The great rooms are spotlessly white and clean, not a mark on the floors or walls, and most surprising, not a particle of flour or dust floated in the air. So attractive are the mills as show places that no less than 3,000 ladies have visited the Winnipeg mills of this company during the past 18 months.

APPRECIATED BY ROYALTY.

The most distinguished of these visitors was H. R. H. the Duchess of York—now Princess of Wales. So charmed was she with the surroundings that the Ogilvie Flour Mills Co. have been appointed by Royal Warrant, millers to the Prince of Wales, and bakers in the royal household are commanded to use no other flour than the product of the company's mills.

There is a triple compliment in this appointment, to the country, to the company and to the product. The attention that is naturally directed to Canada by such unique distinctions as this does not affect simply the one line, but kindred lines, and generally speaking all the agricultural products of Canada. Practically the whole of the Dominion gains by the position occupied by the Ogilvie Flour Mills Co., apart from the great sums of money spent by them in Canada.

The Prince of Wales' three feathers on each bag is a distinguishing mark. Very few customers are unacquainted with the trade marks and registered design, every bag being sewn with red, white and blue cords.

WELL KNOWN BRANDS.

The two brands sold throughout Canada and the flour importing countries of the world are Ogilvie's Glenora Patent and Ogilvie's Hungarian Patent. All that science and mechanical knowledge combined could do for the perfecting of flour making has been applied to the manufacture of Ogilvie's Flour, and as they have led in the past, so have they the advantage of the future.

The evolution of flour making from the primitive grinding of grain in the East thousands of years ago through all its mechanical and scientific gradations to its present condition as indicated in the Ogilvie mills, produces these two brands which are the perfection product of the chief of cereals.

While the buyers of the wheat in the West are amongst the most expert in the world, having had a long connection with the Company, and while the wheat selected is only the best, yet the most exacting tests are continuously made as the flour passes through its final stages to see that its quality is maintained. Experts are employed for this work alone, and a standard of uniform excellence is maintained.

THE COMMERCIAL STANDARD OF CANADA.

Ogilvie's is practically the standard by which flour is graded in Canada, and we notice the Toronto Globe and other papers base their quotations on Ogilvie's brands.

Consumers whether large or small should understand that it is to their interest to use this flour in preference to inferior qualities and in getting Ogilvie's they may rest satisfied that they have the best.

It is a deduction simply made from the facts that it would be impossible to produce a better flour than Ogilvie's. The conditions and circumstances are so largely in their favor that it would hardly be reasonable that any other manufacturing concern should claim an equality of product.

The bakers of Canada are the best judges amongst Canadians of the properties of flour and they recognize the advantage of using the very best flour and accept Ogilvie's as giving the greatest satisfaction.

The success of a business can be made or marred according to the good or bad quality of a material used, and when the best can be obtained it shows only reasonable commercial instinct to select the best in preference ever to second best.

OGILVIE'S ROYAL BREAKFAST FOOD AND OGILVIE'S OATS.

At the present time we are deluged with a multitude of breakfast foods, and many of uncertain origin and still more uncertain value. A great many of these are imported, so that the item of duty is added to the original cost and consumers in Canada pay fancy figures for them. The basis of a breakfast food is the quality of its constituent parts. This is supplemented by the process it undergoes. Ogilvie's Royal Breakfast Food is produced from the best selected wheat, carefully and scientifically prepared to retain its nutriment and present it in a most palatable and digestible form.

Ogilvie's Royal Breakfast Food has all the good qualities claimed for the best of them and the fact that it is Ogilvie's is the best guarantee of its purity, its value and its excellence. Amongst breakfast foods this one has a value on a par with the value of Ogilvie's flour amongst other flours.

"Ogilvie's Oats" is an old-time favorite for the breakfast table and is known throughout Canada. It is simply a preparation in which the best qualities of the grain are preserved and which has stood the test of years.

THE MANAGEMENT AND ITS AIMS.

The guiding spirit in this vast concern is the Vice-President and Managing Director, Mr. F. W. Thompson, who has been associated with its success for the past twenty years and who now in the prime of his life is projecting plans for improvement and development that the marvellous growth of the country justifies.

The objective point of Mr. Thompson and those associated with him, to make the Ogilvie Flour Mills Co. not only the largest in the British Empire but one of the largest in the world is likely to be realized at no distant date. The pride with which all classes of Canadians view the progress of this great representative concern should be some return for the untiring energy and commercial genius of the man on whose shoulders rests the success of the industry.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

Qu'Appelle district will market 600,000 bushels of wheat.

Right Hon. Joseph Chamberlain may extend his visit from South Africa to Australia and Canada.

A survey party at work 70 miles from Winnipeg had an exciting experience with timber wolves. The animals surrounded the party and kept them busy all night.

Workmen in Pittsburg greeted returning soldiers from the anthracite mines with stones, mud and concrete.

Fifteen hundred longshoremen are on strike at Montreal, crippling the shipping industry.

Harry C. Adams died at Rossland last week as the result of terrible injuries received in the Le Roi mine, where deceased was employed as timber man.

The Doukhobor men defied the authorities at Yorkton, and started for Winnipeg, leaving their women and children locked up in the immigration hall and warehouses of the town. The party were eventually prevailed on to return to Yorkton.

Mrs. Mary Feeney, while passing the city hall, Toronto, dropped to the ground, and having hemorrhage bled to death before medical aid came.

Robert Watson, a passenger conductor on the Algoma Central, was fatally injured while shunting cars at Michipicoten on October 30.

Peter A. Morrison, residing at 707 Queen's avenue, London, Ont., died while on duty as an engineer. He left London on a freight train, and when at North Bothwell he was observed by his fireman to reel and fall as if in a faint. Morrison was at once removed to the station and died immediately. Heart failure was the cause.

Harry Towns, of Toronto, was killed on the railway on October 30. He left Toronto in the afternoon for Huntsville to go into the hotel business. At Gravenhurst he was walking on the platform when the train began to move out. He ran to catch it, missed his footing and was instantly killed.

The ideal German forests are grown on a rotation of a hundred years. As the oldest trees are felled new ones are planted, so that the forests never grow less.

FERNIE FREE PRESS.

FERNIE, B.C.

The Germans are ever keen for foreign trade, and are now teaching the Chinese language to their commercial students. While the Chinese language is very complicated, it has been simplified to a very great degree for the purposes of commercial usage.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed for ever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

MARKETS.

(Compiled from The Commercial)

WHEAT—A steady stream of wheat has been moving eastward this week, at the rate of 250 to 300 cars per day, which appears to be as fast as the railways can handle it. Farmers are pushing their fall plowing work as much as possible, otherwise there would be more wheat marketed at country points than has been coming in. As it is, however, several country markets are still blocked this week, the elevators being full, cars not being available not fast enough to keep them clear. It is therefore just as well that the pressure to market grain is not heavier. Threshing was interfered with by the rains, which were general at the close of last week, this being almost the first break since threshing started. Very fine, mild weather, however, prevailed this week. Threshing is well advanced, and promises to be finished in good time. The quality of the wheat continues to show up extra fine, being nearly all No. 1 hard and No. 1 northern, with a little No. 2 and No. 3 northern, but scarcely anything in the other grades. A prolonged storm on the upper lakes at the close of last week and the beginning of this week interfered with shipments by water from our Lake Superior ports, and led to a rapid increase in stocks there. Elevators A and B and Fort William were filled up and elevator C was called into requisition for a time. Later the boats were able to move again, and on Thursday it was reported that no less than seven steamers were loading wheat at Fort William that day. Receipts of wheat of this crop at Fort William and Port Arthur up to October 15 amounted to 6,557,000 October 15 amounted to 6,557,000 bushels for the corresponding period of last year. Shipments by water from the ports named for the same period were 5,150,000 bushels. Approximately 13,500 cars of wheat of this crop have been inspected to the end of this month, or equal to about 11,500,000. This represents the total movement of the crop eastward from country points, not including flour. The official figures have not been made up yet, but this estimate is close to the actual amount. This shows much the largest movement on record here. An estimate of the crop by the local Grain Dealers' association places the total at 64,283,000 bushels of wheat for Manitoba and the Territories, or equal to an average yield of about 24½ bushels per acre. There has been a good demand for spot wheat at Fort William to make up cargoes, at firm prices. There has been an advance on the week of ½ to 1c in value, and at the close of Friday's business prices were 1 hard, 72½c, and 1 northern, 70¼c, immediate delivery; 71¾ and 69¾c delivery first half November, and 71½ and 69½ delivery last half November, all in store Port Arthur or Fort William 2 northern is 4c, 3 northern 6c and No. 4 wheat 10c under the price of 1 hard.

OATS—The market has not changed perceptibly since a week ago, so far as prices are concerned. There is, however, a firmer feeling in sympathy with the bullish advices from Toronto and Montreal of the past week, coupled with the fact that cars are short here which makes it difficult to keep stocks moving freely. Moreover farmers are seemingly not very anxious to seel at present prices. These influences have created the firmer feeling noted, which manifests itself in the shape of an advance in the quotations which some dealers make for their oats. We have not heard of any trading at the higher figures, as feed merchants and others seem to be able to secure what oats they want on the old basis. No. 2 white oats are worth 26¾ to 27c per bushel at Fort William. At country points farmers are getting 20c per bushel at central points.

BARLEY—Receipts are light. Dealers are paying 33c per bushel for carlots of malting grade on track here, and 27 to 30c for feed.

FLAXSEED — The market has declined. Dealers are now paying 97c to $1 per bushel to farmers at country points.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—$6 to $7 per ton for fresh baled in carlots on track, Winnipeg.

POTATOES—30c per bushel.

BUTTER—Creamery—The season is becoming advanced, and the make is falling off. Local creameries are getting as high as 23c per pound for choice creamery, and the market ranges from 20 to 23c per pound.

BUTTER—Dairy — Jobbing houses are buying most of the receipts outright, and are paying 14 to 15c net for best grades. Seconds are worth 12 to 14c net.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—18c per dozen.

DRESSED MEATS — Beef, city dressed, 5½ to 6¼c, country stock, ½c less; mutton, 8 to 9c; lamb, 11½c; hogs, 9 to 10½c.

HIDES—Dealers are now paying 6½c for No. 1 hides, 5½c for No. 2, and 4½ for No. 3. Calfskins same price as hides. Horse hides 50c to $1 each

SENECA—Best root, 52c per lb.

"WELL, THANK YOU."

A Granton Man is now Able to Make this Answer.

Inquiring Friends did not always get such a Cheery Reply because for Many Years Mr. Fletcher Suffered with Lumbago.

Granton, Ont., Oct. 12. (Special)—Mr. John Fletcher, a well-known farmer of this place who suffered for a long time with Lumbago and Kidney Trouble, has at last found a cure Now, when his friends inquire as to his health, he cheerily tells them that he is well, something which he has not been able to do for a long time, till quite recently.

Mr. Fletcher tells the story of his illness and how he was cured, as follows:

"I was troubled for a long time with Lumbago and Kidney Trouble. My urine was of a very red color. I tried many medicines but could get nothing to help me.

"I consulted the best medical doctors in Granton and St. Mary's, but they could do nothing for me.

"At last one day a druggist in Granton suggested Dodd's Kidney Pills as a cure for my Lumbago. I purchased a box and began to take them right away. The first box helped me and I kept on till at last I was completely cured.

"I am now as well as ever I was and have not any trace of Lumbago about me. I am perfectly sound and I thank Dodd's Kidney Pills for it.

"I recommend them to all my friends, and as for myself I never intend that my house shall be without them, for I believe them to be the greatest medicine in the world."

Mr. Fletcher is a man who means every word he says, and is prepared to substantiate the truth of every statement made above.

There seems to be no case of Lumbago, Backache, Kidney Trouble, or Rheumatism that Dodd's Kidney Pills will not cure.

"No; she's no better," said a woman when the doctor came to visit her husband. "You told me to give him as much of the powder as would lay on a ten-cent piece. I hadn't a ten, but I have him as much as would go on ten ones, and he's worse, if anything."

THE MODERN MOTHER.

Has Ways of Caring for Baby That Our Grandmothers Never Knew.

Many almost sacred traditions of the nursery have been cast aside by the up-to-date mother. Even the one essential cradle is now seldom found in the house blessed by Baby's presence. The modern baby is not fed every time he cries, but when the clock announces the proper time. The doctor approves of this, and baby is better for it, but despite regular hours of feeding, nearly all the disorders of infants are caused by derangement of the stomach and bowels. Mothers' greatest problem is a treatment of these ills that will be gentle but effective, and, above all, safe. Mrs. J. W. Bailey, of Head Lake, Ont., writes from the fullness of experience when she says' "I have used Baby's Own Tablets for my six months old baby who was troubled with indigestion. The results were beyond my expectations. Words cannot convey to those who have not tried them the worth of these Tablets. I will never again use any other preparation for the baby, as I am convinced there is nothing so good as Baby's Own Tablets."

These Tablets are a gentle laxatide and comforting medicine for infants and children. They are pleasant to take and are guaranteed to contain no opiate. If your druggist does not keep Baby's Own Tablets send 45c to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y., and a full sized box will be mailed, post paid, to your address.

Polo is probably the oldest of athletic sports. It has been traced to 600 B.C.

Chronic Derangements of the Stomach Liver and Blood are speedily removed by the active principle of the ingredients entering into the composition of Parmelee's Vegetable Pills. These pills act specifically on the deranged organs, stimulating to action the dormant energies of the system, thereby removing disease and renewing life and vitality to the afflicted. In this lies the great secret of the popularity of Parmelee's Vegetable Pills.

The Japanese eat more fish than any other people in the world. With them meat is a foreign innovation, confined to the rich, or, rather, to those rich people who prefer it to the national diet.

No Danger.

Prof. W. Hodgson Ellis, Official Analyst to the Dominion Government, has proved by analysis that "Sunlight Soap is a pure and well-made soap, and has a thorough cleansing power, without danger to the clothing or skin."

Clothing is worn more in the wash than in use where common soaps are used, and the hands are liable to eczema. Try Sunlight Soap—Octagon Bar—next wash day, and you will see Prof. Ellis is right. No one should know better than he. 222

Blue Ribbon Tea relished from youth to old age Are you drinking it?

Ping-Pong is to be played in a glass house by a Dublin club, which has just been formed for the enjoyment of the game.

There never was and never will be a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient — what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease and by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses through the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto, have given to the public their Superior Quinine Wine at the usual rate, and, guaged by the opinions of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

He is a wise son who knoweth when his own father will stand for a touch.

Minard's Liniment Cures LaGrippe.

About 300,000 cases of dynamite are used annually at the Johannesburg mines.

As Parmelee's Vegetable Pills contain Mandrake and Dandelion, they cure Liver and Kidney Complaints with unerring certainty. They also contain roots and herbs which have specific virtues truly wonderful in their action on the stomach and bowels. Mr. E. A. Cairncross, Shakespeare writes: "I consider Parmelee's Pills an excellent remedy for Biliousness and Derangement of the Liver, having used them myself for some time.

All the world's a stage and all the women thereon want speaking parts.

REV. R. F. STILLMAN, - - Pastor.

TO-DAY'S DESPATCHES.

Kingston, Nov. 7—The trustees of Queens University have named a committee to select the new principal for Queens. All candidates previously mentioned are out of the running.

Rossland, B.C., Nov. 7—The announcement is made that the profits of the Le Roi Company in October were slightly over $85,000. This is regarded as a particularly good showing.

West Fairlee, Vt., Nov. 7—A blast furnace at the Westinghouse mines here clogged and burst today, killing an Italian and possibly fatally wounding another Italian, and seriously wounding another man.

Glasgow, Nov. 7—The Associated Press understands that in the Shamrock III. there will be embodied some radical departures from the principles of construction employed in previous challengers. These changes are said to be due to an accidental discovery made during the trials of Shamrock II., but discovered too late to admit of remodelling her. The explanation of this discovery had great weight in deciding Sir Thomas Lipton to try for the American cup a third time, and the designers are convinced that they will now be able to build a yacht superior to any previous racers, and are certain they have evolved an idea which effects the whole theory of propulsion of sailing yachts.

Washington, Nov. 7—Col. C. D. Wright and Col. J. Wilson, members of the anthracite coal strike commission had a brief interview with the President today. They reported that the individual operators in the anthracite region have agreed to abide by the findings of the Commission, and have so notified Judge Gray, Chairman. President Roosevelt was quite pleased over this information. The Commissioners explained their work up to this time. The President expressed his gratification that the work had been satisfactory to those engaged in it.

Fred Simpson of the Cranbrook Herald was in town over night and gave the FREE PRESS a fraternal call.

Contractors are seriously handicapped in their building operations by the scarcity of dry lumber for finishing purposes. This, together with the fact that winter is coming on will probably delay the completion of some buildings until spring.

Winter has been gradually creeping upon us all week until this morning we awoke to the fact that it has fully arrived. The thermometer registered at zero and the depth of snow has reached nearly 12 inches. The draymen and teamsters will welcome the snow as the roads were not in good wheeling condition. The merchants will likewise welcome the coming of the beautiful as it will generally improve trade, and as we dont have to pay Eastern prices for coal we think no one will regret the arrival of Winter.

R. J. Black returned on Monday from a six-weeks visit in Ontario. The hearty welcome he received from his host of friends was followed by many expressions of regret when they learned that he has come back only to say good-bye. Mr. Black has resigned his position in the C.P.R. office here and leaves early next week for Scribner, near Fort William, where he has accepted a more important and remunerative position with the same Company. "Bert" is a general favorite in Fernie and will be greatly missed by every one. Bert's absence will also be a serious loss to the Athletic Clubs of Fernie His able management of the Hockey Club last winter merited great praise and it is largely due to his untiring efforts as Captain of our Lacrosse Club this year that our Club attained the high degree of excellency it possesses.

THE HOCKEY CLUB ORGANIZED

The Boys Get into Line under the Most Favorable Conditions.

On Tuesday evening a large number of hockey enthusiasts met in the Cuthbert Block to organize the Club for the coming season. The greatest harmony and enthusiasm prevailed throughout and a glance at the list of officers selected shows that a large amount of sound judgement was in evidence as well.

The officers elected are as follows:—

Hon. Pres.—J. H. Tonkin.
Pres.—J. H. Bricker.
Vice Pres.—A. C. Liphardt.
Secy. Treas.—Milton A. Kastner.
Captain—J. Miller.
Executive Committee—A. Matheson, W. Dewar and A. Thompson.

A meeting of the Clubs interested in the Crow's Nest League, Cranbrook, Pincher Creek and Fernie, will shortly take place to arrange a schedule. Each team sends a delegate and M. A. Kastner was selected by the meeting to represent the Fernie Club at this conference.

The fees were fixed at the same as last year, active members $2 and honorary members $1.

On Tuesday evening two men from Morrissey were up for trial before Magistrate Trites on the charge of stealing a jug of liquor from a man by the name of Frank Alexander. The evidence for the prosecution was so weak that the prosecuting counsel withdrew the information.

Statements of claims in thirteen of the damage suits against the Crow's Nest Pass Coal Company, brought by widows and orphans of miners killed in the disaster at Coal Creek mine last May, were filed at Nelson on Tuesday by Taylor and O'Shea.

J. F. Jarvis

Notice is hereby given that thirty days after date I intend to apply to the Chief Commissioner of lands and works for a license to prospect for coal upon the following discribed land situated in East Kootenay on the east side of the Flathead river about fourteen miles north of the Boundary line, commancing at a post being the north east corner of Amos Bliss Trites' claim, thence south 80 chains, thence west 80 chains, thence north 80 chains, thence east 80 chains to the place of beginning, containing 640 acres.
Located October 2nd 1902.

AMOS BLISS TRITES, Locator.
HENRY KRUSE, Agent.

Public notice is hereby given that sixty days after date, I, F. R. Delzell, intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the following unoccupied and unsurveyed land in Southeast Kootenay district, B.C., commencing at a post planted quarter of a mile east of Delzell's northwest corner, thence 80 chains north to H. W. Petrie's south line, thence following said line east 40 chains, thence 80 chains south, thence 40 chains west, to point of commencement, containing 320 acres more or less.
Dated at Michel, Sept, 22nd, 1902.

F. R. DELZELL.

Notice is hereby given that I, the undersigned, intend thirty days after the first application of this notice, or as soon thereafter as the application can be heard, to apply to the Assistant Commissioner of Lands and Works at Fort Steel, for license to prospect for coal and petroleum, upon the following described land, situate in East Kootenay, on the east side of Elk river, beginning at a post marked J. W. Leonard south-west corner post, which is the south-east corner of J. F. Miller's coal and petroleum claim, thence east 80 chains, thence north 80 chains, thence west 80 chains, thence south 80 chains to the point of beginning and containing 640 acres.

J. W. LEONARD,
Dated this 14th day of Oct., 1902. 200-5

Notice is hereby given that I, the undersigned, intend thirty days after the first publication of this notice, or as soon thereafter as the application can be heard, to apply to the Assistant Commissioner of Lands and works at Fort Steele, for license to prospect for coal and petroleum, upon the following described lands, situate in East Kootenay, on the east side of Elk river, beginning at a post marked R Marpole south-west corner post, which is the south east corner of G. G. Blaylock's coal and petroleum claim, thence east 80 chains, thence north 80 chains, thence west 80 chains, thence south 80 chains to point of beginning and containing 640 acres.

R. MARPOLE
Dated this 14th day of Oct., 1902. 200-5

A far away look....

may be caused by absence of mind of shortness of sight.

Perhaps one is the cause of the other. Failure to submit to an eye test and neglect about procuring suitable eyeglasses or spectacles may cause permanent injury to the sight. By relieving eye strain now the sight will be strengthened and the use of glasses may only be temporary. We make tests free of charge.

A. C. LiPHARDT.

Notice is hereby given that I, the undersigned, intend thirty days after the first publication of this notice, or as soon thereafter as the application can be heard, to apply to the Assistant Commissioner of Lands and Works at Fort Steele for license to prospect for coal and petroleum, upon the following described land situate in East Kootenay, on the east side of Elk river, beginning at a post marked, J. F. Miller south west corner post which is the north west corner of J. Labarth's coal and petroleum claim thence east 80 chains, thence north 80 chains, thence west 80 chains, thence south 80 chains to point of beginning and containing 640 acres.
Dated this 1st day of Sept., 1902.

J. F. MILLER.

PUBLIC NOTICE is hereby given that sixty days after date, I, George H. Scott, intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the following unoccupied and unsurveyed lands in South East Kootenay District, B.C. commencing at a post planted at the south east corner of Frank Harmer's pre-emption, on the west bank of the Elk River, about five miles north of the mouth of Michel Creek, thence west along Frank Harmer's southern boundary 60 chains to the north west corner, thence south 80 chains to the south west corner, thence east 60 chains to the western bank of the Elk River, thence North along the western bank of the Elk River upstream 80 chains to the place of beginning, containing 480 acres more or less.
Dated the 8th day of September 1902

GEO. H. SCOTT.

Notice is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal and petroleum on the following described lands situate about two miles north of Foss and McDonnell's townsite, Morrissey, B.C., East Kootenay district and commencing at a post marked Thomas Morrison's south-west corner adjoining Chas. Walde's south-east corner post thence north 80 chains, thence east 80 chains thence south 80 chains, thence west 80 chains to place of commencement.

THOMAS MORRISON.
Daniel McKenzie, agent.
Sept. 30th, 1902.

