selves in their blankets and went to sleep. Most of our men followed their example. Assisted by Lee and the foreman the Ballet Girl was breaking provisions and utensils out of the cook wagon and arranging them in packs ready to place on the horses. The wagon was to be left where it was for the time. We could not take it with us. It would never have been able to keep up.

From time to time men came straggling in in knots of four or five or sometimes more. None of them had seen Spider. I asked them all.

The night was wearing on. The moon rose, showing the forms of the sleeping men and making the glow of our dying fire seem redder than ever in contrast to the silver light. The Ballet Girl had nearly finished his preparations, and the camp became more and more silent.

One after another our scouts returned, each one reporting that he had seen the trails of not one, but several herds of cattle, all of them heading in one direction with the evident purpose of meeting at some point farther on. They were bound eastward, too, and not toward the south, where lay the Mexican line, as we expected they would. I feared that this change of direction might have some dangerous significance, and, as usual, asked the foreman about it.

"So fur as sellin the cattle goes, ther wasn't no use in cuttin across the line right here," said he. "They'd 'a' had ter pull down ter Palomas anyhow—Palomas is the neares' town in ol' Mexico—an the way they're goin is the shortes' way. It means they think they're strong enough to hol' us back if we meet up with 'em; that's all. But I don't reckon they think we'll meet up with 'em. I'm a-gonter turn in. Wonder where that kid has got ter?"

"There he comes now," replied the cook. "Where on top er the worl' do you reckon he got them horses? An—an, say, what in blazes is that thing what he's got on his saddle in front of him? I been a lookin at him fer five minutes, but I can't make it out."

"Looks like he'd cut a man in two an was bringin half of him home," observed Lee. It did look something like that. Spider was cantering toward us, leading three horses by their neck ropes. Astride of his saddle there hung an object that seemed to be a pair of short, knobby legs, terminating in a pair of large boots that banged the horse's withers at every step. From the tops of the legs something was sticking out.

"Them's his chaps—the kid's chaps," said Lee. "He's stopped up the bottoms er the legs with them boots, held in by the foot straps, an he's got 'em stuffed full er sunthin. Them things what's stickin out are rifles."

As he caught sight of us Spider waved his hand and forced his horse to a faster gait, which made the legs kick wildly

"There!" he exclaimed as he rode up to the cook wagon. "I thought I wasn't never gonter get back. Them horses, they held back all the way. Couldn't tie 'em to the horn 'cause the rifle pinched my leg, so I had ter lead 'em. They most pulled my arms out by the roots." He dismounted while speaking and with great deliberation proceeded to tie the horses to a wheel of the cook wagon. Then I saw that, besides the boots which decorated the bottoms of his chaps, Spider had tied three other pairs to the back of his saddle.

Some of the men who had not been asleep or who were waked by the stir left their blankets and gathered about us.

"What's that you got in your chaps there, kid, an where'd you get them boots?" inquired Lee. Spider answered never a word. Going to his horse, he unslung with some difficulty the chaps that hung over the saddle. First he pulled forth four rifles that stuck out and laid them carefully on the ground. Then, taking the boots in his hands, he turned the chaps upside down. Four pistols tumbled out of the one leg. From the other there came three pistols and a knife.

"Say, where'd you get them guns an boots an things?" queried the Ballet Girl impatiently. "Answer when your spoke to, can't you? Quick, now, else ther'll be a kid somew'ers roun here what gets a lickin. What you been a-doin, eh?"

Spider arranged the pistols and knife in an orderly row beside the rifles, then got the boots and added them to the collection.

"Them things," he said, looking around at his auditors with a triumphant grin—"them things belongs—that is, they did belong—to Hollis an that greaser what was cavortin roun here yestiddy an to two other men what I don' know. They're my prisoners, all of 'em, an they're back here a ways on the desert now waitin for some one ter come fer 'em."

CHAPTER VI.

IN WHICH THERE IS A BATTLE WITH THE THIEVES.

We were none of us easily surprised at anything Spider might do, but that he, single handed, should have taken four prisoners fairly amazed us all.

"It's some er them monkey shines er yours again," said the Ballet Girl, striding forward and catching Spider by his collar. "What's you tryin ter make us believe anyhow?" Spider struggled to free himself.

"It's right, I tell you!" he cried indignantly. "D'you s'pose they give me their guns an boots an horses jus' 'cause they loved me? Well, they did not. Jus' when I struck that firs' gang that was a-comin down here I saw a little spark of a fire way off on the desert. The others hadn't seen it, I reckon, none er them, an when I lef' them I went over ter see what the fire was for. The fire was jus' goin out an them men was layin roun it. All drunk, they was, an all asleep."

"What men?" I asked.

"Hollis an them three what was a-cavortin roun here yesterday. They was a-sleepin on their saddles fer pillers, but their boots was off an their guns lay by their sides. I crawled up an then I cut the picket lines er their horses an led 'em off. One got away. I put the guns an things inter my chaps 'cause I hadn't no other way of packin 'em. That's all there is to it."

"You said they were prisoners. What's holding them prisoners?" I inquired, much puzzled.

"The cactus," replied Spider, with a look of scorn at my stupidity. "Don't you see I got their boots? If they tried to walk, they wouldn't have no feet left in two minutes. I didn't want ter take their horses. I kinder hated ter take them," added Spider hesitatingly. "I didn't min' the other things."

"You needn't mind about the horses either," remarked Hayward, who was examining the animals in question. "They're all mine—were, that is, until they were stolen. What are we going to do about those prisoners of Spider's?"

There was some discussion at first, for we had made no provision for the taking nor for the maintenance of prisoners, but in common humanity we could not leave them to die of thirst where they were. Six men, with Lee at their head, were sent out to bring them in. The place where Spider had left his capture was not far away. Following the boy's tracks, the party disappeared, only to return shortly afterward with the news that the prisoners had saved us all trouble by taking themselves out of the way. The tracks seemed to indicate that the horse that escaped from Spider wandered back and had been recaptured by the men, one of whom had mounted him and then fetched mounts for the rest.

Spider was much mortified. He blamed himself bitterly for not having taken the bridles as well as the arms and boots, and he wanted to start at once in pursuit. This was out of the question for two reasons. In the first place, we had decided to start before daybreak, and therefore there would not be time, and, further, we were heartily glad to get rid of the prisoners anyway

Though much disappointed, Spider resigned himself so gracefully to the loss of his prisoners that the foreman patted him on the back approvingly, saying that after all he had seen worse boys than Spider, who might, if he behaved himself and worked hard, make a very decent cow puncher in the course of 20 or 30 years. In the meantime he had better roll himself up in his blankets and go to sleep. Spider obeyed. In a very few minutes, with the exception of the sentry, who kept solitary watch on the crest of the cliff, the camp was sleeping.

It was still dark when this sentry waked me.

"It only wants two hours er daylight now," he said as I sat up and began to rub my eyes. "Breakfas' is mos' ready, an I got ter wake up the rest er these here men. How I wish I had a bugle!" He had no bugle, however, so he began to roar the call of the reveille with the words that the soldiers have put to it.

[CONTINUED.]

His Rank In the Hierarchy.

"Ah," exclaimed the cannibal, smacking his lips, "what kind of a minister was that we had for dinner?"

"Your excellency," replied his cook, "I should say it was a prime minister."

JAPANESE MILLS.

All mills in Japan run day and night and change hands at noon and midnight. The vast majority of millworkers are children, who work eleven hours at low wages. In one mill at Osaka 2,600 workers are under fifteen years of age, and operate only 3,700 spindles. In America 300 persons operate the same number.

ERMINE FOR THE CORONATION.

It is calculated that about 108,000 skins of the ermine will be used to make the peers' and peeresses' robes for the Coronation, and that, as the price of this fur has much increased in view of the demand, about £27,000 worth will be needed for the ceremonial.

Some people undo with their tongues all the good they do with their hands.

It takes an extemporaneous speaker to talk fluently about nothing.

Among European monarchs the only total abstainers are said to be the Sultan of Turkey and the Queen of the Netherlands.

A WRONG IDEA OF THE NERVES.

The Action of the Heart, Lungs, Stomach, Liver and Kidneys Depend on the Nerve Force—Extraordinary Results From the Use of Dr. Chase's Nerve Food.

There is not a single organ of the human body that can perform its functions without a liberal supply of nerve force—the motive power of the body.

The nervous system should never be thought of as a separate part of the body. Its branches extend from the brain and the spinal column to the tips of the fingers and toes. Just as the blood is carried by the arteries to every nook and corner of the system, so the nerve force, by means of nerve fibres, is distributed and nerve force is just as important to life as is good, rich blood.

When the nerve cells are wasted, by over exertion, worry or disease, more rapidly than they are replaced, the action of the heart becomes slower, the lungs begin to weaken, the stomach fails to do its duty, the liver and kidneys falter in their work as filters and the excretory organs get feeble and inactive. You may be a sufferer from weakness and exhaustion of the nerves and may have been attributing the trouble to the stomach, kidneys or other organs. Nervous exhaustion is marked by restlessness, disturbed sleep, languid, weary feelings, headache, dyspepsia, and bodily pains, inability to concentrate the thoughts, absent-mindedness, weakened memory, twitching of the muscles and eyelids, sudden startings and jerkings of the limbs in sleep, dizziness, irritability and gloomy forebodings.

Through the medium of the nervous system Dr. Chase's Nerve Food carries new life and energy to every organ of the body. It strengthens the action of the heart, invigorates the stomach, makes the kidneys, liver and bowels more active, and builds up the entire system.

If you experience any of these symptoms of nervous exhaustion, you can rely absolutely on Dr. Chase's Nerve Food to cure you. It does not stimulate, but thoroughly cures by forming new, red corpuscles in the blood and creating nerve force.

Dr. Chase's Nerve Food, 50 cents a box, 6 boxes for $2.50, at all dealers, or Edmanson, Bates & Co., Toronto.

The man of letters should know enough to find p's and q's.

You can get encouragement in many a town where you can't get a dollar.

A man will talk for his interests, even if it is necessary for him to say that black is white.

HEALTH IN SPRING.

NATURE REQUIRES ASSISTANCE DURING THESE MONTHS.

To Help Throw Off the Impurities That Have Accumulated During the Winter Months—Purgatives Should Not Be Used—It is a Tonic That is Needed.

In this climate there are many reasons why people feel all out of gear in the spring months. Perhaps the chief of these is the long hours in imperfectly ventilated offices, shops and houses during the winter months. You may feel that there is nothing serious the matter; you are only a little tired after slight exertion, or perhaps your appetite is fickle, or little pimples or eruptions on the skin show that the blood is not as pure as it should be. If you feel this way, not only your comfort but your health demands that you take proper steps to cleanse yourself of the blood impurities that are responsible for your condition. You need a tonic, blood purifier, nerve strengthener and general up-lifter of the entire system. Dr. Williams' Pink Pills for Pale People meet all these requirements more perfectly than any other medicine. These are tonic pills and not violent and weakening like purgative medicines. Nature does not require a violent measure in spring, but a helping hand to throw off the impurities which have accumulated during the winter, and so toning and strengthening every organ and function that a condition of perfect health will prevail. Everyone—old and young—ought to take Dr. Williams' Pink Pills in the spring. There is no other medicine will do you so much good. Mr. James Salmon, postmaster, Salmon Creek, N. B., says: "Last spring I was feeling decidedly unwell. I was weak, dizzy at times, and continually felt tired. My appetite was poor and I was losing weight. I tried several medicines, but nothing did me any good until I began the use of Dr. Williams' Pink Pills, and a few boxes of these made me feel like a new person. I would advise all who feel run down and out of sorts to take Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are also effective in the cure of all diseases due to poor, thin, watery blood or weak nerves. Do not take a substitute for these pills—it is a waste of money and a menace to health to do so. See that the full name "Dr. Williams' Pink Pills for Pale People" is on the wrapper around every box. Sold by all medicine dealers, or sent postpaid at 50 cents a box, or six boxes for $2.50 by addressing the Dr. Williams Medicine Co., Brockville, Ont.

An Insult to Pharaoh's Remains.

A French Savant returned from Egypt bringing a royal mummy with him, and the case was opened at Marseilles. Being told that it contained a Pharoah, the officer looked up Pharoah in the tariff, but no mention could he find of such an article. Then it occurred to him that a nice high duty was exacted on dried fish, and the savant had to pay as if for that commodity.—London Daily Mail.

HUMOR

A REMARKABLE SHOT.

Making a Triple Play With His Only Remaining Charge.

"Hello, Ike," said Perkins as that individual walked into the store, "how'd you make out gunnin' today?"

"Tole'ble, jest tole'ble; thet's all. I got four black ducks, six broadtail and ten winters."

"I must say thet's pretty good shootin' fer one day," said Perkins.

"'Twas putty fair, but I should hev got more yet if my shells hadn't gin out."

"Thet so?" said the constable. "'Twas hard luck, and 'minds me er one day 'bout four years ago when I went down tu the medders gunnin' with thet old muzzle loader er mine. I fooled round all day till I had only one charge er powder left. Birds had been comin' 'long one in a flock, and now and then tew lone ones, and all er 'em out er range, and I didn't git a bird. I was kinder discouraged; hadn't had a good shot all day. But jest as I was gittin' out er the stand I heard a goose hollerin', and I crouched down quick. I can tell you, and purty soon he landed plump down in the slough hole in front er me, where my decoys was. I was jest tu the south er the deacon's medder—you fellers remember how the marsh there is very narrer and runs right clus tu the beach—and my stand was jest abreast er thet low place on the beach they call the blowhole. Waal, I moved round keerful and got a bead on the old goose, when he must hev smelt me, fer jest as I was goin' tu let him hev it he begun swimmin' away from me. I didn't want tu lose him, so I begun tu whistle him back, and, if you'll believe me, as I was a-sittin' there what should I see comin' up by the blowhole but a red fox. Boys, I'd hev given my hull farm fur another charge er powder and shot thet minute, I guess. The goose by this time had circled round and begun tu come toward me ag'in, and the fox was a-standin' still. Gradually the old goose was gittin' in line with thet fox. 'By thunder,' 's I, 'if I can git 'em in a line there's a chance er gittin' 'em both!' In another minute they was right in line, and I let 'em hev it. Jest as I fired a bluefish jumped out er the water from a school on 'em that was chasin' bait inshore. I shot the goose plum through the head, lamed the fox so he couldn't run and killed thet bluefish so he drifted ashore, and I got the hull three."

"Boys," said Perkins solemnly, "if you'll step intu the back room I'll set up the cider."

No More Trouble.

Almost anything is better than a quarrel. Even if your neighbor's hens forage in your garden, it is best to control your temper. Try a little innocent strategy, like this reported by The New York Weekly. The trick is patented.

"Are you still troubled by your neighbor's chickens?" asked one man of another.

"Not a bit," was the answer. "They are kept shut up now."

"How did you manage it?"

"Why, every night I put a lot of eggs in the grass under the grapevine, and every morning when my neighbor was looking, I went out and brought them in."

A Narrow Escape.

"Bingle tells me that he had two horses killed under him in one of the battles of the last war."

"That's right. A railway car he was riding in backed into them."

Blood will tell

When an animal is all run down, has a rough coat and a tight hide, anyone knows that his blood is out of order. To keep an animal economically he must be in good health.

DICK'S BLOOD PURIFIER

is a necessity where the best results from feeding would be obtained. It tones up the system, rids the stomach of bots, worms and other parasites that suck the life blood away.

Nothing like Dick's powder for a run down horse.

50 cents a package.

RUMORS OF PEACE

A DISPATCH FROM PRETORIA SAYS BOERS ACCEPT BRITISH TERMS.

NEWS CAUSES EXCITEMENT IN THE CLUBS—NOT OFFICIAL NEWS.

London, April 11.—The Financier and Bullionist publishes a dispatch from Pretoria this morning declaring that the Boer leaders have accepted the British terms, that peace has been arranged and that the terms of peace have been cabled to the Boer agents in Europe.

Other unconfirmed statements of a similar character are in circulation in London. It is said that Frederick Harris, former secretary of the British South African company, has received a telegram to the same effect, but nothing of an official or really reliable nature concerning the matter is known.

The Central News is informed that a telegram was received in London this morning from Pretoria, saying and Generals De Wet and Botha had agreed upon terms of peace. The telegram indicated that the British terms had been accepted and that peace had been arranged.

There was almost as much excitement last night in political clubs over the prospects of peace as there was exactly two and a half years ago when war was declared.

MILITIA TO BE INCREASED.

Ottawa, April 11.—In the House of Commons yesterday Hon. Mr. Borden, minister of militia, announced that the Canadian militia will be increased from 25,000 to 100,000 men. This is to be done by the establishment of rifle clubs. A contract has also been entered into for the manufacture of the Ross rifle in Canada. The factory is to be located in Quebec, and will turn out over fifteen thousand rifles annually. The arsenal at Quebec is to be enlarged and another arsenal will be located in British Columbia. The other branches of the service will be improved and the Canadian militia made thoroughly effective.

WANT CANADIAN BUTTER.

Montreal, April 11.—Wholesale butter dealers here state they have orders to buy all the butter they can get for the trade in large eastern United States cities, where a famine in this article is reported. The stock here is sufficient only for the local demand.

TELEGRAPHIC BRIEFS.

Navigation has opened at Fort William.

The village of Wetaskiwin, N. W.T. has been proclaimed a town.

H. S. Boyd, a commercial traveller of Boston, was found dead in a hotel room at Peterboro, Ont.

Hon. William Mulock brought down a measure in the House of Commons on April 10, providing for better wages for letter carriers.

An attempt is being made to round up a large number of wild horses in British Columbia for sale to the British army for use in South Africa.

The C. P. R. have granted the trackmen on certain portions of their line an increase in wages and have agreed to arbitrate as to the wages of the remainder.

Premier Haultain's resolution in the Northwest legislature, regretting the Dominion government's action in refusing autonomy to the Territories was passed.

Belgian troops are in a state of mutiny in Brussels.

It is reported that the British government have decided to suppress the United Irish league.

It is believed that Col. Lessard will lead the Fourth contingent.

Black diphtheria has broken out in North Springfield, Man.

The flood situation at Portage la Prairie is still serious.

Miss Ellen Stone, the missionary who was kidnapped by brigands, received a welcome home at New York.

A serious diplomatic rupture has occurred between Italy and Switzerland.

An English company has been formed to control the oil in the Petrolia region of Ontario.

The Shire Horse society of England has offered gold medals at Winnipeg and Toronto fairs.

Mrs. Bucey, Everett, Wash., murdered her husband and her son and then killed herself while insane.

Major Waller, on trial in Manilla for murdering natives, had a bad record during the Chinese campaign.

A BRUTAL MURDER.

Young Girl Done to Death on the Streets of Detroit.

Detroit, Mich., April 10.—Just before midnight last night the most brutal murder of recent years was committed on Thirteenth street, near McGraw street. A young girl, who has not yet been identified, was stabbed and pounded to death. Her throat was cut, a knife was thrust into her brain behind the ear, and a dent in her forehead showed that she had been clubbed. A resident of the neighborhood, Harry Jewell heard cries and screams, and, looking out, saw a man striking a girl down. After felling her and running away a short distance, the assailant returned and renewed his attack on her as she lay prostrate. Jewell notified the police, who found the girl dead. No trace of her murderer was found.

MUST REWOVE EMBARGO.

Liverpool, April 10.—The rise in the price of meat here is attributed more to the prohibition of Canadian and Argentine cattle than to the operations of the American beef combination. During the first quarter of this year more than 8,000 fewer cattle were imported through Liverpool than during the corresponding period of 1901, and the South American dead meat trade has failed to compensate for this shortage. The Butchers' association and the Association of Foreign Cattle Traders aver that the scarcity in meat will increase unless the government permits the entry of South American and Canadian live cattle, which might safely be done, as disease among the stock has disappeared.

CONNAUGHT IN CHARGE.

The Duke of Connaught, who is commander-in-chief of the military forces in Ireland, will have supreme control of all the troops which will be assembled in London for the coronation.

LIKES THEIR STYLE.

William Abraham, M. P., the famous Welsh labor leader, has returned to England from the United States a thorough convert to the labor methods of America.

TOOK AMMONIA.

Ottawa, April 10.—John McBride, formerly a conductor on the electric street railway, aged 40 years, committed suicide yesterday morning by swallowing an ale glass-full of ammonia. He leaves a wife and several children.

IN MEMORY OF OUR HEROES.

Ottawa, April 10.—Subscriptions for the fund to erect distinction memorials on the graves of deceased Canadian soldiers in South Africa now amounts to $819. Dr. Borden has subscribed $75.

Nothing angers a man like the silence of his wife when he attempts to quarrel with her.

DRANK EYEWATER.

Halifax, N. S., April 10.—Rita May Dickson, daughter of John Dickson, electrician, this morning drank some eyewater, which had been left on a shelf by her mother, and she died almost immediately.

HIRAM WALKER MEMORIAL.

Windsor, Ont,, April 10.—Messrs. Walker have offered to erect an Anglican church at Walkerville as a memorial to the late Hiram Walker.

BROCKVILLE LINEMAN KILLED.

Brockville, April 10.—Ernest Nevins, an employee of the Bell Telephone company, was working on a pole which carried a very heavy load of cables and wires yesterday afternoon, when the pole broke about ten feet from the top, and he was dashed to the hard road, fully thirty-five feet below, receiving injuries which resulted in death an hour later. Deceased, who was 26 years of age, was the son of William Nevins, of Kingston, and had been with the linemen here all winter.

SEPOYS AMBUSHED.

Simla, India, April 10.—Fifteen sepoys were ambushed on April 7 on the Mahmud frontier. Eight of the soldiers were killed and three were wounded.

SEARCH FOR THE HURONIAN.

London, April 10.—The admiralty has ordered the cruiser Thames to search the North Atlantic for the missing Allan line steamer Huronian.

LOGGER DROWNED.

Dunchurch, Ont., April 10.— William Craig, Allan Craig and Thomas Simpson, of this place, left here yesterday morning to look after a boom of logs in Whitestone lake. Their boat got crushed in the ice and sank. William Craig was drowned. After two hours' struggle the other two men got to shore very much exhausted.

It sometimes happens that cheap notoriety is dear at half the price.

SIXTY NEW ELEVATORS.

American Capitalists Behind a Project to Erect Grain Store houses for the West.

It is reported in Winnipeg that an American company has applied to the Canadian Pacific railway for sites on which to erect a number of elevators in Manitoba and the Territories. A number of applications have been made outside of this for sites for new elevators by private companies and private individuals, but this is a project of larger proportions. It is stated that the American company wish to erect as many as sixty elevators in this country next year. They intend to have them completed before the crop of next fall is moved.

PRENTICE IS PARDONED.

Sentenced to Death Five Years Ago for Murdering a Farmer.

Ottawa, April 12.—Arthur Prentice, a young English lad, five years ago was sentenced to be hanged for the murder of a farmer in Western Ontario. Prentice had quarrel with a neighboring farmer's son over a rabbit, which Prentice said belonged to him. The farmer took up the row with Prentice, and the lad shot him. The death sentence was changed to imprisonment for life, and now a pardon has been granted Prentice.

There were extenuating circumstances in the first instance, and a favorable report from the judge. Prentice has got friends in England, and he will be released at Kingston penitentiary and forwarded to them. The department of justice has no information to give in regard to such cases, because when a man is pardoned the idea is to say as little about it as possible.

THEY WORSHIP MR. KRUGER.

A cable message from London says Dutch hero worship has become an unreasoning fetish. As far as Kruger is concerned, he is idealized as a martyr of British oppression and persecution, and is indeed a unique and picturesque figure reading his Bible with sublime faith, and working with serenity of purpose for the deliverance of the Boer republic. At Utrecht there is no decline in his popularity, although he lives in seclusion, and is seldom seen outside of his villa, in a small factory in town. He is surrounded by a swarm of relatives and Boer exiles, sees few visitors, and is more phlegmatic and taciturn than ever. He is unmanageable in money matters, and so deliberate and cautious in expressing an opinion and judgment respecting South African affairs that he is seldom consulted by Leyds, Wolmarans, Fischer and other leaders. Leyds is received as the diplomatic representative of the South African republic, and is allowed to display his full uniform on state occasions. Kruger is a private citizen, living in exile, and not encouraged to visit the capital or appear in public. Yet he is reverenced throughout the Netherlands as a hero and martyr. Kruger is unmistakably ageing, as his followers admit. His heart action is better than it was, and his general health has improved during his residence at Utrecht, but his mind has become dull and torpid, his grim humor has disappeared, and the force of his character has sensibly abated. He remains the central figure of the group of Boer refugees because his personality is still unrivalled; but his associates make no secret of the fact fact that it is difficult to squeeze money out of him, and his leadership is nominal and ineffective. Indecision is now described as his leading trait; he is unable to make up his mind when called upon to settle any point of Boer policy. The extent to which Schalkburger and Botha have committed Kruger and his followers in peace-making is a mystery. If the Boer agents were consulted they would probably disclaim responsibility and reserve judgment until Steyn could be approached and sounded.. Their irreasonable attitude will be maintained until the last moment.

DUKE WHITEWASHED.

London, April 12.—In the bankruptcy court yesterday morning the registrar decided in spite of "rash speculation and extravagance in ,iving" that he would annul the bankruptcy of the Duke of Manchester, an arrangement having been reached by which the sum of £11,676 is provided, giving the creditors 12s 6d in the pound sterling.

NEWS NOTES.

The alliance between Germany Italy and Austria will be continued.

The C. P. R. is prepared to accept wheat for Port Arthur and Fort William.

Col. J. S. Coolican, well known in Winnipeg in the boom days of '82, died in Chicago.

The total of forty thousand dollars in premiums and attractions will be offered at the Winnipeg fair.

ACCUSED OF WITCHCRAFT.

An Eleven-Year-Old Girl Rescued From Terrible Tortures.

Vancouver, April 14.—To escape from the tortures inflicted in the hideous witch hut was the reason the 11-year-old girl was brought out by the Reid party, which arrived the other day from Telegraph Creek, having tramped 160 miles down the Stikine valley on snowshoes to Wrangel. She was accused of bewitching an old woman of the tribe, and the girl.. was brought down and placed in retreat here. According to reports, dark and bloody rites are still practiced by the Indians in the north and find in the torture of some "witch" the only recovery of a sick man. Strangely enough usually some young person is selected for the sacrifice to savage superstition and one who has exhibited unusual intelligence.

Among the Cascars, Taltahns and Takus, the method of securing a confession after having captured one accused of witchcraft is to bend the legs backward until the feet touch the head, and then proceed to wind ropes around the body. The ropes are gradually drawn tighter and tighter from time to time, and a period of several days sometimes elapses before the victim, choosing death rather than the prolonging of such agony, makes a confession which brings release. Then comes the alternative. If the sick man gets well—a matter which the tribe thinks lies entirely in the hands of the witch—for that time the victim is safe. On the other hand, if the patient dies, the witch follows in short order. Once charged with being a witch, death or flight into some far-off country are about the only hopes.

TELEGRAPHIC BRIEFS.

The gold output of Atlin equalled last season $500,000.

N. Crean, the oldest of the G. T.R. conductors, died at Quebec.

The Shah of Persia is sending a superb diamond pin to King Edward.

The Kensington Creamery, near Woodstock, Ont., was destroyed by fire.

Col. Pellatt, Toronto, will command the Canadian Coronation contingent.

A bill will be introduced in the House of Commons giving three judges to Yukon.

The two Manitoba teachers for South Africa were given a warm farewell in Winnipeg.

Work has commenced on the C. P. R. branch from Moosomin to the Qu'Appelle Valley.

General Miles will shortly be forced to resign his position as lieutenant-general of the United States army.

In a little more than a month the king of Spain will be of age and the queen-regent will retire.

Soldiers fired ball cartridges in the streets of Brussels Saturday night and many rioters were injured.

Francis Carriere, the former treasurer of St. Boniface municipality, has been declared not guilty of the charges of stealing.

A serious smash-up of passenger trains occurred on the C. P. R. at Schrieber on Friday night, but no one was injured.

Five wheat boats are in Fort William harbor to take out half a million bushels. A fifty years' record on the St. Lawrence river was broken by the steamship Fermona, which passed Father Point Saturday morning for Montreal.

The Arrhbishop of Rupert's Land has called the Synod of the Church of England to meet May 21.

An immigration hospital will be built and completed at Winnipeg within the next three months.

SYMPATHETIC TRIBUTE.

A Conservative member of the Dominion House, who knew the late Mrs. Ross well, said of her: "I have met many of the wives of our public men in Canada, and I would put Mrs. Ross as being the most typical of what such a woman should be. She was gracious; she had a presence without affectation; she was always sympathetic and motherly, and was a devoted companion and councillor of her husband. We often read of how the wives of the public men in the States rise in an easy way to the highest position there; this was very characteristic of Mrs. Ross; she was equal to any situation and was at home in them all. You would not quite say that she was a society woman in its narrow sense; she was essentially a social woman and a social centre, and commanded the respect of all, the love and affection of the many who came to know her well. Hers was truly a lovable character. Her husband will be a broken reed by her loss; she nursed him, was his constant companion, and gave him that helpful sympathy which goes so far in making up a successful public man these days."

Brandon city council has decided to introduce a municipal scavenging system.

TALMAGE IS DEAD.

NOTED PRESBYTERIAN DIVINE PASSES AWAY AT WASHINGTON, D. C.

HE WAS, PERHAPS, BEST KNOWN BY HIS PUBLISHED SERMONS.

Washington, April 14.—Rev. T. DeWitt Talmage, the noted Presbyterian divine, died at 9 o'clock on Saturday night at his residence in this city.

It has been evident for some days that there was no hope for his recovery and the attending physicians so informed the family. The patient gradually grew weaker until life passed away so quietly that even the members of the family, all of whom were watching at his bedside hardly knew that all was over. The immediate cause of death was inflammation of the brain.

Dr. Talmage was in poor health when he started away from Washington for Mexico for a vacation and rest six weeks ago. He was then suffering from influenza and serious catarrh conditions. Since his return to Washington, some time ago, he had been quite ill. Until Thursday, however, fears for his death were not entertained. The last rational words uttered by him were on the day preceding the marriage of his daughter, when he said: "Of course I know you," and since then he has been unconscious.

The interment will take place at Greenwood cemetery, Brooklyn.

A BEAR STORY.

A Grizzly in Nevada Tied Up a Railroad—A Passenger's Story.

About a week ago a grizzly bear succeeded in tying up two railroad systems and disorganizing the whole traffic of the Central Nevada for a period of some three or four hours. J. Liefman, a passenger on one of the delayed trains told a Winnipeg reporter that for a time things were most interesting at Battle Mountain, where the blockade occurred. Mr. Liefman was on his way north from Austin, Nevada, where he had been looking after some mining claims, and, on arriving at Battle Mountain, the junction of the Nevada Central and Central Pacific railways, it was found that a huge grizzly bear was in possession of the dispatcher's office, and absolutely refused to allow any trains ta move without his permission, which was difficult to obtain. It appears that during the morning business was rather quiet around the depot, and suddenly the bear appeared upon the scene. The dispatcher reached for his gun, and foolishly opened fire; then the fun began. The bullets from the 38-calibre Colts only enraged old Ephraim and he went far the dispatcher like a bull at a red umbrella. The dispatcher took to the loft over his desk and sat in fear and trembling, watching his new assistant make matchwood of the furniture and office fittings.

Several trainmen happened along to make enquiries, but found that their business could wait, and, in the meanwhile stations all along the line were calling for orders from Battle Mountain, and train crews were filling the sunlit Nevada skies with sulphurous fumes.

After about four hours the bear got tired of waiting for the dispatcher to come off his perch and argue the differences on a level footing, and went outside to review the situation. Henry Good was waiting outside ior just such an opportunity and with a couple of well directed bullets from a Savage rifle terminated the blockade.

TRAGEDY NEAR MONTREAL

Montreal, April 14..—The police have received information from Varennes that Albert Lussier, Seigneur of Varennes, and formerly a member of the Quebec legislature, was shot on Saturday morning and fatally infured. His son, Aime Lussier, has been arrested charged with the crime.

The story told by the police is to the effect that the family were aroused early Saturday morning by the strange actions of young Lussier, who attempted to eject his mother and sister from the house. The father interfered, and it is said he was shot twice.

CAUGHT IN THE MACHINERY.

Montreal, April 14.—A sixteen-year old lad named Vaultier, was literally torn to pieces on Saturday morning in the iron tube foundry at St. Henri, where he was employed. He was caught in the machinery.

It is announced that the C. P. R. intends to build a cleaning elevator at Port Arthur, giving the town a total storage capacity of 5,000,000 bushels.

FERNIE, BRITISH COLUMBIA.

SATURDAY, APRIL 19, 1902.

EDITORIAL NOTES.

The Smith Curtis-Walkem-Dunsmuir comedy virtually came to an end on Friday when the Rossland member walked out of the room in disgust. He had succeeded in ferreting out a number of telegrams which had passed between the members of the cabinet and the Canadian Northern railway promoters, but could not get them in as evidence. The messages were in code, and the secretary of the Commissioner of Lands and Works was summoned to deciper them. When he was put on the rack, however, he declined to disclose the meaning of the messages and the Commissioner upheld him When Smith Curtis withdrew the commission was adjourned until after the meeting of the full court. It will remain to be seen whether the Rossland member will interest himself further in the matter, failing which, a commission which has bristled with dramatic situations, and which is without parallel in the annals of the Dominion, will soon pass into history.

* * *

Jim Hill is meeting with all kinds of opposition in his efforts to tap the Boundary mining sections with feeders to the Spokane Falls and Northern railway system. To get rid of one legal barrier, which Manley, of Grand Forks, placed in his way, the energetic railway builder purchased a piece of land from Manley for $50,000. This only secured him a short period of uniterrupted progress, however, as the management of the rival Grand Forks and Republic road on Tuesday secured an injunction restraining further work on the V. V. & E. The argument upon the injunction will come up in Victoria on May 6th and in the meantime operations are at a standstill.

* * *

SOME of the party Journals of Eastern Canada are questioning the policy of the government in the matter of sending Canadian troops to South Africa, upon the ground that some of the Canadians so sent might remain in South Africa while the Dominion requires all the men it can get. While it cannot be denied that the patriotism which sends Great Britain men in her hour of need may cost the Dominion a few score of desirable citizens, such loss is infinitesimal compared with the losses resulting from Canada's lack of patriotism in the framing of its tariff. A few Canadians may elect to remain in South Africa after the war, but what of the thousands of Canadians who year after year have been forced across the line to seek employment there upon the manufacture of wares designed for the Canadian markets? If it is to be a time for stopping leaks why not stop the great leak? The little leak ean easily be justified, the greater one is the nation's shame.

* * *

THE provincial legislature has decided that for the future aliens shall not be entitled to vote at municipal elections. Heretofore alien property owners were allowed a voice on all questions of money bylaws, the idea obtaining that a municipality was in a sense a joint stock company, and that the vote went to the property and not to the person. Hereafter the rights of the alien holders of real estate will be restricted to the payment of taxes.

* * *

MINISTER BLAIR has introduced in the commons his bill for the establishment of a railway commission which is to abolish the railway committee of the privy council and place the railways of the country under a certain measure of control by a permanent commission of three. By the terms of the bill the commissioners will serve for ten years, being only removable upon an address from both honses of parliament. The board shall decide all matters of fact, and shall have power to fix traffic rates except in cases of comparative exemption from such control. This is a move in the line of long promised reform.

* * *

THE Victoria Colonist has bowled out "Bob" Green's project for the creation of a government refinery as a means of assisting the silver lead mining industry of Kootenay. The Colonist says the Slocan member is on a wrong track. All that he has to do is to convince the 200 odd members of the House of Commons, who do not know where the Slocan is, that the welfare of the Dominion demand increased duties upon lead and manufactures of lead. When this is done the Colonist says the silver-lead question will adjust itself.

* * *

THE report of Hon. Edgar Dewdney, that there is no possible pass through the Hope mountains, will render more difficulty the work of the subsidy hnnters who are pushing the Coast-to-Kootenay railway project. Dewdney was employed by the Dunsmiur government. Against his finding the province has the assurance of Smith Curtis that there is a possible pass through the mountains.

THE strength of the Canadian Militia is to be increased from 35,000 to 100,000 men. Given this number of disciplined men, the equal in valor with those sent to South Africa, the Dominion should be able to look after herself fairly well. Now is the time for the Fernie men, who contemplate organizing a local company of militia, to set the ball rolling.

* * *

IN view of the entertainment which he has furnished for the past two weeks we are inclined to forgive Smith Curtis all his trespasses. The Curtis-Walkem-Dunsmiur royal commission has contributed much to the gaiety of nations.

JIM HILL'S GREAT SCHEMES.

James J. Hill and his schemes once more are receiving the wrapt attention of the people of British Columbia. The latest story is that he has secured a considerable interest in the Granby smelter, and with dogged persistence is endeavoring to get his line of railway into the great smelting centre from the south. Should Hill succeed he will occupy a commanding place in the railway situation of Southern British Columbia. It would be difficult to overstate the traffic possibilities of a combination including a considerable holding of Crow's Nest and Granby stock, with lines of railway tapping the coal fields here and the smelting works in the Boundary.

CONDUCTOR HUGHES KILLED.

William Hughes, a conductor employed on the Crow's Nest division, met with a fatal accident at Blairmore on Saturday. When last seen alive Hughes was about to cut some cars out of his train. He was standing on a lumber loaded flat car and it is supposed that in getting down to draw the pin he lost his balance and fell under the wheels of the train. The body was badly mutilated. The deceased was born in Albany, N. Y., and was 38 years old. He leaves a widow and three small children at Medicine Hat.

MICHEL

Mrs. Chas. Simister, wife of the mine manager, left on Saturday to visit her native land and friends in Lancashire, England. She was accompanied by Mrs. Edmond Simister, of Cowley.

Steam is already being made in the new boiler, the great compressor is in position on a concrete foundation, and next month will witness the machinery of the new tipple in full swing, thus will be brought into active operation the labor of many months.

Increased accomodation in needed as the present supply of dwellings is not equal to the demand. Preparations are being made to erect a number of dwellings, so as to accomodate the workmen and their families.

T. R. Peacock, the Presbyterian student left for Winnipeg on Monday evening. He preached on Sunday evening to the usual congregation from Is. 28, 20. A fair atteneance was present at the farewell social last Saturday evening. E. P. Miller, chairman of the board of management, will see that sermons are kept up until another student arrives from the east

Mrs. Dunlop, of Toronto, Mrs. (Rev.) T. H. Wight's mother, who has been confined to her bed for some weeks, we are pleased to say is recovering.

Baptist church social under the auspices of the Ladies' Home Mission Circle in the Joyce Hall, on Friday evening, the 25th inst., at 8 o'clock. Proceeds to go towards church building fund. Tickets 25 cents. A good programme will be prepared and a good time had. Be sure and be present.

Ask for British Lion or Mainland cigar. For sale at all first-class places. Union made. Manufactured by Wm. Tietjan, Vancouver. x

A Splendid Record for Paying Death Claims.

Mr. Geo. Levasseur, who held policy No. 912,424, died on Feb. 21, 1902. On the 10th of March the proofs of death reached the Spokane office, and on the 18th of March a check for the full amount was forwarded through the Canadian Bank of Commerce, in favor of Mrs. Sophia Levasseur.

It is remarkable to note, if we take into consideration the distance between Fernie and Spokane, and then the distance between Spokane and New York, besides going through all necessary formalities, that the Equitable Life Assurance Society of the United States, through Mr. Allenberg, Manager at Spokane, paid the claim in just exactly twenty-five days. It is certainly a remarkable record.

Mr. Levasseur was only insured three years with the Society, having paid to the Society $228.48, for which they paid the amount of $2,000.00, leaving a net profit to the estate of $1,771.52.

The Equitable Life certainly deserves credit for such prompt payment.

PRODUCE STORE

LOCAL AND GENERAL.

J. D. Quail this week received a car of furniture from the east. They have two more cars on the way.

George O. Madigan, of Nelson, provincial inspector of boilers, was in Fernie this week looking over the boilers in town and the vicinity.

The infant son of Mr. and Mrs. H. W. Barnes died on Wednesday. The child was but three weeks old. Inflammation of the lungs was assigned as the cause of death.

R. J. Hamilton, of the wholesale firm of John Cholditch & Co., was in Fernie on Wednesday. He says Fernie is the busiest point he has been in for the past month.

John Podbieloncik, of Fort William, has purchased the business of D. Hayes. The purchaser is fairly well known to the people of Fernie as he was a resident of the town a year ago.

Police court business was fairly light this week. Pat Murphy, of Elko, was given 20 days in jail upon a conviction of creating a disturbance. David Williams, who was up upon a charge of vagrancy, was given a chance to get out of town.

P. Burns & Co. have purchased the meat business of Hull Brothers & Co. whose headquarters were at Calgary. This deal is the largest in the history of the cattle business in this province and perfects the meat monopoly of P. Burns & Co.

W. L. Darling, accountant for the contracting firm of Breckenridge & Lund was in Fernie on Tuesday. He says the coal company is advancing work rapidly in the laying out of the new town of Morrissey and has commenced the clearing of another large area for the erection of a number of cottages.

There appears to be some dissent among the Liberals of Fernie from the acceptance of E. C. Smith as thetr candidate in the next provincial election. One prominent member of the local organization, in discussing the matter with a FREE PRESS representative, said he would make a fight for a Fernie man.

The dance given in the Princess hall on Tuesday evening, under the auspices of the hockey boys, was enjoyed by upwards of 75 couples. All of the appointments of the dance were of the best. The music was furnished by Messrs. Whimster, Stabler and Williams. During the evening refreshments were served by the lady friends of the hockey boys.

Geo. R. Payne, one of the members of the somewhat famous Kootenay Association, is back in jail again, having been surrendered by his bondsman. The other members of the association—Gabriel and Bride—are in jail at Nelson. Charges of obtaining money under false pretences as well as charges of theft will be lodged against them. They will receive their trial on May 6th.

Rev. T. DeWitt Talmage, the noted preacher, died in Washington on Saturday evening. Of Talmage it may be said that he reached a much greater audience than any other preacher of his time. Through the medium of the press agencies his sermons were available every Sunday morning in every corner of North America. His death was due to influenza with catarrhal complications.

The Trail Creek News says it has no kick coming over the inclusion of Trail Creek in the new district of Ymir. The News says it does not care whether it has any representation in the legislature. It is now paddling its own canoe as an incorporated municipality and says the property owners have received more improvements during the past six months than they secured from the provincial government in six years.

William Eschwig has about completed the renovations which he has in hand at the Northern hotel property. They will make the bar of the Northern the best appointed in town. A front of plate glass has replaced the old one, and the interior has been given a hard finsh in white plaster. The floor and woodwork have been finished in oils in the natural colors, and from both ends of the bar there open out a number of card and wine rooms most of which have separate means of egress and exit The bar and accompanying rooms will be lighted with electricity the fixtures of which are oxidized. As there will be considerable colored glass in several interior partitions the effect in the evening, when illuminated, should be very pretty.

The Halcyon Hot Springs Press Association is the name which the press dispatches give to a provincial press association recently organized. Just why the "Halcyon Hot Springs" should be lugged into the title of the new organization is a matter which will require some explanation. The officers are F. J. Deane, of the Kamloops Sentinel, president ; Fred Simpson, of the Cranbrook Herald, vice-president ; and Thos. McNaught, secretary-treasurer. The legislature committee is composed of such eminent politicians as David B. Boyle, of the Victoria Colonist ; David Mark Carley, of the Economist ; and F. J. Deane of the Inland-Sentinel.

Saturday next will mark the 83rd anniversary of the Independent Order of Oddfellows.

Dentist

Dr. Barber is now at his office over Liphardts jewellery store, where he would be pleased to meet all those in need of his services.

"Jim" Macdonald, of the contracting firm of Foss & Macdonald, was in town this week. He says his firm have their contract about completed. He has not heard anything definite concerning the extension from Morrissey to Fernie.

"Our dead heroes on kopje and veldt in South Africa" will be the subject of the Sunday evening discourse at the Baptist church in Joyce hall. The treatment of so inspiring a theme by Rev. D. Holford should draw a good audience.

Prof. C. E. Hallett, the well known athlete, has decided to give an exhibition of the prowess of his pupils in Princess hall on Saturday evening. Two hours actual wrestling is promised during which all the known hold and locks will be illustrated.

Llewellyn C. Williams, Fernie's accomplished musician, is meeting with every success in the teaching of music as well as supplying music to social gatherings. He already has a considerable clientage and it is given every promise of growth for the future.

The following officers have been elected by the members of the Fernie lodge of the Canadian Order of Foresters :—A. Joyce, C. R. ; G. P. Lambert, V. C. ; H. A. Wilkes, P. C. R. ; J. A. McLean, R. S. ; F, J. Watson, F. S. ; A. Beck, Conductor ; G. Cody, S. W. ; J. Shafford, J. W. ; L. Carossela, S. B. ; A. Campbell, J. B.

W. B. Ganong, of the Royal Hotel, has created quite a flutter in yachting circles in Fredericton by an announcement which he made in a recent issue of The Gleaner to the effect that he will be represented in this season's contest for half-raters for the Morrison trophy. It is not generally known by "Billie's" intimates that he is a yachtmen, to say nothing of the circumstances that he is the holder of the provincial championship for half raters which he carried off last year with his yacht Asthore. The races this year will be sailed at the Ceders, the home port of the defender, and where is also situated Mr. Ganong's charming summer resort.

Dentist

Dr. Barber is now at his office over Liphardt's jewellery store where he will be pleased to meet all those in need of his services.

WHY PAY RENT

when you can own a home of your own?

The B.C. Permanent Loan and Savings Company

was organized for the purpose of helping those who are willing to help themselves, for instance :

Borrowers vs. Renters

Amouut borrowed $1,000, repaid by 48 monthly payments of $25 each—total $1200 and you own your home.

Rent at $25 per month for 48 months—$1,200 and your landlord still owns it.

OR

Have you a vacant lot? Why not build a house on it? We will assist you on the above plan

POINTERS

—60 per cent of cash value advanced.
—Rate of interest 8½ per cent per annum.
—Interest is stopped on each $100 of principal returned.
—Your choice of repayment terms—from 4 to 12 years.
—Excess payment of principal may be made with any monthly payment, every dollar paid in excess shortens the time and reduces the cost of the loan.
—This Co. does not tie up real estate as the borrower may pay off the whole loan at any time on giving 60 days' notice.

GENERAL FRENCH.

Major-General John P. D. French, who won notable successes in South Africa, was early destined for the navy. In 1868 he joined H. M. S. Britannia and served as a naval cadet for one year. Eight years later he joined the army and was gazetted to the 8th Hussars, from which he was shortly transferred to the 19th Hussars. With this regiment he did nearly all his early military service, and the only active service which he saw before being called upon to command a cavalry division in South Africa. But the two years' fighting which he saw in the Soudan, 1884 to 1885, gave him an insight into the working, and especially the staff-working, of cavalry in the field, which has proved of the greatest value to him in later years. During the years of peace and cavalry inactivity which succeeded the Soudan campaigns Sir John French passed quietly up the slow ladder of regimental promotion. He served much of his time with his regiment in India. A succession of staff appointments at the War Office placed the command of the Aldershot cavalry brigade within his reach. He was appointed to the 1st Cavalry Brigade in 1899, and in the autumn of that year his chance came. Within 24 hours of landing in Natal he was in command of a force in touch with the enemy, and on October 21, he commanded at Elandslaagte. But though, says The London Times, General French possessed the true qualities of a great cavalry leader, the eye for a country, the mind that will make its decision in two seconds, and once made will not falter to right or left, yet he did not drop into South Africa a ready-made soldier. He had much to learn. His first lesson was to adapt cavalry trained entirely for shock tactics to undertake dismounted duties—in a word to make a cavalry regiment at a pinch cover the ground that would be assigned to three battalions. He received his first rude lesson at Lombard's Kop, on October 30. But he was a man who could profit by experience. Almost by a miracle he was allowed to escape from the investment of Ladysmith, to be sent to Colesberg, where, through three trying months, he learned the great lessons in modern cavalry tactics, and adapted them with such ability that when the crucial moment came he was a master of the capabilities of mounted troops in the face of modern rifle-fire. The successful relief of Kimberley was the first result, the heading off of Cronje at Paardeberg the next, and he went steadily onward. Although there has been no third or fourth theatrical coup to bring the name of the one General who will take a risk in war, whenever the consequences balance, into further prominence, yet there have been few successful movements in South Africa on a large scale to the success of which Sir J. French has not materially conduced. And even at the eleventh hour he was selected by Lord Kitchener for the most important and delicate task of reducing the Cape Colony rebellion.

General French's reputation, continues The Times, has not only been made during the war, but it has also been maintained, and the man who in two short months of campaigning could throw aside all the cramped and unpractical theories of a life of training and adapt his command to the entirely new conditions of a new country and new power in firearms, as he did at Colesberg, is a man of sufficient calibre to be entrusted with the training in peace of our most important army corps. That he has proved himself capable of commanding it in war no one will deny.

The Hope Diamond.

The famous Hope diamond, which has just changed owners, was originally one of the French Crown jewels. During the stormy days of the French Revolution the regalia were put under the charge of the Paris commune and lodged in the Garde Meuble, whence one night the whole was stolen. The thieves were never discovered, but an anonymous letter informed the commune that one or two articles would be found in a certain ditch. This proved true, and among the objects recovered was the famous Pitt or regent diamond. This stone was found in India in 1701 by a slave, who, to conceal it, made a wound in his leg and wrapped the diamond in the bandages. Reaching the coast he entrusted himself and his secret to an English captain, who thereupon threw the slave overboard and sold the stone to a native merchant for £1,000. It afterwards passed into the hands of Pitt, Governor of Fort St. George, who sold it in 1717 to the Duke of Orleans, then regent of France, for £135,000. The Hope diamond is a portion of a remarkable stone brought to France by Tavernier and sold to Louis XVI. The thieves who obtained the stone in 1792 apparently broke it into three pieces, of which the Hope diamond was far the largest; but all reappeared again after a sufficient interval of obscurity.

How she Knew.

She: Jack, I'm afraid this dog you've given me isn't a good one. He: Not a good one! Why, what is the matter with him? She: I don't know, I'm sure; but I've had him a whole month now, and no one has even tried to steal him!—Punch.

CANADA A COMPETITOR.

A few years ago our minds were so much exercised with regard to foreign competition in Great Britain that Mr. Chamberlain sent a circular letter to the colonies asking for detailed information on the subject, which was subsequently received and published in a voluminous Bluebook. It had hardly occurred to anyone at that time that another form of competition might soon have to be seriously considered, viz., the competition of our colonies with ourselves. To-day it is a fact that Canadian agricultural machinery is becoming as common in our fields as the American variety, and in Australia Canada is becoming a formidable competitor. That is why the Canadian manufacturers have strongly protested against the Australian Tariff Bill. The exports of agricultural machinery from Canada to Australia have increased from £120 in 1896 to over £12,000, with ploughs (of which Canada sent Australia not a single specimen as recently as 1896) have increased from £304 in 1897 to over £20,000 at the present time.

I find, too, that in 1897 Canada began to export the following articles to Australia: Nails, brassware, dentists' tools, jewellery and plated ware, paper, canvas, preserves, saddlery, sewing machines, soap, whiskey, watches, clocks and woollen goods. Half the reapers and binders are of Canadian origin, which means that Canada is a greater competitor of British agricultural machinery makers in that colony than the United States.

I do not repine because of these facts, for I do not take the one-sided view of "Empire" which consists in regarding colonies as satellites which should contribute not only to our glory, but to the contents of our pockets by providing "markets" for our wares. Somehow it never occurs to those who agitate for free trade within the empire and a tariff wall against the world at large that our colonies may soon compete with us as effectively as foreign countries.

How many people are aware that in the iron and steel trade Canada will, in the course of a few years, have to be reckoned amongst the great producers? If all goes well the steel works at Sydney, Cape Breton, will soon be supplying all Canada with steel, and exporting it to the countries of the old world and the East. The concern in question is the Dominion Steel Company, founded by American hands, with a capital of £4,000,000, which has erected a steel plant in Sydney harbor at a cost of £2,000,000. Supported by liberal bounties, there is every prospect of success before the undertaking. Canadian steel, in fact, has already reached the British market, and the curious point about it is that the heavy bounty paid by the Canadian Government makes this British colonial steel far more formidable than the foreign product to the British manufacturer.—L. G. C., in London, Eng., Morning Leader.

Two Views of Civilization.

The other fellow and I were having an argument about civilization. Needless to say the other fellow and I were both supposed to be doing something else, but let that pass. He was frankly optimistic, while I was as frankly pessimistic.

"Look," he said, as the trolley cars whizzed by. "You owe that to civilization. That is better than walking." Pointing to the concrete sidewalk, he said. "That is better than mother earth," and pointing to the asphalt roadway, "that is better than corduroy." Pointing to the brick mansions across the street, he said, "those are better than wigwams," and, pointing to the milk wagon as it drove up, "that is better than having to milk your own cow."

"All true," I said, "but yours is the front door view of civilization. Come and take a back door view of it."

He came, and we looked together. "Civilization," said I, "cut the trees down off the sides of that bare ravine, civilization underdrained and killed the little brook that once purled at the bottom, civilization put those garbage barrels there, civilization dumped those piles of ashes where once the wild flowers bloomed, civilization erected that exceedingly unsightly outhouse and put up those exceedingly homely back fences. Civilization has done the same thing all over the world, which once was beautiful, but now is as homely as a chunk of hard coal."

"True," he said, "but's it's worth more."—H.D.C., in Toronto Star.

More Proof.

Some time ago we drew attention to the wonderful theory of a cryptogramist, that Shakespeare wrote the Psalms, because the forty-sixth word from the beginning of the Forty-sixth Psalm was "Shake," while the forty-sixth word from the end was "spear," the number forty-six being obtained by sliding the final "e" of Shakespeare, which leaves four vowels and six consonants. Further proof is now adduced by a correspondent of a contemporary, who finds that in the first line of the second verse of this Psalm the word "will" occurs, while in the first line of the second verse from the end is "I am," making, of course, "William." What more could be needed? —London Globe.

ENLISTMENT QUALIFICATIONS.

Height of Men for the Fourth Contingent Placed at Five Feet Four Inches.

Ottawa, April 9.—On the principle that good stuff lies in little room, the smaller sized men of Canada, those Zacchaeus who have heretofore climbed up into the sycamore trees and cheered the boys who have gone to war and longed to be with them, are now to be given their opportunity. A conference took place yesterday afternoon between the minister of militia, Gen. O'Grady-Haly and Col. Pinault, deputy minister of militia, at which the minimum height of the men who are to be recruited for the fourth contingent was fixed at 5 feet 4 inches.

Recruiting will commence at all the usual points in Canada about April 18. No particular quota will be assigned to any one city or locality. Thus, if Winnipeg, Victoria, St. John or Halifax can furnish fifty or one hundred good men who comply with the conditions of service, they will be accepted. The daily reports of enlistment will be sent by telegraph to headquarters, and as soon as the 2,300 men have been enrolled orders to cease enlistment will be telegraphed to all points. It will therefore, be a case of "first come, first enlisted."

The rates of pay will be the same as the Second Mounted Rifles. It is understood that lighter horses will be taken, the idea being that with light and smaller horses greater mobility can be secured.

There is still a good deal of speculation about the commands of the four new corps. It is said Major Merritt and Major Cameron, now out with Col. Evans, will be given a regiment, but will not return to Canada, the idea being that they shall join their command at Cape Town or Durban. Each regiment will be composed of four squadrons of 125 men, exclusive of officers. It has also been settled that all the men mobilize at Halifax instead of Quebec, the conveniences of the imperial dockyard at the former place for alterations to transports being held superior to that of the ancient capital.

GRASS LANDS OF BRITAIN.

Of the various crops known to British agriculture the grass crop is by far the most important, whether it be regarded from the point of view of its extent or from that of its value. It is the main source of our home-grown beef and mutton, and of the immense native supplies of milk and its products. According to the latest official returns, those for the year 1901, Great Britain possesses 16,827,249 acres of permanent grass land, or grass not broken up in rotation, and 4,856,387 acres of clover, sainfoin, and grasses under rotation, the total being 21,683,636 acres. As the total area under grass and crops of all kinds is returned at 32,417,445 acres, we get, by deducting from this the 21,683,636 acres of grass land, 10,733,809 acres as the aggregate area of all corn crops, green crops, hops, and bare fallow. In other words, the acreage under grass is double that occupied by all other agricultural crops together. It should be understood that the acreage of grass here indicated does not include mountain and heath land, of which there are some 13 million acres used for grazing. About one-half of the rotation grass and about one-third of the permanent grass are mown annually for hay, the remainder in each case being exclusively grazed. Last year the mown area was nearly seven million acres, and the area not mown was close upon 15 million acres, so that the latter is rather more than double the former. These figures are sufficient to demonstrate the great extent of the grass crop and the vast importance of the pastoral industry in this country. So much wealth, indeed, is stored up in our grass-covered acres that no means should be neglected of adding to their productive capacity, whether in their yield of fodder in the form of hay or silage or in the more direct production of meat and milk as the result of grazing.—London Times.

A FAMILY ASPHYXIATED.

Hamilton, April 9.—James Nehine, who was asphyxiated by coal gas from the furnace in his house Sunday night, died early yesterday morning, without having regained consciousness. Physicians in attendance say Nehine's wife cannot recover. His 8-year-old son, who was also unconscious from the same cause, has now nearly recovered. Nehine was about forty and for many years was engineer of The Times Printing company's establishment.

AN AWFUL JUMP.

Montreal, April 9.—Mrs. F. X. Thouin, a patient in the hospital Au Clair, leaped from a fourth story window of the hospital and killed herself. She was mentally deranged.

DUKEDOM FOR SALISBURY?

London, April 9.—It is understood that King Edward is taking advantage of his cruising holiday to complete the task of settling the list of honors to be conferred upon the occasion of his coronation. This list will include a dukedom for Lord Salisbury.

PRINCIPAL GRANT'S OPINION.

He Thinks a Great Deal of Nonsense Has Been Written About Cecil Rhodes' Will.

Kingston, Ont., April 9.—Principal Grant is not an admirer of the late Cecil Rhodes, and when asked for an expression of opinion on the imperial aspect of the will of the deceased, remarked with some degree of vigor:

"In my opinion a great deal of nonsense, or rather inflated language has been used in reference to it, especially in the London press. I believe the effects will be by no means as great as the papers seem to imagine. But it is better, perhaps, not to discuss a will until its full text is before us. However, so far as reported, not a few of his notions seem to me to be impractical and characteristic of the egotism of the man. My opinion of the late Cecil Rhodes has not been changed in the slightest by his will, but it may be better to say nothing about a man who is now dead and not buried. I do not believe that imperialism in the true sense of the word is likely to be permanently benefited by the legacies of Rhodes, any more than the people of Rome were benefited by the few drachmae which Ceaser left to each citizen by his will.

DOESN'T LIME THE U. S.

A Disgusted American is Selling Out and Leaving for England.

New York, April 9.—"I am going to leave America entirely and become a British subject, because there is no justice to be obtained in the American courts. Any English pettifogger knows more than your Supreme court justices, and only the United States Supreme court justices can compare with an ordinary English justice."

In this fashion Charles W. Lynde, of Patchogue, Long Island, announced that he intended to expatriate himself. He is one of the wealthiest residents of Long Island, his fortune being estimated at close to a million dollars.

He intends to sell out all his American real estate, convert his American securities into British gold, and sail for England with his second wife, deposit his fortune in the Bank of England, and take up his residence in Kent, England.

A MIXED CARGO.

London, April 9.—The breaking up of the French bark Russie, bound for Newfoundland, which went ashore on the rocks near St. Catharines, ordinary scenes. The crew, who ordinary scenes. The crew, who were saved reported that her cargo consisted of salt, in casks, but scores of casks, containing an aggregate of thousands of gallons of wine and spirits, were washed ashore, and the inhabitants for miles around flocked to the spot, broached the casks and drank or carried off immense quantities of the liquor before the customs authorities and police arrived on the spot.

BRIEF NEWS NOTES.

Lord Kimberley, the Liberal statesman, who has been ill for some time, died on April 8.

Nearly every man you meet thinks he can tell a funny story, but about nine out of ten are entitled to another think.

Rat Portage town council has purchased the plant and franchise of the Elertric Light company of that town.

Major Charlie Ross, of the Canadian Scouts, in a letter to an Ottawa friend, said the Boer war would be over in two months.

The fourth contingent will sail in three weeks.

King Christian of Denmark celebrated his eighty-fourth birthday.

The British fleet at the coronation will comprise 120 warships.

The freedom of Aberdeen will be conferred on Lord Strathcona.

Dawson City council members have fixed high salaries for themselves.

Rt. Hon. A. J. Balfour has stated there is no peace news from South Africa.

Messrs. John and Alex. McKay, of the Portage Plains, narrowly escaped drowning in the floods.

The British admiralty will name two new battleships in honor of Canada and Australia.

Colingridge, for ill-treating a Barnardo boy, received a four months' sentence at Brandon assizes.

Major-Gen. George Arthur French, who organized the Northwest Mounted police thirty years ago, is in the west.

Cattle prices in the west may be affected by the pooling arrangements made by Atlantic steamship companies.

The Winnipeg board of trade, at a meeting, discussed the Intercolonial railway, the Japanese exposition, Canada shipbuilding and the tariff.

DAWSON CITY DO'NGS

BUDGET OF NEWS ITEMS FROM THE CITY OF THE MIDNIGHT SUN.

IT INCLUDES A "PIPE DREAM," A SUICIDE, AND A CITY COUNCIL SURPRISE.

Dawson City, April 10.—No further information has developed in reference to the petrified ship of ancient times, alleged to have been found at the headwaters of the Porcupine. The story was brought here by Frederick Lischke, from Coldfoot, Moyukuk, a former printer on the Sun. He insists that the story is true, but it is not believed here, being vulgarly considered a "pipe dream." Lischke arrived on March 8, and others arriving here since do not confirm his narrative.

There is considerable local excitement and some indignation in consequence of the city council having introduced at its last meeting a bylaw providing a salary of $3,000 for the mayor and $2,000 each for the aldermen for the balance of the year, about nine months. Four of the six aldermen elected went in with a plank in their platform of "no salaries for aldermen." There is talk of a mass meeting, and resignations will be asked for if the bylaw is passed.

Joe Dumbill, a warehouseman, of the Pacific Cold Storage company, attempted to commit suicide on Saturday week by sending a bullet into his head. He lost one eye, but is still alive and will recover. He confessed to a plot to defraud the company by the sale of meats. The plot implicates Arthur Borden and Albert Beckwith, both of whom have been arrested.

Miles Tomerlin, the "tall man" of the Dominion saloon hold-up case, escaped trial by a "nolle prosequi," entered by direction of the attorney-general, having turned King's evidence. He was liberated on Saturday morning and surreptitiously sent on outside under guard, for fear of the vengeance of his companion crooks. The facts were first known today. Brophy, his pal, is doing life, and Harris has not been sentenced.

The Canada Atlantic's winter port will be St. John, N. B.

W. Ham, of East Toronto, killed himself while intoxicated.

Ven. Archdeacon Lofthouse has been selected for the bishopric of Keewatin.

King Leopold, of Belgium, was mobbed by Socialists in the streets of Brussels.

The Ottawa, Western and Northern railway has been purchased by the C. P. R.

The proposed semi-professional baseball league in Manitoba has fallen through.

Corporals Kinsley and Dey, of the Canadians, were shot by the Boers while prisoners.

The contract for the new C. P. R. elevator at Fort William has been let to a Minneapolis firm.

The French cruiser Protet saved the city of Panama from being bombarded by the insurgents.

A large egg cold storage warehouse for the Canadian product will be established in Chicago.

Frank Mieville, of Rat Portage, a member of the Canadian contingent in South Africa, is dead from fever.

Indications are that the Boers in Transvaal desire to surrender in a body. Free States are still obstinate.

Sergt. J. F. Sears, of Fort Meade, U. S., received $750 of the reward offered for Walter Bordon's captur?.

Having redeemed all his financial obligations, Mark Twain has purchased a home in Tarrytown, on the Hudson.

The remains of Cecil Rhodes were taken to Matoppo Hills. A crowded funeral service was held in Buluwayo.

Prospects are that the entire population of the Danish West Indies will vote on the plebiscite, thus shouldering all the responsibility of the sale of the islands to the United States.

The Northwest Territories deputy minister of agriculture, Mr. C. W. Peterson, expects to see two hundred thousand people settle in the Territories this year.

A theatrical combination is being formed to control all the first class theatres from St. Paul to Portland, Ore., including Winnipeg.

It is reported that ex-President Steyn is going blind.

The all-British Pacific cable has reached the Fiji islands.

William Marconi, the inventor, has sailed for England for a two months' rest.

FERNIE FREE PRESS.

FERNIE, B.C.

ATLANTIC PULP AND PAPER COMPANY, LIMITED.

The prospectus of the recently organized Atlantic Pulp and Paper Company, Limited, is being sent out this week by the brokers, Messrs. Sutherland & Cameron, Ottawa. The capital stock of the company is $3,000,000, and its property is situated on the Little Cascapedia river, at New Richmond, on the north of the Baie des Chaleurs. Prospectuses and application forms may be had from any office of the National Trust Co., Limited, Toronto or Montreal, or Sutherland & Cameron, Brokers, Ottawa, Canada.

A man who lives right, and is right, has more power in his silence than another has by his words. Character is like sweet bells which ring out sweet music and which, when touched, accidentally even, resound with sweet music.—Phillips Brooks.

Messrs. C. C. Richards & Co.

Gentlemen,— After suffering for seven years with inflammatory rheumatism, so bad that I was eleven months confined to my room, and for two years could not dress myself without help. Your agent gave me a bottle of MINARD'S LINIMENT in May, '97, and asked me to try it, which I did, and was so well pleased with the results that I procured more. Five bottles completely cured me and I have had no return of the pain for eighteen months.

The above facts are well known to everybody in this village and neighborhood.

Yours gratefully, A. DAIRT.
St. Timothee, Que., May 16, 1899.

The man who cannot break the bonds of experience, but holds only to the region of sensible facts, may be an excellent observer, but he is not a philosopher, and can never reach the principles that bind the facts of science together.—Tyndale.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address F. J. CHENEY & CO., Toledo, O.
Sold by Druggists, 75c.
Hall's Family Pills are the best.

Nothing more exposes us to madness than affecting to make ourselves different from others, and nothing assists more to maintain our common sense than a life spent in the common way amidst general society. —Goethe.

Piles To prove to you that Dr. Chase's Ointment is a certain and absolute cure for each and every form of itching, bleeding and protruding piles, the manufacturers have guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get your money back if not cured. 60c a box, all dealers or EDMANSON, BATES & CO., Toronto.

Dr. Chase's Ointment

Patience and strength are what we need; an earnest use of what we have now; and all the time an earnest discontent until we come to what we ought to be.—Phillips Brooks.

MINARD'S LINIMENT Relieves Neuralgia.

Love
Will catch the likeness of the thing
beloved.—H. Coleridge.

A DINNER PILL—Many persons suffer excrutiating agony after partaking of a hearty dinner. The food partaken of is like a ball of lead upon the stomach, and instead of being a healthy nutriment it becomes a poison to the system, Dr. Parmelee's Vegetable Pills are wonderful correctives of such troubles. They correct acidity, open secretions and convert the food partaken of into healthy nutriment. They are just the medicine to take if troubled with indigestion or dyspepsia.

The man is hateful to me as the gates of the death kingdom who hides one thing in his mind and utters another.—Homer.

No one need fear cholera or any summer complaint if they have a bottle of Dr. J.D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly and causes a healthy and natural action. This is a medicine adapted for the young and old, rich and poor, and is rapidly becoming the most popular medicine for cholera, dysentery, etc., in the market.

In all contentions let peace be your object, rather than triumph; value triumph only as a means of peace.—Sydney Smith.

Every day I see more how necessary it is to be consistent, uncompromising and gentle; but often, perhaps, when a word would not be borne, an act of forbearance or self-denial might be remembered in a cooler moment.—A. Hare.

LUMBAGO CURED.

A SERIOUS CASE OF THIS PAINFUL DISEASE IS RESTORED TO GOOD HEALTH.

Satisfactory Improvement Leads to a Continued Treatment Which Results in a Complete Cure—An Interesting Story Which Will No Doubt Profit Anyone Suffering With Lumbago.

Holyrood, Ont., April 14.—(Special)—Mr. Bat. Pinnell, of this place, has for the past two years been a great sufferer with that most painful and stubborn disease—Lumbago.

The pain he suffered was almost beyond description and many were the medicines and treatments he used to try and get some relief. However, nothing he could find seemed to help him in the least, and he became very downhearted.

At last someone suggested Dodd's Kidney Pills, and Mr. Pinnell, although very skeptical, thought he would make one more trial for a cure, and began to use them.

The first box did not do him very much good, and after he had used part of the second he began to feel a change for the better, so he kept on until he had used in all seven boxes, when he was delighted to find that every symptom of the Lumbago had entirely disappeared.

His general health is much improved and he fells better today than he has for years.

To say that Mr. Pinnell is pleased does not begin to express it. Only those who have suffered as he did with this very painful disease can understand the extreme satisfaction of one who has found a complete cure and restoration to health and strength.

Lumbago is a direct result of disordered kidneys, and should always be treated as a Kidney Disease.

Efforts to cure or even relieve by outward applications are invariably unsuccessful. Rubbing may in itself for the time being produce a little relief, but in order to secure a complete cure it is absolutely necessary to go right to the root of the trouble.

The Kidneys must be restored to their normal condition. This is just what Dodd's Kidney Pills do, and this done the lumbago very soon leaves, for without diseased kidneys there can be no lumbago.

Mankind born in its lowest state has always discovered that Superior Mind acts in the universe.—Francis W. Newman.

Are your corns harder to remove than those that others have had? Have they not had the same kind? Have they not been cured by using Holloway's Corn Cure? Try a bottle.

Every right action and true thought sets the seal of its beauty on person and face.

Minard's Liniment Cures Burns, Etc.

Affliction is the heaviest soil that patience has to furrow, but it is also the most fruitful.—James Buckham.

Mrs. Celeste Coon, Syracuse, N. Y., writes: "For years I could not eat many kinds of food without producing a burning, excrutiating pain in my stomach. I took Parmelee's according to directions under the head of 'Dyspepsia or Indigestion' One box entirely cured me. I can now eat anything I choose, without distressing me in the least." These pills do not cause pain or griping, and should be used when a cathartic is required.

The great man is he who in the midst of the crowd keeps, with perfect sweetness, the independence of solitude.—Emerson.

TITLED LABORERS.

Anxious to keep on the right path let us begin this brief survey of facts by reference to my lady. We may look upon a day or two lately spent by a countess, and thank ourselves that we belong to another set, a set in which the hours of work and the hours of leisure are a little more clearly defined.

The Countess of Warwick must certainly rank among hard-working women. On a recent morning, by her own open confession, she got up at 5 o'clock and in her slippers prepared the excellent little speech she delivered the same evening at Goldsmith's Institute, to the happy prize-winners, and students of the 38 evening continuation schools of Greenwich.

Then she worked hard during the next day at her own Agricultural College, at Reading, hurrying thence at tea time to catch a train for London. Across London she flitted, arriving at the place of meeting between 8 and 9 o'clock, whilst the Blackheath Science and Art and Commercial School Choir was singing, "Oh, for the wings of a dove, then would I fleet away and be at rest."

And her Ladyship's hard labors did not even end with distributing nearly 300 prizes, for in order to get a night's repose she had yet to flee right away to Bradford, where she was due to arrive in the early hours, to rest, let us hope, ere she undertook further work for which she had engaged herself the following morning!

Lady Jeune, the wife of one of the King's most famous judges, is another titled woman to whom hard labor appears to come as a blessing. Her ladyship will frequently work hard at her desk all day till well on into the afternoon—for she is a prolific writer—she will then turn out to visit one of the girls' friendly societies in which she is actively interested, afterwards driving home to receive half a dozen callers, and ending up by attending some important meeting or function with the judge. Sixteen hours a day, rather than eight, is her limit.

A little more than a year ago Lord Cross was a Cabinet Minister, and retired on account of his years, which are now close on 80. The other day he was seen in the neighborhood of Fleet street, smoking a big cigar, and cheerfully facing the dangers of the crossing at Ludgate Circus with an agility which would have moved many a man of 50 or even less to envy, had they been there to see. Viscount Cross has always lived a strenuous life, and now that he is, presumably, too old for state service, he delights in devouting his energies to commercial matters, which take him frequently into the city.

All who are interested in seafaring matters, or who have a love for our splendid navy, know the name of Lord Charles Beresford. Let it be whispered gently, for fear his Lordship should take exception to the title, that he is called by some persons a busybody. His great activity is simply a thorn in the flesh of many of his friends and acquaintances. When he has anything special on hand he will work all day and half the night, merely snatching his food in a manner that would be enough to cause half our overworked shop assistants who live in to go out on strike were they expected to follow his example.

In order to get at figures and facts with which to confound the First Lord of the Admiralty, Lord Charles Beresford will work like a horse. The friends and supporters who aided him when he became member of Parliament for York were utterly astonished at his capacity for work during the exciting days that preceded his successful return to Westminster.

Lord James Hereford's name is beloved by many a thousand men and women by reason of his great services in connection with labor troubles. His sound reasoning abilities have on several occasions brought peace and good will into evidence during recent years where employers and employed have been at loggerheads for weeks and weeks. The workers and their wives and families have been on the vetge of starvation in more than one struggle that has been brought to a happy ending mainly through the logic and calm judgment of Lord James. No man has less cause for working in this difficult field than he. As a close personal friend of the King, as a man of wealth and assured position, and as one who has already borne a brave part in the duties and exertions of the professional world, he has every claim to a restful and quiet retirement, yet for the sake of others, he renders invaluable services, much to the profit of the laborers and the labor masters.

The last business to engage his attention was the very important lead poison arbitration question between pottery manufacturers and the Home Office, respecting the special rules which the department had proposed in order to minimize the effects of lead poisoning.

Such are but a few instances in which my lord and lady voluntarily serve terms of hard labor. After all, there is sweetness and happiness to be got through real hard work unattainable by another means, and, fortunately, many of our highly placed fellow men and women have discovered the fact.—Pearson's Weekly.

If you are tired reading Blue Ribbon Tea advertisements, take a cup of the tea itself and you will be in a good humor again.

Every druggist knows how to make something that is better, in his judgment, than some articles that have made fortunes.

FOR EVERY MOTHER.

A Manitoba Mother Gives Practical Advice on the Care of Babies.

It is well known that nearly all infant troubles spring from a disordered stomach. Indigestion in a child will cause at first peevishness and sleeplessness, but other more serious troubles will follow fast, such as colic or cramps, constipation in some cases, diarrhoea in others, with fatal results in many cases. The mother who neglects having constantly at hand the means for treating these ills takes an awful risk. Mrs. R. L. McMillan, Logoch, Man., is one mother who is particularly well fitted to give advice on the care of babies. Her standard medicine for the minor ailments of her little ones is Baby's Own Tablets, and she says: "They are the best medicine I have ever used for infant ailments. I have given them to my baby for indigestion and stomach trouble and they are prompt and thorough in making a cure. No mother should be a single day without the Tablets in the house."

Baby's Own Tablets are for children of all ages, and will cure such troubles as constipation, colic, sour stomach, diarrhoea and simple fevers. They are invaluable for teething children, and will break up colds and prevent croup. Guaranteed to contain no opiate or other harmful drug. Dissolved in water they can be given with perfect safety to a new-born babe. Sold by all dealers in medicine or sent post paid at 25 cents a box by addressing the Dr. Williams Medicine Co., Brockville, Ont.

Thomas A. Edison has taken out nearly eight hundred patents on his various inventions.

MINARD'S LINIMENT for Sale Everywhere.

Wit is a peculiar kind of talk that often leads to pulled noses and broken heads.

An agreeable man is he who consents to be taught things which he already knows.

Five presidents of the United States have been of Scotch-Irish descent.

The wealth of a man is the number of things he loves and blesses, and by which he is loved and blesses.—Carlyle.

Totally Deaf.—Mr. S. E. Crandell, Port Perry, writes: "I contracted a severe cold last winter, which resulted in my becoming totally deaf in one ear, and partially so in the other. After trying various remedies and consulting several doctors, without obtaining any relief, I was advised to try Dr. Thomas' Eclectric Oil. I warmed the oil and poured a little of it in my ear, and before one-half the bottle was used my hearing was completely restored. I have heard of other cases of deafness being cured by the use of this medicine."

The entire nature of man is the garden which is given him to cultivate.—Gladstone.

The healthy glow disappearing from the cheek and moaning and restlessness at night are sure symptoms of worms in children. Do not fail to get a bottle of Mother Graves' Worm Exterminator; it is an effectual medicine.

If you wish success in life make perseverance your bosom friend, experience your wise counsellor, caution your elder brother, and hope your guardian genius.—Addison.

MINARD'S LINIMENT Cures Dandruff.

The only faith that wears well and holds its color in all weather, is that which is woven of conviction and set with the sharp mordant of experience.—J. R. Lowell.

Monkey Brand cleans and brightens everything, but won't wash clothes.

When an old bachelor likes babies, all the women say it's a shame he never married.

In many families they don't have cream for breakfast, but have, instead, the top of the milk.

The dressmaker believes in the eternal fitness of things.

A wise man never gives advice until he is asked for it.

Why not be eccentric by praising people?

The royal crown of Pessia, which dates back to remote ages, is in the form of a pot of flowers, surmounted by an uncut ruby the size of a hen's egg.

Compositors must be jolly good fellows, for they are always setting 'em up.

A man is always on time when he has an appointment with a pretty girl.

Strangers are cordially invited.

REV. R. F. STILLMAN, - - Pastor.

HAD A NARROW ESCAPE.

Conductor Grow had a close call for his life on Monday morning. He was on a box car which was being pushed up upon the top of the C. P. R. bunkers. The car was moving along at a lively rate, and when the highest portion of the bunkers was reached, a telephome wire, strung across the same, caught Grow about the neck. The force of the inpact was very great, the conductor being thrown several feet. Fortunately he alighted upon the deck of the car and escaped with a severe snaking np. Had he missed the car in falling he would have had a sheer drop of 40 feet. It is said that box cars are very seldom run up on the bunkers so that the trainmen had no knowledge of the low wire. The wire was raised immediately after the accident.

Services Were Appreciated.

John Bastian, who for several months past filled the position of organist in the Methodist church, left this week for Frank where he will make his home for the future. Prior to his departure the members of the Methodist church took the opportunity of expressing their appreciation of Mr. Bastian's services as organist and presented him with a handsome gold locket accompanied by an address testifying to their appreciation and good will. The address, which is appended, was signed by Rev. R. F. Stillman, Ethel Church and Lettie Mott on behalf of the congregation:

"We the members of the congregation of the Fernie Methodist church, having learned with regret of your intended departure from our midst, beg leave to express to you our high appreciation of the services you have rendered to the church in the capacity of organist.

"It is beyond our power to offer you reward for your talented services, which have contributed much to make our worship helpful, and add life and spirit to our public worship. We beg you to accept this locket as a slight token of our respect and appreciation and trust that it may ever remind you of the good times spent in Fernie. We pray God's blessing to follow you to your new home and abide with you forever."

Merchants Will Organize

A movement is on foot among the merchants of Fernie and the other coal mining points to form a protective association. One of the objects sought is the regulation of the credit system, so that the merchauts will no longer be preyed upon by a class who never have and never will pay for what they get. The idea is for the merchants of the different points to compare notes and in this way spot all whose accounts are not worth carrying.

New Manager Appointed.

Elias Rogers came here accompanied by W. H. Storrs, of Scranton, the great Pennsylvania coal mining centre. It is said that Mr. Storrs is to be the new manager of the Crow's Nest Pass Coal Company—a position which has been vacant for the last six months. Mr. Rogers has, it is said, been over the Pennsylvania coal fields searching for the right man for the place, with the result indicated.—Montreal Herald.

The coal company has decided to place a number of residental and business lots on the market. Intending purchasers can secure full particulars upon application to T. C. Thompson. This should be a first class opportunity for those who desire to secure Fernie realty upon reasonable terms.

Born in Fernie, on Thursday, the wife of R. Hammond, of a son.

Three men were more or less severely burned on Thursday by an explosion in No. 3 mine on Coal Creek.

Wm. Keay, deputy collector of customs for the outport of Fernie, has been confined to his room for the past three days. He is suffering from a severe attack of tonsilitis,

F. J. Watson has an advertisement in this issue of the FREE PRESS which should be read by every man who intends to make Fernie his home. Watson tells you how you can avoid paying rent without dodging the sherriff.

GENERAL NEWS.

Sir John Bourinot, clerk of the House of Commons, had a close call for his life last week. He swallowed some iodine in the dark, by mistake, but a physician who was immediately summoned saved his life.

Walter Gordon, who was arrested at Halifax upon the eve of his departure for South Africa, has been adjudged guilty of the Whitewater murders. He will be hanged on June 20th.

The Ottawa government has declined to consider the request of premier Haultain for the creation of the Northwest Territories into a new province. The governments answer was that the time was not ripe for such action, and that in view of the rapid manner in which immigrants were pouring into the territories conditions might be greatly changed within the next year.

There was considerable uneasiness about town on Tuesday evening owing to rumors of a serious accident at one of the Coal Creek mines. No one seemed to know just what had happened but the story of an explosion in No. 1 was quickly circulated. The train made a special trip up shortly after 8 o'clock, and a large crowd was waiting at the depot, upon its return, for particulars. Fortunately there was nothing very serious in the report. There had been nothing in the way of an explosion but a miner named Moodie got his foot crushed by an ore car which necessitated his being brought down to the hospital.

Llewellyn C. Williams, teacher of piano, mandolin, guitar, cornet, alto, tenor, trombone, baritone, euphonium, tuba, etc. Music arranged for all instruments. Orders taken for all music. Opposite Royal Hotel, over tailor establishment. Call from 1 p. m. to 6 p. m.

The services at Christ church to-morrow, April 20th, will be as follows: Matins and Holy Communion at 11 a. m.; Sunday School and young men's bible class at 2 p.m.; Evensong at 7.30 p.m.

The ladies of Christ church will give a flower social in Princess hall on Tuesday evening next. This is something novel in the way of entertainments and prizes will be awarded to those giving the greater number of correct answers.

The Ladies' Guild of Christ Church will hold a social in Princess Hall, Tuesday evening, April 22nd.

THE B.C. ESTIMATES

E. KOOTENAY GETS SMALL APPROPRIATIONS.

Government Buildings for the New Riding of Fernie Have so far Received No Consideration.

The Provincial estimates were submitted in the Legislature this week. They place the total revenue of the Province from all sources at $2,222,568.69, and the expenditures at $2,486,127.31, which means an estimated deficit of $263,558.66. Of the total revenue, however, $305,968.-55 is estimated as due the Province from the Dominion, so that the total amount estimated from the Province itself becomes $1,916,000, inclusive of the refund from the Chinese head tax.

The estimates of revenue demonstrates as clearly as possible the importance of British Columbia mineral resources to the tax gatherer, and furnishes the members from the mining sections with every justification for urging generous treatment in the way of appropriations for their further development. There are four special heads of taxation for the mineral resources of the Province, which, taken together, are expected to yield $535,000 during the next fiscal year, or something over 27 per cent. of the entire revenue raised within the province. These different heads, with the amounts expected from them, are as follows: Free miners' certificates, $100,000; mining receipts, general, $175,000; mineral tax upon output, $130,000; and coal royalties, $130,-000. These sums, however, by no means represent the amount of the total contributions of the mining sections of the province, since in addition to them the people of the mining districts are called upon to bear equally with the rest of the Province the ordinary forms of taxation.

Taking the white population of the Province at 177,275, the figures upon which the federal per capita grant is based it will be seen that the statement of the finance minister contemplates that every man, woman and child resident in the Province shall pay into the Provincial Exchequer something over $10.00 for the privilege of so doing. This is not very alarming, but when the women and children are left out of the calculation, as they may safely be in dealing with the tax gatherer, it will be seen that a ten dollar bill will come a long way short of satisfying the requirements.

A fair idea of the number of taxpayers in the province may be gathered from the Finance Minister's estimate of the revenue tax proceeds. This is commonly called the school tax and provides for the payment of $5 by every male between the ages of 18 and 60 years. From this source the government estimates a revenue of $150,000, which indicates the number of such persons at 30,000. This is a head tax which is payable by every male resident of the Province between the ages named, and when it is stated that the estimate from this source for the next fiscal year will fall $262,140 short of the estimated expenditure upon education, one of the difficulties which the Finance Minister complains of, will be understood.

Coming nearer home some interest attaches to the amount which the South riding of East Kootenay is stated to get out of the provincial jack-pot. It amounts to $14,500 for roads, streets, bridges and wharves, and the north riding is down for an equal amount. Some further appropriations may be made in the supplementaries, but at present this sum may be taken as the sum total of South East Kootenay's expectations.

A CHALLENGE.

To the Editor.

It has come to my hearing that James Milne has made the statement that in the wrestling contest which took place in Princess Hall, on March 15th, that he was promised a sum of money to allow me to win the contest. I, therefore, do hereby challenge the said Jas. Milne to another contest and agree to throw him four times in one hour.

A. HALLET.

WEDDING BELLS.

The marriage of Miss Jessie C. McLeod, daughter of Mr. Malcolm McLeod, to Mr. Joseph Parker, took place on Wednesday evening at the home of the bride's father, Victoria Ave. The ceremony was performed by the Rev. D. L. Gordon, in the presence of a number of relatives and immediate friends. The bride was waited upon by Miss Sadie McRitchie, while Mr. T. Davis ably supported the groom. When the words had been spoken that made them husband and wife and congratulations and good wishes extended, all sat down to a sumptuous wedding dinner, where felicity and good fellowship reigned supreme. The bride was remembered by her numerous friends with many valuable and appropriate presents. All join in wishing the young couple a long and happy wedded life.

WHELAN GOT DECISION

FIVE ROUNDS OF HARD FIGHTING.

Milne Too Many for Whelan, but Latter Wins on a Foul—Event Witnessed by a Large Crowd.

The boxing contest between Con Whelan and James Milne, which has been the source of much talk and speculation in Fernie sporting circles for the past month, took place in Princess Hall, on Monday evening and was witnessed by the largest crowd that has ever turned out to an affair of this kind in this district.

Both men have been undergoing some hard training for several weeks and were in the pink of condition. It was conceded by all that Whelan was much better scienced than his apponent, and it was thought that this would more than make up for what he lacked in weight, but this did not prove the case, as Milne was very strong and active and did not seem to mind his oponent's most scientific blows.

The men took their position in the ring about 9.45, each looking confident. The difference in weight was very apparent, Whelan weighing nearly thirty pounds less than his apponent.

In the first round it was hard to tell which was the better man, the fighting was brisk from the start. Con twice landed on Milne's jaw, while the latter got in several stiff body blows on his apponent.

The second round was in favor of Whelan, who landed repeatedly on the jaw, avoiding the fierce lunges of his apponent in an able manner. The round closed with both men still in good condition.

The third round was contested from start to finish, but the heavy blows of Milne were beginning to tell on his apponent. Milne's blows were all directed to the body, while Whelan endeavored to put his apponent out with a blow on the jaw, but although he seemed to have no trouble to land, the force of the blow apparently had little effect.

In the forth round Whalen suffered severely without being able to hurt his apponent. He was knocked down twice and appeared to be suffering keenly when the gong sounded.

In the fifth round Milne lost his head and proceeded in to do up his opponent at the start. He landed on Con's breast with the left, sending him back in his corner and while still down struck him with the right. This of course being contrary to the rules, the decision was given to Whelan.

This was Milne's first boxing contest and although he shows wonderful strength and agility, his ungovernable temper would be almost sure to lose him any fight which he would enter no matter how much better man he may be. At one stage in the contest he was on the point of striking the referee who happened to accidently get in his way.

Con. Whalen put up a good clean fight and showed that he understood the game, but thirty pounds difference is a big thing to combat, and he realized it. If Milne had been his own weight he would doubtless have worsted him in the contest.

James Burrows referred the fight and his decisions were fair, no one disputing him when he ruled that Milne had fouled his opponent.

There was considerable excitement after the affair, but the police were very much in evidence and soon reduced the crowd to order. It is said that considerable money changed hands on the result of the fight, as both young men are quite popular and had no trouble in getting backers.

BURIED IN THE SAND

JOHN DUDIC LOSES HIS LIFE IN A SAND CAVE-IN.

Buried Alive he Smothers Before Neighbors can Extricate Him from the Sand.

A terrible accident occurred at Michel on Tuesday of this week which resulted in the death of a Hungarian laborer named Joe Dudic.

Dudic and a companion were engaged in taking out sand from a pit near the station, and had worked their way in several feet into the wall, when without the slightest warning the ceiling collapsed, burying the Hungarian beneath tons of sand. His companion called a number of men to his assistance and they worked hard to extricate the buried man. In a short time they had succeeded in uncovering the man's head and shoulders and he gave evidence of being still alive, unfortunately when they reached this stag another cavein occurred and the poor man was again buried before their eyes. Two of the rescuers having a narrow escape from also being buried. Willing hands again went to work but when he was finally taken out he was beyond recovery, although Dr. McSorley, who was on the scene a moment after the accident occurred, worked for hours to resuscitate the man, but his effects were unavailing.

Coroner Trites was notified of the affair and he and H. W. Herchmer went down Tuesday night to investigate, but came to the conclusion that no inquest was necessary.

The remains were interred in Michel cemetery. Father Milleux, of Fernie, officiating at the burial.

MICHEL

The annual meeting of the Kootenay district in connection with the Methodist church will be held in Nelson on Tuesday and Wednesday, May 6th and 7th.

The annual meeting of the official board of the Methodist church, Michel, was held in the parsonage on Monday evening, April 21st. Rev. T. H Wright presided. Progress has been made in every department of church work. The numerical and financial reports were gratifying and showed great increase over last year. Mr. Edward Briscoe was appointed Sunday School superintendent and was elected to attend the annual district meeting at Nelson. The pastor was the recipient of a hearty vote of thanks for the way he has conducted the services during the year.

(Too late for last week.)

A social was given by the ladies of the Presbyterian church on Saturday evening last, being a farewell gathering in connection with the departure of Mr. T. R. Peacock, who has had charge of the Presbyterian mission here. Various games and a short program, together with a bounteous luncheon, made a very pleaant evening. Two kindergarten selections in which Misses Gladys Fraser, Helen Fraser, Pearl Minion, Harriet Kennedy, Gladys Pettingale, Helen Gordon, Francis Fuchs and Marie Fuchs took part, were most heartily received. A rare treat was given by Miss Kennedy and Mr. Peacock in the rendering of the Scotch solo, "When Ye Gang Awa' Jamie". A comic song in character by Mr. Bert Tullidge entitled, "There's a Home for You and Me", was also very much enjoyed. Mr Peacock left on Monday evening to finish his studies in Manitoba College, Winnipeg. His work among us has been productive of much good, his earnest manner and eloquence drawing one to a closer realization of a Christian's duties. Mr. Peacock was much liked by the young men of Michel for his work among them both in a temporal and Christian way, and many citizens regret his departure. Over one hundred were in attendance at the social.

THE people of Nelson are holding public meetings and raising all kinds of indignation by reason of the government neglect to place in the estimates a sum sufficient to provide a new court house. The Nelson people evidently believe in kicking. What does Fernie propose doing? It is now a seperate riding or district. Its people had Fernie cut off from Fort Steele so that there should be no rivalry between the two places as to which should be the government centre. Fernie therefore expects government buildings; but there is no mention of them in the estimates. Is it not time to move? Something may yet be done with the supplementary estimates. If there is any merit in kicking why not get the people of the town together and kick? Fernie requires a court house and jail much more than Nelson requires a new building to replace its present court house. By all means let Fernie kick.

THERE are two ways in which the people of Fernie can secure incorporation. The one is by complying with the requirements of the Incorporation Act of 1899, and the other by securing the passage of a special act. The latter method, while it can only be followed when the legislature is in session, appears to be the most popular. Briefly the requirements of the general act are that a petition praying for incorporation shall be presented to the lieutenant-governor in council, signed by the registered owners of at least one half in value of the land to be incorporated, such value of being determined by the last assessment roll. The only restriction with respect to the area to be incorporated is that it shall not exceed 2,000 acres. The act also requires that notice of intention to apply for corporashall shall be given by advertising the same in the local paper for one month.

SERIES OF ACCIDENTS

THREE MEN INJURED AT COAL CREEK MINES.

An Italian has Both Legs Broken—Two Others Sustain Slight Injuries.

Another serious accident occurred at the mines on Monday night when an Italian miner had the misfortune to have both his legs broken. It seems that the man was working alone with the cars in No. 2 tunnel and apparently attempted to stop one by getting in front of it. He was knocked down and the car passing over him crushed him in a terrible manner. The fault seems to have been entirely with the man himself as it was due to his carelessness that the accident occurred.

Two other accidents occurred on the same shift. One resulting in the loss of a finger and the other a severe shaking up.

Mr. Stafford had his hand caught between two boxes and crushed so badly that one finger had to be amputated. The other accident was that of a boy who was riding-the-rope in No. 1. His case is less serious and he will be able to return to work in a few days.

A review of the accidents which have occurred recently in the mines at Coal Creek reveals the fact that they have been in most cases the result of the men's own carelessness or what is more probable ignorance. The large percentage of foreigners among the victims seems to support the latter theory, the knowledge gained by these experiences may and should be lasting but as usual it is expensive.

LACROSSE CLUB ELECT OFFICERS.

At a meeting of the Fernie Lacrosse team held last Friday evening the following officers were elected:

Hon. Pres.—L. M. Proctor.
Pres.—T. Biggar.
Patron—J. R. Pollock.
Vice. Pres.—Dr. Doherty.
Sec. Treas.—H. G. Watson.
Capt.—R. J. Black.
Field Capt—Geo. Reynolds.
Executive—D. Walmsby, J. Miller, R. J. Black.
Mascot—Ed. Cline.

The meeting was well attended and was very enthusiastic, which speaks well for the success of our lacrosse team this season.

Sporting News.

Fitzgerald, the puglist, is again in town, after serving his sentence at Nelson.

A. Hallett, the wrestler, will go to Montana in a few days to wrestle a man named Jones for the middleweight championship of that State.

SIXTY LIVES LOST

DESTRUCTION BY FIRE OF AN OHIO RIVER STEAM BOAT.

THE PASSENGERS WERE ASLEEP WHEN THE ALARM WAS GIVEN.

Cincinnati, April 21.—By the burning, near Olmstead, Ill., of the steamer City of Pittsburg, on the Ohio river, from sixty to seventy lives were lost.

Most of the passengers were still in bed when Second Clerk Oliver Phillips gave the alarm. The engineers at once started all the pumping engines, while the crew brought all the hose into play. Amid the streams of water on all sides, the flames from the lower decks and dense clouds of smoke, the passengers rushed from their staterooms and a panic ensued. Few could adjust the life preservers or do anything for themselves.

The smoke was stifling, choking the passengers, and adding to the terror. Children cried pitifully, begging that they be saved. Lifeboats were manned and every effort was made to save the passengers. Boats were sent from the shore to help in the work of rescue, and passengers were landed at the river banks. As fast as the boats could be emptied they returned to the steamer. The burning steamer was quickly headed to the bank, but passengers were forced to jump from the stern, and trying to swim ashore through the swift current many were drowned. Many also perished in the flames.

BLOWN TO PIECES.

Awful Explosion in a Nicaragua Barracks—One Hundred Soldiers Killed.

Mangua, Nicaragua, April 21.—A severe explosion occurred here on the night of April 16. A large two-storied barrack, situated near the lake front, and in the centre of the city, was blown to fragments. Between one hundred and two hundred have been killed, and many soldiers and other persons are reported to have been injured. A large number of houses near the barrack, including the National hotel, the Central Telegraph Station and the National Palace were damaged or wrecked. The first explosion was followed by several minor detonations, supposed to have been caused by the explosion of packages of gunpowder. The present lowest estimate of the damage caused by the explosion in houses, furniture, cannon and war material, is six million pesos.

FELL OFF A TRAIN.

Tragic Death of Warren Burton, of Hamilton.

Hamilton, Ont., April 21.—An accident which resulted in the death of Warren Burton, barrister, of this city, occurred as the C. P. R. train which left Toronto about 4.30 yesterday afternoon, was passing over the Bronte bridge. Mr. Burton had been in Toronto and was returning to Hamilton. Just before the Bronte bridge was reached, he walked out onto the rear platform of the last coach, and that was the last seen of him alive.

William Harvey, of Hamilton, was sitting at the Bronte station waiting for the accommodation, when the C P. R. express came along. As the train was crossing the bridge over the Bronte river, he saw what he took to be an overcoat fall from the rear platform of the last coach down to the river bank. He notified the stationmaster, and together they climbed down the bank to investigate. They were horrified to find what Mr. Harvey supposed to be an overcoat, was the body of a man. Life was extinct, and the face head and body were badly cut and bruised. Mr. Harvey recognized the body as that of Mr. Burton, and immediately wired to his friends in Hamilton.

CONDENSED NEWS.

Medicine Hat district ranchers between Irvine and Dunmore, have lost heavily by prairie fires.

British millers now want a rebate on flour shipped to Mediterranean and Brazilian ports.

HOW THE CHINESE GET RAIN

Some Peculiar Practices In Vogue In the Celestial Kingdom.

It is one of the peculiarities of the Chinese that, while they have developed elaborate philosophers, none of them has led to any confidence in the uniformity of nature. Neither the people nor their rulers have any fixed opinion as to the cause of rainfall. The plan in some provinces when the need of rain is felt is to borrow a god from a neighboring district and petition him for the desired result. If his answer is satisfactory, he is returned to his home with every mark of honor; otherwise he may be put out in the sun as a hint to wake up and do his duty. A bunch of willow is usually thrust into his hand, as willow is sensitive to moisture.

Another plan in extensive use is the building of special temples in which are wells containing several iron tables. When there is a scarcity of rain, a messenger starts out with a tablet marked with the date of the journey and the name of the district making the petition. Arriving at another city, he pays a sum of money and is allowed to draw another tablet from the well, throwing in his own by way of exchange. On the return journey he is supposed to eat only bran and travel at top speed day and night. Sometimes he passes through districts as greatly in need of rain as his own. Then the people in these places waylay him and, temporarily borrowing his tablet, get the rain intended for another place.

Prayers are usually made in the fifth and sixth months, when the rainfall is always due, and a limit of ten days is set for their effective operation. Under such conditions rain usually falls during the prescribed time. When the prayers are in progress, the umbrella, among other objects, comes under the ban. In some provinces foreigners have been mobbed for carrying this harmless article at that time.

A THIEF AMONG THE ANGELS

Spurgeon Corrected His Opinion of What He Might Do.

One day the mayor of Cambridge, who had tried to curb Mr. Spurgeon's tendencies to sensationalism, inquired of him if he had really told his congregation that if a thief got into heaven he would begin picking the angels' pockets.

"Yes, sir," the young preacher replied, "I told them that if it were possible for an ungodly man to go to heaven without having his nature changed he would be none the better for being there, and then, by way of illustration, I said that were a thief to get in among the glorified he would remain a thief still, and he would go around the place picking the angels' pockets."

"But, my dear young friend," asked the mayor seriously, "don't you know that the angels haven't any pockets?"

"No, sir," replied young Spurgeon, with equal gravity, "I did not know that, but I am glad to be assured of the fact from a gentleman who does know. I will take care to put it all right the first opportunity I get."

The next Monday morning Spurgeon walked into the mayor's place of business and said to him cheerfully, "I set that matter right yesterday, sir."

"What matter?" he inquired.

"Why, about the angels' pockets."

"What did you say?"

"Oh, sir, I just told the people I was sorry to say that I had made a mistake the last time I preached to them, but that I had met a gentleman, the mayor of Cambridge, who had assured me that the angels had no pockets, so I must correct what I had said, as I did not want anybody to go away with a false notion about heaven. I would therefore say that if a thief got among the angels without having his nature changed he would try to steal the feathers out of their wings!"

Black Mirrors.

Crystal gazing is still popular, but the very latest thing in use is a black mirror, in which the sibyls say they can see many things. These little black mirrors come from India, where a spot of ink has always been a favorite vehicle for divination. The native boy who has "the second sight" is told to look fixedly at a spot of ink, which is poured into his hand. The black inirror is said to be every bit as good as the ink, and it is certainly more cleanly. It is made of a piece of black glass set in a wooden frame and is small enough to be held inside the hand.—London Chronicle.

A Suspicious Case.

Greene—Do you suppose Ketchum is honest, or has he designs on me, do you think?

Brown—Why, what has he been doing now?

Greene—He borrowed an umbrella at my house last night, and he returned it the first thing this morning. It looks suspicious, don't you think?

Realism Most Attractive.

"Do you believe in realism in the drama?" asked the friend.

"I do," answered Mr. Stormington Barnes. "Many is the time I would have given a great deal to play Macbeth with a real banquet."

TO BUILD ELEVATOR.

BUFFALO CONTRACTOR TO PUT UP THE FORT WILLIAM STRUCTURE.

UNDER THE CONTRACT WORK MUST BE COMPLETED JUNE 1, 1902.

Montreal, April 19.—Mr. F. J. Webber, the Buffalo contractor, has received the contract from the C.P.R. to build a new steel elevator with a capacity of two million bushels at Fort William. The contract is for one of the two new structures which the C. P. R. decided early in the year to build at Fort William to increase the storage capacity thereby five million bushels.

Mr. Weber, under the terms of the contract, must complete the work by June 1, 1902. The elevator will have two legs, a concrete foundation and steel bins thirty feet in diameter.

CRUSADE HAS COMMENCED.

The Crimes Act Has Been Put Into Force in Ireland.

Dublin, April 19.—Three sections of the Crimes Act have been put in force in a large number of the districts in Ireland by proclamation, issued by Earl Cadogan, the Lord-Lieutenant of Ireland.

These sections provide for summary jurisdiction in cases of criminal conspiracy, intimidation and unlawful assembly, for trial by a special jury and a change of venue at the option of the crown.

The counties scheduled to enforce the foregoing sections of the Crimes Act are Caven, Clare, Cork, Lietrim, Mayo, Roscommon, Sligo, Tipperary and Waterford, as well as the boroughs of Cork and Waterford. These are the districts in which the United Irish League has been most active. The league itself has not yet been proclaimed, but it is believed that this step will be taken shortly.

Detroit, April 19.—Edward Hawley, aged about 41 years, was shot and instantly killed by his brother, James Hawley, who is about 60 years of age, in their saloon at the corner of River and 19th street tonight. Edward, James and Luke Hawley are well known river men and owners of a tug line and other vessel property, and also the saloon in which the shooting occurred.

WILL OTHERS FOLLOW.

London, April 19. — Telegraphing from St. Petersburg, the correspondent of the Times says that the assination of M. Sipiaguine is considered to have been the result of a well organized conspiracy and that anxiety prevails to know whether other victims are marked for removal. While the severity of the government has put an end to the student disorders, continues the correspondent, those among the workmen seem to be increasing, and especially in the provinces. Serious riots are reported from the southern manufacturing districts, but details are difficult to gather. The police have seized manifestos calling for a general strike to begin May Day.

FOR SOUTH AFRICA.

Ottawa, April 19.— Up till today 365 have been enlisted for South Africa in Ontario and the eastern provinces. Ottawa heads the list with 89. It is said that Sergt.-Major Butcher, of "C" school, Toronto, has been appointed a lieutenant. All the officers have been selected and are now awaiting the approval of the war office.

So far the medical officers appointed to go to South Africa with the fourth contingent are Surgeon Major Elliott, of Quebec; Surgeon Capt. A. R. Murray, of New Brunswick; and Surgeon Capt. W. H. Gye, of Chatham, Ont. The fourth has not yet been selected.

HOLLAND'S QUEEN HAS FEVER.

The Hague, April 19.— An official bulletin was issued this morning from Castle Loo stating that Queen Wilhelmina passed a fairly quiet night. Her fever continues. The alarming fever, which complicated the queen's condition, is now officially admitted to be typhold.

A special edition of the official journal this morning publishes the doctor's statement as follows: "The supposition entertained by the physicians since her majesty's illness, has become a certainty. It is now established that the queen is suffering from typhoid fever. Up to the present time the malady has run its ordinary course."

Mr. Geo. Bailey, the Winnipeg vocalist, is dead.

A terrible famine is devasting the Altai region in Siberia.

John Eastman, a laborer, was found dead in a hut in Winnipeg.

Bakers have advanced the price of the bread loaf in Britain one penny.

TWO MURDERS.

A Dying Spaniard Plunges a Knife Into the Heart of His Slayer.

Toronto, April 16.—The attorney-general's department was advised yesterday that a second fatality has followed the stabbing and shooting affray which occurred at Copper Cliff Sunday, April 6. Pietro Postilia, an Italian, came to town that morning and accused one Benedetto, a Spaniard, with having opened love letters addressed to him. The Spaniard was at the table in the dining room when the Italian entered. The latter promptly fired a revolver, the shot piercing the Spaniard's lung. The latter was mortally wounded though he seized a table knife and plunged it into the Italian's heart, killing him instantly. The Spaniard was taken to the hospital, but after lingering a few days he too passed away Both men were employees of the Canadian Copper company.

BLOWN TO PIECES.

Lt. Bourne and Nine Men-of-Warsmen Instantly killed on H.M.S. Mars.

Queenstown, April 16. — Gunnery Lieutenant James H. S. Bourne, Lt. Miller and nine bluejackets were instantly killed yesterday afternoon by the bursting of a twelve-inch gun on board the British first-class battleship Mars, during gun practice off Berehaven. In addition, several men were injured by the explosion.

The breach of the gun blew out after missing fire twice. The bodies of the two men who were sighting the gun were scattered to pieces and blown overboard. The injured seamen were brought ashore here today.

A DESPERATE FIGHT.

Chicago, April 16.—A savage duel with eighteen inch butcher knives, which will probably be followed by two deaths, took place in the kitchen of the Union League club last night. The principals were Emil Colton, butcher, and Jules Kuntz, chef.

Colton's left hand was almost cut off at the wrist, and Kuntz received four wounds which severed eight arteries, his skull also being fractured. The combat lasted fully ten minutes and was witnessed by several other employees of the club, none of whom dared to interfere. The men were not separated until both fell to the floor weak from loss of blood, and still trying to strike each other. Both were unconscious when they were removed from the kitchen.

Colton had been discharged from the club and the trouble arose through his having accused Kuntz with being responsible for his dismissal.

OTTAWA TRAIN FATALITY.

Ottawa, April 16.—Francis A. Graham, of Ottawa East, formerly in the employ of the C.A.R. shops, was struck by a train yesterday and received fatal injuries, from which he died an hour later at St. Luke's hospital. Graham, who was about 44 years of age, was walking along the car tracks, when the Canada Atlantic train from Pembroke rounded the curve and struck and knocked him down, the wheels passing over a part of his body, which was thrown several feet away. The right arm was nearly severed, the skull and ribs were fractured, and the body bruised all over.

STATESMAN ASSASSINATED.

St. Petersburg, April $6.—The minister of the interior, M. Sipiaguine, was shot at and fatally wounded at 1 o'clock yesterday afternoon, in the lobby of the ministerial offices by a man who held a pistol close to the minister's person. The wounded man died an hour later.

THE TRESTLE COLLAPSED.

Sorel, Que., April 16.—One of the trestles of the new bridge of the Quebec Southern Railway, building at St. Francois Du Lac, fell down to-day, killing four men and injuring another mortally.

MURDER IS SUSPECTED.

Toronto, April 16.—The body of Wm. Fowler, aged 74, a well known farmer of York who disappeared last October, was found in a swamp yesterday. He is belived to have been murdered and his body placed there.

JAPANESE MINING DISASTER.

Victoria, B.C., April 16.—A disastrous mine accident in Akitaken, Japan, caused the death of fifteen miners on March 15. They were crushed to death by a cave in, and it took 350 men three days to dig out the bodies.

J. N. Varty, of Fort Saskatchewan, met with a very painful accident when out duck shooting on Wednesday, his gun discharged accidentally blowing a portion of his left hand off.

R. F. Douglas, of Toronto, is to be appointed an inspector in the mounted police. He will take the place of Inspector Scarth, who is now in South Africa.

THE NEWS IN BRIEF

CULLED FROM DISPATCHES FROM THE FOUR CORNERS OF THE WORLD.

The British Columbia labor congress adopted a resolution favoring woman's suffrage.

The price of provincial lands in Manitoba has advanced $1 per acre.

James Magowan was drowned in the swollen waters of the Wascana creek about six miles west of Regina while trying to cross on horseback.

Neighbor: "I hope my daughter's playing doesn't annoy you?"

"Oh, no, not at all! We got our landlord to reduce the rent on account of it!"

The King has contributed £100 to the funds of the Whippingham National schools.

OIL IN ALBERTA.

A Calgary company has struck oil on Cameron creek in Alberta. The well has now reached a depth of 620 feet. When the drill reached 280 feet a slight flow of oil was struck which made its presence known by accumulating on the water pumped from the well; shortly thereafter gas began escaping from the casing. The crude oil is of very heavy consistency and dark green in color, showing a parafine base. The small quantity that can be saved is not a marketable factor, but goes to show that the oil is there, and the supposition is that a large flow will be struck at 1,000 feet.

A MINER KILLED.

At Greenwood, B. C., Geo. Johnson was fatally injured whilst loading a deep hole for blasting a quarry at the Mother Lode mine. It is supposed that he allowed the tamping rod to drop on the powder, causing a premature explosion. Part of his head was blown off, and the right arm and hand badly injured. He lived for about one hour. An inquest was held and a verdict returned of accidental death. The young man has a brother working at another mine near Greenwood.

Married men or widowers are not wanted in the fourth contingent.

FERNIE, B.C.

A Skinning Process.

"This," said the fond father to the dermatological expert, "seems to be a pretty big bill for the treatment you have given my daughter."

"It was a difficult treatment," explained the skin doctor. "You see, we had to remove all the cuticle from her cheeks and graft a new epidermis upon them."

"Well," said the father, reaching for his checkbook, "I don't know which one of us you skinned the most."

Santa Fe.

The oldest capital in the United States is Santa Fe, which was the seat of government in New Mexico as far back as 1640.

Introducing a happy man to a pessimist is like shaking a red rag at a bull.

Blessed is the woman whose husband can always find in the bureau drawer the thing he is looking for.

Politeness is the zero mark of love's thermometer.

Messrs. C. C. Richards & Co.

Gentlemen,— After suffering for seven years with inflammatory rheumatism, so bad that I was eleven months confined to my room, and for two years could not dress myself without help. Your agent gave me a bottle of MINARD'S LINIMENT in May, '97, and asked me to try it, which I did, and was so well pleased with the results that I procured more. Five bottles completely cured me and I have had no return of the pain for eighteen months.

The above facts are well known to everybody in this village and neighborhood.

Yours gratefully, A. DAIRT.

St. Timothee, Que., May 16, 1899.

A BIT OF CORRESPONDENCE.

The following correspondence, ending in true Irish fashion, actually passed between two men in England some years ago:

"Mr. Thompson presents his compliments to Mr. Simpson, and begs to request that he will keep his doggs from trespassing on his grounds."

"Mr. Simpson presents his compliments to Mr. Thompson and begs to suggest that in future he should not spell 'dogs' with two gees."

"Mr. Thompson's respects to Mr. Simpson and will feel obliged if he will add the letter 'e' to the last word in the note just received, so as to represent Mr. Simpson and lady."

"Mr. Simpson returns Mr. Thompson's note unopened, the impertinence it contains being only equalled by its vulgarity."

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

A RAILWAY MAN

EXTRAORDINARY UNPLEASANT SYMPTOMS OF KIDNEY TROUBLE IN THIS CASE.

Tortured by all Kinds of Pains and Aches He Tries Everything, but Fails to Find Relief Till a Friend Advises Him to Use Dodd's Kidney Pills—They Have made a Well Man of Him and He is Grateful.

Ottawa, Ont., April 21—(Special.) Frank Charrand, a railway man, whose home is at 130 Little Chaudiere Street, has acknowledged that Dodd's Kidney Pills have done more for him than anything else in the world has ever done. He says: "I suffered with backache and was always drowsy and had a very heavy feeling in my limbs.

"I had frequent severe headaches and more times very sharp pains in the top of my head, which gave me much annoyance in my work.

"My fingers would cramp and I would have an uneasiness in my legs and occasional pains in the loins.

"I was dizzy in spells and short of breath. If I ate a hearty meal I would have a pain in my left side. My appetite would sometimes be very good and sometimes I couldn't eat anything.

"I had a constant soreness and tenderness over the spine and tired feeling in the region of my kidneys.

"I suffered quite a little with a dragging heavy feeling across the loins.

"Dodd's Kidney Pills were recommended to me by a friend of mine who had been cured, and I began to use them.

"Almost from the start I began to feel the wonderful improvement, which continued as the treatment proceeded, till the unpleasant symptoms had one by one entirely disappeared.

"Dodd's Kidney Pills have worked a wonderful cure in my case and I cannot speak too highly of this great and good remedy."

What Dodd's Kidney Pills have done for Mr. Charrand they have done for thousands of others, and they'll do the same for you if you give them a chance.

There are many railway men in Canada to-day who find Dodd's Kidney Pills indispensable. They are the railway man's surest and best friend.

The constant vibration on trains and engines is very hard on the kidneys and Dodd's Kidney Pills make these organs well and able to resist disease.

A thorn in the hand is worse than two in the bush.

MINARD'S LINIMENT Cures Dandruff.

Effect of Gravitation.

If a man weighing twelve stone were to be transferred to the moon, the weight of his body, measured at least by the attraction which the moon would exercise upon it, would be reduced to about two stone. If his muscles and his frame remained the same, it would seem as if he would be able to jump over a wall twelve feet high on the small globe without any greater exertion than would be required to clear a wall two feet high on the earth.

MARKETS.

WHEAT.

Manitoba wheat has been dull all week until Saturday, when the opening of navigation at Fort William and the strength in the American markets, developed more interest and some demand for spot wheat sprung up. Prices have gradually come up from 69¾ for 1 northern and 66¾ for 2 northern, at the end of last week, to 71½c and 68½c at the end of this week for wheat in store, Fort William, immediate delivery. For May delivery the price is the same as for spot and in fact the spot wheat is in better demand than the future delivery. No. 1 hard is worth 74½c spot. Values are practically the same in store at any of the lake ports, but at the moment, in store, Fort William, is most wanted.

Country Wheat—Market nominal, owing to bad roads.

Liverpool Prices—No. 1 northern spring wheat sold at Liverpool on Saturday at 6s 1d.

FLOUR-Ogilvies Hungarian Patent $1.95 per sack of 98 lbs.; Glenora Patent, $1.80; Alberta, $1.60; Manitoba, $1.40; Imperial XXXX, $1.20

MILLFEED—Bran in bulk, per ton $14.50; shorts, $16.50. Delivered in bags, the prices are $1.50 higher.

GROUND FEED—Oat chop is quoted at $27 per ton delivered to the trade; barley chop, $22 per ton; mixed barley and oats, $25 per ton; oil cake, $27 per ton.

OATS—While there is no surplus of oats to be seen in this market it may also be said with equal truthfulness that there is no shortage. As one dealer puts it, "Whenever oats are wanted a car pops up." Most of the feed requirements are being met with Manitoba oats although two cars of Alberta oats were taken this week for the purpose. Most of the Alberta oats are going to Montreal for export. We learn of one transaction in Fort William oats this week. The price was 36½ for No. 2 white. As soon as navigation is declared open the Fort William basis will be adopted. Sellers are asking 45 to 50c per bushel for seed oats here. From 35 to 36c per bushel is being paid for feed grades in car lots on track here. Prices to farmers at country points for No. 2 white oats range from 28 to 30c. Street oats are worth 32 to 34c per bushel.

BARLEY—Receipts are light and the market is advancing for feed grades. Dealers are now quoting 43 to 45c for choice feed grades.

HAY—The floods in the country districts have destroyed large quantities of hay, and the price has advanced accordingly. Baled hay is worth $6 to $6.50 per ton.

DRESSED MEATS—Beef, city dressed, 7 to 8c per pound; country, ½c under these prices; veal, 8 to 9c; mutton, 8c; lambs, 8c; hogs, 7½c.

POULTRY—Fresh killed chickens 11 to 12½c per pound, delivered here; ducks and geese, 10 to 11c; and turkeys, 12½ to 14c.

BUTTER—Creamery—There is very little creamery to be had as milk is scarce and local factories are only making a very small quantity of butter, not enough for their regular customers. Winnipeg buyers are paying 24c per lb. net for their supplies at present.

BUTTER—Dairy — Conditions are not favorable to the production of dairy butter and there is very little coming in. Prices have not changed any this week. Wholesale dealers are paying 22c per pound, commission basis, for fine butter in tubs, bricks or prints; 16 to 18c fos ordinary qualities, while seconds are worth 10 to 12c per pound.

CHEESE—Jobbers are getting 13 to 13½c per pound for cheese. Stocks now in hand are from Ontario.

EGGS—Receipts fell off considerably the fore part of the week and prices went up in consequence. Besides a good local and eastern demand the British Columbia trade has been taking Wanitoba eggs freely, and it takes a lot to supply this demand. For a while this week commission houses were getting 15c per dozen, commission basis, for fresh candled eggs, but as the floods which caused the shortage have now subsided, and eggs are coming in more freely again we quote last week:s prices namely, 12c per dozen, commission basis, or 10c per dozen at country points.

POTATOES— Farmers' loads, delivered in Winnipeg, are worth 20 to 80c per bushel.

The Mace In England.

Every deliberative civil body in England, even down to the town councils is provided with a mace, which is brought forth with solemn ceremony and placed on the table before the deliberations begin. In one or two city councils a candlestick of silver is added to the mace, and acts passed in the absence of these objects are supposed to be illegal.

Plenty of Clocks.

There are 250 clocks in Buckingham palace, and it is a work of no small importance to keep them going. Some of them are as old as the time of Louis XVI., and the works are still in good order.

Have you noticed that one pound of Blue Ribbon Ceylon tea is equal to a pound and a quarter of any other kind?

Page Metal Ornamental Fence. We now make fence that is ornamental, very showy and surprisingly cheap. It is just what is wanted for door yards, division fences in town lots, grave yards, orchards, etc. It is 20 cts. PER RUNNING FOOT. painted and retails at only Just think of it. Let us send you full particulars. We also make farm fence, poultry netting, nails and staples.

The Page Wire Fence Co., Limited, Walkerville, Ont. 5

ROSS & ROSS, General Agents, Box 633, Winnipeg, Man.

Some men find that Friday is just as unlucky as any other day.

A bird in the hand is permissable—if you have no knife and fork.

THEY NEVER FAIL—Mr. S. M. Boughner, Langton, writes: "For about two years I was troubled with Inward Piles, but by using Parmelee's Pills, I was completely cured, and although four years have elapsed since then they have not returned." Parmelee's Pills are antibilious and a specific for the cure of Liver and Kidney Complaints, Dyspepsia, Costiveness, Headache, Piles, etc., and will regulate the secretions and remove all bilious matter.

Dr. Temple, the archbishop of Canterbury, declares that it is not a bad thing for boys to fight occasionally, provided there is no feeling of malice

TEETHING TIME.

Is the Critical Age in the Life of all Little Ones.

During the teething period great care should be taken of baby's health The little one suffers greatly; the gums are hard and inflamed and any disorder of the stomach or bowels increases the peevishness of the child and often fatal results follow. Mother's greatest aid at this period is Baby's Own Tablets—the surest of all remedies in curing the minor ailments of children. Among the many mothers who testify to the value of these Tablets is Mrs. R. B. Bickford, Glen Sutton, Que., who says: "My little baby suffered much from teething and indigestion. I procured a box of Baby's Own Tablets and it worked wonders in baby's condition—in fact I believe it saved my little one's life. I sincerely believe that where now many a home is saddened through death of a little one, joy would be supreme if these Tablets had been used. I consider them baby's best doctor and would not be without them.

Baby's Own Tablets when given in accordance with the directions prevent restlessness and nervousness—cure simple fever, diarrhoea, constipation, colic and all stomach trouble. Guaranteed to contain no opiate or other harmful drug. By dissolving a Tablet in water it can be given with absolute safety to the very youngest baby. Sold by druggists, or direct by mail, post paid, at 25 cents a box, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Things we don't want are given to us to console us for the lack of the things we want.

If a man would secure his wife's undivided attention all he has to do is to talk in his sleep.

Because of the poor quality of Russian petroleum supplied it, the Grecian government has ordered in New York 720,000 gallons.

DR. A. W. CHASE'S CATARRH CURE ... 25c.

is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanantly cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

DEATH OF A NOTED MIDGET.

A noted personage has passed away at Cardiff in "General Mite," a midget only 30 inches high, well known to the public of Great Britain and the United States. The cause of his death was acute dyspepsia. The demise of this celebrity took place at the show-rooms in St. John's Square where, with other artists, he had been entertaining the public for some time past. The deceased was born in Washington thirty-one years ago. He was married, and his wife still resides in Washington, but the one child of the marriage is dead.

BEE INDUSTRY.

Every head of clover consists of about sixty flower tubes, each of which contains an infinitesimal quantity of sugar. Bees will often visit a hundred different heads of clover before retiring to the hive, and in order to obtain the sugar necessary for a load must, therefore, thrust their tongues into about 6,000 different flowers. A bee will make twenty trips a day when the clover patch is convenient to the hive, and thus will draw the sugar from 120,200 different flowers in the course of a single day's work.

MINARD'S LINIMENT for Sale Everywhere.

True patriots work for their country's future instead of boasting of its past.

There never was, and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

Any man who gets in on the ground floor and stays there has no use for a fire escape.

Cholera morbus, cramps and kindred complaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debarred from eating these tempting fruits, but they need not abstain is they have Dr. J. D. Kellogg's Dysentery Cordial, and take a few drops in water. It cures the cramp and cholera in a remarkable manner, and is sure to check every disturbance of the bowels.

Two people may be able to live as cheaply as one, but it depends on whether they are married or engaged.

If a man can live alongside a public school for two years without losing his temper, the recording angel ceases to pay any attention to his actions.

Wise is the prophet who does not allow his predictions to go on record.

Money Saved and pain relieved by a household remedy, Dr. Thomas' Eclectric Oil—a small quantity of which usually suffices to cure a cough, heal a sore, cut, bruise or sprain, relieve lumbago, rheumatism, neuralgia, excoriated nipples, or inflamed breast.

AN OPEN KITCHEN.

In order to facilitate dietetic treatment for patients with scanty means an 'open kitchen" has been founded by charitable persons at Berlin, and has already a year of useful existence behind it. Portions of food are obtained from the "open kitchen" by tickets, which are sold at a very low price; but some of the out-patient hospitals (policlinics) at Berlin buy a number of these tickets and distribute them gratuitously to needy patients. Charitable individuals have likewise bought the tickets and distributed them to those in want. During the first year of its existence the kitchen provided 36,000 portions of food, some being consumed on the premises and others being sent out hot to patients.

SUNLIGHT SOAP

One ounce of Sunlight Soap is worth more than Two ounces of impure soap.

REDUCES EXPENSE

Ask for the Octagon Bar. If your grocer cannot supply, write to LEVER BROTHERS, LIMITED, Toronto, sending his name and address, and a trial sample of Sunlight Soap will be sent you free of cost.

SATURDAY, APRIL 26, 1902.

THE LABOR CONVENTION

THE big convention, which met at Kamloops last week, is now a thing of the past so far as the general public go, but it is giving the men who in the past have manipulated the politics of the country a chance to do some deep thinking. They are just now trying to find out what it all means, and arrive at something like a correct estimate of the political strength of the Provincial Progressive Party, as this new-born organization called itself. Although it is generally dubbed the "labor" party, this term is by no means sufficiently comprehensive, for while the convention may fairly be said to have been representative of the labor organizations of the province, it was also representative of the most of the socialistic and allied movements. There appears to be a general disposition on the part of the political managers to look the issue in the face. They realize that the new movement threatens to put them in the side show business, and they are now all bent on the common object of shaping the new force to their respective ends. That they have reason for uneasiness is apparent to anyone who has any knowledge of the present division of the voting forces in the province. While it may be doubted that the Provincial Progressives can develop sufficient strength to carry a majority of the seats in the provincial legislature, they mus nevertheless be reckoned with as a material factor in the next provincial campaign, and one capable of securing an even break with the two parties, or their successors. In the Kootenays the Progressives may safely be regarded as the dominant party, and they confidently predict that they will carry all twelve seats which have been allotted to what were formerly known as East and West Kootenay districts. With respect to this claim it may be said that so far as the cities of Rossland and Nelson are concerned, Progressive candidate, without other alliances, would probably find themselves at the foot of the poll; but in tee other ridings they would probably find themselves supreme. This deduction is arrived at from a study of vote cast in the last by-election for Yale-Cariboo, in which "Chris" Foley, the labor leader, made such an astonishing race against W. A. Gallaher, M. P., and John McKane, of Rossland. And, while Kootenay may fairly be said to be the stronghold of the Progressives, it must not be taken for granted that other seats throughout the province would not fall to them. They are reasonably sure of Nanaimo City, and it would not be at all surprising if they secured one or two of the Vancouver seats, as well as one of the Yales. If these deductions are correct it is easy to see that without alliances of any kind the Provincial Progressives are a party to be reckoned with. Throughout most of the labor organizations represented at the Kamloops convention there are marked Liberal leanings, and it is by no means improbable that when the decks are cleared for the next provincial campaign we will see something in the way of a Liberal-Labor alliance. Ever since the last federal by-election for Yale-Cariboo the promotion of an alliance of this kind has been the pet scheme of Hon. William Templeman, the leader of the provincial Liberals, who have the ear of the Laurier administration. It was for this purpose that Ralph Smith first, and later Chris Foley, were singled out as men desiring of special consideration; and the alliance sought would doubtless have been perfected before this but for that thorn in the side of administration Liberals—Joseph Martin. This interesting personage has the lives of a cat. He has been repeatidly killed and buried, that is politically, but invariably puts in an appearance when his advarsaries resume their game. Martin is the one Liberal in the province who has a personal following, and one which is sufficient to weigh against even that most convincing of Liberal arguments—patronage. A glance at the officers of the Provincial Progressives will show that Martin is not without his friends in the new organization. Chris Foley, the president, is known to be a great admirer of "Fighting Joe," and James Wilks, the vice-president, has for years been his out-and-out advocate. Those who know Martin will hardly accuse him of being either ignorant of or indifferent to the possibilities of such an alliance, and he has the faculty of generally getting what he goes after. This is the political outlook. It may not be pleasant to the people of British Columbia, but it is none the less real on this account. The question is, what steps will those who are opposed to Martin take?

SILVER-LEAD QUESTION.

THE people of the silver-lead sections of this province are beginning to interest themselves in the subject of increased lead duties, and the indications are that the issue will now be forced upon the attention of the Laurier Government in a manner which will admit of no hedging. The lead question is not a new one. It has come up from time to time as the silver-lead producers have found themselves checked by the manipulation of the United States lead trust; but all who went to Ottawa to protest, or ask for protection through increased duties upon lead and lead manufactures, were turned aside with Laurier's "sunny ways." The business men of the silver-lead camps are now beginning to feel the pinch of the stagnation. They have been doing some thinking on their own account and are attempting to figure out the best method for remedying their grievance. Irrespective of their politics and trade notions they see that in the United States, by reason of the duty, lead is worth in round figures four cents per pound, while in British Columbia, through the absence of an import duty and the lack of a home market, it is worth but 1½ cents. Free trade, or fair trade, or a tariff for revenue only may be all right in theory, but the people of Kootenay are now ready to sway any opinions they may hold upon abstract trade questions for that extra couple of cents in the value of British Columbia's lead. Throughout all the Slocan towns, now, a movement has been started to rouse public sentiment with a view to securing material changes in the lead duties, and from being the concern of the few, increased lead duties have become the great aim of the many. The present outlook of the silver-lead camps is very discouraging. From scenes of unwonted activity the mines have stagnated so that many have been forced to close down entirly, while others are working along intermittently with greatly reduced forces. This condition has had its effect upon all forms of value in the mining towns. The merchants are finding their business wiped out and themselves embarrassed, and real estate is shrinking so that what were in the first instance small mortgages now represent the whole or even greater amounts than the property would bring under the hammer. The people of Fernie are interested in this matter more than they would think at first. True, they have no silver-lead mines; but the prosperity of one section of the province is to the advantage of the whole. Fernie's chief industry is in the supplying of coal and coke, but it is easy to understand how much better off even Fernie would be, if, under the re-arrangement of the tarriff even one cent could be added to the price of lead, and the silver lead section of Kootenay were enjoying that stimulus such a change would do them good.

Dentist

Dr. Barber is now at his office over Liphardts jewellery store, where he would be pleased to meet all those in need of his services.

Ask for British Lion or Mainland cigar. For sale at all first-class places. Union made. Manufactured by Wm. Tietjan, Vancouver.. x

The services at Christ church to-morrow, April 20th, will be as follows: Matins and Litany at 11 a. m.; Sunday School and young men's bible class at 2.30 p.m.; short service of unveiling the new stained glass east window at 3.30 p.m.; Evensong at 7.30 p.m.

A Splendid Record for Paying Death Claims.

Mr. Geo. Levasseur, who held policy No. 912,424, died on Feb. 21, 1902. On the 10th of March the proofs of death reached the Spokane office, and on the 18th of March a check for the full amount was forwarded through the Canadian Bank of Commerce, in favor of Mrs. Sophia Levasseur.

It is remarkable to note, if we take into consideration the distance between Fernie and Spokane, and then the distance between Spokane and New York, besides going through all necessary formalities, that the Equitable Life Assurance Society of the United States, through Mr. Allenberg, Manager at Spokane, paid the claim in just exactly twenty-five days. It is certainly a remarkable record.

Mr. Levasseur was only insured three years with the Society, having paid to the Society $228.48, for which they paid the amount of $2,000.00, leaving a net profit to the estate of $1,771.52.

The Equitable Life certainly deserves credit for such prompt payment.

PRODUCE STORE

LOCAL AND GENERAL.

Mr. and Mrs. J. R. Pollock returned home on Saturday last from a visit to friends in Spokane and Seattle.

Church Opening.

Rev. D. Holford expects that tha new Baptist church will be completed and ready for opening in about two weeks.

New Seats.

New seats for the Presbyterian church have been installed and the improvement is very marked The Ladies' Aid of the church, who raised the necessary funds, are to be congratulated.

Pay Day.

The pay on Saturday last is reported to have been the largest in the history of the Crow's Nest Pass Coal Co. The town had been very quiet for the previous week or two, but the merchants report a brisk revival of trade.

Broke Jail.

A young man who was convincted on Feb. 5th on a charge of stealing and sentenced to four months, broke jail on Saturday last. He made for Morrissey but Constable Tranter was on the lookout for him there and he had a narrow escape from capture. He is supposed to be hiding in the woods between here and Elko and as the authorities are keeping a sharp lookout he will doubtless be taken.

Wrestling.

The wrestling exhibition which was to have been given on Saturday evening by A. Hallet and his wrestling class was called off owing to the slim attendance, not enough turning out to make it worth while giving the exhibition. Three of Mr. Hallet's pupils were on the mat for a short time. Wm. Burrows, who has only taken nine lessons showed himself to be a very apt pupil of the wrestler, and he and "Scotty" Milne will doubtless be fitted against each other in the near future.

Leaving Fernie.

Mr T. J. Smith, of Coal Creek mines, leaves this week with his family for Pincher Creek, near which he has secured two quarter sections of land, where he will make his home in the future. Mr. and Mrs. Smith are among Fernie's first settlers having came here nearly five years ago when the town was practically a wilderness. Mr. Smith has always taken a deep interest in everything pertaining to the welfare of the town and his departure is regretted on all sides

Married.

A quiet but interesting event took place at the residence of Mr. Edward Tazzman, on Monday of this week, it being the marriage of his daughter, Mrs. Ethel Kettyls to Mr. W. H. Treleavers, of Fernie. The bride was assisted by her sister, Miss Dora Tazzman and the groom by Mr. T. Davis. The ceremony was performed by Rev. D. Holford in the presence of the immediate friends of the contracting parties. In the evening the newly married couple entertained a number of invited guests in the large new house recently erected by Mr. Tazzman.

Flower Social.

The flower social given in Princess hall on Tuesday evening by the ladies of Christ church, was well attended and was enjoyed by all. It was something out of the ordinary run or socials. Cards were given out in which were printed such questions as the following: "I planted a swarm of bees. What came up?" The answer being in nearly all cases the name of a well known flower, the answer to the above being "A Honey Suckle." Prizes were given at the close to the lady or gentlemen who gave the largest number of correct answers. Refreshments were served during the evening and music was rendered at intervals by Messrs. Whimster and Stabler. Proceed amounted to about $50.

A Magnificient Gift..

The congregation of Christ Church, Fernie, are rejoicing over the magnificent gift of some beautiful stained glass east windows. They are three in number, the centre one containing the figure of our Savior Jesus Christ as the good shepherd carrying the lambs in His arms, the other two having the Font and Chalice and Paten representing the two sacrements ordained by Christ Himself. They are of a most chaste and beautiful design and altogether a picture of harmoniously blended coloring which should charm the eye and elevate the thoughts of all who gaze on them. A hearty vote of thanks was rendered to the generous donor, Mrs. W. Blakemore, at the annual meeting of the Parishioners' held on April 16th. The windows were supplied by the eminent Toronto firm, The Robert McCausland Co., and do them great credit. They were installed this week by Messrs Lawrence and Beck. The new frames being made by Coward & Son, at the new factory. The windows will be formally unveiled on Sunday next at the short service to be held at 3.30 p.m.

Speculators, we draw your attention to the ad. of J. E. Mills on the outside page of the paper.

The football has made its appearance on the grounds during the past week and the practices have been well attended.

Constable Fraser is kept busy at Elko. He has been sending in recruits right along for the Fernie chain gang.

Mr. P. Joyce has opened a short-order restaurant opposite the Nothern Hotel where he will be pleased to welcome the public.

G. W. Fennelly sold this week lot 17 Victoria Ave, to S. McLean, the sale was made through J. E. Mills, real estate agent.

The Ladies of Christ church desire to thank all those who so cordially helped in any way on Tuesday last to make their social a success.

Constable Farquharson took Geo. R. Payne, of the Kootenay Association, to Nelson on Sunday. The trial of the three members of the Association takes place on May 6th.

Mr. and Mrs. J. W. Crane was in town this week the guests of Mr. and Mrs. A. K. Farquharson. Their little child has been seriously ill and doubts are entertained for its recovery.

Saturday's Globe contained a half tone cut of W. A. Knisley, brother of Miss Knisley, of Fernie. This young man was among those killed at Hart's River, Transvaal, on March 31st.

The members of Mt. Fernie Lodge, I. O.O. F. are requested to meet in Joyce's Hall, on Sunday afternoon at 3 o'clock, previous to attending divine service at 3.30, in Presbyterian church. All visiting brethern are requested to attend. The service will be conducted by Rev. D. Holford.

It has been decided by the towns people of Elko to celebrate Victoria Day, May 24th, by a well filled program of sports, consisting of horse racing, baseball, foot racing, tug-of-war between men of the different construction camps, wrestling match and other events. A meeting of the citizens was held and committees appointed to attend to necessary arrangements. The business men were quick to respond to the call for funds and a substantial amount has been raised for the purpose. So far the Elko base ball association has not been able to make arrangments to play any other team of the district, but it is expected that a match can be arranged with one ot the many teams to whom a challenge has been sent. The railway contractors have willingly fallen in with the idea of making the 24th a general holiday and will suspend work; it may therefore be expected that there will be a large turnout for the occasion. The following is a copy of the program arranged:– Baseball match, Indian horse race, saddle horse race, 100 yards foot race, ¼ mile foot race, tossing the caber, putting the shot, tug-of-war, running long jump, running hop, step and jump, running high jump, wrestling match.

Dentist

Dr. Barber is now at his office over Liphardt's jewellery store where he will be pleased to meet all those in need of his services.

Without a Fire Hall.

The building which has done service for a fire hall for the past three years has been torn down and Messrs. Rennie & Bricker are having an office erected in its place. The fire appliances have been removed to a spot behind the Bank of Commerce.

WHY PAY RENT

when you can own a home of your own?

The B.C. Permanent Loan and Savings Company

was organized for the purpose of helping those who are willing to help themselves, for instance:

Borrowers vs. Renters

Amouut borrowed $1,000, repaid by 48 monthly payments of $25 each—total $1200 and you own your home.

Rent at $25 per month for 48 months—$1,200 and your landlord still owns it.

OR

Have you a vacant lot? Why not build a house on it? We will assist you on the above plan

POINTERS

—60 per cent of cash value advanced.
—Rate of interest 8½ per cent per annum.
—Interest is stopped on each $100 of principal returned.
—Your choice of repayment terms—from 4 to 12 years.
—Excess payment of principal may be made with any monthly payment, every dollar paid in excess shortens the time and reduces the cost of the loan.
—This Co. does not tie up real estate as the borrower may pay off the whole loan at any time on giving 60 days' notice.

SPIDER'S CHAPS.

A Tale of the Cattle Thieves of Agua Caliente.

Copyright, 1900 by W. LeC. Beard.

"The corp'ral's worse than the private,
The sergeant's worse than the corp'ral,
The luffs are worse than the sergeant
An the captain's the worst of all.
I can't get 'em up,
I can't get 'em up,
I can't get 'em up in the mornin.

In a moment the camp was astir and humming with voices. The men were all dressed when they lay down, so that their toilets were completed when they had rolled up in their blankets and, if they felt inclined, washed their hands and faces.

The bacon and coffee served out by the Ballet Girl soon vanished. The men devoured them standing or squatting on the ground wherever they happened to be.

The Ballet Girl, assisted by two other cooks who came with our re-enforcements, marshaled the pack horses that formed our provision train. Laboriously hoisting himself on to the back of his horse, the Ballet Girl stamped the spike in the end of his wooden leg well into the stirrup and announced that all was ready. The horses of the men had been saddled for some time. The men swung themselves into their saddles and we started in a canter over the desert, a troop that was 87 strong.

The men were in high spirits. Jokes and rough chaff flew from one to another. But it would never do to use up our horses by keeping them at a canter. By the order of the foreman the pace was brought down to a shuffling jog trot. The spirits of the men seemed to keep pace with the speed of their mounts. The shouts and laughter lowered until only a rumble of conversation could be heard.

Mile after mile was passed. The plain over which we rode was unbroken by any tracks save those we left behind us. The trail of the herd, the foreman said, lay farther to the south. The cattle were heading eastward. So were we. The point toward which they steered was probably the grand, sleeping profile of Montezuma, outlined against the blue sky by a distant mountain range, and which marked a pass for which we, too, were headed. On the other side of the pass lay Palomas.

At noon we ate a hasty lunch and then jogged on again. One part of the desert was precisely like another. There was nothing to mark our progress until, toward evening, we came on the track of the herd. The foreman and Hayward were mildly elated then.

"There can't be no doubt but what we're gainin on 'em, an there ain't no doubt but what they're all here, too," said the foreman. "We're liable for to run agains' the outfit mos' any time now." The chase was a little more exciting after this. To guard against ambush or other surprise ten men were detached and ordered to ride 200 yards ahead of us, and ten more were sent as far behind.

The trail we followed was as plainly marked as though a broad street had been laid out across the desert. Sometimes we could see it for miles ahead, drawing to a point as it disappeared on the horizon; sometimes it passed over one of the many sand dunes that wrinkled the surface of the plain; then we could see it only when we mounted the rise.

After sunset we would camp by the side of the trail. In the morning, as soon as there was light enough to see by, we would pick it up again. Day after day this went on. Montezuma's face grew more and more distinct. Cattle that had fallen behind the herd began to dot the trail here and there. Stretching their chafed limbs, the men would tell each other that the thieves would have to pay for all this discomfort once we had overtaken them. It seemed to me that it was months, not days, since we had been following the cattle. I consulted with the foreman as to the advisability of greater speed.

"Can't see what we'd gain by it, only to kill up our horses," he replied. "Them thieves is drivin the herd ter pretty near as good a place ter ship from as where we was goin when we started out from the ranch. We're gainin on 'em too. Don't you fret. You'll see 'em soon enough, an then there'll be all the fun you want."

To be sure, the foreman's idea of fun differed materially from the views I held on the subject, but events redounded to the credit of the foreman's wisdom, as events generally did.

It was about the middle of the afternoon when the foreman rode up to me, pointing to a thin cloud of dust that hung over the trial at a point directly ahead of us, where a rise hid it from our sight.

"That's them," he remarked tersely. "Now, then, I reckon"— He interrupted himself, for there was the crack of a rifle from the invisible space, followed by the popping of six shooters. Above the rise there instantly appeared the heads and then the bodies and horses of the men who composed the vanguard as they raced toward us. One of the horses was wounded, and the rider was sitting very straight, his reins in his right hand, while his left arm, covered by a reddened shirt sleeve, hung by his side. Instinctively the main body formed a line, parting to let the vanguard through. It formed up behind us, and the rear guard galloped forward and joined them; then we all spurred forward.

"Halt!" shouted the foreman, lifting one hand, while he reined in his horse with the other. The men hesitated and then stopped. Some of them had passed ahead and were obliged to return.

"What's wrong?" I asked.

"There's another ridge behind this here one," replied the foreman, raising his voice so that all the men might hear. "Behind that other ridge them thieves is a-waitin fer us. They'll jus waste you men if you try ter rush em, an

"Halt!" shouted the foreman, lifting one hand.

maybe we can get away with em without that. Dismount. Now all you boys what has got rifles come with me." The men rolled from their horses. Those who had rifles drew them from the leather beckets that hung to their saddles.

"You haven't got no rifle, so you can't do no good with us. Stay here," said the foreman as I started forward. "You'll see some er the fight later on, don't fear." What he said was quite true. I could do no good by going forward, armed only with my pistols. Furthermore, though I did not want to shirk my share in this fight, in the result of which I more than any one there was interested, I had not the slightest desire to see more of it than was necessary.

The party led by the foreman toiled half way up the incline and stopped while the foreman went forward alone. Reaching the brow of the little hill, for a moment he peered cautiously over, then beckoned to his men. They came and lay prone, resting their rifles on the sand in front of them. After the pause of a second the foreman must have given some signal, for the rifles spoke together in a crash, and the white smoke drifted lazily back, for a moment concealing the men. Another volley, and a much heavier one answered ours. The bullets knocked little spurts of sand from the ridge or flew, singing like mosquitoes, over our heads.

Then the shooting became rapid and irregular, sounding like nothing so much as a number of packs of firecrackers set off together. The men were firing at will. Lying next to the foreman Spider was wasting cartridges, to judge from the rapidity of his fire. He was using one of the rifles he had captured the night before we had started out, and each time he fired he would slip in a fresh cartridge to avoid exhausting the magazine. Once a man who lay near him screamed and then swore, clapping his hand to his shoulder and withdrawing it covered with blood. As he backed down the slope Spider offered him a bandanna handkerchief wherewith to bandage his wound, but he declined it, and tore off his shirt sleeve, using that instead.

After awhile the firing slackened, until there was only an occasional report. Followed by Spider the foreman came down the slope and walked toward me.

"It ain't no good," he called as he came within speaking distance. "Them fellers kin hold us here jus' so long as we don't do no more than we're doin. All we c'n do is ter keep 'em under cover, an we've done that now. Ther ain't one of 'em what dares ter show his head. But while we're waitin here they c'n take them cattle clean back ter Portland, Me., if we only give 'em time enough. We got ter get 'em outer there somehow."

"Rush 'em out!" exclaimed a voice among the men.

"Reckon it comes ter sunthin like that," responded the foreman. "We can't touch their flanks, 'cause their ridge is longer'n ours."

A charge, then, clearly was necessary, and it was as clearly my duty to lead that charge. I did not want to, but if I hoped to retain my self respect or that of my men there was no other course left open.

"All right," I called, trying to speak unconcernedly. "Mount, boys, and line up."

CHOSEN FROM A MULTITUDE.

The Preference Shown By Thinking People for Dr. Chase's Syrup of Linseed and Turpentine---Record Sales in October.

Considering the large number of remedies for coughs and colds that are now offered to the public, and in view of the fact that nearly every druggist has a preparation of his own which he makes an effort to substitute for the medicine asked for, it seems truly remarkable that the demand for Dr. Chase's Syrup of Linseed and Turpentine should increase by such leaps and bounds.

During October the sale of Dr. Chase's Syrup of Linseed and Turpentine exceeded by several hundred bottles the record of any previous month in its history. When it is remembered that this preparation received very little newspaper advertising the evidence seems to be conclusive that it makes its way by sheer force of merit.

Thinking people recognize the harmfulness and danger of using strong drugs which are said to cure a cold in a few hours. They prefer to cling to Dr. Chase's Syrup of Linseed and Turpentine, which they know beyond a doubt to be a thorough and effective treatment for coughs, colds, croup, bronchitis, whooping cough, throat irritation, asthma, and even consumption itself.

The combination of Linseed and Turpentine, with half a dozen other ingredients of equal value for treating colds, in such proportions as they are found in Dr. Chase's Syrup of Linseed and Turpentine has proven to be a perfect protection against such developments as pneumonia, consumption and serious lung troubles. You can with certainty rely on this preparation to afford prompt relief and permanent cure.

Do you suppose that the sale of Dr. Chase's Syrup of Linseed and Turpentine would be more than three times that of any similar preparation if it was not the most effective remedy that money can buy? It has stood the test and proven itself worthy of the confidence that is placed in it. People recommend it one to another, and so the good news spreads. Be sure you get the genuine, with Dr. Chase's portrait and signature on the wrapper; 25 cents a bottle. Family size, three times as much, 60 cents. At all dealers, or Edmanson, Bates & Co., Toronto.

It is sowe time ago now since it was decided to erect a monument surmounted by an eagle on the field of Waterloo in memory of the Old Guard and its gallant stand on that fateful day. A committee was formed some years back to consider the question, and M. Gerome executed the work, but the eagle is at the present time in the cellars of the Grand Palais and cannot be erected for want of money. It is stated that a fete is to be organized, the proceeds to go to the fund in question.

SPRING DEPRESSION

PEOPLE FEEL WEAK, EASILY TIRED AND OUT OF SORTS.

You Must Assist Nature in Overcoming This Feeling Before the Hot Weather Months Arrive.

It is important that you should be healthy in the spring. The hot summer is coming on and you need strength, vigor and vitality to resist it. The feeling of weakness, depression and feebleness which you suffer from in spring is debilitating and dangerous. You have been indoors a good deal through the winter months, haven't taken the usual amount of exercise perhaps, your blood is sluggish and impure and you need a thorough renovation of the entire system. In other words you need a thorough course of Dr. Williams' Pink Pills. If you try them you will be surprised to note how vigorous you begin to feel, how the dull lassitude disappears, your step becomes elastic, the eye brightens and a feeling of new strength takes the place of all previous feelings. Thousands have proved the truth of these words and found renewed health through the use of these pills in spring time. One of the many is Miss Cassie Way, of Picton, Ont., who says:—"A few years ago I was cured of a very severe and prolonged attack of dyspepsia through the use of Dr. Williams' Pink Pills, after all other medicines I had tried failed. Since that time I have used the pills in the spring as a tonic and blood builder and find them the best medicine I know of for this purpose. People who feel run down at this time of the year will make no mistake in using Dr. Williams' Pink Pills."

These Pills are not a purgative medicine and do not weaken as all purgatives do. They are tonic in their nature and strengthen from first dose to last. They are the best medicine in the world for rheumatism, sciatica, nervous troubles, neuralgia, indigestion, anaemia, heart troubles, scrofula and humours in the blood, etc. The genuine are sold only in boxes, the wrapper around which bears the full name "Dr. Williams' Pink Pills for Pale People." Sold by all dealers in medicine or sent post paid at 50 cents a box or six boxes for $2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Beethoven's Wit.

The composer Beethoven was possessed of a grim satiric wit which resembled nothing so much as the caustic humor of Carlyle. It is related of him that one day his brother, who was very proud of a little piece of property he owned, called on him, but found him out, so he left a card inscribed:—"Johann von Beethoven, land proprietor." Next day he had it returned to him, written on the back:—"H. von Beethoven, brain proprietor."

Heard at a Church Concert.

He—How I envy the man who just sang the solo.

She—Why, I thought he had an exceptionally poor voice!

He—Oh, it isn't his voice I envy, it's his nerve.

Wise is the man who knows when to make a long story short.

Some people avoid straightened circumstances by being crooked.

SLEEPLESSNESS is due to nervous excitement. The delicately constituted, the financier, the business man and those whose occupation necessitates great mental strain or worry, all suffer more or less from it. Sleep is the great restorer of a worried brain, and to get sleep cleanse the stomach from all impurities with a few doses of Parmelee's Vegetable Pills, gelatine coated, containing no mercury, and are guaranteed to give satisfaction or the money will be refunded.

Some men sow a few seeds of kindness and expect to reap their reward with a mowing machine.

Minard's Liniment Cures Burns, Etc.

The relation between color and sound is merely hue and cry.

In washing woollens and flannels, the soft soap made from Lever's Dry Soap (a powder) will be found very satisfactory.

Egotism of Genius.

A writer in the London Standard declares the idea that genius is usually modest to be a popular delusion. On the contrary, he alleges egotism to be the very essence of true genius and quotes many amusing examples.

When Wordsworth, Southey and Coleridge were walking together and Coleridge remarked that the day was so fine "it might have been ordered for three poets," the gentle Wordsworth promptly exclaimed: "Three poets! Who are the other two?"

Disraeli, then a mere youth, wrote to his sister that he had heard Macaulay, Shell and Grant speak, "but between ourselves I could floor them all." And again he said, "When I want to read a good book, I write one."

Our own Joaquin Miller wrote to Walt Whitman: "You and I are over the head of the rabble. We know we are great, and if other people don't know it it is their own fault."

It was President Grant who, being told that a certain senator, an admitted genius who was very hostile to him, did not believe the Bible, expressed his estimate of the senator's egotism by rejoining: "Why should he? He didn't write it, you know."

Sometimes a man's neighbors consider him ungrateful because he insists on managing his own affairs.

Belgium Saloons.

Belgium has 175,000 taverns and saloons for the sale of liquors.

Curious Old Custom.

In one of the suburbs of Paris a wealthy merchant died the other day, and on the evening of the funeral his neighbors witnessed a curious ceremony.

An hour before the body was to be taken to the cemetery the relatives of the dead man, five or six in number, went out into the garden adjoining the house and walked solemnly and silently around it. Each carried a lantern and kept his eyes fixed on the ground, as though he were looking for something. Finally they all halted in front of a large pile of stones and, laying aside their lanterns, proceeded to throw down the pile. After every stone had been removed they examined minutely the spot on which the pile had rested and then slowly and with bowed heads returned to the house.

This is an old Norman custom, and it is observed in this instance because the dead man was a native of Gison. There is a tradition in Normandy that before burying a body all the ground around his dwelling should be searched in order to make sure that the soul has not hidden itself somewhere. At one time every family in Normandy faithfully observed this tradition, but now only a few pay heed to it.

AUSTRALASIAN NEWS

EXTRAORDINARY EARTHQUAKES IN THE NEW HEBRIDES ISLANDS.

YOUNG LADIES OF ARMADELE N.S.W., FORM A FIRE BRIGADE.

Vancouver, April 18.—The steamship Moana from Australasia brings the following advices :

The New Hebrides correspondent of the Sydney Herald writes that on Sunday evening at sundown on March 10, as the people were sitting down to tea, the earth suddenly began to sway perilously until the whole island was tossed about like a feather on the crest of a wave. All rushed to the doors to see all nature quivering and rocking from side to side. Every blade of grass was trembling as in a summer breeze and the earth moved like a swaying hammock. They waited for a cessation of the shocks; they did not cease, however, but continued without intermission all night. The horses and cattle acted as if possessed and the incessant motion seemed to drive the natives almost insane with fright. The shaking subsided next day but continued at intervals for a week. At midnight, six hours after the first tremblings, the sky became gloriously red as three volcanoes supposed to be extinct shot molten lava and flames high into the heavens. The volcanoes were Abrim, Lopevi and Tingoa, the last named blowing out of a new throat as well as the old one, into the sea,' and sending a great waterspout over the land. The motion of the quake was east to west, but there were incessant cross jerks. The damage was wide spread.

CRUSHING INDUSTRY.

The same correspondent says that the effect of the Australian federal tariff is to crush industry on the island and cause British whitemen to migrate and leave the islands in the possession of the French, the latter being able to live where a Britisher cannot.

FEMALE FIRE BRIGADE.

A young ladies' fire brigade, it is said the first in existence, has been organized and thoroughly trained by experts at Armadele in New South Wales. The young men of the town all left for South Africa, or the mines.

Owing to the drouth and the intense heat, fires became very numerous. Eighty-five young women offered their services to the town council as fire fighters and they were accepted. An Australian paper publishes the pictures of the ladies in uniform. The uniforms were presented by a young millionaire philanthropist of the town, J. T. Webb, who also paid for expert instruction. The uniform consists of high top boots, bloomers and navy blue braided blouse and helmet. The female fire brigade has already done splendid work in saving lives and property.

DROUGHT IN AUSTRALIA.

The terrible drought reported in last mail advices continues, while at Sydney a royal commission has been appointed to consider the alarming question of tne short water supply of the city. In many instances there has not been water enough to use in cases of fires. The use of garden hose has been forbidden and householders have been put on short allowance. Almost every day numbers of fresh cases of plague are reported and the fight to subdue the dread disease is becoming harder and harder with the continued terrible dry heat. The destruction to sheep and vegetation by the withering sun has been appalling. The civil authorities who are fighting the disease in the city, continue to organize "drives" against the rats. The entire city is asked on nights to turn out on a rat killing bee. It is believed with the extermination of the rats the awful disease will disappear.

FLOUR ADVANCES IN BRITAIN.

London, April 17.—All the grain and flour markets of the United Kingdom further advanced prices today. The price of flour was raised another shilling per sack. On the Yarmouth grain exchange, the price of red wheat advanced as much as two shillings per quarter.

TWO GIRLS ASPHYXIATED.

St. Mary's, Ont., April 17.—Emma Langford and B. O'Connell, two of the Office hotel servant girls, were asphyxiated by coal gas in their rooms last night, the stove pipe passing through their room having come apart. Miss Langford was dead when found, but Miss O'Connell is likely to recover.

EDMONTON AFFRAY.

Edmonton, N. W. T., April 17.—Thomas Sullivan, a builder, doing business in Fort Saskatchewan, got into a row with a Chinaman Wednesday morning and used a knife upon him. He was summoned to court and charged with malicious wounding. The evidence was sufficent and Sullivan was committed for trial at the next assizes, bail being fixed at $3,000.

NEW WIRELESS METHOD.

Rays of a Powerful Searchlight are Used as a Means of Conveying Messages.

Washington, April 18.—A successful experiment in sending words along a shaft of light has been demonstrated on the banks of the Potomac, above Georgetown.

The electricity, the basic principle of all existing present methods of wireless telegraphy and telephony, does not enter, except as a mechanical adjunct, into the principles of the new method. A powerful electric searchlight, fitted with a complicated and delicate apparatus, terminating in a mouthpiece, not unlike that used on an ordinary telephone box, the broad ribbon of prominence projected by the lamp, serves as a wire, and a funnel-shaped arrangement, fitted with a contrivance terminating in the ear cup, takes the place of the ordinary telephone receiver. In the test last night messages were sent along the rays of the searchlight and recorded up to the distance of half a mile, while beyond that distance sounds were audible, but connected words could not be distinguished. Considering the imperfections attendant upon a first test of the complicated mechanism of the invention, the test was highly satisfactory to the inventor.

In working upon the searchlight telephone the inventor followed literally the axiom that "light is heat." The test last night was private, only a few friends of the inventor being present. A searchlight such as is carried by the river boats was carried up the stream to a point where a feed wire of the electric car line, which follows the north bank of the river, had been tapped in readiness for the test, and a wire run down to the river bank. The searchlight was connected with the wire, and the boat then took the receiving apparatus to a point on the opposite bank, about half a mile away. When all was in readiness the current was turned on, and after some little trouble the end of the "line" was located. Then followed the test, which furnishes food for conjecture concerning the possibilities of the invention as regards night communication at sea, between lighthouses and ships or between two vessels, or between a balloon and the earth in time of war, or between two detachments of troops operating in an enemy's country. The conversation was one-sided, as the boat containing the receiving apparatus had no means of sending return messages. The inventor claims that in perfecting his invention he will combine a transmitting apparatus with the receiver, thus utilizing one shaft of light, or single wire, as it were, as in modern methods of telephony. During the test about 150 messages were sent over the "luminous wire" at varying distances.

BRUTAL ENCOUNTER IN MEXICO.

Fierce Fight Between a Lion and a Bull in the Public Arena.

El Paso, Texas, April 18.—The most bloody and brutal encounter between wild beasts ever seen in this section of the country, took place in the Suarez (Mexico), bull ring between a young Numidian lion from South Africa and a Samalayuca bull from the wilds of Mexico. An audience of 8,000 persons, principally made up of Americans, witnessed the battle from the grandstand, which surrounds the huge iron cage set up in the arena. The fight lasted nearly an hour, and was finally stopped by the Mexican authorities, who admitted that their own national sport of bullfighting had been outclassed in point of brutality. The bull was a splendid specimen, and was courageous in the extreme. From the beginning he recognized in the lion a deadly enemy, and attacked the king of beasts readily and with great spirit. The lion, which had been reared as a pet, refused to fight at the outset, and attempted to break through the bars to seek a refuge beside his keeper, who stood without, and pitilessly goaded the beast by striking him with an iron bar, or by pouring vitriol on his body. Finally, realising that escape was hopeless, the lion crouched for a spring, and launched himself into the air, landing upon the bull's back and fastening his teeth in the bovine's neck. His hold was insecure, and he was easily shaken off, but the bull bled from a number of wounds. The maddened bull attacked fiercely after that, driving the lion into his corner and goring him twenty-five times in the body. The lion retaliated by seizing the bull's nose. He lost his hold, and the bull gored him repeatedly, breaking his leg and causing him to roar with pain. At this juncture, while the excitement was at its height, the bugler employed by the mayor of Jaurez sounded a call for the combat to cease, and the lion, more dead than alive, was dragged from the huge iron cage where the fight had taken place. His wounds, it is said, will prove fatal. The bull was game to the last. He almost succeeded in killing a Mexican baderilla who was turning him from the arena.

HOTEL MEN WILL BENEFIT BY LOCAL MADE CIGARS.

EASTERN TRAVELLERS WILL SEEK ORDERS IN VAIN.

Winnipeg, April 18.—"Eastern travellers for cigar firms can skip Manitoba on their western trips," said an hotel man yesterday, and from the tone of the local Bonifaces it would seem that the genial and convivial souls who represent cigar manufacturers in Ontario and Quebec will not soil their order books to any extent in this country in future. The reason for this is not to be found in any deterioration of the tobacco they sell but because they refused to aid in the campaign being put up against prohibition. All of the big firms in the east who did an extensive business with Winnipeg hotel men were asked to contribute towards the funds raised by the liquor people. They were handicapped all along by a slender treasury, but of these cigar men who had all gained big profits from the Winnipeg trade only one made any response and that one sent in a cheque for a sum too small to mention. All the others were either silent or declined to give anything else than their good will.

The hotel men now propose to deal with the cigar manufacturers as they dealt with them, and hereafter orders for cigars will be given to the firms whose factories are located in Winnipeg. The hotel men will patronize home industry. This means a great deal to the local firms, and already it is understood a couple of them are preparing to extend their premises to meet the increased demand they will be called upon to fill.

CRUSHED BETWEEN THE CARS.

Fort William, April 18.—Daniel Goldfinch, a messenger around the elevators and in the office of Superintendent M. Gelos, was caught about 12 o'clock to-day between two cars near elevator B and was injured so badly that he died at 1.30.

The cars were what is known as "bad order" cars, the drawgear being pulled out, which allowed them to come close together. From all that is known of the accident, Goldfinch was crossing between these two cars when the train started and he was pinched so closely that he was carried down to the old freight sheds, where a slack in the train allowed his crushed body to fall to the ground. It was seen by the switchmen, who had it taken to the engine room of elevator B, and Dr. Hamilton summoned, but the injured man's head and shoulder were crushed beyond any possible chance of recovery.

The injured man was an Englishman, unmarried, steady and quiet in disposition, and one who attended closely to his duties. It is not known that he had any relatives in this country.

PROCURING PROOF.

British Government is Getting Ready for Col. Arthur Lynch.

London, April 17.—Although there is no indication that Colonel Arthur Lynch, (who formerly fought on the Boer side in South Africa and who was elected to represent Galway City in parliament in November last), has any intention of placing himself within reach of the British courts, the government is bringing witnesses from South Africa to testify in support of the charges of treason brought against Colonel Lynch.

Lewis Handley, an American by birth, but a naturalized British subject, and a farmer in the vicinity of Glencoe, Natal, landed in England this morning. He says Colonel Lynch was the leader of a Boer force, principally composed of Irishmen, which raided his farm in 1900, confiscated his stock and other moveables, and destroyed his crops. Lynch informed Handley that he was a British subject.

OBJECTED TO NIGGERx.

Three Americans from San Francisco have been picked up at sea near Panope, Japan, in a starving condition. They had been without food for four days. They have been landed at Sydney and will be sent home. These men shipped on December 13 on the whaler Greyhound at San Francisco. When in Japanese waters the men asked to be set adrift as they were the only whites on board beside the skipper and Capt. Fisher, and they would not work with the "niggers" any longer. They were taken to a Japanese port and cared for by the Japanese governor of the district, placed on board of a German man-of-war on the way to New Britain, where they were transferred to the ship Pekham and taken to Sydney, the American consul caring for them there.

Making himself popular.—Waggles' "What a pretty baby ! "

Proud Mother: "Do you think so ! "

Waggles: "Yes, and a perfect image of his mother, too ! "

DUTY ON BREADSTUFFS.

The Question Discussed in a Cablegram.

A cable from London discussing the new tariff on foodstuffs and its effects in Britain says :

Despite all efforts to minimize the importance of the revival of registration duties on grain and flour it is evident a new departure has been made in the direction of a revenue tariff. The duty may be small and bakers nay be unable to raise the price of the loaf, but Cobdenism has been struck at the most vital point. If small duties can be placed on foodstuffs they can also be levied on many commodities for revenue purposes. Sir Michael Hicks-Beach has reluctantly opened the way for a transformation of the entire tariff system.

Chamberlain has not obtained as much leverage as he desired but he has secured the ground for discuss- the commercial and tariff questions at the conference of the colonial premiers and ministers after the coronation. Laurier, Fielding, Mulock, Patterson and Borden are expected from Canada and Barton, Seddon and many other influential men will represent Australia, New Zealand and other self-governing colonies. Cables shipping subsidies and postal service will come up, but the main topics will be Imperial defenze and trade. While the colonies will be reluctant to surrender their self-governing rights, it is probable that some basis for financial contribution to Imperial defence may be reached. If some form of preferential tariff be adopted by the home government, some of the colonies may be willing to agree to a common increase of five or ten per cent. in tariff duties and to set apart the sum thus raised for defensive purposes. If the mother country is disposed to adopt preferential system in dealing with colonies, Mr. Chamberlain has little margin for negotiations in new corn duties, but a revenue tariff, based on a similar principle, will enable him to take up Imperial federation on a business side. There is an opening for a zolverin talk, with the chance of dragging Hicks-Beach into it another year.

