the official patronage of the Government.

No sooner had that journal received intelligence of the indulgence extended to its offence, than it addressed the power which forbore to crush it in these words:—"Your criminal alliance, your insensate outrages are the surest of support for in favor of Louis Napoleon Bonaparte. You think to injure his popularity by your attacks and calumnies. Blind men! Your systematic hostility would be quite enough to range the people on his side, if they were not there already. You wish to prevent Louis Napoleon Bonaparte from becoming Emperor! Your insane acts would crown him, if he became so." Such is the language of the *Moniteur du Soir* of last night, after the universal reprobation which the articles read by M. Dupont de Brisse drew yesterday from the house. The nuisance complained of becomes more offensive than ever. The exclusive privilege of sale is granted by the Cabinet to a newspaper which systematically insults the supreme source of authority, while the whole liberal press is interdicted on them.

Such was the sensation produced on the 26th ult., by the first speech of Baroche, in which he refused to interdict the *Moniteur du Soir* from street sale, that several foreign envoys sent off immediately special couriers to notify to their governments the official declaration of war between the executive and legislature.

On the 27th ult., the Assembly entered upon the discussion of the budget of war. The only incident which deserves mention arose upon a motion by M. Charras for the reduction of the pay of General Changarnier, as Commander-in-Chief of the army of Paris. The money said the Commander-in-chief had been provided with a higher position than that of the minister of War. He alluded to the continual disputes which were arising between General Changarnier and General d'Hautpoul. He quoted an order of the day read to the army of Paris by the orders of General Changarnier, from which it appeared that a colonel had been put under arrest for having sent directly to the Minister of war some information which had been demanded of him, without transmitting it through the channel of the Commander-in-Chief. General de Hautpoul opposed the reduction amid the applause of the Right. He said that he knew his duties as minister, and felt satisfied that General Changarnier was equally aware of those which belonged to his position. The reduction was rejected.

The commission nominated by the Minister of Commerce to examine the question of the herring fishery in the Northern Sea has decided that a subcommission, consisting of some of its members, shall proceed to the coasts of England and Scotland, to ascertain whether French fishing-boats can or cannot fish for herrings. The French fishermen pretend that herrings are only to be found within three miles of the coast, which the limit fixed by English legislation by a treaty with France. On its return the sub-commission will visit the ports of Calais, Boulogne, Dieppe, St. Valery, and Fécamp, to collect information.

The papers are filled with polemical discussions on the incident of the stormy sitting at Fredgy. The *Assemblée National* has greatly abated of its hostile tone against the President. It seems to be agreed among the moderate that some allowance was to be made for the press of the Elysée in the face of the composition of the committee of permanence. On the other hand, the opposition press, in Hinist a d'dom Gratie, open a sharper fire on the Elysée ys.

On the 26th ult., the budget of war was voted in a calm sitting. The figure assigned to this department form the most considerable charge on the resources of the state, and amounts to 307 millions. With this sum an army of 374,000 men and 82,000 horses may be maintained.

Prussia.

A correspondent of the *Daily News*, in a communication dated Berlin, 27th July, states that the Prussian envoy has been recalled from Vienna.—It was stated that at a cabinet council, held on the 20th, the Minister of War proposed to place the army on a war footing, but that the expense of 30,000,000 florins involved in that measure was considered unavoidable. Preparations are made for bringing the army on a war footing within ten days. It seems positive that two army corps are to be directed towards Krewznach and Wetzler, and that a third will occupy the environs of Erfurt. The Customs Congress cannot agree upon the proposed alterations in the tariff of the customs union.

SHIPPING INTELLIGENCE.

Captain Phillips, of the ship Ellen, arrived this morning, reports that the Light at Point des Monts, was not lighted on the night of the 7th instant.

St John's (Nfld.) 27th July.—Cleared for Quebec—Sylph, Le Boutillier.

Halifax, August 1st.—Cleared—Schrs Sta Croix, Fourchette, Bergeron; Sat—Maria, Mercier; Marie Anne, Heine, Hussen; all for Quebec, and to sail.

Liverpool.—A correspondent writing from on board the steamer Pacific, during her last passage to Liverpool, says:—"The weather during the entire voyage has been fine, and we have generally been on deck the greater part of each day. For about two days, while on the banks and off the coasts of Nova Scotia and Newfoundland, the weather was cool enough for overcoats.