Notice is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal and petroleum on the following described lands situate about two miles north of Foss and McDonnell's townsite, Morrissey, B.C., East Kootenay district, and commencing at a post marked Chas. Walde's south east corner thence north 80 chains, thence west 80 chains, thence south 80 chains, thence east 80 chains to place of commencement.

CHARLES WALDE,
Daniel McKenzie, agent.
Sept. 30th, 1902.

Notice is hereby given that thirty days from date that we will apply to the Chief Commissioner of Land and Works for a twenty-one year lease to cut and carry away timber from a tract of land containing 3320 acres more or less situated on the west side of Elk river about two miles from the mouth of Michel creek, beginning at a post planted on the north side of what is known as Wilson creek about 1½ miles from its mouth, west 640 chains, thence north 60 chains; thence west 60 chains, thence north 60 chains, thence west 60 chains, thence south 260 chains, thence east 60 chains, thence north 60 chains thence east 60 chains, thence north 60 chains, thence east 640 chains, thence north 20 chains to place of commencement.

J. COWARD & SON.
Dated this 8th day of October, 1902.

Notice is hereby given that I, the undersigned, intend thirty days after the first publ cation of this notice, or as soon thereafter as the application can be heard, to apply to the Assistant Commissioner of Lands and Works at Fort Steele for license to prospect for coal and petroleum, upon the following described land, situate in East Kootenay, on the east side of Elk River, beginning at a post marked C. W. Spencer south-west corner post which is the south-east corner of J. Labarth's coal and petroleum claim, thence east 80 chains, thence north 80 chains, thence west 80 chains, thence south 80 chains to the point of beginning and containing 640 acres.

THE MICHEL STRIKE.

SITUATION AT MICHEL NOT INPROVING

Miners at Fernie, Michel and Morrissey are Talking of Forming a District Union.

The strike of the miners at Michel is still on and the mines are tied up. Many of the outside men have been laid off by the manager. The principal cause of the trouble, it is said, is not the dismissal of the Presdent of the Miners Uuion, but the granting by the Company of contracts on which cheap labor is employed.

J. A. Baker, of the Western Federation of Miners, has been making a thorough investigation of the trouble aud is now in town advising the Gladstone Union. On Wednesday evening a joint committee of the Michel and Fernie Unions were appointed to interview General Manager Tonkin and this conference which is on as we go to press is generally expected to result satisfactorily to all concerned.

It is reported that some of the men went back to work yesterday and later on a rumor reached the authorities that a riot was pending between these men and the union. Constables Dowe and Tranter were wired to go to Michel and their timely arrival doubtlss averted serious trouble. A Slav. more venturesome than the rest of the men who had gone to work, aroused the ire of the crowd of miners by some insolent remarks, and he received rough usage in consequence. It is reported that this man has received his dismissal from the Company.

At a special meeting of the Gladstone Miners' Union held last night at which were delegates from Morrissey and Michel Unions, the subject of forming a district union was discussed. The opinion is held by these unions that as the same company operates the three mines one general union should be formed to look after the interests of the miners in the three camps.

OPERATORS' REPLY.

Agree in Denouncing Labor Unions' Methods and Morals.

Scranton, Nov. 12—The answer of the independent operators of the Lackawanna and Wyoming region to the statement of president Mitchell, of the mine workers, was made public to-night.

In response to the demand for an increase in wages they say that the present wages are such as to enable the diligent and and skilful miner to earn more in an hour than any class of labor, skilled or unskilled, in the towns in which the mines are located, and amply sufficient to allow him not only to maintain an American standard of living and to educate his children, but to lay aside something for his old age.

That some miners' wages are small it is stated, is because they choose to exercise their option to work only a few hours a day.

In answering the sentiment that mining is extremely dangerous and unhealthy and tends to shorten life, the operators set forth a petition recently circulated in the interests of a candidate for mine inspector which contained the names of ninety-five employees of one mine, sixty-six of whom had worked in the mine for twenty years or more, and twenty for forty years or more, and five for fifty years or more.

The demand for the weighing of coal and payment by the legal ton of 2,240 pounds instead of by the fictitious ton of 2,750 or 3,000 pounds, is characterized as a thinly disguised effort to secure a 40 per cent increase in wages. They assert that 2,750 pounds of coal as it comes from the mine is barely sufficient to produce a 2,240 pounds ton of prepared coal.

Regarding the declaration of the miners that labor unions improve the morals and discipline of the members, this comment is made: "This may be true when applied to some organizations but when applied to the miners' union we enter a most emphatic denial, and propose to introduce evidence showing that prior to the advent of the United Mine Workers of America it was considered bad form to kill or maim a citizen who attempted to exercise his constitutional rights to sell his labor, and that the vast numbers of brutal murders and beatings during the past five months show that the teachings of the United Mine Workers has brought about such moral obliquity that its members believed themselves justified in these acts. Also that the officers of the union justified this course by furnishing bail and counsel for those who have been guilty of these atrocious acts. We believe we will be able to prove such tremendous losses of life and money as the direct results of this particular union, as to convince your honorable body that it is not expedient to do any act which may contribute to its continued existence.

COMMUNICATIONS.

The Editor does not hold himself responsible for the opinions expressed by correspondents.

To the Editor

Will you kindly give me space in your paper to state my position with regard to the trouble in Michel? Some time back I was asked to take a contract of a certain piece of work, I asked the president of the Michel Union if he would bring the matter before the union which he did. He told me that some of them thought it would have to be stopped, I also spoke to several members of the union, they told me the matter had been discussed but as it was done in Montana and all the western states they did not think they had any right to interfere as long as I paid the standard wages, which I agreed to, and more than do,—viz., three dollars and fifty cents for miners and two dollar and seventy-five cents for back hands.

The only man that opposed it was one Harry Bell, of Nanaimo, who commenced work in a stall I left, where I made over $6 per day and he failed to make $3, in fact he could not put up a set of timber so left it, and came to me and offered to back hand for me if I would give him $3 per day. As I have always paid $3 or $2.75 ever since I have been in Michel, I told him to stay where he was. He left it and went bratticing, he then went into another place which crossed an old stall and as there was some timbering to do Mr. Collings, the mine foreman, laid him off until the timbering was done. He (Mr. Bell) says it is against union principals to work with a back hand, we ought to work partners, but at the same time the president of the union and himself each had two back hands and paid them $2.50 each. When the president failed to get the union to act he acted himself, so went to my men and told them that if they did not quit working for me he would turn them out of the union and place their names on the black list, so some quit and when I engaged others he went to one of the fire bosses and asked him who was working for me, failing to get a favorable reply, he said, "I will find out and will make them quit before the week is out if I have to stop the mine." The superintendent hearing of it discharged him. But the union that refused to take action on my contract when the president took action and got discharged, came out on strike for him to get his work back. This Mr. Editor is the cause of all the trouble in Michel which is sending some of our best men away disgusted and leaving men here with families in a queer position. Thanking you Mr. Editor for your space. I remain

R. G. DUGGAN.

Michel, B.C., Nov. 13th, 1902.

WIRELESS TELEGRAPHY.

The announcement of the plans of the Marconi Wireless Telegraph Co. has been made by the solicitor, J. N. Greenshields. A system will be established across the Dominion of Canada connecting Victoria with Cape Briton. Stations will be erected at all the cities and principal towns included in the system, Winnipeg, Regina, Calgary, Revelstoke, Kamloops, Vancouver and Victoria being among the number.

The saving of tolls will be great when the new system is in vogue, for press messages will be sent for one half the present rate while there will be a reduction of 60 per cent. on commercial messages. Mr. Greenshields states that there is no longer any doubt regarding the success of the Marconi system and that the official announcement to this effect can be expected at any time.

COMMISSION AT WORK

PRESIDENT MITCHELL BEFORE THE COMMISSION.

He Submits Proposition to Prevent Local Strikes.—A Trying Day on the President.

Scranton, Nov. 14.—The anthracite coal strike commission to-day began the hearing of testimony by which it will determine whether or not the workmen are receiving a fair and just wage for their labor and whether their conditions can be improved. The star witness for the miners was President J. Mitchell. He took the stand in the forenoon and when the commission adjourned at four o'clock in the afternoon he was still under the fire of cross examination by D. W. Wilcox, general counsel for the Delaware & Hudson Company. It was a trying day for the Miners' leader, but he seemed to stand the test well. Mr. Mitchell handed in a written statement which among other things contained the following: "For the information of the commission we herewith outline more specifically a plan of procedure which if adopted would prevent local strikes and preserve peace and harmony during the time covered by the award which you are empowered to make. First the rate of wages, the hours of labor, the method of weighing and paying for the product of the miners' work should be incorporated in an agreement between the representatives of the organizations of which the complainants in the case are members. Second, there should be a committee of the conservative representative mine workers selected by the employees at each colliery. It should be the duty of this committee to cooperate with the mine foreman and the mine workers involved. Third: Should the mine foreman and committee fail to adjust the grievance complained of the matter in dispute should be referred to the company's superintendent and said grievance committee, which should be constituted of representative mine workers from each colliery effected by any one company. Should this fail to adjust the trouble it should be referred to the general manager of the company and the district president of the miners organization and should they fail to adjust it they should call upon the services of some disinterested persons whose decision should be final. Pending an adjustment in the manner set forth, the miner and the mines should continue at work.

DEATH OE W. A. PREST.

When death came last Tuesday to relieve William Archie Prest of his sufferings, Cranbrook lost a citizen who had not an enemy. During his four years residence in Cranbrook, he quietly persued his own course, displaying at all times a kindness of heart that won for him the esteem and love of all. No man ever heard Mr. Prest say a harsh word or saw him do an unkind act. He was always ready to help a friend, and by his labor or as his means permitted, to do all in his power for the advancement of the community where he had made his home. The news of his death will bring sorrow to many hearts, for he was a good man, a good husband and a good father.

Mr. Prest was born in Guelph, Ont., in 1850, and has been married about 26 years. For 18 years previous to coming to Cranbrook he had lived in Portage la Prairie, Man., where he was engaged in the stationary business and the publication of a newspaper. Later he embarked into photography and since coming here, by the great assistance of his wife had established a large business in this district, having studios in all the principal towns. He leaves a widow and one child, Cecil, bookkeeper for G. H. Miner, brother and sister in Toronto and a brother in St. Paul.—Cranbrook Herald.

R. J. BLACK BANQUETTED.

On Monday evening a banquet was given in honor of Mr. R. J. Black in the dining room of the Royal Hotel, Though the affair was of an impromptu nature being prepared on only a few hours notice, it proved a great success. A large number of Mr. Black's friends, many of them lacrosse and hockey enthusiasts, were in attendance.

After ample justice had been done to the needs of the body, Mr. A. C. Liphardt was elected chairman, and in a happy manner proposed the toast of the evening. The program of the toasts with the names of those who responded follows:

The King—"God Save the King."
Our Guest—Messrs. Black, A. Thomson and J. McLean.
The Lacrosse Club—Messrs. Blundell and Wrigglesworth.
The Hockey Club—Messrs. J. Miller and M. A. Kastner.
The Ladies—Messrs. Moe and Matheson
Our Host and Hostess—W. Tuttle.

In proposing the toast of the evening the chairman referred to the sterling worth of "Our Guest" and to the general regret felt by his many friends over his departure from Fernie, and closed by presenting him with a beautiful gold locket suitably engraved, as a small token and memento of the friendship of the boys of Fernie. Mr. Black in reply feelingly expsessed his gratitude to his friends for their many kindnesses past and present. He assured them that he would carry away with him many pleasant recollections of his stay in the Crows Nest Pass. "Auld Lang Syne" suitable closed a very pleasant evening.

COAL COMPANY FOR ALBERTA.

A New Organization for Developing Coal in this District

Macleod, Alberta, Nov. 4.—L. Ernst, of Nelson, B.C., has been in town for the last few days arranging through his solicitor, C. E. D. Wood, of Macleod, for the incorporation of "The Northwest Coal and Coke Company, Limited." The application for incorporation has been sent to Regina. The company is incorporated with a capital stock of three million dollars divided into thirty thousand shares of one hundred dollars each. The company's representative, who recently went to England, is now engaged in underwriting a very large proposition to the share holders of the company. The head office for the company for the present is to be in Macleod. The company are acquiring very extensive areas of coal lands in the Territories and will engage in operations as coal and petroleum miners and coke manufacturers. Without doubt it is one of the largest industries ever undertaken in the Territories and the lands which they are acquiring include some of the largest coal areas on the continent of America. A few such industries as this will place Alberta in the front ranks of industrial districts and will mean an immense development of not only the coal and coke business, but of every other line of industry in the west.—Winnipeg Free Press.

TO-DAY'S DESPATCHES.

Ottawa, Nov. 14—T. B. Flint, M.P. for Yarmouth, has been appointed Clerk of the House of Commons in succession to the late Sir John Bourinot. Nominations for Argenteuil, Maissonneuve and Yarmouth will take place on Wednesday, Nov. 26, and polling day will be Dec. 3. The North Grey election will go over until January.

Edmonton, Nov. 14—Robt. Heddell, a farmer residing near Leduc, has been shot and fatally wounded by a neighbor named Chas. A. Buckle. Heddell died of his injuries, and Buckle has become violently insane.

Toronto, Nov. 14—The officials of the Can. Marconi Co. organized here with a capital of $5,000,000, say that they have no plans yet for the development of the land business.

Toronto, Nov. 14—The Evening Telegram's London cable says the Privy Council has given judgment allowing the appeal of Ontario against the decision of the Supreme Court of Canada on the claim of the Province of Quebec against Toronto growing out of a common school fund in which Ontario was held responsible for $5,000 uncollected at the close of 1892.

Dentistry

Dr. Barber will return in the cource of a few days and may be found at his office from 8 a. m. until 8 p. m. He has installed a system of incandescent lights which enables him to do dental work in the evenings.

THE PARDONING OF SIDEWHEEL DAWSON

By D. H. Talmadge

Copyright, 1901, by D. H. Talmadge

Mr. Dawson's "fin" was weary from vigorous shaking, his back was sore from repeated slaps, his neck was chafed by the collar to which it had long been a stranger, but his state of mind was one of most excellent satisfaction.

A man who has been sentenced to twenty years of hard labor in the penitentiary and who comes forth free and in the full possession of his health at the end of five is certainly entitled to some felicitation. That was precisely what had happened to Mr. Dawson. He had killed his man under what appeared cold blooded circumstances to an intelligent jury. He had pleaded self defense conventionally, but the testimony was such that there seemed no doubt of his guilt. True, there had been no eyewitnesses to the slaughter. Those who testified merely told of threats he had made, of his bad reputation, of the peaceable character of his victim. The defense had called no witnesses.

"'Tain't worth while," Mr. Dawson had said to his attorney. "'Twould do more harm than good for any of me friends to testify to the gentleness of me disposition. Snapper Griffin'd have had me dead in another wink if I hadn't jerked the trigger when I did, and that's straight. He begun the trouble and kept pushin' it on, while I tried me levelest to reason with him. He'd been dopin' with somethin', I think, but he didn't wiggle a wiggle when he pointed his gun. He was himself all right, and there's some comfort in knowin' it, for I'd hate like blazes to feel that the only man I ever killed wasn't responsible for himself. I've got a mighty tender conscience, whether you know it or not, and it's perfectly comfortable now. I'll take whatever the court gives me, and I won't whimper a whimper."

The first night he slept in the penitentiary his attorney was delivering in the levee district a message to his friends. "Hump yourselves to get Van Altren elected governor," was the burden of it. The levee gang did not know exactly what to think, but they were sufficiently well acquainted with Mr Dawson to accept the instructions in good faith.

Mr. Dawson's message was entirely responsible for their action. To the contrary, it was only an important drop in a tolerably large tub of political suds. Their own candidate had "done them dirt"—quite by chance, certainly not by intention. He had allied himself in a moment of mistaken wisdom with the Prohibitionists. They were engaged in hesitating and grumbling and scowling when Mr. Dawson's message came, throwing the balance over to the Van Altren side. Sidewheel Dawson never did anything without a good reason, but what his reason was in this particular instance they could not conjecture. They were still in the dark on the day when Mr. Dawson unexpectedly and triumphantly returned.

"Say," said he after the first wave of welcome had passed and he was sitting comfortably in the rear room at Muggsy Kelly's place with a number of old and tried associates about him, "I'm owin' you boys a lot for the way you helped old Van to the puddin'. I was a bit leary you wouldn't get next to what I was up to, but it didn't cost nothin' to try."

"We didn't get next; we ain't next yet," candidly observed Mr. Kelly. "Is Van a partic'ler friend of yours?"

Mr. Dawson smiled. "No," he replied, "but he's got reason for believin' me when I tell him I shot Snapper Griffin 'cause Snapper Griffin was dead set on givin' me the long trip and for no other reason."

"We believe that," said Mr. Kelly. "We knowed your story was true, but we couldn't do nothin'."

"Course you couldn't. If any of you had stuck your mugs into the game, I'd have been queered to the limit. Likely I'd have got the drop and gurgle, and then Van couldn't have reached me even if his gratitude was twice as long."

"Then Van was owin' you somethin'?" Mr. Kelly and the others looked at Mr. Dawson with a common expression of curiosity and admiration mingled. "You've got us in the air, Sidewheel. Take us down or we'll bust."

Mr. Dawson laughed this time and rubbed his hands together. "Sure. I'll take you down," he said. "'Won't take me long to do it either. Muggsy, do you remember a little job we had on six years ago this summer down at Bayside, when"—

"When you was out all night and got nothin' but a pair of red eyes and a fit of sickness and a stink of gas?" Mr Kelly put in. "Yes, I remember. I almost lost me faith in you that time."

"Yes?" Mr. Dawson chuckled immoderately. "I was to divvy what I got from the place—that dead easy place with the open cellar windows you spotted one Sunday afternoon when you was strolling home from church. I was to divvy, and I got nothin' but"— He suddenly assumed a reflective attitude, his hand upon his smoothly shaven chin, his gaze upon the ceiling.

"But what?" Mr. Kelly spoke with the sharpness of a long starved and desperate inquisitiveness.

"But—gratitude. It was the rummiest go of me life. I followed the lay just as you'd give it to me. I went through the first floor first, gatherin' up stuff worth maybe a tenner of hundreds. If I'd quit right there, I'd—well, I'd be lookin' forward to fifteen more years of it 'stead of bein' here with me future before me bright as paste. But everything was so nice and quiet I just says to meself, 'I'll tour the next floor.' So I piles me stuff by the grand exit, where I can pick it up when I strolls out, and climbs the stairs.

"And the first thing I know I'm takin' part in a high life tragedy drama. 'Twasn't no supe part either; 'twas the role of the hero that drops in when he's least expected and saves the whole cheese. I opens the first door I comes to, and I nearly faints, owin' to gas. The room was full of it, and I closed the door, standin' for a minute with me hand on the knob thinkin'. 'Twas no picnic of mine, of course, but I couldn't help feelin' that somethin' was wrong—that somebody was tryin' to croak and that it was up to me to save 'em if they was to be saved. That settles it. I draws in two bagfuls of wind and opens the door again, slidin' across the floor to a window and raisin' the curtain, and then I tumbles. There's a girl on the bed and a letter on the table—the same old layout. I tries to raise the window, but it won't budge. It didn't take me all summer to find the leak. The stench was comin' from a hole in the wall where a pipe—one of these things that sticks out about a foot—had been busted off. She must have hung her whole weight on that thing and jumped up and down! But she'd got an elegant flow of gas—'way ahead of what she'd have got by turnin' on the burner, and the beauty of it was that nobody could turn it off. I couldn't see nothin' else to do but put me thumb over the hole, and that's what I done, takin' short breaths till enough of the vapor had got out at the door to let me pump somewhere near normal, and then"—

"And then?" Mr. Kelly had planted his elbows upon the table, contemplating Mr. Dawson fixedly.

"And then—I waited. What else was there to do? I couldn't sneak, leavin' things that way, could I? I'd have been ashamed to look an honest man in the face forevermore if I'd done that. And after awhile I hears a patti-pat in the hall and a dopy voice say, 'Seems to me I smell gas.' 'You're dead right, me friend,' I calls. 'Hustle in here, and don't strike a glim for your life!'

"And then I has the pleasure of makin' the acquaintance of the Honorable James Van Altren. He's in his pajamas and his hair is towseled and his feet have no coverin' and his eyes are blinky. 'Tis two minutes maybe before he can shake himself together. The first question he asks is a double header. 'Who are you and what is the meanin' of this?' he says. 'I'm a thief,' says I, 'and the young lady on the bed there is one too—at least she's been tryin' to rob the world of her presence.' 'My Gawd!' says he, seein' what's up. 'And what are you doin'?' 'I'm holdin' me thumb over this gas well,' says I, 'and I'm gettin' weary.'

"'Oh,' says he, and skips over to the bedside. He shakes the girl, and she sits up, starin' like a wild thing. Then he turns to me again. 'How long have you been here?' he says. 'I don't know,' says I, 'but plenty long enough to save the young lady's life. This room was a fright when I got here. Will you stick your thumb over this hole till I can rest me arm a bit?' And he sticks his thumb over the hole and I bids him a courteous adieu and slides, leavin' him there. I didn't stop for nothin', not even me lantern. I was sick. I was afraid I wouldn't be strong enough to get to a safe place before I'd have to stretch meself. Maybe you remember, Muggsy, how groggy I was for a time after I got here?"

"Yes," responded Mr. Kelly, with a succession of nods; "I remember."

"Well, that was the string I had on Van, and after I'd served what I thought was a fair time for what I'd done to Snapper Griffin I writes to the governor, recallin' to him the circumstance. And he comes down handsome, as I was sure he would. He gives me the honor of a personal interview, and he falls on me neck in a sort of a mild way and tells me that he believes me story regardless of the court, and he sends me a pardon, and that's all."

"Gee!" said Mr. Kelly after a thoughtful interval. "Supposin' Van hadn't been elected!"

"Don't!" said Mr. Dawson. "It gives me a horrible pain to think of it!"

"And the girl—what was the matter with her?" persisted Mr. Kelly.

"I didn't ask," responded Mr. Dawson. "'Twas none of me business."

If We Could Make You Understand

that we want to send you an Absolute Gift, you would read every word of this Advertisement, and answer it at once.

This Fleur-de-Lis Chatelaine Brooch and Locket is a gift to every person answering this advertisement.

SEND us your name and address on the below request, and we will take pleasure in sending you **free of any charge** this exquisite gold finished and hard-enamelled Fleur-de-Lis Chatelaine Brooch and Gainsborough Locket. This is a princely gift being finely gold finished and sells regularly at $1.00 The Secret-Locket opens and will hold two pictures. It is the embodiment of artistic skill and beauty. The present is unconditional, it being a bid for your friendship and good-will. With the Chatelaine Brooch and Locket we will send you ten boxes of Standard Electine Medicines to sell, if you can, at 25 cts. each; then return us our money and we will give you absolutely free all the following magnificent premiums: One Genuine Solid Gold Shell Ring, set with five simulative Rubies, Emeralds or Opals; one Nethersole Illusion Bracelet; One Imported Parisian Belt Buckle, and a complete set of Table Tennis (the most fascinating and popular game in the world.) Never before has there been gathered together such an array of beautiful and distinctive premiums for so light a service. Our medicines and premiums stand squarely on their merits and are satisfying in every respect. We know this from thousands of testimonials from every province praising our remedies and expressing delight with our splendid premiums. It will be to your advantage to reply at once—don't put it off till to-morrow but write now before you forget it. Remember, all you have to do is to sign and return the attached request to day; the Chatelaine Brooch, Locket and Medicine will be promptly mailed postpaid, and even if you do not sell the Medicine you at least have a $1.00 Chatelaine Brooch and Locket for simply making the effort. Do not hesitate, you can count on our fulfilling every promise to the letter, and you will be more than satisfied. **Lay down this paper and write us now.**

The Electine Medicine Co., Limited,
TORONTO, ONT.