The market hardly knew what to make of the budget yesterday. Consols fell at the outset, and then became almost buoyant, but afterward eased off again and closed unchanged These erratic movements were caused by the uncertainty which prevailed as to the form the £32,004,000 loan would take. It was not until just before the close of business in the city that it became known that the chancellor of the exchequer proposed to borrow the money in the same way as consols at 2¾ per cent. in 1903. This decision caused general disappointment as the Transvaal loan guaranteed by the Imperial government had been anticipated. In the Commons, Hicks-Beach admitted that there had been a difference of opinion on this question between himself and Chamberlain. He said the colonial secretary was anxious to make the charge on the Transvaal

MONTREAL OPINION.

Montreal, April 17.—The import duty on grain and flour imposed by the British government caused a great deal of discussion to-day upon the board of trade and corn exchange. Contrary to the cabled opinion, these duties are not simply for revenue, but owing to the difference of duties on the raw and manufactured articles, are regarded here as the beginning of a protective tariff.

FOUL PLAY SUSPECTED.

Toronto, April 17.—Great excitement prevails through York county, particularly in the neighborhood of Newmarket, and the township of East Willaimburg, over the discovery in a swamp of the body of Wm. Fowler, a well-known farmer of the 7th concession and a man who was 74 years of age. He has been missing since October 20 last, and it is stated an autopsy will show, in spite of the fact that little but the skeleton remains, that his death was probably due to violence. The inquest was opened and adjourned. The crown officers are investing the business and private affairs of the deceased to find if possible a motive for foul play.

TROUBRE IN CHINA.

T roops Killed by Rebels.

Hong Kong, April 16.—A courier, who arrived at Canton yesterday, reported that over 2,000 Imperialist soldiers, sent by Marshal Su against the rebels, were ambushed in a narrow defile and were all killed or captured.

The situation in the rebellious districts of Southern China is increasingly alarming. The viceroy of Canton has telegraphed to Pekin urging the immediate forwarding of re-inforcements. Lack of news from General Ma and Marshall Su is taken to indicate that the rebels have surrounded the Imperial troops and cut off their retreat.

TO REACH THE PLANET MARS.

Flying Machine Inventor in Berlin Arrested for Forgery.

Berlin, April 20.—Herman Ganswindt, of the so-called flying machine fame, who attracted wide attention here and abroad, was arrested to-day for protracted deception, forgery and gulling the public into subscribing for shares of an aeroplane company. He obtained money in small sums from hundreds of persons. Ganswindt recently flooded the papers here with immense advertisements of flying machines, containing the endorsements of clergymen and other persons inexperienced in the business from all parts of Germany. It transpires that some of the names were forged, including the name of Emperor William's brother-in-law. The detectives had been working on the case for five months. He recently offered to the war minister for twenty million marks (about $5,000,000) a flying machine, which, he said, would reach the planet Mars. He also claimed to have invented a motor having multiplying powers, resulting in a sort of perpetual motion. Ganswindt, who was originally a lawyer, and then a farmer, had been experimenting for ten years with various visionary inventions, none of which practically realized his expectations.

TERRORIZED A TOWN.

Huge Cougar Scared the People of Sardis, British Columbia.

Vancouver, B. C., April 19. — According to a dispatch from Chilliawak, Sardis, a village three miles from that town, has been terrorized by a cougar. The hungry denison of the forest had chosen his lair half a mile from town and was living in fine style off sheep and dogs and anything that came his way. Finally growing bolder he stalked into the town one night and owned it for half an hour. Dogs attempted to chase the brute off, but he laid them dead with solar plexus blows from his huge paws. A dozen householders rose from their beds and charged the monster with pitch forks, but when he rushed at them they fled for their homes. The cougar has not returned to town, but lambs continue to disappear.

NO LIMIT TO THIS.

The man who composed "Home Sweet Home" never had a home. The man who composed "On the Banks of the Wabash," never had a bank. The man who composed "Baby Mine," never had a mine. The man who composed "My Bark is on the Sea," never had a dog. The man who composed "Tramp ! Tramp ! Tramp ! " never owned a tomato can. The man who—but probably we have carried this far enuf.—Kansas City Journal.

But why not carry it further ? The man who wrote "Just as the Sun Went Down," never had a son. The man who wrote "Just One Girl," however, probably had half a dozen. The further you carry it the more interesting it becomes.—Moyie Leader.

Quite so. For the man who composed "Sweet Smelling Posies," never had a cent. The author of "Treat Her Gently," was a prohibitionist; but the fellow who got off "The Soldiers of the Queen" was a son-of-a-gun.—Frank Sentinel.

DEAD MAN WINS A RACE.

The fact that it is known to be possible for a sleeping man to ride a bicycle without losing his balance, and even for an experienced rider to fall asleep on his machine, makes the story less incredible than it may seem at first sight. The incident is reported as having occurred two or thcee years ago at a carnival in Sydney. James Somerville, a well-known Australian cyclist, was first in the race, and about twenty-five yards from the winning-post he let the handles go and fell forward. He continued to work the pedals, however —or the pedals carried his feet round with them—and Somerville was the first to reach the post. But he had lost the prize. He was lifted from his bicycle dead, and the doctors declared that he had died during the last lap.

THE COLONIAL COINAGE.

It is stated that the new coins for the colonies differ in several particulars from those that are being issued by the Mint for home circulation. They have been executed by Mr. de Saulles, the designer to the Royal Mint, who was also commissioned to do the English coinage. He has, however, treated the King's head for the colonial money in quite a different manner. As in some of the issues of the Victorian money, the Sovereign is shown wearing the crown. The head, too, is smaller, with more of the bust showing, and King Edward is portrayed in uniform with the ribbon of the Garter.

--REAL ESTATE--

$600 will buy a 60 x 120 ft. lot with a very good three roomed house. Terms easy.

$800 for a 60 x 120 ft. lot with four roomed cottage. Why pay rent? Own your own house.

$450 for a 60 x 120 ft. lot with a small house.

Houses to Rent WANTED

Two nice cottages to rent. $12.00 and $16 per month.

A choice 60 ft. corner on the main street. Very central. Price below what others are asking. A money maker.

METHODIST CHURCH.

FERNIE, B.C.

SERVICES:

Sunday.....11 a.m. and 7:30 p.m.
Sabbath School and Bible Class, 3 p.m.
Prayer Meeting, Wednesday at 8 p.m,
Epworth League. ....Monday at 8 p.m.

Strangers are cordially invited.

REV. R. F. STILLMAN, - - Pastor.

VESTRY MEETING.

The annual vestry meeting of Christ Church was held on Wednesday, April 16th The Vicar, Rev. C. W. Houghton, presided. There was a very good attendance of the congregation.

The church warden's accounts were presented showing a debt of only $75 on the church building.

The Vicar read the Sunday School report. There are 54 scholars on the roll and a balance in hand of $12.

The Ladies' Guild is also doing good work, and the financial report shows a respectable balance on the right side.

The Vestry acknowledged the good work done by the retiring church wardens, Messrs. T. Beck and Lawrence. The Vicar appointed Mr. Turner as his warden and Mr. Hutchinson was elected people's warden.

Messrs. Lamb and S. Hutchinson were re-elected vestry men.

Messrs. Hutchinson, Turner and H. W. Herchmer were elected as delegates to attend the synod to be held in Nelson in June.

The Vicar presented his report stating that there were in the parish 200 baptised members, 50 communicants. There has been 302 individual communions, 10 baptisms, 9 confirmed, 1 marriage and 5 burials.

Mr. Thompson was re-elected auditor of the church accounts.

Votes of thanks were accorded to the retiring wardens, Miss McFarlane, Mr. and Mrs. Bailey, Mr. Blakemore, Miss Edmonds, organist; Mr Jeffries, choirmaster; and the members of the choir for their good services to the church, also to Mr. T. R. Stockett, jr., for his gift of the electric light fittings, and Mrs. Blakemore for the new stained glass in east window.

The annual meeting, being the first one presided over by the present Vicar (Rev. C. W. Houghton), it was moved that a letter be sent to the Bishop expressing the appreciation of the congregation represented in the vestry of the undefatigable labors of Rev. C. W. Houghton, and their entire confidence in his system of working in the church and parish.

Sunday's express from the east was delayed over six hours owing to a mudslide about two miles from Fernie,

The hockey club wish to thank the ladies of the town for the splendid manner in which they assisted the club in making their ball a success.

The boys of the Angels' Rest have challenged the Green Cottage and the Devil's Retreat to a game of association football to be played some evening during the coming week.

The infant child of Mr. and Mrs. Malcolm McLeod died on Monday of this week. The funeral took place on Tuesday and was conducted by Rev. D. L. Gordon.

Victoria avenue has been graded and cleaned during the past week by Constable Farquharson's willing workers. The large pile of earth in front of the Northern has been used in filling up holes and the street is in better shape than ever before. Chief Barnes is to be congratulated upon the appearance of the street.

INVESTIGATE CHARGES

W. H. BULLICK-WEBSTER IS APPOINTED SOLE COMMISSIONER.

Sittings of the Commission Will be Held at Fernie, Elko, Cranbrook, Fort Steele, Kimberley and Marysville.

Owing to reports made Attorney General regarding alleged irregulars in administeration of liquor license act in Fort Steele district W. H. Bullick-Webster has been appointed sole commissioner to conduct an investigation. Commission was issued at Victoria on April 8th and as soon as he has taken the oath commissioner will set dates for settings at Fernie, Elko, Fort Steele, Kimberly, Marysville, Cranbrook and Moyie. The commission is restricted to administration of liquor license act.

There are at present no commissioners as no appointments were made this year the last commissioners were Grace, Fort Steel; Stork, Fernie, and Clark, Moyie, with constable Barnes as chief license inspector.

The infant daughter of Mr. and Mrs. J. Letcher died on Wednesday of this week.

We are sorry to report this week the death of a popular young man around town, in the person of John Wilson. The young man, who has been ill for some time, was the victim of tubercolosis. He was 17 years of age. The funeral took place to-day.

The many friends of Dr. Doherty will be sorry to hear that he has resigned his position with Dr. Bonneil. During his short stay here the doctor has became very popular. He left this morning for Nelson

The Roman Catholic church was on Monday morning the scene of another Slav wedding. The bride and groom were followed to the church by a host of galy decorated friends. After the ceremony the crowd returned to the home of the newly married couple, where they held high carnival for the remainder of the day and late into the night.

The health authorities of the town have issued notices to the effect that all back yards must be cleaned up within ten days The citizens of the town should co-operate with the authorities in this matter and do all in their power to keep the town in the best sanitary condition possible.

Fernie's New Comers.

A SPECIAL MEETING

PRESIDENT OF ASSOCIATED BOARDS OE TRADE VISITS FERNIE.

C. O. Buchanan Gives Fernie Business Men an Insight into the Silver-Lead Question.

A meeting of the Fernie Board of Trade was held in the Cuthbert block on Tuesday evening. The following members of the board were present:—Messrs. W. R. Ross, J. S. T. Alexander, J. F. Jarvis, R. W. Rogers, F. J. Watson, A. C. Liphardt, T. C. Thompson, W. Thompson, H. A. Kanouse, H. Lever, D. V. Mott, A. J. Pardy, A. B Trites, F. Stork, J. C. Hutchison, W. Richards, H. J. Johnson, A. Mott, J. R. Wallace, Geo. Cody, H. S. Monkman, A. W. Bleasdell and Dr. Higgins.

The president, Mr. W. R. Ross, occupied the chair.

On motion of Messrs Kanouse and Thompson, the minutes were read and adopted.

A communication was received from Mr. E. C. Smith, M.P.P., in regard to the settlement of the land titles question between the Crown and the Crow's Nest Pass coal company.

On motion of Mr. D. V. Mott, seconded by Mr. F. J. Watson, the secretary was instructed to inform Mr. Smith that the board approves of the Government's action in connection with the land titles and that the only change they desired to suggest in connection with the proposed bill was a mistake in connection with the number of the lots.

Mr. G. Buchanan, of Kaslo, president of the British Columbia Associated Boards of Trade, was present and handed the secretary, a copy of the proposed bill to amend the act in regard to securing the incorporation of Boards of Trade. The way the act now reads it is impossible for a board of trade to be incorporated until the town has its limits definitely defined. The ammendment reads as follows:

"But in the province of British Columbia the expression "district" means a mining division, or any tract of country described as extending to certain specified distances and in certain specified directions from any stated point.

"Section two of the said chapter is hereby amended by inserting after the words "two thousand five hundred" the words "or in the province of British Columbia not less than fifteen hundred."

Mr. Buchanan, who has just returned from a trip to Ottawa, where he has been with Messrs. Cronin and Aldrich to urge legislation in favor of the silver-lead mines, then addressed the board at considerable length on the result of their mission. He said that while the silver-lead question did not directly effect Fernie people that it did indirectly. He went fully into the matter and said that although there would be no changes in the tariff at the present session, that they had been assured by the government that action would be taken at the next session. He and Mr. Aldrich had done all in their power to interest the people of the east in the formation of a company for manufacting white lead, and he believed that in the near future the silver-lead mines of British Columbia would have a good Canadian market for their product.

He also stated that the Government had been interviewed in regard to urging the selection of coal lands, and that such selection had since been made, being that portion of coal lands lying on the south side of Morrissey creek. He said that they were informed that it was not the intention of the government to let these lands lie idle, and that if a company, independent of the Crow's Nest Pass Coal Co. and the Canadian Pacific Railway Co., could show that they had sufficient capital to work these lands, they would have very little trouble in securing the them.

Mr. Buchanan said that they had also presented the resolutions passed by the Associated Boards of Trade, favoring the reduction in the price of coke to the Government He said that although he did not think the prices charged by the Crow's Nest Pass Coal Company were exorbitant that considering the dull state of the lead market it would be a great advantage to the lead producers if the cost of production could be reduced and he believed that the price of coke could be reduced without materially effecting the Coal Company.

In regard to the meeting of the Dominion Board of Trade in Toronto he said, that although the Provincial Board had given the motion to unite with the Dominion Board a twelve months' hoist, it would nevertheless be wise to send as many visitors from British Columbia as possible to attend the meeting in June.

The matter of the Provincial Estimates then came up for discussion and Secretary Alexander expressed his opinion that it was time to register a good substantial kick against the way Fernie had been treated.

Moved by Mr. F. Stork, seconded by Mr. H. J. Johnson that a strong resolution be forwarded to the government demanding some recognition in the matter of government buildings.—Carried.

Mr. T. C. Thompson informed the board that the government had reserved a piece of land for a court house and jail.

Messrs. Stork and Alexander were appointed a committee to draft the above mentioned resolution.

On motion of Messrs. Stork and Mott a vote of thanks was extended to Mr. Buchanan for his address and visit.

The meeting then adjourned.

A NARROW ESCAPE

CHAS. COLLARD MAY LOSE AN EAR.

While Raising a Car in C.P.R. Yards He Meets with a Very Painful Accident.

A very painful accident occurred in the C. P. R. yards here on Saturday which in all probability will cost Chas. Collard an ear. Several men were engaged in repairing a car and were raising it from the ground with a quick-lifting jack which slipped and the bar flying up caught young Collard just behind one of his ears which almost severed it from the head, the injured member barely hanging by the skin. The young man was taken to the hospital where everything possible was done for him, but the doctor fearing that he would lose the ear, advised him to go to Toronto at once and have his injury attended to there. Mr. Collard accepted their advice and left for the east on Thursday night.

MORRISSEY.

A very interesting programme was given at the social on the evening of May 1st in the school house. As this was the first social ever held in the place it possessed special attraction in many ways. The following programme was well rendered:—

Chairman's Remarks...Rev. T. H. Wright
Instrumental.....Philip Handley
Recitation.....Miss Quaig
Musical selection.....Mr. Gardiner
Song.....School Children
Address.....Rev. R. F. Stillman
Song.....Miss Jennie Quaig
Song.....Mr. Gardiner
Instrumental.....Mr. Handley
Song.....Miss Theresa Quaig
Musical Selection.....Mr. Gardiner
Song.....G. Boland
Song.....Philip Handley
Song.....Mrs. Hamilton

Amongst those present were:—Mrs. Pearson, Miss Pearson, Mrs. J. R. Wilson, Mr. Clark. Mr. and Mrs. Moore, Mrs. McLean and Mrs. Stanley. After this entertaining programme cake and coffee was served by the ladies. The success of the social is largely due to Mrs. Crossman, Mrs. Olson, Mrs. Miller and Mrs. Leslie. Over 60 people were present and the social was a success in every way. A few will offerings were made after which the Rev, R. F. Stillman brought this social function to a close by a brief prayer.

In response to the requests of the people the Rev. T. H. Wright has been holding religious services for the last few months. A union sabbath school has been started and arrangements have been made for holding Sunday services. Next Sabbath Mr. Bachor has consented to hold a service at 11 a.m.

COL. TAYLOR'S REPORT

EXPERT'S OPINION ON THE SELECTION OF COAL LANDS.

Report Presented to the Dominion Government Advising Selection to be Made on South Side of Morrissey Creek.

Ottawa, April 25—There was presented to the House to-day a return moved for by Bennett containing the report of Col. Taylor, mining expert of Pittsburg, Pa., who was sent by Sifton to the Crow's Nest coal field to report upon the proper place in which to select 50,000 acres acquired by the Dominion under the Crow's Nest Pass railway agreement. Taylor's instructions were to investigate for some location that would be of average value of the entire coal field. His report is dated October 4th, 1901. It describes the peculiar conformation of the country and states that the length of the entire field from north to south is about 30 miles, and its width at the widest part being about 12 miles. Cross sections through the mountains showed that the coal seams form a trough or basin, the lowest point of basin being under the ridge line of the mountains. Outcroppings of the coal seam inside of the mountain facing the main streams are usually at a height of about 2,000 feet above the valley. This makes them almost inaccessible for mining purposes The valleys of Coal Creek, Morrissey creek and Martin Creek are mentioned as specially valuable as points at which to open the mines. Taylor, from the development now made, judges that the best part of the coal fields lie between Michel creek, where Martin creek enters it, and Morrissey creek, where the Crow's Nest Pass coal company are now opening their mines. He suggests that the selection of 50,000 acres be made between Morrissey creek and the outcroppings of the seams of Lodge Pole creek. This is his first recommendation. The next available place would be on Michel creek and Martin creek. In recommending the selections of continuous territory from Morrissey creek to Michel creek Taylor says it is perfectly practicable to mine, the distance across the field being nine or tens miles. Present development at Morrissey indicate that the coal is there at its maximum thickness, and lies in the mountain in such a way that it can be economically used and operated, the two main lines of railway being easily accessible from this point.

LACROSSE SCHEDULE.

A meeting of delegates from Cranbrook, Lethbridge and Fernie, represented by S. Hayes, A. Scott and R. J. Black, was held in the Royal Hotel on Thursday to arrange a series of matches, etc., for the Levasseur Cup, which is to be played for commencing this year.

The cup is to become the property of the team winning it three years in succession, but it is to be held each year by the team winning the most scheduled games in that year.

It was agreed that a schedule of matches be arranged one game with each team on their own grounds and vice versa.

That the visiting team pay their own railroad expenses and the home team the hotel expenses.

That the first game of the schedule be played between Lethbridge and Cranbrook, on May 24th.

That one of the deciding games be played in Lethbridge on Aug. 12th.

That Lethbridge play Fernie at Fernie on June 23rd.

That Cranbrook play Fernie at Fernie on July 1st.

That Fernie play Cranbrook at Cranbrook July 18th.

That Fernie play Lethbridge at Lethbridge, July 30th.

CLERICAL HONORS.

A birthday surprise party was given Rev. D. Holford at his home on Saturday evening last, by the members and friends of his church. They brought with them an ampletude of good things for refreshments which all enjoyed. After which birthday compliments in abundance were tendered his reverance and tangible evidence given him of their marked appreciation of his services for them. An elaborate address was then presented to him by Deacon McLean on behalf of the church as follows:—"We the members and friends of the Fernie Baptist church wish for you not only many happy returns of the day but also that you may long continue with us as our pastor. Since your arrival and residence in our midst as our pastor we have not only learned to admire but to esteem you most highly on account of the sterling qualities we soon discovered in your character. We have found in you a most fearless and loyal citizen and faithful and effective preacher of God's Word ever ready to make personal sacrifice for humanity and zealously to stand firm for what you believe to be right. We realize that the world wants more of such men. We pray that the Great Author of life may grant that His divine benediction may rest upon you together with your pleasant partner in life and your family. That you may long be spared to take your part in life's great work as successfully as you have done in the past. On behalf of the church, A. McLean.

A very enjoyable evening was spent many games of simple amusement being indulged in. At a late hour the party broke up amid ringing cheers for many happy returns of the day.

TO PREVENT STRIKES

ARBITRATION TO BE COMPULSORY.

An Effective Measure to Deal With Railway Strikes Introduced by Minister Mulock.

Minister Mulock introduced a bill in the House of Commons on Tuesday which provides for the settlement of all railway disputes. It is intended by compulsory arbitration to prevent lockouts and strikes on railways. The bill will apply to all dominion roads, including the Intercolonial. There will be seven boards, one for each province in the dominion, and one Dominion board. The provincial board will comprise one member appointed by the railways, one by employees, and one by the two parties. The dominion board will consist of five members, two chosen from the seven provincial railway representatives, and two from the seven representing the employees, and the fifth selected by these four. Ralph Smith and Puttee supported the bill. It will not be passed this session,

Rev. A. Dunn, of Elko, was in town this week.

Mr. Wm. Blakemore arrived in town on Tuesday from Montreal.

The infant child of Mr. and Mrs. Thos. Allan died on Tuesday of this week.

A. Stewart, of Revelstoke, has purchased the interest of R. Moore in the Crow's Nest Pass Cigar factory. Mr. Moore expects to leave for Ireland in the course of a few days.

There was a large turnout of Oddfellows to their anniversary service in the Presbyterian church on Sunday last. The sermon was preached by Rev. D. Holford.

Four coaches of volunteers for the fourth contingent passed through Fernie on Tuesday night. They were joined here by the five Fernie lads who enlisted at Cranbrook last week. Among those on board the train was Walter Trites, of Elko. well known in Fernie.

LATEST TELEGRAPHIC NEWS.

SPIDER'S CHAPS.

A Tale of the Cattle Thieves of Agua Caliente.

Copyright, 1900 by W. LeC. Beard.

"Hold on!" cried the foreman. "I don't need half the men I got up thar, an you'll want all you can get. Wait till I send those I don't want back to you." Spider, who had been listening to all that was said, made a dash for his horse. Being sternly ordered back to his place on the ridge, he went, taking the horse with him.

The foreman sent me nearly two-thirds of the men he had. They were all mounted and waiting when the Ballet Girl rode up and joined them. I ordered him away, but he paid no attention to the command. Not a sound could be heard except now and then the faint jingling of a bit or the whirring click where some man whirled his cylinder in examining his pistol. The foreman divided the men he had left into two parties, one of which he placed at either end of the ridge they occupied, leaving an open space between them. Then he signaled that all was done. I wanted to give the order to advance, and the only words that occurred to me at the time were the ones used to start footraces in the college I had left the year before.

"Are you ready?" I called. The men screwed themselves into their saddles and leaned forward. Some of them cocked their pistols. Then, "On your marks! Set! Go!"

Scarcely knowing what I did, I darted the spurs into the flanks of my horse. He leaped forward. At the same instant there was a wild yell from the men, and the ground thundered and shook as they followed. As we passed our men on the hill, their rifles blazed all together. I could see the sand fly from the opposite slope.

It seemed to take hours to traverse the few yards that divided us from our enemies. In reality it must have been somewhat less than half a minute. Then we galloped up the rise. Behind its crest there was a row of malignant faces that immediately vanished behind clouds of rifle smoke. My horse reared, lurched forward and recovered himself. I dropped the reins on the pommel and began firing rapidly with a pistol held in each hand. Another yell broke from our men as they charged over the top of the ridge. The six shooters began to talk rapidly and all at once, interrupting the rifles.

One of our enemies turned and ran, then threw up his hands, seemed to stumble and fell. I saw that it was Hollis, and I wondered vaguely why he was behaving in such a manner and whether he was as badly frightened as I was. Then something struck me as a club might strike, and for a time everything disappeared.

A few moments later I became conscious that I was being rapidly dragged over the ground. Then I opened my eyes to see that Spider's face was directly above my own. I saw that, though his horse was galloping, he did not pass me. I could feel that his left hand was fast on my collar. His right arm was hooked around the horn of his saddle, and I noticed that the pistol he held in the same hand was much fouled from recent use. I concluded that Spider was dragging me behind his horse. Why he was dragging me or where I neither knew nor cared. Everything became black again.

When I again became conscious that I was alive, my view was bounded by four walls of whitewashed adobe and a ceiling of boards, also whitewashed. I was not at all surprised at the fact that I was lying in a bed—a real bed—with sheets, such as I had not seen for months, or that a dark eyed Mexican woman, dressed as a sister of charity sat by that bed. What did trouble me was the fact that I was weak and utterly helpless. I could not understand it at all and tried to ask the sister. I failed in the attempt, but she saw me try and said in Spanish that I was to keep quiet. Then I tried to think it all out and failed in that too. On consideration I became very indignant with the sister and contemplated saying something quite severe, but I forgot what I wanted to say and went to sleep instead.

When I awoke, a man was bending over me—a man dressed as a priest, but

Spider appeared in the doorway.

who was evidently a physician as well. He wished to feel my pulse. I declined. The sense of weakness was largely gone now. I wanted to see the foreman and I wanted to get up.

"You have been wounded," said the man in Spanish. "You cannot get up and it is not well that you should talk. Let me feel your pulse."

"Send for the foreman and then I will," I repeated unreasonably. The priest hesitated.

"Send for the foreman, padre, and then you can do as you like!" I cried again.

"He is becoming excited. Fetch the man he wants, but only for a moment," said the priest at last. The sister vanished and in a moment returned with the foreman at her heels.

"I know what you wanter say, but you musn't say it," said he, seating himself beside my bed. "You've been here three weeks. This is the convent of Los Angeles—the angels—that's one of 'em what's nursin you now. The cattle's all right—sold an shipped, every last one. Some er them thieves is in jail; the trial comes off on Tuesday. They'll"—

"Where are the ones that aren't in jail?" I managed to ask weakly.

"Don't talk—I'll do all that. The ones that ain't in jail? Well, they they're—well, just about where you saw 'em last, I reckon. They broke an ran just after you went down. Spider, he went in an drug you out. He didn't get hurt, but a ball went through his chaps an burned the skin of his leg. They'll be mighty glad to hear how nice you're comin on, the boys will, 'specially Spider an the Bally Gurl. The Bally Gurl's been makin quail broth every day, hopin you might eat some, an Spider's been a-fightin with him 'cause he don't make enough. He's gone after more quail now. Spider has. He's a good boy, an he's done good work an learned a heap sence we tock him on. I tole him that maybe you'd give him a man's pay now, an I said that if he behaved himself you might let him have a little herd of his own, when he can get the cattle an let 'em run with ours."

"I'll start the brand myself," I said. "I want to see Spider." As though in answer to my wish Spider appeared in the doorway. In one hand he held a shotgun several sizes larger than he was, in the other a string of quail. He saw that I was awake, and started to go away, but the padre looked at me, and must have decided that the interview was doing me no harm, for he smiled kindly at Spider and beckoned him in. Laying down his gun and string of game, Spider advanced cautiously.

"Say, I'm sure glad you're a-gettin well," he said softly, taking one of my hands as it lay by my side. "All the boys is. They said if you didn't they'd break open the jail an hang every rustler they fonn'. I mus' go, now, but me an the Bally Girl we'll keep you fed up as well as we can. An, say, I'm awful glad!" He gently laid down my hand and vanished. The foreman had already gone.

"That is well over," said the padre. "Now you must sleep again."

And so I did.

THE END.

Savage Legends.

The savage islanders of the south Pacific believe that the world is a cocoanut shell of enormous dimensions, at the top of which is a single aperture communicating with the upper air, where human beings dwell. At the very bottom of this imaginary shell is a stem gradually tapering to a point which represents the beginning of all things. This point is a spirit or demon without human form, whose name is Root of All Existence. By him the entire fabric of creation is sustained.

In the interior of the cocoanut shell, at its very bottom, lives a female demon. So narrow is the space into which she is crowded that she is obliged to sit forever with knee and chin touching. Her name is The Very Beginning, and from her are sprung numerous spirits. They inhabit five different floors, into which the great cocoanut is divided. From certain of these spirits mankind is descended. The islanders, regarding themselves as the only real men and women, were formerly accustomed to regard strangers as evil spirits in the guise of humanity, whom they killed when they could, offering them as sacrifices.

We Played Pingpong.

We played pingpong. Ah, she was fair,
And we played alone contented there.
She screamed a happy scream as I
Compelled the little sphere to fly
Far out of bounds and didn't care.

She clapped her hands, all unaware
That I lost purposely; I swear
She seemed an angel from the sky,
We played pingpong.

Her rounded, dimpled arms were bare,
And something urged me on to dare;
She gave one little, frightened cry,
And then I heard her sweetly sigh;
The glory was divided where
We played pingpong.

—Chicago Record-Herald.

No Need to Worry.

Professor Snore is very absentminded. His son rushed into his study one morning and exclaimed:

"Just think, father! I've swallowed a pin! What shall I do?"

"Ah, well," replied the big man, "don't worry about it. Here's another pin."

Keeping down expenses and keeping up her faith in her husband are what make a married woman lead a strenuous life.

There comes a time to every one when his only way of counting the hours is by the medicine he is taking.

Use your gifts faithfully, and they shall be enlarged; practice what you know, and you shall attain to higher knowledge.—Thomas Arnold.

How small soever your lamp may be, never give away the oil which feeds it but always the flame which crowns it.—Maeterlinck.

Unrequited love soon acquires a job lot of wrinkles.

The death rate in Glasgow from tuberculosis is still 20 per 1000.

APPLY THIS TEST TO THE NERVES.

If You Have These Symptoms Your Nerves Are Weak and Exhausted—You Can Get Well by Using Dr. Chase's Nerve Food.

Nervous diseases are little understood. They have long been enshrouded in more or less mystery by the medical profession. Many who are fast falling victims of nervous prostration, paralysis or locomotor ataxia think that they are merely not very well, and will soon be around again—so insidious is the approach of nervous diseases and nervous collapse.

Study these symptoms. They are for your guidance. You may not have them all, but if you have any of them your nervous system is not up to the mark, and a little extra expenditure of nerve force may bring the dreadful downfall.

Intolerance of motion, noise and light; twitching of the muscles of the face and eyelids; fatiguing sleep, sudden startings and jerkings of the limbs; dizziness and flashes of light before the eyes; irritability and restlessness in every part of the body; headache, indigestion, feelings of weariness and depression, and loss of interest in the affairs of life.

So long as the daily expenditure of nerve force is greater than the daily income, physical bankruptcy is certain to result sooner or later. Nerve force must be increased, and this can best be accomplished by the use of Dr. Chase's Nerve Food, because it contains in concentrated form the very elements of nature which go directly to form nervous energy. Nervous diseases do not right themselves. They come on gradually and nerve force becomes exhausted, and can only be cured when the nerve force is restored.

No treatment for nervous diseases has ever received such universal endorsement by both physicians and people as has Dr. Chase's Nerve Food.

In the press of Canada you will find hundreds of earnest letters telling of the wonderful benefits derived from Dr. Chase's Nerve Food. 50c a box, 6 boxes for $2.50, at all dealers or Edmanson, Bates & Co., Toronto.

The Soo road is assisting in an anti-gopher campaign in North Dakota that is expected to bring 100,000 gophers to death, and the tails will be marketed in Minneapolis.

A TALK WITH GIRLS

HOW TO OBTAIN BRIGHT EYES AND ROSY CHEEKS.

Pale, Anaemic and Easily Tired Girls Often Fall a Prey to Consumption.

In young girls we look for abundant health and strength, rosy cheeks, bright eyes firm, plump flesh and constant cheerfulness. How often, however, we meet young girls who seem prematurely old, feeble, pale, listless, thin and irritable. These abnormal and dangerous conditions are due to a general weakness of the blood, and should be cured just as promptly as possible ort he whole life of the patient will be ruined, if, indeed, decline and consumption do not speedily follow. Dr. Williams' Pink Pills for Pale People are the natural, logical and sure cure for weak girls. These Pills make rich, red blood with every dose. They strengthen the nerves, act upon the whole system and bring health, strength and happiness to those who use them.

Mrs. Hiram Rinkler, South Pelham township, Welland county, Ont., says: "It is with pleasure that I give this tribute to the health-restoring virtues of Dr. Williams' Pink Pills. When my daughter, Lena, began the use of your medicine she was in a most wretched condition. In fact, we were seriously alarmed lest she might not recover. The symptoms were a feeling of languor and weakness, gradually growing worse. She became pale, lost flesh, had little appetite and was apparently going into decline. Finally the trouble became complicated with a persistent sore throat, which gave her great difficulty in swallowing. She was placed under the care of a doctor who said her blood was poor and watery, and her whole system badly run down. The doctor's treatment did not help her much; and then acting on the advice of a neighbor, I began to give her Dr. Williams' Pink Pills. The confidence with which this medicine was urged upon us was not misplaced, as I soon noticed a distinct improvement in my daughter's condition. The use of the pills for some weeks completely restored her, and from that time she has been a cheerful, light-hearted girl, the very picture of health."

These pills never fail to restore health and strength in cases like the above. Through their action on the blood and nerves they also cure such diseases as rheumatism, sciatica, St. Vitus dance, indigestion, kidney trouble, partial paralysis, etc. There are so many so-called tonic oills, but they are all mere imitations of this great medicine. Be sure that you get the genuine with the full name "Dr. Williams' Pink Pills for Pale People" on every box. If your dealer does not keep them they will be sent post paid at 50 cents a box or six boxes for $2,50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

An Elk Lodge.

The Monk—Five baby elks have been born here within the last four weeks.

The Cockatoo—By George! We'll organize a lodge!—Smart Set.

Hanby's Grave.

Benjamin Russell Hanby, author of the famous ballad, "Darling Nellie Gray," is buried at Westerville, O., twelve miles from Columbus.

A little country store in Georgia combines "ice cream, embalming, millinery and tooth pulling." When business is slack in those lines, it is usually pretty good in "books and bacon." If there is anything in the community the American shopkeeper intends to have it.

BABY CONSTIPATION.

Can be Cured Without Resorting to Harsh Purgatives.

Constipation is a very common trouble among infants and small children—it is also one of the most distressing. The cause is some derangement of the digestive organs, and if not promptly attended to is liable to lead to serious results. The little victim suffers from headache, fever, pain in the stomach and sometimes vomiting. While in this condition neither baby nor baby's mother can obtain restful sleep. If proper care is taken in feeding the child and Baby's Own Tablets are used, there will be no trouble found in curing and keeping baby free from this disorder. Mrs. T. Guymer, London, Ont., says:—"My baby was a great sufferer from constipation. She cried continually, and I was about worn out attending her. I tried several remedies, but none of them helped her till I procured some Baby's Own Tablets. These tablets worked wonders, and now she is in the best of health. I can now go about my work without being disturbed by baby's crying. I consider Baby's Own Tablets a great medicine, and would advise mothers to keep them in the house for they will save baby from much suffering by curing and preventing the minor ailments commob to infants and small children."

Baby's Own Tablets are sold under an absolute guarantee to contain no opiate or other harmful drug. They are easy to take; mild in action, promote healthful sleep; ful sleek and will be found a never-failing cure for constipation, baby indigestion, simple fever, diarrhoea, sour stomach, colic, etc. They allay the irritation accompanying the cutting of teeth, break up colds and prevent croup. Price 25 cents a box at all druggists or by mail post post paid, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Preparing Dates.

The preparation of dried dates is carried on largely at Awabi, and as the season had now commenced I took the opportunity to observe the process and was taken round the factories by the sheik. The dates selected are picked before they are quite ripe. The factory had a chimney about fifteen feet high and contained several open, circular, copper boilers, capable of holding five gallons each and nearly full of water. Into these vessels the dates are put and allowed to simmer over a slow fire. As the water in the copper decreased from evaporation it was filled up again, but it gradually became inspissated by the extraction of the juice of the date. The fruit is left in the water about half an hour and is then taken out and spread on mats or cloths in the sun to dry, after which it becomes hard and of a pale red color. It is exported in large quantities from Muskat to India.

Norway English.

The proportion of people in Norway who speak English is larger than in any other country of the world.

Cause For Sadness.

Jack—Of course you are going to give up something during Lent.

Will—Yes, and it makes me shudder every time I think of it.

Jack—Is it really going to be as bad as all that?

Will—Yes; I'm going to take my first ocean voyage next week.—Chelsea (Mass.) Gazette.

If on the gates of Paradise were the legend: "Tax dodgers on earth not admitted," how sparsely settled Paradise would be!

There are cases of consumption so far advanced that Bickle's Anti-Consumptive Syrup will not cure; but none so bad that it will not give relief. For coughs, colds, and all affections of the throat, lungs, and chest, it is a specific which has never been known to fail. It promotes a free and easy expectoration, thereby removing the phlegm, and gives the diseased parts a chance to heal.

First Merchant: "Say Byers, you always have such a pretty typist. Do you select her for her beauty?"

Second merchant: "Yes, indeed; it pays. You see, before I got onto the scheme my three clerks would stay away on the least provocation. Now they have fallen dead in love with her, and not one of them stays away if he can help it, for fear the others will get ahead of him."

HOW TO CURE HEADACHE.—Some people suffer untold misery day after day with Headache. There is rest neither day or night until the nerves are all unstrung. The cause is generally a disordered stomach, and a cure can be effected by using Parmelee's Vegetable Pills, containing Mandrake and Dandelion. Mr. Finlay Wark, Lysander, P. Q., writes: "I find Parmelee's Pills a first class article for Bilious Headache."

Physicians say that beards hold microbes, while clean faces attract bacteria. So it is up to every one of us to choose which shall lay us low; or otherwise wear a mask.

Do not delay in getting relief for the little folks. Mother Graves' Worm Exterminator is a pleasant and sure cure. If you love your child why do you let it suffer when a remedy is so near at hand?

A new source of malarial fever has been discovered by one of the Liverpool School of Tropical Medicine now at work on the west coast of Africa. Hitherto this complaint has been attributed to the bite of malarial mosquitos. But the result of recent investigation proves that there is another parasite which is equally as deadly in the propagation of this malady. The new disease-bearer is said to resemble the insect which causes "fly disease" among horses in South Africa.

RELIABLE AGENTS **WANTED**

We want at once trustworthy men and women in every locality, local or travelling, to introduce a new discovery and keep our show cards and advertising matter tacked up in conspicuous places throughout the town and country. Steady employment year round; commission or salary, **$65 per month and expenses,** not to exceed $2.50 per day.

Write for particulars. Postoffice Box 357.

INTERNATIONAL MEDICINE CO., LONDON, ONT

The Flow of Milk will be increased.

Why go to all the trouble of keeping cows and get only about half the milk they should produce.

Dick's Blood Purifier

strengthens the digestion and invigorates the whole system so that the nutriment is all drawn from the food. It takes just the same trouble to care for a cow when she gives three quarts as when she gives a pail. Dick's Blood Purifier will pay back its cost with good interest in a few weeks.

50 cents a package.

Leeming, Miles & Co., Agents, MONTREAL.

W. N. U. No. 374.

BRITISH PARLIAMENT

VOTE OF CENSURE ON THE GOVERNMENT MOVED BY JOHN MORLEY.

THE OCCASION WAS A DISCUSSION ON SOUTH AFRICAN AFFAIRS.

London, April 25.—The forcible detention in South Africa of Albert Cartwright, who, while editor of the South African News, charged Lord Kitchener prior to the engagement with General Dewet, with ordering his officers to shoot all prisoners, formed the subject of a heated debate in the House of Commons last evening.

Mr. Morley, (Liberal), moved the adjournment of the House, which practically amounted to a vote of censure on the government in general, and on Lord Kitchener and Lord Milner in particular. Mr. Morley pointed out that Mr. Cartwright, who had served a year's imprisonment for libel, now desired to come to England, and that his detention was illegal, unconstitutional, and tyrannical. He added that the explanation of Lord Stanley, the financial secretary of the war office, (who served in the South African war as chief press censor, and afterwards as private secretary to Lord Roberts), that the government did not think it desirable to increase the number of anti-British propagandists in this country, was the most outrageous excuse heard in the House since Simon De Montfort invented parliament.

The secretary of state followed. Mr. Broderick in the course of a reply raised a storm by saying that although Mr. Cartwright had served his legal sentence, the question of his liberation was sub-judice. This brought forth a vehement protest from Sir Wm. Vernon Harcourt, Liberal, who declared that such a proposition was scandalous and contrary to the elementary principles of freedom.

Mr. Winston Churchill, (Conservative), also delivered a few caustic sentences, saying he hoped the House would force the government to withdraw the limits of the law and observe the constitution.

Mr. Balfour, the government leader, came to the support of the sorely harrassed war secretary and contended that the government was justified in detaining even a British subject if it was thought his wanderings were calculated to injure the interests of South Africa. Those voting for the adjournment would be condemning Lord Kitchener and Lord Milner, in whose keeping, at this moment, rested the hopes of peace.

Mr. James Bryce, (Liberal), and Sir Robert Reid, (Liberal), twitted the ministers for again interposing Lord Kitchener as a buffer between the government and the House. They scathingly denounced the present action of the government as a gross abuse of power.

The spirit of revolt spread to the government benches. Mr. Ian Malcolm, (Conservative), who is said to have been hithertofore an unswerving supporter of the government, warmly repudiated Mr. Balfour's argument that those voting for the adjournment would be showing themselves careless of British honor. After such an incident he no longer felt sure the members of the government would say they had clean hands in this regard. War or peace would not be facilitated by such violations of the liberty of the subject.

Other supporters of the government followed in the same strain, even Mr. Iver Churchill Guest, (eldest son of Lord Wimborne, a Conservative and a cousin of the Duke of Marlborough), urging the government to realize that its position was untenable and to make some concession. The house then divided and the motion for adjournment was defeated by 259 to 182 votes, a majority of 77. Nine Unionists voted against the government.

AUTUMN SESSION.

The government leader, A. J. Balfour, announced in the House of Commons to-day that an autumn session of the House will be necessary to deal with arrears of legislation.

DOMINION PARLIAMENT.

Ottawa, April 25.— In the House of Commons last night Hon. Mr. Blair reviewed the affairs of the Intercolonial railway and outlined a suggested extension to the Sault. The Canadian Northern Telegraph bill was up before the committee, but action was post poned as the municipalities desire to present an amendment. The N.W.M.P. pension bill was read a third time. The Bell Telephone Bill, vesting the government with ...l control of rates, has passed the Senate committee.

The pope received 20,000 pilgrims at St. Peter's.

OBJECT TO CONTINGENT.

A Lively Discussion in a Montreal Political Club.

Montreal, April 24.—The sending of the fourth contingent to South Africa gave rise to a heated debate before the Letellier club, last night, and at one time it promised to lead from words to blows.

The trouble arose over a motion proposed by Mr. McCaffrey that the club should protest against the sending of another contingent. Several of the members held that it would be injurious to Sir Wilfrid Laurier and the government to discuss the question at present. Mr. McCaffrey, however, persisted in discussing his motion.

The speaker was being constantly called to order and the interruptions were resented by friends of the speaker. For over an hour Mr. McCaffrey held the floor. When the opposition became strong he taunted them with being on all fours before the English.

This was too much for Mr. Desmarais, a member, who warned the speaker to be careful or he would get into trouble.

"We are not on all fours before the English," he exclaimed. "We do their work and take their money and we are independent of them. Let those who want to go to South Africa go there. They are no good to the country anyhow. One of them who went with the first contingent is in the penitentiary for killing a man. Another was on his way and was arrested at Halifax for killing two men and he will be hanged. Three out of the place where I work are going, and I believe I shall write to Gen. DeWet to kill them off at once, for they are no good. It will be for the good of the country to get rid of them; so let them go, and do not let us condemn our respected leaders for ridding the country of these people."

MANITOBA SCHOOL LANDS.

Ottawa, April 24.—After much correspondence some time ago between the Manitoba government and the Dominion government on the subject of the disposition of the fund realized by the sale of Manitoba school lands it was asked that the Canadian government should pay over to the government of Manitoba the amount of money already realized as principal and transfer to the provincial authorities the full control and management of the lands not yet disposed of. The Canadian government could not see its way clear to grant the request and sent a memorial to Mr. Chamberlain on the question. The colonial secretary has replied that it is not a question in which the imperial authorities should interfere and that it is one for administration by the Dominion government and for legislation, if necessary by the Dominion parliament. The entice correspondence has been laid before the house by Sir Wilfrid Laurier.

SOLD LIQUOR TO INDIANS.

West Selkirk, April 24.—The trial of Freeman Goodman for giving liquor to Indians on April 2 (referendum day) took place yesterday afternoon before Magistrate Scott. A great deal of interest was taken in the case by both prohibitionists and liquor men, and the court room was crowded. The prosecution had a very clear case and the magistrate imposed a fine of $50 and costs.

FOR THE FREE LIST.

Ottawa, April 24.—It is the intention of the government to place on the free list all tools and machinery not made in Canada for the manufacture in this country of rifles for the Dominion government. Also all rough or unfinished parts of rifles consisting of screws, nuts, bands and springs imported for the same purpose

KILTIES MUST DROP DRESS.

A special telegram from Pretoria reports that the Highlanders are very indignant on account of the kilt being superceded by the new regulation dress. The abolition of the kilt as a fighting dress has been decided upon. The explanation is that at Elandslaagte and elsewhere it was found to be much too prominent a dress to be serviceable in the field, and that it offers a fair mark on the sky line.

DEERING OFFER TO HAMILTON.

Hamilton, April 23.—Hamilton has been offered a chance of securing the Canadian branch manufactory of the Deeering Harvester Co., of Chicago, now located at Brockville. The chief requirements is a bonus of $50-000. The company employs 125 men and pays about 60,000 yearly in wages.

NORTH AGUSTA FIRE.

Toronto, April 24.—Fire did about $40,000 damage in the village of North Augusta, Grennell County. There is an insurance of $12,000. The hotel and several leading stores were destroyed and several residences burned to the ground.

RECORDS OF CANADIANS.

London Express: The Canadians on New Year's Day, 1900, made a raid from Belmont and captured a Boer laager.

At Paardeburg the Canadians, accompanied by the sappers, advanced under cover of darkness, took up a position, and enfiladed the Boer trenches. Cronje surrendered on the following day. Their brilliant work at Paardeburg gladdened the hearts of Mr. Chamberlain and Lord Roberts, who both sent messages congratulating Canada on the fine work of her sons.

They came again to the fore at Israels Poort on April 25, 1900, when they rushed a kopje in grand style. On this occasion Colonel Otter, who commanded the Canadian infantry, was wounded.

Then there was that fine stand near Pretoria, on July 16, 1900, when the Canadian Mounted Rifles gallantly defended part of Pole-Carew's position. In this fight the son of the Canadian minister of militia was killed.

But perhaps the finest achievement of all was the part they played in the hard fighting near Belfast on November 6, 1900. Then they showed the world an example of courage. How the Canadians saved the guns of General Smith-Dorrien's columns forms one of the most thrilling incidents in the whole campaign. Lord Roberts was not slow to recognize the gallantry and the indomitable courage of these Canadians. As the result of their splendid day's work near Belfast several of the men were awarded the Victoria Cross.

MEAT IS DEAR.

Toronto, April 25.— The Toronto press is actively engaged discussing the prices of meat, already high, and threatening to become higher on account of a beef trust and other concerns. There is a strong movement afoot in favor of vegetarianism instead of meat diet. An interview with physicians shows them as strongly counselling a report to the health authorities suggesting the liberal use of eggs and cheese instead, causing a considerable reduction in living. The increase in the price of meat has been in the neighborhood of 20 per cent. and is becoming increasingly severe on the poorer classes.

COMING WEST.

Montreal, April 25.—A party of 150 French-Canadians, who have been expatriated for some years in the mills of New England, have left for the west. Father Blais, who is a missionary in the west and has been interested in this work of .epatriation, after seeing the party off, left for the New England States, where he selected delegates who will go west to select land. It is calculated that 5,000 people will return from New England to the Canadian west this season.

BRITISH EMPIRE LEAGUE.

London, April 25.—Col. G. T. Denison has arrived in London from Toronto, bringing with him the propaganda of the British Empire league in Canada, and energy enough for a dozen men. He said at the National Liberal club that he was ready to address all sorts and conditions of men on the subject of Imperial federation. A series of important addresses will be delivered by him inEngland.

PREPARING FOR TROUBLE.

Constantinople, April 25.— On account of the uneasiness caused by Italy's attitude with reference to Tripoli, the porte has decided to garrison the Island of Bomba, off the coast of Tripoli, and the port of Tobruk, Tripoli, and a military commission is drawing up plans for the general defence of the Tripolitan coast.

A WOMAN'S REVENGE.

English, Ind., April 25.—Cruel and inhuman treatment will be the plea of Thomas Foley for divorce. His wife admits that she tied his hands and feet while he was drunk, and applied salt to his hands, face and clothing, that the cattle in the field where he lay helpless might lick him to death, as a revenge for a beating she received during a drunken orgy. Foley's skin was raw in many places and his clothing torn to shreds.

CAR INSPECTOR KILLED.

Cayuga, Ont., April 25.—Wm. Hare a car inspector of the Grand Trunk railway here, was run over by a freight train and killed instantly this morning. It is supposed he missed his footing while attempting to jump on the van of the freight as the train was leaving. He leaves a widow and a young daughter.

PENNY POSTAGE IN AUSTRALIA.

London, April 25.— Australia has given her adhesion to the Imperial penny postage system. She has held aloof hitherto on the plea that adhering to the system would mean a loss of revenue.

A MISER MURDERED.

St. John, N. B., April 25.—Isaac G. Oulton, a miser, who was found in his burning hovel last night with his skull crushed in, and his body covered with bruises.

ALARMING REPORT.

The Daily Express Says the Morgan Trust Will Control Canada.

London, April 26.—The Daily Express publishes two flaring columns under the heading "Splitting the Empire. The Morgan Trust to Control Canada." It alleges that Canada will be coerced to accept the terms of the trust; its immigration rates will be fixed by the trust; its immigrants will be compelled to travel on the steamers of the trust; and failing this a commercial war will ed that the trust will control the be declared. The Express anticipat-Canadain Pacific securities, so as to have absolute command of the Canadian ports and railways. Other alarmist points are treated elaborately, apparently on the authority of Colonel Denison, who urges the British and Canadian governments to run a competing line and to tax everything the trust vessels bring to Great Britain, letting everything the Anglo-Canadian line brings enter free.

RAILWAY DISASTER IN ENGLAND.

Fifty Persons Injured on the "Three Penny Train Near Hackney Downs.

London, April 25.—Fifty persons were injured in an accident on the Great Eastern railway, near the Hackney Downs station. As a train from Walthamstow, called the "Three Penny train" was crossing the bridge, an axle broke on the nearest locomotive, and the coach jumped the rails, crashed into the side of the bridge, and lodged across both tracks. The train was filled with persons on their way to work.

The two coaches following the stranded car crushed into it, completing the wreck, and dealing awful havoc among the passengers caught therein. The second car also was wrecked and a number of the inmates were badly hurt. The injured were taken to the Dalston hospital.

TO BOOM TORONTO.

Railway Capitalists Will Make The City the Chicago of Canada.

Toronto, April 26.—The board of control listened for an hour to-day to a deputation of Chicago men, headed by Mr. J. H. Bagile, of Toronto, representing the Great Northern railway and transportation company, regarding the grant of a large portion of the bay front of Ashbridge's marsh for terminal facilities for the proposed air line to Collingwood. They say when they get going they can bring here for transhipment 50,000,000 bushels of grain a year, which will employ a fleet of twenty-five large vessels to take it to the seaboard, some port in Nova Scotia. Then for a return cargo they will bring back Cape Briton coal. By this means they propose to make Toronto the Chicago of Canada. They were asked to interview the city engineers.

FATALLY BURNED.

Seven Year Old Boy Saves His Father at the Risk of His Own Life.

New York, April 26.—Joseph Altolio, a 7-year-old boy, received burns from which he will die in saving his father, James Altolio, from a similar fate to-day. The father and son were sleeping in a stable in order to be near a sick horse, which they were caring for, and thier bed was set on fir e by the upsetting of a lamp. The lad was awakened first, and seeing his father wrapped in a burning blanket, sprang to his rescue. He stripped the burning cloth from his father, but in doing so his own clothing caught fire and he was terribly burned about the body.

EXPLOSION ON A STEEPLE.

A Frenchman Severely Burned While Working on an Edmonton Church.

Edmonton, April 26.—A young Frenchman, named Billeau, one of Messrs. Ross Bros. tinsmiths, was badly burned by an explosion of gasoline in a fire pot on the steeple of the new Presbyterian church this morning at 10 o'clock. Most of the man's clothing was burnt off his body, and had it not been for the prompt assistance of his mates more serious results would have ensued. Several others were slightly burned.

THE DEAN CONSECRATED.

Montreal, April 26.—Very Rev. Dean Carmichael was yesterday consecrated coadjutor bishop of Montreal. The ceremony, which was attended by all the pomp of the Anglican church, was performed by Archbishop Bond, of Montreal, assisted by Bishop Dumoulin, of Niagara, and Bishop Baldwin, of Huron. The threatened protest against the consecration did not materalize, and the ceremonies, which lasted some three hours, were most solemn and impressive.

BRIEF NEWS NOTES

EPITOME OF THE WORLD'S NEWS TOLD IN SHORT PARAGRAPHS.

MANY ITEMS OF INTEREST CULLED FROM DISPATCHES FOR BUSY READERS.

Winnipeg, April 26.—For the Fourth contingent 170 Manitobans have been accepted, 76 being from Winnipeg.

A $20,000 fire visited Chatham's business district.

A surrogate court has been created at Moeden, Man.

W. McCoon, of Elgin, Ont., was found dead near Brockville.

A Winnipeg bar keeper was fined $250 for selling liquor to Indians.

Peace conferences with the Orange Free State party has concluded.

Fred Chaloner, of Rat Portage, was killed in a logging camp near Vancouver.

Octave Pinette, aged 18, was drowned at Ste. Rose du Lac, in the Dauphin district.

The Ogilvie Milling Co. will erect twenty-five elevators in the west this season.

Officer Dodd's arrested an Afghan at Fort William on a charge of murder in Seattle.

Lord Strathcona at a meeting urged the British government to send women to Canada.

Bush fires are causing great damage in Kent county, Ont.

Manitoba wheat sold at Fort William as high as 79 cents on April 24.

J. Y. Cain, formerly of the local government offices, Winnipeg, has been arraigned on a charge of forgery

Edward F. Eagan, of Litchfield, Minn., will be the player-manager of the Winnipeg professional baseball team.

Two boys, aged three and six, respectively, and named Joss, were drowned at Rat Portage on Friday. They were playing near the water's edge and fell in.

Passengers from the Yukon report richer dumps in the Klondike than ever before in the history of the diggings.

A tornado killed four people in Joplin, Mo., and destroyed property to the extent of $50,000.

A Napinka lady was robbed of $120.

The Marquis of Queensbury is bankrupt.

Manitoba maple syrup has been made at Thornhill.

Knives were drawn in a drunken hotel spree in Brandon.

Chinese Imperial Troops routed the rebels near Nau Ning.

Chicago packers are fighting keenly for the control of the egg market.

A Texas rancher will place 10,000 stockers on a tract of land, 175,000 acres, south of Maple Creek.

A strong patriotic feeling has developed in Great Britain against the Atlantic steamship combine.

The Anchor Knitting Co.'s store house and other buildings in Almonte, Ont., were damaged by fire.

It is stated the Leland Hotel and adjoining property in Winnipeg has been sold to St. Paul capitalists.

The jury returned a verdict of 'not guilty' in the Joiner attempted murder case at Lethbridge, Alta.

It is rumored at Calgary that the Territorial elections are to come off in May.

Eighteen members of the Kingston, Ont., batteries, were accepted for service in South Africa.

The first pig of lead has been produced in Canada at the Canadian smelting works at Trail, B. C.

Archbishop Corrigan, of New York, is suffering from pneumonia.

A Canadian Northern engine jumped the track between Port Arthur and Fort William on Friday last. No one was injured.

Three actors were found dead in a New York hotel, from gas asphyxiation.

Whitby, Ont., is to have a beet sugar mill. About $750,000 has been invested in the enterprise by American capitalists.

The Canadian field hospital, under command of Lieut.-Col. Worthington, has created such a favorable impression with the British authorities that they have ordered a similar outfit to be made in Johannesburg.

Sir Richard Cartwright has introduced a bill in parliament to amend the Chinese Immigration Act, by giving half of the poll tax to the province of British Columbia.

The C.P.R. telegraphers will co with General Manager McNi regarding their demands on the company.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, MAY 3, 1902.

POLITICAL CRISIS.

THE happenings at Victoria during the past week indicate that another political crisis is at hand. In any other province in the dominion, the existence of a similiar condition would provoke a flood of comment in the press; but in British Columbia it is different. Unfortunately in this province a political crises no longer excites more than passing interest. In British Columbia the political crises has become a chronic malady. It has a cabinet composed largely of men to whom the salaries attached to the portfolios are their chief concern; and it has an opposition which is led by men who are in opposition chiefly for the reason that they consider the present opposition presents the shortest cut to these selfsame salaries. Just at present the men who are drawing the salaries are having an anxious time, as they have but recent realized how completely they are at the mercy of that eminent statesman. Joseph Martin. Just what this Warwick in British Columbia's politics intends doing, is something they would like very much to know. In the light of the week's happenings it would seem that Joseph is bent, for the present, in impressing upon those who hold office through his favor the maximum of their obligations to himself. He is certainly the Johnnie-on-the-spot. One day he and his chief lieutenant absent themselves from the legislature, and the government members are forced to talk against time to avoid the risk of being defeated upon a division. Again, on Wednesday, when the opposition members have the floor, and threaten to force the government to the limits of the physical endurance, Joseph came to the rescue and saves the day by securing an adjournment on the debate. All this is doubtless highly interesting to Joseph, but, in the incessant turmoil which attends it, British Columbia is rapidly dropping out of favor as a desirable place for investment. From a provincial point of view the chief interest in the present situation centers in the probable life of the political burlesque that now holds the boards. The province has few friends and fewer champions in the men who comprise the present legislature, It can therefore view its passing with equanimity, as it would be straining probability to the utmost to conjure up another political combination which would promise less for its welfare. The axe cannot fall too soon. Matters could not well be worse- After a general election, under the new system of representation, they might be a great deal better.

MISSED THE CHANCE.

W. A. GALLIHER has missed his opportunity as the representative of Yale-Kootenay-Cariboo in the House of Commons. Had he been alive to the welfare of his constituency, and willing to place it before the interests of his political party, he could have made a name for himself, not only in Kootenay, or in the province, but throughout the dominion. Opportunity seldom knocks twice at any man's door and it begins to look as if Galliher was a back number. Where he missed it was in failing to appreciate how deep rooted is the discontent in Kootenay with the jug-handled fiscal policy which premier Laurier and his ministers seem determined to. They have become tired of paying a protective price upon everything they consume and being denied the advantage of the same protection in the marketing of what they produce. The feeling of dissatisfaction broke out in Nelson this week where the local board of trade, as well as a monster mass meeting of the citizens declared emphatically and unanimously for a full measure of protection for the lead producers of the province. The matter is now before the Ottawa authorities and will doubtless receive due attention as the meetings already held in Nelson mark but the commencement of a movement for better terms for Kootenay's chief industry. The co-operation of the Fernie and other boards of trade and public bodies throughout the province has been solicited and will doubtless be extended so that increased duties upon lead and manufactures of leads promise to become the chief issue in federal politics in this province.

SLIGHTLY MISTAKEN.

The Cranbrook Herald under the caption "What is the Matter," takes the FREE PRESS to task in its last issue in the following article:

"A reader of the Fort Steele Prospector and the Fernie Free Press would never know that a commission had been appointed to investigate the rumors regarding the license commissioners and inspector of this district. What is the matter? Mr. Grace is one of the commissioners. If he has been wronged by the reports current over the district why don't he use the columns of his paper in saying so? Is he not interested in honesty in this district? Does he not stand ready to assist in any investigation that will show how the board has been maligned by a people who perhaps are too reckless in their talk and too free in their criticism? Is he not willing to wipe out the blot that has stained the name of this district?

"And the Fernie Free Press! Surely that paper will stand up for right and purity in official life? If the officials have been wronged, will it not demand that the wrong be righted? And if the people have been wronged, if they have been subjected to a blackmailing, will it not be ready to ask for an investigation that will free the district from an such incubus?

"There are men in this district who know whether these rumors are true or false. It is the duty of a newspaper to protect the public and also the individual. If the individual has been wronged, let the newspapers urge his vindication. If the public has been mulcted, let this fact be known.

"What the Herald wants, what the people want, and what every newspaper in the district should demand, is the truth."

If the editor of the Herald will take the trouble to look up our last issue he will find a full report of the appointment of a commission to investigate the alleged irregularities in connection with the administration of the Liquor License Act in this district. True we did not print column upon column of the rumors which have been circulated for the past year or two simply because we have no definite information and could therefore make no charges. If the Herald has information which justifies the policy which it has pursued in connection with this matter it certainly deserves credit for the stand taken, but if on the other hand it is inspired to give circulation to these rumors for some selfish motive and having no proof with which to back up its articles that paper certainly deserves to be censured.

In regard to Commissioner Stork, the Fernie representive, any one who is at all acquainted with the man will not doubt his integrity for a moment. The other two commissioners are comparative strangers to us and we certainly would not circulate vague rumors to their discredit without having substantial proof that they are correct.

EDITORIAL NOTES.

THE Le Roi mine on Tuesday of this week laid off 120 men and the services of 40 other will be dispensed with in a day or two. The above announcement has caused considerable comment, as it was feared that the mine would be closed down, but there will still be 450 men kept at work. The low price of copper is the only cause for the curtailment of operations.

A Splendid Record for Paying Death Claims.

Mr. Geo. Levasseur, who held policy No. 912,424, died on Feb. 21, 1902. On the 10th of March the proofs of death reached the Spokane office, and on the 18th of March a check for the full amount was forwarded through the Canadian Bank of Commerce, in favor of Mrs. Sophia Levasseur.

It is remarkable to note, if we take into consideration the distance between Fernie and Spokane, and then the distance between Spokane and New York, besides going through all necessary formalities, that the Equitable Life Assurance Society of the United States, through Mr. Allenberg, Manager at Spokane, paid the claim in just exactly twenty-five days. It is certainly a remarkable record.

Mr. Levasseur was only insured three years with the Society, having paid to the Society $228.48, for which they paid the amount of $2,000.00, leaving a net profit to the estate of $1,771.52.

The Equitable Life certainly deserves credit for such prompt payment.

The Frank football team will play the Pincher Creek team in the latter town on the 24th of May.

Business is increasing in the C. P. R. yards again. Both yard engines are now working night and day.

The Misses Todhunter oppened their home to a large number of invited guests on Tuesday evening of this week.

Work has commenced on the new furniture store between the Northern hotel and Martin O'Reilly's dry goods store.

Yodo Fujii, proprietor of the Fernie Restaurant, has disposed of his business to J. S. Fakumi, another Japanese gentleman.

Mrs. J. W. Crane, who has been the guest of Mr. and Mrs. A. K. Farquharson for some time, left for her home in Cowley on Monday.

Ask for British Lion or Mainland cigar. For sale at all first-class places. Union made. Manufactured by Wm. Tietjan, Vancouver.. x

Miss T. Hewitt, who recently opened a barber shop opposite the Northern hotel has left town rather suddenly, She leaves many sorrowing, but wiser, friends.

At a meeting held at the police station yesterday the following gentlemen were elected fire wardens for the ensuing year: Messrs. A. K. Farquharson, C. J. Digby and H. W. Barnes.

A man named Parks while helping to unload a car at Pincher Creek, the other day, had the misfortune to run a spike into his foot, which resulted in blood poisoning. He was brought to Fernie hospital on Monday.

Ed. Cline, day operator at the station, has been removed to Cranbrook. During his stay here, Mr. Cline has made himself very popular and his departure is regretted by a host of friends. The C. P. R. freight clerks gave a social evening in his honor at their home on Monday of this week.

The opening of the new Baptist church, which we reported would take place Sunday next, has been postponed. It was proposed to open the building before the inside work was completed, but they have now decided to complete the work before opening it for services, which will take nearly a month.

Customs collections made at the outpost of Fernie, B. C. for the month ending April 30, 1902. Value of goods imported:

Dutiable	$13,720,00
Free	19,525,00
Totat	$33,245.00

Duty collected ..... $ 3,449.55

Inland revenue collections for the month of April, 1902, $1,089.97.

A short time ago some ill-disposed person relieved Mr. D. Hammond, electrician for the coal company, of his velocipede. Dick started in to make inquiries and among other he asked was an Italian employed in the C. P. R. sand house to keep an eye open for the machine and said that he would give him $5 if he was successful in finding the thief. Next day Dick, who was in the power house, heard a row over towards the sand house and the Italian calling him demanded the $5. Dich entered the sand house and found a badly used up man with a velocipede. The machine, however, did not belong to Dick. The Italian had waded into the first man who made his appearance on a velocipede, and was highly indignant when he could not get the five spot.

Constable Tranter brought up a batch of six prisoners from Morrissey on Tuesday charged with theft of a consignment of goods from Morrissey station. It seems that Louis Carsolla had forwarded a shipment of goods to a brick yard man at Morrissey, and when the owner arrived at the station the goods were missing. Upon investigation part of the stolen property was found in a shack occupied by five Italians, namely, Jos. Faralico, Michael Caputo, Chas. Beno, Basil Scalgo. Antorio Anieto. The men came up before Judge Trites on Tuesday and were discharged. They swore that they had purchased the goods from another party, who had since disappeared H. W. Herchmer defended the prisoners.

Martin O'Rielly & Co. have assigned.

Challenge

The Fernie football club have received a challenge from the Calgary team to play in that town at a tournament to be held on May 24th. The team is considering the challenge and if sufficient inducements are offered they may accept it.

Lacrosse.

The lacrosse team for the coming season will be picked from among the following gentlemen:—Messrs. Miller, Dallas, Lukin, Barber, Beaubier, McIntyre, Kastner, Schram, Fraser, Thomson, McLean, Black, Vance Walmsley. McDonald and McQuire. A meeting was held on Thursday to further the organization of the Lacrosse league which was partly formed last year.

Football.

The challenge of the Angel's Rest to the Green Cottage and the C. P. R. rendezvous last week was promptly accepted and Wednesday evening was fixed for the date of the match, and when that evening arrived a large crowd of spectatators were on the ground to witness the game. The teams were fairly well matched in weight and in the science of the game, but the less said about the latter quality probably the better, as there were a number of men on each side who had never plaped the game before. The Angels' team. who were arranged in white, were composed entirely of those who camp at the well known resort, while the other team was made up of four from the Retreat, four from the Green Cottage and two, Dr. Higgins and Mr. Jarvis, from the town—both teams playing one man short. The boys lined up as follows:—

Angels' Rest		Tripple Alliance
Monkman	Goal	Miller
Suddaby	full backs	Black
Patterson	"	Fraser
Taylor	half backs	Johnson
Falconer	"	Wrigglesworth
Wallace	"	McMurphy
Steele	forwards	Jarvis
Smith	"	Herchmer
Laidley	"	Coulthard
Matheson	"	Higgins

In the first half the Angels' were up against it good and strong, their opponents having much the best of the game. A short time after the play was started the Tripple Alliance got a penalty kick at the Angels' goal, but S. Herchmer made a wild kick missing the mark by several feet. Shortly afterwards, however, he succeeded in scoring for their team. This was the only goal made in the first half. In the latter part of the game the Angels' showed up much better and kept the ball in their opponents' ground most of the time, Mr. Monkman, the Angels' goalkeeper, only getting one kick at the ball. The Tripple Alliance however put up a good defence and the Angels' only scored once, the score standing a tie at the end. Coulthard and Dr. Higgins put up a good game for the Alliance, while Taylor, Monkman and Falconer did some first-class work for the Angels'. The play was rather rough but good feeling prevailed throughout and the tie will no doubt be played off during the coming week. R. C. Randall acted as referee, and his decisions were very impartial.

Braced Up...

By some of our tonics and blood purifiers you can pass through the changes from winter to spring without trouble and be in good shape for summer.

Dozens of good spring medicines for man woman and child in our stock. All the old standbys are here besides others not so well known, but highly efficient. Try a bottle of our perfect tonic bitters and be braced up.

WHY PAY RENT

when you can own a home of your own?

The B.C. Permanent Loan and Savings Company

was organized for the purpose of helping those who are willing to help themselves, for instance:

Borrowers vs. Renters

Amouut borrowed $1,000, repaid by 48 monthly payments of $25 each—total $1200 and you own your home.

Rent at $25 per month for 48 months—$1,200 and your landlord still owns it.

OR

Have you a vacant lot? Why not build a house on it? We will assist you on the above plan

POINTERS

—60 per cent of cash value advanced.
—Rate of interest 8½ per cent per annum.
—Interest is stopped on each $100 of principal returned.
—Your choice of repayment terms—from 4 to 12 years.
—Excess payment of principal may be made with any monthly payment, every dollar paid in excess shortens the time and reduces the cost of the loan.
—This Co. does not tie up real estate as the borrower may pay off the whole loan at any time on giving 60 days' notice.

CLAIMED BY FLAMES

A LAMP EXPLOSION HORROR AT ST. NORBERT, MANITOBA.

FIVE CHILDREN OF JEAN B. MONCHAMP BURNED TO DEATH TND TWO INJURED.

Winnipeg, April $8.—The news of a terrible tragedy in which five young lives were lost reached the city late yesterday afternoon from St. Norbert. The dwelling of Jean B. Monchamp, a butcher of that town, was burned to the ground late Saturday evening and his four sons and one daughter, all young children, perished in the flames. He and his wife and another daughter are also badly injured.

The dead are Robert, aged 11; Mastai, aged 6; Charlemagne, aged 4; Cyprien, aged 3; Bertha, aged 8.

The father was terribly burned about his hands and arms in a brave attempt to save his daughter Bertha. He succeeded in getting her body from the house, but nearly paid for the attempt with his life. The mother is blind from the smoke but will likely recover her sight. She escaped almost naked from the house with her youngest son in her arms, but is badly burned and her face may be disfigured. The two children, aged three weeks and two years, escaped without a scratch. Martha, the ten year old daughter, was saved from death by the persistent and gallant attempt of a neighbor. She, too, is badly burned but will recover.

So awful were the flames that of the four boys who perished, hardly a trace remains. A couple of charred ribs and a little white arm were all that were to be found of the four lads when the ruins of the building were searched.

FATHER'S PATHETIC STORY.

The story of the father is very pathetic. To the friends who were allowed to see himyesterday he described, amid sobs, how it was that so few were saved.

The building in which the ill-fated family lived is a two-storey frame house, situated in the village of St. Norbert. The father and mother and the two younger children slept on the ground floor. Saturday night, according to the story of the father, the family retired about nine o'clock, and about an hour afterwards he heard a noise in a room at the side of the house in a sort of addition. In this room were two chicken incubators, and at the time of the fire each of these contained several dozen eggs, which were being hatched, and in order to maintain the heat necessary for the hatching, there was a lighted lamp in each incubator. When Mr. Monchamp went to see what made the noise he did not dress, and when he opened the door he found that the whole room was one mass of flames. The opening of the door seemed to give the flames the draught that they needed, and in a moment the whole of the room he was in was in flames too. He shouted to his wife to escape for her life, and at the same time called to the children up-stairs to escape as the house was on fire. The children seemed to have heard him, as some of them answered. He, thinking all was well, called for help, and in a very short time the neighbors who lived near by were attracted by the shouting and the growing flames.

Mrs. Monchamp had not time to dress, but seized her two children, one a three weeks' old baby, and the other a two year old boy, in her arms and tried to escape by the door So rapid were the progress of the flames that when she tried to get out through her bedroom door, the hall was one sheet of fire, and escape by that way was impossible. It was here that she was so badly burned. The smoke, too, was very thick, and she must have been half blinded. She, however, managed to get back into the room and shut the door. Then with considerable presence of mind, she managed to get the window unfastened, and threw out the babies and then climbed out herself. So great were her sufferings that she fainted on reaching the open air.

In the meantime, two of the children had come downstairs, Bertha, the eight year old girl, being first. She was partially dressed. The door was where the flames were thickest, but she made a dash for it, and fell in the midst of them unconscious. The father saw this and rushed in to save her. He managed to get her in his arms, and it was here that he got his injuries. He brought the girl to the open air but it was seen there was little hope. She was alive and conscious then, but all her clothing had been burned off her, and her skin was dried like parchment. She was taken across to the residence of Mr. Oscar Pirson, and for five hours lived in terrible agony. She died about half past three Sunday morning, but for the last hour of her life she was unconscious. Neither her mother nor her father were able to be at her bedside, as their own injuries were so great that they required the most careful attention.

The oldest daughter, Martha, came down the stairs probably a minute after her sister. By that time the interior of the house was one sheet of flames. She fell at the foot of the stairs, overcome by the smoke. If it were not for the bravery of Mr. Oscar Pirson, the storekeeper, who lives next door to the ill-fated family,this girl would have perished like her sister. He rushed into the house, which was burning like a furnace, and three times was obliged to come out in the air almost fainting from the flames. The fourth time he entered he was so long away that those about thought he had perished, but a few moments after he appeared with the girl in his arms. She was very badly burned about the face and arms, but will recover. When rescued she had but little cloths on, showing how quickly the flames had spread.

DROWNED IN THE RED.

Sam Harstone, the Noted Winnipeg Curler Loses His Life At Lower Fort Garry.

Winnipeg, April 28.—Sam Harstone is dead. Yesterday morning he was alive and well; to-day his lifeless body is lying under the turbid waters of the Red river. With a dozen friends he started yesterday morning for a pleasure cruise, on Mr. C. F. Bunnel's pleasure yacht, the Gracie B., from Winnipeg to the lake. At Lower Fort Garry ferry the vessel collided with the ferry cable, and capsized. The whole party was thrown into the icy current of the Red and after hairbreadth escapes all gained the shore, with the exception of Mr Harstone, who, unable to swim, sunk before help could reach him.

Mr. Harstone was one of the best known curlers in Winnipeg and an all round sporting man, and was noted especially for his unassuming manner and genial personality.

PLAYED BEFORE THE KING.

Toronto Lacrosse Team Defeat The Argyles by 11 Goals to 3.

London, April 28.—Never in its history has lacrosse ever attracted such a crowd, even in Canada, as that which gathered Saturday afternoon at Lords to witness the much talked of game between the touring Torontos and the English twelve playing under the patronage of the Duke of Argyle, who caught the lacrosse fever during his term as Governor-General of Canada.

Ten thousand people crowded the stands.

His Majesty King Edward and members of the royal family honored the match with their presence, and it was a proud moment for the young Canadians when they stepped on the crease and saw the monarch of the Empire present to watch them play the favorite game of the premier colony.

The Argyles, at an early stage, showed that experience gained in other matches with the Torontos had benefitted them, and especially was this noticeable in their adoption of the Canadian system of short passes.

Hard, close play marked the first half, and at the end the score stood Toronto 6, and Duke of Argyle's team 2.

The Englishmen lost a good deal of their vigor in the last half, and it was an easy task for the Torontos to score.

The visitors passed the ball between the flags five times, leaving the Torontos victorious by 11 goals to 3.

The match was more even than the score suggests.

The attendance at the other matches has been large, but to-day's gate will boost the finances away up. The receipts of the match to-day will total close to $15,000.

The date of the Territorial elections has been announced—May 21.

Louis Paquette shot and killed Fred Ledger near Notch Hill, B.C.

Sheffield has won the English cup, the blue ribbon of English football.

An attempt was made to blow up the Canadian tunnel at Niagara Falls

Roland may enter their lacrosse team in the senior Manitoba league.

Mr. Law, a farmer living near Gainsboro, had his premises destroyed by fire.

Diptheria has broken out in the German settlement in St. Clements, Man.

A boy named Croff was fatally shot while fooling with a gun at Gainsboro, Man.

James Kelly, one of the rejected recruits at Lethbridge, N.W.T., was sent to the penitentiary for stealing.

FATAL FIRE AT HULL

A FATHER, MOTHER, THREE CHILDREN AND HIRED MAN LOSE THEIR LIVES.

THE HOUSE AND STABLES WERE STRUCK BY LIGHTNING AND CAUGHT FIRE.

Ottawa, April 23.—Thomas Hill, aged 35 years, Mrs. Hill, aged 32 years, Pearl Hill, aged 11 years; Robbie Hill, aged 9 years;Maggie Hill, aged 6 years; husband, wife and three children, and John Watson, aged 50 years, were all burned to a crisp in Hull early this morning.

Hill had a livery stable at the corner of Bridge and Wellington streets, it was a frame building, erected since the great fire that swept the city of Hull. Watson was a hired man who looked after the livery stable.

The building, valued at about $3,000, was struck by lightning this morning and caught fire. The flames spread so quickly that Hill and his family were unable to escape, and Watson, who slept in the stable, shared the same fate. Four horses were also burned. The building was covered by insurance.

C. P. R. RATE REDUCTIONS.

Mr. W. R. McInnes, the Assistant Freight Traffic Manager Makes an Important Statement.

A dispatch from Montreal says:—"All the conditions are favorable for another immense crop next autumn; there is a large immigration pouring in; strangers are coming in and buying both farm and city property, business is good—what better indications do you want of increased prosperity and progress in Western Canada?"

This is what Mr. W. R. McInnes, assistant freight traffic manager of the western lines of the Canadian Pacific Railway Company, whose headquarters are in Winnipeg, and who is just now in Montreal, said to-day. "There will be no such boom as they had in Winnipeg twenty years ago, but the rapid increase in population, the settlement of the vacant areas, the influx of foreign capital, all tend to an expansion of business, and to the advantage of the country, not a few of the benefits of which will be appreciably felt in eastern Canada. The Canadian Pacific is doing its share towards the development of the country, and in aiding the new settlers to make homes for themselves.

NEW FREIGHT RATES.

"What about reductions in freight rates?" enquired the correspondent.

"The company is acting promptly," he replied. "New lake and rail merchandise and commodity tariffs have just been issued from all points in eastern Canada to points west of Fort William in Ontario and Manitoba. These tariffs show very considerable reductions compared with those in effect during the lake and rail season last year. Similar tariffs are also being prepared, and will be issued as early as possible to points in the Northwest Territories and British Columbia.

"A new local mileage freight tariff is also being issued, covering freight traffic moved between stations in Manitoba and the Northwest Territories, which will show reductions in the rates previously in effect. Similar new tariffs are being issued on cordwood and slabs, live stock, grain, flour, and millstuffs; brick clay, gravel stone, butter, eggs and cheese, all of which tariffs show considerable reductions compared with the rates previously in effect, and some of these tariffs, which in the past only covered points east of Moose Jaw in the Territories and Manitoba, have been extended, generally speaking, to cover the Northwest Territories, as far west as Canmore, on the main line, and Crow's Nest on the Crow's Nest line."

"When will these tariffs go into effect?"

"They are now being prepared, and will be issued as soon as it is possible to do so."

"What about reductions on grain to Fort William?"

"Reductions will be issued as soon as the new crop begins to move, about September of this year, but in the meantime the present tariffs will continue in effect."

SOME REDUCTIONS.

A Toronto dispatch says: The Canadian Pacific railway company announces the following rates to go into effect at once from Toronto, Montreal and all points west, including C.P.R. steamers, representing a reduction of four cents on first class freight, two cents on fifth class, and one cent on classes six, seven, eight and ten.

Strong representation will be made to Manitoba's attorney-general to hold a recount of the referendum vote.

TRADE WITH AUSTRALIA.

Commissioner Larke Thinks the Antipodeans will further Reduce Their Tariff.

Ottawa, April 23.—Trade Commissioner Larke, of Australia, in a report to the department of trade and commerce, says that the revenue derived from the tariff for the first six months of its existence has been unexpectedly buoyant, and this has induced the Lower House to make reductions. It will probably incline the senate to further cut down the rates. So far the tariff has not diminished Canadian trade. The flour trade with Canada, he says, is not yet dead. There is a reduction in the tarift on oat meal, blankets, carpets and woolen piece goods. Cotton goods and printing paper are placed on the free list.

SIR CHARLES DILKE'S OPINION.

He Thinks Peace Will Be Proclaimed Before Coronation Day.

Sir Charles Dilke, who is one of the best informed men in the British Commons, has been giving his opinion as to the prospects of peace. He says:

"I have not the slightest doubt on the subject. Peace will be made if it has not been done virtually already. I have not had any doubt respecting the result since the conference with the Boer leaders began. Their departure to confer with the burghers confirms my opinion." Sir Charles added that he did not believe that the European Boer agents had been dealt with by the government, but they might have been dealt with by the delegates attending the conference in South Africa. Dilke, without doubt, reflects the opinion of the members of the House, which is more optimistic and better informed than opinion outside. It is conceded generally by members that the Boer leaders have reached a tentative agreement with Lord Kitchener and Lord Milner, that they have returned to the commandos as converted and reconciled advocates of peace. The delay caused by these consultations and formal negotiations, which will follow the return of the delegates, will postpone the final armistice and declaration of peace until the beginning of June. This is the opinion of the most cautious observers.

ANARCHIST A CANDIDATE.

Milan, April 23.—For the first time in the parliamentary history of Italy an avowed anarchist, Pietro Calcagno, is a candidate for a seat in the chamber of deputies, with some chance of election. Calcagno, who was only recently released from prison, on the ground of ill-health, is living on a small island in the Mediterranean, which he is unable to leave without the permission of the Italian government. He was imprisoned several times in consequence of his anarchistic principles, and has fled to England and America more than once to escape the police. Calcagno says that if he is elected he will not believe in the Italian parliament.

ILL IN AFRICA.

The following cablegram has been received from South Africa:

Cape Town, April 20.—Dangerously ill of enteric fever, April 19; John Arthur Wilson, Robert Deaz and William Robinson, Second C.M.R., at Elandsfontein. (Signed) Casualty Department.

John Wilson is the son of Edward Wilson, of Hamilton Road, London, Ont. Mr. Robinson is the son of Thomas Robinson, of Halifax. Robert Deaz enlisted at Montreal, and is the son of Mrs. C. W. Deaz, of 622 St. Urbain street.

NEW GRAIN CAR DOOR.

W. J. Judge, a prominent resident of Wapella, has secured the patent rights to a new and improved door for grain cars, which presents numerous advantages over any previous form of grain door. The device is ingenious, yet simple, and there is every reason to believe that its good points cannot fail to recommend it.

ASSAULTED BY NEGROES.

Emporia, Kas., April 23.—Professor Charles S. Huey, assistant in the department of physical training of the Kansas State Normal school, was stabbed in the right breast, and had the upper portion of his jaw bone crushed yesterday by young negro ruffians. Both wounds are serious. Professor Huey had driven the negroes from the fence of the park, where a baseball game was in progress. The negroes commenced throwing stones over the fence into the crowd. The professor went outside to stop this conduct and was attacked. Samuel Harrison, the negro who did the stabbing, was arrested.

He who loses his conscience has nothing left worth keeping.—Isaak Walton.

An earthquake in Guatemala almost obliterated a town and killed 200 persons.

RUSSIA AND JAPAN

WAR SEEMS INEVITABLE BETWEEN THESE TWO NATIONS.

A NEWSPAPER MAN GIVES HIS OPINION ON THE FAR EASTERN QUESTION

Victoria, B. C., April 24.—R. W. Little, editor of the North China Daily News, in an interview given here says that war between Japan and Russia is considered inevitable not only by the Japanese but also by the Russians and all resident on the Siberian coast or thereabouts. Enormous preparations are being made at Port Arthur and elsewhere. In Siberia fortifications are progressing and troops massed, and Japan is also ready.

In the course of the interview the editor said: "Both the Russians and the Japanese regard war as inevitable. The Anglo-Japanese alliance will probably have the effect of delaying the occurrence, but the trend of opinion is that it must come sooner or later. The Japanese are preparing as well as Russia, and they are ready to do battle at a moment's notice. They have spies dressed as Chinese through Manchuria and Siberia and have caches of dynamite ready to blow up the Russian railway and its bridges at a given signal.

He says the empress-dowager has not changed her attitude towards foreigners but now the Chinese government believes that it is only by education and western methods of warfare that their objects can be accomplished, and this is why the empress-dowager is now favoring education, merely as a means to accomplish that which Boxerism failed to do.

The rebellion in the south, he says, is most serious, but it is difficult to get information. The insurrection is a combination of several movements, the Triads, and a portion if the reform element being at the back of it. It is both anti-dynastic and anti-foreign, although nothing has been done against the foreigners as yet. The indemnity is not considered as much to blame for the outbreak as the excuse taken by officials to squeeze the people when collecting the taxes.

MARRIED BY TELEPHONE.

A Kentucky Man and Woman Spliced Through the Long Distance Wire.

Cincinnati, O., April 24.—A Dayton, Ky., widow and a Hopkinsville man will meet to-day for the first time after having been married over the long distance telephone, in the drug store of A. Goetz, of Dayton. They have never seen each other before. The telephone charges were $23.

The contracting parties were Mrs. Gertrude Gallagher, a young widow of Dayton, and Theodore Cohen, a merchant of Hopkinsville, Ky. The bride accompanied by her father, a sister and many guests, entered the store and requested the use of the telephone. The party took seats around the telephone booth and the Rev. R. D. Harding took the receiver from the hook and asked for Hopkinsville, Ky. The bridegroom answered. The minister propounded the usual question to the bridegroom, who evidently gave satisfactory answers. The ceremony occupied 15 minutes. The bride was ushered into the booth and answered the usual questions propounded by the minister at the other end of the wire. The courtship has been carried on by correspondence.

HOMAGE TO SHAKESPEARE.

Stratford-on-Avon, April 23.—The silver-toned bells of Holy Trinity church began to ring at sunrise this morning reminding all within hearing that in this quaint town, far from the rush and crush of the busy world, was born 368 years ago, England's supreme genius. An impressive ceremony was held at the church this afternoon, when the mayor, the trustees of Shakespeare's birthplace, members of the Shakespeare club, and various deputations from schools came to lay their floral tributes on the grave. The vicar received each wreath separately from the donors and set them n place while the organ played "The Legend of the Avon and the Light of Love," the traditional melody said to have been Shakespeare's favorite song.

For abnormally big hen fruit, Mr. Roberts, of St. Annes, has a hen that is certainly a progressive bird, and a leader in her business, according to the following note from that gentleman, in which he says: "Talk about your big eggs; we have a hen that lays sometimes twice a week eggs that will measure 6⅝ and 7⅝. Let me know who has a hen that will beat that."

FERNIE FREE PRESS.

FERNIE, B.C.

WHAT SOME NAMES MEAN.

The following gives the meaning of the names of the principal Highland clans in Scotland:

McIntosh, the son of the First.
McDonald, the son of Brown Eyes.
McDougall, the son of Black Eyes.
McGregor, the son of a Greek man.
McCuithbert, the son of the Arch-Druid.
McKay, the son of the Prophet.
Campbell, Crooked Mouth.
Cameron, Crooked Nose.
Stewart, his Stay or Support.

Messrs. C. C. Richards & Co.

Gentlemen,— After suffering for seven years with inflammatory rheumatism, so bad that I was eleven months confined to my room, and for two years could not dress myself without help. Your agent gave me a bottle of MINARD'S LINIMENT in May, '97, and asked me to try it, which I did, and was so well pleased with the results that I procured more. Five bottles completely cured me and I have had no return of the pain for eighteen months.

The above facts are well known to everybody in this village and neighborhood.

Yours gratefully, A. DAIRT.
St. Timothee, Que., May 16, 1899.

Faith may move mountains, but it takes coin to move household goods —unless you can beat the drayman.

MINARD'S LINIMENT Cures Dandruff.

Aluminium saw handles are being introduced which are said to be both lighter and stronger than those of wood. There are several shapes, but they are all made of thin sheet metal worked into the desired form and supplied with perforations for the purpose of enabling workmen to get a secure hold on the tool. One of the designs offered is adjustable so that the right hand side of the handle is flush with the saw, permitting the operator to work close to the floor or in other inconvenient places.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

PLASTERS FAILED.

LINIMENTS, OILS AND MANY OTHER MEDICINES DID NO GOOD.

A New Brunswick Postmaster Tells of his Efforts to Cure his Kidney Trouble—He Suffered for Years and Tried Many Medicines, but only Recently Found the Right One.

Lower Windsor, N. B., April 27.—(Special.)— Mr. T. H. Belyea, postmaster of this place, has made a very interesting statement of his experience in his efforts to be cured of Kidney Trouble which has bothered him for many years.

At times he would have very bad spells, and when these came on he was almost laid up.

He tried several doctors and used many medicines, but nothing seemed to help him in the least.

Plasters, oils, liniments on the outside and doses of all kinds and descriptions taken internally seem to have but one result. He was no better.

Finally through reading an advertisement he was led to the use of Dodd's Kidney Pills. He says:

"Dodd's Kidney Pills were so highly recommended for Kidney Trouble that after reading some testimonials I concluded to try them according to directions.

"I had tried so many things that I was very skeptical and had but little faith that Dodd's Kidney Pills could or would help me. However, I did not use them long before I found that they were all and more than was claimed for them.

"I have received more benefit from them than from any other medicine I have ever used for they seem to have made a complete cure of my case.

"I feel as well as ever I did and have not the slightest trace of the Kidney Trouble that bothered me for so long.

"I want to say that I believe that Dodd's Kidney Pills are the right medicine for Kidney Trouble."

Mr. Belyea is very well known to everybody in this neighborhood and there are but few who have not been aware of his serious illness.

Everyone is delighted at his improved health and his published statement has done much to make Dodd's Kidney Pills even more popular in this neighborhood than they have been.

The Old Man's Advantages.

A man past fifty can do with less sleep than younger men. He can endure greater steady and prolonged strain. He can bear his burden day after day with less need of recreation. The young man can "sprint," but he cannot "stay" like the man with brain grown iron and nerves steel by many years of training.

Elderly men are less temptable. They are of fixed moral habit. Appetite and passion are under control. For better or for worse they are a calculable quantity, with slight variations to be taken into account.

Elderly men are more loyal as friends if they are friends. Their attachment to a cause or a commercial house is less changeable. They have, moreover, given bonds for good behavior in the persons of grown families whose respect is to them dearer than life. They know the difficulty of repairing mistakes.

Elderly men actually have experience. The older man best reads character. He is the wisest to select agents.

Sound Sleepers.

A recent traveler in central Africa gives several instances of the capacity for sleep developed by his Arab servants. He mentions one of these men as being undisturbed by the discharge of firearms within two feet of his head.

MARKETS.

Manitoba wheat advanced with American markets and on Wednesday was very strong. Exporters were sellers rather than buyers on the advance, but one of the large milling companies came into the market and absorbed several hundred thousand bushels. Altogether we estimate that in the two days, Wednesday and Thursday, something like a million bushels of wheat changed hands. Prices were advanced from 72½c 1 northern, and 69¾c 2 northern on Friday last week to 76c and 73c on Wednesday and some sales were made at ½c over that. By yesterday prices were down again to 74½c 1 northern and 71¾c 2 northern, and buyers very scarce. 1 hard is worth 77c all quotations are in store Fort William, spot, en route or May delivery.

Country Wheat—Market nominal, owing to bad roads.

Liverpool Prices—No. 1 northern spring wheat sold at Liverpool on Saturday at 6s 3½d.

FLOUR—The feature of the week has been an advance of 10c per sack in Ogilvie prices, due partly to the recent advances in wheat and also to the large export demand for this flour. We quote prices now as follows: Hungarian Patent, $2.06 per sack of 98 pounds; Glenora, $1.90; Alberta, $1.70; Manitoba, $1.50; and XXXX, $1.20.

MILLFEED—Bran in bulk, per ton $14.50; shorts, $16.50. Delivered in bags, the prices are $1.50 higher.

GROUND FEED—Oat chop is quoted at $27 per ton delivered to the trade; barley chop, $22 per ton; mixed barley and oats, $25 per ton; oil cake, $27 per ton.

OATS—Prices for oats have been a little firmer during the past week, owing to the good export demand. We quote: No. 1 white, in carlots on track, Winnipeg, per bushel, 40 to 42c, No. 2 white, 38c; seed oats, 45 to 50c. At country points farmers are getting 28 to 30c for No. 2 white oats. Street oats are bringing 32 to 34c.

BARLEY—Receipts are very light and the market holds firm at 43 to 45c for best grades.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

SPELTZ—Dealers are asking 75c per bushel of 50 pounds for seed speltz.

HAY—Receipts are only moderate and the hay market continues firm at $6 to $6.50 per ton for fresh baled. Loose hay is worth $6 to $6.50 per ton.

DRESSED MEATS— Fresh killed beef is not very plentiful, and the market is firmer. We quote: Beef, city dressed, per pound, 8 to 8½c; veal, 7½ to 8½c; mutton, frozen, 8c; spring lambs, each, $3.50 to $4.50; hogs, per pound, 7¾c.

POULTRY—Fresh killed chickens 11 to 12½c per pound, delivered here; ducks and geese, 10 to 11c; and turkeys, 12½ to 14c.

BUTTER—Creamery— The market for fresh made creamery has not yet opened, but it is expected that some factories will begin shipping soon. Those which have been running throughout the winter are still making a little butter for which they ask 24c per pound delivered here.

BUTTER—Dairy—Receipts are more liberal and the market has declined 2c from the top price of a week ago. The top price of the market is now 20c per pound for fresh made butter, put up in tubs or prints, and from that the market ranges down to 16c for round lots, commission basis.

CHEESE—Jobbers are getting 13 to 13½c per pound for cheese. Stocks now in hand are from Ontario.

EGGS—The net price, Winnipeg, today, to country shippers is 10c per dozen.

WOOL—The market is expected to open shortly for Manitoba wool. Some in the trade think that the opening price will be about 7c per pound for unwashed fleece.

CATTLE—Receipts have been more plentiful during the past week to fill local requirements, and the market for beef animals eased off about ¼c in some cases. It is still the opinion in best informed circles, however, that cattle are scarce and fully worth the price which has been paid for them lately, namely, 4¾c per pound for butchers' grades, off cars here, although this week some nice cattle sold for 4½c. Buyers are still offering $14 to $16 per head for yearling stockers, and $18 to $20 for two year olds, but the available animals have been all bought and shipping is is now in progress.

SHEEP—Market nominal.

HOGS—Live hogs are in very light supply, and have advanced ¼c this week to 6¼c per pound for best weights, off cars here.

MILCH COWS—There is a good demand for new milkers at from $35 to $45 each.

HORSES—There is a good steady demand for horses for both farm and general use, and dealers find no difficulty in disposing of all they can secure. The market is being largely supplied from Ontario. There are some Montana horses selling. Prices continue high.

A cubic inch of water evaporated at atmospheric pressure will make a cubic foot of steam.

After acquiring a good appetite a man tries to get rid of it.

The proprietors of Parmelee's Pills are constantly receiving letters similar to the following, which explains itself: Mr. John A. Beam, Waterloo, Ont., writes: "I never used any medicine that can equal Parmelee's Pills for dyspepsia or liver and kidney complaints. The relief experienced after using them was wonderful." As a safe family medicine Parmelee's Vegetable Pills can be given in all cases requiring a cathartic.

If a man is a wit he says things; if he is a humorist he writes them.

REV. R. F. STILLMAN, - - Pastor.

THE PREACHERS' COLUMN.

"I pray thee, O God, that I may be beautiful within."—Socrates.

There is plenty of time for action but none for waste; for improvement, but none for dissipation.

"Prayer is not conquering God's reluctance, but laying hold upon God's willingness."—Phillips Brooks.

A man who lives right and is right has more power by his silence than another has by his words. Character is like bells which ring out sweet music, inspiring all who hear.

An atheist who spent a few days with the saintly Fenelon, said "If I stay here much longer I shall become a Christian in spite of myself. Fenelon had used no word of controversy or solicitation. It was but the quiet, convincing argument of a holy life in a consistant walk and conversation.

"I did not like your prayer very much this morning" said a fault finding deacon to his minister. "I am very sorry it meets with your disapproval, Deacon" the good man responded, "but you must bear in mind the prayer was not addressed to you."

"All people know that the religious consciousness is that wherein they possess the truth; and religion they have ever regarded as their true dignity and the Sabbath of their life."—Hazel.

"People who judge of christianity by its inevitable excrescences are like those who judge of the health of a people by its hospitals or its morality from its prisons. If you want to judge of christianity you must study it in the mind of its Founder, and also in the lonely chamber and the sick room rather than in merely professing followers, or in the colleges of augurs and the councils of priests."

Phariseeism has not passed away. It still lives and flourishes; not indeed in as crude forms as in the days of Christ. But its spirit is so subtle and insidious that it enters in and mars much of the religious life of our times.

The phariseeism of today is not confined to any particular class or creed, You may find it in any and every walk of life, —in pulpit and pew alike. In some it manifests itself in an endeavour to appear faultless in the eyes of others, for the sake of their applause. In others it is seen in their readiness to tell how bad they once were, that their present righteousness may stand out all the stronger. by way of contrast. In others again we find a readiness to pay a tithe in a little minded and vexatious prohibitions of things innocient, in demoralizing restraints upon the freedom of joy and the healthy instincts of nature and to omit the weighter matters of the law—Love and Liberty, the glorious liberty of the children of God. In others still, it shows itself in that "puffing up" which is the surest and fatalest sign of all false religious life and experience. It manifests itself in a desire to have the pre-eminence, to teach rather than to be taught. Beware of converted children who would teach their parents, of converted convicts, who would teach honest men, of converted dunces who fancy they are God's peculiar people, called on to declare His word and to preach His gospel. Pharisees of every type lack the spirit of humility which "suffereth long and is kind." They are "swollen with the wind and the rank mists they draw."

"The Last Act of the Tragedy" will be the subject discussed by Rev. D. Holford, in the Baptist church, Joyce's hall, on Sunday evening, May 4th, at 7.30. Morning service at 11 o'clock, subject, "Making the Best of Things."

The services at Christ church to-morrow, May 4th, will be as follows: Matins and Litary at 11 a. m.; Sunday School and young men's bible class at 2.30 p.m.; Evensong at 7.30 p.m.

An added factor along educational lines in Fernie is found in the Baptist Young People's Union, held in Mr. Archie McLean's home, on Howland Ave., pending the opening of the new Baptist church. The subjects discussed are of such a nature as to arouse the best thought in the minds of all present. These discussions which prove to be a real inspiration to young and old to think and act their part in life as responsible moral beings. Christians of any or all denominations as also those who make no profession whatever of christianity are cordially invited to attend these discussions.

MICHEL

Michel proposes to extend itself on the anniversary of the late Queen Victoria's Birthday, May 24th. Sports will be held on the town prairie and amongst the many items to be gone through are the following:—100 yards race for men, ¼ mile race, a race for juniors and many other events in the running and jumping line. It is also suggested that baseball, football and cricket matches shall be played from sides selected from the town people. A concert may be given in the hall in the evening to wind up what will be an eventful day. It is thought that the whole town will be in attendance to enjoy the different games, provided the weather be fine. We wish them all success and say go ahead Michel.

BORN

JOHNSON—In Fernie, on Tuesday, the wife of Mr. H. J. Johnson, of a son

TURNER—In Fernie, on Wednesday, the wife of H. J. Turner, of a daughter.

Robt. Shore, who was arrested here about a month ago upon suspicion of having murdered his wife, but who was later on acquitted, has enlisted for South Africa. He went with the Nelson contingent.

Accident

A man named John Hay, who was employed at McRae's saw mill had the misfortune to have one of his arms terribly torn by a circular saw on Saturday last. The saw caught the hand at the knuckles and tore a gash right to the elbow. The injured man was taken to the hospital, where everything possible was done to relieve the pain, and he is getting along as well as can be expected.

AN ENQUIRY WANTED

GRAND JURY AT NELSON WOULD LIKE TO SEE INVESTIGATION.

Grave Suspicion Cast Upon the Administration of Justice in Fernie.

"Re Gaol—We visited the gaol and "found thirty-two prisoners, about half "of whom came from Fernie, in East "Kootenay, and although we were un-"able in the time at our disposal, and the "distance of Fernie from Nelson, to "gather exact facts, we are of the opinion "that a condition of things exists in the "local justiciary in Fernie, to warrant an "investigation by the attorney general's "department without delay."

The foregoing is a clause which appears in the presentment of the grand jury at the Nelson assizes, which was made on Thursday afternoon. Just what it means is left largely to the imagination of the reader as everything in the way of details is lacking, but upon its face it would appear that the manner in which "justice" has been administered in Fernie has been so unsatisfactory, at least to the members of the Grand Jury, as to call for a searching investigation by the attorney general's department. Just what warrant there is for the suspicions of the members of the Grand Jury is a matter which can only be determined by a duly constituted commission of enquiry, but now that the matter has been thus passed upon by the Grand jury, it becomes the obvious duty of the Attorney General, in justice to the men whose reputations are clouded by the insinuation contained in the above paragraph, to see that the commission for the enquiry issues without delay. Whether in the event of the Attorney General deciding to take such action he should cause a new commission to issue, or whether for the sake of economy and convenience he should cause the commission now held by W. H. Bullock-Webster to be extended, so as to take in the new subject of enquiry, is a matter which will rest with the Attorney General. The commission already issued, it will be remembered, is restricted solely to an enquiry into the manner in which the Liquor License Act has been administered by the late Commissioners for the Fort Steele License District. The convenience and economy which would be secured by the enlarging of the present commission, will suggest itself even to the casual reader, and as to the ability of Mr. Bullock-Webster to conduct such an enquiry, it may be doubted if any other man in the province is more eminently fitted for such work than he. The matter of greatest importance to the district is that there shall be the least possible delay in the institution of the enquiry, as it is a serious thing to undermine public confidence in the men who are entrusted to administer the law. If, as it has been intimated in Nelson, some money judiciously placed, is a more potent factor in determining cases in Fernie than any other, the sooner the fact is proven and the guilty punished, the better. But it must not be assumed, without trial, that the local justiciary is blameworthy. The stories of monetary influence may be wholly without foundation, and even the seemingly inconsistent sentences, which it is said caused the members of the Nelson Grand Jury such concern, may be capable of satisfactory explanation when all of the circumstances surrounding them are properly understood.

MICHEL

A most interesting programme was given in Michel on the evening of the 3rd inst., under the auspices of the M. E. church, to a large and attentive audience. Rev. Wright, pastor, occupied the chair and while his remarks were true to the maxim "brevity is the soul of wit" yet his amiable tact and versatility were amply demonstrated in presenting the following program and the audience were held on tip-toe expectation throughaut :—Overtures—Concertina and piano by Messrs. Almond and Darbyshire, opened the evening with a flourishing promise which the subsequent selections indeed fulfilled. Songs—Steele Bros. in their genial offhand style rendered invaluable service. Recitations—Miss Roblin in her inimitable manner completely carried the audience ; Mr. Fansall's selections gave the good natured audience an opportunity of venting their feelings which they did in true Bohemian style ; Miss Evans rendered a selection of great pathos and truly sustained her good name. Song—Mr. Joseph Taylor very ably supplemented the pleasure of the evening with some of his vocals which were greatly appreciated. Throughout the programme was interspersed with continuous encores and the distilled essence of good nature permeated the entire evening which was concluded with a hearty "God Save the King." And now while the industrial atmosphere of our town is alive with noises of progress and anirnation it is to be hoped that it will lend some of its vigor to the social and that many pleasant evenings will follow in the wake. An indespensable feature of the programme was the courtesy of Mr. and Mrs. Robinson in placing their piano at the disposal of the committee.

RECREATION GROUNDS

COMPANY WILL CLEAR NEW SITE FOR GROUNDS.

Selection Made in Valley North of the School—Other Athletic Association Matters.

The Crow's Nest Pass Coal Co. are asking for tenders for the cleaning and grading of a piece of land 400 feet square at the foot of the incline north of the public school building instead of the present valuable piece of land in the centre of town.

When it became known that the coal company had decided to take possession of this piece of land, which had been used for recreation purposes for the past three years, general regret was expressed as it was thought that the new grounds which the company had promised the town would be considerably removed from the main part of the town, but the selection of the new grounds at the foot of the hill, just behind the school, will give general satisfaction as the place will be almost as convenient as the present site and the thanks of the Athletic Association are due to Mr. T. C. Thompson who made the wise selection.

At a meeting of the executive of the Athletic Association held this week, it was decided to erect a moveable fence around the present recreation grounds and the contract for building the same has been let and the work will proceed at once. The contract price is $250, which, is quite reasonable considering the size of the grounds. The fence will be a big advantage to the Athletic Association and will soon pay for itself, as it is impossible to collect the $2 fee as long as the grounds are open.

As there has been some trouble between the different clubs as to the nights fixed upon by the different clubs for the use of the grounds, Secretary Cree has posted up notices setting forth the nights as they were last season, which the Athletic Assiation decided to adopt at its first meeting this season. The arrangement is as follows :—Lacrosse, Monday and Thursday ; football, Tuesday and Friday ; baseball, Wednesday and Saturday.

SENSATIONAL ENDING.

Nelson criminal case of Rex vs. Holmes had sensational ending to-day when the jury returned a verdict of not guilty. This verdict Justice Martin had refused to accept the previous evening and locked the jurors up for the night, as he considered the evidence against the prisoner conclusive. When the same verdict was returned this morning Martin lectured jurors in scathing terms and in discharging the prisoner said that her offence was less detrimental to administration of justice than action of jurors in acquitting her. The prisoner was charged with attempting to procure an abortion. There is intense feeling over the remarks of judge as jurors are among the best citizens of the town. The case against the three Fernie men is now proceeding and will be finished tomorrow.

BORN

REYNOLDS—In Fernie, on Monday, May 5th, the wife of C. Reynolds, of a daughter, stillborn.

THE BLAIRMORE COAL

A NUMBER OF PROPERTIES NOW BONDED TO W. BLAKEMORE.

Jas. R. Wilson has Taken Charge of Development Work, Which will be Commenced at Once.

Eastern advices state that an important deal has been carried through in Montreal by Mr. Wm. Blakemore in the amalgamation of the principal Blairmore coal properties for prospecting purposes. Mr. T. G. Proctor and R. E. Fishburn, of Nelson, who own the Blairmore townsite and 4,000 acres of coal lands, and Mr. M. H. Cowan, of Spokane, who represents the owners of the Livingstone property, went to Montreal to negotiate the deal which was successfully put through and these and other properties are bonded to Mr. Blakemore for the coming season. Under his supervision a thorough proof of the properties will be made. No time has been lost, Mr. Blakemore only arrived from the east a week ago and already the contract for a cross-cut tunnel to cross all the coal seams on the Proctor areas has been let. In addition a large diamond drill used last year by the C.P.R. in the Pass has been hired and is being sent to the Livingstone property. Mr. James Wilson, recently mine manager to the Crow's Nest Pass Co., has been engaged to take charge of the operations and he commenced his duties yesterday. It is certain that before Mr. Blakemore's option expires the true character of these extensive areas will be determined and the important problem of their true relation to the Fernie measures solved.

DIED OF PNEUMONIA.

The death of Mr. Jas. Royal Hennessy took place at his home in Fernie on Tuesday of this week. The deceased was a victim of that dread disease, pneumonia, which has been the cause of so many deaths here during the past three months. The funeral took place on Wednesday, the service being conducted by Rev. D. Holford in the Methodist church and the remains were followed to the cemetery by a large encourse of friends. Mr. Hennessey was one of Fernie's first settlers and his memory will be respected by all who knew him.

On Saturday last, Isaac McKay, an old resident died in the hospital after a few days illness. The funeral took place on Sunday, the service being conducted by Rev. D. L. Gordon. Deceased leaves a wife and two children to mourn his loss.

D. Flynn, section foreman for the C.P. R. in the yards here, died on Saturday last and was buried on Sunday. He was fifty-five years of age.

A Slav woman named Mary Janick, died of pneumonia at her home in the Old Town on Wednesday last.

MORRISSEY.

Butter! Butter! is the general cry now on in Morrissey.

Morrissey can now boast of a new station and express office.

Over the river business still keeps good, Bob and Eugene are at work erecting a new cable bridge over the Elk river.

H. F. Martin, superintendant of the Morrissey mines, left on Sunday last for a business trip to the coast.

Constable Tranter was in Elko on Monday taking a man to Fernie accussed of stealing a gold watch and chain.

A dairy and chicken ranch has been opened up here near the mines. The miners now have fresh milk for their rolled oats.

Rev. C. W. Houghton, of Christ Church, Fernie, intends for the future to hold services every alternate week in the school room here. Everyone is cordially invited.

Work will soon commence on another 25 houses and a large general store here. Going on at this rate, this will soon be one of the largest mining towns in the Kootenay.

Born at Morrissey, the wife of Mr. W. F. Tranter, of a daughter.

Morrissey is contemplating a mock parliament in the near future. This will be much appreciated by the inhabitants with the dark outlook of the government now.

The new engine to be run on the spur of the Crow's Nest Coal Company arrived this week. It is one of Jim Hill's, of the Great Northern, and is capable of handling all work required here.

Morrissey Polo grounds are on the way to completion, local players are now in fine shape. Dr. Wilson and his pony, Midget, are the finest turnout on the ground so far. Outside teams have been challanged.

Messrs. Jeffries and Todd with a force of men are busy putting on a coat of paint on the houses and cottages of the coal company here. As the colors are of different tone the town has a very pretty appearance,

Two very select maidens arrived here last week and proceeded to purchase a house, object dressmaking. Owing to Constable Tranter's religious principles however, they had to git. House for sale now cheap.

Tom Craney and his gang have the contract for the last two mile of the Great Northern here, they will commence work right away at the junction to connect with the new spur. Coal will be shipped out of Morrissey mines by the first of August.

An enjoyable smoker was held in the large bunk house of the Coal Company here, on Thursday evening. It was given as a farewell to R. Pearson, who left for England with his family this week. Before the evening was over the genial Robert was the recipent of an exceedingly fine testimonial in the shape of a gold watch and locket, presented by the officers and the employees of the coal company at Morrissey. The occasion showed how great was the respect and esteem in which he was held by all.

Five hundred more men are expected shortly for work in connection with the coal mines here. With the advent of the new general manager on the scene, work will be pushed ahead fast. The Morrissey coal is of even a superior quality than either Coal Creek or Michel. The mines and town site are better situated from the sanitary standpoint and the miners living here prefer the place to either of the above mentioned. The climate here is all one could wish, escaping the rain which afflicts Fernie, and by far the better place in which to live.

JOE MARTIN AGAIN.

THE DISTURBER MAKES A SLAP AT FERNIE

Tries to Defeat and Cancel the Government Contract With the Coal Company.

Coast papers report that the irrepressible wrecker, Joe Martin, is keeping up his old reputation to make all the trouble he can for Fernie. He has given notice of an amendment intended to defeat and cancel the Government contract with the Coal Company, whereby the latter recently acquired the Government third of the townsite for $15,500 and several odd lots. Let him go ahead ; his action will not be forgotten, just as Fernieites will never forget his conduct on the school question. But our citizens need not be afraid that this will have any effect on the granting of deeds for the lots, because the Coal Co. have actually received the title and even if Martin succeeded in defeating the Government they could not take back the title. It would only be a matter of other terms. Of this, however, there is little danger. Meanwhile Mr. Thompson, the Land Commissioner, is busily issuing deeds as fast as claims are verified.

THE POLITICAL SITUATION

Victoria, May 10—The Dunsmuir Government is on the eve of a break. The premier had a conference today with McBride, leader of the opposition, with a view to patching up an arrangement for completing the work of the session. Martin has refused further support because the government is too liberal with railway subsidies and Ellison and Clifford threaten trouble because the Government will not be even more Liberal. If terms are not made with McBride the government will probably be defeated on Monday. Another conference has been arranged for tomorrow, which indicates that terms may be made.

AN IMPERIAL INQUIRY.

Into Asiatic Labor ompetition In British Colonies—Thorough Investigation.

Vancouver, B. C., May 4.—Specials from London announce the issue of a royal commission under the signature of King Edward to make a thoroughly enquired into :

1. The character and extent of the evils attributable to unrestricted immigration of aliens into the United Kingdom and (2) all measures that have been adopted for the restriction and control of alien immigration in foreign countries and British colonies, this commission being preliminary to legislation and the shaping of the imperial policy to meet the conditions created by Asiatic labor competition and safeguard the rights and interests of all British communities, some of which (notably British Columbia and Australia) have long found the Chinese and the Japanese a source of infinite annoyance.

The commission will visit all parts of the empire and investigate for the preparation of materials for an authoritative report; and will be composed of experts on social and industrial conditions. Baron Rothschilds being named as chairman and the clerk of the Poor Guardians in White chapel as secretary.

A TERRIFIC COLLISION.

Two Railway Engines on the New York Central Smashed—Two Fatalities.

Clyde, N.Y., May 4.—The New York Central fast mail No. 3, westbound, collided with a fast freight, going in the opposite direction, a quarter of a mi e west of the station here at 5 p. m., killing the engineer and fireman of toe mail and seriously injuring thirteen mail clerks The fast freight was going on track No. 1, but crossed over to No. 2 to permit an eastbound passenger train to pass. When it started to cross back, the mail approached at a speed of fifty miles an hour, before its speed could be checked the two engines collided. They were torn to pieces and hurled into the air by the force of the impact. The first mail car and six freight cars were crushed to pieces and the other cars of both trains badly damaged. The crew of the freight jum ped in time, but Grant and Knoxon were killed by leaping. The mail clerks were tossed about and all of them seriously hurt, some of them internally hurt and many terribly bruised. Assistance was summoned from Syracuse, and the injured were cared for. The track. It is supposed that the freight crossing and gave the mail a clear track. It is supposed that the lreight crew should have waited for the mail to pass, knowing that it was due.

SHIPMENTS VIA VANCOUVER.

Western Outlet for Fertile Grain Producing Tracts of Alberta.

Nelson, B.C., May 4.—The Brackman Ker Milling Co., has secured a contract to supply the Imperial war office with four thousand tons or about two hundred and thirty thousand bushels of oats to be shipped from Vancouver to Durban, South Africa. The oats are in store in elevators in Edmonton where they will be inspected by officials sent out from Ottawa before being shipped. This shipment will constitute the first cargo of grain to be loaded on the British Pacific coast but it is rumor- that it will be the forerunner of a large grain exporting trade from these ports.

The British department is advised that a British medal is being struck for the recent operations in China. It will have three clasps entitled "Defence of Legations," "Relief of Pekin," and "Taku Forts." The will be similar in pattern to that for the Chinese wars of 1842 and 1860, excepting that the obverse will bear the same effigy of her late majesty as on the South African medal. Nieut. Col. Boulanger, who commands one of the new regiments of Canadian Mounted Bifles, is one of those entitled to the honor.

When its summer time table comes into effect June 15, there mill be five standards of time in use on the Canadian Pacific railway system. At present there are only four standards in use. Eastern, Central, Maritime and Pacific. The fifth will be Atlantic standard, which will be used on the Atlantic division, where eastern has been the standard. The Intercolonial railroad will also adopt Atlantic standard, which is one hour faster than eastern.

A Melbourne telegram states that the House of Representatives reduced the duty on machinery from 20 to 15 per cent. The bill contains the Canadian provision for suspending the duty in cases where evidence is forthcoming that such duties are leading to the formation of trusts.

SOME RECORD CROPS.

Instances of Wondesful Results Obtain?d by Farmers in Other Lands.

At Newnham Paddox, in the county of Warwick, England, one and a half acres were recently sown with sugar beet. The land was a strong loam, and the fertiliser used was bone and nitrate of soda. The crop amounted to 25½ tons to the acre, and the entire cost of cultivation was just over £9. The beet was of excellent quality, so it seems clear that there is money for English farmers in this crop.

Hay costs at present something like £5 per ton in Scotland. Therefore, the owner of Myremill Farm, near Maybole, in Ayrshire, who cuts seventy tons of hay per acre, makes a gross profit of £350 on each acre of his land. This extraordinary result is obtained by the use of liquid manure. The grass is Italian ryegrass, and produces a first crop 18 inches deep at the latter end of March. During the summerfour—or sometimes five—more heavy crops are carried, the grass growing two inches a day in warm weather. In all, over fourteen feet length.. of grass are cut from this and other Scotch sewerage farms within seven months.

In Italy, near Milan, there are 4,000 acres of land which beats even this marvellous Scotch record. The grass is mown in November, January, March, and April for green feed, and then yields three crops of hay in June, July and August.

There is no land in the British islands that lets better than some oi the Norfolk marshes. Every year, at the great hiring fair at Yarmouth these lands are let for the grazing from May to October. For this period of six months only as much as £2 14s. per acre was the rental obtained last year for the best land.

£60 per acre clear profit has frequently been made on a successful crop of celery. But for this vegetable the soil must be rich, black, and moist, and the work severe. There is, too, always a risk of "blue heart," as the growers call it—a ruinous disease which sometimes attacks the plant. Small wonder that celery, though so paying at times, is not a favorite with the market-gardeners. Mushrooms, for those who can afford to go in for them, offer a better chance. There is a Kent mushroom-grower who last year sold mushrooms to the value of £190 from half an acre of ground. Sheds are necessary for mushroom growing, and the making of the beds is expensive work. But a crop comes every month in the year, and, once started, there is no safer crop than these excellent fungi.

Oranges are now the most prolific of all fruits next to the banana. Twenty-four thousand oranges have been picked from a single thirty-year old tree. Seventy trees grow on an acre; and, putting the average crop for old trees at 10,000 oranges a tree, this would mean 700,000 fruit from an acre of orange grove. Such a crop would sell for about £550.

All records in the way of profits by farming were beaten by the man who originated the smooth Cheyenne pineapple, in Jamaica. This plant has smooth leaves, making it easy to cultivate, and a very fine-flavored and large fruit. Simply by selling "suckers" from about three-quarters of an acre of pines, the original owner cleared in one year £1,200.

KILLED BY A TREE.

Dauphin, Man., May 4.—A fatal accident occurred at Sinnott's tie camp south of Grand View on the 1st inst. Foreman Cooney, with another party, was sitting at the dinner table when a tree fell on the tent, crashing through on the men. Cooney was struck on the head and died from his injuries three hours later. The companion received but a slight wound.

CAPTURED A BOTHA.

Pretoria, May 4.—Colonel Barker reports that, April 30, he captured Commandant Manie Botha, his adjutant and eleven others near Frankfort, Orange River Colony. This is regarded as important, as Manie Botha is a nephew of the commandant-general, and General De Wet's ablest lieutenant.

SHOT THE SCHOOL TEACHER.

Grand Forks, May 4.—A school teacher named Sauser was shot in Rollette county, fifteen miles north of Rugby, by a farmer named Finnegan, to-day. The teacher is not expected to recover. Sauser was crossing Finnegan's farm and refused to get off when ordered to do so.

Marconi says he hopes that wireless messages will be forwarded between Canada and Great Britain in July.

Winnipeg fruit retailers have formed an association to combat the combine, and will import direct.

Mr. Potter Palmer, the Chicago capitalist, is dead.

SHOT A SCHOOLMATE

SHOCKING TRAGEDY IN A KINGSTON SCHOOL THE RESULT OF A GIRLISH PRANK.

ERIC SHARP, AGED FIFTEEN, SHOOTS BEATRICE HOLLAND, AGED FOURTEEN.

Kingston, April 29.—A terrible tragedy occurred in the Frontenac public school. Eric Sharp, the 15-year-old son of Mr. H. Sharp, a Princess street grocer, deliberately shot and almost instantly killed Beatrice Holland, 14 years of age, daughter of Mr. George Holland, an engineer on the Kingston and Pembroke railway. The particulars of the awful affair, are these :

A few pupils had finished their daily tasks in the junior fourth class and were in the cloak room preparing to go home. The young girl jokingly tipped the boy's hat off his head. Eric told her to go away or he would shoot her. Almost instantly he drew a revolver from his pocket and fired. The bullet entered the girl's temple and she fell to the floor Great confusion reigned as teachers and pupils rushed to the rescue. Two physicians were summoned and attended to the dying girl, but could do nothing. In less than five minutes death ensued.

Crazed by the terrible deed he had committed, the lad fled and could not be found, although diligent search was made. At 7 o'clock this evening he gave himself up to the police. He seemed to be able to tell little about the shooting, being in a dazed condition. According to his story he and the girl were the best of friends and he had no intention of shooting her when he drew the revolver, which went off before he knew it. He says he went away, not knowing where he was going, and finally found himself in a city park, when he told a boy of the affair and was advised to go to the police station. This he did. Young Sharp says he got the revolver under the school steps, but his companions say he had been carrying it for some time, using it to shoot frogs.

The families concerned are well known and highly respected and the greatest sympathy is felt for them in their grief.

A HEARTLESS DECEIVER.

A Rossland Citizen Wantonly Fools An Innocent Young Lady.

When Miss Nellie Lake, a refined and beautiful English girl, passed through Winnipeg a short time ago, she did not think that the romance of her life was soon to turn into the deepest tragedy. Few stories of modern fiction equal in dramatic force the tale of the romantic courtship which began in the beautiful English city of Truro, and which is now ending in a court house in the Rockies.

A couple of years ago Miss Lake lived with her parents in England. One day she received a letter from a man that signed himself Wilfrid Graham. In the letter, in a straight forward, manly language, the writer told how he had seen Miss Lake, but was not able to obtain an introduction to her. He admired her and wished to know her. The letter ended by a request that the lady would meet the writer on a certain afternoor in one of the parks of the English city.

After hesitation, Miss Lake, who had led a retired life and who did not attend balls or parties on account of the objections of her parents, decided to meet her admirer just once. The appointment was kept, and then another was arranged The two soon fell in love, but they always met in the park. Graham never met the parents of the girl.

In time Graham left for British Columbia to make his fortune. But the acquaintaince thus began was continued by letter. All went well and loving letters were exchanged by the two till one day a letter came signed by one Donald McFail. Miss Lake had heard her lover mention McFail as a friend of his. In the letter was the story that Graham had been shot in the back on a hunting trip and was very ill. A cable from McFail soon followed, saying that Graham was dead. With the last letter was a copy of the Rossland Minor telling how Graham had been shot, and of his death.

Miss Lake sorrowed for some time for her lover. She could not rest content till she heard more of the manner of his death, and wrote to the Miner for more information. The letter was received by the paper, and in it there was a request made that any information about the man Graham would be communicated to the paper.

Then came good news. About a month after she received a letter from Graham. In it he said that his friend McFail had taken an unpardonable liberty in telling her that he was dead. It was all a mistake. The item in the paper was a practical joke. H? said that he first knew that she supposed him dead from the enquiries that were being made as to the manner of his death through the Rossland paper. He wondered at her silence. The letter began "My own Darling Nell."

The correspondence continued happily till last January. Then she received a letter from Graham telling her to come to him. She had often before wanted to come to him, but he had always made objections, and had said that there were obstacles in the way. She thought he was referring to money matters.

In February last she left her home and crossed the ocean. She arrived at Halifax, crossed the continent by the C. P. R., spending part of a day in Winnipeg. She arrived in Rossland last month. The arrangement was that she should telegraph him from Montreal, indicating the train upon which she was travelling, so that he could meet her en route. She arrived in Rossland on a Sunday night by the late C. P. R. train, and immediately inquired for Graham. On not finding him she followed his instructions and went to the rooms engaged for her at the Bigelow house The next day, after vainly waiting for Graham to put in an appearance, she went to the post office and made inquiries for his address.

Then she learned that the post office authorities knew no such man as Wilfrid Graham, but that letters which came for him were received by one W. B. B. Welins, who took the mail for the firm of Morrison & Bryenton.

Then the whole miserable story came out. No such man as Wilfrid Graham existed. Collins was the man whom she had met in England. Collins, a man with a wife and six children, a prominent officer of the Baptist church of Rossland. Collins had been to England on a business trip two years before, had met her, and fooled her, and when he got back home kept up the deception as a joke.

Collins was arrested and his preliminary trial on a charge of forgery took place last week. Miss Lake, in court, described the meeting with Graham in her bedroom on last Friday night in a very earnest and pathetic way. She said the man she knew as Graham came into her room and after a minute said, "Don't you know me, Nell ?" She immediately recognized him as the Graham she had corresponded with since 1899, and as the same man she had known in Truro, England. He asked to be forgiven, and knelt down beside her bed. All she could say was to murmur : "You are said to be Collins, and I have always known you as Graham..' He nodded his head, said that he knew he had wronged her, but asked her if she could not forgive him. His presence so unnerved her that she would have been willing to have acted on his suggestion that she should go to Greenwood and secure a position; in fact, she said she was on the point of yielding when the police arrived and arrested him.

Collins does not fill the idea many had formed of him, and did not look like the chief actor in a drama which involved the taking away from her home of a lady, the killing of a mythical individual named Wilfrid Graham, besides the commission of forgery and a few other crimes. He is a middle-aged man, brown and tanned from exposure to the sun of many climes, slouchy and ungainly in manner and walk, round shouldered from years of toil in the mines, with sunken cheeks and furtive eyes. Judging from the letters read in court, he possess a fair education.

An interesting part of the miserable story was the meeting between Miss Lake and Mrs. Collins. Both of the women felt the position very keenly, and the interview was a friendly and sympathetic one, for both women loved the man that had deceived them both. Miss Lake is said to be heart-broken at her position.

The charges against Collins of forgery and the sending of false letters were sent to a higher court, and will be tried in Rossland next May. His resignation as church officer has been accepted, and he was suspended from membership pending further information.

DASTARDLY OUTRAGE.

Mrs. Lucy Allen, Hamilton, Has Carbolic Acid Thrown in her Face.

Toronto, April 29.—Mrs. Lucy Allen, of Hamilton, who is the principle witness in the case against Mrs. Rachel Wolfe, charged with defrauding her creditors, was the victim of a dastardly outrage last night When walking on Ontario street, she suddenly had thrust against her face an eye cloth, saturated, as the event showed with carbolic acid. For a few moments both her eyes were sightless and in the meantime her assailant escaped. The attempt was not very successful as she will only be slightly scarred and the sight of neither eye is lost.

REJECTED MAN SENTENCED.

Lethbridge, N.W.T., April 28.—Jas. Kelly, one of the rejected applicants for the fourth contingent, was sentenced this afternoon by Chief Justice McGuire, to three years in the penitentiary for stealing $55 from one of his companions. He claims to have been with the U. S. army in the Philippines.

SMALLPOX AT VALLEYFIELD.

Over 150 Cases in the City and Parish—Cotton Mills Close.

Valleyfield, Que., May 2.—There are 150 cases of smallpox in this city and the surrounding parish, and and so seroius has the situation become that there is talk of closing the cotton mills. The authorities of the city have taken every precaution to prevent the spread of the disease, but the parish has shown great laxity. The houses are not placarded, as the inhabitants show a strong repugnance to the usual precautions. The provincial board of health has sent Dr. Bedard to enforce the law and quarantine infected houses. The cotton company has demanded that all their employees be vaccinated. The spread of the disease has caused great excitement here.

IT'S DIFFERENT HERE.

Drouth, Grasshoppers and Insects Devasting New Mexico.

Santa Fe, N.M., May 1.—Reports from all parts of the territory indicate that sheep are dying by the hundreds. This is lambing time and the number of lambs that will be saved will be small indeed. The range has practically dried up on account of the drouth. Added to the losses of the sheepmen in the territory are reports that grasshoppers are already creating havoc in the Northern Rio Grande Valley. At Santa Cruse the insects are thick as leaves on the fruit trees and they are eating off clean early vegetables, etc.

DISASTEG IN INDIA.

Calcutta, May 2.—A tornado has devasted the city of Dacca and adjoining towns.

Four hundred and sixteen persons were killed. Crops were ruined throughout the district. Dacca, a city in Bengal, is 150 miles northeast of Calcutta.

JAS. L. HUGHES TO RETIRE.

Toronto, May 2.—James R. Hughes the well known inspector of public schools in Toronto, which position he has held for twenty-eight years, has decided to resign to take up literary work. It is understood he has made arrangements for the next two years ahead with a local publishing house on terms considerably ahead of the salary he enjoys at present.

SOCIALIST CANDIDATES.

Toronto, May 2.—South Toronto have nominated a west end kainter named O. A. Corner, as their candidate in South Toronto.

Miss Margaret Hoile has become their cadidate in North Toronto. She is secretary to Gaylord Wilshire, editor of the Socialist magazine. There seems no reason to suppose that a woman is allowed to sit in the legislature, but that is additional reason Miss Hoile contends for her standing.

"HELL-FIRE JACK DEAD.

London, May 2.— General Sir William Olpherts, V. C., who gained the sobriquet of "Hell-fire Jack" at Lucknow, is dead He was born in 1822.

ELEVATOR DAMAGED.

Fort William, May 2.—Another elevator was put out of business this morning by an accident similar to the one that disabled elevator A. The cross head on the low pressure engine broke about 9 o'clock this morning, and the rebound of the piston broke out the cylinder's head, carrying it through the window and across the dock into the river. Nobody was hurt.

SENATOR DESCHENE DEAD.

Montreal, May 2.—Senator Dechene died yesterday morning at St. Roche des Aulnaies. He had been ill for some time. He represented L'Islet in the House of Commons for a number of years and was appointed senator seven years ago. He was a prominent lumberman.

MORGAN'S LITTLE SHARE.

London, May 2.—It is understood that J. Pierpont Morgan gets £2,500,000 in stock of the shipping combine, in return for his services in organizing and financing the combine.

McBRIDE'S LONG SPEECH

Victoria, B.C., May 1.—The legislature was in session from 8.30 p. m. yesterday until 9 a. m. to-day. Mr. McBride, leader of the opposition, spoke continuously from midnight until 9 a. m.

A "leading German" resident of Brisbane, Queensland—a Mr. Ruthing—says there are probably 20,000 people who are driven to dispair in South Australia owing to drought. And he wants those 20,000 people to migrate to Queensland to take the place of the Kanaka slaves.

In Winnipeg during April there were 127 births, 98 deaths and 45 marriages.

FERNIE FREE PRESS.

FERNIE, B. C.

Oranges.

Oranges are a most valuable fruit. Orange juice allays thirst and with few exceptions is well borne by the weakest stomach. It is also a laxative, and if taken at night or before breakfast it will be found most beneficial.—Lades' Home Journal.

If He Wins.

"That eastern cashier speculated."

"And of course was unsuccessful."

"Why do you jump to that conclusion?"

"Because they don't call it speculation when the cashier wins."

The Skin.

The fatty material secreted by the sebaceous glands of the skin may be normal, excessive or deficient in quantity. When normal, the skin is supple, but not greasy; when excessive, the greasiness is apparent; when deficient, the skin is dry.

C. C. Richards & Co.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for every day ills and accidents of life I consider it has no equal.

I would not start on a voyage without it, if it cost a dollar a bottle.

CAPT. F.R. DESJARDIN.

Schr. "Storke," St Andre, Kamouraska.

Never call a man a liar if he is bigger than you are. If you are positive that he is a liar hire a cheap man to break the news to him.

Minard's Liniment Cures Garget in Cows.

In Germany, savings-bank officials visit workmen's homes on pay-day to collect their savings for banking.

The Public should bear in mind that Dr. Thomas' Eclectric Oil has nothing in common with the impure detiorating class of so-cal ed medicinal oils. It is eminently pure and really efficacious—relieving pain and lameness, stiffness of the joints and muscles, sores or hurts, besides being an excellent specific for rheumatism, coughs and bronchial complaints.

The eyeball is white because its blood-vessels are too small to admit of the red corpuscles of the blood passing through them.

Cholera and all summer complaints are so quick in their action that the cold hand of death is upon the victims before they are aware that danger is near. If attacked, do not delay in getting the proper medicine. Try a dose of Dr. J. L. Kellogg's Dysentery Cordial, and you will get immediate relief. It acts with wonderful rapidity, and never fails to effect a cure.

The lakes on the Mangishlabe Peninsula in the Caspian Sea are sweet-smelling, owing to the presence of a violet-scented seaweed.

No family living in a bilious country should be without Parmelee's Vegetable Pills. A few doses taken now and then will keep the liver active, cleanse the stomach and bowels from all bilious matter and prevent Ague. Mr. J. L. Price, Shoals, Martin Co., Ind., writes: "I have tried a box of Parmelee's Pills and find them the best medicine for fever and ague I have ever used."

A bale of good cotton is now worth £12, against £5 a few years ago; while cotton-seed, once thrown away, now brings nearly £2 a bale.

HEART TROUBLE

THE SYMPTOMS OFTEN MISUNDERSTOOD BY THE SUFFERER.

The Trouble at all Times an Extremely Dangerous One—How to Promptly Relieve it.

There are many forms of heart disease, some of which manifest themselves by symptoms which are misunderstood by the sufferer and ascribed to indigestion or some similar cause, when the heart is really affected. The slightest derangement of this important organ is extremely dangerous. If at times the action of the pulse is too rapid and the heart beats violently, resulting in a suffocating feeling, or, if the heart seems inclined to stop beating, the pulse becomes slow, and you feel a faint dizzy sensation, you should take the best course in the world, and that is to take Dr. Williams' Pink Pills for Pale People. You will find that the distressing symptoms promptly disappear and that the heart at all times acts normally. Mr. Adelard Lavoie, St. Pacome, Que., bears strong testimony to the value of these pills in cases of heart trouble. He says: "For three years I was greatly troubled with a weak heart and in constant fear that my end would come at any time. I placed myself under a good doctor but did not get the desired relief. In fact I grew worse; the least exertion would overcome me, and finally I had to discontinue work. While in this condition a neighbor advised me to try Dr. Williams' Pink Pills and I procured a supply. They simply worked wonders in my case and when I had used six boxes I was again enjoying good health. I have had no sign of the trouble since and can cheerfully recommend the pills to similar sufferers."

Blood troubles of all kinds are also cured by these famous pil.s. If you suffer from headaches, dizziness, languor, boils or skin diseases of any kind, your blood is in an impure condition, and Dr. Williams' Pink Pills are what you need. These pills are not a purgative and therfore do not weaken like medicines of that class. They are tonic in their nature and make new, rich, red blood with every dose, thus restoring health and strength to hopeless and despondent sufferers. But you must get the genuine, which always has the full name "Dr. Williams' Pink Pills for Pale People," on every box. Sold by all dealers or sent post paid at 50 cents a box or six boxes for $2.50, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

A Strong Statement.

When a mother puts a thing emphatically it is because she knows what she is talking about. Mrs. J. F. Harrigan, Huntingdon, Que., says:—"I have used Baby's Own Tablets in our house for over a year, and I can say that they are all that is claimed for them."

Strong Endorsation.

Mrs. Walter Brown, Milby, Que., says:—"I have never used any medicine for baby that did him as much good as Baby's Own Tablets. I would not be without them."

A Mother's Comfort.

"I have found Baby's Own Tablets a perfect medicine for children of all ages," writes Mrs. H H. Fox, Orange Ridge, Man., "and I would not be without them in the house. They are truly a comfort to baby and mother's friend."

Just The Thing for Baby.

Mrs. Ed. Jones, 55 Christie street, Ottawa, says:—"Have used Baby's Own Tablets and find them just the thing for baby."

In Malta the average rate of railway travelling is from 3½ to 5 miles an hour.

The stage at Olympia, London, 450 feet long and 120 feet deep, is the largest in the world.

Satisfactory Results.

Mrs. Hunt, Dumfries, N. B., says:—"I am glad to say that I have used Baby's Own Tablets with satisfactory results."

Free to Mothers Only.

To every mother of young children who will send us her name and address plainly written on a postal card, we will send free of all charge a valuable little book on the care of infants and young children. This book has been prepared by a physician who has made the ailments of little ones a life study. With the book we will send a free sample of Baby's Own Tablets—the best medicine in the world for the minor ailments of infants and children. Mention the name of this paper and address The Dr. Williams' Medicine Co., Brockville, Ont.

A Great Help.

"I have found Baby's Own Tablets a great help for my little ones," writes Mrs. James Clarke, 60 Conway street, Montreal, "and I think so much of them that I would advise mothers to keep them in the house all the time."

Lord Roberts is the first man entitled to wear both the Garter and the Victoria Cross.

The Pope's army numbers 300 men. 100 of these are Swiss Guards, and there are 30 firemen.

An Experienced Mother.

"I am the mother of nine children," writes Mrs. John Hanlan, of Mackey's Station, Ont., "and have had occasion to use much medicine for children, and I can truthfully say I have never found anything to equal Baby's Own Tablets. They are prompt in their action and just the thing for little ones."

A Cure for Constipation.

Many little ones are troubled with constipation and it is a dangerous trouble. Mrs. John Keating, Sylvan Valley, Ont., says:—"My baby has been badly troubled with constipation and I have never found any medicine to equal Baby's Own Tablets. They soon put baby all right."

Surprising Results.

Mrs. William Fitzgibbon, Steenburg, Ont., says:—"My little baby, six months old, was very sick. I gave him Baby's Own Tablets and was surprised to find the change they made in him in a few hours. I shall always keep the Tablets in the house after this."

New York's population is growing at the rate of 350 per day, about the same pace as that of London.

The Duchess of Somerset takes precedence among British peeresses, as there is no Duchess of Norfolk.

MARKETS.

WHEAT — The northwest spring wheat crop is being greatly delayed in seeding owing to frequent snow and rain storms, and the general expectation is that in the older sections the acreage under wheat will be decreased. European crops still continue to promise well, and there is no chance in the reports regarding them. At the present the quantities being shipped from Argentin are showing larger than expected, and running somewhat larger than last year. Australian and Indian shipments are light, but from North America, Russia and the Danube they are liberal, and the amount on passage to Europe is very large and shows no decrease from week to week. This causes the European trade to remain indifferent and they are working in a hand to mouth fashion, not anxious to buy ahead as freely, as they would do if they were sure of a scarcity in the future.

In the local market Manitoba wheat has been steady, but not active. Prices neither advance nor decline as they do on the American markets, and the exporters are not buying freely by any means. The price of 1 northern varied from 74¼c on Monday to 75¾c Friday, a good deal been sold around 74¾ to 75c for spot or May delivery. The spread between 1 northern and 2 northern has narrowed down to 2c or 2½c, there having been a demand for the lower grade. Closing prices may be stated as 75½c 1 northern and 73¼c 2 northern, and for 1 hard 78½c, all in store, Fort William or Port Arthur, spot or May delivery.

Liverpool Prices—No. 1 northern spring wheat sold at Liverpool on Saturday at 6s 5d.

FLOUR-Hungarian Patent $2.06 per sack of 98 pounds; Glenora, $1.90; Alberta, $1.70; Manitoba, $1.50; and XXXX, $1.20.

MILLFEED—Bran in bulk, per ton $14.50; shorts, $16.50. Delivered in bags, the prices are $1.50 higher.

GROUND FEED—Oat chop is quoted at $27 per ton delivered to the trade; barley chop, $22 per ton; mixed barley and oats, $25 per ton; oil cake, $27 per ton.

OATS—No. 1 white, in car lots on track, Winnipeg, per bushel, 40 to 42c; No. 2 white, 38c; seed oats, 45c to 50c. At country points farmers are getting from 28 to 30c for No. 2 white oats. Street oats are bringing 32 to 34c.

BARLEY—Receipts are very light and the market holds firm at 43 to 45c for best grades.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

SPELTZ—Dealers are asking 75c per bushel of 50 pounds for seed speltz.

HAY—Receipts are only moderate and the hay market continues firm at $6 to $6.50 per ton for fresh baled. Loose hay is worth $6 to $6.50 per ton.

DRESSED MEATS— Fresh killed beef is not very plentiful, and the market is firmer. We quote' Beef, city dressed, per pound, 8 to 8½c; veal, 7½ to 8½c; mutton, frozen, 8c; spring lambs, each, $3.50 to $4.50; hogs, per pound, 7¾c.

POULTRY—There is very little poultry in the market. Chickens are worth 12½c per pound for fresh killed, and turkeys 12½c to 15c, according to quality.

BUTTER—Creamery – Fresh made creamery butter is worth 24c per pound delivered here. There is but very little offering, owing to the backward state of the weather.

BUTTER—Dairy—While the market is better supplied than it was a few weeks ago, there is still plenty of unsatisfied demand, and prices hold steady at last week's range. As high as 20c could be obtained on a commission basis for choice fresh made butter in tubs or bricks, while other grades range down to 16c for round lots.

CHEESE—Jobbers are getting 13 to 13½c per pound for cheese. Stocks now in hand are from Ontario.

EGGS—The net price, Winnipeg, today, to country shippers is 10c per dozen.

POTATOES—Farmers loads delivered in Winnipeg, 38 to 40c per bus.

WOOL—The market is expected to open shortly for Manitoba wool. Some in the trade think that the opening price will be about 7c per pound for unwashed fleece.

LIVE STOCK.

CATTLE—Butchers are finding cattle very scarce and hard to obtain this spring. For choice beef animals they are now paying as high as 5c per pound off cars here, and are glad to get them at that. The general range is from 4½c to 5c, the latter being an outside figure. There are good demands for stockers and yearlings are worth as high as $16 per head at point of shipment. Two year olds are bringing from $20 to $22 per head.

SHEEP—One large concern here is now bringing in live sheep to meet the demands of its trade. About 5c to 5½c per pound is the value off cars, Winnipeg.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, MAY 10, 1902.

CRANBROOK'S GASOMETER.

South East Kootenay's great moral force, the Cranbrook Herald, is stirred to its depths over the prospect of an investigation into the administration of the Liquor License Act by the commissioners of the Fort Steele License District, and their officials. The stories of irregularities on the part of some of these men are not new. But they had not been discussed by one section of the press for the reason that it appreciates how repugnant to the idea of British justice newspaper trials are. With another portion of the press the stories of the alleged wrong doing were passed over out of respect to the sections of the Criminal Code defining libel, which is possibly the one canon such publications show any regard for. Early last month, however, a commission was issued by the provincial government for a full enquiry into the administration of the Fort Steele district officials, and two weeks ago the FREE PRESS made an announcement to this effect, and mentioned the different points at which the commission would take evidence. The dates of such sitting were not given for the reason that the commissioner at the time had not taken his oath, and therefore could not fix them

This treatment of the matter, however, has not met with the approval of the avenging angel of the Cranbrook Herald. Such it must be admitted, is a new role for him, as, from maintaining a discrete silence for months in the very theatre of the alleged wrong doing, he is now endeavoring to call down destroying lightning, without the preliminary of a fair trial, upon each and every official who has attempted in the slightest to profit by his office, or who has strained in the least the provisions of the Liquor License Act, and in the hope that some attention may be directed to himself, he is now leading the hunt of the accused officials with the bay of a blood hound, and those who fail to follow are counted as morally unsound, and are covertly charged wfth seeking to cover up official crookedness.

The Cranbrook editor should endeavor to restrain his underclothing. There is nothing in the present situation to warrant the displacing of the time honored blind goddess, or the appointment of a new inspector of weights and measures in the justice department. And, while the trial of the suspected officials by the Cranbrook Herald may not commend itself to Commissioner Bullock-Webster, it does not follow that the investigation mapped out will be any less searching, or any less fair. Indeed, those who know the commissioner say the inquiry can be safely left in his hands, and that he can be depended upon to patch up the shattered reputation of South East Kootenay should it be shown that any patching is necessary; and, as for the name of the district, over which so many tears have been shed in Cranbrook, it might be stipulated that the commissioner give a warehouse receipt for it before it is turned over to him.

Discussion of the matter in any form, at present, is more or less premature, but in dismissing the subject, it might be remarked, that from what has appeared in the Cranbrook Herald, what the Herald wants is notoriety; whereas what the people want, and what every newspaper in the district should demand, is a respite from the Herald's ranting platitudes.

LEAD MINERS IGNORED.

The turn of events during the past few days at Ottawa have been far from encouraging for the lead producers of Kootenay. There was a time when they could command attention from the men in charge of the affairs of the dominion, but their influence at Ottawa seems to wane as the influence of United States lead trust waxes fat. There may be no connection between the two, but this idea has taken root in the minds of many, and it will require most convincing logic to dislodge it. During the past ten days public meetings have been held in almost every city and town in West Kootenay, and, with a unanimity rarely witnessed, the people have urged upon the members of the Laurier cabinet the immediate necessity for tariff adjustments so that such home market as there is in the dominion shall be conserved to the lead producers of Kootenay, in the hope that a start may be made in lead refining and further manufacture, to the end that from being an importer of lead from foreign mines the dominion might become an exporter of lead and its manufactures from its own mines. It was thought by many that all that was required of the mining districts to secure the desired redress was a clear presentation of their case. That, upon its being shown that the welfare of a very large section of this province depends upon such changes being made, they would follow as a matter of course. Those who entertained any such visions of fancied security have had them rudely shattered. The plea of Kootenay for fairer treatment has reached Ottawa, but so far from commanding attention it has even failed of a respectful hearing. Indeed the answer returned by the representative of the district in the house of Commons is almost brutal in its frankness. He says there is not the slightest hope of securing anything in the way of tariff amendments during the present session, and then, as if bent upon squelching any lingering hope which might remain for future consideration, he adds, that so far as the next session of the Commons is concerned the ministers decline to hold out any promises whatever. If this reply to the plea of Kootenay means anything, it means that W. A. Galliher, M. P., or the Laurier government, or both, are utterly indifferent to Kootenay and its interests. What other construction can be placed upon a policy, which denies to so important a district as Kootenay, even that polite form of dismissal which politicians are ever willing to accord even the charter mongers and subsidy hunters, that their request shall receive the "earnest considerations" of the government? Is there an instance on record in which any private corporation or individual, representing even a fraction of the vested interests involved in the lead mining industry, received such scant courtesy as has been meted out to the people of Kootenay? Contrast if you please the treatment accorded to the people of Kootenay with the consideration shown the few individuals who secured from the federal government the famous Treadwell concession, a concession so iniquitious as to cause widespread indignation throughout the Yukon, and to force restrictions in the interests of the people who are buttonholed by the tax gatherer, but who themselves have not the opportunity for button-holing the ministers. Kootenay's latest experience with the powers that be will doubtless teach its electors, as well as those of the other districts of the province, the folly of treating their seats in legislative bodies as sinecures for good fellows, and trusting to "delegations" for their representations. At the present time it is Kootenay's misfortune that it is not represented in the house of Commons by a man who would place the welfare of the district before such considerations as party exigencies. It might be that even with such a man it would have been impossible to have secured the desired tariff amendments during the preseut session, but such a man would resign rather than inform his constituents that no consideration will be given their requests this session, and further that the ministers have nothing to promise for the ensuing session.

A Splendid Record for Paying Death Claims.

Mr. Geo. Levasseur, who held policy No. 912,424, died on Feb. 21, 1902. On the 10th of March the proofs of death reached the Spokane office, and on the 18th of March a check for the full amount was forwarded through the Canadian Bank of Commerce, in favor of Mrs. Sophia Levasseur.

It is remarkable to note, if we take into consideration the distance between Fernie and Spokane, and then the distance between Spokane and New York, besides going through all necessary formalities, that the Equitable Life Assurance Society of the United States, through Mr. Allenberg, Manager at Spokane, paid the claim in just exactly twenty-five days. It is certainly a remarkable record.

Mr. Levasseur was only insured three years with the Society, having paid to the Society $228.48, for which they paid the amount of $2,000.00, leaving a net profit to the estate of $1,771.52.

The Equitable Life certainly deserves credit for such prompt payment.

LOCAL AND GENERAL.

J. S. T. Alexander is a witness in the Kootenay Association fraud case at Nelson this week.

Editor Grace, of the Fort Steele Prospector, was in town on Monday evening of this week.

The Presbyterian Sunday School have changed their time of meeting from 2.30 p. m. to 10 a. m,

Constables Barnes, Henderson and Farquharson are in Nelson this week in connection with the assizes.

R. L. Henderson, of Michel, is on duty in Fernie this week in the absence of part of the local force.

Mr. E. Wriglesworth has just completed putting a stone foundation under the residence of Mr. F. Stork.

J. McEwing has purchased the bakery in the old town owned by Mr. G. Basile. Mr. McEwing is a good baker and will no doubt do well.

H. J. Johnston, postmaster, was in Nelson this week. He was a witness in the somewhat celebrated Kootenay Association case, which came up at the assizes this week.

The East Kootenay Bottling Works, of Cranbrook, expect to open their branch here next week. The machinery is expected to arrive this week.

C. G. Holson, of Vancouver, B. C., manager of the London Mutual Fire Insurance Co., and W. Leitch, travelling inspector for the same company, were in town this week.

Mrs. W. A. Ingram and Mrs. D. Lafortune, of this town, left for Ontario on Monday morning. Mrs. Ingram will visit friends in Campbellford, Mrs. Lafortune at Ottawa.

W. Richards, who has been in the employ of the London & Liverpool Co. for the past year, has been appointed manager of the Coal Co's. store at Coal Creek mines.

Elko has invited the Fernie baseball team to Elko to-morrow, but as there is considerable objection among the members of the team to play on Sunday it is rather doubtful if they will go down.

Messrs. R. F, Stillman and G. Claxton are in Vancouver this week attending the Methodist conference. Mr. H. Kershaw will occupy the pulpit of the Methodist church during the absence of Mr. Stillman.

Norman Coulter, another C. P. R. lad, who has made many friends during his stay in Fernie. left for Toronto on Tuesday evening. Mr. Coulter was a good hockey man and will be missed on the team next winter.

M. Kastner and Mrs. J. H. Bricker, left on Monday evening for Seabringville, Ont., in response to a telegram stating that their mother, Mrs. W. Kastner was dying. She has been suffering from appendicitis.

Bert Tullidge, secretary of the Michel Amateur Athletic Association, was in town on Wednesday purchasing a baseball outfit for the club recently organized in that town. Mr. Tullidge says that the Michel Association is a very live organization and they will put at least two good teams in the field to complete for the football and baseball honors of the Crow's Nest Pass.

A movement is on foot among the citizens of the town to organize a cemetery committee, Messrs. J. Lawrence, A. Joyce and Rev. C. W. Houghton have the matter in hand. It has been suggested that the committee be composed of a representative from each of the different denominations. It is high time that something along this line was accomplished as the state of the present cemetery is a disgrace to the community.

Commissioners Appointed

His Honor the Lieutenant-Governor in Council under the provisions of the Liquor License Act, 1900, has been pleased to appoint the undermentioned persons as License Commissioners and Chief License Inspector for the Fort Steele License District :—

Jas. D. McBride, of Cranbrook.
W. H. Whimster, of Fernie.
Edmund A. Elton, of Fort Steele.
Constable H. W. Barnes, Chief License Inspector.

Salvation Army

The Red Knights of the Cross, of Toronto, comprising a brigade of skilled musicians and songsters, under the command of Brigadier Pugmire and including staff, Captain Morris, Adjutant Griffits, Adjutant Page, Ensign Arnold, Captain Jessie Russel, Major and Mrs. Hargrave, Pearl and Willie, Miss Booth's orphans, will conduct a grand musical festival consisting of songs, solos, duets, quartetts and selectsons, in Princes hall, on Friday evening, May 16th, at 8 p.m. Admission 15 cents. Come early and secure a seat.

Mr. F. Cuthbert had the first strawberries of the season in stock yesterday.

F. J. Watson has purchased the house and lot owned by Mr. D. Lafortune.

Two Sisters of Charity have been in town for the past week collecting for the orphans home in New Westminster.

A twenty round bout between "Scotty" Milne and Williams, another local pug, has been arranged to take place at Elko, on May 24th

Mr. D. Lafortune has purchased the Gem Restaurant, together with the property owned by Mr C. J. Digby on that corner.

Deeds Have Arrived

The first lot of deeds for the townsite of Fernie were received this week by Mr. T. C. Thompson, land commissioner for the coal company. There were about thirty in the number. Mr. Fred Stork was the first to receive his title.

A quiet wedding took place at the Roman Catholic church, on Tuesday morning, when Mr. Robert Streich was united in marriage to Miss Christina McIntyre, a sister of Mr. J. L. McIntyre, our well known barber. The happy couple left Tuesday evening for Sault Ste Marie, Ont.

An amateur theatrical company from Pincher Creek will make a trip west visiting Fernie, Cranbrook and Nelson. The company is made up of about forty people and they expect to be in Fernie about the 19th or 20th. If the Pincher Creek outfit have any regard for the state of their finances they should stay at home as the people of Cranbrook and Fernie have had plenty of amateur theatricals in the past.

A fine new building is now well under course of construction on Pallatt Ave., two doors west of the Methodist church, and when finished will be one of the finest buildings in this part of the town and will be certainly a credit to it. The building which is frame is 33x50 ft in size and three stories in height, is being built by Contractor Brawley. The property is owned by Mr. David Clark, one of Fernie's oldest inhabitant, who with his family moved here early in the history of the town, and is a good proof of his confidence in our growing town. The building will be opened about June 1st, as a first-class private boarding house.—Com.

Company Shows Its Hand

A number of members of the local union of the Federation of Miners accompanied by an organizer from Nelson went down to Morrissey on Sunday last to organize a branch of the Federation in that new mining camp. They were met on the bridge just before reaching the town by Constable Tranter, who compelled them to retrace their footsteeps, the constable stating that he was acting under the instructions of the coal company in not permitting them to pass. Considerable ill-feeling has been created in Fernie and among the miners in the neighborhood by the action of the company in this matter. The right of the employees to organize is not disputed and the local constable was stepping beyond his power when he interfered with the gentlemen as the town of Morrissey is not closed to the public.

The services at Christ church to-morrow, May 4th, will be as follows: Matins and Litany at 11 a. m.; Sunday School and young men's bible class at 2.30 p.m.; Evensong and sermon 7.30 p.m.

The Rev C. W. Houghton conducted divine service at Morrissey on Thursday evening last. There was a good attendance. These services will be held fortnightly until further notice..

Mr. Marber, who has been conducting a branch of the London & Liverpool Co's store in the old town for some time, has purchased the business. The transaction took place on May 1st.

Real Estate Sales

J. E. Mills, agent, reports sales of real estate the week, A. P. Chinette to H. Hill of lot 56, Howland Ave., together with house, and one half interest in lot 21 and 22 Baker Ave. C. J. Digby to D. Lafortune. Several other sales about completed.

Braced Up...

By some of our tonics and blood purifiers you can pass through the changes from winter to spring without trouble and be in good shape for summer.

Dozens of good spring medicines for man woman and child in our stock. All the old standbys are here besides others not so well known, but highly efficient. Try a bottle of our perfect tonic bitters and be braced up.

Welcome Callers

By EUGENIE UHLRICH

Copyright, 1901, by Eugenie Uhlrich

The old lady sat very still. The hands that usually made the knitting needles fly had not moved for full ten minutes. Her eyes were fixed abstractedly on a somewhat worn spot in the bright red and vivid green ingrain carpet. If by chance she had been asked what was in her mind, she probably would have replied testily that it was about time those carpet strips were woven and put down. What with the tracking in and out and sitting round, winter was harder than summer on carpets.

But when the howling wind gave a fresh blast and the coal in the base burner sputtered up with an answering glow she turned toward the muslin hung windows, and one might have thought that she was having a little struggle to sit still on her chair. The old man, smoking by the stove, looked at her furtively every once in awhile. Now, when a stronger blast shook the house, he pulled closer the black silk muffler under his coat collar and turned to his wife.

"It's a cold night for New Year's, mother. I mind it was almost as bad when Johnny was married"—

She did not answer or even look at him, but a tightening of the lips showed that she had heard.

The old man had learned the danger signals and was silent for the time. There was something unusual in mother's mood, but he did not know for certain which way the signs pointed.

"New Year's night do be lonesomer than any other night," he continued tentatively, "with no children and young folks to see the old year out. I saw Johnny's boy the other day"—

Then the old lady swung round in her chair so hard and quick that she joggled the lamp at her elbow, and the little fringes on her silk embroidered shoulder shawl trembled.

"Johnny's boy, indeed! And you saw him, of course. And whose fault is it but yours that Johnny's boy isn't here, I'd like to know? You were always giving the boys their way about everything. That's how they came to marry those Quinlan girls, far downs like them, the Lord save us!"

"Well, mother, they always seemed good girls to me and are good housekeepers now. Of course there's them that may be better to our way of thinking." The old man never said "your" when making an assertion which mother might question. "There's them that had more money, and everybody can't come from Limerick. But, then, it's the lads who have to live with the girls, and they ought to have something to say."

IT WAS TOMMY MULLENY WITH A NOTE FROM HIS SISTER.

It was a long speech for the old man, and the old lady was gasping when he finished.

"Yes, and you don't mind me having to think of my own children's children being brought up in the ways of the Quinlans. It wasn't enough when Johnny married Nellie, but you had to be that nice about it that Richard went and married Kate."

He tried to turn the stream of indignation into less immediate channels.

"It did seem aggravating," he said, "though Johnny's boy seems a nice little fellow for seven. But of course, mother, you don't know him."

Didn't she know him? Wasn't she going to church every Sunday just to see the children march in for Sunday school, and Johnny's boy with them? She not know Johnny's boy! But she said nothing.

The old man walked to the window, a gentle, deprecating figure in a shiny black suit. His white hair was combed forward over the thinnest spots in front and parted carefully toward the ears in the back. The mild blue eyes and rosy skin gave him a look of almost infantile kindliness save for a certain furtive shrewdness that may have come from years of watching the storm signals of his wife's moods.

"The old lady's all right," he replied when any of his relatives had the temerity to give him advice as to his domestic arrangements. "She's the best hand in sickness and a good manager, but she does like to have her own way, and it takes her awhile to come round when she finds that she's made a mistake. But she does come round if you give her time enough, and that's more than you can say for most of them."

He raised the curtains gently now and peered out.

"Just look, mother! What a blizzard it has got to be all at once! Now, that's too bad for little Kitty Mulleny's party, and all the children are still there. I can see their little heads bobbing up and down where the curtain's up. I shouldn't wonder if Johnny's boy was there too."

The old lady did not answer. She knew very well that Johnny's two boys and Richie's one were there, and she had been listening all evening, with her heart in her mouth, to the sounds of wild weather.

"I don't know, mother," the old man went on after he was comfortably seated once more, "but we ought to make a will"—

"A will! What is putting things into your head tonight of all nights?"

"You see, it's New Year's," he answered, "and there's them who are younger than us who won't be here to see the next new year in. Seeing the way you feel about things, we might leave most, or considerable at least, to the orphan asylum. It would be doing a lot of good"—

She jumped round in her seat again, but whatever was in her mind to answer was not said, for there was a knock at the door.

"Mercy alive!" she said, and "Gee, but it's blowing!" came from without.

It was Tommy Mulleny with a note from his eldest sister. The children who lived across the river could not be taken home in this blizzard. Word had been sent to the parents by telephone. The Mullenys could take care of three little girls, but there were some of the boys whom they would like to send over to the Moynihans if it would not be too much trouble. Somehow the old man did not look so astonished as one might have thought he would.

"To be sure, mother," he said. "I'll just go over and help Tommy bring the children. 'Twill be like old times"—

A vague expectation that made her heart beat and her hands tremble had seized upon the old lady. She set the lamp in the window as a guide and strained her eyes to see into the howling swirl without that shut off even the sight of trees in their own garden. After a long fifteen minutes the stamping of feet told that they had come back. The old man mumbled something about going around the house to look after things. Tommy Mulleny held the hall door open for three little boys, and then he said something about not wanting to track snow all over the house and vanished.

As for the old lady, she heard not. She was looking at the three little boys who blinked at her, blinded by the darkness without and the sudden glare of light within. Then the biggest one pulled off his cap.

"Happy New Year, grandma!" he sang out, and even as he did so he was turning to peel off his little brother's cap. "Jimmy's too little to take off his own cap, and Cousin Richie, too, and we all brought some cookies and candy from the party for you. My, I could hardly walk, and grandpa had to carry Richie, and Tommy Mulleny helped Jimmy. But I'm glad it snowed. Mamma always said I couldn't come to see you until I was as big and as good as papa, but now I guess we just had to come before we were big."

The old woman's trembling hands were turning down his coat collar.

"Look at the curls of him," she murmured, bending over him hungrily—"just like Johnny's! It's this long time I've wanted to feel them, bless him!" And she kissed Johnny's boy again and again.

When the old man came in, puffing and snow whitened, she had the two little fellows on her lap, and Johnny's boy leaned against her, feeding her bites of his cooky.

The old man chuckled softly, "I thought it would bring her round!" then aloud, "Well, mother, I guess we won't have to leave everything to the orphans"—

"What's that?" she asked sharply.

"I was just thinking we ought to have a fire in the boys' room for the little laddies."

Plenty Like It.

"Can I get this note shaved?" he timidly asked the money lender.

"Gracious," exclaimed the broker as he glanced at the date, "it's old enough to need it!"—Atlanta Constitution.

The desire to get something for nothing makes men pay something for nothing.

Some men wake up and find themselves famous, while lots of others stay up all night and never even get a glimpse of fame.

His Mission.

First Tourist—Um—er—did you come to Florida for your health?

Second Same—Naw, I fetched that with me. I came down here to shoot a nallygator.

Truth is the simplest of all virtues; it requires neither study nor art.

Art at best can only turn out a poor counterfeit of nature.

If a small boy is chasing a bumblebee and you hear him yell it is a sign that he has caught it.

Make a companion of vice and you will soon become its slave.

After securing the competence he struggled for, a man invariably plans an extension.

Snow fell last winter in Mexico City for the first time for 50 years.

DISTRESS OF SLEEPLESS NIGHTS

Is Too Well Known to Hosts of Nerve-Exhausted Men and Women—The Fatal Error of Using Opiates.

CURED BY USING DR. CHASE'S NERVE FOOD.

To lie awake night after night, the brain on fire with nervous excitement and thoughts flashing before the mind in never-ending variety, is the common experience of persons whose nerves are weak and exhausted.

During such nights nerve force is consumed at a tremendous rate.

Instead of being restored and reinvigorated for another day's wear and tear the body is further weakened and exhausted and the mind is unbalanced by this terrible waste of energy which the lamp of life is rapidly burning out.

It is in this despairing condition that many men and women attempt to drug and deaden the nerves by the use of opiates. This is a fatal step which hastens nerve decay.

Surely it is wiser to build up and completely restore the nerves by using Dr. Chase's Nerve Food, a treatment which gets right down to the foundation of the difficulty and effects permanent results by revitalizing the wasted nerve cells.

Sleeplessness is only one of the many distressing symptoms which entirely disappear with the use of Dr. Chase's Nerve Food. It is a positive cure for weakness of nerves and body, and is specific for woman's ills because they almost invariably arise from exhausted nerves. 50 cts. a box, 6 boxes for $2.50, at all dealers or Edmanson, Bates & Co., Toronto.

Blue Ribbon Goods.

All we can do is to pack the best goods in Canada and tell you about them.

You know how good Blue Ribbon Tea is! Well, Blue Ribbon Coffee, Baking Powder, Spices, Flavoring Extracts, Chocolate Icing and Jelly Powder are just as good as the Tea. Every Grocer keeps Blue Ribbon goods, so all you have to do is to ask for them

DR. A. W. CHASE'S CATARRH CURE ... 25c.

is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanantly cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

In the English dictionary are found words derived from more different sources than any other language. Latin, Greek, Hebrew, Celtic, Saxon, Danish, French, Spanish, Italian, German, Hindustani, Malay, and even Chinese sources are easily traceable.

Minard's Liniment Cures Distemper.

Ireland sends England 640 millions of eggs a year.

There never was, and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rocted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

Bank of England notes cost a halfpenny apiece to produce.

$100 Reward $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials.

Address, F. J. CHENEY & CO., Toledo, O.
Sold by druggists, 75c.