"In this neighborhood, we saw several icebergs, some of them a few miles distance. One of these was supposed to be from 600 to 800 feet high, with a surface of 200 acres. Supposing the altitude above the level of the water to be 700 feet, it would be 2,800 feet thick under water, according to the usual estimate; or 3,500 feet thick in all. In the neighborhood of this I counted twenty-four others of various dimensions. The mercury in the thermometer fell to 40 degrees, but gradually rose as we approached the middle of the Atlantic."—(*Mercury.*)

Wrecks.—During the thick fog and high wind on Monday night, 29th ult., the bark Alice Bentley, Capt. Steel, from Liverpool, for this port, with a general cargo of merchandise, refined at £19,000, struck on the Mare Ledges, near Grand Manan. The master and crew took to the boats, saving nothing but what they had on, and report the vessel to have sunk in deep water. They were picked up in the Bay on Tuesday, by the Steamer Maid of Erin, and brought to this port. The Alice Bentley was a new vessel of 320 tons, of her first voyage, and was owned by Mr. N. S Demill, of this City. We regret to add that she was not fully insured. The wreck was advertised to be sold in this City on Friday; but in consequence of a report that it had been a wreck, the sale was postponed until further particulars could be ascertained. You think to

The Bark Selina, Captain Calibourne, sailed from Dundee, for this port, in ballast, consigned to Messrs. L. Richards & Co., got ashore on Monday near the Southern Head of Grand Manan, and became a wreck. One of the boats got more on the rocks, but the crew succeeded in saving their lives in the other, and reached Eastport, on Tuesday, whence they came on to this port by the Maid of Erin.—(St. John's (N. B.) Observer.)

A Ship Struck and Damaged by Lightning.—A serious accident has occurred to an emigrant ship off the Edystone Lighthouse, by lightning. The vessel was a Norwegian hack, with 300 passengers, bound to Quebec. She encountered a fearful storm of lightning and thunder, in the course of which the electric fluid struck the mainmast, splintering it into fragments, and knocking down several of the crew who were on deck. Many of them were most seriously injured. The vessel immediately put into Falmouth to make good the damage.

MARRIED.

INFORMATION FOR THE PUBLIC.

The subscriber begs leave respectfully to submit to his friends and the public at large, the following facts, confirmatory of the value of the PLANTAGENET WATER, not only as an alterative, but for its immediate and sensible operation in the improvement and ultimate restoration of health to invalids generally.

T. S. P. McDonald, Esq., from Toronto, had been in a low state of health for the last seven years, so much so as to be incapable of pursuing any useful or profitable occupation. He recently visited the neighborhood of the *Plantagenet Springs*, so as to use daily the water of the same. At the expiration of twenty-one days, he left the Springs, so greatly renewed in health and spirits, that he attended at a party of friends the evening before he left the neighborhood, and danced during the entertainment—actually danced fourteen jigs.

He would further state another remarkable instance of the value and efficacy of these celebrated Waters:—

Mr. D. Fraser, in the employment of Peter Coburn, Esq., from the County of Stormont, of which the Hon. A. McDonald is at present a Representative in Parliament, came recently to the *Plantagenet Springs*, so much reduced in health, that it was with great difficulty he was enabled to walk or use his limbs with ease or comfort. He remained about sixteen days, drinking each day freely of the Water, and recovered his health so rapidly, that his mind and body appeared to assume new functions of health and vigor. He returned home in most excellent health.

The subscriber, in making known these circumstances, desires to offer to the public no exaggerated details or fulsome representations—they are given as facts, which cannot be contradicted, and will speak for themselves with a testimony which will prove satisfactory to every unprejudiced and sensible mind.

He has still another remarkable case to report, as follows:—

The child of Mr. R. J. Fowler, Professor of Music, residing at No. 69, Craig Street, Montreal, had been suffering severely from an attack of the usual summer complaint, attendant on Teething. The infant became greatly reduced by the severity of the disease, so well as the influence of the heat of the weather; and great fears were entertained as to its recovery. The parents were induced by the suggestions of a friend, to resort to the use of the *Plantagenet Water*, and knowing that their family physician, Dr. McCulloch, had favourably recommended the use of this Water in many cases, they consented to make use of the same, and they believe it was the means of restoring their child to such an improvement of health, as to afford a hope for its ultimate recovery. The above circumstances will, no doubt, prove interesting to those families or individuals who are suffering from diseases incident to infants, and the season of unripe and unwholesome fruits and vegetables.