Request for Fleur-de-Lis Chatelaine Brooch, Gainsborough Locket, and Medicine.

ELECTINE MEDICINE CO., LIMITED, Toronto, Ont.

Ship immediately by mail one Fleur-de-Lis Chatelaine Brooch and Locket; also 10 twenty-five cent boxes of Electine Medicines. I agree to make an earnest effort to sell the medicine and return you the money with the understanding that I am to receive for this service a Solid Gold Shell 5-stone Ring, a Nethersole Illusion Bracelet, an imported Parisian Belt Buckle, and a complete set of Table Tennis. If I fail to sell the medicine, I will return it to you within thirty days, and retain the Chatelaine Brooch and Locket as a gift from you.

A Lady Says: "PAINE'S CELERY COMPOUND Has Been Worth Hundreds of Dollars to Me."

A Happy and Complete Cure After Eighteen Years of Awful Agony.

All weary and disheartened sick people and those who have lost faith in the remedies they have used in the past, because none of them have given indications of cheering results, should now be filled with a strong determination to make use of the one medicine that cures disease—the new agent of new life that saves hopeless and despairing sufferers after all other agencies and means fail.

The thousands of victims of tormenting neuralgia after reading the testimony of Mrs. G. H. Parker, of Winona, Ont., must see that to avoid a continuance of suffering and the possibility of sudden death, it is absolutely necessary to use Paine's Celery Compound, the only medicine that successfully banishes neuralgia and kindred nerve diseases. Mrs. Parker says:

"I have been a great sufferer from neuralgia for eighteen years, and my sufferings at times were so bad that words fail to describe them. After having tried a host of remedies, I was persuaded to use Paine's Celery Compound. I am happy to say that I am now a different woman and completely cured. I can recommend Paine's Celery Compound; it has been worth hundreds of dollars to me."

There are no less than 300,000 people in the United Kingdom who speak no language but Cymric or Gaelic.

The Venice Campanile, which collapsed on July 14th last, was built of brick, and its foundations were stone, resting on timber piles buried 20 feet below ground.

Mauna Loa, in the Sandwich Islands, 13,950 feet high, is the highest mountain which rises directly from the sea.

Ordinary fresh air contains 3 parts of carbonic acid per 10,000. Air that has been breathed contains 441 parts.

One in seven of British land owners are women. In all there are about 38,000 women who own land in England and Wales.

The boiler tubes of an ocean steamer, if laid in a straight line, would reach 10 miles, and the condenser-tubes over 25 miles.

How Russian Men Wear Their Coats.

When in Russia, I remember well on one occasion an athletic young Saxon shrugging his shoulders and exclaiming as some figure went by muffled up in a great fur coat, of which the collar turned up as high as the top of the head, without using the sleeves, but holding the garment on as one might a shawl or blanket, with the hands very carefully folded inside: "Look at that now!"

Incidentally it may be remarked that this way of wearing a greatcoat, even in summer, is almost universal—i. e., without using the sleeves, so much so that it is frequently so worn in the army by all ranks in uniform, and there is a special word in the language which designates this peculiar way of wearing a coat. I tried so to wear it once or twice, but it really is troublesome to keep on, and I am at a loss to understand how a custom neither convenient nor becoming can have become so general as to be distinctly national.

Generosity.

There was some cold pudding on the luncheon table, and mamma divided it between Willie and Elsie. Willie looked at his pudding, then at his mother's empty plate.

"Mamma," he said earnestly, "I can't enjoy my pudding when you haven't any. Take Elsie's!"

Languages in India.

Twenty-eight languages are spoken in India and none of these is spoken by fewer than 400,000 persons, while the most general is the mother tongue of 85,500,000. Besides these there are in the remotest parts of the country dialects spoken by no more than 500 persons, which none other than themselves can interpret. India has nine great creeds, numbering their followers from the 208,000,000 Hindoos down to the 9,250,000 Animistics and the innumerable sects included in the 43,000 "others."

A Sleep Coaxer.

A cylindrical pillow of old papers placed under the neck is helpful in inducing slumber. The pillow thus checks the flow of blood to the head. The Chinese and Japanese use this method to woo the god of slumber and nearly always with success.

Metal Teapots.

Metal teapots which are not in daily use are apt to become musty. This may be prevented by dropping a lump of sugar into the pot before putting it away.

SAVE THE BABY.

A Mother Tells How Many a Threatened Life May Be Preserved.

To the loving mother no expense is too great, no labor too severe, if it will preserve the health of her little ones. Childish ills are generally simple, but so light is baby's hold on life that it is often a knowledge of the right thing to do that turns the tide at a crisis. And in baby's illness every crisis is a critical one. "I think the timely use of Baby's Own Tablets would save many a dear little life," writes Mrs. P. B. Bickford of Glen Sutton, Que. "I take pleasure in certifying to the merits of these Tablets, as I have found them a sure and reliable remedy. My baby was troubled with indigestion at teething time, and was cross and restless. The use of Baby's Own Tablets made a wonderful change, and I am glad to recommend them to others." Mothers who use these Tablets never afterwards resort to harsh purgatives that gripe and torture baby, nor to the so-called "soothing" preparations that often contain poisonous opiates. Baby's Own Tablets are pleasant to take, guaranteed to be harmless. Send 25 cents for a full-sized box to the Dr. Williams Medicine Co., Brockville, Ont., if your druggist does not sell them.

The most wonderful private park in the world belongs to Mr. William Whitney. It is in the Adirondack mountains. It consists of 90,000 acres. Sixty-four lakes and ponds and half a dozen mountains are comprised in its area.

IT MAKES PRIZE BUTTER WHEREVER USED.

The best, most thorough and most successful buttermakers in the world score their victories and triumphs when they use Wells, Richardson & Co.'s Improved Butter Color which always gives the true gold tint of June. If you have not used this perfect color, you are behind the times and cannot command the highest market price for your butter. Try it in one churning and you will see why the majority of buttermakers insist upon using "the kind that has no mud." Refuse all imitations and substitutes. Ask for Wells, Richardson & Co.'s Improved Butter Color that makes prize butter.

France loses less by fire than any other large country. Her loss is about 3¼ millions yearly; while the United Kingdom loses over nine millions.

"KELPION" (A STAINLESS IODINE OINTMENT.)

Endorsed by best English medical journals.
Supplied to British soldiers in South Africa.
For all Throat and Gland Troubles, Lumps, Abscesses, Old Sores, Ulcers, Felons, Skin Diseases, Eczema, Pimples, Stiff Joints, Rheumatism, Lumbago, Sprains, Bruises, Piles, Cuts, Sore Feet, Pleurisy.
Sold by Druggists, 25c. Try it once.

More than 42 millions of sleepers are in use supporting rails on the railways of the United Kingdom.

Minard's Liniment for Rheumatism.

The railway bridge which connects Venice with the mainland is 12,000 feet long, and has 242 arches.

The British ambassador to Paris receives £10,000 a year, the highest salary paid to any ambassador.

BACK TO YORKTON

DOUKHOBORS ENTRAINED BY POLICE.

An Exciting Scene Witnessed at Minnedosa---Pilgrims Were Stubborn but Inoffensive---Arrival at Yorkton Without Incident.

Minnedosa, Man., Nov. 9.—Another chapter in the history of the Doukhobor pilgrimage was completed on Sunday night with their forcible deportation from Minnedosa to Yorkton. The special train, which had been expected early in the afternoon had been delayed and did not reach Minnedosa until nearly 5 o'clock. Meanwhile, a solitary member of the Mounted Police, stationed at the door of the rink, was sufficient to restrain any attempt of the new missionaries to continue their wanderings.

Immediately upon the arrival of the special train with its detachment of Mounted Police, under Mr. Wilson, Mr. C. W. Speers addressed the Doukhobors, telling them the train had arrived to take them back to their families, and that they must make ready. When asked if they were willing to return, the answer in the negative was significantly emphatic. Nothing daunted, however, Mr. Speers called to them to follow him, and the motley throng poured forth into the open, but, reaching the road leading to Main street, resolutely turned toward the east, and would have proceeded in that direction had not the authorities, backed up by a number of citizens, equally as resolute, opposed their further advance.

About one-half of the pilgrims, apparently the lukewarm in the search for the "new life," had remained in the building, leaving about two hundred of their members huddled in a surging mass on the roadway, endeavoring to proceed eastward, being prevented from doing so by the townspeople, who confronted them. Then Agent Speers grasped a fussy pilgrim by the arm and proceeded with him toward the cars, at the same time saying the others must follow. Some seemed inclined to do so, seeing which the spectators encouraged their wavering inclinations by vigorous means. Many of them when seized by the arm, walked quietly to the cars, and were there received by the policemen in charge and placed in the cars. Others required vigorous application of Manitoba muscle, in the form of shoves and pushes, to make them at all inclined to obey the voice of authority. Others, resisting stubbornly all attempts to guide them in the desired direction, were unceremoniously downed by the more athletic of the spectators, and bodily carried to the train.

Among those thus treated was that pilgrim calling himself "John the Baptist," while another of the agitators, Zebroff, was placed upon a farmer's wagon and thus conveyed to the train. It was certainly an animated scene with ten score or more of the more zealous of the sad-eyed pilgrims as a centre and a crowd of interested spectators of both sexes; nor was the picture without its amusing features. So intent were all upon having the wanderers return to their homes that farmers and bankers, parsons and hardware merchants, government officials, laborers and sedate newspaper men, first urged the reluctant pilgrims, then added force to persuasion, and in obdurate cases resorted to very novel methods in their zeal for the welfare of the pilgrims and in their anxiety to have them return to their homes and kindred. To other than the superficial observer the patient resignation discernible on the faces and shown in their actions, together with their conscientious adherence to what they esteemed to be the cause of truth, won for them the sympathy of those who have any regard for the eternal verities. By degrees the pilgrims in the road were induced to go to the train, gentle urging being sufficient in most cases. Then the remnant in the rink upon being invited to the train proceeded thither arm in arm with some citizens, no compulsion being necessary with these. At 6 o'clock the whole number were safely entrained, and after an interval to allow the members of the police patrol to break their fast, which had lasted since 6 a.m., the train proceeded westward, Messrs. F. Pedley and C. W. Speers accompanying the party.

Yorkton, Assa., Nov. 9.—The special train containing the Doukhobor pilgrims, their Mounted Police guard and the government agents, arrived here at noon today. The journey was without incident and the entire party are quiet and appear to be resigned or contented. They will be escorted to their villages to-morrow.

Sir Marcus Samuel was formally installed as lord mayor, in succession to Sir Joseph Dimsdale, at the Guildhall on Nov. 9. All the quaint ceremonies customary at the induction of a chief magistrate were carried out, including the presentation of the diamond sceptre, the sword, the city seal and the purse.

IN EACH OTHER'S ARMS

Baptist Minister at Omaha and a Young Woman Found Dead.

A dispatch from Omaha, Neb., says Rev. W. G. Rabe, pastor of the German Baptist church, and Miss Augusta Busch, a young woman living in that neighborhood, were found dead early today in the pastor's church room. The two bodies were locked in an embrace, and the gas jets were turned on, but not burning. The Rev. Rabe was 65 years old and a prominent minister.

Miss Busch was missionary pastor of the church. She came here five years ago from a Chicago missionary college and had worked with Rev. Mr. Rabe since. Last night she did not return to her home as usual and the janitor of the church, at whose home she lived, started in search of her. In the pastor's room at the rear of the pulpit he discovered the dead bodies. The room was filled with illuminating gas. A gas stove was turned on full force, as were also several gas jets. It is believed to be a case of double suicide.

Rev. Mr. Rabe accepted the call to this city last January, coming here from Buffalo, N. Y. He was popular with his congregation and was considered an exemplary pastor. He leaves a widow and one son, both of whom reside in New York city, where his wife is attending a missionary college. The parishioners scout the idea of suicide and believe it was an accident. In the room where the bodies were found, which was used as a study, were found an open letter relating to church business, the young woman's gloves and a number of religious books and papers.

Prohibitionist Murdered.

A dispatch from Effingham, Ill., dated Nov. 4., says: Hon. Hale Johnson, a prohibition leader of national prominence, and the vice-presidential candidate on the Prohibition ticket in 1896, was shot and killed by Harry Harris this afternoon at Bogota, a village in Jasper county, thirty miles from here. Harris committed suicide in the county jail by taking poison.

As Johnson, who was practising law at Newton, the county seat, went to Bogota to collect an account which judgment had already been rendered against Harris, an altercation arose between Johnson and Harris, and the latter secured a shotgun and fired at Johnson at close range, the charge striking Johnson in the face and causing instant death. Immediately after the shooting Harris jumped into Johnson's buggy and attempted to make his escape, but was arrested by a deputy sheriff, who had accompanied Johnson, and who was a witness to the shooting. The people of Newton are much excited. Johnson was the nominee of the Prohibition party in this state for governor in 1896, but later accepted the nomination for the vice-presidency and withdrew as gubernatorial candidate.

The King is Active.

A London cable says: The King has been generally credited with taking an active part in the negotiations for bringing the Boer war to an end, and it is now assured that he has been complaining to his ministers of the condition of Ireland and that the appointment of a new permanent secretary and official of unusual ability and experience in the Indian service has been made in deference to his wishes. These rumors are accompanied by forecasts of a complete revision of Mr. Wyndham's Land bill, and he has sent an official announcement that the King will visit Ireland in semi-state during the spring.

The King's activity in political affairs is a great surprise to ministers accustomed to the precedents and habits of the Victorian reign. He takes the business of reigning as seriously as the German emperor, scrutinizing appointments in church and civil service, and has definite ideas respecting policies which responsible ministers ought to adopt. His review of a battalion of Scots Guards, which returned last week from South Africa, was closed with a remarkably hearty speech of appreciation.

Hessian Fly in Manitoba.

Hessian fly has again been doing much damage in some parts of Manitoba, notably around Wawanesa and Rounthewaite; also near Treesbank and Stockton. While in Ontario the Hessian fly is double-brooded, and late sowing is the chief remedy, and one which, having been widely adopted last year, is now bearing good fruit in that province; in Manitoba the pest is single-brooded, owing to there being no fall wheat grown here. Dr. James Fletcher, the Dominion entomologist and botonist, contends that as the Hessian fly is undoubtedly restricted in Manitoba to the summer straw-attacking brood, the remedy is simple, and if persisted in this pest never need become a serious menace to wheat growers. The insect passing the winter, for the most part, in the stubble, and not appearing until the following spring, when there are growing wheat plants for the females to lay their eggs upon, if the stubble be burnt over or plowed down in autumn, and the straw fed to stock or burned at any time before the flies emerge in the spring, this enemy of the wheat grower should be easily controlled. Many of the "flaxseed" of the summer brood are carried with the straw, and at threshing are dislodged and thrown down beneath the machine among the rubbish, or are left in the straw. All screenings or dust should, therefore, be carefully destroyed, and all straw should be either used during the winter or be burned before spring.—Farmers' Advocate.

Autumn Assizes.

The fall assizes opened in Winnipeg on Tuesday, Nov. 4. Gustav Mueller charged with having murdered his wife, was discharged, the grand jury bringing in no bill.

George Brown, charged with housebreaking was found guilty. Brown entered the bedroom by the window of some of the servant girls at the Roblin House and stole some jewelry. He was surprised by one of the girls waking up and screaming.

Henri Beauchamp, charged with forgery, was found not guilty by the jury. Evidence was produced to show that prisoner had changed his name and had then issued the cheque, which he signed with his father's name, a merchant of Montreal named Souliere. The father testified that he had before paid cheques issued by his son and the only crime was in the son changing his name.

The Duke of Cambridge's granddaughter, Mrs. Olga Hamilton, who is a daughter of Col. Agustus Chas. Frederick Fitzgeorge, was granted a divorce on November 4 on the grounds that her husband, C. E. A. A. Hamilton deserted her, and was guilty of misconduct with an unknown woman. The court room was filled with society people, many of whom were present in 1897 at the marriage of Miss Fitzgeorge, who was a noted beauty. Among those who sent gifts and congratulations to the bride were the Prince and Princess of Wales.

A woman's portrait isn't natural unless it is a speaking likeness.

If a man carries a mortgage it is usually because he can't lift it.

That marriage is more conducive to long life in women than single life is shown by the fact that of the thirty-two women of over 100 years, revealed by Germany's last census, twenty-nine were widows and one married, leaving only two old maids.

The tenor bell of the parish church at Fasburgh, nea. Norwich, England, which was cracked during the celebrations following the battle of Waterloo, was left untouched until quite recently, when it was recast and increased in weight.

Appointments, once made, become debts. If you have made an appointment with anyone you owe him punctuality. You have no right to throw away his time if you do your own.

Do not think you can do anything worth doing in a fit of enthusiasm, but train yourself carefully to any work that you are called on to do, and think nothing too small to do carefully, or for which to train carefully, that is for the good of your fellow creatures.

The smallest bone in the human body is in the lenticular, seated in the ear.

It is while you are patiently toiling at the little tasks of life that the meaning and shape of the great whole of life dawns upon you. It is while you are resisting the little temptations that you are growing stronger.

The ideal wife and the ideal husband are two of a kind that never make a pair.

The Republicans remain in control of congress as a result of the elections which took place in the United States on November 4.

Wm. Redmond, the Irish leader, was arrested on his arrival at Kingston on November 4. Mr. Redmond several months ago, made a speech at Wexford, which was said to be incendiary. He was ordered by the court of the King's Bench to give bail for $1,000 for his good behavior. This he refused to do and the court sentenced him to six months' imprisonment.

What the fisherman gets out of his seine is not net profit.

It's easier to make a tool of a dull man than a sharp one.

True happiness consists in the pursuit of a thing rather than in the catching thereof.

Boneless codfish are common enough but what a long-suffering public wants is boneless shad.

TELEGRAPHIC BRIEFS.

Short Dispatches From the Four Quarters of the World.

The Emperor of Germany has arrived in England, and spent Sunday at Sandringham.

The Dominion government will maintain the lighthouses on the upper lakes until Dec. 12.

Rhode Island electors have selected a French-Canadian, Hon. A. Archambault, for governor.

It is reported that Mr. Raymond Prefontaine will be Dominion minister of marine, and Hon. Jas. Sutherland will receive the public works portfolio.

The steamship Bagnor has arrived at Fort William with 4,200 tons of Pennsylvania coal on board for Winnipeg.

The sixty-first birthday of King Edward VII. was observed in Winnipeg churches on Sunday.

Owing to the cold weather the Boer delegates cut short their stay in Calgary.

Sir Richard Cartwright has been made an imperial privy councillor by King Edward.

Negotiations are under way for the establishment of a dairy combine in eastern Canada.

It is said that the Dominion government is preparing the public for the announcement of a scheme to construct a trans-continental line to rival the C. P. R.

A dispatch from Tucson, Ariz., says: J. E. Sullivan, superintendent of a mine at Lameza, and a half dozen Mexicans have been killed near Sanmarcial, Sonora, by Yaqui Indians, who are reported to have taken the warpath, and are beyond the control of a small Mexican force.

A dispatch from London, Ont., says the jury in the case of Gerald Silton, charged with the murder of his father, returned a verdict of not guilty on Saturday evening. The court room was packed, and the prisoner was cheered as he stepped from the dock. The jury was some time in agreeing upon a verdict. It announced one disagreement after three hours, but the judge sent the jurors back to their room. One man was holding out for conviction, but he finally acquiesced in the opinion of the majority.

Another missionary murder has occurred in China, the victim on this occasion being a Mohammedan priest, who with his coolie, was burned to death near Hsinganshjan, near Kenlin, the capital of Kuangsi province. The tragedy was the result of rumors having been spread that the priest had poisoned wells. Being searched, some phials of medicine were found on him, and the mob which gathered procured kerosene and firewood and burned both the priest and his follower to death.

This year a number of Japanese schooners went into Behring Sea to catch seals, as they did last season, and Captain Searle, of the schooner C. D. Rand, says that, at one time, he was lying near four Japanese vessels, whose crews were bombarding so much that he had to shift for his hunters found it difficult to get seals with spears midst the bombardment. The Japanese, not being a party to the modus vivendi, which forbids the use of firearms in Behring Sea, use their arms, while the Victoria sealers must needs use their spears. Last year a boats crew from one of the Japanese schooners which went into the Behring sea were caught on one of the rookeries, which they had gone ashore to raid, and the astute Japs represented themselves as shipwrecked seamen, and were forwarded to Seattle by the revenue cutter, and thence to Japan.

Recent reports of the crown lands department indicate the present is the busiest season in the history of the Ontario lumber woods. An official, who has just returned from the north, says there are 10,000 men in the woods between Ottawa and Sault Ste. Marie, 3,000 or whom are in the vicinity of Ottawa alone, while the limits east and west of the territory are equally crowded. Many limits on which no cutting has taken place for years are now yielding their portion, owing to the strong demand for lumber in connection with building operations. All this is not being done without feeling the pinch and the scarcity of labor. In far western Ontario it has been found necessary to import hundreds of French-Canadians from as far east as Gaspe. Wages are from $25 to $35 a month and board, and many who are mere lads are making from $20 to $22 per month. One camp foreman, on catching sight of a new lot of workmen asked if the public schools had received their vacation.

In the Christmas number of "The Delineator" the best modern writers and artists are generously represented. The book contains over 280 pages, with 34 full-page illustrations of which 20 are in two or more colors.

Natives of Greenland are a cold and distant people.

A dispatch from Sydney, N. S., says that Commander Martin, of the Italian cruiser Carlo Alberto, on which Marconi is trying his experiments, is authority for the statement that a wireless message was received off Sunny Harbor last Saturday on board the warship from a station at Cornwall, England. This is by far the longest distance a wireless message has been transmitted by wireless telegraphy. The distance from Sunny Harbor to Cornwall is greater than the distance from Table Head to Cornwall.

A street car runs twice as fast when a man is trying to catch it as it does when he is riding in it.

Amateur musicians are probably all right, but the trouble is with the people who don't like that kind of music.

Two million persons are attacked by malaria every year in Italy.

If a man really knew what his acquaintances thought of him he would go away somewhere and do the hermit act.

A sad and fatal accident occurred near Foxwarren on the farm of Mr. George Dunlop on Nov. 4, whereby Arthur Pizzey was smothered to death in a wheat granary. He was working in the upper story when the floor gave way, precipitating him into the basement, the wheat running through on top of him. Threshing was in progress on the farm at the time and the gang set to work promptly to dig the unfortunate man out, but it was an hour before it could be done, and life was then extinct.

Paint looks all right on an old house, but on an old woman—well, that's quite another story.

Bread as a daily article of food is used by only about one-third of the population of the earth.

Fifty thousand persons have visited Robert Burns' cottage at Ayr this year.

There are 20,000 Methodist soldiers in the English army in South Africa.

Many an artist thinks he is in hard luck if he isn't able to draw a cork.