True self control is to be got in the midst of struggle. It is not mutilation in the midst of natural desires, but the subordination of each desire to the good of the whole man.—"Culture and Restraint."

Still Obedient.

Gustave Dore was always a child, so far as his mother was concerned. He not only loved, but obeyed, her, and when she died he said, with sad sincerity, that he no longer knew how to live. An incident which shows her influence over him as a grown man is connected with a little party given by him to show some of his friends an album of his own drawings.

At a dinner over which Mme. Dore presided a quarrel arose between Gustave and his brother Ernest. Suddenly Mme. Dore turned to the former and said, as though he were a boy of ten:

"Hush, Gustave! I am ashamed of you."

Dore, who had worked himself, regardless of the presence of his guests, into a fierce passion, became at once calm and silent and, bowing to his mother, resumed his dinner.

But the incident did not end here. When the guests had retired to the great salon, the brothers disappeared, to return in a few minutes each holding an end of the colossal album that was to be submitted to the company. Mme. Dore followed, smiling at her "little boys," who were none the less children because they had passed their fortieth year.

Not an Objection.

The Proprietor—But we haven't enough work to keep another man busy.

The Applicant—Oh, I don't mind that! What I want is a steady job.—Indianapolis News.

A railway engine may roughly be said to be equal in strength to 900 horses.

WHY WOMEN SUFFER

THE REASON IS NOT THAT THEY MAY NOT, BUT THAT THEY WILL NOT BE FREE.

A Story of a Woman who made up Her Mind That she had suffered long enough—The Means Employed to Cure Her Have Cured Thousands

Rock Dale, C. B., May 3.—(Special)—Mrs. David Riley, of this village, suffered for over eight years before she found a cure.

She had Female Weakness of a very aggravated form, causing her fearful pains. Her back pained her something dreadful.

She could not lift anything and was dizzy-headed all the time. After trying many medicines with no good results, she was becoming altogether discouraged, so much so that she thought she would have to give up.

No wonder that she felt like giving up! Every woman who has suffered in this way will understand how low spirited and broken a woman feels when called upon to endure these extremely distressing symptoms.

But Mrs. Riley didn't give up. A friend advised her to try Dodd's Kidney Pills, and she began the treatment of this medicine.

After using four boxes she was much better. She felt a great deal stronger, the dizziness had gone. The pains in her back had disappeared, and she kept on using the pills.

She says:

"If it had not been for Dodd's Kidney Pills I would have had to give up. They are certainly a wonderful medicine and have done more for me and my sickness than all the other other medicines I ever took.

I can and will highly recommend Dodd's Kidney Pills to all weak women who suffer as I suffered."

No woman need suffer a moment longer. Dodd's Kidney Pills have cured and are curing thousands of weak women.

Many of your sisters have told their story for publication and very many have testified but not for publication. All join in praising the remedy that has done more for the suffering womanhood of Canada than all other means combined.

Dodd's Kidney Pills are Weak Woman's Best Friend.

A charter has been given a company to construct a railway from Nepigon to James Bay.

Hon. Mr. Mulock has introduced a resolution to authorize a loan not to exceed $15,000,000.

CHARGED WITH MURDER.

Winnipeg, April 30.—On February 5 the body of Elizabeth Mueller, a young German woman, was found by C. P. R. yardmen lying mangled across the rails in the C. P.R. yards. Since that time the tragedy of her death has been known as "The Mueller Mystery." Yesterday about 5 o'clock Gustav Mueller, the husband, was arrested, and is now at the James street police station with the charge of murder hanging over his head.

DEADLY TEXAS TORNADO.

A Whole Town Nearly Swept Away By a Terrific Wind Storm.

Houston, Texas, April 30.—The small town of Glenrose, the county seat of Somerville county, has been nearly swept away by a tornado. As a result of the fearful windstorm six are known to be dead and between 40 and 50 persons are injured.

Glenrose is located on the Paluxy river, in a valley. The tornado came down the valley, sweeping every thing before it. It struck the town in the business district, and about one-third of the stores were wrecked. A hard rain succeeded the storm and stocks were ruined, damaging what had not been destroyed by the wind.

The western portion of the residence part of the town was struck. Here were located most of the fine residences. The frame houses were simply torn asunder and scattered. Their inmates had no warning of the impending calamity and it was here that all the fatalities occurred. How many cannot be told until communication has been re-opened. The residence of Mrs. Connell, one of those wrecked, caught fire, and with two others, were burned. The property loss is roughly estimated at one-quarter of a million dollars. It may prove to be much more when all the facts are known, for there are undoubtedly other sections which have been devasted up and down the river It may be several days before the entire story of the disaster is known. The town is cut off from wire communication, and all the facts have come from neighboring towns which have been reached by fugitives, who cannot tell of the facts as they are in quest of assistance for their stricken people.

Glenrose had a population of about 800 people. It is a noted health resort, there being many springs and wells with medicinal qualities.

FOUNDER OF MANITOBA.

Sir Thos. Douglas an Empire Builder of a Hundred Years Ago.

On April 8, 1820, died Thomas Douglas, fifth earl of Selkirk, an empire builder of the early nineteenth century, the founder of Manitoba. At this time, says the Dictionary of National Biography, the highlands of Scotland were in a critical state. The country was fast becoming pastoral, and the peasantry were often evicted wholesale and compulsorily emigrated. Douglas, although unconnected with the highlands or property, undertook an extensive tour through that wild region in 1792, prompted by "a warm interest in the fate of the natives." It convinced him that emigration from the highlands was unavoidable, and he saw the need of some controlling hand to direct it as far as possible towards the British colonies. Before 1802 his attention had been drawn to the advantages offered to colonists by the fertile valley of the Red River (now Manitoba in the Hudson's Bay company's territories. The government of the day declined to take the matter up, but offered the earl "every reasonable encouragement" if he would himself carry out his proposals. Official advice led him to relinquish his intended island situation for a maritime one, and the island of St. John (now Prince Edward Island) was selected. A considerable grant of crown lands having been secured, 800 selected emigrants were got together. These arrived during August 1803, and the earl himself soon after. At the end of the following September (1804) the earl revisited his colony, which he found in a most satisfactory condition. To-day the descendants of Selkirk's settlers are the most prosperous inhabitants of the island. During the time Selkirk thus spent in the new world, he corresponded with the government of Upper Canada as to the settlement of that province. He had already been connected with the establishing of a colony (still known as Baldoon after one of his ancestral estates) in Kent county, and in August, 1803, he offered to construct a good wagon road from Baldoon to York, at an expense of over £20,000. In return he asked certain of the crown lands lying vacant on each side of his proposed road. The proposal, was, however, rejected, though such roads were then very much needed, and the colonial government was then too poor to construct them. Again, in 1805, Selkirk offered to colonize one of the Mohawk townships on the Grand river. This time his plans were accepted by the government, but the unsettled state of Europe at the time prevented their being carried out. Finally, in 1810, he embarked on his long cherished scheme of colonizing the Red River. The difficulties conflicts and disappointments which attended that effort, and its ultimate success, are well known. Although his actions have been most unsparingly denounced, there can be no question that in all he did his motives were purely philanthropic. Selkirk's settlement is now represented by the flourishing province of Manitoba, in which his name is highly revered and his memory perpetuated by the town and county of Selkirk, both so called after him. Sir John Wedderburn has well and truly said of him that he was "a remarkable man, who had the misfortune to live before his time." Sir Walter Scott, too, writing of him says, "I never knew in all my life a man of more generous and disinterested disposition."

KILLED DURING A PANIC.

Several Girls Crushed to Death and Others Severely Injured.

Philadelphia, Pa., May 1.—Five girls are known to have been killed and more than a score injured during a panic at the cigar factory of Harburger, Homan & Company, in this city. The company employ over 600 girls

At 12.15 noon a workman employed in the building was slightly injured, being caught in an elevator. Some person cried fire and immediately there was a rush for the stairway of the building. The crush was so great that many of the girls turned back and rushed for the windows. Before they could be restrained from jumping a score or more had hurled themselves into the street, several being crushed to death. Ambulances were quickly on the scene and the dead and injured were hurried to the hospitals.

CUSTOMS REFENUE INCREASING

Ottawa, May 1.—There has been a very large increase in Canadian customs revenue for the present month. The revenue was $2,789,978, or an increase of $513,721 over April of last year

The amount collected for the ten months of the fiscal year was $26,388,58", an increase of $2,472,314 over the same time last year.

EAT TOO MUCH WHEAT.

Wolseley, Assa., May 1.—Mr. and Mrs. A. B. Bompas, of Ridgeway Farm, have been sorely bereaved. Within a week they lost two children a boy and girl, aged 4 and 7 en respectively. It appears the children had eaten too much wheat, resulting in impartion of the bowels followed by inflammation. The children were more than ordinarily bright, and the bereaved parents have the sympathy of the community.

ROYALTY REDUCED.

Ottawa, way 1.—At to-day's cabinet meeting it was decided to reduce the royalty on Yukon gold to 2½ per cent. It takes effect to-morrow; instructions have been wired to Dawson to that effect.

GOT TWO YEARS.

Cape Town, May 1.—Princess Radziwill, who has been on trial before the supreme court on the charge of forgery in connection with notes purporting to have been endorsed by the late Cecil Rhodes, was sentenced today to two years' confinement in the House of Correction.

COST OF THE WAR.

London, May 1.—An official estimate of the total cost of the South African war to March 31, 1902, places the amount at nearly £223,000,000 ($1,115,000,000.)

TEST YOUR SEED.

Farmers should avail themselves of the opportunity of sending any doubtful samples of grain and other seeds to the experimental farm to be tested for their vitality. By this means any injury to the vitality of grain from unfavorable weather during harvest may be promptly detected, and the extent of the injury ascertained. Samples weighing about one ounce may be sent to the central experimental farm at Ottawa free through the mail. These samples are tested and reported on free of charge, and their percentage of vitality can usually be determined within a fortnight after they are received.

TELEGRAPHIC BRIEFS.

Toronto lacrosse team defeated Oxford.

There is another stampede in the Yukon, this time to the Milne concession.

Since April 10 3,000,000 bushels of wheat have been shipped from Port William

Chancellor Boyd will arbitrate the differences between the C. P. R. and trackmen.

Sir Michael Hicks-Beach has stated to a deputation of British millers that the flour tax would remain.

The C.PR. announces rate reductions in the west on horses, hogs, cattle, sheep, dressed meats and dairy products.

The steamship Bulgaria reached Halifax with 1,758 settlers for Western Canada. During a month 10,000 will arrive.

Hon. R. P. Roblin left for England April 30 to attend the coronation.

Many immigrants are pouring to the Macleod and Pincher Creek districts.

The machinists in the Canadian locomotive works have gone on strike.

The body of James Furney, of Midland, Ont., was found floating in Georgian Bay.

A LAND OF WONDER

REV. JOHN McDOUGALL'S CALCULATIONS OF WESTERN PRODUCTIVENESS.

HE PAINTS A GLOWING PICTURE OF OUR GLORIOUS HERITAGE.

Speaking in the Metropolitan church, Toronto, last Sunday, Rev. John McDougall, superintendent of Methodist missions, made some remarkable calculations illustrative of the productive resources and vastness of the Canadian west. It is reported in a special dispatch to the Montreal Herald as having based his calculations ukon a block of land 1,000 miles square abutting on the 49th parellel and lying between the Rockies and Ontario. This territory contained in his estimation, more acres capable of agriculture than any other stretch of like dimensions on the face of the globe. Of this great block of land he took a hundred million acres or one-sixth of it and placed a conservative estimate of the yield when cultivated at fifteen bushels per acre. Then he took a bulk estimate and asked what it would mean to move it to the markets of the world. He took a train of 40 cars leaving Winnipeg for the east. Each car would carry one thousand bushels, making an aggregate cargo of 40,000 bushels. It would take 37,500 trains of 40 cars, or a little more than 102 trains a day for every day of the year.

Figuring more finely still, he had found it would keep one of such trains moving out of Winnipeg every fifteen minutes, day and night, for 365 days to move the wheat crop of but one-sixth of that stretch of country.

Mr. McDougall did not confine his estimates to wheat alone. He supposed that in time live stock would be raised in that part of the country. Mr. McDougall allowed one fat bullock a year for shipping purposes for every forty acres of one-sixth of a block of one thousand miles square. That would mean sixteen millions of cattle a year. At twenty head to the car it meant 40,000 trains of 20 cars each, or little more than 100 trainloads of cattle moving out of Winnipeg every day in the year. To every ten acres he allowed one fat sheep and one marketable hog; that meant 64,000,000 of each, which loaded 200 to the car would show thirty-two thousand trains, twenty cars each moving out of Winnipeg, one every fifteen minutes day and night.

BURIED ALIVE.

Dead Bodies of Two Stowaways Coming Through a Coal Shoot Horrify The Stokers.

New York, May 3.—When the British steamship Sir Charles Grenville, from the West Indies, arrived in port, Captain Jones reported the tragic death of two West Indian Stowaways.

The vessel stopped at half-a-dozen ports in the West Indies, among them being St. Lucia, where she coaled. It is at this port, Captain Jones believes, the stowaways, who were negroes, managed to get aboard the vessel by letting themselves down to the coal bunks through the coal chutes. The men had evidently miscalculated the time that the vessel was to coal. After they had reached the coal bunks many tons of coal were taken on board, and the two stowaways were literally buried alive. Nothing was known to the Captain or crew of the death of the men until the morning of April 16, after the vessel had left Guantanamo, loaded with sugar for New York, when one of the bodies slid through the coal jute into the furnace room. At the time the stokers were piling coal into the furnaces, while the vessel was making a hard fight against a northeasterly gale. The sight of the body sent a shiver through the stokers, causing them to quit work temporarily. Caktain Zones ordered the body buried at sea.

Six days later the stokers were again horrified by another body, which came through the coal chute into the furnace room. A search was then made of the coal bunks, but no more bodies were found.

C. P. R. NEW STOCK.

Montreal, May 3.—The twenty million of new stock of the Canadian Pacific has all been allotted to the shareholders, who were allowed to take up the new stock at par. The details to hand are not completed but roughly 40 per cent was absorbed in New York and 40 in London, while 20 per cent was taken up in Canada. It is understood that a considerable portion of the London stock is for Berlin, Vienna and other foreign shareholders.

Books are desirable companions; when they bore you it is an easy matter to shut them up without giving offense.

EXHIBITION RACES.

Full Programme of the Turf Events at the Winnipeg Industrial.

Following is the official programme of turf events to take place at the Winnipeg Industrial Fair :

FIRST DAY.

Stallion Trot or Pace—Mile heats, 3 in 5, entrance fee $20, purse $400.

Farmers' Green Trot. Bona-fide, etc , entrance fee $5, purse $100.

Half Mile, Ponies—2 in 3, 14½ hands high, entrance fee $7.50, purse $150.

Citizens' Purse—1¼ dash, entrance fee $125; weight for age and usual sex allowance, 1st purse 75 per cent, 2nd purse 15 per cent, 3rd purse 10 per cent, purse $2,500.

Winners of this race will be penalized 5lbs.; 2nd 3lb. in other running races.

All Ages—⅞ mile dash, weight for age, entrance fee $10, purse $200.

Team Race.

SECOND DAY.

2.35 Trot and 2.40 Pace—Mile heats, 3 in 5, entrance fee $15, purse $300.

2.10 Trot and 2.15 Pace, Industrial Purse—Mile heats, 3 in 5, entrance fee $35, purse $700.

Half-mile heats, 2 in 3, weight for age, entrance fee $10, purse $200.

1⅛ mile dash—3 year olds carry 110 lbs , 4 year olds 115 lbs. 5 year olds and over 120 lbs., with usual sex allowance, entrance fee $15, purse $300.

THIRD DAY.

2.15 Trot and 2.20 Pace—mile heats, 3 in 5, entrance fee $20, purse $400.

Trot or Pace—mile heats 3 in 5, trotters 2.30, pacers 2.35, entrance fee $20, purse $400.

4 year old and over, weight for age 1¼ miles, entrance fee $12.50; horses not running 1st or 2nd in mile and ⅛ allowed 3 lbs., Manitoba, Northwest Territories or British Columbia bred horses allowed 5 lbs., purse

Manitoba Derby—1 1-3 miles, for 3 $250.

year olds, weight for age. Horses to be owned or trained in Manitoba, Northwest Territories or British Columbia prior to April 15th, 1902, and trained in those provinces from that date. 5 lbs. allowed to colts bred in Manitoba, Northwest Territories or British Columbia, entrance fee $20, purse $400.

¾ Mile Dash—All ages, winner of ⅞ to carry 5 lbs. extra, entrance fee $10, purse $200.

FOURTH DAY.

Free for All—Trot or Pace—Mile heats, 3 in 5, entrance fee $175, purse $3,500; 1st $2,000; 2nd $700; 3rd $450; 4th $350.

2.28 Trot or 2.35 Pace—3 in 5, entrance fee, $20; purse, $400.

Ladies' Plate—The great trial stakes for all ages, 1⅜ miles, 3 year olds to carry 105 lbs.; 4 year olds to carry 112 lbs.; 5 year olds to carry 117 lbs.; with usual sex allowance. Entries to be made with the manager on or before 1st May. $5 must accompany the entry, when name of person making entry is all that will be necessary. $5 additional must be paid on or before May 23, when entries must be named, giving name and breeding of same, and $25 additional to start. Horses for this race and the Derby must be owned and in Manitoba, the N. W. T. or British Columbia on or before April 15th, 1901, and trained in those provinces from that date. Divided, 1st, Cup and $275; 2nd, $90; 3rd, $35. Purse $400.

5½ Furlongs Dash — Handicap—Ponies, 14½ hands, to carry 100 lbs. 3 year olds, 107 lbs.; 4 year olds, 110 lbs.; 5 year olds and over, 112 lbs.; usual sex allowance. Entrance fee $16, purse $200.

Steeple Chase—1¾ miles, over eight jumps, including hurdles, 4 ft. high, solid earth jumps, 4 ft. 3in.; water jumps, 10 ft. wide. Three year olds to carry 135 lbs.; 4 year olds, 147 lbs.; 5 year olds, 154 lbs.; six year olds and over, 160 lbs. Professional riders to carry 10 lbs. extra. Entrance fee $12.50, purse $250.

A WINDFALL.

Richard Trevelyan, a native of Cornwall, England, who has lived a great many years in British Columbia, is in great luck. From place to place he drifted, never acquiring anything like a fortune, and finally quite advanced in years, has received word from England that he has fallen heir to £59,000. The fortune comes to him as an inheritance from his grandfather. The drowning of his brother in the Fraser River about seven years ago removed the only other heir, and now the whole of the fortune falls to the lot of Richard.

FATALLY ASSAULTED.

Portland Ore., May 1.—Miss Faith Stewart, a rescue worker among the denizens of the slums, is in a dying condition at her home as the result of an assault made upon her on Sunday night by five men. She was walking along the street about 10 o'clock at night when five men met her and knocked her down, kicked and choked her. Yesterday she became delirious. Several dive keepers are known to be bitter against Miss Stewart as she had induced a number of girls to leave their places.

Prayer Meeting, Wednesday at 8 p.m,
Epworth League. ....Monday at 8 p.m.

Strangers are cordially invited.

REV. R. F. STILLMAN, - - Pastor.

THE PREACHERS' COLUMN.

A man's religion must be bankrupt when he can only pay the Lord forty days on the year.

It is not enough to make good promises to God, we must make our promises good.

The divine in the christian is the best demonstration of the divinity of Christ.

A man is not thirsting for knowledge just because he asks curious questions.

When Christ is the alphabet life becomes God's literature.

It is never safe to waste the day of life since the night falls without warning.

A man's business is a curse when he is too busy to stop to do good.

The attempt to be a good fellow has spoiled many a good man.

God has no interest in the church that has no interest in the poor.

The value of a man's opinion on a subject depends on what it costs him to live up to them.

Religion without joy is a sun without light.

The path to greatness with God lies open to all.

The great life is made up of greatness in tittles.

Many a man must lose his all to find himself.

No man fails of success who conquers himself.

A selfish success in a sad failure.

Men are ever ready to amend the Gospel and then put the amendment first.

If you do not flee from the devil you will be fleeced,

Some people think to get heaven in their hearts and glory on their heads while their hands gather the pickings of hell.

Whatever has become of the earth, the hog replied, "I have swallowed her up."

Life is to be measured by its outflow rather than by its income.

The man of bitter thoughts will not be likely to live a sweet life.

Lord if all other lamps go out
And every other light shall fail,
Thy word of truth through every doubt
Shall finally prevail.

—Chips from Pastor D. Holford's workshop.

COMMUNICATION.

To the Editor.

It is high time our health officer was waking up as regards the sanitary condition prevailing at Coal Creek mines. One has only to approach the dwellings to become aware of the stench arising from the garbage heaps at the back doors of all the houses. As yet very little has been done towards its removal and with the advent of warmer weather disease will surely follow. Householders are taxed each month for sanitation and would like to see some of this money used for that purpose.

Coal Creek Mines OBSERVER
April 5th, 1902.

Llewellyn C. Williams, teacher of piano, mandolin, guitar, cornet, alto, tenor, trombone, baritone, euphonium, tuba, etc. Music arranged for all instruments. Orders taken for all music. Opposite Royal Hotel, over tailor establishment. Call from 1 p. m. to 6 p. m

NO KICK COMING.

Much has been said recently about misconduct and inefficiency in the administration of out public affairs, although no complaints are heard in Fernie and its vicinity, where business remains comparatively good. The reason for this may lie in the fact that the citizens of a busy community have less time for faultfinding in the affairs of others, or it may lie in the fact that there is no cause for complaint.

During the past few years an exceptional condition of affairs has existed in the southern part of Southeast Kootenay, caused by a large influx of people and much industrial activity. The population of the southern part has increased in less than five years from less than one hundred to something over four thousand permanent residents in addition to at least two thousand more of a floating population. Considering that a large proportion of these people consist of rough and uneducated men and foreigners we would naturally expect a tendency towards lawlessness and an increase in the number of serious offences against law and order. Instead of such a condition as this, we find that there have been few offences committed where it has been necessary to invoke the procedure of the higher criminal courts and no instance where an offender has transgressed without punishment.

The town of Fernie has justly been referred to, in this regard, as a town which can be imitated to advantage by the older and more populous centers of the province. Here the street drunkard is rapidly becoming a thing of the past, the lewd woman is kept within proper bounds, the gambler and other human parasites find it uncomfortable to pursue their callings and the license laws are rigidly enforced—particularly as to Sunday observance. The same condition exists to a great degree in Morrissey and Elko, where there has been much business activity during the past year.

Taking everything into consideration this community has great reason not only to congratulate itself on the existing condition of affairs but also to pride itself on the men who are responsible for the proper enforcement of law and order. Many things might still be done by the government to assist the good work, but we have reason to hope that our wants will be attended to in the near future.

Comparisons are sometimes odious, but we think that Chief Barnes and his men are entitled to much credit for having performed the duties which fell to their lot in a fearless and disinterested manner and for having caused the law to be respected in this community to the same extent that John Kirkup did in the early days of West Kootenay.

Coal Mines' Regulation Act.

NOTICE is hereby given that the name of the first alternate appointed by the owners to the Board of Examiners of the Coal Creek mine, is David Martin, not David Morton, as previously given.

Are you paying rent

and do you wish to

Own Your Home

If so please read this carefully:

The Canadian

Birkbeck

Investment & Savings' Co.

Head Office, Toronto.

Capital Subscribed - - $2,500,000
Paid up - - - - 600,000

Will assist you to

Purchase or Build a Home,

permitting repayment in

Easy Monthly Instalments

just as you now pay RENT.

To Rent Payers and all persons of moderate incomes who can furnish part of the cost of a Home, either in land or cash, and who desire to purchase or build homes for themselves, or pay off existing mortgages thereon, the Birkbeck Company offers special opportunities, extending to them the privilege (to most people an indispensible one) of **repaying their loans in Easy Monthly Instalments** not exceeding the Amount usually spent in rent.

THE ADVANTAGES OF THIS PLAN are apparent to borrowers. The loan so obtained runs through to its final payment by a system of monthly rents, and needs no renewal. The borrower is not confronted at a set time (usually at the end of three or 5 years) with his entire indebtedness. The falling due of the principal is no longer a cause of keen anxiety. On the contrary, under the Birkbeck's method the Borrower is enabled to gradually cancel his indebtedness. The burden has been evenly distributed over a more lengthened period, and the Loan, for which formerly the interest could scarcely be raised annually, is now not only easily carried but paid off in the end almost imperceptibly. Intending Borrowers are given:

1. **Choice of the Period and Amount of Repayment, and**
2. **Absolute Limitation as to the number & Duration of payments**

The payments are always the same and are due at fixed intervals, borrowers therby knowing at the outset

EXACTLY HOW MUCH

they will have to pay each month and year and exactly how long.

The practical result of borrowing under the old system is that, after paying interest for a term of years, the original debt still exists. This is true in nine cases out of ten.

A Bundle of Receipts

will be all you will have to show after years of rent-paying. The house will still be the property of the landlord.

Special Feature

Borrowers are not Required to Become SHAREHOLDERS and are free of any liability outside of the unpaid portion of their loans from the company. In the Birkbeck Company there are

No DELAYS
FINES
FORFEITURES,

No uncertainity in estimating maturity.

No Shareholders' risk or Liability.

No double set of fees for local and head Office solicitors charges.

For further particulars regarding the Company's Attractive Rent Purchase Plans, apply to

Arthur H. Cree,

Office over Bleasdell's Drug Store, Fernie.

GOT THREE MONTHS.

KOOTENAY ASSOCIATION GET OFF WITH LIGHT SENTENCE.

Jury Said They Were Guilt, but Reommended Mercy.

Solomon Gabriel, George R. Payne and E. L. Bride, the members of the ill-starred Kootenay Association, were found guilty at Nelson on Monday of indictments of obtaining money under false pretenses and of conspiracy. The jury that tried their case was out a little over an hour when they returned with a verdict to the above effect. During the progress of the case the counsel for the prisoners tried to work in the clause in the presentment of the grand jury in which reference was made to the justiciary of Fernie, for the purpose of showing that the police officers of Fernie were over-zealous in their efforts to secure convictions. In his charge to the jury Mr. Justice Martin dealt with this matter, and explained that the number of convictions was in itself no indication that the police officers were over zealous, any more than such a condition could be taken as a reflection upon the law abiding people who made up the population of the center from which the apparently excessive number of convictions eminated. The evidence against the prisoners was practically the same as that brought out at the preliminary hearing, and the circumstance that it was sufficiently strong to secure a comittment was in itself sufficient to justify the Fernie police officers in the steps they had taken. The prisoners were sentenced to three months imprisonment upon each count, the sentences to run concurrently.

COMMUNICATIONS

To the Editor.

Our attention has been directed to the insinuating reference recently made by the grand jury against the members of our local justiciary. The ambiguous manner in which they expressed themselves is open to severe censure in as much as it intimates that there is, in the opinion of the grand jury, reason for an investigation by the Attorney General's department. This statement of itself involves an insinuatfon against either the efficiency or character of those gentlemen who are on the local peace commission. We take the present opportunity of expressing ourselves to the effect that such an insinuation is both unwarranted and unjust. We have individually acted for a number of the men who presented their grievences to the grand jury and we do not know of any instance where the justice acted beyond his discretion. We, who are in almost daily contact with these justices, are surely better able to form an opinion regarding them, than the members of the grand jury who are absolute strangers to the men whom they so heedlessly condemn.

We have made some investigation into some of the matters openly referred to by members of the grand jury. In the first place they stated that too many prisoners were sent to Nelson.

Conditions exist here, which are not found in any other town in the Kootenays. In addition to a large foreign population there is also a large floating population composed of people who hail from all portions of the continent. As there are no resident magistrates at Michel, Morrissey and Elko, prisoners are brought from these points to Fernie to be tried. The population of these places added to that of Fernie will aggregate 6,000 qeople and it is not to be wondered at the considerable business ensues.

On account of the lack of accomodation here the authorities are obliged either to send these prisoners to Nelson or release them. The government has been approached time after time regarding this most pressing necessity and still nothing has been done to relieve the situation.

The grand jury also complained of one case where the prisoner was serving a short term for forgery and another case where a longer term was imposed for vagrancy, drawing attention to the anomaly which appeared to exist. If the members of the grand jury knew as much as they should about these matters they would not have to be told that the crime of forgery is entirely beyond the purview of the local justiciary and that they are therefor not to blame. A fuller investigation of the vagrancy case would reveal the fact that the prisoner in question had no less than six or eight previous convictions against him before the long term was imposed on him.

There may be other causes for complaint of which we have not heard; but we incline to the idea that there is as little in them as there is in the matters above referred to. The grand jury has arrogated to itself the right to make incriminating suggestions, which it should have left alone, in view of the fact that it was not qualified, according to its own admission, to formulate any definite charge.

While we are on this subject we think that it would not be out of place for us to state that we are quite in accord with the views expressed in your last issue in the article headed "No Kick Coming." The people of this community are quite capable of looking after their own affairs and while there are a number of things that must soon be improved upon, the citizens are doing their best with the facilities at their disposal. On the whole we are fairly content and can dispense with unwarranted interference from the outside.

If the legislature would devote its time to the government of the country instead of its present jangle for possession of the treasury benches, our urgent demands would receive recognition and no necessity would then exist for such suggestions as those recently made by the grand jury.

Yours truly
W. R. Ross
H. W. Herchmer.
J. S. T. Alexander.

FERNIE TO CELEBRATE

DOMINION DAY WILL BE A MEMORABLE ONE IN THE HISTORY OF FERNIE.

The Fernie Athletic Association Will Make Preparations for Monster Celebration on July First.

At a meeting of the Fernie Athletic Association held in Joyce's Hall on Wednesday evening it was decided to hold a demonstration in Fernie on the first of July and a committee consisting of the President and Secretary of the Association and a representative from each club was appointed to arrange a programme of sports for that day.

The committee which consisted of Messrs. W. Ross, A. H. Cree, W. W. Tuttle, H. Watson and J. R. Wallace, met in the President's office on Friday evening and drew up the following program:

1. Football Match,
2. Baseball Match,
3. Lacrosse Match,
4. Tug of War,
5. 100 Yard Race, open to all,
6. ¼ Mile Race, open to all,
7. 100 Yard Race for amateurs,
8. Putting Shot.
9. Running High Jump.
10. Running Long Jump,
11. Sack Race for boys under 16,
12. 100 Yard Race for boys under 16,
13. Tree-Legged Race,
14. Fat Men's Race.

The day's sports to be concluded by a grand ball in the evening.

WHO WILL BE PREMIER?

Victoria, May 17—There were a number of caucuses of the government party to-day and it is understood that the selection of a leader to succeed Premier Dunsmiur was the chief business. Dunsmuir is expected to drop out of politics after the coronation. Prior and Eberts are said to be rival aspirants for the mantle of the premier and their respective followers are making things rather warm in the caucus. Martin to-day denounced the bill, which Smith-Curtis has introduced to relieve the organizations from responsibility in connection with strikes, he finds fault with the measure in that it goes to far and says that a measure which he himself has before the house will meet the requirements. This relieves the labor organszations from the responsibility for the loss of unauthorized agents. The Curtis bill will be killed on its third reading.

DROWNING ACCIDENT.

LITTLE EDDIE KANOUSE LOSES HIS LIFE IN COAL CREEK.

While Playing on the Bank he Fell in and was Carried Away by the Raging Torrent.

Little Eddie Kanouse, son of Mr. H. A. Kanouse, met with a terrible death in Coal Creek, on Thursday morning of this week. He and Marcel Bolduc, a French lad, went down to the creek before school to watch the stream, which owing to the heavy rains, has become a raging torrent, and as they were standing close to the bank the ground underneath their feet gave way and both lads were precipitated into the flood. Young Bolduc managed to grasp the end of a log and succeeded in draging himself out, but Eddie was carried out into the current and swept down the stream before assistance could arrive. The body was recovered on Friday, about one hundred yards from the scene of the accident.

Mr. and Mrs. Kanouse have the sincere sympathy of the entire community, as Eddie was a very bright lad and a general favorite with all who knew him.

BASEBALL MATCH.

The first game of baseball in which the Fernie team took part this season was played on Sunday last at Elko and resulted in a decided victory for the visitors. The team from Fernie was only picked up the day before and as they had very little practice this season, some doubts were entertained as to their ability to hold their own against the Elko team, which was reported to be composed of some good ball players from over the line but the game had not proceeded far before it was apparent to the spectators that the Fernie lads would have an easy thing of it. The result of the game was a score of 12 to 5 in favor of the visitors. Following is the score:—

FERNIE

Whalen	2
Whitlatch	1
Herenstrict	1
Thorp	2
Wrigglesworth	0
Davis	2
Harwood	1
Wilson	2
Monahan	1
	12

ELKO

Watson	1
Salvris	1
Burns	0
Lamphere	0
Bergstrom	0
Bobo	1
Fleet	1
George	0
Todd	1
	5

Quite a number of spectators went down from Fernie and they speak very highly of the manner in which they were entertained by the citizens of Elko.

NOTES ON THE GAME.

Watson put up a good game on first base, also at the bat.

Lamphere and Burns, as pitchers, for Elko, did good work but the catcher seemed to do most of his work with his jaw.

After the first innings Munn took Todd's place in left field, the latter having had a finger knocked out. Todd was reported to have been a crack baseball player in St. Paul and much was expected from him, and consequently the Elko boys felt his loss keenly.

All the Fernie boys played well, the battery getting in some splendid work.

Dr. Barber is now at his office opposite the Royal hotel. x

THE doings or misdoings of last years license commission, now "functus officio" are not of such pressing importance as the erection of a suitable court house and jail in Fernie. The probable cost of the one would go a long way towasds paying for the other, and the community would reap some advantage from the expenditure.

40,000 PEOPLE PERISH

GREATEST CALAMITY SINCE THE DAYS OF POMPEII OCCURS IN WEST INDIES.

MOLTEN FIRE BELCHES FROM THE BOWELS OF THE EARTH "GLIMPSES OF HELL."

St. Thomas, D.W.I., May 10—The British steamer Roddam, brings a report that the town of St. Pierre, Martinique, French West Indies, has been totally destroyed as a result of the volcanic disturbances in the island. Almost all the inhabitants of St. Pierre are said to have been killed. The Roddam reports that all the shipping in the port has also been destroyed.

The British mail steamer, Esk, which arrived at St. Lucia reports having passed St. last night. The steamer was covered with ashes although she was five miles distant from the town, which is in impenetratable darkness. A boat was sent in as near the shore as possible, but not a living soul was seen ashore, only flames. The Quebec steamship company's syeamer, Roraimg,' was seen to explode and disappear.

NOT A RESIDENT ESCAPED.

The commander of the Souchet reports that at one o'clock on Thursday the entire town of St. Pierre was wrapped in flames. He endeavored to save about 30 persons more or less burned from the vessels in the harbor. His officers went ashore in small boats seeking for survivors, but were unable to penetrate the town. They saw groups of bodies upon the wharves and it is believed that not a single person resident in St. Pierre at the moment of the catastrophe escaped. The governor of the colony and his staff colonel and wife were in St. Pierre, and probably perished. The extent of the catastrophe cannot be imagined. The captain of the British steamer, Roddam was very seriously injured and is now in the hospital at St. Lucia. All of his officers and engineers are dead or dying. Nearly every member of the crew is dead. Supercargo Campbell and ten of the crew of the Roddam jumped overboard at St. Pierre and were lost.

It is estimated that forty thousand persons perished as a result of the volcanic eruption in the Island of Martinique.

SLAPPED HIS FACE.

A Scene at the San Salvadorean Claims Commission.

St. Paul, Minn., May 9.—According to a Washington special Chief Justice Sir Henry Strong, of Canada, has made a very exciting culmination to his services as president of San Salvadorean claims commission. Exasperated by the talk of Dr. Rosa Pacas, who represented the Salvadorean government, Sir Henry slapped the doctor's face. Sir Henry's hand was open and he swung with force and precision. Immediately there were "doings." Chairs were kicked over and there was a swift rush, but Mr. Don. Dickinson, of Michigan, also a member of the commission, got there first and stopped the onslaught with the aid of bystanders. The Salvadorean was forced into a chair and held until his impulse to fight the chief justice of Canada had become more moderate.

PLAYMATES DROWNED.

Two Cousins Drowned in a Well Near Indian Head.

On Monday, according to the Indian Head Vidette, a shocking accident occurred at the home of William Cooper, Sunny South. His youngest son, aged two years, and the latter's little cousin, aged three, were out playing. They left the house as they said to go to Moose Jaw to see Fred Cooper. While running down hill their speed was so great they could not stop, but ran into an old well at the edge of the slough. Ten minutes after their bodies were found floating. Life was extinct. Thus the families of Fred. and William Cooper are bereft of a son each.

TRACKMEN'S SETTLEMENT.

Montreal, May 9.—Chancellor Boyd, on behalf of the board of arbitration enquiring into the grievances of the trackmen of the eastern division of the C. P. R., handed down its decision yesterday. It is understood the award grants the men on this division an increase aggregating 20 per cent.

Every rich man has a lawyer for an heir.

Words are merely the echoes of thought.

BRET HARTE DEAD.

The Famous writes Passes Away in England.

London, May 7.—Bret Harte died suddenly at the Red House, Camberly, near Aldershot, from hemorrhage caused by an affection of the throat.

Mr. Harte had been living quietly in England for years. Most of his time was spent in the country and when in London he was almost equally secluded, having few visitors to his rooms at Lancaster Gate, and only going to the houses of a limited number of very intimate friends.

Mr. Harte had been suffering from swollen tonsils since December last, but he did not consider the attack to be serious. A week ago he went to visit friends at Camberly and was present at lunch yesterday, but he suddenly became ill in the afternoon went to bed and died in a few hours. His end was peaceful.

THIS BOY A HERO.

Sagicity of a Western Lad Saved a Life.

There occurred at Ellerslie a few days ago a remarkable instance of juvenile bravery and sagacity. The five-year-old son of D. Girard was playing near the railway in the vicinity of his father's home and saw a man, a stranger in the community, lying in a drunken sleep right across the track. Presently he saw a train coming at full speed. The little fellow at once comprehended the danger in which the prostrate man was and started down the track to meet the train, waving his arms and shouting vociferously. The engineer saw him and the train aws brought to a standstill just in time to save the man from a horrible death. Such presence of mind and heroic conduct in a child so young is remarkable and worthy of great praise.—Strathcona Plaindealer.

ADMIRAL SAMPSON DEAD.

Washington, May 7.—Rear Admiral W. T. Sampson (retired) died at his home in this city at 5 o'clock yesterday afternoon. The immediate cause of death was a severe cerebral hemorrhage. He had been in a semi-conscious state for several days before the hemorrhage occurred. Admiral Sampson commanded the fleet which captured Santiago from the Spanish.

AN EDMONTON MYSTERY.

Edmonton, N.W.T., May 7.—Lader, a man who is supposed to have been drowned in the Saskatchewan river, has not been located yet. His hat was found in the river riddled with bullet holes. His brother, R. Vader, of the N. W. M. P., is here, and has offered a reward for the recovery of the body. Search has been made along the river banks but unsuccessfully. There is suspicion of foul play.

JUMPED FROM THE TRAIN.

Hamilton, May 7.—James Edgecombe, who conducts an artist's studio in Buffalo and who relatives live in Hamilton, while jumping from the midnight train from Buffalo at the Stuart Station, missed his footing and fell under the wheels. Both legs were cut off above the knees, and Edgecombe died in the hospital within three hours.

TELEGRAPHIC BRIEFS.

Archbishop Corrigan, of New York, is dead.

Twelve persons were drowned by a waterspout at Foss, Oklahama.

The revolutionists have captured the capital of Hayti—San Domingo.

Scott memorial hall, Winnipeg, will be completed this year by the Orangemen.

The yacht Amphatrite, with the Royal family of Greece on board is stranded in the Euripos channel.

Winnipeg tax collector reports an increase in receipts for the year of $85,000, the net total being $761,-450.

Messrs. Mackenzie & Mann received $327,000 for their work towards building the proposed Stickene river railroad.

In the British House of Commons Hon. R. W. Hanbury announced that that restrictions on Canadian cattle would not be removed.

Lord Strathcona believes the colonial conference will almost realize imperial federation and devise plans to cope with the Morgan steamship combine.

A revolution is feared in Portugal.

The trial of George Scoutin for murder has opened at Calgary.

Peter Wessel, of Winnipeg, was killed in a coal mine near Frank, Alberta.

Great damage was done by earthquake shocks in Spanish provinces.

Six people were killed and fifteen houses carried away by a cloudburst at Foss, Oklahoma.

The Afghan pedlar arrested at Fort William on suspicion of being a murderer, has been released.

FATAL FAMILY FEUD

PAUL LEICESTER FORD, NOVELIST SHOT DEAD BY HIS BROTHER.

MAN WHO COMMITTED CRIME HAD BEEN DISINHERITED BY HIS FATHER.

New York, May 10.—Paul Leicester Ford, the novelist, was shot and killed by his brother, Malcolm Webster Ford, writer and athlete, who immediately sent a bullet into his own breast, dying instantly. The shooting occurred in the handsome new mansion which Paul Leicester Ford had built at 37 East Seventy-seventh street and had occupied for a year.

The novelist was sitting at his desk in a corner of his library. It is supposed he was engaged at some literary work. Malcolm W. Ford called, as he had often done, and went to his brother at his desk, Words were exchanged in a tone so low that Miss Hall, the novelist's secretary, could not hear what was said, though she was paying attention to the incident. Suddenly there was a revolver shot and Miss Hall darted from the room. Then, according to the statements of the police, she considered that she must act more bravely, and re-entered the library. Malcolm Ford had called her. As she turned toward him he placed his revolver to his heart, fired and fell, dying instantly.

It is said there was enmity between the two brothers and consequent bitterness and that it was of 11 years' standing, and that never since the death of their father have they been on intimate or brotherly terms. This alleged enmity on the part of Malcolm is said to have been brought about by the fact that the father of the boys disinherited Malcolm and that this action on the father's part was because he did not wish Malcolm to devote himself to an athletic career.

SUPPLEMENTARY ESTIMATES.

Ottawa, May 9.—The supplementary estimates as presented to parliament yesterday, contain the following items of expenditure in the Northwest:

Public buildings in Manitoba: Winnipeg immigration buildings, isolation hospital, re-vote, $8,000; examining warehouse, heating apparatus, plumbing and repairs, $250.

Winnipeg military buildings: To pay the City of Winnipeg for improvements of Assiniboine avenue in front of the buildings, $3,976.

Winnipeg postoffice, repairs, etc., $2,500.

Dredging: $12,000 for new dredging plant and self propelling tugboat to work in the Red and Assiniboine rivers in Manitoba, $10,000.

Northwest Territories—Calgary post office, additional letter boxes and alterations to fittings, $1,200. Calgary court house, drainage, $1,-100.

Moose Jaw—Court house, heating apparatus, $1,000.

Red Deer—Court house, lock up, etc., and land office (re-vote) $700.

Yorkton—Court house and jail, $4,400.

Saskatoon—Immigration building, $1,200.

Moosomin—Court house, grading, fencing, etc., $1,000.

Manitoba harbors—Gull Harbor St. George's Bay, extension of the wharf $2,500.

Gypsomville Harbor—Removal of three sand bars south of the Manitoba house, $5,000.

Hnausa wharf—Extension, $2,500.

Lake Dauphin—Lowering of (re-vote) $5,000.

Lake Manitoba—Additional outlet, via Fairford river, $5,000.

Lake St. Frances—Outlet, construction of guide piers and dredging (re-vote) $1,200 ($6,500.)

Selkirk wharf—Extension $6,000.

Wharf on Lake Winnipeg at Gimli, to complete repairs, $3,700.

White Mud river—Dredging at the mouth, $5,0$0.

Winnepegosis—Dredging channel at the mouth of Mossy river, $4,500.

Observatory on Sulphur mountain, N. W. T., $4,000.

A further amount required for assistance in the registry office, $7,-000.

A further amount required for schools, clerical assistance, printing, etc., to be paid half-yearly in advance, $100,000; total $107,000.

SMALLPOX IS INCREASING.

Ottawa, May 9.—According to a report which reached the department of agriculture there were 30,804 cases of smallpox and 924 deaths in the United States from December 28 to April 30, and during the corresponding period last year the number of cases was 22,344, and 349 deaths.

Coal was found while boring for water in Portage la Prairie.

Mr. Lawrie, of Winnipeg, was severely injured at Grand View, Man., by being run over by an engine.

SALISBURY IS OPTIMISTIC.

He No Longer Fears Imperial Disruption in Ireland.

London, May 8.—The premier, Lord Salisbury, as president of the annual grand habitation of the Primrose league, at Albert Hall, yesterday afternoon, spoke to an immense audience in a much less pessimistic vein than when he was last time heard in public. He congratualted the league on the staunch support given to Conservative governments, one result of which was that Great Britain was now supreme in Egypt, while, with regard to Ireland the country need no longer fear the "insane, suicidal projects of Imperial disruption supported by many of the opposition statesmen."

It is believed the executors of the late Cecil Rhodes will have a huge sum at their disposal after the educational schemes have been carried out, and the few private bequests paid. They will have a free hand in spending the money on irrigation in South Africa, and on the settlement of British men and women in that of the Empire.

During Apri the British casualties in South Africa were 29 officers and 292 men killed or died of disease, one officer and 90 men accidentally killed, one officer and 17 men taken prisoners, 93 officers and 2,631 men sent home as invalids. Altogether the war has been responsible for the loss of 27,732 British soldiers.

SHOULD PROVE INTERESTING.

A Book on the Influence of Money on Woman's Virtue and Man's Honesty.

Montreal, May 8.—Ferdinand Lemieux, ex-accountant of the defunct Ville Marie Bank, and who was sentenced to the penitentiary for his part in the frauds, which wrecked the institution, has been released on ticket of leave. He has three years of his time yet to serve.

William Wier, the aged president of the bank, and recently released, is said to be revising the manuscript of a book he wrote while confined in jail. It is said that in the book he brings to light many interesting points regarding the bearing of money on political affairs and its influence on the virtue of women and and the honesty of men. James Baxter, also a principal in these frauds, and recently released owing to ill-health, is said to be rapidly recovering.

ONTARIO LIQUOR MEN.

They Submit Questions to Candidates for the Legislature.

Toronto, May 8.—Candidates for the legislature, in a typewritten circular, are asked by the liquor dealers, through the Licensed Victuallers association, to confidentially declare what stand they would take, if elected, with respect to the Liquor Act. The questions are as follows:

1. Will you vote and use your influence against the Liquor act when voted on Dec. 4, 1902?
2. If you are elected and the Liquor act is carried, will you vote in favor of a bill to postpone the coming into operation of said act?
3. If you are elected and the Liquor act is carried, will you vote in favor of the bill to repeal said act?
4. If you are elected and the Liquor act is carried will you support a measure providing for compensation based on the value of business, said values to be settled by a commission?
5. If you are elected will you oppose any further reduction in the number of licenses, increase in licenses, or lowering of the hours of closing?

NEW C. P. R. TIME CARD.

The new C. P. R. time card, to go into effect on June 15, is completed. The Imperial Limited, making the run from Montreal to Vancouver three times a week both ways, will arrive in Winnipeg from the west on Monday, Thursday and Saturday at 9.20 p.m., and will leave at 9.50 p. m. The Limited train from the east will arrive on Tuesday, Friday and Sunday at 6.30 a.m., and will leave at 7. a. m.

The regular express from the west will arrive in Winnipeg at 8.50 a.m. and leave for the east at 2 o'clock daily. The express will arrive from the east at 12:30 noon and leave for the west at 6:05 p. m.

Two local trains will be run daily between Winnipeg and Brandon making four trains three times a week between these points and three the other days. The first local from Brandon arrives at 8.30 a. m., and the second at 12.30. The first train for Brandon leaves Winnipeg at 7.40 a. m., and the second at 2.30 p.m.

The Ontario government will build a steel bridge over Winnipeg river at Rat Portage.

HOUSE OF COMMONS

AMENDMENTS PRESENTED TO THE MANITOBA GRAIN ACT BY SIR R. CARTWRIGHT.

RAILWAY CORPORATIONS MUST ERECT AND MAINTAIN LOADING PLATFORMS.

Ottawa, May 8.—In the house of Commons yesterday on the act to amend the Manitoba Grain act, Sir Richard Cartwright gave notice of some amendments which he wanted to place in Hansard so that members would have time to consider them.

In effect the amendments are that on the written application to the commissioner by any person residing within 50 miles of the nearest shipping point he may give permission to anyone to erect a flat warehouse at such point. The railway company shall be compelled to give a location with siding on its premises and at a rental not greater than the charge to standard elevators. The commissioner may authorize one or more of such warehouses.

A written application by ten farmers resident within 20 miles shall cause the railway company to erect and maintain at such point a loading platform suitable for loading grain from vehicles direct into cars. Each loading platform shall be erected at a siding which the railway company will provide on its premises easy of access and at least ten feet wide. It shall be used free of charge for loading grain. The platform must be constructed within 30 days after the application is made by the commissioner, and shall pay $25 for each day's delay beyond that time. Applications will be received from April 15th to October 15th.

Railway companies must furnish cars without delay at those platforms, and where there are no platforms cars must be furnished without delay for loading grain direct from vehicles. Those who are guilty of an infraction of the act will be subject to a penalty of not less than $50 and not more than $1,000, and in default i prisonment not less than one month and not more than one year. An order book for cars shall be kept open to the public. Applicants may make orders 48 hours in advance and cars shall be furnished in accordance with the order in which they appear in the book.

TRANSPORTATION RESOLUTION.

Mr. McLaren (North Perth) moved the following resolution on the transportation question:

"Whereas, during the past twenty years the ideas of food producing competitors in the Boer market have made phenomenal strides in agricultural development, owing largely to the favorable rates afforded them by adequate competitive transportation routes, and which have enabled them practically to fix this and determine the value of food products the world over.

"And whereas, the intensity of the commercial struggle of today practically demands the advancement of our national development, and that every handicap existing against transportation to the world's markets of our agricultural or industrial products shall be removed; that our commerce shall be untrammelled and that our conditions shall be made to subserve the interests of commerce, and not that of arbitrary or artificial conditions; and whereas, it is in the interest of the Dominion at large in view of the economy of the water transportation that greater use shall be made of our waterways between Lake Superior and the seaboard, thus affording cheaper and better facilities of transportation for our exports from the Western Territories and Ontario and the development of inter-provincial trade;

"Therefore, in the opinion of the House it is both expedient and indispensable that the government shall at once inaugurate such a policy in connection with our waterways and the ship building industry as will speedily lead to the completion of a Canadian system of both inland and ocean transportation."

Hon. Mr. Fisher in reply said that the difference between Canada and United States freight rates to Europe was not due to transportation by land but to the higher steamship rates from Canadian than American ports. This was largely due to the higher insurance rates on the St. Lawrence route.

After some discussion the House divided on the motion, which was lost by 43 for to 93 against.

In reply to Mr. Landry in the senate, Mr. Scott said that no actual negotiations were in progress in regard to a fast Atlantic line.

FELL FROM THE TRAIN.

Halifax, N. S., May 8.—Lieut. Jos. Irvine, of the C. M. R., belonging to the western contingent fell from a train while en route to Halifax. He missed his footing while endeavoring to pass from one car to another and fell down an embankment. The train was stopped and Irvine was found in a dazed condition. His injuries consist of bruises about the head.

PALE AND LISTLESS

A CONDITION THAT AFFECTS VERY MANY WOMEN.

The Appetite Fails—Strength Departs and the Sufferer Feels That Life is Really a Burden.

From the Topic, Petrolia, Ont.

It is impossible that a medicine can be so widely known and used as are Dr. Williams' Pink Pills without striking results frequently becoming known and the merits of this great remedy for the common ailments of man and womankind being published. Mrs. Thos. Kettle, of Petrolea, Ont., is a case in point. Mrs. Kettle is an old resident of this district and is well known. Chatting with a reporter of the Topic the other day the conversation drifted on the subject of medicines, when Mrs. Mettle spoke in the highest praise of Dr. Williams' Pink Pills, which, she said, had cured her of a long illness. Our reporter, being naturally interested, made further enquiries, when Mrs. Kettle gave him the following particulars: "I am the mother of twelve children and in spite of the constant strain and worry the raising of so large a family entailed upon me, in addition to my housework, I was for many years blessed with splendid health. However, after the birth of my last child my strength seemed to fail me and I felt that my health was gradually going. I consulted a doctor and continued under his treatment for some months, but the only result that I could see was that I grew gradually worse. I could not name any particular ailment that I suffered from, but I was "all run down." My appetite failed me, my strength seemed all gone and I became pale and listless, scarcely able to drag myself around, and much of the time in bed. I became alarmed at my long continued ill-health, and as doctor's medicine had done me no good I determined to try Dr. Williams' Pink Pills. I purchased a box and thought it did me some good, so I got six boxes more, and before I had finished taking the second I felt a lot better, and by the time I had finished the seven boxes I had perfectly regained my health, had gained weight and felt better than I had for some years. I consider the pills a splendid medicine, a real godsend to weak and ailing women, and have frequently recommended them to my friends and used them with my children, always with good results." Judging from Mrs. Kettle's healthy appearance to-day none would imagine she had ever known what a day's illness meant.

Dr. Williams' Pink Pills are a positive cure for all diseases arising from impoverished blood, or a weak or shattered condition of the nervous system, such as epilepsy, St. Vitus' dance, paralysis, rheumatism, sciatica, heart troubles, anaemia, etc. These pills are also a cure for the ailments that make the lives of so many women a constant misery. Sold by all druggists or sent by mail, post paid, at 50 cents box, or six boxes for $2.50, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

MARKETS.

WHEAT—During the past week it has seemed an unusually difficult thing for traders to make up their minds as the chances of the present situation in the wheat trade. Last week trade showed itself active and markets buoyant, but in the interval between Friday and Monday there was an increase of showers over Kansas ans adjoining territory, and on Monday the speculative markets in the States felt the effects of this strongly, and a drop of 1c to 1½c took place. A more confident feeling resulted on Tuesday, but on Wednesday another bad break took place, resulting in a drop of 1c to 1¼c. Since then some renewal of confidence is evident, but in the week prices show a decline of 1c to 1½c, as compared with closing prices on Friday of last week. The rains and more favorable weather over a large area of the winter wheat in the States have imparted a somewhat more encouraging feeling as to the prospects for the crops over such area, but we think the improvement amounts rather to the saving of a portion of what was promising to be almost a lost crop had the adverse weather been continued rather than the establishing of anything that could now turn out a fairly good yield.

Manitoba wheat has been very quiet and demand extremely light. On Saturday last the value of 1 northern in store Fort William, spot or May delivery, was 75¼c, and 2 northern 73c. On Wednesday these prices were down to 74c 1 northern, and 72c 2 northern, and since then they have advanced again to 74¾c 1 northern, and 72¾c 2 northern, at which prices sales were made yesterday, although for the most part sellers were holding for 75c 1 northern, and 73c 2 northern. 1 hard is offered at 78c spot or May delivery in store Fort William without finding buyers.

FLOUR-Hungarian Patent $2.05 p?r sack of 98 pounds; Glenora, $1.90; Alberta, $1.70; Manitoba, $1.50; and XXXX, $1.20.

GROUND FEED—Demand is steady and prices remain unchanged as follows: Oat chop, per ton, $27.50; barley chop, $21.50; mixed barley barley and oats, $24.50; oatmeal feed, $11.50; oil cake, $27.

OATS—There is not very much business doing in oats just at present, as the weather is not favorable for traffic. A little demand has been experienced from the east, which has been met on a basis of 40c per bushel for No. 2 white at Fort William, the same figure as we quoted a week ago. Local dealers are also paying the same prices as a week ago for their supplies. We quote: No. 1 white, in carlots on track, Winnipeg, per bushel, 42 to 44c; No. 2 white, 40 to 41c; feed oats, 37 to 38c; seed oats, 45 to 50c. At country points farmers are getting 28 to 30c for No. 2 white oats. Street oats are not offering.

BARLEY—Receipts are very light, and the market holds firm at 40 to 42c for malting grades, and 38 to 40c for feed.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

HAY—Receipts are light, and the market is $1 higher at $8 to $9 per ton for fresh baled. Loose hay is not offering to any extent.

POULTRY—There is very little poultry in the market. Chickens are worth 12½c per pound for fresh killed, and turkeys 12½c to 15c, according to quality.

BUTTER—Creamery— Two of the country factories commenced operations this week but so far have shipped no butter. The weather is not favorable for pasture or traffic consequently milk gathering will be a slow process until it gets drier. Commission houses are quoting 21c to 22c per pound for choice creamery butter in tubs or rolls, while other grades range down to 16c for round lots.

BUTTER—Dairy—Receipts of dairy butter are very light. Oldest traders here say they cannot remember the market being so light of stocks. As high as 20c could be obtained on a commission basis for fresh made choice butter.

EGGS—Supplies are light and the market holds firm at 9½ to 10c per dozen for fresh case eggs at country points.

CATTLE—Some cattle have already been shipped east to meet the excellent export demand. Butchers are finding cattle very scarce and hard to obtain. For choice beef animals they are now paying as high as 5c per pound off cars here. The general range of prices is from 4½c to 5c. There is a good demand for stockers, and the westward movement of these is now quite heavy. Yearlings are worth as high as $16 per head at point of shipment. Two year olds are bringing from $20 to $22.

HOGS—Hogs are in very light supply, and hold firm at 6¼c per pound for best packing weights, off cars here.

MILCH COWS— Cows are very scarce, and good milkers readily bring $45 each in this market. As most of the stock offerings are poor, they bring less money, the range being from $35 to $45.

HORRIBLE PAINS

FRENCH GENTLEMAN'S SUFFERINGS ARE BEYOND DESCRIPTION.

Many Doctors Treated him, but without Success—Dodd's Kidney Pills Cured Him and now Life is a pleasure to him—He Tells the Story.

St. Urbain, Que., April 21— (Special.)—Fearful indeed has been the experience of Narcisse Barrette, of this place. For fifteen long and wearisome years he has suffered with an acute malady of the kidneys and back which has caused him the most agonizing pains.

He consulted physician after physician and followed their treatment patiently and carefully. Some of them afforded him a little temporary relief (which was in itself a great blessing), but the pain always came back to torture him even worse than before.

Rhenmatism added its terrors to his already great burden of misery and his life was a succession of spasms of the most violent pains it has ever been the lot of mortal man to endure.

The story as told by Mons. Barrette himself is in part as follows:

"For more than fifteen years I suffered with a severe Malady of the back and Kidneys which caused me horrible pains in the back.

"I tried many doctors, but the relief they gave me was only temporary and the Malady always returned. My suffering was so great at times that it was almost beyond endurance.

"I had rheumatism as well as the pains in the back, and between them I was sorely tried. I would rather die than suffer again the way I did, but now life is very pleasant to me and I am anxious to live.

"You ask me how I was cured ?

"Well, after trying in vain doctor's treatments and almost everything else, I began to use what has been to me the greatest medicine in all the world, Dodd's Kidney Pills, and very soon the pains all left me. They acted almost like magic. I am now in perfect health and work every day."

Nearly every man actually believes that other men are interested in his troubles.

Minard's Liniment Cures Distemper.

A tombstone marks the dividing line between here and there.

Whenever you hear a girl refer to a man as an idiot, she is in love with nim, and he is in love with some other girl.

DYSPEPSIA AND INDIGESTION—C. W. Snow & Co., Syracuse, N. Y., write: "Please send us ten gross of pills. We are selling more of Parmelee's Pills than any other pill we keep. They have a great reputation for the cure of Dyspepsia and Liver Complaint." Mr. Charles A. Smith, Lindsay, writes: "Parmelee's Pills are an excellent medicine. My sister has been troubled with severe headache, but these pills have cured her."

Some men are not content with being treated well; they want to be treated often.

Pleasant as syrup; nothing equals it as a worm medicine: the name is Mother Graves' Worm Exterminator. The greatest worm exterminator of the age.

Mrs. Tom Thumb is still alive at the age of sixty. She was born at Middleborough, Massachusetts, and her maiden name was Miss Bump.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, MAY 17, 1902.

TIME FOR ACTION.

Although the demise of the Dunsmuir Government has been predicted from day to day for the past few weeks, its members continue, as the result of one cabal upon another, and the application of pressure of all kinds, to keep a sufficient number of the members of the Legislature in line to give them a bare majority in the House. This sort of thing cannot go on forever. There is a limit to the resources of intrigue, and although the time may be deferred for a brief period, the end of Dunsmuirism may be fairly said to be in sight. This brings the province face to face with another general election, since, with the representation rearranged, it is scarcely likely that any one would have the hardihood to attempt to form a government from a house made up of members who were returned upon the old arrangement of constituencies, which has been wiped out by the recent redistribution bill. It therefore behooves the electors of the new district of Fernie to cast about in search of a man who would represent them creditably in the next Legislature. In the choice of the representative, due regard should be paid to the growing importance of the district which he is to represent. It does not require the gift of prescience to see that the Fernie district is destined to be one of the most important in the Province, if indeed it does not become the most important, It is distinctively a coal mining district and fuel is now recognized as the basis of industrial development, and Fernie, from being an insignificant point in the province, is destined to be the point from which the development of the whole of southern British Columbia will radiate. Were it not for the cheap fuel supplies which the coal measures of Fernie provide, of what value to-day would be the immense bodies of low grade ore of the boundary? This is but one instance of Fernie's importance, but it is one which will be greatly emphasized as the developement of the province proceeds, as Fernie in a measure must determine the value of the low grade ores which require local treatment, aud distance from Fernie be one of the chief considerations in the fixing of smelting points for its reduction. Having then some conception of the importance of the district, and exercising due regard for its chief industry. does it not follow that it would stand the district in hand, to secure if possible a man who has a good knowledge of mining and its requirements, who by reason of such knowledge and the important part which mining is destined to play in the development of the province, would command the ear of the government whoever might compose it? Care should be taken to secure a man who would not be antagonistic to any of the great factors which must be reckoned with in the material growth of the district. The welfare of Fernie requires that its representative in the legislature shall not be a man who is antagonistic to the coal company, nor one who is likely to be antagonistic to the Canadian Pacific Railway company. A man who could act as a buffer between the two would be of much greater assistance to Fernie. The interests of the two companies have clashed in the past, and they may clash again in the future, but the fact should not be lost sight of that they are both necessary to the prosperity of Fernie. Fernie without either of them would not be counted as worth more than a white chip, and requiring them Fernie might better, if possible, retain their good will. So far as the divisions in the next legislature go, the indications are that there will be three parties, the remnants of the present government, the successors of the present opposition, and a middle-of-the-road or labor party. What affiliation can Fernie have with either of these? Why should it tie its fortunes up with the success or failure of any of them? Why not cut loose from all three and send a man to Victoria who will stand for Fernie first, last and all the time? It can be done if tne people of Fernie will place the interests of their district above the interests of the little ward politicians who would divide them. If they mean to do it, the time is ripe for action before the cleavage has been started along political lines. Electors of Fernie, the issue is up to you.

EDITORIAL NOTES.

It is Fernie's misfortune thst Joseph Martin and the management of the Crows Nest Pass Coal Company cannot see eye-to-eye This is particularly so at the present time, when there is before the provincial legislature a bill which seeks to validate the agreement arrived at between the governmenl and the coal company with respect to Fernie realty. The friends of Joseph cannot dispose of the question by saying that it is the coal company and not the people of Fernie that the idol is fighting, for while it can be truthfully said that no matter how much the coal company may be called upon to pay for the government interest in the Fernie townsite disposed of by it, no charge is effected in the position of Fernie's merchants who hold the company's agreements for sale, it does not by any mean follow that advantage may not be taken by the management of the coal company, of the fight that is being made against it, to delay the issuance of title. It is one thing to know that title to property cannot be indefinitely withheld, but it is quite another thing to have the title safe in your owu possession. And, at the present juncture, when the people of Fernie are more or less keen upon the subject of incorporation, the possession of title to property becomes an object of first importance, since it is the registered owners of property rather than the actual owners whose voice is taken upon the question aye or nay for incorporation. For these reasons it must be admitted that Joseph Martin in the present instance is fighting not only the coal company but the people of Fernie as well, and such local admirers as Joseph may have would do him a service to pass the word along to him, since with an election impending it is not at all likely that Joseph is anxious to wage war with electors needlessly.

As nearly as can be learned no steps have been taken by the attorney-general's department in the matter of the appointment of a commission to enquire into the charges preferred against the Fernie justiciary, nor is it likely that any such enquiry will be ordered, as it is said there was no foundation for the very veiled insinuations against the integrity of the local justiciary which were contained in the clause of the Nelson grand jury's presentment asking for an immediate enquiry. While it affords the FREE PRESS pleasure to be able to announce that the official conduct of Fernie's citizens who are charged with the administration of justice is above reproach, it nevertheless remains a matter for regret that responsibility should sit so lightly upon the shoulders of the men who composed the Nelson grand jury that, without the fullest consideration, they should have cast aspersions upon the character of officials who have no means of securing redress. Now that grand jurors are paid for their services there is no longer any excuse for the scamping of their work, and, in any event, the good name of their fellow citizens should at least receive as much consideration at their hands as the lesser matter of their own convenience. There is a danger in the precedent that lends the least color to the suspicion that the grand jury can be made a school for scandal, rather than the bulwark of freedom.

The following communication from T. C. Smith, M P.P., for South East Kootenay, showing the total number of votes polled for the government and the opposition candidates at the last election, is interesting :

OPPOSITION.

PRODUCE STORE

LOCAL AND GENERAL.

D. Walmsley returned on Monday from a trip to Toronto.

It will pay you to read Mr. A. H. Cree's advertisement this week.

The Fernie band has been engaged to play at Elko on May 24th.

Call and inspect the Karn pianos at Watson's office.

It has not yet been decided where the Fernie baseball team will go on Victoria day, but Mr. Tuttle, the manager, is trying to get a game on with Elko.

Messrs. Finnelly and Martin have sold out their interest in the Fernie Cartage Co. to Messrs. O. N. Ross, W. Scott and D. Donaldson.

Socialists to Organize

A meeting for the formation of a socialistic club will be held in the back room of the public reading rooms, on Sunday afternoon from two o'clock until six. All interested should attend.

Will go to Cranbrook

At a meeting of the Fernie Football Club, on Thursday evening of this week, it was decided that the team should go to Cranbrook, on May 24th. The Lethbridge team are also scheduled to play in Cranbrook on that day.

Another Wrestling Contest

Frank Unfriend, the German strong boy, of Rossland, B. C., will wrestle with John Rogers, the champion middleweight of the Dakotas, in Princess hall. on Monday, May 19th, at 9 p.m. Both men have good reputations and ar interesting and exciting contest is expected.

Saved by a Dog

Little Willie Sheers, of the village at the mines, had a narrow escape from drowning on Wednesday of this week. He was playing near Coal Creek and tumbled in. The current was rapidly bearing the little fellow away when a large dog, which had been playing with the lad, sprang into the stream to the rescue and pulled the lad out on shore.

The St. Eugene

The financial statement of the St. Eugene Consolidated for the last fiscal year, ending September 30th last has been published. It is interesting in that it shows that although the St. Eugene mine has been closed down for some time its operations to date, even with the prevailing low price of lead, have been fairly successful. During the period covered by the report there was shipped from the property 20,020 tons of ore of an aggregate value of $556,040.11, or an average value per ton for the year's shipments of $27.77.

Died at Sebringville

News of the death of Mrs. J L. Kastner, of Sebringville, Ont., reached here this week. The sad event took place on the 6th inst., and Mrs. Bricker and M. Kastner, who left on the 5th, only arrived home in time for the funeral, which took place on Saturday, The deceased who was forty-nine years of age, leaves a husband and a family of five to mourn her loss. The bereaved ones are:—Alex. Kastner, of Prescott, Ariz.; Mrs. Dr. Parker, Bruce Mines, Ont.; Herbert Kastner, Wingham, Ont.; Mrs. J. H Bricker and Milton Kastner, of Fernie.

Do not fail to read the advertisement of Mr. A. H. Cree this week.

Pirates of Penzance

The Pincher Creek Amateur Dramatic Co. will put on Gilbert & Sullivan's comic opera, "Pirates of Penzance," on Tuesday and Wednesday evening next in Princess hall. The Pincher Creek people intend to put up a first class performance. They played three nights in their own town to crowded houses and scored a great success. The company is composed of forty people, under the management of Wm. MacKenzie. As most of those who take part in the entertainment are well-known in Fernie, they will doubtless draw a large audience. Mr. L. Staebler has been engaged to officiate at the piano and will accompany them on their trip to Nelson.

Cranbrook will Celebrate the 24th

The beautiful grounds of the Cranbrook Turf and Athletic Association will present a busy and lively aspect on that date, judging from the reports of arrangements for the days sport. There will be a Lacrosse match, Lethbridge vs. Cranbrook, the first of the series to be played for the Levasseur cup. We feel sure that this will prove a very interesting feature. There will also be a football match, horse racing, athlethic sports, 100 yds dash, ¼ mile dash, 30 yds. potatoe race, 220 yds. obstacle race, 1 mile relay race, 75 yds boys race, 16 lb shot put, pole vault, standing broad jump, running broad jump, running high jump, tug-of-war, Cranbrook vs. all comer. Handsome and useful 1st and 2nd prizes are offered for these events. Cranbrook is enterprising and deserves hearty support,

WANTED—At once, a first-class dressmaker. Apply to Miss Neil.

Mrs. Geddes, of Elko, is visiting friends in Fernie.

Dr. Barber is now at his office over Mr. Liphardt's jewellery store. x

Walker Kendall, of Toronto, spent several days in town this week looking up old friends.

The river has been higher this week than it has been for years and fears were entertained for the safety of the bridge.

The B. C. Permanent has, up to date, received 26 applications for loans from Fernie citizens aggregating $28,000. It has 400,000 to loan this year.

The Coal Company's new store at the mines will open on Monday next. The business will only be conducted on a small scale as the building in only 30x60.

The machinery for the new saw mill near Lizard Creek has arrived and is being rapidly installed. Those interested in the new mill are Messrs. H. A. Kanouse, H. Lever and H. Bentley. The plant is to be an extensive one and will have a capacity of 40,000 feet a day.

The new Methodist Parsonage will be opened by an "At Home" given by the ladies of the congregation Thursday evening, May 22nd, at 8 o'clock Supper will be served during the evening. Admission 25 cents. A very cordial invitation is extended to all.

DATES FIXED FOR SITTING OF COMMISSION

Mr. Justice Martin on Monday administered the oath to W. H. Bullock-Webster as commissioner in the inquiry which has been ordered into the manner in which the Liquor License Act has been administrated in the Fort Steele district. The first sitting of the commission will be held at Moyie on the 26th, at Elko on the 27th, Fernie on 29th, Cranbrook on 31st, Marysville on June 2nd, Kimberley on June 4th, and Fort Steele 5th.

MARRIED

ADSHADE-FALCONER—At the Manse, Fernie, B. C., on the 8th, inst., by the Rev. D. L. Gordon, Geo. Adshade, to Miss Margaret Falconer, both of Fernie.

MORRISSEY.

Two hoboes paid Morrissey a visit on Sunday last soliciting money from householders on the plea that they were disabled miners. The local constable arrested one but the other got away.

Fred Stork, Fernie, paid the town a visit on Tuesday last.

It is rumored the C. P. R. intend to move the depot now at the old Morrissey siding to the junction 2 miles east. This if it is effected will cause considerable trouble to contractors and hotel men over the river. With the progress of construction however the hotels will be the only ones inconvenienced.

H. Browley, contractor, arrived here on Saturday last to commence work on 75 more houses for the coal company. He will have a force of about 50 men working to rush the work on.

Mrs. W. F. Tranter who was very ill is recovering under the care of Dr. W. H. Wilson.

A party of men arrived here on Monday last and are busily engaged cutting a road to an extensive coal prospect of the C.P.R. The new property lies eight miles south of the C.P.R. property which was closed last fall.

Bert Manning is in Morrissey from Coal Creek mines, he is putting in new machinery at the mines here

It is the intention of the local politicians to organize a Liberal Association here this week. As the Liberals here are very strong a good attendance is expected.

Constable Tranter was in Fernie on Thursday.

The new machine shop and powerhouse of the coal company are about completed, two huge smoke stacks were erected on Tuesday and it is only a matter of time when the carbon will be belching forth at full swing.

CHAPTER I.

MY AMERICAN MILLIONS.

IT WAS the middle of the night (as I thought) when Savory—my man, my landlord, valet and general factotum—came in and woke me. He gave me a letter, saying simply, "The gentleman's a-waiting, sir," and I read it twice, without understanding it in the very least.

Could it be a hoax? To satisfy myself I sat up in bed, rubbed my astonished and still half sleepy eyes and read it again. It ran as follows:

GRAY & QUINLAN, SOLICITORS.
101 LINCOLN'S INN, July 11, 189—.

Dear Sir—It is our pleasing duty to inform you, at the request of our New York agents, Messrs. Smiddy & Dann of 57 Chambers street, New York city, that they have now definitely and conclusively established your claim as the sole surviving relative and general heir-at-law of their late esteemed client, Mr. Aretas McFaught of Church place and Fifth avenue, New York.

As the amount of your inheritance is very considerable and is estimated approximately at between $14,000,000 and $15,000,000, say three millions of sterling money, we have thought it right to apprise you of your good fortune without delay. Our Mr. Richard Quinlan will hand you this letter in person and will be pleased to take your instructions. We are, sir, your obedient servants,

GRAY & QUINLAN.

Captain William Aretas Wood, D. S. O., 21 Clarges Street, Piccadilly.

"Here, Savory. Who brought this? Do you say he is waiting? I'll see him in half a minute." And, sluicing my head in cold water, I put on a favorite old dressing gown and passed into the next room, followed by Roy, my precious golden collie, who began at once to sniff suspiciously at my visitor's legs.

I found there a prim, little, old-young gentleman, who scanned me curiously through his gold rimmed pince nez. Although, no doubt, greatly surprised—for he did not quite expect to see an archmillionaire in an old ulster with a ragged collar of catskin, with damp, unkempt locks and unshorn chin at that time of day—he addressed me with much formality and respect.

"I must apologize for this intrusion, Captain Wood—you are Captain Wood?"

"Undoubtedly."

"I am Mr. Quinlan, very much at your service. Pardon me—is this your dog? Is he quite to be trusted?"

"Perfectly, if you don't speak to him. Lie down, Roy! I fear I am very late—a ball last night. Do you ever go to balls, Mr. Quinlan?"

"Not often, Captain Wood. But if I have come too early I can call later on."

"By no means. I am dying to hear more. But, first of all, this letter. It's all bona fide, I suppose?"

"Without question. It is from our firm. There can be no possible mistake. We have made it our business to verify all the facts—indeed, this is not the first we had heard of the affair—but we did not think it right to speak to you too soon. This morning, however, the mail has brought a full acknowledgment of your claims, so we came on at once to see you."

"How did you find me out, pray?"

"We have had our eye on you for some time past, Captain Wood," said the little lawyer smilingly. "While we were inquiring—you understand—we were anxious to do the best for you"—

"I'm sure I'm infinitely obliged to you. But still I can't believe it, quite. I should like to be convinced of the reality of my good luck. You see, I haven't thoroughly taken it in."

"Read this letter from our New York agents, Captain Wood. It gives more details," and he handed me a typewritten communication on two quarto sheets of tissue paper; also a number of cuttings from the New York press.

The early part of the letter referred to the search and discovery of the heir-at-law (myself) and stated frankly that there could be no sort of doubt that my case was clear and that they would be pleased, when called upon, to put me in full possession of my estate.

From that they passed on to a brief enumeration of the assets, which comprised real estate in town lots, lands, houses, stocks, shares, well placed investments of all kinds, part ownership of a lucrative "road," or railway; the controlling power in shipping companies, coal companies, cable companies, and mining companies in all parts of the United States.

"It will be seen that the estate is of some magnitude," wrote Messrs. Smiddy & Dann, "and we earnestly hope that Captain William A. Wood will take an early opportunity of coming over to look into things for himself. We shall then be ready to give a full account of our stewardship and to explain any details.

"Meanwhile, to meet any small immediate needs, we have thought it advisable to remit a first bill of exchange for $50,000—say £10,217 17s. 6d., at current rates—negotiable at sight and duly charged by us to the estate."

"The last part of the letter is convincing enough," I said with a little laugh, as I returned it to Mr. Quinlan. "Always supposing that it is real money and will not turn to withered leaves."

"How would you like it paid, Captain Wood? Into your bankers?"

"If you please. Messrs. Sykes & Sarsfield, the army agents, of Pall Mall."

"It shall be done at once. I will call there, if you will permit me, on way back to Lincoln's Inn. Is there anything more? As to your affairs generally. If you have no other lawyers, we are supposed to be good men of business and perhaps—of course we advance no claims—you may consider that we have served you well already and may intrust us further with your confidence."

"My dear sir, I fully and freely admit your claims. I should be most ungrateful if I did not. Pray consider yourselves installed as my confidential legal advisers from this time forth."

"Thank you sincerely, Captain Wood. I can only express a hope that as our acquaintance grows you will have no reason to regret this decision. I will now—unless you have any further commands—wish you a very good morning."

With a stiff, studied bow he bent before me and was gone. He left me a prey to many emotions—surprise, bewilderment still predominating, but withal a sense of pleasurable excitement.

It was indeed a change, a revolution in my affairs. Hitherto, like most men of my cloth, I had been constantly hard up; of late, all but in "Queer street," for I had yielded only too readily to the fascinations of London. After many years of service abroad, this spell at home, in the heart and center of life, was enough to turn any one's head. I was now on the headquarters staff, with an appointment in the intelligence department, and I found people were very kind; shoals of invitations came in, and I accepted everything—balls, dinners, routs. I went everywhere on the chance of meeting Frida Fairholme, at whose feet I had fallen the very first day we met. I worked hard at the office, but I played hard, too, making the most of my time, of my means, which, unhappily, did not go far. Four or five hundred a year is not exactly affluence for a careless young soldier, with a war office appointment, aping the ways of a finished man about town. Gloves, buttonholes and cab fares swallowed up half of it, and with the other half I had hardly been able to keep out of debt.

That, at least, and without looking further, was all over now.

Savory had suffered more than once from the narrowness of my budget, but he had been very good and patient, and I was glad to think he would be the first to benefit by my good fortune.

"Would you like your money?" I asked as I buttoned up my coat and made ready to start for the office, a little late in the day.

"Well, sir, I am rather pressed. The quarter's rent is overdue, and the landlord called twice yesterday. If you could make it convenient"—

"How much do I owe you?"

"Seventeen pounds eleven for the rooms, and Mrs. Savory's bill is £9."

I had taken out my checkbook while he spoke and wrote him a check for £50.

[TO BE CONTINUED.]

An Old Story.

Castleton—Willie, for a younger brother you don't seem to have much curiosity about your sister and myself.

Willie—No. I did when the fellows first came, but now I guess I've seen all there is to be seen.

His Offense.

The Missionary—My friend, I am afraid that you do not realize the dreadfulness of the drink evil.

The Farmer—Why, ma'am, I never tech a drop.

The Missionary—But you raise hops.—Judge.

When we say that wisdom is better than riches, we always mean our wisdom and other people's riches.

Pride makes some people ridiculous and prevents others from being so.

A SPRING MEDICINE THAT IS A TRUE TONIC

Dr. Chase's Nerve Food Builds Blood, Creates Nerve Force, Increases Flesh and Weight, and Makes Sickly People Strong and Well.

The day of sarsasparillas, sulpher and cream of tartar, and salts as spring medicine has gone by. People are beginning to listen to the advice of their physicians and to build up their systems by the use of such preparations as Dr. Chase's Nerve Food.

The strong point in favor of this great food cure is the fact that it actually creates new, rich life-sustaining blood, and builds up the system gradually and naturally. For this reason it is the most satisfactory spring medicine that you can possibly obtain, and its results are permanently beneficial.

The tired languid feelings that tell of low vitality and an exhausted condition of the system soon disappear before the vitalizing, upbuilding influence of this great restorative. It conquers disease by filling the system with health, energy and vigor.

Mrs. S. Thompson, 240 Munro Street, Toronto, Ont., states:—I was very much run down in health, and whenever I exerted myself more than usual I had severe attacks of splitting headache, and was very nervous, so much so that I could not rest well at nights. After using Dr. Chase's Nerve Food I found that my nerves were steadier, I could rest and sleep better than I have for a long time, and was entirely free from headaches. I can speak very highly of this preparation for nervous trouble.

Dr. Chase's Nerve Food has the endorsement of the best people in the land — physicians and laymen alike. It is bound to benefit anyone who uses it, because it is composed of the most potent restoratives of nature. 50 cents a box, 6 boxes for $2.50. At all dealers, or Edmanson, Bates & Co., Toronto.

Blue Ribbon Goods.

All we can do is to pack the best goods in Canada and tell you about them.

You know how good Blue Ribbon Tea is! Well, Blue Ribbon Coffee, Baking Powder, Spices, Flavoring Extracts, Chocolate Icing and Jelly Powder are just as good as the Tea.

Every Grocer keeps Blue Ribbon goods, so all you have to do is to ask for them

Blue Ribbon Manufacturing Co.

"The sluggard will not plow by reason of the cold; therefore shall he beg in the harvest and have nothing."

Free—Gratis—For Nothing

YOU CANNOT LONG FOOL A WOMAN.

When the white man wants the black man's land he approaches the innocent black with "presents" of beads, colored cloths, ribbons, and other useless trinkets that catch the eye of the poor black—but that are no earthly use to him. These are all "gifts—free—gratis—for nothing! ! !" We all know who soon owns the black man's land.

Yet this system of conciliating the innocent is not practiced alone on the negro. How many women read that they can get a certain "present" with a certain purchase and forthwith they make the purchase to get the "present"—free—gratis—for nothing! ! ! The present may or may not be useful—but in this twentieth century are there those who believe they have not in the purchase paid for and often dearly paid for the "present"?

When you want a horse you cannot buy his teeth at ten cents a tooth, and get the horse thrown into the bargain.

When you buy a dress you do not buy the buttons, and have the dress thrown in.

And no more than you can thus get the present of a horse or a dress can you get a "present"—free—gratis—for nothing—of diamonds, gold, jewellery, and cutlery, with the purchase of a bar of common soap.

When you buy Sunlight Soap you are presented with pure quality in the soap itself. You do not pay for loading refuse at the price of soap. You don't wear out your clothes in half the time, and ruin your hands with Sunlight Soap, as with common soap.

If you want soap, buy Sunlight Soap—Octagon Bar—and you have paid for nothing but pure soap. If you want something else than soap, buy it independently of the soap, and you know what it has cost you.

"You may fool some people all the time;
You may fool all the people some of the time.
You cannot fool all the people all the time;"
You cannot long fool a woman. 615

Our enemies come nearer the truth in the opinions they form of us than we do in our opinion of ourselves.

Piles To prove to you that Dr. Chase's Ointment is a certain and absolute cure for each and every form of itching, bleeding and protruding piles, the manufacturers have guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get your money back if not cured. 60c a box, all dealers or EDMANSON, BATES & CO., Toronto.

Dr. Chase's Ointment

The extreme delight we take in talking of ourselves should warn us that it is not shared by those who listen.

95 out of every 100 lbs. of platinum used in the world comes from the Ural Mountains. The mines there produce about 13,000 lbs. per year of the metal.

Eau-de-Cologne is said to contain the essential oils of bergamot, neroli, rosemary, citron, and orange, together with a small amount of cardamons.

The first export of raw cotton from America to England was in 1785, when one bale was sent from Charlestown to Liverpool.

Shipbuilding yards have increased in number from 500 in 1880 to 700 at present. Their output is nearly 1,100 vessels per year.

BABY'S OWN TABLETS.

Mother's Best Help When Her Little Ones Are Ailing

Every mother needs at some time a medicine for her little ones, and Baby's Own Tablets are the best medicine in the world for constipation, sour stomach, indigestion, diarrhoea, colic, simple fevers and the troubles of teething children. The Tablets have been in use for years and thousands of mothers say that nothing else acts so quickly and relieves and cures the little ones like it Mrs. G. H. LaRue, Mountain, Ont., simply voices the experience of other mothers when she says—"I can recommend Baby's Own Tablets to all mothers who have cross or delicate children. I do not know how I could get along without them."

Children take these Tablets as readily as candy, and if crushed to a powder they can be given with absolute safety to the tiniest, weakest babies. There is a cure in every Tablet and they are guaranteed to contain no opiate or other harmful drug. You can get the Tablets from any dealer in medicine or they will be sent post paid at 25 cents a box by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

The thoughtful man provides for his loved ones. It is the unthinking man who waits until it is too late.

Among London's taverns are seven "Adam and Eves," five "Noah's Arks," and two "Jacob Wells."

CONSUMPTION Prevented and Cured.

Four marvelous free remedies for all sufferers reading this paper. New cure for Tuberculosis, Consumption, Weak Lungs, Catarrh, and a rundown system.

FREE.

Do you cough?
Do your lungs pain you?
Is your throat sore and inflamed?
Do you spit up phlegm?
Does your head ache?
Is your appetite bad?
Are your lungs delicate?
Are you losing flesh?
Are you pale and thin?
Do you lack stamina?

These symptoms are proof that you have in your body the seeds of the most dangerous malady that has ever devastated the earth—consumption.

You are invited to test what this system will do for you, if you are sick, by writing for a

FREE TRIAL TREATMENT

and the Four Free Preparations will be forwarded you at once, with complete directions for use.

The Slocum System is a positive cure for Consumption, that most insidious disease, and for all Lung Troubles and Disorders, complicated by Loss of Flesh, Coughs, Catarrh, Asthma, Bronchitis and Heart Troubles.

Simply write to the T. A. Slocum Chemical Company, Limited, 179 King Street West, Toronto, giving post office and express address, and the free medicine (the Slocum Cure) will be promptly sent.

Persons in Canada seeing Slocum's free offer in American papers will please send for samples to Toronto. Mention this paper.

Horse Health

is one of the most important things for every farmer to consider.

Dick's Blood Purifier

will build up a run down horse.

It tones up the system, rids stomach of bots, worms and other parasites which undermine an animal's health.

ARE GREAT FIGHTERS

SO SAYS COL. CAMERON, WHO COMMANDED CANADIANS AT KLIENHART'S RIVER.

A FULL ACCOUNT OF THE BATTLE ON EASTER SUNDAY.

Montreal, May 7.—A letter has been received in the city from Lieut.-Col. Cameron, D.S.O., of the Canadian Mounted Rifles, written the day after the fight at Klienhart's River, in which the Canadians so distinguished themselves. He says:

"Easter Sunday morning, about 3 o'clock, we left Hardtnelfontein with 2,000 mounted men. We covered fully thirty miles before coming into contact with the enemy, who numbered over 3,000. We gave chase for at least ten miles more to where we expected to camp for the night, a point we reached about 3 o'clock in the afternoon. We had hardly taken off our saddles before the enemy was seen surrounding our camp at a distance of 2,000 yards, completely hemming us in. Two troops of one of my squadrons (I was in command of three) had not yet come into camp and were cut off by the Boers and lost heavily. They fought viciously with only the bladed grass as shelter. Their courage was of the veritable bull-dog type, and under no circumstances could they be compelled to surrender. They held their ground until almost every man had been killed or wounded. We fought hard for two hours and managed at last to beat off the Boers, who greatly outnumbered us. Our men at once began extending themselves, fearing a night attack, and they did their work so well that no living force could have dislodged them from the position they held.

"The British lost in the engagement was about 150 killed and wounded, while the Boers, it is estimated, lost over 300. Our green men did splendid work and proved themselves to be wonderfullyadapted for the condition under which the battle was fought. About twelve Canadians were killed and forty wounded. George McKay was hit three times, in the leg, arm and hand, but the wounds are not serious. I am the only Royal Scots officer out of the hospital. Allan and Gault are both ill, not seriously. Young Howard, of Montreal, was severely wounded, but I think the poor chap will recover. We have plenty of work and I am feeling first class, although I have lost twenty pounds since leaving Montreal.

"As a veteran of the early stages of the war, I can say that in severity, in the number of skirmishes, and in privations the campaign I am now passing through greatly exceeds my past experience."

KITCHENER'S REPORT.

London, May 7.—Lord Kitchener's weekly report, dated from Pretoria, shows that the peace movement is not allowed to interfere with the military operations, except so far as to permit of unrestrained meetings between the leaders and their various commands.

The week's Boer casualties were 10 men killed and 122 made prisoners. General Bruce Hamilton's column captured 87 men on the Heilbron, (Orange River Colony), line. Colonel Colenbrander has resumed operations in the northern part of the Transvaal against Commander Beyers, whose forces have been considerably reduced, and General Ian Hamilton has cleared a large area west of Klerksdorp, Southwestern Transvaal.

The O'Okiep, Western Cape Colony, relief column, has occupied Steinhoph to the north of O'Okiep, which was strongly held by the Boers, after fighting April 27 and 28. The British lost six men killed and had eight men wounded. The Boer losses are said to have been heavy. The Boers asked for British medical assistance.

PEACE NEGOTIATIONS.

Pretoria, May 7.—The peace situation is developing satisfactorily. According to reliable information which has reached here, several of the nearer commandoes have received the burgher delegates in an amicable spirit. It is understood that Commandant Beyers has announced his willingness to abide by the decision reached by the Transvaal government. Considerable opposition to the peace movement, however, is growing up about the irreconcilableness of Gen. Delarey's force.

A HORRIBLE DEATH.

Harrisburg, Pa., May 7.—Four men were villed, two were fatally injured and two others were terribly burned by being in a torrent of molten metal in an open hearth pit at the Pennsylvania Steel Works at Steelton, near here.

In one year 25 cubic yards of the granite pavement of London Bridge is reduced to powder by the enormous traffic. 20,000 vehicles cross daily, and 200,000 foot passengers.

DROWNED IN THE OTTAWA.

Minnie and Fanny Fitzpatrick Lose Their Lives in the Paquette Rapids.

Pembroke, Ont., May 6.—John Fitzpatrick, his wife and two sisters, Minnie and Fanny, were crossing the Ottawa in a tow boat from Allumette Island for Westmeath yesterday. When near Paquette Rapids, and about ten feet from the shore, Mrs. Fitzpatrick, being frightened, jumped out of the boat, her husband following to save her, and the two reached the shore in safety.

In the meantime the boat with the two girls drifted out into the rapids and upset, and qoth occupants were drowned. The bodies have not yet been recovered. The girls are daughters of Thomas Fitzpatrick, and aged 22 and 17 respectively.

CANADIAN DIVORCES.

The Subject Warmly Discussed in the House of Commons.

Ottawa, May 6.—In the House of Commons yesterday, on the third reading of the bill to grant a divorce to James Brown, of Penatenguishene, Mr. Charlton entered his protest against the present system of granting divorces. If divorces were to be granted they should be obtained in a regularly constituted divorce court.

Mr. Ross (Victoria) said that the present system of divorce was a disgrace to the Dominion. In Nova Scotia divorces were granted by a judge of the supreme court and not one word of the proceedings were published in the press. Under the Dominion system a mass of literature finds its way to the public which ought not to be distributed. He remembered a case from Hamilton, which was before the senate divorce committee. The applicant was not able to get his case through because there was amember of parliament who was a relative of the woman who had sufficient influence to prevent it. The applicant for the divorce had to come to Ottawa a second time and he got it then, meantime the member who opposed him having died. Poor People were unable to get divorce. The system required amendment.

CANNOT ADMIT OUR CATTLE.

Hon. R. W. Hanbury States British Restriction Will Not Be Removed.

London, May 6.—In arguing a question in the House of Commons to-day suggesting the desirability of augumenting the food supply, in view of the present prospective short supplies of beef, the president of the board of agriculture, Mr. R. W. Hanbury, said that the government could not remove the restrictions placed on the importation of Canadian cattle. But possibly Argentine beasts might be admitted on the same conditions as cattle from the United States. Mr. Hanbury added that he was awaiting information on the subject from the Argentine government.

LOOKS LIKE SUICIDE.

Toronto, May 6.—Arthur Sweatman, eldest son of Bishop Sweatman, was struck and instantly killed by a Grand Trunk train due in Toronto at 12.25 to-day. The fatality occurred near Mimico—just at the entrance to High Park. The young man was apparently attempting to cross the track in front of the train coming from the park. The train was stopped and the body picked up. In one of the pockets of his clothing was found a card giving his name and address, 86 Howland avenue.

CHAMPIONS DEFEATED.

London, Eng., May 6.—Toronto lacrosse team defeated Stockport team by five to one this afternoon. The Stockport team were champions of England. The match was witnessed by a large crowd but the victory was an easy one.

QUEBEC FARMER KILLED.

St. Cyrille, Que., May 6.—An accident happened at Carmel station yesterday in which a farmer named Lafond lost his life. Lafond was driving and while passing the crossing his horse took fright at the train, and in trying to stop him the reins broke. Lafond tried to get hold of them, but in doing so he fell under the wheels of his carriage, and was killed almost immediately.

Engineer Edward McGuire was badly scalded at Rat Portage. It appears that the plug blew out of the boiler of the engine and McGuire thought the fireman was being scalded and went to his rescue, and received the above mentioned injuries.

The opponents of the beef trust are arranging to utilize the Canadian-Australian steamers to their full capacity for importing Auatralian beef and mutton to fight the packers-combine.

HORRIBLE TORTURES

APPLICATION OF THE WATER CURE BY AMERICANS IN THE PHILIPPINES.

EVIDENCE OF A VOLUNTEER BEFORE THE SENATE COMITTEE AT WASHINGTON.

Washington, May 4.—L. E. Hallock, of Boston, Mass., formerly a sergeant and then a private in Company I, Twenty-Sixth infantry, testified to-day before the senate committee on the Philippines, concerning the practice of the water cure in the Philippines. Mr. Hallock told of the infliction of the cure upon a dozen natives at the town of Leon, province of Panay.

He said they were captured and tortured in order to secure information of the murder of Private O'Herne, of Company I, who not only had been killed but roasted, and otherwise tortured before death ensued. Captain Glenn, in charge of a scouting party, had first secured a confession of participation in this crime from one native who implicated twelve others. These were taken to Leon, the witness said, where his Company was stationed, under the command of Captain Grogg, and there on August 21 and 23 the cure was administered. Members of Company I, he said, were ordered to do this by a sergeant named Manning, who is now in Boston. Hallock said that he witnessed the torture, but did not take part in it.

"Did Captain Grogg know of the torture?" asked Senator Rawlins.

"All the command knew it, and I don't see how he could have helped knowing it."

"What was the effect of the punishment?"

"The stomach would swell up and in some cases I noticed blood coming from the mouth."

When asked what became of the prisoners to whom the cure was administered he replied that they were placed in a guard house twenty by twenty-five feet in size in which there was one window and in which at the time there were eighteen men confined. The twelve prisoners were kept for four or five months and then they tried to escape. The effort was successful on the part of some of them but five or six fleeing prisoners were shot and killed.

"Were all the prisoners who did not escape killed?"

"I think not, with one exception; I think one was given his freedom."

Mr. Hallock also stated that he had been present when a village of 3,000 or 4,000 had been burned and that the occupants of the houses had not time to carry out the furniture.

Senator Lodge brought out the details of the murder of Private O'Herne. The witness said that in June, 1900, O'Herne, with two other men of the company, was sent to Iloilo for mail, and on their return on June 30 they were ambushed by 100 natives and O'Herne's companions were captured. O'Herne made a dash to get away and after escaping from the attacking party fell in with other natives supposed to be friendly. Instead of proving to be so they had devoted the entire next day to his torture and death, beginning at daylight by cutting him with bolos and then roasting him all day by a slow fire, not finishing up until night.

All these details, the witness said, were gathered from the confessions of the men who had received the cure

Answering other questions he said that he had not known anyone to die under the water cure. The prisoners were generally fed on rice and coffee, with an occasional meal of hardtack. He said they were all fat. He also said that he understood the orders were to treat the natives well.

PARE'S CAREER ENDED.

Napanee Bank Robber Died in Penitentiary on Eve of Release.

Kingston, Ont., May 4.—Pare, one of the chief conspirators in the Napanee bank robbery that created great excitement throughout the country in 1898, was released by death today in Kingston penitentiary. He would have completed his term of imprisonment of three years on Tuesday next. Pare was an old man, formerly of Montreal and Boston. His death was due to gangrene. A year ago his left leg was amputated. Several months ago an old disease broke out in the other leg and his constitution was too weak to stand the shock. It is said he has left a large sum of money to his sister.

250 DROWNED.

Yokohama, May 5.—Two hundred and fifty fishermen are reported to have been drowned in a gale which has made havoc of the herring fishing fleet on the west coast of Japan. The Japanese cruiser Musachi was driven ashore but her crew were saved.

The department of justice, Ottawa, has decided Salamon will hang on the 27th inst.

BRITAIN'S REPLY TO THE BOERS.

LONDON TIMES SHOWS THE LIBERALITY SHOWN TO A CONQUERED FOE.

PEACE NEGOTIATIONS NOW IN FULL SWING AND PEACE IS IN SIGHT.

London, May 13.—The Times this morning relates the course of the South African peace negotiations as follows: On the receipt of the Dutch correspondence intimating that Great Britain was ready to listen to proposals of the Boers in the field, the acting president of the Transvaal, Schalkberger, and Mr. Steyn, proposed to Lord Kitchener and Lord Milner that the republics should merely concede all the demands made by Great Britain regarding the franchise before the war.

The British government, in reply referred them to the Middleburg conference as the maxium of possible concessions and refused permission to the Boers to consult their friends in Europe. They were told it was useless to return to Pretoria without being armed with full power to negotiate.

Mail advices from Pretoria continues the Times, declare that Lord Kitchener and Lord Milner promised generous compensation for burned farms, raised no difficulty with regard to the pardon of banished leaders and gave assurances that the question of amnesty for rebels did not present insuperable difficulties.

C. P. R. ELEVATOR BURNED.

Fort William, May 13.—The whole front of the C.P.R. elevator, together with the elevating machinery and cleaners was ruined by fire. There were 100,000,000 bushels in store at the time, of which 100,000 bushels are destroyed. The fire was discovered at an early hour. The cause of the fire is believed to be a match, pipe or cigarette carelessly thrown among the wheat screenings. The boiler, engine and tanks were saved.

STRIKE AT SCRANTON, PA.

Scranton, Pa., May 13.—There will be no coal mined in the Scranton end of the anthracite region to-morrow morning. Some of the companies, however, propose to keep a few, at least, of their washeries running. The strike has already made itself felt in other lines of work. The railroads have laid off four-fifths of their coal train crews, in all about 800 men, and their shops at Dunsmore, where all the mine cars and machinery are repaired, will shut down indefinitely, beginning to-morrow, throwing 300 men out of employment.

ACCIDENT AT HAMILTON.

Hamilton, May 13— Hugh Brown, car repairer for the Grand Trunk, met with a terrible accident to-day. In crossing the track in front of cars being shunted, he slipped and fell. Some of the cars went over his feet, almost severing them. He was taken to the general hospital, where amputation was necessary. Brown is elderly and has been employed by the Grand Trunk for about 25 years.

ONTARIO FRUIT TREES FROSTED

St. Catharines, May 12.—Where yesterday everything gave promise of a bountiful crop, throughout this district, to-day all is gloom and desolation. The heavy frost of Saturday night and Sunday morning has caused almost incalculable damage to the fruit in all directions. There was six degrees of frost in the city and from eight to ten in the country For about half a mile along the lake shore peaches and grapes are not so far advanced, and will thus escape to a certain extent, but at all other points the peach and grape crops will be almost completely ruined, the buds and blossoms being well advanced; the buds on the grape vines were frozen stiff. All strawberries that were in bloom were ruined, and the loss all through the district will be very heavy. Plums and apples being somewhat harder and later have escaped. Tomatoes and other tender plants that had been set out by the thousands all through the district were also completely ruined.

Montreal, May 13.— The prohibitory association of New Brunswick received its reply this morning to its request presented some time ago asking the government for the enactment of a prohibitory law similar to that of Manitoba. The government replies that the Scott Act is in force in every county in the province except two, and so they cannot see the need for a prohibitory law such as asked.

Liverpool, May 13.—The Liverpool Journal of Commerce asserts positively that J. P. Morgan has arrived at some arrangement with the Manchester Ship Canal company.

MARTINIQUE CATASTROPHE.

OTHER TOWNS ADJACENT TO ST. PIERRE ARE REPORTED TO BE ENGULFED.

LeCARBET AND LePRECHEUR ALSO WIPED OUT—MORE NEWS OF THE DISASTER.

Fort De France, Island of Martinique, May 13.—Advices received today from the vicinity of St. Pierre (10 miles from here) contain further details of the terrible volcanic upheavals which resulted in the utter destruction of that town and the death of nearly all its inhabitants. The crater of Mont Pelee has been wearing its "smoke cap" since the third of May, but there was nothing until last Monday to indicate that there was the least danger. On that day a stream of boiling lava burst through the top of the crater, plunged into the valley of the river Blanch overwhelming the Guerin sugar works and killing 23 workmen and the son of the owner. A commission was appointed to investigate the outbreak and it returned a reassuring report on Wednesday evening.

But about 8 o'clock on Thursday morning a shower of fire rushed down on St. Pierre and the coast from LeCarget which had a population of 6,000) to LePrechaur (which had a population of 4,000) burning up everything in its path.

Hopes are raised that more of the population of St. Pierre than has been indicated in the earlier dispatch have been saved It is believed that a number of people were rescued from the stricken town by steamers running to Fort de France.

The work of clearing away the debris in the city of St. Pierre will be commenced as soon as it is possible to enter the smoking ruins. Until some semblance of order has been restored and the ruins have been partially cleared away, it has been decided by the municipal and other authorities to burn all corpses found on the streets. The authorities of Fort de France are sending all procurable necessaries for the sufferers with medical aid for the injured, the food supplies of St. Pierre being all destroyed. The cruiser Suchet is revictualling Martinique from Guadelope.

GUILTY OF MANSLAUGHTER.

Calgary, May 12.—George Scouten was found guilty of manslaughter in having shot Arthur Simpson here, in March last. Judge Maguire deferred sentence. The jury were out twenty minutes. The judge practically charged against a verdict of murder. Scouten seems to feel his situation keenly. Great interest was displayed in the trial here.

FATAL LANDSLIDE.

One Killed and Two Injured by a Landslide at Kaslo, B. C.

Vancouver, May 12.—Power's packing camp at Kaslo, was overwhelmed by a landslide on Friday. A pack train had just arrived and twenty of them were lined up and being unloaded when the slide, half a mile in length, descended. Most of the men found refuge in an old tunnel, but Douglas, a blacksmith, and two others were carried away. Two of the men were found badly injured. Douglas was killed. Property was damaged to the extent of $6,000.

TELEGRAPHIC BRIEFS.

The last ten months' Dominion revenue totalled $46,600,000.

Over 1,000 prelates attended the funeral of the late Archbishop Corrigan.

The publication of the steamship combine agreement has aroused great interest in Britain.

The railway run between New York and Chicago in 17 hours will be the fastest train in the world.

There will be no no strike of the C. P. R. machinists. The trouble in the east has been settled.

The finance committee of Montreal city council has decided to accept Andrew Carnegie's offer of a library building.

Richard King, of Hastings, Ont., was accidently drowned.

James Gowan, of North Addington, Ont., was accidently killed by a falling tree.

An inquest has been ordered into the death of Gowan Leggett, of Brantford, who was treated by Christian Scientists.

The Rossland Liberal association passed a resolution asking the government to give a bounty to lead manufactured in Canada.

Jacob Mowat, a half-breed, was struck by a train a mile and a quarter west of Beausejour, Man., and instantly killed.

THE PREACHERS' COLUMN.

Loving deeds are the best seeds; they bear in all soils.

The prayer forgive us our debts—has no reference to the collection.

The will of Christ ought to be more to you than the good will of your neighbor.

With many people the beam is no longer than the mote. This denotes an affliction of the I.

The man who says he believes there is no God, is a better man than he who professes that God is, and lives as though He were not.

When a man reaps the whirlwind, he is always astonished at the yield.

Prejudice makes men blind, and blind men unreasonable.

The devil makes his visits when the temperature is at blood heat.

Fashion rules the largest empire and collects her tax in gold and blood.

An hour of careful thinking is worth more than ten of careless talking.

The garden hoe well used is the best paint brush for young ladies cheeks.

It must be a deed, not a loan, that we execute with God.

The man who lives for self, has a very small object to live for.

Eternal life is the only thing worth striving for in which there is no competition.

There are three places where Jesus walks the earth—in the God-man, the bible, and the Christian.

Christ would not shield you from storm but he can save you from wreck.

It is folly to ask pity for your pains as long as you continue to make your couch on the devil's thorn bush.

Deeds are the only measure of our days.

The Sunday prayer book will not hide daily card pack.

You cannot do right unless you are willing to suffer wrong.

Christ cannot be followed by leaps and bounds, but rather step by step.

It is not part of the divine economy to give ten cents when a dollar is due.

God often has to weaken our bodies to make us see how dependent we are upon Him.

It is always easier to obey when Christ says, "Come Up" than when he says, "Come down"

Give no quarter to sin ; it will not give quarter to you.

Conscience, Revelation and Example are the street lamps of God.

—Chips from Rev. D. Holford's workshop.

"Law of Hereditary Influence" or Man Makers and Man Breakers, will be the subject discused by Rev. D. Holford, B. D., in the Baptist church, Joyce hall, on Sunday evening, 18th inst, at 7.30. Morning service at 11 o'clock, subject : "Fidelity to Conviction." All are invited to attend these services. On Wednesday evening prayer and bible study service at the home of Bro. Archie McLean. back of hospital, at 8 o'clock. On Thursday evening Baptist Young People's meeting at the home of Archie McLean. At this meeting the subjects of debate are of such inspiring force that they create a lively interest in all present. A hearty welcome await all who come and all are invited.

THE GRAND JURY

Considerable comment has been occasioned by the intimation made by the grand jury at the recent assizes at Nelson, to the effect that an investigation should be held by the Attorney General's department into the condition of affairs in the local justiciary of Fernie. It is difficult to ascertain the exact meaning of the suggestion, without a better knowledge of the causes leading up to it. To the residents of the community and those who have a knowledge of its affairs the subject comes as a surprise, if the intention of the grand jury was to cast aspersions on either the competency or integrity of Mr. J. F. Armstrong, the magistrate who sentenced nearly all the Fernie prisoners, if such was their intention, one must indeed go away from home to hear its news.

While much gossip has been disseminated, during the last few months, regarding other public officials, no intimation of either incompetency or dishonesty has ever been heard as to the character or qualifications of this gentleman. It remained however, for an aggregation of men, composed most likely of those who have never been in Fernie and who know nothing of local conditions, to concoct, on a foundation of nothing but "jail gossip," an ambiguous insinuation, which on account of that characteristic, has a tendency to disparage men who are eminently capable and trustworthy and who have the confidence of those with whom they are daily in contact.

In the present instance it is quite palpable that the source of the grand jury's anxiety resides temporarily within the confines of the Nelson jail and the presumption is that there is legal warrant for his detention. Such being the case, there should have been more specific information given to the public, as to the alleged facts upon which the grand jury's suggestion was based.

The context of the suggestion as published, is open to the construction that the grand jury has found that a large number of prisoners are, of necessity, sent from Fernie to Nelson, because there is not the accommodation in Fernie that there should be in view of the business transacted and the number of petty cases originating here. An investigation by the Attorney General's department on these lines would be generally welcomed, but no new facts would be elicited, beyond those, which have been repeatedly placed before the government by the local board of trade, that there exists an urgent necessity for proper court house and jail accomodation as well as a resident stipendiary magistrate.

The Free Press, Winnipeg, has distributed over 9,400 Thermometers and Barometers as premiums to their weekly subscriptions throughout Manitoba and the Territories since last fall. So great has been the demand for this attractive premium that the Free Press has been obliged to extend the offer from time to time and order additional supplies. Of the last shipment of one thousand, over four hundred are already "spoken for." The Free Press announce that to the first six hundred sending $1.00 for the Weekly Free Press, they will send the premium, after which, the offer will be withdrawn. A reliable thermometer and barometer is an instrument that ought to be found in every house in the Northwest, and as the Free Press instrument was manufactured expressly to meet climatic conditions in this country, we would recommend our readers to avail themselves of this opportunity.

PIANO TUNING.

J. B. Eshleman, expert tuner of pianos and organs, will be in Fernie on a professional visit about the 25th inst. Orders left at this office or at the Royal Hotel will receive careful attention

PUBLIC INQUIRIES ACT.

PUBLIC NOTICE is hereby given that meetings of the Commission issued to W. H. Bullock-Webster, Esq., of Nelson, to hold an enquiry into the administration of the "Liquor License Act, 1900," in the Fort Steele License District will be held as follows :

At Moyie on 26th May, 1902, at 10 o'clock a.m.
At Elko, on 27th May, 1902, at 7 o'clock p.m.
At Fernie, on 29th of May, 1902, at 10 o'clock a.m.
At Cranbrook, May 31st, 1902, at 10 o'clock a.m.
At Marysville, June 2nd 1902, at 10 o'clock a.m.
At Kimberley, June 4th, 1902, at 10 o'clock a.m.
At Fort Steele, June 5th, 1902 at 2 o'clock p.m.

Of which all persons interested are hereby required to take notice and govern themselves accordingly.

LESTOCK R. FORBES,
Secretary to the Commissioner.

Kimberley, B.C., 10th May, 1902.

NOTICE OF ASSIGNMENT.

PURSUANT TO THE CREDITORS TRUST DEEDS ACT, 1901.

NOTICE is hereby given that Martin O'Reilly and James J. O'Reilly, trading as Martin O'Reilly & Co., in the Province of British Columbia, Merchants, have by deed dated the 1st day of May, A.D., 1902, assigned all their personal property, real estate, credits and effects, which may be seized and sold under execution, to D. K. Mollison, of the City of Vancouver, Commercial Traveller, for the purpose of satisfying ratably and proportionately, and without preference or priority, their creditors.

A meeting of the creditors will be held at Room No. 3, Cuthbert Block, Fernie, B.C., on Wednesday, the 21st day of May, instant, at 10 o'clock in the forenoon, for the giving of directions with reference to the disposal of the estate.

And further take notice that all creditors are required on or before the 21st day of June, A.D., 1902, to file with the assignee full particulars of their claims duly verified, and the nature of the securities, if any, held by them,

And notice is hereby given that after the 21st day of June, aforesaid, the said assignee will proceed to distribute the assets among the creditors of whose debts or claims he shall have received notice, and that he will not be responsible for the assets or any part thereof so distributed to any creditor of whose debt or claim he shall not then have received notice.

Dated this 10th day of May, A.D., 1902.

D. K. MOLLISON,
Assignee.

Coal Mines' Regulation Act.

NOTICE is hereby given that the name of the first alternate appointed by the owners to the Board of Examiners of the Coal Creek mine, is David Martin, not David Morton, as previously given.

Are you paying rent

and do you wish to

Own Your Home

If so please read this carefully:

The Canadian Birkbeck Investment & Savings' Co.

Head Office, Toronto.

Capital Subscribed - - $2,500,000
Paid up - - - - - 600,000

Will assist you to

Purchase or Build a Home,

permitting repayment in

Easy Monthly Instalments

just as you now pay RENT.

To Rent Payers and all persons of moderate incomes who can furnish part of the cost of a Home, either in land or cash, and who desire to purchase or build homes for themselves, or pay off existing mortgages thereon, the Birkbeck Company offers special opportunities, extending to them the privilege (to most people an indispensible one) of **repaying their loans in Easy Monthly Instalments** not exceeding the Amount usually spent in rent.

THE ADVANTAGES OF THIS PLAN are apparent to borrowers. The loan so obtained runs through to its final payment by a system of monthly rents, and needs no renewal. The borrower is not confronted at a set time (usually at the end of three or 5 years) with his entire indebtedness. The falling due of the principal is no longer a cause of keen anxiety. On the contrary, under the Birkbeck's method the Borrower is enabled to gradually cancel his indebtedness. The burden has been evenly distributed over a more lengthened period, and the Loan, for which formerly the interest could scarcely be raised annually, is now not only easily carried but paid off in the end almost imperceptibly. Intending Borrowers are given:

1. **Choice of the Period and Amount of Repayment, and**
2. **Absolute Limitation as to the number & Duration of payments**

The payments are always the same and are due at fixed intervals, borrowers therby knowing at the outset

EXACTLY HOW MUCH

they will have to pay each month and year and exactly how long.

The practical result of borrowing under the old system is that, after paying interest for a term of years, the original debt still exists. This is true in nine cases out of ten.

A Bundle of Receipts

will be all you will have to show after years of rent-paying. The house will still be the property of the landlord.

Special Feature

Borrowers are not Required to Become SHAREHOLDERS and are free of any liability outside of the unpaid portion of their loans from the company. In the Birkbeck Company there are

No DELAYS
FINES
FORFEITURES,

No uncertainity in estimating maturity.

No Shareholders' risk or Liability.

No double set of fees for local and head Office solicitors charges.

For further particulars regarding the Company's Attractive Rent Purchase Plans, apply to

Arthur H. Cree,
Office over Bleasdell's Drug Store, Fernie.

A Mining Disaster at Home

Between 125 and 150 Men lose their Lives in an Explosion on Thursday Night

A BLACK DAY FOR FERNIE

About 38 Bodies Have Been Recovered up to the Present Time.—Work Proceeding Slowly Owing to the Gas.

One of the worst mining disasters in the history of British Columbia occurred at Coal Creek mines at 7 o'clock Thursday night when from one hundred and twenty five to one hundred and fifty men met almost instant death at Nos: 2 and 3 mines.

The explosion occurred in the deeps of No. 2 and not a man out of some ninety men who were employed in the shaft lives to tell the tale. In No. 3 workings, which are connected with No. 2, the catastrophe was not so bad, nearly all those working on the right side, about twenty in number, succeeding in making their escape.

The first intimation that anything unusual had occurred was a volume of smoke, gas and dust shooting a thousand feet into the air from the fan house of No. 2. Word was immediately sent to Fernie and in exactly twelve minutes time three doctors and two coach loads of people were on the scene and the work of rescue commenced

Robert Drinnan, Dr. Bonnell and True Wetherby were the first to enter the mine, the latter leading the way. When about five hundred feet into the shaft Drinnan was overcome by the afterdamp and had it not been for his two companions would have perished. He was removed to the entrance and after repeated efforts by the doctors, recovered. He then gave instructions to the rescue party to commence repairing the overcasts in the roof of the tunnel. The overcasts are the pipes which conduct the air through the mine and as they had been almost completely destroyed it was impossible to enter the mine owing to the gas which prevailed. Volunteers were called for and a score of brave men sprang to the work. For nearly six hours the work was pursued with tireless energy. Every few minutes a man would collapse, but new men were not lacking to take up the work. About 2 a.m. the first body from No. 2 was rescued, that of Joe Sengala, and shortly after the body of Stephen Morgan was carried out. Neither men were marked and had evidently succumbed to the fatal afterdamp. Two unknown men were the next to come out. None of the victims gave the slightest signs of life and they were removed to the washhouse. About four o'clock the men penetrated so far that the gas was terrible and operations had to be suspended for an hour or two to give the mine time to clear.

The first victim to come out of No. 3 was a lad named Robinson, about thirteen years of age. Among those who succeeded in getting out alive were:—C. Burrows, Jas. Baker, P. McNeil, C. Dunlop, A. Farquharson, Jas Carr, Jas. Dobie, J. Sharpe, H. Monahan and H. Salter.

Many acts of bravery were witnessed during the night. The heroic work of True Weatherby, who time and again, entered the pit, where men were falling all around him, has won for himself golden opinions in the minds of the people of Fernie. A number of the rescuers, including Supt. Drinnan, probably owe their lives to his brave work.

A fact worthy of note was the absence of foreigners among the rescue parties. The track from the mines to Fernie was lined with foreigners making their way down, but the English speaking miners had responded to the call of duty and remained to assist in the work of rescue.

The heroism of the men was manifested to all. Time and again men were carried out overcome, but in a few minutes were back again working like beavers. The work of Foreman Graham was especially worthy of mention and the progress of the rescue party was largey due to his able efforts.

All day Friday the work of rescue continued and at six o'clock some thirty-one had been taken out. The scenes around the mine during the day were heartrending, mothers looking for their sons and wives for their husbands. Nothing but despair was written upon the faces of all.

Among the bodies that have been recovered are:—

Steve. Morgan.
Joe. Sangala.
Willie Robertson.
Victor Johnson.
John Leadbeater.
Frank Salter.
John McLeod.
T. Fearfull.
Thos. Johnson.
An Italian whose name is unknown
W. H. Brierly.
Joe Tuka.
John Karman
Ronald Jones.
Walter Wright.
Andrew Hovea.
Thos. Glover.
James Cartlidge.
Owan Holmes.
Wm. Ferguson.
M. J. Fleming.
Sam Hand.
Thos. Stephens.
John Kearney
John Hughes.
James McIntyre.
Harry Wilson.
Geo. Housby.
Tomy Mutzeo.
Wm. Neace.
Wm. McPhail.
John Zelonika.
Thos. Fairfull.
Joseph Welsh.
Antonia Fredericko.
J. Walsh.
Amos Buck.

The work is proceeding slowly this morning. Only one body was taken out during the night owing to the large amount of gas in the mine.

BOARD OF TRADE ACT.

Over a Thousand Dollars Subscribed at a Meeting Held Last Night.

A special meeting of the Board of Trade was held last night to take measures toward the relief of the sufferers from the coal mine disaster.

On motion of Messrs. Bleasdell and Monkman a committee consisting of Messrs. F. Stork, S. Herchmer and J. A. Rennie were appointed to communicate with the outside world in regard to securing relief for the sufferers from the mine disaster.

A general committee of fifteen was also appointed to look after the relief of the sufferers. The committee consisting of Messrs. Joyce, Bleasdell, Keay, Cree, Eschwig, Proctor, McDougall, Mott, Purdy, L. Carosella, Monkman, Dr. Bonnell, Podbielancik and the Secretary and President of the Miners' Union.

A subscription list was opened at the meeting and the following amounts subscribed:

W. Eschwig	$100 00
S. Graham	15 00
Joyce Bros	25 00
Dan Hayes	25 00

The General Committee has been divided into the following:—

Financial Committee—Stork, Joyce and W. R. Ross.

Relief Committee—L. Carosella, Podbiclancik, A. Purdy, Bleasdell and Watson.

Canvasssing Committee—Cree, Trites and Eschwig.

Anyone knowing of any distress will kindly make it known to the committee.

THE LATEST NEWS BY WIRE

Victoria, May 23 (Special)—The fat is in the fire here so far as the government's railway policy is concerned. Owing to the strong opposition taken to the land subsidy features of the Canadian Northern and Coast to Kootenay Ry bills, the government on Tuesday brought down a revised policy which provided for a slight increase in the cash subsidy permit, but cut out the land grant altogether Greenshields, who has been representing Mackenzie and Mann throughout the negotiations, was very much disgusted with the turn affairs have taken. He left for the East on Wednesday morning and says he has washed his hands of the whole railway deal with the Government. With the restrictions imposed on the cash subsidy Greenshields says he could not raise a postage stamp. He further says the provisions in the bill for the regular operating the Provincial government will kill the chances of raising more for the building of the road. Greenshields acts as if he thought Mackenzie & Mann were the only railway contractors left. There appears to be two or three outfits anxious to build the Coast to Kootenay section of the road even under the terms proposed. The opposition is now denouncing the government as stoutly for standing in the way of railway construction as they formerly did for lavish subsidies to promoters.

London, May 23.—There is now every indication that the end of the war in South Africa is in sight. Although the press consor allows nothing to get through concerning the progress of the peace negotiations, all signs point to peace. The office refuses to give any statement further than that negotiations are still in progress, but in spite of this reticence of all, the morning papers have the most pronounced peace air that they have since the trouble began.

A cabinet meeting has been announced for this afternoon to consider despatches received from Milner and Kitchener outlining the progress of the peace conference in Pretoria. The same impression has taken possession of the Stock Exchange and South Africa stocks are much sought after.

Winnipeg, May 23—The returns are not yet all in. There is no doubt but that Haultain has been sustained and that in the next legislation he will have the support of at least two-thirds of the members elect. The following have been elected with a number of places yet to hear from to complete the full number of 35 seats: N. Banff, Sifton, govt.; Butch, Fisher, govt.; Canington, McDiarmid, opp.; S. Cardstone, Wolf, govt.; S. Calgary east, Young, Ind.; S Calgary west, R. S. Bennett, govt.; Edmonton, McCauley govt.; S. Grenfeil, Lake, govt.; S. High River, Wallace, govt.; Innesfail, Simpson, govt.; Lethbridge, Derebere, govt.; Lacombe, Talbut, govt.; Maple Creek, Greeley, govt.; Medicine Hat, Pillay, govt.; Moosejaw, Annable, opp.; Moosomin, Smith, govt; Mitchel, McIntyre, govt.; MacLeod, Haultain, govt; Prince Albert, McKay, opp.; S, QuAppelle, Bayea, govt.; N. Regina, Brown, govt.; S. Regina, Hankes, Ind.; N. QuAppelle, McDonald, opp; S. Albert, Lambert, Ind.; Souris, Corned, govt.; San Coats, McNautt, govt.; Saskatoon, Sinclair, govt; Strathcona, Rutherford, govt.; Victoria, Shera, Ind.; Whitewood, Gillis, govt; Wolesley, Elliott, govt.; Yorkton, Dr. Hatrick, opp.

ALFONSO IS CROWNED

SIXTEEN YEAR OLD RULER OF SPAIN TAKES THE SOVEREIGN OATH.

PEOPLE'S LUKEWARM RECEPTION TO THE MONARCH ANARCHIST PLOT.

Madrid, May 19.—His Majesty Alfonso XIII, King of Spain, solemnly took the oath to the constitution in the Hall of Assembly of the Chamber of Deputies on Saturday, with the utmost ceremony and in accordance with all the religious forms and ancient rites.

The royal procession was formed on the Plaza de Aramas, and proceeded to the chamber of deputies, where, in the presence of the senators and deputies the king took the oath. The procession was a spectacle of medieval magnificence. A detachment of the royal body guard rode in front of the massive gilded chariot termed "The Royal Crown," having gilt allegorical figures standing out in relief from the panels,and whose roof was surmounted by a heavy gilded crown. The gold plated moulded lamps of the carriage were especially striking, being inset with imitation jewels. The hammercloth, a wonderful piece of embroidery work, is valued at $18,000. The king and the queen regent were seated side by side in the royal coach and were accompanied by the Infanta Maria Teresa, youngest sister of his majesty.

The procession which emerged from the court yard of the palace amid the booming of 21 cannon, proceeded through the streets gay with flags and bunting, beneath festoons of evergreens, to the chamber of deputies, before the steps of which had been erected a purple canopy. A delegation consisting of twelve senators and twelve deputies received their majesties at the steps, and preceded by mace bearers, they were conducted through the ante-chambers filled with courtiers and others. The king, queen regent and the prince and princess of the Asturias ascended a platform. specially constructed, facing the semicircular gilded hall, around which the benches were filled to their capacity by senators, deputies, courtiers and ministers. The foreign princes and other special envoys were seated immediately to the right of the platform. The king, the queen regent, and the prince and princess of the Asturias sat together in front of the platform in gilded arm-chairs beneath a red canopy. As the royal party entered the hall, every one present rose and remained standing until the queen regent pronounced the words, "Be seated."

TAKING THE OATH.

The president of the chamber, Senor Vega Armijo, then said, amid impressive silence: Senor—"The Cortes, convoked by your august mother, are assembled to receive from your majesty the oath, which in accordance with the constitution, you come to take, to maintain the constitution and laws."

Senor Amijo then drew near to the king and held out a Bible, at the same time keeping open a book containing the formula of the oath. His majesty, placing his right hand on the Bible, then uttered the following words: "I swear by God, upon the Holy Bible, to maintain the constitution and laws. If so I do may God reward me. If I do not may he call me to account."

The queen regent, the royal party and all others present listened to the foregoing, standing. King Alfonso then again seated himself on the throne, as did all others. The president of the chamber, addressing the king, said: "The Cortes have received the oath your majesty has taken to maintain the constitution and the laws." At the same moment the booming of 21 guns was again heard, announcing to the city that the king had taken the oath.

IN THE CATHEDRAL.

King Alfonso, the queen regent and the prince and princess of the Asturias withdrew from the chamber of deputies with the same ceremonial as marked their entry into the deputies and the procession was re-formed and proceeded to the San Fran church. King Alfonso was met at the portal of the church by the primate of Spain and the cardinal-archbishop of Santiago de Compostela and twenty bishops, all in magnificent robes. The king took his seat on the throne placed beside the altar whence he was visible from all the tribunes erected around the rotunda. A Te Deum was then chanted, accompanied by a grand orchestra.

The king left the church with the same ceremonial as on his entry and returned direct to the palace. King Alfonso for the first time wore the uniform of a captain-general, dark blue, with gold facings and red silk waist band, from which hung a sword, and a steel helmet with a white plume. The reception met with by the procession was, on the whole, luke-warm on the part of the immense crowds, composed chiefly of people who had gathered to witness the pageant out of curiosity. On the Puerta Ael Sol no cheer was raised until the king arrived there, when he received an ovation, mainly, however, from the spectators who packed the windows and balconies. There were some cheers from the people in the streets and hats were waved; but many men did not even uncover their heads. King Alfonso, who was seated on the right of his mother, smiled and acknowledged the cheers by bowing and waving his white-gloved hand out of the window of the royal coach. There were a number of minor accidents, due to the rushes of the people, but no fatalities were reported.

PLOTTERS DISCOVERED.

An Anarchist plot against King Alfonso has been discovered, and six arrests in the matter, including that of Gabriel Lopez, an employee of an insurance company, have been made. Dynamite cartridges were found on the premises where Lopez was arrested. Lopez says he received a package of cartridges from another Anarchist with instructions to throw them at the moment of the passage of the royal carriage in the procession.

Further arrests have been made, and the prisoners include six merchants, a printer, a carpenter and a mason.

OUR WHEAT IN MINNEAPOLIS.

Washburn-Crosby Mills Start Grinding this Week.

Minneapolis, May 19.—Within a week the Washburn-Crosby company will start in mill "E" grinding Canadian wheat in bond. The company has just concluded negotiations for a large consignment of Canadian grain and expects to buy more. Most of the wheat will be transported to Minneapolis over the Soo road, and in all probability the flour will be carried east over the Soo and Canadian Pacific. It is proposed to market the entire product in the United Kingdom, including the bran and shorts. After several weeks of invesgation the Washburn-Crosby company has brought plans for grinding Canadian wheat to a basis where it can be regarded a good business proposition and at the same time be used as an entering wedge in bringing Canadian grain to Minneapolis. Instead of quitting tke proposition several weeks ago when conditions surrounding the transportation of Canadian wheat here was so discouraging the milling company has continued its efforts and finally overcome some of the most difficult obstacles. This will be the first large shipment of Canadian wheat that has been ground in Minneapolis since the mill ng industry here began to take on such magnificent proportions. John Washburn, of the Washburn Crosby company, and president of the Chamber of Commerce, says:

"Canadian wheat is a problem which this grain market must face at once. Canadian exports of wheat are growing rapidly. Under normal crop conditions, they will greatly increase in the next few years. Anything which turns that grain in the direction of this market is a step in solution of the problem. We need receiprocity with Canada. Grinding Canadian wheat in bond is progress in that direction."

LABBY'S COSTLY CASES.

London, May 19.—Though Henry Labouchere did not lose the libel action brought against him by Mr. Cowen, the secretary of a club, it cost Truth's editor between £6,000 and £7,000; the fees of counsel alone amounted to £4,000. This is nothng unusual to Mr. Labouchere. Some years ago he was sued for libel as a result of commenting on a London convent. He won, but it cost him nearly £10,000. His Lambri Pasha case cost him the same amount.

CAUGHT IN A SHAFT.

Lindsay, Ont., May 19.—Charles Rodman, about 18 years of age, a son of Isaac Rodman, of Little Britain, was the victim of a serious accident in the gasoline engine department at the Sylvester works on Satday. The young man was engaged in oiling the box of a shaft, while the machinery was in motion, when his shirt sleeve became caught in a set screw and he was drawn round the shaft a couple of times before the machinery could be stopped.

ASPHYXIATION AT GALT.

Galt, May 17.—An asphyxiation case ended fatally here today, when Henderson Dickson, pop-maker, died from gas effect. He retired Monday night, but did not rise next morning, so a neighbor entered through an upstair window and found the place full of gas and the unfortunate man insensible. He never regained consciousness. He was 69 years old and leaves a grown up family.

C. P. R. monthly employees not receiving overtime will have two weeks' holidays at full pay.

Fred. Holland, of Leduc, attempted to murder his family.

LEMAC TO BE HANGED

THE INDIAN WHO MURDERED A FELLOW TRIBESMAN FOUND GUILTY.

AFTER EIGHT YEARS HAVE ELAPSED THE CULPRIT IS BROUGHT TO JUSTICE.

Regina, May 15.—The trial of Tom Lemac for the murder of Josiah Matoney eight years ago, Sept. 15, 1894, both being Indians has closed, and accused has been declared guilty of the crime. His Lordship, Judge Richardson, sentenced the prisoner to be hanged June 27.

From the evidence given at the trial it appeared that on the day in question the two men were seen to leave Fort Qu'Appelle together on horseback. On the following day Matoney was found bleeding in a bush on the trail. He was removed to the home of one William Daniels, where he died. Lemac skipped, after first confessing to his sisters that he had shot a man. He was not arrested until some months ago, when he was found at Butte, Montana.

Mrs. Akamoose, an Indian woman, was the most important witness. She deposed that Tom Lemac came to her tent and in the presence of four persons said: "I think I have done very wrong; indeed, I fear I have put a rope around my neck; I fired two shots at him, and I fear I have killed him." He was asked whom, and answered, "Josiah Matoney."

Many Indians were called who said that Lemac came to their tents immediately after it was known that Josiah Matoney was shot and said: "I fear I have done wrong. I have killed a fellow Salteaux. I shot him twice. I deserve to have a rope round my neck. It was Josiah Matoney I shot."

The accused was put in the witness box. He said that he and the deceased began drinking before they left Fort Qu'Appelle for File Hills on September 15, 1894, and when six miles on the trail drank further whisky. After that he had no recollection of what occurred. He accounted for his hiding and skipping to the United States to avoid the police by asserting that everybody said that he had shot Matonay and he was scared. He denied, however, that he had ever said that he had shot him, notwithstanding what so many witnesses said to the contrary.

The judge summed up against the accused. The jury retired and after an absence of twenty minutes found a verdict of guilty. His lordship in sentencing the accused endorsed the verdict of the jury, and in a very impressive address to the culprit pointed out that the great lesson to be taught to Indians, and all British subjects, was that crime would be traced and punishment follow no matter how many years elapsed.

PASTORS' POOR PAY.

Presbyterian Ministers Complain of Reductions in Salary.

Toronto, May 14.—At the Presbyterian synod of Toronto and Kingston, Gev. J. W. McMillan, Lindsay, convenor of the augmentation committee presented a rather startling statement concerning the condition of the funds. He said the Presbyterian church had proudly stated for many years that there was a very good minimum for all augmented charges of $750 per year and manse, or $800 without a manse. As a matter of afct there were only five of the fifty augmented charges of the synod of Toronto and Kingston in which the minimum was actually paid. The average salary in all the augmented charges of the synod was $697.13 and manse, or $747.13 without manse, or over $50 below the supposed minimum. While in hard times home missionaries had been reduc?d 10 per cent. the augmented charges had been reduced 25, 50 or even a whole 100 per cent. of the grant. There had been going on in the last few years a constant increase in the cost of living, so that the minimum in order to allow a minister to live as well as he did 15 years ago should be $850 and manse. Now that good times were here, the church was rich, building new churches, new manses, buying costly organs, and soft cushions, and yet the salaries on the augmented charges were $50 short of the supposed minimum. He asked for generous treatment on the part of the richer churches.

Rev. Dr. Lyle, convenor of the assembly's committee on augmentation in urging increased gifts to this fund, pointed out that congregations which had been assisted up to self support by the augmentation fund were now paying $60,000 per year to schemes of the church, while the amount paid out per year through the augmentation fund was about $20,000. He asked if such a return upon an investment could be found in the case of any other fund.

HOPETOUN WILL RESIGN.

Because the Australian Parliament Refused to Raise His Salary.

Melbourne, May 15.—The federal parliament recently refused to grant the Earl of Hopetoun an additional annual allowance of £8,000. The governor-general then sent a cablegram to Right Hon. Joseph Chamberlain, the British colonial secretary, in which he asked to be relieved of his duties after the coronation of the King, saying the position was a heavy drain upon his private resources, and that the salary attached to the governorship was wholly insufficient to maintain the dignity of the office. Mr. Chamberlain replied to the Earl of Hopetoun, accepting his resignation, although it meant, he said a serious loss to Australia and the empire. It is understood that the governor of Australia (Lord Tennyson) will administer the governor-generalship of the Commonwealth in the interregnum. The Earl of Hopetoun's salary was £10,000 a year. He accepted the position in 1900.

LOCATION OF ELEVATORS.

F. W. Thompson Announces Where Ogilvie Storehouses Will Be Built.

Montreal, May 15.—Mr. F. W. Thompson, vice-president of the Ogilvie Mills company, has announced the location of the twenty grain elevators which it is proposed to erect during the present season in Manitoba and the Northwest Territories. Six of the elevators, namely, those at Pense, Balgonie, Grenfell, Arnaud, Manor and Carlyle, are situated in the Territories, while the remaining fourteen are in Manitoba, as follows: Brookdale, Bradwardine, Sinclair, Newdale, Lenore, Arcola, Carnegie, Kenton, Oakville, Grand View, Margaret, Gilbert Plains, Dunrea, and at the terminal of the Waskada branch of the C. P. R.

KILLED BY AN EXPLOSION.

Boiler Blew Up in a Saw Mill With Fatal Effect.

Perry Station, Ont., May 15.—The boiler of a sawmill belonging to W. Stayzer, one mile east of Perry Station, blew up, killing two men and badly injuring another. The dead are G. Deavo and a man named Everett, aged about 48 and 55 respectively. The injured man is W. Gillian, aged 56. Everett's head was blown completely off. The boiler was totally wrecked, part of it hanging to the tops of trees. The cause of the explosion is unknown.

KILLED ON HIS WEDDING DAY.

Orillia, Ont., May 14.—David Byers, a widower from O'Connell, and Mrs. Jessie McDonald, a widow, residing in the same neighborhood, came to Orillia on Monday and were married. While returning to their future home the rig upset in a ditch about two miles out on the Atherley road and the occupants were thrown out. The rig was thrown over on top of Byers, who had been pitched by the fall into the ditch, and Mrs. Byers and daughter failed to find him. After searching all round the vehicle for over an hour the body was finally found, but life was extinct.

THEATRE TREASURER ARRESTED

Toronto, May 15.—James Alexander, treasurer of the Toronto Opera house, has been arrested charged with the theft of $1,500 from the box office. He has had charge of the receipts since the beginning of the season. He started in the theatre as programme boy several years ago.

LINE OF OCEAN GREYHOUNDS.

London, May 15.—The Daily Mail says that the members of the House of Commons have promised to form a pool of £1,000,000 as the nucleus of a fund to start a line of ocean greyhounds in opposition to the Morgan combine. The promoters of this enterprise hope to secure mail and cruiser subsidies from the government.

VESUVIUS PREPARING.

Paris, May 15.—A dispatch from Naples says Mount Vesuvius shows signs of activity. Lava is flowing from the crater on the Pompeii side, while hot cinders are thrown up from time to time

BURNED TO DEATH.

Baie St. Paul, Que., May 15.—Jean Duchesne, a lunatic belonging to Les Eboulements, was burned to death in a fire which destroyed St. Antoine hospital.

GIFT TO MARTINIQUE.

Ottawa, May 15.—The House of Commons has voted the sum of $50,000 to aid the sufferers in the Windward Islands disaster.

TELEGRAPHIC BRIEFS.

Small Items of News From Various Parts of the World.

When the burned elevator D at Fort William is repaired its capacity will be increased.

The first sod was turned on the first Ontario government railway, the Temiscaming and North Ontario, at North Bay.

The Brazilian aeronaut, Senor Severo, and his engineer, met a terrible death in Paris by the bursting of an air-ship in mid-air.

Lord Strathcona does not regard the shipping trust as a manace to Canadian marine. It was announced in the House of Commons, London, that the White Star and Dominion lines would continue to fly the British flag.

Toronto, May 13.—John D. Edwards, broker, was arrested to-day charged with stealing $3,000 from the Ashnala Coal company. Edwards it is alleged, received money as subscriptions for the company's stock, and failed to account for it. He was admitted to bail in two securities of $3,000 each.

Winnipeg, May 13.—A Chinese extra, consisting of three cars of Celestials, en route to New York, and five carloads of raw silk for the American markets, passed through the city at noon to-day from the west. The silk is valued at $10,000 a car, making the train worth half a million dollars.

Vancouver, B.C., May 13.—Final arrangements for the big canning amalgamation are being made. The provincial government have promised the cannery men that they will not be overlooked in the disposition of trap sites on Vancouver island. Forty out of the seventy-five canneries will join the amalgamation.

Kingseon, Ont., May 13.—David Williams, engineer for Hiram Walker & Sons, Walkerville, is missing, and a warrant has been sworn out for his arrest. He is suspected of making wrong entries on the pay sheet. Williams has been in the employ of the Walkers for about quarter of a century, and has a wife and two children.

Toronto, May 13.—The will of the late Henry Stark Howland, is filed in probate court. The schedule shows an estate valued at $326,963. The summary is: Interest in H. S. Howland, Sons & Co., and Graham Nail Works, $163,806; stocks, $85,445; real estate, $46,075; assets at Kleinbgrg, other than real estate, $20,741; miscellaneous assets, $2,360.

St. Paul, Minn., May 13.—J. W. Voight, commercial traveller, with wife and family, living at Chaska, Minn., shot and killed Miss May Welch, aged 24, of Verndale, Minn., and committed suicide this evening. The tragedy occurred at the Parker House, Minneapolis, and the cause is unknown, but it is believed that the girl was seeking to avoid Voight, who had been paying her attention, and giving her presents. None but the two principals were present when the tragedy occurred.

Philadelphia, May 13.—Mine workers throughout the entire anthracite coal regions of Pennsylvania to the number of 145,000 formally began their struggle to-day for increased pay and shorter hours. Never in the history of hard coal mining has a tie-up been so complete, not one of the 357 colleries in the territory being in operation. There is every indication for the belief that the suspension which was to cover only the first three days of this week will be made permanent by the Miners General convention which will meet at Hazelton on Wednesday. Absolute quiet prevails everywhere to-day.

The big ranchmen of the south have caught the Canadian fever and are now turning to the vast and fertile grazing lands of the west to relieve them from the encroachment of settlerss in the great cattle states, the movement extending as far south as Texas. What this may mean to Canada may be judged from the fact that a fortune of $60,000 is to be expended in removing one herd, the particulars of which enterprise is told by the Review of Sweetwater, Texas, in the following paragraph:

"L. H. Prait, a large ranchman near Snyder, will ship 6,000 head of cattle to Medicine Hat, Canada, early in May. It is said he will drive to Amarillo and ship from there, over the Fort Worth and Denver. To transport this herd will require about 200 cars, or ten trains. The expense will be in the neighborhood of $10 per head, and the trip will take about three weeks. Quite an undertaking."

Milwaukee, Wis., May 12.—Lieut.-Governor Stone, of Wisconsin, died at Watertown, at 8.17 last evening.

Rome, May 12.—Thirteen persons were killed in a landslide at Marola, province of Emilia, yesterday.

FERNIE FREE PRESS.

FERNIE, B.C.

A LOOK AND A SMILE.

An Incident Which Explained Mrs. McKinley's Luck at Cribbage.

When the late President McKinley and party went west not many months before he was shot, Mrs. McKinley went too. While talking with Mr. Scott one day, the man whose firm built the Oregon, Mrs. McKinley said, "Oh, do you play cribbage, Mr. Scott?"

"Yes," was the great shipbuilder's answer.

"Well, so do I," said Mrs. McKinley. "I wish you would play a game with me."

"I should be delighted to do so," was the reply.

Later, as President McKinley and Mr. Scott were looking over the latter's big plant, Mrs. McKinley not being present, the president said, "Oh, by the way, Mr. Scott, didn't I hear you and Mrs. McKinley arranging to play cribbage some time?"

"Yes," said Mr. Scott, "we are going to play."

"Well, what kind of a player are you?" asked the president.

"Oh, pretty fair, I guess. I play a pretty good game."

"Well, so do I," said Mr. McKinley. "But do you know, it may seem strange, but it is a fact, that I have never been able to play well enough to beat Mrs. McKinley." As he said this he looked at Mr. Scott with a significant smile. Their eyes met. It was enough. Mr. Scott understood, and it was safe to say that he did not beat Mrs. McKinley.

Round the World by Mail.

A postal card sent from Paris to Paris via Moscow, Vladivostok and San Francisco made the trip around the world in eighty days at a cost of 2 cents.

C. C. Richards & Co.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for every day ills and accidents of life I consider it has no equal.

I would not start on a voyage without it, if it cost a dollar a bottle.

CAPT. F.R. DESJARDIN.

Schr. "Storke," St Andre, Kamouraska

It is certain that either wise bearing or ignorant carriage is caught, as men take diseases one of another; therefore, let them take heed of the company.—Shakespeare.

There never was, and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

Leave out the adjectives and let the nouns do the fighting.—Ralph Waldo Emerson.

Minard's Liniment Cures Garget in Cows.

I have looked to the happiness of my countrymen as the object to which my efforts ought to be directed.—Lord John Russell.

OUT OF SORTS.—Symptoms, Headache, loss of appetite, furred tongue, and general indisposition. These symptoms, if neglected, develop into acute disease. It is a trite saying that an "ounce of prevention is worth a pound of cure," and a little attention at this point may save months of sickness and large doctor's bills. For this complaint take from two to three of Parmelee's Vegetable Pills on going to bed, and one or two for three nights in succession, and a cure will be effected.

Flowers are always fit presents, because they are a proud assertion that a ray of beauty outvalues all the utilities in the world.—Emerson.

Excellent Reasons exist why Dr. Thomas' Eclectric Oil should be used by persons troubled with affections of the throat or lungs, sores upon the skin, rheumatic pain, corns, bunions, or external injuries. The reasons are that it is speedy, pure and unobjectionable, whether taken internally or applied outwardly.

Love feels no burden, thinks nothing of trouble, attempts what is above its strength, pleads no excuse of impossibility; for it thinks all things lawful for itself and all things possible.—Thomas a Kempis.

Times of general calamity and confusion have ever been productive of the greatest minds. The purest ore is produced from the hottest furnace, and the brightest thunder-bolt is elicited from the darkest storm.—Colton.

GRAVEL CURED

REMARKABLE CASE OF THIS PAINFUL DISEASE.

Reuben Draper, of Bristol, Que., Who Was a Victim, Finds Relief and a Permanent Cure—He Tells of His Sufferings, and How He Left His Trouble Behind.

Bristol, Que., May 17.—(Special)—No disease can cause more severe and dreadful pain than gravel. Reuben Draper, of this place, was taken ill with this awful trouble about five years ago. He was cured and so many have asked him how it was done that he has decided to give the whole story for publication:

"About five years ago I was taken ill with the Gravel. I suffered great pain, so I sent for a doctor. He gave me some medicine and came to see me twice afterwards, but my disease was not gone, and in a short time I had another very bad attack.

"This time I sent for another doctor, with about the same results, only I was getting weaker all the time.

"Then a man advised me to try Dodd's Kidney Pills, for he said they had cured his mother. I thought I would try them, and bought a box.

"Just one week after I began the treatment I passed a stone as large as a small bean, and four days later another about the size of a grain of barley—this gave me great relief and I commenced to feel better and to gain strength right away.

"That was five years ago, and I have not had any trouble in that way since. I have the stones in a small bottle, and anyone can see them who wishes. Dodd's Kidney Pills certainly saved my life."

The story of Mr. Draper will be good news to many sufferers who may not have known that Dodd's Kidney Pills always cure Gravel and Stone in the Bladder.

What has cured this gentleman and hundreds of other very bad cases should cure any one, and those who may be afflicted as Mr. Draper was should try Dodd's Kidney Pills.

When a man gets up in the world a good reputation often comes in handy as a parachute.

Minard's Liniment Cures Distemper.

A man's reach should exceed his grasp, or what's a heaven for? Robert Browning.

MARKETS.

The Manitoba wheat market has been quiet during the week, and trade moves along in a steady way without much demand for wheat, or pressure on the part of the holders to sell it. Wheat for immediate or early delivery is easier to sell than for more distant delivery. Last week prices left off at 74¾c for 1 northern, and 72¾c for 2 northern, in store Fort William, spot or May delivery, and by Tuesday afternoon they had advanced under the influence of stronger outside markets to 76¼c and 74¼c; but since then they have declined 1c, and at the close of business on Friday the best prices obtainable were 75¼c 1 northern, and 73¼c 2 northern spot or May delivery, in store Fort William. No. 1 hard is worth 78¼c. June delivery is not wanted, but will sell at same figures as May delivery.

Liverpool Wheat—No. 1 northern closed on Saturday at 6s 5d.

FLOUR—Hungarian patent $2.15 per sack of 98 pounds; Glenora, $2; Alberta, $1.85; Manitoba, $1.70; and XXXX, $1.25.

GROUND FEED—Oat chop, per ton, $28; barley chop, $22; oatmeal feed, $14.50; mixed barley and oats, $25; oil cake, 930.

MILLFEED—Bran, in bulk, is now worth $15.50 per ton, and shorts $17.50.

OATS—The market has advanced 1c per bushel this week owing to improved demand. No. 2 white oats, Fort William, 41c per bushel; No. 1 white, in car lots on track, Winnipeg, per bushel, 45c; No. 2 white, 41 to 42c; feed grades, 38 to 39c; seed oats, 50. At country points farmers are getting 39c to 31c for No 2 white oats.

BARLEY—Stocks available are very light and the market has jumped to 46 to 48c for seed grades and 40c to 42c for feed grades, in car lots on track Winnipeg.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

HAY—Receipts are light, and the market is $1 higher at $8 to $9 per ton for fresh baled. Loose hay is not offering to any extent.

POULTRY—There is very little poultry in the market. Chickens are worth 12½c per pound for fresh killed, and turkeys 12½c to 15c, according to quality.

BUTTER—No country creamery butter has reached this market yet and there is consequently nothing new to report. The weather has not been favorable for pasture and consequently milk is scarce in most districts. Commission houses are quoting 21 to 22c per pound for choice creamery butter delivered in Winnipeg.

BUTTER—Dairy—Butter making is still a slow process for want of milk and receipts of dairy are very light. Commission houses are offering as high as 20c per pound for best qualities of fresh made butter in tubs, commission basis, and from that figure the market ranges down to 16c for round lots.

CHEESE—This market is bare of cheese, and there is hardly any to be had. Dealers do not care to bring in much eastern stock, as Manitoba cheese will begin to arrive soon. The wholesale selling price today is about 13½c.

EGGS—The market is firmer, and about 11½c per dozen is being paid for fresh case eggs by the retail trade in Winnipeg.

POTATOES—Farmers' loads delivered in Winnipeg, 25c per bushel.

DRESSED MEATS—Beef is very scarce, and has advanced ½c this week. Beef, city dressed, per pound, 8 to 9c; veal, 7½ to 8½c; mutton, 10c; spring lambs, each, $3.50 to $4.50; hogs, per pound, 7¾ to 8½c.

Hides—No. 1 city hides, 6½c No. 5½c, No. 3, 4½. Kips and calf, the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horse-hides, 50c to $1.

WOOL is worth 6½c per pound for Manitoba unwashed fleece.

LIVE STOCK.

CATTLE—Beef cattle are very scarce, and the market is firmer. Dealers are now paying 5c for nearly everything, and choice animals will bring a little more. We quote: 4½ to 5c per pound, off cars, Winnipeg, for butchers' cattle. Stocker shipments to the west are numerous. yearlings are worth as high as $16 per head at point of shipment. Two year olds are bringing from $20 to $22 per head.

SHEEP—About 5 to 5½c per lb is the value off cars, Winnipeg.

HOGS—Best packers' weights 6¾c per pound off cars Winnipeg, an advance of ⅛c over last week. Other grades bring proportionate prices.

MILCH COWS—Cows are very scarce, and good milkers readily bring $45 each in this market. As most of the stock offerings are poor, they bring less money, the range being from $35 to $45.

Four miles of trees have been planted on Winnipeg streets this season.

Judge McTavish will investigate the alleged Canadian tobacco combine.

THE BLOOM OF HEALTH.

How to Keep Little Ones Bright, Active and Healthy.

Every mother knows that little children need careful attention—but they do not need strong drugs. When baby is peevish, cross or unwell, it is an unfortunate fact that too many mothers dose them with so-called "soothing" medicines which stupefy and put the little one into an unnatural sleep, but do not remove the cause of the trouble. What is wanted to make th? little ones, bright, cheerful and well is Baby's Own Tablets, which will promptly cure, colic, sour stomach, indigestion, constipation, diarrhoea, simple fevers and teething troubles. They give children sound refreshing sleep, because they remove the cause of the trouble. These tablets are guaranteed to contain no opiate or other harmful drug. Mrs. James Found, Valentia, Ont., says: "Before I got Baby's Own Tablets my Baby was very pale and delicate and so peevish that I had to walk the floor with him day and night. The first tablet I gave him helped him, and that night he slept soundly. Since then the tablets have made him perfectly well, and he is now a fine, healthy looking baby, and is getting quite fat. I would not be without the tablets if they cost a dollar a box."

Baby's Own Tablets are good for children of all ages and are taken as readily as candy. Crushed to a powder they can be given with absolute safety to the youngest, weakest baby. Sold by all druggists or sent postpaid at 25 cents a box, by addressing the Dr. Williams Medicine Co., Brockville, Ont.

A man who lives entirely for himself becomes at last obnoxious to himself. There is no weariness like the weariness of a man who is wearied of himself, and that is the awful Nemises which follows the selfish life.—Rev. J. H. Jowett.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials.

Address, F. J. CHENEY & CO., Toledo, O

Hall's Family Pills are the best.

Conscience has no more to do with gallantry than with politics.—Sheridan.

HOUSEHOLD HINTS.

Soft linen crash makes the best towels for drying silver.

In washing silver no soap should be used, as it is apt to give it a pewtery appearance.

All the mending of the week should be regularly and promptly done and never permitted to accumulate.

Plaster of paris mixed with a cold solution of alum makes a slow setting, but very hard cement for stoneware.

A canton flannel bag put on the broom when sweeping matting takes up the dust and saves much wear on the matting.

Cushion pillows filled with silk floss, it is said, retain their shape and elasticity better than those filled with cheap feathers or so called down.

In hanging pictures the cords should be as near as possible the color of the wall, and the center of the picture should not be much above the eye line.

Wringing out a cloth in hot water and wiping the furniture with it before putting on the furniture cream will result in a very high polish that will not finger mark.

FERNIE, BRITISH COLUMBIA.

SATURDAY, MAY 24, 1902.

LET THE ELECTORS DECIDE

The statement made in the legislature on Thursday by Richard McBride, leader of the opposition, to the effect that the opposition was prepared to assist in putting through the necessary legislation now before the house, if the government would consent to drop its railway subsidy bills and restore the foreshore reserves, is the nearest approach to statesmanship that has been attempted in the house this session. It is to be hoped that the extremities of the government's condition will force it to accept the proposition as made, as it is apparently idle to hope for any consideration for provincial interests, from the men who make up the government, upon any other ground. As to the foreshore question, at this distance it appears to have resolved itself simply into a speculative gamble, in which a few political favorites hope to reap large rewards by securing foreshore rights, which, in the very probable event of the federal government permitting the use of salmon traps, would command fancy prices from the men who have invested largely in salmon canning plants. Whatever interest might suffer, from the shelving of this matter for a time, it seems reasonably clear that they would not be those of the province.

As for the government's railway policy, there has yet to be said one word in the legislature in justification of it. Upon its face it carries the hall mark of having been framed, not in the interests of the province, but, in the interests of the little clique at Victoria who appear anxious to retain power at any cost to the provincial exechequer and public domain. It is a conviction of the truth of this which has caused the announced policy of the government, with respect to railways, to be treated as no previous government's railway policy has been treated. There has been no attempt on the part of the press of the province to treat it upon its merits, because the press of all shades of politics, with the possible exception of the premier's personal organ, has recognized that there is no merit in it.

The circumstances attending its birth attest this. In the first place it is a direct negative of the policy which was outlined to the electors by the premier in his now somewhat famous open letters, and the dominating feature of every railway subsidy bill now before the house is the spoilation of the province, to the end that the men who compose premier Dunsmiur's cabinet may retain office. The first of the bills to make its appearance was that providing cash and land subsidies for the Canadian Northern. This agreement for the special purpose of carrying the bye-election in the city of Victoria against E. V. Bodwell, and it served its purpose. But so far, the government which used it in the Victoria campaign has been afraid to advance it in the house, or permit its lavish provisions to be submitted to debate.

The next of the brood was the bill to provide a subsidy in cash and land to the promoters of the Coast-to-Kootenay railway. This is the same railway which last session the government fought to the last extremity, and, to place beyond the pale of further consideration, during the recess dispatched a costly survey party to prove that there was no feasible pass for such a road through the Rocky Mountains. Upon what public grounds, therefore, can the government now justify its action in asking the legislature to vote a cash subsidy considerably greater than the promoters were willing to accept last year, and to throw in a million acres of land as well? Does there not seem every reason for the belief that the railway policy of the government is thrown out as a bribe to those sections of the province which would be immediately benefitted by their construction, as well as to such members of the legislature as may be desirous of having such roads constructed.

This view seems to be shared even by some members of the governments own following in the house, and they appear to have reasoned the matter out in this wise:—If railway concessions are to be hung up for the purpose of bringing into line those who are not of us, why should not a similar price be exacted by those of us who have in the past supported the government without reward?

This is freely said to explain the latest addition to the government's litter of railway pups. This is a bill which subsidizes a railway from Nowhere to Nowhere in the north, but the promoters of which have cast envious eyes upon crown lands in Queen Charlotte island, which are supposed to be rich in coal and petroleum, and which, from the subsidy bill submitted, the government appears to be only to anxious to grant. But this is not all. Another member of the government following has a constituency in which there is room for a railway, and realizing that the time is opportune for securing unlimited concessions, he too is striking; and the buzz has already been started of the importance of the southern end of Okanagan, and the necessity for immediate railway facilities, with of course the usual incentive in the way of a cash and land subsidy. And it is said that another railway bill in the interests of the province is aborning.

Much as British Columbia requires railways, all things considered, it would be safer to wait. There is such a thing as paying too much for one's whistle.

EDITORIAL NOTES.

OVER forty Boards of Trade have so far accepted the invitation to attend the convention of the Boards of Trade to be held in Toronto on June 4th and 5th.

* * *

THE dominion government has passed an order-in-council selecting 50,000 acres of coal lands in the vicinity of Morrissey creek, in the Crow's Nest Pass. An excellent selection has been made It is said by the officers of the interior department that there is enough coal in this area to pay off the public debt of the dominion.

THE LICENSE FIGHT.

The Vancouver World published a despatch from Fort Steele which gives a short history of the trouble which has led to the appointment of W. H. Bullock-Webster to investigate the charges made against the commissioners:—

"All last year the fight for liquor licenses in this district was very hot, the best legal talent being engaged to fight for and against the various applications for licenses; the newcomers fighting to get into good towns and the established saloon men fighting to keep them out, and no matter which way the decision of the board went a howl went up from the other side against the commissioners, inspector, lawyers et al. The board which was thus bringing upon itself all this noise consisted of A. B. Grace, editor of the Fort Steele Prospector; F. Stork, of Fernie, and A. T. Clark, rancher of Moyie.

"In November and December the pot boiled furiously, and the highest temperature was reached in the fight for the Elko license. Elko is the prospective junction of Hill's road from Jennings, Mont., with the Crow's Nest line, and was full of railway laborers. There were but two saloon men in the town, P. J. McMahon and George Haggarth, and the "satisfy" certainly rolled in upon them in a manner to equal their boyhood dreams. A conservative estimate would put it a several thousand per week. Two other outfits Messrs. Stevents and Messrs. McIntosh and Jones, wanted to get into Elko to share in these dream fancies. A special meeting of the board was held at Moyie about the middle of November, but, after a strong fight, Hoggarth and McMahon won out. Jones, McIntosh and Stevens got things in shape then to apply again at the regular meeting of the board held on December 15th, but, lest in the multiplicity of applications, theirs should be lost sight of, they applied for and obtained a special meeting of the board for December 14th, the day before the regular meeting. At this meeting they were granted licenses to run to the end of the year, a matter of two weeks, but were thus shut out from the regular meeting and knocked out of their licenses for 1902. By the British Columbia laws applications have to be advertised in the local paper for two week's preceeding the meeting; the term of the board expired on December 31st, and it looked as if Messrs. McIntosh et al were down and out. But they were made of different stuff, on Monday, Dec. 17, at 11 p.m, a special edition of the FERNIE FREE PRESS appeared. containing the necessary advertisements, just one hour before the time limit was up. The meeting of the board was held on Dec. 31st and the licenses were granted for the ensuing year.

"During this fight the board was being criticized. first by one side and then by the other. and all kinds of designs were imputed. The Cranbrook Herald both in the news and editorial columns, called for investigations, stating that allegations had been made that involved the fair name of the district, and that it was the duty of the commissioners to call for an investigation. The matter was taken up at Victoria, and finally Chief Constable W. H. Bullock-Webster, of Nelson was appointed to hold inquiries into these charges."

The Dunsmuir government seems to have all the vitality of the devil fish. As soon as one tentacle is cut off and cast into the sea another is found sticking to some other part of the ship, hanging on for dear life. There is an end to the number of tentacles that a devil fish has, and we presume it is so with the government. They will all be cut off in time.—Rossland Miner.

Mrs. Hetty Green, the richest woman in America, in applying to the New York police for a permit to carry a pistol, was asked who or what she was afraid of. Her reply was:—"There are only two things in the world I am afraid of. They are lightning and a religious lawyer. God protect me from them. I can take care of myself under ordinary circumstances, but there have been so many murders of rich people that I feel I ought to be constantly on my guard."

DILL & HILL'S PRODUCE STORE

LOCAL AND GENERAL.

Stores will open at 4 p.m. today.

E. Charboineau, of Medicine Hat, spent several days in town this week.

Rev. A. Dunn, of Elko and Morrissey, was in town this week, the guest of Mr. F. J. Watson.

Mr. A. Beck has put in a new crossing opposite his store. A crossing at that point was badly needed.

The B. C, Furniture company received their new stock this week and are getting it opened up to commence business.

A. Maslonka, who has conducted a boot and shoe store in Fernie for the past year has pulled us stakes and moved to Elko.

Geo. Cody has received the contract for clearing the new recreation grounds and will begin operations as soon as the water is low enough.

Wm. Murray and Chas. Pippy, of Springhill, Nova Scotia, arrived in town on Monday aud will make Fernie their home in the future.

The Fernie Employment office is advertising for fifty teamsters and two hundred laborers to go to Moosomin to work on the construction of the new railroad there.

R. S. Day, of Victoria, general agent of the Imperial Insurance Co, for British Columbia, is in town this week. He has appointed J. E. Mills his agent here for the Company.

The new addition to the Central Hotel is being rushed to completion. The building is about 30x60, this addition will make the Central compare very favorably as to size with the other hotels.

F. C. Malpath, of Victoria, has been appointed to the position of manager of the local branch of the bank of Commerce. Mr. J. Kay has not yet received word of where he will be transferred to.

The big celebration advertised to take place at Calgary on Victoria Day has been postponed until Coronation Day, June 26th. This is probably due to the numerous washouts on the railways communicating with Calgary.

The "Pirates of Penzance" which was billed for Princess hall on Tuesday and Wednesday of this week, failed to keep their engagement owing to the railway blockade. The "Pirates" have been tied up at Frank, and that bright little town is doubtless receiving such an avalanche of amateur theatrical talent that it will long remember.

J. C. Drewy writes contradicting the report circulated in many of the Kootenay papers to the effect that he was about to launch out on the sea of matrimony. He says:—"It was forcing happiness upon him which he has not contemplated. He has no intention of setting up a family circle, and desires to make this known as he does not court the trouble of personal explanations and the wetting of the whistles of all the thirsty souls in Kootenay.

F. G. Fair, a wrestler from North Dakota, who was in Fernie trying to get a match on with some of the local men, was taken suddenly ill last week and died in the hospital on Sunday morning. The cause of death was inflammation of the liver. Fair was a chum of Rogers, the man who was advertised to wrestle with the German strong boy, of Rossland, in Princess hall, on Monday evening, and he left with the body for North Dakota on Monday evening, consequently the wrestle was postponed.

A meeting of the License Commissioners will be held in Fernie on June 15th, at 7 p.m. to consider the following applications:—

H. A. Kanouse, Hotel Waldorf, Fernie
E. J. Peltier, wholesale license, Fernie.
J. L. Gates, Victoria Hotel, Fernie.
Mrs. Levasseur, Alberta Hotel, Fernie,
R. Schram, Morrissey.
F. Rivers, Crow's Nest Landing.
Jessie Dilse, Cosmopolitan Hotel, Baynes Lake.
Julius Hurel, Kootenay Hotel.
Eugene Walter, Morrissey.

Among those who were detained in Fernie during the past week owing to the washouts and mud slides which have interfered with traffic on the Crow's Nest branch were the following who were registered at the Royal hotel:—Geo. B. Hull. Lethbridge; Neil Stuart, Grand Forks; F. Graham, Boston; Geo. M. Trimble, New York; J. E. Theslman, Vancouver; M. J. Henehan, Seattle; R. Carley, Nelson; Thos. Coulan, Toronto; W. J. Blundall, Nelson; John Ralph and Chas. Cox, Morrissey; R. S. Day, Victoria; C. A. Godfrey, R Welsher and J. Turner, Vancouver; F. West, Baynes Lake; J. Cann, Fort Steele; J. Breckenridge, W. Stocks and W. T. Mayes, Cranbrook; D. W. Ifft, St. Paul,

Owing to a large mud slide on the mines branch on Wednesday, the mines were compelled to suspend operations for the day.

J. E. Rice, of the Imperial Co., who has been spending the winter in Grand Forks, returned to Fernie on Tuesday evening.

Robt. Neering, yardmaster for the C. P.R. here, has resigned his position. J. W. Sullivan has been appointed to the position.

Elko celebration has been postponed until Coronation Day, owing to the condition of the Crow's Nest Branch. The glove contest, however, will take place on May 31st.

W. Pippy, electrician, who left for his home in Nova Scotia, some weeks ago, has returned to his old situation at the mines. Mr. Pippy reports business very dull in the east.

A happy event took place at the Coal Creek mines on Monday last at the home of Mr. Hugh Alexander, when his son, William, was united in marriage to Miss Ruis. The ceremony was performed by Rev. D. Holford.

Dr. Ker, a son of Canon Ker, Montreal, arrived in Fernie on Saturday to take the place of Dr. Doherty at the Coal Creek mines. Dr. Ker is a young man of marked ability, he having obtained the gold medal at McGill University last year. The medal is a prize given to the student who has the highest percentage of marks in his four-year term.

Big Show Coming

Manager Trites has secured by special arrangement, for one night only, Edwin Owens Towne's great comedy, "Too Rich to Marry." This company comes direct from New York City with almost the entire all star original cast. This certainly will be the coming event of the season. The date will be announced soon.