LUXURIANT HAIR.

Bogle's Hyperion Fluid.—One bottle of this truly valuable liquid is worth more than its weight in gold. There is no quackery in its composition; but healthy and efficacious ingredients, calculated to effect all that it promises, namely, to strengthen at once the root, and a luxuriant growth of hair take its place. Gray hair will return to its pristine brilliancy—weak hair become strongand vigorous, and the skin take a proper and healthy action by the use of the inestimable Hyperion—as an article for giving softness to the hair, as a brilliant gloss, it cannot by any compound be equalled.

The following is from the *New York Evening Mirror*, May 25, 1849:—

"WISTAR'S BALSAM OF WILD CHERRY.—Among all the Pulmonary advertised for the cure of human ailments, there is none in which we have more confidence than 'Wistar's Balsam of Wild Cherry.' We regard it as one of Nature's own preparations—simple, safe, pleasant to take, and almost certain to cure all bilious and pulmonary affections. We have witnessed its wonderful effects in cases that were regarded as hopelessly desperate, and we can conscientiously recommend it as one of the best medicines in the world."

The following is from a very respectable source:—

Boston, November 27, 1849.

Mr. S. W. Fowle—Dear Sir,—Although averse to having my name public in the newspapers, I think this unsolicited testimonial, and you are at liberty to make use of it as you may please. In the Fall of 1847, I took a violent cold, which brought on a severe cough that lasted through the Winter and Spring, and caused me to raise blood and phlegm continually, day and night, which greatly reduced me in flesh and strength; I tried several kinds of medicine, with little or no effect; I had become feeble and emaciated, and began to despair of ever getting relief; when, by advice of my friends, I was induced to try Dr. Wistar's Wild Cherry Balsam; and after having taken five bottles, I found myself nearly, or quite well; and to this alone I think I owe present existence. I shall be happy to give further information to any one who will call on me.

Respectfully yours,

£100 REWARD.

WHEREAS some malicious person or persons have circulated a REPORT that SEVERAL BURNED CHESTS OF DAMAGED TEAS, had in their cooling, and (from the effects of salt water) poisonous in their nature, lately sold in the City, were purchased by me, I hereby offer a REWARD of £100 to any person who will bring to conviction the author or authors of such a slander, as such report is false, malicious, unmeasurable, and intended to injure my reputation.

It is well known that I and I alone have been the management of the Tea and Coffee Trade in Canada, that mine (the Canton House) is the only establishment for the exclusive sale of Tea and Coffee in either the Upper or Lower Province, and, by my sterling exertions, has been raised to the position which it now holds, which, notwithstanding the immense amount of malicious opposition I had to encounter. It is also well known that I have never interfered with others; that I have never supposed the knowledge of the mere humability of keeping Tea in a proper condition, when immaculate, sufficient, and sugar, molasses, candles, soap, tobacco, &c., &c., are kept; but when my good name is so cruelly and wantonly attacked, as in the present instance, I think it only just to myself, that should this calumnious slander be promulged in the Public, may have a list of the names of the purchasers of the Damaged Tea, above referred to, which is now in my possession, as I agree to pay the small spite which prompted such a malicious report, myself.

IMPORTANT TO THE PUBLIC.

JOHN McCLOSKY,
SILK AND WOOLLEN DYER AND CLOTHES CLEANER,
(From Belfast.)

No. 32, St. Louis Street, near Donegana' Hotel, BEGS to return his best thanks to the Public of Montreal, for the kind manner in which they have patronized him for the last four years, and now returns a continuance of the same. He will warrant to his Trade as formerly, in all its branches, viz.:—Dying all kinds of Silks, Satins, Crapes, Woollens, &c.; as also, Scouring all kinds of Silk and Woollen Shawls, Moreens Window Curtains, Satins, Silks, &c., Dyed and Watered, &c. He has at a great expense, procured a new Watering Machine for Watering Silks, Shepherds Tartans, and others, who may require anything done in the above line, will find it greatly to their advantage to call on him. He also engages to renew the colour of all sorts of Woollen Clothes that has lost them, and to make such as Tar, Paint, Oil, Grease, Iron Mould, Wine Stains, &c., carefully extracted.