"Alcohol is a good thing to preserve some things," remarked the observer of events and Things, "but it will not preserve order."

Blessed be the hand that prepares a pleasure for a child, for there is no saying when and where it may blossom forth.

People who go barefotted and those who wear sandals instead of shoes rarely have colds in the head or any form of influenza.

The best policy is a paid-up one.

Twenty-one carloads of apples for Manitoba have reached Fort William.

The International hotel at Rossland, B.C., was the scene of a serious shooting on November 4 when Walter Willis shot Robert Adams through the lungs and liver with a 32-calibre revolver. The men had trouble on various occasions and the hard feeling engendered culminated when a dispute arose over a trifling sum of money. Adams is in a critical condition and Willis is under arrest, charged with attempted murder.

Berlin's last horse drawn street car will be withdrawn from service on December 1.

Five hundred and two patents have been taken out by women in Germany since 1877.

There are seven species of salmon in the Taku River, Alaska. Each has its date of arrival from the sea at the spawning grounds.

Tight, unventilated hats are one of the chief causes of baldness.

Prussian blue paint is made from the ashes of the burnt hoofs of horses.

"MENE MENE TEKEL."

Sir Wilfrid Laurier has been "par excellence" Canada's noble knight. The loftiness of his personal character, the nobility of his aims and his fearless denounciation of wrong-doing in high places have marked him out as a prince of nature's true nobility, a knight "Sans peur et sans reproche," and one who by a long and honorable career purifying the adminstration of the country and ever raising the standard of public service would in time erase the "bar sinister" from our national escutcheon. Among the faithful there were not a few who believed that this was he who should have redeemed his country from the blighting influences of the last decade of corruption and dishonesty which he was so prompt to denounce and which led to the downfall of the previous administration. Alas for the disillusionments of life, our golden idol has but feet of clay, and our Sir Galahad, who for six years has borne so gallantly the white pennon of purity, has sheathed his conquering blade and joined the ranks of the Sir Percivals and Sir Lancelots, who could never succeed in their quest because their eyes were clouded.

Sir Wilfrid has been our idol, to him the eyes of young Canada have been turned. We thought we already discerned the dawn of a better day when a purged administration should rule and lead the newest of the nations to a noble prosperity. Our hopes are dashed to the ground, the clock of progress has been turned back, and the true reformers must still labour and wait.

It matters not whether the decision was at the last the result of personal influence or of party exigence, the choice of Prefontaine for cabinet position and national honor is a national dishonor inflicted by the one from whom both party and country had least right to expect it. A man who only a year ago was not deemed fit to receive recognition at the hands of his Sovereign, a man against whose appointment the cleanest and most honorable organ of its party, the Montreal Herald, is forced to protest in such dignified terms, a man of whom the Witness says "his appointment is fatuous" can only be regarded as a source of weakness to the Government and of danger to the country. The Premier has already neutralized the splendid effect of his prompt handling of the "unconstitutional" Mr. Tarte by wnat can only be regarded as a weak concession to pressure, and his capitulation now lends color to the supposition that his former prompt action was due less to the courage for which he got credit than to the coercion of which nothing was heard. In any event the advancement of Prefontaine is an undoubted triumph for the forces of corruption and a job which at one stroke promoted a "heeler" from municipal to Cabinet rank and degraded its champion from the rank of a statesmen to that of a politician. The whole transaction bears the ear-mark of degeneracy.

THE POSTAL SERVICE.

Postmaster General Mulock's announcement that his department will show a small surplus for the past year instead of the usual heavy deficit will give general satisfaction, Had this accomplishment been effected under the old tariff the subject would have been a matter for congratulation but when we consider the sweeping reductions both in domestic and foreign rates that have been made, as well as the many reforms in other branches of this department, during the present administration we think Sir William deserves the thanks of the Canadian people.

Fernie and all the other Crows Nest branch points have one complaint to make however, and it is one that has been borne patiently by a long-suffering people, but now that the department is self-sustaining it is time to speak. There is no reason why mail should be held over at each end of our line once every week when trains run regularly every day and this but represents half of the grievance as out-going mail from all these places has the same monotonous wait. The loss to the commercial interests of the valley is very great not to say anything of the social inconvenience caused by this senseless regulation. If trains are to be allowed to run on Sunday it is the height of inconsistency and folly to detach the mail car on that day.

EDITORIAL NOTES.

THE reorganization of our Hockey Club recalls to our memory the brilliant success of the Club last season, when it practically won the championship over all the territory between Nelson and Brandon. Judging by the enthusiasm exhibited at the initial meeting last week and by the list of officers who have the Club in hand this season we predict for the hockey boys another successful season, and we earnestly bespeak for them the same loyal support from the citizens of Fernie that they so generously gave last season.

* * *

"It would appear that there is a serious lack of appreciation of the responsibility of unionism upon the part of some of the mine workers in the Crow's Nest Pass collieries. Upon the least pretext it appears to be their practice to order a cessation of work at one or other of the collieries. This is not in accordance with the spirit or practice of unionism in other parts of the country, We do not suggest that the men may not have grievances. This is something we know nothing about, but we do know that nothing is more surely calculated to weaken the influence of unions than too great readiness to resort to methods that should only be called into play when every means of adjusting difficulties has been tried. We know, too, that there is a feeling among union men in other parts of the province that this excess of zeal, to put mildly, on the part of their Crow's Nest brethren is a source of weakness to their cause."—Nelson News.

* * *

THE Presbyterian and Methodist denominations are moving in the direction of cooperation in the missionary work of Western Canada. They brought the subject before the supreme courts of their respective churches, and committees authorized to deal with the matter were appointed at the late meetings of the Presbyterian General Assembly and the Methodist General Conference. A joint meeting of these two committees which consists of five members each met in Toronto on the 6th, when a full and frank expression of opinion made it evident that there was absolute unanimity on the part of all present as to the desirability of a scheme of co-operation being adopted and the two general secretaries, Dr. McLaren and Dr. Sutherland were instructed to communicate with the home mission superintendents of the two churches and report to an adjourned meeting to be held at as early a date as possible. This movement, to the average westerner who has thought and observed along this line, will appear sensible and timely, by preventing the possibility of unseemly rivalry and by economizing men and means in the home mission fields.

A Mass of Information

Can be crowded into a limited space sometimes, but it is impossible to tell here half what should be told about our books and stationery. A partial list could not convey an idea of the magnitude, variety or value of our goods. Come in and delve through our stock. There's good reading on all subjects for little money. Writing will be a pleasure when you use our pens, ink and paper, all are so good, and the cost is so small.

LOCAL AND GENERAL.

Fresh Oysters at Cuthbert's.

J. A. MacLean spent several days in Jaffray this week.

R. J. Black went east on Tuesday to fill his new position with the C. P. R. at Scriebner.

James Joyce who has been in town for a couple of weeks went west to Jaffray on Monday morning.

Mrs. Moe and her sister, Miss Neilson have returned from Montreal where they have been visiting friends for the past six weeks.

Frank A. Dewar has left the C. P. R. and accepted a position as stenographer with S. H. Carswell & Co. Bankers, Qu' Appelle. We wish him success.

Miss Stella St Clair, of Phoenix and Mr. S. J. Lowgwood, of Sandon were married at Phoenix on Tuesday by Rev. W. A. Robins of Greenwook.

The London & Liverpool is advertising a big discount sale this week. This firm recently bought two large stocks at a bargain and two dollars worth is promised for one dollar

The local Orange Lodge is advertising a grand entertainment to be given on Thursday evening in Princess Hall. The program will be given by the best local talent.

The Westbound express on Tuesday morning ran into a bunch of five horses near Morrissey Junction, killing two and so badly wounding the third that the trainmen knocked it on the head.

Last week Mrs. C. H. Levers went to join her husband at Morrissey where they will commence housekeeping in a residence Mr. Levers has erected near the mill of which he is manager.

It is reported that sixteen men commenced work in No. 8 Mine, Michel, on Thursday morning and thirty on Friday morning and that the number will be so increased by Monday as to enable the tipple to be worked.

J. A. Baker, Slocan, and A J. MacDonald, Sandon, representatives from the B C. Executive of the Western Federation of Miners, were in town this week and left for Michel on Thursday to gather all the facts pertainlng to the strike at that place.

The services at Christ Church, Fernie, to-morrow will be held as follows:—Matins and Holy Communion, 11 o'clock, Sunday school and Young Mens bible class at 2:30 p.m., Evensong at 7:30. All are welcome. Collection in aid of Church expenses.

Dr. C. P. Higgins has moved into the handsome new residence on the corner of Smith and Blakemore Streets. He is vacating his quarters in the Hill Block as he has had offices fitted up in his house, where he will receive his patients.

Last week before C. E. Coleman, late agent for the C.P.R. at Cranbrook, left for North Bay, his many friends among the C.P.R. employees presented him with a handsome chain and locket as a token of their esteem and friendship.

The Alberta Railway and Coal Co. at Lethbridge in its annual report states that during the past year the coal sales amounted to 148,059 tons as against 171,656 tons sold during the preceding year. The decrease of 23,597 tons is attributable entirely to the fact that the C. P. R. are now obtaining a large supply from the Frank mines. The general coal sales show a satisfactory increase.

An invitation has been issued by the Nelson Board of Trade to all interested in the lead industry to attend a meeting in that city on Nov. 24th. The object of the conference is to consult with our member, Mr. W. A. Galliher, as to the best ways and means the Government may adopt to assist in the development of the leadmining and kindred industries. A large gathering is looked for.

Two weeks ago Mr. D. MacKenzie handed in his resignation as Secretary of the Gladstone Miners Union. Mr. E. Neale was nominated to fill his position and since that time has been secretary pro tem. The election takes place to-day and it is almost certain that Mr.—Neale will receive the appointment The Miners Union has a movement on foot to combine the position with the position of weigh-checking, and the present secrstary is fulfilling the duties of both just now.

P. Lund, J. Breckenridge, railroad contractors and Wm. Gordon and A. Doyle; merchants, of Fort Steele, have formed The Crow's Nest Pass Lumber Co. with headquarters at Wardner. The company has a paid-up capital of $100,000 and owncs 50,000 acres of timber tributary to the Kootenay river. A mill is now being erected at Wardner that will cut 200,000 feet of lumber in 24 hours. Lumber camps are being established along the river and 200 men will be employed in the woods for the winter months.

To-day is pay-day.

E. J. Peltier registered at the Alberta on Wednesday.

The infant son of Mr. and Mrs. J. W. Crane, of Elko, died on Sunday morning.

The Ladies' Guild of Christ Church will hold a Bazzar on December 11th.

Constable Henderson was in from Michel on Wednesday.

R. W. MacPherson, auditor for the C N. P. Coal Co., is in town on business in connection with the Company.

Mrs. S. Arnold who has been visiting friends in Fernie for some time returned to her home in Cranbrook to-day.

Mr. J. H. Tonkin took a tramp up the valley for a hunt last Saturday and came back with a fine large buck weighing 215 lbs.

A large and attractive stock of furs and silk and French flannel blouses have been opened up at the London & Liverpool Co. this week.

The only thing you can buy cheaper in the west then in the east is an Insurance policy. The "Great West" invests its money in the west, that's the reason.

James Lawson who was sent up to Nelson for trial for stealing a watch is not a stranger in that city, according to the "Daily News" as he served four months there a year ago for burglary.

Mr Norman Broley returned on Wednesday from a trip to Rat Portage and Winnipeg where he has been visiting friends and combining business and pleasure.

The French coal miners who were dissatisfied with the findings of the arbitration committee in their recent strike trouble shave abandoned the idea of carrying the matter to the Chamber of Deputies and have gone back to work.

Mrs. C. M. Henretta and Miss Emma Henretta left on Tuesday evening for Ohio where they will spend the winter with relatives. Mr. Henretta expects to go to the coast next week and return to Ohio via Montreal.

The bridge at the foot of the grade and leading to the Elk River bridge, west of Fernie, is about completed and is a very creditable structure. This will bring the new grade into use and its advantage in shortening the distance will be seen by all who have ocassion to go across the siver.

About fifteen mile of the track at Pincher Creek is in a very shaky condition and strict orders have been issued to the train officials to run over it on a very slow schedule. This fact along with the usual wait for connections at Medicine Hat has made our train service more wretched then usual this week, the morning express seldom getting here much before noon.

Foley is President

The Provincial Progressive Party held an organization meeting in Vancouver last Saturday evening and drew up a constitution and elected the following officers. Hon. Pres. Dr. T. R. McInnes, President Mr. Chris Foley, Vice-Pres. Mr. John Morton, Sec.-Treas. T. H. Cross; Trustees, Jos. Dixon, Jos. Watson and Wm. George.

A Slav Fight

About a dozen Slavs had a high old time in Michel on Tuesday night in a house behind the coke ovens. It turned into an impromptu birthday party and with the aid of a little whisky things got pretty lively about 12 o'clock. A general scrap ensued and at least eight of the men took part. Knives were freely used and three of the participants were badly hacked about the arms and shoulders, while one man's head showed evidence of a severe jab from a knife point. One, a little more zealous than his companions, attempted to use an axe but was restrained. Constable Henderson took the matter in hand and made several arrests. The prisoners were up for trial here on Thursday and three of them were fined $20 each and costs.

Sunday the 9th was the 63rd anniversary of King Edward VII's birthday.

Robert Adams was shot in the International Hotel Rossland by Walter Willis on Monday. The shooting was the result of a dispute over a small sum of money. Adams is in a daugerous condition and Willis is held for attempted murder.

Three thousand American Quakers will settle in the N.W.T. near Yorkton next year. The American Quakers have very little in common with the Russian Quakers or Doukhobors and they are never carried away by extreme religious views.

Montreal, Nov. 8.—The directors of the Crow's Nest Pass Coal Co. have decided to call a meeting to authorize the carrying out of the reorganization plan. This will involve an issue of $2,000,000 of bonds, the proceeds of which will be used to develop properties which the directors consider necessary.

Dan Hayes is in town to-day.

Mr. W. Blakemore, Montreal, is in town on business.

Wm. R. Ross returned this week from Winnipeg where he has been holidaying for a couple of weeks. He reports everything booming in the Metropolis of the prairie.

CANADA'S ATTITUDE

BRITISH OPINION ON THE COLONIAL CONFERENCE

Disappointment is Expressed at Our Position on Imperial Defence--Chamberlain Declines a Preference to Colonial Products.

London, Nov. 5.—The official report of the colonial conference shows that the imperial defence proposals fell through. This was due in large part to the attitude taken by the Canadian ministers who placed themselves on record in opposition to the movement in a memorandum in which they explained that they did not object so much to the expense of the proposed arrangement as to the important departure from the principle of self-government implied by it. In answer to the assertion that the colonial troops sent to South Africa could not with safety be pitted against European troops the Canadian ministers outlined the improvements now being made in the militia force of the Dominion and expressed a willingness to make all reasonable efforts to co-operate with the imperial authorities to secure efficiency in the Canadian forces and common action in national emergencies so far as is consistent with the full enjoyment by Canada of her rights of self government. But Canada firmly refused to enter into any arrangement by which she would lose, in the slightest degree, her control over her own military organizations or her own resources. With respect to the navy the Canadian ministers announced that they were prepared to co-operate in the creation of a naval reserve.

There is a good deal of disappointment expressed by those who desired to have all the forces of the empire —home and colonial—merged under common management at Canada's firm position. The Morning Post declares that the Blue Book shows how far the empire still is from securing any organization for any great end.

Regarding the preferential tariff the conference recognized the value of the principle, but admitted the impracticability of the proposal to establish free trade throughout the empire, the colonies not being prepared to give up the right to the exclusive control of their own tariffs. The colonial representatives urged the British government to grant a preference to the colonies by exemption from or a reduction of duties now or hereafter imposed upon imported produce. The Canadian ministers especially urged that there should be exemption of Canadian foodstuffs from the duty now levied by the imperial government upon produce of this nature, but Mr. Chamberlain did not see his way clear to consent to this.

The other colonial ministers agreed to extend to their colonies the principle of the preference now given by Canada to British goods. The Canadian ministers pledged themselves to recommend that the Canadian parliament maintain its present preference by further reducing duties in favor of Great Britain along certain lines, by raising duties on certain foreign imports and placing duties on certain foreign imports now free.

The Times in its comments is inclined to minimize the value of the preference. "The Canadian trade," it says, "illustrates in a curious way how little may result even from liberal preferential treatment when the general fiscal arrangements are highly protective." It says that notwithstanding the Canadian preference of 33 1-3 per cent. on British goods the ad valorem burden upon British imports is higher than the ad valorem burden borne by the general trade with other countries. "Our exports to Canada," says the Times, "pay 18 per cent. ad valorem in spite of the preference, while American goods on the whole pay only 12 per cent., and the burden upon all Canadian imports taken together is 16 per cent."

A cable from London says: The excitement over the reported flight of a peer to the continent was heightened by the announcement that a well known London society man, Bernard Fraser, had been sentenced at the Norwich assizes to ten years' penal servitude. With him was also sentenced Arthur Thorold, the son of a clergyman, connected, as is Fraser, with one of the oldest and proudest families in the United Kingdom. The prisoners were charged with having carried on a regular practice to deprave the morals of youths all over the country. An array of prominent King's counsellors appeared on both sides, but the prisoners pleaded guilty of misdemeanors, apparently with the idea of getting off with light sentences.

The returns for the government creameries in the district of Alberta, N. W. T., show that in all 280,840 pounds of butter were turned out during the past season, compared with 261,498 last year. This, considering the fact that the beginning of the season was very unfavorable for the dairy business, is a very good showing.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

Eight men were drowned off Nome beach in a storm.

The Canadian poet, John Imrie, died in Toronto on Nov. 6.

Anthracite coal in Winnipeg has been reduced to $11 a ton.

Arthur Cowley, of Swan Lake, Man., has mysteriously disappeared.

T. A. Garland's store at Portage la Prairie was burglarized on Nov. 6th.

The Canadian inland revenue returns show a large increase in the amount of intoxicants consumed.

The cable rates between Canada and Australia have been fixed at 2s. 4d. per word.

A combine has been formed to control the flour trade of the Pacific coast of the United States and the Orient.

The C. P. R. land department takes on an average daily $18,000 cash for lands purchased.

General Superintendent Egan, of the Great Northern, is lost in the Rockies, and it is feared he was killed by bears.

An amazing spectacle was witnessed at a Methodist revival in St. Paul, Minn., people shouting, praying and groaning in church all night.

Joint committees of the Presbyterian and Methodist churches met in Toronto and were unanimous for co-operation in western mission work.

The Bell Telephone system has established a long distance connection with Morden, and next week connection will be made with Chicago.

Peter Sheppard was sentenced to five years' imprisonment at Montreal on Nov. 6 for an attempted criminal assault on a nine-year-old daughter.

Mr. Olson, of Dundurn, Assa., has broken the record so far as flax yields are concerned in that district. He reports as high as twenty-two bushels to the acre.

C. W. Speers says that latest reports on the Doukhobor situation are of a hopeful character. Many are showing a disposition to return to their homes, and a number have already deserted the ranks.

The British bark Florence B. Egett foundered at sea, and her captain his wife, and nine seamen were forced to travel 1,450 miles in an open boat to land.

Mrs. James Trull, wife of a well-known farmer in Pickering township, Ont., died as the result of being frightfully burned while throwing out of doors a pot of roofing tar that had caught fire on the kitchen stove.

Alfred McDougall, late solicitor and treasurer for the Ontario government, suspended some time ago owing to a shortage in his accounts, was arrested in Toronto last week. He had been shadowed since his suspension. It is supoosed that the detective had information that he was about to skip out.

At Lyndhurst, near Brockville, Ont. a romantic wedding occurred. Jonathan Bullard, aged 74, marrying Mrs. Eliza Niblock, aged 70. They were engaged 50 years ago but parted. Bullard went to Iowa, married and had a family of nine children. Mrs. Niblock in the meantime had a family of eight children. Bullard returned recently to visit the scenes of his boyhood with the result mentioned.

When questioned in the British House of Commons on the subject of the action of the province of Ontario looking to paying a bounty for beet sugar, and whether the provincial government proposed to take any action there anent in connection with the Brussels sugar convention, the president of the board of trade, Gerald Balfour, said that even if bounties were paid, His Majesty's government, under the terms of the convention, would not be required to penalize the sugar of any British colony.

A recent arrival in Toronto from England, a coachman, giving his name as Frederick Barton, was arrested charged with blackmail. His scheme was to write to sundry suspected persons, supposed keepers of disorderly houses, that he was a detective employed by the government, but would not inform upon them if they sent him $15. He enclosed an envelope addressed to an assumed name at the general post office. When he appeared there he was arrested.

A lad aged eight years, son of Angus Yorke, of Kingston, Ont., accidentally lost his life. The lad and his sister were playing in the shed when a bullet passed through the shed, struck the child behind the ear and killed him instantly. The bullet flew past the target some men were shooting at.

Birmingham, England, has upward of 40,000 back-to-back houses and 6,000 courts, which are entered by tunnels from the street.

Success never comes to the man who sits on an empty dry-goods box and whistles for it.

KILLED BY FIREWORKS.

Eleven Persons Lose Their Lives in Madison Square, New York.

A dispatch from New York says: By a series of explosions of pyrotechnic bombs and other fireworks on Tuesday night among the vast multitude gathered in Madison Sq. to witness the ascension of an airship and the display of the election returns, eleven persons were killed outright, many being blown almost to pieces, and at least fifty injured many of them fatally.

It is estimated that at least 30,000 persons thronged the square at the time of the explosions, which were succeeded by a frightful panic in which hundreds were thrown down and trampled under foot. Five hundred policemen and all the ambulances in the city were summoned and the dying and those most seriously injured were removed to the hospitals. In addition to those many of the wounded were taken away by friends. Nine men in charge of the fireworks display were placed under arrest immediately after the explosion.

Twenty-one persons were seriously injured, some of whom are likely to die. The densest portion of the throng that packed the square was gathered along Madison avenue, close to the place reserved for the discharge of the fireworks. Along the border of the square facing the avenue were arranged groups of cast iron mortars, 20 in each group, and loaded with heavy bombs. A few minutes after 10 o'clock the first row of mortars was touched off, but before the discharge took place, one of them fell on the side, and the next instant the bomb was shot into the thickest of the crowd where it exploded and hurled the people into heaps.

The fall of the mortar and the concussion of the explosion knocked down the rest of the row of mortars, and a thundering volley of huge projectiles ploughed through the crowd. Almost instantaneously the second group of 20 mortars about 100 feet further up the avenue discharged their contents into the crowd, and a moment later the third group, ignited by the showers of falling sparks exploded in the same manner.

In the panic that ensued thousands ran blindly across the square, tripping over the seats and benches, and falling, were trampled upon. The police on duty were carried along by the rush, and for half an hour the wildest confusion reigned. After the smoke had cleared away 16 persons were found lying in Madison avenue between 23rd and 25th streets. Scores of injured were scattered about the avenue and the square. Among the dead was a policeman, who was standing close to the first mortar, and whose body was frightfully mangled. A force of 500 policemen were soon on the spot, and upwards of 100 physicians and 200 nurses were summoned from the hospitals, every available vehicle being pressed into service for the transportation of the wounded.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

Minneapolis capitalists may buy out the Rat Portage Lumber company.

Some $40,000,000 will be distributed as aid among South African colonists.

The sale of Manitoba government lands this year up to November 1 amounted to 270,122 acres.