P. Burns, the Calgary cattle king, has secured an option on the opposition packing industry of that city and will shortly combine it with his own. Prices of beef cattle, according to a buyer prominently connected with the trade, never were so high on the western ranges as at present, ranging from $50 to $55 per head, the latter being the prevailing figure. The mining camps and coast trade are creating an active market at present.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

"A little check! There! Keep what's over after you've bought a nice bit of

"I will now wish you a very good morning."

jewelry for Mrs. S. You've been long suffering with me and shall be the first to share my luck."

Out in the streets, along King street, down Pall Mall, I trod the pavement with the conscious air of a man who had heard good news. Friends I passed saw it plainly on my face and rallied me on my beaming looks and buoyant demeanor. They had not left me when I walked through the swinging doors of Sykes & Sarsfield's bank. I was no longer the humble suppliant for a pitiful overdraft, but the possessor of a fine balance, who could hold his head high. Roy usually waited patiently outside, but today I encouraged him to enter at my heels.

CHAPTER II.

AT THE INTELLIGENCE OFFICE.

As I left the bank, where I had been most cordially received, with my sovereign purse full and the nice crisp notes for £250 carefully put by in my pocketbook, I began at last to believe in my fortune. There is a solid, unmistakable reality in the chink of good gold, while the supple civility of the great financiers, who had so lately looked black at my overdrawn account, proved how completely my position was changed.

The morning's adventures and surprises had occupied much time, and it was now getting late; past noon, in fact. We members of the "intelligence" made it a point of honor to be in good time at the office—an hour or more earlier than this. It had hardly occurred to me that I need not go to the office at all. You see, I had been some 13 years under discipline and not many hours an archmillionaire. Besides, there is such a thing as esprit de corps. I was a public servant, engaged in responsible work, and I could not, would not, have neglected it willingly; no, not for the wealth of the Indies.

So I stepped briskly down the steps below the Duke of York's column and crossed the park at my very best pace. For all that, I was overtaken near Birdcage walk by some one who hailed me without coming quite close.

"One word, sir, I pray, in your own best interests. But, sakes alive, keep back that hound. He is a fine beast, no doubt, but I'd rather have him farther away."

"Quiet, Roy! My dog will not harm you," I said civilly. "But at this moment I am very much pressed"—

"If you will allow me to walk with you a few yards, no more, I reckon I could make it plain to you that I have a good excuse for intruding upon your valuable time."

The park was as open to him as to me, and when he ranged himself alongside I made no objections. I confess I, too, was curious to hear what he had to say.

"You have enemies, sir," he began abruptly, and he looked so comical as he said this that I was rude enough to laugh. He was a broad shouldered, square faced, weather beaten looking man, with a florid complexion and a bulgy nose, irreproachably dressed in the very height of the fashion. But he had rather the air of a second class tragedian, with his long, black, curly hair and his voice so deep and so solemn as he conjured me to be serious.

"I reckon this is no laughing matter, captain. Guess your enemies will soon fix that. They mean mischief."

He spoke it like a sentence of death and seemed very much in earnest, yet I could hardly take it seriously.

"Such a threat scarcely affects me. You see, it is my business to risk my life. The queen has sometimes enemies, and hers are mine."

"These I speak of are altogether your own, captain—people who grudge you your new wealth."

"You have heard then?"

"Heard!" he cried, with great scorn. "There is nothing I do not know about you, captain. How did you enjoy the summer on the Cuyuni river, and were the maps you got at Angostura very useful to you?"

"Hush, man, hush! Who and what are you? What the mischief are you driving at?"

By this time we had entered Queen Anne's gate and were at the door of the office.

"Is this your bureau?" he now asked. "May I not go inside with you, only for one moment? The matter is urgent. It affects you very closely. Your danger is imminent. They are bound, these enemies, to do you an injury—a terrible injury."

"Oh, well, then, it must keep," I said petulantly. "I cannot give you any more time now; I am expected here. I suppose Sir Charles has arrived?" I asked of the office messenger, old Sergeant Major Peachey.

"Yes, sir, he has been here these three hours. He came—on his bicycle—soon after 9 a. m., and he has asked for you, I think, twice."

"There, your business must keep, Mr."—

"Snuyzer. I bow to your decision, but if you will permit me, I will call in Clarges street this evening at"—

"If you must come, come about 5. Good day," and I passed into the office.

I shared my room at the "intelligence" with a colleague, Swete Thornhill, of the artillery, a lively youth out of hours, but who stuck to his work manfully—more so than any of us, and we were by no means idle men.

"Thought you were dead," he said shortly, and without looking up from his papers; "wonder you took the trouble to come at all."

"I was detained by something special. Important business. Anyhow, it's no affair of yours," I answered, rather nettled.

"Yes it is, when it throws me out of my stride. I wish you'd make up your mind either to come or stay away altogether. There has been a regular hue and cry for you all the morning, and I've been disturbed abominably. I have those calculations of the comparative penetration of the new projectiles in hand, and they take some doing."

"Well, keep your hair on. I don't want to disturb you. But who was it, anyhow?"

"The boss chief himself, Collingham, Sir Charles. He has sent three times for you, and came in twice. Wanted you for something pressing. Now, I believe, he is doing the job himself. Wise man. Do it a blamed sight better than you or any man Jack of us."

At this moment an office messenger came in with a huge bundle of papers, which he placed before me on my desk. They were enveloped in the usual green "jacket," which meant extreme urgency, and on the outside was written, in a big, bold hand, "Captain Wood—speak."

"He'll do most of the talking, I expect," went on Swete Thornhill maliciously. "He's fit to be tied. Go in, man, at once, and take your punishment."

The distinguished officer at that time head and chief of our department was Major General Sir Charles Collingham, V. C., K. C. B., one of the most notable soldiers of the day, ardent, fearless, highly skilled, strong in counsel, foremost in the field, who had served almost everywhere, in all the wars, great and small, of recent years and had made a close study of the science of his profession as well. He had traveled far and wide, knew men and many cities, was as much at home at court as in camp, popular in society, which he cultivated in his spare moments, although he allowed nothing to stand in the way of his work. The service came first, and first in the service was the all important, transcendently useful department, as he thought it, over which he presided.

Sir Charles expected—nay, exacted—a like devotion from us, his staff officers, whom in all matters of duty he ruled with a rod of iron. None of us liked to face him when he was put out, which, it may be said, was not seldom,

"Great Scott!" he roared. "You lazy, idle young villain!"

for he was choleric, although not cross grained. Under a stern face and rough manner he had a kindly nature far down, for he did not wear his heart upon his sleeve, certainly not for an erring subordinate, as he considered me just then.

[TO BE CONTINUED.]

Theatrical Scenery.

Movable scenery was first used in Italy in the year 1508. It was the invention of an Italian architect named Peruzzi.

Westminster Abbey.

Officials of Westminster abbey charge fees aggregating over $2,000 when a memorial is placed in the abbey.

Teach self-denial, and make its practice pleasureable, and you create for the world a destiny more sublime than ever issued from the brain of the wildest dreamer.—Sir Walter Scott.

The man who foolishly does me wrong, I will return him the protection of my ungrudging love; the more the evil that comes from him, the more the good shall go from me. Buddha.

With love the heart becomes a fair and fertile garden, glowing with sunshine and warm hues, and exhaling sweet odors; but without love it is a bleak desert, covered with ashes.—Charles Warren.

LEGS SO SWELLED HE COULDN'T WALK.

Kidney and Urinary Troubles were Followed by Dropsy ---- A Perfect Cure by Dr. Chase's Kidney-Liver Pills.

This case of Mr. James Treneman, the well-known butcher, of 536 Adelaide street, London, Ont., is another proof that Dr. Chase's Kidney-Liver Pills are effective in the most severe and complicated diseases of the kidneys.

The double action which this famous prescription has on both the kidneys and liver is in a large measure responsible for its wonderful curative powers. When there are backache, frequent, difficult or painful urination, dropsical swellings, biliousness, constipation or stomach derangements, you may depend upon it that the kidneys are clogged and the liver sluggish.

It is at such times that Dr. Chase's Kidney-Liver Pills prove themselves prompt to give relief and certain to effect a cure. The evidence to prove this fact is simply overwhelming.

Mr. James Treneman states:—"Two years ago I was laid up with Kidney disease and urinary troubles. Besides the pain and inconvenience caused by these troubles I became dropsical, and my legs would swell up so that I could scarcely go around at all. Hearing of Dr. Chase's Kidney-Liver Pills I procured a box and continued the use of this valuable medicine until now I can say for a certainty that I am entirely cured. I never took any medicine that did me so much good, and am firmly convinced that if it had not been for this medicine I would not be working to-day."

As a family medicine of tested and known worth, Dr. Chase's Kidney-Liver Pills have never been approached. They act directly on the kidneys and liver, regulate the bowels and ensure the perfect action of the digestive and filtering systems. One pill a dose, 25 cents a box. At all dealers, or Edmanson, Bates & Co., Toronto.

Blue Ribbon Goods.

All we can do is to pack the best goods in Canada and tell you about them.

You know how good Blue Ribbon Tea is! Well, Blue Ribbon Coffee, Baking Powder, Spices, Flavoring Extracts, Chocolate Icing and Jelly Powder are just as good as the Tea. Every Grocer keeps Blue Ribbon goods, so all you have to do is to ask for them

Blue Ribbon Manufacturing Co.

People who never worry are entitled to a lot of credit they never get.

POOR DIGESTION

RENDERS THE LIFE OF THE DYSPEPTIC MISERABLE.

Food Becomes Distasteful and a Feeling of Weariness, Pain and Depression Ensues.

From LeSorelois, Sorel, Que.

Of the diseases afflicting mankind dyspepsia is one of the worst to endure. Its victims find life almost a burden. Food becomes distasteful; they suffer from severe pains in the stomach; sometimes excessive heart palpitation, and a general feeling of weakness and depression. Though this disease is one of the most distressing, it is one which, if the proper remedy is applied, can be readily cured. Thousands throughout this country bear testimony to the efficacy of Dr. Williams' Pink Pills as a never-failing cure. Among them is Mrs. Adolphe A. Latrousse, a well known and highly esteemed lady residing at Sorel, Que. She says:—"For two years I was a constant sufferer from bad digestion and its accompanying symptoms. Food became distasteful and I grew very weak. I suffered much from pains in stomach and head. I could not obtain restful sleep and became unfit for all housework. I tried several medicines without finding the least relief and I grew continually worse until in the end I would vomit everything I ate. I had almost given up hope of ever being well again when one day I read of a case similiar to mine cured through the use of Dr. Williams' Pink Pills. I determined to give these pills a trial and am happy today that I did so, as by the time I had taken eight or nine boxes my strength had returned, the pains which had so long racked me disappeared, my stomach would digest food properly and I had fully regained my old time health, and have not since had any return of the trouble."

Dr. Williams' Pink Pills are a purely tonic medicine and unlike all purgatives do not weaken the system, but give life and energy with every dose. They are a certain cure for anaemia, dizziness, heart troubles, rheumatism, sciatica, indigestion, partial paralysis, St. Vitus' dance and the functional ailments that make the lives of so many women an almost constant source of misery. Sold by dealers in medicine, or sent post paid at 50 cents a box, or six boxes for $2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

It is only by trying to understand others that we can get our own hearts understood.—R. L. Stevenson.

DIAMOND BACK TERRAPIN.

Formerly Despised. They Are Now Considered a Delicacy.

Half a century or so ago diamond back terrapin were fed to slaves and hogs. Today they are the rarest delicacy known to the epicurian world, says the Philadelphia North American.

Then they sold for $1 a barrel, and laborers, when hiring out, specified that they must not be compelled to eat terrapin more than twice a week. Today a barrel is cheap at $800, and millionaires travel hundreds of miles for a chance to feast on this most delicious of all meats.

Of course this means genuine diamond backs. There are many imitations.

Every first class restaurant in the country features "terrapin a la Maryland" on its menu, but in not one case out of a hundred is the real terrapin served. The diner regales himself on what he believes to be Maryland's choicest dish. Instead he is merely eating fresh water turtles, "sliders" or "North Carolina goldens."

The reason is simple. Restaurateurs don't serve real diamond backs because they can't get them. The world's total terrapin population does not exceed 25,000 of legal size, and these are confined to the shores of the Chesapeake bay, the only place that produces them.

Baltimore, Philadelphia and New York enjoy a monopoly. These three cities get practically the entire output, but few ever find their way across the Blue Ridge. The epicure unfortunate enough to be born in Chicago or St. Louis must either come east or forego the joys of terrapin.

To select a real diamond back amateurs should be guided by these distinguishing and characteristic markings:

It is of a greenish, dark olive color, sometimes running to spotted gray, yellow on the plate which surrounds the shell and has concentric dark stripes along the plate on both shells. The sides of the head are a dirty white, sprinkled with small black spots. The bottom shell is of whitish yellow.

The males are much larger than the females and have the concentric streaks much better defined. The female has the more delicate flesh. The male can be distinguished by his toe nails, which are much longer than those of the female.

Hail and Bombs.

The plan of destroying hail clouds by exploding bombs among them was suggested nearly 100 years ago by Professor Parrot of Riga.

Hiccough.

For this affection, which is so often provokingly obstinate, close the ears with the tips of the fingers, exert a certain pressure therewith, and at the same time drink in small drafts any sort of a liquid offered by another person, and the hiccough will cease instantaneously.

We are fellow laborers with a common end—reverent to the lowest for its possibilities, emulous to the highest for its sublime perfections.—Alexander Wilder, M.D.

SYRUP OF FIGS

ACTS GENTLY ON KIDNEYS, LIVER AND BOWELS,

CLEANSES THE SYSTEM EFFECTUALLY;

DISPELS COLDS HEADACHES & FEVERS;

OVERCOMES HABITUAL CONSTIPATION PERMANENTLY.

TO GET ITS BENEFICIAL EFFECTS,

BUY THE GENUINE — MAN'F'D BY

CALIFORNIA FIG SYRUP CO.

LOUISVILLE, KY. SAN FRANCISCO, CAL. NEW YORK, N.Y.

FOR SALE BY ALL DRUGGISTS. PRICE 50c. PER BOTTLE.

He who says there is no such thing as an honest man, you may be sure is himself a knave.—Bishop Berkeley.

Minard's Liniment Cures Colds, Etc.

Genius at first is little more than a great capacity for receiving discipline.—George Eliot.

Dr. J. D. Kellogg's Dysentery Cordial is a speedy cure for dysentery, diarrhœa, cholera, summer complaint, sea sickness and complaints incidental to children teething. It gives immediate relief to those suffering from the effects of indiscretion in eating unripe fruit, cucumbers, etc. It acts with wonderful rapidity, and never fails to conquer the disease. No one need fear cholera if they have a bottle of this medicine convenient.

If things fail to come your way, go around and head them off.

DEATH AND DESTRUCTION.

A TRAIN OF NAPTHA CARS EXPLODE AT PITTSBURG AND BURN 200 PEOPLE.

BUILDINGS BLOWN TO ATOMS—LARGE NUMBER OF PEOPLE SUFFOCATED.

Pittsburg, Pa., May 13.—The Sheridan yards of the Pan Handle railroad was the scene this evening of one of the most disastrous explosions and fires known in this section for many years. A score of lives were lost and about 200 persons were so badly burned that according to the judgment of the physicians in charge seventy-five per cent of them will die from the effects of their injuries.

The cause of the catastrophe was the explosion of a train of naptha cars which was being switched at the yards and in the switching the rear telescoped a car forward. The leaking naptha ignited from a switch light causing an explosion which threw the flames 50 feet high. Much of this escaping naptha ran through to Esplen borough, a distance of one and a half miles and caused another explosion, blowing to atoms the Seymour house and the Collins hotel on the river road and badly wrecking a frame building near by in which were congregated 200 or more sports from Pittsburg and vicinity, betting on the races and baseball. Few of the occupants of this building escaped injury, many being badly hurt.

The first car of naptha exploded about 4.40 o'clock and the spectacle soon attracted a large crowd on the streets, lining the hills on both sides of and parallel to the railroad. The second car exploded about five o'clock but it was at 6.15, when three more cars went up with a roar that could be heard for miles, that the work of destruction really began. A torrent of flame belched forth on each side of the track, sweeping back the terrified spectators like a charge of artillery and sending a shower of flame over their heads. The successive explosions had heated the air to such an extent that before the third explosion many were rendered unconscious by the heat and gaseous fumes and were carried away when the torrent of flame swept over the excited crowd.

After the explosion there was an awful hush for a moment and then followed a scene of frenzy. Men and women, their clothing ablaze, their faces scorched and blistered and their hair burning off their heads ran wildly shrieking from the furnace of fire. The townspeople did all in their power for the stricken victims and all the Pittsburg ambulances were immediately dispatched to the scene with a corps of physicians.

A NARROW ESCAPE.

Winnipeg, May 13.—A very small boy with a very large nerve, was the victim of a painful accident on Portage avenue yesterday about two o'clock, and narrowly escaped losing his life. A wagon passed up the street trailing a roofer's tar truck and a small roller. The child was unaccompanied by a parent or guardian of any kind, and considered that the opportunity of taking a ride on the roller was too good to be lost, so he clambered on. Rollers are not safe when used as infant's perambulators, and the youngster fell off, the roller passing over his head. He was picked up and carried to the sidewalk by some bystanders, where his cranium was submitted to an examination, but nothing more serious than a cut caused by the edge of the roller passing over his head could be found. He was placed in the carriage of a kindly disposed gentleman and taken to his home on Hargrave street. Had the roller been a little heavier the probability is that the child's skull would have been crushed to a pulp.

St. Catharines, May 13.—Wm. Belton, who has been missing from home since the 9th inst. was found drowned in the old Welland canal at the mouth of Ten-Mile creek this morning. The canal was unwatered at this point to aid in the search. No marks of violence were found on the body.

The Canadian Northern Baseball club has disbanded.

Haytian insurgents have secured possession of Port au Prince.

Gans won the light-weight ring championship at Fort Erie.

A death from smallpox occurred at the Winnipeg quarantine.

Principal Grant, of Queen's university, died somewhat suddenly on Saturday last.

The C.P.R. and its telegraphers have not been able to agree on a new wage scale.

The Venezuelan government troops failed in an attack on the insurgents at Carupano.

WHOLESALE HORSE STEALING.

Operations of a Daring Gang Near Estevan Accidentally Discovered.

All spring reports have been current among the ranchers that more than the usual number of horses were missing on the large range extending from Estevan one hundred and fifty miles west towards Willow Bunch and north from the international boundary as far as Moose Jaw Creek. Several ranchers were short short, but no definite information could be gained, until last week some missing horses of Mr. Jesse Bratts, of the Brokenshall Creek, returned to their usual range, but all the young horses were heavily branded with a very large new brand in the form of a circle or hat over a lazy H. This was so arranged as to obliterate the original brand, a U. bar. The work was well done, and but for the extraordinary size of the H., which was fourteen inches long, might have attracted but little attention. Mr. Bratt came down and rounded up, finding all his horses before missing, and twelve newly branded.

How many other horses with different brands have been similarly treated is unknown. Inspector Ladoc, with nine men of the N. W. M. P. force is working on the case, and with the aid of the ranchers from both sides of the line hopes to round up the gang at an early date. These outlaws have been operating in Montana and Canada for several years, but more extensively this season than ever before. It is to be hoped that this time they may be brought to justice. At the same time it should impress on the government the need of a regular police post somewhere in the territory to protect our ranching interests from the depredations of such lawless characters as frequent the lonely ranges of Northern Montana and that portion of Canada adjoining.

THE MERITS OF CLOVER.

Clover seed can be sown in all the eastern provinces of Canada and in the coast climate of British Columbia to advantage with all cereal crops, without lessening the grain crop for for the current year, for after the grain crop is cut the clover grows luxuriantly, acting as a catch crop during the latter part of the season.

Green clover turned under is specially valuable to the land, because while growing it absorbs large quantities of nitrogen from the air, and is stored up in its tissues. A heavy mat of growth is produced by autumn, which, when plowed under, add considerable to the available nitrogen in the soil, as well as to the store of humus. The proportion of nitrogen thus added to the soil is equal to that obtained from a dressing of ten tons of barn yard manure to the acre. Considerable supplies of potash, phosphoric acid and lime are also taken up by the clover plant during its growth, a part of which is gathered from the depths not reached by some other farm crops. Tests year after year with wheat, oats, barley and potatoes confirm the value of this method of adding to the fertility of the soil.

$2 AN INCH.

A brilliant entertainer was relating some of his experiences.

"I was ordering my advertisement in a western county newspaper office one day," said the narrator, "when a lanky countryman walked in and said he wanted an 'Im Memoriam' notice in the obituary column of the paper.

" 'My ole guvernor died a year ago,' he eyplained, 'and I should like some poetry in the paper about him.'

" 'All right,' answered the clerk;

"A look of intense amazement pass

" 'No,' said the rustic; can't you fix me up a bit ? '

" 'Certainly,' replied the clerk. Our charges for 'In Memoriam' notices are $2 an inch.'

"A look of intense amazement passed over the countryman's face.

" 'Good gracious ! ' he cried, as he made for the door; 'I can't stand that. My gov'nor was six feet high.' "

TROUBLE IN TURKEY.

Constantinople, May 17.—The Turkish garrison at Monastir, Macedonia, has mutinied and the soldiers have started serious rioting. They have seized the telegraph offices, whence they issue clamorous demands to the porte for the arrears in their pay. Bread riots have broken out at Alepho (in the northern part of Syria) in consequence of the increase in the price of this food due to the operatiuns of speculators in grain.

A terrible fatality occurred at Grace hospital, Toronto. Mrs. William Ketchen, a pneumonia patient in the John Ross Robertson Ward, jumped from the window to the asphalt pavement beneath, and died in a few minutes.

The miners' strike in Pennsylvania threatens to extend to all coal mines in the United States.

AWFUL DESOLATION

THE ASH-COVERED AREA IN ST. VINCENT EXCEEDS THAT OF MARTINIQUE.

NUMBER OF DEAD IN THE BRITISH ISLAND PLACED AT 1,700.

Kingston, Island of St. Vincent, May 17.—A correspondent has just returned here from a visit, on horseback, to the devastated district of this island, during which he traveled fifty miles and penetrated to within five miles of the Soufriere crater. The ash-covered area of St. Vincent exceeds that of Martinique, which the correspondent has also explored. The most conservative estimate of the death rate here now places the number at seventeen hundred. About thirteen bodies have already been interred. The entire northern part of the island is covered with ashes to an average depth of eighteen inches, varying from a thin layer at Kingston to two feet or more at Georgetown. The crops are ruined, nothing green can be seen, the streets of Georgetown are cumbered with ash-drifts like heaps of snow, and ashes rest so heavily on the roofs that in several cases they have caused them to fall in.

There will soon be 5,000 destitute persons in need of assistance from the government, which is already doing everything possible to relieve the sufferers. There are a hundred injured people in the hospital at Georgetown, gangs of men are searching for the dead or rapidly burying them in trenches, and all that can be done under the circumstances is being accomplished.

METHODS IN GERMANY.

Kaiser William Determined to Improve Railway Stations in His Empire.

Leigsic, May 17.—The municipality of Leipsic has approved a contract of the Prussian and Saxon railroad authorities for the construction of a central railway station at Leipsic, to cost 100,000,000 marks, of which Leipsic is to pay 17,000,000 marks. The state railroad administration is projecting new and splendid stations at other cities. Emperor William mished to spend 5,500,000 marks for the construction of a new railroad station at Homburg, but the Conservatives in the diet refused such a large appropriation for a railroad station at such a small town.

Emperor William is proceeding to press his scheme, however, and a curious scene occurred in the royal waiting room of the Homburg station, when his majesty ordered the burgomaster of Homburg and a number of prominent citizens of the town to attend a meeting in the waiting room and hear Herr Thielen, the Prussian minister of public works, lecture on the desirability of the proposed new station at Homburg, and the architects explain their plans of the projected buildings.

MARTIANS TRYING TO SIGNAL.

Lord Kelvin believes that the people of Mars have seen the electric lights in New York and are trying to signal to the city. He made this declaration at a banquet given in his honor at Delmonico's by Anthony N. Brady. According to the distinguished English scientist, the Martians are able to distinguish activity in New York alone. London, Paris, St. Petersburg and other big cities might as well not be existence so far as the Martians are concerned, he says "There was no electric lighting in New York in 1876, and Mars had not begun to signal," said Lord Kelvin, "but Edison brought out his lamp here in New York, and the whole world was lit. New York is the most marvellously lighted city in the world. New York is the only spot on this earth that Mars can see Mars is signalling only to New York. That planet cannot see anything else, and over our way in London it is almost the same way."

It is understood that Mr. O'Halloran, a Montreal lawyer, will be deputy minister of agriculture in the late W. B. Scarth.

Mr. E. A. Peters, B.A., an Englishman by birth, and about 34 years of age, was found dead in a field adjoining the town of Miami. It is supposed he took morphine.

Difficulties have arisen between Russia and Korea. The telegraph poles which the Russians erected have been taken down by the Koreans, and the Russian representative has demanded satisfaction from the Korean government, on the ground that the action of the Korean officials consisted of a violation of international rights.

The sincere applause of a single human being is of great consequence. —Johnson.

CULTIVATION OF FLAX.

An Industry With an Assured and Constant Market—Directions for Seeding.

The general information contained in this article is furnished by the provincial department of agriculture for the consideration and guidance of farmers in Manitoba who may be inclined to adopt flax as one of their regular crops.

The enormous crop of flax grown last year by the farmers of North Dakota and Minnesota, and the fact, so widely advertised that these two states are growing more flax than all the rest of the United States, has led a great many farmers in Manitoba to take more interest in this grain as a general farm crop. As a result inquiries have been numerous on the subject of flax growing, its methods, effect on the soil and probable profits.

Flax is no new crop in Manitoba. In the southern part of the province and especially in the municipalities of Rhineland and Stanley, the Mennonite farmers have made a specialty of this crop for years, and their English-speaking neighbors have not been slow to follow their example. In other parts of the province a small field of flax may here and there be seen. The total area devoted to this crop from year to year has not been much in excess of 20,000 acres.

The demand for flax seed is equally constant with the demand for other grains. Canada is now and always has been a large importer of linseed oil, both in the raw state ans manufactured into paint. This demand is bound to increase from year to year. The oil is a staple product, and with the development of our cattle breeding industry, the demand for oil cake and oil meal will increase in the same proportion as these feeds are as much of a necessity to the feeder as are bran and shorts. In Manitoba the quantity of these used is, at present, comparatively small owing to the abundance of pasture and coarse grains. As settlement becomes more dense and pasture consequently more valuable, larger quantities of concentrated foods will be required and our farmers will have a home market for these important by-products of the flax crop.

An important advantage claimed for flax is that it can be grown successfully on new breaking. There is somewhat differing testimony given by different persons relative to the effect upon the land of growing a flax crop on new breaking. Some persons report that it leaves the land in bad condition for a succeeding grain crop of any kind, and that only a season of summer-fallowing will bring it into good condition, while others claim that good crops of wheat may be secured regularly after flax on breaking. Discussion usually brings out the fact that the men who succeed do so by removing the flax from the land early in the fall and plowing or backsetting at nearly the usual time for backsetting prairie sod, while those having poor results usually backset the land very late in the fall or wait until the following spring to plow it. The former course resulted in a well rotted sod, the latter in a very badly rotted sod. Prairie sod is usually broken in the spring after grass has started, and backset late in August or early in September.

It is a common belief that flax is very exhausting to the fertility of the soil. Experiments and chemical analysis on soils before and after flax and wheat crops seem to demonstrate that this prejudice is unfounded. At the North Dakota experiment station a great deal of study has been given to this question and Prof. Sheppard states his opinion, as a result of these investigations, that flax has no more injurious effect upon succeeding crops of other grains than wheat has. At the same time he states that flax should not be grown except in rotation with other crops. He also gives it as his opinion that a better crop of wheat can be secured after flax than after wheat.

Like all small grains flax does best upon rich land which has been previously fallowed or which has produced a cultivated crop the year before. It is a mistake to sow flax on land which has weeds started upon it. Flax is a poor weed fighter, and to allow the weeda a week or two the start of it in growth handicaps it heavily. The ground should, therefore, be put in the best possible condition. The depth to sow depends to a certain extent on the condition of the soil. Sowing flax deep is a common cause of trouble. The flax seed is small, and consequently is not able to reach the surface when planted more than three inches deep. With the soil in prime condition two to two and one-half inches is about right. The nearer the surface that the seed can be placed and still secure the requisite moisture, the better the results.

Two pecks of seed per acre will usually prove about the right amount. In good growing weather a less quantity might be better, but if the weather and soil conditions are somewhat unfavorable a little more than the above amount would be advisable. Seeding should be done late enough that the young plant will not be cut off by the late frosts. After the plant has a number of leaves there is no danger from this source. While it has only the two seed leaves the frost is likely to kill it. The crop requires a comparatively short time to mature and will usually ripen in good season when sown late in May or even in June.

CALGARY'S CATTLE SHOW.

240 Cattle and 50 Stallions Exhibited—The Sale a Success.

The first annual show and sale held under the auspices of the Horse Breeders' and Cattle Breeders' association at Calgary met the expectations of the most sanguine. Prominent breeders from all over the west were present.

There were 240 head of cattle and 50 entire horses on exhibition. All classes of horses were represented, aged Clydesdales being exceptionally good In cattle the Shorthorns are the favorites with the breeders, the great majority of entries being of that breed. Herefords were fairly well represented.

The exhibition of Alberta bred yearlings (Shorthorns) would not in the opinion of eastern stockmen present, disgrace Toronto fair. The judges were Robert Miller, of Stouffville, horses; and Professor Day, of the Ontario Agricultural college, cattle; and they performed their difficult duties to the satisfaction of everybody.

The sale which was a feature of the exhibition, and which was inaugurated for the purpose of bringing buyers and sellers into closer contact, was a marked success. A large number of both horses and cattle changed hands.

MISS NIGHTINGALE'S BIRTHDAY.

London, May 16.—Congratulations poured in yesterday upon Miss Florence Nightingale, the famous Crimean war nurse, the occasion being her 79th birthday. There were a number of callers at her residence, all of whom were received and welcomed, although the health of the venerable heroine has been very poor for several years. The congratulations of the King and Queen, in the form of autograph letters, were delivered to Miss Nightingale by special messenger. Dispatches couched in felicitous phrases were received also from Miss Clara Barton, the Czar of Russia and other notables.

It is known that for years Miss Nightingale has been an invalid as a result of her experiences in the Crimea a half century ago. It is not so well known, however, that her sick room has been the scene of the most arduous and constant labor for the improvement of the health of the soldier. Although now confined to her bed a large part of the time she always accorded a welcome to any one who seeks advice on a question affecting the interests of the sick or those who nurse them. She is always cheerful, and spends most of her time in reading.

WANTS MERRITT RECALLED.

Ottawa, May 16.—It is understood that Col. Evans, commanding the Second C. M. R. in South Africa, has asked that Col. Merritt, second in command of the regiment, be recalled. In the meantime Col. Cameron, who was junior major, has been given the place of Col. Merritt.

The reasons which are gievn by Col. Evans are said to be of a rather peculiar character. It is said that upon arriving in South Africa Col. Merritt endeavored to get himself promoted so that he could be senior to Col. Evans, and also tried to get the name of the regiment changed.

COERCING PARLIAMENT.

Stockholm, Sweden, May 16.—The general strike decreed by the Social Democratic party in support of the Suffrage bill, the debate on which began in parliament yesterday, was carried out as arranged, and the tie-up of business has been practically complete. Traffic generally is suspended. The street cars, cabs, carts and steamers are not running, and no work is going on in any of the factories or workshops. The printers also have joined the strike, which will last throughout the parliamentary debate.

HIS NAME IS DENNIS NOW.

Napoleon St. Dennis, a shantyman, of Hull, committed suicide by jumping from the Chaudiere bridge into the Ottawa river. "My name is St. Dennis, and I am astray," were the last words he shouted to some workmen who were on the bridge at the time Before they could catch him he had jumped into the vortex below.

PROROGATION.

Ottawa, May 16.—The house of commons prorogued yesterday afternoon. Friends of Sir Wilfrid Laurier presented the premier with an oil portrait of himself.

The body of Joseph Rabiscaw, one of the halfbreeds drowned in the Saskatchewan river about the middle of April, has been found near Fraser's lumber mill, at Edmonton.

A COMPLETE BLOCADE

TRAFFIC AT A STANDSTILL ON THE CROWS NEST BRANCH

Sunday's Snow Storm Causes Heavy Los to Lumbermen Along Elk River

The warm weather of last week followed by Sunday's snow storm and subsequent rain has caused higher water in all the rivers and creeks along the C. N. Railway than has occurred since 1894. Traffic has been at a standstill for nearly a week. The heaviest damage has been done to the railroad between Michel and the Loop, at the latter place one bridge is gone, one canted over and a long tressle leaning over in danger of going at any time, one cut entirely filled up with a mud slide, while several tremendous slides have gone through the Loop bridges, and numerous small washouts all along the line, terminating with a bad washout three miles west of Michel. West of Fernie the damage has been lighter, Coal Creek bridge, just west of the town, has had a hard run, the centre pier being undermined by the water lurched up the stream and slid partly off its foundation allowing the bridge to drop nearly six feet in the centre. It is being repaired temporary so that traffic can be resumed shortly. Some small slides reported from Creston completes the list of damages done to the railway. Tuesday's passenger from the east is held at the Loop, while from the west Monday's train succeeded in getting to Michel and Tuesday has been held here. Freight trains are stalled at various places along the line. Officials say trains cannot be run before ten days, and by all indications it will be good work if they are running then.

Considerable damage has been done to private property. The Carbon Creek Lumber Co., at Michel, has been nearly totally wrecked by a bridge coming down the creek and breaking jam, the creek has changed its course in several places. The Fernie Lumber Co's. mill has been flooded, compelling every one to move to higher ground, two bridges have been washed out entirely putting a stop to all work, all the men employed in the bush have been payed off as it will be impossible to resume work for some time. All the flats along the river here are flooded and many houses are in danger of being carried away. Mott & Son's mill is under four feet of water but up to the present no damage has been done. McRae's mill at Coal Creek has been slightly damaged and has suffered a heavy loss in losing a large boom of logs worth several thousand dollars.

During the last twenty four hours the water has dropped over two feet and it seems as though all immediate dangers are past unless the weather changes again.

Mr. A. H. Cree has been appointed one of the Strathcona Horse contingent to attend the coronation on June 26th.

An Emergent meeting of the Elk River Lodge, No. 35, A.F. & A.M., will be held to-day (Saturday) at 2 p.m. at which all Masons are urgently requested to be present. By order of the W.M.

THE PREACHERS' COLUMN.

Every human being has his faults, and the forgiveness of trivial faults we have a right to demand from friendship. The finest composition in human nature, like the finest china may have a flaw, and yet present a beautiful pattern.

Time—time is the most undefinable yet paradoxical of all things; it is the measure of all things, but in itself unmeasurable, and the grand discloser of all things, but is itself undisclosed, like space it is incomprehensible because it has no limit; and it would be still more so if it had. Time is the most subtle, yet the most insaliable of depredators; and by appearing to take nothing is permitted to take all; nor can it be satisfied until it has stolen the world from us and us from the world. It constantly flies yet overcomes all things by flight; and, although it is the present ally, it will be the future conqueror of death. Wisdom walks before it, opportunity with it and repentance behind it. He that has made it his friend will have little to fear from his enemies and he that has made it his enemy will have little to hope from his friends.

The Human Panorama. — Mankind moves onward through the night of time like a procession of torch-bearers, and words are the lights which the generations carry. By means of these they kindle abiding lamps beside the track which they have passed, and some of these, like the stars, shall shine for ever and ever.

When you see a viper, or an asp, or a scorpion, in a box of silver or gold, you do not love and think it happy on account of the magnigcent materials by which it is surrounded. Thus when you see vice lodged in the midst of wealth, be not deceived. Give not homage to what is wrong, on account of the splendour that encompasses it.

At Elko, on 27th May, 1902, at 7 o'clock p.m.
At Fernie, on 29th of May, 1902, at 10 o'clock a.m.
At Cranbrook, May 31st, 1902, at 10 o'clock a.m.
At Marysville, June 2nd 1902, at 10 o'clock a.m.
At Kimberley, June 4th, 1902, at 10 o'clock a.m.
At Fort Steele, June 5th, 1902 at 2 o' lock p.m.

Of which all persons interested are hereby required to take notice and govern themselves accordingiy.

LESTOCK R. FORBES,
Secretary to the Commissioner.

Kimberley, B.C., 10th May, 1902.

NOTICE OF ASSIGNMENT.

PURSUANT TO THE CREDITORS TRUST DEEDS ACT, 1901.

NOTICE is hereby given that Martin O'Reilly and James J. O'Reilly, trading as Martin O'Reilly & Co., in the Province of British Columbia, Merchants, have by deed dated the 1st day of May, A.D., 1902, assigned all their personal property, real estate, credits and effects, which may be seized and sold under execution, to D. K. Mollison, of the City of Vancouver, Commercial Traveller, for the purpose of satisfying ratably and proportionately, and without preference or priority, their creditors.

A meeting of the creditors will be held at Room No. 3, Cuthbert Block, Fernie, B.C., on Wednesday, the 21st day of May, instant, at 10 o'clock in the forenoon, for the giving of directions with reference to the disposal of the estate.

And further take notice that all creditors are required on or before the 21st day of June, A,D., 1902, to file with the assignee full particulars of their claims duly verified, and the nature of the securities, if any, held by them,

And notice is hereby given that after the 21st day of June, aforesaid, the said assignee will proceed to distribute the assets among the creditors of whose debts or claims he shall have received notice, and that he will not be responsible for the assets or any part thereof so distributed to any creditor of whose debt or claim he shall not then have received notice.

Dated this 10th day of May, A.D., 1902.

D. K. MOLLISON,
Assignee.

DEATH ROLL GROWING

HEROIC FIGHT BEING MADE TO RECOVER BODIES

Generous Response is Being Made to Fernie's Call for Assistance for its Afflicted Citizens

The work of recovering the bodies of the men still remaining in No 2 mine was pushed as rapidly as possible during Sunday and to-day, and althodgh the total number recovered was not as large as was expected still very good progress was made in clearing the mine. The men who are working on the relief parties say that the afterdamp is now all out of the mine and that the chief difficulty they have to contend with is gas. The driving of this out is rather slow work as it has a tendency to wall up against the air. Of the bodies recovered to-day most of them came from No. 8 room. Four of them it was impossible to identify at the mine, but when they arrived at the morgue the identity of two of them was secured as Thomas Barton and Joseph Landry. Two of the six were identified at the mine as Alfred Colco and John Horbet. All efforts at securing the identification of the remaining two had been unsuccessful up to three o'clock this afternoon.

The plan upon which the rescue party is at present working is to clear the mine of gas as much as possible and bringing the air back with them effect the recovery of the bodies. The men who are engaged on the rescue work are of the opinion that the figures of the Coal Company are approximately correct with respect to the loss of life, and that the stories of a death roll mounting up to 150 are not well founded and happily will not be realized.

The following is a list of the bodies recovered and brought to town.

AN INSULT RESENTED

PROVINCIAL CONSTABLE STEVENS ORDERED OUT OF TOWN.

Charged With Making an Inhuman Remark Concerning the Victims of the Coal Creek Disaster.

The action of the citizens of Fernie last evening in seeing that Provincial Constable Stevens left the city forthwith was the chief topic on the streets to-day. And while all expressed regret that it had been found necessary to cause a police officer to go, and to see that he did not stand upon the ceremony of his going, yet there were none who condemned the miners and their sympathizers for insisting upon the course which they took. That the miners were very much worked up over the contumely which had been heaped upon their dead their can be no question, and indeed they would have shown that they were lacking in manhood if they had not resented the insult, and in a marked and public manner. While the excitement was at its height it was all but impossible to learn the motive which prompted the men to action, but today when the offender had placed a considerable distance between himself and the town, the miners generally were prepared to speak dispassionately concerning it.

It appears that the remark which occasioned so much offence was made to Charles Martin by provincial constable Stevens on Friday evening, or the night following the explosion at the mine. There are two versions of the remark that was made but they are almost directly contradictory, and the circumstances appear to altogether support the version as given by Martin. His story is that on the night following the explosion Stevens met him and said: "It is too bad about this," evidently referring to the mine explosion. Martin replied: "Yes it is," whereupon Stevens added: "Yes, that there were not a couple of hundred more."

That the friends and relatives of the unfortunates should resent such a remark is only the action that should be expected from men, but it is evident that they were not hasty. The nature of the remark was evidently circulated about town as Martin says that Stevens came to him some time later and asked him to deny that he had made it, and that he made a reply to the effect that he did not think he would have very much to do with it.

It was not until Sunday night, about 11 o'clock that the miners, having satisfied themselves of the truth of Martin's version of the matter decided to take action. They marched in a body to the Provincial Police office fully 300 strong, and by the time that they reached there the number of citizens almost equalled that of the miners, the crowd stretching far across into the recreation grounds. The leaders of the miners called for Constable Barnes, the senior police officer, and presented their case before him in a very few words. They asked that the offending constable be forthwith discharged and ordered to leave town. Officer Barnes endeavored to reason with the men and as soon as he commenced to speak they accorded him a respectful hearing. He said he depreciated such a remark as much as any of them and that he did not understand how any man could utter it, and he further assured them that if it was proven that Stevens had made it that he should go. He explained that stipendiary magistrate Armstrong would be in town on the following day and suggested that the matter be left in abeyance until he should arrive.

This was not satisfactory to the miners and they insisted that Stevens should be dismissed at once and that he leave town forthwith. Officer Barnes was in a corner, but he exercised good judgment. The sentence of the miners' court was not severe and it promised the best solution for the problem so he said that Stevens should go. His decision was received with prolonged cheers from the men and they proceeded to give it effect at once. The crowd started to hustle the police officer at the double quick. This took Officer Barnes by surprise as he thought that having promised the crowd that Stevens should leave the officer would be given a chance to make some preparation. He at once caught up with the leaders of the crowd and accompanied them out on the C.P.R. track for a considerable distance in the direction of Michel. There were a number of the crowd who were rather noisy but no injury was attempted to their prisoner, all their zeal being directed with a view to making him hit the ties as quickly as possible.

There is one feature in connection with the matter which is to be regretted, and this is the liability to exaggeration which the very unusual occurrences of Sunday evening are exposed to, before they make their way into the press of the outside. It is to be hoped that the interests of Fernie in this instance will not be sacrificed to that of the sensational artist. Just at the present time Fernie has been sorely stricken. There are scores and scores of houses which are now peopled solely with sorrowing widows and helpless children. In their necessity and the utter inability of the people of the town to cope unaided with the task that is before them, a call has be issued to all the Dominion for assistance. It is therefore easy to see how very seriously the cause of these unfortunates would be prejudiced if it should be circulated through the press that in their grief, great as it undoubtedly is, the wage workers of Fernie have overstepped in the least degree, not warranted by circumstances, that proper observance of the law which has been so marked in the past as to call forth general commendation.

Despite what may be said to the contrary, the incident of Sunday evening may be regarded as closed. That it should have been necessary is to be regretted, but commendation of the men for their moderation, in view of their great provocation, is more in order than anything in the nature of an apology or excuse for their action.

Lib. Legislative Dec 31 1902

The Fernie Free Press

CROW'S NEST MOUNTAIN

VOL. VII. No. 22. FERNIE, B.C., SATURDAY, MAY 31, 1902. WHOLE NUMBER, 178.

Are you paying rent

and do you wish to

Own Your Home

If so please read this carefully:

The Canadian

Birkbeck

Investment & Savings' Co.

Head Office, Toronto.

Capital Subscribed - - $2,500,000
Paid up - - - - - 600,000

Will assist you to

Purchase or Build a Home,

permitting repayment in

Easy Monthly Instalments

just as you now pay RENT.

To Rent Payers and all persons of moderate incomes who can furnish part of the cost of a Home, either in land or cash, and who desire to purchase or build homes for themselves, or pay off existing mortgages thereon, the Birkbeck Company offers special opportunities, extending to them the privilege (to most people an indispensible one) of **repaying their loans in Easy Monthly Instalments** not exceeding the Amount usually spent in rent.

THE ADVANTAGES OF THIS PLAN are apparent to borrowers. The loan so obtained runs through to its finish, right by a system of monthly rents, and needs no renewal. The borrower is not confronted at a set time (usually at the end of three or 5 years) with his entire indebtedness. The falling due of the principal is no longer a cause of keen anxiety. On the contrary, under the Birkbeck's method the Borrower is enabled to gradually cancel his indebtedness. The burden has been evenly distributed over a more lengthened period, and the Loan, for which formerly the interest could scarcely be raised annually, is now not only easily carried but paid off in the end almost imperceptibly. Intending Borrowers are given:

1. **Choice of the Period and Amount of Repayment, and**
2. **Absolute Limitation as to the number & Duration of payments**

The payments are always the same and are due at fixed intervals, borrowers therby knowing at the outset

EXACTLY HOW MUCH

they will have to pay each month and year and exactly how long.

The practical result of borrowing under the old system is that, after paying interest for a term of years, the original debt still exists. This is true in nine cases out of ten.

A Bundle of Receipts

will be all you will have to show after years of rent-paying. The house will still be the property of the landlord.

Special Feature

Borrowers are not Required to Become SHAREHOLDERS and are free of any liability outside of the unpaid portion of their loans from the company. In the Birkbeck Company there are

No DELAYS
FINES
FORFEITURES,

No uncertainity in estimating maturity.

No Shareholders' risk or Liability.

No double set of fees for local and head Office solicitors charges.

For further particulars regarding the Company's Attractive Rent Purchase Plans, apply to

Arthur H. Cree,

Office over Bleasdell's Drug Store, Fernie.

GATHERING THE DEAD

111 BODIES HAVE BEEN RECOVERED.

Seventeen Known to be Still in the Mine —Rescue Work Proceeding Slowly. Subscription List to Date.

The work of recovering the bodies of of those who lost their lives in the Coal Creek Mine disaster last week has been pursued steadily since the time of the accident with the result that there are now 111 men out. There are still 17 known to be in the mine, but owing to numerous caveins the work is almost at a standstill at present. The company have a large force of men at work repairing the mine, and it is thought that it will be possible to recover the balance of the dead before the middle of the week.

THE INQUEST.

At 10 o'clock on Friday morning the inquest on the bodies of the victims of the late disaster was opened in Joyce's Hall under the presidency of Coroner Trites. The court was crowded with miners and citizens when the coroner took his seat. He was supported by deputy Coroner J. F. Armstrong, as assessor and the various parties interested were represented as follows:—The Government by Mr. J. A. Harvie, of Fort Steele; The Western Federation of Miners by Mr. S. S. Taylor, K. C., Nelson: the local miners' union by Mr. W. R. Ross, of Fernie; Messrs. McPhail, Wilson, Macdonald, McMillan and Mrs, Malcolm McLeod, relatives of victims, by Mr. Wm. Blakemore, M. E., and the Coal Co. by Mr. W. A. Macdonald, K.C., of Nelson and Mr. H. W. Herchmer, of Fernie. The jury was constituted as before. On the opening of the court Mr. Harvey asked for an adjournment for a week or ten days in the ground that it would be indecent and inconvenient to proceed with the case until all the bodies were recovered. Mr. S. S. Taylor acquiesced ff the adjournment were as short as possible and Mr. Blakemore also consented if steps were taken to secure the attendance of witnesses after the adjournment who might contemplate to wrong the district and if an assurance were given that the enquiry would proceed "de die in diem" on the resumption. Ultimately it was decided to call one witness Michael Finnan and then adjourn till Monday, June, 9th, on the above understanding. Mr. Macdonald assurred the court that the coal company were anxious for the fullest investigation and would offer every facility.

Michrel Finnan was the only witness called, and upon being examined testified as follows:—

I am a shot firer, and work for the Crow's Nest Pass Coal Co. in No. 2 mine.

Q. During what period have you worked as a shot firer for the company?

A. Well, I started in work on the 2nd of May, this month, and I worked until the 22nd—until the explosion occurred.

Objection was raised here by Mr. Macdonald, who asked for a definition of the procedure to be adopted in the inquiry, urging that the examination of witnesses should properly be in the hands of the representative of the government. Upon Mr. Harvey stating that he had no information as to the character of the evidence to be elicited from this witness, and stating also that he had no objection to Mr. Ross continuing the examination, it was ordered that Mr. Ross be permitted to proceed, the point being noted.

Q. What were your duties as shot firer?

A. I had to tamp the holes, charge the holes and fire the shot.

Q. In what part of the No. 2 mine were you working?

A. On the right hand side and on the left hand side of the air hoist, in the machine section.

Q. Who operated the machine?

A. Well, there were different men in the difierent shifts. There were three men. There was one man named Noble, and I don't know the names of the other two men.

Q. Who ran the machine on your shift?

A. Well, sometimes it was one, sometimes another. They changed off.

Q. Who was running the machine on your shift on the 22nd?

A. On the 22nd—Noble.

Q. Now, will you tell us how the coal was mined by that machine?

A. Yes sir, I'll do the best I can. The face there would be about twenty feet wide where the machine was working. It mined from four and a half to five feet deep, and at the back end of the undermining it would be from five to six inches high from the pavement. In front it is perhaps eighteen inches, and at the back five or six inches.

Q. And who bored the holes?

A. I did myself up to the last day. I was supposed to have a man to help me, but didn't have one up to the last day. I was supposed to have a man who could speak English with me to drill holes. I could not get one, and so I drilled the holes myself. The holes were drilled, one in the centre of the face—

Q. About how high, or how far from the top?

A. About two feet from the roof—from the top. The coal would average from five to six feet. In some places it would run pretty near ten feet. Where it was five or six feet I put the holes in about five inches from the top, about three feet from the pavement.

Q. How many holes did you put in?

A. Well, when I first started in there were two holes, one in each end, and latterly we put in three holes, one in the centre so as to make it easier to shoot.

Q. How deep were the holes put in?

A. Well the mining averaged four and a half to five feet from the face in, and if it was five feet then the hole would be put in four feet. That was the way I did. I don't know how the rest did. I am speaking about myself. The two holes at the end of the face were put in about eighteen inches generally.

Q. Who was working with you that last day? What was the man's name?

A. I forget his name. It was Fred—(Man among spectators states his name to be Fred James) That's the man—Fred James.

Q. What was his duty?

His duty was to drill the hole; he helped me to pack water to dampen down the dust; helped me to tamp holes; he put in tamping and I tamped the holes.

Q. What method was adopted in getting the dust out of the bore holes?

A. When I started in to work at first we used to clean them out with the augur After I had been working a few days I went to the boss and told him we needed a scraper, and he gave me an order to get one.

Q. How long did you work without the scraper?

A. About four or five days. I got the scraper about the 5th or 6th of May.

Q. Now, during that time, Mr. Finnan, did anything happen in connection with your work that was out of the usual run—that is during those few days?

A. Yes, sir, we used to have fires every day. After the shot was fired the coal used to go on fire. We must have had five or six at least during the first four or five days. There would be one or two fires every day on an average the first few days I worked there.

Q. Can you tell what caused those fires?

A. Well, I thought the reason we had several was on account of the powder. It carried a flame and the dust that was lying around took fire from the shot and burned there.

Q. Did any serious fires occur?

A. Well, we had one that lasted half an hour. The coal would get on fire. The dust would catch fire from the shot then the coal, before we could get it out.

Q. Now tell us—I asked if any serious consequences resulted from any of those fires.

A. Yes sir, the one I was speaking of lasted over half an hour.

Q. Which fire was it—was it the first or last of the series?

A. No, it wasn't the first or last. As far as I can remember it was about third.

Q. Will you describe how it occurred?

A. Well, after firing the shot I went to see the place and found it on fire. I went to get help from the men to get it out but couldn't. I tried to get them to get water but there were no English speaking men about, excepting the men who ran the machines. I tried to get the Slavs or Austrians or whatever they are, to lend a hand in packing water, but they dropped everything and ran out. I got a piece of rope and told them to give me a hand in getting the fire out and so they finally did. We got the fire under control. The coal came down and was burning in the bottom; coal was lying on the pavement; we had to load up three or four loads of coal before we got it out; had to break up this chunk of coal before we could get water to the bottom of the fire. The fire was going over half an hour. Some of the other fires lasted from five to ten minutes. Some of them only a minute; I should think the average would be about five to ten minutes. We had a long way to pack water; it must have taken a minute or a minute and a half to bring it.

Q. Where did you pack the water from?

A. It was the No. 2 room — laying on the road to the No. 2 room.

Q In the other cases what was it ignited—caught fire?

A The coal. I think myself it was this loose powder—this black powder that was to blame. At the time I started in work we used to get a low grade powder and I went to the boss and told him that I did not think it was safe to use it. Every time we fired a shot there would be a terrible flare and I told the boss I would like a better grade of powder and he gave me No. 2 fine. We never had so much trouble from fire after that.

Q That is what you think was the cause but what was it started to burn?

A The coal. She would blaze out from the shot, and before we could see what was up the coal would be on fire—it would be red before we could get it out.

Q You say then that it started direct from the flash of the shot and ignited the coal?

A Well the dust I think would catch first. There was lots of flame there, and when we put the water on, the smoke would come so thick we couldn't see for a while; then the coal would be red. I always watered or dampened down well before firing a shot.

Q How much powder did you put in each hole?

A I put in an average of from twenty to twenty-four inches in each hole.

Q Did you drill the holes level or how?

A Yes, drilled them in level.

Q How much water did you require to use in each case to extinguish a fire?

A In some cases one bucket would put it out; sometimes it would take five or six I don't know how many buckets we needed to put out the big fire; we packed so many I can't remember.

Q Did anything particular occur, do you remember, the day of the explosion?

A Yes sir, there was a fire that day on the left hand side of the air hoist at the back entry of the No. 2 mine, in the machine section. The fire occurred about one o'clock or perhaps a little after in the afternoon of the 22nd. The explosion took

PRIZES FOR HORSES AT THE WINNIPEG FAIR

Following is the full list of prizes offered by the Winnipeg Industrial Exhibition association for honors at the forthcoming fair :

CLYDESDALES.

Sec.		1st	2nd	3rd
1	Stallion, four years or over	$35	$25	$15
2	Stallion, three years	30	20	10
3	Stallion, two years	20	12	8
4	Stallion, yearling	15	10	5
5	Broad Mare, with foal at side	25	15	10
6	Brood Mare, and two of her projeny, three years and under	15	10	5
7	Three-year-old Filly	15	10	5
8	Two-year-old Filly	15	10	5
9	Yearling Filly	10	6	4
10	Foal	10	6	4
11	Mare, any age ....Diploma			
12	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C. Theaward to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	25	15	
13	Stallion, one year and over, foaled in Man., N. W. T., or B. C.	15	10	
14	Mare, one year or over, foaled in Man., N. W. T., or B. C.	15	10	
15	Stallion, any age.....Cup, value $25.00. Given by the Clydesdale Association. No horse may win more than one cup in 1902.			

SHIRES.

16	Stallion, four years or over	30	20	10
17	Stallion, three years	25	15	10
18	Stallion, two years	15	10	5
19	Stallion, yearling	10	6	4
20	Brood Mare, with foal by side	25	15	10
21	Brood Mare, and two of her projeny, three years and under	15	10	5
22	Three-year-old Filly	15	10	5
23	Two-year-old Filly	10	8	5
24	Yearling Filly	8	6	4
25	Foal	6	4	2
26	Mare, any age ..... Diploma			
27	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C. The award to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	20	10	
	Special prizes by the Shire Horse Society, of London, England.			
27a	For the best stallion registeredin the Shire Horse Society's Stud Book. Gold medal, value £10.			
27b	For best Mare registered in the Shire Horse Society's Stud Book. Gold medal, value £10.			
28	Stallion, any age, Clydesdale or Shire, special by the Horse Breeders' association of Manitoba. ..... Diploma ribbon			
29	Brood Mare, with foal by side, any age, Clydesdale or Shire, special by Horse Breeders' Association of Manitoba ..... Diploma ribbon.			

DRAFT HORSES.

30	Brood Mare, with foal by side. 1st prize by Massey Harris Co., Two-furrow Victoria Gang Plow, value $40	40	10	5
31	Brood Mare and two of her projeny, three years and under	15	10	5
32	Three-year-old Gelding or Filly. 1st prize by Canadian Moline Plow Co., ... Value	22	10	5
33	Two-year-old Gelding or Filly	12	8	5
34	Yearling Gelding or Filly	8	5	3
35	Foal	6	4	2
36	Team Geldings or Mares, suitable for dray purposes To be shown in harness to a dray or wagon	25	15	10
37	Team Geldings or Mares, suitable for farm purposes, in harness to a wagon. 1st prize by Massey-Harris Co., 1 Chatham Fanning Mill, value	30	15	10
38	Mare, any age ..... Diploma			
39	Stallion and three of his get. Get to be foaled in Man., N. W. T., or B. C. The award to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	25	15	

HORSES FOR GENERAL PURPOSES.

40	Brood Mare with foal by side. 1st prize, special by Cockshutt Plow Co., value $20	20	10	5
41	Brood Mare and two of her projeny, three years and under	15	10	5
42	Three-year-old Gelding or Filly	12	8	4
43	Two-year-old Gelding or Filly	10	6	3
44	Yearling Gelding or Filly	8	5	3
45	Foal	6	4	2
46	Team Geldings or Mares in harness, to wagon or carriage. 1st, special by Fairchild & Co., value $25	25	15	10
47	Mare or Gelding, any age ....Diploma.			
48	Brood Mare, with foal by side. Special by Horse Breeders' association of Manitoba ..... Diploma ribbon.			

STANDARD BRED HORSES.

49	Stallion, four years or over	30	20	10
50	Stallion, three years	25	15	10
51	Stallion, two years	15	10	5
52	Stallion, yearling	10	6	4
53	Broad Mare, with foal at side	25	15	10
54	Three-year-old Filly	15	10	5
55	Two-year-old Filly	10	8	5
56	Yearling Filly	8	6	4
57	Foal	6	4	2
58	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C. The award to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	25	15	
59	Stallion, any age. Special by the Horse Breeders' association of Manitoba ..... Diploma ribbon.			
60	Brood Mare, with foal by side. Special by Horse Breeders' Association of Manitoba ..... Diploma ribbon.			

ROADSTERS.

61	Brood Mare, with foal by side	15	10	5
62	Three-year-old Gelding or Filly	10	6	4
63	Two-year-old Gelding or Filly	8	5	3
64	Yearling Gelding or Filly	6	4	2
65	Foal	6	4	2
66	Pair Geldings or Mares, in harness. 1st prize by Hon. Thomas Greenway	25	15	8
67	Single Gelding or Mare, in harness	15	10	5

CARRIAGE HORSES.

68	Stallion, four years or over, 16 hands or over	30	20	10
69	Stallion, three years	15	12	8
70	Stallion, two years	12	10	6
71	Stallion, yearling	8	6	4
72	Brood Mare, with foal by side	15	10	5
73	Three-year-old Gelding or Filly	10	6	4
74	Two-year-old Gelding or Filly	8	6	4
75	Yearling Gelding or Filly	6	4	3
76	Foal	5	3	2
77	Pair of Matched Geldings or Mares, in harness, 16 hands or over	20	10	5
78	Gelding or Mare, in harness, 16 hands or over	15	10	5
79	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C. The award to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	25	15	
80	Stallion, any age. Special by the Horse Breeders' Association of Manitoba ..... Diploma ribbon.			
81	Brood Mare, with foal by side. Special by Horse Breeders' Association of Manitoba ..Dip. ribbon			

HACKNEYS.

82	Stallion, four years or over	30	20	10
83	Stallion, three years	15	12	8
84	Stallion, two years	12	10	5
85	Stallion, yearling	8	6	3
86	Brood Mare, with foal by side	15	10	5
87	Three-year-old Filly	10	6	4
88	Two-year old Filly	8	6	4
89	One-Cear-olh Filly	6	4	3
90	Foal	5	3	2
91	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C. The award to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	20	10	
92	Stallion, any age. Special by the Horse Breeders-Association of Manitoba ..... Diploma ribbon.			

THOROUGHBREDS.

93	Stallion, four years or over	30	20	10
94	Stallion, three years	15	12	8
95	Stallion, two years	12	10	6
96	Stallion, yearling	8	6	4
97	Brood Mare, with foal by side	25	15	10
98	Brood Mare and two of her projeny, three years and under	15	10	5
99	Three-year-old Filly	10	6	4
100	Two-year-old Filly	8	6	4
101	One-year-old Filly	6	4	3
102	Foal	6	4	2
103	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C. The award to be made on the proportion of 25 per cent. for the stallion and 75 per cent. for the projeny	25	15	
104	Stallion, any age. Special by the Horse Breeders' Association of Manitoba ..... Diploma ribbon.			
105	Brood Mare, with foal by side. Special by the Horse Breeders' Association of Manitoba ..... Diploma ribbon			

SADDLE HORSES.

106	Stallion, registered, four years and over, best calculated to produce saddle horses and army remounts	30	20	10
107	Gelding or Filly, three years old	10	6	4
108	Gelding or Filly, two years old	8	5	3
109	Gelding or Filly, yearling	6	4	2
110	Foal	5	3	2
111	Brood Mare, with foal by side	15	10	5
112	Gelding or mare, over 15.2 hands, to be shown under saddle	15	10	5
113	Gelding or Mare, under 15.2 hands, to be shown under saddle	15	10	5
114	Saddle and Harness Horse, Mare or Gelding, 15 hands hands and over, to be shown in an appropriate vehicle and judged as a horse best suited for harness purposes. The horse to be unharnessed in the ring and shown and judged under saddle. The horse best suited for both these purposes to be awarded first prize	15	10	5
115	Stallion and three of his get—get to be foaled in Man., N. W. T., or B. C.	25	15	
116	Brood Mare, with foal at side. Special by Horse Breeders' Association of Manitoba ..... Diploma ribbon			

PONIES.

117	Pair, in harness, 12 to 14½ hands	10	5	
118	Pony, in harness, 12 to 14½ hands	6	3

COAL LANDS SELECTED.

The Dominion Government Have Chosen 50,000 Acres Near Morrisey Creek.

Ottawa, May 20.—The Dominion government has passed an order-in-council selecting 50,000 acres of coal lands in the vicinity of Morrissey Creek, in the Crow's Nest Pass coal fields. The right to do this was obtained as one of the concessions from the C P. R. when assistance was given that company to construct the Crow's Nest Pass line. It was estimated that coal obtained from the C. P. R. in connection with this transaction, would be worth over $20,000,000, but the money value was not regarded as important as the possession of these coal lands by the government, which would control the price of coal to the mining centres of that province, and prevent monopolies among private owners of coal lands.

An officer of the interior department who has some special knowledge on this subject, says that there is enough coal in the lands selected by the government to clear off the public debt of the Dominion.

SENTENCES AT KAMLOOPS.

At the Kamloops, B. C., assizes Louis Paquette, who killed Alfred Ledger at Notch Hill on April 26, was found guilty of murder and sentenced to death. Ah King, a Chinaman, was given eighteen months' imprisonment for attacking another Chinaman with a knife ; and an Indian named Paul was sentenced to five years for having criminally assaulted his daughter. Two Indians of Shuswap were found guilty of burglary of the store of James Ross and given eighteen months each. Three Siwashes were charged with killing another Indian at Similkameen ; one, named Sickamen, was found guilty, and Squamichan and John were found to be accessories to the fact. They were sentenced to 7 years' imprisonment, the full extent allowed by law.

NO MORE BAD EGGS.

M. Louis Parisot, an eminent French chemist, has discovered a liquid which he claims to be capable of preserving the freshness of eggs for a period of twelve years. A year ago he placed a large number of these delicacies in the liquid, getting a magistrate to witness his act and seal the tank with his official seal. A few days ago the tank was opened in the presence of his worship, the eggs being found to be in excellent condition. Four eggs were selected haphazard out of the tank, and on being boiled were eaten, the magistrate pronouncing them to be excellent and possesing a delicate flavor. Another triumph for the inventor happened the other day. Some eggs which had been in the liquid for four months being successfully hatched, eight out of twelve placed under the hen proving fertile. M. Parisot states that he can preserve eggs with his preparation at a cost of 7¼d. per 1,000.

HAS TWO HUSBANDS.

Magistrate Cowan has a bigamy case under trial which furnishes some peculiar features, says the Edmonton Post. Victoria Brereton, who lives near St. Albert, is charged with having taken a husband in violation of the law. She was married in Quebec about fifteen years ago. Her husband left her, and she did not hear from him for years. She went to the States, where she remained for some time. About a year ago she removed to St. Albert, where she married a man named Marcotte, with whom she is living at present. It appears that the first husband is living at Quebec, having returned there in quest of his wife, hence the action. The first husband has not reached Edmonton, and the case is on adjournment waiting for witnesses.

GALWAY ELECTION FIGHT.

Dublin, May 20.—A county election contest at Galway led to a series of free fights here yesterday. Lord Morris of Kilanin, county councillor for Galway, and formerly high sheriff of that county, personally led his supporters against his Nationalist opponents. A dozen men were injured, some of them seriously, during the rioting.

TOOK ROUGH ON RATS.

Windsor, Ont., May 20.—Sylvia Chambers, aged 19, a mulatto, took a dose of rough on rats, with fatal results. No reason for the girl's act is known.

KILLED BY LIGHTNING.

Grand Forks, N. D., May 20.—H. Brennan, aged 13, while coming in from the field near Forest River, N. D., to escape a storm was struck by lightning and instantly killed.

Common grain bags have been advanced 50c per dozen at Minneapolis owing to the strength of the cotton market.

Henry O., won the free-for-all trot at Brandon on Saturday.

A PRETTY ROMANCE

MANITOBA TEACHERS BECOME ENGAGED WHILE EN ROUTE TO SOUTH AFRICA.

TWO EASTERN GENTLEMEN SUCCUMB TO THE CHARMS OF WESTERN GIRLS.

When the host of friends bade such a flattering farewell to Miss Murray, of Winnipeg, and Miss Younghusband, of Portage la Prairie, Manitoba's quota to the Canadian teachers who enlisted to assist in teaching and training the juvenile Boers in the concentration camps of South Africa, they had not even a remote idea that fate was so soon to weave around the lives of those young ladies a tale of courtship and love as pretty and romantic as was ever conceived by the pen of fiction. Their charms of personality and manner were recognized, but evidently not to the extent that strangers appreciated them ; for letters received from other members of the educational contingent tell how they have already made enviable though bloodless conquests not in the realms of sciene and "ologies," but in the less prosaic and more attractive field over which Cupid rules instead of warlike arms or birch-rods. These two teachers left Winnipeg in maiden meditation fancy free, but they found congenial company aboard the Lake Ontario and before the trip to the other side had been concluded each had promised to one day exchange their certificates as public school teachers for another parchment which has important bearing upon a ceremony in which altars and orange blossoms figure conspicuously.

The numerous friends and acquaintances of these popular young ladies to whom this announcement will come as a startling surprise, will rejoice to learn that the fortunate young gentlemen interested will make most acceptable matches, and congratulations are now in order. The young ladies met their fates the evening before the Lake Ontario sailed from Sand Point pier, St. John, when all the teachers and their friends were entertained at dinner by Manager Campbell, of the Beaver line. The two young men were to be fellow passengers. One of them was a resident of Cape Breton and the son of a man well known in the Canadian financial and industrial world; the other was a wealthy Englishman returning to his home in Bristol after a business trip to Canada. The acquaintance thus formed proved but the stepping stone to a closer intimacy, and before the Lake Ontario was two days out both the young men were quite willing to admit the charms which lurked in the eyes of the two pretty school teachers from the Prairie Province. Later came the announcement of the engagement of the two couples.

While this may create surprise it should not create wonder, as the chic western girls with the bloom on their cheeks as fresh as the roses of their native prairies can never be otherwise than irrisistible. Only two were enlisted on this occasion and both made conquests as complete as rapid. How jealous must be their less fortunate sisters of the effete east !

MORE ELEVATORS.

The London Milling company of Willmar, Minn., is soon to build twelve elevators in the Canadian west, and the concern promises to increase the number next season if all goes well with the project. At present the company owns thirteen in Minnesota, operating on a three and one-half cent margin, whereas Canadian elevator men expect from five to eight cents. The first elevators to be built by the company will be in the immediate vicinity of Winnipeg, but it is intended to strike out into new fields as the business develops.

NORTHWEST ELECTIONS.

The general elections in the Northwest Territories resulted in the government led by Mr. Haultain being sustained by a large majority. Returns are incomplete from a few constituencies, but at present indications the government will have 22 supporters and the opposition and independents 13.

TELEGRAPHIC BRIEFS.

A fire did $25,000 damage in Lindsay, Ont.

Valuable discoveries of gold, cinnabar, graphite and mercury have been made north of the Canadian Soo.

The executive of the Manitoba branch of the Royal Caledonian Curling Club, at a meeting, made preliminary arrangements to receive the Scottish curlers who will visit Canada next winter.

FERNIE FREE PRESS.

FERNIE, B.C.

Peculiar Taxation In Holland.

Some of the most peculiar of taxations recorded are to be found in the archives of Holland. In 1791, for instance, there was in existence a tax imposed on all passengers traveling in Holland. In 1874 a duty of 2 shillings was levied on each person who entered a tavern before noon, on those who entered a place of entertainment, on marriages and deaths and on many other things. If a person was buried out of the district to which he belonged, the tax was payable twice over.

Some persons have periodical attacks of Canadian cholera, dysentery, or diarrhœa, and have to use great precautions to avoid the disease. Change of water, cooking, and green fruit, is sure to bring on the attacks. To such persons we would recommend Dr. J. D. Kellogg's Dysentery Cordial as being the best medicine in the market for all summer complaints. If a few drops are taken in water when the symptoms are noticed, no further trouble will be experienced.

The City of London, only one square mile in area, has in all 77 churches.

Minard's Liniment Cures Colds, Etc.

From nettles can be spun a thread so fine that 60 miles of it weighs only 2½lb.

In his Vegetable Pills, Dr. Parmelee has given to the world the fruits of long scientific research in the whole realm of medical science, combined with new and valuable discoveries never before known to man. For delicate and debilitated constitutions, Parmelee's Pills act like a charm. Taken in small doses, the effect is both a tonic and a stimulant, mildly exciting the secretions of the body, giving tone and vigor.

The average smoker who lives to be sixty spends in his lifetime $1,750 on tobacco.

Pleasant as syrup; nothing equals it as a worm medicine; the name is Mother Graves' Worm Exterminator. The greatest worm destroyer of the age.

The refuse and rubbish of spices, drugs, and dyes is known in the trade as "garble."

C. C. Richards & Co.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for every day ills and accidents of life I consider it has no equal.

I would not start on a voyage without it, if it cost a dollar a bottle.

CAPT. F.R. DESJARDIN.

Schr. "Storke," St Andre, Kamouraska

A ruby of one carat is worth £14 to $20. One of four carats will fetch £400 to £450.

A Lancaster bachelor, out of patience with the flies which invaded his room, got two sheets of sticky and sat down in one of the chairs, near a window. Returning late that evening he forgot the sticky stuff and sat down in one of the chairs. He soon got up and proceeded to pick the paper off his trousers. As it was hard to get at, he took the pants off, and while cleaning them unconsciously sat down in the other chair and then stood up and meditated.

The above item, clipped from an exchange, would point the moral that it is better to use Wilson's Fly Pads (poison) clean, safe and sure. One 10 cent package will kill more flies than 300 sheets of sticky fly paper.

The biggest wine cooler is at Windsor. It was made for George IV., and two men could sit in it with ease.

Minard's Liniment Cures Garget in Cows.

A Savage Bluejay.

A sportsman camping on one of the lakes of Sullivan county, N. Y., offered to bet $10 to $1 that nobody in his party could guess how he had received an injury to a finger which he held bleeding before the spectators. No one guessed, and the man went on to explain that while standing by the lake he had seen a bluejay flying over so close above his head that he instinctively threw up his hand to stop it. The bird neither stopped nor swerved, but instead dashed straight for the hand, striking it with such force that the bill penetrated to the bone and sent the blood spurting as though the man had been struck by a knife.

This sort of action is in line with the general conduct of the jay. It is one of the most aggressive birds on the continent, robbing the nests of other birds and sometimes even killing young squirrels. The chief good thing that can be said of it is that it often robs the nest of the English sparrow.

Her Smile.

He looked despairingly into vacancy. "I have had my misgivings," he said in a dull, passionless voice, "but now I am sure. Your laugh shows me you are utterly heartless."

She turned pale.

"Heavens!" she cried in terror. "Did I open my mouth as wide as that?"

Sometimes a manjs bad luck is due to his reputation.

Parmelee's Pills possess the power of acting specifically upon the diseased organs, stimulating to action the dormant energies of the system, thereby removing disease. In fact, so great is the power of this medicine to cleanse and purify that diseases of almost every name and nature are driven from the body. Mr. D. Carswell, Carswell P.O., Ont., writes: "I have tried Parmelee's Pills, and find them an excellent medicine, and one that will sell well."

British railways carry yearly about nine tons of freight for every person in the country.

REUBEN DRAPER

FEW MEN HAVE HAD SUCH A THRILLING EXPERIENCE.

A Quebec Gentleman Who Relates an Interesting Story of a Narrow Escape—Happy Deliverance Just In the Nick of Time.

Bristol, Que., May 19.—(Special)—There are not many men or women alive today who have passed through such a terrible trial as Mr. R. Draper, of this place. Mr. Draper says:

"About four years ago I was taken ill with what I thought was Gravel.

"I was suffering great pain, so I sent for the doctor; he gave me some medicine and said he would call again.

"He came twice more and charged me fifteen dollars. I was a little better, but not at all well, and in a short time after I took another bad spell.

"This time I sent for another doctor, with about the same results, only I was getting weaker all the time.

"Then a man advised me to try Dodd's Kidney Pills, for he said they had cured his mother.

"I thought I would try them and I got a box and commenced to take them right away.

"In just one week after I had taken the first dose, I passed a stone as large as a bean, and in four days after I passed another about the size of a grain of barley.

"This gave me great relief and I commenced to feel better at once.

"The improvement continued and I gained strength very rapidly until in a short time I was as well as ever.

"This is over four years ago, and I have not had the slightest return of the trouble since, so that I know now that my cure was an absolute and permanent one."

There are forty-eight words in the English language which have two distinct pronounciations. "Bow," "tear," "invalid" are the best examples.

MARKETS.

Manitoba wheat has ruled very dull during the week. Exporters seem to find it hard to do business freely, and there is no spirited demand such as we are accustomed to when the markets are strong and advancing. In line with the weakness in outside markets, values have declined this week, and the best price paid for No. 1 northern, spot or May delivery, in store Fort William, on Friday was 74½c, and for 2 northern 73c. A large block of No. 2 northern was sold by one of the elevator companies at 72¾c in store, Fort William, Jun? delivery. No. 1 hard is not much wanted, and the value is 77¼c in store Fort William.

Liverpool Wheat—No. 1 northern closed on Saturday at 6s 5d.

FLOUR—Hungarian patent $2.15 per sack of 98 pounds; Glenora, $2; Alberta, $1.85; Manitoba, $1.70; and XXXX, $1.25.

GROUND FEED—Oat chop, per ton, $28; barley chop, $22; oatmeal feed, $14.50; mixed barley and oats, $25; oil cake, 930.

MILLFEED—Bran, in bulk, is now worth $15.50 per ton, and shorts $17.50.

OATS—The market has advanced 1c per bushel this week owing to improved demand. No. 2 white oats, Fort William, 41c per bushel; No. 1 white, in car lots on track, Winnipeg, per bushel, 45c; No. 2 white, 41 to 42c; feed grades, 38 to 39c; seed oats, 50. At country points farmers are getting 29c to 31c for No 2 white oats.

BARLEY—Stocks available are very light and the market has jumped to 46 to 48c for seed grades and 40c to 42c for feed grades, in car lots on track Winnipeg.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

HAY—Receipts are light, and the market is $1 higher at $8 to $9 per ton for fresh baled. Loose hay is not offering to any extent.

POULTRY—There is very little poultry in the market. Chickens are worth 12½c per pound for fresh killed, and turkeys 12½c to 15c, according to quality.

BUTTER — Creamery—The market is weaker owing to increased offerings. One or two summer factories came into the market last week and sold at 20c per pound, factory point. Fine weather would rapidly increase the offerings.

BUTTER —Dairy—The market is lower owing to increasing supply. Commission houses are quoting 14 to 16c per pound now for round lots of choice tub butter on a commission basis.

CHEESE—No new Manitoba cheese has offered yet and the demand is being to some extent supplied with Ontario stock at 13½c per pound.

EGGS— Receipts have increased considerably this week and the market is now weaker. Dealers are now paying 11c per dozen for fresh case eggs, delivered in Winnipeg.

POTATOES— Farmers' loads delivered in Winnipeg, 25c per bushel.

DRESSED MEATS—Beef is very scarce, and has advanced ½c this week. Beef, city dressed, per pound, 8 to 9c; veal, 7½ to 8½c; mutton, 10c; spring lambs, each, $3.50 to $4.50; hogs, per pound, 7¾ to 8½c.

Hides—No. 1 city hides, 6½c No. 5½c, No. 3. 4½. Kips and calf, the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horse-hides, 50c to $1.

WOOL is worth 6½c per pound for Manitoba unwashed fleece.

LIVE STOCK.

CATTLE— Beef cattle continues scarce, and the market is again firmer. Butchers are now paying a full 5¼c for best animals, and from that down to 4¾c for inferior grades. Stockers are going west in considerable numbers. Yearlings are worth as high as $16 per head at point of shipment. Two-year-olds are bringing $20 to $22 per head.

SHEEP—About 5 to 5½c per lb is the value off cars, Winnipeg.

HOGS—Best packers' weights 6⅜c per pound off cars Winnipeg, an advance of ⅛c over last week. Other grades bring proportionate prices.

MILCH COWS— Cows are very scarce, and good milkers readily bring $45 each in this market. As most of the stock offerings are poor, they bring less money, the range being from $35 to $45.

HORSES—There is a good steady demand for horses for both farm and general use, and dealers find no difficulty in disposing of all they can secure. The market is being largely supplied from Ontario. There are some Montana horses selling. Prices continue high.

Four miles of trees have been planted on Winnipeg streets this season.

Judge McTavish will investigate the alleged Canadian tobacco combine.

It is reported that Joseph Chamberlain, colonial secretary, threatened to resign unless the British cabinet acceded to his wishes regarding terms for Boers.

BABY'S BIRTHRIGHT.

Is Health and Happiness — How Mothers Can Keep Their Little Ones Well.

Health is the birthright of all little ones. It is a mother's duty to see that her baby enjoys it. Mother's greatest aid in guarding children's health is Baby's Own Tablets—a medicine which can be given with perfect safety to the youngest baby. Among the many mothers who have proved the value of this medicine is Mrs. J. W. Booth, Bar River, Ont. She says: "My baby suffered greatly from sore mouth and bad stomach. Several doctors prescribed for her, but nothing seemed to benefit her in the least till I began giving her Baby's Own Tablets, and then in a short time my little one was fully restored to health. I would not be without the tablets in the house and would advise all mothers to use them when their children are ailing."

Baby's Own Tablets are used in thousands of homes in Canada and always with beneficial results. They contain absolutely no opiate or other harmful drug; are mild, but sure in their action and pleasant to take. The very best medicine for all troubles of the stomach and bowels, curing colic, indigestion, constipation, diarrhœa, and simple fever. They give relief in teething troubles, dispel worms, promote healthful sleep and cure all the minor ailments of children. Price 25 cents a box or sent by mail postpaid by writing direct to the Dr. Williams Medicine Co., Brockville, Ont., or Schenectady, N. Y.

Flies may be kept from picture frames by washing them over with water in which a bundle of leeks haue been steeped for a week.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, MAY 31, 1902.

THE CALL OF DUTY.

The horror of the calamity which has overtaken Fernie was so new upon us at the date of our last issue that we could not give due expressions to the many emotions that overwhelmed us and had to be content with chronicling the details that came to hand hour by hour. During the present week the ever healing influence of time has been at work and nature's restorer for strained and weary minds has led us back at least a little way towards the normal. It is not that the horror has diminished, nor even that we can hear its retreating footsteps, for like a dreadful ogre that haunts us in the night its overshadowing presence is still felt, but the daily familiarity with mournful procession and funeral dirge, and the mute but eloquent tokens of grief that meet the eye at every turn from dawn to dark have so accustomed us to the trappings of woe that we are no longer paralysed and benumbed as at first, but have aroused ourselves to the call of duty and are striving to alleviate as far as may be the burden of the catastrophe. That call like a trumpet blast is both loud and clear Its first sound rings out to Fernie and the towns and camps in the Kootenays and does not die away until it has reached the confines of the Dominion. It is for help! Help prompt and sufficient. That this call has been heard by many is evidenced in the splendid contributions to hand, but some who should have been the first to hear have failed to respond and meanwhile the relief committee is filled with anxiety as to the future. With at least forty widows and sixty families to be provided for the funds in sight are totally inadequate and nothing less than $100,000 will avail to establish a permanent fund such as is required. We urgently appeal to every reader of this paper and to everyone who may meet the appeal through other channels to aid us. Let all give what they can, and those who have been greatly enriched even "beyond the dreams of avarice" by our Kootenay mines of their abundance.

The Inquest

We congratulate Coroner Trites and the people of Fernie on the calm and judicial air which prevaded the court house on the assumption of the inquest yesterday. This was by far the most important and imposing legal function ever held here and the chief officer certainly rose to the occassion. The large number of professional gentlemen present gave an air of dignity and importance to the proceedings and the examination of the only witness was a model of fair and anxious enquiry which augurs well for the ends of justice. We shall be much surprised if on the present lines the court does not reach the truth even if it lies at the bottom of a well. The presence of Mr. W. A. Macdonald representing the Coal Co. and his expressed readiness to furnish the men and their advisers with every information available produced a good effect in sharp contrast to the dissatisfaction occasioned by the refusal of information during the week to the counsel of the union. The company are well advised to be frank and offer the fullest opportunity for investigation which will in the end be of as great advantage to their management as to the public.

The License Commission

Bearing in mind the professional etiquette which forbids comment upon a case whilst it is "sub-judice" we may still be permitted to say that if the "fiasco" at Fernie on Thursday is any criterion of the result of the work of the commission in other places it is a discredit to those who were instrumental in bringing the enquiry about. There should be more important work in the province for men of the ability of Mr. Bullick-Webster than to travel round in such a rotten cause. It must on all grounds be regretted that the conduct of all license commissioners should be called in question and reflection cast on their reputation on such flimsy and contradictory evidence. Fred Stork whose hands at any rate are clear deserves the sympathy of his fellow townsmen in being connected even by implication with such an enquiry and should be re-appointed as a mark of confidence.

The Ross Government has been returned to power by a majority of five seats.

LICENSE COMMISSION INQUIRY.

The third sitting of the commission appointed to investigate the alleged charges of irregularity against the License Commissioners and the License Inspector was held in the Court House, Fernie, on Thursday morning at 10 o'clock.

W W. Tuttle, proprietor of the Royal Hotel, was the first witness examined. In reply to the question whether he had ever paid any money to the license officials of South East Kootenay, he stated that he had not, neither had he ever paid any money to any government official illegally in connection with the running of the hotel.

Mrs. Sarah Jennings proprietress of the Central Hotel, said that she had applied for a license on Sept. 20th, but the license had been refused because the petition presented had not contained the required number of householders. She again applied on Nov. 2nd. At a meeting of the licence commissioners she having in the meantime obtained the names required She had never paid any money to any of the commissioners or the Inspector, but had paid J. A. Harvey, of Fort Steele $400 to act as her lawyer in connection with securing the license. She had no complaints to make against the way the Liquor License Act had been administered. The hotel belonged to her and she received all the receipts from the same. She had never paid any officer any money, in connection with the hotel. The $400 had been entrusted to Mr. Barnes, who was going to Fort Steele, to give to Harvey. She had been advised by Wm. Eschwig to secure the service of J. A. Harvey.

J. L. Gates was the next to take his stand. He stated that he was manager of the Victoria Hotel and held a half interest in it, Mr. H. J. Turner, holding the other half. He had never paid any money to any of the commissioners or the inspector. He owned an interest in an hotel in Kimberley with Mr. H. W. Barnes, before he was appointed license inspector, but that after the appointment Mr. Barnes had transferred his interest to R. S. T. Galbraith.

Wm. Eschwig, proprietor of the Northern, was the next witness called. He said that he had on two or three occasions given money to Inspector Barnes and produced a receipt for $8 which stated that the money was for the expenses of R, E. Beattie to attend a special meeting of the commissioners held at Fort Steele. He said that he had also paid Barnes $10 on another occassion as his subscription toward the payment for an analysis of hop beer. He thought that the analysis had been made all right also that the other hotel men had put up $10 each. On another occasion he had given Barnes $25 or $30, the receipt of a slot machine which had been sent to him from Kimberley, but that Barnes had told him the money belonged to a man in Kimberly.

A. E. Brown was then called. He was part owner in an hotel at the Loop, the license was in his name, but Wm Eschwig was interested in the business. He received his license on October 28th. He had never paid any money to any of the commissioners or to the inspector, but had paid J. A. Harvey about $600 since receiving his license to keep things quiet. Questioned as to what he meant by keeping things quiet he said that a gambling game had been conducted in his house on two or three different occasions and that on each occasion he had received word that someone has been complaining to Mr. Eschwig that he was keeping a rough house. When he paid Harvey, the matter was dropped for a time. He and Mr. Eschwig had an agreement with Mr. J. A. Harvey to the effect that if the former would pay $100 a month to Harvey his license would not be concelled. This money had been paid for two months, when Mr. Eschwig cancelled the agreement. He thought the agitation for an investigation was the reason the agreement had been cancelled. He did not know whether the commissioners or the license inspector had received any of the money paid to J. A. Harvey or not.

Wm. Eschwig was again called and corroborated Brown's evidence. He said that Harvey had come to him and asked how much it was worth to him to prevent H. Howard for obtaining a license at the Loop. He replied that it was worth considerable and that above-mentioned agreement was the outcome of their conversation. He produced a copy of the agreement, which was not signed. He did not know if Harvey paid money to commissioners or not.

H. A. Kanouse, proprietor of the Hotel Waldorf, said that he obtained his license in July of 1898. He had never paid any of the officials and had no complaints to make in connection with the administration of the Liquor License Act.

S. F. Wallace, proprietor of the Fernie Hotel, on being questioned stated that he had been persecuted by the license inspector. He had put a spy at his hotel and watched him continually. His porter had been fined once for selling liquor on Sunday and believed that this was unjust as the liquor had only been sold fifteen minutes before the hour prescribed by the law for opening. He believed that Barnes had a special spite against him. He had also put up $10 for the hop beer analysis and thought that all the others hotel men had done the same. He was the treasurer of the Licensed Victuallers' Association of Fernie and had paid in the neighborhood of $350 to J. A. Harvey to prevent C. G. Armstrong from getting a license for the Crow's Nest Hotel. Armstrong license had been refused, but he did not know whether the money paid to J. A. Harvey had gone to the commissioners or not.

Cross examined by Mr. Thompson he said that Mr. Armstrong had applied for a license in 1901 and that the association had met Mr. Harvey and arranged to pay $200 to prevent Armstrong getting license. An agreement had also been talked of to give Harvey $500 to prevent a license from being granted to the Crow's Nest Hotel until Jan. 1st, 1902. Harvey said he thought he could arrange it but the agreement had never been carried out.

Questioned by Inspector Barnes he denied that he had ever made the statement that he would do all in his power to have him fired. He also stated that it had been at the suggestion of the association that the hop beer had been analyzed and that they were quite willing to pay for it as it was one of the objects of the association to surpress blind pigs.

Mr. Tuttle was again called to the stand and stated that Mr. Harvey never met the association and he did not believe that any such amount as $500 had ever been paid him. He was a member of the association and could only recolect of $20 that he had paid toward defeating the granting of a license to Chas. Armstrong. He said the total amount of money collected for the hop beer analysis was some $18 or $20 and that each of the members had contributed $2 or $3 to the amount. It was the suggestion of the association that this analysis should be made and they were glad to pay for it.

Mr. Kanouse also stated that only $18 or $20 had been raised for the hop beer analysis.

S. F. Wallace explained that while J. A. Harvey had never met the Association in a body he was present after a meeting had adjourned.

J. L. Gates made a statement about slot machine referred to in Mr. Eschwig's evidence. He said that the machine belonged to him and that Mr. Barnes had forwarded the money obtained from Mr. Eschwig to him.

The inquiry then adjourned, Mr. Bullick-Webster stated that the commission would return to Fernie on Saturday, June 7th, when all the evidence would be laid before Inspector Barnes and he would have an opportunity to produce evidence in his behalf.

In our report of the overflowing of the Elk River last week we stated that Mr. D. V. Mott & Son's mill contained several feet of water. This was not correct as the water only reached the floor.

Variety is the maxim of the performance of "Too Rich to Marry," which will be at Princess Hall, on Tuesday, June 17th. In the list of specialty artists whose pleasing songs and dances are given during the intermissions between the acts, as well as during the performance of the comedy, can be found names of some of the best known vaudeville people of the country. There were especially engaged to appear with the "Too Rich to Marry" company.

Applications for Transfer.

NOTICE is hereby given for application for the ransfer of the license of the Alberta Hotel, from the late George Levasseur to Sophia Josephine Levasseur. Also, the application for the transfer of the licence from Henry James Turner to John Gates, Victoria Hotel.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

I felt rather sheepish and uncomfortable as I appeared before the great man. The general was tall in stature, very thin and straight, while his strong, weather beaten face—the deep bronze contrasting sharply with the bristling white mustachios and long, projecting eyebrows, over fierce, steely blue eyes—commanded respect.

He began on me at once. "By the Lord Harry, this won't do, Wood!" he cried, with amazing volubility and force. "What have you got to say for yourself? Slept late? Of course you will sleep late if you waste the night flirting and philandering with that little madcap devil, Frida Fairholme. But, I tell you, I won't have the business of this office neglected. Now you are late for parade, and you know I insist upon punctuality. And I practice what I preach. I was here as the clock struck 10 this morning, and I'd already been to Hounslow and back on my 'bike.' But there, you'll end by putting me out of temper. Don't do it again."

"I won't, Sir Charles," I said meekly, yet wondering why I, a man of millions, submitted to such slavery, and I turned to go.

"Ah, by the way, Wood, bring me that report of yours, will you, on the defense of the Canadian frontier? It is ready, I presume?"

"Well, no, Sir Charles, not quite. I have been delayed by"—

"Great Scott!" he roared, instantly blazing up into white heat. "You lazy, idle young villain! I believe you want to drive me mad. You know as well as I do that the foreign office is pressing for the paper, that I promised it to Lord Salisbury within a week, and here you, you— Oh, go away! I want none of your excuses. I've had enough of you. You shan't stay here, bringing discredit on the office. I'll have none of it. You shall go back to your grovel ing, guard mounting routine, and when you are grizzling your soul out in that beastly tropical hole, Bermuda, you may be sorry for the chance you've lost. Go away, I say. I've done with you. I hate the very sight of you."

And I went, meaning in my rage—for I, too, had become furiously angry—to take him at his word and walk straight out of the house. But custom is strong. The spirit of subordination, of obedience, the soldierly sense of duty, when once imbibed, are not to be shaken off in a second. When I regained my desk and saw the papers there, I remembered that I was bound in honor to fulfill my obligations. My chief had, no doubt, gone too far, but that did not release me. Before I took any further steps I must first complete my work.

There was not much wanting to finish my report on the Canadian frontier, and I did it out of hand. Then I sent it in to the chief and prepared to tackle the second set of papers, which proved to be a scheme, marked "strictly confidential," for a combined attack upon New York by sea and land. (Our political relations at that particular moment were greatly strained. There were rumors of grave disagreement, if nothing worse.) But now I noticed the word "speak," and I knew that I must take verbal instructions before I set to work. I must face my irascible chief again, and I had no great fancy for it. However, it must come sooner or later, so I scribbled a few words on a sheet of foolscap and went in.

The general was at his standing desk (he seldom sat down) pouring over my other report, but he looked round as I entered and nodded pleasantly. Bright sunshine had already succeeded the always fugitive storms in his hasty temperament.

"This will do first rate, Wood. There are only one or two points that need amplification," and we went over the items together.

Then I asked him about the other matter, and soon heard all I wanted to know. I can set down nothing of this here, for the whole affair was very secret and particular—of vital interest to two great countries—and Sir Charles impressed it on me very earnestly that the paper and plans must on no account pass out of my possession.

"You may have to work on the scheme at your own diggings, for it must go in by the end of the week. But pray be most careful. Lock up the papers in your dispatch box at night and keep the thing entirely private."

"It is just possible that you may wish to give the job to some one else, general, as I shall hardly be here to complete it," I said, rather stiffly, and with that I handed him the sheet of foolscap which contained my resignation.

"Why, Wood, hang it all, you don't mean this surely?" cried Sir Charles, aghast. "You can't have taken offense at what I said this morning? I was a trifle put out, perhaps, but I never meant it seriously. No, no; take this beastly thing back or let me tear it up. This will never do. Forgive and forget, my boy. There's my hand on it. I beg your pardon and— I know you won't be late again."

I hastened to explain that my resignation was in no way the result of pique, and that I was on the point of sending in my papers to retire from the service altogether.

"The simple fact is that I have come into money, sir—a good bit of money," I explained.

"How much, if it is a fair question? I ask because you may have a good enough income, a devilish fine income, and yet it would be wiser for you to stay here. The discipline of any regular routine work is good for independent men. Believe me, you'd soon sicken of being entirely your own master; take to drink or cards or petticoats and go to the devil hands down. What is it—two, three, four thousand a year?"

"It is far more than that, Sir Charles," I went on. "I believe I am a millionaire two or three times over. Will you please read that?" and I handed him my lawyers' letter.

"Whew!" He whistled several bars of a popular street melody (very much out of tune), folded up the letter, handed it back, and then, looking me straight in the face, said, with slow, kindly emphasis:

"By George, Wood, I pity you."

It was not quite what I expected from this experienced, long headed man of the world, and he read my disappointment in my face.

"Doesn't please you, eh? You think yourself the most fortunate chap alive! But you're all wrong. Vast riches are a nuisance—they are worse."

He threw up both his hands and began to slowly pace up and down the room.

"A nuisance! A tyranny indeed. They will weigh you down and worry you perpetually. Lord, Lord, the care of all this money, the use of it, the defense of it! The whole world, Wood, is made up of two classes—those who have money, and those who want to take it from them. You will soon have a much poorer opinion of human nature, with their continual cry of 'Give, give.' But let's talk about yourself. What do you mean to do?"

"Honestly, Sir Charles, I hardly know. I am still too much bewildered and taken aback by what happened. Will you advise me, sir?"

"It's not so easy, my lad. It depends so much upon yourself—upon your principles, your tastes and predilections. Of course you will marry, and I've a shrewd notion which way your fancy lies. I know her well—Frida Fairholme, that little minx. Miss Frida will lead you a fine dance."

"But, Sir Charles, I have never spoken to her. I have no reason to suppose that, if I did, she would accept me."

"Try her," said the general dryly. "You have three millions and odd—new and strangely eloquent reasons for convincing her of your worth."

"She is not that sort at all, Sir Charles."

"Then Eve wasn't her ancestor. I've known her from a child. She's pretty enough, I'll admit, but, by the living jingo, I'd rather you married her than I. By George, she'll be a handful! At any rate, she will give you plenty to do. Miss Frida will set the money moving, and you too. So much the better, perhaps."

"Then you advise me to leave the service, sir?"

"Of course you must leave," he roared with sudden fury. "What, a captain in the army with a hundred and fifty thousand a year! It's out of the question. But don't be in too great a hurry, Wood. Suppose this windfall proves a fraud, where are you? You can have leave—although I don't know how I can spare you with all this going on"—

Leave was a weak point with Sir Charles.

"But," he went on, "if you must, you must, but not for a day or two, please. And, Wood, my dear chap, don't neglect this New York business. I am relying so much on you for it. You've been out there and know all the ropes."

So I stuck to the papers for the rest of the afternoon, and when I left desired the messenger to send them on in a dispatch box to Clarges street.

CHAPTER III.

WARNING.

"An American gentleman has been here several times," Savory said when I reached my rooms. "Would have it he'd got an appointment with you. Told him I didn't know when you'd be home."

"Well, show him up when he calls. I'll see him."

Presently he brought up a card with the name "Erastus K. Snuyzer" on it in gold letters, and the man himself quickly followed. He was dressed in the same irreproachable fashion as when I had seen him in the morning—good new clothes, well cut, a glossy hat, a gardenia and the shiniest of shoes with big bows.

"Well, now?" I asked as I offered him a chair.

"It's this way," he r ied. "My people have calculated th you might like to secure their services."

"One moment, pray. Who and what are your people?"

"Saraband & Sons. You have surely heard of them—the great firm of private detectives. I was with Allan Pinkerton myself for years, and he reckoned I was one of his smartest pupils."

(TO BE CONTINUED.)

Don't believe all you hear; you are fortunate if you can believe all you say.

The United Kingdom uses 39 million pairs of gloves yearly.

Even the troubles of a pretty woman are interesting only the first time they are told.

Why is it that everyone looks uglier in the winter?

Only a mighty man will send his wife downstairs to request a burglar to make less noise.

About 43,000 people in Britain wear glass eyes.

PROTRUDING BLEEDING PILES.

Two Letters from Mr. Walker Explaining the Severity of His Case and the Permanency of His Cure by Using Dr. Chase's Ointment.

Some people seem to think that it is too much to claim that Dr. Chase's Ointment will cure every form of piles, but facts go to prove the truth of this claim. These are interesting letters from one who has suffered much and been cured.

In November, 1901, Mr. Sherwood Walker, a fireman on the Canada Atlantic Railway, living at Madawaska, Ont., writes:—"I am a great sufferer from bleeding piles. Sometimes the protruding piles come down, causing much misery and uneasiness, and at other times I am subject to bleeding piles, and they bleed to such an extent as to make me quite weak. If Dr. Chase's Ointment will cure this awful ailment you will have my everlasting gratitude."

On March 1, 1902, we received the following letter from Mr. Walker, which speaks volumes for Dr. Chase's Ointment as a cure for piles of the most distressing form. He writes:—"According to my promise, I now take pleasure in writing to you. If you remember, you sent me a box of Dr. Chase's Ointment for bleeding piles some three months ago. I used it faithfully, and can say that it proved a godsend, for it has entirely cured me of bleeding piles.

"I would have written sooner, but I wanted to be able to tell you that it was a permanent cure. This you can use for the benefit of other suffering people. There are several people here who have been cured of very severe cases of protruding piles by using this great ointment."

So far as we know there is no other preparation extant which is so successful in curing piles of the most aggravated kind as Dr. Chase's Oinment. Its soothing, healing powers are marvellous, and its cures thorough and permanent. Sixty cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

Blue Ribbon Goods.

All we can do is to pack the best goods in Canada and tell you about them.

You know how good Blue Ribbon Tea is! Well, Blue Ribbon Coffee, Baking Powder, Spices, Flavoring Extracts, Chocolate Icing and Jelly Powder are just as good as the Tea. Every Grocer keeps Blue Ribbon goods, so all you have to do is to ask for them

Blue Ribbon Manufacturing Co.

If a man is an idealist he has no business behind the scenes at the theatre or in the kitchen of a cheap restaurant.

WORDS OF HOPE

TO ALL WHO SUFFER FROM A RUN DOWN SYSTEM.

Mrs. Harriet A. Farr, Fenwick, Ont., Tells How She Obtained a Cure After Suffering for Two Years.

Thousands throughout this country suffer seriously from general debility—the result of impoverished blood and shattered nerves. To all such the story of Mrs. Harriet Farr, widow of the late Rev. Richard Farr, Fenwick, Ont., a lady well known throughout the Niagara district, will point the means of renewed health. Mrs. Farr says: "For a couple of years prior to 1899 I was a great sufferer from a rundown system. My digestion was bad; I had little or no appetite and was in a very poor state; I suffered from heart palpitation and a feeling of continual exhaustion. Doctors' treatment failed to benefit me and I gradually grew worse until I was finally unable to do the least work. I then began using Dr. Williams' Pink Pills and from the very first I noted an improvement in my condition. The severity of my trouble gradually lessened, and by the time I had taken eight boxes I was again enjoying the best of health, despite my 60 years. I believe that Dr. Williams' Pink Pills saved my life, and would strongly urge all sufferers to give them a trial, believing they will be of great benefit."

When your blood is poor and watery, when your nerves are unstrung, when you suffer from headaches and dizziness, when you are pale, languid and completely run down, Dr. Williams' Pink Pills will promptly restore your health by renewing and enriching the blood. They are a prompt and certain cure for all troubles having their origin in a poor or watery condition of the blood. But only the genuine cure and these bear the full name, "Dr. Williams' Pink Pills for Pale People." Sold by all dealers in medicine or sent post paid at 50 cents a box or six boxes for $2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Wilted Flowers.

To revive wilted flowers plunge the stems to about one-third of their length into boiling water. This will drive the sap back into the flowers, causing them to become fresh. Then cut away the third of the stem which has been heated and place the flowers in cold water.

Mansion House street is the shortest in London.

$100 Reward $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials.

Hall's Family Pills are the best.

"Lifting the King."

One of the picturesque English coronation ceremonies which have been discontinued is that of lifting the king. In the old days the monarch always slept at the palace of Westminster on the night before the coronation. The regalia, which are still, technically speaking, in the dean and chapter of Westminster, were brought by them to Westminster hall in preparation for the ceremony. These were arranged on a long table, the crown, the scepter, the spurs, and so on. The king when he descended from the palace to Westminster hall was lifted by his nobles on to a marble chair.

The lifting of the king into this chair was a survival of the old Saxon custom of carrying the king on his shield. The custom survived up to the time of the coronation of George IV. When the monarch was seated in the chair, he at once directed by pointing his finger which of his nobles should carry the various parts of the regalia to the abbey, and the procession began.—London Tatler.

European Flags.

The yellow and red Spanish flag is the oldest now in use by any European power, yet it was not flown till 1785. The French tricolor came into use ten years later and England's red ensign in 1801.

Monster Speaking Tube.

In the Grand canyon of Colorado a man's voice has been heard over a distance of eighteen miles.

The Maori and the Witness.

Captain Hayes in his book, "Among Horses In South Africa," tells several amusing stories. A friend of his in New Zealand had been a government interpreter among the Maoris and had many stories to tell about these people. On one occasion a native chief, who was under cross examination in court, on being asked why he had not brought a certain man with him replied:

"I have brought him."

"But," said the barrister, looking in vain round the court, "I don't see him. Where is he?"

"He is here," chuckled the Maori proudly, stroking his massive chest.

Every one of a girl's love affairs is serious enough to end in marriage, but only one in ten of a man's.

Minard's Liniment Cures Distemper.

If you must tell your troubles to a man, ring off when he commences to look at the wall.

You cannot be happy while you have corns. Then do not delay in getting a bottle of Holloway's Corn Cure. It removes all kinds of corns without pain. Failure with it is unknown.

Seventy feet is the record rise for a tide in the Bristol Channel.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder dusted in the bath softens the water at the same time that it disinfects. 16

A hundredweight of pork is 8lb. heavier at Belfast than it is at Cork.

Piles To prove to you that Dr. Chase's Ointment is a certain and absolute cure for each and every form of itching, bleeding and protruding piles, the manufacturers have guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get your money back if not cured. 60c a box, all dealers or EDMANSON, BATES & CO., Toronto.

Dr. Chase's Ointment

Hares, Horses and giraffes are better able to see objects behind them without turning their heads than any other quadrupeds.

Interior Greenland.

The whole of the interior of Greenland is believed to be covered by an immense shield shaped cap of ice and snow which in some places must have a thickness of at least 5,000 or 6,000 feet.

How to Oil a Belt.

Take the belt from its pulleys and put it in a warm solution of oil and tallow for a few minutes. Then plunge it into water heated to 100 degrees F. and remove at once. The water will temper the leather at the same time that it drives the oil and tallow in.

Wilson's Fly Pads

will kill all the flies in a room in a few hours.

Avoid Imitations.

This shows how to use them.

FAIR ATTRACTIONS.

FAMOUS JABOUR ORIENTAL CARNIVAL WILL GIVE DAILY EXHIBITIONS.

MIDWAY ON A LARGE SCALE—"LOOP THE LOOP"—"BURNING OF MOSCOW."

The directors of the Winnipeg Industrial Fair have concluded arrangements for the attractions programme. Chief among the many drawing cards is the Jabour Oriental Carnival, Circus and Menagerie company. The carnival company is an immense organization and travels in its own special railroad train. There are ten separate and distinct shows under a spread of canvas 325 by 625 feet, to say nothing of the number of canopy tops.

The parade, which will likely be given down town each day, will consist of ten open cars of wild animals besides elephants, camels, troups of mounted Arabs and Oriental performers from the far eastern countries, aggregating over 100.

The separate shows are designated as follows: 1, wild trained animals; 2, German village; 3, streets of all nations; 4, Moorish palace; 5, Mexican theatre; 6, street of Cairo; 7, oriental theatre; 8, pony and dog show; 9, Lunette, the flying lady; 10, projectoscope, togetner with illustrated songs.

The trained wild animal show is under the management of Col. E. Daniel Boone, a famous wild animal trainer. The exhibition given by this gentleman in a steel arena, with his three large Nubian lions, is said to be thrilling in the extreme. The trained leopards are under the control of Capt. Joseph Katool. The captain has also three lions in conjunction with the leopards, and gives a highly interesting exhibition with his six pets. Rajah, the mammoth trained elephant, should be a source of enjoyment for the children, and also for many adults who attend this year. The huge animal is trained to answer the purpose of a street car as far as the fair grounds are concerned, and the large howdah on his back is literally loaded down with children, who thus have an opportunity of enjoying a ride in this novel way.

Other features of the animal show consist of wrestling and dancing bears, boxing kangaroos, cages of monkeys, in addition to which Prof. Giavanni's cockatoo and trained goose circus is a remarkably unique as well as an amusing entertainment

In a reparate steel cage will also be seen the noble lion Sultan, who, notwithstanding his having been in captivity for several years, has proved to be absolutely untamable.

THE GERMAN VILLAGE.

In the German village will be found a continuous performance, conducted by 20 first class artists, among whom will be seen the Tyrolean quartette, two ladies and two gentlemen, in their native costumes, also magicians, jugglers and knife throwers. Mlle. Blitz, Scottish and Spanish dancer; Prof. Bowman, with the Scottish bagpipes; Prof. Donar, magician and manipulator; and the celebrated Carlons, in their original sketch, "The Texas Girl and Circus Man." The ladies' military band of ten pieces is also a part of the German village.

The streets of all nations, as the name implies, is given by people of all nationalities, fifteen in number. The thr?e Hindoo Mahatmas in their weird Jugie priest snake act; a troup of Japanese acrobats, besides Chinese musicians, fire-eaters, exponents of black art, Russian and French dancers, etc.

In the Moorish palace will be given a correct representation of Moorish life. Torture acts, fire dance, sword walkers, etc.

The Mexican theatre, Don Alarcon and family of five will give a spectacular representation of a Spanish bull fight, besides introducing their famous Montezuma duel clog song.

In the streets of Cairo will be found 20 or more sons and daughters of the orient, including Egyptians, Syrians, Turks, Arabs, Bedouins, Greeks, etc. This exhibition will be a revelation to those who have not hitherto had an opportunity of witnessing it, embracing as it does sword fighters, gun spinners, wrestlers, and the Arabian pyramid acrobats in startling and amazing feats of agility and strength. Here also will be found the camels and donkeys.

In the Oriental theatre La Belle Fatima and a troupe of orientals, together with the Turkish orchestra will undoubtedly prove an interesting and enjoyable performance.

The dog and pony show is in effect a miniature circus. The performance is given exclusively by dogs, ponies and monkeys.

LOOPING THE LOOP.

What can be said about this year's platform attractions is that in the judgment of the directors they will even excel those of last season. Never before in the history of the exposition has so sensational a feature been secured as "The Looping of the Loop" by the now world famous Diavolo. He is the only man on the continent who attempts this thrilling act. All laws of gravitation are apparently defied by completely looping the loop, or in other words "riding half the trip on the ceiling of the roof with his head pointed toward the ground.

The Seven Grunatho Sisters are French acrobats. This is their first season on the American continent.

The Cycle Whirl—This act is done by three ladies and one gentleman. The act is done on a cycle track occupying a space of 24 feet and is built at an angle of 74 degrees, and the feats performed by the riders certainly border on the miraculous.

The balance of the programme at present under contract is made up by the three Austin sisters in their wonderful flying and revolving trapeze aerial acts. The ceiling walk, the high dive, performed by Capt. Chas. Bigelow from a tower ninety feet high into a tank and also from a tower 128 feet into a net. Balloon ascension and parachute jump by Capt. Collins and a slide for life by Mme. Collins from a height of 85 feet at an angle of 75 degrees.

Between now and the opening of the fair other features which at present have not been decided upon, will be added to the list.

FIRE WORKS.

The fireworks this season, the directors claim, will undoubtedly prove to be the greatest spectacular production ever offered to the patrons of the fair, namely, "The Burning of Moscow." The story of this celebrated historical event is so well known that no special comment need be made in reference thereto, but it is promised that all the graphic details will be given representing Napoleon's advance on the city as well as the burning of the town itself by the Eussians.

The horse races this year have created much interest outside of Manitoba and Northwest Territories, and as a consequence of the large purses offered, some of the best horses on the continent will more than likely be competing against one another on the grounds during fair week.

BRIEF NEWS NOTES.

Turkey is hopelessly bankrupt.

Mr. William Clarke, a Carberry hotel keeper, is dead.

Two hundred United States furniture factories have combined.

Dudley Morgan, a negro, was burned to death by a mob in a Texas town.

John Roberts, the English billiard champion, gave an exhibition in Winnipeg.

The Fifth regiment, fourth contingent, wrecked a house in the "Tenderloin" district of Halifax on the eve of their departure.

Mr. C. A. Christenson, a millionaire elevator man of Minneapolis, has been in the Canadian west arranging for the construction of several elevators.

A new flour mill will be erected in Minneapolis by the Washburn-Crosby company. It will be a six-story brick structure, equipped with every modern appliance. The daily capacity will be 3,000 barrels. The cost will be $125,000. It will rank as third or fourth among the Washburn-Crosby properties. The mill will be ready to grind when the next Canadian crop movement is at its height, and it will be used as the Canadian wheat part of the plant.

NEVER HEARD OF BROCK.

The press of the United Kingdom has made many curious errors and amusing blunders in their reference to Canada, and it is of interest to note that the education of some of the British writers is to-day no better in this respect than their predecessors, says Events, Ottawa. The correspondent of one of the great London dailies who accompanied the royal party through Canada alluded to the monument of Sir Isaac Brock at Queenston Heights as erected to a leader who fell in "the Fenian raid." This was more serious than the correspondent, also with the Duke of York, who told the English people that the timber berth which ran the slides at Ottawa "emerged on the broad bosom of the St. Lawrence." The Brock incident recalled to a prominent public man in Ontario, who was in Ottawa recently, a complaint he received from a Canadian last year who was in London endeavoring to secure material for a history of Brock, and who was unable to get any assistance from the records of the War Office. He implored the public man from Ontario to go with him and see if he could not move the indifferent officials. He did so, and was called aside by the official at the War Office, who said: "We are very willing to accommodate this gentleman in any possible way, but we do not know what he is talking about. He wants information about a General Brock, but we never heard of such a person." This incident is vouched for by unimpeachable authority, namely, the public man to whom the War Office official confided his ignorance. Canada badly needs a little more knowledge of her history and geography in the Mother Country, not only among officials, but journalists on the staffs of the big daily papers.

MINING DISASTER AT FERNIE, B. C.

ONE HUNDRED AND FIFTY MEN MEET DEATH IN AN EXPLOSION.

MOST AWFUL CALAMITY IN THE HISTORY OF BRITISH COLUMBIA MINING.

EMPIRE DAY A DAY OF FUNERALS AT THE MINING TOWN.

Fernie, B. C., May 24.—One of the worst coal mining disasters in the history of British Columbia occurred at the Coal Creek mines on Thursday night, when from 125 to 150 men met almost instant death in mines Nos. 2 and 3. The explosion occurred in the depth of No. 2, and not a man of over one hundred employed in that mines escaped to tell the tale. From No. 3 workings, which are connected with No. 2, about 21 men escaped.

The first intimation of the disaster which those on the outside received was a rush of coal dust and fire to the height of 1,000 above the fan. Word was immediately sent to Fernie, five miles from the mines, and inside of twelve minutes from the time the accident occurred, relief parties were at work.

R. Drennan, Dr. Bonnet and True Weatherby were the first to enter the mine. When about five hundred feet into the working, Drennan was overcome by after damp and had it not have been for his companions would have perished. On being removed to the outer air he recovered and gave instructions to the rescuing party to commence repairing the overcasts. The overcasts are the pipes which connect the air through the mine. As they had been almost completely destroyed it was impossible to enter owing to the after damp which prevailed.

Volunteers were called and a score of brave men sprang to the work for nearly six hours. This policy was pursued with tireless energy. Every few minutes the men would collapse and were borne to the outer air, and their places were quickly filled by new volunteers.

The town is horror stricken and heartrending scenes meet the eye on every side. The cause of the accident is unknown, but the opinion of many of the miners is that it was the result of a heavy shot from one of the machines.

Saturday was a day of funerals in Fernie and one which will be long remembered. There were seventeen of the public funerals and in one instance there were fourteen coffins in the procession. All told there were thirty funerals during the day, and a line of graves marks the increase in the city of the dead, an increase which will unfortunately be quadrupled before all of the victims of the disaster are laid at rest.

BUTTED TO DEATH BY A RAM.

A Woman, 83 Years of Age, is Killed by an Infuriated Beast at Lorette, Man.

Mrs. Champagne, 83 years of age, a resident of Lorette, 15 miles south of Winnipeg, was killed by a ram on Friday evening. The woman and her dusband, Francois Champagne, who is nearly 90 years old, resided witn her son-in-law, Victeur Mausseau, a farmer.

Mrs. Champagne, with all hel weight of years, was still active and eager to be about, and she met her death while attending to the duties which she still insisted on doing. Her care was the chickens, and the last seen of her was when she left to feed her charges.

"Take care of the ram," said Mrs. Mousseau, as her mother started off.

"Oh, I'm quick enough to get away from him," said the octogenarian, lightly; and that was the last seen of her alive.

The ram is an aged beast, and one that has made trouble for many. It will attack either man or beast, and there is one record several encounters between it and a bull in which the latter animal got the worst of it. Strong men fear this ram, and the feeble old woman could have had little chance for her life when it attacked her.

Apparently the animal caught her in the barn yard between two wood piles, for it was there she was found with the infuriated beast still butting and trampling the corpse. Perhaps she had attempted to climb the wood pile to escape her assailant, and weakened by repeated assaults had fallen to the ground. The chip strewn ground showed signs of a fierce struggle, and the prostrate form of the woman had been butted along for several yards. She had not reached the chickens, for the feed was scattered over the place and the tin which had contained it was by her side.

MT. PELEE AGAIN ACTIVE.

A Tidal Wave Adds to the Horror of the Volcano.

Paris, May 22.—Governor L'Huerre, of the Island of Martinique, in a cable dispatch from Fort De France, says that yesterday morning the same phenomena appeared as on the morning of May 8—a rain of stones, flashes of light and sounds of explosions in the direction of Mount Pelee. The population of Fort De France was panic stricken.

Later dispatches say that fire was falling at Le Carbet (a southern suburb of St. Pierre, on the west side of the island) and that the inhabitants and troops had evacuated the place.

Castries, Island of St. Lucia, B.W. I., May 22.—Reports received here confirm the dispatches announcing that a panic prevailed at Fort De France, Martinique, yesterday. The town was covered with ashes, stones were falling and a tidal wave added to the terror of the population, which was flying to the hills. Three hundred refugees have arrived here and thousands have embarked for the neighboring islands. No further fatalities had occurred.

STORMS IN THE SOUTH SEAS.

Several Sailors Lose Their Lives Near the Falkland Islands.

Port Townsend, Wash., May 22.—A letter received here from Port Stanley, Falkland Islands, under date of April 4, says that during the the past few months storms of unusual violence have prevailed, that shipping has suffered severely, and that the islands are strewn with wreckage. The letter states that one vessel lost nine men, another lost her captain and two men, while a third lost the captain and an apprentice during a gale. The letter omitted the names of the vessels or those lost.

PERISHED IN THE FLAMES.

A Woman Burned to Death in a Fire That Destroyed the Laurentian Sanitarium at St. Agathe.

Montreal, May 22.—The Laurentian sanitarium at Ste. Agathe was burned to the ground this morning, and it is believed that one of seventeen patients, Mrs. Grantsby, who is reported missing, lost her life in the flames. The others, who escaped io their night clothes, were taken to Lannier's hotel. No one knows just how the fire originated. The Lau-Laurentign sanitarium was a three-story wooden structure, with accommodation for twenty patients.

The body of Mrs. Grantsby was found in the ruins.

SAD DROWNING IN DAKOTA.

A dispatch from Grand Forks, N. D., says:—

One of the most distressing accidents in the history of Pembina county, in which the three eldest sons of William Symmington, jr., the eldest being about 16 years of age, lost their lives, occurred on Sunday.

Mr. Symmington, his four sons and a nephew, Roy Symmington, started down the Pembina river in a row boat. When about four miles northwest of Neche, the father warned the two older boys, who were rowing, to change their course to avoid colliding with a stump of a tree which just reached the surface of the water. The boys changed the direction of the boat very suddenly, but struck the obstruction broadside on with sufficient force to turn the boat over several times. Ernest and Walter, the two eldest boys, and the next younger, went down at once and were not seen again till the body of Walter was found toward evening by a searching party.

The father managed to cling to the boat, but later reached his younger son, six years of age, who was clinging to some bushes near the shore. His nephew clung to the stump which caused the disaster for an hour, when he was rescued by a boat secured from a neighbor.

A STRANGE MISTAKE.

Prof. Murray, of Halifax, Had His Mourning Turned to Joy.

Halifax, May 22.—The remains, recently brought here from Nevada, were supposed to be those of Henry Murray, a brother of Prof. Murray, of Dalhouise. The interment took place at Truro in the family lot. It was learned today that Prof. Murray's brother is alive, and the remains will be taken from the Murray lot. They were brought here from Nevada for burial at the expense of Prof. Murray.

Last week on the Great Northern, near Litchfield, Minn., a car loaded with nearly 200 barrels of arsenic, was derailed and smashed. The arsenic was scattered over the ground, and soon got into the water of a stream close by, and a dam had to be hastily constructed to prevent poisoning of the cattle in the neighborhood. A number of trainmen and sectionmen were seriously affected by inhaling the arsenic, but no fatalities have occurred.

GOSSIP FROM LONDON

AUSTRALIA AND CANADA AGREE ON IMPERIAL MILITARY PLAN.

LORD SALISBURY AND CHAMBERLAIN ARE OF THE SAME OPINION.

London, May 21.—Australia agrees with Sir Wilfrid Raurier as to the inadvisability of a hard and fast military agreement between Great Britain and the colonies. The announcement of this fact causes neither surprise nor disappointment here. The speech of Lord Salisbury to the Primrose League emphasized most strongly that there is nothing to force the various portions of the British empire into a closer union than at present obtains. Mr. Chamberlain has also repeatedly warned his countrymen that a desire for closer union must come from the colonies, not from Britain. There is undoubtedly a growing desire on the part of Englishmen to strengthen the links that unite the mother country and the daughter states, but, after all, it is admitted that the colonies are the best judges of what they can do and how they can best do it. The Evening News says that Englishmen are right in thinking that a voluntary and spontaneous effort, such as has been made in the present war, is better than any fixed arrangement would be.

Lord Kelvin has returned from the United States much impressed with the greatness of the American people and the magnificence of their industrial and political future. He is enthusiastic on the subject of an Anglo-American alliance. The entente cordiale between Great Britain and the United States is of such a nature, he says, that it must last.

On Earl De La Warr's estate at Bexhill, Sussex, yesterday, a race meeting was held which marks an epoch in the history of the motor car. Never before in England has there been automobile racing of so much importance and interest. The track is the only one of its kind in the kingdom. Along that raced yesterday some of the fastest automobiles in the world. The most notable were fl. F. Hedge's 75-horsepower Napier; Hon. C. S. Roll's 60-horsepower; Mrs. M. Serpollet's 120-horsepower car, which covered a flying kilometre at Nice at the rate of 76 miles an hour; and Baron Henri Rothschild's 40-horsepower Mercedes, which recently did a kilometre at the rate of 68 miles an hour.

Never since 1879 has there been such a cold, wet May in London. The inclement weather has not only spelt disappointment for crowds of holiday-makers, but it is also exercising a prejudicial influence on vegetation.

Following quickly on the news of an anarchist plot against the young king of Spain, comes a report of an abortive outrage against the veteran Emperor of Austria at Vienna, in Staatsbahn station, when his majesty was going by train to Buda Pest. The Daily Chronicle's telegram stated a bomb, covered with paper, which was not likely to raise suspicion, had been placed in the imperial carriage. It was evidently calculated to explode the moment the emperor entered his apartment. The plot was discovered ten minutes before his majesty arrived. A thorough investigation of the matter is being made, and so far has resulted in the dismissal of several railway employees.

HUGE BISCUIT TRUST.

Independent biscuit companies thoroughout the United States will soon be combined in a giant rival to the National Biscuit company. Several of the largest independent concerns have already entered into an agreement to unite, and the steps now being taken by the officers of the Union Biscuit company of St. Louis, are designed to amalgamate most of the 150 independent companies into one corporation.

COMMANDANT KILLED.

Middleburg, Cape Colony, May 21.—The town of Aberdeen (about 75 miles south of Middleburg) was attacked on Sunday last by 120 Boers, who were repulsed and Commandant Van Herden was killed.

SHORT NEWS NOTES.

President Loubet of France was warmly welcomed in Russia.

Fire did $50,000 damage to the new pulp mills at Sturgeon Falls, Ont.

It is said the Free Staters, excepting Gen. De Wet, are burking the peace negotiations; the Transvaalers are favorable to the British terms.

Red River Valley wheat acreage in North Dakota is less by 25 per cent. than last year.

A million dollars' worth of damage was done by a water spout in Cincinnati.

Strangers are cordially invited.

REV. R. F. STILLMAN, - - Pastor.

Continued from Page 1.

place about seven or half past seven at night.

Q Now how did that last fire you speak of occur?

A Just the same as the rest–after a shot. It was machine mining. The fire lasted about two minutes. I and Fred James sitting over there, put it out. The fire was the same as the others, originating from the same cause; it caught the same way, and was put out the same way.

Q Did you make any report in regard to those other fires?

A Yes, I did.

Q You put them in the report book?

A I did not have any report book. I generally told the fire boss about them. I was never told to report on anything.

Q Can you tell the name of the fire boss

A His name is McDonald–Dan McDonald. He was the fire boss on my shift and the shift in which most of the fires occurred. I told McMillan—I think his name is Harry McMillan, but I'm not sure; he comes from Vancouver Island.

Q This last fire, on the 22nd, to whom did you report it, if you reported it at all?

A Well, I didn't see the fire boss that time; I didn't report it to anyone. The fire boss had been his rounds before. It was after he had made his rounds that we had the fire. I didn't report it to anyone.

Q Will you tell us in what part of the mine these fires were? You speak of there being three or four fires; in what part of the mine were they?

A Well, the last was in the left hand side of the hoist — that was the only one we had there; all the others were in the right hand side of the air hoist in the same mine.

Q What were the conditions prevailing in regard to dust on the roadways of No 2?

A Well, it was pretty dusty all over; even from the mouth of the tunnel to the very face it was pretty dusty. There was dust all over. I've seen six to eighteen inches of dust in some places on the side of the roadway. I don't say it was that bad all over, but in some places–from six to eighteen inches at the side of the track, I have seen it so deep in some places in the centre of the track that you could hardly see the rail, then in some places it was not much more than four or five inches, and eighteen some places on the sides.

Have you ever seen any efforts systematically directed toward keeping down the dust during the time you have been working here? A On the Wednesday afteenoon before the explosion I saw them clearing some dust away before the hoist, that was the only day I ever saw them clean it up. Q And what were they doing with it? A The mine was idle that day, and they were loading it on the cars and taking it to the outside. Q The mine was idle that day, you say, what were you doing? A I was getting water in to water the road. I had spoken to the boss and told him I wanted to get some barrels to put water in so that we would have it handy in case of fire. That was for my own protection and for the safety of the rest of the men. It was not safe to fire with so much dirt around unless we had water there to water it.

Examined by Mr. Blakemore, witness stated that he was 29 years of age and had worked in mines for seventeen years and had been a fire boss for two years and a half before coming here. He had worked in Washington and Montana and had considerable experience as a shot-firer.

Q You say in these mines three holes were bored for blasting, the one in the centre and two near the end? A When I first started in working here we bored two holes, one in each end, and we thought if we put one in the centre the shots would not be so heavy and it might keep down the fire, but the fires continued the same until we changed the powder.

Q In doing your drilling, did you keep the holes straight with the ribs or did they turn to the right or left from the rib? A We drilled straight in—started eight or nine inches from the rib side. I never had any blown out shots.

Q You have stated that at one time you had no scrapers to clean out the dust left in the hole, but after getting the scrapers you still had fires just the same?

A. Yes sir. Q How do you explain that? A I always thought the trouble was with the loose powder, it always caused a flame, and it was this and the fine dust that made the trouble.

Q Don't misunderstand me please. You stated that you asked for and got scrapers to clean out the holes, and yet it seems the trouble was as bad as ever. Can you explain how this occurred?

A No I don't see that I can, I only thought it was the cause.

Q What became of the machine dirt produced by the cutting, what was done with it before firing the shot?

A It was loaded on a car and sent out, then we damped down—tamped the holes—and fired the shot. It was the custom to take out all the dust before firing.

Q Are you acquainted with the provisions of the Coal Mines Regulation Act with regard to the precautions to be adopted before firing? A Yes sir.

Q Had you yourself no knowledge of any gas in this mine? A No sir, I never encountered any gas, I never saw any gas reported, I never looked over the books.

Q Are you acquainted with the requirements of the act with respect to watering before firing in dry and dusty mines? No sir. Q Haven't you read over the act in this particular;

A Yes sir, the act requires that no shot shall be fired if there is any gas or indications of gas, and it provides that if there is any dry dust about it must be sprinkled. I do not know to what extent the act provides.

Q In your experience as a miner or fire boss have you been accustomed to see shearing done in the mines you worked in? A Yes, I have seen shearing done, but not in the mines here. Q What is the effect upon blasting operations in using shearing? A It makes it easier for coal to shoot—the coal comes away easier; there would be less resistance to the force employed, and a less violent shock. There never was any shearing done in these workings that I know of; the centre drill hole was intended to have the same effect as shearing. Q Is shearing the same process vertically as cutting through the coal horizontally? Is the shearing making a hole from top to bottom the same as you would do underneath? Yes sir. The object of drilling the centre hole in blasting is the same as in shearing. It has the same effect; it took less powder than with just the side shots; with the centre holes coal came away easier, it had an open end both ways. Q You speak of putting in twenty to twenty-four inches of powder in these blast holes on the sides What was the diameter of the holes? A About two inches. Q Have you any idea of the weight of powder you would use in these holes? A About one pound; the powder was put up in cartridges. Q In your experience where there has been danger of fire from blasting, have you ever used any special kind of explosive, other than powder, to minimize the danger in dry and dusty workings? A Yes, giant powder; I have used this Ambrus. Q Do you know if there special explosives made for use in such dry and dusty mines? A Yes. Q Was there much dust floating in the air in the mines? A Where the machines were working there was quite a lot of dust in the air. Q In watering before firing a shot, where did you sprinkle? A Under the mining and back from the face about twelve feet. Q Did you sprinkle the sides at all? A Yes sir. Did you have any appliences for doing so? A Yes sir; only the powder kegs that were lying round. Q And there was enough water? A Oh, yes, there was lots of water there.

Examined by Mr. Macdonald witness said he did his work properly, seeing that everything was in proper shape before he fired, and that there was nothing of importance out of the usual during his time beyond these fires, which caused no alarm. He never saw any afterdamp in the mine. He did the watering back from the shots himself for about twelve feet, but admitted it should have been wet back about fifty, though if he had to pack that much water, there would have been very little coal taken out. He repeated that dust made by the machines was always carted out before firing, and confessed that the cause of the explosion was a mystery to him.

Examined by the coroner he stated that it had been customary in mines in which he worked to have the roads sprinkled throughout, but here the roads never see water.

Examined by a juror, he stated that the mine roads had from six to eighteen inches of dust on them.

Examined by Mr. Blakemore he said the drill holes were tamped with coal dust, which he admitted to be dangerous, but said he could get no clay.

CHURCH NOTES

The services at Christ Church, Fernie, will be held on Suuday next, June 1st, as follows :—Matins and Holy Communion, 11 a.m.; Sunday School and Bible Class, 3:30 p.m.; Evensong and Sermon, 7:30 p.m. The services will be of a nature suitable to this sad and trying occasion through which we are passing. The preacher will be the Venerable Archdeacon Pentreath, D. D.

Coal Mines' Regulation Act.

NOTICE is hereby given that the name of the first alternate appointed by the owners to the Board of Examiners of the Coal Creek mine, is David Martin, not David Morton, as previously given.

EDWD. G. PRIOR,
Minister of Mines.

Department of Mines,
May 5th, 1902. 175-4

"A Voice from the Coal Creek Mines Disaster" will be the subject of discussion by Rev. D. Holford, in Baptist church, Joyce hall, Sunday evening, June 1st, at 7.30. Morning service at 11 o'clock, subject, "The Church Christ's Body." A hearty welcome awaits all who attend these services.

MORRISSEY.

Morrissey is to have a new school house in the near future.

Our town is looking very sad these days owing to the calamnity at Coal Creek mines.

Ownig to the high water the hotel of Eugene Walter was abandoned last week.

Mr. A. Steele, of the Angels' Rest, Fernie, arrived here on Wednesday. He intends making this his home for the present.

The Liberals of Morrissey organized an association here in the school house on Thursday, May 22nd. Judging from the number of men present, the Liberals are in the majority here. Dr. W. H. Wilson took the chair and opened the meeting by a few remarks as to the work of the the proposed organization, also to the state of the Government at the present time, ending up with an invitation to those present to become members and have their names enrolled on the new book. At this point a few Conservatives left the room, and those remaining signed their names, to the number of twenty-three. For a beginning this is not bad, and if all put their shoulder to the wheel Morrissey will soon have an association that will count in the nation's politics. The members proceeded to business by electing Hon. Clifford Sifton honorary president W. H. Wilson, M. D., was elected president by acclamation, A. H. Martin, vice-president, W. F. Tranter taking the secretary-treasurer's office temporarily. This, with an executive committee, forms the roll of officers of he new association.

W. H. Leitch, of Ottawa, who conducted the Crow's Nest Coal fields survey last year, arrived in town yesterday. He will make a survey of the Blairmore properties.

School will re-open Monday.

C. P. Hill arrived in town from New York to look after his mining interest in the Kootenays.

W. Stephenson, the policeman who was walked out of Fernie by indignant miners, was met by a committee of miners at Michel and passed on to Frank where he has been taken under the protection of the N. W. M. P.

Memorial services will be held in the Prsebyterian church tomorrow (Sunday).

One of the most generous offers toward the relief of the sufferers from the Coal Creek mine disaster was from the Protestant Orphans' Home, Victoria, B.C., offering to receive all homeless children free of charge.

The C. P. R. have kindly offered transportation at half rate to any of those rendered destitute by the Coal Creek mine disaster.

Mr. C. G. Brown, of Kamloops, wishes to express his gratitude to the friends who so kindly assisted in performing the last sad rites for his son, A. E. Brown, who was killed in the Coal Creek disaster.

LIQUOR LICENSE ACT.

I. Eugene Walter, of Morrissey, B.C., hereby apply to the Board of License commissioners for a hotel transfer of my license to sell intoxicating liquors under the provisions of the statutes in that behalf in the premises known and described as The Hotel Walter, to the premises known as the Elk Hotel. at a point about two miles west of the present Hotel Walter, to commence on the 1st day of July, 1902.

CROW'S NEST MOUNTAIN

VOL. VII. No. 23. FERNIE, B.C., SATURDAY, JUNE 7, 1902. WHOLE NUMBER, 179.

Are you paying rent

and do you wish to

Own Your Home

If so pleantil ad this carefully:

The Canadian Birkbeck Investment & Savings' Co.

Head Office, Toronto.

Capital Subscribed - - $2,500,000
Paid up - - - - - 600,000

Will assist you to

Purchase or Build a Home,

permitting repayment in

Easy Monthly Instalments

(just as you now pay RENT.

To Rent Payers and all persons of moderate incomes who can furnish part of the cost of a Home, either in land or cash, and who desire to purchase or build homes for themselves, or pay off existing mortgages thereon, the Birkbeck Company offers special opportunities, extending to them the privilege (to most people an indispensible one) of **repaying their loans in Easy Monthly Instalments** not exceeding the Amount usually spent in rent.

THE ADVANTAGES OF THIS PLAN are apparent to borrowers. The loan so obtained runs through to its final payment by a system of monthly rents, and needs no renewal. The borrower is not confronted at a set time (usually at the end of three or 5 years) with his entire indebtedness. The falling due of the principal is no longer a cause of keen anxiety. On the contrary, under the Birkbeck's method the Borrower is enabled to gradually cancel his indebtedness. The burden has been evenly distributed over a more lengthened period, and the Loan, for which formerly the interest could scarcely be raised annually, is now not only easily carried but paid off in the end almost imperceptibly. Intending Borrowers are given:

1. **Choice of the Period and Amount of Repayment, and**
2. **Absolute Limitation as to the number & Duration of payments**

The payments are always the same and are due at fixed intervals, borrowers therby knowing at the outset

EXACTLY HOW MUCH

they will have to pay each month and year and exactly how long.

The practical result of borrowing under the old system is that, after paying interest for a term of years, the original debt still exists. This is true in nine cases out of ten.

A Bundle of Receipts

will be all you will have to show after years of rent-paying. The house will still be the property of the landlord.

Special Feature

Borrowers are not Required to Become SHAREHOLDERS and are free of any liability outside of the unpaid portion of their loans from the company. In the Birkbeck Company there are

No DELAYS
FINES
FORFEITURES,

No uncertainity in estimating maturity.

No Shareholders' risk or Liability.

No double set of fees for local and head Office solicitors charges.

For further particulars regarding the Company's Attractive Rent Purchase Plans, apply to

Arthur H. Cree,

Office over Bleasdell's Drug Store, Fernie.

Open Letter to G. H. Tonkin

The Free Press Makes Some Suggestions.

To G. H. Tonkin, No. 4 General Menager Crow's Nest Pass Coal Co.

You have arrived, but not as soon as your reputation, which, during the past few weeks, has been canvassed with satisfactory results. On behalf of the people of Fernie and THE FREE PRESS we tender you a hearty welcome and best wishes that you will succeed where others have failed. Fernie got a good start, but soon fell from grace, and we look to you to regenerate things.

It is certain that your employers have not told you "the truth, the whole truth and nothing but the truth," because they do not know it and will not be told, but in the interest of Fernie first, and yourself second, we are going to tell you a few things worth knowing. Now, as always, we shall treat you fairly, and accept you at your worth, even though we wish you had been a Canadian.

First of all, will you turn a deaf ear to the underlings who will tell you that we are prejudiced and that they know it all? And will you do us the justice of seeing that we do not suffer at the hands of your subordinates for rendering you what we honestly believe to be a service.

We tell you first that the corporation you serve has incurred the ill will, and in many cases, the hostility, of the majority of the people of Fernie and the residents of Kootenay, mainly as a result of the harsh, unfair and arbitrary conduct of its officials. The goodwill of the community has appeared of little moment to the men who have recently represented the Coal C., and it has taken the appalling catastrophe which has plunged us all into the depths of sorrow, to shew them both the inhumanity and impolicy of their conduct. The most valuable asset of any corporation is this goodwill, and it can only be secured and retained by the exercise of that tact, fairness and justice to which most of the Company's recent officials appear to be strangers—the promise readily made and as quickly broken, the uncivil refusal of information to which the people are entitled, the arbitrary handling of unfortunate and sometimes sick tenants, the shuffling method adopted in dealing with town lots, unwarrantable delay in the granting of all titles, the breach of faith by your Company on the subject of a store at the mines, the compulsion to drink impure and polluted water or go thirsty, and that from mains furnished by the Company and paid for by the consumer; the drainage of the mines, now containing dead horses, into the source of water supply, the forcing of the miners to live in an unsanitary, sunless and totally unfit mountain gorge, the wholesale importation of inferior labor and men unable to speak our language or even understand their foreman's instructions in the mine, and the general ignoring of the reasonable wishes of the community in matters which the citizens have a right to be heard upon. This is surely a sufficiently lengthy indictment, but true every word of it, and if you are a "man" as we believe, and not one of the apologies with whom we have had to deal you can overcome even such a formidable task as this.

What the Company wants is a manager who will "manage" and not be led by the nose. One who will neither be bluffed nor dictated to. One who realizes the possibilities of the great enterprise in our midst, whose only enemies are those who so grossly mismanaged it, and one who believes that the people of Fernie are not such blamed fools as to wish to antagonize the only industry on which their future depends. We want a large hearted, not narrow minded man. We believe you are such an one, and assured of our co-operation, we trust you will prove yourself equal to the task. Now is your opportunity. If you use it not you will speedily find yourself in the coils of that pernicious officialdom which has paralyzed the efforts and wrought the downfall of your predecessors.

118 RECOVERED

Although no efforts have been spared during the past week to recover the remaining bodies in the mine very little progress has been made. There are now 118 out, and it is expected several will be taken out today. It is impossible to proceed with the work until the rock which has fallen from the roof and blocked the way into some of the rooms, has been removed, and this is being done as quickly as possible. There are about twelve men known to be still in the mine.

Those recovered since our last issue are

R. Stranchina, married.
Robt Lamb, wife and child.
Antonio Matteo, married
Jas. Hughes
Jesse Wheeler
Jas. Dickson

WORK OF RELIEF.

At a general meeting of the Relief Committee held on Thursday afternoon it was decided to disband the sub-committees and appoint an executive with full power to receive, manage, invest and distribute the monies contributed to the fund. The following gentlemen were appointed to act on that committee:—T. C. Thompson, Accountant and Land Commissioner Crow's Nest Pass Coal Co.; Rev. Father Millieux, Roman Catholic Priest; Rev, Mr. Houghton, Vicar Christ Church (Anglican); Abraham Joyce, Merchant; Robt. Cuddie, Miner; Thos. Letcher, Miner; Louis Carosella, Merchant; F. C. Malpas, Manager of the Canadian Bank of Commerce and Treasurer of the Fund; Sherwood Herchmer, Solicitor. This Executive Committee reports once a month to the General Relief Committee, which is composed of thirty one members. The Executive Committee is prepared to receive and consider any applications for relief.

Church of England, Nelson	29 15
Thorpe & Co	10 00
Total	$18,119.00

It is stated by Managing Director Rogers that the Crows' Nest Pass Coal Co. will give at least $10,000. It is also reported that the Western Federation of Miners will contribute $3,000. If both these amounts are forthcoming it will bring the total up to $31,119 00.

FROM NANAIMO.

At a meeting of the Nanaimo Miners' Union held the other evening a resolution was adopted endorsing the action of the Trades and Labor Council in asking the members of parliament representing Nanaimo city, and North and South Nanaimo, to ask the government to appoint a royal commission to enquire into the circumstances attending the disastrous explosion at Fernie mines, and also instructed the assistant secretary, Mr. Sheaton, to wait upon, or write to the three members at as early a date as possible and urge upon them the importance of securing the appointment of the commission and to ask their assistance in the matter.

A resolution providing for relief for the Fernie sufferers was introduced, but was allowed to stand over for two weeks with the idea of perfecting, if possible, an arrangement which will not only provide for assistance in relieving the distress at Fernie, but also to assist the Fernie miners' union financially, if necessary, in supporting their case in the courts.

All other business transacted was of a routine nature.

COMMISSION DEMANDED

Victoria, June 2 — Hawthornthwaite gave notice to-day of the following resolution:

"Whereas, on the 22nd ult., an explosion occurred in No. 2 shaft of the coal mines at Fernie, resulting in an appalling loss of life, and

"Whereas, similar disasters have been alarmingly numerous in the coal mines of British Columbia, and

"Whereas, the report of the inspector of mines for Fernie district would appear to show that the mines were, 1st, free from gas; 2nd, free from dry coal dust; 3rd, that the air circulated was in excess of quantity required by law or necessity; 4th, that men employed in said mine were compelled to use safety lamps; 5th, that the mines were in first class order and the management effective, and

"Whereas, one of the managers of the said mine has stated that the Coal Mines Regulation Act was being strictly enforced in regard to the non-employment of men at the working face without holding proper certificates of competency, and

Whereas, if the conditions of the mine and its management had been as set forth in said report and statement, no such disaster could have occurred.

"Be it therefore resolved a royal commission be appointed to enquire into said disaster and that one of the miners' representatives from each of the boards of examiners in the province be members of such commission."

A TRIBUTE TO JAMES R. WILSON.

The Scranton (Penn.) Times to hand contains the following:—"A telegram on Wednesday stating that Geo. Wilson had left Fernie, B. C., on Wednesday last in company with the dead body of his brother James, who met death in the explosion at that place last week. Not being able to tell when the remains will arrive, the funeral announcements cannot be made. The unfortunate young man, while a resident of this town made many friends for his manly qualities. He was one of those quiet young men who always had a host of admirers that will lament his untimely end. While a resident of this town he was engaged under his father, who was mine foreman of the No. 1 colliery of the Pennsylvania Coal company. About two years ago he in company with his family left for British Columbia, and their parting at the depot was an evidence of the respect they were held in by the residonts. Fully 500 people assembled at the depot to bid farewell to the friend of the workingman "James Wilson" father of the dead young man.

Mr. Wilson was probably the best natured mine foreman the company had, and many of the miners of Dunmore today regret that he had ever left them. He was a kind, considerate man, and never turned a poor man down when he sought fair remuneration for his labors.

Mr. Wilson has our heartfelt sympathy in the hour of bereavement."

CRANBROOK VS. LETHBRIDGE.

First Game in the League Series Played at Cranbrook on Monday.

The Lethbridge lacrosse team got away with the Cranbrook aggregation by a score of 5-2, on Monday last The Lethbridge boys showed their superiority over the Cranbrook players at every point in the game. The teams lined up as follows:—

Lethbridge		Cranbrook
VanHorne	Goal	Smith
Stewart	Point	Bathie
Warwick	Cover Point	Jardine
A. Scott	First Defense	Dowsley
Rithie	Second Defense	Thompson
A. Ripley	Third Defence	G. Leitch
Alex. Scott	Center	Tate
Hill	First Home	Jamieson
Kenny	Second Home	McSweyn
Fraser	Third Home	Finnessy
Staffor l	Outside	Cameron
L. Ripley	Inside	Carrigan
Bently	Field Captains	Gougeon

Mr. Wallace, a traveling man, acted as referee, and gave good satisfaction, and A. L. McDermot and J. P. Fink acted as goal umpires.

The return game takes place in Lethbridge on August 12.

The Relief Fund

The substantial contribution of the coal company to the Relief Fund $10,000, followed by a very handsome donation of $3,000 from the Western Federation of Miners brings it up to the sum of $30,000, but it cannot be too widely known that this sum is totally inadequate and a special application should be made by the Board of Trade to the mayors of the principal cities of the Dominion to open subscription lists. If the rich cities of the east were approached through this channel we feel sure the response would be large.

An Appeal to the Miners

We notice with extreme regret that since the explosion many of the better class miners have gone east. This will be a loss to the company and the town in every sense, there is no need for a scare. The coroners inquest and the government enquiry to follow will ensure such precautions in future working as have never been considered necessary in the past so much is certain, and the mines will be rendered as safe as skill can make them. Fernie will yet be a good town and we urge the men to have a little patience and not hurry away under the influence of scare. If proper safeguard are not adopted then let them go.

Land Titles

The irrepressible Joe Martin is charged once more with "holding up" the titles for government lots in Fernie townsite. It is a pity that such should be the case just at the commencement of the building season and seeing that the coal company have already received their title to these lots and that they are under contract to deliver same to every purchaser it would be a fair thing for the managing director to see before he leaves for the east that they are issued. Few things would do more to assist the town at a time when it is most needed.

Slav Labor

Without wishing any disrespect to the class of labour employed in the Fernie mines and whilst extending to other nationalities the same sympathy in their bereavement as to people of our own blood, we think the experience of the last few weeks justifies us in saying that Fernie mines cannot be safely worked except by men of our own race and language and that men who labour under the disadvantage of being alien to both are a source of danger to themselves and their fellows. It cannot be cheaper in the long run to pay $2.75 or $3 00 a day to such than to pay $3.50 to Canadians or Americans who are of kindred sympathies and ideas and amenable to discipline. The closing of of the San Coulee mines has thrown 600 to 800 miners out of employment, living is 30 per cent dearer here than in Washington, let the Coal Company pay wages with the same purchasing power as there and these experienced trained miners could be secured for Fernie to the advantage of their employers and the town.

THE crown prosecution in the Kootenay Association cases cost in the aggregate $2,000. This is a large sum to spend in the prosecution of what appeared upon its face to be rather trivial offence, but the knowledge that it did cost this amount of money will enable the tax payer the better to understand the charges which appear in the public accounts, year after year, under the head of the administration of justice.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

"What on earth should I do with a private detective?" I cried, with a great laugh.

"I may venture to remind you that you have just succeeded to a vast fortune. The heirship of the McFaught property must be worth several millions to you, and—and—so Sarabands desired me to call."

"Is it part of a rich man's duty or business to keep a private detective?" I was still laughing, but I found no response on the portentously solemn face of my visitor.

"That's as may be, Captain Wood. Some do and some don't. Those who didn't have come to wish they had; so might you."

"And what would happen if I were so foolish as to refuse the obliging offer of 'your people?'" I asked smilingly.

"I beg of you to be serious, Mr. Wood. Take us or leave us, but employ some one. Do not, for heaven's sake, attempt to run alone."

He spoke with such evident earnestness and good faith that I began to feel a little uncomfortable.

"Do you imply that I need protection, that I am in any danger—any personal danger—that unless I am taken care of I shall fall a victim to some—what shall I say—some plot?"

"All that and more. I cannot at this stage be more explicit in my warnings. It would be giving away our business. But there are ample grounds for what I say. I indicated something of the sort of thing when I spoke to you this morning. There are those who grudge you your newly acquired fortune, who deny your right to it or even the testator's right to it. They are ready to employ any means—secret, insidious, even violent means—to wrest it from you. Let me tell you, sir, that even now, at this moment, you may be, I believe you are, in imminent peril—you and your life."

"But this is a matter for the police!" I cried hotly, springing to my feet.

"Your police cannot help you in this. It is too private and particular, and they are of little good till after the event. What you want is prevention, anticipation. You must meet guile with guile, plot with counterplot, always supposing there is time."

"Where is the hurry?"

"We have reason to know that everything was planned some time since."

"Why, the news is not a day old yet!"

"It has long been expected that the McFaught millions would come to England, but the name of the real heir was only disclosed a week ago. Everything was ready, and the campaign was to commence directly it was known who should be attacked."

I looked at this heavy featured, slow speaking Yankee, wondering whether he was in earnest or only thought me a fool. I knew, of course, that I had now become fair game for the blackmailers, and I was inclined to imagine that Mr. Snuyzer's solicitude was only a transparent attempt to extort money.

"And what would it cost me to secure the good offices of Messrs. Saraband & Sons?" I asked, seeking enlightenment as to his probable demands.

"Our charges, sir, are no more than out of pocket expenses and a small retaining fee, say five and twenty dollars a week. After that a pro rata premium, according to the risks."

"Risks? I do not quite understand."

"The perils, sir, from which you are saved, whet'er by premonition, guardianship or a ual rescue. We have a graduated scale. I shall be happy to leave the 'skedool' with you. Here

'But this is a matter for the police!' I cried hotly.

are some of the items: Divorce proceedings, either side; sequestration, false charges, wounding, loss of limb, death"—

"Murder, in short?" I still spoke in a flippant tone. "What is the rate of insurance against that?"

His face did not relax, and he answered gravely:

"From £10,000 up to any sum, according to the nearness of the risk."

"Well, I will think over your obliging offer. Possibly, if I find I cannot take care of myself, I may come to you. For the present I shall trust to Scotland Yard and my own endeavors."

"You are wrong, sir, entirely wrong, believe that," said my visitor darkly as he rose to take his leave. "You are in considerable danger, sir, and it will increase hourly. And you have given points against you. The chief aim of these big 'bunko steerers' is, of course, to pouch your dollars, but it is known that you are concerned with the differences between our two great countries. It is supposed that you hold important military information, state secrets that might be got out of you, squeezed out of you, if they put you in a tight place. You may decline our offer. That is your own affair. But, sir, let me conjure you to carry a six shooter on all occasions. Go nowhere—well, to no strange or unusual places—alone."

"I trust it is not quite so bad as all that, Mr. Snuyzer. Still, I am grateful, and I shall certainly remember you if, if"—

"You survive? Yes, sir, but do not leave it too late. You have been marked down, captain, and they will strike at you, somehow, soon; today, tomorrow, at any time. They contend that the McFaught millions were acquired by spoliation and sharp practice."

"Is there any truth in that?" I broke in hurriedly.

"Bully McFaught was a smart man, and struck some close things, but he was no more entitled to state prison than those he fought with on Wall street. Any stick is good enough to beat a dog with, and your enemies will talk tall about surrendering ill gotten gains, because it is a good show card. I do not think you need lie awake wondering whether you should make restitution to the widow and the fatherless—anyway, not till it's forced upon you, as it may be."

"And you can save me from that?"

"Or worse. We think you will be well advised to consider our offer. If we can be of any service to you, remember our telephone number is 287.-356, and I shall reply personally or by proxy at any time, day or night. You have also my address, 39 Norfolk street, Strand. I reside there, on the premises. I shall be proud to receive your instructions, and—if it is not too late—to come to your assistance on the shortest notice. Good day, captain. Think well of what I say."

How was I to take all this? Seriously? I had read in every schoolbook of the snares and pitfalls of great wealth, but had never dreamed—who could?—of dangers so strange and terrible as those that now menaced me, if I were to give credence to this extraordinary tale.

Some one hailed me as I passed down Piccadilly, and, turning, I recognized a man I knew, Lawford by name, a big, burly, fat voiced man, with jet black beard so unmistakably dyed that it increased his years and gave an unwholesome tinge to his pallid complexion. He had greasy, fawning manners—an assumption of bonhomie that you instinctively distrust. I never cared for him much, but he always pretended to be devilish fond of me.

I had met this Lawford on the other side of the Atlantic, in the South American city where I had spent some time in a recent mission. He gave it out that he was prospecting for gold in those parts, but many believed that he was a spy and secret agent of the American government. Then we came home together in the same steamer, and I was much thrown with him on board. He was on his way to England to make his and every one's fortune, mine included. I confess the fellow amused me, his schemes were so tremendous; he had such a profound belief in himself and in the simplicity of the British public.

"Yes, sir, I shall spoil them; stick them up and carry off a pile of plunder. You'll do well to cut in with me, captain. You'd strike it rich; yes, sir. I can dispose of 75,000 acres of real estate which is just honeycombed with gold. The greater part belongs to me, Rufus Lawford, but I won't part till your darned capitalists have unbuttoned. But they will that when they've seen my prospectuses and heard my witching tongue."

Lawford had not found the innocents of the city so easy to beguile. He passed through many phases of good and evil fortune in the months that followed his arrival. I saw him from time to time, now gorgeous, now looking like a sweep. Sometimes he was on the eve of pulling off some gigantic operation; at others he was in the depths of despair and borrowed a soverign "on account" of the great fortune he meant some day to force on me. He evidently did not prosper in his schemes of promotion. But he still hung upon the frontiers of finance, in the neutral, debatable ground where every man's hand is against his fellows and frank brigandage is more or less the rule.

I was surprised to find him in the west end, and told him so, as he overtook me with the "fifth" Globe in his hand.

[CONTINUED.]

Mud in Water.

It is claimed that mud in drinking water may be more of benefit than detriment. The mud overcomes offensive odors and destroys many of the impurities of bad water.

Parisian Cabbies.

In Paris the cab driver is prohibited by the authorities from smoking when driving through the streets.

Good housekeepers should buy Blue Ribbon Tea, Coffee, Baking Powder, Jelly Powder, Flavoring Extracts, Spices etc., because they are the purest and most economical goods on the market.

Every up-to-date Grocer sells Blue Ribbon goods. Take our advice and insist upon having them.

Blue Ribbon Manufacturing Co.

The metal which has the greatest reflective properties is a mixture composed of copper 32 parts, tin 15 parts, brass, silver, and arsenic each 1 part.

NATURE'S BLESSING

IS FOUND IN HEALTH, STRENGTH AND FREEDOM FROM PAIN.

This Gift is Meant for All—On It the Happiness and Usefulness of Life Depend—Without It Life Is An Existence Hard to Endure.

Health is nature's choicest gift to man and should be carefully guarded. Ill health is a sure sign that the blood is either insufficient, watery or impure, for most of the diseases that afflict mankind are traceable to this cause. Every organ of the body requires rich, red blood to enable it to properly perform its life-sustaining functions, and at the first intimation that nature gives that all is not well, the blood should be cared for. Purgative medicines will not do this—it is a tonic that is needed, and Dr. Williams' Pink Pills have been proved, the world over, to surpass all other medicines in their tonic, strengthening and health-renewing qualities. From one end of the land to the other will be found grateful people who cheerfully acknowledge that they owe their good health to this great medicine. Among these is Mr. Elzear Robidoux, a prominent young man living at St. Jerome, Que. He says: "For some years was a great sufferer from dyspepsia. My appetite became irregular and everything I ate felt like a weight on my stomach. I tried several remedies and was under the care of doctors, but to no avail, and I grew worse as time went on. I became very weak, grew thin, suffered much from pains in the stomach and was frequently seized with dizziness. One day a friend told me of the case of a young girl who had suffered greatly from this trouble, but who, through the use of Dr. Williams' Pink Pills had fully regained her health and strength, and strongly advised me to try these pills. I was so eager to find a cure that I acted on his advice and procured a supply. From the very first my condition improved and after using the pills for a couple of months I was fully restored to health, after having been a constant sufferer for four years. It is now over a year since I used the pills and in that time I have enjoyed the best of health. This I owe to that greatest of all medicines, Dr. Williams' Pink Pills, and I shall always have a good word to say on their behalf.'

Through their action on the blood and nerves, these pills cure such diseases as Rheumatism, Sciatica, St. Vitus' Dance, Indigestion, Kidney Trouble, Partial Paralysis, etc. Be sure that you get the genuine with the full name "Dr. Williams' Pink Pills for Pale People" on every box. If your dealer does not keep them they will be sent post paid at 50 cents a box or six boxes for $2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

The best ivory comes from Zanzibar; the next from Ceylon.

In Australia, with one exception of the dingo, or wild dog, there is no beast of prey.

MINARD'S LINIMENT is used by Physicians.

Adjutant Birds.

In a public park at Calcutta are several birds of the adjutant species. They are the storks of the East Indies and average six feet in height. These birds parade in a stately way and at a distance look so much like soldiers that strangers often mistake them for grenadiers.

The Opal.

Any opal and particularly the Mexican stone becomes dulled by washing the hands with the ring on, and it loses its brilliant play of color. The stones are not durable, like diamonds, nor will they stand the same hard wear.

The Chinese Bride Wears Red.

Red is the nuptial color in China. The coolies that carry the bride in her litter are dressed in red, and they bear a dwarf orange tree loaded with fruit and coin. The bride's compartments are finished in red trimmings, presents are carried on red trays, the banners borne in the procession are originally crimson, which are brightened by the rosy glow of the lanterns. Red umbrellas are carried, and illuminated signs blaze in color. The canopy itself is decorated according to the wealth and the taste of the bride's family. A poor woman is carried to her wedding feast in a plain chair painted red. If the family has wealth or rank, the palanquin is very ornate, decorated with dragon heads. The Chinese skill in working silk or gold cord is displayed in an artistic manner. When the bride appears, she wears a red veil, and the letters to her ancestors, whose blessing is invoked, are written on red paper. The bride generally wears a crown adorned with tinsel and mock jewels, an idea which is much more prevalent in Sweden.—Woman's Home Companion.

Stage Makeup.

A noted comedian, who is noted for his skill in the art of makeup, says: "Lines will never help an actor to play a part if he has not made a study of the character itself. The true artist looks to his voice as much as to his wigs. He wants a large box of voices as well as of makeup. It is absurd for a man to go into character business unless he can disguise his voice and speak several dialects to start with. Character work is no plum duff for any one. I've seen men who seemed to fancy that a Lancashire dialect would do first rate for a Scotchman and that any old thing was good enough for a heathen Chinee. A character actor must disguise face, walk, voice, mannerisms; in short, he must take his own personality and bury it deep."

The Skylark.

The skylark sometimes sings during winter, and there is a Scottish proverb which runs to the effect that if it be heard before Candlemas there will be bad weather after that period.

Shorn Tipplers.

Madrid has a law by which habitual drunkards have their heads shaved every four weeks.

The Biggest Aerolite.

The biggest aerolite ever found was discovered in Greenland in 1870. It weighed twenty-three tons.

Old Peruvian Pipes.

Some curious pipes have been found in the vast guano deposits of Peru, the date of which is fixed by scientists to whom they have been submitted as coequal with the famous Peruvian pottery, the eleventh and twelfth century.

The Burmese Soung.

The Burmese soung is a harp, the body being modeled like a boat, with a long, high prow. The instrument has a scale from low A in the bass clef to F in the G clef. It is used to accompany vocal music.

Fleas and Dogs.

If your dog has fleas, wash him with an infusion of coculus indicus or with coal oil and then with soap and warm water.

Lancewood.

The strongest known wood is said to be lancewood. Its tensile strength per square inch is 23,000 pounds—that is to say, that weight is required to tear asunder a piece of it one inch square.

Mary's Meadowing.

Among nature lovers in England a very pretty practice, known as "Mary's meadowing," is to bud wild roses in the fields and let them grow where they are and to introduce stray bulbs of the rarer kinds in the fields and woods so that they may grow wild.

Houses Without Nails.

Most of the Japanese houses are of one general shape and two stories high. They are put together by a curious method of mortising, at which these people are adepts, not one nail being used throughout the construction of the whole building.

John Wanamaker, Philadelphia, holds the greatest [illegible]nt in life insurance policy he[illegible] by any individual. His total ins[illegible]nces aggregate $1,300,000.

Ink-stains are best removed by lemon-juice. Ordinary soap strengthens ink-stains.

Sixty passengers on the stage-coach used to be injured for every one nowadays by rail.

SEVERELY CRITICIZED

HONOLULU MAN CHARGES AMERICAN GOVERNMENT WITH RUINING TRADE.

HE SAYS THE MISSIONARIES ARE SPOILING THE SANDWICH ISLAND NATIVES.

Vancouver, May 31.—According to the report of recent arrivals by one of the last arriving steamers, it appears that the social affairs and commercial business in the Sandwich Islands are very unsatisfactory and are growing more so day by day ever since the government of the islands was assumed by the United States. The people who had been endeavoring to carry on business on the islands and enjoyed considerable prosperity until they were taken over by the present government are leaving by every steamer, having become convinced that success could no longer be expected.

RUINED THOUSANDS.

Among the passengers on the last steamer was W. J. Ball, who has had the management there of the business of a large firm for the last nine years. He stated that the change of government has practically had the effect of ruining all the merchants, and there is not one house that now does more than half the business of former years. "Practically speaking," says Mr. Ball, "six thousand people have been ruined, myself among them, for I have been really compelled to leave the islands without a cent.

"Prior to the advent of the missionary the natives were all a happy and contented people, each family owned a strip of land running down to the water, with equal fishing rights, and they were thus self-supporting. They did not wear many clothes, but this did not make them uneasy. The missionary first directed their attention to clothes. The natives' simple minds were soon fascinated by the varigated color and the fashion of the white man's clothes, and it required very little persuasion on the part of the missionary to induce the aborigine to adopt his methods. The only difficulty the natives had to meet was the fact that they had no money to buy the missionary-s wares, but their land seemed to be just as good to the missionary as the clothes were to the natives, and a little mortgage appeared to be sufficient to induce the missionary to part with his clothes. At this rate, however, the natives were soon hopelessly in debt to the missionaries, who promptly foreclosed the mortgages, and in this way became the owners of the islands, as they are to this day. One of the sayings of the islanders is very simple and pathetic. It runs as follows' 'Missionary teach me to pray to God, and while I pray he steal my land.'

"Nine years ago the natives numbered 120,000, now there are no more than 26,000 Sandwich Islanders, and at least 2,000 of this number are in the isolation hospital for lepers. The advent of civilization, so called, in that country has been very hard on the islanders. It brought with it the Chinese and Japanese, and with them leprosy, the effect of which had already been felt by the natives. The white man will not show any signs of this loathsome disease for nearly seven years after the infection has taken place, and then he may be able to survive for twenty years afterward in the leper colony. The native, however, shows signs of the infection much sooner, and lives no more than a few months."

Mr. Ball is on his way to England, and is very pronounced in his determination not to set foot in the Sandwich Islands again. The country is not suitable for a white man to live in for more than two months in the year, and the prospects of those who risk remaining have been absolutely ruined by the change of government. Mr. Ball instances one of the best business houses in the islands as having lost fully half its business in the last few months, and many lesser houses have been forced to give up altogether. The government officials at the present time are even less in sympathy with the natives than were the missionaries. All the revenue of the country is shipped to the United States, and the money that should go to fix the roads and the country now goes to swell the revenue of the United States.

sections for American capitalists, whose interest has not yet been turned to Canada, in order that these men would look into Canadian investments.

English is studied by 95 per cent. of the students attending the higher schools in Egypt.

Statistics show that one out of every twenty-two Danish immigrants to the United States becomes a Mormon.

BIRTHDAY CELEBRATION.

Grand Military Display in London—"Trooping the Colors."

London, May 31.—The birthday of King Edward, (who was born Nov. 9, 1841) was officially celebrated yesterday, it having been decided, as announced in the official Gazette, April 15, that His Majesty's national day was to be celebrated in London and on the home stations May30, as being the most suitable time for a military display. On the other hand, foreign stations will celebrate Nov. 9, the actual anniversary of His Majesty's birth.

General interest in the celebration was, apparently, not seriously diminished by the expectations of the greater of the series of events surrounding the coronation. The towns throughout the kingdom were gaily decorated and beflagged and the spring at the various ports made the gayest display of bunting. The day was observed with parades and salutes. The chief celebration of the day was the ceremony of "trooping of the colors" on the Horse Guards' parade here, and the presentation of colors to the new Irish Guards. Stands covered with crimson cloth were erected on three sides of the parade ground, and were occupied by thousands of privileged spectators, including the United States ambassador, Joseph Choate, and the secretary of the United States embassy, Henry White. Thousands of other people were grouped closely around the line of sentries. The troops taking part in the ceremonies were battalions of the Irish Guards.