N. B.—As many of my customers are of opinion that I have opened another Establishment in Notre Dame Street, I wish to correct the mistake, by informing them that I have neither to do with any place but the above, and that I have leased the same for six years from the 1st May. 12

Montreal, November 8, 1849.

GREAT ENGLISH REMEDY!!!—THE MOST VALUABLE SPRING AND SUMMER MEDICINE IN THE WORLD!

HALSEY'S FOREST WINE!

Patronized by the Nobility and Medical Faculty of England, and considered the most efficacious of all the Medicines of the Age.

MEDICINES containing Mixtures of Liquors, like the herbal Sarsaparillas, require many large bottles to prove to the slightest change in health. The Forest Wine is altogether a different article. It can take no System to give it consistency, chemical qualities from the vegetable plants of which it is composed. The Forest Wine depends for its virtues of the

WILD CHERRY, DANDELION, YellowDOCK, and SARSAPARILLA,

With other valuable Plants whose properties are well known.

Its high concentration renders it one of the most powerful medicines now in use. Less than a single bottle relieves the lingering Patient from a long standing, & hilly and sickness, to strong and vigorous health. Every dose shows its good effects on the constitution, and improves the state of the health. The Forest Wine is recommended in the strongest terms, for all complaints of the

STOMACH, LIVER, KIDNEYS, NERVOUS DISORDERS, BILIOUS AFFECTIONS, DROPSY, DYSPEPSIA, LOSS OF APPETITE, JAUNDICE, FEMALE COMPLAINTS, SCROFULA, AND ALL DISEASES ARISING FROM BAD BLOOD AND IMPURE HABIT OF THE SYSTEM.

SAVED FROM DEATH!!!

Wm. Ayer of Mr. Nathan Mathews, a Highly respectable and wealthy citizen of Newark, N. J.

Dr. G. W. Halsey:—I believe your Forest Wine and Pills have been the means of saving my life. When I commenced taking them, I was at the point of death, with Dropsy, Piles, and Asthma. My Physicians had given me over as past cure, and my family had lost all hope of my recovery. While in this dreadful situation, your Forest Wine and Pills were procured for me, and before I has finished the first bottle of the Wine, and box of Pills, I experienced great relief, my body and limbs, which grew greatly swollen, became sensibly reduced, hope sprung up, and recovery now seemed possible. I persisted in continuing the use of your medicines, and in a month, the Dropsy, with which my life was placed in such great danger, was also nearly gone. I have continued the use of your Medicines until the present time, and I now enjoy as perfect health as ever I did in my life, although I am more than sixty years of age.

I ascribe my recovery entirely to the use of your excellent Medicines. Several of my neighbors have also cured them with similar success in obtaining complaints, and I can cheerfully recommend them to the public.

Yours, respectfully, N. MATHEWS.

Newark, Dec. 19, 1847.

GREAT CURE OF LIVER COMPLAINT OF TEN YEARS STANDING!

New York, Jan. 9, 1848.

Dr. Halsey—Dear Sir:—Having taken your Forest Wine and Pills to remove a disease of the Liver, from which I have suffered severely for upwards of ten years; and, having adhered strictly to the directions which accompany the Medicines, I have recovered my health; and, in justice, feel it my duty to make this known as the best means I have found effectual in curing this obstinate and incurable complaint. I have recommended your Medicines to many who have given their testimony to the efficacy of your Medicines in cases of Liver Complaint, Dyspepsia, and Nervous Debility, which, I trust, will be sufficient to induce others to make trial of them.

Yours, &c., JAMES WILSON.

Dr. David Merritt, celebrated Practitioner of New York, declared publicly, that one bottle of Halsey's Forest Wine contained more virtues in the shape of the large quantities of Sarsaparilla Mixtures, &c. Lorenzo Co., Agent for Montreal, & R. Lymman & Co., Toronto, in Syrupus, in a letter, says: "Your Forest Wine they have heard and seen of H.'s Forest Wine, it is an excellent and good Medicine, and will, undoubtedly, become the leading Medicine of the day." Dr. Mott, of New York, also subscribes to the virtues of Halsey's Forest Wine, by recommending it to many of his patients.