The house and contents of Alex. Campbell, near Marquette, Man., were destroyed by fire on November 4th.

A big hotel will be erected in Winnipeg on Notre Dame avenue, by American capitalists.

The elevator capacity in Western Canada has been increased between ten and eleven million bushels this year.

The Doukhobors have reached Solsgirth.

The report of the post office department shows a surplus of $5,000.

The trial of Gerald Sifton for murder has re-commenced at London, Ont.

The Ontario government has applied to the Dominion authorities for possession of the islands in the Georgian bay.

Over 100 townships, or 25 per cent of the municipalities of Ontario have abolished statute labor, substituting direct tax for the improvement of roads.

A freight train collided with another freight on a sidetrack at Maple Creek on Nov. 4. Both locomotives were damaged, and the engineer of one train slightly injured.

After having carried a knife blade one and one-quarter inches in his brain for 22 years, P. J. Kent, of Chicago, has undergone a successful operation for its removal. The blade had broven off into the skull and the point had been inserted squarely into the brain. Kent suffered from frequent epileptic seizures. The physicians say Kent will now recover full control of his muscles.

MARCH OF THE DOUKS

PILGRIMS REACH SHOAL LAKE.

They Rebuke a Boisterous Wag and Address the Populace--Women and Children Sent Back to Swan River---N. W M. P. Receive Orders.

The Doukhobors reached Shoal Lake on November 5. The first of the advance guard arrived about 1 o'clock in the afternoon, and the others followed in twos and threes in close successdion, until 3.30 when the main body of about four or five hundred, in a compact square, about twenty abreast, slowly marched in, chanting a hymn. They were received in the middle of the town by the townspeople, who nearly all turned out to see them.

The pilgrims stopped and one of the leaders, who could speak fairly good English, turned to some wags who were poking fun at them, and addressing everybody said: "Brothers and sisters, we are travelling for Jesus. Jesus died for us all. Please accept Jesus; our mission is peace." One notable wag was jocularly blaspheming Christianity and several of the pilgrims noticing he was enjoying a good cigar, told him that "Jesus no smoke. Jesus no drink whisky. Jesus no steal." All questions put to the pilgrims were similarly answered. The pilgrims are all fairly well clad, and most of them have rubbers. They seem quite peaceably disposed, molesting no one and are civil and courteous in their demeanor. Their countenances show determination and peace and good will toward all men. After their arrival they moved to a vacant piece of land at the skating rink at the east end of the town, where, about 5 o'clock all took a hearty supper of bread, oatmeal, apples and onions. Although several of the pilgrims seemed hungry, yet no selfishness on the part of any of them was noticeable, each gladly sharing what he had with his neighbor.

During supper the special train of eight coaches came in, taking the women and children from Yorkton home to Swan river. Mr. C. W. Speers, and other officials, accompanied by interpreters, came off the train and tried to persuade the pilgrims to go home. A heavy snow began to fall, but the weather prospects, the appeals and warnings of Mr. Speers and others had no effect. They said they were bound to conquer the world for Jesus, and by peaceable methods. The immigration officials particularly urged and entreated the leaders and warned them of the folly of their movement which was sure to bring disaster with the approaching winter; but all were of no avail.

Inspector Wilson, Sergt.-Major Church and nineteen N. W. M. P. left Regina by freight on Nov. 5 for Portage la Prairie, there to await orders in connection with the Doukhobors. They took horses and equipment with them.

CANADA AND ABROAD.

A Budget of Important News in Short Paragraphs.

The post office building at Gladstone, Man., was destroyed by fire on Nov. 5.

Reed Smoot, a Mormon, will be the choice of the Utah legislature for United States senator.

The new United States congress will consist of Republicans, 204; Democrats, 179; three seats are in doubt.

The Manitoba Hockey association has admitted Rat Portage to the senior series. Brandon may also be received. Portage la Prairie has withdrawn its team.

The auxiliary screw steamer Scotia left the Clyde on Nov. 5 for the Antarctic regians with a number of members of the Scottish National Antarctic association, under the leadership of Wm. S. Bruce, of Edinburgh, on board.

Fournier was convicted at Dawson on Nov. 4 at the end of the first day of the trial for the murder of Guy Beaudin. The jury were only out three minutes. Prisoner will hang on January 20.

Kenneth Smith, who worked for David Morrow, a farmer living eight miles from Lions, Ont., while driving home on the night of Nov. 5, met with a fatal accident. His horses ran away, upsetting the wagon and throwing him out. His head struck a log near the road. He died in a few hours without regaining consciousness.

According to passengers on the steamship Miowera, Australia is in a bad way for provisions owing to the awful ravages of the drought. Thousands of herds of sheep have been destroyed and mutton is being imported from Argentine and pork and other meats from Vancouver and elsewhere, while a thousand tons of freight is being refused by every Australian boat.

THE WIDE WORLD.

Telegraphic News of Two Hemispheres Briefly Chronicled.

The Mad Mullah is advancing against the British.

There is much counterfeit money circulating in the east.

A strike is threatened at the mines of the Nova Scotia Steel and Coal company.

For two weeks a fire has been burning in 10,000 tons of coal at Niagara.

Canada's trade with Britain continues to increase, according to the past ten months' statements.

The Kingston locomotive works will remove to Montreal, claiming that it is easier to obtain skilled labor there.

James P. Stevenson, of Nelson, Man., was fatally kicked in the abdomen by a horse last week.

Judging by the first four months' statement, the Dominion surplus for the year will be the largest on record.

A consignment of silk, valued at $5,000,000 passed through Winnipeg en route east last Friday.

The C. P. R. has moved already 11,500,000 bushels of this year's grain to the lake ports, and expects to increase the figures to 20,000,000 before navigation closes.

The Doukhobor pilgrims were met at Minnedosa on the 7th inst. by Frank Pedley and C. W. Speers, but they steadfastly refused to turn back.

The French government arbitrators have decided against the request of the coal miners in the Department du Nord for an increase of wages, and a portion of the miners have refused to accept the adverse reward and will continue the strike.

A Cool-Headed Canadian.

A dispatch from St. Paul, Minn., says: A Winnipeg young man proved himself a hero here today. He is George D. Stark, a clerk employed at the Hamm brewery. He stopped a runaway team on East Seventh street, and had his right knee painfully injured. He was taken to the City hospital by the police.

The team was standing at a building near Seventh and Sibley streets, and became frightened and ran up Seventh street, and the wagon swayed from one side of the street to the other. Stark followed and climbed into the wagon from the rear. He climed over the seat and along the pole to the horses' heads.

While in this perilous position the animals kept running up the street, and the wagon swayed from one side of the street to the other. Stark had the horses almost under control when Minnesota street was reached, and several people seized them.

Stark was impelled to his act of daring to save several girls who were threatened by the team. The horses, guided by Stark, veered just enough to escape the young women, and save them from serious injury, if not death.

WELL MERITED GROWTH.

Among the publications that came to our desk this week is that little annual messenger, Dodd's Almanac, published by The Dodds Medicine Co., Limited. This is its eighth annual appearance, and its growth in the estimation of the public is attested by the fact that in the eight years of its life its circulation has grown from thousands to many millions, and that it is now printed in many languages and is found in almost every English-speaking home as well as in nearly every quarter of the civilized world.

Dodd's Almanac differs somewhat from other publications of the kind in that it is filled from cover to cover with useful information. The data, weather indications, etc., are prepared by expert scientists and have established a reputation for accuracy, while the antiquated joke that has made the ordinary almanac a byeword is banished from its columns, which are filled instead with simple, straightforward talks on the rules of health and interesting accounts of the various cures that have been accomplished by Dodd's Kidney Pills and Dodd's Dyspepsia Tablets.

And it might be remarked here that people who are prone to overlook such reading simply because the cures are the work of what they call a proprietary medicine, devote much of their time to gorging their minds with less interesting, less wonderful and far less truthful matter. This is simply another exemplification of the general tendency to dodge that which is useful in the way of reading matter.

But aside from its value as a book of reference to the healthy and sick alike, Dodd's Almanac is a wonderful evidence of how an enterprise will flourish when it is founded on merit. As the circulation of Dodd's Almanac has grown from thousands to millions, so has the domain of Dodd's Kidney Pills extended. Eleven years ago they were placed on the market in Toronto, after years spent in the investigation of Kidney Disease and its cure had led to their discovery. They had their own way to make and they made it. As one man or woman was benefitted by them he or she told another. Their fame has spread till it covers one continent, and has made inroads into every civilized country in the world, and The Dodds Medicine Company has grown into one of the largest concerns of its kind, and we might even say one of the largest influences for good on the American continent. And all this immense structure has been built by the hands of those whom Dodd's Kidney Pills have raised from beds of sickness and suffering. Each one told others. That is the secret of it all.

But it is not the intention here to go into the theories on which the Dodd's Remedies work nor to mention any of the wonderful cures they have accomplished. Those are now almost common property, for, like Dodd's Almanac, Dodd's Kidney Pills and Dodd's Dyspepsia Tablets, have found their way into every community and into almost every home. The intention is to simply welcome Dodd's Almanac for 1903 and to commend it to the consideration of the public generally.

Income tax in India is levied on all incomes of £33 and over.

About seventy million animals are killed yearly for the sake of their furs.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed for ever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Address, F. J. CHENEY & Co., Toledo, O.

Sold by druggists, 75c.

Hall's Family Pills are the best.

There are now about 250 towns in the world with over 100,000 inhabitants.

Quito, in South America, is sinking faster than any other city. It now stands 80 feet lower than it did in 1780.

Messrs. C. C. Richards & Co.

Gentlemen,— Theodore Dorais, a customer of mine was completely cured of rheumatism after five years of suffering, by the judicious use of MINARD'S LINIMENT.

The above fact can be verified by writing to him, to the Parish priest or any of his neighbors.

Toronto.

MARKETS.

(Compiled from The Commercial)

WHEAT—The wheat movement has kept up in about the same proportion as last week. Manitoba wheat has been firm generally this week, with a better demand for spot than for the more distant futures. Prices at the close of the week were: No. 1 hard, 72½c; No. 1 northern, 70½c, spot or delivery first half November. For delivery up to 25th November 1 hard 72½c, and 1 northern 70½c; and for all November 1 hard 72c and 1 northern 70c. All prices in store Fort William or Port Arthur.

Liverpool—No. 1 northern closed on Saturday at 6s. 7½d.

Country Wheat—From 55 to 57c a bushel is being paid to farmers at country points for their best wheat.

OATS—There has been a better shipping demand for oats this week, but as cars are scarce advantage can not always be taken of opportunities to trade. Prices are better than a week ago to the extent of 1 to 1½c. Today No. 2 white oats are worth 28c per bushel at Fort William. On track, Winnipeg, No. 2 white oats are worth 27½c per bushel, and about 25½c is the price for feed white. At country points farmers are getting 20c at central points.

BARLEY—Movement is light and there is not much business doing. No. 3 extra is worth 36c per bushel at Fort William; No. 3, 35c; and feed grades, 34c.

FLAXSEED—The market is steady and unchanged. Dealers are paying 97c per bushel to farmers at country points.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—$6 to $7 per ton for fresh baled in carlots on track, Winnipeg.

POTATOES—30c per bushel.

BUTTER—Creamery—The season is about over and receipts are light. Creameries are asking 25c per pound from city customers for choice makes, which is an advance of 2c per lb.

BUTTER—Dairy—Stocks are not very large and most of the holdings are under grades. Very little choice table butter is to be had. Jobbing houses are paying 14 to 15c net at Winnipeg for best grades. Seconds are worth 12 to 14c net.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—18c per dozen.

POULTRY—Trade in live weights is now about over, and receipts are mostly all dressed. Chickens are worth 10 to 11c per lb., dressed; fowl, 8 to 9c; ducks and geese, 10c; turkeys, 12½c.

DRESSED MEATS — Beef, city dressed, 5½ to 6½c, country stock, ½c less; mutton, 8 to 9c; lamb, 11½c; hogs, 9 to 10½c.

HIDES—Dealers are now paying 6½c for No. 1 hides, 5½c for No. 2, and 4½ for No. 3. Calfskins same price as hides. Horse hides 50c to $1 each

SENECA—Best root, 52c per lb.

CATTLE—The export season is about over and shipments are falling off. Stockers will begin to move soon, as the winter will turn attention to them. They will be worth about $16 per head for yearlings and $20 to $22 for two-year-olds. Best export steers are worth 4c per lb., point of shipment, and prices range from 3½ to 4c. Butchers' cattle are steady at 3c to 3½c.

MILCH COWS—Cows are scarce. Good milkers readily bring $45 in this market, the range being from $35 to $45 each.

Carved Furniture.

To dust carved furniture there is nothing better than a painter's brush.

Baptism In Hungary.

In Hungary the legal age of an individual dates only from baptism.

Coffee Stains.

If coffee stains do not yield to the treatment of having boiling water poured on them, try using the yolk of an egg in the same way as soap when washing them.

Marvelous Growth.

It has been found by experiment that a turnip seed will under favorable conditions increase its own weight fifteen times in a minute. Turnips growing in peat ground have been found to increase more than 15,000 times the weight of their seeds in a day.

Making Pastry.

Make pastry with clean, cold hands. Wash the hands in hot water in which there is a little liquid ammonia, carefully removing every stain, then plunge the hands into cold water.

Corn Rows.

The reason why corn (maize) never rows unevenly is supposed to be because of its having opposite radials of growth from the cob center.

The Sorrowful Tree.

In India and South America there is said to be a small tree known as the "sorrowful tree" which bears sweet scented flowers that "bloom only in the nighttime and fall off at the break of day."

SEASONABLE ADVICE

CHANGE OF WEATHER DISASTROUS TO MANY PEOPLE.

Bad Blood Makes You Liable to Cold---A Cold Makes You Liable to Twenty Diseases---How to Protect Yourself.

Changes of the season affects the health more or less perceptibly. The effect of the hot summer weather on the blood leaves it thin and watery, and now that the weather is changeable this makes itself disagreeably felt. You feel bilious, dyspeptic and tired; there may be pimples or eruptions of the skin; the damp weather brings little twinges of rheumatism or neuralgia that give warning of the winter that is coming. If you want to be brisk and strong for the winter it is now that you should build up the blood and give the nerves a little tonic. Dr. Williams' Pink Pills are the greatest of all blood making, nerve-restoring tonics, and will make you strong and stave off the aches and pains of winter if you take them now. Mr. James Adams, Brandon, Man., is one of the thousands whom Dr. Williams' Pink Pills have restored to health and strength. He says: "It is with deep gratitude that I acknowledge the benefit I have derived from the use of Dr. Williams' Pink Pills. Before taking the pills my health was much shattered with rheumatism, nervous depression and sleeplessnes. For fully twelve months I rarely got a good night's sleep. When I began the use of the pills it was with a determination to give them a fair trial. I did so and can truthfully say that I could not wish for better health than I now enjoy. I shall always speak a good word for Dr. Williams' Pink Pills."

Poor blood is the cause of most diseases. Good blood means health and strength. Dr. Williams' Pink Pills do not purge—they simply make pure, rich blood. That's why they cure so many diseases. But you must always get the genuine with the full name, "Dr. Williams' Pink Pills for Pale People" on the wrapper around every box. Sold by all druggists or sent by mail, post paid, at 50 cents a box or six boxes for $2.50, by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont.

DUNSMUIR RESIGNED.

COL. PRIOR SWORN IN AS HIS SUCCESSOR

Eberts Bitterly Dissappointed.—Will Likely get the Appointment of Attorney General.

(Today's specials to the FREE PRESS)

Nelson, B.C., Nov. 22—Maintaining his innocence to the last moment Henry Rose suffered the extreme penalty of the law at 8 o'clock yesterday morning in the jailyard. He was perfectly composed and walked firmly to the scaffold. For a moment he looked calmly down upon the spectators and then handed to Father Althoff the paper containing his last declaration which the Priest read, On the morning of Tuesday, Oct. 7th last, after a patient trial Henry Rose was found guilty of the murder of Charles Cole, Nakusp, on the 4th of June and was sentenced to be hanged by Chief Justice Hunter on Nov. 21st.

Nelson, Nov. 22.—The Daily News Victoria special says: "Premier Dunsmuir yesterday morning handed in his resignation to the Lieut. Governor, and recommended Prior as his successor. Col. Prior was sent for by Sir Henry Joly and had a conference at which it is understood the governor expressed himself in the kindest terms and gave him until this evening to decide whether he could form a cabinet. At 6.30 to-night Prior was sworn in as Premier and Minister of Mines. Prentice, the present Finance Minister being re-sworn at the same time in office. Wells did not arrive from the east till an hour later, but immediately on arriving saw Prior and Prentice and consented to accept office under the new chief and at 10 o'clock tomorrow morning will be sworn in retaining his present portfolio of lands and works. Eberts who was Prior's rival for the premiership was not sworn in and is known to be bitterly disappointed. Whether he will accept office again as Attorney General is a matter of conjecture but is believed he will, especially as Prior has given him the opportunity, and Eberts cannot afford to lose office. If he does so there remains still the post of Provincial Secretary which has been vacant for so long. The most likely one to take this is Denis Murphy, of Yale, who reached the Capital tonight and went to dine with Prentice. The Presidency of Council will likely be taken by H. Dallas Helmcken, of Victoria. Murphy it is believed could carry his seat easily. North Victoria will probably be opened at once. Prior's cabinet, he stated, will be a strictly non-party one in spite of his recent stand in favor of party lines. He retains the post of Minister of Mines. His policy he will distinguished by a determined effort to secure the Canadian Northern on terms of a land grant safe-guarded by a provision for taxation after a term of years. Dan Mann and Dunsmuir yesterday completed their trip over the E. & N. and it is almost certain that that road is to be acquired as part of the proposed Canada Northern system which is to have its terminus in Victoria. The desire to be of out office before disposing of his road doubtless hurried Dunsmuir's resignation.

Scranton, Pa., Nov. 21.—The mineworkers through their representative have agreed with the mine-owners to attempt to adjust the differences existing between them. Outside the anthracite coal strike commission the proposition was made on a compromise basis and negotiations it is expected will be at once entered upon with a reasonable hope of settlement without the aid of the arbitrators. The rough proposition which is to form the basis of negotiations, is a 10 per cent. increase in wages, a nine hour day, and trade agreements between the miners and the company by whom they are employed. The only one of the four demands not touched upon is that of the weighing of coal by the legal ton. While both sides have expressed a willingness to settle their differences among themselves it is not to be construed that this carried with it the acceptance of the terms proposed. They are mentioned only as a basis, it is understood, from which a settlement is to be effected.

STRIKE ENDED.

Miners at Michel Went Back to Work on Monday.

As predicted in our last issue the conference between General Manager Tonkin and the joint committee of representatives from the Fernie and Michel unions resulted in a settlement of the labor troubles at Michel.

The committee asked that Wm. Evans be reinstated in his position with the Company and that the contract system of labor be abolished. Manager Tonkin explained that it would be impossible to accede to their first demand as he had been dismissed for just cause. He agreed to do away with the objectionable contract system.

By thus compromising the management and the men came to an amicable settlement, the latter agreeing to go to work on Monday morning. General satisfaction was expressed by everybody upon hearing that the strike was off.

RIOT AT MICHEL.

Knives and Pistols in Evidence—The Leader Skipped Out.

As was reported in the FREE PRESS last week several men disobeying the strike order at Michel, went back to work in No. 8 tunnel. Taking advantage of the absence of Constable Henderson, who was in Fernie on a case, a large crowd of miners of stronger union principles than those who went to work, on Friday lay in wait for the latter as they, about 20 in number, came off the afternoon shift.

The mob divided its forces, part remaining west of the tipple to chastise those of their rebellious companions who lived in the Italian quarter while the other part halted near the station and waited for the remaining victims.

The roughest of the work was done by the former crew who knocked a Slav down with a club and otherwise assaulted another Slav and an Italian. In the melee three shots were fired and knives were drawn. The other gang stood at the railroad crossing and dared the enemy to cross. Serious trouble was at this juncture averted by the interference of Supt. Evans who rushed in and ordered them off.

Constables Henderson, Tranter and Dow came in on the evening train and no further violence was shown. Great difficulty was experienced in gathering any reliable evidence. as people living close to the scene denied any knowledge of it, and no arrests were made.

The mob, it is known, consisted mostly of Italians and Slavs and was led by a Scotchman by the name of Hugh McPherson, who immediately left town walking the track towards the Loop. Meeting a friend, he was persuaded that he could not be arrested before a warrant was got, and he returned to town and escaped on the evening express.

THE FERNIE FEDERAL LABOR UNION.

On Wednesday evening a meeting of all interested in a federated union of all smaller crafts that have no union of themselves was called by Organizer O'Brien to take place in the cigar factory. The lumbermen's union which was organized at the initial meeting of the Federal Union was not represented as it has an executive of its own.

The Federal Labor Union elected its officers at its meeting on Wednesday evening, Wm. Scott being appointed President; J. Ruddit, Vice President and M. L. Chase, Secy.-Treas. Sixteen charter members were enrolled, embracing barbers, waitresses, draymen and other crafts. Regular weekly meetings will be held, the next taking place at the soda water factory on Wednesday at 8 p.m.

TWO MORE LICENSES.

A license was granted last night to the Muskoka hotel, which will occupy the Farquharson block. Mr. Farquharson is building an addition to his cottage and as soon as he can move out the hotel will open under the management of John Balko.

Last week Louis Carosella secured a license to keep a wholesale liquor store. He intends to fit up his present quarters for this purpose.

DYNAMITE EXPLOSION

George Washington Dies From the Effects of an Explosion at Michel.

A terrible explosion occurred in Michel at 7 o'clock on Thursday morning. Geo. I. Washington and his wife, who are a colored couple, live in the east end of a double house next to the postoffice and opposite the station. Mrs. Washington keeps boarders and her husband, who is a man of towering height and magnificent physique, works in the mines.

A few moments before seven he placed 11 dynamite sticks in the kitchen oven and sat down beside them. Alex. Fraser, who happened to be in, warned him of the danger but Washington replied that it was quite safe as he had done it in that way many times. Shortly after, a terrific roar told every citizen that something unusual had occurred, and a rush to the place of the tragedy revealed an awful sight. The corner of the house where the kitchen was situated was torn out, the ceiling burst open and the floor, sills and all, was shattered. Every window and door in the entire building was blown off and not a yard of plaster was left on the lath. The stove was driven clean through the window and the whole building presented a desolute wreck. Mr. Washington was driven against the wall with great force, one arm was entirely blown off and the other so nearly that Dr. McSorley, who was immediately on the spot, cut the remaining threads. His two legs, below the knee, were broken and shattered almost to a pulp.

There were four other persons in the house, Mrs. Washington escaped with a slight wound on the arm, John Coutts, a boarder, who was standing before the door in the front room was badly burned about the face and head, while the other two, who were boarders, escaped unhurt. A box known to contain a quantity of dynamite was kept under the kitchen table and sticks of this explosive were picked up from among the wreckage.

The two men were brought to the Fernie hospital on Thursday morning. The doctors in attendance at once concluded that nothing could save Washington's life and refrained from inflicting more pain by operating. In the evening death mercifully ended his agonizing sufferings.

A coroner's inquest over his death was commenced this morning. The jury viewed the body at the hospital and Dr. Corson gave evidence after which it was adjourned until Friday evening at 7 o'clock when Michel witnesses will be present.