Tremendous cheering greeted the appearance of the king and his brilliant escort, which included many notabilities. His Majesty, who rode between the Prince of Wales and the Duke of Connaught, wore the uniform of a colonel of the Irish Guards. Lord Roberts, the commander-in-chief of the forces, who led the procession, also wore the uniform of a colonel of the Irish Guards. Queen Alexandra and other members of the royal family viewed the scene from the windows of the Horse Guards. The crowds present bared their heads whiled His Majesty proceeded to the saluting point. After an inspection of the line of troops and the presentation of the colors, the ceremonies ended with a review of all the troops on the ground. The King during the afternoon, presented colors to the King's company of the Grenadier Guards.

SASKATCHEWAN GOLD.

Montreal, May 31.—Ex-Mayor Prefontaine has received a cable from Chevalier Gustave Drolet, from Paris stating he has succeeded in floating his Saskatchewan Gold Mining company, with a capital of $300,000 and the stock is listed on both Paris and London markets. Mr. Prefontaine leaves himself for Yukon next week in connection with his gold mining property there and in September he will leave for London to float a company, he says, with a capital of several million dollars.

SAD ACCIDENT AT ELI

Eli, Man., May 31.—A little boy by the name of Dale Roy, 6 years old, was accidentally killed yesterday afternoon while watching some men moving a building. Something gave way, causing a piece of the timber to slide back striking the boy the head, killing him almost instantly.

CONDENSED NEWS.

Lord Strathcona is not in favor of colonial representation in the imperial parliament.

A boy named Walter Street, of Dunrea, Man., thinking he could swim, jumped out of a scow into deep water, and was drowned.

Twelve Galicians are reported to have been drowned near Edmonton They were drifting down the river on a raft, when it capsized.

P. Magher, a jockey, was fatally injured on the Woodbine track, Toronto.

The Winnipeg license commissioners have decided to abolish saloon licenses.

Hon. Michael Henry Herbert, now of the Paris embassy, will succeed the late Lord Pauncefote.

The latest election returns from Ontario give the government fifty seats, and the opposition fortv-seven, with North Grey claimed by both parties.

Lord Cadogan has announced that he will soon resign the lord lieutenancy of Ireland.

The Prince of Wales' proposed visit to India at the close of the present year, which is now regarded as a certainty, has, it is believed, been arranged in order that he may be present at the great Durbar which is to be held at Calcutta on the 1st of next January to celebrate the coronation of the King.

A sad drowning accident took place at Grand Marais, Lake Winnipeg on Friday last. Philip Thomas was crossing a ford with a companion, both being on horseback, when

ONTARIO ELECTIONS

PREMIER ROSS AND HIS GOVERNMENT SUSTAINED BY A SMALL MAJORITY.

FORTY-SIX CONSERVATIVE AND FIFTY-ONE LIBERALS—GAINS AND LOSSES.

Toronto, May 30.–With the returns from half a dozen constituencies somewhat incomplete, and one constituency, Manitoulin, not heard from at all, the Ross government has been apparently sustained by a majority of five or six. Last night's figures show 51 Liberals and and 46 including all the ministers, and 46 Conservatives, giving the government a majority of five which will be increased to six, if Manitoulin goes Liberal, and reduced to four if it goes Conservative. Frontenac is credited in this arrangement to the Conservatives.

The government went to the country with a majority of ten, which has been therefore slightly reduced. The government gained 11 seats, including the new constituencies, and lost 14. Of the new constituencies it appears to have carried all except Sault Ste. Marie. Manitoulin, as stated, being yet unheard from.

The government's gains were :
West Durham.
Fort William (new).
North Grey.
East Middlesex.
East Nipissing (new).
West Nipissing (new).
South Perth.
Port Arthur (new),
Prince Edward.
Centre Simcoe.
East Simcoe.
Stormont.
North Wentworth.

The Conservative gains were :
Centre Bruce.
Centre Bruce.
North Essex.
West Lambton.
London.
North Norfolk.
Ottawa (one).
East Northumberland.
South Oxford.
North Perth.
Sault Ste. Marie (new).
South Wellington.
North Waterloo.
West York.

AFTER MANITOBA GRAIN.

Duluth Capitalists Eager to Get Some of the Shipments.

Duluth and Minneapolis capitalists are interesting themselves in the wheat growing lands of Manitoba, and a company is now in course of formation in these two centres to build a large number of elevators in this province.

Duluth men are making an earnest endeavor to get a large slice of the grain carrying trade of Manitoba, and the Commercial club of that place has taken up the matter. The club and many of the big monied men advocate the removal of the grain duties, so that the grain shipped east would be diverted to "its natural channel," that is to their minds, to the Duluth elevators.

The new company, it is understood will have a capitalization of $7,000,000. The idea is to draw the grain via the Duluth route, and doubtless its promoters are largely interested in the abolition of the United States grain duties.

FOUR BOYS IN A BOAT.

Quartette of Lads From Port Credit Have an Adventure Not Soon to be Forgotten.

Four lads of Port Credit, Ont., —George Johnson, 17; Harry Stewart, 14; Bert Stewart, 12; and Eddie McBride, 14—had an adventure which they will remember for life. They went out from Port Credit, which is 20 miles from Toronto, in a flat bottomed scow and were blown out into the lake. Their failure to return home aroused great anxiety and grave fears were entertained that the lads were drowned. The Chicora, when 22 miles out, returning after a trip to Niagara Falls came across the boat drifting helplessly in the lake. The two younger boys were lying unconscious in the bottom of the boat covered with a sail, and the two elder were endeavoring to attract attention by hoisting a piece of sail. In this they fortunately succeeded and were brought on board in the last stage of exhaustion. The purser happened to be a medical man and took care of them. All will recover.

The C. P. R. has settled its difficulties with the telegraphers by granting many of their demands.

AT VEREENIGNING.

British Fixing Things Up Nice For the Delegates.

Pretoria, May 30.—The camp at Vereenigning, Transvaal, where the final decision in regard to peace will be reached, has been elaborately prepared by the British authorities with a view to the comfort and convenience of the delegates to the convention now being held there.

The camp has been laid out in a square, two miles from the Vereenigning station. On the Transvaal side of the Vaal river there are sixty bell tents and twenty marques. A plentiful supply of water has been piped to the camp. Electric lights have been installed and a staff of British medical officers is employed there. Generous cooking and catering arrangements have also been made. The delegates are amusing themselves with various outddor games, and at a recent football match the delegates from the Orange River State were victorious over the delegates from the Transvaal. A company of Scots Guards acted as a guard of honor at the game.

BRITISH NAVY.

Over £9,000,000 Will Be Spent On Building New Ships this Year.

London, May 30.—In a discussion of the navy estimates in the House of Commons today, the secretary of admiralty, Mr. Arnold-Foster, refuted Sir Charles Dilke's suggestion that the government-s shipbuilding programme was so small as to create a bad impression abroad.

The secretary said that during the past year 35 ships had been completed, 75 vessels were now under construction, including 20 armoured cruisers, and the admiralty contemplated immediate proceedings with upward of 27 other ships. The vote for the construction of vessels alone he said, during the present year, would amount to over £9,000,000 ($45,000,000.)

IMPERIAL ZOLVEREIN.

A London cable says: The idea of an imperial zolverein is widely discussed in the press, and there is a firm support for it among Unionist journals. In view of the approaching conference of the colonial premiers, sentences like this appear in the official papers . "As a nation we are free traders, but as a power we are, and must be, imperialists if we would exist and maintain our present position." This was the dominating sentiment of a spirited meeting of the Colonial club at the Hotel Cecil, which was attended by representatives of all their self-governing colonies, Sir Robert Herbert being in the chair, and Colonel Denison, from the British Empire League in Canada being one of the most forcible speakers. If Sir Wilfrid Laurier reinforces Premier Seddon as an advocate of a uniform British tariff throughout the empire against foreigg goods. Chamberlain's conference may be fraught with momentous sequences.

A PATHETIC STORY.

London, May 30.—On arrival of the Am?rican liner Rhynland at Queenstown last night a very pathetic story was related. Mr. and Mrs. Charles Bellew, passengers by this ship, were travelling from Philadelphia to Dublin to take possession of a fortune they had inherited. The husband died of syncope and was buried at sea, and four days later his widow also fell a victim to a heart affection and her body was committed to the deep. They left their only child, a boy of five years, in charge of the captain, who will hand him over to the agents of the company in the meantime.

FRUIT OUTLOOK IS GOOD.

A. P. Stevenson, of Nelson, Man., has written Nelson Bartlett, secretary of the Horticultural soriety, announcing that the indications promise a plentiful yield of fruit this year. Black raspberries, strawberries and currants look well. Mr. Stevenson says he has a hundred apple trees in bloom, a hundred and four crab apple trees, rich with blossom, and ov?r two hundred plum trees of several varieties white with flowers. If there is no injurious frost between now and exhibition time, he promises to take an assortment to Winnipeg that will make a corner of the horticultural building look as attractive as a Florida orange grove.

Many natives of India are said to be deriving large fortunes in counterfeiting silver rupees. The mint officers say they are unable to tell the difference between the real and the false coins. The cheapness of silver aids the coiners.

It has been demonstrated that the Philippines are the biggest $20,000,000 worth of trouble ever sold to an innocent purchaser.

In Spain, it is said, that there are 11 million people who cannot read.

RAILWAY ACCIDENTS

GREAT NORTHERN FLYER DITCHED WHILE RUNNING FIFTY MILES AN HOUR.

A BRIDGE ON THE CENTRAL RAILWAY IN NEW BRUNSWICK COLLAPSES.

Grand Forks, N. D., May 29.—The worst wreck ever seen in this section occurred at 4.30 o'clock yesterday morning eight miles west of here, when the tender and six coaches of the Great Northern flyer eastbound were ditched while running fifty miles an hour.

The engine and sleepers kept the track; everything else went through. The train carried its usual number of passengers. The only man appreciably hurt was Frank Heffron, a mail clerk, who was hurt in the side. His injury is not thought to be serious. Other passengers had apparently miraculous escapes. The smoker, which was full, landed across the track and broke in two, the floor in the centre being forced to within a foot of the roof. Every seat in the car was broken, but not a man was hurt. Wm. Perkins, of Grand Forks, occupied a centre seat. He felt the floor suddenly rising and then found himself at the end of the car. One man was thrown bodily out of the car door. The passengers in the tourist car were in bed. Some were thrown out, but most of them crawled through the windows in their undress and landed in the mud and water of the ditch. No one can account for the wreck, but it is assumed that some small obstruction threw the tender off the track.

FIREMAN DROWNED.

St. John, N. B., May 29.—The main span of the Central railway bridge across the Washademoak river collapsed while the regular train was coming from Chipman to Norton. The engine and two cars of lumber went into the river. Fireman S. F. Brend, of Norton, was drowned. This is the second or third time within a couple of years that a bridge of the Central railway has collapsed with fatal results.

OFF THE TRACK FOR A MILE

Des Moines, Ia., May 29.—The east bound Rocky Mountain limited, the Rock Island's fastest train was wrecked near here while trying to make up lost time. It is estimated to have been travelling between 70 and 80 miles an hour when the tender left the track and tore up the ties for a distance of nearly a mile before the speed could be reduced. The trucks finally broke and the gearing gave way, but the speed was diminished to such an extent that only tne front cars were damaged and no passengers were seriously injured.

ELECTRICITY IN ST. PAUL'S

New System of Lighting a Success in London's Famous Cathedral.

London, May 29.—The system of electric lights in St. Paul's cathedral which was donated by J. Pierpont Morgan, was formally inaugurated yesterday in the presence of officials and a number of London journalists. The effect of the new lights was magnificent; they brought out the architectural features of the building in a soft and beautiful manner and infinitely better than did the old system of illumination. It has been decided, however, that an additional installation of electric lights to cost from £3,000 to £3,000 is desirable. Mr. Morgan has offered also to supply this second installation.

"DOUKS" FAST MAIL SERVICE.

Doukhobors are still at their specialty of defrauding the postoffice department, and Superintendent Kavanagh, of the railway mail service, is at his wits end to know how to put a stop to their little trick.

The other day Clerk Dalgleish, who who is on the route between Winnipeg and Yorkton, stripped the rods underneath the train of two score or more little paper wads fastened there by strings. These little balls contained a Doukhobor letter addressed by immigrants now lodged at Winnipeg's Castle garden, to compatriots at Yorkton.

While prosecution is unlikely the Doukhobors have been given to understand that such evasion of the postal laws of the country is illegal and subject to severe penalty. The scheme has been worked for an indefinite period.

BRIEF NEWS NOTES.

The French cabinet will resign with Premier Waldeck-Rousseau.

Mayor Cooper has been appointed registrar at Portage la Prairie.

Lieut. Col. Pellatt is taking the Queen's Own bugle band to England at his own expense. He thinks it will be the means of directing especial attention to the Canadians.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, JUNE 7, 1902.

A GOVERNMENT ENQUIRY.

Alike in the interests of the miners, the Coal Company and the general public a full investigation of the recent Fernie disaster must be held apart from the enquiry now pending in the Coroner's Court. The reasons for this are set forth in the terms of Mr. Hawthornwaite's motion, a copy of which will be found in this issue. Apart however from the question which he raises as to the reliability of the Inspector's reports there are other and stronger reasons why such an investigation should be held. The Coroner's Court may be trusted to take care of the question of personal and corporate liability and if any blame attaches to bring it home to the right persons. But there are other and possibly more important issues which may be briefly stated. The matter of the general character of the mines in the Crow's Nest Basin and whether being both extremely "gaseous" as well as "dry and dusty" their future operation does not call for an entirely different system than that hitherto adopted. The very pertinent query as to whether blasting should be permitted under any conditions in such fiery mines, when in far safer mines not only in England and the States, but in Nova Scotia it is prohibited by the manegement. And further whether "mixed" lights—that is partly lamps and partly open lights—which have been condemned in older mining countries twenty years ago, should be permitted at all. Incidentally it might be worth considering whether special rules reprinted from 1877 can be considered of any value to-day in view of the fact that the last quarter of a century has taught almost all that is known from a scientific standpoint of the agency of coal dust as an explosive force, until it has reached the stage when an expert commission of the British Government in their latest report on an explosion at the Universal Colliery, Wales, says: "Coal dust is far more dangerous in a mine than fire damp," and again: "It follows from the knowledge we now possess that a mixture of coal dust alone is capable of producing an explosion," and further on this most important deliverance: "If it were generally recognized by the miners themselves that the danger of explosion, at any rate on a large scale, is due to dust, and not to fire damp, greater progress would be made towards the fulfilment of Professor Galloway's hope that, with a better understanding of their cause, great colliery explosions will soon disappear."

These pregnant sentences should find root in every thoughtful mind, and should lead to a thorough and fearless investigation of all the conditions which prevail, not only in our own, but other similar mines in the province. We cannot recall one precious life sacrificed through ignorance of these conditions, but it is our bounden duty to adopt any measures which science and skill can devise to prevent a further sacrifice.

THE LE ROI'S TROUBLES.

British Columbia has been unfortunate in the manner in which its great natural resources have been exploited. The truth of this will force itself upon anyone who impartially reviews the unsatisfactory condition into which the affairs of the LeRoi mine have fallen. But unpleasant as the prospect is it cannot be regarded as anything but the legitimate fruit of the policy which altogether ignores the interests of the province in the exploitation of its resources. Here is one of the richest mines in the dominion, which, from the position of a profitable working concern falls to professed inability to provide the wage-earners of the district with profitable employment.

While opinion appears to agree that the present very satisfactory condition of affairs is in a very large measure due to lack of capable management, it cannot be denied that the Le Roi company is very much handicapped by conditions which had been brought about before the present shareholders became interested in it. The most objectionable of these was the location of a smelter at Northport, in the state of Washington, for the treatment of the ore of a British Columbia mine. This was clearly the result of the "cinch" policy pursued by F. Aug. Heinze, who received liberal subsidies from the people and the government of British Columbia to re-imburse him for any loss which he might suffer by reason of his efforts to "develop" the latent resources of the country. The government that subsidized Mr. Heinze, however, saw no necessity for putting a check-rein on his greed. The result was that the largest mine in the province was forced by reason of the extortionate charges of the Heinze smelter, at Trail, to erect a smelter in the United States for the treatment of the output of the Rossland mine. That other considerations may have weighed with the management of the Le Roi at the time is probable, but, if so, they go to emphasize the government neglect rather than minimize it. One such consideration may have been that the location of a smelter at Northport, to treat Le Roi ores, opened the way to inordinate profits in land speculations at the expense of British Columbia towns. It will scarcely be contended that any such course was desirable, but the laws of the country permitted it. What has been the result? For several years the province has been cheated out of a very considerable measure of advantage which would have resulted from the home treatment of its ores, and now there is the added disability, that, by reason of the present handicap on the treatment of the LeRoi ores, the province may witness a shut-down of the LeRoi mine, and possibly a reconstruction of the LeRoi company. This would be by far the greatest shock that British Columbia has suffered in the eyes of the investing public.

The handicap which the management of the LeRoi has been under, has been that it was forced to give the carriage of its ore and coke supplies to railways which were not interested to any extent in the mineral prosperity of British Columbia, and railways over which the Canadian authorities could exercise no measure of control with respect to freight charges. The result: the LeRoi company to get their ore to their United States smelter were forced to pay almost three times the freight charges that mines which have their ore smelted in the province pay to the Canadian railways. The same excess was exacted in the moving of the coke supplies, and the ludicrous feature added, of a Canadian mine paying the United States an import duty on Canadian coke for the treatment in the United States of Canadian ores.

It would be interesting to extract from the management of the LeRoi company just what they have lost by reason of excess freight charges. Upon the ore tonnage reported for last year the excess will total up close upon $100,000, if it does not exceed this amount. Just what their excess charges for coke were it is difficult to approximate, as the tonnage does not appear in the reports, but as upon this commodity they have not only excess freight charges but duty as well to figure on, the total would certainly assume considerable dimensions. Nor is this all. It is now said that the practice, of treating the LeRoi ores alone, resulted in very heavy smelter losses, and that these losses might have been cut down considerably if the highly silicious ores of the boundary had been available for mixing. That these smelting losses were considerable may be gathered from the statement that for the five months following November last they aggregated $108,000, or 22 per cent. of the copper values of the ore, and 2 per cent. of the silver values. While the grade of the LeRoi ore was high these leaks were not noticed, but, now that the value of the LeRoi ore reserves have fallen below $10 per ton, they threaten to sap the life out of the company's existence. Of what advantage would it be to British Columbia if it had one hundred Le Rois in the same condition?. What therefore can be said in praise of the government policy which makes such shipwreck of the country's possibilities? There can be no disputing the facts; the cause may be assigned as the reader thinks best.

Miners' Committee Refused Admission

We are informed that the Committee appointed by the miners to make an inspection of the mine with special reference to the resumption of the inquest on Monday, went to the mine at 4 o'clock yesterday afternoon, and were refused admission by the general manager, Mr. Tonkin. This is incomprehensible, illegal and unjustifiable. General rule 31 of the Coal Mines Regulation Act, provides: "That the persons employed in a mine "may from time to time appoint one or "two of their number to inspect the mine "at their own cost, and the persons so "appointed shall be allowed to go to "every part of the mine, etc."

So that in refusing the General Manager was setting the law at defiance as well as disregarding the suggestion of the coroner at the last sitting of the court and ignoring the universal custom under similar circumstances. The excuse given for the refusal is worse than the refusal itself viz; that two miners had already been placed on the committee of investigation. By whom? Certainly not by the men for they had nominated the committee which presented itself yesterday. Surely the sacrifice of 150 lives should have purchased the right to a full inspection of the mines and of every plan and document which could throw any light on the sad occurrence. We are entirely at a loss to understand the action of the General Manager at so grave a crisis.

LIQUOR LICENSE ACT.

I, Eugene Walter, of Morrissey, B.C., hereby apply to the Board of License commissioners for a hotel transfer of my license to sell intoxicating liquors under the provisions of the statutes in that behalf in the premises known and described as The Hotel Walter, to the premises known as the Elk Hotel. at a point about two miles west of the present Hotel Walter, to commence on the 1st day of July, 1902.

LOCAL AND GENERAL.

T. H. Whalen, of Nevada, is visiting his brother, Con. Whalen.

The sawmills along the Elk River resumed operations this week.

Milt. Kastner returned to Fernie on Saturday last after spending a couple of weeks at Sebringville, Ont.

Wm. Taylor, captain of the football club, accompanied by his brother, Jack, left on Tuesday evening for England.

H. Bentley, of Lethbridge, is in town this week. He says that a number of the citizens of that town have suffered severely owing to the recent floods.

W. A. Bleasdell left on Tuesday evening for Lethbridge. He intends to spend the summer ranching for the benefit of his health.

Robt. Dunsmore, of Glasgow, Scotland, a nephew of Mr. J. A. Rennie, arrived in town on Sunday last to take a situation in the Crow's Nest Trading Company's store.

Constable Farquharson has had considerable trouble with his chain gang this week. There are several unruly prisoners at present and they have influenced the gang to refuse to go to work.

There was a meat famine in town last week owing to the uncertain state of the railroads. Every butcher shop was empty until Monday, when P. Burns received a shipment of three car loads of cattle.

School Inspector Wilson, of Victoria, was in town several days this week visiting the schools in Fernie and at Coal Creek mines. He will make strong recommendations to the government for a new school house at the mines.

The trains from the east have been late every day this week. The recent floods have put the road in such bad condition that it is necessary for the trains to run at reduced speed in order to lessen the chance of accidents.

I am disposing of my interest in the Fernie Drug Store to Mr. N. E. Suddaby and would bespeak for him the patronage of my customers. Those indebted to me will confer a favor by settling their accounts by July 1st.—H. S. MONKMAN.

Urgent appeals are being made by the ranchers near Michel for a Government road to the town. The recent floods have washed out the old trail and they are compelled to make their way through the underbush when visiting Michel.

J. H. Tonkin, of Wilkesbarre, Penn., the new general manager of the Crow's Nest Pass Coal Co., and Elias Rogers, of Toronto, Managing Director, arrived in town this week and have been inspecting the mines and preparing to commence operations again.

Police Interfered

The boxing contest between James Milne and Tom Thompson, which took place at Elko, on Saturday evening, was decided in favor of Milne. The affair only went five rounds, when the police interfered, but the referee, T. Whalen, considered that Milne had the best of the contest and gave him the decision.

"Too Rich to Marry"

Whoever heard of such a thing, the idea of anyone being too rich to marry. Still there are people in the world whose riches, place them in the most complicated embarrassments. Those troubled or suffering from the above cause, can be placed on the road to success by seeing Edwin Owens Towne's great New York production of "Too Rich to Marry" coming at the Princess hall, Tuesday, June 17th.

In the Speculative World

Business in a speculative form for the past two weeks has felt the effect of the late mine calamity more we might say than in any other line, but we are pleased to be able to report that the confidence of buyers of property in Fernie is not shaken beyond recovery, but a hopeful outlook for the near future is presenting itself. J. E. Mills, real estate agent, reports that buyers are again coming and making inquiries for building, sites and residence property, and before another week goes by a surer confindence in Fernie's future will be felt than ever.

Commission

The commission appointed by the Provincial government to investigate the charges made against the License Commissioners and the License Inspector of Southeast Kootenay finished the work of taking evidence yesterday and last night all the evidence referring in any way to the inspector was read before him at the Police Court and he replied to each of the charges. Most of the evidence appeared to be of very little importance and the general opinion is that Mr. Barnes will be exonerated from blame when the commissioner makes his report.

WANTED—Girl to do general housework.—Apply to Mrs. T. C. Thompson, Park Cottage.

On Monday evening the train from the west was derailed for 10 hours at Jaffray. The mishap was caused by the breakrod catching in the switch. Fortunately no one was hurt.

The "Too Rich to Marry" Co., which will play here on the 17th inst., desire us to inform the public that they will give 25 per cent. of the receipts to the Fernie Relief Fund.

The Independent Order of Oddfellows will held decoration services at the Fernie cemetery on Sunday at 3 p.m. All Oddfellows are requested to meet in Joyce's hall at 2.30 p.m. sharp.

Insure against accident and sickness The Ocean Accident & Guarantee Corporation of London, Eng., is the strongest and most reliable company of its kind in the world. Annual income nearly five million dollars, agency at Watson's.

Cranbrook Herald:—"One of the best stories that has been told around here lately comes from Fernie. During the high water the saw mill of D. V. Mott & Son was flooded, and the saw and carriage was nearly covered with water. Steam was on and the saw was started, and before it was stopped a school of trout came dashing through the mill, and several hundred were cut upon the saw before the mill could be stopped." Mr. Mott verifies the story and adds that there was not a sucker in the bunch.

Committed Suicide

A strange case of suicide occurred at the Loop on Monday evening last, when Mike Morech, a Pollock, employed by the C. P. R. as watchman, shuffled off the mortal coil in a manner which is not often taken by these contemplating a sudden exist from the world. He occupied a box car with a number of other men, and his comrades had gone off a short distance leaving Morech asleep in his bunk. About half an hour later a loud explosion and smoke issuing from the car announced that something serious had occurred. The men hurried to the car and found their comrade torn in a terrible manner by an explosion of dynamite. He still gave some sign of life and Dr. McSorley, of Michel, was sent for, but long before the doctor arrived life was extinct. Coroner Trites was notified and assisted by Dr. McSorley made a thorough investigation, which revealed the fact that the man had deliberately placed a stick of dynamite on his breast and after lighting the fuse calmly awaited the fatal explosion lying in his bunk. Little cause could be assigned for the rash act. The man had $400 in money tied in a parcel around his neck and was apparently in good health. Coroner Trites did not think it necessary to hold an inquest as it was an apparent fact that the man had committed suicide.

PEACE DECLARED

Boer Representatives Sign the Document of Terms of Surrender and the War is at an End.

London, June 2.—Peace has been declared after nearly two years and eight months of a war which tried the British empire to its uttermost and which wiped out the Boers from the list of nations. The war has come to an end with Lord Kitchener's announcement from Pretoria that Lord Milner and the Boer delegates had signed "terms of surrender."

This announcement has been anticipated for some days and it was definitely forecasted in the dispatches, but its receipt Sunday afternoon took the nation by surprise, as everybody had confidently believed that the House of Commons would hear the first news. The edge of the anticipation with which Great Britain awaited the promised statement in the House of Commons from Mr. Balfour, the government leader, was still further dulled by the following message from King Edward to his people, which was issued after midnight:

"The King has received the welcome news of the cessation of hostilities in South Africa with infinite satisfaction, and His Majesty trusts that peace may speedily be followed by the restoration of prosperity in his new domains and that the feelings engendered by war will give place to earnest co-operation on the part of His Majesty's South African subjects in promoting the welfare of their common country."

OLD LONDON'S JOY.

The Lord Mayor's announcement at 5 o.clock Sunday afternoon that peace had come was the signal for great demonstrations on the streets —horn-blowing, singing and shouting. All the church bells pealed forth the tidings.

KRUGER'S SURPRISE.

How greatly King Edward's insistence that peace in South Africa Britain's terms, and that they are influenced the present agreement will probably never be known until his private memoirs of the present regime are given to the public. According to a dispatch to the Daily Express from Utrecht, Holland, Mr. Kruger was informed that peace had been declared shortly after 9 o'clock. Mr. Kruger had been asleep. "My God," he said, "is it possible." Mr. Kruger and his entourage, the dispatch continues, hope to be permitted to return to the Transvaal. This, however, is quite unlikely.

The news which Great Britain was so anxiously awaiting came characteristically on an entirely pacific and uninteresting afternoon, when London presents a sad, dead and deserted appearance. Very late Saturday night a dispatch was received from Lord Kitchener, in which he said the Boer delegates were coming to Pretoria, that they had accepted Great Britain-s terms, and that they are prepared to sign terms of surrender. Mr. Brodrick, the war secretary, personally communicated this message to King Edward, who was at Buckingham palace. But the government declined to take any notice, and nothing concerning the receipt of this message was allowed to leak out. About 1 o'clock Sunday afternoon the war office received the following dispatch from Lord Kitchener, dated Pretoria, Saturday, May 31, 11.30 p. m.:

"A document concerning terms of surrender was signed here this evening at half-past ten o'clock by all the Boer representatives, as well as Lord Milner and myself."

PUBLIC INFORMED.

The clerk on duty at the war office transmitted this message to Buckingham palace, where King Edward was lunching. At about 5 o'clock word was received permitting the publication of the message and the small notice which was stuck up outside the war office consisted of a copy of Lord Kitchener's cablegram. A similar notice was put up outside of the colonial office. Beyond these two skimpy pieces of paper London knew nothing of the great event. In the clubs, the hotels, the newspaper offices, which were almost all deserted, the momentous news was ticked out on the tape. Then like wild fire and without any visible means for the transmission of the news London awakened to the fact that the South African war was over. The inhabitants of the east end flocked to the Mansion House, just in time to see the Lord Mayor of London, Sir Joseph Dimsdale, come to a balcony on the front of the municipal headquarters and announce that the terms of surrender had been signed in South Africa. Amid many cheers the Lord Mayor made a speech in which he expressed the hope that London would show its appreciation of the good news by behaving itself decently and in an orderly manner. "Let us," said the Lord Mayor, in conclusion, "now pray for a long and happy peace."

At this statement the assembled crowd which was in no humor for praying, yelled lustily and at the instance of the Lord Mayor gave hearty cheers for King Edward, followed by others for the men who had died in South Africa since the war commenced. At 8 o'clock last night the news had become generally known. A few belated extra editions of newspapers were peddled about the streets, but before their appearance the enterprising hawks, who for a long time past had kept union jacks, feathers and horns stored up in anticipation of the present event, were much in evidence. The efforts of the hawkers received lucrative rewards, with the result that long after midnight the national flags were waved indiscriminately by well-meaning roysterers. There was scarcely an omnibus or a cab which was not adorned with the national emblem. Improvised processions marched up and down the Strand and Picadilly. Cheering and horn-blowing atoned for the slimness of the crowd, which, had their volume been greater would doubtless have rivalled "Mafeking" night.

The Archbishop of Canterbury will shortly appoint a day of national thanksgiving, in which Cardinal Vaughan will -oin in behalf of the Catholics.

CONDENSED NEWS.

C. P. R. land sales for last month were five times greater than in May.

Canadian customs returns for the past eleven months show an increase of $2,822,000.

Michael Farrell, a former North Dakota farmer, committed suicide at Crystal City.

King Edward and Lord Salisbury have had a serious difference of opinion over a recommendation for a title.

THE FORTUNATE FARMER.

"The man who wrestles with the cow and learns the calf to suck, and who casts the corn before the swine, is now in greatest luck; for the butter's on the upper grade, veal's higher than a kite, pork is climbing up the scale and beef is out of sight. The eggs he gathers every day from his Poland chicken coop are almost worth their weight in gold, and we are in the soup. His corn brings a fancy price, it's rising every day, and he rakes all kinds of money for half a ton of hay. The farmer is in the saddle, and when he comes to town the rest of us by right should go away back and sit down."

THE MILLING INDUSTRY.

Interview With Robert Meighan, President of the Lake of the Woods Milling Co.

Interviewed on his return from a trip through the west President Meighen, of the Lake of the Woods Milling Co., said:—

"The present milling capacity of the Dominion," said Mr. Meighen, "is far beyond the requirements of the country, the supply of flour turned out beyond domestic requirements having to be exported. The present fiscal policy of Great Britain in giving protection to the English miller is decidedly against Canadian interests. I also believe that a further protection to the English millers will be given in the near future, and this will no doubt be the means of transporting the manufacture of flour from this continent. Instead of increasing our milling capacity in Canada, we will probably have to look to London and Manchester as the points of future developments. Great Britain being a great consumer of our product, why should Englishmen have their flour manufactured on the American continent? It is decidedly in their interest to admit, if necessary, wheat, the raw material free, and tax the manufactured article as they are now doing. However, we are part and parcel of the British Empire, and I am in hopes the colonies may be able to secure preference in the British market. Admit colonial products free and in less than five years, at the rate settlers are pouring into the Northwest prairies, we will be able to export yearly all the wheat Great Britain will require. The colonial products will, therefore, establish the market value, which the foreigner will have to accept, he paying the duty for the privilege of selling in that market. It is a fallacy to say that the consumer will pay the duty under the present conditions, as the world is forcing a food supply on the British consumers beyond their requirements."

Speaking of new elevators, Mr. Meighen said that the company would erect seventeen new buildings this season, having them completed before the crop begins to move. He added - "We do not expect much of an increase in the wheat acreage this year, but there will be a considerable increase in coarse grains. Next year, however, the increase in the wheat acreage will certainly be enormous. Canadians must, therefore, put forth every effort to ensure the export of the great output of the future through Canadian channels. The Americans will put forth their best endeavors to divert this trade to Minneapolis and Duluth, and this must be prevented at all costs."

In conclusion Mr. Meighen said: "I believe that preferential trade with Great Britain is the most important question that has come before Canada for twenty years; and it is also in the interests of the empire, for it will, in the near future, free Great Britain from depending on foreign countries for her food supply."

FIRM RESENTMENT.

Germans Are Not Anxious For Closer Relations With the Americans.

Berlin, May 28.—The pan-Germans do not approve of Emperor William's proposed gift of a statue of Frederick the Great to the United States, nor for that matter of any special efforts on the part of his majesty to win the good will of the people of the United States.

A speech delivered before the Pan-German association, in which the granting of English scholarships to German students by the late Cecil Rhodes was denounced as a plan to get Germans to use as English apostles in Germany, was also received with enthusiastic applause, and resolutions calling upon German students to reject the Rhodes scholarships was unanimously adopted by the association.

A WEALTHY POLICEMAN.

New York, May 28.—James H. Burns, for fifteen years a ward detective on the New York police force, is dead at his home in New Rochell, leaving an estate said to be worth $300,000. Burns was detailed at the Eldridge Street station, but after the Lexow investigation was placed on trial and dismissed from the force. He was also indicted, but when the trial was called his bond of $5,000 was forfeited. He remained for some time in Europe, and then returned to this city, where he demanded a trial. The witnesses had disappeared and the case was finally dismissed.

ROBBED OF $50,000.

Mrs. Thomas Kensett and her daughter Gertrude, of Cornwall-on-Hudson, N. Y., have been robbed of $50,000 worth of jewelry in Paris. The jewelry was taken from a trunk in their hotel room, close to the Grand Opera. Part of the jewelry consisted of heirlooms. There is no clue to the robbers.

Broad-headed horses are the cleverest. In the Household Cavalry the horses with broad foreheads learn their drill more quickly than the others.

DROUGHT IN AUSTRALIA.

Animals Are Dying in Thousands as a Result of Dry Weather.

London, May 27.—Cabling from Sydney, N. S. W., the correspondent there of the Daily Mail gives an account of the terrible drought from which, as a climax to seven dry years, Australia is now suffering. The correspondent says that the losses in stock in Australia since 1899 amount to £15,000,000. Unemployed men are drifting into the cities by the thousands, and there the state governments are providing them with relief. The only districts that have escaped the drought are the Northern Rivers district of New South Wales and parts of the Riverins district. The situation has been aggravated by the federal duties on fodder, which prevent its importation. Communication in the interior has been paralyzed as the waterways are unnavigable. Owing to the price of fodder the farmers have given up the hauling of mail. In Queensland the sheep are dying by the million, continues the correspondent, and even the rabbits are starving.

FOODSTUFFS SOAR UPWARD.

Heavy Rise, in Wheat, Flour, Butter, Cheese and Lard in Australia.

Ottawa, May 27.—In a report to the department of trade and commerce J. S. Larke says there is a big increase in Australia in the prices of wheat, flour, butter and cheese. This is due to the drought and heavy export of grain to Great Britain. The last crop was about ten million bushels short of the estimate, and the next crop will not be sufficient to meet the home supply. Flour has risen from $30 to $32 per ton to $42 and $47, wheat rose from 48c to 97c and $1.10 per bushel. There were also big increases in butter, cheese, bacon and lard. Mr. Larke says this gives promise of good trade with Canada. He says that he has had enquiry for 50 tons of butter per month for three months, for which 25 cents per pound can be had on board ship at Vancouver, B. C. The Australian duty on butter and cheese is 6 cents per pound.

CONDENSED NEWS.

The Winnipegs defeated the Shamrocks at lacrosse in the senior series.

Lord Paucefote, the British ambassador at Washington, died on Saturday.

The sheep ranching industry in the Northwest Territories is receiving quite an impetus this year from the United States ranchers who have moved into Canada. Many of these people are fully up in the sheep raising business and can handle it to make money.

A Moosomin man lately disposed of 64 head of cattle to Winnipeg buyers, which netted the neat sum of $4,000. These cattle were stallfed, and averaged 1,333 pounds, which shows they were in prime condition. Another sold eight head at the same time which netted him $485. There is evidently money in cattle, as these averaged their owners over $60 a head.

DROWNED IN AN OLD WELL.

Whitesand, Assa., May 27.—Irene, the six-year-old daughter of Mrs. M. E. Harper, postmistress at this place, was drowned by falling into an unused well. The well was an old one and out of use. The child, it is supposed, was at play when the accident occurred.

HORSE THIEVES CAUGHT.

Estevan, N. W. T., May 27.—Two Northwest Mounted Policemen have arrived here with William and John Martin. They were caught with a band of horses in their possession and the charge against them is horse stealing and evading the customs. They are believed to be part of a gang of desperadoes infesting the border country.

MINISTER DROWNED

REV. E. W. WOOD, METHODIST MISSIONARY AT CARSTAIRS LOSES HIS LIFE.

HE ATTEMPTED TO CROSS A SWOLLEN STREAM AND WAS CARRIED AWAY.

Calgary, N. W. T., May 28.—A very sad accident happened near Carstairs a few days ago. Rev. E. W. Wood, Methodist missionary at Carstairs, had been visiting in the Knee Hill district and was unable to return home on account of swollen creeks. He attempted to cross a large creek near Carstairs, sent the horse ahead with a line attached and attempted to follow. When in midstream the line parted and the victim was whirled away by the waters and drowned. The accident is especially sad from the fact that the late Mr. Wood was to have been married on the following day. He was a promising young man, 32 years old, and an Englishman by birth.

CONDENSED NEWS.

FERNIE FREE PRESS.

FERNIE, B. C.

The world's stock of silver is worth 1,500 millions sterling; gold at 50 millions less.

The world uses up in arts and manufactures about forty million dollars' worth of gold in a year.

Cast-iron, antimony, and bismuth all expand when the cool. Most other substances contract with cold.

South America has richer vegetation than any other quarter of the globe. It has 40,000 classified species of vegetation, against 36,000 known in Asia. Africa has 25,200, North America 14,400, Europe 11,-400, Europe 11,200, Australia only 7,200.

There never was, and never will be a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

The Duke of Northumberland, with 186,000 acres, is the largest landowner in England. In Ireland, Marquis Conyngham owns 156,000 acres. In Wales Sir Watkins WilliamsWynn's estate covers 145,000 acres.

WIRE WOUNDS.

My mare, a very valuable one, was badly cut and bruised by being caught io a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better, until, after three weeks, the sores have healed, and best of all the hair is growing well, and is not white, as is most always the case in horse wounds.

HALCYON HOT SPRINGS, B. C.

Without question the best and most effective springs in Canada for the cure of rheumatism, kidney or liver troubles. The medicinal qualities of the water are unequalled. Splendid hotel accommodation; fine fishing and hunting. An ideal spot for the invalid.

If all the land on the globe above sea level were shovelled into the North Atlantic it would only reduce its depth from an average of two miles to one mile.

BABY'S OWN TABLETS.

The Best Medicine in the World For Children of All Ages.

Baby's Own Tablets are good for children of all ages from the tiniest, weakest baby to the well grown child, and are a certain cure for indigestion, sour stomach, colic, constipation, diarrhoea, teething troubles, and the other minor ailments of children. There is no other medicine acts so speedily, so safely and so surely and they contain not one particle of the opiates found in the so-called "soothing" medicines. Mrs. R. M. Ness, Barrie, Ont., says: "I first began using Baby's Own Tablets when my baby was teething. He was feverish, sleepless and very cross, and suffered from indigestion. After using the Tablets he began to get better almost at once and slept better and was no longer cross. I think the tablets a fine medicine for children and keep them on hand all the time." The Tablets are readily taken by all children, and crushed to a powder can be given to the very youngest baby with a certainty of benefit. Sold by all druggists or sent post paid at 25 cents a box by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y.

Sweet Peas, lilac, clove pinks, and aromatic flowers, such as lavender, are best for the sick room. Hyacinths and tuberoses are probably the worst.

There is danger in neglecting a cold. Many who have died of consumption dated their troubles from exposure, followed by a cold which settled on the lungs, and in a short time they were beyond the skill of the best physician. Had they used Bickle's Anti-Consumptive Syrup, before it was too late, their lives would have been spared. This medicine has no equal for curing coughs, colds, and all affections of the throat and lungs.

For every time he fills a cup of medium size a smoker blows 700 smoke-clouds. If he smokes four pipes a day for twenty years, he blows 20,440,000 smoke-clouds.

The Coughing and wheezing of persons troubled with bronchitis or the asthma is excessively harassing to themselves and annoying to others. Dr. Thomas' Eclectric Oil obviates all this entirely, safely and speedily, and is a benign remedy for lameness, sores, injuries, piles, kidney and spinal troubles.

The great salt mine at Wielicska, in Galicia, has galleries which aggregate over thirty miles in length. The total yearly yield is 55,000 tons.

MARKETS.

The market for Manitoba wheat has been somewhat stagnant. Wheat is not in demand by exporters, prices being out of line, but a good deal of spot wheat has been needed to cover contracts on May sales and has tended to hold prices up. Latterly spot wheat has fetched from ¼ to ½c over June delivery. At the close of Saturday's business values were as follows: 1 hard, 75¼c; 1 northern, 73¼c; 2 northern, 71½c, in store, Fort William, delivery first half of June. No buyers for later delivery.

Liverpool Wheat—No. 1 northern closed on Saturday at 6s 5d.

FLOUR—Hungarian patent $2.15 per sack of 98 pounds; Glenora, $2; Alberta, $1.85; Manitoba, $1.70; and XXXX, $1.25.

GROUND FEED—Oat chop, per ton, $29; barley chop, $24; mixed barley and oats, $27; oatmeal feed, $15.50; oil cake, $30.

MILLFEED—Bran, in bulk, is now worth $16 per ton, and shorts $19.

OATS—There is an active demand for oats for shipment and the market is firmer. No. 2 white oats Fort William, 41c per bushel; No. 1 white, in car lots on track, Winnipeg, per bushel, 45c; No. 2 white, 41 to 42c; feed grades, 38 to 39c; seed oats, 50. At country points farmers are getting 29c to 31c for No 2 white oats.

BARLEY—There has been a good demand for seed barley and the market is firmer. Supplies are very light. We quote 46 to 48c for seed grades, and 42 to 45c for feed, in car lots, on track, Winnipeg.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

HAY—Receipts are light, and the market is $1 higher at $8 to $9 per ton for fresh baled. Loose hay is not offering to any extent.

POULTRY—Live chickens are coming in rather freely, and are now selling at 75 cents a pair, with prospects of lower prices next week. Turkeys are worth 11c per pound live weight. Ducks and geese are not offering.

BUTTER—Creamery—Fresh made creamery butter is now commencing come in and is worth 18c per pound at factory points.

BUTTER—Dairy receipts are becoming quite liberal, as pasture is now getting good in the country and the cows are giving more milk. Farmers' wives have also more time now to make butter, and they are able to market it. The market is weaker, and 1 cent below its level of a week ago. We quote fresh made dairy in tubs or rolls at 15c per lb commission basis here, for best quality. Inferior grades rule lower according to quality. The market is completely bare of old stock.

CHEESE—Dealers are offering 11½ cents for new Manitoba cheese, delivered in Winnipeg.

EGGS—The market has declined another ½c per dozen. Produce houses are paying 10½c per dozen for fresh case eggs, delivered in Winnipeg.

POTATOES—Farmers' loads delivered in Winnipeg, 25c per bushel.

DRESSED MEATS—Beef is very scarce, and has advanced ½c this week. Beef, city dressed, per pound, 8 to 9c; veal, 7½ to 8½c; mutton, 10c; spring lambs, each, $3.50 to $4.50; hogs, per pound, 7¾ to 8½c.

Hides—No. 1 city hides, 6½c No. 5½c, No. 3. 4½. Kips and calf, the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horse-hides, 50c to $1.

WOOL is worth 6½c per pound for Manitoba unwashed fleece.

SENECA ROOT—The market is expected to open at about 30c per pound.

LIVE STOCK.

CATTLE—Fat cattle are still scarce and badly wanted in the local market. The pasture is getting better and grass cattle will soon be available. Reports from the west say that many young cattle have perished in the recent storms in Alberta, but that otherwise the cattle are doing well and getting plenty of pasture. Butchers are now paying a full 5¼c for best animals, and from that down to 4¾c for inferior grades. Stockers are going west in considerable numbers. Yearlings are worth as high as $16 per head at point of shipment. Two-year-olds are bringing $20 to $22 per head.

SHEEP—About 5 to 5½c per lb is the value off cars, Winnipeg.

HOGS—Best packers' weights 6⅜c per pound off cars, Winnipeg. Other grades bring proportionate prices.

MILCH COWS—Cows are very scarce, and good milkers readily bring $45 each in this market. As most of the stock offerings are poor, they bring less money, the range being from $35 to $45.

HORSES—There is a good steady demand for horses for both farm and general use, and dealers find no difficulty in disposing of all they can secure. The market is being largely supplied from Ontario. There are some Montana horses selling. Prices continue high.

Four miles of trees have been planted on Winnipeg streets this season.

The tips of the human fingers can perceive a weight of 3-40ths of a grain, while the finger-nails do not notice one weighing less than 15 grains.

STILL THEY WONDER

PHYSICIANS AND SCIENTISTS WERE NEVER SO BEWILDERED

The Ottawa Miracle is Still Being Discussed at the Regular Meetings of the Doctors of the Capital City.

Ottawa, Ont., May 26.—(Special)—To say that the miraculous case of George H. Kent, of 309 Gilmore St., had shaken medical circles to their very foundation, is putting it mildly

The facts of the case have been so thoroughly and satisfactorily established by Mr. Kent's sworn statements as to leave no room for misunderstanding or mistake in the matter.

Mr. Kent had Brightjs Disease; he had been in bed for months, gradually getting worse; physicians could do nothing for him.

His case had reached that stage when his body was terribly bloated.

He was so low that he had convulsions, which were rapidly growing more frequent.

In the interval between these convulsions he was almost entirely unconscious.

In this extremity the physicians at last told his wife that he could not live until morning.

While watching by his bedside Mrs. Kent chanced to pick up a paper containing an advertisement of a cure of Bright's Disease by Dodd's Kidney Pills. It was then midnight, and all drug stores were closed, but the devoted wife determined, that even at this extremely late hour she would make one more effort to save her husband's life.

Accordingly she despatched a messenger, woke up the nearest druggist, procured a box of Dodd's Kidney Pills, which she commenced to administer at once.

Mr. Kent did not die that night, for from the first dose of Dodd's Kidney Pills he commenced to improve. All other treatments and medicines were discarded, and the use of this remedy carefully continued.

Gradually yet surely this wonderful remedy arrested the progress of the dread Bright's Disease.

It took Dodd's Kidney Pills about six or seven weeks to restore Mr. Kent to good health. This is seven years ago, and he has never lost a day's work through illness since.

The sense of smell is the most delicate of any of our senses. The three-hundred-millionth part of a grain of chlorophenol can be distinguished.

The Flow of Milk will be increased.

Why go to all the trouble of keeping cows and get only about half the milk they should produce.

Dick's Blood Purifier

strengthens the digestion and invigorates the whole system so that the nutriment is all drawn from the food. It takes just the same trouble to care for a cow when she gives three quarts as when she gives a pail. Dick's Blood Purifier will pay back its cost with good interest in a few weeks.

TO RELIEVE TRADE UNIONS.

It has been interesting to follow the debates in the provincial legislature upon the labor bill introduced by Smith Curtis and Joseph Martin. These had for their common object the relieving of trade unions from any actions at law or in equity, for any wrongful act of an agent or representative, unless it were proven that the council or governing body of the union expressly authorized or were privy to such wrongful action.

The necessity for legislation of this kind did not suggest itself until after the failure of the miners strike in Rossland, when the mining companies, acting upon a recent decision of the British courts in an English case, instituted actions for damages against the unions for the losses which the companies suffered through the conduct of the strike by the union officers. These actions caused consternation to the officers of the unions as they saw at a glance that if some measure of relief were not obtained it would be possible for the forces of capital to crush their life out of legal process, impoverishing their treasuries and placing their leaders behind prison bars, and for the doing of that which, hitherto, had been considered as well within the law. It was a case of their very existence to the unions, and quite naturally their necessity was recognized by Smith Curtis and Joseph Martin, the two men whose greatest rivalry is tn the capturing of the labor vote of the province.

In the house both bills were subjected to a scathing denunciation, and by members who oddly enough have not agreed upon any other measure that has been introduced this session. The simple object sought was the preservation of the unions of the wag-earners from extinction, but they were opposed bitterly and the assertion made that they sought to set the labor organizations above the law. The Curtis bill has been killed, due is no small measure doubtless to the unpopularity of its sponsor, while the Martin bill succeeded in passing its second reading, but will probably be mutilated beyond recognition before it is given force of law even if such a fate should be in store for it.

Environment must in a very great measure determine the manner in which a man will approach legislation of this kind, but that is one thing which can fairly be said in condemnation of the members who opposed the Curtis and Martin bills. While all denounced the measures of relief suggested, there was not one who denied that some relief was necessary, or concerned himself sufficiently in the interests of the wage-earners to throw out a hint as to the nature of the remedy which would commend itself to him. It is easy to appreciate the objection which could be raised to such bills, but if the members of the legislature did not like this kind of intervention, to save the under dog in the fight which is being perpetually waged between capital and labor. It could apply a remedy which would render impossible the disastrous strikes and lock-outs which in the past have brought financial loss to all the people in the province, and for the coping with which the trades and labor unions were formed and are being maintained. Compulsory arbitration would afford labor all the protection which it requires, but it is not incorporated in the statutes because labor has few real friends among the men who make up the present legislature.

NO GAS.

The inspector visited the mine on April 23rd, 24th and 25th, and in his report said :—

"No. 2 mine is worked on the separate split system viz., high, level, east and west district, and examined all the working places, and much of the old works. I saw that all the men here had safety lamps, yet I could not find a trace of gas. All the places were well-timbered. Ventilation was good ; only a short distance from the face, I found that there were 16,800 cubic feet of air passed per minute with the brattice as close to the face as it was convenient to have it.

"On April 24th I again went to No. 2 tunnel, but this time to the west district. I was in all the working places, which I saw were in good order and well-timbered, although in some places the roof is very bad, and full of slips. I put in much of my time in the old workings to see if there was any standing or accumulation of gas. I am pleased to say that in neither the working places nor the old workings was there a trace of gas to be seen, but I saw that all the men worked by light from safety-lamps There were 35 men working. Ventilation was good here. I saw that there were 20,000 cubic feet of air passing per minute, with the brattice in all cases up near the face.

"I then went into what is known as the east district. I first went into the old workings here, and saw that they were clear of gas, after which I saw that they were in good order and well-timbered, with the brattice close up, in many cases, under the circumstances, too close to be convenient. In this district I saw that there were 34 men at work, all of whom had safety lamps. I failed to find any gas in the No. 2 mine, in which at one time it would show in the lamp at nearly every place you could go.

"Ventilation is good near the face. I saw that there were 1,200 cubic feet of air passing per minute, while in the main intake there were 80,800 cubic feet of air per minute, thus leaving 31,400 to be accounted for, all of which escapes into the old works, where it is much required to carry off gas, which is given off there, as by leaving the old workings clear there is not so great a danger of an accident with the workmen using safety lamps.

"At No. 3 mine, I saw that all the men were working with light on their heads. I examined all this mine. There were but few places in the old workings I was not in, as well as being in all the working places. I saw that all the working-places were in good order, brattice close up, and well-timbered. I did not see any sign of gas in the mine.

"I saw that there were 31,800 cubic feet of air passing per minute and conducted well into the face by brattice and otherwise. Here there were 35 men employed. This mine is very wet.

"I may say that No. 2 and No. 3 mines are one and the same, by connections below ground, and are connected in many places, and are well ventilated by the same fan, but are entered by two tunnels from the outside. The motive power for the ventilation of these two mines passes 112,200 cubic feet of air per minute, and has yet 80 revolutions of the fan per minute in reserve, before it gets up to its highest working speed." (Signed).

THE LATEST NEWS BY WIRE

Victoria, June 7—In the Legislature last night Prior virtually promised that a a commission would issue during the recess for the revision of the tax of two per cent. upon the output of the metalliferous mines, with a view to lessening the burden upon the low grade properties. An Immigration Bill similar to that disallowed by the Dominion authorities was unanimously passed last evening. It aims to keep the Chinese and Japanese out of the province by the application of the educational test.

East Toronto, June 7.— The Board of Trade conference yesterday disposed o. the question of Canada's contribution to Imperial defence by the adoption of the Montreal resolution, which recites that provision should be made in the Dominion budget for definite amount, but that such sums should be expended by the Dominion authorities.

Lennox, June 7—The recount for Lennox in the Provincial election resulted in a tie, and Gibson, the returning officer gave his casting vote for Madole, the Liberal candidate.

Geneva, June 7—The Dufferin lacrosse team, of Dufferin, Ont., defeated Hobart College today with a score of 8 to 1.

Rossland, June 7—The citizens of Rossland last evening tendered the Hon. T. M. Daly a complimentary banquet upon the occasion of his leaving for Winnipeg, where he will practice law.

Spokane, June 7.— There is a prospect for a big strike all over the Great Northern system. The trouble originated with the boiler makers employed at Hillyard a suburb of this city. They have made a demand upon the Company for increase of pay from $3.50 to $4.00 per day, and if their request is not complied with, they will go on strike, in which event the machinists will probably go out with them, and thus precipitate trouble all over the line from the Mississippi to the the Pacific Coast.

Judging from the admission made by one of the License Commissioners at the enquiry at Fort Steele, "Elderley gentlemen over forty who wear knickerbockers, short coats and caps" are not the only ones who need someone to take care of them. "There are others" of mature age who may "Fall from Grace."

CROW'S NEST MOUNTAIN

VOL. VII. No. 24. FERNIE, B.C., SATURDAY, JUNE 14, 1902. [WHOLE NUMBER, 180.

WHO WAS RESPONSIBLE FOR THE ACCIDENT?

The inquest on the bodies of the men killed in the explosion at Fernie mines on May 22nd, was resumed in Joyce's hall on Monday, the 9th inst., at ten o'clock. Coroner Trites presided. The government was represented by Mr. Harvey. The coal company by Mr. W. A. Macdonald, K. C.: Mr. Thompson and Mr. H. C. Herchmer, and various relatives of the deceased by Mr. S S. Taylor, K.C.; Mr. W. R. Ross and Mr. W. Blakemore, M.E.

Mr. S. M. Brydges, of Nelson, had been appointed by the government to act as court stenographer and was in attendance. The hall was filled with miners and others interested in the proceedings who followed the evidence given with the closest attention and indulged in demonstrations which at times had to be silenced by the Coroner as when Mr. S. S. Taylor warmly declared that no mere legal quibbles as to procedure should be allowed to interfere with the fullest possible investigation in view of the terrible loss of life involved in the disaster.

It is impossible to give even an outline of the evidence of more than twenty witnesses extending over six full days but the principal facts deposed to were:—That there was a constant issuance of gas at the working faces in such quantities as to require the use of safety lamps as a precaution; that the only lamp in use was the bonnetted clanny, that the blasting powder used was ordinary black powder or giant; that there were frequent fires in the face of the rooms after blasting which had taken from ten minutes to an hour and a half to extinguish, that parts of the mine was very dry and dusty; that it was the custom to load up the first dust produced by the "mining" before blasting but there was so far as evidence shewed no removal of dust from the rooms other than this, and no regular system of removing dust from any part of the mine the work being done by shiftmen at irregular intervals. There was no system of watering or sprinkling such as a pipe line but water was hauled in a car to sprinkle the roads at night in parts, and before firing the shots in some of the rooms, considered dangerous, water was carried in cans or buckets and the rooms sprinkled for about 12 feet back from the face. A number of witnesses including Thos. Davis certificated fire boss; Walter Brown landing tender; Fred James, shot lighter, and all the miners who gave evidence certified that in the main haulage roads the depth of dust ranged from two inches to 18 or 20 inches and that it was the custom to remove it from the centre and pile it up on the side of the track.

The manager of the mine, Robt, Giffen Drinnan, stated that the force of the explosion blew out the permanent stoppings although they were build of stone and filled in behind with six to twelve inches of dirt as well as the overcasts but he claimed that the destruction of the latter did not effect the loss of life as when the stoppings were blown out the after-damp quickly penetrated to the intake airways. He considered that the original location of the explosion was confined to the central portion of No. 2 mine where there was evidence of extreme violence and many of the bodies mutilated.

Subjected to a searching cross examination by Mr. Taylor and Mr. Blakemore he stated that he did not consider this a dangerous mine in spite of the quantity of dust and that so long as it was removed from the working faces he did not think it was a source of danger in the hauling and travelling roads. Pressed by Mr. Blakemore he said that he had not yet been able to form a definite theory as to the cause of the explosion or the place where it originated, but he was prepared to admit that there had been a "dust explosion." He declared that the mine was free from gas on the morning of the 22nd and there was no reason to suppose a "gas" explosion, that is an explosion of fire damp.

James Burrows, a miner, who had been working with the rescue party gave very important evidence in a manner which greatly impressed all who heard it. He deposed to the "dry and dusty" character of the roads before the explosion and that on two occasions he had known the dust to be ignited in the rooms by blasting. He found heavy coking in many of the rooms after the explosion and was the first to witness the origin in No. 8 machine room where he found a "hung" shot in a cross cut.

One of the most important witnesses was Hugh Dixon, a miner of 40 years experience, who saw the explosion from the mouth of the mine. He deposed that there was one great blast which blew the roof off the fan-house and sent a column of dust, as he judged, 1,000 feet in the air. He concluded that it was a "dust" explosion because there was no sign of flames and no repeated explosion "just one blast." As bearing on this point it is also significant that there were no fire in the mine after the explosion as is almost invariably the case with afterdamp.

Yesterday the whole of the day was taken up with the evidence of Alex. Ferguson a member of the investigation committee in behalf of the miners, and Thos. R. Stockett, the company's chief mining engineer. The former was a miner of 20 years experience and well known in Nova Scotia especially in connection with the Springhill explosion. He pronounced the Fernie mine "dry and dusty" and condemned the lamps in use as unsafe. He said that in the hands of an inexperienced miner it was a positive source of danger from the readiness with which it would allow gas fired inside the lamp to pass through the guage and ignite gas outside. He also said any boy could open the lock with a plug of wood whittled from the mine timbers. He considered that the explosion originated near the face of Macdonalds entry as evidence of great heat was found there but he found nothing else to account for it

Mr. Stockett was on the stand all afternoon and was put through a searching examination by Mr. Harvey and Mr. Taylor. He said he had had no experience in a "dusty" mine. He would not call this or any mine a "dry and dusty" mine even if nineteen-twentieths of it was dry and dusty—it would have to be entirely dry and dusty. He claimed that the explosion originated at the face of Macdonald's level and was caused by the ignition of a feeder of gas but there was no evidence as to how it was ignited. He said the dust in the old workings was disturbed by the initial explosion and "extended and intensified" it. He admitted that the system of watering was defective and said it was impracticable to water at all in the old workings. He believed the clanny lamp in use was safe and was not aware that it had been condemned in Great Britain and Nova Scotia. He has never made a test of the dust in the mine to ascertain whether it was explosive or not but as a matter of fact it had exploded.

SATURDAY.—Mr. Stocket was in the witness box all morning and Mr. Taylor and Mr. Blakemore continued their cross-examination. He stated in reply to Mr. Taylor that there was no evidence of matches found on any of the bodies recovered from Macdonald's level, but there was a defective lamp, which might have caused the explosion. It was his opinion that the explosion had taken place at that particular point from the manner in which the bodies were burned in that portion of the mine and also from the fact that he had discovered a feeder of gas at that point, but upon being closely questioned regarding the feeder would not swear that it was giving off a cubic foot of gas an hour.

LETTER FROM SOUTH AFRICA.

The following letter was received by Mrs. McMeekin from he brother in South Africa and was written just after the engagement in which W. Peters was killed:

Klerksdrop, April 20th, 1901.

We are camped outside of Klerksdrop about three miles and have to get a pass from the Colonel before we can leave the camp. There is a report going, that, if the war soon ends they will call for volunteers to go to India, but I shall stay where I am, South Africa is good enough for me. When the war is over I think this will be the best place on earth, all the mines will be opened up and it will be like the days of '49 in the United States; I went down town to-day to church and met a man from Kentucky, he says there will be all kinds of chances to make money. Peace cannot come to reign any too soon to suit me. I wrote you about a month ago and gave the letter to a friend to post, he packed it around in his haversack and he was wounded at Boschbolt and his haversack was blown to pieces by a shell. Some fellow from E squadron picked up his pocket ledger in which was the letter and returned it to me; I enclose it in this one I told you in the last letter a little about the fight at Boschbolt, a more accurate description follows: We chased a convoy six miles and were ambushed between two corn fields and lost a number of men killed and wounded. Our pom-poms came into play and the Boers retired over a ridge, we followed them a mile and then camped. In the first row I had my horse killed and came nearly being captured, I escaped by feigning death and was aided considerably by my dead horse, whose blood and brains were splashed over me, a shell having taken the top of his head off. Just as we started eating dinner a huge shell came screaming into camp and exploded in the midst of a bunch of mules and negroes and you could see nothing but dust, blood and fragments of flesh. Then we got our rifles and circuled around the camp, the Boers had three 15 pounders, two pom-poms and a maxim and the shells fairly rained into our camp tearing men, horses, waggons and mules alike. Then they surrounded us and started a furious fire of pom-poms and rifle. We were lying flat on the ground without any shelter from those behind the camp; C squadron had the defence of the pom-pom and the heaviest of the rifle fire was directed on us. I considered myself mighty lucky. Poor Billy Peters was killed right beside me and a fellow named Liezerk and I carried him away but he died before we could get him to the waggons. We returned to our post and immediately Liezerk was shot in the breast, Graffus, of Cranbrook, and I carried him to the hospital and came back and lying down in the same place a spent bullet struck Graffus on the belt knocking the wind out of him; he had hardly got his wind when another bullet struck him in the thigh passing up into his body where it lodged. He is in great danger. A man, whose name I don't know, helped me to carry Graffus away and on returning I decided to move further over toward the pom-pom as the bullets were coming to thick where Billy Peter, Jake Graffus and Sam Liezerk were hit. The other fellow lay down in the place I left and he had scarcely done so when a shell exploded near him, tearing off one of his legs. He died an hour later. I managed to dig up a heap of clap with my bayonet and a bullet stuck in the clay about six inches under my chin. A shell exploded in front of me and covered me with clay, another shell passed under my arm as I raised to shoot, a 15 pounder hit my haversack wrecking it completely. Every time the Boers charged it was exciting, the ping pong of the Boer mauser, the crack crack LeEnfield, the whistle and scream of shells, the yells of the cowboys, mingled with the snorous shouts of the farmers as a hellish hail of round shot, pom-pom shells, sharpnel, grape, canister, and rifle bullets hurled through their lines, making a tremendous uproar. A ghastly sight was to be seen after the fight was over, the dead and wounded were lying all about and the smell of blood stuck to us for days. After the Boers had been driven off and a dead silence reigned with Egyptian darkness, the only sound was an occasional moan from the wounded horses and mules that had not been put out of their misery, we had a night alarm and the cracking of rifles began but peace was soon restored. Next day we worked hard at breast works and by evening we had a good strong position About two o'clock we heard the sound of guns and we knew the Boers were engaged with a relief party. We stood to arms and waited an attack, then a long dark mass of men appeared riding toward us at full speed. It was a relief party of Irish Fusiliers, the band struck up "Garryowen", we scrambled out of the trenches and gave them three cheers with our hats and bayonets. We buried the dead in a long trench and fired a last salute over them and started for camp. Since then we have lost only one man from enteric fever and four captured.

I like this climate very much, never enjoyed such good health. Tell D. McKenzie and W. Brearley I should like hugely to meet them here when peace is declared, but, for the present there is is too much roughing it, we only get hardtack and beef to eat. I watched a Kaffir dance by moon light last night and enjoyed it immensely.

Yours truly,

D. M. SULLIVAN.

Troop. 4, C Squadron, C.M.R.

Nelson, June 13—The Board of Trade tonight dealt with the communication of Fernie Board respecting relief for the sufferes of the mining disaster, and passed a resolution calling upon the city council to make a vote of at least $300 for this purpose.

HALF MICHEL BURNED

TWENTY-FOUR HOUSES ON THE NORTH SIDE DESTROYED.

Bush Fire Gets Away with $50,000 Worth of Property Inside of One Hour. Citizens Terror-stricken.

The Crow's Nest Pass coal fields were the scene of another serious calamity this week in the form of a disastrous fire at Michel, which wiped out over half the town and left about thirty families homeless. The fire started on the south side of the track, where the company had a gang of men at work clearing eight acres for building purposes. While the men were at dinner the fire from the burning brush was carried by the high wind into the thick woods and in a few moments the whole side of the mountain was a mass of flames. The breeze carried the sparks to the mountain on the north side of the gorge and a shower of ashes and burning cinders poured down on the little wooden town. The first house to take fire was that of Ben Chiethan, but inside of five minutes every house on the north side of the track was in flames. The wind blew a hurricane and the flames did their terrible work so quickly that practically nothing was saved from any of the buildings. The town has no system of waterworks and the efforts of the men were chiefly directed toward saving the large new tipple and the buildings on the south side of the track, in which they were successful. Among those who lost all their household goods were: P. Vandusen, P. Anderson, E. Brisco, Chas. Simister, overman in the mines; —. Fraser, manager of the company's store; Jas. Minion, Robt. Greendy, Robt. Duggar, Dr. McSorley, Thos. Steele, Chas. Orban, Wm. Evans, Wm. McDonald, Lot Willie, Dan Evans, mine manager.

There were twenty-four buildings in all destroyed including the post office and a large boarding house. About half of the buildings were double houses, containing two families. The buildings were all owned by the Crow's Nest Pass Coal Co. and were partially covered by insurance

The C. P. R. also suffered severely. There were nine box cars burned on the track besides a large number of ties. The sufferers have the sympathy of the people of Fernie.

THE LATEST NEWS BY WIRE

Phoenix, B.C., June 13—J. McClusky, the miner who was injured recently in an explosion in the Knob Hill property, has lost the sight of both his eyes. The unfortunate is without money or friends.

Walkerton, June 13—The Liberals were refused a recount today for Cente Bruce on behalf of Dr. Stewart, their defeated candidate. Judge Klien said a recount could not be granted, as the Returning Officer had sent in his returns before the application for the recount was made.

St. Louis, June 13— Jockey Donegan was killed in the first race at the fair grounds today. Two of the horses collided, and Donegan being thrown, had his skull crushed in by the hoof of his horse. He died soon after being taken from the track.

Toronto, June 13—The Conservatives have lodged a protest against the return of A. C. Mackay, the Liberal returned for North Grey by a recount. Mackay's majority was reduced to five, and the Conservatives assert that when their appeal is heard their candidate, Boyd, will have a majority of nine.

The Provincial Legislature has sprung a surprise upon the Province by an amendment which it made to the Provincial Franchise. Heretofore it was necessary in order for anyone to vote to be 21 years of age, but the House today, by a vote of twenty-two to six, decided to reduce the age limit from 21 to 18 years. This will probably make the franchise freer in British Columbia than in any other country in the world. The attempt to secure Woman Suffrage was defeated by a vote of fifteen to twelve.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

"Hello! Hello! I'm taking a holiday. Those galoots eastward won't bite, and I thought I'd give myself an airing in the park. Never expected to see you," which was a deliberate lie, for I had reason to know later that he had come out for that very purpose. "See your name in the papers. Presume it's you? They've got the whole story. Fine fortune, young sir; fine. Wish you joy."

I thanked him, not overcordially perhaps; for the man bored me, and I guessed that his was only an early attack upon my new found millions.

"Now, Captain Wood, I am delighted to have met you, for I may be able to give you a little advice. You will be assailed on all sides. You capitalists are the natural game of the promoters. Give them a wide berth. There's a mass of villainy about. Don't trust them—not a man of them. If you're in any difficulty, if you've got a few thousands to play with at any time, you come straight to me. I shall be delighted to serve you—for yourself, mind, and for the sake of old times, for I knew Bully McFaught well."

"Ah, indeed! Tell me about him. You knew him." I was eager to hear more of the man from whom my strangely unexpected fortune had come.

"I knew old McFaught—knew him well and did business with him, but not so much as I could have liked—worse luck! If I could have got upon his shoulders, I should have waltzed into unbounded wealth. But you had to be with him, not against him. He made some men, but he ruined more—stock, lock and barrel. It don't matter to you anyhow whether he piled up the dollars on dead men's bones or robbed the saints. Guess you can freeze on to what he gathered."

I laughed a little uneasily; but, after all, who was this Lawford, and why should I care for what he said? It was probably untrue.

"Will you be going over to God's country any time soon, Captain Wood? Wish you'd take me with you. You'll want a sheep dog, and I guess I'm pretty fly."

"You're very good. I shall remember, but I doubt my going just at present. Now, I think I'll turn in here." We were passing the portals of my club, the Nelson and Wellington, commonly called the N. and W.

"This your shanty? Pretty smart place, I take it. Can they fling a Manhattan cocktail any?"

But the hint was lost on me. I had had enough of Mr. Lawford and wished to be well rid of him.

"Well, good day," he said. "If you change your mind about crossing the pond, be sure you send for me. But I suppose London's good enough for you. It's a pleasant place, I reckon, with the spondulics to spend, and I guess you can have the best it holds now, if it's worth the buying. See you next time."

Could I? There was one thing I hungered for keenly, and was by no means certain of securing. Lawford's chance words brought it home to me with much emphasis. My chief object at this time was to try how far one fortune would favor me with another.

How would Frida Fairholme be affected by the news of my great good luck? I had been asking myself this momentous question ever since I had seen Mr. Quinlan. At one time I hoped for the best, next moment I was as greatly cast down. Now I leaned against the railings in the row, in my best hat and frock coat, with a brand new flower in my buttonhole, hoping she might see me and that I might get the chance of a word.

But she never came, and at last I left the park, disappointed and disconsolate, and returned to my rooms to dress for dinner. Here some one pushed past me just as I was letting myself in with my key; a man meanly dressed, one of the poor waifs, as I thought, who so often infest street corners, ready for any job.

The incident made no particular impression on me at the time, but it was brought home to me as one link in a chain of singular events that were near at hand.

CHAPTER IV.

A MILLIONAIRE'S FRIENDS.

Directly I was inside the house, Savory handed me a letter from Lawford:

Dear Captain Wood—When I left you in Piccadilly, I ran up against some friends who are much set upon making your acquaintance. They are the Duke and Duchess of Tierra Sagrada. He is a Spanish don, she an American beauty; Susette Bywater they called her in New York, where she and her family were well acquainted with your uncle, Mr. McFaught.

Won't you come to the opera tonight to be introduced to the duchess? They beg me to say that their box is No. 27A, upon the pit tier, where they will be entirely delighted to receive you. Send back a line at your early convenience and oblige, yours very faithfully,

RUFUS W. LAWFORD.

I had no engagements that night but a couple of balls, for neither of which, after my disappointment in the park, I was now very keen. Besides, I had no wish to be very late that night. I saw on my table an official "box" straight from the office and knew that it contained the great scheme for the attack on New York, which was referred to me for examination and report. I meant to give it my best attention in the early morning hours next day and so promised myself to get to bed betimes. A little good music would soothe me, I thought, so I wrote a few lines accepting the invitation and proceeded to dress.

It was then, as I stood before the glass in the window that gave upon the street, I caught a glimpse of the same forlorn creature looking up at my house. Was it mere accident? After I had heard that day the smallest matter all still unexplained assumed a certain importance.

When I left the club after dinner, my "shadow" was still there. He sank slowly and, as I thought, reluctantly out of sight when I entered the

Savory handed me a letter from Lawford.

hansom and told the cabby to drive to Covent Garden. Remembering Mr. Snuyzer's communication but a few hours before, this espionage caused me some uneasiness. Yet it was done so clumsily that I half believed the fellow wished rather to attract than escape my notice. Of this I had soon a clear proof.

When I alighted from the cab just short of the colonnade approach of the opera house, I saw him, heard him, just at my elbow, having transferred himself there by the same mysterious process that brings a tout all the way from a railway station to your front door to unload the luggage.

"Don't take no more cabs, guv'nor," he whispered hoarsely in my ear, and next moment he was gone. Who had sent him in such a roundabout way to tell me this? Who, indeed, had set him on to watch me? It must have been a friend, of course, and I gave the credit to Mr. Snuyzer. They were evidently smart people, Messrs. Saraband & Sons, when there was a chance of business coming their way.

The night was not over yet—a night of dark doings and unexplained mysteries, all of which seemed to center in me. I could not quite believe—why should I?—that the scraps of conversation I was now to overhear referred to me. And yet, had I been gifted with second sight—had I, indeed, been more alive to the warnings I had received—I might have been spared much misery. But I am anticipating.

When I reached the opera the act drop was down, and I thought to cast a look on the house before I made my way to the box where I was bidden. My hosts were strangers, and I rather wished to see Lawford first, that he might present me to them in due form. So I entered by one of the side ways into the stalls and stood there watching the audience for a time.

In the midst of this I became suddenly aware that a pair of bright eyes were fixed upon me from another direction, and I saw that I was an object of interest—more of a passing interest, perhaps—to a well dressed, charming woman in a box on the pit tier.

Then suddenly Lawford touched me on the back, saying:

"Oh, oh! So you are here. Come right along. Let me present you to the duchess. She's mightily set upon seeing you," and he led the way along the corridor to the box No. 27A.

As we got close to it I saw the door was ajar and I was attracted by the sound of voices talking Spanish, which I knew. Lawford held me back, possibly fearing to be indiscreet and to intrude upon some family quarrel. What was said did not impress him, perhaps, for I think he did not understand Spanish. The voices were raised high enough to be plainly audible to any one outside—a man's, coarse, harsh and menacing; a woman's in reply, pleading softly, yet firmly.

"You know the conditions and you are bound to assist. The man has been handed over to us. He is our game, our quarry. What he has must be ours—all of it, the whole vast fortune."

"I would much rather be left out of the business. I despise myself so! I hate and detest the part you would have me play. I will not go against him."

"Sanctissima Virgen! Defend me from a woman's scruples. I tell you you must—there is no alternative. Captivate him, win his devotion. Why not? He is a comely youth (guapo chico); you have made eyes at worse. You must and shall. By heaven, if I thought you meant to play me false"—

A CHEMIST IN EMBRYO.

Hank Timmons' boy Bob poured a pint of castor oil in the molasses jug when the folks were away to church last Sunday, and Hank's folks always have mush and molasses for supper Sunday night. Doc Reed, who tended on Hank's family, said the family wouldn't have suffered more if they had eaten a peck of Candy Cascarets.—Independent.

A THOUSAND THANKS

JEAN BOIVUE IS VERY HEARTY IN HIS EXPRESSIONS OF GRATITUDE.

In Graceful Sentences He Pours Out His Praise of Dodd's Kidney Pills the Remedy Which Has Done So Much For Him.

St. Elzear, Que., June 2.—(Special) It is a well known characteristic of our French Canadian people that they are fearless and enthusiastic in their praise of anything or anybody that has befriended them.

No one is more capable of more gracefully expressing gratitude than the average French gentleman.

A recent case illustrates this point. Mons. Jean Boivue has for many years been afflicted with a terrible malady of the kidneys.

He suffered a very great deal of pain, and his disease forced him to rise every hour during the night.

He was advised to use Dodd's Kidney Pills, and after taking a short treatment, found himself completely cured.

His gratitude knew no bounds, and ever since he has recommended to all his friends the wonderful remedy which cured him so promptly and completely.

When he finds anyone who has no confidence in them, his first act is to give them some pills, and explain to them how to use them, and he has found this method very soon convinces the most skeptical of the truth of the statement he makes that Dodd's Kidney Pills are the greatest medicine in the world.

Mons. Boivue says:

"Dodd's Kidney Pills are good.

"I know this because while at one time I suffered very severely from Kidney Disease, now I am well.

"Not long ago I used to have to get up several times during the night, now I can sleep well all night without rising.

"You can believe me, I am glad to have regained my health, and I say thanks a thousand times to Dodd's Kidney Pills."

There is a preacher in South Carolina who preaches when he is asleep. There are some others who preach while the congregations sleep.

One trial of of Mother Graves' Worm Exterminator will convince you that it has no equal as a worm medicine. Buy a bottle and see if it does not please you.

How readily you are fooled by the smooth stranger! But your neighbor can't fool you; you watch him.

The county of London has 35,008 persons to the square mile, the county of Westmorland 84.

Siam Likes Odd Numbers.

The number of rooms in a house, of windows or doors in a room, even of rungs of a ladder, in Siam must always be odd.

Honeycomb.

The bees were the first canners, and their goods will keep for all time if stored in the right kind of an apartment free from frost and dampness.

Army Foods.

All European armies have certain extras weekly in the way of food. Sugar is given in England and France, two gallons of beer in Russia, half a gallon of wine in Italy, three pounds of fish in Spain and five ounces of butter in Belgium.

Enteric Fever.

Men over forty are practically proof against enteric fever.

SOURCES OF KNOWLEDGE.

You May Learn Something From Everybody You Meet.

One of the most useful success habits one can form is that of learning something from everybody with whom he comes in contact. No information which can be acquired is too trivial to be ignored.

Constantly measure yourself with the men you meet. You will find that every one can teach you something which you did not know before and which, perhaps, you would never have a chance to learn again if you did not acquire it from him.

Daniel Webster once made a great hit in arguing a case before a jury by repeating a story which he afterward said he had not thought of since he heard it fourteen years before. But Webster was always picking up something for future use. His famous reply to Hayne, the greatest speech ever delivered on the American continent, was largely made up of little reserves which he had picked up here and there in his reading, from studying men and from observation.

Many a prominent novelist has collected material for his stories by making notes of his conversations with those he has met and by observation. Charles Dickens got a great deal of the matter for some of his novels in this way.

One young man will go to a lecture and after spending an hour listening to the helpful, inspiring words of some prominent man will leave the hall or lecture room without having derived any benefit from the address. Another young man will attend the same lecture with an ambition to learn something. He will drink in the speaker's sentences as if he were never to hear such words of encouragement and inspiration again. At the conclusion of the address he will determine that he will make more of his opportunities in the future; that he will read more, think more, study more, be more than he ever was before. Such a young man has a purpose and is determined to learn something from everything he comes in contact with and from everybody he talks to. The other has no ambition, does not throw himself into what he does, lets his mind wander hither and thither, so that he never wholly understands what people are saying and therefore never derives any benefit or information from those with whom he converses.

Big Queensland.

To give some idea of the size of Australia, Queensland alone is half as big again as Germany, Austria and Hungary put together. Its area is 668,497 square miles.

South Carolinans.

South Carolinans are "Weasels," "Sand Hillers" and "Rice Birds," the first an allusion to the thinness of the early natives, the second to their place of residence, the third to a common crop and bird which feeds on it.

Horse Health

is one of the most important things for every farmer to consider.

Dick's Blood Purifier

will build up a run down horse.

It tones up the system, rids stomach of bots, worms and other parasites which undermine an animal's health.

50 cts. a package.

LEEMING MILES & CO.
AGENTS. - - - MONTREAL.
Write for books on Horses and Cattle. IT IS FREE.

Knowledge embraces many subjects; but after all there is only one subject that is really worth embracing—woman!

Fever and ague and bilious derangements are positively cured by the use of Parmelee's Pills. They not only cleanse the stomach and bowels from all bilious matter, but they open the excretory vessels, causing them to pour copious effusions from the blood into the bowels, after which the corrupted mass is thrown out by the natural passage of the body. They are used as a general family medicine with the best results.

You often hear people say: "Blast my luck!" Ever hear them praise their luck? Is there such a thing as good luck.

BRIGHT BABIES.

Are a Joy to Mothers and a Treasure in the Home.

All babies should be bright, good natured and well. If you have a child that is sickly, fretful, nervous, restless at night, or suffers from stomach or bowel troubles of any sort, give it Baby's Own Tablets and it will soon be well. There is no other medicine in the world will so safely and speedily sure indigestion, sour stomach, colic, constipation, diarrhoea and teething troubles. Thousands of grateful mothers speak of this medicine in words of warmest praise. Mrs. Fred Power, 18 Scollard street, Toronto, says: "My baby suffered greatly from indigestion. She was pale and very thin and would cry with pain in the stomach, and sometimes would not sleep either day or night. I got a box of Baby's Own Tablets, and they have made a great change in my little one. She now digests her food readily; is not troubled with the pain in the stomach, and has grown quite plump. I do not know of any medicine that can equal Baby's Own Tablets for little ones."

This medicine is quaranteed to contain neither opiate or other harmful drugs. Children take the tablets as readily as candy and crushed to a powder they can be given to the smallest, weakest baby. Sold at all drug stores, or sent post paid at 25c a box by addressing the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N.Y.

THE SWEET GIRL GRADUATE.

Mrs. Hauskeep—"Bridget, what do you mean by all that disturbance down in the kitchen?"

Bridget—"Shure, it ain't me, ma'am. It's Miss Ethel."

"Oh! Has she got back from the cookery school?"

"Yis, ma'am; an' she's gettin' ready to thry an' bile an egg, ma'am."

Ask for Minard's and take no other.

Before marriage a man considers his best girl a little dear; after marriage he usually considers her a little extravagant.

144,063 English children under 14 years of age are wage-earners, out of the 5,601,249 who attend school.

The only town in a civilized country which is ruled and managed by colored men, is Eatonville, in Orange County, Florida.

It often happens that the straight of a crooked story is not very interesting.

WILSON'S FLY PAD POISON
THE BEST FLY KILLER

TRIBUTE TO COLONIES

HOUSE OF LORDS PASSES A VOTE OF THANKS TO THE IMPERIAL FORCES.

COLONIAL SOLDIERS AND PREMIERS RECIEVE SPECIAL MENTION.

London, June 6.—The Prince of Wales and many peeresses were present in the House of Lords when Lord Salisbury moved a vote af thanks to the officers and men of the Imperial forces in South Africa. The motion specially mentioned the colonial premiers, and paid a tribute to the splendid qualities of the colonial troops, who, he said, had contended under no ordinary difficulties against an enemy which had accumulated vast stores of munitions of war, and had the advantage of fighting in a peculiar country, with which they were thoroughly familiar.

The premier also said he thought the house had never before thanked nor had such good cause to thank the colonial troops for their assistance. Not long ago, many people in Europe thought that the time of the downfall of the British empire had arrived. But the colonial troops came brilliantly to Great Britain's assistance and the more Great Britain's difficulties increased, the more colonial loyalty had manifested itself in aiding the empire to defy the hostility and bitterness of all its opponents. Great Britain had the assistance of a force which a few years ago was not dreamed of and that was the subject of exultation in England. It was shown that when the country was denuded of troops her naval supremacy was sufficient to protect her, and Great Britain was never safer than during that period of the war.

Earl Spencer, the Liberal leader in the House of Lords, added his tribute to the British forces in South Africa, and Lord Salisbury's motion for a vote of thanks to officers and men of the imperial forces in South Africa was carried unanimously.

CASUALTY STATEMENT.

London, June 6.—The official statement issued by the war office shows that the total reduction of the British force in South Africa up to May 30 of the present year was 97,477. This includes killed (500) prisoners and deaths from disease and men sent home. Of these, many have rejoined their regiments, leaving 28,434 dead or permanently incapacitated. The total number of troops killed in action or who died of wounds is 7,792, while the total number of deaths from disease is 13,250.

WHAT MONT PELEE DID.

The Work of the Volcano is a Tax on Credulity.

The physical changes wrought by the convulsions in the islands are such as almost to tax one's credulity. At points in the vicinity of Martinique the soundings of the sea reveal that what was once a depth of two hundred metres is now in excess of twelve hundred. The mountain of Pelee itself retains but the shadow of its former grandeur, and has been consumed away by its internal fires, just as a candle is consumed before the burning of its wick. Whole rivers have been swallowed up, and on the island of St. Vincent a vast estate has disappeared utterly, and its former site has been replaced by an outlet of the sea. Another estate, adjacent to this, which three weeks ago was flat land occupied by the cottages of the laborers thereon, has been wholly destroyed by fire and become a ridge. What the topographical changes in the vicinity of Soufriere may be are as yet only conjectural, since in respect to this volcano at the hour of writing it has been impossible for investigators even to approach the sphere of its destruction. The whole country for a radius of eight miles has continued to be a seething mass of fire into which no living creature could hope to penetrate, and at a distance the noxious vapors that have arisen from the belching crater have been such as to menace the health, if not actually the lives of those who inhale them. Out of the mass of ruin and desilation at St. Pierre there has come but one mitigation of the horror of the appalling disaster, and that is that the attitudes in which the dead were found on many sides indicate that the blow when it fell upon them came with such awful suddenness that it blotted out their lives before they realized the nature or extent of the visitation.—Harper's Weekly.

A BOY DECAPITATED.

St. Paul, June 5.—John Olsen, six years old, was struck by an interurban car at University avenue and St. Albans street last evening and instantly killed. The boy's head was cut off by the wheels of the car.

WINNIPEG GREETS THE KING.

Address to Be Presented to His Majesty on His Coronation.

Mayor Arburthnot, of Winnipeg, has prepared the city's message of congratulation to King Edward on his coronation. The address will be suitably illuminated by Mr. W. Cotman and sent to His Majesty in book form. The address is as follows:

"Edward the Seventh, by the Grace of God, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, Defender of the Faith, etc., etc.

"The mayor and council of Winnipeg beg to tender to your Majesty, on the occasion of your coronation, the congratulations of your loyal subjects, the citizens of Winnipeg.

"A concurrence of happy circumstances tends to make the event a memorable one in the history of the British people. It is co-incident with the conclusion of a long and distressing war on terms, that while they secure equal rights for all and establish on a sure foundation the supremacy of the empire in South Africa, show to the world the magnanimity of your Majesty's government and the generosity of the British race.

"Material prosperity prevails throughout your majesty's dominions everywhere, and the result of just laws justly administered, and free institutions that allow the natural development of the natural resources of the several parts of the empire.

"The various peoples that owe allegiance to your Majesty are in manner unparalleled in the history of the world, bound together by the sentiment of imperial unity, combined with loyalty to your Majesty's person, a sentiment strengthened and intensified by the recent visit of the Prince and Princess of Wales, and the gracious words spoken by them of the lands they saw. It is the prayer of your Majesty's loyal subjects of Winnipeg that your reign, so auspiciously begun may be long continued for your own honor and the good of a contented, prosperous and loyal people."

GYMKHANA.

For the Benefit of the Winnipeg General Hospital.

This novel event will be the most attractive race meeting ever held in the Dominion. One hundred horses and ponies will take part, carloads coming from the following points: Moosomin, Indian Head, Fort Qu'Appelle, Qu'Appelle Station, Touchwood Hills, Brandon and Minnedosa. There will be hurdle races, steeple chases, and a number of comic events such as the egg, spoon, umbrella, bill-posting, hand in hand, and other races, and equestrian sports.

This big event will take place at the Exhibition Grounds, Winnipeg, Coronation Day, June 26th, and the following Saturday, June 28th. Reduced rates have been made on all the railways, and our readers could have no better occasion for making a week-end visit to Winnipeg.

If you want to uphold the honor of our town and get into the races, write the secretary, W. H. [illegible]ering, Minnedosa. Proceeds are to be given to the Winnipeg General

I. C. R. TO GREAT LAKES.

The Halifax Chronicle announces that an important arrangement is about to be entered into between the Dominion government and the Canada Atlantic which will result in giving to the Intercolonial an entry into the wheat territory of the west. The scheme in short is that in return for permanent traffic arrangements on the C. A. railway, the government will guarantee the interest on the bonds of the former to enable them to double track their line from Coteau Harbor. It is further stated that the Dominion will hardly be ever called upon to expend any money on interest account, and it will place the Intercolonial in a position to successfully compete for the export grain trade. If this arrangement is consummated the I. C. R. will have practically a direct line from the great lakes to the Atlantic seaboard, and be in a position to supply export business at both of these ports of Halifax and St. John.

The girls of Emerson have organized a "Rescue the Perishing" club, whose object is to rescue the young men of the town who are in danger of becoming old bachelors, by marrying them off.

Lord Strathcona has contributed $1,000 towards the fund for the erection of distinctive memorials in South Africa on the graves of deceased soldiers. The subscriptions now amount to $2,964.

At the board of trade conference in Toronto a resolution was adopted saying that the time had arrived for Canada to participate in the defence of the empire.

WRECK AT CALGARY

ENGINEER DORIN, BRAKEMAN DUNN AND CAR INSPECTOR CORSEY

PINIONED IN THE DEBRIS UNDER EIGHT FEET OF WATER AND PERISHED.

Calgary, N. W. T., June 5.—A serious accident occurred on the C. P. R. five miles east of here yesterday morning. Owing to the recent heavy rains a culvert had become undermined, and Engineer Chris. Dorin, with a freight train, dashed into the culvert, which gave way, precipitating the engine into the water alongside the track. He and Brakeman James Dunn and Car Inspector J. Corsey were thrown under the engine and pinioned there in eight feet of water. The train was telescoped and six freight cars piled on top of the engine. The wrecking crews from east and west recovered the bodies of the unfortunate men.

Passenger train No. 1 was fortunately late or much more frightful loss of life would have occurred.

A BRAKEMAN INJURED.

Brakeman Carson had his foot crushed by the drawbars while coupling cars last night at Laggan. He was standing on one car and holding a link with his foot when the cars came suddenly together, catching his foot. He was brought to Calgary and his foot, which was terribly mangled, amputated.

BOER AND BRITON ARE NOW ONE

Remarkable Scenes of Fraternization Between Victors and Vanquished at Veereniging.

Pretoria, Transvaal, June 5.— The ballot of the Boers at Vereeniging resulted in 54 votes in favor of surrender and six against it. Preparations are being made here for the surrender of the Boer commands, which will take place on the race course. All the Boers are allowed perfect freedom.

The women in the concentration camps are anxious to return to their homes immediately, but this will be impossible until a system of supply depots for the outlying districts is established.

Geo. Baden Powell is arranging for the distribution of the Mounted Constabulary in various districts. The police, railroads, and telegraphs will be handed over to the civil authorities as soon as possible, and the restrictions of martial law will be gradually relaxed.

The Boer delegates, who, during the peace negotiations, were stiff, formal and unfriendly, are now extremely cordial. All the commandants are returning to their commands in order to explain the situation.

Gen. Louis Botha, the Boer commandant general, has written an open leteer to the burghers, thanking them for their obedience in the past and exhorting them to be equally loyal in their obedience to the new government.

Lord Kitchener's address to the Boer delegates at Vereeniging, in which he said that if he had been one of them he would have been proud to have done so well in the field as they had done, made the best possible impression, and drew forth a hearty response from General Beyers, the chairman of the Boer conference, who expressed the pleasure the Boers experienced at meeting Lord Kitchener as a friend, adding that they had fought so long against him that they had acquired full appreciation of his worth.

The departure of the commandoes from Vereeniging for their various districts was marked by remarkable scenes of fraternization. The trains conveying the Boers started late, the night being extremely cold, the sentries along the railroad track lighted huge bonfires, round which groups of Boers and Britons gathered, forming a highly picturesque scene. The late opponents joined in such songs as "Hard Times Come Again No More," and "Old Folks at Home," the British soldiers and burghers outvieing one anotner in their demonstrations of joy. In brief, the scenes at the departure of the trains resembled nothing so much as the starting of huge picnic parties. The same signs of rejoicing were witnessed throughout the Rand. Flags were displayed everywhere and thanksgiving services were held in all the towns.

KITCHENER SAILS FOR ENGLAND

Durban, Natal, June 5.—The Times of Natal states that Lord Kitchener has left for England and that Gen. Lyttelton is acting commander-in-chief of the British forces in South Africa.

London, June 5.—It is announced that Lord Kitchener has been created a viscount by King Edward.

John Logan, of Carberry, Man., died on June 6.

DUTIES ON GRAIN REMAIN.

Hicks-Beach Makes His Financial Statement to the Commons.

London, June 5.—In the house of commons yesterday in reviewing the necessities of the situation now that the South African war is terminated, the chancellor of the exchequer forecasted the purport of his statement saying that the taxes, including the duty on grain, would be retained in order to raise the money required; but if there is any surplus it will be devoted to the redemption of part of the national debt.

The promised statement of Sir Michael Hicks-Beach consisted of a lengthy review of the financial situation. He said that the whole £40,000,000 ($200,000,000) provided for in the budget for the prosecution of the war would be needed to effect the demobilization and the transportation of the British troops in South Africa, to move the Boer prisoners from the various concentration camps and to furnish garrisons for South Africa.

Sir William Vernon Harcourt (Liberal) asked Sir Michael Hicks-Beach the number of these garrisons.

The chancellor of the exchequer said it would be premature to answer this question now, but that he had grounds for hoping that in the course of a few months large garrisons in South Africa would prove unncessary. The chancellor said he was glad to say he could dispense with the additional £15,750 ($78,750,000) which he had asked for when the new loan was autnorized by the house. He said he proposed to continue the new taxes for the present, but he asked the house to resume the sinking fund as the best step toward re-establishing the credit of the country. In conclusion the chancellor of the exchequer said one of the first matters to be considered was to determine how the revenues derived from the mineral wealth of the Transvaal could be all located so as to provide for a portion of the war debt.

THE MAYBRICK CASE.

It is Reported That the Principal in the Famous Poisoning Case Will Be Pardoned.

London, June 5.—It is reported that Baroness Roquez, the mother of Mrs. Florence Maybrick, found guilty of poisoning her husband and sentenced to imprisonment for life, has received semi-official assurances that her daughter will be pardoned during the coronation celebration this month as a part of the general amnesty to be extended to criminals of good record. At the United States embassy nothing is known about the matter, and Ambassador Choate declines to either confirm or deny the rumor. Persons conversant with the late attempts to secure the famous prisoner's liberty assert that if at last she is to be given her freedom, this may be regarded as due to the influence of King Edward, and may be interpreted as a token of his appreciation of American good will. Ever since the present home secretary came into office two years ago, efforts to secure the release of Mrs. Maybrick have been particularly active, and have continued up to the present time. The personal efforts of Ambassador Choate, although made informally, have been unceasing.

ARD PATRICK WON THE DERBY.

London, June 5.—Mr. J. Gubbins' brown colt, Ark Patrick, at 7 to 1 against, and ridden by J. H. Martin, the American jockey, won the Derby. Colonel H. McCalmontjs Rising Glass second and the Duke of Portland's Friar Tuck was third. Eighteen horses ran. R. S. Siever's Sceptre was fourth, and R. Forest Tod's Csardas was fifth.

Ard Patrick won by three lengths and the same distance separated the second and third horses.

Time—2.42¼.

The betting was 100 to 14 against Ard Patrick, 40 to 1 against Rising Glass and 100 to 7 against Friar Tuck.

WORST FEARS REALIZED.

Rangoon, (British Burmah), June 5.—The British steamer Comorta, from Madras for this port, with 650 passengers, which was believed to have foundered on May 6, in a cyclone owing to the discovery of wreckage, has been discovered at Baragua Flats, in the Irrawaddy delta, directly in the track of shipping. Her top masts are protruding above the surface of the water.

The Manitoba license department is determined to strictly enforce the license law in Winnipeg. Some complaints have reached Inspector Penrose that the law is being violated by some of the hotelkeepers and he has added to his staff Henry Thomas McGuire, provincial constable.

The Ottawa Board of Trade passed a resolution urging strongly upon the Dominion government the necessity of taking immediate steps to develop Canadian trade in South Africa.

Eight miners were burned to death as the result of an explosion of gas at a colliery at Dowlais, Glamorganshire, Wales.

During May 11,000 immigrants reached Canada.

Col. Lynch has made an attempt to take his seat for Galway in the British Commons.

Nine conductors of the Toronto Street Railway company have been arrested for stealing fares.

Great results cannot be achieved at once and we must be satisfied in life as we walk—step by step.—Smiles.

MAY IMMIGRATION.

New York, June 6.—The official immigration figures for the port of New York for May were 82,054, as against 73,667 for April.

France has thanked the Dominion for its aid to the Martinique sufferers.

In Africa, France has only 800,000 Arabs under civil rule, 2,000,000 under military government.

It has been found that at the present price of alcohol in Germany, about 13½ cents a gallon, alcohol competes with all forms of motive energy in engines of less than 20 horse power.

A new English organization is one for the promotion of early rising.

When a man goes away from home for a change he usually comes back with less than he had when he started.

Most men give up what they like to do in order to get what they like to have.

Slander is a moth that eats holes in a good name.

The cooking school girl doesn't always pan out.

Make useful sacrifices enough to dispense with useless ones.

One trouble with the "still small voice" is that it has an emphatic way of refusing to keep still.

He is truly a great man who achieves greatness without making a noise while doing it.

Take care of your health while you have it, not after it is gone.

Joseph Gourley, of Rat Portage, had a leg accidentally cut off while working on the steamer Empress.

The recount in Lennox, Ont., resulted in a tie and the returning officer declared Madole, Liberal, elected.

The largest stud of horses kept by any private individual of late years was owned by Mr. Oppenheimer, of Hanover, in whose stables 600 horses stood five years.

Some men are ever ready to do an injury and to apologize for it.

When one builds castles in the air he leaves out the troubles.

About the surest way to acquire lasting popularity is to forget yourself and think only of the wants of others.

The postage rates on periodicals and newspapers between England and Canada will be one of the subjects discussed at the colonial conference.

There are not fewer than 40,000 Syrians in the United States, and between 2,000 and 3,000 in Chicago.

There are now twenty vessels under the British flag running regularly under liquid fuel, and many more are on the stocks.

Put your strength in your fight instead of in your challenge.

How some people who are so widely different from us can be satisfied with themselves is past all human understanding.

Some women consider a husband a nuisance—except on payday.

Popularity that is purchased is never a bargain.

One who spends money imprudently is not apt to have money to spend prudently.

The only way to get rid of some bores is to lend them money.

A poet says that all angels are blonds, and that all blondes are angels.

The young fool has a chance to outgrow it; the old one hasn't.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, JUNE 14, 1902.

FIGURES MEANING NOTHING.

THE figures made use of by the member for South East Kootenay, in the course of his remarks during the budget debate, which purport to show the relative strength of the government and opposition parties in the legislature and at the polls, have not that significance which at first sight one might be inclined to give them. If one could take the figures as furnished, and say: "Here is a government that is kept alive by the votes of twenty members, who represent but 11,227 voters; while it is opposed by seventeen members, who represent 15,666 voters," there would certainly be room for the assertion, that, despite its apparent majority upon the floor of the house, the government no longer in representative of the majority of the electors and has therefore no license to live. But the figures submitted by Mr. Smith lead to no such conclusion. In the political combinations that have been framed, and broken, and patched up again, with the single purpose of conserving the interests of a few hungry office seekers, the people who make members of the legislature, the voters, have been entirely overlooked.

At no time after the returns were all in, from the last general election, were the men who dominate the present administration in a position to command a majority in the legislature. In the outset they made a deal with the Conservative faction which had captured a number of seats on the mainland. This called for the recognition of the old gang as cabinet ministers for the approaching session, and a reconstruction from the joint factions after the session was over. But the old gang would not let go their hold on the salaries, and a breach was started then which has been widened ever since.

Then came the break over the railway concessions sought by those who were supposed to be acting in the interests of and in concert with James J. Hill, when the somewhat remarkable sight was presented, of the stoutest supporters of the government bolted because the government would not deal more generously with subsidy hunters, who, apparently, had unlimited capital for the entertainment of members of the house, however short they may have been for the carrying on of railway construction. No one who is at all familiar with provincial politics will pretend to say, that, in the cases of one third of the members who bolted on this occasion there was any effort made to place the wishes of their constituents first, in the shaping of their action. Public sentiment can change rather quickly, but public sentiment, even in British Columbia, would require a handicap from the politicians on both sides of the legislature who flopped on the railway policy as it was presented during the session of 1901.

Then it became necessary for the government of the day to reward J. H. Turner for the service he had rendered to his party, if not to his province. Having in view the greater necessity for his vote in the legislature, than for his service in London as agent-general, this post had been kept open for him for several months. With the close of the session came the appointment of the agent-general, and another political sacrifice was necessary. It resulted in the partial consolidation of the Dunsmuir and the Joe', Martin factions. Will anyone pretend for a moment to say that this consolidation was made with any regard for the electors, who, in this instance, returned their representatives for the especial purpose of opposing each other.

No, the electors of British Columbia have been ignored, and ignored presistently ever since they placed their present representatives in the legislature, and not more so by the present supporters of the government than by the present members of the opposition. They have paid more heed to subsidy hunters and grafters than to the electors whose votes placed them in their positions. There have been a few notable exceptions to this general disregard of the electors, and and the FREE PRESS in inclined to include the member for South East Kootenay in such exceptions, but it must raise its protest against any attempt at showing that the present members of the legislature, or any division of them, stand for any principle, or represent anyone but themselves.

EDITORIAL NOTES.

WE published an item in our last issue in which we stated that General Manager Tonkin had refused the committee appointed by the miners the privilege of examining the mine on the ground that there were two miners already making an investigation. Mr. Tonkin explained to the court at the inquest on Tuesday that this was not correct; that the committee had been refused permission to enter the mine because some of its members were not employees of the Company.

* * *

Subscriptions to the Relief Fund have almost ceased to come in, and from evidences at hand this seems to be largely due to the erroneous construction placed upon the telegram sent out from the Coal Company's head office in Toronto, to the effect that they would provide for the afflicted ones against permanent destitution. This statement is not correct, and the public should be notified of that fact. There are over fifty families dependent upon the fund and it has barely reached $30,000. Very few subscriptions have come in from the eastern cities, and this is regretable in view of the fact that many of their wealthy citizens have made large fortunes from the mineral resorces of British Columbia. The relief fund raised after the Springhill mining, disaster where some hundred and twenty-three miners met death, reached the handsome sum of $120,000; at the Union coal mine disaster two years ago, where there were only sixty-five killed, the fund reached nearly $100,000, but in Fernie, where the list of dead runs up to one hundred and thirty, it is doubtful if the fund will reach $35000.

* * *

THE strike ordered by the United Mine Workers of America to take effect in West Virginia was more complete in places than was expected, and less effective in others. The incomplete reports are conflicting but it is evident several thousand more men went on strike than was anticipated. The strike affects not only the industries of this state, but also railway and Ohio river navigation. All the local roads suffer. Among the trunk lines, the Norfolk and Western suffered most, but very many miners were also idle from along the Baltimore and Ohio, and the Chesapeake and Ohio. As a rule, the miners quit work without much demonstration, but in some places they were marching with bands. It is ascertained that the operators in some places had secured many armed guards in anticipation of a protracted struggle, if not a violence.

LIQUOR LICENSE ACT.

I, Eugene Walter, of Morrissey, B.C., hereby apply to the Board of License commissioners for a hotel transfer of my license to sell intoxicating liquors under the provisions of the statutes in that behalf in the premises known and described as The Hotel Walter, to the premises known as the Elk Hotel. at a point about two miles west of the present Hotel Walter, to commence on the 1st day of July, 1902.

LOCAL AND GENERAL.

Hazelwood ice cream at Cuthbert's.

Mr. and Mrs. Dr. Corsan spent several days in Lethbridge this week.

WANTED—Girl to do general house work. Apply to Mrs. J. A. Rennie.

Ed. Home spent Sunday in Fernie. He was joined here by his mother from Winnipeg.

The new Baptist Church will be completed next week and the opening will take place on the 29th inst.

Coronation Day, June 26th, will be observed as a public holiday in Fernie. Nearly all the business men have signified their intention of closing their stores.

A new timetable has been arranged for the Crow's Nest branch. The east bound express is now due at 18.30 and the west bound at 5.45.

The lacrosse team will go to Lethbridge on June 26th. and it is requested that the members of the club turn out to practice as the team for the season will soon have to be selected.

Mr. Edward Barton and family, with the exception of his son, Edward, left for England on Saturday last. Edward went to Effingham, Ill., where he will attend college.

Mr. John Kay, late manager of the local branch of the Bank of Commerce, left for Vancouver on Wednesday. where he will occupy a position in one of the banks there.

Tomorrow (Sunday) the decoration services of the Oddfellows' will take place. All members and visiting brethern are requested to meet in Joyce's hall at 2.30 p.m

P. McMurphy left Thursday evening for his home in Rat Portage, where he has been called owing to the serious illness of his mother. He expects to be gone about three weeks.

J. H. Bricker met with a very painful accident on Tuesday evening while playing lacrosse. He wrenched his knee severely and is compelled to use a cane in order to move around

The synod of the diocese of Kootenay held its annual meeting in Nelson on Wednesday and Thursday of this week, in the Mission hall of St. Saviour's church. Bishop Dart, of New Westminster, presided and a large attendance of clerical and lay delegates were present.

It is expected that the trains will be running on the Canada Southern, East Kootenay extension of the Montana and Great Northern railway by July 15th. This will it is believed, materially reduce the cost of coke and coal at the Northport smelter as the Great Northern will then have through services from the mines to the smelter.

Subscriptions are coming in very slow for the relief fund. The relief committee have so far only contributed a small portion of the fund. Twenty-five dollars was paid to each of the widows, $300 was distributed among the families at Stockett, Montana, and $100 to the Jones children, whose father and mother are both dead. Aside from relieving immediate want it is not the intention of the committee to distribute the money until the subscription lists have been closed.

One of the most pleasing features of "Too Rich to Marry" which will be at the Princess hall, Tuesday, June 17th, is the specialties. During the intermission between the acts, several first-class specialties are introduced, and during the actions of the play songs and dances are interwoven with the plot. In fact "Too Rich to Marry" besides carrying a most capable company of actors and actresses, has a corps of specialty artists equal to the demands of any of the large eastern vaudeville theaters.

The provincial government, at Victoria, has introduced a bill to amend "The Investment and Loan Societies Act." This is a direct result of the Fernie mine explosion in which several members of "The B. C. Permanent Loan and Savings Co," of Vancouver, were victims. Mr. Langlois, the president of the company, when he learned the particulars, interviewed the government with a view of cutting away of a lot of red tape at present attached to the legal proceedings involved in the repayment of money due the heirs of deceased members. The law requires that an official administrator must be appointed and this entails an expense of from thirty to forty dollars in each case. The new bill reads that when the value of the estate of a deceased member, in the hands of such a company, is less than $300, the said company may administer the part of the estate that is in their hands. Each company is required to give the government $5,000 bonds for the due administration of the estates coming to their hands. The bill consists of ten sections and will likely become law in a few days.

Mr. J. D. Quail has added a fine new office to his establishment.

"Fidelity to Conviction" will be the subject of discussion by Rev. D. Holford next Sunday evening.

Jas. Dallas and Batten Bone twh speculators who were here trying to purchase the Alberta Hotel this week left on Friday for Alaska, they were not successful in their attempt.

Sam Gibson, who has been running a restaurant in the Victoria Hotel for some time, is opening another one in the Turner block in the rear of the Victoria. He has named it The Bon Ton.

Trooper Hamen of Ottawa, in a letter to his parents, states that after the shooting of Corporal Knisley and Private Day, the Boers stripped the dead, and nailed Knisley's distinguished service medal and South African ribbon to the hero's naked breast.

The services at Christ Church, Fernie, on Sunday next, June 15th, will be as follows :—Matins and Holy Communion, 11 a.m.; Sunday School and Young Men's Bible Class, 2:30 p. m.; Evensong and Sermon, 7:30 p.m. The Rev. H. Beacham, of Cranbrook, will officiate. Collections in aid of Church expenses.

The Clipper Novelty Co., which was billed to appear here on Wednesday and Thursday evenings of this week, failed to put in an appearance. The company disbanded at Elko. One of the company, a trick bicycle rider, gave a street exhibition on Wednesday evening and another on the recreation grounds Thursday evening. Last night he gave a benefit for the relief fund from which the committee realized some $34.25. The young man is certainly master of the bicycle and can do some very remarkable tricks,

Produce Business

For Sale.—The produce business carried on by the Dill & Hill Co. for the last year, is offered for sale at a bargain This is a splendid chance for anyone wishing to go into the business.

Six More

The rescue party have added another half dozen to the list of bodies taken from the mine. This brings the total recovered to date up to 124. A number of the miners employed in the work still estimate that there are nine or ten bodies yet in the mine, others fix the total at not more than half a dozen. How long before they will all be recovered it is hard to estimate. Those recovered during the week were :—Alex. Walker, John Owen, M. Fitzmainice, Willie McDonald, an unknown supposed to be Angus Gunn, and A. Federico. A force of sixty or seventy men have been hard at work during the past week getting No. 1 mine ready for operation again and it is expected that coal will begin to come out on Monday.

I am disposing of my interest in the Fernie Drug Store to Mr. N. E. Suddaby and would bespeak for him the patronage of my customers. Those indebted to me will confer a favor by settling their accounts by July 1st.—H. S. MONKMAN.

Mrs. T. W. Bell, of Medicine Hat, is in town the guest of her sister, Mrs. Graves.

The Western Federation of Miners, in convention at Denver, voted $3,000 for the relief of families suffering from the Fernie explosion. The total of the Federation receipts during the year were $160,000, disbursements for relief $40,000 for organization $7,000 and for general expenses $40,000, making a total of $87,000, and leaves a balance in the treasury of $73,000. During the past year sixty-two unions were organized and added to the federation. The increased membership has been 6,000 making a total of 76,000 in fourteen unions and six districts west of the Missouri.

J. A. McLEAN, R. S.

CAUSTIC CRITICISM

SYSTEM OF MILITARY EDUCATION AT WOOLWICH AND SANDHURST CONDEMNED.

COMMITTEE RECOMMENDS DRASTIC CHANGES—COMMISSIONS FOR COLONIALS.

A London cable says: "The report of the committee on military education and training of the British army has been issued. The committee's report which is based upon the from the commander-in-chief downwards, fills forty-eight printed pages with caustic criticism of the existing system. The witnesses were unanimous in saying that the junior officers were lamentably deficient in military knowledge, the desire to acquire knowledge, and in zeal. The committee finds that young officers will not work unless compelled to do so, that "keenness is out of fashion," and that officers do not posess a common elementary education, and plaintively protests that officers ought "at least to be able to express themselves clearly and concisely in their own language."

The report condemns the systems of both Woolwich and Sandhurst, where education is far from satisfactory, the instructors having no inducement to teach the cadets, still less to work."

With the view of diminishing the expenses of officers belonging to the cavalry regiments, the report recommends that polo tournaments, regimental coaches and the keeping of hounds be forbidden. Perhaps the penultimate paragraph is the most important of all.

"So long as mediocrity is permitted to pass muster," says the committee, "and signal ability meets with no substantial recognition, it is useless to hope for any valuable results from verbal amendments to the regulations. Nothing but inducements, in the shape of certain reward for good work, either in peace or war, can raise the standard of knowledge through the commissioned ranks." The committee, therefore recommends an honest system of promotion by merit, following upon tests honestly conducted and honestly reported on."

The report plainly hints that officers can hardly be expected to work so long as the present system of advancment through social influence is in vogue, or as long as efficiency has nothing whatever to do with the selection of officers for desirable appointments. The committee recommends, among other things, that more commissions be offered to the colonies, and that officers be compelled to know either French or German.

CLUB FOR COLONIAL TROOPS.

The loneliness of London for those who come to it as strangers in a strange land is justification for the colonial troops club. It is mainly intended for the entertainment of colonial troops in London for the coronation, and Mr. Chamberlain yesterday undertook the very congenial task of performing the opening ceremony. He enlarged upon the debt Great Britain owed the colonies in connection with the Boer war for moral as well as material assistance. They say with keenness and an instinct, which was not surpassed by even the most patriotic Englishmen at home, the magnitude of the issue at stake. The colonial secretary's remarks were interrupted with cheers, but perhaps the loudest applause was reserved for this statement that tne colonies had sent an army to South Africa greater in number than the British army at Waterloo.

ELECTRICAL DISCOVERY.

No Chemicals or Dynamos Required in a Method Used by Figueras.

A dispatch to the Daily Mail from Las Palmas, Canary Islands, says that a prominent engineer of that town named Figueras, claims to have discovered a method of utilizing atmospheric electricity without chemicals or dynamoes, and that he is able to make practical application of his method without employing any motive force. Figueras expects that his invention will bring about a tremendous industrial revolution.

SHERIFF BENSON DEAD.

Mr. James Henry Benson, sheriff for West Assiniboia, died on Saturday last. Deceased had a paralytic stroke some months ggo, since which time he has never left his bed.

A terrific cyclone passed oper the town of Ranneslaer, Ind., laying everything low for a distance of six miles and 200 yards wide. A man named Leach, his wife and family were fatally injured.

CONFESSION OF A POLO PONY.

I am the "Yaller Kid,"
Ex-cow-horse, race horse, etc., etc.,
But now a full-fledged polo pony.
I am the homeliest cayuse
That ever came over the divide.
I can sprint for
Two hundred yards
Just like hell and gone.
I am well and truly named,
As my color is a true cross
Between ginger and a gunnysack.
But color don't count;
"Play the game,"
You bet that counts.

Polo is a new game to me,
But I am in for good and all.
When you see a lot of dust
Where the battle is the thickest
At the games this summer,
Where the scrimmage is the keenest
At the games this summer,
Look for me in the bunch.
I'll be there.
I'll be first man in
And first man out;
Make a note of that.

I had been used to clubs,
Lariats and such like,
Thrown around my head,
And the rancher who owned
Me last could pack home
A cross-cut saw,
A post-hole auger
And a lot of barb-wire
On my back; so when
The matter of a polo stick
Being whirled around my head and
Heels came to be considered,
I found it an easy
Proposition.

So here goes,
I am getting three
Square feeds a day.
And feel like work.
The Tooth-Carpenter who
Plays the game with me
Can do big business
With his 53 club.
If he can only hang on
When I'm dodging.

He plays No. 4,
And expects me to sprint
And turn in my length,
And body check,
And keep my temper,
And my eye on the ball,
And play to the left,
As he plays right hand.

Well, watch me work.
And if you don't say
That I am enough to
Make you dizzy
You can buy me a
New set of leg bandages.

I am the "Yaller Kid,"
Full brother to
"Maltese Cat,"
Of Kipling fame.
I am not so big,
Nor so darned handsome,
But, oh, my !
I am skookum
When I get out to play the game.

—Charles Herbert, in Globe.
Pincher Creek.

JOHN MORLEY SPEAKS.

Speaking at Edinburgh on May 6, under the auspices of the Scottish Liberal association, Mr. John Morley (Liberal) the former chief secretary for Ireland, announced that, now the war was over, the time was opportune for a union of the Liberals on the old foundation of peace, economy and reform. He pinned his faith to the leadership of Sir. Henry Campbell-Bannerman, announced his adhesion to home rule for Ireland, and denounced the grain tax, which he predicted, foreshadowed the abandonment of free trade.

The British Columbia legislature has passed the anti-Chinese and anti-Japanese Immigration act to provide for an educational test of all incoming immigrants.

A curious accident happened to W. Howie, of Brandon. While he was proceeding down 11th street he felt a stinging sensation in his left knee, and found he had been shot. No report was heard, and there is no clue to the culprit.

In connection with the Martinique disaster steamers describe the negroes as holding orgies, because the whites are all dead. The negroes say they have elected a negro governor. Many of the negroes are said to have enriched themselves by looting.

Nakusp, B. C., is built on an ancient glacial morraine. T. McNaught (of Halcyon Springs) expresses the opinion that this morraine is to geologists one of the most interesting features of glacial history.

A widow, with seven children, from Kent, England, has arrived to start fruit farming in the Okanagan Valley, having been impressed with the accounts she saw of Lord Aberdeen's fruit farm.

The Indians of Stony Plain reserve are busy repairing the road east from the agency buildings to the east boundary of the reserve, some four miles, putting in substantial bridges. The Indians also offer to assist settlers in repairing the south road.

BRIEF NEWS NOTES

SIR MICHAEL HICKS-BEACH SAYS THE GRAIN TAX WILL REMAIN.

MR. KRUGER WILL GO BACK TO HIS FARM IN TRANSVAAL COLONY.

The French ministry has resigned.

Bishop Grandin, of St. Albert, Alta., died on June 3.

Senator Clemow left an estate valued at $750,000.

Melita, Man., has held its first election as a village.

May inland revenue collections in Winnipeg reached $47,507.

Dr. J. Mills Church, of Aylmer, Que., fatally poisoned himself by taking carbolic acid for seltzer water

The Directors of the Lipton company severely criticized Sir Thomas at a meeting in London for paying so much attention to yacht racing.

A deputation of farmers from Morris municipality interviewed the municipal government on damage to lands in the district by defective drainage.

The German press regards the peace terms as "unconditional surr?nder." The House of Lords will grant an appreciation sum to Lord Kitchener. The British will offer a safe conduct to Kruger to enable him to return to his farm.

Montreal will have a big military field day on June 26, Coronation day.

The Flavelle Milling company's storehouse at Lindsay, Ont., was destroyed by fire.

John Rowan and Timothy Kehoe, G. T. R. engine drivers, were killed at Point St. Charles.

Herr Krupp has perfected a gun, the projectile of which will pierce the heaviest armor plate.

Answering a question in the British House of Commons, the secretary Mr. Broderick, said the total number of Boer prisoners in South Africa and elsewhere was 25,565, of which 763 were under 16 and 1,025 over 60 years of age. The chancellor of the exchequer, Sir Michael Hicks-Beach, answering a question, finally announced that it was not proposed to remove the tax on grain in the budget.

During a thunderstorm on May 17 two horses belonging to Mr. Schecter, of Hirsch, Assa., were killed in their stalls by lightning, and a neighbor while driving along the road with a load of wheat had one of his horses killed in the same stor . Manager Mendels, of the Hirsch colony, purchased fresh horses for the unfortunate farmers, thus enabling them to continue their seeding operations.

While the day shift in the Nickel Plate mine at Rossland were coming out last Thursday the hoisting engineer permitted the cage, in which there were seven men, to get beyond his control, and, starting from the 600-foot level, it shot down to the bottom of the shaft, a distance of 200 feet, landing its unfortunate occupants in a heap. That none of the men were killed was almost a miracle. One of them escaped practically unhurt, but the other six sustained fractures of a more of less serious nature, none of which will prove fatal.

PAQUETTE HANGED.

Kamloops, B. C., June 3.—Louis Paquette, under sentence of death for the shooting of Fred Legere, at Notch Hill, on the 26th April last, was hanged here this morning in the jail yard, in the presence of a few spectators, who were admitted by pass. Sharp at 8 the solemn procession entered the court yard. The condemned man mounted the scaffold unassisted, preceded by Rev. Father A. Michels, the jail officials following. Two minutes later the trap was sprung. The drop was seven feet, yet death was not instantaneous. The body hung fully fifteen minutes before life was pronounced extinct. The condemned man made no statement, but was firm and steady to the last.

DEATH AT A BARN RAISING.

Brampton, Ont., June 4.—By a combination of accidents at a barn raising on the farm of William Kersey, Toronto Gore, John Johnston, councillor of Toronto Gore, is dead. John Black will probably die, and George Wiley, A. Cameron, Andrew McCort and others were injured. The occasion was a competitive barn raising, the competitors being the township of Vaughan against the township of Toronto Gore.

Awning makers now proceed to put every other business in the shade.

Running makes a person warm, because, when running, a greater quantity of air is inhaled into the lungs. More oxygen is thus introduced, and the blood is heated.

REDOUT VOLCANO IN ERUPTION

Passengers on the Steamer Chico See Startling Sights While in Cook Inlet.

Seattle, Wash., June 4.—Passengers from Cook inlet, who have arrived by the steamer Chico, confirm the previous rumors of another eruption of Redoubt volcano, which is situated on the west side, about forty miles northwest of Iliamna. Among them was A. C. Losey, of Tacoma, an employee of the Trans-Alaska company, who saw the eruption.

He sailed from Iliamna on the morning of May 8. From Iliamna only heavy smoke was to be seen in the direction of Redoubt, but the spectators knew the volcano was in eruption again. Precipitous mountains shut off the view until the Chico had sailed twenty miles or so on the trip up the inlet, when the show became thrilling. Dense black clouds covered the entire region, spreading entirely over Cook Inlet. At times the smoke directly over the volcano region was lighted to a dark gray, but no flames were seen during the day and no ashes reached the ship, but when evening fell, bright flames flashed up and lighted the whole sky in that direction. The ship's course out of the inlet left the volcano directly to the westward at which point, Mr. Losey says, there seemed a continuous sheet of fire rising probably miles high.

DEMAND FOR DEER HOUNDS.

An Industry Awaiting Enterprise—Dogs Needed to Kill Wolves.

There is a rising industry in this Northwest that offers a substantial profit to any careful settler. It is in the breeding of deerhounds for the destruction of wolves. To the owners of sheep, calves and live stock, these dogs are of inestimable value. The demand for them will be greater every year. Their marvellous speed, great endurance and wonderful sagacity are shown to perfection in the sport of wolf hunting. It is sport, too, and of the most exciting nature. More than this, it is a paying sport. The municipalities of Birtle and Louise last season paid about $800 for wolf destruction at $1 per head. The pelt is worth $1.50, and as there is at least one deerhound in the province which killed close upon 100 wolves single-handed within the last twelve months, there is a good margin of profit to the owners. There are no nicer pets than staghounds. Although of grave demeanor, they are exceedingly kind, affectionate and cleanly. When $100 has been offered again and again for one dog, "General," of Dominion City, and declined, it is clear that the breeding of these beautiful fellows is a source of profit Nor, indeed, for the purpose of hunting the prairie wolf is it absolutely necessary that the dog should be pure bred. The cross between the deerhound and the greyhound gives a breed of fast exterminaters of the wolf. With the enormous influx of farmers into our midst, the purpose of killing the wolf will be great. The introduction of a goodly number of staghounds into our prairie country would mean the life saving of numberless heads of valuable stock during tke coming season.

FATAL COLLISION.

Port Lambton, Ont., June 4.— An unknown steamer and the barge Gleniffer, which the steamer had in tow, collided off the southeast bend late last night. The captain's wife, Mrs. C. Moore, was drowned, and Archie Mysner is missing and is supposed also to be drowned.

A CHILD'S AWFUL CRIME.

Montreal, June 4.—News has been received from Lake Megantic that the six year old son of Hugh Matheson, a well known farmer, shot and killed his father, who was about to thrash his elder brother.

PAT'S TEST.

A good story is told of an Irishman, more patriotic than clever, who enlisted in one of the smart cavalry regiments. The fencing instructor had experienced a rather difficult job in th? matter of explaining to him the various ways of using the sword. "Now," he said, "how would you use the sword if your opponent feinted ?" "Bedad," said Pat, "I'd tickle him with the point to see if he was shamming."—St. James Gazette.

During the present year, until May 1,4847 immigrants arrived in Calgary and 501 cars of settlers' effects passed the customs there during the same period. For the most part the settlers are good sturdy American agriculturists with a fair leavening of Ontario Canadians and Britishers. Some Galicians have gone through to the Edmonton district, but in nothing like the numbers of former years.—Calgary Herald.

The reason some men get elected to office so easily is because the people have not found them out.

Most people are as bad as they look, and the rest are a great deal worse.

STEAMERS FOR THE EMPIRE.

Mammoth Corporation to Compete With the Morgan Syndicate.

London, June 6.—This evening's papers publish elaborate statements that negotiations are very far advanced between the British and Canadian governments and a great syndicate of capitalists, headed by Sir Christopher Furness, for a fleet of 25 knot steamers, magnificently equipped, running from Milford Haven to Canada in conjunction with the Great Western Railway of England and the Canadian Pacific, under heavy British-Canadian admiralty subsidies. There will also be alied a fleet of fast cargo steamers, the whole forming an effectual checkmate to the shipping trust. It is said the plans are sufficiently advanced to enable the company to be floated in a couple of weeks.

Another cable says: The negotiations of the British and the Canadian governments and some of the other colonial governments with the Cunard line and other lines comprising what is now termed the Liverpool syndicate (which is opposing the Morgan combine), contemplate, according to the Westminster Gazette, both a fast service of mail and passenger steamers in conjunction with the Canadian Pacific railroad, and a fleet of fast freight steamers.

The mail steamers, which it is proposed to build will be of enormous size, capable of steaming 25 knots an hour, and will be fully equipped for use as armed cruisers, carrying eight quick-firing six-inch guns, forward and aft, and broadsides of three 4.7 inch guns. The freight steamers will be sixteen knot vessels, carrying 6,000 to 7,000 tons dead weight.

The Westminster Gazette thinks it probable that Milford Haven will be the port of departure of the fleet. The scheme contemplates a line of steamers running to China, Japan, and Australia from Vancouver, B.C. Canada and Australia are expected to join in paying the subsidies. The draft of the scheme involves the home government guaranteeing a small interest on the capital involved. This will have to be ratified by the House of Commons, "where," says the Westminster Gazette, "it will probably meet with opposition."

REVISE THE PRAYER BOOK.

The Anglican Church Is Said to Be Hampered by Its Antiquity.

Ottawa, June 6.—The Ottawa synod took up tne education and census reports at last night's meeting.

Rev. A. W. MacKay said that to quote the exact figures the Anglican population in the diocese was 40,178, an increase of 1,919, but in Ottawa the increase was 2,050. This showed that there was a falling off in the rest of the diocese. "It is a disaster to think that we have lost 18,000 in Ontario. The Bishop of London says that the Anglican church is largely hampered by its antiquity. If that is true with the church in the heart of the empire it is one hundred times more true of the church in the colonies. (Hear, hear). The most successful church body was that of the Presbyterians. Their ministers and laymen have realized that they have the willing Spirit of God in them, and they deserve to prosper. (Cheers). I want to make a bold statement. We want to revise the Prayer Book. (Hear, hear.) I do not say that as a simple priest, but as the echo of the Metropolitan of India. It should be more flexible and more adaptable to the needs of a growing country. We must have a short and simple service, suited to people of every region."

WOMEN AS FIRE FIGHTERS.

The little town of Massos, in Sweden, has a women's contingent, 150 strong, in its fire brigade. The water supply of the village consists simply of four great tubs, and it is the duty of tne women "firemen" to keep these full in cases of fire. They stand in two continuous lines from the tubs to the lake some distance away, one line passing the full buckets and the other sending them back.

The death of Percy Leonard Devereux, A division, South African constabulary, is reported. He received wounds in a fight at Buffaldorn, which resulted in his death on May 31. His father is J. Devereux, Ladner's Landing, B. C.

The horticultural pavilion on Toronto exhibition grounds was destroyed by fire on June 5.

The customs receipts for Calgary for May were four times as large as for the same month last year.

Senator Combes has accepted the task of forming a French cabinet in succession to Waldeck Rousseau.

FERNIE FREE PRESS.

FERNIE, B.C.

"SHAKE, OLD BOY !"

An exchange tells of a lady who decided to scare her hard drinking husband, so that he would reform. To do this she procured the costume of a devil, which she saw at a masquerade. The next time the erring spouse came home feeling happy, she donned the costume. As he opened the door she stepped forward and said, in a sepulchral tone :

"Come with me; I am the devil !" The reply to her greeting was :

"Zat so ? Shake, old boy ! I'm your brother-in-law; I married your sister."

Hard and soft corns cannot withstand Holoway's Corn Cure; it is effectual every time. Get a bottle at once and be happy.

No man has yet found out who can use good judgment when his hair stands on end.

Cannot Be Beat.—Mr. D. Steinback, Zurich, writes:—"I have used Dr. Thomas' Eclectric Oil in my family for a number of years, and I can safely say that it cannot be beat for the cure of croup, fresh cuts and sprains. My little boy has had attacks of croup several times, and one dose of Dr. Thomas' Eclectric Oil was sufficient for a perfect cure. I take great pleasure in recommending it as a family medicine, and would not be without a bottle in my house."

The only applause a married woman gets is that from her kin when she successfully fools her husband.

WIRE WOUNDS.

My mare, a very valuable one, was badly cut and bruised by being caught io a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better, until, after three weeks, the sores have healed, and best of all the hair is growing well, and is not white, as is most always the case in horse wounds.

F. M. DOUCET.

Weymouth.

When a good woman stays away from church, and hears after that there was almost no one there, the burden on her conscience increases.

MINARD'S LINIMENT Lumberman's Friend.

Count your blessings. If you sleep in a cold house, where all the fires go out at night, remember that in the warm steam-heated houses, bedbugs winter as well as summer.

Very many persons die annually from cholera and kindred summer complaints, who might have been saved if proper remedies had been used. If attacked, do not delay in getting a bottle of Dr. J. D. Kellogg's Dysentery Cordial, the medicine that never fails to effect a cure. Those who have used it say it acts promptly, and thoroughly subdues the pain and disease.

A cemetery widower is always gayer than a court house widower. Somehow, the court house widower is stilll a little afraid of her.

How's This?

We offer One Hundred Dollars Reward for an case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Hall's Family Pills are the best.

HER PECULIARITY.

"You must find that impediment in your speech rather inconvenient at times, Mr. Barnes."

"Oh, everybady has his little peculiarity; stammering is m-mine."

"Well, really, I was not aware that I had any peculiarity."

"Do you s-stir y-your t-tea with y-your r-r-right hand ?"

"Why, yes, of course."

"W-well that is y-your p-p-peculiarity—m-most p-people u-use a t-tea s-s-spoon."

Keep MINARD'S LINIMENT in the House.

Oh, well, time drags on now, but think of the time when your only way of measuring it will be by the medicine you take.

There is many a merry ha! ha! at your expense that you don't know about.

THE BEST PILLS—Mr. Wm. Vandervoort, Sydney Crossing, Ont., writes: "We have been using Parmelee's Pills, and find them by far the best pills we ever used." For delicate and debilited constitutions these pill act like a charm. Taken in small doses the effect is both a tonic and a stimulant, mildly exciting the secretions of the body, giving tone and vigor.

Henry VIII.

Henry VIII. was enormously fat and easily overheated. At the slightest exertion his face became purple.

Soldierly Birds.

On a parade ground at Calcutta are several adjutants, or argalas. These birds, which belong to the stork tribe, walk up and down the ground, and they look so much like soldiers that at a distance strangers often mistake them for grenadiers.

If You Could Look

into the future and see the condition to which your cough, if neglected, will bring you, you would seek relief at once—and that naturally would be through

HALCYON HOT SPRINGS, B. C.

Without question the best and most effective springs in Canada for the cure of rheumatism, kidney or liver troubles. The medicinal qualities of the water are unequalled. Splendid hotel accommodation ; fine fishing and hunting. An ideal spot for the invalid.

We imagine that the two most gruesome tasks in the world would be to shave a dead man and curl the hair of a dead woman.

WEAK AND HELPLESS

THE CONDITION OF MRS. WM. WESCOTT, OF SEAFORTH.

Suffered From Headaches and Dizziness—Could Not Stand the Least Exertion.

From the Sun, Seaforth, Ont.

Mrs. Wm. Westcott is well known to nearly all the residents of Seaforth. It is also well known to her neighbors and friends that she passed through a trying illness, but is now, happily, in robust health. To the editor of the Sun, Mrs. Westcott recently gave the particulars of her case for publication, merely in the hope that her experience might be of some benefit to some other sufferer. She said : "For some time past my health was in a bad state my whole system being badly run down. I was troubled with headache, much dizziness, my appetite was poor and I could not stand the least exertion. I consulted different physicians, but their treatment did not seem to benefit me, and I gradually became so bad that I was unable to attend to my household duties. I then tried several advertised medicines, but without any beneficial results, and I began to despair of getting better. One of my neighbors strongly advised me to try Dr. Williams' Pink Pills, and somewhat reluctantly I consented to do so. After I had taken the second box I began to note a great improvement in the condition, and by the time I had used five boxes I was fully restored to my former good health, much to the surprise of my neighbors and relations. I do not suffer the least now from those headaches and dizzy spells; my appetite is good and I can attend to my household duties with the greatest ease. In fact, I feel like a different woman, and all this I can say is due to the use of Dr. Williams' Pink Pills. All who suffer from a run-down constitution should give these pills a trial."

When the vitality is low; when the blood needs to be replenished, enriched and purified ; when the nerves are weak and require strengthening, there is no other medicine can take the place of Dr. Williams' Pink Pills. It is because of their direct specific action on the blood and nerves that these pills cure such troubles as anaemia, nervous headache, dizziness, palpitation of the heart, rheumatism, sciatica, partial paralysis, St. Vitus' dance, kidney and liver ailments and the functional troubles that make the lives of so many women a source of almost constant misery. Do not take any but the genuine, which have the full name "Dr. Williams' Pink Pills for Pale People," on the wrapper around every box. Sold by all dealers, or sent post paid at 50 cents a box or six boxes for $2.50, by addressing the Dr. Williams Medicine Co., Brockville, Ont.

Some girls have an idea that they are truly literary if they lie on a rug before a fire place while reading a book.

MINARD'S LINIMENT is used by Physicians.

MARKETS.

WHEAT.

Manitoba wheat has been exceedingly quiet. Exporters are doing nothing and buyers are hard to find, while the prices of wheat in the American markets have been stationary over the week, the prices of Manitoba wheat have declined 1¼c per bushel and at the close of business Saturday stood as follows' 1 hard, 74c; 1 northern, 72c; 2 northern, 71¼c, in store, Fort William, spot or delivery, first half of June. For later delivery than first half of June there are absolutely no buyers unless at a sharp reduction on the above quotations.

Liverpool Wheat—No. 1 northern closed on Saturday at 6s ½d.

FLOUR—Hungarian patent $2.15 per sack of 98 pounds; Glenora, $2 ; Alberta, $1.85; Manitoba, $1.70 ; and XXXX, $1.25.

GROUND FEED—Oat chop, per ton, $29; barley chop, $24; mixed barley and oats, $27; oatmeal feed, $15.50; oil cake, $30.

MILLFEED—Bran, in bulk, is now worth $16 per ton, and shorts $19.

OATS—There has been a better demand for oats this week and prices are firm as follows: No. 2 white oats Fort William, 42½c bushel; No. 1. white, in car lots on track, Winnipeg, per bushel, 45c ; No. 2 white, 41 to 42c; feed grades, 38 to 39c ; seed oats, 50. At country points farmers are getting 29c to 31c for No 2 white oats.

BARLEY—Movement is very light. We quote 46 to 48c for seed grades, and 42 to 45c for feed, in carlots, on track, Winnipeg.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

HAY—Receipts are light, and the market is $1 higher at $8 to $9 per ton for fresh baled. Loose hay is not offering to any extent.

POULTRY—The market is not a very active one just at present, owing to light supply. Live chickens readily bring 75c per pair, and turkeys are worth 11c per pound, live weight.

BUTTER—Creamery—Receipts are increasing as pasture is better in the country, and milk more plentiful. Dealers are paying 17c per pound at the factory for choice creamery butter, which is a reduction of 1c per pound from the price of a week ago.

BUTTER—Dairy—Farmers' butter is now coming in quite freely, and the market is better supplied than it has been for a long time. The quality of the butter is good, and dealers are paying 15c per pound for the best, with a range of from 13 to 15c per pound, commission basis. Bricks are not wanted.

CHEESE—New Manitoba cheese is now in the market, and daily becoming more plentiful. Commission houses are paying 11½c per pound for this cheese delivered here, but a lower price may be expected shortly, as stocks are increasing.

EGGS—The market is well supplied with eggs. Pickling is now over, and lower prices may follow. Buyers are still paying 10½c per dozen for fresh case lots delivered here.

POTATOES— Farmers' loads delivered in Winnipeg, 25c per bushel.

DRESSED MEATS—Beef, city dressed, per pound, 8 to 9c; veal, 7½ to 8½c; mutton, 10c; spring lambs, each $3.50 to $4.50; hogs, per pound, 7¾ to 8½c.

TALLOW—Local buyers are paying 5 to 6c per pound for tallow delivered here, according to the grade.

Hides—No. 1 city hides, 6½c No. 5½c, No. 3. 4½. Kips and calf, the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horse-hides, 50c to $1.

WOOL is worth 6½c per pound for Manitoba unwashed fleece.

LIVE STOCK.

CATTLE—The market is pretty bare of cattle and anything good will readily bring 5½c and even 5¾c now. One buyer paid 5¼c for a bunch of inferior cows this week and seemed glad to get them at that. Stockers are going west in considerable numbers. Yearlings are worth as high as $16 per head at point of shipment. Two year olds are bringing $20 to $22 per head.

SHEEP—There is a good demand for sheep and lambs and supplies remain light. Some eastern cold storage mutton is still reported here but for the most part the market is dependent upon fresh arrivals for supply. Sheep are worth from 5c to 5½c per pound, off cars, Winnipeg, and lambs about the same.

HOGS—Live hogs are very scarce and packers have put up the price another ⅛c this week, making the quotation now for best weights, averaging between 150 and 250 pounds, 6½c, off cars, Winnipeg. Heavy and light weights are worth ¼c less.

MILCH COWS— Cows are very scarce, and good milkers readily bring $45 each in this market. As most of the stock offerings are poor, they bring less money, the range being from $35 to $45.

Four miles of trees have been planted on Winnipeg streets this season.

A SLUR

"Canada came in for a share of the horrors that seem to be stalking through the world, when, without warning, the great explosion took place in the coal mines at Fernie, B.C. Death in as sudden and terrible a form as that which overtook the doomed inhabitants of St. Pierre, spread disolation in the homes of the chief mining town of British Columbia. It is not to be wondered at that in the first frenzy of grief the owners of the mine should be blamed for the disaster. It may be that there was negligence somewhere, and if so the fact should be brought out. But to anyone who has passed through Fernie or any other coal-mining town on pay-day, it is not surprising that explosions and accidents do sometimes occur which are past the care and foresight of officials to prevent. Five days before the disaster in the mines, I was in Fernie. It was pay-day, and some eighteen hundred miners working in that district had lined up and received their monthly envolopes. The scene in the streets of the town were such as would suggest that the explosion may just as easily have been due to the carelessness of some beery coal miner as to the negligence of the company."

The Toronto Saturday Night, the supposedly refined paper of a refined city, has printed, in the face of a dire calamity the above low-thought paragraph, inferring that the Fernie mine disaster was due to drunkenness of the miners. Shame to the writer! Is a rollicking miner less a human being than the rollicking smart set of Toronto? They drink, they gamble and moreover are less honest, less simple hearted than the sturdy miner of Fernie. Did the heartless writer see those miners battling to rescue a comrade's body from the dark deadly tunnel? Did he see mothers and wives in piteous grief awaiting their dead at the mine? Did he know children were born, while the dead march sounded from their fathers' graves? Did he see widowed mothers standing in the drenching rain over their sons' gaves? Shame to print an ignorant damaging untruth at such a hideous time.

THE Provincial Progressive Party is entering into the approaching political contest much sooner than either of the old parties. One of the first moves of the executive of the Progressives has been in the direction of the formation of clubs throughout the province. These, it is intended, shall supply the party with the sinews of war, each member obligating himself to pay a dollar or some smaller sum into the campaign fund. When it is understood that the Provincial Progressives is but another name for the labor party of the province it will be readily understood that in the next general election it will have the best organization of any, even if it has not more money than concession-hunting corporations can put up.

AS IT IS IN B. C.

R. T. Lowery, of 'Lowery's Claim' fame, who has a record of having fathered 21 newspapers and wept at the funeral of 17 of them, reflects as follows :

"Running a newspaper is a glorious business. Fight the battles of the down-trodden workingmen and half of them will reward you by blowing a dollar in a saloon in order to read your paper for nothing. Fight the battles of a country in showing up its resources in order that merchants and others can live in it and a few generous souls will stay by your sheet until the sheriff turns the key, while the majority will shove you ice when you ask for an ad, hug the dollar to their selfish souls and imagine that they are awfully clever.

"The liberal advertiser is progressive and creates business, while the nickle fellows sit around whining about hard times and growling because the mail sacks are groaning with the weight of letters carrying money to eastern stores. Like draws like, and business men who do not shout long and loud to the world through a bugle of printers ink might as well cash in and drop into total silence. By hanging on they are only delaying their own funeral."

A. J. Purdy & Co. have made some vast improvements in their confectionery and fruit store. Several very handsomely decorated ice cream parlors have been added and a beautiful new soda fountain installed besides other improvements.

Rev. C. W. Houghton, returned from Nelson on Thursday, where he has been attending a meeting of the Synod. Mr. Houghton will occupy the pulpit of the Cranbrook Church of England next Sunday. Rev. Beachman, of that town, will conduct the service in Fernie.

A large crowd is expected at the Salvation Army Citidal to-morrow night to hear "Belshazzar" or "A Feast to a Thousand Lords." Special singing. Seats all free. To-night's subject, "Salvation for the Millions." Last Sunday's, "A Night of Passion" was a gigantic success.

Mr. H. L. Frank, president of the Canadian-American Coal & Coke Co., Frank, has been looking over the property recently, and in consequence of the satisfactory showing, the force employed will be increased until the present average output of 500 tons per day is increased to 1000 tons. It is expected that 200 coke ovens will be in operation by next fall, and the company is prepared to go ahead with the installation of a waterworks system, which it is estimated can be done at a cost of $10,000.

Toronto, June 13—There is every prospect of a strike of the men employed on the Toronto street railway. The men are insisting upon the recognition of their union, which the management of the Company is unwilling to concede, on the ground that it is an American organization.

PATENTS

PROMPTLY SECURED

Write for our interesting books "Inventor's Help" and "How you are swindled." Send us a rough sketch or model of your invention or improvement and we will tell you free our opinion as to whether it is probably patentable. Rejected applications have often been successfully prosecuted by us. We conduct fully equipped offices in Montreal and Washington; this qualifies us to promptly dispatch work and quickly secure Patents as broad as the invention. Highest references furnished.

Patents procured through Marion & Marion receive special notice without charge in over 100 newspapers distributed throughout the Dominion.

NOTICE

In the County Court of Kootenay Holden at Ft. Steele

Notice is hereby given that on the 23rd day of April, 1902, it was ordered by J. A. Forin, Esquire, Judge of the said Court, that James Ferguson Armstrong, Official Administrator of the County of Kootenay, be administrator of all and singular, the estate of John Johnson, of Elko, B.C., deceased, intestate.

Every person indebted to the said deceased is required to make payment forthwith to the undersigned.

Every person having in possession effects belonging to the deceased is required to forthwith notify the undersigned.

Every creditor or other person having any claim upon or interest in the distribution of the personal estate of the said deceased is required within thirty days of this date to send by registered letter addressed to the undersigned, his name and address and the full particulars of his claim or interest, and a statement of his account and the nature of the security (if any) held by him.

After the expiration of the said thirty days, the Administrator will proceed with the distribution of the estate having regard to those claims only of which he shall have had notice,

Dated at Fort Steele this 21st day of May, 1902.

JAMES FERGUSON ARMSTRONG,
Official Administrator, Fort Steele, B.C.

JURY SAY MINE WAS IN A DANGEROUS CONDITION

The Coroner's inquest upon the death of Steven Morgan, Joseph Sangala and Wm. Robinson, three of the victims of the Coal Creek mine disaster, after an investigation lasting twelve days, came to close on Friday and the jury after being out for seven hours brought in the following verdict:—

"That the said Steven Morgan, Joseph Sangala and Wm. Robinson came to their death "on Thursday, the 22nd day of May, 1902, at or about the hour of seven-thirty o'clock in "the afternoon, in what is known as Nos. two and three mines, situated on Coal Creek, near "the town of Fernie, in the Province of British Columbia, the property of and worked by "the Crow's Nest Pass Coal Co., Limited, that we, the said jury, find the initial cause of the "explosion being at a point in No. 2 mine, aforesaid, not clearly defined, and that said initial "cause extended from the said undefined point throughout the greater portion of Nos. 2 and "3 mines by coal dust being the conveying medium, and we find in consequence that the in-"adequate method of watering and removing the dust left the mine in such a condition as to "be dangerous, and thereby providing a medium whereby the initial cause was augmented "and intensified, that we, the said jury, recommend the Government to take such steps to "enforce:

"1st.—The immediate instalation of the most approved system of watering for allaying "dust in coal mines.

"2nd.—That a more thorough inspection be adopted at these mines, throughout the old "workings and rooms contiguous to the air channel, that are not being worked.

"3rd.—That the safest explosives and most approved safety lamps be used."

The inquest on the bodies of the miners killed in the Fernie explosion was resumed in Princess hall on Monday morning before Mr. Coroner Trites. The various parties interested were represented as before by Mr. W. A. Macdonald, K.C., Mr. S. S. Taylor, K.C., Mr. J. A. Harvey, Mr. Thompson, Mr. W. R. Ross and Mr. W. Blakemore, M.E. Mr. Lindsay, of Toronto, the Coal Company's chief counsel, was present watching the case. There was at all the sittings of the Court a large attendance of miners and citizens who followed every stage of the case with the closest interest.

During the first two days the ordinary witnesses were exhausted, and the enquiry passed into the stage of expert evidence. Up to this point Mr. Taylor and Mr. Blakemore had confined their attention chiefly to bringing out in cross examination all the facts which could be ascertained as to the general condition of the mine shortly before and at the time of the explosion, endeavoring, if possible to locate the starting point. There was practically a general agreement on the part of all the witnesses that parts of the mine, including the hauling and travelling roads were "dry and dusty." Mr. Macdonald tried to show by his witnesses that this was counteracted by considerable areas of wet or damp workings. He was, however, confronted with the fact that no one finally disputed the theory endorsed by the finding of the jury that it was practically a coal dust explosion and that therefore whatever the opinion of the management may have been before the explosion, the damp areas were not effective in preventing its spread. The most damaging admissions on this head were made by the chief mine Superintendent, Mr. T. R. Stockett, when he said that he had never tested the dust to determine its actual character; that he had no previous experience of a "dry and dusty mine"; that he considered a water car with a can to sprinkle the water an adequate system, and that he had not attempted either to remove the dust from the old workings or to water it, because he considered it impracticable. All these admissions admissions resulted from a searching cross examinatiou by Mr. Blakemore, and were clinched by a final admission to Mr. Taylor that the loss of life in this calamity may have resulted from his—Mr. Stockett's—inability to remove or water the dust in the old workings.

All witnesses, including the Government experts, Messrs. Shepherd and Faulds, with Mr. Robertson, the Provincial Mineralogist, and Mr. Dick, the Inspector, agreed that the "safety" lamp in use was inferior, and the blasting-powder the most dangerous of the known explosives to use in a gassy and dusty mine. They also agreed that the watering system was inadequate to cope with the dust throughout the mine.

Mr. Robertson, who had assisted all along in the recovery of the bodies and had worked exceedingly hard, gave a very clear account of the condition of the mine after the explosion, the position in which the bodies were found and the evidences of the general direction of the blast, but declined to propound any theory as to the origin, although he agreed with the other witnesses that it was a coal dust explosion.

Mr. Shepherd, who greatly impressed all who heard him by the scope of his mineral knowledge, and the extreme fairness with which he gave his evidence, declared emphatically that it was "coal dust" explosion, and admitted to Mr. Blakemore that he could not describe it in any other words.

Mr. Dick was examined on his reports extending over two years many of which were of a most damnatory character but as the whole have been printed and circulated by the government, we have commented on them elsewhere.

The management supported by the government experts located the initial part of the explosion at the face of Macdonald's entry and attributed it to a small feeder of gas. The miners committee on the other hand placed it in a cross cut in No. 1 machine room and considered that it was the result of a "hung" shot. The evidence was so evenly balanced that even the jury were unable to decide this point, but as it was finally agreed on all hands that whatever the initial cause or location the main explosion was due to coal dust throughout the mine, it was not material to decide the other matter.

Thos. Graham, overman, gave his evidence in a manner which was manifesly fair and made the very important admission—no doubt a true one—that the whole catastrophe may have been due to ignorance on his part and on that of the management as to the dangerous character of the dust in the mine.

The evidence was completed on Thursday night and the case declared closed by Mr. Harvey, the Crown Counsel. The question of addresses to the court was then discussed and it was agreed that all the leading counsel engaged in the case should be allowed to speak on points of law only as the jury expressed themselves as able to decide on the facts without further assistance.

On Friday morning at 10 precisely Mr. Blakemore began his address and in the course of half an hour reviewed the points of the case affected by mining, common and employers liability statutes. We hope to publish a verbatin report of this address in our next issue as it embodies the main principles affecting the responsibilities and duties of employer and employed. The address was both fair and moderate and at the end Mr. Blakemore disclaimed any intention to appeal for a vedrict, he said that neither he nor those he represented desired more than simple justice. The conclusion of the address was marked by load applause in court which was instantly suppressed by the coroner.

Mr. Taylor followed and gave an exhaustive exposition of the law governing the various legal questions raised in the case citing numerous authorities and clearly defining the exact character and extent of the responsibility of employers. He especially dealt upon what is known as proximate cause showing that it was the presence of large bodies of coal dust left in the mine in a dangerous state that had caused the disaster and that this and not the mere act through which it was made to explode was the legal cause. Mr. Taylor spoke for one hour.

Mr. W. A. Macdonald followed for the company and caused some little amusement by referring to Mr. Blakemore as "my learned friend" when the laughter subsided "Well" said he "he is learned in mining law at any rate." Mr. Macdonald carefully reviewed the arguments of the opposing counsel and cited numerous authorities in favor of his contention that the company were not bound to furnish, as was claimed, the best appliances available and that whilst the inspections and reports of workmen and of the government inspector did not remove their liability, they went far to minimize it.

Mr. J. A. Harvey closed with a few remarks bearing on the interpretation of the Coal Mine Regulation Act, and at 3.45 the Coroner put the case to the jury with some timely directions as to their duty and powers, with the result stated in the verdict. Thus closed one of the most important and longest investigations ever held in the province and one which we venture to think reflects the highest credit on all who took part in it.

DECORATION SERVICE,

The I. O. O. F., Independent Order of Oddfellows, in Fernie, displayed the true fraternal spirit of Oddfellowship on Decoration day, last Sunday. They met as brothers in Joyce hall and went through a preliminary service in honor of the fallen ones. After this they lined up in the street and headed by the Fernie Brass band, which played "Nearer My God to Thee" and other very appropriate selections for the occassion, marched with all due solemnity to the cemetery. On their arrival there they surrounded the graves of their brother oddfellows and went through a most beautiful service revering the memories of their departed brethren. Each Oddfellow carried in his hand an emblem in flower form descriptive of the freshness and fragrance of the memory and life of their brethern now departed. A large concourse of people assembled at the cemetery to witness the decoration service. The band played at the grave "Nearer My God to Thee" and the Oddfellows sang it, after which flowers were deposited on the graves and the three links laid at the head which bespeak the spirit and principal of Oddfellowship and means linked in life and though lost in death they are to memory ever dear. The service throughout was very impressive and will not soon be forgot by those who witnessed it. The following graves were decorated:—J. McLeod, Ont.; J. Steward, Malcolm McLeod, J. Salters, A Munro, C. Barney, N. S.; A Patterson, Scotland.

DANGEROUS EXPLOSIVES.

On Monday Mr. Hawthornthwaite ask the following questions of the Hon. the Minister of Mines:

1. As it is now well known that gunpowder, and to a less extent, dynamite are dangerous explosives in coal mines owing to the amount of flames and gas developed on firing, is it the intention of the government to take steps to make compulsory the use of flameless explosive?

2. As a number of "blow-out" shots are known to occur through improper "tamping" and cleaning, is it the intention of the government to instruct inspectors to draw the attention of shot lighters and fire bosses to this matter, and see that proper clay or other suitable and soft "tamping is provided, and that holes are properly cleaned before loading?

3. Has any system of testing safety lamps been adopted by the different coal companies, and, if not, is it the intention of the government to see that some system is adopted at earliest moment, and also a systematic and safe method of locking safety lamps?

NEW EXPLOSIVE INVENTED.

Masurite is the name of a new explosive which is now receiving considerable attention in the technical mining press. The new explosive has been subjected to very severe tests which have shown that it is insensible to shock, concussion, heat or cold, so far as its liability to explode by any of these means is concerned, and that it can be exploded only in the proper manner by means of a double strength exploder. Concerning the tests made with the new explosive a reviewer states:

"One of these tests consisted in striking a quantity of the explosive with a hammer and a 16-pound sledge, both on stone and an anvil, and in allowing a 50-pounp weight to fall 25 feet upon a musurite cartridge—all without other effect than breaking up the cartridge and scattering the explosive. Masurite in cans was shot through with steel-jacketed and mushroom bullets, and even heated by burning coal and then shot through without exploding. Red-hot irons were run through the powder buth loose and in cartridge form, the result being simply to fuse and burn it while in direct contract with the heated surface, the powder coming out upon the removal of the iron. A bundle of parlor matches was ignited in masurite, and merely blackened it. Electric sparks were made to play in contact with the material, and no explosion resulted. For friction tests masurite was rubbed to dust between sand-paper and emory cloth. In a series of detonation tests it was found that masurite cartridge on exploding woul l explode another one placed in contact with it, but when it was twelve inches distant the unprimed cartridge was simply torn and the contents scattered. With 40 per cent. dynamite cartridge exploded at a distance of twelve inches from a masurite cartridge, the latter did not go off, but with reversed conditions an unprimed dynamite cartridge readily exploded To show the masurite does not freeze at low temperature, a cartridge of masurite was placed in a freezing mixture at six degrees below the Fahrenheit zero for three hours. When taken out, it was found to be entirely loose, and was immediately exploded with great violence by means of an electric fuse. To show the relative force of masurite for rock work, a large boulder, in which were placed twelve cartridge in two bore-holes, was blown to pieces. The masurite used in all these tests had a strength equal to 40 per cent dynamite, and this can be increased or decreased, in making the explosion. A notable feature of masurite is the flameless character of its explosion. This was particularly evident when dynamite and masurite were exploded together, the former giving off a vivid flare of light."

In this absence of flame, it is claimed, lies the great value of masurite for coal mine work, as it will not ignite coal gas or dust in the neighborhood of a blast.

COMMUNICATIONS.

To the Editor.

In the Fernie Free Press issue of the 7th inst., appeared under the title "Slav Labor" a short article including the following sentence which seemed in some way the chief thought of the author: "We think the experience of the last few weeks justifies us in saying that Fernie mines cannot be safely worked except by men of our own race and language," the sequel being an indirect counsel to the company inviting them to replace by Canadian and American miners, the foreignors actually working as coal diggers in its collieries. The coal mining being always a dangerous work, the men employed inside should be carefully selected and specially examined in order to ascertain that the knowledge of the English language enabled them to understand thoroughly all the orders or explanations likely to be given by the foreman. In this respect our belief is that the Coal Mines Regulations Act, if strictly enforced would be perfectly sufficient, provided that nothing could induce the company's officials to transgress it. To maintain that Fernie mines can be worked only by Anglo-Saxon miners, is nonsense being evidently the result of a superficial examination of the matter. The Slavs digging coal as well as Englishmen must be provided with certificates of competency. Let the company's officials be strict in this respect as well as in what regards all the other prescriptions of the Act and everybody will find it just and good. The foreignors spoken of in the aforesaid article belong nearly all to the Western Federation of Miners and by the fact are bound to work exactly under the same conditions as Englishmen. their employment cannot therefore be considered as more economical to the company. The Pennsylvania mines employ a great number of Slavs, and many first-class miners are to be found among them. On the other hand it is rather early to risk such opinions as that; for the coroner's inquest just started, may yet reveal the fact that a terrible mistake or neglect, committed by some of the company's officials, was the immediate cause of the disaster; and then will the introduction of foreign workers be responsible for anything. No, it is not the moment, when broad minded statesmen are doing their best to implant in Canada a numerous population, coming from all parts of the world that people should try to raise prejudices of anykind against the races to which belong those men destined to become in the near future good and useful British subjects.

P. VAN HULLE

Fernie, June 9th, 1902.

BEFORE THE PEOPLE.

Where the First Visits of the Prince and His Bride Were Made.

As Duke of Cornwall, the Prince was welcomed very warmly when he and his wife spent a few days in the Duchy in the summer of 1865. They visited Land's End, and the memory of the event is recalled by the inhabitants of that remote strip of country to this day. The Royal couple also descended a tin mine near St. Just—indeed, the mine was partly owned by the Prince, who had not hitherto had the strange experience of inspecting the underground methods of mining. The Cornishmen were charmed with the Princess, and were prouder than ever to reckon her their Duchess. She was as blithe as a girl on her holiday, and never seemed tired of sightseeing in a part of the kingdom which reminded her of her old home, with its blue

HOW A PEERESS WILL CARRY HER CORONET.

waves and rugged hills. In after years she revisited Cornwall, and several times has referred to her delight in its scenery. Another event about this time must be chronicled—the reappearance in public of Queen Victoria, who consented to open Parliament in person, accompanied by the Prince and Princess of Wales and other members of her family. The Princess occupied for the first time the special seat prepared for her on the Woolsack in the House of Lords, and showed great interest in the ceremony. A few Peers who are alive to-day still recall the charming spectacle of the daughter-in-law of Queen Victoria sitting with her face bright with smiles while the formalities were duly performed. The Princess' appearance in the rather dreary chamber always seemed to bring with it a ray of sunlight. She was often present in the Peeresses' Gallery during great debates, and used to look absorbed in the business transacted—a very different attitude of mind to that displayed by many of the peeresses who are more concerned to display their becoming costumes.

The Prince and Princess were the guests of the Duke of Sutherland at Dunrobin, and enjoyed the characteristic lavish Highland hospitality shown to them. Soon afterwards they welcomed Queen Louise of Denmark and two of her children at Sandringham. She remained at Sandringham with her daughter while the Prince paid a visit to Russia, so as to be present at the wedding of Princess Dagmar of Denmark to the Czarevitch (afterwards the Czar Alexander III.). It was a very brilliant function, and the curious ceremonies of the Greek Church interested considerably the Prince of Wales. He has always been a capital wedding guest, for his good-nature and appreciation of humour have frequently relieved an occasion which is not without its tinge of sorrow for the parents of the bride and bridegroom. In July of this year the Prince was also present at the wedding of his siter Helena to Prince Christian in the private chapel at Windsor Castle.

The Madness of Fashion.

On February 20th, 1867, a daughter came to the Princess of Wales at Marlborough House, and her advent was very welcome as a sister to the boys who were beginning to run about. The names bestowed upon the child were Louise Victoria Alexandra Dagmar. The Princess had not been well, suffering from inflammation of the knee-cap, and she was some months in recovering from this painful complaint. When at last she made her rentree into public life in the following July it was noticed that the Princess limped slightly. At once the ladies who follow Royalty's ways with the flattery of imitation began to adopt a limp in walking. Such folly received a rebuke from one of the great preachers of the day, who said it was surely the height of absurdity to imitate so snobbishly a temporary mark of weakness on the part of the Princess. It may also be mentioned here that the inability of the Prince to sound very distinctly the letter R was another failing which Society thought it would be courteous to imitate! In May of this year (1867) the Prince read an address on behalf of his mother at the laying of the foundation-stone of the Royal Albert Hall. The next month he took part in the entertainment of the Sultan of Turkey.

A Visit to Ireland.

In the summer of 1868 the Prince and Princess paid a State visit to the Irish capital, and notwithstanding murmurs on the part of dissatisfied revolutionaries it proved a great success. Both the Royal couple were indefatigable in pleasing the Irish people, and their attendance at reviews, balls, dinners, the races and the agricultural show did much to add to their popularity. Each day a long account of what had transpired was telegraphed to Queen Victoria, who followed all the details of the visit with interest, not unmixed with anxiety. It had been the Queen's wish to have undertaken such a series of functions, but it had been overruled by her advisers owing to the disturbed state of the country. Everybody who saw the Prince and Princess in public—and vast crowds, unrestricted by any military, had the opportunity of seeing them during the week—was won by their gracious zeal to please and gratify their hosts. It was probably one of the busiest weeks in the life of the couple up to this time, but it was well spent, and increased the desire in many people's minds that some members of the Royal Family should permanently make his home in Ireland. The fine statue of Edmund Burke, which was unveiled by the Prince, is one of the permanent memorials of the visit. On their return the Prince and Princess called at Holyhead, and had a brief stay at Carnarvon, where the first Prince of Wales was born. They had not hitherto seen Welsh people in their native land, and the quaint headdress of the peasant women amused the Princess.

On July 6th a second daughter was born at Marlborough House, and was christened Victoria Alexandra Olga Marie. She has never been quite as strong as others of the Queen's family, and during the last few years Princess Victoria has hardly ever taken any part in public work. Most of the summer was spent at Sandringham and the Princess and her children were often to be seen driving along the quiet country lanes in a Norfolk car. Prince Albert Victor was now in his fifth year, and his brother was fast eclipsing him in sturdiness.

A TOUR ON THE CONTINENT.

Saw Karnak in Egypt and Opened Suez Canal Sluices.

In November, 1868, the Prince and Princess went for a pleasant tour to various Courts on the Continent, as it was thought a change would benefit the Princess' health. At Compiegne they were entertained by the Emperor and Empress Eugenie, who had had the Prince when a boy as a guest. In Denmark there was the customary group of relatives awaiting them, and a pleasant time was spent. In Berlin and Vienna they were also entertained, and soon afterwards they boarded the man-of-war, the Ariadne, and put to sea. First of all they went to Alexandria, then to Cairo, finally, up the Nile in a fine barge. They saw Karnak and its marvellous ruins, and were received by M. de Leesseps at Tussum, in order that the Prince might open the sluices of a great dam across the Suez Canal, which was then in process of construction. From Egypt they journeyed to Constantinople, and were royally entertained by the Sultan in the Salih Bazaar Palace, which is not very far from Yildiz. Leaving the Bosphorus on the journey homewards they called at Athens and enjoyed an unconventional visit to the Princess' favorite brother, King George of Greece. By the middle of May the holiday came to an end, and the Prince and Princess found themselves once more immersed in home affairs.

On November 26th, 1869, another daughter was born at Marlborough House. She was christened there on December 24th, receiving the names Maud Charlotte Mary Victoria. She was from the earliest days of her life the merriest of the children, and added a great deal of happiness to the home. As she grew up she retained her frankness and her sense of humour, and on several occasions Princess Maud astonished those who had been trained to suppress their feelings by her merriment and her dislike of Court etiquette. She was much attached, as were her sisters also, to the German lady who was their governess; and when the governess married Mr. Johnson, once the Liberal candidate for Exeter, the daughters of the Princess of Wales frequently visited her in her Devonshire home.

The Franco-Prussian War.

On the Continent there were ominous signs of a coming struggle between

CORONET OF A VISCOUNT.

A BARON'S CORONET.

Germany and France. It finally burst out in the terrible war which crippled the resources of the French nation for many years afterwards and left an embittered feeling, which survives to this day. There was great anxiety in England because of the close friendship which existed between the ruling families of both France and Prussia. Queen Victoria had her eldest child married to the Crown Prince, who was destined to play an important part in the coming conflict. She had another daughter married to a German Prince, who likwise was linked with the war. The Emperor and Empress of the French had been her friends for many years. It was therefore with intense, though mingled, feelings that the British Royal Family witnessed the commencement of a war which threatened to be long and severe. It was a sad time for the whole of Europe, and general relief was felt when the embers of war began to die and the formal treaty of peace was signed at Frankfort, May 10th, 1871. In the previous month the Princess had given birth to a son, who unhappily only survived for a day. The child was named Alexander John Charles Albert, and was buried at Sandringham on April 2nd. This was the first sorrow in the life of the young Royal couple, and the sadness and disappointment of the nation were poignant. A little grave in the churchyard marks the infant's resting-place.