Eleven hundred Certificates from Physicians, Clergymen and individuals of known respectability, have been given, testifying to the great curative powers of Dr. Halsey's Forest Wine and Pills, by which my life was placed in such great danger, was also nearly gone. I have continued the use of your Medicines until the present time, and I now enjoy as perfect health as ever I did in my life, although I am more than sixty years of age.

I ascribe my recovery entirely to the use of your excellent Medicines. Several of my neighbors have also cured them with similar success in obtaining complaints, and I can cheerfully recommend them to the public.

Yours, respectfully, N. MATHEWS.

Newark, Dec. 19, 1847.

GREAT CURE OF LIVER COMPLAINT OF TEN YEARS STANDING!

New York, Jan. 9, 1848.

Dr. Halsey—Dear Sir:—Having taken your Forest Wine and Pills to remove a disease of the Liver, from which I have suffered severely for upwards of ten years; and, having adhered strictly to the directions which accompany the Medicines, I have recovered my health; and, in justice, feel it my duty to make this known as the best means I have found effectual in curing this obstinate and incurable. Previous to taking the Wine and Pills, I had recourse to the best medical treatment, but continued to grow worse to an alarming degree. Some of my friends spoke despairingly of my case, and tried to persuade me from making use of any more medicine; and, I doubt not, but what there are numbers who are deterred from taking your excellent Medicines, in consequence of the deception practised upon them by many advertised remedies put forth by unprincipled men, in flaming advertisements. But, what a pity it is that the deception used by others should be the means of disappointing many labouring under disease, from making trial and being cured by your excellent remedies. Humanity speaking, they have saved my life; when I cannot making use of them. I was in a wretched condition, but began to experience the effects from the first dose, from three days; and, in six weeks from the time I purchased the Medicines, to the great surprise of all my friends, I was entirely cured, and had increased fifteen pounds in weight, having taken one bottle of Pills and two bottles of the Wine. Hoping that this may induce many suffering as I did, to avail themselves of the same remedies!

Yours, &c., JAMES WILSON.

Dr. David Merritt, celebrated Practitioner of New York, declared publicly, that one bottle of Halsey's Forest Wine contained more virtues in the shape of the large quantities of Sarsaparilla Mixtures, &c. Lorenzo Co., Agent for Montreal, & R. Lymman & Co., Toronto, in Syrupus, in a letter, says: "Your Forest Wine they have heard and seen of H.'s Forest Wine, it is an excellent and good Medicine, and will, undoubtedly, become the leading Medicine of the day." Dr. Mott, of New York, also subscribes to the virtues of Halsey's Forest Wine, by recommending it to many of his patients.

Eleven hundred Certificates from Physicians, Clergymen and individuals of known respectability, have been given, testifying to the great curative powers of Dr. Halsey's Forest Wine and Pills, by which my life was placed in such great danger, was also nearly gone. I have continued the use of your Medicines until the present time, and I now enjoy as perfect health as ever I did in my life, although I am more than sixty years of age.

I ascribe my recovery entirely to the use of your excellent Medicines. Several of my neighbors have also cured them with similar success in obtaining complaints, and I can cheerfully recommend them to the public.

Yours, respectfully, N. MATHEWS.

Agents for Montreal:—Dr. Picault, 38, Notre Dame Street, corner of Bonsecours Street; Benjamin Workman, Apothecary, corner of St. Paul and William Streets; Custom House Square; O. LaLiberte, Quebec; Kennan & Co., Toronto; Mr. Whitehead, corner of St. Catherine and Visitation Streets.

The Proprietors have their Depot established at No 6, Jacques Cartier Place, next door to the Hotel of Signor Giraldi, Esq. The distance for conveying the Waters to the Depot is so trifling, that we are enabled to have a constant supply (fresh) and are consequently in possession of a better market than any other place. Price, 7½d. per gallon, and 25. per dozen, (4 bottles.) Sick persons, unable to pay for it, can have some given, by producing a certificate from their Physician, since we are unwilling that any should be deprived of these healing and wonderful Waters, prepared by Providence for his creatures, which are apparently designed for the alleviation and cure of many miserable complaints.