SUPPOSED SUICIDE.

B. O. Nettleship Takes a Dose of Poison.

A sad case of evident suicide occurred at Michel yesterday. B. O. Nettleship, stable boss for the Coal Co. stables at that place, made a remark to the stable boy in the morning that he would be dead by noon. The remark was not thought to mean more than a wild saying of a man recovering from the effects of drink, but when too late it became apparent, from his serious condition, and from an examination of a partly emptied bottle that he had taken some form of poisor. He steadily sank and though Dr. McSorley did all possible to save his life he passed away in the afternoon.

"Doc" Nettleship as he is generally called, was well and favorably known through the Crow's Nest Valley. He is an Englishman, his people are well to do and he has been in the habit of getting remittances from them. In the early days he built the Sanitarium hotel near Frank and he was its first proprietor.

His worst fault was his fondness for liquor. About six weeks ago he commenced the gold cure but three weeks ago his craving overcame him and he had been under the influence of drink ever since.

The Orangemen's concert on Thursday evening was not well attended though the finances came out fairly well as many tickets were sold that were not handed in. A program made up entirely of local talent was well rendered. Among those who took part are Messrs. Staebler, Piper, Hunter and Revs. Houghton and Gordon.

MORRISSEY ITEMS

F. Geddes, of Elko is putting up a building at Morrissey and will run a branch store there.

The foot-bridge over the Elk near the C.P.R. depot, Morrissey, is completed.

The Great Northern depot at Morrissey has been completed.

The C. P. R. have completed arrangements for a $3,000 depot at Morrissey and work will be started on it next week.

The Great Northern have completed their telegraph line to the mines. The office will be in the Coal Co's old store building and an operator from the East will take charge next week.

The Coal Company at Morrissey Mines has installed an hydraulic box car loader. This machinery is very expensive and it has taken three months to place. The loader is worked by water power and is the only one of its kind in Canada. It loads a car in 3 minutes. If it is as successful as it appears similar machines will be placed in Fernie and Michel.

Rev. Connor, the Methodist minister at Morrissey has his new Church well under way and it will be ready for worship before Xmas.

The people living at Morrissey Mines are agitating for a new name for their town. Now that the Townsite Company below them have stolen their name much confusion arises. The name of Pittsburg is the favorite.

Those of our citizens who attended the dance at the Anstralian Hotel, Morrissey, report the affair as a great success. Many friends from Cranbrook, Elko and Fernie attended and the Coal Co., ran a special train from the Mines for the benefit of those who wished to take it in. Mr. Stephens the host had everything arranged to perfection and all had a good time.

Thursday was pay day at Morrissey and $19,000 was paid out. Constable Dow was up for the occasion.

More coal is now being taken from the Morrissey mines than ever before in the history of the camp.

Sixty new miners from Black Diamond, Wash., several with families, arrived this week at Morrissey mines where they have secured work. It is reported that more are coming.

R. W Woods, manager of the Coal Co's. store at Morrissey, is ill in Fernie.

WEDDING BELLS.

At the residence of Mr. and Mrs. Joe. Smith, uncle and aunt of the bride, by Rev. R. F. Stillman, on Thursday evening, Nov. 20th, 1902, at the hour of 8:30 —Miss Nina A. Graham to Geo. W. Williams, carpenter and secretary of the local carpenters' union. Mr. and Mrs. Austin Wilson performed the duties of groomsman and bridesmaid. The bride was becomingly dressed in blue and white french organdie trimmed with white silk, and the bridesmaid was prettily dressed in a suit of white trimed with lace. After the ceremony was performed, about 40 guests sat down to a splendid supper provided by the host and hostess, after which the usual congratulatory toasts were indulged in by Rev. Mr. Stillman, the groom, and his brother, Mr. Harry Williams; Mr. C. M. O'Brien, Mr. Thos. Beck, Mr. Ross, Mr. Mills and others. This was followed by a couple of hours of pleasant social intercourse. A large number of costly and beautiful gifts were presented to the bride by her many friends.

The election of coal mine members of the Board of Examiners for the Michel, Morrissey and Coal Creek mines, which was constituted under the coal mines Regulation Act of 1901, will take place at these points on Dec. 13th.

The Success Club with a membership of ninety-five of Nelson's brightest citizens has been organized in that town. It has instituted a mock parliament with Judge Forin, as governor general; R. J. Clark, premier, and James Wilks, leader of the opposition.

Mr. H. Bentley came down from Fernie last Saturday and brought with him the Crow's Nest Lacrosse League trophy —the Levasseur cup—won by the Lethbridge boys last season. The cup is now on exhibition in H. Bentley's store, the window being artistically decorated with the club colors and lacrosse sticks.—Lethbridge News.

A BOILER EXPLOSION

FOUR KILLED AND FORTY INJURED.

Several Have Their Eyes Burned Out, Hands Blown off and Otherwise Injured in Steel Works at Lebanon, Pa. Pathetic Scenes.

A dispatch from Lebanon, Pa., of Nov. 14 says: The explosion of a large boiler in a scrap puddle furnace at the west works of the American Iron and Steel Manufacturing company's plant today caused the death of four workmen. Forty others were more or less seriously injured.

The calamity is the worst that ever occurred in Lebanon. The boiler exploded without warning, and in an instant the entire plant was black with death dealing debris. The wreck and ruin of the nine immediate puddle furnaces was complete.

Thousands of persons were attracted to the scene and weeping women and children crowded about the place making frantic efforts to obtain tidings of their loved ones. The excitement was intense.

Physicians were ordered from every quarter of the city, and hospital ambulaoces and other vehicles were hurried into service. The offices of the works were converted into a hospital, and a corps of nurses from the Good Samaritan hospital were soon on the spot.

Into this temporary hospital the maimed and scalded workmen were carried and given every attention. Some have their eyes burned out, others their hands blown off. It is impossible to learn the names of the injured. Many of them, it is believed will perish. It is feared the list of the dead will be materially increased when the ruins of the nine puddle furnaces are explored.

The exploded boiler was hurled high into the air and passed over the offices, burying itself in the south bank of Quitamphilla creek several hundred yards away.

It is not known whether the explosion was due to defects in the boiler or not. The boiler, which was of a hundred horse power, broke squarely in half, one half sailing through the machinery and woodwork of the mill. The roof collapsed and the flames from the puddle furnaces under the wrecked boiler set fire to the debris.

Homestead Entries.

The department of the interior has given out a statement of the homestead entries for the months of July, August and September of 1902, showing an increase over the previous year as follows:

	July.	Aug.	Sept.	Total.
1902	2623	1922	1416	5961
1901	921	756	566	2243

The statement for the month of October has not yet been completed, as reports have not been received from three officers for the last week of that month. However, the reports show 1094 for the past month as compared with 779 for October, 1901.

This shows a total for the four months of 1902 of 7875, as against 3022 for the same period in 1901, an increase of 4853. It is expected when the complete returns are in for the four months, the entries will number for this year over 8500, or almost three times as many as in 1901.

There is no better indication of the actual settlement of the west than through the number of homestead entries, as persons making entry for lands actually become settlers and are not in any sense speculators.

A petition from the Doukhobors asking the Sultan of Turkey for permission to settle in some part of his empire where they can cultivate gardens with their own hands and not be compelled to obey human laws is published in St. Petersburg.

For the first time in the history of British Columbia, a consignment of Canadian oats will be shipped to Australia via the steamer Miowera. The shipment consists of fifty tons, and is experimental.

Hon. G. H. V. Bulyea, of Regina, commissioner of agriculture in the Territorial government, says that the farmers in the Territories have had a good crop this year, but he hardly thinks the yield per acre will come up to that of last season. Just now the grain is beginning to move out of the country, but shippers find themselves face to face with a blockade. Mr. Bulyea expects that the total acreage under crop in the Territories next season will be almost double the crop acreage of this year, or in the neighborhood of 1,000,000 acres. People are still rushing into the country south of Regina and along the Prince Albert branch, not to speak of other sections of the Territories. Regina is full of intending settlers and land buyers and chair boarders are common at the hotels, as the accommodation of the town is overtaxed by the unprecedented influx.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

There are 7,200 pupils enrolled in Winnipeg schools.

The Canadian patriotic fund, Ottawa, has a surplus of $157,000.

Mr. T. B. Flint, M.P., has been appointed clerk of the House of Commons.

The C. P. R. has decided to put into effect its plan to superannuate employees.

Forty prisoners in an Arizona jail overpowered their guards and escaped.

Roland B. Molineau, of New York, has been declared not guilty of poisoning Mrs. Adams.

The immigration arrivals for October totalled 6,511, of these 5,400 were from the United States.

The Rev. John Kellman of Edinburgh has been offered the vacant chair in Knox College, Toronto.

Sir Wilfrid Laurier is ill, and his physician has ordered him to take a complete rest for some weeks.

Halford Marcy, of Hamilton, Ont., died as a result of exposure from being upset from a boat into icy water.

The trade of Sydney, N.S.W., has fallen off £3,000,000 as a result of the drought.

The new treaty between Newfoundland and the United States, injures trade with the Dominion, abolishing as it does a preference given to Canada.

Mr. J. S. Larke, trade commissioner to Australia, reports to the department that one million bushels of oats could be disposed of as they will be required in Australia in four months' time.

Judd Forsyth, son of D. Forsyth, hotel keeper of Goodwood, Ont., was killed at Uxbridge on Nov. 12. He attempted to board a moving train and was thrown under the wheels and completely cut in two.

G. G. Groomes, of Collingwood, Ont., was engaged in loosening the stakes on a car of lumber when it suddenly broke and struck him on the head. Before he could get away the lumber fell on him, breaking both legs and injuring him internally. He was taken to the hospital, where he died.

A petition, signed by 4,000 persons has been presented to the Italian government asking for a pension of £72 per annum to be conferred on a woman named Maddalena Granetta, who has given birth to 62 children—59 boys and three girls—during her married life. In nine years she presented her husband with eleven sets of triplets, three groups of quadruplets, one group of six, and the other eleven children came singly. She is now 57 years old, and incapable of work.

Advices received from Fiji state that the British government is preparing to establish a naval coaling station on the island of Suwarrow in anticipation of the construction of the Isthmian canal. Suwarrow island is to the eastward of Samoa, and north of Cook islands. The government of Fiji will import into those islands 792 East Indians as contract laborers for the sugar and other industries there, applications for that many having been approved.

A dispatch from New York says: In speaking at the banquet at the Minnesota society in this city, Archbishop Ireland expressed the belief that Canada eventually will be under the domain of the United States. The transition, he said, would come without conquest, without war. After telling of the growth of America in comparison with other great nations, the archbishop said: "I do not want to be bellicose, but I say this for myself: As sure as fate, although you and I may not see it the Starry banner will wave mistress over all the territory from the Gulf to the Bay. There will be no conquest, no war. The hearts across the border are already beating with love for us, and commerce and agriculture are calling for espousals."

The English press regards the German emperor's visit with suspicion and distrust. He is not lampooned nor caricatured, but it is generally assumed that he is there for business purposes, and must be allowed to have what he wants. Conjunctions respecting his mission differ widely, but the conclusion is the same in every instance, namely, that the ministers must be on their guard and decline overtures for joint action of Great Britain and Germany, whether in East Africa, Asia Minor, or in the Yang Tse Valley. Public opinion as expressed by some papers is so unfriendly to Germany that it is hardly credible that the ministers can be drawn into new diplomatic engagements, but compacts made during the Boer war cannot be repudiated. The Anglo-German agreement respecting China was not a good bargain for Britain, but it has now lapsed in consequence of the termination of the war and difficulties respecting the evacuation of Shanghai are connected with it. There is also a secret agreement or understanding between the two powers respecting East Africa.

CANADA AND ABROAD.

A Budget of Important News in Short Paragraphs.

The Dominion agent in Nebraska has secured 3,000 settlers.

Navigation chairs may be established in Canadian universities.

Several obsolete British warships are offered for sale as the result of investigations by the admiralty.

Malcolm Graham, a bricklayer, was killed on a Winnipeg building on November 14, by being struck on the head by an immense stone.

It is expected that the last C. P.R. boat will leave Owen Sound for Fort William on Nov. 29.

King's elevator at Fort William is again working. Machinery for cleaning flax is being added.

Thousands of Russians and Germans will come to Western Canada via Odessa next spring.

Charles Anderson, a farmer of Tyndall, Man., hanged himself in his shanty last week.

The Ontario government has made arrangements for the settlement of 12,000 Americans in the northern part of the province.

The government of Australia is contemplating the importation of a large shipment of Canadian bass spawn.

It is reported that the Archduke Francis Ferdinand has abdicated his right of succession to the Austrian crown in favor of his nephew, the Archduke Charles Francis.

The Rev. Thomas Voaden, a Methodist minister, of Woodstock, Ont., has written to the Hamilton conference withdrawing from the Methodist church. He writes that he has become a Dowieite, and that his sympathy with Dowie's work is incompatible with loyalty to the Methodist church, and that his address for the next few months will be Zion City, Lake county, Illinois.

Previous to his death all the world looked upon Emile Zola as childless. His domestic life was regarded as above reproach. But when the novelist's will was read it was found to contain a liberal bequest to "my son Jacques and his sister Denise and my faithful friend Madame Rosereau." Then it was revealed that the two children who, with their mother, attracted attention at the Zola funeral by their grief at the bier were the novelist's son and daughter. Their mother swooned over the coffin.

A dispatch from Chatham, Ont., says: Definite tests of an oil gusher in Raleigh township were made. After pumping to get out water, oil began to come, and poured out at the rate of fifty barrels per hour. It is not expected to continue, although the well is a wonder, even to the most experienced oil men. So impressed are the Imperial Oil company of Sarnia with the prospects that they will at once lay a pipe to Bardos siding, a mile away, to convey oil direct to tank cars.

A serious stabbing affray took place in a Slav house at Michel, B. C., on Tuesday night, where an impromptu birthday party was being held by a dozen men, assisted by a small supply of whisky. Eight men are thought to have taken part in the melee, three of whom were cut about the arms and shoulders with knives. One attempted to use an axe. The police find it difficult to make a clear case, and the men are yet at liberty.

A clerk in Versailles brought a suit against an author charging that one of the characters in a novel written by the latter was taken from himself and presented a libellous picture. The author pleaded that he had not represented and did not even know the clerk, but the judge gave the latter damages in a thousand francs, ($200), and ordered that the novel should be withdrawn from circulation. It was admitted that the author did not know the clerk, but the judge said he incurred a grave responsibility in introducing to the public an official to whom he attributed the most immoral conduct without first ascertaining that no misapprehension could follow.

Charles S. Clark, of St. Paul, Minn. has been granted a divorce from Clara Clark, whom he married at Ottawa, Ont., nine years ago. Mrs. Clark and two children are still living in Ottawa, the husband having left them two years ago after reaching home one evening and finding his trunk packed and a note informing him that he was no longer wanted about the house. In his story to the court Clark said he made the mistake of marrying a society woman, whose time after their marriage was taken up almost altogether with social functions and church affairs, her home life and children being sadly neglected. Estrangement between the Clarks began when Mrs. Clark left Ottawa on a two weeks' visit with friends at London, Ont. When the wife returned after having been away three months she explained her prolonged absence by saying she was having too good a time to return. This was a few months after their wedding.

OLD WORLD CABLES

WHAT IS GOING ON IN THE EMPIRE'S CAPITAL.

Hopes of Breaking England's Great Telephone Monopoly Lessened By the Action of Tunbridge Wells in Selling Out to the Company.

A cable from London says: Tunbridge Wells was provided on the opening day of the present century with the first municipal telephone service in this country and now it has decided to sell its system to the National Telephone company. This decision gives a great shock to the long desired scheme for combatting England's great telephone monopoly by means of competitive municipal undertaking.

* * *

Dr. Parkin, formerly of Toronto, who is academy manager of Rhodes Anglo-Saxon scholarships, has been addressing Oxford union and predicting that one of the results of the educational scheme will be the establishment of an organic connection between the university life of the mother country and men of the future in the colonies. Imperial federation, he asserts, will be brought about when the young brains of the colonies are brought under direct formative influence of Oxford. He does not explain what will be done with the best young brains of Germany and the United States.

* * *

The German emperor's visit to Sandringham is approaching its close without any disclosures of state secrets. There are evidences already of a fresh outbreak of what Balfour has described as "Newspaper restlessness" respecting the next royal visit, but the only new fact is the painstaking care with which the officials connected with the Delagoa Bay have been awarded with decorations.

* * *

The visit of the King of Portugal to Windsor will be attended with more formality than has been witnessed at Sandringham, and there probably will be a revival of inventions about the approaching annexation of a large district in East Africa. The existence of a secret agreement between Germany and England respecting East Africa is not doubted in diplomatic circles, although the circumstances are not considered opportune for carrying out its provisions.

* * *

King Edward is reported to be considering the expediency of reviving the old custom of always having a member of the ministry at court, except when he is in residence at Buckingham Palace. This change will make it necessary for some member of the ministry to be at Windsor or Sandringham, as well as at Balmoral, whenever the King is out of London. If it be adopted it would be fresh proof of active interest taken by the King in public affairs. There has already been so much evidence of royal energy in this direction that Labouchere is moved to remark in Truth that "Edward VII. is as active in government business as George III. was a century ago."

* * *

A special dispatch received in London from Rome says the Sicilian police, who have for a long time been trying to capture a notorious brigand named Varzalone have raided the district of Cammatata, in the province of Girmenti, and made prisoners of sixty persons, including a marquis, the mayor, several doctors and a number of lawyers. In the course of these drastic operations, a wealthy land owner named Lini, barricaded his house and shot one policeman dead and wounded another. The police were unsuccessful, inasmuch as they failed to capture Varzalone, who is still at large.

* * *

In a dispatch from Lividia, Russia, the correspondent of The Daily Mail says the Czarina has fallen into a condition of deep melancholy, which takes the form of preserving silence for long periods, even in the presence of guests.

* * *

A cable from Vienna, Nov. 14, says the sitting that day of the lower house of the Austrian reichsrath was suspended on account of the German and Czech members coming to blows. The cause of the trouble was a debate on the advisability of the use of the two languages in the names of stations on the Bohemian railroads. Herr Schnal started the disorder by shouting: "You Germans are a lot of pigs." Thereupon a number of German deputies cast themselves upon Herr Schnal, crying "Smash him," "Kick him;" which they proceeded to do. Eventually Herr Schnal was thrown down the gangway to the bottom of the amphitheatre. The fighting continued for a quarter of an hour after the suspension of the sitting. Throughout the disorder the combatants were encouraged by hearty plaudits from the strangers' gallery.

MURDER AT LEDUC.

Charles Buckle, While Insane Shoots and Kills a Neighbor.

On Monday, Nov. 10, Charles A. Buckle, a farmer residing about six miles south of Leduc, N.W.T., shot and wounded Robert Heddell, a neighbor. Buckle, who is violently insane, has been arrested and is now awaiting trial at Fort Saskatchewan. Heddell died of his wound about three hours after being shot.

Buckle is an Englishman, about 35 years of age, and muscular, weighing probably 200 pounds or over. He is a single man and lived alone on his farm in a settlement about sixteen miles southwest of Leduc. Heddell is also an Englishman and leaves a wife. He was a close neighbor of Buckle's. Of late neighbors had noticed something wrong with Buckle and suspected that he was going insane. They frequently visited him and had taken the precaution to take away his rifle and shotgun from his house, but were not aware that he carried a revolver. On the morning of the tragedy several of his neighbors were present at the house keeping watch over him. Buckle appears to have got impatient and ordered one of them to leave. To humor him the man got up and went outside, when Buckle walked over to the lamp and blew it out. Heddell and a man named Molson struck matches simultaneously to relight the lamp, when Molson by the light of the match saw Buckle aiming at Heddell with a revolver. Before he could give warning the shot was fired and Heddell fell to the floor, shot in the left temple. Buckle then turned his revolver on Molson and snapped it twice, but it missed fire both times. Buckle then ordered all the men outside on pain of being shot if they refused to go. They all left the house and Buckle chased them for some distance.

William Buckle, brother of Charles William, armed himself with a gun and with neighbors, entered the house, where they met Charles, who had returned his revolver to his pocket. He was asked by William to give up the revolver, but he denied having it. William told him to give it up or he would shoot him. Chas. seeing the neighbors armed, said if he gave it up they would shoot him, but William told him to go into his (William's) house and he would be safe. Charles then gave up the revolver to William and went into William's house. Two men returned to Charles Buckle's place and placed Heddell in bed, but he died in about three hours, without gaining consciousness. The prisoner at present is raving mad, and on account of his great strength is a dangerous man to deal with. He is kept in a straight jacket.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed for ever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Address, F. J. CHENEY & Co., Toledo, O.

Sold by druggists, 75c.

(Compiled from The Commercial)

WHEAT—The most interesting feature of the wheat situation this week is the advance in wheat prices of 6 cents per bushel to farmers at Canadian Northern railway points in Manitoba, which went into effect on Tuesday last. The reason given for this advance is alleged to be that the Canadian Northern Railway company had given the grain dealers assurance that the wheat would be moved out before the close of navigation. The Canadian Northern railway has been short of cars almost since the season opened, and a number of points on that company's lines have been blocked for days or even weeks at a time. The company is said to have arranged for a sufficient supply of cars to relieve the pressure and move out the grain before the close of navigation. Grain that can be got out before the close of navigation, is, of course, worth more than that which will have to be held over. The freight rate is two cents lower from Canadian Northern railway points than from Canadian Pacific points, but previously the farmer did not get much advantage of this lower rate. The Canadian Northern, it is understood, has arranged for cars from the Northern Pacific and Great Northern, and the grain loaded into these cars will probably go to Duluth. The situation has not not been very promising recently regarding the movement of grain. With the advent of colder weather, and the consequent stopping of plowing and other work at the farm, a large increase in wheat deliveries is expected, with a possibility of a serious blockade resulting. Blockades have been occurring at country points for some weeks, and the railways recently have not been handling as much wheat as has been expected of them. A large increase in deliveries would, therefore lead to a very serious situation again, unless a much larger movement by rail can be made. Stocks at Fort William also continue to accumulate, the shipments by water being less than receipts at that port. If navigation should close with large stocks at lake ports there would be a complete blackade soon after the close of navigation. Manitoba wheat has been generally firm during the past week. Prices at the close Friday were: No. 1 hard, 73½; 1 northern, 71½c; 2 northern, 70c; 3 northern, 68c; No. 4 wheat, 64c; all in store Fort William or Port Arthur. In store Duluth sells at same price as Fort William for the high grades, but the low grades are about 1½c less.

Country Wheat—Farmers' deliveries have been large during the week, although the country roads are not in the best shape for hauling. A little more snow would make sleighing and then deliveries would be freer. Probably the railway companies and elevator men are as well pleased to have the roads bad, as they are unable to take care of all the wheat offering. The market has improved as compared with a week ago, and the average price to farmers for wheat is higher. The action of the grain trade in advancing prices at Canadian Northern points over those in force at corresponding Canadian Pacific points has created a disparity in prices to farmers. At C. P. R. 16c freight rate points the ruling price for best wheat is 55 to 56c per bus., while at similar C. N. R. points the price is 59 to 60c per bushel for farmers' loads.

Liverpool—No. 1 northern closed on Saturday at 6s. 7½d.