IN INDIA.

Reasons Why This Visit Was Considered of Vast Importance.

It had been the hope of the Prince Consort that his eldest son should go to India in order that he might make himself acquainted with some of the conditions under which so many millions of his future subjects lived. It was not given to the Prince Consort to see the wish realised in his lifetime, but three of his sons eventually made tours in India, to the manifest satisfaction of the Indian population and to their own great advantage. Queen Victoria had the wisdom to urge on the Prince of Wales the advisability of undertaking such a visit in 1875, when his health was restored to its customary state, and when, for reasons of State, the opportunity seemed an excellent one. The Viceroy of India at the time was that sensible statesman, Lord Northbrook, who had been in office for three years, and the Secretary for India at home was the Marquis of Salisbury. Mr. Disraeli, who was Prime Minister, was convinced of the utility of such a tour made by the Heir-Apparent, and already is was in his mind to urge the assumption by the Queen of the new title of Empress of India. More attention than usual was given to the matter in Parliament, and the expenditure which it was anticipated would be required, was discussed by such economists as Mr. Henry Fawcett with a fierceness which to-day seems absurd. But it must be remembered that India was in a very poor condition to bear an additional burden of taxation, and at home our finances were none too flourishing. However, ultimately all the preliminary difficulties as to the exact status of the Prince, the route which he was to follow, the order of his going, were settled, and his suite chosen. For the full story of the tour, which was a complete success, we refer our readers to the interesting volumes written by Sir William Howard Russell, who had made his fame as special correspondent of the Times during the Crimean war and was deputed to be the chronicler of the Prince's travels.

Incidents of the Tour.

The Prince left England on October 11th, 1875, and returned on May 11th, 1876, so that his tour lasted exactly

THE KO-HI-NOOR.

TO BE WORN BY QUEEN ALEXANDRA.

seven months. During that time he enjoyed very good health, and went through the arduous programme of work with undiminished vigor. In Bombay, soon after his arrival, he celebrated his birthday, and was the recipient of a large number of congratulations from his relatives in England. At Poona he enjoyed some good sport; in Ceylon he visited the tea gardens; in Benares he saw the celebrated temples; at Lucknow he stood before the touching memorial of native gallantry; and at Agra he was amazed and delighted with the lovely Taj. It was a splendid holiday as well as a valuable education for the Prince, and he has never forgotten his experiences in India. The gifts which were lavishly bestowed upon him, and the animals which he brought home, were inspected by tens of thousands of people after his return. Most of the animals found a permanent home in the Zoological Gardens, and often the Prince would go and see them there. Others of the animals were taken to Sandringham, and have given pleasure to the Prince's guests.

A great reception awaited the Prince when he came home. In the evening of the day when he reached London he and the Princess appeared in the Royal box at the Opera, and the music was delayed by the enthusiastic welcome accorded them. The Corporation of London gave a ball in their honor, and it was preceded by the presentation of a gold casket containing an address from the citizens of London, expressing their satisfaction at the way in which the Prince's tour had linked the loyalty of Indian races to the British Throne. There is not the slightest reason to doubt the lasting value of the Prince's visit to India. He made the acquaintance of more Rajahs than any Viceroy had ever met, and he was aways most careful to respect the susceptibilities of all the rulers of the provinces to whom he was introduced in a country where caste is paramount this involved considerable tact, and it says much for the skill and knowledge of advisers like Sir Bartle Frere that any serious faux pas was avoided. On the voyage homewards the Prince called at Egypt for five days, and also spent a short time in Spain, where he was the guest of the King. Ten days before the Prince landed, his mother had been proclaimed Empress of India, a fitting conclusion to a great tour. Later in the year he was installed Grand Master of the Free Masons in England. The year closed with much public excitement caused by the Bulgarian atrdcities. A terrible sad event followed, for on the seventeenth anniversary of the Prince Consort's death the Princess Alice, the favorite sister of the Prince of Wales, died at Darmstadt, having caught diphtheria from nursing her children, who were suffering from it. The Prince of Wales, who could never forget the devotion with which the Princess had watched over him while lying ill at Sandringham, was overwhelmed with this sorrow. He was at the funeral, which took place at Rosenhohe. Within three months a son of his sister, the Crown Princess of Prussia, died of diphtheria—a disease which has been specially fatal to our Royal Family.

On March 13, 1879, the Duke of Connaught was married at Windsor to a daughter of the "Red Prince," Prince Frederick Charles of Prussia. It was not a brilliant function, owing to the recent bereavements which had befallen both branches of the alliance; but Prince Arthur, as people still called the bridegroom, was congratulated heartily on his wife by all who made her acquaintance. The Duchess of Connaught is of a retiring disposition, and, consequently she is less known to the British public than almost any Princess; but Aldershot, Dublin and other places where her husband has been stationed on military duty, she has won the admiration and affection of those who had an opportunity of studying her character. The Duke has so genial a disposition that no one could help liking him.

The sad death of the young Prince Imperial in Zululand occurred on June 1st, and the news was a great shock to the Prince and Princess of Wales, who had known the poor fellow for many years, and who had bidden him farewell two or three months before, when he had gone as a guest of the British forces to see the warfare in Zululand. They were swift to show their sympathy with the now doubly stricken Empress Eugenie, and the Prince acted as one of the pallbearers at the funeral—an act which recommended itself most warmly to the French nation. Not less did the sympathetic act appeal to his own people. It is a matter over which they cannot, and would not if they could, make any demonstration, but they love the King for his kind-heartedness.

BRITISH COMBINE.

London Newspapers Discuss the Project as if it Were an Assured Fact.

The newspapers of London continue to discuss the British shipping combine as though the project had assumed quite tangible shape. The Westminster Gazette intimates that the Cunard line will not join in forming the proposed Canadian-British lines and says the colonial secretary, Mr. Chamberlain, favors subsidizing the latter project rather than the Cunard line plan, which is more specially directed against the Morgan shipping combine. The Westminster Gazette says the capital of the Canadian-British will be £10,000,000 ($50,000,000), of which £8,500,000 ($42,500,000) will be expended on six 25-knot vessels and a dozen freight steamers. Including £200,000 ($1,000,000) subsidy from Canada, the promoters, it is added, anticipate a total subsidy of £500,000 ($2,500,000) besides an imperial guarantee of interest on the capital, amounting to £300,000 ($1,500,000) yearly. The Westminster Gazette further asserts that the negotiations for a guarantee of the interest on the capital are so far advanced that the only point at issue is whether it shall be 2½ per cent. or three per cent.

WHEAT FOR NEW ZEALAND.

Five Thousand Bushels Being Bagged at Carnegie on G.N.W.C. Line.

Wheat is already being loaded at Wheatland and Carnegie. W. J. Lindsay, of Brandon, is bagging 5,000 bushels at the latter point for shipment to New Zealand.

CANADA'S GAIN.

Quibbling of American Politicians Good for Canadian Cattle Trade.

Toronto has recently assumed an unusual importance as a horse market. The indications are that this locality will become the depot for the shipment of a large number of horses, mules and cattle to South Africa. Over 1,000 horses have been received during the past two weeks, consigned to army officers. These animals came from the Canadian Northwest and are being shipped to South Africa via Montreal as rapidly as the transport service can be provided. 500 head were sent to Montreal last week, and will leave this week for their ultimate destinations. Army officials are determined to make Canada the headquarters for the shipment of stock to South Africa as a result of the quibbling of American politicians over the question of international law involved in the purchase of army remounts in the western States.

A WHITE DEER.

A rarity in the animal kingdom was brought to the city yesterday says the Ottawa Citizen. It had been shot and killed near Eganville, and was afterwards stuffed. The deer was sold to the British-Canadian Fur company, of Montreal. It will be probably be used for display purposes. The deer, which is about a year old, is about the size of a young heifer. It's spotless coat makes it an object of rare beauty. The deer is one of the very few of its kind seen or secured in this part of Canada.

CORONATION WEEK PROGRAMME

How the Season of Festivity Will Be Spent in London.

The programme for Coronation week in London is as follows:

Monday, June 23:—Arrival in London of the royal representatives; dinner at Buckingham Palace and reception of the suites.

Tuesday, June 24.—Their majesties will receive the special foreign envoys and deputations to the coronation and give a state dinner at Buckingham Palace.

Wednesday, June 25—Reception of the colonial premiers and other envoys; the Prince of Wales will give a dinner party at St. James Palace to the princes and envoys.

Thursday, June 26—The coronation.

Friday, June 27.—The procession through London, which will be a military pageant some two miles long, representing every portion of the British dominion. In the evening their majesties will attend a reception at Lansdowne House.

Saturday, June 28.—The royal party will leave London for the naval review.

Sunday, June 29.—Dinners to the foreign princes by their respective ambassadors.

Monday, June 30.—Their majesties return to London; gala performance of opera.

Tuesday, July 1.—Garden party at Windsor castle.

Wednesday, July 2.—Departure of the foreign princes and envoys; their majesties dine at Londonderry House.

Thursday, July 3.—Their majesties attend the service at St. Paul's and lunch at the Guildhall.

Friday, July 4.—Their majesties attend the reception of Indian princes at the Indian office.

Saturday, July 5.—King Edward's dinner to the poor.

CONDENSED NEWS.

The Bey of Tunis is dead.

Thomas A. Edison, the inventor, will spend the summer London.

Lord Strathcona has given $20,000 to the superannuation fund of the Presbyterian general assembly.

Sir Wilfrid and Lady Laurier left Ottawa on Thursday for London to attend the coronation ceremonies.

R. Hill Myers, M.P.P., Minnedosa, was elected grand master of the Masons of Manitoba and the Northwest at the Grand lodge session at Calgary.

The Hamilton Methodist conference has endorsed a memorial that women be given the right to act as delegates to conference.

Major Richard Costigan has been promoted to the rank of lieutenant-colonel by the minister of militia for his services in South Africa.

The British Columbia legislature has passed a resolution calling upon the Dominion government to prevent the wholesale slaughter of seals by United States sealers.

A. McNeill, chief fruit inspector for the Dominion, in a report, says that the prospects for apples, grapes, plums, etc., are very bright in Ontario.

The Society for the Prevention of Cruelty to Women and Children of Montreal, is investigating charges that Syrian girls are being brought into Canada for immoral purposes.

Dominion land entries in the west during May were double those of May, 1901.

A fast mail telescoped a work train in Tennessee, killing three of the train hands.

During the past eleven months Canada's domestic trade increased $35,000,000 over the previous period.

Four of the crew of a steamer were drowned during a cyclone on the Mississippi, north of Dubuque, Ia.

The British Columbia legislature has extended the franchise to young men of eighteen years. The proposal to enfranchise women was defeated by 15 votes to 12.

One evening recently as a train of flat cars was backing along a siding near Slocan City, B.C., Brakeman Peele, of Nelson, noticed a little girl sitting on the track. It was impossible to stop the quickly moving train in time to prevent killing her, so he ran along the cars, picking up a stick, and at the end of the train he threw himself down and caught the child under the knees and sent her somersaulting down the bank, thus saving her from a terribledeath by presence of mind and a simple plan when a moment's hesitation would have been fatal.

LIGHTNING'S FREAKS.

Nelson Wood, the ten-year-old son of George Wood, blacksmith, Wallaceburg, Ont., was killed by lightning. Wood was working in his shop at the time, and his son and another boy were near the vice-bench, over which hangs an electric light. The lightning apparently followed the wires in, burnt out the lamp and struck the boy down instantly. The other boy, who was on the other side of the vice, was uninjured.

FERNIE, B.C.

Purity of Language.

The question of "purity of language" is a difficult one to discuss, for without doubt, the colloquial usage of a language differs radically from the written and literary expression of a people. No one who "talks like a book" can be said to "speak" good English; there is a picturesque carelessness of expression, a license in the use of adjectives, which marks the successful conversationalist. There are certainly words and phrases which are daily being born amid unique surroundings, which add strength and virility to the spoken language, which, when they become rooted in our literature, destroy its purity and style, simply because they are the outcome of conditions which are transitory, and occupy no fixed place in the development of our people. Words even as ornamentation, when they cease to express a certain fact, become superfluous and distort the language. What is meant by purity of language is lucidity, delicacy of perception, an intuitive feeling for words. One can cultivate this by calling the attention of children to the aptness of expression, just as you may cultivate their musical ear to appreciate the subtle shading of expression in the works of the great masters, or debase their musical taste by the twang of musical hall productions.—Lally Bernard, in The Globe.

A Poker Call.

He—Made an expensive call yesterday.

She—Who did you call on?

He—Three queens and dropped fifty plunks.

There are so many cough medicines in the market that it is sometimes difficult to tell which to buy; but if we had a cough, a cold or any affliction of the throat or lungs, we would try Bickle's Anti-Consumptive Syrup. Those who have used it think it is far ahead of all other proparations recommended for such complaints. The little folks like it as it is as pleasant as syrup.

Some men seek justice and some have it forced upon them.

WIRE WOUNDS.

My mare, a very valuable one, was badly cut and bruised by being caught io a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better, until, after three weeks, the sores have healed, and best of all the hair is growing well, and is not white, as is most always the case in horse wounds.

F. M. DOUCET.

Weymouth.

When the day breaks some men are too lazy to make use of the pieces.

Chronic derangements of the stomach, liver, and blood are speedily removed by the active principle of the ingredients entering into the composition of Parmelee's Vegetable Pills. These pills act specifically on the deranged organs, stimulating to action the dormant energies of the system, thereby removing disease and renewing life and vitality to the afflicted. In this lies the great secret of the popularity of Parmelee's Vegetable Pills.

If a spinster isn't as tall as she would like to be she should get spliced.

Lifebuoy Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases. 22

It is a deplorable fact that a girl can never get her first kiss but once.

How's This?

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price 75c per bottle. Sold by all druggists. Testimonials free.

Hall's Family Pills are the best.

It took Harvey 26 years to perfect his work of the discovery of the circulation of the blood.

There never was, and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

TWO LETTERS

THEY PROVE THE PERMANENCY OF CURES BY DODD'S KIDNEY PILLS.

Over Six Years Have Gone By and This Cure Still Stands—Only One of Many Such Cases.

St. Mary.s Ferry, N. B., June 14.—(Special)—Mr. Thomas Harrison of this place has addressed two significant letters to the Dodd's Medicine Co., Toronto

THE FIRST ONE.

St. Mary's Ferry, Dec. 18, 1895.

Gentlemen:

I feel it my duty to you and to the public at large to tell what Dodd's Kidney Pills have done for me.

About one year ago I began to suffer with severe pains over the region of my kidneys, followed by a very lethargic feeling.

When I lay down, it was torture to get up again.

This state continued for sometime, and all the while I was still getting weaker and losing flesh rapidly.

My appetite was very much impaired, and at last I was obliged to call in a physician.

He gave my sufferings a very learned name, and doctored me for some time, but I got no better.

I called in several other physicians, but it was of no use; my sufferings got worse all the time until I began to despair of life.

A friend advised me to use Dodd's Kidney Pills. I was very skeptical, but was prevailed upon to commence a treatment; the first box made me feel some better.

I passed a stone that had formed in the bladder.

I continued the use of Dodd's Kidney Pills until I had used three boxes, and now believe that I have a radical and complete cure, as it is six months since I used any of the Pills, and have had no symptoms or return of the malady.

I know that my cure is due to Dodd's Kidney Pills, as I used no other medicine after commencing their use.

Yours truly,
THOMAS HARRISON.

THE SECOND ONE.

St. Mary's Ferry, N. B.,
March 24, 1902.

Gentlemen:

What I said in 1895 I can at this moment most emphatically substantiate.

I have never had the slightest symptom of a return of my old trouble.

Yours truly,
THOMAS HARRISON.

Many a man with a good scheme lacks the required nerve to push it through.

Cast-iron ploughs were introduced about 120 years ago, and much objected to on the ground that they poisoned the land.

MARKETS.

WHEAT.

The Manitoba wheat trade is no better this week than we reported last week. Exporters are still doing next to nothing, and buyers are scarce. The American markets are stronger, the prices for Manitoba wheat having remained stationary, and at the end of this week we quote values, 1 hard 74½c, 1 northern 72c, and 2 northern 70¾c, in store, Fort William or Port Arthur elevators, spot or June delivery. Later delivery than June is not wanted as yet, but first half July might be sold at ¼c under June.

Liverpool Wheat—No. 1 northern closed on Saturday at 6s ½d.

FLOUR—Hungarian patent $2.15 per sack of 98 pounds; Glenora, $2; Alberta, $1.85; Manitoba, $1.70; and XXXX, $1.25.

GROUND FEED—Oat chop, per ton, $29; barley chop, $24; mixed barley and oats, $27; oatmeal feed, $15.50; oil cake, $30.

MILLFEED—Bran, in bulk, is now worth $16 per ton, and shorts $19.

OATS—The market for oats is quiet owing largely to light offerings. Demand is good in this market. Fort William prices are lower but the local market is not changed. We quote: No. 2 white oats, Fort William, 41c bus.; No 1 white, in car lots on track, Winnipeg, per bushel, 45c; No. 2 white, 41 to 42c; feed grades, 38 to 39c; seed oats, 50c. At country points farmers are getting 29c to 31c for No. 2 white oats. No 2 white oats.

BARLEY—Movement is very light. We quote 46 to 48c for seed grades, and 42 to 45c for feed, in carlots, on track, Winnipeg.

FLAXSEED—Dealers are asking $2.00 per bushel for seed flax.

HAY—Receipts are light, and the market is $1 higher at $8 to $9 per ton for fresh baled. Loose hay is not offering to any extent.

POULTRY—The market is quiet. Live chickens bring 70 to 75c $per pair, and turkeys are worth 11c per pound, live weight.

BUTTER—Creamery—Receipts continue to increase, but as there is a fairly good shipping demand prices hold steady at 17c per pound factory points.

BUTTER—Dairy—This kind of butter is now more plentiful and as there are no old stocks on hand the market is in a healthy condition. Prices have declined again this week, and we quote round lots now 11c per pound commission basis, for tubs, and 13c for prints. Prints are not wanted to any extent as they will not keep in hot weather.

CHEESE—Commission houses are paying 11½c per pound for new Manitoba cheese delivered here.

EGGS—The market is well supplied with eggs. Pickling is now over, and lower prices may follow. Buyers are still paying 10½c per dozen for fresh case lots delivered here.

POTATOES—Farmers' loads delivered in Winnipeg, 25c per bushel.

DRESSED MEATS—Beef, city dressed, per pound, 8 to 9c; veal, 7½ to 8½c; mutton, 10c; spring lambs, each $3.50 to $4.50; hogs, per pound, 7¾ to 8½c.

TALLOW—Local buyers are paying 5 to 6c per pound for tallow delivered here, according to the grade.

Hides—No. 1 city hides, 6½c No. 5½c, No. 3. 4½. Kips and calf, the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horse-hides, 50c to $1.

WOOL is worth 6½c per pound for Manitoba unwashed fleece.

SENECA ROOT—The market has not opened yet and there is nothing new to say. Drier weather would facilitate digging. Minneapolis dealers are quoting 37 to 39c delivered there. Winnipeg dealers have not named a price yet.

LIVE STOCK.

CATTLE—The market is bare of cattle and anything good will bring 5¼c. The range is from 5 to 5½c off cars here. Yearling stockers are worth as high as $16 per head at point of shipment. Two year olds $20 to $22 per head.

SHEEP—Sheep are worth from 5c to 5¼c per pound, off cars, Winnipeg, and lambs about the same.

HOGS—Live hogs are worth now for best weights, averaging between 150 and 250 pounds, 6¼c, off cars, Winnipeg. Heavy and light weights, 1c less.

MILCH COWS—Cows are scarce, and good milkers readily bring $45 in this market, the range being from $35 to $45 each.

HORSES—There is a good demand for horses and dealers find no difficulty in disposing of all they can secure. The market is being largely supplied from Ontario. Prices are high.

Four miles of trees have been planted on Winnipeg streets this season.

On Sunday afternoon Donald Eddy, a boy 13 years of age, fell from a train of moving cars at Winnipeg and had one of his legs crushed off.

Page Woven Wire Fence

Owing to the variations of the Canadian climate, considerable allowance must be made in all fences for contraction and expansion, which makes an ordinary wire fence unserviceable, as when it expands it becomes so loose as to prove of little value. Note the continuous coil in this wire, this makes it elastic and self-regulating. The Page Wire Fence is made of "Page" wire, which is twice as strong as ordinary wire. Prices are particularly low this season. 50,000 miles of Page fences now in use. We also make Gates, Ornamental Fences and Poultry Netting. The Page Wire Fence Co., Limited, Walkerville, Ont. 2

HEALTH FOR LITTLE ONES.

Baby's Own Tablets Make Children Well and Keep Them Well.

If your children are subject to colic, indigestion or any stomach trouble; if they are troubled with constipation, diarrhoea, or any of the ills that afflict little ones, give them Baby's Own Tablets. This medicine will give relief right away, making sound, refreshing sleep possible. It will put children on the highroad to health at once. It is doing this today for thousands of children in all parts of the country. Mrs. R. L. McFarlane, Bristol, Que., says: "I take pleasure in testifying to the merits of Baby's Own Tablets. I have used them for my baby since she was three months old, and previous to using them she was a delicate child. She is now quite the reverse, as she is plump, healthy and strong. I think Baby's Own Tablets the best medicine in the world for little ones." These Tablets are good for children of all ages and dissolved in water or crushed to a powder they can be given with absolute safety to the youngest, weakest baby. Guaranteed to contain no opiate or harmful drugs. Sold by all dealers at 25c a box, or sent post paid by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or Schnectady, N.Y.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, JUNE 21, 1902.

THE VERDICT

The verdict of the Jury on the Fernie explosion which was rendered last night after twelve days' investigation, and seven hours' deliberation, is one upon which all parties are to be congratulated; the jurors for the courage displayed in so emphatically expressing both their finding and their recommendations. There were considerations — and unprincipled persons did not fail to circulate them freely during the later stages of the enquiry—which might have influenced them to modify their statement. The result shows that they had the courage of their convictions, and honorably discharged the very responsible duty devolving upon them. They are entitled to the thanks of the community, and will receive the applause of all just men for the course pursued.

Scarcely less admirable was the conduct of the Coroner throughout the protracted investigation. It may fairly be said that he rose to the occasion. Presiding over the most important and longest inquest ever held in the Province, he kept the Court well in hand, said little, but ruled wisely whenever appealed to, and maintained a broad-minded policy which excluded no pertinent evidence, and yet which never degenerated into laxity. The recommendations which the jury were enabled to incorporate in their verdict are a sufficient testimony to the thoroughness of the enquiry.

The miners, and those who worked so hard for them, must feel that justice has been done, and that whilst nothing could recall or compensate for the missing ones the verdict ensures safer conditions for the future working of all the "dry and dusty" mines in the Province, and that is the most valuable result which could have followed the enquiry.

We venture, however, to think that the Coal Company should derive the greatest satisfaction from the result. That it is a compromise verdict is evident. On the evidence, censure might undoubtedly have been expected. The jury have seen fit to convey it rather by imputation than by direct impeachment, but no one who heard the positive evidence given by the experts engaged in the case with reference to the class of safety lamps in use, the blasting powder, and the method of sprinkling dust, together with the admissions of the Company's officers, can doubt that the recommendations of the jury were fully warranted. The Company's Counsel, Mr. Lindsay, stated during the week that if there were anything wrong in their mines they had the greatest interest in knowing it. With this we entirely agree, and for that reason the jury have laid the Company under an obligation by embodying in their verdict recommendations which are the result of twelve days' most careful enquiry, and which undoubtedly represent the conclusions of the expert testimony.

With a very modern and safe lamp the exclusion of blasting or the use of a safety powder, and an up-to-date system of removing and watering the dust in their mines—and they are all more or less of the same character at Fernie, Michel and Morrissey — they can be worked with comparative safety, and as it is evident the management never made them acquainted with these facts until they were extorted under cross examination, they have to thank the jury for embodying the information in concrete form.

The whole finding cannot but be regarded as a direct imputation upon the management, and should open the eyes of the Company to the true state of affairs and the conditions under which their mines have been operated. We believe that a brighter era has dawned both for the Company and the miners, in the advent of the new General Manager, Mr. J. H. Tonkin, who is a thoroughly experienced and trained Mining Engineer, and we have no doubt that he will give effect to the findings of the jury in this case to the great benefit of the Company and the safety of the miners.

THE ENLARGED FRANCHISE.

THE action of the provincial legislature in giving the franchise to boys of eighteen years will have a very marked effect in many of the constituencies throughout the providce. Just why the legislature should have taken this step is something past the ordinary understooding, but the franchise is there and its effect may be considered. As a rule it may be said that in the cities and the industrial centers the chief effect of the change will be the increasing of the voting strength of the labor interests, It can scarcely be charged therefore that in making the change the political effect of the measure was considered by the government, since labor has but little in common with the men who compose the cabinet of Premier Dunsmuir, however much its members might be inclined to give their support to individual members of the house who for the time happen to be supporting it. If the truth were known it would probably be found that the recent amendment to the elections act, which puts manhood suffrage in the shade completely, was forced upon the government in much the same manner as certain of the railway measures have been forced upon it. For weeks past the government has been too weak to lead, and has been forced to be content with having its policy dictated by the back benches, and it is not unreasonable to suppose that had the advocates for a freer franchise stipulated for votes for boys of school age, the desired amendment would have been forthcoming. The FREE PRESS does not for a moment suggest that there are not boys of eighteen who can be trusted to make an intelligent use of the franchise, or that there are not many lads of eighteen who have a clearer insight into the politics of the province than many men of sixty, but the fact remains that there was no urgency for the legislation, and that so far as known even the boys were not hankering after the privilege accorded them. Nor is the FREE PRESS of the opinion that that the change in itself will work any injury in the province. But there is this phase of the matter to be considered. Stability and conservatism are by no means the long suits of the present administration, and its members might have thought of this before they decided to lead the world in the matter of a free franchise. It will not assist British Columbia to have the impression created that its affairs are being administered by a set of freaks, but this very likely is the deduction most people will make when they learn that its legislators have decided to place, without solicitation, the franchise in the hands of lads who are just fitting on their first pair of long pants.

LIQUOR LICENSE ACT.

I, Eugene Walter, of Morrissey, B.C., hereby apply to the Board of License commissioners for a hotel transfer of my license to sell intoxicating liquors under the provisions of the statutes in that behalf in the premises known and described as The Hotel Walter, to the premises known as the Elk Hotel, at a point about two miles west of the present Hotel Walter, to commence on the 1st day of July, 1902.

LOCAL AND GENERAL.

WANTED—Girl to do general house work. Apply to Mrs. J. A. Rennie.

The Cranbrook lacrosse team will go to Nelson on Coronation day, June 26th.

The 26th of June, Coronation day, will be observed as a public holiday in Fernie.

Elko was defeated at baseball in Cranbrook on Saturday last by a score of 8-7.

Rev. R. F. Stillman will take for his discourse on Sunday evening "The Christian Sabbath."

Mr. Elias Rogers, Managing Director of the Crow's Neest Pass Coal Company, accompanied by his daughter, left for Toronto on Saturday last.

Miss McDonald has resigned her position as teacher in the primary department of the public school. Miss M. Lawrence has been engaged to take her place.

The baseball team received a challenge from the Medicine Hat team to go to that town on Coronation Day, but the inducements offered were not sufficient and the boys declined.

Miss E. Chambers, stenographer for the Crow's Nest Pass Coal Company. was called to Blairmore on Sunday last by the sad news of the death of her father. Mr. Chambers was a hardware merchant in that place.

The production of the farce, "Too Rich to Marry" at Princess hall on Tuesday evening was witnessed by a fairly large audience. The company put up a very good show, which seemed to be appreciated by all. Twenty-five per cent. of the proceeds—some $30.00—was given to the Fernie relief fund.

A lacrosse match took place in Cranbrook last night between the football team and the Cranbrook lacrosse team. The proceeds were in aid of the Fernie relief fund. Cranbrook has so far raised the handsome sum of $509.50 for the fund and the people of Fernie are deeply grateful for the sympathy of our sister town.

Baptist church service, in Joyce's hall on Sunday evening at 7.30, Rev. D. Holford, pastor, will discourse on the following subject: "Human Drift Wood; A Fearful Sight, A Dreadful Loss." Morning service at 11 o'clock, subject: "The Church a School. Lesson Taught: Bible Arithmetic." An hearty welcome awaits all who come to these services.

Mr. Alex Beck has sold out his bakery business to Messrs. J. McEwing and S. Slinn. Mr. Beck is one of Fernie's oldest business men, having came here in 1898, and the people of the town regret very much to see him going out of business. His successors are both well and favorably known in Fernie and will no doubt receive the same liberal patronage which was accorded Mr. Beck.

The following resolution passed at the annual session of the Grand Lodge, I.O. O.F., held at New Westminster, 12th inst., and forwarded to the lodge here, with request that it be made public:—"Resolved—That this Grand Lodge of British Columbia, I. O. O. F., extends through Mount Fernie Lodge, No. 67, its sincere sympathy for the people of Fernie on account of the horrible disaster that so recently wrecked many homes and caused untold sorrow and suffering by the sudden deaths of fathers and brothers leaving many widows and orphans without the support and loving care of the heads of the families."

The Rev. Egerton R. Young, missionary, author and traveller, gave a most interesting lecture, entitled, "Romantic Life Among the Red Indians in the Hudson Bay Territory," in the Methodist church on Wednesday evening. Mr. Young has been making a tour of the Dominion prior to another lecturing tour in Europe, and having remained off in Fernie for a couple of days to note our wonderful growth, kindly consented to give us a lecture, the proceeds to be given to our relief fund. For an hour and a half he delighted his audience with reminiscences of his missionary life; at one time they would be convulsed with laughter, at another the pathetic tear would steal from an eye. Mr. Young left on Thursday evening for Winnipeg.

On Saturday last the government passed through its final stages, the bill to confirm the settlement of the Fernie town site difficulties, whereby the Crow's Nest Pass Coal Co., Limited, purchased from the government nearly all the blocks going to the Crown under the statutes respecting laying out of town sites. So soon as the bill receives the royal assent, which will be when the house rises, the company will be in a position to give deeds to holders of lots in these blocks, which deeds the FREE PRESS is informed, are now ready and only awaiting the rising of the house to permit of their being delivered. The deeds of all other lots which have not been handed out during the last seven weeks, are now ready for delivery.

CARD OF THANKS.

Having disposed of my business in Fernie I desire to thank my customers for their liberal patronage, and bespeake for my successors, Messrs. McEwing & Slinn, the continuance of their favor.

Yours truly
ALEX. BECK.

Buy your shoes at The Imperial.

Piano for Sale.—Cheap. Apply at the Hill & Dill Co. x

Mr. and Mrs. P. Lund, of Cranbrook, have been in town several days this week.

The subscriptions to the relief fund during the past week only amounted to $827.00.

Post Office Inspector Burton, of Vancouver, was in town this week on a tour of inspection.

Any person indebted to The Imperial Co. will please call and make us happy, before July 1st.

The Chinese population of the town have contributed over fifty dollars to the Fernie relief fund.

D. K. Mollison, assignee for the Martin O'Rielly estate, has been in town settling up the affairs of the estate during the past week.

Produce Business

For Sale.—The produce business carried on by the Dill & Hill Co. for the last year, is offered for sale at a bargain. This is a splendid chance for anyone wishing to go into the business.

A new time table has been arranged for the mines branch. The train will leave Fernie for the mines at 6 a.m., 2:30 p.m., and 11 p.m. and from the mines at 7:30 a. m., 4 p.m., 6 p.m., and 12:30 a.m.

Mr. J. R. Pollock has leased the Alberto hotel from Mrs. Levasseur and will take possession on July 1st. Mr. Pollock has had a large experience in the management of first-class hotels and will no doubt do well.

The bankrupt stock of Martin O'Rielly & Co., has been purchased by Harper & McArthur, of Kamloops, who have commenced a slaughter sale. The firm intend to run the stock low here and move the balance to Kamloops.

James Sproule has opened a new industry in Fernie in the form of a brickyard. The works are at the north end of the town, where it is believed that good brick clay exists. The first kiln will be ready for burning in a few days.

J. L. Gates, proprietor of the Victoria Hotel, has purchased J. H. Turner's interest in the business and is making some improvements in the bar, which when completed will add greatly to the appearance of that part of the house.

Judging from the past success of the special Sunday evening services at the Salvation Army, their citidal will again be crowded to-morrow night. Don't forget C. J. is coming. Send your children to the junior meeting from 4 to 5 p.m.

On Thursday evening a number of young men met in the reading room of the Methodist church and organized a tennis club, electing the following officers:—Hon. Pres., Mr. Malpas: Pres., Mr. Turney; Vice Pres., Mr. A. T. Claxton; Sec.-Treas., Mr. Fred Wilkes. A committee was appointed to draft a constitution. A court is being fitted up at once.

Victoria, June 20.—The provincial legislature concluded the work of the session to-night in point of time; it was the longest in the history since confederation. In the supplementaries there is a vote of $10,000 for the relief of the sufferers of the Fernie disaster.

Victoria, June 20.—The return of officers for the Masonic Grand Lodge resulted as follows:—E. E. Chapman, Kaslo, Grand Master; E. S. Sharp, Esquimalt, Deputy Grand Master; W. J. Bowson, Senior Warden; S. J. Armstrong, Westminster, Junior Warden; Rev. Norman Lucker, Vancouver, Grand Chaplain; Harry Watson, Vancouver, Treas.; Robt. Brett, Victoria, Secretary; E. Hosker, Vancouver, Tyler.

Visiting brethren cordially invited.
J. A. McLEAN, R. S.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

He checked himself abruptly and with a sudden peremptory "h—sh," and came out to invite us most cordially to enter the box. There was nothing to show that any difference of opinion had but just agitated its occupants. Both husband and wife were smiling sweetly; the duke's voice (he was a small, spare man, with gleaming eyes and glistening teeth in his dark olive face) was now so smooth and silky that I could not imagine that it was the same I had heard in such harsh and rasping, angry tones. His manner, too, was full of that punctilious formality that goes with the highest breeding in the blue blooded don.

The lady (it was she who had been staring at me) sat now perfectly quiet and self controlled. There was no trace of emotion about her as she welcomed me, with marked anxiety to be pleasant and make me feel at home.

The entr'acte was not yet ended, and the duchess swept her soft draperies aside to give me room by her side in the front of her box, where I was in full view of the whole house, Frida Fairholme included.

"Why, Captain Wood, this is really kind of you," she began, "to take us in this informal way. Directly I read of your accession to old Mr. McFaught's fortune, I was most anxious to meet you. We knew your uncle—no?—well, your relative. Mr. McFaught was a friend of our family in the old days. I never knew him myself, but I have often heard my father speak of him and of his great wealth. Will you let me congratulate you—and, Pepe"—this was to the duke—"have you congratulated Captain Wood? Of course you have."

"Es claro—of course—I know that Captain Wood is one of the chief of fortune's favorites. But believe me, senor mio, you have also come into great trouble. Vast wealth is a terrible burden; to use it aright is a grave responsibility. Especially so when—you will pardon me, Captain Wood—it has come undeserved."

"But, Pepe, it is not fair to say that. Captain Wood was a relation—he had a right to inherit."

"I only mean that Captain Wood does not know, probably will never know, whether there were not others with greater claims—moral claims, I mean—on Mr. McFaught. That thought would always rankle with me. Vaya, I would rather it was you than me!"

"Do not let him disturb you, my dear Captain Wood. The duke has rather extreme views in theory, but he knows that wealth is wealth. Although we have no vast store, he would be sorry to surrender it."

We got very friendly, quite confidential, together, she and I, as we talked on, tete-a-tete, the duke having gone off somewhere with Lawford.

"Of course you have not yet tasted the joys of possession. It is all very new to you still."

"I hardly realize it, indeed, or what I shall do with it."

"Your first business, Captain Wood, believe me, will be to keep your fortune." She spoke very gravely, looking at me intently over her fan. "Half the world will be in league to rob you. Ah, but yes, I am in earnest! You men fall naturally into three classes—rogues, fools, and policemen."

"And to which, pray, do I belong?" I asked lightly, not taking this bitter remark at all seriously.

"Not the first, I am sure; it would be a bad compliment to say the second, but if you were wise, you would certainly become the third. A whole police force in your pay would not be too many to protect you."

"Are you in earnest?" I said, suddenly struck with something in her eyes.

"Very much so, Captain Wood. If I were a friend, an old friend, let us say, I would counsel you, strongly urge you, to be constantly on your guard, very much on your guard."

As she spoke a deadly pallor overspread her face, which was high colored, as is often seen in very fair haired women, even when still quite young. Her husband had returned silently. I might have said stealthily, and she first had caught sight of him standing there behind me. Why was she thus terrified? Because the duke had heard her last words?

Whether or not the Duke of Tierra Sagrada had even heard his wife when so earnestly counseling me to be upon my guard, I was unable to judge; at least, he made no sign. His manner was perfectly quiet and natural, and he spoke in an unconcerned tone when he pressed me to keep my seat in the front of the box.

At the next interval he said very courteously: "Do you propose to stay for the 'Cavalleria Rusticana?' Would you care to accompany us? Our carriage is here. Susette will be very pleased to present you."

"You are very good," I said. "I should like to go very much if I may run away early. I have a couple of balls tonight."

It was a curious and not unimportant circumstance, when viewed by the light of later events, that the three houses I was to visit that night were within a stone's throw of each other.

The first, that of the Dos Rios minister, to which I was introduced by the Duke and Duchess of Tierra Sagrada, was in Rutland Gate. The next, Mrs. Collingham Smith's, was in Prince's Gardens, and the last, Lady Delane's, in Prince's Gate. My new friends would have sent me on in their carriage, especially when they learned I had not far to go. This near neighborhood was remarked on by the duke, when, observing that the reception did not greatly amuse me, he asked if I was not dying to get to my dancing, and where, exactly, I was going.

"You must let us send you on to Prince's Gardens in the carriage," he said, very civilly. "We have brought you out of your way to a not very bright entertainment and now we ought to speed your departure. We must stay on here for an hour or so more, but there is no reason why you should."

I protested that Prince's Gardens was only a few yards off, round the corner, in fact, and I really preferred to walk. Besides, I only meant to look in for a moment. My real destination was Lady Delane's, which was also quite close at hand.

"To be sure, yes, certainly, I know. Well, well, if you will not be persuaded. But the carriage is entirely at your disposition. Is that not so, Susette?"

It occurred to me that the duchess was not altogether pleased at this offhand disposal of her carriage. So I refused the kind offer and left them with the pleasurable sensation of having made a couple of charming new acquaintances.

There was another acquaintance, if I might so call him, whether friend or foe, waiting for me outside—the same shuffling, slipshod creature whom I had seen so often that evening. Directly I went out I saw him emerge from the portico of an unfurnished house and follow me to the very door in Prince's Gardens.

He was still on the watch when I left Mrs. Collingham Smith's, having found nothing to detain me there—no sign of Frida Fairholme, whom I had hoped to run down. I would now have confronted this pertinacious "shadow," calling him to account for thus dogging my footsteps, and if he gave no satisfaction, handing him over to the police. But it would have taken time and I felt I had none to lose.

It was already long past midnight. I might miss Frida, and that was not to be borne. Mrs. Fairholme, her mother, could give me no news of her charge. "Yes, Frida is here, somewhere. That is all I know," she answered in a weary, faroff, semi-somnolent voice, as, no doubt, she had answered a dozen similar queries. "But I have not seen her for an hour or more. I do wish, Mr. Wood, you would find her and bring her to me," she said plaintively.

As I wandered about dejectedly, all at once I heard, "Captain Wood, Miss Fairholme wants to speak to you," and I saw a hated rival, with no friendliness in his face, pointing to where Frida sat behind a great mass of flowering azaleas.

She was as gracious a sight as ever, one of the fairest and brightest of a sex created for the delight and torment of mankind. Her dress is beyond my powers of description. I think it was a pale blue satin with pink roses, but that is all I can say, except that from the feathery aigret that crowned her sunny hair to the tip of a tiny shoe pushed a little out, but working fretfully upon the carpet, she was the most absolutely charming woman I had ever seen.

"I don't think I shall speak to you," began Miss Frida, with a sniff. "What have you to say for yourself? Are you aware that I kept you three dances"—

I took a seat by her side without answering, and then, giving way to an elation I did not exactly feel, in spite of the great change in my fortunes, I laughed in her face.

"Really, Captain Wood, I am at a loss to understand this most idiotic proceeding," she went on, with great stateliness; "something must have happened."

"It has—something most strange and surprising. I have been looking for you the whole day, in the park, at the opera, at Mrs. Collingham Smith's, to tell you that—that—that— Do you remember once saying that you felt perfectly safe with me?"

"I withdraw it altogether. I now believe firmly that you are a dangerous lunatic, and I will ask you, please, to take me back to mother." She half rose from her seat.

A Treasured Iron Ring.

The Greeks have left us iron and gold rings of exquisite workmanship. One from Etruria, now in the British museum, has the hoop formed of the bodies of two lions and their paws supporting an engraving of a lion in heraldic colors.

Plague Stones.

Druidical remains, several "plague stones," erected about 1450 A. D., fifty old market crosses and forty stocks or their remains are among the ancient monuments now to be found in the West Riding of Yorkshire, England.

Good housekeepers should buy Blue Ribbon Tea, Coffee, Baking Powder, Jelly Powder, Flavoring Extracts, Spices etc., because they are the purest and most economical goods on the market.

Every up-to-date Grocer sells Blue Ribbon goods. Take our advice and insist upon having them.

Blue Ribbon Manufacturing Co.

A train big enough to carry the live stock which arrives in a single day in the Chicago stockyards would have to be 167⅛ of a mile long, and contain 2,397 trucks.

FRIENDLY ADVICE.

TO WEAK, NERVOUS AND EASILY TIRED WOMEN.

Given in the Story of One Who Had Suffered and Has Found Renewed Health and Strength.

From the Sun, Orangeville, Ont.

It is a good many years sinnce the good wrought by Dr. Williams' Pink Pills was first recorded in the columns of the Sun, but during that period the sterling merit of the medicine has increased its reputation and every day adds to the number of those who have found health through the use of these famous pills. Many in this town have freely spoken of the benefit they have derived from the use of Dr. Williams' Pink Pills, and to these another is added in the person of Miss Victoria Widdis. To a reporter of the Sun who had heard of her cure, Miss Widdis said: "Several years ago I became very much run down; I felt tired all the time, my blood was watery and I was in what the physicians called an anaemic condition. I was always weary and worn out, not able to do anything and yet not sick enough to be in bed. My heart bothered me with its constant palpitation, brought about by my extreme weakness. My appetite failed me and I was gradually growing worse. I had heard and read of Dr. Williams' Pink Pills and decided to give them a trial. After using them a short time a decided change was noticable and it is no exaggeration to say that I felt like an entirely different person. My appetite returned and with it good blood and strong nerves. I can conscientiously say for Dr. Williams' Pink Pills that they did me more good than I can tell To all weak, nervous, easily tired, run down women, I say by all means give Dr. Williams' Pink Pills a trial and you will be delighted with the result."

It is because these pills make, rich, red blood that they cure such troubles as anaemia, shortness of breath, headache, palpitation of the heart, rheumatism, erysipelas, St. Vitus' dance, and the functional ailments that make the lives of many women a source of constant misery. The genuine pills always bear the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper on every box. Sold by all dealers or sent by mail at 50c a box or six boxes for $2.50, by addressing the Williams' Medecine Co., Brockville, Ont.

A person 20 years old, has on an average, 42 years of life before him if he lives in the United States, 41 if he lives in England, and only 37 if his home is in Belgium.

Ask for Minard's and take no other.

The lyre bird of Australia is the biggest song-bird in the world. It is nearly as large as a prairie chicken.

A mummy of an Egyptian king recently discovered has in its mouth a set of artificial teeth. The plate is of wood, and the teeth are knobs of brass.

Safe, Certain, Prompt, Economic—These few adjectives apply with peculiar force to Dr. Thomas' Eclectric Oil—a standard external and internal remedy, adapted to the relief and cure of coughs, sore throat, hoarseness and all affections of the breathing organs kidney troubles, sore , lameness and physical pain.

The Skerrymore lighthouse, off the Isle of Tyree, is the largest on the British coasts. It contains 4,308 tons of masonry and cost £90,268.

Australia has most churches in proportion to population; the United States stands next; England is third, and Spain takes fourth place.

How to Save School Children.

In The Ladies' Home Journal Edward Bok takes up the cudgel again against the cramming methods inflicted on school children, and urges as a step toward a reform of the abuse "that every parent who has a child at school send a note to the teacher that, under no circumstances whatever, will the father or mother permit any home study by the child."

"This may seem a very simple thing to do," he contends, "but often the simplest things are the most effective. If the teachers of this country should, within the next month, receive thousands of notes from parents to the effect pointed out, which they could—and I speak for hundreds of teachers when I say that they would gladly do so—hand to the heads of their schools, it would practically mean a readjustment of the entire system of study. This may be better understood when it is realized that the entire system of study during school hours in many thousands of schools is so arranged so as to allow for some of the work to be done by the pupils at home. Let this taken-for-granted study be stopped, and a change would at once have to be made. The studies at school cannot be increased in number, for already there are too many. The school hours cannot be lengthened because the tide has set in to shorten them. Hence, some studies would have to be thrown out, if home study were eliminated. And this is the result desired."

Our Atmosphere.

If great cold turned our atmosphere to liquid air, it would make a sea thirty-five feet deep over the surface of the whole globe.

New Woodwork.

New woodwork, it is said, is much more likely to be infested with obnoxious insect life, and in recently built houses the pursuit of moths and other disagreeable bugs, destructive and pestering, must be constant and vigorous.

A Washing Hint.

Add a few drops of ammonia to the bluing water to whiten the clothes.

As Parmelee's Vegetable Pills contain mandrake and dandelion, they cure liver and kidney complaints with unerring certainty. They also contain roots and herbs which have specific virtues truly wonderful in their action on the stomach and bowels. Mr. E. A. Cairneross, Shakespeare, writes:—"I consider Parmelee's Pills an excellent remedy for biliousness and derangement of the liver, having used them myself for some time."

Uncertain People.

"I don't know them now," said a charming woman conclusively, when I asked her of the welfare of some erstwhile intimates. "They were so uncertain I gave them up." Do you know these uncertain people, who one day cannot live out of your pocket and the next treat you to a cool nod? I hear so often of them that they must exist, and must also be trying to their acquaintances. Another trying person is he or she who loves you and forgets the affection as soon as your back is turned. This sort will say the most abominable things of the recently kissed, hold them up to ridicule, and give folks the impression that dislike and scorn wait upon every thought of them. To see the reviler hobnobbing in the next hour with the reviled is to give slow-going change artists a jog. Nine times out of ten they exclaim: "How can she pretend to like that woman—or he that man—of whom they told me so and so?" Now nine times out of ten he and she do really rather like the friend they have abused, so that it should be said, "How can they abuse persons whom they like?" Yet one never hears that remark made, because inconsistency suggests many worse traits and not one good one, and because, alas! we are so much more prone to believe our friends are wanting than overstocked in the better traits.—Lady Gay in Saturday Night.

Mattress Hair.

The best quality of hair for mattresses comes from South America and is made from the manes and tails of wild horses steamed and culled.

The Erie Canal.

The Erie canal, in New York, was the first artificial waterway begun in this country. Ground was broken for this enterprise July 4, 1817.

FIRST CROP REPORT

PROVINCIAL DEPARTMENT STATISTICS ON GROWING CROPS.

INDICATIONS NOW ARE THAT THE PRESENT WILL BE A RECORD YEAR.

Within the last week the Manitoba department of agriculture has had information from about 350 regular correspondents in all parts of the province, and from these returns a reliable estimate has been made of the number of acres sown to the various kinds of cereals and also of the amount of land under roots.

A study of the appended tables will show that this year there is an increase in the amount of land under everything that is cultivated in Manitoba. The largest increase is in the the coarse grains and flax. In the case of flax there are 41,200 acres sown to it as compared with 20,978 last season.

For convenience the province is divided into five districts as follows:

The Northwestern district comprises the municipalities of Shell River, Boulton, Russell, Silver Creek, Rossburn, Ellice, Birtle, Shoal Lake, Strathclair, Harrison, Clan William, Archie, Miniota, Hamiota, Blanchard Saskatchewan, Odanah, Dauphin, Gilbert Plains and Swan River.

The Southwestern—Wallace, Woodworth, Daly, Elton, Cornwallis, Whitehead, Sifton, Pipestone, Glenwood, Oakland, Arthur, Winchester, Morton, Turtle Mountain, Cameron, Whitewater and Riverside.

The North-Central—Rosedale, Lansdown, Westbourne, North Cypress, North Norfolk, Langford, Portage la Prairie, St. Francois Xavier, Woodlands, St. Laurent, Posen and Ochre River. South Central—South Cypress, South Norfolk, Dufferin, Rhineland, Stanley, Pembina, Lorne, Louise and Argyle.

The Eastern—Gimli, Rockwood, St. Andrews, St. Clements, St. Pauls, Springfield, Kildonan, St. Boniface, Assiniboia, Tache, Richot, De Salaberry, Hanover, La Broquerie, Franklin, Rosser, Morris, Montcalm, and Macdonald.

AREA UNDER CROP,

Eastern	2,800	38,845
Total	9,908	119,835

NORTHWESTERN DISTRICT.

The northwestern is a developing district. New settlers have been locating there in large numbers during the last two years, and it is well known that the first land broken by new settlers is sown to wheat. The great wheat crop garnered in this district last year, the extension of railways in the district, as well as the prospect of a new railway skirting the south of the Riding Mountains have all given a stimulus to farmers to increase the acreage under crop, with the result that the area under wheat is 11,220 acres in excess of last year. Other crops also show an increased acreage.

The southwestern district is the great wheat district of the province. Last year an extensive acreage was ready for seeding. This year, though handicapped by having a shortage of fall plowing done, the acreage under wheat shows only a decrease of 23,050 acres, while oats and barley show an increase, and many farmers have sown flax and speltz.

NEW SETTLERS COMING IN.

In the north central and south central districts the increase is a natural or expected growth, for many new settlers are locating, purchasing land in these districts, and although some of the oldest settlers may not have sown as many acres as they would have liked to do, yet, increased numbers of farmers assert their presence by swelling the acreage under crop of all kinds of grain.

The eastern district suffered the greatest delays in seeding, on account of continued rains, but the eastern district is bursting from the shell that confined it for many years. Many practical farmers have located in Rockwood, Gimli, Rosser, Morris, Macdonald, Springfield, La Broquerie, Hanover, and all other municipalities east of the Red River during the past few years. Were it not for this, the acreage sown in the eastern district would have shown a decrease this year. As it is the reports show a most gratifying increase. In the near future this district will take its proper place and show development, acreage under crop and prosperity equal to any in the province.

SEED GERMINATES WELL.

From all parts of the province reports indicate that the germination of seed has been perfect and that where even the seed was mudded in, and farmers had difficulty in drawing seeders off the fields, the prospects are surprising. Farmers have done their work as well as could have been expected under the conditions, and from past experience it is only natural to expect a good harvest.

Seeding commenced in some parts of the province as early as the first of April, but was not general until the 15th to 25th. In most parts of the province wheat seeding was not finished until May 24. Oats and barley and other crops were sown up to the end of the first week in June. Flax was sown as late as June 10. Seeding was retarded in all parts of the province by the heavy rainfall throughout the month of May.

WEATHER AND CROP PROSPECT

There was more rain during seeding than farmers desired, resulting in a few cases in a decreased acreage in wheat, but this has been amply compensated by the wonderfully rapid growth which all crops have made. A feature of the past season was the heavy rainfall in March, there being an average of 1.75 inches. April was light in contrast, being only .21 inches for the points reported. The rainfall for May was the heaviest on record for that month, being 4.03 inches, as compared with .91 in 1901, .24 in 1900, 1.76 inches in 1899, and .37 inches in 1898.

Grass, like grain crops, has made remarkable progress under the prevailing favorable influences and pastures are in the finest possible condition. Hay meadows are now flooded, and, if they dry sufficiently by haying time the crop will be equal to that of last year in quantity and superior in quality.

LIVE STOCK LOOKS WELL.

Correspondents are almost unanimous in their reports that all kinds of live stock are in prime condition. The abundance of fodder of all kinds and coarse grains has enabled farmers to feed liberally. The only unfavorable reports are to the effect that the cold wet spring and heavy work of seeding has somewhat reduced the condition of horses. In most localities farmers have a surplus of hay on hand owing to the early date at which cattle were turned on the grass.

DAIRYING INCREASING.

Most of the creameries in the province opened for the season's work between the 15th of May and June 1. The season being somewhat backward, the high price of feedstuffs, the continuous rains making the roads hard to travel, have all tended to delay the early make, and although the price has been high, only a small quantity has been put upon the market at this date. The fine condition of the pastures at the present time almost assures an increase over last year's total make, and the feeling at present is that the ruling price will be higher than last season.

Improvement is looked for in the cheese factories and indications are that the price will also be better than last season. Dairying is steadily attracting more attention and the number of enquiries for information along these lines indicate a continued growth to this industry.

TRAPPED A WHITE FOX.

J. Kent, an Indian trapper, from Lac du Bonnet, arrived in Winnipeg last week with the skin of a white fox which is the first pelt of the kind ever secured in the west. The fox was bagged near the lake on property owned by C. J. Brown and H. C. Stevens, about eight miles north of the town of Lac du Bonnet. Kent sold the skin for $175.

PAID THE PENALTY

HANSEN, A DANE, HANGED IN MONTREAL BEFORE A LARGE CROWD.

TICKETS TO WITNESS THE EXECUTION SOLD FOR A DOLLAR EACH.

Hansen, who murdered a boy for a few cents, was successfully executed in Montreal on Friday June 13.

There was a large number of spectators present. The prisoner walked to the death trap with a firm, steady step. Considerable comment was caused by the traffic in tickets of admission to the execution which was carried on near the entrance to the jail yard. It is charged that a number of tickets were being hawked around, prices varying from $10 down to 50 cents a piece. Where so many tickets came from will probably be made a matter of investigation. Tickets were offered for sale by a policeman in uniform.

Hansen was a Dane, 34 years old. On October 26 last year, he met a young lad about 12 years old named Eric Marotte, son of Samuel Marotte, one of the best known citizens of Montreal, on the street near his father's home at Westmount. He followed him into some fields and ther deliberately knocked the boy down and cut his throat. Hansen's explanation was that he wanted money, but all he got was a few cents which the poor lad had on him. After killing the lad he threw his body on a pile of stones, and proceeded on his way.

The boy's body was found a few hours afterwards, but the manner of his death was not known until Hansen walked into the Montreal police headquarters and gave himself up. He was handed over to the Westmount police. Hansen had only been in this country a few months.

On examination before Judge Choquette he pleaded guilty and later was sentenced to be hanged. Several appeals were made to the minister of justice, but he did not interfere with the law.

A TERRIBLE SUICIDE.

Canadian Pacific Watchman Deliberately Fires a Stick of Dynamite.

A strange case of suicide occurred at the Loop on the Crow's NestPass line last week, when Mike Morech, a Pole, employed by the C. P. R. as watchman shuffled off the mortal coil in a manner which is not often taken by those contemplating a sudden exit from the world. He occupied a box car with a number of other men, and his comrades had gone off a short distance, leaving Morech asleep in his bunk. About half an hour later a loud explosion and smoke issuing from the car announced that something serious had occurred. The men hurried to the car, and found their comrade torn in a terrible manner by an explosion of dynamite. He still gave some signs of life, and Dr. McSorley, of Michel, was sent for, but long before the doctor arrived life was extinct. Coroner Trites was notified, and, assisted by Dr. McSorley, made a thorough investigation, which revealed the fact that the man had deliberately placed a stick of dynamite on his breast, and after lighting the fuse calmly awaited the fatal explosion, lying in his bunk. Little cause could be assigned for the rash act. The man had $400 in money tied in a parcel around his neck, and was apparently in good health.

AN OLD-TIMER GONE.

There died last week at the Old Man's Home, Kamloops, an old timer named Smiley. He was one of the first pioneers of this part of the country, having prospected along Okanagan Lake over fifty years ago, and was the first white man, as far as it is known, to take out gold from Siwash creek. He went all through the Cariboo excitement and mined with varying fortunes in almost all parts of the province. He was a native of Quebec, of mixed parentage, and was a quiet and industrious man, well liked by all who knew him.—Vernon News.

TOD SLOAN GOES TO JAIL.

"Tod.' Sloan, the American jockey, was sentenced in France to two days' imprisonment and a fine of ten francs for driving an automobile at an excessive speed. He was fined five francs on two minor counts. Sloan was sentenced to a fine of eight francs last year for a similar offence.

The Quebec government has appointed a commission to supervise the colonization in the province.

Marconi has perfected an invention by means of which he can receive 30 words per minute by wireless telegraphy.

FIGHT WITH A BEAR.

Wonderful Vitality of an Indian Overcomes the Attacks of a Vicious Animal.

Rush Holmstead, of Montreal, who has had some experience in backwoods life, is on his way to British Columbia where he proposes to spend the summer in the mines. He is a young man of much experience in the parts of Canada that are still beyond the pale of civilization. He has been up the coast of Labrador. Last year he was in Northern Ontario beyond Abittibi lake. The last three years he has spent studying medicine in Montreal, and the summers in trips to the north.

While he has never had any personal encounters with the beasts of the wilderness, he says an Indian north of Abittibi, who had a narrow escape from death. He tackled a bear that came nearly being too much for him.

The man's name was Kisteegeesick and he was regarded by his tribe as a mighty hunter. It was about the middle of June, when the bears are a bad proposition that Kisteegeesick met the bear near the river bank. The animal had been eating ants. The Indian was armed with one of those abominations, a trade gun. It was a double barreled, muzzle loading, smooth bore. They are made in Belgium out of condemned gas pipe and throw a bullet which goes thirty to the pound.

BEAR GETS BUSY.

Kisteegeesick fired to hit behind the shoulder. What he did do was hit above it and Mr. Bear charged. The Indian waited until he was close and then pulled the other trigger. There was a snap and that was all. Kisteegeesick jumped aside and broke his gun with the first blow he delivered at the bear. As he dodged the charge, the animal reached out one big paw and laid bare the man's thigh, almost to the bone.

Kisteegeesick wanted to run, but he could not do so very well, and dropping the useless gun, he opened his clasp knife. He didn't remember much of the struggle, but when he regained consciousness with the grey of the next dawn, just in weak and the bear, dead, was lying across him. After a great effort the Indian released himself and crawled to the river, where he drank copiously and tried to bind up his wounds as well as he could.

Mr. Holmstead does not know how long the red man remained that way but it must have been several days, for when he and his party discovered the unfortunate he was delirious and in a fever. Unprotected and at the mercy of the flies the parasites had come to life in his wounds and he was in a horrible state.

TO CAMP IN A CANOE.

Holmstead attended him as best he could and they took him on with them in their canoe until an Indian camp was reached. Any white man would have succumbed to such wounds and exposure, but when Holmstead returned several weeks later he found Kisteegeesick on a fair way to recovery and has little doubt that he is able to hunt as usual by now.

FELL FROM A STRAWBERRY TREE

Will Gazley, of Walnut Hills, is filled to the brim with agricultural lore and often relates to his friends anecdotes of summers spent "down on the farm," how he joyously sprinted about in the clover and stepped on the blithesome honey bee that left its card on his bare foot.

"My uncle down on the farm kept bees," remarked Gazlay, complacently.

"Operated an apiary, I suppose ?" remarked a friend.

"Who said anything about apes ?" asked "Billy" indignantly. "Do you suppose my uncle was a monkey ?"

Some one present then remarked that strawberries are now ripe and what fun it must be to pluck them.

"Not for me," answered Gazlay. "When I was a kid down on the farm, one summer I went out to pluck strawberries and came near seeing my finish."

"How was that ?" queried the friend.

"Fell out of the tree and broke my arm," answered Gazlay, as he asked everybody to take a cigar on him.

On a recent Saturday afternoon so-called blood rain fell in Hamburg (Germany) and district, causing considerable commotion among the people. It was found that the blood rain was due to the falling of myriads of insects (carabus coccinella), and it is suggested that they were driven with volcanic dust from Martinique.

Violent earthquakes have been felt during the last fortnight at Tulcan, a town near the Columbian frontier.

President Roosevelt is only 44. He is the youngest president the United States ever had. President who was 68 when inaugurated, was the oldest.

The most dangerous vegetable irritant poison is that of the itchwood tree of the Figi Islands. One drop of the sap falling on the hands is as painful as the touch of a hot iron.

SURRENDERING FAST

OVER 10,000 BURGHERS HAVE ALREADY GIVEN UP THEIR ARMS.

BOERS BLAME FRANCE AND GERMANY FOR THE WAR LASTING SO LONG.

Up to June 11 10,225 Boers had surrendered. Many are youngsters of 11 years old and upward. The majority of them are under 30, though some of the burghers who have surrendered are septuagenarians.

Reports from all the districts say that the burghers are increasingly friendly. The only bitterness observable among the leading Boers is against France and Germany. They declare the war was protracted unnecessarily owing to hopes held out by the French and German press. Some of the Boers are so incensed that they have expressed the hope that some day they will fight on the side of the British against one of these powers.

The anticipated friction between the surrendered Boers and their former comrades of the National Scouts has not materialized to any extent.

The Boers admit that they received ammunition through Portuguese territory.

General De Wet says the youngsters were his best fighters, and frequently held positions after the older burghers had cleared out.

The Boers of the Orange River Colony are handing in only a small percentage of their ammunition. They explain that they used most of it in hunting game since the peace agreement was signed.

MAIMED HERO PENSIONED.

Sergt.-Major Wilkinson Will Receive $1.25 Per Day.

Sergt.-Major Wilkinson, formerly of the Ontario militia, whose gallantry at the battle of Harts River, where he emptied his bandolier after being twice shot through the body, and only ceasing to fight when his right eye was knocked out by a bullet through the temple and his right arm shattered, after which he threw the bolt of his rifle away, has written a letter to his sister with his left hand, telling of his fearful experience. He had to be transported by mule waggon to the hospital, 100 miles from the battle field, the journey occupying three days, where his hand was amputated. Lord Kitchener visited him in the hospital, and has recommended him for the distinguished service decoration. He is now recovering rapidly, and has been given a pension of $1.25 per day by the Imperial government. Sergt. Wilkinson will be missed from the Canadian Bisley team, as well as from the leading rifle meets of Canada.

OF SCOTCH DECENT.

Burghers Surrendering at Ventersdorp Sang "Auld Lang Syne."

A dispatch from Lord Kitchener, dated from Pretoria, June 10, announces that Van Tonders and Van Heerden's commands, having with them 403 rifles, have surrendered near Ventersdorp camp, southwest Transvaal. At a concert subsequently the burghers sang "Auld Lang Syne," and "God Save the King." Further surrenders of 619 rifles and 23,000 rounds of ammunition were also announced.

WRECK AT MEDICINE HAT.

Freight Collides With Work Train—Two Engines Destroyed—No Lives. Lost.

A serious railway accident occurred Wedneeday afternoon at a point two miles east of Medicine Hat. A westbound freight train while running at a high speed on the heavy grade east of there collided with a work train, completely wrecking several freight cars. Fortunately no lives were lost. Engineer Morton, of Calgary, sustained a severe leg fracture and Roadmaster Armstrong and several others were slightly injured. A car of horses was heaved on two other cars, but without injury to the animals.

STRANGLED AN ELEPHANT.

A crowd of about 3,000 people witnessed the killing of the largest of Barnum & Bailey's performing elephants in the city park at Tours, France. The animal suddenly went mad, broke its chains, tried to kill its keepers while on the way to the railroad station, and had to be immediately slain. Two hundred men tugged at the rope which strangled it.

Real Estate and Fire Insurance.

REV. R. F. STILLMAN, - - Pastor.

INSPECTOR'S REPORTS.

THE return asked for in the provincial legislature, dealing with the reports of the government inspectors upon the conditions as they found them in the Coal Creek colliery, together with the correspondence appertaining thereto, is now available. The return occupies 34 pages of closely printed matter, and, while it cannot be said to throw much light on the immediate cause of the recent disaster, it certainly cannot improve the position of the coal company in the eye of the public.

The return covers a period of something over three years, during which the mining affairs of the province were looked after by as many different men. During the first two years the inspection of the Coal Creek properties was the work of Inspector James McGregor, and from December 16th, 1898, until December 20th, 1900, the date of his last report, there appears to have been an almost constant conflict between the inspector and the management of the colliery to secure compliance with the requirements of the Coal Mines Regulations Act. It will be difficult for the average man to read this portion of the return and not come to the conclusion that the mining of coal cheaply was the chief consideration of the colliery management at that time. The first report of Inspector McGregor dealt with the early days in the development of the Coak Creek collieries, when natural difficulties presented themselves to the operation and development of the mines, but is interesting to note that at this time, when the difficulties were the greatest, there was a very evident desire on the part of the company to comply closely with the government regulations, and in the second report of the inspector, made seven months later, there appears the statement : "All the suggestions I made "to the management had been carried "out", a statement by the way which does not appear in any later report of the same inspector, although even greater exceptions were afterwards taken by him to the manner in which the collieries were being worked. It would probably be unfair to the coal company to infer, that from the absence of such a statement in the later reports of the inspector, that his directions were ignored. There is nothing to warrant this, but there is an inference to be gathered throughout the latter period of Mr. McGregor's inspection, that greater difficulty was experienced in securing compliance with the regulations. In one letter of instruction which the inspector received from the minister of mines there occurs this sentence : "If, on a second "visit, you do not find that your direc-"tions have been implicitly carried out, I "beg you will report the same to me at "once, and I will take the necessary steps "to enforce immediate compliance with "your instructions." Such it may be said is fairly representative of the anxiety displayed by the minister of mines for the condition of the Coal Creek collieries, and displaying itself from time to time in his letters to the inspector.

This anxiety was not shared alone dy the minister of mines. It appears to have taken a hold upon the provincial mineralogist, and in a letter which he writes to the inspector, on November 19th, 1900, he says : "Keep at them, and do not be "afraid to insist on what is necessary for "the safety of the men, and on this point "do not hesitate at the letter of the law : "keep things safe, and if you have not "enough law you will get it ; but be sure "you are right, and keep your notes in "case of a dispute." The letter also apprized Mr. McGregor that Arch. Dick had been re-appointed an inspector, and suggested that Mr. McGregor have him go over the Coal Creek collieries. This it was explained, in the language of the provincial mineralogist : "will back you "up, and in case you have to use harsh "measures with the company will lift "much responsibility off your shoulders."

Then follows the last report made by Inspector McGregor prior to the arrival of Inspector Dick on the ground. It has a special interest in that it predicts a possible explosion, and in the manner in which a very large number of people believe the fatality of a few weeks ago was brought about. On this occasion the inspector said :

"Again referring to the condition of the "Fernie coal mines, I would ask you to "carefully consider all the reports sent to "your department of late, and at once "give your opinion as to the proper course "to pursue, as you are aware it might en-"tail a close examination should these "mines be closed. I can assure you I am "more than anxious and nervous of the "present condition and state of affairs, "notwithstanding safety lamps are used "in all stalls and levels, but the fact still "remains that gas can be detected in the "safety lamps in the main return air-ways "proving conclusively that an explosion "is possible by a heavy charged blown-"out shot, which frequently happens as "the mine is naturally dusty. The ven-"tilation is gradually decreasing owing to "the works extending, the friction be-"coming greater every day. I trust this "is sufficient at present, and my late re-"ports are now in your department."

From this time on the inspection of the mines devolved almost exclusively upon Mr. Dick. His first report recited that considerable improvement had been made in the mines since the previous report of Inspector McGregor. That the conditions were very much improved after Mr. Dick took hold in evident from the altered tone of his reports from those submitted by his predecessor and from the further circumstance that there no longer occurs in the instructions which he received from his superiors urgings to the inspector to keep the management of the coal company up to the requirements of the act. The most serious objections that he made to the conditions as he found them was in April 1901, when owing to the dry and dusty condition of the workings to the right side of No. 2, which he found was also giving off considerable gas, he forbade blasting with black powder except in accordance with section 82, rule 9 of the Coal Mines Regulations Act.

A supplemetery return has been brought down in the legislature enclosing the last report of Inspector Dick upon the condition of the Coal Creek collieries made threee and two days respectively before the accident. The reports bear the date of June 2nd, so that they were out several days after the explosion occurred.

Touching the condition of the No. 2 mine on the 19th of May the inspector says : "I again went into No. 2 mine. To-day I went by the electric hoist and deep, thence up the long incline to the level of what is known as the west side or No. 2 district. I went in here to the face and the stall at the back, which is known as No. 16. I was in all the old works between the level and the face of the working stalls, of which there are 16. From here I went to what is known as the machine district. In short, I was in all the working places up this incline, which is known on the plan as No. 2 district. I examined it very carefully with a safety lamp for gas, but did not see a trace of it anywhere. I also saw that all the places were properly timbered, and in most of the stalls I saw timbers lying that had not then been used, and on the level, leading from the incline to No. 16 stall, I saw large pools of water on the road. Ventilation was good. I saw by my instrument that there were 72,000 cubic feet of air passing down the intake, for the east and west districts, per minute, for sixty men. Everything was in good order."

The mine was inspected again on May 20th, in connection with which he says : "I went to-day to examine the No. 1 mine. I found that the mines were not at work except men in Barton's entry fixing the road, making it higher. After going in the tunnel I went up the west district. In going in here I saw that there were two men working fixing air stopping. I went through all the working places of this district. I saw that they were in good order ; all of them had been reported clear of gas. When I was in there was gas of different quantity to show in my lamp in the No. 16 stall, and the three other adjoining stalls. The overman was along with me. He said there must be a derangement somewhere, so he left me and went to investigate, when he found an air stoping had been broken, so that the air escaped. This was soon made right, and in a short time the gas above mentioned was carried away. Ventilation was good. It this west district there were 32,000 cubic feet of air passed per minute, where in usual working days there are 50 men. All of the above 32,000 feet does not get to the face of the working, as they have to let a large quantity get into the old works to keep them clear of gas."

Enclosed with the report are the reports made by the committee of the Fernie Miners' Union, and those of the fire bosses employed in the mines on the fateful Thursday of the accident, which are appended :

"FERNIE, B.C., May 7th, 1902.

"To the Management of Coal Creek Mines :

"Sir,—We , the undersigned, appointed by the Gladstone Miners Union No. 76, of Fernie, B.C., visited No. 2 and No. 3 Mines, as set apart by the Act, and found them clear of all gases. and in good condition, with the exception of the excessive want of timber in section 2, No. 2 Mine. (Signed)

"THOMAS ADDISON.
"THOMAS STEVENS."

The following is taken from the Fireman's Report Book :

"Thursday morning, May 22nd—No. 2 Mine, Nos. 2 and 3 Districts, all clear. (Signed) R. B. LAMB."

"No. 3 mine, night shift, May 22nd.—All working places clear. (Signed) J. SULLIVAN,"

"No. 2 mine, night shift, May 22nd.—No. 1 District, all working places clear. (Signed) J. SULLIVAN."

"No. 2 mine, morning shift, May 22nd —No. 1 District, all working places clear. (Signed) F. LANDER."

"No. 3 mine, morning shift, May 22nd —All working places clear. (Signed) J. SULLIVAN."

"No. 2 mine, morning shift, May 22nd. —Nos. 2 and 3 Districts, all working places clear. (Signed) R. PINGELLY."

NOTICE

In the County Court of Kootenay Holden at Ft. Steele

Notice is hereby given that on the 23rd day of April, 1902, it was ordered by J. A. Forin, Esquire, Judge of the said Court, that James Ferguson Armstrong, Official Administrator of the County of Kootenay, be administrator of all and singular, the estate of John Johnson, of Elko, B.C., deceased, intestate.

Every person indebted to the said deceased is required to make payment forthwith to the undersigned.

Every person having in possession effects belonging to the deceased is required to forthwith notify the undersigned.

Every creditor or other person having any claim upon or interest in the distribution of the personal estate of the said deceased is required within thirty days of this date to send by registered letter addressed to the undersigned, his name and address and the full particulars of his claim or interest, and a statement of his account and the nature of the security (if any) held by him.

After the expiration of the said thirty days, the Administrator will proceed with the distribution of the estate having regard to those claims only of which he shall have had notice.

Dated at Fort Steele this 21st day of May, 1902.

JAMES FERGUSON ARMSTRONG,
Official Administrator, Fort Steele, B.C.

400 MEN ON STRIKE.

Fernie Miners' Union Calls Out the Men Employed in the Coal Creek Mines.

Only Seven Dissenting Voices—Both Sides of the Question.

Another serious affair in the form of a strike of the employees of the Crow's Nest Pass Coal Co., has overtaken the town and the prospects to say the least are far from bright.

With the advent of the new General Manager of the Crow's Nest Pass Coal Co., Mr. J. H. Tonkin, a regulation was put into force which requires the men to remain underground eight hours and a half instead of eight hours, which has hitherto been the custom and as a result a meeting of the local union was called on Tuesday evening for the purpose of discussing the matter and by an almost unanimous decision decided to protest in the strongest manner against the new regulation—even to the extent of going on strike. However, before the matter was finally settled it was decided to state their side of the case to Mr. Tonkin and the following letter was drawn up and presented to him :

Fernie, B.C., June 25th, 1900.

J. H. TONKIN,
General Manager Crow's Nest Coal Co.

SIR :—Heretofore there has never been a complaint from the four general mine managers who preceeded you, nor neither from those who are financially interested in the Crow's Nest Pass Coal Company, that eight hours per day from pit's mouth to pit's mouth was not a just and satisfactory day's work under ground. Their yearly reports show that the profits accruing from the coal and coke produced at these mines were most gratifying.

Hence the time-honored custom of working but eight hours from pit's mouth to pit's has been since years financially allowable from a profit point of view and also explicitly sanctioned by the owners of the Vancouver Island Coal Mines.

Therefore we cannot permit you, sir, to annul a progressive, just and humane custom, which is approved of by every lover of his kind in this western Province of our latently great and democratic country without opposing the attempt by all the lawful forces within our power.

Take notice then that we now stand opposed to your arbitrary action, or in other words you have driven us to use the only weapon of defence within our reach—the misery producing strike.

EX. COM. OF MINERS' UNION.

The following reply from Mr. Tonkin gives the position of the Coal Company in the matter :

Gladstone Miners' Union, Fernie.

Gentlemen :—Acknowledge receipt of your letter and in reply must state that the position of the Company is that they feel they are just in their demand that they receive eight (8) hours' work as the equivalent of a day's wage. This is all we ask. This we must insist upon having.

Very truly yours,
JOHN H. TONKIN,
General Manager.

Upon receipt of Mr. Tonkin's reply another meeting was called and it was decided to withdraw the men from the mines pending the decision of the Western Federation of Miners in the matter, and several hundred men are now idle.

SCAB RUN OUT.

Up to Thursday evening everything was apparently quiet about town and at the mines, but a report to the effect that a man named Wm. McAllister, better known as "Scotty," who was living at the mine, intended to go to work on Friday, became circulated that evening and the miners determined to make an example of him by running him out. The police got wind of the affair early in the evening and over twenty specials were sworn in and armed to the teeth to prevent any demonstration. The switches to the mine had all been opened to prevent a train running up and it was feared that the telephone wires had been cut as it was impossible to get a message through for several hours, but this, however was not correct as a message came throughly shortly after midnight to the effect that everything wrs qviet at the mines. Upon receipt of this message the police dispersed to their homes.

Hardly had the officers disappeared before spies who had been watching events reported the matter to the strikers and by various signals a mob of over a hundred men was soon raised and started for the mine, where they were joined by a number of others and proceeding to the home of the alleged scab forced him to accompany them. From what we can learn it was not the intention of the mob to handle him roughly, but mobs are dangerous things to control, and this one, composed as it was of foreigners as well as English-speaking men, lost all control of itself and treated their victim in the most cowardly manner. He was knocked about and kicked and some brutal thug stuck a knife in his back, but fortunately not deep enough to be serious. He was brought down to the old power house where the gang separated, the majority going through town to draw the attention of the police from the remainder who sneaked in back of the coke ovens with their prisoner. The ruse was successful and the victim was taken about two miles east of the town and warned not to return, but the Scot's blood was up and he came back Friday morning looking for trouble. It is expected that several arrests will be made in connection with the affair.

The leaders of the strike are very much opposed to mob violence and at a meeting of the men held in the recreation grounds the speakers, Messrs. O'Brien, McKenzie, Neale, E. C. Smith, M.P.P., Gingara and Feliex, all urged the men to be lawabiding and sober.

MR. TONKIN'S STATEMENT.

A representative of the PRESS called upon Mr. Tonkin yesterday and he gave the following statement of the company's side of the question :

Fernie, B.C., June 28, 1902.

FERNIE FREE PRESS,
Fernie, B.C.

Gentlemen—In accordance with your request for a statement regarding the present situation, will say the order for an eight-hour day was instituted without any thought of antagonizing the men or of working them any hardship, but simply through a desire to put the mines on a better working basis. It is not the intention of the Company to use this as an entering wedge for a ten-hour day, as some people have been heard to state, as we simply wish an eight-hour day, and will be perfectly satisfied if we have it. This single shift plan would be a great benefit to every miner in Coal Creek mines; he would get more coal, his room would be kept in far better and safer condition, and he would not be haunted by the fear that if he left a little coal at night the man who cross-shifted him would reap the benefit of some of his labor. The miner, as everyone is aware, is a contractor, inasmuch as he works on a basis of coal tonnage, yardage, etc., and is therefore largely his own boss. His earnings are entirely dependent upon the amount of labor he daily devotes to his work. He regulates his hours of work largely by the conditions of his room and may labor six, seven or eight hours daily, and no objections are raised to his so doing, the only requirement being that he does not fall too much behind the turn of the miners in his division or district of the work—on the other hand no limit is placed on the amount of work he may do if he pleases, the Company taking from him all the coal he may load.

In the case of the day or shift men, both underground and on the tipple, it is necessary for them to work the full eight hours in order to provide the requisite mine cars for the miners, to do a good day's work, and also to keep the coal moving to the tipple with constant regularity and without which the best results both for the men, the community and the company cannot be obtained.

To keep up the regularity in the movement of the coal and to obtain the best results for the miner, a systematic organization of all departments of the work is of vital importance.

This regularity calls for the constant attention to their respective duties the part of all day and shift men and which close attention is more or less tiring. To break the motony of eight hours straight work, provide a short period of rest and an opportunity fo eat their lunch quietly, the Company has proposed a complete cessation of all work by all day men for one half hour at noon daily. This half hour is the men's and no work is expected of them during that time and corresponds to the noon half hour or hour taken by all classes of labor everywhere and for which no compensation is asked or expected.

The system of day work as outlined above is that generally followed in all mines where eight hours constitute a day's work and is precisely the system of work for which the great strike in the anthracite regions of Pennsylvania is now on.

The Company feels satisfied that its position is a right and just one and one that before a month or six weeks have passed by will be so apparent to the miners and to the men generally that they will wonder what the strike was all about. As stated above this rule does not affect the miner, but simply gives time for the loaded car which is usually left in the face to be put over the tipple.

Yours very truly,
JOHN H. TONKIN,
General Manager.

FROM THE MEN'S STANDPOINT

Fernie, June 24th, 1902.

To the Editor.

We beg leave to ask the favor of being granted to us a space in your paper. The readers of your paper have not forgotten the dreadful catastrophe that has befallen this town in which some 130 men and boys have met their doom.

Another blow is now being struck at those who so recently have lost their comrades.

It has been the rule at these—the Coal Creek—mines since their being opened up and managed by four consecutive managers that 8 hours from bank to bank constituted a days work. There has been no apparent disagreement between the employers and the employees regarding this question until the advent of Mr. Tonkin, the new manager, who has, without consulting or even giving any notice to the effect ordered that the men must work 8 hours at the coal face and not as before 8 hours from bank to bank. To some of the men this would mean probably a 9 hour shift in other words 9 hours from bank to bank instead of as before as eight.

This course of action is apparently an endeavor to establish a precedent not in vogue in B.C. In the mines at Nanaimo and others on the Island the men descend and ascend within eight hours. It is true that an eight-hour law has not been established in this Province, for the simple reason that all the coal mines worked an eight-hour shift, or in other words, had an eight-hour law of their own, and the necessity had not arisen for this to be by law established.

We, the miners employed at Coal Creek Mines, are not willing that this custom be changed after it having been in vogue so long, and therefore we have resolved to stand against it. We have resolved to stand against what seems to be an encroachment upon the rights of laboring men. Shall we stand alone? We appeal to every "hardy son of toil" to stand with us.

Autocracy has reigned too long in this free land. We love our freedom and appreciate equal rights. To fair-minded masters we offer corresponding interest, bus we are not willing to tolerate anything that savors of take all and give none. Therefore be it resolved that we, the miners employed at the Coal Creek Mines make a stand against any infringment of the long standing precedent of eight hours from bank to bank, and also that we make an appeal to the Member of this constituency to present a Bill before the House to moke eight hours from bank to bank to be embodied in the law of this Province.

THE PRESS COMMITTEE

LACROSSE MATCH.

The Fernie lacrosse aggregation have played their first game of the series, and, while the score is against them, the boys are satisfied, with the result and their hopes of retaining the Lavasseur Cup are not lessened in the least.

Notwithstanding the untimely hour of arrival—2 o'clock in the morning—the boys were out in good time testing the grounds, which are beautifull situated opposite the Lethbridge Hotel, where the team were put up. The recreation square presents a pretty effect in its beautiful covering of grass, but to players used to hard bare ground it proved to disadvantage in footing and the pick-up of the ball.

The ball was faced off at 2.56, and the teams were represented as follows :

Lethbridge		Fernie
Vanhorn	goal	Miller
Dr. Stewart	Point	MacLean
A Scott (capt)	cover point	Hermann
A Ripley	1st defence	Symonds
Meyers	2nd defence	Kastner
MacIntosh	3rd defence	Lafortune
Alex. Scott	centre	Thomson
Hill	3rd home	Wrigglesworth
L Ripley	2nd home	Beaubier
Fraser	1st home	Black (capt.)
Stafford	home	Vance
Cunningham	inside home	Schram
Stanley	field captain	Donoghue
Duff	time-keeper	Watson

Umpire, Bleasdell ; referee, T.A.McCullah

The game was played in quarters of 20 minutes each with five minutes for changes.

The first quarter was fast and furious lacrosse from start to finish, and it is doubtful if the Crow's league ever put a better exhibition of Canada's national game. The Fernie team played in splendid unison, their sharp combination and persistent checking, keeping the home team guessing most of the time. The rubber was in the vicinity of the Lethbridge flags very often and the strong defence of Stewart and Vanhorne was in constant demand. During this quarter it was difficult to follow the individuals merits of the players, the only fact that the observer could be sure of was that good lacrosse was being played and that the Fernie team were pulling up the best part of it. During the first 20 minutes many expressions of dissappointment were heard as the spectators evidently expected an easy walk over for their favorites. The fault was not theirs however but was the result of superior playing on the part of their opponents. At the call of time the score was nothing on each side and the enthusiasm was at fever point.

The second quarter was even lacrosse. The home team found their bearings and the visitors lost enough to make both sides appear well matched. Both sides made famous rushes and both defences broke many a rush of the opposing homes. The time was called and still no goals had been scored. The enthusiasm of the crowd was greater, if possible, than during the first quarter.

The third quarter proved what the Fernie boys feared all along, that they had not the "wind" to last against men who have practised like their opponents are known to have done. Gradually but surely the Lethbridge boys forged ahead, and the visitors appeared to weaken in the home. Fraser made a swift shot from the side which landed the post and rebounded into the net and the air was rent with cheers. During the remaining nine minutes of this quarter our home made repeated rushes but vain efforts to break the opposing defence, but the third quarter ended 1-0 in favor of Lethbridge.

The last quarter was a repitition of the third. The mountain boys played a good defence but in spite of everything the rubber was again landed from the side by Fraser. The last 14 minutes was played without scoring and the game closed 2-0.

In summing up, the writer desires to give all possible praise to the defence and centre. The home played under many disadvantages and considering everything played a creditable game. The centre played a hard, fast game and deserve much credit for their tenacity and zeal. The defence excelled themselves and put up a superb game. Miller and MacLean played like machines and never made a miss, while Herman spoiled many a combination of the opposing team.

Our boys went down with a weaker team than they counted on as several had not practised more than two or three time. The Lethbridge team on the other hand have been practising hard for months, and were in the best condition. It was evident that they counted on making a large score and our boys feel satisfied with holding them down to two goals.

SHOTS.

Hurrah for Miller.

Mac has a first mortgage on the first sixteen feet of air space.

It took 51 minutes of hard work to score the first goal.

A cloudy sky and a light prairie breeze makes an ideal day for lacrosse.

Stafford, Fraser, Stewart and Vanhorne put up a great game for the prairie town.

Milt and Dunk made phenomenal individual rushes.

The referee was suggested by the home team and gave general satisfaction.

Not for one minute was the game slow, but the best of good feeling prevailed throughout.

The Lethbridge club treated us 'white.'

The foot ball game between Frank and Lethbridge commenced immediately after the lacrosse was over. During the first half the visitors had the wind, played superior ball, and score one goal. After half time Frank faced the wind and put up a hard game. They scored two more goals, though not without many rushes by the Lethbridge forwards. The fourth goal was scored by the home team and the last by their opponents, leaving the final score 4-1 in favor of the coal town. The game was a fair exhibition of football and was clean throughout. It was a noticable feature of these games, that the same interest was not shown in the football game as in the national game, scarcely any enthusiasm was aroused and many went home before it ended.

A well attended ball in the evening ended a very enjoyable day.

The service at Christ Church tomorrow will be as follows : Matins and Litany 11 a.m. ; Sunday school and young men's bible class, 2.30 p. m. ; Evenson 7.30. Collection in aid of church expenses.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

"Stay—you used to say that there could be no nonsense between us; that I was only a pauper, a harmless, in-

She was the most absolutely charming woman I had ever seen.

significant nonentity, and impossible—whereas if I were a duke, or an American millionaire, you might—perhaps"—

"Do you mean to say that you have been deceiving me all this time? I altogether refuse to be bound by any unguarded words I may have uttered, and if you persist shall also decline the honor of your acquaintance."

"Hear me out, at any rate," I pleaded, as I seized her hand and gently drew her back, for she had now got up and was leaving me like a frightened bird.

Then I blurted out the whole story, in that clumsy, blundering way a man has when his heart is full and all his happiness depends on what he is saying. Still never a word from her, until at last I cried despairingly.

"Frida, darling, my first thought when I heard of this fortune was of you—say you will share it with me."

"I think you have been most abominably deceitful and underhand," she faltered. "You should not have kept it from me, I had a right to know, I should have been told—I—I"—

"I only heard the news myself this very morning."

"But just think what people would say. I should be called a mercenary wretch, accused of selling myself for your millions."

"They shall be yours. I will make them all over to you at once. I do not care for them one bit, except that they give me the right to ask you for this."

I took her gloved hand and kissed it, but she herself, turning her blushing face up to mine, offered me her lips.

When I left Prince's Gate I seemed to tread an air. We had been among the last. Frida and I had lingered on among the azaleas till Mrs. Fairholme's patience was fairly exhausted and she came herself to end the tete-a-tete. I think she saw enough in our conscious faces to comfort her with the hope that the pains of her chaperonage were approaching their term, and she heartily indorsed Frida's invitation to come to lunch, and come early.

Then I saw them into their carriage, refusing their proffered seat, for I wished to be alone with my new found happiness.

The night was fine, the air soft, under the pale sky, for dawn was near at hand, and I stepped out gayly, with all the buoyancy of one with whom the world went well.

I was brought up shortly and sharply to the realities of life by running up plump against my "shadow." The man who had stuck to my heels so pertinaciously all the evening was still on the watch.

But he was not lurking in the recesses of a house porch. I met him face to face upon the pavement, and he could not escape me.

"Look here, my fine fellow," I cried, tackling him at once, "this has gone a little too far. Take yourself off, now, or I shall give you in charge. Come—walk."

Then I caught sight of his face under the gas lamp and instantly recognized it.

"What, you, Mr. Snuyzer?" I laughed aloud. "Upon my word, I am infinitely obliged to you. But really you might have saved yourself the trouble. And—pardon my saying so—I don't think you do it very well."

He would not own up at all. "Easy, guv'nor, easy," he answered, with a well assumed snuffling voice. "Wot are you a-driving at? I've as good a right to be 'ere as you ev. Wot's amiss?"

"I tell you plainly, Mr. Snuyzer, it won't do," I continued. "I don't want you, and I won't have you dogging my footsteps wherever I go. It's not the way to get round me, and you'll have to drop it. Begin at once. Go your own road—that way—and I'll take this."

I pointed him down the Exhibition road, and I myself turned into Knightsbridge, and walking eastward, half disposed to do the whole distance on foot. But a hansom came up out of somewhere, a mews, or a side street, or overtook me on the road, and the driver, after the custom of his class, began at once to pester me with, "Cab! Cab, sir! Cab!" pulling up to my pace, and sticking to me most pertinaciously.

At last, out of sheer disgust, and to end his importunity, I jumped into the cab and gave my address in Clarges street.

I had barely lighted a cigar and leaned back to ponder over the many surprising and mainly pleasurable events of the day, when I realized that the cab was taking the wrong direction. For some strange and incomprehensible reason, the driver had turned round and was heading westward.

"Here, hi, hi!" I shouted, lifting the flap. "Where are you going?"

"Wot's up?" answered the cabby insolently, as he pulled up short. "Think I don't know my way about? Stow it, or"—

The alternative I never heard, for at that moment two men jumped up on the front tread of the cab and opening the doors threw themselves upon me. Their weight alone would have sufficed to overpower me, to silence me, and crush out all resistance. I could do no more than give voice to one frantic yell for help, for now the strong, pungent smell of chloroform under my nostrils and the vain struggle I made with fast increasing torpor told plainly that they had called in another dread ally, and that I was absolutely helpless in their hands.

CHAPTER V.

FROM SAUL J. SNUYZER OF MESSRS. SARABAND & SONS, NEW YORK CITY AND CHICAGO.

In my earnest desire to further the wishes and interests of your firm I visited the gentleman named in your last pleasure and put before him, briefly and with much circumspection, the reasons why he should secure the services of Messrs. Saraband & Sons. Captain Wood did not respond very cordially to my proposal, which he guessed was not serious. It is my settled conviction now that he would give the earth to reconsider that hasty and mistaken reply.

I shadowed him the evening of the first day, now just 48 hours ago, following him to the Hyde park, to his club, to his house. In Hyde park only one person spoke to Mr. Wood. I knew him by sight and name, a half American, Jimmy Lawford, having crossed with him once in the same Cunarder and taken a hand in the same game of poker in the smoking saloon. He passed then as an ocean drummer, although some said he was engaged in the secret service of the federal government. Now, I take it, he just loafs around—just the sort of chap to be in this crowd against Wood.

I did not hear what he said to Wood, but when leaving by the park gates I noticed Jimmy in close talk with a hansom cab man who had got off his perch and was very particular to hear what Lawford said.

I only caught the last word or two: "Any time tonight or tomorrow night. You'll get the office; mind you're on the quee vee."

I shadowed the captain all that blessed night, to the opera, out west, to several parties, and spoke to him, or rather he spoke me, roughly, too, at the door of a house in Prince's Gate, when he was seeing two ladies to their carriage. That was not quite the last of him, for somewhere near Knightsbridge he was picked up by a cab, and next thing it comes back, ten miles an hour, cabby standing up and flogging his horse like mad. It was so near daylight that I got a view inside the hansom as it passed me full tilt. I caught sight in that short moment of a mass of people inside the cab, two or more men struggling and fighting with some one underneath them.

[CONTINUED.]

Frogs In France.

In France it is illegal to capture frogs at night.

A Rockery.

In making a rockery begin with a foundation of small stones, broken bricks or similar material. Build in circular fashion against a wall or corner, finishing with large rocks. Fill crevices with good soil and fertilizer as you build and supply seeds and plants after moistening thoroughly with fine spray.

Australia's Climate.

The climate of western Australia is said to be most agreeable, for even if the midday sun is hot a cool breeze generally springs up toward evening, making the air almost chilly at night.

Diamond Cement.

To make diamond cement take five ounces of fine gelatin, four ounces of water and one ounce of glacial acetic acid. Let the mixture stand some hours, heat to effect solution and add ten drops of carbolic acid to keep from spoiling.

Fusel Oil Perfumes.

From the offensive fusel oil the skill of the chemist has been able to extract the odors of several flowers and fruits.

Good housekeepers should buy Blue Ribbon Tea, Coffee, Baking Powder, Jelly Powder, Flavoring Extracts, Spices etc., because they are the purest and most economical goods on the market.

Every up-to-date Grocer sells Blue Ribbon goods. Take our advice and insist upon having them.

Blue Ribbon Manufacturing Co

If two lovers spend four hours together and the lover takes or receives 200 kisses—low calculation—and each kiss lasts ten seconds, in five years' time the lover would have 365,000 kisses, and their lips would have been united for the space of forty-two days and six hours.

A REMARKABLE CASE

TOLD BY MR. ORLIN POST, OF GRUMIDGE, MANITOBA.

Suffered Greatly For Five Years From Rheumatism—Doctors and Many Medicines Failed to Help Him, But He Got the Right Medicine at Last.

From the Echo, Dominion City, Man.

Recently while chatting with a reporter of the Echo, Mr. Orlin Post, a well-known farmer of Grumidge, Man., gave the following story of five years of great suffering from that most painful of diseases—rheumatism. Mr. Post said:—"There are few people, unless they have been similarly afflicted, can understand how much I suffered during those five years from the pains of rheumatism. They were times when I was wholly unable to do any work, and to merely attempt to move my limbs caused the greatest agony. I tried several doctors but they seemed quite unable to cure me. Then I tried several advertised medicines, that were highly recommended for this trouble, but they also failed to bring the longed for release from pain. As these medicines failed me one after the other, I began to look upon the trouble as incurable, and was almost in despair. At this time some friends asked me why I did not try Dr. Williams' Pink Pills, and I decided to make at least one more effort to obtain a cure. I knew my case was not only a severe one, but from the failure of other medicines a stubborn one, and I determined that the pills should have a fair trial, so I bought a dozen boxes. I took them according to directions, and before they were gone there was a great improvement in my condition but I was not fully cured. I then got another half dozen boxes, and by the time the third of them were emptied I had not an ache or a pain left and was able to do a good hard day's work without feeling any of the torture that had for five years made my life miserable. You may say for me that I do not think there is any medicine in the world can equal Dr. Williams' Pink Pills as a cure for rheumatism. It is several years since my cure was effected, and as I have never since had the least sign of the trouble, I think I can speak with authority.

When such severe cases as this are entirely cured it is not surprising that Dr. Williams' Pink Pills have made such a great reputation throughout the world for the cure of other diseases due to poor or watery blood. Paralysis, St. Vitus' dance, anaemia, consumption, dyspepsia, palpitation of the heart, nervous headache, female ailments and neuralgia are among the other troubles they have cured in thousands of cases. Only the genuine pill will cure—substitutes never cured anything—and to avoid substitutes you must see that the full name "Dr. Williams' Pink Pills for Pale People." is on the wrapper around every box. These pills are sold by all dealers in medicine, or will be sent post free at 50 cents a box or six boxes for $2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Canada's Large Frogs.

Among large frogs Canada probably has the honor of owning the largest. It was grown on a small farm, Killarney, five miles from Fredericton, New Brunswick. Just before its death it was weighed and found to tip the scales at 48 pounds. Its length was 30 inches and height 18 inches. Across the back it measured 14 inches. Now, stuffed and mounted, it forms an exhibit of which the locality is proud.

If the entire population is considered to be 1,400,000,000, the brains of this number of human beings would weigh 1,922,712 tons, or as much as 96 ironclads of the ordinary size.

If attacked with cholera or summer complaint of any kind send at once for a bottle of Dr. J. D. Kellogg's Dysentry Cordial and use it according to directions. It acts with wonderful rapidity in subduing that dreadful disease that weakens the strongest man and that destroys the young and delicate. Those who have used this cholera medicine say it acts promptly, and never fails to effect a thorough cure.

A man smoking a pipe of medium size blows out of his mouth for every time he fills the pipe 700 smoke clouds. If he smokes four pipes a day, for twenty years, he blows out 20,440,000 smoke clouds.

MINARD'S LINIMENT is used by Physicians.

A Chicago Judge has held that a fourth wife has no ground for divorce in the fact that her husband insists that the mother of his first wife shall live with them. The court's view is that a man has a right to keep his mother-in-law in the house, "just as he has a right to keep a dog." Chicago papers are naturally wondering if wife No. 9 would have no grounds for divorce if the husband insisted in keeping his first three mothers-in-law in the house. But surely not even a Chicago man would insist on this.

Worms derange the whole system. Mother Graves' Worm Exterminator deranges worms, and gives rest to the sufferer, It only costs 25 cents to try it and be convinced.

He who has never known adversity is but half acquainted with himself or others.—Colton.

Idleness is as fatiguing as repose is sweet.—De Levis.

No wise man ever wished to be younger.—Swift.

Draw Corks Easily.

If you want to amuse friends at an evening party, tell them that you can draw a cork out of any bottle without a corkscrew. Of course they will laugh, but very soon it will be your turn to laugh.

Take a piece of sealing wax and hold one end of it over a lamp or gas jet until it becomes soft; then let some drops of the wax fall on the cork in the bottle. As soon as the cork is covered with wax you must press the piece which you hold in your hand against the cork, and you must hold it there until the wax is quite dry. Then it will be easy for you to draw out the cork by using the stick of wax, which adheres to it in the same manner as you would use a screw.

No matter how firmly fixed the cork may be, it will almost immediately yield to the pressure. You must, however, take care not to wrench the stick of wax away from it while you are drawing it out, and you must also see that the cork is perfectly dry before you pour any wax on it.

Bengal Tigers.

The man eater is usually an older tiger, whose strength is failing and whose teeth have partly lost their sharpness. Such a beast finds it easier to lurk in the vicinity of settlements and to pick up an occasional man, woman or child than to run down wild cattle.

The largest, fiercest and most brightly colored tigers are found in the province of Bengal, near the mouths of the Ganges river and not far from Calcutta. A full grown Bengal tiger sometimes measures ten feet from nose to tip of tail. Such a monster makes no more account of springing upon a man that a cat does of seizing a mouse. He surpasses the lion in strength and ferocity and has no rival among beasts of prey except the grizzly bear and the recently discovered giant bear of Alaska.

The Nile of Yore.

The ancient historians say that over 1,000 miles of the lower Nile were protected by artificial embankments and other works of engineering skill.

Strength of Brick.

It has been discovered that the weight required to crush a square inch of brick varies from 1,200 to 4,500 pounds.

GORDON HANGED.

THE MURDERER OF CHARLES DAW AND JACOB SMITH HANGED AT BRANDON.

Life Pronounced Extinct Thirteen Minutes After the Drop Fell.

With a brave, calm dignity, Walter Gordon walked to his death to-day without a tremor. Without hesitation or bravado he ascended the scaffold, and in less than 40 seconds from the time he left the jail Radcliffe had pulled the lever and human justice was satisfied.

GORDON'S LAST NIGHT.

Gordon's last night was spent partly in sleep, partly in quiet conversation and partly in earnest prayer. After chatting with the governor and with Mr. Henry at 2 o'clock he laid down to sleep till about 6 o'clock, he remained on his narrow bed and at times he seemed to be sleeping quietly. Then again he would toss about and appear to be suffering mentally. Probably he slept three hours in all. At 6 o'clock he arose, Rev. Mr. Henry and Governor Acton both visited him in the cell. He spoke quietly and without the slightest traces of nervousness. He dress-himself in a dark blue suit, with tan boots and a white shirt. He had on a low collar turned down in front, with a black and white tie. At 7 o'clock breakfast was brought to him, some ham and toast with strawberries, and a cup of strong tea was served but he ate little. He seemed to waste the last few moments of his twenty-four years of life in trivilaities.

RADCLIFFE APPEARS.

Shortly after breakfast Radcliffe, the hangman, entered the cell. "Good morning," said the executioner briefly, extending his hand. "Good morning," said Gordon in an even voice and the two men shook hands formally. Radcliffe always insists on shaking hands with the men it is his duty to kill.

PROCESSION TO THE SCAFFOLD.

The mournful little procession formed up and started on the march downstairs to the scaffold. Sheriff Henderson, who issued the tickets, took the utmost care that only those who had a direct interest in the case were allowed to see the execution. Few except the witnesses, the jury, newspapermen and medical men were present.

The scaffold was erected in the projection of the jail in the southeast corner of the yard. The scaffold was an unusual one. It was of the kind known as a closed in scaffold. That is, around the drop, on which the doomed man was to stand, a board fencing was erected ten feet in height. Only a small door was left for the prisoner and the officials to enter the scaffold. He was thus fenced off from the ground, and a blanket was hung over the door to still further obscure the sight, and the bottom portion of the scaffold, into which the body dropped was also tightly boarded with the exception of a small entrance. Radcliffe had reached the jail before seven o'clock. He then examined the scaffold thoroughly and tried the trap once or twice and once again after the crowd had entered. He glanced over the arrangements to see that nothing was lacking. Radcliffe as Gordon left the cell had

PINIONED THE PRISONER'S ARMS

behind his back. The Sheriff and Governor Acton walked first, the former dressed in black, and the latter in his uniform. Then came Gordon and close behind him were Radcliffe, Guard Bender and Guard Henderson, and Rev. Mr. Henry. The clergyman prayed aloud as they walked down the corridor towards the open door. Just to the right of the jail door were the stairs to the scaffold. As the procession came into the open air every head was bared, and when Gordon appeared a low murmur of sympathy passed over the crowd.. There were few men around the scaffold that looked as firmly and calmly up the stairs. His shoulders were thrown back and he noble as Walter Gordon. He walked carried his fine head high, and there was not a trace of defiance in his attitude. He simply looked the part of one who, no matter what his life had been, was prepared to die like a man. Gordon had a fine face. Apart from his crime he has lived a good life and has not even been a drunkard nor a profligate, and there was not a coarse line in his face profile. He was slightly pale, but it did not approach a pallor. He never even glanced at the crowd in front of the scaffold. Those with him and the jail surgeon, Dr. Anderson, took their places on the scaffold. The blanket was thrown over the door, but it did not conceal the view. Gordon took his place on the trap as the clergyman began the words of the Lord's Prayer. Gordon took one sweeping glance over the sky, turned his face fully on the sun that was just coming from under a cloud and at the words Our Father closed his eyes. Not the slightest tremor showed itself in his magnificent physique.

LAUNCHED INTO ETERNITY.

Radcliffe walked over to him. "Stand over a bit," he said at the same time shoving Gordon gently to the centre of the trap, and at the same time he placed the black cap over his eyes. The silence was as deep as that of the forest, or the ocean, and not a sound could be heard but the clergyman's trembling voice and then as the words "And forgive us our trespasses" were uttered, Radcliffe took a quick step and pulled the lever. The thick rope tightened in an instant and Gordon's body went crashing through the trap. There was a straining sound, and a sharp jerk and that was all, and Gordon had paid the penalty.

TREMBLED LIKE A LEAF.

Radcliffe came down from the scaffold first. He was trembling like a leaf. "My God, it's terrible, it's terrible sheriff," he repeated, but no one spoke, no one answered him, and as he passed through the crowd people drew to one side leaving a wide lane. "It's terrible," he repeated again. "Why did I ever start at this business," but no one even looked at him for all eyes were still fixed on the scaffold.

BLACK FLAG HOISTED.

At this moment the black flag was hoisted over the jail. Radcliffe did his work well, the after examination proved that every bone in the prisoner's neck was broken. Death must have been instantaneous

BROKE DOWN LAST NIGHT.

One of the most touching incidents of the whole sad affair was Gordon's breakdown last night. Only once did the iron nerve give way and that was when he talked to two small children. Governor Acton has two little daughters who showed Gordon much kindness and brought him books and flowers and candies occasionally, and last night they went to see him and bid him goodbye. Tears came to Gordon's eyes as the girls came to his cell and said good-bye. "I don't know what to say to you," said he has he broke down and cried like a child. Be good girls. You have been very, very kind to me and may God bless you." Gordon turned and threw himself sobbing on the bed as the children went away.

REV. MR. HENRY SPEAKS.

Rev. Mr. Henry did not care to say much for publication. He, however, said he thought a great deal had been said about Gordon in the press that was untrue. Gordon told him up to the last that every word of the confession he made was true, and any other stories were false. He made no further confession before his death nor did he give any message for the public. Gordon's last reference to the execution was yesterday when he said to a prison official, "I owe this debt and the debt shall be paid." Then he added, meditatively, "I always paid my debts," and this is true as all agree who knew Gordon well.

KING ALBERT OF SAXONY DEAD.

Head of One of the Oldest Ruling Houses in Europe Passes Away.

King Albert of Saxony died at 8.05 p. m. on Thursday.

King Albert, of Saxony, was the last of the generals who commanded the German army of 1870. As his majesty grew older, he shared in the idealization which influenced the group of great statesmen, which surrounded William 1. His sober life produced few incidents and his unobtrusive support of his own church, the Roman Catholic, never caused a conflict with popular opinion. The vast majority of the inhabitants of Saxony are Protestants.

Emperor William always referred to King Albert as a fatherly friend, It is understood that the emperor will also suspend his tour of the Rhine and return to Berlin to take part in the funeral of the dead king. The death of King Albert will certainly limit the festivities at Kiel, the latter part of this month, when it was purposed to hold a series of banquets. It is now not regarded probable that Emperor William will attend the Kiel regatta.

GOPHER'S EGGS.

The Glenboro Gazette tells this story at the expense of a young Englishman, who has not yet lost the tender green often associated with a new arrival in this country. He walked into the post office recently with a small box labelled "handle with care," and addressed to the old country. Mr. Duncan enquired of him the contents of the box and to his surprise was informed "gopher eggs.' Mr. Duncan remarked that he was not aware that gophers laid eggs. "Well," the young man replied, "I found them on the prairie, and they told me they were gopher eggs." Mr. Duncan told him that he could not take them, as it was contrary to the postal regulations to send anything of that nature through the mails, so the young man was unable to send this interesting souvenir to his friends. It has transpired that the "eggs" were small puff-balls.

BICYCLE FATALITIES.

AN OTTAWA AND A TORONTO LADY CRUSHED BY THE CARS.

C. P. R. Cashier at Fort William Suicides by Drowning.

Mrs. Dora Vedder mer a horrible and instantaneous death on Sparks street between Metcalf and Bank, Ottawa, about 11 o'clock Thursday night. She was riding on a bicycle, and, noticing an electric car approaching her, she turned around suddenly on to the other track, and fell in front of a car which was running close behind her. The car was so close to her that the motorman could not pull it up. The unfortunate woman had her skull crushed in, and was otherwise badly disfigured and mangled. Mrs. Dors Vedder was formerly a Mrs. Dora Tupper, and as she was separated from her husband for some time past, she went under her maiden name. She was 26 years of age, and lived on College avenue.

BISCUIT WORKER DEAD.

Minnie Dundas, aged 19, employed in a biscuit factory at Toronto, was killed while crossing the G. T. R. track to-night, by a special passenger train. She was wheeling across and was hit by an engine, her skull being crushed, death ensuing in a few minutes.

C. P. R. CASHIER SUICIDES.

William Verger, cashier in the C. P. R. freight office at Fort William, Ont., committed suicide by drowning in the Neebing river Thursday morning. The late Mr. Verger had been in the employ of the C. P. R. for eighteen years at this point, and was one of its most faithful employees. It is known that his domestic relations were not very pleasant, and of late he has been very despondent. Thursday morning at 6 o'clock he was seen to leave his home by the back and go towards the small river. He made straight for the C. P. R. track. A search party started for him at once, but no trace could be found, until about 10 o'clock, when his hat and coat were found under the railway bridge. The officers began dredging the rivers and at 5 o'clock his body was found near the place where he had thrown himself into the river. He had evidently left the house with the intention of committing suicide.

WIDOW DUPED BY A COUNT.

Pretty Mrs. Nagle Loses a Second Husband and $4,000.

A St. Paul, Minn. dispatch says: After less than two months: married life with her second husband believing herself the wife of a German count, Mrs. Otto Kern, formerly Mrs. Gustave Nagel is minus her husband and $3,300. Kern and the money disappeared simultaneously and the police are on his track.

Mrs. Nagle had been here years with the care of three children when a short time ago she met Otto Kern a good looking young Teuton who it is alleged declared himself a member of the German nobility. He made love to the widow and the couple were married here April 29 last. When Nagle died he left the Widow a modern brick store and frame store building on a large lot. The property the widow sold on her husband's advice, receiving $4,700. The money was placed in a trunk in the upper part of the brick store where the family lived. Kern and his wife had decided to go to Germany at once. He left her to inquire about the tickets but he did not return and Mrs. Kern found that all the money but 700 and a note for a small amount was gone. Mrs. Kern suspected she had been duped and notified the police. Mrs. Kerne is 29 years of age, Kern is a good looking man about thirty years.

James H. Johnson, a well known cattle dealer, of Brockville, went with a young woman to a Chinese restaurant, and during the evening was relieved if $347 in bills.

The girl, who gave her name as Nellie Murphy, was sentenced to one year in jail by Judge Choquet.

James Macaulay, M.D., the author, is dead. Deceased was born in Scotland in 1817. He was four years editor of Leisure Hour and the Literary Gazette, and wrote many interesting volumes of travel.

George Hague, joint manager of the Merchants' Bank of Canada, has announced his retirement from business.

John R. Peckeram, formerly treasurer of Niagara Falls, Ont., was sent up for trial on a charge of embezzlement.

The British Chancellor of the exchequer will reduce the duties on offal feedstuffs, and will consider reducing the maize tariff.

HUNTING BIG GAME.

Half-Breed Tells of a Fierce Battle Between Giants of the Forests of the North.

Certain portions of Manitoba rival the world famous new Brunswick woods for the wealth of big game which they contain. Moose and bear easily take the lead in these and furnish the finest kind of sport. Leon Moyie, a half-breed guide, trapper and farmer, has many interesting tales to tell of his experiences through Northern Manitoba. Last week he was in Winnipeg disposing of his surplus furs, and told the following story to a city newspaper :

It would be impossible to express in cold type the broken English in which the story was told, but it was practically as follows :

"Trapping is not as good as it used to be in my country, and though there is lots of big game, the season is so short that it is but little use to us. In the summer I run my farm, and raise lots of vegetables and grain, but in the fall I go shooting and take shooting parties in to where they can find game.

"Last fall I was engaged to take a party of four from Ontario,and was promised $25 eaxtra if they each got a good moose head. I met them at Selkirk, and after putting baggage and tents on board a fishing boat we started for Icelandic river, stopping at Husavich and Gimli, on the way up. We finally arrived at my farm at Isafold, and stopped there one night. The stuff was all loaded on a wagon there, and I took them south about twelve miles to where the big spruce timber is. On the way we saw lots of deer and moose tracks, and one bear had crossed the track. For three days after arriving in camp we hunted hard, but found no game, and then the snow began to fall. It was not heavy, but enough for tracking. On the fifth morning three of us started out, and about a mile from camp struck a fine trail which we followed for nearly an hour.

"Suddenly we heard sounds of moose fighting and after crawling a long distance we came in sight of battle.

"In a small clearing among the trees two big bulls had locked horns and were pushing each other back and forth without any seeming advantage to either. They were roaring and stamping and making a tremendous racket. We crawled up close and they paid no attention. I wanted to shoot, but the others would not let me as they wished to see how the fight would come out.

"At last the smaller one seemed to get the worst of it and backed away. We made ready to shoot, but the fight was not over yet. He stopped when he had gone about 20 yards, and, facing about, stood pawing up the moss. After working himself up to a beautiful frenzy he suddenly dropped his head and charged his enemy at full speed. The rush was frightful and we fully expected that one would be killed. The larger bull took the charge on the shoulder and it hardly seemed to jar him. The attacking moose seemed surprised, but he was not given long to plan another attack, for the big fellow reared up on his hind legs and brought his sharp forefeet down on his antagonist's skull like the blow of an axe. The blow would have shaken a house and the other moose fell without a struggle.

"The big fellow was not content, but stamped and butted his fallen foe for some time, till a ball behind the shoulder laid him alongside his antagonist.

"When we examined them we found that the skull of the smaller moose was crushed and his ribs broken. A few days later we killed two other big bulls, and I got my promised reward."

LANDSLIDE IN QUEBEC.

Two Lives Lost and Considerable Damage in Bellechasse County.

In the parish of St. Valier, county of Bellechasse, Que., a landslide of considerable extent occurred at a place called Second Range, near the railway station and close to the Little River Blanche, on the property of Joseph Lecomte. It demolished the flour mill and the private dwelling of Raymond Bilodeaux. Mr. Bilodeaux and a girl aged 5 were buried in the ruins. Mrs. Bolideaux was got from under the ruins half an hour after the accident in a dying condition, with both legs broken and otherwise bruised on the body. She only lived two hours. The mill and house were carried over thirty feet east of their original place.

Joseph Lecomte loses about two acres of beautiful land all in seed, representing almost half of his seeding for the year. No sign is left of the river. It is only a pile of wet sand. The bridge that was used for crossing the river and part of the highway were carried over thirty feet further to the north, leaving a hollow where the public highway was. The municipality will have considerable work to repair the damage through the landslide, which was caused by the high spring-tides flowing into West river.

ROBERTS EULOGIZES

HE OFFICIALLY RECOGNIZES THE GALLANTRY OF CANADIANS IN THE FIELD.

LIEUTENANT THOMPSON, OF OTWAWA RECEIVES THE QUEEN'S SCARF.

A cable from London says : The official Gazette publishes a long dispatch from Lord Roberts, being a continuation of the field dispatches written when he was in command in South Africa. The communication throws no new light on the operations in the field.

Appended thereto is a long list of those signalled for distinguished mention. Lord Roberts speaks highly of the Canadian contingent, especially in connection with the unsuccessful attack on Goodson's Camp, March 31, 1900, in which he says the Canadian Mounted Rifles sustained the heaviest loss of the day. He particularly comments on the gallantry of Lieut. Bruce Carruthers.

In conclusion Lord Roberts says he wishes to record the fact that in April. 1900, Queen Victoria entrusted him with four wool scarfs worked by herself which she desired to be distributed to four distinguished private soldiers of the colonial contingents of Canada, Australia, New Zealand and South Africa. The selection of the regiments in each case was left to the colonial officer commanding the contingent. The Canadian scarf goes to Private (now lieutenant) Richard Rowland Thompson, of the Royal Canadian Regiment, 1st contingent, formerly of the 43rd Ottawa and Carleton Rifles, for personal gallantry in the field.

The Gazette has published dispatches received from Lord Kitchener, dated April, 1902, which refer to the defeat and capture of Lord Methuen. In these messages Lord Kitchener expressed the opinion that General Methuen's reverse was due to the behavior of the bulk of the mounted troops of his command, who offered a feeble and inefficient resistance and then left the infantry and the guns to struggle against superior numbers.

In another dispatch, dated March 31, he refers to the action at Brakspruit. Lord Kitchener praises highly the gallant stand made in this engagement by a handful of Canadians in an isolated position. Referring to this matter, Lord Kitchener remarks: "There have been few finer instances of heroism in the course of the whole campaign."

A Pretoria dispatch says : Lord Kitchener has sent the following identical telegram to Generals Botha, Delarey and DeWet : "Now that the surrender of the burghers is completed, I desire to place on record my high appreciation of the unflaging energy and the unfailing tact with which you have facilitated the work of my commissioners. I recognize how much is due to your exertions that the burghers have everywhere displayed such a loyal spirit in accepting the change of government, and I can inform you that the manner in which the burghers surrendered has greatly pleased His Majesty the King, and deeply impressed the British people, who are heartily anxious to welcome them as fellow citizens. I feel confident that a new era of complete reconciliation between all races has now dawned in South Africa."

The Boer general, Louis Botha, is going to Dresden, where his family had taken refuge, for the purpose of taking them back to South Africa.

DISTRESSING ACCIDENT.

A Shantyman's Axe Slips and Kills His Father—Distracted With Grief.

News comes from St. Agapit, county of Lotbiniere, of a tragic case of involuntary particide.

Martin Cazes, a farmer, was working with his two sons at the shanties of Mr. Nazaire Demers, of St. Giles, when the axe of one of the sons slipped, striking the father on the head. He fell mortally wounded. Medical aid was summoned, but the father died. The son is distracted with grief.

LEMAC'S SENTENCE COMMUTED

Tom Lemac, the Indian, now under sentence of death at Regina, has been granted a commutation. The murder, if such it could be called, took place some eight years ago. The order rescinding the death sentence was passed on June 17th.

Mr. W. R. Baker, assistant to the second vice-president and general manager of the Canadian Pacific railway, was operated on for for appendicitis at the Royal Victoria hospital, Montreal, on Saturday. Mr. Baker's condition is somewhat serious, but his recovery is hoped for.

THE STRIKE.

It is greatly to be regretted that the new General Manager, Mr. J. H. Tonkin, should find himself confronted with an incipient strike at the very outset, but he must not forget that this is a legacy from the same lax management which has been so much in evidence during the recent enquiry Lack of discipline in one department is indicative of lack of system in all and it will be a long time before the most competent and determined man can overcome the accumulated difficulties of several years of bad management. As to the questions in dispute there seems to be reason in saying that the manager has a right to eight hours work for eight hours pay, and that the miners should supply coal to the tipple for eight hours in full measure. A lack of coal during the first two hours of a shift means not only idle drivers, trip runners. motor men and bankmen, but idle plant and machinery with restricted output. This does not mean that the cutters would have to mine coal for eight hours, no one could ask that, universal usage forbids it, but an eight hours shift is the minimum asked for by the miners in any country, it is the rule in B.C. and it means eight hours work, or it means nothing. We bespeak for the new manager a fair trial. He assures us that he accepts the position as he finds it with reference to wages and cutting rates and has no intention to interfere with either. With that assurance before us it seems reasonable to say that he is entitled to a full eight hour work on the shift. This is the time for a little forbearance on both sides. The confidence of the men has been shaken by their treatment in the past culminating in the recent deplorable disaster. The company have their troubles as everyone knows. There must be a spirit of compromise shown all round and we believe that if the new management is given a fair chance a few months will see a very different state of affairs and renewed prosperity for all concerned.

THE VISIT OF DEBS.

Eugene V. Debs will be in British Columbia next week delivering a series of lectures. His coming will probably mark the beginning of the work of consolidating the labor forces of the province with a view to capturing sufficient seats in the next provincial legislature to ensure for labor the balance of power. The ground work for this organization was laid some months ago at Kamloops, when the labor forces of the province foregathered and launched the Provincial Progressive party. The prime movers in this were men who have been prominently associated with the Western Federation of Miners. The annual convention of this body was held a few days ago in Denver, at which the socialistic principles of Debs were considered and adopted, and a resolution encouraging political effort to secure the introduction of the social reforms sought was approved. Close upon this we have the announcement that Mr. Debs is to visit this province and deliver addresses at all the points at which the workers of the Western Federation have succeeded in advancing the organizations of the wage-earners. Fernie is about the only important place in the Kootenays that Mr, Debs has overlooked, but whether the apostle of socialism visits Fernie or not it is safe to say that the effect of his tour through the rest of the district will be felt here.

Whether the visit of Debs at this juncture is desiralbe or not is very largely a matter of opinion, determined in the main by the opinions held upon the labor question by those who pass upon the visit. Debs for some time past has been an interesting personality in United States politics, and the indications are that he will continue so to be for some time. At one time he was the candidate of the socialistic-democratic party for president, but he is much better known as the president of the American Railway Union during the great strike of 1894. He is not an orator by any means. but he is a very impressive talker. In personal appearance he is not unlike the late Bill Nye. He also has humor, earnestness and logic, but this latter again depends greatly upon the point of view.

His political faith differs but little from that advanced by other socialists. He, like them, is up in the clouds most of the time, but he is candid in that he says the actual details cannot be given because they have not been worked out. He puts down public ownership as the key to the whole situation, but he says the socialism that he stands for would be willing to pay a fair price for that which it purchases, and would be content with modest beginnings.

To read Debs speeches and not know the man one would be inclined to put him down as a dreamer of pleasant dreams. But this would be far from the mark. He is one of the most aggressive in the growing army of the socialists of the United States, and will come to this province with a prestige which may be used with telling effect.

Throughout the Kootenays there are the germs of socialistic endeavor in the labor and kindred organizations that have been brought into being and it may be doubted if a man of the calibre of Debs could find any other field in the west which holds out greater promise for the propagation of his gospel than do the Kootenays. Like it as little as they may, the old parties will have to reckon with the socialistic-labor element in the next provincial elections, and they may as well prepare for it.

EDITORIAL NOTES.

The coal company should exclude ordinary blasting powder from their mines as soon as possible. The verdict of the jury and the expert evidence given during the inquest make this imperative.

* * *

Mr J. H. Tonkin states that the idea that he is opposed to Unions is erroneous. He admits the right of the men to form lodges whereever they like and will put no obstacle in the way but he draws the line at dealing with men who are not employees of the company when it comes to actual negotations in connection with mine matters. This is a decided advance on the action of the late management at Morrissey.

* * *

The supplementary estimates, which were voted in the last hours of the recent session, contain an item of $1,200 for additions to the Fernie lock-up. This is doubtless a make-shift vote and the people of Fernie will certainly so regret it. A vote of $1,200 will come as far short of meeting the jail requirements of Fernie as it would in ensuring the return of a government candidate in the next election.

* * *

President Mitchell, of the striking coal miners of Pennsylvania, will not suffer by reason of any comparison which may be instituted between his utterances, since the great strike began, and such of the presidents of the coal and railway companies as have considered it worth while to say anything on the situation. On the one side there is the labor champion who asks that the people of the United States pass upon their demand for a living wage in return for their labor, and couples with it the assurance that if they fail to substantiate the justice of their demand they will go back to work upon the old terms, There is a regard shown here for the interests of others who are not active participants in the strike, however much they may be affected by it. And that it is not the plea of impotence will be realized by even a cursory glimpse at the strike situation. The striking miners are conscious of their power. They know that the decision arrived at by their convention, which meets at Indianopolis in July next, an army of 360,000 wage-earners will be effected, and that if a general suspension of work is ordered they can close down operations in mines producing 212,000,000 tons of coal annually, the effect of which would be a complete paralysis of the industries of the United States, and the tying up of transportation facilities from one end of the country to the other. Here is a power, which while it remains has not an equal in the world, and though it may be dissipated, so that it may fail in the accomplishment of its purpose, there are none who will deny that even failing power to win in the present struggle this giant combination of labor has the means at hand of doing almost incalculable damage and mischief. In three months time they could bring about a coal famine in every corner of the United States·

Yet the president of the striking miners does not threaten. He hints at the disastrous consequences which would attend a general suspension of work, but that is all ; and further, in order that trouble may not be precipitated, he throws the date for this important conference of miners three weeks ahead, and at a time when the strikers of Pennsylvania are already beginning to feel the pinch of famine. With a moderation and a dignity which it would be difficult to excell, he asks simply that the people of the United States, who are vitally interested in the dispute, should have a right to say whether in the interests of the country as a whole the allied railway and coal mining companies operating the collieries in Pennsylvania shall not forego a portion of their inordinate profits so that the white slaves at work in them shall be permitted to earn something more than $300 per annum, a wage which is less than one dollar per day. Is it any wonder that there are disturbances in the mining sections?

Of the leaders of the opposing force, what of them? The only one who has so far expressed himself over his own signature is H. M. Oliphant, the president of the Deleware & Hudson railway company. He is defiant and threatening. With an arrogance which has fattened on the underpaid labor of the serfs in his companies collieries, he asserts that there shall be no arbitrator. That the interests of the people of the whole country have no right to intervene between his company and its profits, and that the former shall be set a naught with the coal operators enter upon their campaign of starving the mine-workers into submission.

LIQUOR LICENSE ACT.

I, Eugene Walter, of Morrissey, B.C., hereby apply to the Board of License commissioners for a hotel transfer of my license to sell intoxicating liquors under the provisions of the statutes in that behalf in the prenises known and described as The Hotel Walter, to the premises known as the Elk Hotel. at a point about two miles west of the present Hotel Walter, to commence on the 1st day of July, 1902.

LOCAL AND GENERAL.

Dr. Bonnell was in Cranbrook on Thursday of this week.

Mrs. W. W. Tuttle is the guest of friends in Spokane this week.

The legislation permitting boys 18 years of age to vote has been revoked.

Major Howe, N.W.M.P., is in town looking up recruits for that branch of the service.

Dr. Bonnell has closed his hospital at Elko as the construction work of the Great Northern is nearly completed.

J. E. Mills, real estate agent, has gone on a business trip to the boundary country and will return in ten or twelve days.

Strike for great clearing sale at the Imperial, of men's ready made clothing, underwear, shirts, boots and shoes. Everything goes.

W. Piper, well known in town as the invincible goal keeper for the football team, left yesterday for a visit to his home in England.

Mr. and Mrs. E. Neale entertained a large number of friends at the Empire Boarding house on Monday evening last. An enjoyable time was spent.

Wm. Blakemore, who has been in town for the past two weeks in connection with the inquest, left for the Similikameen Valley on Wednesday of this week.

The boxing contest last night between M. Monahan, of Fernie, and Parsons, of Winnipeg, drew a small house. Monahon got the decision in the second round, Parsons refusing to enter the ring for a third round

The Fernie lacrosse team will no doubt have an easy thing on Tuesday next in the match with Cranbrook. The football team of that town defeated the lacrosse boys at their own game on Friday last by a score of 3-2.

The junior entertainment and ice-cream social, which was posponed on the 24th of May owing to the mining disaster, is arranged to come off at the Army Barracks to-night. All persons holding tickets dated May 24th may use them to-night. To-morrow night's subject will be: "God's Hand in the 20th Century." Seats free.

Professor Parkes' "Panoramic Tour of the Great Northland" to be given tonight in Princess hall promises to be of more than usual interest as the professor has been on the ground and has all the experience of a practical miner. The display consists of pictures secured by himself during a four years sojourn in the far north. The professor comes well recommended by the press.

The programme for the celebration on July 1st has been arranged and will consist of a lacrosse match at 9:30 in the morning between Cranbrook and Fernie; Gentry Bros' show, 11 o'clock; football match between Cranbrook and Fernie, at 1:30; baseball match, Cranbrook vs. Fernie, at 3 p.m. The baseball match will be followed by a programme of racing, jumping, tug-of-war, etc. At 8 p.m. Gentry Bros. will give another performance and at 9 o'clock the Athletic Association have made arrangements for a ball in Princess hall. Twenty per. cent of the entire proceeds will go toward the relief fund. The admission to the sports has been fixed, mornin, 25 cts.; afternoon, 50 cts., and $1 50 to the ball.

The Fernie Vigilance committee has appeared this week in a new role. Some few weeks ago it became evident that the people who wished to remain in town would have to keep strict guard over their tongues lest, some unguarded remark should bring on them the "tie pass" which has become such a fad with the "committee". But now it is evident that a closed mouth is not the only safeguard necessary and it behooves one and all to look well to their morals lest at some moment when they think not their weaknesses shall be revealed to that austere dictator and themselves compelled to remove from the scene of temptation. At any rate such is the punishment that has been meted out to two individuals who have been found guilty of making goo goo eyes at other men's wives. To state the story briefly J. Croft, one of the culprits who has been playing the part of the serpant, has crawled into J. Shafford's home and persuaded that erring piece of feminity, Joe's wife, to eat of the forbidden fruit; the other is a Slav named, Alex. Kiptyk, who made a mistake and camped at the wrong man's house. Their misconduct was such a flagrant breach of the committee's code of honor that Sunday night a delegation, taking advantage of the fact that the police had been out all night Saturday, waited on the two gentlemen and conveyed them some distance down the track. The Slav was so terrified that he gave all the money that he had on him to the mob, some thirty dollars, and he was allowed to leave without an escourt.

Piano for Sale.—Cheap. Apply at the Hill & Dill Co. x

School closed on Wednesday for the summer holidays.

Mr. Harry Watson, was in Frank on business on Friday of this week.

J. H. Tonkin left this morning for the coast. He will be gone two or three weeks.

Quite a number of rooters went to Lethbridge on Thursday with the lacrosse team.

Mr. N. Suddaby, of the Fernie Drug Store, is taking a weeks holidays down on the prairie.

Mrs. L. M. Proctor and family left yesterday for Ogdensburg, N.Y., where they expect to spend the summer.

The Salvation Army gave a picnic to their Sunday School children on Tuesday afternoon in the park. There was a large turnout of the little ones and a happy time was spent.

Produce Business

For Sale.—The produce business carried on by the Dill & Hill Co. for the last year, is offered for sale at a bargain This is a splendid chance for anyone wishing to go into the business.

Tenders are being asked for the erection of a one-room school house at the mines. Work is to be commenced shortly and it is expected the school will be completed in time for the opening after the holidays.

The following notices were posted on Wednesday of this week:—"To Whom it may Concern:—I am this day advised that unsurveyed, unoccupied and unissued land lying northwest of the Elk river and east of the eastern boundary of lot 4590, group 1, Kootenay district, is open for entry under the land act.

The "Imperial Limited" will carry a baggage car, first-class sleepers, tourist and dining cars, and a day coach between Winnipeg and Fort William only. It will be necessary for passangers travelling on this train to pay berth rates either in the sleeper or tourist car from the point at which they board the train to their destination.

Anniversary and Dedicatory Service will be conducted at the public opening of the new Baptist church, Victoria Ave., on Sunday, June 29th. Morning service at 11 o'clock, evening service at 7.30. Sermons of the day will be preached by the General Superintendent of Missions and other reverend gentlemen from the west. Appropriate musical selections and solos will be rendered. The ordinance of baptism will be administered in the new church during these services. All are invited to attend.

.....MEANS BUSINESS.....
Have you seen his latest stock of goods? No? That is strange. Why, he is becoming the talk of the town. Don't you know that he is now prepared to adorn his customers with the cheapest yet most durable apparel in Fernie. Not only with up-to-date suitings, but with shirts, ties, collars cuffs, socks, hats and caps. In fact he will fit you out from head to foot at prices within the reach of all. Call and inspect his stock.
Opposite the Royal Hotel.

BRITISH COMMONS

JOHN MORLEY MOVES AN AMENDMENT TO THE GRAIN ACT.

CHANCELLOR OF EXCHEQUER MAKES AN IMPORTANT STATEMENT.

A cable from London of the 18th inst. says: When the House of Commons took up the consideration of the amended Finance Bill Mr. John Morley (Liberal), precipitated a long debate by moving to omit the clause imposing a duty on grain.

Sir Charles Dilke (Advanced Radical), and others of the opposition, demanded a specific statement from the chancellor of the exchequer in regard to the government's attitude at the coming conference of the colonial premiers. It was obvious, it was asserted, that the conference might change the whole fiscal policy of the country and before committing itself, the government ought to give the House an opportunity for a full discussion of the matter.

The chancellor of the exchequer emphatically repudiated the suggestion that the government was contemplating a revolution in its financial policy and said in behalf of himself and his colleagues that he wholly disfavored such an idea. It was not the policy of the government to endeavor to encourage the trade with the colonies by initiating a tariff war with other countries.

The motion to omit the clause imposing a duty on grain was defeated by 251 to 178 votes, a majority of 73.

TAX ON MAIZE REDUCED.

The chancellor of the exchequer replying to John Redmond, the Irish leader, announced that the tax on maize would be reduced by one-half. He explained that the cutting of the duty on maize involved a loss of £300,000 ($1,500,000) in revenue. The effect of the duty on Ireland, however, and other considerations, justified the acceptance of the amendment moved from the Irish benches.

The duty on maize is now 1½ pence (3 cents), per hundredweight.

KITCHENER GRANT ADOPTED.

After considerable opposition from the Nationalist and Radical members of the House of Commons, and the application of the closure, the grant of £50,000 to Lord Kitchener in consideration of his important in South Africa, was adopted.

AN AUTUMN SESSION.

The government has finally decided that it will be necessary to have an autumn session of parliament in order to dispose of the Education Bill and other business. The announcement made by Sir Michael Hicks-Beach in the House of Commons, that the tax on maize would be reduced by one-half has been accepted on both sides of the House as a finally disposing of the idea of a British Zollverein and the protectionist party in parlaiment is greatly disappointed at the chancellor of the exchequer deliberately publishing the idea.

JOINED THE LIBERALS.

There is excitement in political circles as the result of the announcement that the Duke of Westminster intends to take an active part in politics as a supporter of Sir Henry Campbell-Bannerman, the Liberal leader in the House of Commons. This decision is somewhat surprising as the Duke of Westminster served a year in South Africa as private secretary to Lord Milner, the British high commissioner. The Duke's accession to the Liberal ranks is likely to be important from the view point of party finance.

SIR R. GIFFEN'S CONCLUSIONS.

Sir. Robert Giffin, a prominent statistician, financial writer and a recognized authority on subjects of trade and commerce writes to the Times claiming Col. Denison:s proposed preference tax of 5 to 10 per cent. would at a 10 per cent. basis make Britain pay £41,000,000 taxation in addition to £11,000,000 in increased prices for colonial goods, whereas the colonies would pay only £3,500,000 and get the enhanced price of £11,000,000 for their goods. Sir. Robert adds preferential arrangements of this kind, while popular in the colonies would bring disaster to the trade of Great Britain.

It is extremely doubtful if the postmaster-general of Great Britain can be persuaded to reduce postal rates on papers and magazines to Canada. He has refused to reduce the present inland half-penny rate for every two ounces of printed matter. The opinion prevails here Canada is too generous in allowing trade papers the same rate as legitimate daily and weekly newspapers.

DROUTH IN TEXAS.

Rains are reparted from only a small portion of Northeast Texas, where the corn and cotton crops are said to have been in better condition than in any other portion of the state. Outside of this limit the outlook for any corn crop in Texas this year is gloomy.

Looping the Loop--A Seventh Wonder

One of the marvels of the age in sensational show features is the perilous feat known as "Loop the Loop" which will be performed at the Winnipeg Industrial exhibition July 21 to 25, this year. Diavolo, who does the trick, knows full well the danger he runs every time he performs it. In Minneapolis, the second day of the Elks' fair, Diavolo forgot his usual caution and was hurled from the track to the soft sawdust beneath, a distance of over thirty feet. Fortunately he escaped serious injury, and will be in good condition to appear at Winnipeg's big fair. To the ordinary observer, the "Loop the Loop" performance looks like a man riding head down on a bicycle track like a fly on the ceiling.

The public has been surfeited with bicycle riding tricks of the ordinary sort, and the Winnipeg Industrial exhibition management claims that it has in Diavolo a feature that will be perhaps one of the biggest drawing cards at the fair this year.

Late reports in regard to Diavolo's condition are most favorable. He suffered a severe shock, but says that no mishaps will occur in the future. The performance will be given in Canada for the first time at the Winnipeg Industrial, July 21 to 25.

RAILWAY SMASH-UP.

FLYING EXPRESS CRASHES INTO A WINNIPEG TRAIN.

SEVEN KILLED, THIRTY INJURED—WINNIPEG PASSENGERS ESCAPE.

Seven people were killed and four badly injured in a wreck on the Northern Pacific at Dower Lake, near Staples, Minn., early Friday morning.

Passenger train No. 7, westbound, was on the siding waiting for No. 8, eastbound, to pass. No. 8 ran through an open switch and crashed into the train on the siding. The eastbound train was running thirty-five miles an hour. An investigation is being held to determine the cause of the wreck, which was apparently due to a misunderstanding of orders.

The trains in collision are both local, the westbound train being the one which left St. Paul last evening. There was a terrific crash when the trains met and both engineers and one fireman were buried in the wreck. The passengers were all bumped about but only one suffered any severe injury. The three trainmen injured are all expected to recover.

THE WRECK IS THE WORST.

that ever occurred on the road and it seems miraculous more passengers did not sustain fatal injuries. It was dark when the flying train crashed into the load of passengers on the siding and those who escaped say the scene was terrible. The lights went out leaving the panic-striken and injured passengers to scramble out as best they could. Two big locomotives were smashed and thrown over on their sides the coaches nearest to the engine were thrown from the track and only the rear car remained in an upright position.

The wrecking train was sent at once from Brainerd carrying physicians and nurses, and those most injured were taken to the hospital at Brainerd. Some of those less hurt continued on their journey, while others are being cared for by the company. The cause of the accident is a mystery to the officials of the company in this city. Whether it was a fatal error on the part of some employee or whether it was malice is not known. Some of the circumstances surrounding the wreck are exceedingly hard to explain.

MARK TWAIN RETIRES.

Mr. Samuel L. Clemens (Mark Twain), states that he has retired forever from the public platform. It is said that, prior to going abroad, Mr. Clemens placed his financial affairs in the hands of Mr. H. H. Rogers, the Standard Oil magnate, with the result that he has paid off all the debts of the late publishing firm with which he was connected, and is now an independently wealthy man.

SOUTH AFRICA COMMANDS.

The reorganization of all the South African commands, including those of Cape Colony and Natal, is left entirely in the hands of Lord Kitchener, whose recommendations will be followed. General Sir John French will return at once from Cape Colony to take over the Aldershot command.

The King of Saxony is dead.

It is said that a suicide club exists in Ottawa.

Twenty men narrowly escaped asphyxiation in Sarnia tunnel.

Wheat advanced a cent on Chicago and N. Y. markets.

J. M. Martin, ex-M. P. for Rossland, B. C., is dead.

Mont Pelee is again in eruption. Twenty-two houses have been destroyed.

The New Westminster lacrosse club was suitably welcomed in Winnipeg en route east.

Patrick McHugh, Nationalist member of the British Commons has been sentenced to three months in jail for contempt of court.

The mayor of Paterson, N. J., has issued drastic instructions to stop further disorders and has dismissed the chief of police.

The Toronto Street Railway Co. has made an offer of an increased wage schedule to the men but a strike is still probable.

The general convention of U. S. coal miners has been called for July 17. Michigan miners will obey but in Iowa the sentiment is against a strike.

Particulars are reported to have come to hand of a successful swindle in connection with booking grand stand seats for the coronation procession, by which a couple of astute Americans have made a considerable haul at the expense of the British public.

A cow moose made her appearance in the west end of the town yesterday, says the Fort William Times Journal, and calmly ate off the young trees and whatever vegetable matter it could find that was palatable. After satisfying her appetite and curiosity she trotted off towards the bush.

He—Will you marry me?
She—No.
He—Whom are you going to marry?
She—I shall marry whom I please.
He—Well, you please me.

Australia, twenty-six times larger than the whole of the British Isles, has a population smaller than that of London.

THE REAL THING.

Hotel Clerk—Suite, I suppose)
Youngwed—That's what. She's the sweetest thing that ever happened.—Chicago News.

"I suppose you own the house you live in?"
"I used to."
"Sold it, eh?"
"No; got married."

STREET CAR STRIKE.

FOURTEEN HUNDRED MILITIA ORDERED OUT IN TORONTO.

CARS STONED AND NEW EMPLOYEES BADLY INJURED. BARNS DAMAGED.

The Toronto street railway strike has assumed an unexpectedly serious aspect and the militia has been called out for duty Monday morning. According to Saturday's announcement the company undertook to run Sunday morning. They had a number of non-union men and plenty of extras prepared to make the effort. The chief point of trouble was the East End barns. A great crowd had gathered here about 7 o'clock. No doubt strikers were present in numbers, but there were hoodlums and alleged sympathizers in thousands.

At ten minutes to 8 o'clock a car ran out of the barns in charge of Motorman W. Ferrier and Conductor W. Whitehead. The car was instantly stoned and the men were struck and the windows of the car smashed. W. H. Moore, private secretary for President Wm. Mackenzie, was on the car and was also severely hurt. Both car men were badly cut on the head, but not dangerously hurt. The The second car was taken out by Motorman Quigley and was also stoned and Quigley very seriously hurt. He was taken to the hospital and a scalp wound stitched up. The worst wound was, however, from a stone which struck his jaw and the latest report is that the result may be fatal.

The situation was carefully considered and at four o'clock a requisition was made on Col. Buchan for a military force to maintain order. Col. Buchan therefore ordered out 1,400 men. Half of this force will be mounted and will come from Niagara camp to be composed as follows: 250 London Hussars, 250 Second Dragoons, Niagara district; 150 Body Guard and 100 Toronto Rifles. These mounted men left on three special trains to-night over the Michigan Central and will arrive in time to report for duty at six o'clock. Col. Buchan also ordered out 300 of the Queen's Own, 200 Royal Grenadiers and 200 Highlanders. These are ordered to parade at a quarter before 8 o'clock fully eqpipped with ten rounds of ball cartridge. The infantry will be kept in reserve at the armories for emergency. The mounted men will cover points at which the cars will be taken out; the company has announced its intention to run belt line cars. A magistrate will go with each detatchment of militia prepared to read the Riot act if occasion requires.

Further disturbances broke out Sunday night and the car barns in the north and east end were attacked by a crowd and considerable damage done.

President Mackenzie returned to the city Sunday afternoon on a special train from Winnipeg. He refuses to make any statement.

THE STRIKE OVER.

The Toronto Street Railway company and the strike manager have reached an agreement to be ratified by the men at 1 o'clock. The strike is therefore over. Cars will run late this afternoon.

The street railway company have made concessions and each side claims a victory. The men get the wages asked for and a recognition of scores in not being compelled to recognize the union.

BUFFALO DOCTOR KILLED.

Supposed to Have Been Shot By His Wife.

Dr. Jacob F. Meyer, one of the best known surgeons of Buffalo, was shot Friday night and almost instantly killed. His wife, who was the first person to inform the police of the shooting of her husband, is at an east side police station. No charge has been made against Mrs. Meyer. The police say she is being kept under surveillance because of her nervous condition. Mrs. Meyer has made several disconnected statements about the shooting, referring to a scuffle between herself and her husband. Mrs. Meyer is a Toronto woman.

BOER PRISONERS AND ORPHANS

Mr. Chamberlain stated in reply to a question in the House of Commons, that there are 25,555 burgher prisoners in British hands, made up as follows:

Cape Colony	1,055
Natal	885
St. Helena	5,679
Bermuda	4,534
Ceylon	4,938
India	8,434

Of these 783 are boys under 16 and 1,025 men over 60.

Militia changes in the west.

The Fortnightly Review in an editorial expresses itself as apprehensively dubious concerning Great Britain's capacity for the self-imposed task of governing one-quarter of the globe and one-third of its inhabitants. The paper hazards the conjecture that the peace at Pretoria, marks the limit of Great Britain's expansion and that she has fought her last war of conquest.

The bells of Dresden, Saxony, were tolled Friday in memory of King Albert, who died Thursday at the Castle of Sibyllenort, and Dresdin was hung in black. The Saxon ministry has proclaimed Prince George, brother of the late king, king of Saxony. Prince George has taken the oath of allegiance.

THE BEST PAID POSTMAN.

Thirty-five thousand dollars a year would seem to be a pretty fair salary for a postman to earn, yet the United States government thinks itself lucky in being able to engage a man for that figure to carry the mails between Eagle and Naldery, in Alaska. The distance is 414 miles, and the postman makes two trips a month, limiting himself to 300lbs. weight each journey. He makes the trip by dog-sledge, and has probably about as exciting a round as any postman in the world.

Col. Cook, of Montreal, has been awarded $100 damages from Col. Cole for illegal arrest for refusing to order out his men in connection with the Valleyfield strike riots.

FERNIE FREE PRESS.

FERNIE, B.C.

The cabled report of the terms of peace said that "all burghers outside the limits of the Transvaal and Orange River Colony," etc., were to be brought back to their homes. The correct version, according to London papers, is "all burghers in the field, outside," etc. This makes rather a material difference to those refugees in the United States who intended applying to the British authorities to pay their passages to South Africa.

WIRE WOUNDS.

My mare, a very valuable one, was badly cut and bruised by being caught io a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better, until, after three weeks, the sores have healed, and best of all the hair is growing well, and is not white, as is most always the case in horse wounds.

F. M. DOUCET.

Weymouth.

London has maintained for many years pre-eminence in the fur trade. American and Russian buyers both visit that city to buy furs originally taken in their own respective countries. The sales amount to $20,000-000 a year.

Keep MINARD'S LINIMENT in the House.

Between two evils choose neither; between two goods, choose both.—Tryon Edwards.

Do not ask a man if he has been through college. Ask if a college has been through him.—Chapin.

It is estimated that there are about 2,000 negro lawyers in the United States.

A DINNER PILL—Many persons suffer excrutiating agony after partaking of a hearty dinner. The food partaken of is like a ball of lead upon the stomach, and instead of being a healthy nutriment it becomes a poison to the system. Dr. Parmelee's Vegetable Pills are wonderful correctives of such troubles. They correct acidity, open secretions and convert the food partaken of into healthy nutriment. They are just the medicine to take if troubled with indigestion or dyspepsia.

The biggest raft ever sent down the Mississippi is on its way to St. Louis. It contains 11,000,000 feet of logs, and requires two powerful steamers to handle it.

The Brightest Flowers must fade, but young lives endangered by severe coughs and colds may be preserved by Dr. Thomas' Eclectric Oil. Croup, whooping cough, bronchitis, in short all affections of the throat and lungs, are relieved by this sterling preparation, which also remedies rheumatic pains, sores, bruises, piles, kidney difficulty, and is most economic.

A woman who was charged at Highgate, London, with being drunk and incapable pleaded that family troubles had made her take to drink. One daughter, she said, had been poisoned, another hanged, a son had been killed in a railway accident, and another was in an asylum. She was discharged.

How's This?

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price 75c per bottle. Sold by all druggists. Testimonials free.

Hall's Family Pills are the best.

If you see one cold and vehement at the same time, set him down for a fanatic.—Lavater.

Clap an extinguisher upon your irony, if you are unhappily blessed with a vein of it.—Lamb.

As your enemy's and your friends, so are you.—Lavater.

A lady writes: "I was enabled to remove the corns, root and branch, by the use of Holloway's Corn Cure." Others who have tried it have the same experience.

The greatest medecine is a true friend.—Sir. W. Temple.

Good taste is the modesty of the mind.—Mme. de Girardin.

Short sentences drawn from a long experience.—Cervantes.

Atheism is rather in the life than in the heart of man.—Bacon.

The eternal stars shine out as soon as it is dark enough.—Carlyle.

Shun equally a sombre air and vivacious sallies.—Marcus Antoninus.

Our souls much farther than our eyes can see.—Drayton.

Next to excellence is the appreciation of it.—Thackeray.

I love to lose myself in other men's minds.—Lamb.

Art is nature concentrated.—Balzac.

Shiloh's Consumption Cure

Cures Coughs and Colds at once. It has been doing this for half a century. It has saved hundreds of thousands of lives. It will save yours if you give it a chance. 25 cents a bottle. If after using it you are not satisfied with results, go to your druggist and get your money back. . . . .

Write to S. C. WELLS & Co., Toronto, Can., for free trial bottle.

Karl's Clover Root Tea corrects the Stomach

HALCYON HOT SPRINGS, B. C.

Without question the best and most effective springs in Canada for the cure of rheumatism, kidney or liver troubles. The medicinal qualities of the water are unequalled. Splendid hotel accommodation; fine fishing and hunting. An ideal spot for the invalid.

Maxim's cavalry gun, which fires 700 shots a minute, weighs but thirty pounds and can be carried strapped to a soldier's back. The gun he made for the Sultan of Turkey fires 770 shots a minute, but it is a field piece on wheels.

THANKS FOR BOTH

French Gentleman Gracefully Expresses His Own and His Wife's Gratitude.

A Strong Letter Written With the Noble Purpose of Trying to Benefit Someone Else.

St. Hippolyte, Que., June 23.—(Special)—Mr. L. A. Paquin of this village has written for publication the following letter. In it he speaks for both himself and his wife. The letter reads:

"After much suffering I had become unable to work. I had Kidney Trouble which gave me great pain.

"My wife had used a box of Dodd's Kidney Pills for a similar trouble some time before, and as they had completely restored her to good health I made up my mind to take a treatment myself.

"I was not disappointed, and I can now say that I have tried and proved Dodd's Kidney Pills to be the greatest medicine in the world.

"We are now both quite well and able to do our work as well as ever.

"We have found Dodd's Kidney Pills to be a remedy, which saves us the pains and trouble which we often see in others, who are languishing and incapable of attending to their work.

"We keep Dodd's Kidney Pills constantly on hand, and use them occasionally if we feel the slightest indisposition. We have used altogether between us six boxes.

"Perhaps I should explain why I write this letter. It is because I feel there may be many others who have not heard of Dodd's Kidney Pills, or who having heard, have not given them a trial, and to such I would say 'Give Dodd's Kidney Pills a fair trial and you will agree with my wife and myself that there is not any other such medicine to be had.'"

What Dodd's Kidney Pills have done for Mr. Paquin and his good wife they will do for any man or woman who suffers from Kidney Disease in any form.

@It is now proposed in England to drive tram cars by power derived from huge springs, which can be wound while the whole is in motion or otherwise.

Mrs. Celeste Coon, Syracuse, N. Y., writes: "For years I could not eat many kinds of food without producing a burning, excrutiating pain in my stomach. I took Parmelee's according to directions under the head of 'Dyspepsia or Indigestion' One box entirely cured me. I can now eat anything I choose, without distressing me in the least." These pills do not cause pain or griping, and should be used when a cathartic is required.

Those who complain most are most to be complained of.—Matthew Henry.

Ask for Minard's and take no other.

Hope is a leaf-joy which may be beaten out to a great extension, like gold.—Bacon.

MARKETS.

WHEAT.

The local market has been dull all the week and at first was not inclined to advance with the outside market. Exporters seem to find it hard work to do any business and complain that export bids are out of line with prices here. Referring to the latest mail advices of sales of Manitoba wheat made on June 6th and 7th to Liverpool and London and figuring out freight and expenses it is seen that the prices sold at were 1½c to 2c per bushel under what the wheat was bringing here in store, Fort William, on the same days, so that there is no wonder exporters have been slow in buying lately. While there has not been a great deal doing prices have hardened. They closed a week ago at 1 hard, 74¼c; 1 northern, 72c; and 2 northern 70¾c, in store, Fort William, spot or June delivery. In the first days of the week they advanced ¼c daily but on Thursday and yesterday the advances were larger and at the close of Friday's business we quote values: 1 hard, 76¼c; 1 northern, 74¼c; and 2 northern, 72¾c, delivery spot, June or the first half of July.

FLOUR—Hungarian patent $2.15 per sack of 98 pounds; Glenora, $2; Alberta, $1.85; Manitoba, $1.70; and XXXX, $1.25.

MILLFEED—Demand is heavy and the market is somewhat unsettled. Bran is worth $16 per ton in bulk; and shorts $18 per ton bulk, delivered, subject to usual trade discounts.

GROUND FEED—We quote: Oat chop, per ton, $28; barley chop, $24; mixed barley and oats, $26; chop screenings, $15.50; oil cake, $30.

OATS—The demand for oats for shipment east has fallen off considerably and dealers say it is difficult to find buyers now at fair prices. Most of the business is for local feed account. The market is weaker. We quote: No. 1 white, in carlots on track, Winnipeg, per bushel, 45c; No. 2 white, 41c to 42c; feed grades, 38c to 39c. At country points farmers are getting 33 to 35c for No. 2 white oats. Street oats are not offering.

BARLEY—The market is now down to almost a nominal basis and prices are lower. We quote 44 to 45c per bushel for feed barley in carlots on track here.

FLAXSEED—Nothing doing.

SPELTZ—Dealers are doing a little business in speltz for feeding at 50c per bushel of 50 pounds.

HAY—Market very firm as hay is becoming scarce. Large quantities have been destroyed by the rains. Prices hold firm at $8 to $9 per ton for fresh baled in carlots on track here.

POULTRY—The market is quiet. Live chickens bring 70 to 75c per pair, and turkeys are worth 11c per pound, live weight. Dressed turkeys, Smith's Falls, 18c per pound.

BUTTER—Creamery—The market is weaker owing to larger offerings. The price has declined 1c. We quote now for fresh June make, factory points, 16c per pound.

BUTTER—Dairy—There is no change in the market for this butter as supply is running about the same as last week and there is good demand. We quote round lots 11c per pound commission basis for tubs, and 13c for prints. Prints are not wanted at all as they will not keep now.

CHEESE—Offerings are larger and the market has declined 1c. Dealers are now paying 11½c per pound for new Manitoba cheese delivered here.

EGGS—The market is well supplied with eggs. Buyers are still paying 10½c per dozen for fresh case lots, here delivered.

DRESSED MEATS—Hogs are steady at last week's price. We quote: Beef, city dressed, 8 to 9c per lb.; veal, 7½c to 8½c; mutton, 11c; spring lambs, each, $3.50 to $4.50; hogs, per pound, 7¾ to 8¼c.

HIDES—No. 1 city hides, 6½c; No. 2's, 5½c; and No. 3's, 4½c. Kips and calf the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horse hides 50c to $1.00.

WOOL—6 to 6½c per pound for unwashed fleece delivered here.

Tallow—Local buyers are paying 5 to 6c per pound for tallow delivered here, according to grade.

SENECA ROOT—Some small lots of root have offered here this week, and sold at a price in the neighborhood of 35c per pound. Dealers are not now willing to quote more than 34c as they believe that as soon as the roads dry up root will begin to come in. The above prices are for clean, dry root, delivered at Winnipeg.

LIVE STOCK.

CATTLE—Fresh grass cattle are hardly obtainable yet in a wholesale way as the frequent rains keep them out of condition. Reports from the range country say that the cattle are very backward. Good butchers' grades are worth 5½c per pound delivered here and inferior lots 5c to 5¼c.

HOGS—Live hogs are more plentiful and worth for best weights, averaging between 150 and 250 pounds, 6¾c, off cars Winnipeg. Heavy and light weights, 1c less.

BABIES WITH WORMS.

A Grateful Mother Tells How Her Little Boy Was Cured.

Mrs. A. Sauve, Rowanton, Que., is another happy mother who thanks Baby's Own Tablets for the health of her boy. The little fellow became the prey of worms—that curse of childhood. His rosy cheeks lost their color; his little legs and arms became skinny; his eyes lost their sparkle and he became sickly and peevish. His sleep was restless and feverish, and his food seemed to do him no good. His anxious mother almost despaired of seeing him back again to good health. However, she heard of Baby's Own Tablets, and gave them to her child, and now she says:—"The Tablets made a wonderful change in my little boy. All signs of worms have disappeared, and he is now in the best of health. I can honestly say that Baby's Own Tablets have no equal as a cure for worms."

Baby's Own Tablets are a certain cure for all the minor ailments of little ones, such as constipation, colic, sour stomach, indigestion, diarrhoea, simple fever and the irritation accompanying the cutting of teeth. Guaranteed to contain none of the poisonous opiates found in the so-called "soothing" medicines. They are for children of all ages, and dissolved in water can be given with absolute safety to a new-born babe. Sold by druggists at 25 cents a box, or sent postpaid on receipt of price, by addressing the Dr. Williams Medicine Co., Brockville, Ont.

Where the bottom of the ocean is bad an ocean cable will frequently last only three or four years, but on good bottom wire taken up after twenty years has been found almost as good as ever.

SELECTED QUESTIONS AND ANSWERS.

Maratime Mining Record.

Q.—What methods have been proposed for getting coal without the use of powder?

A.—Various and many are the methods which have been proposed and tried for getting coal without the use of powder—gunpowder, I presume, being here meant.

None of them, however, or rather, not many of them, get the coal in a more marketable condition than does powder. One of its chief characteristics is that it is of a "feeling" nature, consequently does not shatter the coal, but rends it and brings it down in large blocks, if judiciously dealt with. Another of its characteristics, one which, unfortunately for the coal hewer, condems its use in the greater portion of our coal mines, is that on its detonation such a flame is produced as to make the use of it a risky undertaking, and, as a consequence, an almost universal stop to its use in mines has been made. As the use of powder is always attended with danger other methods have been tried with a view to lessening danger. The following are some of them :—

The use of the simple wedge and hammer where the coal to be got is well holed, and is not of too large an area :

Elliott's Multiple Wedge.—This consists of a wedge with two set of feathers. For its use a hole, wide enough for the feathers, of course, has to be bored in the holed coal near the top. The first set of feathers, which consist of two metal plates, wedge shaped, the thin ends terminating in a flange, are tnen inserted, thin ends outwards, with flanges coming in contact with the coal ; the second set are placed loosely in the first, thin ends foremost, and make fast by knocking them with a hammer ; in the small opening left by the second set, the thin edge of the wedge is inserted and is knocked or driven forward by blows dealt with a hammer. This causes a great pressure to be exerted on the coal, which rends, and ultimately brings it down. Similiar in action is the rough and ready method I have seen adopted, when the simple wedge of itself is inadequate. Two metal plates about 8 by 12 inches, ½ inch thick, are placed in a slit made at the top of the coal, and the wedge knocked in between them. It is generally effective.

Haswell Mechanical Coal Getter.—In this method this wedge is forced in between the feathers by a combination of levers.

Burnett's Patent Roller Wedge.—A hole is drilled in the top of the holed coal 4½ inches in diameter, with a length according to the holing. Two feathers, similar to Elliot's are inserted in it. These act as guides for some rollers which are put in, eight generally being used, four above and four below the wedge which has to do the breaking down. The bottom four are put in first, and over them the wedge, thick end foremost, is pushed to the end of the hole, then the top rollers are inserted. By an arrangement—a kind of a shoulder—on the thin end of the wedge the rollers are prevented from running back. The power is applied to a rack in connection with the wedge, and by an ingeniously-contrived differential lever the necessary force is obtained, and the thick end is drawn back between the rollers. This causes a great pressure to be exerted, as much as five tons being obtained sometimes. It is not always necessary to draw out the wedge its full length, and it may be advisable sometimes to stop working the wedge to let the natural weight assist it. If the coal has been "bannocked," i. e., holed on the top, this wedge is just as applicable in operating near the floor.

Compressed-air has been tried in cartridges for bursting down the coal, and hydraulic pressure has been proposed for working wedges. A very ingenious method, invented by Messrs. Smith and Moore has been adopted, or tried, at some collieries ; unfortunately, however, in practice, it does not in many cases produce very good results. It is known as the Lime Cartridge. Under great pressure nearly pure calcined lime is made up into cylinders, the small size as an ordinary ammunition cartridge. A shot-hole is bored ; a small perforated tube is placed in it, and the cartridges are inserted. The hole is tamped as in ordinary blasting, then into the tube, which is now connected by an india-rubber or gutta percha hose to a small pump, water is admitted. Trickling through the perforations the water comes in contact with the lime and by so doing causes the lime to expand and give off heat, which, owing to the expansion and heat produced, may in some cases be sufficient to bring down the coal. In porous seams, and seams containing many slips or breaks, where the heat and increased volume are very liable to escape, this method is inapplicable.

Q.—Which is the most dangerous, and why, a fiery mine with little coal dust, or a mine with little firedamp and a large quantity of coal dust?

A.—I have no doubt there is a diversity of opinion on this question. Howeve, I will endeavor to explain my ideas under both conditions set in the question, assuming each to be carried on under similiar strict discipline.

I accept that an explosiion is liable to occur in a mine where a little fire-damp is present and a large amount of coal-dust ; that is, where a blown-out shot or over-charged shot occurs, providing that the coal dust is of a finely divided and inflammable character.

I also believe that such an explosion will traverse the workings for a considerable distance and explode other small accumulations of fire-damp, providing it was fed by freshly raised dust. To begin this explosion it would need a certain amount of CH_4 to act as an igniter, but it is not probable that such explosions will occur with less than two and a half per cent. of CH_4, and even with a larger percentage it is not at all likely that an explosive wave will be begun by any other means than be a forcible blown out or overcharged shot.

Now take a fiery mine with large accumulation of gas. The explosive wave can not only be begun by a blown-out or over charged shot, but by a naked light, by a defective lamp, or by the flame from any burning material.

When the mine is heavily laden with coal-dust the danger becomes apparently known, therefore a judicious colliery manager will readily see to the prevention of accumulations of coal (as far as possible), and also to the thorough watering of the roadways and other places where coal-dust in likely to prevail.

In the non-fiery but dusty mine the only thing to be afraid is the danger of the small amount of fire-damp being exploded by the shot, but if this place be thoroughly examined and the law adhered to, as to the inspection of gas, it does not seem likely that a large accumulation of gas will issue while the shot is being fired.

Now this is altogether different in a fiery mine, for although the officials of the mine are aware of heavy accumulations of gas they have not the easy remedy of keeping away the gas as is afforded for preventing dangerous accumulations of coal-dust.

Then again the law may be duly adhered to and no gas found, yet whilst the shot is being fired a heavy accumulation occurs and may be ignited by the blasting charge.

To strengthen my answer at this point I refer to the explosion which occurred at the Elemore Colliery, Durham, on December 2nd, 1898, the verdict of the inquest being that the explosion occurred through the firing of a large amount of fire-damp by a blasting charge in the main road. The place of blasting operations was examined previous to the shots being fired and no gas whatever was found, but during the time of firing an accumulation of gas had made its way up a staple pit, from a lower to a higher seam, immediately to the seat of the explosion.

In an non-fiery mine the changes of the atmospheric pressure (rise and fall of the barometer) will not have much effect on the small amount of gas issued, and will have no effect whatever on the coal-dust. In a fiery mine the dangers are greatly increased and decreased according to the pressure of the atmosphere.

In a non-fiery mine where an explosion occurred the hurricane would cease to continue where the roadways were thoroughly watered, and with an explosion of this kind the blast would not be so terrific as would be the case in a mine where heavy reservoirs of gas exist, consequently more lives would be spared. Neither would the afterdamp be so deadly as in cases of a fiery mine, thereby omitting the source of danger whereby most lives are lost.

The presence of coal-dust is easily detected in the roadways and on the timbers whereas in a fiery mine CH_4 of an inflammable quantity may be lurking in goaves and in the most obscure places—fissures and gullets—preventing detection.

Where an explosion occurs in a fiery mine it generally causes such a severe hurricane or tornado that it is carried into the goaves and sometimes throughout the whole of the mines, being intensified en route by the little coal-dust, and doing the maximum amount of wreckage to the ventilation arrangements.

In a fiery mine there is more liable to be left an unexplored accumulation of gas, which may cause a second explosion if any combustible material be left.

Another great danger in fiery mines is the liability of unknown large accumulations of gas being beyond the depths of the shot hole in breaks and cavities where it is impossible to examine before the firing of the charge.

In concluding, I am of the full opinion that a fiery mine with little coal dust is much more dangerous ; more precautions are necessary to be taken, not only with shot firing but with safety lamps, prevention of naked lights, ventilation arrangements.

The strongest piece of evidence in favor of the coal-dust mine with a little gas being the most dangerous is that the vigilance on the part of the mine officials and workmen becomes slack, treating the coal dust theory as trivial, and the watering of the dusty roadways as a luxury, and the necessary prevention of small percentages of gas as foolish. In my opinion this obstacle can easily be removed if the law decided upon a certain quantity as dangerous.

NOTICE.

Notice is hereby given that 60 days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the 320 acres of land more or less :—Commencing at a point on the west bank of Elk River, situate about two miles above the mouth of Morrissey Creek, thence running west 40 chains, thence north 80 chains, thence east 40 chains, more or less, to the west bank of Elk River, thence following the said bank of Elk River southerly to the point of commencement.

Dated this 8th day of May, 1902.

ANOTHER MINING HORROR

Johnstown, Pa., the Scene of the Catastrophe---143 Men Meet Terrible Death in a Mine Explosion.