IMPORTANT TESTIMONIALS.

Copy of a letter from "COLONEL HAWKER," (the well known Author on "GUNS & SHOOTING,") Longridge House, near Winchester, Hants, 1st May, 1846.

Sir,—I deem it my bounden duty to bear testimony to the efficacy of your LOZENGES. I had a most severe cough, which I had tried all means and been prescribed for in vain, and yet I got completely rid of it by taking about half a small box of your lozenges, which I find are the only ones that relieve the cough without derranging the stomach or digestive organs.

I am, Sir, your humble servant, P. HAWKER.

ANOTHER INSTANCE OF THE GOOD EFFECTS OF KEATING'S COUGH LOZENGES UPWARDS OF TWENTY-ONE YEARS STANDING.

Liverpool, 6, Salt House, Jan. 29, 1840.

Mr. Dear Sir,—I have great pleasure in informing you that my wife has received great benefit from the use of Keating's Cough Lozenges, you remember her a short time since. Previous to this she was troubled with a severe cough and pain in her side, which would not yield to any other medicine, but your Lozenges have done her wonders.

With respect, believe me, Yours faithfully, THOS. MAYOR.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES.

Glasgow, 12th January, 1847.

Sir,—I have great pleasure in bearing testimony to the great good your excellent COUGH LOZENGES have done me. In January last I caught a severe cold from riding for my life, and quite took away my voice so that I could not speak above a whisper from that time until December last. I tried all kinds of medicine but found no benefit. I at last tried your Lozenges, which I found to be the only thing that relieved me. I shall be happy to recommend them to my friends; but believe I need scarcely add, that I shall ever be your great friend, since you have restored my voice.

I am, Sir, your's gratefully, JAMES MARTIN.

MINERAL WATERS
OF
POISY BY AIX, FRENCH REPUBLIC OF HAUTE-SAVOIE.

THESE truly valuable WATERS are daily gaining in the most rapid manner, the confidence and esteem of the most eminent Physicians and invalids they have cured, are acknowledged superior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold or hot, and are in the most expressive heat to the greatest degree in the most expressive heat of Summer, and that without altering or affecting injuriously the health of the patient; but, on the contrary, they are well fitted to improve and strengthen. The great number of cures effected by the use of the above Waters, enable us to recommend them to the public as an excellent remedy in a very great number of cases. The names of a few only of the persons of celebrity, who have given their written testimonials of the Waters, are here given. These, however, show the happy results arising from their application:—

R. Eve, de Kingston,	A. Nelson, M. D.,
Jos. M. Belanger, Pr.,	J. B. Meilleur, M. D.,
P. C. A. Munro, M. D.,	A. E. Regnier, M. D.,
Amable Simard, M. D.,	A. Rollin, M. D.,
L. G. Cazenove, M. D.,	C. Sebourin, M. D.,
E. H. Trudel, M. D.,	F. X. Gosselin, M. D.,
W. Nelson, M. D.,	F. H. Lemoine, M. D.,
R. L. Macdonnell, M. D.,	T. Ed. Ouellet, M. D.,
G. B. Bibaud, M. D.,	Dr. Dorion.

Persons who have not received the little volume containing these certificates at length, can obtain it at the Depots, where the Waters are Sold; by reading it, they will feel convinced that they have effected wonderful cures in various cases, and that they have been found superior to all others.

Byrnes Des Prairies, March 1, 1850.

Sir,—Have you the goodness to inform the other writers and Vendors of the Poisy by Aix Springs have procured on myself, I have found great good from them, and have found them superior to all other Medicinal Waters, and have found them highly emolliency, as it was at the time so affected by the Physicians of Paris and Stoves of the Hospitals, Organs that my Physicians despaired of a cure, and for a time all relief from the Medicines, for the treatment of Dyspepsia and an absolute Retention of the Urine. He Prescribed for my relief the Mineral Waters, and I made use of them of the Poisy Waters, and I made use of those of the Poisy Waters, and I made use of those of the Poisy Waters, and I made use of those