OATS—Car shortage is interfering with trade to a considerable extent. Today No. 2 white oats are worth 28c per bushel at Fort William. On track, Winnipeg, No. 2 white oats are worth 27½c per bushel, and about 25½c is the price for feed white. At country points farmers are getting 20c at central points.

BARLEY—There is not much movement in barley, and the business is almost all on local account. Malting grades are worth 32 to 33c per bushel on track, Winnipeg, and feed grades 26 to 27c.

FLAXSEED—Receipts are moderate, and the market steady at $1.00 per bushel for carlots at country

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $6 to $6.50 per ton for carlots on track.

POTATOES—30c per bushel.

BUTTER—Creamery—The season is about over and receipts are light. Creameries are asking 25c per pound from city customers for choice makes, which is an advance of 2c per lb.

BUTTER—Dairy—Stocks are not very large and most of the holdings are under grades. Very little choice table butter is to be had. Jobbing houses are paying 14 to 15c net at Winnipeg for best grades. Seconds are worth 12 to 14c net.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—18c per dozen.

POULTRY—Dressed chickens are worth 9 to 10c per pound, ducks and geese, 10c, and turkeys 12½c.

DRESSED MEATS — Beef, city dressed, 5½ to 6½c, country stock, ½c less; mutton, 8 to 9c; lamb, 11½c; hogs, 9 to 10½c.

ARE YOU MAKING BUTTER FOR PROFIT?

Your success and profits from buttermaking depend largely on the quality of coloring you use during the autumn and winter seasons. If you use Wells, Richardson & Co.'s Improved Butter Color, your butter will bring a higher price than if colored with any of the imitation colors now sold by some merchants for the sake of large profits. Poor colors produce a bricky shade, rancidity and a mottled aupearance. Any of these results will condemn your butter. Wells, Richardson & Co.'s Improved Butter Color always gives the natural June tint and never fades from the butter. Ask for it and take no other make.

The easiest money to spend and the hardest money to save is that which you haven't yet earned.

Some men know only enough to hold on to what they inherit.

Mrs. Celeste Coon, Syracuse, N. Y., writes: "For years I could not eat many kinds of food without producing a burning, excruciating pain in my stomach I took Parmelee's Pills according to kirections under the head of 'Dyspepsia or Indigestion.' One box entirely cured me. I can now eat anything I choose, without distressing me in the least." These Pills do not cause pain or griping, and should be used when a cathartic is required.

With some 5-cent cigars you get at least six scents.

The eight-day clock is a hard worker and a chronic striker.

Sometimes it is his lie-abilities that increase a man's assets.

It is always safe to keep what you think to yourself.

People like a man better if he has at least one idea of his own and sticks to it.

Misfortune is no respector of persons, and neither is fortune, for that matter.

Every man would rather line up in front of a dry goods store than go inside with his wife.

Nothing varies so much as the promises people make and their performances.

Do not bottle up your happiness; you should let the world have the benefit of it.

Paine's Celery Compound CURES RHEUMATISM.

The Only Medicine That Prevents a Return of the Terrible Disease.

Rheumatism, which does its terrible work in the muscles, joints and tissues, is caused by uric acid which gathers in the blood. To get rid of this poisonous acid which produces the irritations, pains, agonies, inflammations and swellings peculiar to rheumatism, Paine's Celery Compound should be used without delay. No other medicine gives such prompt cheering and happy results. It is the only medicine that prevents a return of the dreaded disease. Paine's Celery Compound braces the nerves, the blood is cleared of all irritating poisons, tissue and muscle are built up and the digestive organs perfectly toned. Do not treat with indifference the slightest symptoms; early use of Paine's Celery Compound will prevent weeks and months of suffering. Mr. G. J. McDonald, Cornwall, Ont., writes as follows:

For three years I suffered terribly from rheumatism. It seemed to me that I was forced to endure all the agonies and pains that a mortal could possibly experience from the disease. While suffering, I tried many of the advertised medicines, also doctors' prescriptions, but never found a cure until I procured a supply of Paine's Celery Compound. It worked like a charm, and seemed to strike at the very root of my trouble. I am now cured; all pains are banished, and in every respect I am a new man."

Food is so dear at Stellenbosch, Cape Colony, that the men of a battery of the Royal Horse Artillery stationed there propose to cultivate their own vegetables.

Result of New York Expert's Analyses of Canadian-Made Soaps.

Dr. Deimel Linen-Mesh Co. writes: "We sent samples of the leading "soaps made in Canada to an expert "in New York, and had them thor-"oughly analyzed. As a result of "this analysis, we find your 'Sun-"light Soap' to thoroughly cleanse "without danger to the clothes, and "we are therefore pleased to recom-"mend wearers of the Dr. Deimel "Underwear to use Sunlight Soap "for washing."

FERNIE BRANCH, E. H. BIRD, Manager.

The Fernie Free Press

ESTABLISHED 1898.

Address all communications to the Editor.

Subscription: $2.00 Per Year in Advance

SATURDAY, NOV. 22, 1902.

OUR SOUVENIR.

THE experiment of the FREE PRESS last Christmas in publishing a Souvenir number met with such flattering success that we venture into a similar work this year with larger ideas and bolder confidence. The plan of the book is already well matured and we take pleasure in announcing to our readers some of its prominent features.

The book will be considerably larger than last year's, both in size and number of pages, while the paper used will be of the same fine quality. It will be profusely illustrated with nearly 100 clear half-tone engravings of familiar and interesting scenes, portraits, etc.

The Souvenir will contain an exhaustive write-up of Fernie's past, present and future. The steady progress of the town during the year, embodying a history of its important events in every department, will be faithfully recorded, and the industrial and mercantile features will be impartially treated. The great and ever-widening possibilities of the whole of the Crow's Nest Pass Coal fields will receive the most careful attention.

To sum up,—The FREE PRESS is sparing neither expense nor effort to make this the most artistic and comprehensive work of its kind ever issued in the West. It will be out in time to reach your friends in the east before Christmas day.

All new subscribers and renewals will receive a free copy of this beautiful Christmas Souvenir of the FREE PRESS. To others the price is put at the low figure of 35 cents. Leave your order at the office or with the delivery boy.

Pittsburg B. C.

Nearly all of us have a difficuly when speaking of Morrissey and Morrissey Mines in making ourselves understood Since the new town has appropriated to itself the name given to the mines it only remains that the Coal Co. should change the name of its camp, and the agitation to make it Pittsburg should meet with general satisfaction. This would prevent either Morrissey from making the mistake of picking up bouquets thrown to the other. Pittsburg, we think, correctly represents the possibilities of that camp and we hope for journalistic reasons, if for no other that some change be made at once.

* * *

THE "Old Man" of the Morrissey Miner, calls us down in a long editorial for referring to that locality as Morrissey Junction. He racks his brain and after a long train of philosophical reasoning brings forth three theories as the cause of that unpardonable sin.

With marvellous skill the editor of that great family journal kills with one stone not only two birds but a whole flock. He tells us the real name of his town and gives references; he tells us of the wonderful advantages of that town and "surrounding country"; he gives us and insight into his marvellous Sherlock-Holmes like manner of fathoming cause and effect; and biggest fowl of all,—he fills up his paper.

Incidentally he undertakes to order the Coal Co. off the earth and to express a guess as to who is running this paper.

No! No! neighbor Miner the reason for the mistake can be found nearer at home. For years we and the public at large have been taught to call the town at the mines by its correct and original name of Morrissey. When the Great Northern formed a junction with the C. P. R. near there that locality we as naturally fell into the habit of calling Morrissey Junction. A townsite was laid out at the latter place and for reasons perhaps best known to its promoters the name of Morrissey was stolen from its fore-parent.

Therefore we humbly beg to plead in defence of our mistake that it is hard to overcome a habit so naturally formed, so hard that the lifetime of a town may be consumed in a vain struggle to forget custom's thorough teachings.

* * *

"Dear old Marconi!" writes a Canadian, after being scrutineer at one of the booths in the Bowery, New York, "if he could only invent wireless politics."

BOARD OF TRADE.

Two Important Resolutions Passed on Wednesday Evening.

The Executive of the Fernie Board of Trade met Wednesday evening. Besides the usual routine business two important subjects were dealt with.

One was our train service. It was thought by the Executive that the Crows Nest branch should never leave Medicine Hat without making connection with the main line, a resolution to this effect was passed and forwarded to the Lethbridge Board of Trade which is also advocating the same reform. Both boards will unite in pressing the point with the postal department and the C. P. R.

The subject of incorporation was discussed and after careful deliberation the board decided to drop the matter for a time, on the ground that it was premature as there were not a sufficient number of property owners who had got their deeds from the Coal Co. to guarantee further action in the matter. It is required by the provincial act dealing with municipal government that the majority of the property owners must be in favor of the movement.

We Guarantee all Chains sold, and are willing to stand at the back of every guarantee.....

LOCAL AND GENERAL.

Fresh Oysters at Cuthbert's.

Dr. Bonnell went to Cranbrook on Tuesday.

C. W. Laidley went to Michel on a trip on Thursday

The Imperial Bank will open a branch at Cranbrook on Monday.

Gramophone and 15 records for sale cheap. Apply Box 217, Fernie P. O. 2t

Mrs. Loasby of Sirdar, was the guest of Miss Andrews for a few days this week.

Geo. Hogath, proprietor of the leading hotel, Elko, was in town for a couple of days this week.

General Manger Tonkin, went down to Michel on Tuesday evening and returned on Wednesday morning

The Frank mines exported 4,000 tons of coal last week. The shortage of cars is still felt by the Company however.

Mrs. D. L. Gordon returned on Tuesday from Pincher Creek where she has been visiting friends for a couple of weeks.

According to a despatch to the Rossland Miner the Boundary District Smelters were beginning to feel the effect of the Michel strike as the supply of coke was short.

Mr. J. H. Brock, manager of the Great West Life Assurance Company, of Winnipeg, was in town on Thursday looking after the interests of his company in Fernie and vicinity.

Dentistry

Dr. Barber can now be found at his office in the Hill Block from 8 a. m. until 3 p. m. He has installed a system of incandescent lights which enables him to do dental work in the evenings. x

Regular church service will be held in the Baptist church to-morrow evening at 7.30, Ensign Sheard of the Salvation Army will preach. On Thursday evening at 8 o'clock Rev. F. W. Auvoche, of Cranbrook, will conduct a regular service.

The Ladies Aid Society of the Presbyterian church will hold a social in Princess Hall on Wednesday evening. An enjoyable program consisting of games, music, etc., is promised. Refreshments will be served. The Admission will be 25 cents.

The services at Christ Church, Fernie, to-morrow will be held as follows:—Matins and Holy Communion, 11 o'clock, Sunday school and Young Mens bible class at 2:30 p.m., Evensong at 7:30. All are welcome. Collection in aid of Church expenses.

The people of Michel are making strenuous efforts to build a skating rink this winter, and it is not at all unlikely that before the year is out they will have a large, covered rink. The site contemplated is near the engine house, where the ground is level and hot water, for flooding purposes, is available.

On Sunday evening an accident delayed the eastbound express here for an hour A freight engine, No. 501, broke its eccentric rod while attached to a heavy train about 5 miles east of Fernie. Engine 342 went down and shoved the train into Hosmer siding allowing the express to get by.

The Fernie Quadrille Club held its second dance on Wednesday evening of this week. A large crowd of the leading people of the town took advantage of this popular amusement and a most enjoyable evening was spent. The large hall was comfortably filled and the club is to be congratulated upon the success of its undertaking.

Mr. F. B. Smith, Inspector of Mines in the territories and formerly Supterintendent of mines here was in town on Sunday. Mr. Smith accompanied by his wife has just arrived from a long tour over Europe where he was inspecting mines with a view to introducing new legislation to increase the safety of miners and to improve mining methods in his district.

The young people of Michel have organized a Young People's Society. The officers are as follows; President, R. L. Henderson; Vice-president, R. J. Clarke; Secretary, Miss A. Evans; Assistant-secretary, Miss A. Dudley; Treasurer, Miss M. Evans; Executive Committee, R. B. Sparkmen and E. K. Stewart. The society meets every Tuesday in the public hall, the first and third meeting of each month being open to the public when everybody is welcome and the remaining meetings are open to members only. At the next meeting the male members are putting up a grand oyster supper which will be followed by an interesting program, The society is maintained by a small monthly fee, is free from all church influence, and will doubtless prove an important factor in the social life of that town.

Mr. Wm. Blakemore went west as far as Nelson on Monday's express.

A. J. McDonald, of the Western Federation of Miners, was down at Frank this week.

A bunch of 14 fine young horses were brought up on Tuesday morning to be used in logging for the Cedar Valley Improvement Co.

Fred Johnson has resigned his position with the Coal Co. and leaves at the end of the month for his home in Pennsylvania.

J. A. Baker has gone to Denver, Col., as a B.C. delegate to the Western Federation of Miners. His duties will be attended to here by A. J. McDonald.

Rathier and Borrissete, of Fernie, have rented the store next to Alex. Leitch's grocery and will open up a tailoring establishment next month.—Frank Sentinel.

Mrs. Arnold, who was incorrectly reported last week as having gone to her home, was the guest of Miss Church until yesterday when she left for her home in Cranbrook.

A. C. Bell, auditor for the C. P. R. at Cranbrook, who was taken ill with pneumonia while in Fernie about two weeks ago, is almost fully recovered and will leave the hospital soon.

Mr. F. Stephens, C. P. R. station agent is making a special effort to have the cheap Christmas excursion rates extended to Fernie. Hitherto they have only extended as far west as Pincher Creek.

The Hockey club of Lethbridge is proposing to build a 65x130 skating rink at an estimated cost of $1000. If the matter is brought to a successful issue the boys intend to join the Crow's Nest League.

"A Foxy Tramp" was played here to a small house on Tuesday evening. General satisfaction was expressed by those who attended. The play which is of a light nature was said to be clean and well rendered.

Quite a number of cases of dphtheria have been reported in town during the past few weeks but the careful regulations of our Health Officer have resulted in almost stamping the disease out. One case of scarlet fever also broke out but no further developments in this direction have been reported

Fred Delzell, of Michel, was in town yesterday and reports that the statement that a band of Territory Indians had been hunting on the upper Elk was incorrect. He asserts that they came only as far as the Summit. Fred is very much interested in the formation of a branch of the League of American Sportsmen.

To be Tried in January

The cases for damages against the Crow's Nest Pass Coal company, arising out of the mine explosion in Fernie last May, will be heard in the supreme court of British Columbia in January. There are forty actions already entered, aggregating over $500,000. The claimants are represented by S. S. Taylor and W. R. Ross.

Read all about our souvenir Christmas number on another page. Every new subscriber and every old subscriber renewing will receive a free copy. Every house in the Crow's Nest Pass should contain a subscriber of this representative weekly paper. To all others the price will be put as low as 35 cents, which barely covers the cost of its production.

The next session of the Dominion Parliament will be asked to grant a charter to construct a railroad from a point on the eastern boundary of B. C. known as South Kootenay Pass, thence to a point on the Crows Nest line between Macleod and Lethbridge, thence to Medicine Hat, Battleford, Prince Albert and Fort Churchill on Hudson Bay.

The C. P. R. are calling for tenders for a lot of grade work in the yards at Frank The specifications include the building of a road bed a mile long and sixty feet wide, to hold four tracks, and a side track to the coal bins where engines will be coaled; one main side track to the tipple with four sidings; a local freight siding and other small sidings and switches. This is entirely separate from the proposed cut-off of 5 miles in the mainline.

Charles Wiernet, a trapper, who lives alone in a shack about 22 miles up the Elk river from Michel, and near the sulphur springs, cut his leg badly with an axe some time ago. He bound it up as well as he could and it was apparently healing alright. Lately it began to fester and an examination by Dr. McSorley showed that the healing was only at the surface. Wiernet was sent to the Cranbrook hospital on Thursday morning. It is feared that his leg may have to be amputated.

3 Days Sale

Hats, children's bonnetts, belts, Ribbon, chiffons, corsets, hair combs, silks, velvets &c.

Will be sold at COST

My Heart's Darling

* * *

BY W. HEIMBURG

Auther of "A Penniless Orphan," "Gertrude's Marriage," "Her Only Brother," Etc., Etc.

CHAPTER I.

The express train was standing at the station of H——. "One minute!" cried the brakeman, hurrying from one coupe to another. Greetings and farewells were being exchanged along the row of cars, here and there a thirsty passenger was calling for beer, and now the bell rang for the third time. In the meantime the coupes had been filled up, in spite of the unconcealed annoyance of the earlier occupants, and as by magic all was quiet. But just as the brakeman was putting the whistle to his lips a young girl rushed out of the station in breathless haste.

"Where?" cried the conductor.

"To Hohenburg—second class—ladies!" she gasped.

"All full!" said the man, brusquely, pulling open the door of a first-class coupe and thrusting the slender figure in, tumbling wraps and traveling bag after her, and then went slowly along the step of the already moving train and began to collect the tickets.

The girl sat a moment, still breathless, looking at her wraps and bag, then straightened her hat on her blonde braids, and wiped her heated face with her handkerchief. Then she looked at a lady leaning out of the opposite window, who had not once turned her head when she had dashed so hastily into the coupe. She wore a simple brown cloth dress without any trimming, but the way in which it fitted the slender figure was perfect. From beneath the plaited skirt a beautifully shaped leather boot could be seen; gants de Swede with many buttons covered the slender hands, and a little brown felt hat without ornament, which crowned an abundance of dark hair, finished the elegant toilet

On the seat opposite the lady lay an open book, and near it a handsome leather portfolio, on the silver clasp of which was engraved "H. L." under a seven-pointed coronet. The book was evidently French. Several large newspaper sheets had slid to the floor, and near them the astonished brown eyes of the young girl saw the remains of two cigarettes. She knew now where this pleasant pungent odor had come from which filled the coupe.

"Tickets, please," called the voice of the conductor, as he leaned in at the window. Hastily the girl's little hand went to the pocket of her dress, and equally hastily it came out empty. An eager search was now begun through the traveling-bag, on the seat and on the floor, while the girl's face kept changing from red to white, and her eyes gave a frightened look at the impatient face of the conductor.

"I must have lost my porte-monnaie, and my ticket with it," she stammered at last.

"Look again," growled the man. "I will come back."

With that he disappeared, and she began anew to ransack the pockets of her black alpaca dress and all her belongings, but in vain. A half audible "Oh, dear!" trembled in the air, and then a woman's peculiarly musical, ringing voice asked:

"Can I help you in any way Lucie Walter?"

The latter looked up in astonishment at the beautiful regular features turned toward her, and which seemed so familiar, but which she could not in any way recall.

"You look just as you did Lucie, in the days when we used to crawl under your father's garden hedge to steal strawberries."

A smile came over the girl's face.

"Hortense von Lowen! I did not recognize you!"

"That I can well believe; but you are just the same. Feature for feature, the same blonde child; just as if your mother had kept you in a glass case, so unchanged and soft has your face remained; while I—" She stopped. "How old was I," she continued, "when we rented the house from your father—about twelve years? Now I am twenty-five, so it was thirteen years ago! How old were you at that time?"

"Ten years old, Hortense."

They were now sitting opposite each other, Hortense leaning back gracefully, Lucie sitting bolt upright, as one might on a visit of ceremony.

"So you are twenty-three now! What have you been doing since we moved away from D——? I have never heard from you since. How are your parents and sister?"

The smile faded out of the girl's face. Lucie looked down at her hands, and there was a long pause before she answered, suppressing a sob:

"They are both dead."

Hortense von Lowen was silent and looked out of the window.

"And where have you found a home?" she asked at last.

"With my sister, who married the Oberforster Kemmert. Do you not remember her wedding?"

"Oh, yes, I remember it. She was a pretty girl, wore a mull dress, and cried so bitterly at her wedding."

"I have been with her until now."

"And now?" asked Hortense.

The clear face of the girl turned red as a rose. "I am traveling today to my future mother-in-law's, where I am to remain until my wedding."

Hortense von Lowen looked smilingly into the happy, trustful eyes of her companion. "I congratulate you heartily. And does your future mother-in-law live in Hohenberg?"

"Yes; and he too. He has lately become practicing physician there; he was formerly assistant at Professor B——'s clinic in H——. When he became engaged to me he settled in Hohenberg. Do you know anything of Hohenberg?"

"I know it very well; I live there with my grandfather."

"Then do you also know Doctor Adler?"

Hortense shook her head. "I know nobody. We live in a very retired way there, my grandfather and I, and I am away traveling a great deal of the time."

"And your father, Herr von Lowen—is he well?" asked Lucie.

Hortense leaned back on the cushions.

"I believe so," she said, coldly. "There comes the conductor; may I offer you my porte-monnaie? The lady will pay at the next station," she said, turning to the conductor. "She has lost her ticket."

The man pocketed his trinkgeld, and bowed politely.

"Ach, I thank you a thousand times!" stammered Lucie.

"Oh, it is nothing," returned Hortense, taking up a book and beginning to read.

The train hurried on through the bright spring day. In the coupe all was still. Lucie could hardly take her eyes off the beautiful face opposite her, and in her mind scene after scene of past days kept rising up. The pale, small face, with the delicate nose and nostrils that always seemed to vibrate, the beautifully formed mouth, about which such a disdainful expression occasionally played; the steel gray eyes that took a green light when excited, blended wonderfully with the face of the little girl of former years. The wild, beautiful child that had been such a delightful playmate was now vividly in her memory again.

The Von Lowens had once come to D—, and had rented the upper story of her father's house, and had lived there—father, daughter, and governess.

Lucie remembered well the handsome man with the aristocratic features, and with what strong affection the little one would hang about his neck, when he would return home after an absence of weeks. At that time Hortense was wearing mourning for her mother, and it used to have such an odd effect—the wild, pale child in the deep-black clothes. The governess also came clearly before her memory again—the elderly, fussy person who was always looking for her pupil. "Oh, Mademoiselle Lucie! dear Madame Walter, have you seen Hortense?"

Lucie had always been positively forbidden either to drive her goat or to ride her pony through the park; but Mlle. Bertin was always begging her mother, in her broken German: "Do let Lucie come oftener with us, Frau Doctor. Hortense is so fond of her, and she so seldom cares for other children. Mademoiselle Lucie is so gentle, she will have a good influence upon Hortense."

She recalled all the games which Hortense had suggested — the races in the court-yard, the secret confabs in the attic—and then how she used to be scolded when she appeared before her mother covered with dust and her clothes torn. Now she seemed to feel again the fascination that used to influence her in those days, when she would be sitting busy with her schoolbooks in the children's room, and out of the branches of the pear-tree in front of the window a pale, childish face, with large grey eyes and dark hair would appear. "Are you not coming! Make haste! I will wait in the barn."

The sums would be added up in the most reckless manner, and she would hurry off to the dimly lighted barn, where everything smelled extremely musty. And Hortense would talk and tell stories. "When I am grown up, then—" She even then talked of a possible husband.

Lucie smiled to herself. It was odd that they should meet again here, after a separation of so many years. What had Hortense been doing all this time? She wanted to hear, but scarcely knew how to ask.

"How is Mademoiselle Bertin?" she asked at last.

(To be Continued.)

The Earth's Other Motion.