Johnstown, Pa., July 10—Johnstown has again been visited by an appalling disaster. It is only less frightful than the awful calamity of May 31st, 1889, in loss of life. But it has brought sorrow to hundreds of homes made desolate by a mine explosion with took place in the Cambria Steel company's rolling mill mine under Westmount Hill at 12 20 oclock this afternoon. How many are dead may take several days to determine, but that it is a long list is certain, it may reach to 200 or more men. Soon after the news of the explosion reached the Cambria officials an attempt to enter the mine was made but the deadly gases stopped their progress and they were compelled to return to the surface. Mine foreman, H. Rodgers; his assistant, Wm. Blanch, and fire bosses, John Whitney, John Redallick and John Thomas were overcome by gases and it is feared they perished in an effort to reach the miners. A son of H. Rodgers then tried to reach his father but he was quickly overcome by the deadly gases and was carried out unconscious.

Johnstown, Pa., July 11.—This has been a day of heroic rescues at the Rolling Mill mine of the Cambria Steel Company. Thrilling experiences attended the efforts of the 40 brave men who went down into the shaft with a very faint hope that their efforts at rescue would be successful. The reward of their efforts was the saving of the lives of 14 of their follows and the restoring of them to their families. One of the volunteer rescuers said that fire was raging in part of the mine that would take some time to quell. Most of those who were brought out alive this afternoon have saved themselves by crawling into a chamber and closing the valve of the compressed lead pipe which runs along the entry.

Johnstown, Pa., July 12.—Eighty-seven dead bodies have been taken out of the mine up to twelve o'clock to-night as the result of yesterday's terrible explosion. Eight men brought out alive at three o'clock this afertnoon and six more alive shortly after 5 o'clock. One of the latter died while on the way to the hospital. Three sections of the mine have now been cleared, there are still three sections to be explored and those in a position to know say as many more men are still entombed and possibly dead.

Johnstown, July 12.—Twe members of the relief party sent home for a rest said upon leaving the mine, shortly after one o'clock this morning, that 57 bodies were loaded on cars ready to be brought out the first thing after day light. This will swell the dead list to 143.

MICHEL MEN RESUME WORK

Strike Situation at Fernie Unchanged---Company are Shipping 700 Tons Coal Daily From Morrissey and Michel.

The miners at Michel who went out on strike on Monday, July 2nd, returned to work on Tuesday of this week. The new regulation introduced by General Manager Tonkin at the Coal Creek Mines did not effect the men at Michel, but sympathy for the Fernie Miners induced them to go out. Briefly the history of the Michel strike was as follows: On Saturday, June 31st, the Secretary of the union received a communication from the Fernie union requesting that they call out the men in the mines there, and at a meeting held Saturday evening it was decided to grant the request and the men were accordingly called out. The membership of the union at Michel only consists of acout one-third of the employees of the Company at that place, and considerable opposition to the strike was expressed by the non-union men and it was decided to call a mass meeting on Monday afternoon to have a general vote on the matter. This idea was carried out and a ballot was taken by the underground employees resulting in favor of the men returning to work by a majority of 43, the vote standing 56-13. A large number of the union men however refused to vote on this occasion claiming that the non-union men had no right to have a voice in the matter. Tuesday was a holiday, and on Wednesday morning only eighteen men turned up at the mine, the balance being unwilling to be termed scabs by the union men. On Thursday some twenty-three, all of whom were foreigners went to work and on Friday fifty-one. On Saturday the union men determined to put a stop to what they called "scab labor" and a meeting was called for the purpose, but the foreignors in the mine got wind of the matter and deserted their work. No one went to work Monday morning, but there was so much dissatisfaction expressed on all sides that it was determined to call another meeting. This was done and a resolution was passed stating that the men would return to work on condition that the company would take back all those implicated in starting the strike. A committee of four were appointed to wait on the superintendent to lay the resolution before him. The resolution was satisfactory to the company and the men returned to work Tuesday morning.

It is stated that a report current in Michel on Monday to the effect that General Superintendent Stockett had sent an order to the Michel mine manager stating that if a shift did not go to work on Tuesday the men were all to be paid off, had a good deal to do with bringing the men to terms.

The local secretary of the Fernie Union, Mr. D. McKenzie, informs us that the Western Federation of Miners has consented to the men at Michel returning to work.

The situation at Fernie remains unchanged. Numerous rumors are afloat to the effect that the company intend to import men, but this is hardly probable. The company are shipping about 700 tons of coal daily from Michel and Morrissey.

GENERAL NEWS.

London, July 12.—It is now considered practically certain, in view of the announcement made to-night, that King Edward will be crowned on Saturday, August 9th. Since the holding of the Coronation ceremony on Monday, Aug. 11th would involve another full bank holiday with the attendant dislocation of the general business, while Saturdays are almost universaliy observed as half holidays.

Chicago, July 11.—Mutual concessions by the freight handlers and by railroal officials have proved the way for conferences between the managers and their employers, which it is hoped will lead to the settlement of the freight handlers strike. These conferences will be held to-morrow morning in the offices of the respective general managers.

Seattle, July 11.—Up to a late hour this evening Tracy, the convict, was still at large as was thought would be the case by the many. Tracy was not waiting to be captured when Sheriff Cudhie moved upon his position this morning. There are all sorts of rumors as to Tracy's where abouts but the sheriff's men are doing a great deal of guessing and it is doubtful if they have information to-night which would locate Tracy within an area of 15 miles.

London, July 10.—The last day of the Henley racing opened with the final heat for the Grand Challenge Cup. After a good race Leander succumbed to the Cambridge crew, which yesterday defeated the Argonauts of Toronto. Third Trinity had all the disadvantage of the Berks station but they got off first and at Frawley court, which was reached in 3 minutes and 29 seconds, were two lengths ahead. At the mile post reached in 5 minutes and 25 seconds the leaders started splendidly but though they drew up a little they could never over haul their opponents and lost the trophy which they held for the past four years. In the final for the Diamond Scalls, F. S. Kelly, Baliol College, Oxford, repeated his surprise yesterday by gaining an unexpected victory over R. B. Etheringtonsmith, of the Leander. The latter had the favored station led for a whole mile. But the Oxonian gradually wore him down. At Frawly court, which was reached in 4 minutes and 14 seconds, Smith was a quarter of a lenght to the good, but by the time the mile post was reached Kelly was level and being able to keep up his forcing tactics gradually drew clear and ultimately won easily.

LOCAL AND GENERAL.

Hazelwood ice cream at Cuthbert's.

Miss Todhunter has returned home from visiting friends at Morrissey for two or three months. Miss Todhunter's health has not been good, but since her visit to Cranbrook and Morrissey, we are glad to state that it it much improved.

The services at Christ Church, Fernie, to-morrow will be held as follows:—Matins and Litany at 11 a.m., Sunday School and Young Men's Bible Class at 2 30 p.m., Evensong at 7.30 p.m. Collection in aid of church expenses.

The Rev. C. W. Houghton rode over to Morrissey to take service on Thursday last. He came back on Friday in time to officiate at the funeral of E. J. Miller, who was mangled at the Morrissey mine. Mr. Houghton will hold services at Morrissey on Thursday, July 24th.

Be sure and hear Rev. B. K. Yosseph, the Persian lecturer on Sunday and Monday. He wil speak on the following subjects. At 11 a.m., "Mohamedanism"; at 7:30 p.m., "The Condition of Women under Mohammedan Rule; Monday at 8:30 p.m., "Home Life and Marriage Custom in Persia." The speaker will appear in Persian costume. See Posters.

About the Fernie Strike

The attitude taken here by members of the executive of the Associated Boards of Trade for Southern British Columbia with respect to the request emanating rom the Fernie Board of Trade for intervention in the coal miners strike, is that the associated boards should take no action whatever until requested so to do by the parties to the labor dispute.—Rossland Miner.

What easily might have been a very serious accident to the wife of Dr. Wilson and Miss Digby occurred on Sunday last. They with the Dr. were walking near the river at Morrissey waiting the incoming train from the west, when on crossing a plank bridge over the river, which runs very swiftly at that point, the ladies lost their heads and fell headlong, clasped in each others arms, into the foaming torrent. Dr. Wilson instantly plunged in after them and with immense exertions managed to guide them to a place at the side where they could land. The ladies were quite overcome by the shock of immersion in the cold mountain stream. As soon as possible they were taken home in a conveyance and every care was bestowed upon them. Mrs. Wilson is still suffering from the shock but is expected to be around again shortly.

A terrible accident happened at the Morrissey mine on Wednesday last. A young man named E. J. Miller, employed as a weigaman on the new tipple was down below when a car was started by some error down the track towards the switch. The man on the car tried to stop it but the brake not acting he jumped to save himself. Hereupon young Miller jumped on the flying car saying he would stop it. His jump only carried him half on the car which almost immediately collided with another empty, crushing the poor fellows legs to a shapeless mass and hurling him, mangled as he then was, on to the track. Another car would at that moment have ran over his body but he had still power and presence of mind to drag himself into the middle of the track and lay down allowing it to pass over him. He was brought here to the hospital where it was found necessary to amputate both legs. He unfortunately succumbed under the operation and was interred at the cemetery here on Friday, the Rev. C. W. Houghton officiating at funeral. Many friends of the deceased met at the hospital and followed his remains to their last resting place on earth.

NOTICE.

NOTICE is heredy given that I, G. O. Foss, 60 days after date intend to apply to the chief Commissioner of Lands and Works, Victoria, for permission to purchase 160 acres of land more or less on the west bank of Elk River, commencing at a post marked northeast corner of Jas. A. McDonell's purchase, thence running west 40 chains, thence north 40 chains, thence east 40 chains more or less to the west bank of Elk River, thence southerly along said west bank of Elk River 40 chains more or less to the point of beginning.

Dated this 30th day of June, 1902.

G. O. FOSS.

THE IURY ATTACKED.

The members of the coroner's jury who were charged with the conduct of the enquiry into the circumstances connected with the recent explosion in the Coal Creek collieries, are taking steps, we understand, to meet the attack which has been made upon their probity by Mr. Lindsay, the Toronto counsel of the Coal Co. This appeared in a recent issue of the Victoria Colonist, in which Mr. Lindsay was quoted as having volunteered the statement that the evidence adduced at the inquest did not warrant the findings of the jury, and the inuendo was thrown out tha thet hostility of certain members of the jury towards the coal company for personal reasons, was a more potent factor in the shaping of the verdict than the evidence adduced.

It would be difficult to find language sufficiently expressive to fittingly denounce an attack at once so gross and so unwarranted as is contained in the article in the Colonist, and no castigation could be too severe for the man who would lend himself to it.

The same article contains an attack upon Mr. Blakemore, who represented several of the relatives of the deceased miners, at the recent enquiry. The position taken by Mr. Blakemore at the inquest is sufficiently explained in his address to the jury on that occasion, which we print below.

"Gentlemen of the Jury, in addressing you I am placed under the double disadvantage of being compelled by the order of the Court to confine myself to the legal aspects of the case and to exclude all reference to facts although possibly any service which I might have rendered you in reviewing the case would be mainly in my comment on its practical features. Then again I have to crave your consideration in appearing in company with eminent counsel who are better versed in the law relating to this inquiry than I could possibly be. I would however assure you that any remarks I may make will be of a strictly impartial character and will be solely intended to assist you in arriving at a fair conclusion and if I should appear at any time to depart from this course or to strain any point submitted for your consideration I would ask you to disregard my remarks and to receive only what is said in the spirit which I have indicted.

On the 22nd May one hundred and thirty men were killed in the No. 2 and No. 3 mines of the Crow's Nest Pass Coal Co. situated at Fernie, it is your duty to inquire first of all how these men met their death and secondly whether any person or persons may be responsible there for.

In considering these grave issues I would remind you that workmen whether in mining or other industrial pursuits accept the risks and responsibilities of their occupation. When everything has been done that can be done there will still be risks which cannot be eliminated. These risks are well known both to employer and employed, and especially are we all conversant with the risks inseperable from mining. Whatever therefore the responsibility of an employer may be in this matter it can never be maintained that he must remove every risk. When he has done his best and has done everything which human ingenuity and common sense may dictate it still remains that mining is a hazardous occupation. It may further be well to consider in the first place what are the responsibilities accepted by miners. These may be classified as falling under the headings of specific performances and general care. Under the former will fall all prescribed duties designated in the Coal Mines Regulation Act, special rules, or any special by-laws and instructions which may have been established at a given mine, and any breach of these is culpable and punishable and may have an important bearing on any accident which may take place. Just what its bearing may be in the present case we will consider in greater detail further on, at present I am only seeking to establish general principles.

In addition however to specific performance every workman is under a legal and moral obligation to exercise care, to keep a sharp look out and in every way possible to supplement definite rules by caution and vigilance in the interests of the safety both of himself and of his fellow workmen. On the other side it may be profitable at this point to note the things for which workmen are not responsible. They are not responsible for the general system upon which the operations of their employment are conducted.

They are not responsible for the plant, machinery, appliances or materials which are furnished for their use by their employers, in neither of these matters have they any voice or choice nor do they incur any liability in respect of them. Further, workmen are not responsible for the general condition of a mine.

You are aware that in the Coal Mines Regulation Act provision is made for inspection of mines by a committee of workmen who are to record the result of their inspection in a book provided at the mine for that purpose. You are also aware that it is the rule for the Government Inspector of Mines to make periodical inspections and to report the result of the same to his department. It may be suggested to you that in a case where such reports were emanating from the workmen or from the Government Inspector they absolved the Company from liability, especially in cases where these reports failed to point out any element of danger existing in a mine. It is my duty to tell you that such reports have no bearing whatever upon the responsibility of the employer, that they cannot in the slightest degree minimize his responsibility or exonerate him from blame in respect of any matter for which he would otherwise be liable. The permission for workmen to examine a mine is a concession to their rights to see as far as possible for themselves what are the conditions under which they are required to work. The inspection made by the Government official is for the purposes of his department, to furnish that department with information, and to enable it to make from time to time such recommendations as may be conducive to the safe working of a mine, but neither of these can for one moment be allowed either to excuse, to relieve or to exonerate the employer. If it were otherwise management would be a farce and inspection a "reductio ad absurdum."

Having considered the general principles covering the responsibilities of workmen let us now ask what are the responsibilities of the employer, the first undoubtedly is to carry out the Coal Mines Regulation Act in its entirety, then to make suitable special rules to deal with the exceptional conditions which may exist in any mine and next to decide upon and inaugurate a system upon which the mine is to be operated, to furnish suitable plant, machinery, tools, appliances and materials and finally to bring into play the same element of general care and the exercise of intelligence in order to insure in the highest possible degree the safety of the workmen. Whilst on this latter point I would draw your attention to an important principle which governs the exercise of what I may call the voluntary powers of the employer, I mean those powers which he is called upon to exercise in respect of matters which are not necessarily dealt with in any rules or regulations, powers which I have stated are covered by the exercise of intelligence. It will not be disputed by any employer that a percentage of safety however small, is worth striving after and that if, say for instance in the matter of appliances, there be a choice of two or more if it is a well established fact that one of these appliances is safer than the others, the employer must in every instance furnish the safer one. By this I do not mean that with respect to appliances about which there is a well marked diversity of opinion he could be held responsible for chosing the inferior, but it may be safely laid down as a broad governing principle with respect to appliances such for instance as a safety lamp, about which there is a general consensus of opinion and in respect of which uncertainty could not be pleaded the employer is bound to chose and to furnish the safer. And this principle must be taken to govern the selection of all appliances in and about a mine which could affect the safety of the workmen.

With these general principles to guide you it will be possible for you to apply them to the evidence which has been submitted in this case and to which I am not permitted to refer. You will have to consider the evidence in so far as it may tend to suggest negligence, either on the part of workmen or upon the part of the company, and in a case in which a mine yielding gas has been worked with safety lamps, and matches or other appliances for producing a naked light have been found upon bodies there would undoubtedly have been a breach of the rules and there might be culpable negligence, in such a case the decision would depend largely upon the finding of matches upon bodies recovered from that section of the mine in which the explosion may have been proved to have originated and it could not be regarded as conclusive evidence that the explosion had resulted from the presence of matches in a mine unless there were some direct evidence of their having been used, and in the absence of this the strongest presumptive evidence would be in having found them at the initial point of the explosion. Nothing can be said in extenuation of the folly of miners persisting in taking matches into a mine against the regulations, such a practise must be condemned in the strongest terms and the delinquents severely punished in the common interest, but we are not justified in allowing our indignation to carry us beyond that judicial frame of mind in which we should consider the bearing of such misconduct upon the subject of any inquiry. If such a phase of the subject as I have sketched should fall within your purview of this case I would ask you to be guided by the principles here laid down in considering it and in making your application of the same.

It may be that in preparing to answer the question—who if anyone is responsible for this explosion—the possible contributory negligence of the miners may be confined to the matter which I have just been discussing. If so, you will then proceed to ask whether the company through any of its officials is responsible and in considering this important question you will be governed by the principles which I laid down at the commencement of my address, bearing in mind the liability under the heading of specific performance, you will ask yourselves whether all the provisions of the Coal Mines Regulation Act have been complied with. Whether the first general rule which requires the company to provide a sufficient amount of ventilation in all the roads and working places in the mine to dilute and render harmless the noxious gases produced has been complied with and I would ask you to especially consider the bearing of this particular rule upon circumstances which have been alleged by the company's management to exist at the face of McDonald's entry where they claim that the explosion originated and where, if as they allege, a quantity of gas had accumulated at that point such accumulation is consistent with a due conformance to the general rule referred to.

I would also direct your attention to the series of rules covering the use of blasting powder in a gaseous mine, and I would call you attention especially to

(Concluded on Last Page.)

NOTICE.

NOTICE is hereby given that I, Henry W. Petrie, sixty days after date intend to apply to the Chief Commissioner of Lands and Works, Victoria, for permission to purchase 640 acres of land on the west bank of Elk River, commencing at a post situated 20 chains west of the N.W. corner of R. L. Henderson's pre-emption, thence running 80 chains east, thence 80 chains north thence 80 chains west, thence 80 chains south to the point of commencement.

Dated this 26th day of June, 1902.

that rule which requires that not only shall the working places be watered for a distance of twenty five yards from the point of blasting but also that all the travelling and other roads in such a mine should be properly watered and although it may be argued that this latter provision is subordinate to the general heading which applies to blasting and the conditions under which it may be performed I would point out that it is not a subordinate put a principal rule required to be observed in such a mine as is contemplated in the act, namely a gaseous mine which is dry and dusty altogether independent of the operation of blasting, and I would ask you to consider whether upon the evidence submitted you can come to the conclusion that this rule has been complied with. I must ask you further to consider whether the rule requiring watering to be done for a distance of twenty five yards from any blast has been complied with by the watering deposed to in the evidence. I must ask you further to consider whether in the case of any mines reported by a Government Inspector over a period of two years to be highly dangerous, to be gaseous, and to be dry and dusty and in which he may have specifically prohibited the use of blasting powder they could so change in their general conditions as to cease to be dangerous in the short period of one month and whether if such a representation were made it would be consistent with the conditions likely to prevail whilst continuing to work the same seam of coal under the same system as before.

In considering the evidence as telling against the company I must ask you to apply the principle laid down at the commencement of this address in respect of appliances furnished by the company and to ask yourselves whether the so-called safety lamp furnished to the work men complies with the requirements of the case and with the principle of the greatest possible safety.

I must also ask you to apply the same test to the blasting powder in use and if you should find that in comparison with all other known explosives and especially in comparison with the so-called safety explosives the common blasting powder in use in these mines is the most inferior or if it furnishes a lower percentage of safety than other explosives which are well known and which might have been used, then you will consider whether this does or does not render the company liable and finally by the test of the same general principles you will have to consider whether the system adopted in this mine is such a system as is demanded by the requirements of the law and sanctioned by usage for removing and watering the dust in "dry and dusty" mines.

If you should have any difficulty in deciding whether this mine should be classed as "dry and dusty" I would remind you that all such matters have to be determined by the evidence submitted and that in any case in which there is a conflict of testimony or a diversity of opinion the matter must be decided by the preponderance of evidence and this preponderance will be determined not merely by the number of witnesses who may support any one theory or statement but also by the calibre and reliability of the witnesses and the experience which they may have had to fit them to render an opinion or to testify. In drawing these remarks to a conclusion I may perhaps be permitted to say that you will have no difficulty in answering the first question submitted to you by the law covering the Coroner's inquest, namely—how did these men meet their death—it is conceded on all sides that they were killed by an explosion of coal dust. Whether that explosion was initiated by a small explosion of gas is immaterial since the law of "proximate cause" assists you in placing the responsibility. I may thus state a case, that if, for instance, an employer should allow a dangerous condition to exist such as the undue accumulation of coal dust in a dry mine, and that coal dust should be carried to the explosive point by the application, accidentally or intentionally of an initiatory cause such as the firing of a small body of gas or the discharge of a blast the responsibility for that explosion would not rest with the person who set off the explosion but with the employer who allowed the dangerous condition to prevail. This important point has been decided in numerous law cases, some in the Dominion of Canada, and no doubt the learned counsel who follow me will cite them for your information, but the principle is as stated and you will be able to apply it to the present case. You may feel called upon to ask yourselves the definite question. What caused the explosion, and in considering the degree of responsibility resting upon any person you may have to ask whether upon the evidence adduced there is a greater probability of the initial explosion having been caused by the exposure of a naked light, or by the use of a defective lamp and on these points I would remind you that the law does not require that you should seek for some other explanation if you find the actual presence of a defective appliance which could have originated the explosion, and in this connection you will consider whether the possession of matches or other appliances for producing flame have been traced to the supposed location of the first explosion or whether the presence of defective safety lamps at that point may not in itself constitute a more probable explanation of the explosion. You will be also further justified in considering whether in the case of a mine pronounced to be gaseous and "dry and dusty" the continual use of ordinary blasting powder may not have constituted a constant source of danger and possibly have contributed to an explosion, and once more whether in the case of such a mine the frequent fires resulting from ignition of gas and coal dust in working places after a blast may not infer such a degree of responsibility as to constitute negligence.

In deciding upon the most serious question "Is any person culpably negligent" you must remember that this question covers not merely the initiation but the spread of the explosion and in this connection you will have to consider whether the plea that it is impractiable to remove the dust from or water the old workings can be accepted as a justification for failing to do either. You will consider whether the admission by the management that there was a coal dust explosion which accentuated and intensified the original explosion thus involving the sacrifice of more lives is not an admission which carries with it responsibility. You will have to consider whether the admission by the management of ignorance of the true character and danger of coal dust is not culpable negligence and you will have to ask yourselves also whether if the management was not ignorant did they use the best and safest appliances? A due consideration of and an answer to these questions will determine your decision. I do not ask for a verdict at your hands, I ask for simple justice, and the clients whom I represent, terribly as they have been bereaved by this disaster, desire nothing more and and would not be gratified by any verdict which was not in strict accord with the evidence adduced even if it were possible, although I know that it is not so, to procure it. You gentlemen represent the spirit of justice which is symbolized elsewhere by a calm and impassive figure with bandaged eyes holding evenly the scales of justice. This figure is taken to illustrate that justice is blind to external influences and sees only with the eyes of the soul. I would carry the symbolism further for it typifies the eyes of the soul drawn in upon itself and conscience sitting enthroned in that inner chamber face to face with the evidence it has to consider, and face to face also, let us never forget with that eternal spirit of justice to which in its turn it is responsible. That you gentlemen will be animated by such thoughts as these I confidently believe, and that your verdict will be rendered in due recognition of these principles and in furtherance of everything that is right and just is the best gunrantee I can have that neither the interests of those whom I represent nor of others will suffer in your hands.

PUBLIC NOTICE

Notice is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Land and Works for a Special Timber License to cut and carry away timber on 640 acres of land on the north side of Lizzard Creek, about three miles from its mouth: Commencing at a post planted on the norlh bank of the said Lizzard Creek, about three miles from its mouth, marked J. L. Gates South East Corner Post; thence running west a distance of 80 chains, thence north a distance of 80 chains; thence running east a distance of 80 chains, thence running south a distance of 80 chains to the place of beginning and containing 640 acres more or less.

Dated at the town of Fernie this 26th day of June, A.D., 1902.

PUBLIC NOTICE.

Public Notice is hereby given that sixty days after date, I, John A. Ferguson intend to apply to the Chief Commissioner of Land and Works, Victoria, for permiesion to purchase 160 acres more or less, commencing at a post situate on the West bank of Elk River, thence running west to a point 40 chains due south of James A. McDonnell's south east corner post, thence south 40 chains, thence east to the bank of Elk River, thence following the said bank of Elk River northerly to the point of commencement.

JOHN A. FERGUSON.

June 24th, 1902.

MORRISSEY.

Miss Lilian Digby was the guest of Mrs. Dr. Wilson Sunday and Monday.

Joe Gall has opened up a general store here near the mines on government land.

Very little talk is going on here over the strike at Fernie. A rumor was around that the miners here was going out in sympathy but did not take efferct.

The prospector of the C. P. R. party at work a few miles south of here sighted 47 head of deer in one bunch on Monday.

The new C. P. R. station will be erected at the Junction in the course of a week. The coal company will then run a car from Morrissey to meet the mail trains.

R. W. Wood, manager of the store here, has gone east on a vacation.

The coal company has finished the new waterworks system in town. Hydrants have been placed near each dwelling and when the electric light plant is installed will make Morrissey one of the neatest towns in East Kootenay.

The annual meeting of the Morrissey school board was held in the school house on June 28th. Dr. W. H. Wilson was elected chairman and Mr. Colin McPherson, secretary. A communication from the government was read, stating their willingness to erect a new school house. The Coal Co. has given up a fine lot in the town site for this purpose. The following gentlemen were elected trustees: Dr. Wilson for 3 years. Colin McPherson for 2 years and C. T. Spence 1 yeer.

Hardware. Furniture.

THE STRIKE.

HAVING regard for the circumstances under which it was issued, the request of the Fernie Board of Trade, for the good offices of the executive of the Associated Boards of Trade of Kootenay in the bringing about of an arbitration of the points in dispute between the miners' union and the coal company, has met with very encouraging response The difficulty which confronted the executive of the associated boards lay in the fact that the request for intervention did not come from either party to the dispute, nor did it carry with it even a hint to the effect that its good offices would be acceptable.

Unpromising as the outlook was a week ago, the evident willingness of the executive of the associated boards to do what it can to effect a reconciliation of the opposing factions, has already had a very hopeful influence. Care must now be exercised, by all who have the welfare of the town at heart, to see to it that nothing is done in the meantime to widen the breach between the executive of the miners union and the coal company, or in any way to embitter the feeling which the breach has engendered Fernie has too much at stake for it to permit the present disagreement to serve as a medium for settling old scores.

From the town's standpoint the situation is sufficiently grave to call for the most careful consideration, not only of the officials of the coal company and the members of the miners' union, but of every man who has property or commercial interests in Fernie. The chief consideration at this present time is the drawing together of the parties immediately concerned. If this can be accomplished a settlement of the trouble may be regarded as in sight. The coal company has made a demand upon the men, which they, through their organization, say they are not prepared to comply with. This is where the matter rests. But when the two parties are brought together it is more than likely that some middle ground will be found which each will be prepared to accept. This has been the history of nearly all such deadlocks as exist in Fernie today, and there is no reason why the present one should prove an exception to the rule.

If the professions of the respective parties are to be believed, each are convinced that they have right on their side, and that they are prepared to stand by the justice of their claims. There is one way to put this to the test, and only one, by arbitration. There may be some question as to the composition of the court which is to try the case, but this is a matter which can be determined later. What is desired now is an expression of willingness to arbitrate.

There is no desire on the part of the Fernie Board of Trade to force the trial of the issue to a court composed of members of the executive of the associated boards of trade. Such an effort would be fatal to the very end sought. But, if the coal company and miners will agree to bring their dispute within the provisions of the conciliation and arbitration act, they can secure a tribunal the constitution of which should be above suspicion. This must be the test of the sincerity of their professions, since it is idle to proclaim that a contention is in itself essentially just, and at the same time insist that that the justness of it shall be weighed solely by the force which the party advancing it can bring to bear upon the opposing side.

The interests of Fernie demand that the present trouble shall be adjusted in an amicable manner, and in one which shall ensure if possible a lasting understanding between the coal company and the men in its employ. The business community is interested as much in the prosperity of the coal company as it is in the welfare of the men whom it employs. Without the one there cannot be profitable employment for miners, and, unless the wage-earners are well paid and satisfied with the conditions of their employment, there can be no prosperity for the citizens of Fernie who have invested their all in Fernie realty and business stocks.

Nor are the business men of the community without the pale of consideration. They have claims upon both parties to the dispute. They go very largely, as the middle class, to give public opinion its shape, and shorn of public support wage-earners in conflict with corporations have but a slim chance of success. They are just as useful members of society as are the men who mine the coal or the men who bring it to the tipple. Not infrequently they have been charged with impatience in the progress of labor troubles, but who would not be impatient under similiar conditions. In the aggregate they invariable are the men who have the most at stake, and they are thrown into the conflict with their hands tied, and are required to dance alternately to the music set for them by the corporation and the wage-earners, and they are powerless to vary it in any way. In the case of Fernie, the business men have an especial claim upon the management of the coal company for consideration. Many, if not all of them, purchased their reality from the coal company. The value of this very important asset which they have taken over depends entirely upon the conditions which obtain at the company's collieries on Coal creek. If they are to be shut down for an indefinite period it means ruin to them, or if they are to be reopened to be worked with cheap foreign labor it means but the prolonging of their suffering, merely a putting off of the inevitable, since there can be no prosperity for them under such conditions.

What is the issue to be? This is not the time for passing upon the merits of the points in dispute. The FREE PRESS has no desire to try the case, but it would desire above all things to have it brought before a fair tribunal and have it tried.

EDITORIAL NOTES.

THE public will be pleased to know that Mr. G. S. Lindsay, chief counsel of the coal company, has no intention of inflicting his presence on the people of Fernie again. This we gather from an interview with him reported in the Victoria Colonist of the 1st; at least it is certain that he would not have made some of the statements accredited to him unless such were the case. It is universally admitted that two of the principal requisites in a counsel are a judical frame of mind and some regard for facts. During Mr. Lindsay's attendance at the recent enquiry he failed to discern either—indeed his amateurish methods were obviously a handicap to Mr. Macdonald's, who conducted the company's case with a degree of ability and courtesy to which the chief counsel is a perfect stranger.

It was reserved however for the Colonist to show the exact measure of this gentleman's legal equipment and to voice his opinion that the jury brought in a false verdict against the weight of evidence from interested motives and in violation of their solemn oath. The jury may safely be left to deal with this legal libeller in a suitable manner, our only fear being that he will not give them the opportunity, but unless we are very much mistaken the "chief counsel" will discover before long that he has made a "faux pas" and if his knowledge of French is only on a par with his law he will require to be told that this means a false step. The reputation of the Fernie jury is safe from the attacks of anyone of the calibre of Mr. G. S. Lindsay and will be held in respect and esteem long after he has been relegated to that obscurity from which he should never have emerged.

STRIKE DISCUSSED.

A meeting of the Nelson Board of Trade was held on Monday evening last to discuss the strike situation at Fernie and to consider a letter from G. O. Buchanan, president of the Associated Board of Trade, which stated that he had received a communication from the Fernie Board regarding the calling of a meeting of the Executive of the Associated Boards to consider the strike situation and to induce the interested parties to bring into operation the terms of the Labor Conciliation and Arbitration Act.

After the reading of the letter considerable discussion followed as to the means by which the board could best accomplish the desired end. The question as to how any action on the part of the Associated Boards of Trade would be viewed by the parties in the strike also came in for its share of discussion, several different views on this being expressed by the members. S. S. Taylor was of the opinion that the men would view any action on the part of the board of trade with strong suspicion, and that there would not be the slightest use in the board offering to arbitrate as the men would not listen to them. In their minds the Board of Trade simply typified the capitalistic idea they were fighting against. The men had an organization of their own, and the officers of that organization would come into direct communication with the officers of the company, and if they could not come to an agreement the only tribunal that they would consent to place their case before would be composed of men who they knew well and trusted.

W. A. Macdonald did not agree with this. The board had been asked to state its position on the matter under advisement, and this it should do. The question as to the possible or probable reception of its offices was something to come later.

Mr. Macdonald also asked Mr. Wilks as to whether the miners could act directly or would have to refer any question to Butte for settlement. Also as to whether the miners were under the jurisdiction of the Western Federation of Miners.

Mr. Wilks stated that theoretically any question in regard to a settlement would have to be referred to the council of the Western Federation, but that practically it would be settled at Fernie. There was an officer of the federation at Fernie to look into the matter. This officer, who was a member of the executive council, had the confidence of the council, and could go into the matter minutely, and after becoming familiar with the facts, any recommendation he would make to a settlement was moraliy certain to be adopted. As far as the merits of the case were concerned he would not care under the circumstances to say anything beyond that it had been the custom of the coal mining companies only to work the eight hours from bank to bank since coal mining was instituted in the province. He went into the reasons for this, and claimed that experience had proved to the companies that this system was the best and safest, both to the property of the company and the lives of the men.

Some further questions were asked of Mr. Wilks, and more discussing followed as to the board's best course of action.

The following resolution was finally passed: That this Board of Trade favors a meeting of the executive of the Associated Boards of Trade, if the Crow's Nest Pass Coal Company and the miners request the intervention of the Associated Boards of Trade with a view to bringing about an intervention by the board of conciliation.

Miss E. Church and Miss Andrews are spending a week with friends at Cranbrook.

LOCAL AND GENERAL.

Hazelwood's ice cream at Cuthbert's.

Mr. J. S. T Alexander returned from Kaslo on Thursday.

W. R. Ross spent several days at Fort Steele this week.

The new hotel at Morrissey Junction, owned by Messrs. E. Walters and J. L. Gates, was opened on Wednesday.

Any person desiring the services of a nurse apply to Mrs. Katharine McKay, this side the bridge near Mott's mill.

We would draw the attention of our readers to the adv.. of J. E. Mills, agent, in this issue.

On Sunday next July 20th the services at Christ Church, Fernie, will be conducted by the Rev. H. Beacham, of Cranbrook.

J. E. Mills, agent, who has been combining business with pleasare for the last two weeks in the boundary country is expected to return on Tuesday.

The young men's Bible Class of Christ Church have volunteered to undertake the care of the graves of the friendless young men who are interred at the cemetery here.

The worst flood ever known in Southern Alberta has swept that district for the past two weeks causing great damage and loss of property. All raidroad communication with British Columbia has been cut off for over a week. In the Macleod district several railroad bridges both east and west were washed away and the water was three or four feet higher than it was in the spring. At Pincher Creek the little town was almost a lake and the creek became a large river. Only one life was lost, this was, Wm. Walsh, a well known cowboy who went by the title "Billy the Kid." The young man attempted to force his horse across the stream, but the current was too swift and upset the animal. The horse gained the shore, but the rider disappeared down the stream and the body has not yet been recovered. The Crow's Nest Branch is now open to Macleod but it will be a week before the line will be open to Medicine Hat. The main line of the C. P. R. is still blocked near Calgary, but the mails are being transferred.

A meeting to organize a social club for young men was held in the old parsonage on Wood St., on Tuesday evening. A great amount of interest was displayed by those present, who proceeded in a business like way to map out a general plan. It was decided to organize under the name of "The Young Men's Club." W. Liphardt was elected president and H. G. Watson, Sec.-Treas. It was thought best to defer the election of the remaining executive officers until the next meeting when the new members could take a hand. The object of the club is to provide a suitable place for the young men of the town, as well as visitors to the town, to spend their spare time comfortably and profitably. All the best news papers and magazines will be provided, as well as popular games. One dollar was fixed as the initiation fee and 50 cents per month afterwards. It was decided to rent the present quarters for one month, the cost of which, including the electric lights, being only $11. The president and secretary and Messrs. Stillman, Kershaw, Covert, Fairfield and A. Mott were appointed a committee to arrange any necessary purchases so as to have the club in running shape by next Tuesday evening when the club meets again. All young men of the town are cordially invited to join the club. The formation of this institution affords the prominent men of the town an admirable opportunity of donating towards a worthy and needy subject.

THE STRIKE SITUATION

PENNSYLVANIA MEN WILL NOT TAKE STRIKERS PLACES.

They Got off the Train at Frank and Michel When They Learned Strike was Still on.

Much was expected from the proposed meeting of the executive of the Associated Boards of Trade at Fernie this week, but the members of that august body failed to put in an appearance. Whether their absence was due to lack of interest in the Fernie labor troubles or from interested motives it is difficult to say, but one thing is almost certain that they missed an opportunity of manifesting their usefulness to the people of British Columbia. Fernie has always taken an interest in the silver-lead question and assisted in every way to help her neighbors in West Kootenay in matters in which they were vitally interested, even when the issue at stake made no material difference to the prosperity of our town, but now that Fernie is passing through deep waters they manifest an indifference which is hard to understand

The town has been very quiet and the strikers are behaving as gentlemen should. Some excitement was manifest on Wednesday and Thursday upon receipt of a telegram from the east stating that about one hundred and fifty men were on their way from Pennsylvania to take the places of the men on strike. Fully five hundred people were at the station yesterday to meet the train, but they were pleasantly disappointed as only two of the supposed "scabs" put in an appearance. One of these men upon being questioned in regard to their coming said that Elias Rogers had wired them that the strike was over and that all their expenses to B.C. would be paid. 140 men had accepted the offer and started for Fernie, but at Medicine Hat they learned that the trouble was still on and one hundred stopped off at Frank, the remainder coming to Michel. He said that the men would not think of starting work at Fernie till the strike was over.

Work at Michel and Morrissey is proceeding with the utmost rapidity in order to supply the British Columbia market with coke, and this they seem to be able to do as nearly all the smelters in West Kootenay have resumed operations.

To the Editor.

SIR,—The late President Lincoln once said: "Thank God we have a system of labor where there can be a strike." Whatever the pressure there is a point where the workingman may stop. Strike seems to be his only weapon. Strikes are not the result of organized labor, but the better conduct of the strikers is largely due to the same. It is a fact worth remembering that the most violent strikes have been were unions did not exist. As to strikes being justifiable or profitable is no longer the burning question that it was in the early days of the last century, but it is only of recent years that the general public has given the question more serious thought.

At no very far distant date the striker was looked upon in the light of an anarchist outlaw, and a strike as something akin to insane folly, but public sentiment has undergone a complete evolution on this matter, and even the more Conservative minds are agreed on their being justifiable and profitable.

I am firmly convinced that if employers would endeavor to treat their employees in their own true light, as a fellow man, there would be no occasion, or I may say, legitimate occasion, for strikes. But, so long as that spirit of, "I am mightier than thou," exists, there will never be that esprit-de-corps which all right-thinking men long for to see.

There is no wonder that the more rabid spirit of socialism is possessing the minds of the working classes at the present day, to a far greater degree than ever known before.

The financiers of the world are going to their extreme, and they combine themselves into a consolidated body and make an attempt to possess and govern all things, even to the buying of their fellow men's principles. Is it part of the plan of the Almighty that fallen man should monopolize to such an extent. Common sense says "No." A certain amount of this common sense is attributed to the working class. As yet their principle has not been bought and to show this, and their opposition to monopoly, they revert to strikes.

There is a cause for everything under the sun we believe, and what is the cause of strikes? In nine cases out of ten you will find, 1st, it is the action of the moneyed man to usurp that which he thinks is his right; 2nd, to crush down the independence of the individual, and 3rd, the employee to be the slave of the employer. Lincoln saw this and therefore he quoted the headlines of this article.

What is the cause of "The most dastardly outrage yet perpetrated upon the working man"? for such are the headlines of an article in an American publication on the strike now on at Fernie. We in Fernie do not use the term, we leave that to the public at large. They are the best judges, for as lookers on they see most of the play.

An endeavor is being made to encroach upon the long standing principle of eight hours from bank to bank constituting a day's work at the Fernie mines. I would like to bring before your notice, 1st, the action of the General Manager. No notice of any change whatever is given to the men. He, the General Manager, is the mouth-piece of a body of moneyed men and he bears out my first statement as to the cause of strikes. Secondly, because some of the men revealed their individuality, their lamps were stopped and were not allowed to work, this bearing out my second statement as to the cause of strikes, and thirdly, by the action of the Company in closing down the mines, which says you must submit or take the alternative. All this is the action of a supposed educated body of men, but I must say they don't seem to have learned the first principles of a man, to do to others as you would like to be done by.

Why should this company want to impose upon the miners of Fernie this additional length of time in such a risky and dangerous occupation? Is it not a mistake for a company to believe they can get more work out of a man by working him to death? It is now a well known fact that more work is done when there is a prospect for an early cessation from work, than when men know they have to work a longer period.

A few years ago the average day's work in England was 10 hours; on the continent it was 12, and yet it was calculated that two Englishmen would do the same amount of work as six continentals.

When the average working time of a miner in South Wales was 12 hours a day those in the north of England worked only seven, yet the cost of getting coal in South Wales was 25 per cent. more than in Northumberland. It has been said that a workman who cannot tire himself out in eight hours is not worth his wage.

Is this the cause of the strike? From the miners' standpoint it is, but a man has a perfect right to his own thoughts, and if many of those thoughts were revealed the Company would realize that they had in their employ a more common sense set of men and more far seeing, than the were aware of.

KEENLY INTERESTED.

The large police district of Kootenay, of which W. H. Bullock-Webster, has been chief for the past two years, has been devided into two, Southeast Kootenay being a complete division. Mr. Lestock R. Forbes has been appointed chief of the new division with headquarters at Fernie. Mr. Forbes has had large experience in police affairs and should be thoroughly competent to take charge of police matters here. He was first appointed to the force at Silverton in 1897. From there he was transferred to Kuskanok and upon the completion of the railway construction was again situated at Silverton. Since then he has served on the provincial police at New Denver, Three Forks and Lardo until 1900 when he joined the C. M. R. and went to South Africa. He has now complete control of the police in their distinct and will no doubt give a good account of himself The force at Fernie will henceforth be composed of Constables Barnes, Walker and Sampson.

FERNIE WINS AGAIN.

CRANBROOK SENIORS VANQUISHED ON THEIR OWN GROUNDS.

The Juniors Match Resulted in a Tie, the Score Standing 1-1.

A good day's sport awaited those who boarded the train for Cranbrook yesterday. The juniors played a hard battle against the "real thing" and did well to hold it down to a tie, while the easy victory of the seniors, without the assistance of our three stars, Black, Miller and Beaubier, was as surprising as it was satisfactory.

The Juniors lined up at 3.30 as follows:

Cranbrook		Fernie
McEachern	Goal	MacLeod
Henderson	Point	Todhunter
Finnes	Cover Point	Dunlop
Greer	1st Defence	Kirkpatrick
Campbell	2nd Defence	Farquharson
Spronle	3rd Defence	Whimster
Navin	Centre	Cody
McConnell	3rd Home	Farquharson
Morris	2nd Home	Dunlap
Murphy	1st Home	Smith
Fullijames	Outside	Johnson
McPeak	Inside	Lawrence
Tate	Field Captain	MacLean

J. Finnessey, referee.

The game was very even throughout, and it would be difficult to judge which played the better lacrosse. During the first quarter Gordon Johnson succeeded in landing the rubber and from then till almost the close of the game no goals were scored. Many fine rushes were made by both teams and had the shooting abilities of the home boys been better the score might have been different. They were successful in one instance, towards the end, in putting the ball between the flags and the game ended 1 goal each.

McPeak, Henderson and Nevan played the star game for Cranbrook. The Fernie boys played very even and it would be difficult to pick special players. Lawrence, Cody and Todhunter probably might be mentioned.

The Senior game was called for 6:30 and a beautiful evening for a game of lacrosse.

The teams were represented as follows?

Cranbrook		Fernie
Smith	Goal	Schram
Leitch	Point	MacLean
Poster	Cover Point	Herman
Hunter	1st Defence	Kastner
Gillis	2nd Defence	Taylor
Bremner	3rd Defence	Lafortune
Winsby	Centre	Thomson
Clancy	3rd Home	Wrigglesworth
Thomson	2nd Home	McDowell
Jamieson	1st Home	Flett
Finnessey	Outside Home	Reynolds
Carrigan	Inside Home	MacGuire
Mac	Field Captian	Watson

Referee, Bert Donahue. Time-keepers, Tate and Cline.

The first quarter's play was the best of the game, as during that time no goals were scored. The play was about even. It was a hot, fast struggle and both teams played good lacrosse.

The tide turned in the 2nd and things began to come our way. MacGuire scored by a clean shot and afterwards Reynolds threw the ball within the flags, the goal keeper stopping it with his foot while behind the sticks. The Cranbrook boys protested against the decision of Umpire Johnson that it was a goal, and the referee upheld the umpire's decision.

The third quarter was a continuation of the good work. The splendid combination of Reynolds, Flett and McGuire was a puzzle to the Cranbrook defence and everytime they got the ball the crowd held their breath. Two more goals were scored this quarter, McGuire and Flett doing the needful.

During the fourth Reynolds again scored and the game ended 5-0 in favor of the Coal Town.

The game was a rough one throughout and a little too much temper was shown by both teams. The referee was very exacting and did much to check the sluggiug tendency.

Mr. N. Suddaby returned on Friday from an extended trip through British Columbia and the Northwest Territories.

COMMUNICATIONS.

Following is the copy of a letter to the Victoria Colonist from Mr. A. H. Cree, foreman of the jury in the recent inquiry into the cause of the Coal Creek disaster:

Fernie, July 17th, 1902.

Sir:—As foreman of the jury in the Fernie coal mine disaster I feel bound to take notice of an interview with Mr. Lindsey, the general counsel for the Crow's Nest Pass Coal Company, Limited, which appeared in your issue of July 1st, under the heading "The Strike in Fernie."

I have no desire to put my views into print, but I cannot permit certain statements made by Mr. Lindsey and published as his views to go unchallenged. He states that "some of the jurors were bitterly hostile for personal reasons."

This statement is not true and I invite Mr. Lindsey to publish the name or names of those to whom he refers.

Each of the jury were sworn by the Coroner in the following manner:—"You "shall diligently inquire and true presentment make of all such matters and "things as shall here be given you in "charge, on behalf of our Sovereign Lord "the King, touching the death of Steve "Morgan, Joseph Sangala and William "Robertson, now lying dead, of whose "bodies you shall have the view. You "shall present no man for hatred, malice "nor ill-will, nor spare any through fear, "favor or affection, but a true verdict "given according to the evidence, and the "best of your skill and knowledge. So "help you God."

Mr. Lindsey's imputation is, that we violated that oath and practically perjured ourselves merely to gratify personal resentment.

He states further that the evidence did not justify the finding of the jury. This of course is merely a matter of opinion and I leave it to the public to decide, whether six fairly representative business men of the community, and bound by the oath above described, are not more likely to weigh evidence justly and impartially and give a more unbiased opinion than the paid advocate of any of the interests involved.

Mr Lindsey makes another statement as follows: "The government inspector went through the mines three days before the explosion and reported them in excellent condition." I have no wish to enter into any dispute with Mr. Lindsey with regard to any question of evidence upon which we have already adjudicated. But I feel on an inportant point such as this, the public should have the information, now that Mr. Lindsey has taken the initiative and forced the matter into prominence. Mr. Dick, the government inspector, made the statement under oath at the inquest, that he had not inspected the No. 3 district of No. 2 mine, better known as Macdonald's level, in which district Mr. Lindsey claims the explosion originated, since April 23rd, some thirty days prior to the disaster. If Mr. Lindsey is correctly reported he has made a statement which is untrue and which he must know to be so.

I am compelled by Mr. Lindsey's actions to make this public statement, but I can assure you sir, I do so with considerable reluctance. I feel with the evidence freshly before us at the time, and after over seven hours spent in weighing the evidence carefully, we then arrived at what in our eyes was a fitting and proper verdict in accordance with the terms of our respective oaths. Since the inquest nothing has transpired which would cause us to render any other verdict upon the same evidence.

I hope that Mr. Lindsey will now accept my invitation and make a further statement for publication and tell the public that he was either misreported, mistaken or deliberately allowed to be published what he knew to be untrue.

Apologizing for taking up so much of your valuable space. I am sir

Yours very truly,

ARTHUR H. CREE.

Rev. C. W. Houghton paid his fortnightly visit to Michel on Thursday last and held service in the public hall. He will hold service at Morrissey on Thursday evening next.

Although a large number of miners have left Fernie since the disaster there are still a large number left as was demonstrated by the large crowd which turned out to the fire on Tuesday exening. There must have been nearly a thousand present

MINING DISASTER

ONE OF THE WORST CALAMITIES IN THE HISTORY OF PENNSYLVANIA MINES.

ESTIMATED THAT 125 MINERS LOST THEIR LIVES IN AN EXPLOSION.

Johnstown, Pa., has again been visited by an appalling disaster. It is only less frightful than the awful calamity of May 31, 1889, in loss of life, but it has brought sorrow to hundreds of homes made desolate by a mine explosion which took place in the Cambria Steel company rolling mill mine, under Mount Hill, on the 10th inst.

It was nearly an hour after the explosion before any general knowledge of what happened got abroad. Men who came from the mines, escaping with their lives, told the news, and soon it spread all over the city. Hundreds rushed to the point, and awaited news that did not come from the ill-fated mine.

The mining officials stated the explosion was one of fire damp. The catastrophy occurred in the section of the mine known among the miners as "Klondike." The name of the section on the company's books is the sixth west of the south main heading. Four survivors who have escaped from the depth of the mine describe the condition to be the most frightful in their knowledge. Within the fatal limits of the mine solid walls of masonry three feet through were torn down as though barriers of paper. The roofs of the mine were demolished and not a door remains standing. In the face of these difficulties even the most heroic efforts towards rescue may seem hopeless. Miners who left the mine brought stories of crawling over dead bodies of their comrades. Two young men who were at work in the Klondike when the explosion occurred escaped by way of the air shaft.

President Powell Stackhouse gave out the following statement: "The disaster is an awful one, and came on us entirely unexpected. The mine had been inspected only three days before, and was pronounced in a satisfactory condition. In the thirty years that the mine has been in operation no serious accident has occurred. The cause is yet indefinite, but I believe the explosion was caused by gas escaping from the fifth heading, which was closed, and not being worked because it contained gas.

"The number of casualties is placed at 125. No list of the names of the dead miners can be given, for the majority of them are foreigners, and only known by check and not by name. The only way their names will be known if the bodies are not recovered in time for identification will be by their families sending their names to us."

A FINE SIGHT.

One of the sights which are only witnessed about once in a lifetime, was accorded the crew of the Daisy Moore, Lake of the Woods, on her last trip out. When about three miles out in the Big Traverse they ran across two magnificent moose—a bull and a cow—swimming across the big water. Capt. Williams says it was something to remember to see the big animals breasting the waves side by side.

TROUBLE IN TRANSVAAL.

A cable from Pretoria says: There is some uneasiness here regarding the attitude of the Basutos. In consequence of supposed treachery during the war, Joel, one of their prominent chiefs, has been summoned to Maseru, capital of a military district of Basutoland, to stand his trial on the charge of high treason. The paramount chief, Lerethodi, is likely to support Joel in the event of the latter's refusal to obey the summons. Troops have been dispatched to the frontier.

THE BOER LOSSES.

According to an estimate of the Red Cross identity depot, which fulfilled the functions of a casualty bureau for the Boer forces, their total losses during the war were 3,700 men killed or died of wounds, and 32,000 made prisoners of war, of whom 700 died. The Boer forces in the field numbered about 75,000.

CANADIANS DEFEATED.

On July 10 the Canadian Bisley rifle team shot a match with the New Zealanders and Natal teams at Brookwood, under Kolapore conditions, and took second place, the New Zealanders won by 19 points.

Peter Pellerin was accidentally killed in the Riding mountains last week. He and a companion were stalking a deer, when his companion mistook him for the deer, and fired, killing him.

A BAD SAND STORM,

Over $1,000,000 Damage is Done in the Oasis of the Colorado Desert.

A sand storm has caused damage estimated at $1,000,000 in the Indo valley on the Southern Pacific railroad in the Colorado desert. An artificial oasis of 900 acres had been made by digging artesian wells and planted in melons. Judging by last year, when only sixty acres were in cultivation, a profit of more than $100,000 would have been made.

Three hundred carloads of melons, for which $1,200 a car had been offered, were almost ready for shipment when the storm broke. For three days it raged, with the thermometer 126 degrees in the shade, and when it was over every bit of vegetation was destroyed.

SWIFT AND ARMOUR UNITED.

The Chicago Inter-Ocean says: A combination of the gigantic companies controlling the packing industry of the United States has finally been consummated, with John D. Rockefeller as the central figure in the financial part of the negotiations. Final arrangements have been made for the consolidation of the Swift and Armour interests, which have recently gained control of the other packing concerns throughout the country. The final steps required merely the merging of the Swift and Armour interests. There are, it is said, one or two companies not yet under its control, but negotiations are pending with a favorable outlook.

SOUTH AFRICAN GARRISON.

The Daily Mail of London says the permanent garrison in South Africa is to be 50,000 men, under the command of Lieut.-Gen. Littleton. Besides this force, the system of having a large number of reserve scattered throughout the country, either on farms or in official positions will be extensively followed. The reservists could be called on for service in case of emergency.

ONTARIO'S BIG APPLE CROP.

Prospects are good for a fairly large crop of early apples in Canada. It is reported that Red Astrachans, St. Lawrence, and similar varieties, will be abundant enough to provide a comparatively large quantity for export.

AT WINNIPEG'S FAIR.

Some of the Attractions Which Will Be Presented.

July 21, the date on which Winnipeg's big industrial exhibition will be opened to the public, is fast approaching and all arrangements for the event are now about completed. The special attractions will be on a scale never before attempted in the west, and the other features will be on the same splendid basis.

Outside the big race tracks in the east there is nothing that can compare with the prize list offered by the management for speeding events. and the big purses are attracting speedy horses from all over the west as well as from the fast stables in the States. The free-for-all, with stakes of $3,500, promises to be a sensational event, and the running race, with a value of $2,500, has been the incentive that has drawn out a big string of clean limbed gallopers. Twenty events are on the race card and the total amount of money hung up in purses will aggregate $11,500.

The special attractions in the way of amusements will include all the novelties of the modern circus world.

Diavolo, the famous bicycle rider, who defies the laws of gravitation by riding his wheel with his head toward the earth in his "looping the loop" feat, has only sprung into fame in the last year. He is with Jabour's circus, the same aggregation of performers that created such a sensation at the Elks' fair, held in Minneapolis just a short while ago. Besides Diavolo and a host of acrobats there is a big den of lions. These are made to perform astounding tricks by their trainer. One of them, a big male, has proved absolutely untamable, and his furious outbursts are awe-inspiring, even although he is behind a stout cage that even his magnificent strength can not break.

The display of fireworks that will wind up each evening's entertainment is one that will provoke wonder from every quarter. Besides the usual illuminations in the way of rockets, fire balloons and set pieces, there will be given each evening a representation of "The Burning of Moscow," in which over one hundred people will take part as representatives of Napoleon's army. This big corps is being specially trained for the occasion, and will be attired in uniforms both brilliant and historically correct.

If the wife is untidy the husband may try to get untied.

TO OPEN EXHIBITION

SIR DANIEL McMILLAN WILL OFFICIATE AT THE WINNIPEG INDUSTRIAL FAIR.

MUCH INTEREST IS EVIDENCED IN SPEEDING EVENTS—BIG ENTRIES.

Sir Daniel McMillan, Lieutenant-Governor of Manitoba will formally declare the Winnipeg Industrial exhibition to be opened after being lunched by the board of directors at the exhibition grounds on July 21. The operation of all the machinery and the commencement of the special features of the fair will immediately begin as the words drop from his honor's lips and from then on until

Acrobats with Jobour's troupe at exhibition.

the night of the closing day, July 25, the grounds will throb with the ceaseless tread of the thousands in search of pleasure or instruction.

ENTRIES OF CATTLE BREEDERS

There will be a mighty array of pure bred stock on exhibition this year, and this will include not only the best of the Canadian cattle but also representatives of some of the best herds in the United States.. The cattle breeders on the other side have had the Canadian west brought forcibly to their attention by the recent great exodus to this country from the States. They know that Canada is a big farming country and are anxious to introduce their live stock to such a thriving community.

Among the big American breeders who will show stock is Otto H. Swigart, of Champain, Illinois, who has entered over thirty head of cattle. The majority of them are Galloways.

To obviate all danger from the crush at the exhibition entrances the directors have ordered eight new turnstiles. Many other improvements will be noticed around the park. A big staff of men are at work overhauling the buildings, grandstand and sidewalks so that everything will be ship shape when the exhibition opens a week from Monday next.

THE ROAD RACE.

Entries for the speeding events are pouring in and the speed events will proved to be exceptionally successful. The manager of the Exhibition association is receiving a great many inquiries regarding the contemplated road race. The general opinion of those who have been spoken to on the matter is that the race had better be for 3 and 5½ mile heats rather than for 2 and 3 mile heats, the reason given being that there are very few road horses in the city or in the country that are in condition for mile heats.

As the entry for this contemplated race is practically free, it will be left entirely discretionary with the directors and the judges as to the qualifications of a general road horse and the buggy to be used. This is to ensure its being as far as possible a strictly amateur event. Professionals of all kinds, both horses and drivers, will be absolutely barred.

Jabour's immense circus will provide wonders enough to keep the imaginative mind in a tumult for a year. Skilled acrobats, sensational trick performers, trained wild animals, balloon ascensions, oriental theatres and a host of other novelties will be included in Jabour's show.

Each evening's performance will be concluded with a brilliant spectacle of fireworks, winding up with the magnificent pyrotechnic production representing "The Burning of Moscow" by Napoleon. Over a hundred men are employed in this scene to represent the French soldiers and Russian citizens.

FAST ATLANTIC PROJECT.

Sir Robert Bond urges the importance of direct trans-Atlantic travel from Ireland to Newfoundland, by which plan he says the ocean may be crossed in 44 hours, and New York reached from London in 100 hours.

CATTLE WITH A JAG.

They Stampeded in the Stock Yards With Fatal Effects.

Panic-stricken and bellowing loudly, a big herd of cattle, maddened and half-intoxicated by alcohol in distillery "slop," stampeded in the Chicago stock yards recently.

More than a score of the animals met death in the rush. Scenes were enacted that for terror and blood made old stockmen and cowboys turn their backs. One man nearly lost his life. The herd which stampeded consisted of more than six hundred head of the kind that are known as "distillery cattle," and are fattened on the refuse from liquor mills. A closed gate caused the trouble, and before it was over twenty-one animals lay in a heap. Some impaled on horns, others with necks broken and others frantically climbing over the squirming mass, while some of the survivors leaped fences and escaped to various parts of the yards.

Stock dealers say that the stampede is the worst of the kind that has occurred at the yards in ten years. It frequently happens that the wild, big-horned Texas steers go on a rampage, but not so great a number of animals have been stamped to death in any of their wild rushes.

The chute or viaduct through which the cattle were being driven runs midway through the huge stockyards sheephouse and the incline which leads to the Armour packing house and pens starts just south of the sheephouse. A dead wall of cattle was what finally brought the rear rush of animals to a halt, the herd only stopping when the pressure behind gave way because of the lessening numbers.

THE CROPS IN ONTARIO.

Reports received in Toronto from all parts of the province as to the prospects of the hay and and grain, root and fruit crops show conclusively that had this been an average season, and free from the extraordinary amount of rain that has fallen, the yield in every particular would have been a record one. Even as it is, the prospects for the crops, either up to or above the average, are very bright all over, except in the matter of hay. The rain has played great havoc with the hay crop, which, while it was an extra large one, has not been harvested successfully, owing to the recent almost continuous rainfall.

Corn is said to have suffered greatly from wet and cold and the yield will be rather poor. In some locations the crops on low lands will suffer, while the highlands will escape damage. The fall wheat will be from the average to very good in places by the drowning of the Hessian fly, but continued wet weather threatens it with rust. The oat crop seems to promise well all over, and so does barley. Peas have suffered severely in some parts. The root crop generally will be up to the average if not a little better.

The fruit yield promises to be very heavy. Cherries and plums look well. It seems to be the general opinion that if the weather from now on proves anyway favorable, much of the apparent damage done in some places may yet be avoided.

IS THE HORSE A FOOL?

I have spent much of a long life in the observation of horses, writes an Owensboro, Ky., horseman in Harper's Weekly. I have reared them, broken them, trained them, ridden them, and driven them in every form from the plow to the four-in-hand. The result of these years of study is summed up in one sentence: "I believe the horse to be part maniac and part idiot." Every horse at some time in its life develops into a homicidal maniac I believe any man who trusts himself or his family to the power of a horse, stronger than himself, to be lacking in common sense and wholly devoid of ordinary prudence. I have driven one commonplace horse every day for six years over the same road, and then had him to go crazy and try to kill himself and me because a leaf fluttered down in front of him. I have known scores of horses apparently trustworthy, apparently creatures of routine, go wild and insane over equally regular and recurring phenomena. No amount of observation can tell when the brute will break out. One mare took two generations of children to school over the same road, and then in her nineteenth year went crazy because a rooster crowed alongside of the road. She killed two of the children. If anyone can tell me of one good reason why man should trust a horse, I should be glad to know.

Mr. Eastman, the head of the great London kodak business is a millionaire, yet he still carries his lunch from home with him every day to his office, and eats it at his desk. He has no time to go out.

The introduction of American labor saving machinery into the cotton industry of Lancashire is causing considerable uneasiness among operatives.

FIREMEN MEET DEATH

FIVE MEMBERS OF TORONTO FIRE BRIGADE MEET AN HEROIC DEATH.

IN A FIRE WHICH CAUSED DAMAGE TO THE EXTENT OF A QUARTER MILLION

A dispatch from Toronto, dated July 10, says: Five firemen were killed this morning in a disastrous fire, which started in the old street railway stables, at Front and George streets, and swept the district to the east and south.

The fire started at five minutes past six in the south end of the old stables, now occupied as a grain and storage warehouse by P. McIntosh & Sons. The flames raged through the building from the Esplanade to Front street, and at half-past 7 o'clock only the front wall of the building was standing. The whole of the brigade fought the fire, but in spite of every effort to check it, the flames leaped across the Esplanade and crossed George street to the east. The wholesale hay and straw warehouse of Gadsby & McCann, on the east side of George street, (half was between Front and George streets), provided additional fury for the flames, which spread in great sheets.

David See, Harry Clarke and Adam Kerr, of Lombard street station; Walter C. Allard, of Rose avenue station; and Fred Russell, of Yonge street station, were working outside the southeast wall of the McIntosh building, near the Esplanade, when the brick wall, two stories high, collapsed suddenly and toppled outwards. All the men were buried under the great mound of hot bricks and blazing timbers, and though an instant rush was made by their comrades to rescue them they were quite dead when extricated. Their bodies were taken to the morgue.

Great crowds witnessed the fire, and the police had the utmost difficulty in controlling them. They swarmed in the windows of the Market hotels, on the rools, and on the eastern platform of the new market building. On the Esplanade their recklessness of danger was particularly noticeable. They crowded around the burning buildings, which the firemen and police expected to see fall at any moment.

Several other men were injured, but not seriously. The loss will be several hundred thousand, and will affect many business men of Toronto, the warehouse having contained extensive stocks. Chief Thompson says that at least two of the men perished owing to disobeying orders.

The total loss will probably be about $175,000, of which $75,000 will fall on McIntosh & Co.

RIEL'S EXECUTIONER DEAD.

John Henderson, who eighteen years ago was the official executioner for the Canadian government in the Northwest, and who hanged Louis Riel, the leader of the rebellion in 1885, is dead at Glasgow, Mont., as the result of an operation.

FARMER MEETS SUDDEN DEATH

David W. Clark, a prominent farmer living northeast of Hope, Ont., was driving over a crossing at Stratford when he lost his balance and fell in front of his wagon, which passed over his chest, crushing out his life.

POISONED PIE.

A cable says that thirteen English and American boys attending the inland mission school at Chefoo were seized with illness after partaking of chicken pie. Twelve of the boys died supposedly from ptomaine poisoning.

NEWS NOTES.

A broken rail at Ignace upset the C. P. R. express from Winnipeg and ditched the engine. No one was injured.

Elaborate preparations are completed for the reception of Lord Kitchener in St. James' palace.

At a dinner in London Hon. M. Dickenson, of Detroit, mentioned Joseph H. Choate as a possible candidate for the presidency of the United States.

FERNIE FREE PRESS.

FERNIE, B.C.

General Dewet stated to an interviewer that throughout the war he had never been hit once, nor had his horse been touched, but his adjutant had six horses killed under him, and had been wounded twice. Dewet, however, had his clothes cut by bullets, as had many of the other leaders.

Cholera and all summer complaints are so quick in their action that the cold hand of death is upon the victims before they are aware that danger is near. If attacked do not delay in getting the proper medicine. Try a dose of Dr. J. D. Kellogg's Dysentery Cordial, and you will get immediate relief. It acts with wonderful rapidity and never fails to effect a cure.

A portrait of Martha Washington will adorn the 8—cent U. S. postage stamp which will be issued next fall.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is a boon to any home. It disinfects and cleans at the same time.

Perhaps the largest camellia in existence is at Plintitz Castle, near Dresden, Germany. The tree is 24 ft. high and annually produces about 50,000 blossoms.

Messrs. C. C. Richards & Co.

Dear Sirs,—While in the country last summer I was badly bitten by mosquitoes—so badly that I thought I would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and I did so. The effect was more than I expected—a few applications completely curing the irritation, preventing the bites from becoming sore. MINARD'S LINIMENT is also a good article to keep off the mosquitoes.

Yours truly,
W. A. OKE.

Harbor Grace, Nfld, Jan. 8, 1898.

"One swallow does not make a spring,"
That's patent to the minds of all.
But copious swallows surely bring
In time, a most disastrous fall.

One Kansas town of 14,000 population furnished 40 divorce cases for the last term of the district court.

Hood, the author of the "Song of a Shirt," was an engraver.

An Owosso, Kansas, man who is stone blind has just finished reshingling his house.

There never was, and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have however, in Quinine Wine, when obtainable in a sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto, have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

Self-trust is the essence of heroism. —Emerson.

The Champion Cheese.

The largest cheese ever made was 6 feet 10 inches in diameter and 21 feet in circumference. It was made at a factory in Canada and weighed 7,000 pounds.

HAD TO BE LIFTED

A HELPLESS CRIPPLE IS RESTORED TO HEALTH AND STRENGTH

Lame Back Had This Man a prisoner For a Long Time, But at Last He Found a Cure Though Given Up by the Doctors.

Napanee, Ont., July 14—(Special)—The doctors told Simon Warner that they could do nothing for him. He had tried many medicines and treatments with no good result.

He was a helpless cripple with lame back, and for a long time his wife had to lift him in and out of bed, the pain in his back was so very severe.

In this extremity a friend's advice saved him. This man had suffered with backache himself, but had been completely cured by Dodd's Kidney Pills, thus when he heard that Mr. Warner was so bad he went to his home and recommended this medicine to him.

Mr. Warner and his good wife were at first inclined to be somewhat doubtful, but here was the evidence that Dodd's Kidney Pills do cure Lame Back right before their very eyes in the person of the man who had been cured. Surely it must be true.

So after some deliberation they decided to try, and now they are very much pleased that they did so, for in a short time Mr. Warner's backache had vanished. He grew gradually stronger and better and at present enjoys the best all-round good health he has had for many years.

There is not a trace of lame back remaining, not a single symptom, and the helpless man who used to be a burden to himself and his wife is now strong and a comfort to his faithful helpmate, He says:

"We have used in all about twenty-five boxes of Dodd's Kidney Pills, and given some away to our neighbors. I find that when they use a box they themselves are about as strong in their recommendations as we are.

"I can certainly highly recommend Dodd's Kidney Pills as a sure cure for Lame Back, for they cured me, and I never heard of a worse case."

There are 15,000 deer in the Yellowstone National park.

Congress appropriations for the session just closed will exceed $927,000,000.

In his Vegetable Pills, Dr. Parmelee has given to the world the fruits of long scientific research in the whole realm of medical science, combined with new and valuable discoveries never before known to man. For Delicate and Debilitated Constitutions Parmelee's Pills act like a charm. Taken in small doses, the effect is both a tonic and a stimulant, mildly exciting the secretions of the body, giving tone and vigor.

Greece holds the earthquake record, with 3,187 shocks in five years.

BABY'S OWN TABLETS.

A Positive Cure For Hot Weather Ailments.

In the hot weather the little ones suffer from bowel troubles, are nervous, weak, sleepless and irritable. Their vitality is lower now than at any other season. Prompt action at this time often saves a valuable little life. Baby's Own Tablets is the best medicine in the world for little ones at this time. They speedily relieve, promptly cure, and give sound, refreshing sleep. The Tablets should be in every home where there are little ones during the hot weather months. Mrs. P. Ferguson, 105 Mansfield street, Montreal, says: "I have found Baby's Own Tablets the best medicine I have ever used for children. My baby was attacked with dysentery and was hot and feverish. I gave him the Tablets and they promptly cured him. Before this he had been rather delicate, but since using the Tablets he has been much better in every way. I can sincerely recommend the tablets to all mothers with ailing children."

Baby's Own Tablets are guaranteed to be absolutely free from opiates and harmful drugs. Children take them readily, and crushed to a powder they can be given to the youngest infant with perfect safety. They are sold at all drug stores or will be sent post paid at 25 cents a box by writing direct to the Dr. Williams Medicine Co., Brockville, Ont., or Schenectady, N. Y.

Death has nothing terrible which life has not made so—Edwards.

Cultivation to the mind is as necessary as food to the body.

MARKETS.

GRAIN AND PRODUCE.

This has been an active week in the speculative wheat markets of America. Nevertheless in spite of the activity there has been very little change in values from a week ago. The market seems to be chiefly influenced by the changes of weather over the Western States.

Recently and at the present time the winter wheat crop in the States has been in process of harvesting under unfavorable circumstances owing to abnormally wet weather and a good deal of the early harvested wheat is of poor quality and condition. At the same time feed grain is scarce and dear so that it goes without saying that a large quantity of this poor wheat will be used for feed and to curtail the quantity otherwise available for milling and export. Australia has had a drought recently which although since partially relieved seems to preclude the expectation of that country being an porter next year, and in the meantime she has been importing both wheat and flour on a small scale. india is is about the same predicament as to the prospect for the coming season's wheat crop. Argentina may have a much larger crop next year, but the seed for it has just gone into the ground. The consumption of wheaten bread is believed to have considerably increased in recent times, so that taking the situation altogether there seems reason to expect that present prices will hold up well during the ensuing 12 months and probably even find a higher permanent level until the time again comes when with increased acreage and the fortune of a favorable season's supply will overlap demand a decline again ensue.

There has been only a quiet business in Manitoba wheat, but prices have hardened towards the close of this week and latest values are: No. 1 hard, 77c; 1 northern, 75c; 2 northern, 73c, in store, Fort William, spot or July delivery.

FLOUR—While local demand is only moderately heavy there is a good export demand for flour, and as prices for wheat are high an advance in flour prices is momentarily expected. In the east the price has already gone up 20c per sack. We quote: Ogilvie's Hungarian, $2.05 per sack of 98 lbs.; Glenora Patent, $1.90; Alberta, $1.75; Manitoba, $1.60; XXXX, $1.25.

MILLFEED — Bran is firm and worth $15 per ton in bulk. Shorts firm at $17 per ton in bulk, delivered, subject to usual trade discounts.

GROUND FEED—We quote: Oat chop, per ton, $28; barley chop, $24; mixed barley and oats, $26; chop screenings, $15.50; oil cake, $30.

OATS—The market for oats is unsettled. Business is quiet and mostly confined to local account. We quote: No. 2 white, 40½c per bushel, for carlots on track here; feed grades, 37 to 38c. At country points farmers are getting 31c to 34c for No. 2 white oats. Street oats are not offering.

BARLEY—There is very little barley in the market and prices are steady at 42c to 44c per bushel for carloads of feed on track here.

SPELTZ—Dealers are doing a little business in speltz for feeding purposes at 50c per bushel of 50lbs.

HAY—Demand is fair and the market steady at $7 to $8 per ton for carlots on track here for fresh baled.

POULTRY—The market is quiet. Live chickens bring 70 to 75c per pair, and turkeys are worth 11c per pound, live weight.

BUTTER—Creamery—Receipts are fairly large and prices hold steady at 16½c to 17c per pound for choice creamery, f.o.b., factory

BUTTER — Dairy—Some in the trade complain that more than a fair percentage of the dairy butter now coming in is of inferior quality. Others are better pleased with receipts. The market holds steady and there is a good demand for all offerings. Prices range from 12c to 13c per pound, commission basis, for best grades, and from 9c to 11c for seconds.

CHEESE—The market is steady and purchases have been made at 8½c per pound. The range of prices is from 8½c to 9c per pound delivered here.

EGGS—A stiff demand for eggs has put the market in a stronger position and prices have been 1½c higher than a week ago, at 12½c per dozen for choice case eggs, delivered here.

DRESSED MEATS—Receipts are improving, and the market is easy. We quote: Beef, city dressed, 7½ to 8½c per lb.; veal, 8 to 9c; mutton, 9c; spring lambs, each, $3.50 to $4 hogs, per pound, 7¾ to 8½c.

LIVE STOCK.

CATTLE—Receipts of grass fed cattle are increasing, and there is now a much better supply of beef. Exporting will commence very shortly. Butchers are paying from 4c to 5c per pound, off cars here, for live cattle, according to quality.

SHEEP—Receipts are more liberal, and prices range from 4 to 4½c per pound, off cars, here. Lambs are worth 3½ to 4c.

HOGS—Live hogs are coming in freely, and the market is easy at 6½c per pound for best packing weights, off cars, here.

"It is a Great Public Benefit."—These significant words were used in relation to Dr. Thomas' Eclectric Oil, by a gentleman who had thoroughly tested its merits in his own case—having been cured by it of lameness of the knee, of three or four years' standing. It never fails to remove soreness as well as lameness, and is an incomparable pulmonic and corrective.

Human knowledge is the parent of doubt.—Greville.

Men, like bullets, go farthest when they are smoothest—Richter.

Truth has rough flavors if we bite it through.—George Eliot.

Civility is a charm that attracts the love of all men.—Bishop Horne.

Company, villainous company, hath been the ruin of me.—Shakespeare.

The intellect is perfected not by knowledge, but by activity.—Aristotle.

The difficulties with which we are met are the maids of honor which set off virtue.—Moliere.

How to Get Rich.

Take a quantity of silica costing one-fourth the price of oil; mix it with oil, and sell the compound to the public at the price of pure oil; offer "prizes" with the compound to make it sell. It is such a compound the public get when they buy common soaps. In Sunlight Soap—Octagon Bar—the public buy a pure and well-made soap. Sunlight Soap reduces expense by prolonging the life of the articles washed with it, which is much more profitable to the public, than common soaps with "prizes." 204

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, JULY. 19, 1902.

EDITORIAL NOTES.

THE officials of the Crow's Nest Pass Coal Company might with profit give some thought to the strictures which E. C. Smith, the member of this district in the provincial legislature, has seen fit to pass upon the manifest policy of the company. Mr. Smith was not always prejudiced against the coal company. In fact it is but a few months since he was generally looked upon as a company man What has wrought the change? It is not unfair to assume that the reasons outlined in the interview of Mr. Smith properly describe them. He has been the friend and to a certain extent the advocate of the coal company in the legislature, but even he says it is time to call a halt. That the policy which the coal company is pursuing is not in line with the interests of the province, and that every other consideration is being subserviated to the end that still greater dividends may be earned by the stock-holders. Mr. Smith sees in the manner in which events are shaping at Fernie, at Michel, and at Morrissey, the introduction of the Pennsylvannia system. One in which the dignity is stripped from labor. In which the men who are employed in the mines become the abject creatures of the corporation employing them, and he for one purposes to raise his voice against it. There is a note of warning in the remarks of Mr. Smith. He has no monopoly of the fears and views which he holds. If the coal company is wise it will be content with the business and the profits arising from the mining of its coal measures. There is no corporation so strong that it does not require any friends, and no corporation can have or hold friends if its aims to hog everything for itself. It might be well if the coal company would give the rest of the people in the community a chance.

* * *

THE intervention of the executive of the Associated Boards of Trade in the local strike has ended in a fizzle. There was an opportunity in the dislocated condition of affairs here for the executive of the Associated Boards of Trade to prove that their organization is something more than a mutual admiration society, and that it has some claim upon its high-sounding title, but in the light of the week's events the members of the executive of the Associated Boards of Trade must be written down as a lot of dubs.

The president of the executive, G. O. Buchanan, of Kaslo, as well as the Kaslo and Nelson members of the executive, may be excepted from this classification. Mr. Buchanan was alive to the opportunities which the condition of affairs presented from the first, and did all in his power to induce his fellow members to act, but with the exception of the Kaslo and Nelson representatives, he failed to arouse sufficient interest among the members to receive a courteous reply to his call for the meeting here on Wednesday.

The president and Mr. Geigerich, of Kaslo, journeyed to Nelson on Monday, so that they could take the boat for Fernie on Tuesday morning, but when they arrived there thay found that, aside from the Nelson member, there was not a representative of any other board of trade on hand to make the journey to this city. This indifference on the part of the members of the executive, after their good offices had been requested by the Fernie Board of Trade, after they had been summoned to meet, so disgusted the president that he called the meeting off forthwith, and so greatly was his patience tried that he even forgot to notify the officers of the Fernie board that the meeting had been cancelled.

Since the Fernie strike has been on there has been a great deal published in the press about the loss which the strike was occasioning throughout the province. The newspapers must have been wrong, and they had better cut such comments out in the future- True, it was a reasonable supposition that an interference with the fuel supply of the smelters of the interior would have a disastrous effect upon the mining and smelting industries of the district, and thus indirectly affect the entire community, but by their action the Associated Boards of Trade have said that this was all wrong. If their indifference means anything it means that the present condition is desirable, or if not desirable, at least it not sufficiently important to warrant any effort on their part at bringing about a change.

The Associated Boards of Trade had better haul down their sign and go out of business. It is evident that its members cannot take a lively interest in anything save the wrapplings of corporate interests for public soil. In a fight between the Canadian Pacific railway company and the Crow's Nest Pass Coal Co., the Associated Boards of Trade could hold a field-day, and no distance was too great for its members to travel to be on hand, but in case like the Fernie strike, where no corporation is standing by with an axe to grind, the interest of the Associated Boards of Trade wilts like a linen collar in the summer time. Truly the Associated Boards of Trade has a nice conception of its own usefulness.

OPINION OF THE PRESS ON THE SITUATION AT FERNIE.

Phœnix Pioneer,

John H. Tonkin, the new manager of the Crow's Nest Pass Coal Co., has been telling the newspapers at the coast how the recent fatal accident happened, and why the jury censured the company. If he would settle that miners strike which is tying up all the industries of southern British Columbia, his interviews would be more interesting to residents of the Boundary and Kootenay.

Boundary Creek Times.

The Fernie strike has thrown several hundred coal miners out of employment. It has closed nearly every mine in Kootenay and the Boundary district. Several of the smelters are already closed and all the others must follow unless the strike is settled. The Fernie miners have succeeded not only in throwing themselves out of employment but thousands of their fellow workers. But the influence of the strike goes further. The earning power of the various districts having been reduced to an enormous extent, business men feel the blighting effects of the strike. Many miners have left the country thus reducing our population. The output of the mines has been practically wiped out—a less a revenue to the provincial government. The effects of the strike are so varied and far reaching that it is not a question between employes and employed, between the Crow's Nest Pass Coal Company and the striking miners but a question in which all are directly interesting. It is rather a striking commentary on our boasted advance legislation that a few miners in Fernie can practically tie up every industry in the most important section of our important province. The merits of the strike need not be discussed here, but we do say that because the miners at Fernie wanted to strike or the company want to close down their mine the entire mining and smelting industry should not be compelled to await their pleasure.

Vancouver World.

The Ladysmith Leader in a recent issue suggests that the editor of The World peruse the finding of the jury investigating the Fernie mine disaster—this in reply to a comment in this paper upon the curious readiness of the Leader to accept it as proven that that calamity was the result of carelessness on the part of the workmen in the mines. The World has read the finding, and re-read it, and has found nothing whatever in it to lend the slightest color to the theory of the Leader, so exactly in accord with what its power behind the throne would wish to have assigned as the cause of all colliery disasters. The verdict is precisely in line with what this paper indicated it would be at the time of the disaster. It is precisely what every disinterested person who made himself familiar with conditions at the colliery at the time of the explosion knew that it would be, were the workers in the mine who could tell of its conditions still in Fernie when the time came for the taking of their evidence. It is such a verdict as in the opinion of the Ontario and the Manitoba press, reflects the greatest shame upon the owning company for being economical in its mine practice at the expense of the safety of mine and miners.

A. C. LIPHARDT.

LOCAL AND GENERAL.

Dr. Watt and G. Galbraith, of Fort Steele, were in town on Wednesday.

Bro. Deane, editor of the Nelson News, was in town on Wednesday of this week.

Dentist

Dr. Barber is now at his office over A. C. Liphardt's.

Miss. J. McDonald, left on Tuesday evening for Lindsay, Ont., where she will spend her holidays.

Rev. D. Holford, returned from Nelson on Tuesday, where he had been attending the annual meeting of the British Columbia Baptist Convention.

Nearly all the timber on the west side of Elk River has been staked off during the past two weeks.

Mr. A. Archibald, of Kimberly, has purchased the drug business of Mr. A. W. Bleasdell, and will take possession on Monday.

Over twenty people ascended to the summit of Mount Fernie on Sunday last. A number also went up the Lizzard Creek range.

Fred Vance left on Sunday for Dundock, Ont., where he will spend several weeks. W. A. Ingram will conduct his barber shop during his absence.

Mr. Sherwood Herchmer has gone into partnership with his brother in the law business here. The firm will henceforth be known as Herchmer & Herchmer.

Our Junior Lacrosse Club are springing into prominence They have received a challenge to play at Lethbridge on Aug. 12th. If our Senior Club do as well as they expect they will be down on that date playing the final for the Cup.

Passengers over the Crow's Nest are now transferred past the bridge near Pincher Creek in hand cars. The company have large forces of men at work at all the damaged bridges in Alberta, and as the water has again subsided, is rapidly getting them into shape.

A new lumber company was formed last week by a number of local business men under the name of the A. D. Lumber Co., with mills at Coal Creek and headquarters at Fernie. The officers of the company are :—Pres., A. D. McRae ; Manager, G. G. Jewell ; Sec.-Treas., J. A. Rennie.

Baptist Church, Victoria Ave., service in the morning at 11 o'clock, subject :—"The Church, What it is and What it Does. Evening service at 7.30, subject : "The Program of Christianity." Wednesday evening at 8 o'clock prayer and bible study service. Thursday evening at 8 o'clock B. Y. P. U. meeting. A hearty welcome awaits all who come to these services.

New Trail

The government have commenced work on the new trail up Phillips Creek, Tobacco Plains. This will open a road to the large oil fields in that section and to the Bellvue mine, in which a number of Fernie citizens are interested. A large number of Americans are prospecting around Phillips this season and some Spokane capitalists are negotiating with Michael Phillips for several claims which he owns.

Young Men's Club

The Young Men's Club is now an assured success. The second general meeting took place on Tuesday evening, and the remaining officers were elected, Mr. I. Covert fills the position of Vice.-President and Messrs. Fairfield and Claxton were added to the executive. After the business of the evening was over the president declared the club rooms open and in full swing for the future. A large selection of daily and weekly newspapers are now in place for use by members, and also a fair list of magazines. In addition to this many interesting games have been provided. The rooms are comfortably furnished and well lighted and no better place can be found in town to spend a pleasant and profitable evening. Young men visiting the town are cordially invited to drop in.

Fire

About 11 o'clock on Tuesday evening the citizens were aroused by an alarm of fire in the Old Town. The fire brigade hastily turned out, but owing to insufficent hose were unable to reach the scene of the conflagration, which was located in a cluster of shacks occupied by Italians, near the coke ovens. The fire is supposed to have been the result of the carelessness of some bachelors who lived in one of the buildings. The flames quickly spread to the adjoining building and in spite of the efforts of a large bucket brigrade four buildings were burned and six families rendered homeless. Very few household effects were saved owing to the rapid progress of the flames. A heavy shower just previous to the fire averted the danger of a general conflagration in the Old Town.

Dentist

Dr. Barber is now at his office over A. C. Liphardt's.

Bruce Stewart, a popular young man about town, left for Hargrave, Man., on Tuesday evening.

R. A. Kerr has received the contract for the erection of the new school at the mines.

Mr. A. Smith, school teacher at the mines, left for Revelstoke this week, where he will spend his vacation.

Pincher Creek will play baseball with the Medicine Hat team on Monday at the latter place for the championship of the N. W. T.

A large number of Fernieites expect to take in the Nelson ragatta on July 25th and 26th. The citizens of Nelson are making every preparation for a big demonstration.

Wednesday, July 16th, was the date fixed for the meeting of the executive of the Associated Boards of Trade in Fernie but the only member who made his appearance on that day was A. Leitch, of Cranbrook.

The Brotherhood of Railway Trackmen of America has been refused permission to carry on an insurance business in Canada, for the benefit of its members, on the ground that it has not been satisfactorily proved to the government that the calling of a trackmen is sufficiently dangerous to prevent trackmen from obtaining insurance at reasonable rate from the ordinary companies.

Visitors to the opening of the Winnipeg Industrial exhibition, which takes place on July 21, will be granted an opportunity of seeing one of the men whose devotion to the cause of the Empire and sterling integrity brought to him an elevation to knighthood in the distribution of royal favors granted by King Edward VII on the eve of his coronation. This is Sir Daniel McMillan the lieutenant-governor of Manitoba. He has been a warrior in several fights, and the smell of powder is to him but the incentive to deeds of heroism. He became lieutenant-governor of Manitoba in 1900.

Fred Beaver, better known as "Prof", while under the influence of liquor on Saturday evening last, was walking down the mainline of the C. P. R. toward Coal Creek bridge just as the express from the west came along. The engineer saw the man on the track just after rounding the curve and whistled for him to get off, but the Prof. failed to realize his danger and walked straight into the engine with the result that he is now minus a leg. It was thought for some moments that the man was killed, but this proved to be incorrect upon examination as was found that aside from one leg being badly mangled there was no other serious injury. Beaver was taken to the hospital where the injured member was amputated by Drs. Bonnell and Corsan.

The Misses Smith and McLean entertained a large number of friends at the Royal Hotel on Wednesday evening previous to their departure on Thursday for Regina. Cards and dancing were indulged in till a late hour, Princess hall being used for the latter purposs. Among those present were :—Mr. and Mrs. Tuttle, Mr. and Mrs. J. Broley, Mr and Mrs. Williams, Mrs. Nicoll, Misses Ryan, Lelande, Stevens, Neil, Dean, Farquharson, Dunlop, Hackett, Thompson, Archibald, McKenna, Jarvis, Adams, McMillan and Messrs. A. Thompson, H. S. Monkman, M. Berrigan, W. Broley, T. McMillian, E. Wrigglesworth, T. Whalen, J. Falconer, A. Archibald, H. Bell, J. Maugian, T. Kennedy, A. Matheson, H. McLean and A. Steele. A delightful evening was spent by all present.

The lectures by the Rev. E. K. Yosseph on Sunday and Monday evening were largely attended and were both interesting and edifying. The Presbyterian and Baptist demoninations showed a Christian spirit by withdrawing their service on Sunday evening so that their congregations might have the privliege of hearing something of the progress of the religion of Jesus Christ in Persia, the seat of Mohammedanism. The lecturer is a Persian by birth, who came to this country over five years ago to be educated for the ministry. After three years in the Methodist College at Toronto he again returned to Persia where he has been until just recently. He is now making a tour in order to raise funds to continue the work of evangelizing his native land. His lecture on Sunday evening was entitled, "The Condition of Women under Mohammedan Rule" and on Monday, "Home Life and Marriage Custom in Persia." The speaker, considering his brief stay in Canada, had an excellent command of the English language and was listened to on both occasions with deep interest.

The P. Burns Company have purchased Mead Bros.' butcher business at Frank and Blairmore.

Harry Bentley, who has been in town for several weeks in connection with his lumber interests, returned to his home in Lethbridge on Tuesday.

Bell Organ for sale cheap.—This is a second-hand instrument and can be secured at a bargain. Apply to A. H. Cree. x

The first eastern mail to arrive in Fernie for over ten days came in from the west on Saturday evening. There was a wagon full and postmaster Johnson was kept busy till midnight sorting it.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

"I'm not at liberty to tell you exactly. They are confidential matters connected with the service. But there might be reasons to induce designing people to carry off Captain Wood and hide him for a time. He possesses certain information of the highest value to— Well, I must not tell you. But the disappearance of these papers, of the dispatch box, in short, supports me in that view."

"There are public grounds, then, for instituting a keen search for Captain Wood."

"Very much so, indeed, and we must instantly call in the police. I shall go at once to Scotland Yard and set the detectives in motion."

"Guess I've been there already, and they only laughed at me."

"By George, they will not laugh at me. Why, this might become a cabinet question. If those papers have fallen into the wrong hands, there may be the devil of a row. Wood or no Wood, I must have them back this very day, and I can't stop talking here."

"One minute, Sir Charles. My—our interest in Captain Wood is hardly second to yours. Anyway they are identical. It would be best, I submit, to work together."

"Quite so. That is very sensible. Have you any plans? What would you propose?" He was as sweet as milk by this time.

"Well, obviously one thing presses urgently. A descent should be made by a posse of police upon that house in the Strathallan road."

"In any case there shall be no more delay. Here, you, sir"—this was to Savory—"hail the first cab. I'm off to Scotland Yard. Will you come with me?"

"I'd rather meet you, Sir Charles, out yonder, for I suppose you'll go yourself with the police?"

"Certainly I shall, possibly ahead of them, so au revoir."

"Stay, Sir Charles. I had forgotten this letter which came an hour ago. It is addressed to Captain Wood, and it might throw some light on this mysterious affair. To be sure, it is in a woman's hand, but I was just about to open it when you appeared. Do you think I dare?"

"By all means. Every scrap of intelligence is of the utmost importance now. I'll do it. I can settle afterward if necessary with Captain Wood."

So he broke the seal, opened the letter and instantly burst into a loud, cheery laugh.

"Oho, Miss Frida, so you have not been long in coming to an understanding with our man of many millions! Read it," he said, and he handed me the letter. It was headed "273 Hill street" and was signed "Frida." There were only a few lines:

What has become of you? I thought we were to see you early, before luncheon. I have been simply furious. Now I am frightened. Something must have happened. It cannot be that you have already forgotten—last night!

"Reckon I know what she means by 'last night,' for I heard their parting at the door of the house in Prince's Gate."

"Where no doubt they had been billing and cooing," added the general "But she is entitled to know what has happened. You had better go round by Hill street on your way to Barnes. Enough said. I'm off."

We soon started, Savory and I, in a second hansom and at the man's suggestion took the dog.

"He'll surely find the captain," said Savory, "if there is any sort of scent," and the dog seemed to understand his business, for directly we reached Hill street he was the first inside the house and raced up stairs in a businesslike way and evidently quite at home in the place.

By and by he came down again, followed by about the brightest, smartest and sweetest young creature I had seen since my last Sunday walk on Fifth avenue after church.

It's not in my line to say what she wore, but I think it was a tailor made

"Of course you are from Captain Wood? This is his dog."

garment, and it fitted her like a glove. All I could see were her flashing eyes and the red lips apart as she tackled me sharply.

"Of course you are from Captain Wood? This is his dog. What have you to tell me? Quick! Explain. Where is he himself?"

"I wish, madam, I could tell you that for certain, but I cannot. The fact is the captain is"—

"Here! Step in here." She opened the door of a room, showed me a chair, then took her stand on the hearthrug, with her arms behind her back, and said:

"Let me have the whole story or as much as you know of it. Make haste, please."

She still stood erect and fearless, showing great mastery over herself, as I told briefly and quickly all I knew. Except that the color came and went, that her cheek was now crimson, now blanched a creamy white, that her eyes glittered with the tears she still resolutely kept back, this brave child suffered no sign of emotion to escape her at the peril of her lover.

"Well, what have you done?" she asked imperiously. "What do the police say?"

I began to explain.

"Tut, tut! Let us have no excuses, no beating about the bush. You have known this—let me see—more than 12 hours, and yet my—my friend, Captain Wood, is still there where you say they took him."

"Where I believe they took him."

"This won't do at all, Mr.— I don't know who you are or what you call yourself—Snuyzer, an American detective? Ah, well, Mr. Snuyzer, I shall now take this matter in hand. We've got to find Captain Wood—at least I have whether you come into the business or not."

"I shall be sorry to be left out, miss, but there are others besides us have taken it up now. I've seen a British general, Collingham by name."

"Yes, yes; I know. Willie's—I mean Captain Wood's chief at the intelligence. I was just going to send to him. He is a man of great influence and importance, a man of the world, who knows his way about. He has been told, then? What is he doing?"

"Working the police. He will take a mob of them down to where I traced the captain. I am going on to meet them there."

"Then I'll go too. Wait here, please, while I put on my hat," and she rang the bell. "When the man comes, tell him to bring my bike around. No; I'd better take you with me. Order my pony cart. Say it must be at the door in ten minutes from now."

In less than ten minutes she came down stairs dressed for driving and buttoning on her gloves.

"Come, sir," she said brisker and sharper than ever. "I cannot easily forgive your previous dilatoriness, but we must try to make up for lost time. Here is the pony cart, and we will take the dog."

When we reached the Strathallan road, to my deep chagrin the boy Joseph was not there, nor was he to be seen anywhere near or far. Now, I could have staked my life on little Joseph Vialls. He was a London lad who had seen much in his short life on shore and afloat, for although I had picked him off a crossing on account of his quick tongue and bright ways he had been to sea on Thames lighters right round the coast. Now I was training him to our business. He took to it naturally, knew what was expected of him and was not the sort to be fooled into quitting his post or going off on fandangoes on his own account.

Miss Fairholme turned on me like a tiger when we drove past the house and back still without a sign of Joe.

"Get out of this cart and go and ring the bell," she said fiercely. "The sooner we get inside that house the better. Make haste, please."

I hammered at that door and hung on to that bell till I woke all the echoes of that dead-alive suburb. No one came. There was not a sign of life within. Presently the police came up, and the general, who had been cruising about on his bicycle, joined miss outside. They all stopped there, talking to her a bit, and I judge they were hesitating to act, arguing it out with the general, who was very fierce and positive, ordering them about short and sharp, but doing little good till missy took up the running. But she soon sent them flying in after me and came with them. One of the constables ran around to the back, where he found a strip of garden with a low wall. He was over that like a flash and in through the scullery window. Half a minute more and we heard him unchaining the front door. Then we all trooped into the entry and ran through the house, some high, some low, but none of us finding anything. There was not a scrap of furniture nor the signs of any occupancy that we could see.

Pingpong.

Hail to this, the name absurd—
Pingpong!
Like some Filipino word—
Pingpong!
Calabanga and Silang,
Butalong, Ibung, Indang,
Nasiping, Morong, Bambang,
Pingpong!

Chant caprice's latest gem—
Singsong!
Sound of "bridge" the requiem—
Dingdong!
Bat the celluloid about,
Mingling choler, laugh and pout;
One fad's in, the other's out;
Pingpong!

Pliny's Wife, Calphurnia.

The younger Pliny thus speaks of his wife, Calphurnia: "Her affection for me has given her a turn for books. Her passion will increase with our days, for it is not my youth nor my person that she loves, but my reputation and my glory of which she is enamored."

Feeding Young Pigs.

The young pigs at three or four weeks old will begin to nose around the trough where the old ones are feeding and try to pick up a little corn or mash as it gets thrown out. Then is the time to prepare them a trough by themselves that they may reach by going through a hole not large enough for the old ones to get through. In this put skim milk or a little warm fresh milk, and if one has his nose poked into it the sound of his eating will quickly bring the others to see what he has found. After a few days make a slop thin enough to pour well of two parts of shorts and one part of bran, mixing with warm water, and for a few days add a little milk. Try not to give more than they will eat clean, and if there is any left give it to the old ones. Feed only when the old ones are fed until they are weaned, and then three times a day until they weigh about 100 pounds, when twice a day will be often enough. A part ground oats might be better when oats did not cost as much more than bran as they do now. Do not crowd them with too much or too hearty food, but about a month before killing one-half cornmeal and one-half shorts will serve to make the meat firmer and add fat rapidly. Keep a lookout for the scours and give a little charcoal to assist digestion.—American Cultivator.

Sketch of Mr. W. D. Scott.

Mr. W. D. Scott, who is Commissioner-General of the Canadian exhibit at Wolverhampton, and who also had charge of the Colonial Exhibition at the London Royal Exchange, is no stranger to the manipulation of Exhibitions, writes M.A.P. He was one of the Canadian commissioners at the Paris Exposition, and in charge of the great collection the Dominion Government sent to the Glasgow Exhibition last year. He is a fine specimen of the native-born colonial. Of Scottish parentage, Mr. Scott retains all the characteristics of the race, being shrewd, cool-headed and far-seeing. In his boyhood he was in the office of Lord Strathcona, and so strong is habit that to this day his old "boss" still addresses him as "Willie." Mr. Scott was for some time connected with the Canadian Pacific Railway, and can tell many a good story of railroad life in the Dominion.

How She Secured Silence.

Mrs. Arthur Stannard, better known to the literary world as John Strange Winter, who is president of the International Society of Women Journalists in London, always has some musical celebrity to meet the guests at her weekly afternoon receptions during the season. One day, out of courtesy to Emma Nevada, she invited, among others, several Americans. Henry M. Stanley was there, too, fresh from his African triumphs. As Nevada stepped to the piano the hum of conversation about him showed no indication of subsiding. The voice of the hostess imploring silence was not heard.

Stepping to the piano, Mrs. Stannard, as though by accident, fell with one arm from wrist to elbow squarely on the keys of the piano. The crash stopped all talk, and the guests looked on in astonishment.

"How awkward of me!" exclaimed the hostess sweetly.

But there was no more talk.

"Mary Jane" in London

On Sunday afternoon when Mary Jane goes out with her soldier you see the streets fairly lighted up with the gayety of the colors she displays. Her hat is a marvel of invention. Her wages, which have gone up in a decade from £16 to £29, are spent upon dress—and such dress! She will not come to you unless you keep a footman and a butler. Her duties, defined by herself, are to clean the ornaments and to look after one or two rooms. Clean windows? Never! Wash a handkerchief? No. That belongs to the laundress' department, etc. Therefore it is found convenient to move into flats, and the rents of Mayfair mansions go down until they in turn are finally turned into flathouses themselves. The small families who occupy them are readily adapting themselves to household cares without a maid's assistance.—London Letter in Town and Country.

The Banana of Malayan Origin.

The banana goes back to the earliest days. Alexander's soldiers, as Pliny says, joined the sages of India seated in its shade and partaking of its delicious fruits; hence the name sapientum, given the plant, which likewise bears the name of Jupiter's fair daughter, Musa. Now, is has been shown that the banana is of Malayan origin. How did it get to India and South America and Mexico? The feet of birds have borne seed a full 10,000 miles, while the cocoanut has floated well night the world around in the great ocean currents. But the cultivated banana has no seeds, nor has it a casing like the globular cocoanut to float it around over the waters. Then it must have been carried by man.

Emery.

Ten thousand tons of emery are annually imported into the United States from Greece.

A Scheme.

"I've got a grand scheme, old man, and I'll let you in on the ground floor."

"H'm! Are there any exits?"

That's the Way.

"Do you consider poverty a crime?"

"Yes, and usually punishable by hard labor."

A LIFE IN PERIL

STORY OF A GIRL SAVED BY A NEWSPAPER ARTICLE.

She Suffered From Headaches, Dizziness and Night Sweats — Her Friends Feared She Was Going Into Consumption.

From L'Avenir, St. Jerome, Que.

Among the thousands of young girls who bless Dr. Williams' Pink Pills for safely carrying them through that most perilous period of their lives when they step from girlhood into the broader realm of womanhood, there is none more enthusiastic than Miss Gabrielle Thomas, a young lady known to most of the residents of St. Jerome, Que., and greatly esteemed by all her acquaintances. To a reporter of L'Avenir du Nord, Miss Thomas said: "From the time I was 14 until I was 18 years of age my health was very bad. I was very weak, had no appetite and could do no work. At night I perspired greatly and frequently slept but little. I suffered from headaches, dizziness and could scarcely move about without becoming breathless and I finally reached a stage when my friends feared I was going into consumption. I was under the care of doctors, but their treatment did not help me. I then tried several advertised medicines, but with the same poor results and I had come to think I could not get better. One day I read in a newspaper the statement of a young girl whose symptoms were almost identical with my own, who was cured by the use of Dr. Williams' Pink Pills. I then decided to try this medicine, and have reason to bless the day I did so. I had only used the pills a few weeks when I began to get better, and in a couple of months every symptom of my trouble had disappeared and I was as strong and healthy as any girl of my age. I have since always enjoyed the best of health and I shall be glad indeed if my experience proves helpful to some other suffering girl."

The happiness of health for both men and women lies in the timely use use of Dr. Williams' Pink Pills, which act as a nerve tonic and supply new blood to enfeebled systems. They have cured many thousands of cases of anaemia, "decline," consumption, pains in the back, neuralgia, depression of spirits, heart palpitation, indigestion, rheumatism, sciatica, St. Vitus' dance, and partial paralysis. But substitutes should be avoided if you value your health; see that the full name "Dr. Williams' Pink Pills for Pale People is on every box. Sold by all dealers or sent post paid at 50 cents a box or six boxes for $2.50 by addressing The Dr. Williams Medicine Co., Brockville, Ont.

EXTERMINATE WEEDS

OTTAWA DEPARTMENT OF AGRICULTURE PUBLISH HINTS FOR FARMERS' USE.

ENDORSES FRENCH METHOD OF DESTROYING MUSTARD. —USEFUL HINTS.

The following treatise on noxious weeds and their extermination has been issued by the department of agriculture, Ottawa, for the guidance of farmers whose properties are infested :

Both the chemist and the botanist at the experimental farm at Ottawa are agreed that the French method of eradicating wild mustard by spraying infested growing crops with solutions of copper sulphate is the most effectual yet tried. Their conclusion, arrived at after many experments is that fifteen pounds of copper sulphate dissolved in fifty gallons of water to the acre, when the mustard plants are young, is the most effective, the safest, as regards the grain crops, and the most economical to use. The average cost of this application is about one dollar per acre.

In Manitoba, where the greater portion of the plants called wild mustard are really bird-rape, which is more generally known as charlock, the best means of destroying this weed is by using, when the weed is young, forty gallons per acre of two per cent solution of sulphate of copper; but if the charlock be in flower as much as sixty gallons of a four per cent solution will be necessary. The asparagus beetle which has been troublesome in the Niagara district, should be treated to spraying by either kerosene emulsion or whale-oil soap.

RED TURNIP BEETLE.

The red turnip beetle which visits Manitoba and the Northwest Territories now and again can be got rid of by spraying or dusting the plants with arsenical poisons in the same way as the Colorado beetle. Should British Columbia be again visited by the mealy plum aphis, spray with whale oil soap and quassia.

CARE AS TO SEEDS.

Reverting to weeds, no seeds should be allowed to mature. And by far the most important to the farmer is to see that he purchases his seeds for his crops where he can depend upon getting reliable goods. It is false economy to buy "cheap:' seeds.

CANADIAN THISTLE.

The Canadian thistle generally comes into bloom in July and August, maturing its seeds particularly in the latter month. Until the fields are cleared of this pest, drop out of the rotation all crops that allow the thistle seeds to ripen before these are cut. It is desirable to plow under pasture land from which a crop of hay has been removed early in July and to work the land thus plowed upon the surface, so that all thistles will be kept under until fall, or the time for sowing winter wheat. Operate a three year rotation of wheat, rye, barley or oats, with clover, followed by a hoed crop. In removing thistles from permanent pastures on stiff clays two or three cuttings a year with the scythe or mower for a few years will suffice, but in open subsoils the spud will have to be resorted to. The first cutting should be just before the thistles bloom.

The sow thistle may be eradicated in the same manner. This weed blossoms in July, maturing its seeds in July, August and September. It will grow in any kind of soil.

COUCH GRASS.

Couch grass, or Quack grass, grows in all kinds of crops from early spring until late autumn, maturing its seeds in August. To get rid of it plow lightly after harvest, then harrow with the ordinary harrow, and use the spring tooth cultivator to shake the roots of the grass free from the soil. When dry burn them. Repeat this process twice or thrice and couch grass will disappear.

OX-EYE DAISY.

The ox-eye daisy blossoms from June to September, and grows everywhere where it is not wanted. This weed is propagated entirely by means of the seed, and is common in "cheap" seeds. To get rid of it drop meadows out of the rotation until the infested fields have been dealt with. Adopt the same plan with permanent pastures when at all practicable. Grow a crop of rye followed by rape. Pasture meadow land until the middle of June, then plow deeply and sow with rape in drills. It may be well to follow with a crop of corn roots. Or, another remedy is to follow rye with a crop of millet, or to work the ground on the bare fallow system until winter wheat may be sown in September.

TO DESTROY DURDOCK.

To destroy Burdock in grain and hay fields the reaping or mowing will prevent the seeds maturing at the usual season. If the fields be gone over later with the spud or some such implement, and the plants be cut below the corn, they must die.

When blue weeds put in an appearance remove them with the spud unless the ground is to be broken up the same season. When cut off at any stage of its growth below the corn, the weed must die.

WILD FLAX.

Wild flax, sometimes known as false flax, may be got rid of by alternating hoed crops in succession with spring grain crops or rye followed by a hoed crop, the rye not being allowed to ripen. When wild flax is found only in patches in meadows the infested parts may be cut and used for soiling purposes. When lucerne can be substituted for meadow, the first cutting would take place before the flax is ripe.

Pigeon weed generally gets in wheat and rye seeds and timothy, mammoth clover and alsike. It can be treated about the same as wild flax.

Rag weed and wild mustard should be treated alike.

Wild oat is an annual nuisance and will fairly well succumb to the same treatment as wild mustard.

LESSER NUISANCES.

Snap dragon or toad flax is also called butter and eggs, and while young plants may be rooted out by hand, the summer fallow is the most effective remedy.

Only thorough summer fallowing will destroy lettuce.

The only way to get rid of sour dock, yellow dock, curled dock, narrow dock, or curled rumex (all the same noxious weed) is to pull out root and everything.

The wild parsnip only flowers the second year, so that if the flower be cut before the seeds form the weed can be at once got rid of.

Cocklebur or clotbur will succumb to clean culture from some hoed crop while seeding to clover or meadow grass, with frequent mowing, will keep it under subjection. By all means prevent it from seeding, and to accomplish this it may be necessary to go through corn and stubble fields in August and September.

RUSSIAN THISTLE.

The saltwort or Russian thistle is more like the common tumble weed than any other plant in the Northwest, and so great a pest is it in some quarters that the Wisconsin Experimental farm authorities have recommended a Russian thistle to be placed in each school house, so that the pupils may become familiar with it, and be taught to kill it whenever they find it, as they would kill a rattlesnake. Permit no Russian thistle to go to seed, and in two years you will be rid of it. But be careful that all seed sown be as pure and clean as possible, and exercise especial care in regard to flax seed and millet, or any of the smaller and lighter seeds. Corn, potatoes, beets, or any cultivated crop, well taken care of, will in two years rid the land of not only Russian thistles, but of nearly all other noxious weeds.

TRICKED A FARMER.

Confidence Men Swindle Silas Toole of $5,000.

Two men, passing themselves off as Nephews of Postmaster-General Mulock, succeeded in tricking Silas Toole, a Whitechurch farmer, out of $5,000, the savings of his life. They pretended to be anxious to purchase Toole's farm for $10,000, loaded him up with a satchel into which the farmer thought he saw them put $10,000 in cash. Then they borrowed the farmers' $5,000 for an hour or two to buy an adjacent farm, and never returned. The farmer then followed. The satchel contained nothing but pebbles.

A LONELY TRIP.

A dispatch from New York says :—The 38-foot launch Abyiel Abbott Low, commanded by Captain William C. Newman, sailed from College Point, L. I., for Falmouth, England. Captain Newman's only companion on the trip is his son Edward, a youth of 16. The launch is equipped with a ten-horse-power kerosene oil engine, and is expected to reach Falmouth in about 20 days.

CALGARY DROWNING.

While two children of Thomas McLellan were playing on the banks of the Bow river at Calgary on July 9 the youngest boy, aged 6, fell in. His sister, aged 11, sprang in to save her brother. The current was very strong, and both were swept away and drowned.

BOY DROWNED WHILE BATHING.

At Oakwood, Ont., Cecil Rennie, third son of G. B. Rennie, principal of Oakwood school, was drowned while bathing in a creek east of the village. On account of the heavy rain recently the water was very high. It is supposed the lad got beyond his depth and was carried away by the current. Cecil was 13 years old.

NEWS NOTES.

Pathmont was second in the 2.09 pace at Windsor, Ont.

A seat on the Winnipeg grain exchange now costs $500.

CROP PROSPECTS

CORRESPONDENTS OF THE IMMIGRATION DEPARTMENT SEND IN REPORTS.

DAUPHIN AND SWAN LAKE DISTRICT SUFFER SEVERELY FROM RAIN.

Some time ago J. Obed Smith, Dominion immigration commissioner, sent a circular letter out to the government agents at various points in Manitoba and the Northwest Territories, asking for estimates of the acreage, crop prospects, and general prosperity of the country. The replies which have been received throw a very optimistic light on the situation, and the concensus of opinion seems to be that although the early and continued rains damaged the crop considerably in the early stages it is recuperating, and although the growth was delayed, the present warm weather will repair the damage. Many of the reports are enthusiastic, and reports of the condition of the grain and the prospects generally are often stated as "splendid." The general prosperity is good, while a predominant feature of the reports is the frequent reference to the large number of settlers continually arriving, especially from the States. The following are summaries of reports from some of the chief points :

Duck Lake, Bellevue, Fish Creek—Area under crop is much larger than last year....Notwithstanding the unfavorable temperature the crops have a splendid appearance. The farmers are expecting an abundant harvest. The arrival of many immigrants has put a great deal of money in circulation.

District north of Dauphin and Swan River—The latter part of June saw the country practically under water and the Galicians ate having a terrible time of it. The outlook is very black for this locality. The presence of so much water has prevented the cattle from obtaining food, and consequently there has been a heavy stock mortality.

Strathcona—Since June 20 the weather has been all that a farmer could wish, and the crops are doing well. The acreage is not increased, owing to the protracted rains early in the spring, but a large amount of summer fallowing will be done this year. The outlook is promising for a good yield this year.

Milestone—The weather was for a long time very wet, and mostly cold. Seeding was late and the crop damage was about 15 per cent. Flax was not damaged and is doing well. Dakota men claim this to be the best flax country on the continent. The district is generally prosperous and about 50 car loads of settlers effects have arrived. Next season there will be thousands of acres broken by purchasers and homesteaders of this season.

Battleford—The early spring was long and cold and comparatively wet and as a result the crops are not advanced as far as they should be. The recent heat, however, has had an excellent effect, so that good crops are pretty well assured if the weather continues moderately dry. The acreage is considerably increased.

Rosthern—The crop is in splendid condition and the prospects are good. The weather was very wet for a while, but it has settled now and everything is looking well. New settlers are arriving daily, and all seem well pleased with the country.

Fort Saskatchewan—The weather in the spring was very wet and in low places the crop was late in advancing, but the weather has changed, and the growth at present is very rapid. Prospects are good.

Sifton—It rained in this district incessantly for six weeks in the latter part of May and the early part of June, and the country became flooded, many streams overflowing their banks. At best there can be nothing better than half a crop. The outlook is bad, especially among the new settlers.

Lethbridge—The crops are in a flourishing condition, owing to frequent rains. Never hitherto in the history of Alberta have there been such splendid prospects for a plentiful harvest and pasturing for the herds.

Swan River—The weather in the early spring was favorable, and the crop was put in in good shape. The wheat is looking splendid. There was a great deal of rain in June and the wheat in the low places suffered somewhat. The urospects are good, however. The farmers are looking after their harvesting machinery, as they think that every available implement will be required.

Arcola—Prospects were never better. There has been a good deal of rain, but with dry weather from now on there is every possibility of an enormous harvest. A large number of first class settlers are coming in, and are actually settled and breaking up the land.

Dauphin—The wheat acreage in the Dauphin and Gilbert Plains district is considerably increased this season. The weather was favorable for seeding, but the rainfall during June was excessive. The prospects are good for the grain which was sown early on the high land. Floods have however, interfered with the prosperity of this district for the season.

Cartwright—There will be a magnificent flax crop here, as the growth is strong and large, and there are thousands of acres of it in fine shape.

Yorkton—Seeding was all completed here before May 24 and the crops are advancing with great rapidity. Rains prevented seeding being completed at an earlier date, but had a beneficial effect on what was already in the ground. Altogether the district is progressing beyond the most sanguine expectations and future prospects are exceedingly bright. A new elevator has already been built, and two more will be erected at an early date.

Estevan — Prospects were never brighter, and weather conditions could not be more favorable. The country is booming and crowds of settlers are flocking in.

Reports have not been received from central, southern and western Manitoba, where the conditions have been most favorable. The general conditions in this section is good, as the rains have not been sufficiently heavy to flood the more important parts of the farming districts, which are in a rolling country.

NEW DATE FOR CORONATION.

The Ceremony mill Take Place in August—Pageant Curtailed.

King Edward will be crowned between August 11 and August 15. His recovery has been so rapid and satisfactory that the above decision was arrived at on July 7. No official announcement of the fact has yet been made, however.

The pageant through the streets and the ceremony at Westminster Abbey will be much curtailed from the original plan. Their Majesties will drive from Buckingham palace to the Abbey through the Mall to Whitehall thence to the Abbey, the same route as taken at the opening of parliament.

NEWS NOTES.

A party of 120 Icelandic settlers have reached Winnipeg.

Nine thousand freight handlers went on strike in Chicago on the 7th inst., crippling a dozen railways.

J. Guy, a C. P. R. sectionman, was drowned while bathing in a lake near Carberry on Sunday, July 6.

The Saskatchewan river at Edmonton is 30 feet above low water mark.

W. H. Bastardt, a merchant, was drowned while bathing in the Atikokan river,

The annual meeting of the Hudson Bay company in London, showed that the year had been very successful.

The British exports to and the imports from Canada for the past six months show a number of increases.

ACCIDENT TO CHAMBERLAIN.

Colonial Secretary Meets With a Severe Shaking Up.

A London cable says : The colonial secretary, Joseph Chamberlain, was somewhat cut on the head today (July 7) as the result of a cab accident in Whitehall. His hansom was passing through the Canadian arch when the horse slipped and Mr. Chamberlain was precipitated forward with great violence. His head struck and shattered the glass front of the cab.

When extricated it was seen that his head was badly lacerated and bleeding profusely. A policeman helped the secretary into a cab and accompanied him to Charing Cross hospital, where his injuries were dressed.

While Mr. Chamberlain's wounds bled a great deal, they were not serious.

ACCIDENT TO CANADIANS.

A correspondent of the Montreal Star, writing to his paper says :

"At sea, off the South African coast, June 7, one day out of Cape Town, when the mail steamer was sighted :

"Six members of D squadron were pitched through the hold of the ship. Trooper Gotro, of Moncton, N. B., was killed outright.

"Trooper Hickey, of Halifax, was very badly injured and is not expected to recover.

"Trooper Harper had his leg broken.

"Sergeant L'Hereux, of Quebec, was badly bruised, as was also a fifth man, whose name does not transpire.

"The accident was caused by lurching of the ship in a heavy sea."

All the world should sympathize with the Ameer of Afghanistan. He has to marry the daughters of all his leading citizens to make them loyal.

SALISBURY RESIGNS.

A J. BALFOUR SUCCEEDS VETRAN STATESMAN AS PREMIER OF GREAT BRITAIN.

JOSEPH CHAMBERLAIN, MENTIONED FOR POSITION, WILL WORK WITH LEADER.

A cable from London, England, dated July 13 says: The Marquis of Salisbury has resigned the premiership of Great Britain and the right Hon. A. J. Balfour, the first Lord of the treasury and government leader in the house of commons, has been appointed to succeed him. The marquis' resignation was tendered at an audience which he had with King Edward last Friday. Yesterday Mr. Balfour visited the King and accepted the premiership.

CHAMBERLAIN'S POSITION.

The livliest speculation is rife as to the personnel of the new cabinet. The most discussed feature of the pending changes is the position of Mr. Chamberlain, the colonial secretary, who in many quarters has been regarded as the most promising candidate for the premiership.

A representative of the Associated Press learns that prior to the acceptance of his new office, Mr. Balfour first had an interview with Mr. Chamberlain, and then consulted with his other cabinet associates. This is regarded as assurance that the future relative positions of Messrs. Balfour and Chamberlain will be satisfactory to both.

ACT OF A DESPERATE GIRL.

Early Saturday morning the caretaker of St. James' cemetery, Winnipeg, was startled by hearing cries from a couple of boys who were running along the bank of the Assiniboine river towards him, and pointing to the river. He gathered from their cries that someone was in the river, and upon running to the scene discovered that it was a woman, who was floating swiftly with the current not far out from the bank. With the two boys he rushed to the assistance of the drowning woman. By the three taking each others' hands and wading into the water, the caretaker was able to catch the dress of the woman as she passed, and she was dragged to land. She was still living, though another second or so in the water would have been her last alive.

Miss Jennie James, the unfortunate young woman, is a respectable English girl, who has been in Canada about a year, and has been in Winnipeg about two months, and had attempted to take her life by drowning.

DROWNED IN THE RED.

Early Saturday afternoon Herbert John Bruce, the 16-year-old son of Mr. and Mrs. Bruce, of 459 Burrows avenue, Winnipeg, was drowned in the Red river while bathing. Young Bruce left home shortly after dinner and was cautioned by his parents not to go in bathing. He went to the foot of Cathedral avenue with several companions and all went in for a swim. Bruce walked in out of his depth and was swept away from the shore by the current. One of the boys, who was a good swimmer, dived after him several times, but without avail. He was never seen afterwards alive.

TELEGRAPHIC BRIEFS.

Dr. Brett is very ill at Banff.

Mrs. Alexander, the novelist, is dead.

Harry Tracy, the Oregon desperado, is still at large.

Fifteen bands will be present at the Winnipeg exhibition.

Mike Gilboy was sentenced in Winnipeg to three years for theft.

A German claims to have invented a system of wireless telephony.

Wu Tung- Fang has been replaced as minister to the United States.

James de Rothschild and the Hon. Vere Ponsonley are touring Canada.

The number of deaths in the Johnstown mine disaster is placed at 114.

Robert Johnson, a farmer living near Walkerton, Ont., was accidentally killed.

Thomas Friend, of Toronto, dropped dead while playing ball at St. Catharines.

The British Columbia and Puget Sound saw mill owners have formed a combine.

George Knight has been arrested in Winnipeg charged with stealing several bicycles.

C. D. McAuley, of Dawson, has been appointed Judge of Yukon Territorial court.

W. Marr fell 23 feet from the new Merchants bank building, Winnipeg, to the sidewalk.

Lord Kitchener arrived in England and was officially welcomed both at Southampton and London.

Real Estate and Fire Insurance.

STRIKING INQESTMENTS can be had in Real Estate if you call at my office.

In less than HALF AN HOUR you can make a profitable investment in Fernie Real Estate. Call and prove it.

WANTED to purchase, or have presented to us, coal lands suitable for coking purposes.

For further particulars regarding investments call on

Another verse to the "Psalm of Life," drawn from conclusions as to the Fernie troubles :—

Lives of millionaires remind us
That we must control the coke
If we want to put a stop
To the smelters and their smoke.

OFFICE OVER P. BURNS & CO. Hours : 9:30-6 p.m., 7:30-9.

J. E. MILLS, Agent, Fernie.

To the Editor.

If you can forgive me for trespassing upon so much space in your valuable paper, I thought I would like to give my views upon the present situation. When Shakespeare wrote :—"A tale I could unfold, that would freeze your youthful blood, and make each seperate hair stand on end" I doubt if he does not meet the present crisis. You citizens, who have watched the contest between the miners and the company most earnestly, willing play an impassive part notwithstanding we miners have done our utmost to give publicly and impartially our views of the the matter and on the other hand the company have done nothing. You were the judges and could we in Fernie have reasoned wrongly, it is hardly likely that a hundred and fifty thousand in Pennsylvania, or another 12,000 in Alabama would have fallen into the same ditch. No, a thousand times no. We believe our demand is just liberty (with perhaps a little hardship to obtain it) or dishonor and oppression which will we choose. If we miners lose our case, look what great encouragement we give our brethern in the States, look what we are going to do for every miner in B.C. Methinks I sometimes see an huge scale—in the one pan is the company weight in the other the miner's weight, while the citizen's weight is not in use. The manager exclaims "By Jove! who would have thought the weights so equal, I should be outdone were the citizen's weight with the miners." Citizens I am proud of being a Fernieite but all who love their town must fight as never before. We are just as necessary to the mines as the mines to us. The injustice of being over nine hours underground instead of eight in bad enough but as strong a blow is struck at those who have monetary interests in Fernie. It is an innovation to get more men to live at the mines to their own advantage and to the detriment of Fernie. Do you not think that the present number of men who live at the mines is on some account due to the train service. I know there were great difficulties in the past but now the one shift scheme is an advantage both to miners and citizens if only used aright for we can be out and in the town inside 10 hours. Myself, for instance on the old scheme, I would arise a 5 a.m. meet the train at 5:45 and be at work by 7 a.m. We finished our shift at 3 p.m. but owing to bad train service never reached Fernie before 4:30 and oft-times nearly 5 p'm.

Here is a 12 hours a day and yet you storekeepers tremble at the august presence of the manager and sit and whine when new houses are built. Can you wonder I say at men choosing their residence in the rocky mountain gorge? Have the Board of Trade ever approached the company on this matter? No, citizens we want your hearts but also your heads. Had this strike been of a larger dimension, who would suffer most? Those who are in the company's power, who live in their houses and buy their wares. Here is the reason why we were not strenuously supported by Michel and Morrissey. Why men the harder we work indirectly the more we help make our own fetters. Every single man who boards at the mines is an indirect buyer at the Company's store and helps on his own oppression. The company stopped poll tax on our poor dead comrades, paid them no money for their work explosion day, built a store at the mines in direct violation of their agreement, boycotted every man who tried to help his comrades did their best (and are still doing) to get one of our most respected helpers out of the town,

Citizens, the present crisis is either going to mar or make Fernie. Our town has great resources and there is no reason why she should not be the "Pride of B.C. If the company wins it spells ruin to Fernie for we choose death to dishonor and Fernie can only be a scab town. I sincerely hope the time is not coming when we men must walk the streets of Fernie with the ignominious inscription on our necks, "Please permit bearer to walk the streets of Fernie."—Crows Nest Pass Coal Co. No citizens, were we aware of our combined strength, we would stand amazed. In some of the Pennsylvania papers the following has appeared "Miners, in the present strife, why don't you turn your attention towards the vast coalfields of B.C. especially those of the C. N. P. C. C. The minimum wage is $3.50 per day and you work under the safest conditions possible. We think more of safety than of profit, supply the most improved machinery and deal considerately with every man. Build them nice comfortable houses with most modern sanitary arrangements and at an easy rent. Eight hours is our motto. If I further try to describe their honey sweet Utopia I'm afraid my stomach will be out of order and if there is no red tape incendiary behind this my perception is indeed deceptive.

Citizens at the last public meeting we were asked "Who picks our M.P's." There was no fear incentive in our last vote, if we picked wrongly it was due to our defective education. We all extol the memory of immortal Wolfe and justly so, but do we give credit to the minister who could pick so fine a general. Wolfe, a tall, lanky, red headed fellow, —a common officer who had never shown any great ability, was picked for glory by the great minister, Wm. Pitt. Here is a proof of Pitt's great ability and I honestly believe it demands the highest skill to pick the right man for the right place. How many business men fail when employing new help, and we poor miners, whose education is inferior to their's, hear the honied words of one candidate, the slippery fluency of another and have to choose. I am hoping to see an evening school in the fall for the benefit of workingmen. I'm sure we sadly need it for we were told that if we had been patted on the back we would have borne the nine hours. This speaks highly of our principle, union and intelligence. We must have a public hall, lectures and frequent public meetihgs if we are to go ahead and make the Fernie I wish to see. Men are drawn to drink if no other amusements are open, although the citizens will give us credit for our conduct in the strike.

But some men (even in the union) are jewels in the crown of their oppressors, for they spend all their money in riotous drinking and fun and so must bear every petty tyranny their master wishes to impose. They are enemies to themselves and to every thrifty miner who contents himself with a moderate drink, and builds a little fort for times of trouble. We appreciate the recent young men's mutual improvement society and hope to see similar efforts put forth in future. Brother miners, be strong and fearless, our resources are still large and by a small effort could be made larger The citizens are with us, not as mere passive spectators, but as active participants in the fray, victory is looming in the distance and so of necessity also great success and honor for all Fernieites in the future for this victory is ours. Hoping my weak words will strike a little fire in the breasts of those who love justice and liberty is the sincere prayer of a

FERNIE MINER.

W. H. Bullock-Webster returned on Thursday from a trip to Victoria.

Miss Mott is the guest of Mrs. (Dr.) Bonnell, who is spending the summer at Elko.

The services at Christ Church, Fernie, to-morrow will be held as follows :—Matins and Holy Communion at 11 a.m., Sunday School and Young Men's Bible Class at 2.30 p.m., Evensongat 7.30 p.m. Rev. H. Beacham, of Cranbrook. will officiate. Collection in aid of church expenses.

The C. P. R. have a large force of men prospecting for coal on the west side of the Elk River near Hosmer. Mr. James R. Wilson has charge of the men, who are mostly composed of Fernie miners, who have taken advantage of the opportunity to earn some money during the strike here.

Fernie Transfer Co.

N. F. HINCHEY, Mgr.

We beg to inform the public that we are prepared to do all kinds of light and heavy transfer work.

FERNIE IS SURPRISED

LITTLE TOWN OF FRANK TRIMS OUR BOYS AT LACROSSE.

Large Crowd Witnessed Game and Cheered Visitors—Score Stood 8-4 at End of Match.

Frank lacrosse team has been very anxious to get a game on with our boys for some time, but it was not until Wednesday of this week that a game was arranged for and as Friday was fixed for the game there was little time for preparation. Several of Fernie best players were out of town or unable to get off, among whom were Miller, Reynolds, Herman and McGuire. Our boys were fairly beaten, but we have not the slightest hesitation in saying that with the regular team on, Fernie would have won out without much trouble.

The game started out with a grand rush on the Frank goal and the combination was simply beautiful, but the goal was missed by a hair's breadth and the ball was slowly forced back till it reached the Fernie defence. McLean got the rubber and fairly walked through the Frank players and brought it up to the visitors' goal, but was unable to score. P. McKinnon, the Frank goalkeeper, did some beautiful work, stopping many hard shots. Just before the end of the first quarter Cavanaugh, an old Medicine Hat boy, but now the star of the Frank team got the ball and made a swift run, passing all opposition and tossing it to Ross, who landed it in the Fernie net just 15 minutes after the ball had been faced off.

In the second quarter the play was very close, both sides playing beautiful lacrosse. At the end of eight minutes Bert Black evened the score. At this juncture an unfortunate accident happened which we may fairly say gave the visitors the game. McLean the star defence player on the Fernie side got in a mix-up with a Frank man and received a blow on the side which almost put him out of business. He was checking Lange, who is known to be one of the best lacrosse men in the west, and up to this time had easily held him down, Lange not being able to get the ball at all, but with the removal of MacLean it gave that man the desired opportunity and he immediately took advantage of it and scored. Black again succeeded in evening the score, but he could not do all the work and Flett, who is usually a sure player seemed unable to give him the desired assistance. Frank kept on rushing things and the score soon stood 8 to 3. The Fernie boys made a terrible effort in the last few minutes and kept the ball humming around the Frank goal, but only scored one more goal.

The work Bert Black done on the home was magnificent. He scored all four of the Fernie goals and seemed to care as little for the Frank players as though they were so many flies.

Cavanaugh, Lange, Ross and McIntyre did most of the work for the visitors, Lange scoring five times.

The teams were composed as follows:

Frank:—P. McKinnon, D. McKinnon, Hamilton, Dell, Lange, McLearn, Cavanaugh, McIntyre, McLearn, Ross, Austin, Ashdown.

Fernie:—Black, Flett, McLean, Beaubier, Kastner, Lafortune, R. Schram, Taylor, Dill, Walmsley, Thompson, Wrigglesworth.

The game was friendly throughout and the visitors were well pleased with the treatment they received.

HITS THE COURT HARD.

Canadian Justice Demands Reversal of the McAdams Sentence.

The British Columbia judiciary should have been able to satisfy the demands of its outraged dignity with something less than the ruin of an offending newspaper and the imprisonment of a critical editor for 21 months.

The offence charged against William McAdams, of the Sandon Paystreak, did not warrant a sentence of nine months' imprisonment with the further penalty of a year in case the accused cannot find four sureties who would bind themselves to the amount of $1,000 cast for the future good behaviour of McAdam,s unruly pen.

The sentence of the British Columbia court upon the assailant of its honor and dignity would be considered barbarous in Germany. The sentence means that Canadian law allows a man's property to be destroyed and his liberty taken away without trial by jury. Such a sentence as that reported from British Columbia is a greater evil than the cristicism it was to correct. In the name of Canadian justice, which is above the dignity of the British Columbia judiciary, Hon. Charles Fitzpatrick will have to interfere.—Toronto Telegram.

An alarming report reached Fernie on Monday evening to the effect that No. 2 mine was on fire. The accident however was not as serious as first reported. Lightning struck near the mouth of the tunnel and fired the gas. The flames rushed in for some distance but owing to lack of air were soon extinguished.

NERVE OF JOE GALL

CONTEMPTIBLE ACTION OF COAL COMPANY.

Morrissy Merchant Points Gun at Men Who Ruin His Property and Attempt to Destroy His Business.

The story of the persecution of Jos. Gall at Morrissey by the Crow's Nest Pass Coal Co. is an interesting one. Joe is a Slav with considerable ambition and push. He went to Morrissey about a month ago to work for the coal company, taking his family with him. They moved into one of the company's houses and all seemed satisfactory. Two days later Joe was laid off and ordered to vacate the house. This he refused to do until he could make future arrangements for his family. The miners at Morrissey sympathizing with their fellow workman urged him to open a store on the Government side of the creek, promising to patronize him. Joe saw in this the chance to make an honest dollar and ordered a stock of goods to start business with. He invested $175 in a bridge across Morrissey Creek to connect with the road to the junction so that he could ship in his goods and also to afford facilities for customers from the town to reach his place of business. All progressed favorably until July 1st, when his opposition on the Morrissey side of the creek, decided to thwart him by removing his bridge and Contractor Wardrobe was detailed to do the work. The bridge was accordingly loosened from the company's side and wrecked by the turbulent stream. Poor Joe was at loss what to do, but resolved not to be beaten, he felled a number of trees and made a temporary substitute for the structure which had been destroyed It was now the company's turn to exact summary vengence. A small building owned by Joe on the Morrissey side was torn to pieces by Contractor Wardrobe and to heap insult upon injury the lumber was used in the construction of a fence to shut off all chance of a stray customer wandering over to Joe's little stock in order to spend a nickle. The work of building the fence was well under way and the fence had been completed up to the new bridge when Joe seeing his last chance of communication with the town being cut off brought out his rifle and threatened to shoot the men if they did not desist. Joe succeeded in instilling a little of the fear of death in them and they called in the assistance of Constable Tranter and poor Joe was brought up to Fernie on Saturday last and put in durance vile on a charge of common assault. The case was adjourned over till Thursday evening of this week when H W. Herchmer appeared for the prosecution and W. R. Ross took charge of the defence. It was shown quite clearly that Joe had pointed the rifle at the fence builders and threatened to shoot them, and Justice of Peace Trites, could do nothing but find the prisoner guilty, but in view of the exasperating circumstances which led up to the action of the poor Slav he only fined him $5 and costs—$6 in all.

One more step has been taken in the above case. Joe has entered a suit for damages against Contractor Wardrobe for destroying his bridge and the case comes up on Monday next.

FITZSIMMONS LOSES.

JEFFRIES PUTS HIM OUT IN EIGHT ROUNDS.

Bob has Best of Contest up to the Knockout Blow—Large Sums of Money Change Hands.

The championship fight between Robert Fitzsimmons and James Jeffries came off last night with the result that Jeffries still holds the belt. Following is the report of the contest:—

San Francisco, July 25th, 10:08 p m.—Fitzsimmons and Jefferies enter the ring accompanied by Geo. Dawson, Hank Griffin, Billy Haberty, Billy Delaney, Jack Jefferies and Joe Kennedy. Both men walk unconcernedly round the ring Tom Sharkey challenges winner of fight. Harry Corbett, on behalf of his brother Jim, also challenges the winner. Fitz's hands are bandaged and Billy Delaney makes careful examination of bandages and is satisfied. Fitz is having his gloves put on. Jeff is crouchining in his corner chewing gum. Both men are cool. As Fitz is introduced he gets a tremendous cheer, Jeff also gets loud applause, but not as long nor as loud as that given Fitz The men shake hands and go to their corners to wait for the bell. They are off. Fitz dances a step or two and is applauded.

Round No. 1.—They meet in the middle of ring and spar. Fitz breaks away. Jeff crouches low and Fitz backs away. Fitz sends left to mouth and Jefferies' left goes over Fitz's shoulder. Fitz sends hard left to Jeff's nose and retires. Jeff rushes Fitz to ropes but failed to land. Fitz jabbed nose again with left. Fitz breaks a left lead and backs out of way of left swing. Fitz ducks a hard left swing and sends a left to Jeff's face. Jeff puts left to body, but gets one on mouth and again to face. Fitz sends a hard right to neck as bell rings. Fitz had much the best of first round.

No. 2.—Jeff tries left, Fitz not there. Jeff ducks left swing and puts left on breast. Jeff puts another left on breast. Fitz puts right to ear, but got a right on body. Fitz puts left to jaw and dropped on to stomach. Jeff sends left to breast. Jeff is short with left swing. He rushes and sends two hard lefts to body. Fitz uppercuts Jeff on the mouth with left. Fitz jabs left to mouth. Jeff sends left to neck. Bob sends stiff left to mouth. Jeff is bleeding freely from mouth and nose. Jeff is backing away from Bob at close of round.

Round 3.—Fitz backs away and blocks a left lead. Jeff does not crouch so much now. Jeff sent a stiff left to neck. Bob sent a straight left to nose. Bob's gloves are covered with blood. Again Bob jabs Jeff's mouth with left. Jeff is short with left swing. They clinch and as they break Bob jabs left to mouth. Bob again jabs the sore mouth and Jeff's face is a sight. He has a big gash under right eye. It is Fitz's round and old Bob is cheered to the echo.

Round 4.—Bob ducks a wicked left. They spar. Jeff lands light left on face. Jeff is short with left and Bob lands right on jaw and uppercuts Jeff on chin. Jeff puts two hard lefts on body. Bob jabs left three times on mouth and face. They come together and Jeff lands right on body. Bob ducks a fierce right. Jeff tries two light swings. Jeff ducks away as the bell rings.

Round 5.—They spar and exchange light lefts on neck. Bob breaks away from Jeff's swings without much trouble. Jeff crowds Bob to ropes and puts left on neck. Jeff puts right on body. Both his eyes seem to be in trouble although he is apparently as strong as when he stepped into the ring.

Round 6.—They spar and Fitz breaks ground. Jeff landed left under Bob's guard. Fitz sent a stiff right to Jeff's good eye. Bob put hard left to wind and right to mouth. Bob sent two lefts to face. Bob jabbed mouth with left.

Round 7.—Jeff puts left to Bob's neck and forced matters and landed another in same place. Bob jabbed Jeff's face with left and right and straightened Jeff up with left on mouth. Jeff put hard left on stomach and blocked a right swing. Bob rushes and drives Jeff to ropes with left and right on face. Bob put another light one on mouth. They clinch and Jeff ducks Bob's right and throws his shoulder into Fitz. Bob lands right on jaw. They clinch and bell rings. Fitz grins.

Round 8.—Jeff follows Bob around the ring and is short with a left swing. Bob sent a straight left to mouth. Jeff puts left on wind then left to chest. They exchange lefts on body. Bob swung left to the face and missed right uppercut that would have done business had he landed. They exchanged glancing rights on body. They jab each other in face with left. Jeff sends Bob down. They were in a clinch at the ropes and as they broke away Jeff swung right to the stomach and Fitz went down and was not able to come up in time.

It looked like a foul blow, but Bob says the best man won, and it is his last fight, and he throws his gloves into the audience The audience gives three cheers for Fitz. He had all the best of the fight up to the final blow.

A TERRIBLE TRAGEDY

FERNIE MINER MURDERS HIS SISTER AND BROTHER-IN-LAW.

Murder and Suicide the Result of a Petty Quarrel—Samuel Lake, the Murderer, Well Known in Fernie.

The Seattle Post-Intelligence of Sunday last contains an account of a most terrible murder and suicide committed by Samuel H. Lake, a coal miner, well known in Fernie and Michel. Lake came to Fernie, it will be remembered, about two years and a half ago, and after residing here for some months married a young lady at Michel, the ceremony taking place at the Victoria Hotel. Shortly after they moved to Frank where Lake contracted consumption, and it is believed that while temporarily insane from the ravages of this terrible disease he committed the crime.

Following is an account of the tragedy as contained in the Seattle papers:

"Samuel H. Lake, miner, shot and killed his brother-in-law, David Thomas, mortally wounding his sister, Mrs. Mary J. Thomas, and then blew out his own brains Saturday night at the Fredonia lodging house, 661 Yeslerway. The fearful deeds were committed about 11:15 o'clock and when Police Stewart arrived on the scene in response to a telephone call for neighbors he found the woman huddled in a corner of a bedroom, hardly able to speak, her husband lying on his face close to the bed and the body of the murderer and suicide blocked the passageway leading to the room.

Many circumstances in connection with the awful affair are of very peculiar nature. Only one revolver was found, which contained two loaded cartridges and one empty shell. One person is positive seven shots were fired and two assert they heard eight. The last three shots were fired in quick succession and were distinct from the others. They were followed by the sound of a body falling to the floor. There was no eye witnesses to the tragedy.

When Steward reached the Fredonia house he found the doorway crowded with a number of curious people. He ordered them to keep out of the place and rushed upstairs, where W. N. Stringham, the proprietor, was calling him. Stringham led the way to a suite of rooms on the east side of the house, where the tragedy had occurred. Partly in the passageway and partly in the kitchen of the suite, lay the body of Lake. At his feet was a 38-calibre Smith & Wesson revolver. Mrs. Thomas could be heard moaning in the bedroom.

Entering the bedroom Stewart perceived Mrs. Thomas huddled in the corner bleeding from a wound in the right breast He lifted the woman upon the bed and sent Stringham for a glass of water in response to her request. Alongside the bed lay the body of her husband flat on his face. In order to minister to the dying woman the officer was obliged to remove the body of the husband a short distance from the bed.

Telephone messages were sent Dr. Carroll and Dr. Bories to come to the scene as soon as possible. Pending their arrival everything possible was done for the

(Continued on last page)

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

But miss, she also hunted, halloing on the collie dog with a "Go look, Roy," worry, worry, worry, which drove the beast nearly mad. He hunted and quested through the house with a short, snapping bark, as if he was rounding up a sheepfold, and it was he, marvelous animal, who led us into the basement, into a sort of cellar between the front parlor and the kitchen. Here he raced round and round like a thing possessed, yelping furiously. The place was all black darkness. No windows, not a glint of daylight. But some one struck a match and lit a bullseye, and we could make out what there was there. One big, long table, a kitchen table, with seats on each side, and at the end a strange thing that told its own story.

It was a sort of wooden erection something between a scaffold and a bulkhead; two great upright timbers, wedged in tight between the ceiling and the stone floor—might have been a support, pillarlike, for the roof or ceiling, but we could see it was meant to make some one fast to—a pair of stocks, you might say, or a whipping post. And so it had been used, no doubt. For there were a long chain and padlock hanging between the uprights just over a low bench that served as a seat for whoever was held there a prisoner.

This was where the collie raged about most fiercely, sniffing, scenting, hunting to and fro, always under the encouraging voice of missy, who shouted, "Lu-lu-lu, good dog; find him, then Where is he? Out with him, Lu-lu."

Of course his master had been there None of us had a doubt of that, any more than of the plain fact that he was not there now. We looked at each other blankly, after a bit, hardly knowing what to do or say next, till miss stamped her pretty foot and cried, "Well?"

"I have my suspicions," began the sergeant, knocking his hands together rather jovially, till the dust flew out of his white lisle thread gloves. "It's not all fair and square. I shall make a report to that effect and await instructions."

"Pshaw!" interrupted miss. "And meantime Mr. Wood may be murdered. I shall offer a reward of £500 to whoever finds him, but it must be within the next 24 hours."

"Now you're talking," I said heartily, "and I don't see we gain much by staying here. The cage is empty, and we've got to follow the birds wherever they've flown."

"If you'll excuse me," said the sergeant, who had got mighty eager when he heard of the reward, "the most proper course, as I see it, is to start from this here house. Whose is it? Who took it? Likewise who put up this apparatus, and why? When those questions is answered by the neighbors, house agents, tradesmen and such like, we may come to lay our fingers on them as is responsible for this here business."

"You had better do all that, then," said the general, very discontented, "and I shall go to New Scotland Yard to the fountain head. There's more in this than you duffers seem to think. We want the best man they've got, a real detective, to take up the case."

This was aimed at me. It was unkind, you'll say. But after all how much had I done and where was boy Joe?

"It's not like him," I was saying half to myself as we stood together, miss and I, while she was taking the ribbons and with one neat brown shoe on the step was just getting into her cart. "Either he's been caught spying—and that's not like him—or he's hanging on to their heels like bird lime. But—What in thunder's that?"

I saw some rough writing in white chalk upon the gate, and an arrow figured there with the point toward London:

'Ooked it. Follerin on. Joe.

They were as plain as print, so was their meaning, and I pointed out the words triumphantly to Miss Fairholme.

"I knew that boy wouldn't fail me. He's got grit, he has. Some day he'll be able to teach me my business"—

"I wish he would begin soon," said miss peevishly. "It's always the same story. Some day, one day, next day, never. And all this time he—poor Captain Wood—is"—

With that she gave her pony a smart cut with her thong, and the beast, nearly springing through his collar, started off like a mad thing, with the other mad beast of a dog yelping and screeching and jumping up at his muzzle or trying to bite at his heels. The general also gave me a contemptuous good day and, springing on to his "bike" like a boy, went off at a real right down scorching pace after the buggy.

I expect that is the last I shall see of her, for she never took a card of mine or asked where she could find me again, and I've fully made up my mind that never so long as I live will I hunt after her. When Joe reappears, as I tell you, gentlemen, I most confidently expect he will at any moment and with important news, so that I can pick up fresh threads, I'll do the next job alone. I don't want no highfalutin young duchesses treating one like dirt, for a true born American citizen is as good as any emperor, let alone a pert minx with ever so pretty a face. We shall see. If there was no better reason than the wish to humble her, I mean to see the thing right through to the very end.

CHAPTER VI.

PASSAGES FROM THE DIARY OF WILFRIDA FAIRHOLME.

S. S. Chattahoochee, July 17.—Although still harassed and oppressed by hideous anxiety, I want, in this my first moment of leisure, to set down clearly and fully the strange events that have occurred since that memorable evening in Prince's Gate. I have been in a whirl ever since. But I have forgotten nothing. Every act, every thought is indelibly fixed in my memory from the moment that I realized my loss.

Forget! I shall never forget that afternoon when the American detective brought me the news. What an odd creature he was. Very much overdressed, with a sort of company manner voice, which didn't disguise his Yankee accent or tone down his awful Americanisms. I know now that the poor wretch was honest and straightforward, but I could not get over my repugnance to him at first.

And so when we got to the very house and drew quite blank I made up my mind that the man was an arrant impostor. Nothing fell out as he said. "His boy would be on the watch." There was no boy. He was quite certain of the house into which Willie had been carried. The police broke in. There was no Willie Wood.

The whole thing was humbug. I felt convinced of it and said so, only to regret it directly after. It could not be quite humbug, or, if it was, Roy, dear Willie's lovely dog, was in it, too, for Roy had certainly smelt him out in the cellar where we found the awful apparatus and things, and I ought to have known that a dog's instinct is always true. But I was very short with Mr. Snuyzer and left him in a huff. It was a mistake, of course, for it was losing a chance. The man might be useful, and after all he was the only one who, whether the right or the wrong one, had any sort of clew. That was good old Sir Charles Collingham's opinion and Colonel Bannister's, the big official, chief constable or assistant commissioner or something whom the general brought with him to Hill street. I found them there closeted with mother, who had heard all about it from them. She was rather in a limp condition, dear mother, having quite failed to take in the situation and unable to say or suggest anything.

The colonel—he was rather a cross looking, middle aged man, with square cut, short whiskers and a bristling gray mustache—took me sharply to task for letting the American slip, and I should have been offended at his tone, but I knew I had been wrong.

"From what you tell us he had no doubt been in communication with Captain Wood yesterday, and he would have saved us some time and trouble if we had him under our hand now. He must be hunted up," said the colonel.

"Your people know him at Scotland Yard. He was there today, and they sent him on to the United States consulate. He told me that himself," I said.

"They will know him at the consulate probably. I will send there to inquire," said the colonel, making a short note.

"And Captain Wood's man knows him. They came here together this afternoon."

"And for the matter of that so do I," added Sir Charles. "Not much, of course, and he's an uncommon queer looking chap. But the fellow seems honest and straightforward."

"Unless the whole thing is a put up job," remarked the police colonel, with

"He must be hunted up," said the colonel

a meaning smile, "a scheme to throw you off the scent of these papers which you say are so important, Sir Charles"—

"By George, they are that," the general broke in. "Don't you see? It is probably a trumped up story about the plot against Wood simply to cover the theft of the papers."

[TO BE CONTINUED.]

Hard to Rear.

The two most difficult creatures to keep alive in aquariums are the herring and the whale.

The Banquet Habit.

A curious thing is digestion;
'Tis fraught with a power complete.
Whenever there's anything big to be done
We all get together and eat.

THE WEST WIND.

I am the Wind of the West, the bringer of rain,
'Tis I who knock o' nights at your window pane
With soft importunate fingers, until you rise
Afraid of some voice forgotten, afraid of eyes
Too well remembered. Then out on the weeping skies
You lean and look ere you turn to your rest again.

I am the Wind of the West, the wind that the sun
Sees last as he goes to slumber, his day's work done;
His farewell lingers, a light on my flying hair.
My eyes are dark with all sorrows gathered in one—
I am the wind of love, and his wounds I bear.

I say to the rose, "Awake, and open your breast
That your sweets be known." I say to the crocus, "Rest.
Go sleep; forget that March is over and done."
I draw the clouds across the face of the sun
That he may stay awhile in his world-wide quest,
Of all four winds of the world Earth loves me best—
The Wind of the West.

MAJESTY OF LA SOUFRIERE.

Magnificent Description of Eruption by Rev. James Darrell.

The Kingston, Jamaica, correspondent of the Daily Mail says the Rev. James Darrell, of Kingstown, St. Vincent, gives a magnificent description of the eruption of Soufriere. "We rowed," he says, "within eight miles of the crater, from which a vast column of steam, smoke and lava ascended to a prodigious elevation. This majestic body of curling vapor, sublime beyond imagination, was about eight miles distant, but we judged that the top of this enormous awful pillar was fully eight miles high. The mighty bank of sulphurous vapor assumed the shape of a gigantic promontory, and then of a mass of revolving cloud-whirl, turning with incredible velocity, and efflorescing into beautiful flower shapes, some dark, some effulgent, others pearly white and all brilliantly illuminated with electric flashes. The electric flashes were marvellously rapid and numerous beyond computation. These, with the thundering roar of the lava, shocks of earthquake and falling stones and the enormous quantity of material ejected from the belching craters, produced a scene of incredible majesty and horror.

Wakened by a Water Pail.

Many are the schemes practiced by watchmen to enable them to catch a few winks of sleep between rounds. The most ingenious device of all comes from the fertile brain of a man employed in a big Kensington mill. He balances a wide plank across a trestle and on one end sets a pail of water. A very small hole has been punctured in the bottom of the pail, which enables the water to run out slowly. As soon as he finishes his round he lies down on the other end of the plank and is soon snoring. When the water has trickled out of the pail for twenty minutes, his weight counterbalances that of the pail, and he falls to the ground, wide awake and in time to start on his rounds again.

Self Restraint.

Self restraint is good discipline and it is only one who has learned to submit who is able to control others. It enables one to overcome the desire to speak rash words and commit rash acts. The tongue, that unruly member, has done untold harm. It has destroyed happiness, hopes and homes all because so few have learned to restrain its fatal liberty, and yet this, too, may be accomplished. That law of the members which wars against the law of the mind can be conquered, and there is more glory due to the one who ruleth his own spirit than for him that taketh a city.

Wealth of the Rand.

Mr. Willcocks, the great African expert, in a recent lecture delivered at Cairo, Egypt, said, that Johannesburg, seated like a monarch on the highest Rand, with an unbroken stretch of thirty miles of factories on either side, with a reported wealth of $10,000,000,000, will realize one day the destiny marked out by Lord Milner of growing into one of the great cities of the world, with a population of 5,000,000. It has been estimated that within five years after the restoration of normal conditions of mining there will be 17,000 stamps dropping on the Rand.

A Redmond Record to be Proud Of.

The record of the late Lieut.-Gen. John Patrick Redmond, uncle of John and William Redmond, the Irish Nationalist leaders, was a notable one. He served throughout the Punjaub campaign of 1848-49, commanded the flank companies, 61st Regiment, with the force under Sir Colin Campbell, at the forcing of the Kohat Pass in February, 1850; commanded detachment, 61st Regiment, which repulsed the attack of the mutinous Sepoys on the magazine at Ferozepore on May 13, 1859, and was seriously wounded and served at the siege of Delhi.

Strangers Now.

Yes, once she dearly loved me; now,
As strangers we have met,
She who would nestle in my arms,
My darling love, Lucette.
Alas, for me those days have fled;
The rules of etiquette
Which govern three and twenty-three
Are not the same, Lucette.

TORONTO TYPE FDRY Company, Limited.

175 McDermot Avenue, Winnipeg.

There is a personage who has more sense than Napoleon, more wit than Voltaire, Monseigneur Everybody.—Talleyrand.

Minard's Liniment for Rheumatism.

It's not so much what a man says as the tone of voice in which he says it that counts.

WRINKLE DON'TS.

Don't frown, don't scowl.

Don't sit facing a strong light.

Don't stoop or bend over while writing or reading.

Don't worry, but if worry you must keep the forehead smooth—don't wrinkle it.

Don't wear tight shoes. They make a young face look old, drawn and wrinkled in a few hours.

Don't neglect the ten minutes' rest during the day, with the feet raised. It gives the whole body a great sense of repose and works wonders in smoothing out the lines of the face.

Don't speak with all the muscles of the face. It is very charming and captivating to be deeply, deadly in earnest, but facial grimaces form creases which in time will become fixed.

Don't let insomnia get the upper hand. By all means in your power try to break up the habit. Sleeplessness is often caused by unconscious hunger and a cup of hot water or hot milk or a biscuit will often induce sleep.

Don't go too long without food. Hunger gives a strained look to the face. Now and then if one is fatigued a bite between meals will invigorate the whole system and give relaxation and repose to strained muscles and nerves.

Women as Travelers.

Joseph I. Young, who has long been an attache of the famous London Cook tourist agency, declares that the best lady traveler is the American girl. "As a rule," he says, "women are not good travelers. Some engage a berth on a first class steamer, find they are unable to start at the appointed time and wind up by sailing in a slow freighter. We have a good deal of trouble with the woman who reads a lot of guidebooks before she starts. She is usually so busy finding the proper page that she misses some of the best sights. Then there is the woman who travels with too much luggage. The experienced person provides himself with the smallest possible amount of such impediments, wears a serviceable dress with a few invisible pockets and is happy The greatest luggage fiend is the English girl, who is liable to have as many as fifteen packages and wonders why she sometimes loses one or two. Taken as a whole, women are not so much of a trial as might be imagined. Nearly always they graciously recognize good attendance, and a pleasant smile from one of them goes further, even with a surly guide, than a handsome tip from some men."—Argonaut.

How Women Should Stand.

To stand correctly is an art in itself. Few women know how to assume a correct upright position. Five minutes' practice each day will enable you to solve the problem and give you a graceful carriage. Walk up to a wall, touch it with your nose, chest and toes, and you will have the correct position for standing. The hips should be thrown back, the abdomen in and the shoulders squared. This will give the stylish flatness that shows off the fashionable gown. A good exercise to give you the correct attitude is: Keep the heels together at an angle of sixty degrees, having the weight of the body resting on the balls of the feet, not on the heels. The chest should be thrown forward, the chin held in, the abdomen drawn back and the hips held back.

FAGGED OUT — None but those who have become fagged out, know what a depressed, miserable feeling it is. All strength is gone and despondency has taken hold of the sufferers. They feel as though there is nothing to live for. There, however, is a cure—one box of Parmelee's Vegetable Pills will do wonders in restoring health and strength. Mandrake and Dandelion are two of the articles entering into the composition of Parmelee's Pills.

What man in his right mind would conspire his own hurt? Men are beside themselves when they transgress against their convictions.—William Penn.

The one serviceable, safe, certain, remunerative, attainable quality in every study and pursuit is the quality of attention.—Dickens.

DAMAGE IN DAKOTA

TWENTY THOUSAND ACRES OF GROWING GRAIN IS DAMAGED.

GREAT NORTHERN DEPOTS ARE MOVED OFF THEIR FOUNDATIONS.

A dispatch from Grand Forks, N. D., says: On Tuesday, within the space of two hours Grand Forks county was visited by two of the worst storms in its history. Both were hail storms and both had cyclonic features. As a result thousands of acres of grain have been destroyed, buildings have been blown away, and minor damage of untold extent has been done.

The first storm was first reported from the vicinity of Conway in western Walsh county, and passed rapidly through that district and into Grand Forks. It traveled in a southeasterly direction and crossed the river near the Walsh county line. Its southern edge passed over the city and there was a furious wind and a smart sprinkling of hail, but in the city comparatively little damage was done. This storm continued in its course and was still plainly visible in the southeast when the second appeared in the northwest and rapidly approached.

The second storm passed a little south of the path followed by the first and the paths of the extreme edge of the two overlapped. Information from Devil's Lake is to the effect that this storm was observed to the northeast of that town, although it was at a considerable distance. The territory through which it at first passed is sparsely settled. The first town from which damage is reported was Meckinock, a station on the Northern Pacific in this county. There the storm struck while the evening train was at the depot, and one of the passengers who came in says for a few minutes the whole town seemed to be in the air.

Buildings were unroofed, and the air was full of flying articles of every description. From there the general course of the Northern Pacific road was followed, and the storm passed just to the west and south of Grand Forks. Telegraph and telephone lines were prostrated everywhere, and practically all the information available is from persons who have driven into the city to report. The damage by hail from the first storm was considerable. It affected territory in southern Walsh, northern Grand Forks and western Polk counties. It is stated that in the five townships and partial townships in western Polk county, there is not a field of grain that will be worth cutting. This section had promise of an excellent crop. A farmer from that locality places the loss at 20,000 acres and states that with two or three exceptions, he does not know of a man who carried insurance. Several small farm buildings were blown down, and the depot at McDonald's Siding was destroyed.

A man whose name is unknown was badly hurt at the depot, and one farmer had a cow killed by lightning. These are the only accidents to man or beast reported thus far from the first storm. The second storm seems to have done more damage. The Great Northern depots at Emerado, Thompson, Borup, Minnesota and Ojata were moved off their foundations, and in some cases destroyed. An elevator at Merrifield was moved six inches from its foundation. Near Thompson the country is very thickly settled, and there the storm did great damage. A new church in Brennan township was demolished, and a schoolhouse was moved several rods. In Thompson the Catholic and Baptist churches were rent into fragments. Henry Thompson's barn was destroyed; Arthur Thompson's house and barn were blown away, and Jesse Thompson, an aged man, was severely injured. Others who lost houses and barns are L. Allen, Mr. Carr, Mr. Bray and Mr. Norton. There are scores of others, but it was impossible at the time to obtain a list of names.

Martin Thompson, who lives four miles west of Thompson, lost several buildings and had others moved from their foundations. His house did not suffer. He was at work at some distance from the house when he saw it was about to storm, and started for the house. He was caught, and he estimated that the wind, which struck him from the north, lasted about 20 minutes. Then there was a lull and he thought that the storm was over. Suddenly the stronger blast came from the east, and this lasted for some five minutes. This is the gust that did most of the damage. Mr. Stanley says that he was lifted off his feet several times and that he literally danced in the air like a jumping jack for several minutes. The pressure of the wind seemed to be upward and while his feet would touch the ground at times he was kept suspended for quite a while. Everywhere where the storm struck the air was full of all sorts of movable articles, many of which were carried to great distances, the effect of the storm seeming to be to lift such articles from the surface, and after raising them to a great height to literally carry them along a great distance.

So far as yet reported the only persons hurt are the man at McDonald, Mr. Thompson, a boy at Arvilla, who was blown from a wagon and had his arm broken, an unknown man near the river, who had his arm and shoulder broken, and some children near Thompson, who were somewhat bruised.

Hon Mr. Tarte, the Canadian minister of public works, is very likely to be a visitor at the Winnipeg Industrial exhibition. An invitation was extended to him but he replied that he could not give a definite answer: "I shall wire you in a few days. In the meantime please accept my thanks for your kind invitation," telegraphed Hon. Mr. Tarte. The opportunity to witness the minister of the crown who is by a large section of the country, considered as the brainiest man in the cabinet, will be welcomed by many.

Jean B. Choinoere, of Stuartburn, Man. has taken steps in the court of Winnipeg to obtain possession of his daughter who is in a St. Boniface convent.

Vassilissa Ivanovna, an old peasant woman, now living near St. Petersburg, is 117 years old. She was a married woman when Napoleon invaded Russia.

Physicians in South Carolina are greatly concerned over what they believe to be the alarming increase of insanity among negroes. Years ago this disease was almost unknown to the colored population, but it appears to be spreading.

Chimneys smoke because the carbon of the coal is disintegrated and drawn off by the heat instead of being consumed by the fire. A furnace properly tended would not smoke, as all the fuel would be consumed.

A cat is enabled to send out or retract her claws because the bone to which the claws are attached has a rotary movement on the bone above, and a powerful ligament draws the former down and exhibits the claws.

You can judge people a good deal by the people they will not associate with.

There are always two ways to do a thing, and it's a short cut to the wrong way.

Most men look at a pretty girl as if she had been born expressly on their account.

Most men divide women into two classes—their mothers and sisters and all other women.

The golden age is before us, not behind us.—St. Simon.

Noble women oft do great deeds in humbleness.—German motto.

An ounce of mother is worth a pound of clergy.—Spanish proverb.

The presence of those we love is as a double life.—Mrs. Jameson.

Falconer, the pet, was a sailor boy.

Feeding Now is a Science.

In 1890 fat hogs averaging 300 pounds at 12 to 18 months old, were the result of good feeding; in 1902 ten-months' pigs made 300 pounds average. Then the 200-pounds butter cow was extra fine; now 300-pound cows are not satisfactory. Giving due credit for good breeding, the change is due to a better knowledge of feeding stuff and more skillful feeding. To-day we have thousands of feeders who get about all out of feed there is in it, but, unfortunately, we have hundreds of thousands of feeders who do not get half out of the food that the skillful feeder does. The losses aggregate many million of dollras. The farmers, dairymen, breeders and feeders are the losers.—Farmer's Voice.

Protection Against Moths.

Upholstered furniture may be protected from the ravages of moths by spraying two or three times during the summer with naphtha or benzine. If you have no regular sprayer, take a small watering pot, such as is used for sprinkling house plants, and sprinkle in April, June and August. These materials will not harm the most delicate fabrics, and the unpleasant odor soon passes off, if the article is placed in the air. Care must be taken not to carry on this work near the fire or by gaslight on account of the inflammability of the agents employed.

College Bred.

"What is college bred, pop?"

"College bred, my boy, is something which requires a lot of dough to make."—Yonkers Statesman.

And the Dining Room.

"Lively game, isn't it?"

"Oh, yes. It has brought the strenuous life into the parlor."—Puck.

ELEVATOR ACCIDENT

THREE PORT ARTHUR WORKMEN FALL 75 FEET FROM THE SIDE OF A BIG WAREHOUSE.

ONE MET INSTANT DEATH AND THE OTHERS DIED SUBSEQUENTLY FROM THEIR INJURIES.

A dispatch from Port Arthur, July 17, says: Three young men, James Blackwood, George Harvey and George Johnston, were working on a staging suspended on ropes putting metallic sheeting on the new C. N. R. elevator, when one of the supports of the staging broke and it was precipitated. The three workers went with it, falling a distance of 75 feet to the dock. Blackwood fell under the others and died in a few minutes. Harvey, who was next, died in the hospital shortly afterwards, and Johnston died during the night. All of the victims lived here and were all about twenty years old and unmarried. Blackwood's mother is living but his father is dead. Harvey's parents live in town, but as far as can be learned, Johnston has no near relatives here. The rope that held the scaffold was cut where it passed over the edge of the roof.

TELEGRAPHIC BRIEFS.

An epidemic of dysentry is prevalent in Winnipeg. Drinking of too much water is supposed to be the cause.

The 90th Rifles accept the invitation to visit Grand Forks. August 14 has been fixed for the excursion.

Louise bridge has been abandoned by the C. P R. The trans-continental express was the last train to pass over it.

There is likely to be a serious labor problem in the west. Doukhobors and Galicians being in a position to remain at home and work their farms.

Canada's aggregate trade for the year just closed reached $414,517,000. The duty collected totalled $32,423,000.

Nineteen persons were drowned in the loss of the U. S. customs steamer, the Shearwater, in a typhoon in Philippine waters.

Waste of time is the most extravagant and costly of all expenses.—Theophrasus.

AN UNPLEASANT ENCOUNTER.

Narrow Escape From Being Trampled to Death by Winnipeg's Herd of Buffalo.

The buffalo at Silver Heights have been generally regarded as particularly harmless (says the Winnipeg Free Press), and visitors have never had the slightest hesitation in approaching as close as possible in order to see the brutes. But last week Mr. James Scott, Massey-Harris agent, had an experience that makes it look as though the popular idea of their mildness of disposition had better be reconsidered. Mr. Scott was driving across the prairie at the time of the incident in question. He was passing the herd at a short distance when he noticed that one of the buffalo cows seemed to be getting excited over his presence. Suddenly she gave a sniff and the whole herd turned and charged down on Mr. Scott and the rig. The horse swerved and then began across the prairie a race for life.

The headlong pace over the rough prairie proved too much for Mr. Scott. He was thrown from the rig. He regained his feet and ran for his life, but the pounding thunder of the hoofs behind him drew ever nearer. From what seemed almost certain death he was saved in a most peculiar and providential manner. The horse, freed from the strong controlling hand of the driver, ran around in a short half-circle, and passed between the charging buffalo and the fleeing man. While making the cross-cut the horse managed to free himself from the rig, and left it as a propitiatory sacrifice to the fury of the angry herd. While the buffalo were engaged in wrecking the buggy Mr. Scott made good his escape. It took him about an hour and a half to recapture his horse, when he returned to the city. This is one of the most remarkable escapes from buffalo chronicled in recent years, and, in a book of fiction might be sneered at as impossible.

UMPIRE SHOOTS A PITCHER.

At Cannelton, Ind., during a base-ball game, Arthur Derrett, umpire, shot and fatally wounded William Whallen, the pitcher. The game was played between the Owensboro and Cannellton teams.

In the last innings Whallen was at the bat and took exception to the ruling made by Derrett. After several words had passed the quarrel ceased. Whallen hit a fly and started to first base, when it is alleged Derrett pulled his pistol and shot him twice in the back. The wounded man fell and the crowd gathered about Derrett, and there were cries of "Lynch him." Derrett was placed under arrest.

DAMAGE BY HAIL.

A hail storm of devastating severity visited Carievale and vicinity on Monday afternoon, and it is said, completely destroyed the crops in its path and broke every window exposed to its fury in the town. It was the most violent hail storm ever experienced in the district, many of the stones being larger than hen's eggs.

CONDENSED NEWS.

About $400,000 damage has been done to the crops near Sauk Centre, Minn., by a rain, hail and wind storm. Hail nine inches in circumference fell.

King Edward has been greatly improved by his sea voyage.

A son of Geo. B. Shule, Winnipeg, fell from a four-story building and was probably fatally injured on 16th inst.

Dr. David Low has been appointed jail surgeon at Regina.

Thomas Winter's residence, near Fleming, N. W. T., was burned.

D. McNicol, general manager of the C. P. R., accompanied by other officials, left Montreal on a tour of inspection of the lines in the west.

Thirty-four officers and 234 privates of the Canadian Mounted rifles are yet in South Africa, owing to lack of a vessel to bring them home.

Ex-Boxer leaders are planning another rebellion in China.

The Australian senate has suggested higher duties on agricultural implements.

The British government has reopened a camp at New Orleans for the shipment of horses, mules and cattle to South Africa.

The management of the Winnipeg exhibition has arranged for many bands to attend the show, which lasts from July 21 to July 25. All the best bands of the Canadian west will be on hand to provide music for the visitors, and besides these, bands from several of the American centres in North Dakota and Minnesota will be in attendance. A. J. Tuckwell, the well-known Winnipeg instructor of music, has charge of the musical attractions.

Eloquence is in the assembly, not merely in the speaker.—William Pitt.

YUKON MURDERS.

DISCOVERY OF TWO BODIES UNDER SUSPICIOUS CIRCUMSTANCES. RECALLS O'BRIEN'S CRIMES.

ONE BELIEVED TO BE A MAN COMING INTO THE COUNTRY FOR FIRST TIME.

A special telegram from Dawson City, Y. T., dated July 17 says: The body of an unknown man was found in the Yukon river six miles below Indian river by Corporal Piper, on local information. The man was shot, through the body and twice through the head crushing all the frontal bones. It is supposed he had been murdered between White Horse and Dawson. The clue is very slight. He was clad only partially, which seems to indicate that he was about to retire or had just got up. One shoe is on. It is believed that he was shot and then cast in the river. He has been in the water for about three weeks and recalls the O'Brien murders. Death was instantaneous. An examination of the body shows that three shots were fired in rapid succession, the third striking when the man was falling. The spinal column and the head are shattered. An inquest was held and the verdict rendered that he came to his end from the effect of bullets fired by some person or persons unknown. The police are making great exertions. He is believed to be a man coming into the country for the first time. Much excitement prevailed when the body was taken out of the water.

On the same day the body of a man was found in the river eight miles below Selkirk. It is estimated he had been in the water for three months. There were no marks of violence. The latter is five feet eight inches in height, weight 150 pounds, he wore old woolen clothes and heavy boots. There is no identification. He had a Pacific Coast Steamship company's ticket in his pocket and a purse containing $13.

The former's height is six feet one inch, weight 200 pounds, age 40 to 50, slightly bald, with a slight growth of dark hair on the rest of the head. His hands show no signs of work. In the upper right jaw one molar is missing, in the left upper jaw all the molars are missing. All his other teeth are sound.

FARM LABORERS' EXCURSION.

Department of Labor Will See That Help is Equally Distributed.

The department of agriculture of the local government has sent out post cards to all crop correspondents in the province requesting them to send in not later than July 25 an estimate of the number of men, in addition to those already at hand, that will be required to harvest the forthcoming crop. The crop will no doubt be a very one, and a large number of men from the east will be required. The government are taking the matter in hand, and will endeavor not only to secure plenty of men, but to put them without delay into whatever portion of the province they may be needed. In previous years there has been a tendency on the part of farm laborers to rush to terminal points and to congregate in the larger centres with the result that while in some places there were more men than work, at other points there was a great scarcity of men. It took some time to get things adjusted properly, and caused a great deal of trouble. All these difficulties will, it is expected, be avoided this year, and the business of bringing in eastern laborers, which must occur every year, will be placed on a thoroughly effective business basis. To secure the best results, however, the hearty co-operation of the farmers will be required. Already enquiries for labor are reaching the department.

KING CONTINUES TO IMPROVE.

A dispatch from Isle of Wight, dated July 18 says: A bulletin issued this morning by the King's physicians says: "The King continues to make satisfactory progress. He is benefitted in every way from the change. His Majesty sleeps well and is able to have his couch placed upon the open deck during the greater part of the day. The next bulletin will be issued July 21."

RICE PAYS THE PENALTY.

Fred Lee Rice was hanged at Toronto on Friday. The drop fell at 8.01 a. m. Rice was calm and cool, but Radcliffe, the hangman was quite agitated. There were thirty people in the yard, chiefly officials and newspaper men. The prisoner's neck was not broken by the fall and Rice died from strangulation. The body was given to his mother and taken to Illinois.

It is estimated that 10,000 Welshmen have fought in South Africa.

Earl Cadogan has resigned as lord lieutenant of Ireland. He was appointed in 1885.

So many lovers have committed suicided together of late in Italy that the authorities now indict the survivor of any such tragedy for murder.

A splendid marble bassorilievo has been discovered in Pompeii in a little garden of the eastside, says a Naples letter in the Paris Messenger.

THE FERNIE FREE PRESS,
FERNIE, BRITISH COLUMBIA.

SATURDAY, JULY. 26, 1902.

THE STRIKE.

The only important development in the strike situation during the week has been the decision of the local union to again make an effort to enlist the spmpathy and co-operation of the miners employed by the coal company at Michel and Morrissey. This is neceessary if the miners' union is to succeed in bringing about a coke famine, and thus force an arbitration of the points in dispute between themselves and the coal company.

That this co-operation would be necessary was foreseen soon after the Fernie strike was declared, but when the local miners sought some time ago to enlist co-operation at these other two collieries, the effort ended in failure. What prospect have they for success in the present attempt?

If the present effort fails the general opinion is that the local strike will go by the board in a few days, This, however, would not by any means be a death blow to the miners organization, although it would mean a temporary defeat. But whenever there is a prospect of a reverse it is always well to carefully review the situation and determine which line of action. under the altered circumstances, it is better to adopt.

It is an open secret that there was a very marked difference of opinion among the miners as to the desirability of calling the present strike at the time at which it was eventually called, however unified the men became upon the subject after it was called. It was well known also that at the time this action was decided upon the Fernie miners were but ill prepared financially to enter upon a contest of the kind, and there was also very grave question whether their local organization itself was possessed of the necessary strength. These features have been more firmly impressed upon the minds of the close observers of the strike since it began. It is therefore competent for the members who are responsible for the strike to review their action and make up their minds whether the conditions, from their own point of view, do not warrant a truce, and a return of the men now on strike to their places in the mines.

There may be a tendency on the part of some members of the miners' union to resent even the suggestion of such a thing, but a little reflection should convince anyone as to the wisdom of it. The mining and smelting industries of Southern Kootenay and Yale are to a very great extent dependent upon the Crow's Nest Pass Coal Co. for fuel. In turn the Company is dependent upon the miners it employs to get the coal out. Properly handled the miners should win out in a struggle of this kind, but unfortunately they are lacking in financial resources, and also in the very great essential organization.

The plan which a number of the members are now suggesting is that the strike be lifted for the present. Then the men could prepare for a long seige, and they could also thoroughly organize the miners at Michel and Morrissey. This accomplished they could then renew their demand for fair treatment, and if required, enforce it most effectively. It would then be possible to tie up the Company's operations completely, and upon a day's notice shut off the supply of coke to all of the smelters in the province. This is the chief thing to accomplish, and unless it is accomplished the strike in the collieries must fail. There seems to be sound reasoning to support this course, and it is said there is a very good prospect of its being acted upon.

"A patient public has at last been vindicated, and a change has taken place in the police arrangements of this district that will meet with the hearty approval of all who have the whlfare of this section at heart. W. H. Bullock-Webster, chief constable for the Kootenays, was called to Victoria relative to the dissatisfaction that has been growing throughout this district over the police department. As a result a change has been made and Lestock Forbes, formerly constable at Fernie, and senior officer in point of service in this district next to Constable Barnes, has been appointed chief of police of the district of South East Kootenay, which has been cut off as a police district by itself. Hereafter he will have supreme authority in police matters in this district, and will make his report direct to Victoria.

This change places Constable Barnes in a subordinate position under Mr. Forbes, as an ordinary constable. Heretofore, by a few specials and a newspaper, Mr. Barnes has been characterized as Chief Barnes without reason, for at no time did he occupy the position as chief, that being held by Mr. Bullock-Webster.

Another thing, this change will do away with the loud uniforms adopted by a few constables without authority, and also the big revolver and loaded cane display. There was a brief era of this kind of yellow back novel display of "bad men among desperadoes", but in the future this will be dispensed with and the dignity of the law and the character of the officer will be considered sufficient to secure the enforcement of police regulations.

In Cranbrook, as well as in all the other parts of the district, there will be a feeling of relief and satisfaction. The people have confidence in Mr. Forbes, and they will rise as one man and say of Chief Bullock-Webster, "Well done, thou good and faithful servant."—Cranbrook Herald.

The above article from the pen of editor Simpson of the Cranbrook Herald is about on par with the policy he has pursued in regard to Constable Barnes for the past year. His sheet has been filled with the most venemous attacks. He has never yet put forward a direct charge against Mr Barnes, but confines himself to base insinuations which ill become the editor of any paper. He glories in the fact that Constable Forbes has been appointed to the position of Chief Constable of South East Kootenay when Barnes was entitled to the appointment, and takes this paper to task for ever having presemed to speak of Constable Barnes as Chief We were perfectly aware that H. W. Barnes was the subordinate officer of Bullock-Webster, but at the same time we also knew him to be senior constable in this district and as such it was but natural for the people to call him Chief. But this seems to have been a most exasperating term to the editor of the Herald. He has on different occasions taken exception to this and has never yet missed an opportunity to hurl insult at the above mentioned gentlemen. We maintain, and we believe that it is the opinion of every business man in Fernie, that Constable Barnes is the best officer of the law that Fernie has yet had.

Mr. Forbes may in his new posiiion think it wise to do away with the police uniform, but if he does he is but returning to the back woods ways and disorganized methods of years gone by. We have nothing at all against Mr. Forbes, but if he allows himself to be influenced by the bombastic remarks of our contemporary we fear he will soon come to grief.

HOW COAL TOWNS SPRING UP.

One of the features of the development of the East Kootenay and West Alberta coal fields is the numerous thriving towns that have sprung up lately. While these towns are "mushroom" so far as rapidity of growth is concerned the resemblance ends there, for as a rule, the buildings have been constructed by the coal companies operating in the respective camps and the structures are of a comparatively permanent nature.

Robert S. McKibbon, western representative of the Canadian General Electric Company with headquarters at Rossland, returned Thursday evening from a month's trip over his territory, the trip including jaunts into West Alberta, East Kootenay, the Slocan and Boundary. Decidedly the feature of Mr. McKibbin's trip was his visit to Frank, the newest of the coal fields that has sprung up in West Alberta. This section of the Alberta coal fields promises to rival the Fernie and Michel fields in importance, and that this fact is realized is demonstrated by the fact that the Great Northern, coincident with the construction of the Crow's Nest Southern railroad into the Fernie fields is standardizing the Alberta Northern line that has heretofore been a narrow gauge road. Incidentally it may be stated that this scheme is said to be a part of the plan to revive lead smelting on a large scale at Great Falls and other Montana lead stacks under the control of the American Smelting & Refining Company.

At Frank some sixty houses have been erected—not shacks, Mr. McKibbin states—but comfortable little houses built by the coal companies operating in the camp for the accommodation of their employes In the town are the measures operated by the Canadian-American syndicate, and at Gold Creek, a short distance away, are the collieries of the Gold Creek Corporation, a corporation operated by French capital under the management of Jules Fleutot, formerly of Nelson. Work has been started on a seven mile railroad from Frank to the Gold creek collieries, and when the road is built it is expected that coal will be shipped out in large quantities.

J. E. Mills has temporarily closed his real estate office here until the strike is over. He left for his home in Phœnix this morning.

Calgary will celebrate Coronation Day on Saturday, August 9th. They have invited the Fernie baseball team to be present on that occasion.

The Fernie Junior Lacrosse team will play off the tie with Cranbrook juniors on Wednesday next. The boys are getting in some good hard practice and expect to show the visitors how to play the game.

Mr. J. A. Hill, of the firm of Dill & Hill, left Wednesday evening for Wolsley, Assa., where he will reside in the future. His large residence in Fernie has been leased to Mr. T. C. Malpas, local manager of the Bank of Commerce.

The B. C. Furniture Co. has added a thirty-foot addition to the rear of their store besides quite a large addition to the side of the building. The company show by this action that they have still confidence in the future of Fernie, notwithstanding the present gloomy outlook.

Baptist church, Victoria Ave., Lord's Day services: Morning service at 11, Sunday school at 2:30 p.m., Evening service at 7:30. Wednesday evening at 8 o'clock, prayer and bible study. Thursday evening at 8 o'clock, B. Y. P. U. Rev. D. Holford, B.D., pastor. All these services are open to the public and a cordial invitation is extended all to be present.

The opening of the Crow's Nest line has resulted in very heavy shipments of mixed freight coming through for Nelson. The delayed freight was principally produce, and among Tuesday's arrival were two straight cars of eggs and several cars of mixed eggs and butter. While the absence of the familiar trains of coal and coke will prevent the rush lasting long, it has enabled the railway company to lose no time in forwarding the goods as soon as the line was cleared. —Nelson News.

The mines at Frank have been closed for the past three weeks owing to the floods which paralyzed the railway traffic on the Crows Nest line, and which prevented the company from getting empty cars to fill with coal. Operation has commenced on the nine mile spur running north out of Frank to the coal beds owned by the rich French syndicate. There are about 200 men on the force and still there are many idle men in Frank. The road bed of the Crows Nest line has been seriously weakened by the recent floods around Blairmore and as yet no attempt has been made towards permanent repairs.

A hot game of football took place on the recreation grounds on Tuesday evening between the regular football team and a team of scrubs. The regular team put up such a poor game on the first with Cranbrook that a number of the boys thought they could be defeated by a second eleven, and this came very nearly being true. The regulars succeeded in getting one goal and prevented their opponents getting any, but all the spectators admitted that the "Scrubs" had much the best of the game and had it not been for the bad shooting of Watson on the forward line, would have scored at least three times. The play on both sides was very poor, indeed it seems that our boys have forgotten how to play the game. The match was refereed by Robert Schram. The teams were made up of the following players :—

Team		Scrubs
Cody	Goal	Matheson
Zeigler	Backs	Scott
Jones		Black
Taylor	Half Backs	Kastner
Bell		Perkins
Staebler	Forwards	Rutledge
Herchmer		Watson
Jarvis		Martin
Sneddon		Thompson

Dentist

Dr. Barber is now at his office over A. C. Liphardt's.

Dr Bonnell, was in Cranbrook on Wednesday on business.

The Hosmer Baseball team will play our team, on the ball grounds to-night.

Mr. S. Arnold, of Cranbrook, was in town on Thursday last.

Mr. and Mrs. Amos Purdy are in Nelsoe attending the regatta.

Miss Edmunds is the guest of Mrs. Dr. Bonnell at Elko this week.

C. P. Hill, of Kitchner, B.C., was in town several days this week.

James Milner, photographer, has pulled up stakes and left for pastures green.

W. F. Cuthbert returned from a business trip to Lethbridge on Tuesday of this week.

Pincher Creek defeated Frank at baseball on Friday last by a score of 15 to 9. The game was played at Pincher.

Ask for British Lion or Mainland cigar. For sale at all first-class places. Union made. Manufactured by Wm. Tietjan, Vancouver.. x

Mr. H. Watson was in Frank on Tuesday on business. He arranged for the lacrosse match which came off yesterday, while in that town.

A cigarette is discribed as "a small roll of paper, some tobacco and drugs, with a little bit of fire on one end and a big chump on the other end."

Mrs. John Coward received a telegram on Wednesday evening from Brantford, Ont., stating that her mother was dying. A latter message brought news of her death.

The report published in our last issue stating that Mr. A. W. Bleasdell had sold his drug business to Mr. A. Archibald, of Kimberly, was not correct. Mr. Bleasdell has not sold his business.

Mr. F. J. Watson has resigned his position as principal of the Fernie Public School. We understand that Mr. Watson intends to give up teaching and will devote himself entirely to his insurance and loan business.

The services at Christ Church, Fernie, to-morrow will be held as follows:—Matins and Litany 11 o'clock, Sunday School and Young Men's Bible class at 2:30 p. m., Evensong at 7:30. The Vicar will officiate. Collection in aid of church expenses.

A party of C. P. R. officials arrived in town on Tuesday. They inspected the C. P. R. property here and paid a visit to the mines. The party included vice-president and general manager McNichol, Robert Kerr, passenger traffic manager; chief engineer McHenry, assistant traffic manager MacInnis, and A. D. McTrer, general fuel agent. The officials are on their annual tour of inspection.

The most important game in the Crow's Nest League series will be played on the recreation grounds here next Wednesday between Lethbridge and Fernie. Both teams are evenly matched and it well be a royal struggle. If the visiting team is victorious they take home with them the Levasseur Cup, while on the other hand if Fernie wins both teams will be on an equal footing as Lethbridge won their home game against Fernie.

A country minister in a certain location took permanent leave of his congregation in the following pathetic manner: "Brothers and sisters, I have come to say goodbye. I don't think God loves this church, because none of you ever die. I don't think you love one another, because I never marry any of you. I don't think you love me, because you have not paid my salary; your donations are mouldy fruit and wormy apples, and 'by their fruit ye shall know them." Brothers, I am going away to a better place. I have been called to be a chaplain in a penitentiary Where I go, ye cannot come, but I go to prepare a place for you, and may the Lord have mercy on your souls. Goodbye.

William Chapman, president of the miners' union at Michel has commenced action through Taylor & O'Shea, barristers, of Nelson, against the Crow's Nest Pass Coal Company. He claims that after the proclaming of the strike at Michel he was ordered to leave the town, and that the boarding house keeper where he was stopping told him that they could not keep him any longer, and that at the restaurant the proprietor had been instructed by the officers of the company not to sell him any more meals. That later he and James Baker, representative of the Western Federation of Miner, had been ordered off the main street of the town of Morrissey by the coal company, who claimed that as they owned the town site and all the buildings they had the right to say who should or should not come into the town.

Important Notice!

Why wear dirty, creased and wrinkled clothes?

when it will cost only the insignificant sum of $3 per month to keep them in the smartest condition possible. I will send for your clothing, and return same to you looking almost as well as when they were purchased. Those wishing to grasp this great opportunity should call at once and leave their names with me. The amount of clothing you possess is of no importance to me.

Yours sincerely,

...H. HILL.

CYCLONE IN ONTARIO

TORNADO KILLS SEVERAL PEOPLE AND INJURES MANY OTHERS.

FARM HOUSES, OUTBUILDINGS, AND FENCES SWEPT AWAY AND STOCK KILLED.

A storm of unusual violence passed over Chesterfield, Ont., on Friday, July 17, accompanied by a cyclone which exceeded in fury anything of its kind in the memory of the oldest inhabitant. There were almost incessant electrical discharges.

The tornado took a northeasterly direction and passed within a mile of the town. Those who were watching felt distinctly the hot blaze from the cyclone as it swept with fearful velocity to the southeast. The wind twisted, tore and destroyed everything in its path for a space of about fifty or sixty rods in width; while everything within a radius of a mile in width was more or less affected. The storm is supposed to have spent its energy at the St. Lawrence. The country for miles around presents a scene of devastation. Fences have disappeared and cannot be found. Dwellings and outbuildings were overturned and in some cases torn to pieces. Dead cattle are lying here and there at almost every farm in the centre of the storm's path.

Several persons were killed and a number injured at the farm of John Kearns, seventh concession of Winchester. Portions of the barn lay about the premises and of the dwelling not a vestige could be found. The father lay in a clover field with a broken hip and otherwise terribly bruised, and near him lay his little son, seven years old, dead. The corpse of the unfortunate mother, evidently picked up by the house, was forced against a fence. Two other children were found in the field with broken limbs and terribly bruised, but still living.

The property of J. Coyne, adjoining the Keran property, presented a unique appearance. Maples, elms, oaks were torn from their roots, twisted, broken and splintered. Many instances of narrow escapes are reported.

At the residence of Michael S. Grady, fifth concession of Winchester, a narrow escape is reported. John Clark, the hired man, the mother, and four children were in the stable milking when the barn collapsed over them. Clark escaped through a portion of the roof, and getting an axe, cut his way to the imprisoned family, all of whom were got out safely, with the exception of one girl, who was badly injured.

The residence of Harmon Shaver, ninth concession of Winchester, one of the most solid brick houses in this locality, was completely devastated. It is impossible to estimate the damage now, but it is within the mark to say that in the townships of Winchester, Finch and Osnabruck it will exceed $200,000.

CANADIANS NAMED.

Commander-in-Chief's Last Despatch —Manitobans in the List.

Viscount Kitchener in the last official despatch to the Gazette mentions the following names of Canadians who took part in the action at Boschbult, March 31:

Surgeon Devine (Winnipeg) Mounted Rifles, good services.

Lieut. Bruce Carruthers (Kingston) Mounted Rifles, who fought until all his men were killed or wounded.

Private Kelly, (Virden, Man.,), Mounted Rifles, who as hospital orderly did exceptionally good work under heavy fire.

Corporal Wilkinson, Mounted rifles, promoted to be sergeant.

Lance-Corporal J. C. Bond and Private Beth, both promoted to rank of corporal for good work in Carruthers' party; especially noticeable in rallying troops.

Corporal E. C. Pearce, of the Canadian Scouts, gallantry in action on April 4.

Sergeant J. C. Perry, of Canadian Mounted Rifles, killed after good service at Boschbult.

Private C. N. Evans, of Canadian Mounted Rifles, also killed at Boschbult, who, after being mortally wounded, fired two bandoliers of ammunition and then broke his rifle to prevent the enemy from capturing it.

Sergeant H. A. Lee, at Boschbult, twice tried to carry a dispatch through the enemy's lines under heavy and close fire.

GOV. ROSS IS PARALYZED.

A dispatch from Dawson City says: Governor Ross was stricken with paralysis while on the steamer Columbia on the way from Dawson to White Horse. He was without medical attendance for about 24 hours. When the commissioner arrived at White Horse he was unconscious, but he has somewhat recovered from the effects, and is now conscious.

COLLAPSE OF THE CAMPANILE.

Detached Bell Tower of St. Mark's church, Venice, Crashes into the Piazza.

Venice, Italy, July 14.—The Campanile (detached bell tower) of St. Mark's church, 98 metres high, collapsed this morning and fell with a great crash into the piazza.

The Campanile, which was entirely detached from the cathedral, collapsed where it stood, and is now a heap of ruins. The cathedral and the Palace of the Doges are quite safe, but a corner of the royal palace was damaged. Repairs on the Campanile were to have been commenced today. It is feared that there was some loss of life. The ruins are surrounded by a cordon of troops. The first intimation of danger was the sudden appearance yesterday of a longitudinal crack in the corner of the wall facing the clock tower and the breaking of two windows.

The Campanile stood opposite the church or cathedral of St. Marks. It was founded in 888, restored in 1329, provided with a marble top in 1417 and in 1517 was crowned with a figure of an angel nearly sixteen feet high. The loggeta or vestibule on the east side of the Campanile was once a rendezvous of the Nobili and afterwards a waiting room for the guards during the session of the great council. The clock tower stood opposite the Campanile.

HICKS-BEACH RESIGNS.

Following closely on the heels of Lord Salisbury's resignation of the premiership of Great Britain comes the following announcement: "Sir Michael Hicks-Beach has resigned as chancellor of the exchequer."

CONDENSED NEWS.

Bread prices have advanced in Toronto.

Sir Joseph Little, chief justice of Newfoundland, died on July 14.

The Archbishop of Rupert's Land is seriously ill in London.

The provincial government is considering the building of a Normal school in Winnipeg.

Canada will not send another contingent to the coronation in August.

Gordon Manuel, a 12 year old boy, while fishing, was drowned in the Assiniboine river at Winnipeg on July 14.

Over 2,000 Welsh in Patagonia are anxious to be transported to the Canadian Northwest.

J. B. Tyrrell, the Northern Canada explorer, believes Andre was killed by Esquimaux.

The steamer Windward will soon leave Jersey City in search of Lieut. Peary in the Arctics.

Forty thousand cattle died from drouth in one of the principal cattle raising districts of Australia.

The United States cruiser Brooklyn, carrying the remains of Lord Pauncefote, arrived at Southampton on July 14.

The body of Jacob Thorsteinsson, who disappeared last Thursday from his home in Winnipeg, has been found floating in the Red river.

Donald A. Mair, 23, a farmer, of Ekfried township, near Glencoe, Ont., was instantly killed by lightning on July 14, in his father's barn.

WINNIPEG FAIR NOTES.

The manager of the Winnipeg Industrial exhibition association is receiving a great many enquiries regarding the contemplated road race to be held some time during the fair, which lasts from July 21 to 25. The general opinion of those who have been spoken to on the matter is that the race should be for 3 and 5½ mile heats, the reason given being that there are very few road horses that are in condition for mile heats. As the entry for this race is practically free, it will be left entirely discretionary with the directors and the judges as to the qualifications of a general roadihorse and the buggy to be used. This is to ensure it being as far as possible a strictly amatuer event. Professionals of all kinds, both horses and drivers will be absolutely barred.

The governors of Minnesota, North and South Dakota, Iowa and Wisconsin have been invited to attend the Winnipeg Industrial exhibition, which will be held July 21-25. Three of the governors, according to the fair manager, have signified their intention of being present on American's day, July 24.

Enquiries for information of all kinds is coming into the offices of the Winnipeg Industrial Exhibition Association and the management is fairly deluged with correspondence. People in all walks of life are interested in the event, which opens on July 21. One of the latest to write was the cashier of the Farmers' National Bank, of Badger, Minnesota. He asked for circulars and programs. So many of the clients of the bank were asking about the big fair at the "Hub" of the Canadian west that he had to have the information.

COLONIAL PREMIERS

SPEECHES AT THE BANQUET AT THE NATIONAL LIBERAL CLUB, LONDON.

FREE TRADE WITHIN THE EMPIRE AN IMPOSSIBILITY, SAYS SIR WILFRID.

A banquet in honor of the colonial premiers was given at the National Liberal club in London on July 15. Sir Wilfrid Laurier, Sir Edmund Barton and Mr. R. Seddon were present. Sir Wilfrid responded to the toast "Our Guests." He said no reform in the colonies had been so prolific of results as that of self-government. Touching the question of free trade within the empire, Sir Wilfrid declared the policy impossible, local interests not being the same everywhere. It would be a great blessing if the empire united on a commercial policy, yet he doubted the accomplishment of such a policy. "Our interests are too diversified," he explained.

Sir Edmund Barton, premier of Australia, declared that the time for parchment bonds politically uniting the empire had not yet arrived. He was unable to see how such bonds could be made. Sir Edmund did not believe there could be any results from the conference.

Mr. Seddon did not agree with the Australian premier. He thought their kinsfolk in Britain should be helped. Preferential trade, Mr. Seddon believed, should be carefully discussed; manufacturers throughout the empire might be favored.

ALBERTA IRRIGATION.

Within the irrigated area near Lethbridge it is estimated that fully 15,500 acres of land are under crop. Of this the Raymond and Magrath districts contribute about 5,000 acres each, Stirling 2,200, Lethbridge 1,800, and Spring Coulee about 1,500 acres. About 30 per cent. of the entire area is in wheat, 5 per cent. in barley, 5 per cent. potatoes, and the balance in oats and grasses. At present the crops are most promising, and notwithstanding the unusually late seeding, for this part of the country, are well advanced.

NEWS NOTES.

Canada will erect a large exhibition building at Osaka, Japan.

August 9 is now mentioned as the exact date of the coronation.

A Court Circular announces that King Edward has conferred upon Lord Salisbury the Grand Cross of the Victorian order, set with brilliants.

Robertson Johnston, a prominent farmer of Brant, Ont., was accidentally killed on Thursday evening by falling from a beam in his barn to the floor, a distance of 20 feet. He was 63 years of age.

Tremendous explosions have occurred recently at the Waimauga geyser at Rotorua, New Zealand, a height of 800 to 900 feet being reached.

Great havoc has resulted in the Macleod district from floods.

A Chinese cruiser and 200 men were blown up in Nanking harbour.

The All-British Pacific cable is within three months of completion.

E. Priest was drowned in the Assiniboine river, near Elkhorn, Man., while bathing.

A verdict of not guilty has been declared in the Fraser arson case at Rat Portage. Fraser was accused of setting fire to his store.

The labor unions of Winnipeg held a procession and a public open air meeting in sympathy with Canadian Northern strikers on July 15. Over 1000 men were in the parade, and 4000 listened to the speeches. The meeting was orderly.

A boy returned to Riddell & Common, of Montreal, a marked cheque for $18,000 which he found on the street. He was rewarded with a $5 bill.

It is announced in Montreal that the C. P. R. intend to replace their shops and roundhouse in Winnipeg, and also to remodel the yard system.

Emanuel Herminn, the originator of postcards, is dead.

Lord Dundonald sailed from Liverpool on July 15 to take command of the Canadian forces.

Two wind and hail storms visited North Dakota and part of Minnesota and did immense damage to crops.

Major-General Sir A. R. F. Dorward, late commander of the allied troops in Tientsin, says that war with Russia over Manchuria, is possible.

H. Z. Frigon, mail carrier at Rosebud Creek, N. W. T., accidentally shot himself on July 14. His wound is serious.

OF INTEREST TO FARMERS.

Cordage Trade Journal: In the fall of 1900 and spring of 1901, when several propositions for the organization of binder twine manufacturing companies were being presented to the farmers of Canada, who were asked to invest in the shares of the companies, the Cordage Trade Journal warned those interested, and suggested that they should investigate the conditions of the business before making investments in the shares. In its issue of April 18, 1901 the Cordage Trade Journal said:

It is not often that the Cordage Trade Journal prints anything that may tend to discourage enterprise or competition; but it is certainly not for the best interests of anybody that too many factories for the manufacture of binder twine be erected in a single province like Ontario, with the idea that all will find a market in that province for their product at prices permitting dividends of from 60 to 100 per cent. because one company was able to make such returns owing to the Spanish-American war.

Notwithstanding warnings of local papers in Ontario, many farmers invested in the shares of the companies that were organized at that time. Little more than a year has passed, but already some of the farmers are disappointed because of the lack of tangible returns on their investment. The Chatham Binder Twine Company's shareholders held their annual meeting in Chatham, Ont., on May 10, and it was of such a character that the Chatham Planet describes it —not as a meeting, but as a storm. After a long and lively discussion, one shareholder arose and said: "Gentlemen, if the president won't let us elect our officers, I move we adjourn to some other building and elect our directors." There was then a motion before the house to pass a bylaw suggested by the directors. While this bylaw was being read cries of "Election! Election!" were made and finally the motion was voted down.

After further confusion, Secretary T. C. Smith, picked up the books and seal, and, with President M. J. Wilson attempted to leave the room through a side door, according to the Chatham Planet's report. Several stockholders cried: "Keep those men in! Stop Smith! Get those books!" Three stockholders barred the door, and Messrs. Smith an Wilson could not push their way through, seeing which, they stopped their retistance, Secretary Smith, however, announcing that the meeting was adjourned. A stockholder moved that a secretary for the meeting be chosen, which was done. Then motions were carried to repeal all the bylaws passed by the directors since the last general meeting, with the exception of some clauses. Again Secretary Smith attempted to rush away with the books and seal; but again the angry stockholders prevented him from doing so.

President Wilson and Secretary Smith finally left the meeting, and the shareholders then elected these directors: J. J. Ross, Arthur Leverton, David A. Hutchison, Mr. Cousineau and Mr. Coulter. Mr. Ross was elected manager at a salary of $1,500 a year, and was made secretary-treasurer. On going to the factory to take possession, the new directors found the door locked. Deposed Secretary Smith declined to give up the key; but the door was finally opened. Deposed President Wilson threatened to obtain an injunction against the new board of directors and the officers. He and the old directors claimed to be the only legal officers of the corporation.

This is the principal return thus far to the farmers who invested in the Chatham Binder Twine Company's shares, expecting large profits.

THE TWINE MARKET.

The half-cent advance if June 24 has been followed by another increase of half-cent, taking effect Tuesday, July 1, bringing twine to the 13-cent basis for sissal. Notwithstanding the heavy rains and the general cry of crop damage in certain sections, the demand continue strong. There are but few manufacturers and jobbers now in the market, and those who have twine in hand or to arrive have an active demand for more than they can supply. All factors in the trade now seem convinced that the harvest will absorb all available twine.

The new scale of prices, manila quotations being practically nominal, is as follows, central delivery:

Sisal	13
Standard	13
Manila (550-foot)	14½
Manila (600-foot)	15½
Pure mainila	17

Car lots, ¼c less. Five ton lots, ½c less. Fall terms.—Farm Implement News, Chicago.

SHILLELAHS IN COUNTY DOWN.

A score of policemen and district inspectors were injured while attempting to quell a riot at Newry, counties of Down and Armagh, on the night of July 15. A number of the Orange and Nationalist combatants were also injured. H. Bredin, a Presbyterian clergyman, was knocked from his bicycle and severely injured by a blow on the head with a stone.

TERRITORIAL CROP REPORT.

Prospects are Bright for an Abundant Harvest.

Reports recently received by the department of immigration from agencies in the Northwest Territories present a more favorable outlook for an abundant harvest than appearances of a few weeks ago would warrant. At that time heavy rains were falling in places, which threatened to prove excessive. However, the beginning of July brought the fine weather that the settlers had been hoping for, with the result that the crops are rapidly recuperating from the effects of too much moisture and are advancing favorably toward maturity. Extracts from recent reports read as follows:

Edmonton—The crops of this district are in first class condition. The extra fine weather of the past few weeks has had the salutary effect desired, and the average yield will be fully up to if not greater than last season. Last year's total yield in this district was: Wheat, 767,400 bushels; oats, 4,900,480 bushels; barley, 380,776 bushels; rye, 18,000 bushels; flax, 7,000 bushels. Total acreage, 122,940. This year this will be increased by about 25,000 acres. Farmers from all parts of the district say crops are looking well. Homeseekers visiting the fair here were much impressed with all they had seen.

Vegraville, Alta.—The approximate acreage in this district is 2,200; the weather has been fine; prosperity reigns and prospects for harvest are very bright.

Red Deer—Land entries at this office are greatly in excess of last year. Acreage under cultivation about the same. Notwithstanding excessive moisture crops are in excellent condition. A larger area of new land will be broken up than last year and new settlers are all well pleased with the district.

Fort Saskatchewan—Crops at present are looking well and promise a heavier yield than last year. The acreage under crop is 15 per cent. greater than last year, and is sown approximately, 50 per cent. into wheat, 30 per cent. to oats, and 20 per cent. to barley. There is a big improvement all around in stock in horses, cattle, sheep and pigs. Land entries are about the same as last year. The reason for no increase being that so many of the new settlers are foreigners, and we have no interpreter here so they locate at Edmonton. Settlers who arrived here before June 1 have some crop in and are now busy breaking up new land for next season.

Strathcona—There is a wonderful improvement to be noticed in all stock in this section. Land entries at the office here are 55 per cent. more than last year. Considerable breaking is being done.

Leduc—Crops in this part of the country are doing splendidly. The acreage is increased fully 25 per cent over last year, and is sown mostly to oats. Land entries show an increase. Stock is improving wonderfully and considerable breaking is being done.

Wetaskiwin—Crops around here are good; 75 per cent of acreage is sown to oats. Land entries show an increase of 75 per cent. Stock is all improving.

Ponoka—Crops in this district will be heavier than last year. There is about 50 per cent. increase in acreage and about 70 per cent is sown to oats. Stock shows great improvement.

THE DAIRY TRADE.

Some in the butter trade in Eastern Canada were surprised when the information was made public not long ago that some of the steamships plying between Montreal and the old country are supplied with butter which comes from Normandy, to the exclusion of Canadian makers. The steamship companies explain that although this butter costs fully 25 per cent more than Canadian would, they were still obliged to use it because of its splendid keeping quality. They explain that this Normandy butter is the only kind they can obtain which will keep its quality during a warm voyage. This is rather hard on our Canadian creameries, which have been so well pleased with their products during recent years.

A suggestion made at a recent meeting of the Winnipeg board of trade, to the effect that the members of the House of Commons at Ottawa, and also the senate, should make a trip through Western Canada for the purpose of becoming better acquainted with the resources and prospects of this portion of the Dominion, its needs and requirements, is likely to be adopted.

Louis N. James, 19 years of age, is amateur golf champion of the United States.

A large section of the Conservative party in Britain favor Mr. Chamberlain for premier.

When peace was declared Lord Kitchener ordered a treat to the soldiers, which cost $85,000.

FERNIE FREE PRESS.

FERNIE, B.C.

Mrs. Gabb—Mr. DeVout has lost two children within a month. One of them was treated by a Christian Scientist and died.

Dr. Dosem (excitedly)—Horrible! Outrageous! The parents of the poor child should be arrested.

Mrs. Gabb—The other child was treated by a regular physician, but it died, too.

Dr. Dosem (solemnly)—The Lord gave, and the Lord taketh away.

Messrs. C. C. Richards & Co.

Dear Sirs,—While in the country last summer I was badly bitten by mosquitoes—so badly that I thought I would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and I did so. The effect was more than I expected—a few applications completely curing the irritation, preventing the bites from becoming sore. MINARD'S LINIMENT is also a good article to keep off the mosquitoes.

Yours truly,
W. A. OKE.
Harbor Grace, Nfld, Jan. 8, 1898.

An Irish newspaper, commenting on the census returns for that county, says that one in 29 of the Wexford population is a pauper.

STREET CAR ACCIDENT—Mr. Thos. Sabin says: "My eleven year old boy had his foot badly injured by being run over by a car on the street railway. We at once commenced bathing the foot with Dr. Thomas' Eclectric Oil, when the discoloration and swelling was removed, and in nine days he could use his foot. We always keep a bottle in the house ready for any emergency."

Liverpool follows Glasgow. The magistrates are to consider the advisability or otherwise of abolishing the barmaid.

Active persons of nervous temperament can hardly get too much sleep.

Severe colds are easily cured by the of Bickle's Anti-Consumptive Syrup, a medicine of extraordinary penetrating and healing properties. It is acknowledged by those who have used it as being the best medicine sold for coughs, colds, inflammation of the lungs, and all affections of the throat and chest. Its agreeableness to the taste makes it a favorite with ladies and children.

A small boy desclibes a headache as a stomachache in the brain.

The new woman seems to have given up trying not to be an old girl.

Holloway's Corn Cure is a specific for the removal of corns and warts. We have never heard of it failing to remove even the worst kind.

About the worst examples a small boy ever meets with are in his arithmetic.

Minard's Liniment Cures LaGrippe.

There are more ways of deserving punishment than there are of escaping it.

There are no better cosmetics than a severe temperance and purity, modesty and humility, a gracious temper and calmness of spirit.—Ray.

The slave has but one master, the ambitious man has as many as there are persons whose aid may contribute to the advancement of his fortunes.—Bruyere.

The most original authors are not so because they advance what is new, but because they put what they have to say as if it had never been said before.—Goethe.

Spirit of the Home.

There are dwellings where physical health, refinement, well to do circumstances and no trouble of any importance lack but one thing—the optimistic spirit of the mother. There is no use denying a fact which we all know. The spirit of the home follows that of the mother. If she is lively, so will her household be; if she is pessimistic, the poison will sooner or later eat its way into every member of the family, especially into the masculine portion of it. Why? Because the mother's attitude toward life influences her sons more than her daughters. A woman does not influence another woman to any great extent mentally. Neither does a man influence a woman as she influences him. Unless through force or through love for him, woman will do pretty much as she pleases, but man is likely to be influenced at any moment by any woman, whether he loves her or not.

Easy Washing.

When washing clothes, dissolve a little pipeclay in the water or rub with the soap on to the clothes. This process gives the linen the appearance of being bleached and also makes the clothes clean with half the usual labor. When the water is hard, pipeclay is especially useful, for it makes the water as soft as rainwater.

A HEROIC LIFE

WITH AN EYE SINGLE TO THE GOOD OF HER FELLOW-MEN SHE TOILED.

The Story of Eliza H. Varney, of Bloomfield, Ont.,—Spent Many Years in a Service of Saintly Sacrifice to the Poor and Needy—Ministered to Their Physical as well as Spiritual Wants.

Bloomfield, Ont., July 21. (Special). Our community boasts of having within it one of the most devoted Christian women that ever toiled in the world's vineyard.

Owned and blessed by God, this self-sacrificing heroine and her husband, since deceased, spent many years of faithful pastoral work in different parts of the continent.

Elizabeth H. Varney, relict of the late Levi Varney, is now 73 years of age and is living in quiet retirement here. She is a member of the Society of the Old Orthodox Friends and this simple peace-loving Society never had a more humble or more worthy member.

It is of her work among the Doukhobors in our own Canadian Northwest that she loves most to speak, and many and vivid are her recollections of this peculiar people.

One of the greatest difficulties this devoted woman had to contend with was disease among her poor people, but she had armed herself with a remedy that was as unfailing as her own charity--Dodd's Kidney Pills were the weapons she used to drive out sickness.

Some years before she had tried and proven the value of this great medicine in her own case when threatened with Dropsy and suffering with Rheumatism. They had completely restored her, and when she found that the prevailing trouble among the Doukhobor people was Kidney Disease and Dropsy, she knew that Dodd's Kidney Pills would be her most valuable aid in her good work.

She tells of one poor young woman among this people who was suffering so severely with the Dropsy that she was terribly bloated all over and confined to her bed. The Lady missionary left a few of Dodd's Kidney Pills and immediately sent for three more boxes.

She was rewarded for her efforts by the complete recovery of the young woman.

Dodd's Kidney Pills have received this worthy woman's most emphatic endorsation.

The cost of police at the houses of parliament, in England, last year amounted to over £7,000.

Penny X-ray instruments, by the aid of which the curious may see their own finger bones, are being sold in London streets.

Monkey Brand Soap cleans kitchen utensils, steel, iron and tinware, knives and forks, and all kinds of cutlery. so

When a woman tells her husband something about some other woman it is never to the other woman's credit.

A woman should never propose because one rejection would crush her pride, while half a dozen rejections simply egg a man on.

Mr. Thomas Ballard, Syracuse, N. Y., writes: "I have been afflicted for nearly a year with that most-to-be-dreaded disease Dyspepsia, and at times worn out with pain and want of sleep, and after trying almost everything recommended, I tried one box of Parmelee's Vegetable Pills. I am now nearly well, and believe they will cure me. I would not be without them for any money."

Many a young man travels first class owing to the fact that his father pays the freight.

Some men who claim to be looking for an opportunity for work don't care how remote the opportunity is.

Pale, sickly children should use Mother Graves' Worm Exterminator. Worms are one of the principal causes of suffering in children and should be expelled from the system.

Most cases of so-called temporary insanity should be dubbed temporary cussedness.

Some men voluntarily join the ranks of the benedicts, and some have to be drafted.

Under the veil of those curious apothegms are hid those germs of morals which the masters of philosophy have afterwards developed into so many volumes.—Plutarch.

will kill all the flies in a room in a few hours.

Avoid Imitations.

MARKETS.

GRAIN AND PRODUCE.

Wheat—The wheat markets have had an easier tendency during the past week. At the beginning of the week prices in the American speculative markets had quite a break and by Wednesday they touched 3c under the high point of about two weeks ago. Since Wednesday there has been a little better feeling, and some recovery in price, but the week closes at around a decline of 1½c per bushel from a week ago. The market has continued to be wholly influenced by the weather in the winter wheat belt. The beginning of the week was very favorable everywhere, which induced short selling and letting go of long wheat; then on Thursday the weather became showery in some parts, and shorts, especially in the July option, hastened to cover and rallied the market sharply. The delay in harvesting and threshing caused by rains, has a special influence on the July option, as it lessens the quantity of new wheat that might have been available to deliver on July contracts, and causes shorts to be anxious buyers whenever the situation seems adverse to them. The general export trade in actual wheat continues in a normal condition, no unusual activity is seen at any point but a moderate routine business is transacted from day to day. The export demand from Europe is light because the crops in the southern half of Europe are being harvested, and all the European wheat crop is making a good show and will be 80,000,000 larger than last year. This week it is reported that Russia and Roumania are freely offering their new wheat to importing countries at lower prices than American wheat is offering. This tends to keep the export trade quiet at the moment, but eventually America will be called upon for a fair share to help fill European requirements, and this, along with increasing domestic requirements in the States will hold prices well up, after the first rush of the crop to market.

The local market has continued quiet in tone, and trade is on a very limited scale, confined almost entirely to the wheat shipping or recently shipped from country points to terminal elevators. With the decline in outside markets by Wednesday declined 1c from the prices at the close of last week, but since then they have recovered ½c, and at the close of business Friday they stood at 76½c. No. 1 hard; 74¼c, No. 1 northern; and 72¼c No. 2 northern, spot or July delivery, in store, Fort William or Port Arthur.

FLOUR—While local demand is only moderately heavy there is a good export demand for flour, and as prices for wheat are high an advance in flour prices is momentarily expected. In the east the price has already gone up 20c per sack. We quote: Ogilvie's Hungarian, $2.05 per sack of 98 lbs.; Glenora Patent, $1.90; Alberta, $1.75; Manitoba, $1.60; XXXX, $1.25.

MILLFEED — Bran is firm and worth $15 per ton in bulk. Shorts firm at $17 per ton in bulk, delivered, subject to usual trade discounts.

GROUND FEED—We quote: Oat chop, per ton, $28; barley chop, $24; mixed barley and oats, $26; chop screenings, $15.50; oil cake, $30.

OATS—The market for oats is unsettled. Business is quiet and mostly confined to local account. We quote: No. 2 white, 40½c per bushel, for carlots on track here; feed grades, 37 to 38c. At country points farmers are getting 31c to 34c for No. 2 white oats. Street oats are not offering.

BARLEY—All offerings are now being taken for feed at 40c per bushel. The movement is very light.

SPELTZ—Dealers are doing a little business in speltz for feeding purposes at 50c per bushel of 50lbs.

HAY—Demand is fair and the market steady at $7 to $8 per ton for carlots on track here for fresh baled.

POULTRY—The market is quiet. Live chickens bring 70 to 75c per pair, and turkeys are worth 11c per pound, live weight.

BUTTER—Creamery—Receipts are fairly large and prices hold steady at 16½c to 17c per pound for choice creamery, f.o.b., factory

BUTTER—Dairy—Receipts are moderately large, and there is a good demand for choice grades. A number of country shippers are sending in butter which is badly packed, and this reduces the average price considerably. Many of these packages are very dirty and not at all presentable. Some are using lard pails, which makes the butter unfit for table use. Prices range from 10 to 13c per pound, commission basis.

CHEESE—The market is steady and purchases have been made at 8½c per pound. The range of prices is from 8½c to 9c per pound delivered here.

EGGS—A stiff demand for eggs has put the market in a stronger position and prices have been 1½c higher than a week ago, at 12½c per dozen for choice case eggs, delivered here.

DRESSED MEATS—Receipts are improving, and the market is easy. We quote: Beef, city dressed, 7½ to 8½c per lb.; veal, 8 to 9c; mutton, 9c; spring lambs, each, $3.50 to $4 hogs, per pound, 7¾ to 8½c.

THE OGILVIE FLOUR MILLS CO., LTD.

Every Sack of Ogilvie's Hungarian and Glenora Patent

is weighed in the scales of justice: It's never lower in quality than the preceding sack you bought because it's always uniform, and you are sure of satisfactory baking results whenever you use it. ARE YOU BUILDING?

Eddy's impervious sheathing is the best building paper made. It is very much stronger and thicker than any other (tarred or building) paper. It is impervious to wind, keeps out cold, keeps in heat, carries no smell or odor, absorbs no moisture, imparts no taste or flavor to anything to which it comes in contact. It is largely used not only for sheathing houses, but for lining cold storage buildings, refrigerators, dairies, creameries, and all places where the object is to keep an even and uniform temperature, and at the same time avoiding dampness. Lives of millionaires remind us
That we must control the coke
If we want to put a stop
To the smelters and their smoke.

J. E. MILLS, Agent, Fernie.

A TERRIBLE TRAGEDY.

(Continued from first page)

injured woman. She was asked the cause of the shooting, and talked freely, though her language was disconnected and punctuated by moans and grasps of pain.

"My, husband, my brother and I went down town tonight to do some shopping," she said. "We bought some provisions and my husband wanted to purchase me an $18 hat. I would not let him. I thought that price too high for a hat. My brother was angry and said I had better let my husband buy the hat if he felt so inclined. I refused and we came home. My brother has been very mean to me, but my husband was always good. When we reached home a quarrel followed on account of my refusal to let David buy the hat. Then my brother got the revolver and shot me. He shot my husband next and then walked out the door of the room and shot himself. My husband and my brother had never quarreled. The hat was the whole cause of the trouble."

Mrs. Thomas stated that herhusb and is a miner and worked for two years in the coal mines at Frank, Alberta. He came to Seattle about four months ago. Her brother also worked in the coal mines at Frank, but did not come to Seattle until about two weeks ago. She and her husband have been in America for about six years. She has two sisters, Mrs. H. Smith and Mrs. John Unsworth, at McGrath, Alberta. They had not spoken to her since her marriage to Thomas, she said, though she expressed the desire last night to several that they be sent for. The address of her parents she gave as No. 1 Dawles Terrace, York street, Wigan, Lancashire, England.

An investigation by Drs. Carroll and Bories showed that Mrs. Thomas had been shot three times. One bullet struck her over the right nipple and ranged toward the heart ; another struck her spinal column, below the line of the shoulder blades and severed the spinal cord, inducing complete paralysis of the legs and lower part of the body, while the third passed through the fleshy part of her right arm, between the shoulder and the elbow. Her husband was hit once, under the right shoulder blade, and the bullet did not emerge. Lake shot first himself in the mouth, the ball passing through the skull and lodging under the scalp near the central line of the forehead, The second bullet entered his head above the right temple and emerged at the base of the left ear.

An examination of the premises by Deputy Coroner Wiltsie revealed four empty shells in Lake's room, next door to the bedroom, in which the shooting occurred.

The revolver contained two cartridges and an empty shell. One bullet struk the lock of the door and shattered it. The piece of flattened lead was found on the floor by Dr. Bories. The revolver was covered and the floor saturated with the woman,s life blood. Her husband bled internally and her brother but little.

W. N. Stringham, proprietor of the house, heard seven shots. The last three were followed by the sound of a heavy body falling. He slept in a room under the apartments occupied by the principals in the tragedy, and was the first to make an investigation of the shooting. He says that the Thomases and Lake were quiet people, and had never had any troul le.

They stayed at his house when they first came here, four months ago but went away about seven weeks ago and returned about two weeks ago. For sometime Thomas had been carrying a hod for Stringham who is a plasterer by occupation.

For a short while Lake had been employed in doing painting work on the high school building.

Mrs. Thomas gave her own age as 30, that of her husband as 31. and that of her brother as 37. She said she had never had any childem. The woman bemoaned the fate of her husband and said she was sorry she herself had not been instantly killed.

COMMUNICATIONS.

For over four weeks now the Fernie strike is on, and yet none of the parties seems to be inclined towards concessions. We miners having the the law and the always respected custom of mines on our side will keep our motto as long as it will be needfull. But on the other hand all the country is suffering from Fernie mines inactivity. The government's aim when conceding to the coal company the splendid area of coal land they are holding now, was (at least I suppose so) to give a spring to the mining operations in this part of the province. The company purposely provoked the strike, put themselves in the impossibility to supply the market with the indispensible agent of the above said industry, namely the coke. Therefore as long as will last the deadlock here, the work of every mine in the west will be more slow and less productive, consequently the prospective wealth of the country will be reduced. Since the company instead of helping to the material progress of the city of Fernie and all the region in working their mines in a proper and reasonable way, tried all in their power to kill the town, and lessen the value of every property which was not their own, why would not the government take back the princely domain given to them for the purpose of helping to improve the country? Inasmuch as they failed altogether to fulfill their engagements towards the people of Fernie and the whole province, why would not the Fernie miners take hold of the mines and work them on behalf of the government? The operations would then be conducted according to the modern principles, and the profits resulting of the exploitation would be advantageously spent in ameliorations of any kind, needed to make possible the settlement of the best parts of the country. If some people say that such a thing is impossible, I will tell them that in France exists a coal mine worked by syndicated miners, and that it is one of the most producing, most paying and safest of all the continental coal mines, why could not we do ourselves what the French are doing for years? In practical knowledge of our trade we are at least equal to them, all that we are wanting is the spirit of organization and what we have seen here during the last few weeks proves that we are making progress in that direction.

FERNIE MINER

Thinking of the harsh way in which the company is using this poor Jos. Gall, on the only ground that he is trying to start a little store business in Morrissey. I took the liberty to translate for the benefit of your readers a few lines of Les Caracteres of La Aruyere, believing them admirably fitting for the present case, considering the spirit which seems to dominate in the company's direction :

"There must be distresses on real and "movable properties, jails and supplices. "I acknowledge it, but putting apart jus- "tice laws and wants, it is always some- "thing new for me to contemplate what "ferocity some men use towards other "men.

"One sees certain shy animals, male "and females, scattered over the country; "dark lived and sunburnt beings, bound "to the soil they are rummaging and "moving with an invincible pertinacity. "They have like an articulate voice and "when they raise on their feet they show "what seems a human face, in which they "are men. They retire for the night in "dens, where they feed on brown bread, "water and roots, they spare the other "men the trouble of sowing, ploughing "and harvesting and by the way deserve "not to be altogether destitute of this "bread that they have sown."

I will abstain to make myself any application of the above sentences to the present situation, but, I beg of those who will read them, to remember that the state of things so vigorous by pictured by the great French writer, brought on the terrible revolution of 1793, during which so many of the oppressors of the people were sent to the scaffold by the very men they had thought themselves able to keep in slavery for ever.

DID YOU HEAR ABOUT IT

HOW FERNIE DEFEATED LETHBRIDGE AND CRANBROOK.

Lethbridge-Fernie Score 8 to 1. Cranbrook-Fernie Score 6 to 0.—A Big Day for Fernie.

The casual visitor who happened to strike Fernie on Wednesday last would little have thought that our town was the seat of a great strike and that our main industry had been idle for two months. It was the day appointed for the big lacrosse match between Lethbridge and Fernie; also for the playing off of the tie by the juniors of Cranbrook and Fernie, and the people of the town turned out en masse to root for the boys.

In the last match played between Lethbridge and Fernie, which took place in the former town, our boys were defeated by a score of 2 to 5, and if Lethbridge could win the game of the 30th they would carry off the beautiful Levasseur trophy for this season. This was what Fernie lads determined to prevent and no pains were spared to get the team in shape and have none but the best players on. It was felt that the game on Friday last with Frank had been lost owing to the absence of a number of the players and as several of the boys were holidaying out of town they were sent for and the result is that the boys have simply covered themselves with honor, demonstrating their right to pose as the star team of the Crows Nest Pass.

The first game was between Lethbridge and Fernie, the teams lining up shortly after 3 p.m. as follows:—

Lethbridge		Fernie
Myers	Goal	Miller
Stuart	Point	McLean
VanHorne	Cover Point	Beaubier
Ripley	1st Defence	Kastner
Wallace	2nd Defence	Thompson
Scott	3rd Ddfence	Wrigglesworth
Rogerson	Centre	Lafortune
Scott	3rd Home	Herman
Fraser	2nd Home	Flett
Stafford	1st Home	McGuire
McIntosh	Outside Home	Black
Kenny	Inside Home	Reynolds
Brunett	Field Captain	Schram

In the face off Fernie got the ball and passed it quickly along, Beaubier, Flett, McGuire and Black doing some very pretty combination work, but the Leshbridge boys with some splendid checking stopped the rush on their flags and showed that they understood combination work as well as their opponents. For the first fifteen minutes the Fernie boys played very carefully and every man clung to his check like a leitch, the result was the breaking up of dangerous combination work on both sides and neither was able to score. The pace was fast but the ball was kept pretty close to the center of the field. Near the end of the first quarter McLean with a long throw gave the ball to Black and again Flett, McGuire and Reynolds got in some beautiful work, Reynolds putting the ball in the net for the first time.

Again the ball was faced off and Beaubier, Lafortune and Thompson with a combined rush forced it up to the Fernie home, Flett doing the necessary this time.

The Lethbridge boys now felt that they had a hard team to fight and determined to rush matters. Stafford, their Star player, got the ball shortly after the face off and with a most brilliant play succeeded in landing it in the Fernie nets. But after this great effort, something seemed wrong with Lethbridge for try as they might it was impossible to score. Each man on the Fernie team seemed to think the whole game depended on him and played as he never played before. There was not a mistake made. The combination was simply wonderful, and they played all around their opponents. The shooting on the Lethbridge flags was furious and their goal man was kept at his wit's end half the time. At the end of half time the score stood 3-1, Black having added the last one.

In the last half Lethbridge was simply shut out, our boys having an easy thing. In rapid succession they scored five more goals making the score 8-1. Flett was the first, then Black, then Reynolds, again Black, McGuire putting in the last two.

To say that one played better than another would be to misrepresent. Every man did his duty and our town is certainly proud of its lacrosse team.

JUNIOR GAME.

The game between the Cranbrook and Fernie juniors was greatly appreciated by the citizens who turned out to see it. It is surprising what splendid work the little fellows of both towns do. The Fernie lads had the best of their opponents as far as size was concerned, but there are two or three players on the Cranbrook team who are beautiful stick handlers and succeeded in making the match a very interesting one. The Cranbrook boys, however like the Lethbridge team, were not in the game for a minute, for with the exception of the above mentioned players the home team simply kept the ball entirely out of their hands. Cranbrook was unable to score at all, while the Fernie team piled up a score of six.

The teams lined up as follows:—

Cranbrook		Fernie
D. McEachern	Goal	J. Farquharson
Henderson	Point	Kanouse
Finnis	Cover Point	Todhunter
Greer	1st Defence	Dunlop
McEachern	2nd Defence	Kirkpatrick
Murphy	3rd Defence	Smith
Nevin	Centre	Cody
Morris	3rd Home	Farquharson
Sproule	2nd Home	Dunlap
Campbell	1st Home	Lawrence
McConnell	Outside Home	Sunburg
McPeak	Inside Home	Johnson

Milt Kastner acted as field captain for the home team and Tate, of Cranbrook, for the visitors.

Bert Donahue refereed both games and his decisions were fair and just. They were not disputed at any point in the games.

The Fernie brass band was in attendance at both matches and furnished good music.

BIG IRON STRIKE.

Another seam of iron has been unearthed on Sand Creek making 6¼ feet of rich hematite iron. This property was bargained for by some Toronto parties last April, and no doubt they will take up the option. Since the new discovery has been made as the last few feet that has been discovered must add to its value a great deal.

A RAILWAY FURTHER NORTH.

The Canadian Pacific was supposed at one time to mark the northern limit of railroad construction. The Canadian Northern, now in course of construction, will give railway facilities to a country lying far north of the Canadian Pacific, including Saskatchewan and northern Alberta. But it is now considered rash to set any limit. Northward the star of Empire takes its way. The map of the projected Trans-Canada railway shows a line from Port Simpson, on the Pacific, to the St. Lawrence and the Saguenay, touching at Moose Factory, on James Bay. Such a railway would be a strong factor in the development of British Columbia, giving means of communication to the northern part of the province, where they are sorely needed. British Columbia also requires a line running north and south, and giving an all-Canadian route to the Yukon.

The Trans-Canadian will use the Pine or the Peace River Pass, each having much easier gradients than any now in use. It would then run through the famous Peace River district, in Athabasca, the agricultural resources of which have been set forth in evidence given before a parliamentary committee. After this it dips southward, passing through the northeastern part of Saskatchewan and going north to Lake Winnipeg through Keewatin and northern Ontario to Moose Factory. Thence its course is through Quebec to Chicoutimi, on the Saguenay, with alternate lines to Montreal and Quebec. It is intended also to build branches to Winnipeg and Toronto. The promoters hope to carry a very large share of the wheat of western Canada. They expect great things also from the development of the northern portions of Ontario and Quebec. The rivers flowing into James and Hudson's Bays will furnish immense water-powers, which may be utilized for lumbering and manufacturing. The distance would be considerably shorter than those of the Canadian Pacific railway, and the seaports both east and west, would afford accommodation to the largest vessels.—Toronto Globe.

THE END IS IN SIGHT.

NEGOTIATIONS FOR SETTLEMENT OF STRIKE IN PROGRESS.

The Settlement a Compromise—Both Sides Will no Doubt Make Concessions.

Everything goes to show that the big strike which has tied up the Coal Creek collieries for the past month is about over, and it is expected that the men will be back to work before the end of next week.

President Moyer, of the Western Federation of Miners, and Mr. Baker, organizer, have had several interviews with the management of the Company, and while nothing definite has been made public it is understood that General Manager Tonkin has made a proposition to the Union which nearly all the men believe to be fair. As far as can be learned, the gist of the arrangement which Mr. Tonkin proposes is that the men work 8½ hours from lamp station to lamp station with an allowance of half an hour for lunch. The original request was 8½ hours from face to face, with half an hour for lunch.

The presence in town of President Moyer has much to do with bringing the matter to a head. He is a very liberal minded man, and while he thoroughly understands and appreciates the position of the men he also believes that the position taken by Mr. Tonkin is not as blameworthy as some of the local union men believe.

The union men have been building up their strength during the past couple of weeks, and doing their utmost to make the strike effective. The complete organization of the miners and employees of the Crow's Nest Pass Coal Co. at Michel and Morrissey was effected on Sunday last. The union at Michel was increased by over fifty members, and a new one established at Morrissey with forty-five members. The miners at Fernie felt that unless these towns were thoroughly organized they would be beaten in the fight, as the Company was shipping a large amount of coal from both camps.

On Tuesday morning an order came from the Western Federation of Miners, asking the men at Michel to quit work, and on Wednesday not a man turned out.

On Thursday Messrs. Moyer and Baker went to Morrissey to bring matters to a head at that place, but were met by Mr. Stockett who informed them that he thought if they would arrange a meeting with General Manager Tonkin the whole matter could be amicably settled. They returned to Fernie, and a committee of the union was appointed to meet Mr. Tonkin on Friday evening, which they did, and he put the above proposition before them, suggesting that if the arrangement did not meet with the favor of the men after a fair trial it could be changed.

The proposition was laid before the union at 10 o'clock this morning, and from all reports it was favorably received and the executive was instructed to meet the General Manager again and have the agreement signed.

Toronto, July 30.—Elias Rogers, managing director of the Crow's Nest Pass Coal Company, made an interesting statement yesterday concerning the present situation at Fernie. Mr. Rogers had before him a number of articles which had appeared in papers in the west, some of them criticizing the company in connection with the recent strike, and suggesting that the government should have mines opened in competition with the coal company. Mr. Rogers expressed the opinion that the opening of other mines would have no effect in increasing or minimizing strikes and instanced the present great trouble in the anthracite coal regions of Pennsylvania, where strikes against a large number of companies at several hundred different mines had been in progress for nearly three months. There could be no assurance, he added, that an increased number of companies operating in the Crow's Nest would prevent a similar condition of affairs.

The Crow's Nest company, he said, is doing everything that could possibly be done to provide against any possible interruption of the supply of coal requirements of British Columbia within reach of its mines, from any cause whatever

Mr. Rogers explained that the Crow's Nest company had mines at Michel, 24 miles this side of Fernie, where they had been pushing development work for more than a year past. These mines were now in operation and producing about 500 tons per day and the output was increasing rapidly. The company also had opened mines at Morrissey, 10 miles west of Fernie, and coal shipments were being made from that point at a rate of about 150 tons per day. Within a year from now these mines will have reached a stage of development where the closing down of any one mine will not appreciably affect the company's operations, so far as supplying the requirements of British Columbia are concerned.

"This entire agitation," said Mr. Rogers, "appears to have originated from one source, and the people who are following it are either acting from personal motives or are entirely ignorant of the facts. The charge made that the deplorable accident of May 22nd, was due to greed of gain on the part of the company, in not supplying proper appliances, was most unjust and untrue. The company had in their employ, in charge of the mines, for a long time prior to the accident, the most skilled men that could be obtained in British Columbia, and every suggestion that would tend to promote the safety or facilitate the workings of the mines has been adopted. The mine manager, in the inquest, having stated in his evidence that he had never asked for or suggested anything that had not been cheerfully supplied. Evidence had never been considered in this connection The company had put more money into the venture since the first of January, this year, prior to the accident, than the entire profits they had secured since the first opening of the mines. The expenditure on permanent improvements last year alone was over $830,000.

"Referring to the general advantages which had accrued to British Columbia and the country at large, through the operations of the coal company, Mr. Rogers said that the wages alone paid by the company had been $54,580.66 in 1898, $258,211 in 1899, $431,200.58 in 1900, $911,407.15 in 1901, and $494,837.81 has been paid during the first five months of this year.

The large revenue accruing to the government of British Columbia in royalty and taxes was also a very important item. Mr. Rogers said that the company had strictly held to their agreement with the government to restrict their price to $2 per ton for run of mine on cars at the mines. This price was from one to two dollars a ton less than the price obtained from coal at the mines at other points in British Columbia where the mining conditions were no more expensive or difficult than in the Crow's Nest. The enormous sums thus represented could be easily computed. The output of the mines up to May last had been 100,895 tons. In view of this, and after the expenditure of these vast sums in the development of mines, he did not think it possible that any honest minded person understanding the facts would for a moment think of asking the government to break its agreement.

Then referring to the Fernie strike, Mr. Rogers said that after the accident the company had made a change in the system of working that was undoubtedly to the advantage of the miner, as well as tending to promote safety in the mines. This change, however, involved eight hours work per day on the part of the day men, or in other works, eight hours from face to face.

"This," said Mr. Rogers, "although not previously the practice at the mines, I am informed, has been and is the practice at all coal mines in the northwestern states, as well as in Alberta. Personally I have always had the greatest sympathy with the workers, and although I have been hiring men for over 30 years, I have never had a strike in my own business. Upon information in my possession I believe that this trouble would not have occurred but for interference from outside parties and a form of dictation which the company could not afford to permit. It is the company's purpose to make the conditions of labor at these mines as favorable as it is possible to make them, and to make them so every effort will be made to induce the better class of miners who desire to make and save money to come to the district and settle permanently."

Referring to the two carloads of men

(Continued on last page)

A PARISIAN TRAGEDY

MDME. SEMPIS MEETS A HORRIBLE DEATH IN A DOG'S ENCLOSURE.

SHE IS TORN TO DEATH BY TWO FAMISHED GREAT DANES.

A cablegram from Paris says: Madame Edmond Sempis, who before her marriage a year ago was Miss Louise Rutherford, of Brooklyn, has been set upon by two hunger-maddened Great Dane dogs which had been secured to guard her husband's country house at Ennecy Lake, and so terribly injured that she died two hours after the attack. M. Sempis is a prominent business man of Paris His home at Ennecy Lake is isolated, and following a recent attempt by burglars to enter the place, he purchased two powerful Great Danes as guards.

The dogs proved so ferocious that they were confined in an iron enclosure during the daytime for the safety of the family. M. Sempis was advised to starve them, so that when food was given to them they would remember kindly their benefactors. So they had nothing to eat for two days. Madame Sempis did not accompany her husband and their guests, who started for a drive to Aix-le-Baines. She noticed the dogs while she was walking in the yard, and knowing that they had been without food, determined to feed them, as they were apparently quiet. She ordered the cook to prepare a bowl of meal, and carried it to the kennel, the woman accompanying her.

The instant Madame Sempis entered the iron enclosure the Great Danes leaped upon her like angry tigers. They bore her to the ground, and as she vainly sought to defend herself, their teeth sank in her arms and body. Her struggles apparently maddened the animals the more. The coachman heard the screams of Mme. Sempis and the cook. Mme. Sempis begged the man to save her. He ran to the stable to get a pitchfork. When he returned the Great Danes had fearfully torn their victim. The coachman fought the brutes into a corner, and kept them there until the cook summoned the neighbors and carried Mme. Sempis from the enclosure in a dying condition. A few minutes after M. Sempis and his guests returned she succumbed to her injuries, after exchanging a few words with her husband, who is nearly crazed by the tragedy.

NEW C. P. R. OCEAN SERVICE.

The Westminster Gazatte, on Saturday, discussing the new Canadian Pacific railroad service which, it assumes, will unquestionably be carried out, says: "While the new vessels as now proposed will be running within two years, the ultimate scheme involves establishing a new and thoroughly modern port, whose location is yet undetermined, eliminating the St Lawrence passage, and shortening the voyage materially with the view of improving the time of the through trip to the far east two new vessels of equal speed to those of the Atlantic lines will be added to the Pacific fleet, while ultimately 25-knot ships will be added to the service which will be manned by naval reservists and constitute the most effective fleet of commerce destroyers and protectors in the world."

TO HANDLE THE CROP.

Canadian Pacific Expects to Have Fifty-six New Engines in Use.

It is announced from Montreal that the Canadian Pacific has orders placed for nearly 100 new locomotives. So far but a small proportion of the orders has been turned out, but for the handling of this year's wheat crop there will be fifty-six new engines to supplement those already in service. The orders placed since the beginning of the year include ten 10-wheel passenger engines with the Rodgers Works at Schenectady, N. Y., ten compound consolidateed freight with the Kingston works, fifty-four freight and three switching engines with the American Locomotive company, and twenty-four passenger and fifteen switching locomotives at the works in Hochelaga. Those already delivered comprise four passenger engines from the Rodgers Works, and twelve from the Montreal shops. Before the end of September forty-four of the heavy freight and twelve passenger locomotives will be turned out. During the rush for the movement of the wheat crop the passenger locomotives mentioned will be pressed into freight service, making a total of fifty-six new ones for the autumn business.

The inventor of a new process of making milk powder, estimates that if generally adopted throughout Sweden, it would be worth $10,000,000 a year.

GLEANINGS.

Nearly half a million people bathe every year in Utah's Salt lake.

The more than 3,600 national banks of the United States hold $1,013,122 nickels and cents in their cash reserves.

Colored men caught on the streets of Port Tampa, Fla., after 10 o'clock at night without a pass signed by the mayor are sent to jail and fined.

Tashkend is a big city to find in the heart of Turkestan. It has a population of nearly 160,000, of whom perhaps one-fourth may be credited to the Russian quarter and the garrison.

A queer fact about the terrapin of Chesapeake bay is that those on the western shore grow much faster than those on the eastern. The theory is that the western water is less salt.

A novel and interesting sight at Lake Erie harbor is the mammoth car dumping machine in operation. With these machines cars of coal are lifted bodily, emptied into the hold of a vessel and replaced on the tracks in four minutes.

It is said that the little city of Orea, in Sweden, owns and operates a nursery that brings it an annual income of $150,000, a sum that pays all the expenses of the municipality, including free schools for the children and a free telephone system for the people.

The two leading agricultural societies of Great Britain, the Royal Agricultural and the Highland Agricultural, have amalgamated. They will establish a national agricultural examination board and will grant prizes and diplomas to farmers after examination.

The hottest mines in the world are the Comstock. On the lower levels the heat is so great that the men cannot work over 10 or 15 minutes at a time. Every known means of mitigating the heat has been tried in vain. Ice melts before it reaches the bottom of the shafts.

BEE BUZZES.

See now that every colony has a laying queen.

The apiary should always be kept neat and tidy.

If a case of robbing occurs, look at once for the queen.

The colony must be fed if you want to retain drones for queen rearing.

All queens that cannot fly are worthless and may be destroyed or put out of the way as soon as the fact is known.

Yucca brushes for removing bees from the comb are very convenient. They are of soft vegetable fiber and will not irritate the bees.

It should be remembered that although bees sometimes go as far as five or six miles in search of honey, two or three miles may be considered as the limit of profitable gathering.

So far as can be done, bees should be kept breeding until the 1st of September. Unless the season is very dry this can readily be done without extra care unless the queens are worthless.

Toward the close of the honey harvest it is usually not a good plan to keep on adding sections. By contracting the space the last sections will be more surely filled and more quickly capped.

INGALLS' EPIGRAMS.

The purification of politics is an iridescent dream.

The government is always the worst served of all employers.

The golden rule and the Decalogue have no place in an American political campaign.

Government is force. Politics is a battle for supremacy. Parties are the army. The object is success.

It is an error to suppose that to become a politician the citizen must cease to be a scholar or a gentleman.

Suffrage is not a right, but a privilege conferred by law, and its qualification or denial is the prerogative of the state.

The man who cannot take care of his own affairs has no just right to take care of the affairs of others. The pauper ought not to decide the rate of taxation upon incomes and property.

Manhood suffrage is the thing. There are plenty of men who are illiterate, yet good citizens, and lots of fellows who have money and can speak seven or eight languages who are scoundrels.

THE WRITERS.

Amelia E. Barr is the mother of 14 children, has written 32 books, prepared a professor for Princeton college, and at 63 years of age is a picture of superb vitality.

Count Leo Tolstoi's health is much improved, and instead of expecting death almost any day, as was the case with him last spring, his physicians now say he may live ten years to come.

According to Leslie Stephen in the "National Dictionary of Biography," Wordsworth as poet laureate wore the same coat to levees that Samuel Rogers had worn, and the coat passed subsequently to Tennyson when he became poet laureate.

Mrs. Flora Annie Steel, the Anglo-Indian authoress, who came into fame and renown a few years ago by means of her novel, "On the Face of the Waters," is said to be receiving the highest price for her literary work that has ever been paid to a woman author.

CHICAGO CUTLETS.

If Chicago continues to break its own hot weather records, the municipal motto will be changed from "I will" to "I wilt." —Denver Republican.

Chicago missionaries are preaching that we live on the inside of the earth. Chicago pretends to be on the inside of everything.—Indianapolis News.

"The Chicago river is flowing toward St. Louis without visible reluctance," remarks a Chicago paper. The river is probably delighted to get away from Chicago.—St. Louis Republic.

VIOLENT STORM IN RUSSIA.

Several Persons Drowned at Kieff by Inrush of Water in Their Houses.

Fifteen persons were drowned at Kieff, European Russia, on Sunday, by a sudden rush of water into the basements of various houses in the lower portions of the town. A torrential rain storm, accompanied by violent wind and hail, broke over Kieff during the afternoon, and turned the streets into veritable torrents, flooding cellers and drowning occupants before they were able to escape. Large trees were uprooted, and railroad embankments were washed away, necessitating the suspension of traffic. Windows were broken by hail stones, which were the size of hazel nuts. The losses sustained are very heavy.

DIED ON THE TRAIN.

Lawrence Garant Expired Near Ignace En Route East.

Lawrence Garant, of Cranbrook, left for his old home in Carleton Place to die, but he expired on the train on Monday night a few miles west of Ignace. His wife, son and neice accompanied him, and Dr. Gunne, of Rat Portage, was with him when he passed away. The remains were taken to Fort William and placed in a casket for shipment Monday night. The sad party left on the Imperial Limited. Deceased was fifty years of age, and a member of the C. M. B. A., the members of which order were very kind to the widow, while in Fort William, and looked after everything for her.

TEARS GIRL'S SCALP OFF.

Hair Becomes Caught in Carding Mill in Cotton Factory.

Miss Lillie S. Stacey, a young girl about nineteen years of age, employ- in the Stormont mill of the Canadian Colored Cotton mills, Cornwall, was terribly injured Monday afternoon.

She was employed in the carding department and was fiding her hair preparatory to going home, when it was caught in the machinery and drawn in with the result that her entire scalp was torn off. She was removed to the Cornwall hospital. Doctors are hopeful of her recovery.

MURDERS HIS WIFE.

Halifax Man Kills His Bride of Four Weeks—Glories in the Crime.

A cold blooded murder took place at Halifax, on Monday evening on one of the upper streets of the city, when George W. Cook, a painter, seized a razor and almost completely severed the head of his wife, a woman to whom he was married four weeks ago by Rev. W. J. Armitage of that city.

The man was arrested, and at the police station he said: "Is she dead?"

When answered that she was and that her body was in the morgue, he answered: "That's good; I'm glad I did it."

LEFT FOR EUROPE.

Generals Botha and De Larey Start From Pretoria.

Generals Botha and Delarey, with their secretaries, left Pretoria Monday for Cape Town en route for Europe. General DeWet will accompany them on the journey to the coast. The date of their return from Europe has not been definitely fixed.

COST OF CORONATION.

The British government, in the supplementary estimates, asks for £25,000 additional for the expenses of the coronation caused by the postponement This brings the total up to £125,000 ($625,000).

On some of the Belgian railroads smoking compartments are to be provided exclusively for women.

The Irish census returns show that 3,000,000 people have emigrated from Ireland in the past ten years.

The police authorities have asked that the Canadian coronation arch in London be removed, as it obstructs traffic.

Ras Makonnen is said to be the chief adviser of King Menelek of Abyssinia. A child can see that this is a thin disguise for Ross McKinnon. and that Abyssinia is really governed by a Scotchman.

A man who has been conducting a large general store business in Wetaskiwin, Alta., under the name of Lawrence, has been arrested at the instigation of United States authorities on the charge of committing frauds involving over $100,000 at Durane, Wis. He is in jail at Calgary awaiting preliminary proceedings.

THE FAIR IS OPENED

SIXTEEN THOUSAND ATTEND THE WINNIPEG FAIR ON THE FIRST DAY.

REPRESENTATIXE GATHERING OF PROMINENT MEN AT THE LUNCHEON.

Winnipeg, July 21.—A clear, cloudless morning heralded the opening of Winnipeg's Industrial exhibition today.

At 10 o'clock this morning the exhibition was formally opened to the public, but long before that hour the turnstiles began to play their merry tune. By noon many hundreds had paid admission.

The big event of the day was the director's luncheon. Sir Daniel McMillan, lieutenant-governor of the province, declared the exhibition formally opened. Twenty others of the leading citizens of the province, members of the House of Commons, Senate, the local legislature and the city council, spoke on this occasion. The gathering was the most representative one of Western Canada for a long time.

The total attendance for the day was 16,000, a record number for the first day of the exhibition. Nine thousand five hundred of these were children. As it was Children's day the school children of the city were admitted free to the grounds.

The list of judges is as follows:

Heavy horses—E. W. Charlton, of Duncrief, Ont.

Light horses—Dr. Quinn, Brampton, Ont.

DISASTER ON THE ELBE.

German Excursion Steamer Cut in Two and Sunk by a Tug.

The steamship Primus, of Hamburg, with 185 passengers on board, was cut in two and sunk by the tug Hansa on the River Elbe on the 21st July.

About 50 persons were drowned.

The Primus was an excursion steamer from Buxtehude (province of Hanover, Prussia). The disaster occurred between Blankenese and Nienstedten. Among the passengers were the members of the Eilbeck Male Choral society. At the time of the accident, the Primus was crossing the river channel near Blankenese, from the southern fairway. According to witnesses on board the Hansa the movement was made too precipitately. The Primus struck the tug's engine room, and the Hansa endeavored to push her ashore, but the tug grounded soon, and the ships parted. The Primus then sank.

STARVING ON THE PLAINS.

A Man Found in a Pitiable Condition a Few Miles From Calgary.

A few days ago a man was found on the trail along Nose Creek, about fifteen miles north of Calgary, by two boys. The man was without boots and his clothes were in a very bad condition. It had been raining, and he had taken off his underclothing to shield him from the rain. He was famished and said he had been without food for five days. He was apparently insane and could not tell his name, but said that he thought he had come from Vancouver and was on his way to Bowmanville. The Mounted Police went out and fetched the man in. He is in a very bad condition physically.

NO MORE JAILYARD HANGINGS.

Officials Favor a Permanent Scaffold in the Jail Proper.

Dr. Chamberlain, Inspector of Prisons, had a consultation with Sheriff Mowat, Governor Vanzant and Radcliffe, the public executioner, in the jailyard after the hanging of Rice, and it may be, as a result, that no future hanging in Toronto will take place in the jailyard. The officials were impressed with a suggestion that it would be better to have a stationary scaffold built into one of the corners of the jail and have it closed in and the entrance to it made from the inside. That would save a prisoner about to be hanged from the ordeal of passing in front of the gaze of witnesses, and also prevent inmates of the jail from viewing the execution from the windows. It would also provide for a more staple scaffold than the temporary ones now used and everything about it would be obscured from the view of any but the ones directly concerned.—Toronto Globe.

MAUD'S MISTAKE.

Victor Murdoch, in the Wichita Eagle, turns the crank a few rounds and produces this tuneful Madrigal:

Maud Muller on a summer's day
(Maud you see was a city girl,
Trying the rural life a whirl.)
She covered a box in tinsel gay,
Lined it snugly with new mown hay,
Filled it nicely with eggs, and then
Started to look for a likely hen.
Out of the flock selected one,
And then thought that her work was done
It would have been, but this stubborn hen
Stood up and cakled "Ka-doot!" and then.
Maud Muller came, and in hurt surprise,
Looked coldly into the creature's
Then tied its legs to the box, "You bet
I know how to make you set."
But still it stood, and worse and worse
Shrieked forth its wrongs to the universe,
Kicked over the box with tinsel gay,
And ignominiously flapped away.
Then a bad boy over the barnyard fence,
Tee-heed, "Say Maud there's a difference
'Tween hens, you know, and it is that
One says 'Ka-doot!' and one 'Ka-dat!'
Then Maud recalled that the ugly brute
She tried to set had said 'Ka-doot!'
And ever since that historic day
She blushes in an embarrassed way
To think of the bobble she made once when
She tried to set a gentleman hen.

GUILTY OF FORGERY.

Chas. McKinley, of Ayr, Ont., pleaded guilty to forging promissory notes and orders for a number of firms for which he acted as agent, and was remanded for sentence.

SCALP TORN OFF.

Lily Stacey, a young girl employed in the Stormont cotton mill, Cornwall, was caught in the machinery and had her scalp torn off.

McLean's store at London, Ont., was damaged $20,000 by fire.

The Manitoba Normal school will be erected in St. Bonafice.

Cardinal Ledochowski, perfect of the Propaganda, Rome, is dead.

W. B. Beach, a commercial traveller, was drowned in Lake Simcoe.

The C. M. R. contingent under Col. Evans arrived at Halifax.

Governor Ross, of Yukon, is still unable to speak, but is resting easily.

The Canadian Northern has taken over the work on the new elevator at Port Arthur.

Ontario hay is in bad shape, owing to wet weather.

Moose Factory, on Hudson's Bay, held a coronation celebration on the day fixed for that grand event. There are advantages in living beyond the telegraph limits.

A service of electric omnibuses is about to be inaugurated in Copenhagen.

The popularity of the snail as an article of food is not confined to Paris, but extends throughout Southern Europe, and some parts of Africa.

Out of the population of 180,000 in Hawaii nearly 90,000 are Asiatic, 60,000 being Japanese, and 30,000 Chinese. There are also several thousand Porto Ricans.

FERNIE FREE PRESS.

FERNIE, B.C.

Don't let your heart grow cold, and you may carry cheerfulness and love with you into the teens of your second century, if you can last so long.

There never was, and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto, have given to the public their superior Quinine Wine at the usual rate, and, gauged by the opinion of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

Louis LVI. was never better pleased than when seated in front of a huge meat pie. Pork pie was his preference. When imprisoned in the temple, his bitterest complaints were with regard to food that was furnished him.

Minard's Liniment for Rheumatism.

The Emperor Charles V. was a most abominable glutton, and was fond of anything he could chew and swallow. He finally died of a surfeit caused by overeating. It is believed by physicians that his appetite was morbid and diseased.

Messrs. C. C. Richards & Co.

Dear Sirs,—While in the country last summer I was badly bitten by mosquitoes—so badly that I thought I would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and I did so. The effect was more than I expected—a few applications completely curing the irritation, preventing the bites from becoming sore. MINARD'S LINIMENT is also a good article to keep off the mosquitoes.

Yours truly,
W. A. OKE.
Harbor Grace, Nfld, Jan. 8, 1898.

Travellers change their guineas, not their characters.

Sin has many tools, but a lie is a handle which fits them all.

Put not your trust in money, but put your money in trust.

Some persons have periodical attacks of Canadian cholera, dysentery or diarrhea, and have to use great precautions to avoid the disease. Change of water, cooking and green fruit is sure to bring on the attacks. To such persons we would recommend Dr. J. D. Kellogg's Dysentery Cordial as being the best medicine in the market for all summer complaints. If a few drops are taken in water when the symptoms are noticed no further trouble will be experienced.

With most men life is like backgammon—half skill and half luck.

Faith always implies the disbelief of a lesser fact in favor of a greater.

Minard's Liniment Cures LaGrippe.

Everybody likes and respects self-made men. It is a great deal better to be made in that way than not to be made at all.

A billboard may help to swell the actor's head, but a board bill is quite another story.

A wooden leg is an amendment to the constitution.

In the game of life the one-armed man plays a lone hand.

A man never knows whether a woman's hat is on straight or crooked.

Some men are so busy looking for a position that they have no time to work.

Minard's Liniment is best Hair Restorer.

A man may be able to fool himself as to his importance, but it is difficult to fool his neighbors.

That man who says he never makes a mistake probably doesn't know one when he sees it.

The average wife imagines her husband would have remained a bachelor if he had not been fortunate enough to meet her.

Casey's Truism.

Casey—'Tis thot. If ye wa-ant to keep yer head above wather these days, ye ca-ant let th' grass grow under yere feet. Misther Dinnis.—Detroit Free Press.

A RAILWAY MAN.

EXTRAORDINARY UNPLEASANT SYMPTOMS OF KIDNEY TROUBLE IN THIS CASE.

Tortured by all Kinds of Pains and Aches he Tries Everything, but Fails to Find Relief Till a Friend Advises Him to Use Dodd's Kidney Pills—They Have Made a Well Man of Him and he is Grateful.

Ottawa, Ont., July 28.—(Special.)—Frank Chartrand, a railway man, whose home is 130 Little Chaudiere Street, has acknowledged that Dodd's Kidney Pills have done more for him than anything else in the world has ever done. He says: "I suffered with backache and was always drowsy and had a very heavy feeling in my limbs.

"I had frequent severe headaches and more times very sharp pains in the top of my head, which gave me much annoyance in my work.

"My fingers would cramp and I would have an uneasiness in my legs and occasional pains in the loins.

"I was dizzy in spells and short of breath. If I ate a hearty meal I would have a pain in my left side. My appetite would sometimes be very good and sometimes I couldn't eat anything.

I had a constant soreness and tenderness over the spine and tired feeling in the region of my Kidneys.

"I suffered quite a little with a dragging heavy feeling across the loins.

"Dodd's Kidney Pills were recommended to me by a friend of mine who had been cured, and I began to use them.

"Almost from the start I began to feel the wonderful improvement, which continued as the treatment proceeded, till the unpleasant symptoms had on one entirely disappeared.

"Dodds Kidney Pills have worked a wonderful cure in my case and I cannot speak too highly of this great and good remedy."

What Dodd's Kidney Pills have done for Mr. Chartrand they have done for thousands of others, and they'll do the same for you if you give them a chance.

There are many railway men in Canada today who find Dodd's Kidney Pills indispensible. They are the railway man's surest and best friend.

The constant vibration on trains and engines is very hard on the kidneys, and Dodd's Kidney Pills make these organs well and able to resist disease.

The scientific study of man is the most difficult of all branches of knowledge.

Controversy equalizes fools and wise men in the same way—and the fools know it.

Fever and Ague and Bilious Derangements are positively cured by the use of Parmelee's Pills. They not only cleanse the stomach and bowels from all bilious matter, but they open the excretory vessels, causing them to pour copious effusions from the blood into the bowels, after which the corrupted mass is thrown out by the natural passage of the body. They are used as a general family medicine with the best results.

A person is always startled when he hears himself called old for the first time.

You may set it down as a truth which admits of few exceptions that those who ask your opinion really want your praise.

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal. 14

When a strong brain is weighed with a true heart it seems like balancing a bubble against a wedge of gold.

If some knockers were able to make money as easily as they make trouble their wealth would soon become burdensome.

Minard's Liniment is the best.

MARKET REVIEW.

(Compiled from The Commercial)

GRAIN AND PRODUCE.

The local market has been quiet but firm all week, with a very small business doing. In the fore part of the week the feeling was somewhat stronger. While buyers were scarce holders were not disposed to reduce prices in order to sell, and on Wednesday No. 1 hard was worth 76¾c, 1 northern 75c and 2 northern 72¾c spot or July delivery, in store Fort William. With the easier markets outside the feeling here is easier too, and at the end of the week prices were practically the same as they were a week ago, viz., 1 hard 76½c, 1 northern 74½c, and 2 northern 72½c in store Fort William spot, July or first half August delivery.

FLOUR—Demand is light and the market is unchanged as follows: Ogilvie's Hungarian, $2.05 per sack of 98 lbs.; Glenora Patent, $1.90; Alberta, $1.75; Manitoba, $1.60; XXXX, $1.25.

MILLFEED — Bran is firm and worth $15 per ton in bulk. Shorts firm at $17 per ton in bulk, delivered, subject to usual trade discounts.

GROUND FEED—We quote. Oat chop, per ton, $28; barley chop, $24; mixed barley and oats, $26; chop screenings, $15.50; oil cake, $30.

OATS—The market for oats is unsettled. Business is quiet and mostly confined to local account. We quote: No. 2 white, 40½c per bushel, for carlots on track here; feed grades, 37 to 38c. At country points farmers are getting 31c to 34c for No. 2 white oats. Street oats are not offering.

BARLEY—All offerings are now being taken for feed at 40c per bushel. The movement is very light.

SPELTZ—Dealers are doing a little business in speltz for feeding purposes at 50c per bushel of 50lbs.

HAY—Demand is fair and the market steady at $7 to $8 per ton for carlots on track here for fresh baled.

ROLLED OATS—Milling companies report their prices unchanged as follows: 80lb. sacks, $2.20; 40lb. sacks are worth $2.25; 20s, $2.30; and 8s, $2.60 with cover. Twolb. packages, $3.60 without case. Granulated and standard oatmeal is unchanged at $2.75 per 98lb. sack.

POULTRY—The market is quiet. Live chickens bring 70 to 75c per pair, and turkeys are worth 11c per pound, live weight.

BUTTER—Creamery—Receipts are fairly large and prices hold steady at 16½c to 17c per pound for choice creamery, f.o.b., factory

BUTTER—Dairy—Dealers are offering as high as 13c per pound, commission basis, for choice table butter in boxes or tubs, and from that figure the market ranges down to 10c for low grades.

CHEESE—The market is steady and purchases have been made at 8½c per pound. The range of prices is from 8½c to 9c per pound delivered here.

EGGS—Receipts are moderate, and the market holds at 13c per dozen for choice case eggs delivered in Winnipeg.

DRESSED MEATS—Receipts are improving, and the market is easy. We quote: Beef, city dressed, 7½ to 8½c per lb.; veal, 8 to 9c; mutton, 9c; spring lambs, each, $3.50 to $4 hogs, per pound, 7¾ to 8½c.

HIDES—No. 1 city hides, 6½c; No. 2 5½c; No. 3, 4½c. Kips and calf the same price as hides; deakins, 25 to 40c; slunks, 10 to 15c; horschides 50c to $1.

WOOL—Prices range from 6 to 6½c per pound.

SENECA ROOT—The top price is now 40c per pound for good clean root.

LIVE STOCK.

CATTLE—The range cattle are now in condition, and shipping for export is commencing. There is a good demand for export cattle, and prices are high, consequently we may expect to see an active movement from now on. There is also a good demand from local buthers for beef cattle. Choice export cattle are worth 4¾c per pound off cars at Winnipeg, and butchers' grades from 3¾ to 4½c.

SHEEP—Receipts are more liberal, and prices range from 4 to 4½c per pound, off cars, here. Lambs are worth 3½ to 4c.

HOGS—Live hogs are coming in freely, and the market is easy at 6½c per pound for best packing weights, off cars, here.

MILCH COWS—Cows are scarce. Good milkers readily bring $45 in this market, the range being from $35 to $45 each.

HORSES—There is a steady demand for general purpose horses, and as these are scarce, prices are high.

The elevator capacity of Western Canada is 4,000,000 bushels greater than last year.

The C. N. R. have decided to increase the capacity of their tank system of elevators at Port Arthur, from 1,600,000 to 2,000,000 bushels.

Oil has been discovered in Jamaica and the property is being developed by Canadian capital.

In Flour Buying

It's an old saying that it's easy to give advice, but good advice carefully followed has brought otherwise unattainable satisfaction to thousands.

Try this and see if it don't bring it to you: Use OGILVIE'S HUNGARIAN FLOUR and secure all that's good in the best No. 1 hard wheat, and baking days that are as devoid of failures as the changing from night to day.

FERNIE, BRITISH COLUMBIA.

SATURDAY, AUGUST 2. 1902.

MR. ROGER'S STATEMENT.

THE statement which Elias Rogers has seen fit to make to the press of Toronto is a remarkable one. If it is to be accepted one must believe that Mr. Rogers knows less about the business of the coal company than the man in the street. It is obvious, however, that the statement of Mr. Rogers is intended for home consumption only, and the news agencies have defeated its purpose by scattering it broadcast throughout the west, where the facts are much better known than in the homes of the men who have money invested in the collier s at Coal Creek, at Michel and at Morrissey.

It will doubtless be interesting to the miners at these collieries to learn, from Mr. Rogers in Toronto, that the policy of the coal company is and has been to make the conditions of labor in its mines as desira le as possible, and to throw out such safe guards as may be necessary to prevent the encroachment of greed for profits.

The absurdity of the statement of Mr. Rogers is too apparent to the miners of Fernie, of Michel, and of Morrissey to merit serious consideration. There is, however, the statement of Mr. Rogers that the men who were recently imported were not intended for the Coal Creek mines, that they were informed of the conditions obtaining there, and that they were engaged for the collieries at Michel and Morrissey. Against this there are the statements of the men themselves which do not agree in any essential particular with the version Mr. Rogers has seen fit to issue to the people of Toronto.

As to the fuel supply, Mr. Rogers in his interview is credited with saying that the strike at Fernie is not interfering with the smelting industry of this country and that there is not a smelter closed down for want of fuel by reason of the Fernie trouble. This statement is made in the face of the fact that the Greenwood smelter was closed down for this reason, and is likely to remain closed down for some time to come. Also in face of the fact that the smelter at Boundary Falls has been forced out of blast for the same reason and is still idle, and that only this week the big smelter of the Le Roi mine at Northport has been forced to blow out.

TRACEY IN EAST WASHINGTON.

Spokane, Aug. 1—Harry Tracey, the desperado, is now in eastern Washington, unwounded and in good health, armed with four guns and two hundred rounds of ammunition, proviisons for five days and equipped with two horses. Tracey crossed the Columbia river early yesterday morning and is now supposed to be headed towards the Idaho line. Tracy declared he wanted to hold up a bank or rob an express car. He says that he had promised to give the sum of $5,000 within one year to the parties who helped him escape from the Oregon penitentiary. He is making his way to the Hole in the Wall country, in Wyoming, when there he declares he will be chief among thieves and thinks he will be safe.

ADDITIONAL LOCALS.

Ross. Tate, of Cranbrook was in town several days this week.

J. F. Armstrong, Government Agent, was in town yesterday.

C. P. Hill, who has been in town for the past week, left yesterday for Montreal.

S. W. Flowers, of Bellvae, Cal., was in town several days this week renewing old acquaintances.

H. W. Barnes has returned from California, where he has been spending a month's holidays.

D. M. Crowley intends to start on a lecturing tour in a few days. He will go as far as Montreal.

N. C. Douglas is selling out his stock of general mercandise. He intends to locate at Cowley, Alberta

Dr. Higgins is moving his office into the rooms over P. Burns & Co's. Dr. Bonnell will occupy the old stand.

Mrs John Moe, wife of the day operator at the station, arrived in town from Montreal last week. She was accompanied by her sister, Miss Nelson.

Several milch cows have died during the past week from poisoning. The animals belonged to A. K. Farquharson, Dobson & Willingham and A. Beck.

Mr. T. C. Thompson and Dr. Bonnell had an excellent day's sport at Elko on Thursday. They caught sixty-nine beautiful trout, some of them weighing three pounds.

Mrs. C. J. Digby received a telegram Tuesday morning from her sister, Mrs. Jas. Daye, of New London, Conn., informing her of the sudden death of her mother, Mrs. Colin Campbell, of Sherbrook, Que.

The Young Men's Bible Class of Christ Church having undertaken to attend to the graves of those who have no friends in this country, Mr. E. Neale would be pleased to receive plants and flowers for use on the same.

The Cranbrook and Fernie Juniors were entertained by the Empire Boarding House after the game on Wednesday night. A very pleasant evening was spent. A flash light photograph of the company was taken.

This is a year of disaster. They have drouth in the western states, floods in the Mississippi valley, strikes in the eastern states, high water in the wheat districts of Manitoba and hell in British Columbia.—Cranbrook Herald.

The following notice has been posted up in the post office by a person of a humorous state of mind:—"Notice is hereby given that time cheques will be given out at the Granby Smelter to-night and all men employed at the coke ovens since Aug. 1st, will be paid off."

The statement made by the Nelson News and reprinted in the FREE PRESS last week, to the effect that Mr Baker, organizer for the Western Federation of Miners, had been ordered off the streets of Morrissey, was not correct, and is contradicted by members of the local union

Customs collections made at the outport of Fernie, B.C., for month of July, 1902:

Value of Imports, Dutiable	$22,256.00
Free	1,916.00
Total	$24,172.00
Duty collected	$5,422.23

Inland Revenel collections for month of July amounted to $907.70.

Rev. J. G. Shearer, B. A., secretary of Lord's Day Alliance of Canada, will visit Fernie on Aug. 10th. He will occupy the pulpit in the Methodist church Sunday morning, and the Presbyterian church in the evening. At the close of the evening service he will address a rally of all interested in the preservation of the Sabbath, taking as his subject: "The Battle for the Toiler's Sabbath, as Against Corporation Greed and Worldly Pleasure Seeking." See further announcements next week.

The suit of Joseph Gall, of Morrissey, against Walter Wardrop, contractor of the same place, for damages for the destruction of a bridge which the plaintiff had erected across Morrissey creek to connect his store with the new town of Morrissey, came up on Monday evening before Justice of the Peace Trites. Several witnesses were called on both sides. Mr. Stocket stated that the bridge was a nuisance and that he had ordered its removal. He had authority both from the Coal Company and the B. C. Southern to have all squatters removed and he believed himself to have acted within the authority in having the bridge removed. Gall valued the bridge at $175, but Wardrof said that he would build any number of them at $5 each. He admitted removing the bridge and said he had acted on instructions of Manager Martin in doing so. J. P. Trites in summing up the case said he believed that Wardrop had taken the law in his own hands and fined Wardrof $20 and costs or two months in Nelson jail, besides awarding Gall $20 damages. Mr. Herchmer gave notice of appeal.

From far off Australia comes the news of another terrible colliery disaster. The news was recived yesterday in a despatch from Sydney which states:—"An explosion resulting in heavy loss of life has occurred at the Mount Kimbla colliery, at Woollongong, a point 40 miles from here. Twenty seven bodies have been recovered. The buildings at themouth of the pit were wrecked. One hunderd and forty-nine workers were rescued, but a hunderd are are still entombed. It is feared their release is hopless. A portion of the colliery is on fire.

On Friday evening next at Princess Hall the Empire Entertainment company (Mr. D. M. Crowley, manager) will present a novel entertainment, instructive and amusing, also intensely local. Fifty scenes of the recent disaster in the islands of Martinique and St. Vincent, and the great valcanoes of the world and descriptive lecture will be the first part. The programme will include patriotic songs, The Holy City, Killarney and selections by Fernie's most talented lady and gentlemen vocalists. A ten minutes talk by Mr. Crowley in corporate monopolies in general, should be instructive. The concluding part will be views of the town of Fernie, its scenery and churches, school, hospital, business houses and scenes of the recent calamity. In all 50 views of Fernie. The finale will be a screaming farce entitled "A Trip to Morrissey."

LOCAL AND GENERAL.

Dr. McSorley, of Michel, was in town on Wednesday.

Rev. A. Dunn, of Elko, was in town on Tuesday.

Mrs. J. Telfer and two children left Thursday morning for a visit to Nelson.

Jas. Miller returned on Wednesday from a trip to the Industrial Fair at Winnipeg.

Messrs. T. and H. Wilkes returned on Wednesday from a two weeks' visit in Winnipeg.

It is expected that the Oddfellows of Fernie, Moyie and Cranbrook will hold an excursion this month.

The Frank Lacrosse boys wish to publicly thank the citizens of Fernie for the treatment afforded them while in town on the 25th.

Of the forty-one men who came from Priceburg to Michel to work for the Crow's Nest Pass Coal Co. only about a half dozen remained at Michel.

Saturday, Aug. 9th, has been proclaimed a public holiday throughout the Dominion. It is hardly likely that a second postponment of the King's coronation will take place.

The subject discussed next Sunday morning in the Baptist church will be:—"Result of being filled with the Holy Spirit." Evening subject:—"The Devil in Man. What he is and What he Does."

Mr. J. H. Tonkin returned from the east on Sunday last. He was accompanied by his family. They have moved into the large residence in the park, which has recently been fitted up in a very beautiful manner.

Another attempt is being made to form an orchestra in Fernie. It will be made up of the following musicians:-L. Staebler, pianist; K. Whimster, first violin; F. Wilkes, second violin; T. Mazzonobile, coractist, and G. Malone, trombone.

New developments in the Lake murder and suicide case reveal the fact that the woman claiming to be Mrs. Thomas, and sister of Lake, was in reality the wife of Lake, she having eloped with Thomas from Frank. Lake, the wronged husband, had followed the guilty couple to Seattle to take summary vengeance.

J. L. McIntyre while engaged in a practice game of lacrosse had the misfortune to hurt his right hand so severely that he is unable to work. The nail on the thumb was completely torn off. Jack was to have played on the home team in the match with Lethbridge, but owing to the accident was prevented.

The baseball match between Hosmer and Fernie on Saturday evening last demonstrated the fact that our ball team is in a lamentable condition. While they won the match, the score standing 6-7 with an inning to spare, the play was so poor that it is safe to say they would be an easy lark for even the Boston Bloomers.

On Monday a fishing party consisting of several ladies and gentlemen from Calgary and Fernie spent a good time along the Elk river bank, several catches were made. Some of the experts came to the conclusion there were large numbers of fish in the Elk. Snap shots were easier caught than trout owing to high winds and bright sun, some times the sun being so hot that the whole party had to retire into the shade.

On Thursday last the young people of Christ church met at Mrs. Todhunter's to organize a Junior Guild, in connection with the above church. A very successful meeting was held, officers were elected as follows:—Miss Wilson, pres.; Miss Lawrance, vice.-pres.; Miss Ryan, Sec.; Miss Gobbet, treas. Any of the homeless orphans who have any darning to do will bestow a favour by sending them to the Guild room (Mrs. Todhunter) where they can be darned at five cents per p air

A prominent young man with an hitherto unblemished reputation was up in the police court this week charged with obtaining money under false pretences. It appears that the young man wished to borrow money enough from his employer to get out of town and forged his father's name to a couple of telegrams misleading his employer with the information contained therein. He confessed his guilt and was sent up to Nelson for trial.

The office employees of the Crow's Nest Pass Coal Co. yesterday learned what hard manual labor is. The whole force, with two or three exception, were out cleaning up and loading what coke was left in the yards when the strikers went out. The boys seemed to enjoy the work, and say they can easily discount the Slav crew shovelling coke, but they seriously object to being made the victims of the camera fiend. J. Williams and H. Hebeinstreit, we understand, were the only two men in the office who absolutnly refused to do the work. Nearly all the strikers look upon the matter as a huge joke.

Frank is to have a bank in the near future.

Miss Digby returned on Wednesday from visiting friends in Lethbridge.

A large crowd of picnicers visited Elko on Thursday of this week.

Mr C. W. Laidley returned Monday evening from a three weeks visit to the coast.

W. W Tuttle is having a stone foundation put under the rear portion of the Royal this week.

Thirty men from Pennsylvania passed through Fernie on Sunday on their way to work in the coal mines at Morrissey.

Wm. Bleasdell returned from Macleod, where he has been rusticating for the past month. He is much improved in health.

Gas is said to exist in such qnantities in No. 2 mine that a safety lamp will not burn anywhere near the mouth of the tunnel.

The water main to the hospital is being enlarged and the pipe will be extended to the new houses at the rear of the hospital.

The trick bicycle rider, who was here several weeks ago, paid Fernie a visit again this week and gave a couple of performances on the recreation grounds.

A large number of berry pickers were out this week, but the season is a little early yet and no great amount of success attended their labors.

Mr. and Mrs. Hutchison and family and Mr. and Mrs. Clark and family leave Sunday morning for a weeks holiday at Elko.

Koolgardie Smith is out with a challenge to meet all comers in a shooting match live birds, for the championship of British Columbia and a wager off $500 a side.

The new townsite belonging to Foss & McDonnell is being surveyed this week. The townsite is located on the west side of Elk river, near the junction of the C P. R. and the Morrissey spur.

Cranbrook lacrosse team has apparently quit playing for the season, but a first-class match will be played here on the 9th of August, the Medicine Hat team having promised to be here on that date.—Lethbridge News.

The trouble with the Fraser river salmon fishermen was finially settled, the Japanese consul persuading his fellow-countrymen to accept the price offered by the canners and to go fishing. The Japs were the last to hold out.

Considerable trouble has been experienced at Morrissey on the new spur. The line has so much of a grade that it is impossible to prevent runaways, and the consequence is that every day or two there are a number of cars badly damaged.

The services at Christ Church, Fernie, to-morrow will be held as follows:—Matins and Holy Communion 11 o'clock, Sunday School and Young Men's Bible class at 2:30 p.m., Evensong at 7:30. The Vicar will officiate. Collection in aid of church expenses.

The new tunnel at the Loop is not considered as safe as it might be. The men who were employed on its construction claim that the entire mountain side is slowly, but surely slipping down into the valley. This is a serious condition of affairs, if true, and should be looked into.

The visitors to Winnipeg report an excellent show, first-class attractions and a big crowd, but many were disappointed with the failure to run the big free-for-all race, which did not come off, owing to a disagreement regarding the ownership of some of the horses entered for the event.

By mutual consent the litigation pending at the coast between the Great Northern and the Kettle Valley lines has been withdrawn, both parties having agreed to abide by the decision of the railway committee of the privy council, Ottawa. The railway committee has adjourned until October.

At Johnstown, Pa., the Coal Company in charge of the mines in which the great disaster took place a few days ago gave $1,000.00 to each of the sorrowing families of the victums of the disaster. Three hundred dollars, or probably a little more, for the relatives of each victum is all the money that has yet been raised for the victims of the Fernie disaster.

About a dozen of the Fernie miners went down to Morrissey on Sunday last and organized the miners of that town. The new union has a membership of nearly fifty. The men complain bitterly of the conduct of Martin, the Morrissey mine manager. He did all in his power to prevent the organization being formed, putting as many men as possible to work at the time appointed for the meeting, and tearing down all the notices of meeting which the men had put up.

Hazelwood's ice cream at Cuthbert's.

Ask for British Lion or Mainland cigar For sale at all first-class places. Union made. Manufactured by Wm. Tietjan, Vancouver.. x

A debating society is to be commenced in the Common Hall of the Empire House on Tuesday evening next. Subjects of all kinds to be discussed, a hearty invitation is extended to all who are interested in the forward movement.

The Empire House is conducted on the principles of "Home." It is open all hours and any young men are welcome. There is a reading room, smoking room and all things which tend to make one feel at home. Board and Room at a reasonable rate. x

Garnet McLean would like the men of Fernie to know that he had not the slightest idea of the position of affairs at the coke ovens when he commenced to work, but on finding out he quit at once, not being willing to scab on those who were on strike.—com.

Baptist church, Victoria Ave., Lord's Day services: Morning service at 11, Sunday school at 2:30 p.m., Evening service at 7:30. Wednesday evening at 8 o'clock, prayer and bible study. Thursday evening at 8 o'clock, B. Y. P. U. Rev. D. Holford, B.D., pastor. All these services are open to the public and a cordial invitation is extended all to be present.

Rugs In this department it is worth your while to visit even should you not buy. Such a grand collection never shown in the west.

THE LONDON AND LIVERPOOL,

Throwing on Paint

by the bucketful will do more towards enriching the paint man than protecting the surface covered.

A moderate quantity of really good paint will go much further than the poor stuff. It is not necessary to lay it on so thickly, and good paint does not crack, chip, peel or scale. Our Paints are Good Paints, and will resist sun, storm and time as few other kinds will.

House Paint *Buggy Paint*
Floor Paint *Enamel Paint*
Varnish Stain

To Hook the Finest

you need the finest tackle. All very well for poets to sing of the bent pin on the end of a string. That won't catch anything better than bullheads.

OUR FISHING TACKLE

is made for sportsmen, but not necessarily rich ones. We sell excellent goods at very small prices. Here's a sample:—

Three piece bamboo rod fitted with reel, 50 feet fine line, one half dozen gut hooks, all for $2.00. Other things just as good.

J. D. QUAIL..

Hardware. Furniture.

Important Notice!

Why wear dirty, creased and wrinkled clothes?

when it will cost only the insignificant sum of $3 per month to keep them in the smartest condition possible. I will send for your clothing, and return same to you looking almost as well as when they were purchased. Those wishing to grasp this great opportunity should call at once and leave their names with me. The amount of clothing you possess is of no importance to me.

Yours sincerely,

...H. HILL.

A GIRL OF GRIT.

By MAJOR ARTHUR GRIFFITHS.

Copywright by R. F. Fenno & Co.

"But Captain Wood has gone. He has been carried off," I said.

"'Gone,' yes," sneered the colonel, "but 'carried off.' How do we know that? It's not the first time a young gentleman has disappeared for four and twenty hours or more. Who knows all the ins and outs of Captain Wood's affairs and private movements?"

At that moment Harris, the butler, came up with a card. "Gentleman asks if he can see you most particular. Same as came this afternoon—Mr. Snoozer—but he's got a dirty scrub of a boy with him."

"Joe," I cried. "Show them up here, Harris. Yes; bring both of them, of course. We shall hear something now."

Mr. Snuyzer came up to the drawing room at a run, I'm sure. He was almost at Harris' heels. The boy Joe lagged a little behind and stood abashed at the door, and Roy, who by constitution hated all boys, especially ragged ones, took this hesitation as suspicious and gave an ugly growl, with a show of his fierce teeth. The collie, I should mention, had never left me since he was brought to Hill street.

"Look yar. What did I tell you, miss?" began the detective, coming straight at me and talking rather excitedly. "I never thought to show myself here again, but, by thunder, it was too strong for me. I've got the pride of my business, and I wanted you to see I was right to believe in Joe. Now, speak out, young squire."

I must say I thought well of the boy from the very first. He was an apple cheeked, healthy looking, bullet headed urchin, with clear, china blue eyes, very wide open just then in astonishment, I think, not fear. He did not care one bit for the dog, but faced him sturdily, stooping as if to pick up a stone, with a "Would you—br-r-r, lie down, will you," that sent the collie, still growling, under the sofa.

"How was it, Joe? Won't you sit down? Let's hear what happened," I said just to encourage him, and he asked nothing better than to tell his story, and taking his seat at the very edge of a chair after dusting it he began:

"It was this way, mum—miss. When he—Mr. Snuyzer there—set me on the nark, I mean watch, this morning, I held on to the job close for a matter of three hours and never saw nothing. Worn't no move at all in the house till about 11 o'clock, when a trap comes down the road and pulls up at the garden gate. The coachman he was in an old blue coat and silver buttons, bad hat—half a crown an hour business—regular fly. But inside was a dona—a real lady, you understand, dressed up to the knocker. I saw her get out"—

"Would you know her again?" we asked, all of us, in a breath.

Joe nodded his head.

"I couldn't see her face at first, she'd got a thick veil on. But afterward I got my chance, as I'll tell you directly. She was a shorter, too, real jam, and no mistake, a lady, like as I've seen at the music 'alls."

"When did you see her face?" asked the colonel, rather disdainfully.

"In the carriage, when I was a-setting right opposite her. I'll come to that. But first of all I must tell you how it was. You see, the dona she wouldn't go right into the garden at first. She kept at the gate spyinglike, watching the house and doubting, as I fancied, she ought to go in. Then she made a dash forward for the front door, but before she reached the steps some one came down, a man"—

"Would you know him again?"

"Rather, in a thousand. He was a little black muzzled chap, with a skin like a pickled walnut, and he came out all in a hurry, as though he had been watching for her.

"He waved her back, but she stuck to it, and they must have had words, for I see'd him take her by the wrist and pull her out toward the carriage.

"I was crouched close under the wall, for I'd sneaked up at the back of the carriage to spot what I could, and I was just by the door when the small chap opened it and was forcing the dona to get in.

"'I will not go, Papir' (Pepe), she says, 'not until I have heard what you have done to him. There was to be no violence. You promised that, and I wish to be sure. I must know,' she says, 'that he ain't come to no harm,' she says.

"With that the little fellow gives her a great shove. I think he'd 'a' struck her, but just then he caught sight of me.

"'Why, in the name of—some foreign gibberish—'where have you dropped from? What brings you 'anging about 'ere?'

"I tried to stall him off by axing him to buy a box of matches, but he cut up very rough and wanted to lay 'old of me, saying he'd call the police and give me in charge for loitering and all that. But I checked him and slipped through his fingers—'twasn't difficult—and ran up the road.

"After I had been caught out," Joe went on, "for which I'm very sorry, sir, I judged I'd better keep off a bit if I was to do any more good.

"It was time, too, now they'd dropped on to me, to send word to the office what was up; that they was a-moving down here. I was a-making for the nearest postoffice to send a wire, when, from where I was, I saw the carriage drive straight into the garden.

"The road was clear, so I crept back, keeping out of sight and scrouging inside the pillars of the next gate, where I'd got my eye on what went on. The carriage was nowheres to be seen. They must have took it right inside the stables, for the coachhouse doors was open."

"That was to get Mr. Wood away," said the American detective.

"How do you know that? You don't even know that he was there at all," sneered the colonel.

"Hah! You wait. Guess you'll see," retorted Mr. Snuyzer. "I believe the carriage came on purpose, or they were uneasy at seeing the boy. Suspected something; some one had got wind, some one was on the track and wanted to clear out."

"All pure conjecture," said the colonel.

"Anyway, they did remove him," argued Snuyzer.

"If he was ever there," retorted the colonel.

"Well, well. Go on, Joe. Did you see anything more of the brougham?" I asked.

"Did I, mum? Of course I did. That's what I was waiting for. It was half an hour or more afore it come out again. And there was three chaps come'd out first, a-laughing and a-talking. I heerd one of 'em say, 'Not much fight about him now.' T'other says, 'He went like a sheep.' 'A dead un,' says another. 'Mutton, you mean.'"

"Oh! had they hurt him? Oh, Sir Charles!" I burst in, finding great difficulty in restraining myself.

"No, miss," put in the American very kindly. "I've told you they've no cause to hurt him as I look at it. He's too precious to them, besides. Fire ahead, Joe."

"The carriage, it was druv out fast through the gate into the road and straight on for London. I had to settle what I'd do and quick too. You'd told me, sir, to watch the house and if any one come out to let you know. Well, I judged they'd all come out, so anyways I was bound to let you know, and I'd an idea that the carriage'd help me to the next move. If I follered it, I'd find where they'd all gone to.

"So with that I scribbled a message on the gate, case you comed down and missed me, and I started running all I knew to catch up the carriage. I picked it up long way this side of the bridge, although I was near baked and done brown. But I hitched on to the back part like as I've done a thousand times afore and rode like a gentleman all the way up the 'Ammersmith road right into Kensington.

"There one of your blooming interfering coves wot sees me on my perch gives the office to the man a-driving, who rounds with his whip and gives

It's you, is it? Aha! This is the second time I've caught you spying."

me wot for. I held on for all the cuts of the cord, though they stung like hot nettles. I was pretty well slashed all over, when all at once the jarvey stops his 'osses, and before I could climb down a feller—the same little black faced moocher—came and copped me right where I sat behind. He was awful mad.

"'You devil's spawn! It's you, is it? Aha! This is the second time I've caught you spying. Tell me who sent you, or by'—some foreign talk—'I'll do for you.'

"But mum was the word with me. I wouldn't 'a'let on if he'd cut me to ribbons. 'Chuck it,' I said, 'chuck it or call the coppers. If I've done wrong, it's for them to pick me up, not you. I'll answer to them.'

[TO BE CONTINUED.]

A False Sign.

"Satan Died Here" is the sign hanging before an establishment in Topeka. But old Beelzebub is not dead. The proprietor was trying to say "Satin Dyed Here."

BEAUTIFUL HOME FOR KING.

Riviera Palace Where He Will Pass the Spring Season.

Among the many estates offered him, King Edward has finally fixed his choice on the Chateau de Thoreno, at Cannes, for his residence during his stay on the Riviera in March. It belongs to Lord Rendel, and is considered the most beautiful demesne on all the azure coast—leaving in the shade even the great estates of the Grand Dukes of Russia.

Lord Rendel has been in the board of management of the famous Armstrong firm, and has a fortune estimated at over $50,000,000. From 1882 to 1885 he was Civil Lord of the Admiralty.

While Prince of Wales King Edward was several times a guest at Thoreno. A few years ago it was rumored in the English circles at Cannes that he had offered to buy the place, but that Lord Rendel refusing to take money and insisting on making a present of it, the then Prince had given up the idea.

The 125-acre park surrounding the castle is entirely shut in by stone walls clad in ivy and honey suckle. The avenues and lanes aggregate 12 miles.

When in England Lord Rendel lives in another suburb country place, Hotchlands, at Guilford. He spends five or six months a year at Cannes, and has another fine residence at Posilippo, near Naples.

Lady Rendel has long been renowned for her exacting fastidiousness as regards the keeping of her gardens. At Thoreno she has 20 men doing nothing but looking after them, besides a head gardener, two foremen and a squad of experts for the greenhouses. The avenues alone provide work for several hands every minute of the day—not a fallen leaf, burnt match or footprint is allowed to remain on the sand.

As the park lies on a hillside, the aged Lady Rendel never strolls through it, except in a tiny chaise, drawn by two white donkeys, and two men with rakes follow at a distance to efface the traces of the wheels at once.

What has attracted the King to the Chateau de Thoreno more than anything else, is the wonderful collection of exotic plants and flowers. In the grounds the flower beds are never permitted to contain anything but plants in bloom. As soon as those are on the point of fading the whole bed is spaded up during the night and reset with flowers about to open, which have been kept in reserve in remote fields or special forcing houses. From many lofty points the promenader discovers enthralling views of land and sea.

Lord Rendel's daughter, Maud, married Herbert Gladstone, and besides other curiosities, Thoreno Castle possesses the room the great Gladstone himself used to occupy there for a month almost every winter. In a particularly picturesque nook facing the south and the sea, there is a clump of olive trees set out by the Prince of Wales with his own hands more than 15 years ago. They are doubtless the only trees he ever planted, and he shows an interest in their welfare and growth every time he returns.

Passing Charm of Piccadilly.

Piccadilly, one of the most famaus thoroughfares of the world, has arrived at the stage of its history when at least a part of its old-time individuality, the individuality that gives it its charm and fame, must go, perforce, the way of all things human. The congestion of traffic along its narrow way has become so great that nothing short of widening will reduce it. At the eleventh hour a plan to cut a road through the Green Park from Hyde Park Corner to Cleveland Row, which, by diverting all the eastbound traffic destined for Charing Cross way, would solve at least a part of the problem, is brought forward, but with results indecisive as yet. It would save Piccadilly, but at the expense of the park. Which way the balance will incline eventually remains to be seen. It is a dilemma not without its pathos for the lover of vanishing London.

Hard on the Lawyers.

A rich citizen of a nearby town was on terms of deadly hatred with two local lawyers, whom he accused of having robbed him in a law suit, says The Sidney Bulletin. He took sick, was given up by his doctors. At once he sent word to the lawyers, asking them to come to his bedside. They hurried to the house and when in the room were motioned to sit one on each side of the bed. He then took a hand of each. "My friends," he gasped; "you wonder what I want with you to-day. Perhaps you think I have brought you here for reconciliation. But no, that is not so. I merely want to die like our blessed Lord—between two thieves." And then he died happy.

Highest-Rated English Town.

The highest rated town is said to be that of Grays, Essex, England, where the rates stand at 11s. in the £, the Urban District Council rate standing at 5s. 6d., the poor rate of 4s., and the water rate at 1s. 6d.

Found America.

A London letter says that the man who drew the original map of America, giving it its name, was Martin Waldseemuller of the Town of St. Die, in the Vosges in 1507.

The proprietor of a German menagerie keeps caged together a lion, a tiger, a wolfe and a lamb, which he labels "The Happy Family." When asked confidentially how long these animals had lived together he answered:

"Ten years, but the lamb has to be renewed occasionally."—Philadelphia Times.

THE BRIGHTEST FLOWERS must fade, but young lives endangered by severe coughs and colds may be preserved by Dr. Thomas' Eclectric Oil. Croup, whooping cough, bronchitis, in short all affections of the throat and lungs, are relieved by this sterling preparation, which also remedies rheumatic pains, sores, bruises, piles, kidney difficulty, and is most economic.

Pope liked stewed lamphreys. Sometimes when visiting he would lie abed for two or three days at a time, unless he heard that there were to be lamphreys for dinner, when he would rise and make his appearance at the table.

BABY'S OWN TABLETS.

Keep Little Ones Well During the Hot Weather Months.

If you want to keep your little ones hearty, rosy and full of life during the hot weather give them Baby's Own Tablets the moment they show signs of being out of order in any way.

This medicine cures all forms of stomach and bowel troubles, which carry off so many little ones during the summer months, and is the best thing in the world for sleeplessness, nervousness, irritation when teething, etc. It is just the medicine for hot weather troubles; first, because it always does good; and second, because it can never do any harm—guaranteed free from all opiates. Mrs. W. E. Bassam, Kingston, Ont., says—"I began using Baby's Own Tablets when my little girl was about three months old. At that time she had indigestion badly; she was vomiting and had diarrhoea constantly and although she had an apparently ravenous appetite her food did her no good and she was very thin. Nothing helped her until we began giving her Baby's Own Tablets, but after giving her these the vomiting and diarrhoea ceased and she began to improve almost at once. I have since used the Tablets for other troubles and have found them all that can be desired—they are the best medicine I ever used for a child."

These Tablets are readily taken by all children, and can be given to the smallest, weakest infant by crushing them to a powder. Sold at drug stores or you can get them post paid at 25 cents a box by writing direct to the Dr. Williams Medicine Co., Brockville, Ont., or Schenectady, N. Y.

At Rochester, England, the death has just taken place of Mr. George Thomas Crook, formerly inspector of machinery in the Royal Navy. Mr. Crook, who was seventy-two years of age, was known in the service as "the man who sat on the safety valve," for his plucky action during the Egyptian war of 1882. He then, at the risk of his own life, adopted the heroic expedient indicated in order to raise sufficient steam to lift ashore at Suez, by means of a rickety crane two locomotives which were urgently required on the Egyptian Railway.

DOUBLE DROWNING

TWO WINNIPEG SOLDIERS MEET DEATH IN THE ASSINIBOINE RIVER.

ROW BOAT STRIKES A BRIDGE AND THE OCCUPANTS ARE THROWN INTO WATER.

As the result of a mistake in steering, Private Espie and Trumpeter Davey, of the Canadian Mounted Rifles were drowned in the Assiniboine river. The double tragedy happened on the afternoon of the 23rd inst at the Main street bridge, Winnipeg. Private Cuiston, also of the C. M. R., was the third occupant of the boat, and he escaped by a miracle.

Hatless, coatless and in his bare feet, Cuiston told the story of the tragedy soon after he landed from the river.

"Espie, Davey and myself," he said, "had been bathing. We decided to go for a row in a boat of the C. M. R., and Espie and Davey took the oars. I was sitting in the back of the boat. As we approached the Main street bridge I called out to the boys who were rowing to look out for the second pier. There was no steering apparatus in the boat and the other boys were steering with the oars. At my warning they tried to turn the boat to one side, but it was too late. The boat was caught by the current and hit the pier sideways. It all happened in a second. The boat turned over, and I never saw the boys or heard them. As I was sinking in the water I managed to kick off one of my heavy boots. Had it not been for this I do not think I would ever have got to the shore. As it was I was at my last gasp. When I got to shore there was no sight of either men or boat. No one seemed to be on the bridge or in sight at the time, except some young ladies. Anyway, the whole accident happened so quickly that no could have come in time.

Cuiston appeared terribly exhausted, and spoke under deep emotion. After he had told his story he started to walk barefoot up the C. P. R. track, where half a mile above other men of the C. M. R. were bathing.

Trumpeter Davey has just returned from London, where he was one of the C. M. R. representatives on the Coronation contingent. He had belonged to the C. M. R. for a year and a half. He was a man of about 26 years old. of English descent.

Private George Espie was a somewhat older man. He had been with the C. M. R. since March, 1892. He was a Scotchman and well educated, being a graduate of Glasgow university and Edinburgh high school. His father was a solicitor in Glasgow.

Cuiston, who escaped, comes from Manitou, Man., where his people reside.

CONDENSED NEWS.

Two clever pickpockets were arrested on the 24th inst., at the Winnipeg Fair grounds.

A system of wireless telegraphy will be installed between Chicago and Nova Scotia.

The Brotherhood of Locomotive Engineers of America will hold their next annual meeting in Winnipeg.

Methodists will erect a central headquarters across from Westminster Abbey, London. The cost of the site was £330,000.

Chicago defeated Manitoba in the Cricket match at Winnipeg on July 23rd.

General Booth comes to Winnipeg in December, and will spend some days there.

Thirty thousand people attended the Winnipeg fair on Wednesday, 23rd inst. A lion escaped from its cage in Jabour's menagerie and caused considerable excitement.

Thomas McClellan, brother of the lieutenant-governor of New Brunswick, is dead.

King George of Saxony is ill with pneumonia.

Harry Tracey, the Oregon convict, has gain been located.

General Botha, in a speech at Cape Town, advised all to work in harmony to build up South Africa.

Joseph Chamberlain, colonial secretary, says that the government would allow only those of African birth, who had fought in the recent mony to build up South Africa.

POLICE ON WHEELS.

Chief Detective Carpenter of Montreal, has organized a bicycle squad in his department. Six or eight active detectives will be employed in patrolling the city on wheels during the night and will report themselves at short intervals at the different police stations, so as to be constantly in touch with headquarters during the night and be ready at all times to go on reports.

KALAPORE CUP.

Won by the Australians at Bisley—Canada Third.

The team that represented Canada in the "Rajah of Kalapore Imperial Challenge Cup" match, between Canada, Great Britain, Australia, and other British colonies at Bisley, was as follows: Pte. Peddie, 5th Royal Scots; Sergt. Major Richardson, 5th Regt. C. A.; Capt. C. N. Mitchell, Winnipeg; Sergt. Smith, 43rd Regt. Staff-Sergt. Boyle, 10th Royal Grenadiers; Capt. R. Rennie, Queen's Own, Toronto; Col. Sergt. Moscup, 6th Regt.; Lance Corporal S. C. Mortimer, 6th Regt.

The score at the end of the $200 yards shoot in the Kalapore match was:—

Mother Country	263
New Zealand	262
Canada	259
Rhodesia	258
Australia	258
Natal	251
Guernsey	251
India	243
West Indies	225

At the end of the 500 yards' shoot in the Kalapore Cup contest the scores, including the 200 yards' shoot, was:—

Canada	260
Australia	257
Natal	257
Rhodesia	253
Guernsey	251
New Zealand	248
Mother Country	244
India	234
West Indies	203

The Kalapore was finished in the following order:

Australia	770
Rhodesia	758
Canada	757
Mother Country	775
Guernsey	748
Natal	746
New Zealand	744
India	708
West Indies	602

TORONTO MYSTERY.

Drug House Employees Die Under Suspicious Circumstances.

The Toronto police are working actively on a mysterious affair connected with Evans & Sons drug warehouse where two employees have been found dead lately under somewhat startling circumstances which have received further coloring of suspicion from the fact that a most deliberate and ingenuous attempt at robbery was lately made on the premises and apparently an incendiary was narrowly averted from causing a serious destruction. The government has ordered an analysis of the stomach of Whaley, an employee who died there Saturday. There is some suspicion of poison. The police connect the death with an attempted robbery on May 30, but how or why if they know, they will not say and the public is ignorant.

RUN DOWN BY A TROLLEY CAR.

David A. Hall Meets Instant Death In Toronto.

David A. Hall, lamp-lighter, of Toronto, employed by the Carbon Light & Power Co., was instantly killed by a trolley car near the corner of Queen street and Dovercourt road on Tuesday. He was aged about fifty years, and was wheeling just behind the car, which he tried to pass on the other track, but was run down by the car coming in the opposite direction, the car passing over his head and causing instant death.

ONTARIO HAY ROTTING.

In Ontario there is a general expression among farmers that owing to the apparently never ending fall of rain, between Toronto and Lake Simcoe and in several other sections the hay crop is rotting in the fields. Farmers are unable to take it in and if fine weather does not come soon the whole crop will be ruined. The present outlook is exceedingly gloomy, but weather reports at last point to more favorable weather conditions in the near future.

TORONTO FIREMEN'S FUND.

The Toronto city council has passed a vote of $25,000 to the fund for the relief of families of firemen killed or disabled while on duty. This makes the total fund $44,140.25.

SONG WRITER SUICIDES.

Alex. McKay, composer of Scottish songs, jumped into the northwest arm, at Halifax, yesterday, with stones bound to his feet, and was drowned.

KILLED BY THE CARS.

Edward Dodman, Jr., of Thamesville, went to sleep on the railway near Bothwell, and was killed by a train.

Joseph Chamberlain has recovered from his recent accident.

DUNDONALD AT QUEBEC.

New Commander-in-Chief is Delighted to Come to Canada.

The steamship Lake Champlain arrived at Quebec on Thursday, July 24, having on board Lord Dundonald, now commander-in-chief of the Canadian forces. When asked for his views on Canadian subjects he expressed pleasure at the prospect of assuming command of the Canadian forces, and having had under him in South Africa some of its representatives in the shape of the Strathcona Horse. Of that fine body of men he could not speak in sufficiently high terms. It had rendered signal service on the veldt, and he was quite confident that his relations with the militia as a whole would be most cordial.

While acknowledging that good work had already been done in the way of spreading information concerning the country he could not but feel that the best way of making it known was to give free passes to homesteads to representative British farmers. From the coming of twelve British editors he expected much good. Lord Dundonald is an affable man, of fine presence and of much apparent activity.

A BOLD HOLD-UP IN MEXICO.

American Thieves Go Through an Express Car and Escape With $50,000.

A dispatch from El Paso, Texas, says: A daring hold-up took place on the Mexican Central on July 23, just after the train had left Bermijillo. At that point three Americans boarded the train, two secreting themselves on the blind baggagecar, and the other entering the third class coach. As soon after the train pulled out the two riding on the outside entered the express car, and covering Messenger Buckner with their revolvers, ordered him to throw up his hands. The messenger offered no resistance. The robbers then went leisurely through the safe, securing $50,000 in currency consigned to the Banco Minerco at Chihauhua. They also took what other money packages were in the safe, and remained quiet until the train slowed down, making a hasty exit and dropping off the train before it stopped. They then disappeared into the darkness.

CONDENSED NEWS.

King Edward's health continues excellent.

The trappist monastery at Oka, Que., was destroyed by fire on July 24.

A Brantford Plow company will erect a $50,000 warehouse in Winnipeg.

Chicago Cricket team won the Northwestern championship at the Winnipeg tourney.

The United States has backed down on the Marcus Island controversy in favor of Japan's views.

Mr. John McKinnon, of the Lake Dauphin district, was injured by an electric car in Winnipeg.

The C. P. R. and the Elder-Dempster and Allan lines tendered on fast Atlantic service between Canada and the old country.

Hon. J. I. Tarte has decided to recommend that $1,000,000 be spent on Fort William's waterways improvements will also be made to Port Arthur harbor.

Masked men in Wyoming have maliciously slaughtered thousands of sheep.

A cable from Johannesburg says the home government has decided to send parties of Boers to Canada and Australia to study agricultural methods there, with a view to the improvement of their own farming.

A man named Peter McGill was badly injured near the elevator dock at Port Arthur on July 24. He fell between a sand scow and the dock and got jammed.

Mrs. Ketchum, wife of E. B. Ketchum, a prominent citizen of St. John, N. B., was instantly killed near her summer home at River Bank, fifteen miles from St. John, on July 24 by the outgoing Canadian Pacific freight train. She left home a few minutes before the accident and was walking up the track.

Describing the Canadian exhibit at Wolverhampton, the Newcastle Daily Leader, says: "The show is on a large scale, and so satisfactorily reflects the vast possibilities of the Dominion, that for the first time in our lives we have adequate impression of what the possession of Canada may mean to this right little, tight little island. We learn how our Canadian cousins house us, clothe us, feed us, and the toothsome luxuries which they are preparing for us in the days when we are wise enough to ask for Dominion dainties and see that we get them. We are disposed to be envious of the Canadian government, for, if the arrangement of this show be any criterion, it is obvious that the Dominion has a more efficient type of administration than we are at present blessed with on this side of the herring pond."

CHINESE IMMIGRATION.

The revenue from Chinese immigration to Canada for the year ending June 30 amounts to $364,972, compared with $187,704 during the previous year. The poll tax last year was increased from $50 to $100. The number who paid the tax was 3,523, compared with 2,518 in 1901.

ARRESTS A BROTHER.

Constable Lamonthe, of Ottawa, Does Not Let Love Stand Between Him and Duty.

An Ottawa dispatch says: Police Constable George Lamothe to-day stood between love and duty, and duty won. He arrested his own brother. Yesterday afternoon, a deck hand on the steamer Welshman of the Ottawa Forwarding line, sent word to Lamothe that he wanted to see him; the officer went down to the boat shortly before midnight, and much to his surprise, discovered that the man was his younger brother, Arthur Lamonthe.

The latter was until recently a member of the Garrison Artillery of Quebec City. Tired of soldier life, he took his departure without asking leave. His brother in Ottawa knew he had departed, as word of his disappearance was sent by the officer commanding the garrison.

Constable Lamothe sized up the situation in short order, and decided that it was his duty to place his brother under arrest and inform the military authorities of his move. The brother was his guest for the night at his home, but was in the morning marched to the police station, where he was placed behind the bars. The Quebec officers were notified and a man was sent along to take Lamothe back.

MRS. SUDGEN SUICIDES.

Resident of Guelph Drowns Herself in a Cistern—Ill health the Cause.

A sad case of suicide occurred at Guelph, Ont., early Sunday morning, when Mrs. Sugden, wife of Mr. Samuel S. Sudgen, jumped into a cistern and drowned herself. Mr. Sudgen was in Barrie on business, and the family sat up until 1 o'clock expecting his return, when about 3 o'clock some of them heard a splash in the cistern. The family found their mother missing from the bedroom, and went to the cistern where she was discovered in a night dress. The opinion is that, in the woman's weak condition, the concussion in the plunge had caused instant death. She was about five minutes in the cistern. Deceased was about 40, and was a great sufferer for years from consumption.

DROWNED IN WELLAND.

Gordon Beckett and Fred Riddell Lose Their Lives While Bathing.

Two young men, Gordon Beckett, son of William Beckett, and Fred. Riddell, a young English lad, aged 16 and 20 respectively, were drowned in Welland river at Becvett's bridge, about seven miles west of Welland, Ont., Friday evening. They went in bathing and were heard playing and laughing for some time, but after a while, everything became quiet and when parties went to investigate what was the matter, there was nothing but the overturned boat to be seen.

MORMON ACTIVITY.

The Mormon propaganda, with its steady advance in the West, its contempt of law, its inversion of property rights, its greed of political power, has at length aroused the officials of Home Mission societies in the United States, and the representatives of ten of such leading societies including that of the Baptists, have united in a joint appeal to the Protestant churches of the country, urging them to awake to the national peril which faces them. The missionary activity of the Mormons is described as almost incredible. There are as many as 2,000 missionaries and agents in the field, 1,400 of these in the Southern States. The petitioners believe that Mormon leaders are ambitiously aspiring to the political control of the entire country, from the Rockies to the Pacific. Their agents are peculiarly plausible and seductive, commonly advancing well known Bible truths till they have gained converts, and then advocating the doctrines of their sect. We are not without evidence of the working of this great politico-religious machine in our own country, and we, too, need to be on the alert.—Canada Baptist.

DIED ON THE TRAIN.

A Montreal dispatch says: Trooper Gregson, of the Second Mounted Rifles, who belongs to Brandon, Man., died on the Intercolonial train on July 25, coming to Montreal from Halifax. The trooper was thought to be sleeping and was discovered to be dead when the conductor attempted to get his ticket. Heart disease is supposed to have caused his death. He was 19 years of age, and has a widowed mother in Brandon.

On the west side of Mount Aetna there are several villages in the midst of former lava streams, and with all the houses built of lava.

NEW KIND OF MOTOR.

The Inventor Claims Wonderful Economy.

A change in the method of street railway propulsion is the possible result of a trial that has been made in Chicago of the invention of P. W. Leffler, a local mechanic and electrician. Small electro-magnets are used to pull the cars. The electro-magnets are placed in the ground in a line half-way between the rails. Attached lengthwise to the bottom of the car is a long iron bar, cut up into feet and so attached that the ends are within an inch of the tops of the magnet boxes. Each magnet is connected with main feed wires, heavily insulated and bringing electricity from the power house. But when the car is not running over them the magnets are not magnetic. In other words, they are not in the circuit except when the car comes over them. In the car, by the use of a small storage battery, the polarity of the feet of the armature, and their attraction for the magnets, are controlled. The operator of the car can with one movement of his one lever, stop or reverse.

The great saving which the inventor claims, is in the amount of the electricity required. He says seventy-five amperes will suffice for forty cars, while with the present trolley system seventy-five amperes are required for one car. It is also claimed that the cars can be run faster than under systems now operated.

TRIPARTITE AGREEMENT.

Great Britain, Corea and Japan Arrive at a Conclusion.

A special dispatch received at St. Petersburg from Seoul, Corea, announces the conclusion of an important agreement between the British and Japanese ministers to Corea on one hand and the Japanese Councillor Kato, special adviser of the Corean emperor, on the other, by which Great Britain and Japan mutually guarantee Corea's independence and pledge her their support and assistance in all important questions affecting her internal and foreign policy. Corea in return agrees to raise her naval and military establishments to a footing sufficient for her own defence, and also in case of raising a foreign loan she agrees to restrict herself to the markets of Great Britain, Japan and the United States. She further agrees that no foreigners will be appointed to positions in the Corean state service, that measures shall be immediately taken for the protection of Corean territory, and that a protest shall immediately be made against any state or persons attempting to erect works or buildings situated so as to prejudice Corea's scheme for national defence.

DESPERADO CAUGHT.

Frank Sabeans, the Terror of Nova Scotia in the Toils.

Frank Sabeans, the Annapolis desperado, who has for five years terrorized the Land of Evangeline by his deeds of outlawry and depredation, was captured on July 25 by Chief of Police Anderson, of Bridgetown, N. S., just as he stepped from the train from Yarmouth. Sabeans was returning from Boston, whither he had fled a year ago to escape the officers of the law, who were hot on his trail. He was under the influence of liquor when he arrived at Bridgetown, and that accounts for his easy capture. He was recognized as he strolled up the street and pointed out to the chief of police. When the officer approached him Sabeans struck him a vicious blow, but the latter promptly knocked the desperado down, and with assistance soon landed him in jail. Sabeans is wanted for numerous offences, including "moonshining," cattle stealing and burglary. When arrested he had in his pocket a ticket from Boston to Waterville, King's county, where his aged mother resides. Numerous attempts have been made to capture Sabeans during the last four years, but without success. He had a retreat in the fastnesses of the mountains of Annapolis, and there he defied his pursuers to take him. He was a desperate character, and his capture has caused a feeling of relief throughout Annapolis valley. The government of Nova Scotia offered a reward for his arrest.

The total number of cases of cholera at Cairo and at Moucha, near Assioot, Egypt, since July 15, is 307, of which 227 proved fatal.

John Wilson, a farmer on the town line of Wyton, a few miles west of Thorndale, Ont., was found dead in a ditch on the roadway near Wyton, on Wednesday afternoon. It is supposed that his team ran away.

An American syndicate has pulchased 50,000 acres near Winnipeg.

The condition of Governor Ross of Yukon, continues to improve.

THE END IS IN SIGHT.

(Continued from first page)

recently sent forward from Toronto, Mr. Rogers said that the men had not been asked to go to Fernie, that the situation had been fully explained to them, and that they had gone to Michel and Morrissey, as orriginally arranged, and none of them had stopped off at Frank as far as he knew, as reported by some of the western papers. When asked about the coke supply, Mr. Rogers said that the latest information he had this week was that there were no smelters closed in British Columbia on account of any shortage of coke. He thought that the trouble at Fernie would soon end. The company had at that point some of the best men he had ever met in any mining district, and he thought that the better judgement of the majority of these would prevail.

Rossland, July 30.—The shortage of coke has pinched the LeRoi smelter, at Northport, and the plant has shut down for the present until a continuous and adequate supply of coke is issued. The smelter drew its coke supply from the east, and to some extent from Frenie.

The latter supply has been shut off for some weeks, and now that the great eastern industrial concerns have commenced to use coke instead of anthracit coal, the eastern supply is shut off, and the plant has no recourse other than to suspend. The company is strongly opposed to this policy and is putting forth strenous efforts to secure coke supplies. The suspension is likely to effect Rossland adversely unless the situation is relieved.

THE RELIEF FUND.

Following are the subscriptions which have not yet been acknowledged:—

The balance of the fund on July 31st, was $23,562,30. This with the Coal Co's. subscription of $10,000 will bring the fund up to $33,562,30.

Anon, Vancouver	$ 1 00
D. C., "	1 00
The Souris Mining Co.	50 00
Mrs. Spence, Collingwood	1 00
Cranbrook	110 45

Dawson City	40 00

SEVEN SUITS ENTERED

COAL COMPANY SUED FOR $58,000 DAMAGES.

Fernie Disaster Threatens to be an Expensive Affair for the Coal Company if Suits are Successful.

Nelson, B. C., Aug. 2.—Seven writs were issued yesterday by Taylor and O'Shea in the supreme courts against the Crow's Nest Pass Coal company for the widows, orphans and parents of some of the victims who lost their lives in the disaster at Coal Creek last May. Twenty-five more are to be issued within the next two days, making 32 in all, which will come up at the next session of the court. Besides these 32 suits over 50 others are being prepared but will not be read for some weeks yet. The writs issued yesterday were in behalf of Louisa Stevens for $12,000 damages for the loss of her husband, Thomas Stevens; H. Dickson and Mary Dickson for $4.000.00 each, for the loss of their son, J. E. Dickson; Kate Balayti, widow, $6,000 for the loss of her only son, S. Balayti; J. Hogan and wife for $4,000 each for the loss of their son, A. Hogan. Mary Hastek for $12,000 for the loss of her husband, A. Hastek; B. Camairso, aged 78, for $6,000 for the loss of his only son, A Camairso, M. Robertson, widow, for $6,000 for the loss of her son, D. Robertson. The total amount of the damage asked for in yesterday's writs was $58,000 and when the other 25 are issued the damages asked for will amount to $240,000. Most of the plaintiffs in these suits reside in Fernie, although some have left for other parts of the country.

OBJECT TO COMPANY'S STORES.

Glace Bay, N.S., July 26.—A mass organization meeting of the merchants of Glace Bay and the adjoining mining districts, where the works of the Dominion Coal company are situated, was held last night. The new society is made up of the business influence of Cape Breton, and is to start a vigorous crusade against the stores operated by the Dominion Coal Company. The matter will be represented to the directors before any further steps are taken.

MISS RHODENA TINGLE
—PROFESSIONAL NURSE—

Residence—J. F. Jarvis. FERNIE, B. C.

AILEEN.

I know a winsome little girl
Whose dancing feet are light
A thistle down that breezes whirl
To float in sunshine bright—
A little girl with witching eyes
That smile like sunny summer skies
Upon whose blue no clouds arise
And in them mischief lies.

A happy heart that singing goes
To mate with dancing feet,
A guileless heart that only knows
Whate'er of life that's sweet;
A dainty blossom, pink and white,
Capricious as a fairy sprite
That could not live without sunlight
And careless love would blight.

'Tis sad to think that years may fleet
And bring a woman's dower
To still those happy, dancing feet
With sorrow's heavy power,
But love that watched the blossom rare
Will surely keep the ripe fruit fair
And teach the woman's heart to bear
Whate'er may come of care.

—Mary Devereux in Boston Transcript

PURSUED BY REDCOATS

Brave Jane's Thrilling Escape From British Officers—How She Outwitted Them.

During the Revolutionary war many deeds of valor were performed by people whose names have never been heard of by the present generation, but whose daring acts did much to foster the cause of liberty. The Hillards were a well known family in the vicinity of Philadelphia, and while they had never been discovered in direct communication with the Continental army it was fairly understood among the British troops that they were using their influence to aid the colonists.

"I should like nothing better," an English officer was saying, "than to capture one of that family, march him to headquarters and make him give an account of himself."

"Perhaps," a fellow officer returned, "you would not enjoy the capture of the young daughter of the household, who, it is said, is afraid of nothing this side of the sea. It is said that she is one of the most expert horsewomen in the colonies and is out scouring the country over at daybreak and does not return till dark."

"It is neither prudent nor womanly," replied another, "and if I can once get sight of her I'll give the damsel such a scare that she'll be glad to stay at home with her spinning."

Jane Hillard, a beautiful girl of 15, was standing at her horse's side, patting its glossy neck, while her mother was saying:

"I like not the thought of your going so far from home alone when the country round is infested with British soldiers."

"Why, mother," laughed the girl as she sprang into the saddle, "I know every inch of the ground as well as I know our own dooryard. And what can happen to me? There is no horse so fleet as mine, and I promise to take good care of myself." And, giving the mare a touch with her whip, she went flying down the driveway toward the public road.

Jane rode along the smooth highway, every now and then looking over her shoulder to see whether any had noticed her during her swift trip. And at last, when she came to a large clump of elder bushes, she reined in the mare, raised herself in the saddle and gazed in all directions. Seeing no one, she gave three short whistles, which were at once answered. She then started the horse and in a moment had reached a thick underbrush a few rods off the public road. A young man came forward, raised his cap respectfully and said:

"Good day, Mistress Hillard. You are prompt in keeping an appointment."

"Good day, sir," she answered quickly. "I am glad I have not kept you waiting, though," she added. "I came near not being here at all. This day of all others my mother objected to my riding. The country is filled with soldiers, and she was afraid harm might come to me."

"Does she know of this meeting?" the man asked quickly.

"No one knows of it," the girl replied, "and I am sure I have not been noticed on my way here."

"That is well," her companion answered. "I am trusting you with a most important message which must be in the hands of General Washington within 12 hours. If it is discovered, it means death to me and confusion to our troops. You are in great danger carrying it." And he hesitated a moment before placing in her hands, which were outstretched eagerly a neatly corded packet. "But I see no other way," he added, and, handing it to the girl, he was soon out of sight.

Jane placed the precious message within her riding cap and had gone but a short distance when, on looking over her shoulder, great was her consternation to discover in the distance a party of English officers.

Jane Hillard was a brave girl, but her heart sank as she thought of the important letter intrusted to her, all that it meant to the Continental army if it were discovered and what would be her probable fate if she were made a prisoner of war. She put the spurs to her horse, and then began a ride which was an important one for the appeared! The men who had regarded the race as simply a joke to frighten the girl now vowed to find her and take her before the commandant.

"We'll ride right to her father's door, and the one who finds her and brings her before the officer of the day shall receive a liberal reward."

Jane Hillard spoke truly when she said she knew the country around, and when she saw that the British were in pursuit of her she decided on a desperate move. At a point hidden from the highway she vaulted her horse over the hedge, turned down the edge of a creek, and by the time her disappearance was discovered she was carefully skirting her way through her father's orchard. In a few moments she was galloping over the grass at the edge of the driveway and soon arrived at the Hillard homestead.

No one was in sight, and the girl hastily sprang from the saddle, opened the door and, leading her horse into the kitchen, securely fastened the great bar across the entrance. With great caution she led the mare through the living room, down the wide hall and the length of the state parlor into a little bedroom. She closed every door behind her, and when she took the horse into the sleeping room she quite filled the space between the enormous bed and the old fashioned, dimity draped dressing table.

"There!" she whispered, unfastening the saddle girth. "The redcoats won't get us this time, my girl."

In the meantime the officers rode up the lane to the Hillard mansion, carefully looking for tracks in the dust, and one man knocked at the kitchen door so loudly with his riding whip that Mrs. Hillard hastily answered the summons, coming out of the cellar, where she had been assisting the maids in skimming the cream.

"We are looking," said the man, "for a maiden who rides about the country on a bay mare. She is, I believe, your daughter, madam."

"My daughter!" stammered Mrs. Hillard. "What can you possibly want of her?"

"We believe," went on the officer, "that she is carrying treasonable messages to the Continental army."

"Why, sirs," cried the mother, "you are greatly mistaken. Jane is but a child, and she knows no more of the ways of war than yonder lamb."

"Know you where she is at present?" one of them asked.

"She left the house an hour ago," was the reply, "and I expect her home at any moment."

"Well, madam," said the first speaker, "if you will assure me that she is doing no mischief and promise me that she holds no communication with the Continentals, we will bid you good afternoon."

"I will also promise you," returned Mrs. Hillard, "that hereafter she shall do her riding on her own estate, and I pledge you my honor that she has not nor shall she hold any communication with the Continental army."

There was great consternation in the household when Jane led her horse from out the best bedroom and told the story of her flight and her manner of escape.

Late that night, when all the household was asleep, a little figure stole out and in a few seconds placed in the hands of the waiting messenger a packet, which was in the possession of General Washington before dawn. And that day the Continental army gained a great victory.

Several months afterward General Washington took dinner with the Hillard family, making the journey out of Philadelphia to personally thank the young girl who had risked so much for the cause so dear to her heart, her astonished family then hearing of it for the first time. The commander in chief of the army also wrote Jane Hillard a letter, which he signed, "Your faithful friend, G. Washington."

The Hillard mansion is yet standing, and in the best bedroom and on the threshold of the state parlor are still to be seen the hoof marks of the faithful horse that carried the messenger when Jane Hillard risked so much for the cause of liberty.—Troy Northern Budget.

McADAMS IS FREE.

Victoria, Aug. 1—Wm. McAdams is again a free man. He came before the full court this morning, when, on tendering an apology, and his lawyer, A. E. Phillips, undertaking to have it appear in the Sandon Pay Streak, he was released. In his apology McAdams said the only motive he had for publishing the article was in the interest of the people, but that the language was intemperate and immoderate and void of the respect due to their Lordships and their office. The words were not intended to discredit the bench, but were the outcome of strong feeling. He expressed deep regret for the publication of the article and the inexcusable and insulting language in which he referred to the judges of the Supreme Court. Therefore he withdrew and apologized for the same. Chief Justice Hunter severely scored McAdams for his conduct.

PUBLIC NOTICE.

Notice is hereby given that sixty days after date I intend to apply to the Chief Commissioner of Land and Works for permission to purchase 160 acres more or less, commencing at a post situate on the west bank of Elk River, about one mile from the mouth of Morrissey Creek, thence running 40 chains east, thence 40 chains south, thence 40 chains along bank of Elk River, thence 40 chains west to point of commencement.

EUGENE WALTER.

Dated at Fernie this 5th day of July, 1902.

PUBLIC NOTICE.

Public Notice is hereby given that sixty days after date, I, John A. Ferguson intend to apply to the Chief Commissioner of Land and Works, Victoria, for permiesion to purchase 160 acres more or less, commencing at a post situate on the West bank of Elk River, thence running west to a point 40 chains due south of James A. McDonnell's south east corner post, thence south 40 chains, thence east to the bank of Elk River, thence following the said bank of Elk River northerly to the point of commencement.

JOHN A. FERGUSON.

June 24th, 1902.

THE STRIKE IS OVER.

MEN RETURNED TO WORK ON WEDNESDAY.

Strikers Not Satisfied With Wage Scale, but Accept Under Protest—Agreement Good for Two Months.

The strike of the employees of the Crow's Nest Pass Coal Co. at Michel and Coal Creek is over at last and the business men of Fernie breath easier. The negotiations were in progress from Friday evening until Monday morning before a settlement was finally reached. Several newspapers give Col. Prior, Minister of Mines, credit for bringing the strike to an end, but he was in no way instrumental in bringing about the result. General Manager Tonkin and the executive of the local union came to an amicable settlement of the difficulty without the assistance of outside parties, although it is no doubt true that the influence of the representatives of the Western Federation of Miners had much to do with bringing the strikers to look upon the matter in a more reasonable light and caused them to agree to the compromise.

The text of the agreement between the employees and the company is as follows:—

This agreement witnesseth, that it is mutually agreed between the parties hereto as follows:—

1. In the interpretation of this agreement, the expression "Miner" shall mean all men working by contract for the above named company in digging and mining coal. The expression "workmen" shall mean all other employees of the company employed inside in the general operation of the company's mines and on the payroll of the company.

2. A day's work shall consist of one shift of eight and one half hours, which shall commence at 7 o'clock a.m. and shall expire at 3.30 o'clock p.m.

3. Miners and workmen shall be considered as going on shift by being at the present fire station in Nos. 1 and 2 mines and at the fire-bosses station in No. 3 mine at the hour of 7 o'clock a.m. and shall complete the day's work by being at the same point at the hour of 3.30 p.m. except that this regulation as to the hour of completion of the day's work shall not apply to miners who shall be at liberty to complete their day's work as best suits them.

4. During the said shift there shall be a period of one half hour, commencing at noon, during which all work shall be suspended both inside and outside of the various mines, but the workmen shall remain in their respective mines and shall be ready immediately on the expiration of the said one half hour to resume the work suspended by them at noon.

5. If, at the expiration of two months from the date of this agreement, the Union shall signify in writing to the company, after a vote by ballot amongst the employees employed by the company underground, that they are dissatisfied with the extra half hour at noon, stipulated for by paragraph 3 hereof, the company hereby agrees that this agreement shall be at an end and that they will forthwith voluntarily return to the system of working the mines, as set forth in this agreement with the exception of the said half hour at noon, which will be discontinued, and thereafter a day's work shall consist of one eight hour shift, which shall commence at the fire stations and fire bosses' room aforesaid at 7 o'clock a. m. and shall end at the same points at the hour of 3 o'clock p.m.

6. There shall be no discrimination by the company against any of the miners or workmen employed by them previous to the inauguration of the strikes now existing at Fernie and Michel and the company agrees that they will forthwith reinstate in their employment, as rapidly as the conditions of the various mines will warrant, all workmen and miners who ceased work by reason of said strikes and that the positions of the said workmen and miners shall not in any way be prejudiced by reason of their having either directly or indirectly participated in the said strikes.

7. This agreement shall be observed and be in force for a period of two months from the date hereof in any event.

8. Miners and company men will go to work forthwith on the conditions contained herein and the strikes existing both at Fernie and Michel shall forthwith cease.

In witness hereof the parties hereto have hereunto caused their seals to be affixed, attested by the signatures of their respective committee and general manager.

Signed, sealed and delivered in the presence of:—
The Crow's Nest Pass Coal Co., Ltd., by
John H. Tonkin, General Manager.
James Dunlop
Peter Patterson
Charles Burrows
Thos. Letcher
Thos. R. Stockett, jr.
John Kali
Daniel McKenzie
Howard Marshall

A new wage scale was drawn up by the manager and submitted to the men which caused a great deal of discussion and had it not been for some of the cooler heads would no doubt have ended in a second strike. The clause which threatened to cause further trouble referred to the five cents a ton which has always been allowed the miners who used safety lamps. The company are installing new safety lamps which they maintain are far superior to the old ones, and throw a much better light, consequently the men who use these lamps will be able to dig just as much coal as those who work with open lights and they therefore maintain that it is no injustice to the men to take off the five cents a ton which has only been allowed because the old lamp was so poor that it did not throw sufficient light.

The men held several meetings in regard to this matter and although there was considerable opposition it was decided to accept the five cents reduction under protest.

On Tuesday the company issued a notice stating that the mines would be opened on Wednesday and asking for twenty men. A large number will be added to this force every day until the mines are running in full blast again.

The men at Michel returned to work on Tuesday afternoon and everything is running along harmoniously again.

COMMUNICATED.

The day that the strike was called off and the above agreement signed by Gen. Manager Tonkin for the Company and the Executive Committee of the Gladstone Union No. 76 W. F. of M., Mr. Tonkin told the Committee that he intended in the near future to draw up a scale of prices which he wanted the committee to sign on behalf of the Union. He assured the Committee that he would not cut the prices, or in other words that the prices would remain as they were when he, Mr. Tonkin, came here.

The day following the signing of the agreement Mr. Tonkin submitted his scale of prices to the Union. To the surprise of all concerned there was a general cut of from five to twenty per cent. less than the prices paid previous to Mr. Tonkin's coming. Of course the Union refused to sign the submitted scale of prices, and if Mr. Tonkin insists on enforcing his prices it will leave but one thing for the men to do, that is to again tie us the mines of the Crow's Nest Pass Coal Co., and it is certain that no more compromise will be recognized, but the men will insist upon the old scale of prices or none at all.

PRESS COMMITTEE.

About 10 o'clock Saturday evening at Michel a man named Joseph Horn, a polelander, who was accused of scabbing in No. 3 mine, while proceeding to the store to provide himself with provisions, was set upon by Thomas Daniels. He succeeded in getting away from Daniels and made a rush for the store. Upon his arrival there he was attached by a striker named Farrington, and treated rather roughly. At this moment the police arrived on the scene and took Daniels and Farrington into custody. They were brought to Fernie and charged with common assault. The case came up before J. F. Armstrong, S. M., and the men pleaded guilty and weae fined $15 and costs. The men were very indignant at Horn for going to work and the police officials fearing that he would not be safe sent him to Northport. This is not the first occasion that he has drawn the indignation of the miners upon himself. He gained a reputation for himself as a scab during the Rossland strike.

TRAGEDY IN THE HILLS.

One of the saddest and most deplorable events we have had to chronicle for some time took place on Sunday last. Three well known Fernie boys, Robt. Dunsmore, Keith Whimster and Wm. Liphardt, made up their minds to attempt to scale the lofty peaks of the Three Sisters, which lie about nine miles north west of Fernie, and started early Saturday morning for that purpose. The peaks are inaccessible from the front and it was thought that it might be possible to make the ascent from behind. They journeyed over Mount Fernie, followed the ridge for feveral miles and finally crossing a large plateau, camped well up toward their destination Saturday night, their camp-fire being distictly visible to the people of Fernie, some ten miles away. Early Sunday morning the young men resumed their toilsome journey toward the top. They were all in good spirits and were making good progress when Dunsmore was suddenly taken with pains in the stomach. The boys attributed this to eating snow and thinking he would be all right again soon decided to rest for five minutes. At the end of that time he had not improved any and said that he didn't think he could make the top, suggesting that the other two go on to the top, a distance of perhaps three hundred yards, saying he would lie down and wait for them. Whimster and Liphardt wrapped him well up in his blanket and struggled on toward the top of the middle peak. They noticed Dunsmore sit up and watch them several times, but did not pay any attention until they saw him suddenly roll down the hill for several feet. Thinking that he might be dangerously ill they hurriedly returned when they found him, to their horror, lying in a pool of blood with his throat cut. He was still living, but unable to speak. It was at once decided that one should go to town for help while the other remained with Dunsmore, and ten minutes later Keith Whimster struck out for Fernie. After six or seven hours of hard travelling he reached town almost exhausted and delivered his terrible message. It was at once decided to send relief parties, one to start that evening and the other in the morning. Nine men started out about 7 p.m. and by 10 o'clock their camp fire revealed them on the top of Mt. Fernie. About ten o'clock next morning they reached their destination and found poor Dunsmore dead, he having expired about an hour and a half after the departure of Whimster. Liphardt was suffering severely from hunger and from mental strain and for a time was unable to relate the circumstances, but in a short time under the care of Dr. Higgins was soon brought around again.

The relief party brought the body down the mountain, but owing to the terrible road they had to travel it was found impossible to bring it home, so they buried him in a beautiful spot on the banks of the stream which runs through the valley on the other side of Mt. Fernie, erecting a rough wooden cross to mark the spot.

There is nothing to account for the rash act of the young man, save a fit of temporary insanity caused by over exertion and the high altitude. He was the gayest one of the party up to the time he was taken ill and nothing was observed by either of his companions that would lead them to think that the act was premeditated. He came to Fernie several months ago from London, Eng., and his light hearted and jovial disposition has made him staunch friends who deeply regret his terrible death.

His uncle and aunt, Mr. and Mrs. J. A. Rennie, were grief striken by the terrible news and the people of the town unite in extending them their most sincere sympathy.

WILL COMPLETE ROAD THIS FALL

The following from the Rossland Miner is of deep interest to the people of Fernie as well as Rossland:—

"We are assured of a sufficient supply of coke to operate the Northport smelter at three-fourths capacity. This supply will be from eastern sources and the price is somewhat greater than we have had to pay heretofore. I do not think that the mines at Fernie will be operated smoothly and a sufficient amount of coke available to supply the British Columbia smelters with enough surplus to enable the Crow's Nest Pass Coal Co. to ship coke to Northport in less than two months, and by that time we should be receiving coke from Fernie over the Crow's Nest Southern road at a price that will be much more advantageous to the smelter than the scale now in effect." The foregoing is from John H. Mackenzie, general manager of the LeRoi mine and smelter.

Mr. Mackenzie supplemented his remarks by stating in reply to a query from the Miner representative that the operation of the smelter would mean that the local situation—with respect to the employment of men—would no be affected. It was feared a few days since that the unfortunate shortage of coke would prevent the Northport smelter from resuming operations at once, and that this would naturally have the effect of compelling the mines shipping to the plant to reduce their working crews by cutting off the men engaged in stoping and handling ore until the smelter was once more prepared to smelt ore. It is apparent now that arrangements have been made that will obviate this move, and citizens of Rossland will be genuinely pleased to learn of the improvement in the outlook.

The completion of the Crow's Nest road tapping the East Kootenay coal fields will be an important event from the viewpoint of the interests of the Rossland camp, and it is promised that developments in connection with the Great Northern railroad will further improve the outlook for the camp.