The earth, in addition to its diurnal and annual revolutions, has a slow wabbling of its axis, a motion seldom mentioned even in the textbooks of astronomy. This curious motion may be properly likened to that imparted to a top by a touch of the finger on its rim when it is in rapid movement, the touch causing the upper end of the top's stem to describe a small circle. So, too, the mighty sun lays hold of the rim of the great terrestrial top, and it begins to oscillate in the long period of 21,000 years—that is to say, on Dec. 21, 1248, the earth made its nearest approach to the sun, and it will approach equally near in 10,500 years from that time, or on the 21st day of June in the year 11,748. This has all to do with climate both north and south of the equatorial line.

In the period comprising the first our northern winters are short and mild and our summers are long and sunny. But during the period of which the year 11,748 will be the middle our winters will be awful in their severity and our summers short and cool. Even now the northern hemisphere is slowly but surely losing its long, sunny summers, and if you should live until the winter of the year 11,748-49 you could tell a story of cold and snows that would pale to insignificance the stories of the cold winter of 1833-34, for the whole northern hemisphere will then be in the midst of its great and terrible winter.

The Kingfisher.

Koskomenos, the kingfisher, still burrows in the earth like his reptile ancestors. Therefore the other birds call him outcast and will have nothing to do with him. But he cares little for that, being a clattering, rattle headed, self satisfied fellow, who seems to do nothing all day long but fish and eat. As you follow him, however, you note with amazement that he does some things marvelously well—better, indeed, than any other of the wood folk. To locate a fish accurately in still water is difficult enough when one thinks of light refraction, but when the fish is moving and the sun glares down into the pool and the wind wrinkles its face into a thousand flashing, changing furrows and ridges, then the bird that can point a bill straight to his fish and hit him fair just behind the gills must have more in his head than the usual chattering gossip that one hears from him on the trout streams.

A Horse's Revenge.

A strange case of a horse taking revenge on a brutal driver is reported from Rennes, France. The horse was dragging a heavy load of bricks from a kiln at Lormaudiere to Rennes, and the carter hardly stopped flogging him all the way. On reaching Rennes the driver was unharnessing when the horse bolted down the street. He allowed himself to be caught and led back quietly, but the moment he saw his tormentor he rushed at him, caught him in his teeth, dashed the man to the ground and rolled upon him. The man was seriously injured and would probably have been killed but for the help of the people standing round, who had, nevertheless, the greatest difficulty in getting the horse away from his victim.

Reliability.

"Is Wiggins a reliable man?"

"In one sense. If you tell him to do anything, you can count absolutely on his forgetting all about it."

In cases where bronchitis has become chronic from want of proper treatment in the earlier stages, there is nothing so good as Dr. August Koenig's Hamburg Breast Tea, in conjunction with which is strongly advised the use of St. Jacobs Oil as an outward application along the front of the throat from close up under the chin to well down to the top of the chest; the one remedy assists the other, and as intended, they work in complete unison. The wonderful penetrating power of St. Jacobs Oil enables it to reach the adhesion of foreign matter which lines the bronchial tubes and which makes breathing more and more difficult. As these adhesions become inflamed and enlarged St. Jacobs Oil causes such adhesions to break away, making expectoration easier and more free. Dr. August Koenig's Hamburg Breast Tea, drank slowly and very hot, soothes and heals the parts, is comforting and quieting, stops the cough and relieves the breathing. This manner of treatment (and there is no other two remedies that will work together so successfully) reaches the difficulty from the outside and and the inside at the same time. St. Jacobs Oil reaches the roots of the adhesion and assists Dr. August Koenig's Hamburg Breast Tea in clearing them; then both remedies act in unison in healing and curing. The above remarks apply with equal force in cases of asthma, croup, whooping cough, enlarged tonsils and all bronchial affections. Every family should have St. Jacobs Oil and Dr. August Koenig's Hamburg Breast Tea always in the house in order that they may be promptly used in the first stages. Often the maladies develope with wonderful rapidity, and complications take place with equal suddenness.

Paris and Copenhagen will be placed in telephonic communication with each other next month.

HAD MADE HIS WILL.

Fully Expecting to Die, Had Arranged all his Earthly Affairs.

How Death was Disappointed by the Happy Restoration to Health and Strength of Mr. Teeny.

Sumner, Assa., Nov. 10.—(Special)—Mr. Louis Teeny of this place was so ill with inflammation of the bowels and kidneys that no one ever expected him to recover. All hope had been abandoned and Mr. Teeny had made his will, fully expecting that he would die.

In this extremity Mr. Cosgrave, Postmaster, thought of Dodd's Kidney Pills and immediately gave Mr. Teeny a dose. This treatment was continued at intervals with the result that in a very short time the man who was thought to be dying was on his feet and going around as if nothing had happened.

This remarkable cure of such an extreme case has created quite a sensation in the neighborhood and many kind words are being said of Dodd's Kidney Pills for the wonderful work they did in Mr. Teeny's case.

This remedy has always been recognized among the people as a sure cure for Backache, Rheumatism and all Kidney Troubles, but this is the first case ever reported in this vicinity where they have been used with such quick results.

Mr. Teeny himself is very grateful to Dodd's Kidney Pills for his happy restoration.

People in and about Sumner have just about concluded that there is nothing in the way of sickness that Dodd's Kidney Pills will not cure, and there is scarcely a home to be found in the neighborhood that does not contain a box of this wonderful medicine.

Men, women and children are finding out every day some new virtues in it and it is very interesting to hear them get together and compare notes as to what Dodd's Kidney Pills have done in their various homes.

Bread has been cheaper in Yorkshire and Lincolnshire, England, since the tax was imposed on imported cereals.

A DINNER PILL—Many persons suffer excruciating agony after partaking of a hearty dinner. The food partaken of is like a ball of lead upon the stomach, and instead of being a healthy nutriment it becomes a poison to the system. Dr. Parmelee's Vegetable Pills are wonderful correctives of such troubles. They correct acidity, open secretions and convert the food partaken of into healthy nutriment. They are just the medicine to take if one is troubled with Indigestion or Dyspepsia.

Orders have been issued to the Russian police to forbid the sale or use of phonograph rollers for the reproduction of sacred music.

Minard's Liniment for Rheumatism.

Any small boy in his first pair of trousers feels sorry for his mother.

If it is true that the good die young it is up to the oldest inhabitant to offer an explanation.

A cynic is a man whose disappointment is due to the fact that the world was made without his advice.

SYRUP of FIGS

ACTS GENTLY ON KIDNEYS, LIVER AND BOWELS,

CLEANSES THE SYSTEM EFFECTUALLY;

DISPELS COLDS HEADACHES & FEVERS;

OVERCOMES HABITUAL CONSTIPATION PERMANENTLY.

TO GET ITS BENEFICIAL EFFECTS,

BUY THE GENUINE—MAN'F'D BY

LOUISVILLE KY. SAN FRANCISCO CAL. NEW YORK N.Y.

FOR SALE BY ALL DRUGGISTS. PRICE 50c. PER BOTTLE.

A man may not be able to earn what he eats at all times, but a willingness to do so excuses the omission.

The healthy glow disappearing from the cheek and moaning and restlessness are sure symptoms of worms in children. Do not fail to get a bottle of Mother Graves' Worm Exterminator; it is an effectual medicine.

On account of the bad harvest in Norway the government has granted $48,000 to farmers for the purpose of buying seed.

Minard's Liniment is best Hair Restorer.

Doctors will tell you that some men die hard, while others are dead easy.

It takes a rich man to enjoy the pleasures of poverty.

Are your corns harder to remove than those that others have had? Have they not had the same kind? Have they not been cured by Holloway's Corn Cure? Try a bottle.

Riches don't bring happiness, but they pay house rent and the gas bill.

A good man never blows his own horn—because he's too poor to own one.

There are so many cough cures on the market, that it is sometimes difficult to tell which to buy; but if we had a cough a cold or any affliction of the throat or lungs, we would try Bickle's Anti-Consumptive Syrup. Those who have tried it think it is far ahead of all other preparations recommended for such complaints. The little folks like it as it is as pleasant as syrup.

Coronation medals made of gun metal have been presented by the King to the Household Police at Windsor Castle.

Messrs. Northrup & Lyman Co. are the proprietors of Dr. Thomas' Eclectric Oil, which is now being sold in immense quantities throughout the Dominion. It is welcomed by the suffering invalid everywhere with emotions of delight, because it banishes pain and gives instant relief. This valuable specific for almost "every ill that flesh is heir to," is valued by the sufferer as more precious than gold. It is the elixir of life to many a wasted frame. To the farmer it is indispensable, and should be in every house.

The worldly wise seldom squander their accumulated wisdom.

Poverty isn't a crime—unless it furnishes one with prison fare.

"KELPION" (A STAINLESS IODINE OINTMENT.)

Endorsed by best English medical journals.

Supplied to British soldiers in South Africa.

For all Throat and Gland Troubles, Lumps, Abscesses, Old Sores, Ulcers, Felons, Skin Diseases, Eczema, Pimples, Stiff Joints, Rheumatism, Lumbago, Sprains, Bruises, Piles, Cuts, Sore Feet, Pleurisy.

Sold by Druggists, 25c. Try it once.

When people actually carry out their good intentions, the millennium will be in full blast.

A Primitive Postoffice.

Until a short time ago a very peculiar postoffice was used in Argyllshire, England. It was situated in the lonely hills between Drimmin and Barr, three miles from any habitation, and consisted of a simple slit in a rock, closed up by a nicely fitting stone.

When any letters arrived at Drimmin for the district of Barr, they were conveyed to the rock by the first shepherd or crofter going so far. Having been dropped in and the slit reclosed, they were left until a shepherd or crofter from the other side happened to come along, when they were taken up and delivered at their destination. No letter was ever known to be lost at this primitive postoffice.

Got the Wrong Flag.

A retired naval officer took holy orders and became rector of a country church. His parishioners, wishing to give him a surprise, subscribed among themselves and bought a naval flag for the church tower. Directly the old gentleman saw it he flew into a violent rage and ordered it to be taken down at once. One of his parishioners asked him why he did not like it.

"Allow that flag to fly on my church tower? Never! It's an insult! Do you know what that particular flag signifies, sir? It means, 'In distress; want a pilot!'"—London Standard.

A Cross Parent.

"Mother," said a little girl, looking up from her book, "what does 'transatlantic' mean?"

"Oh, across the Atlantic, of course. Don't bother me."

"Does 'trans' always mean across?"

"I suppose it does. If you don't stop bothering me with your questions, you'll go to bed."

"Then does 'transparent' mean a cross parent?"

Ten minutes later that little girl was resting on her tiny couch.

Then She Smiled.

He—You always remind me of something very disagreeable.

She—Sir! I—I—

He—Yes, you remind me of all the time I have to spend where I can't see you.

And the clouds lifted.

Defined.

Precocious Child—Papa, tell me what is humbug?

Parent (with a deep drawn sigh)—It is, my dear, when your mamma pretends to be very fond of me and puts no buttons on my shirt.

FROM THE ORIENT

TWELVE HUNDRED CATHOLIC CONVERTS KILLED.

Boxer Movement in China Followed by Death and Pillage---One Party After Entering Chengtu Were Captured and Eleven Beheaded.

Mail advices from South China report a recrudescence of the rebellion in Kwangsi some months ago reported to have been suppressed. The rebels captured Hochinchou in Chinywanfu, secured the sub-perfect and plated him in his own prison. After pillaging this place, they attacked and took Lincinfu, a prefectural city. Large numbers of the Kotihui, a new secret society, which is both anti-foreign and anti-dynastic, have joined the rebel movement.

The rebels are regularly supplied by caravans which cross the adjacent French and Portuguese territory with arms and war munitions. Two Chinese cruisers, the Whan Gai and the King Ching, left Canton shortly prior to the departure of the steamer Empress of China from Hong Kong, with over a thousand braves to reinforce the imperial force.

In Szrehuan the Boxer movement still progresses. The Boxers have plundered all the villages between Tzsechau and Chengtu, and in the place massacred 1,200 Catholic converts. When the last advices were received at Shanghai from Chengtu, Yanghsein was besieged by Boxers and the gates of several cities near by were kept closed and people were let down and pulled up their walls with ropes. On October 1 two parties of Boxers entered Chengtu, flourished knives and waved Boxer flags. The people were panic-stricken and fled in confusion, but the prompt arrival of the garrison resulted in the Boxers being driven from the city with heavy loss, and eleven, including a woman, looked upon as a prophetess, were captured and beheaded in front of one of the yamens.

A proclamation has been posted at Chengtu, offering one hundred taels for the head of each Boxer captured within the city.

A fire at Kweilin, Kwangsi, has caused great loss of life and property. The fire originated in a fire cracker shop, where the men were testing the powder. An explosion followed and then a fire which spread and burned several hundred houses. Many Chinese were burned to death. The fire burned houses all around the Christian Alliance mission, which was unscathed. The result of this freak of fire is that many Chinese have since come to the missionary to be baptized.

Mail advices from Guan report that the earthquake which occurred there on Sept. 22 all but destroyed Aganu (the colony's capital) where nearly every house will have to be rebuilt. The effects of the earthquake are described as terrifying, big fissures being opened in the earth, and one case is known where a native house with several people was engulfed in a fissure.

Escaped From Jail.

A Kingston dispatch says: A sensational escape of a prisoner from the county jail occurred on Nov. 12, when Gunner Cleator, of A Battery, got away in an unusual manner. So far, no sign of him has been seen.

Six prisoners were in charge of Turnkey James E. Perry, and Assistant Turnkey Bert Dawson. Cleator wished to go to the lavatory, so Dawson took him, and the two men went along. While Cleator was away Dawson kept his eyes on the other two, but forgot about a window in the building where the Batteryman was. Later Turnkey Dawson began to wonder what kept the soldier so long.

He gained admission to the lavatory, only to see a pile of old clothes with the familiar stripe on them, but no prisoner. He raised the alarm, but there was no sign of the escaped man.

William Cleator was a gunner of A battery, sentenced to serve 168 days in jail for desertion. He had served only about half that time.

A shocking accident and tragedy occurred recently at Stoney Island, N.S. James Nickerson, a young man of about nineteen, left his home on the island, accompanied by his dog, for some beach shooting. Toward noon the dog returned to the house alone, evidently anxious and ill at ease. Some of the family became alarmed and followed the dog, which led them a long distance from the house to his master's body. The young man had been badly wounded in the side by the accidental discharge of his gun, but had managed to take off his coat. Then, apparently, seeing the impossibility of reaching help or of lingering in agony until help came, he had taken his knife and cut his throat to close the struggle the sooner. The knife, with blood upon it from where he had severed his jugular vein, was found on the body. Deceased was one of three brothers, and his parents are living.

The exchequer court at Ottawa has awarded William Hargreave, ex-postmaster of Winnipeg, $2,050 arrears of salary.

Acting under compulsion from the government officials, the Doukhobors started to tramp from Yorkton to their villages.

The Christmas number of The Designer is unusually attractive. Its fashion department illustrates and describes the latest in winter wearing apparel and millinery, and under "Points on Dressmaking" is furnished most useful instruction for the making of juvenile garments.

It is definitely learned in Montreal that the United States locomotive works is behind the syndicate which purchased a large tract of land at Longue Pointe. S. R. Callaway, of New York, president of the American concern, and associates, about a year ago visited Montreal suburbs and afterwards went to Kingston. It was then stated that the Kingston locomotive works had been purchased, but afterwards denied. It has now developed, however, that the American concern recently completed the purchase, and will remove the works to Longue Pointe, where an enormous plant will be constructed, and over 1,500 men employed. The intention is to build locomotives for Canadian roads, and in addition to seek a large export trade.

Dispatches from Skagway give brief details of a story of witchcraft and superstition in the Hoonah Indian village, forty miles from Juneau. Although quiet and peaceable the Hoonah Indians are superstitious and nearly every year one or more members suffer violent death. Several days ago the Indians took a man who was believed to be possessed of a devil and made him the victim of frightful atrocities. His ears were cut off and his body frightfully hacked in an unsuccessful attempt to drive out the demon. The victim was troubled with epileptic fits which continued under the ill treatment. He was buried alive in the earth and his scalp cut off. Officers have started to the scene from Juneau on a special steamer.

Word was received at Woodstock, Ont., on Nov. 10 that during the previous afternoon Mrs. Mauser, an old lady living near Sweaburg, had been burned to death. She was alone in the house at the time of the accident. Neighbors discovered the house on fire and its occupant burned to death within. She was 96 years of age.

Lord Mayor's Procession.

A cable from London says: For the first time in the history of London, the Lord Mayor's procession traversed the unfashionable thoroughfare of Petticoat Lane, in the heart of the ghetto, in recognition of the Jewish ancestry of Sir Marcus Samuel, the new Lord Mayor.

Jewish London especially celebrated the event. The poorest inhabitants of Whitechapel and Houndsditch were banquetted at the expense of their wealthier co-religionists.

The quaint annual programme of the chief executive of the city through the streets of the metropolis was probably more brilliant than usual. Seven richly decorated floats and fifteen bands, representing crack regiments, together with the city officials and the London guilds, made up a goodly pageant. A unique feature was a float representative of the Anglo-Japanese alliance, surmounted by the arms of both countries and surrounded by a guard of Japanese and British bluejackets.

The procession left Guildhall at 11 o'clock and traversed the processional streets of the old City of London to the Law Courts, where, according to ancient custom, the Lord Mayor was formally presented to the Lord Justice and was sworn in.

HE SHOT AT A KING

AN ANARCHIST FIRES AT KING LEOPOLD.

Rubino, an Italian Anarchist, Proves a Poor Shot—In Three Attempts He Only Succeeds in Hitting the Next Carriage.

A cable from Brussels, dated Nov. 15, says: Three shots were fired at the King of the Belgians this morning as his majesty was proceeding to the cathedral to attend a Te Deum in memory of the late Queen Marie Henriette. No one was hurt.

The man who fired the shots is an Italian. He stood in front of the Bank of Brussels on the Rue Royale. The other cartridges in his revolver proved to be blank, so it is presumed that those fired were equally harmless. The man was immediately arrested and the police had some difficulty in rescuing him from the hands of the crowd. He gave the name of Rubino.

The royal cortege consisted of several carriages, besides that of the king, containing the Count and Countess of Flanders, Prince and Princess Albert of Flanders, the Princess Clementina and aides-de-camp and ladies of honor.

King Leopold appeared to be quite unmoved by the attempt of Rubino to kill him. After luncheon at the palace his majesty entered a motor car and proceeded to the railway station, where he boarded a train bound for Groenendael.

A fuller investigation satisfied the police that Rubino really fired a ball cartridge, the bullet of which smashed the window of Comte D'Oultremont's carriage and grazed the grand marshal's face. When rescued from the mob Rubino was placed in a cab. Infuriated crowds of people immediately surrounded it and attacked the vehicle with knives and sticks. The police had great difficulty in forcing a way to the police station through the crowd, which shouted alternately, "Kill him!" and "Long live the king!" The cab was badly hacked with knives. A search of the prisoner revealed a package of ball cartridges on his person.

Rubino is a small bald-headed man with a heavy black moustache. He maintained perfect calm during his interrogation by the police. He informed the police that he came from London, where he went on a futile search for work. There he obtained assistance from the Italian embassy, and was temporarily engaged to watch anarchists. He was dismissed, however, as the embassy officials discovered that he sympathized with the anarchists. It was then that he bought a revolver and 50 cartridges and came to Brussels. Failing to find work, Rubino said he "determined to act," and went to the cathedral with the intention of shooting the king, but as already stated he did not fire. Then he proceeded to the Rue Royal, where he awaited the cortege. The royal carriage containing the king passed before he was able to draw his revolver, hence the shots only hit the carriage following.

In Rubino's pockets were found picture postcards, bearing portraits of King Leopold, Prince Albert and Princess Elizabeth. The prisoner said he procured the cards so as to be able to recognize the members of the royal family, and expressed the hope that others would be more successful than himself. He also said that he did not regret his act, and would have fired at any monarch, at the King of Italy as readily as at the King of the Belgians, because monarchs are tyrants who cause the misery of their peoples. Finally he declared he hated socialists because they were friends of the police, and asserted that he had no accomplices.

According to some reports Rubino, in the course of his examination before the magistrate, declared that he selected King Leopold for his attack on account of his majesty's inhuman conduct towards his daughter, Princess Stephanite, at the time of her mother's death, and he also wished to show to the anarchists in London who doubted his loyalty that while they only talked, he acted. He would have killed King Edward, he added, but for the strong feeling of the English in favor of the monarch.

Rome, Nov. 16.—The ministry of the interior has established the identity of the assailant of King Leopold. His name is Generaro Rubino, and he, as described in their records, is an advanced socialist. He was condemned to a long term of imprisonment for stealing in Milan in in 1893, but he effected his escape to England, where he is supposed to have imbibed his anarchistic principles. His father was a patriotic communal councillor, but Rubino, while still serving in the army, was condemned to five years' detention for writing a subversive newspaper article. These are the only criminal records that have been found against him. Since leaving Italy he has resided continuously in Scotland and England, first in Glasgow and afterwards in London. Some years ago he was accused of treachery by his anarchist friends and expelled from their ranks.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

Lord Salisbury's son, Lord Hugh Cecil, is regarded as the coming man to lead British Conservatives.

The Ogilvie Mills company has accepted Fort William's conditions for the establishment of a mill in that town.

Two crazy United States women were arrested near Sandringham, Eng., while endeavoring to reach Queen Alexandra.

Emperor William is arranging in England the betrothal of the Crown Prince Frederick and Princess Alice, of Albany.

A letter from South Africa states that 101 men and two officers of troop No. 17, South African Constabulary mutinied. No reasons were given, but the writer expected the dismissal from the service of all the offenders. Capt. Powell, of Ottawa, was in command.

A dispatch from Toronto says: The board of police commissioners gave their judgment Saturday in the investigation into the trouble between the police and the Toronto medical students on Hallowe'en night. They find that the use of the whips was entirely unwarrantable abuse of their powers. Sergt. Goulding, who was in charge, was fined seven days' pay, and Mounted Constables Ide, Warde and Guthrie, three days' pay each. The commissioners feel bound to express to Dean Reeve and his associates, and to the students, their sincere regret that their officers committed such a grave error of judgment.

Mr. George Lambert, British M.P., during his tour of the South African colonies visited Spion Kop. Since the campaign a beautiful spring of water has been discovered lying within the sphere of the historic operations. Had its existence been known at the time of the campaign an entirely different story, Mr. Lambert thinks, might have come to be written about the relief of Ladysmith. At the summit of Spion Kop there is a vast trench in which lie the remains of the British soldiers killed in the action, but this is beautifully kept by a league of ladies residing in the various neighboring farms. The bits of cover constructed of stones and clay by our men are also to be seen.

Wolves have killed much valuable stock recently belonging to farmers in the vicinity of Hull, Que., and now the herds are threatened by a hitherto unsuspected enemy—fierce dogs which have deserted the homes of their owners and joined the wolf packs. These renegade dogs are much fiercer and have greater destructive powers than the wolves, and the farmers are alarmed. The depredations of wolves among the sheep have been enormous. A farmer living near Hull was disturbed by the howling of wolves recently and determined to drive home his restless herd of sheep. His sheep dog, a powerful half-breed, accompanied him. The farmer had recently had doubts of the honesty of this dog. On this occasion the dog apparently worked with great zeal, driving the sheep near a corner of the field, when a pack of wolves sprang out and killed three sheep. The dog had deliberately driven the sheep within reach of the wolves.

The popular phrase about a 'frost' has received a startling vindication at the hands of an importer of foreign mineral waters, who has been matching New York skill against customhouse vigilance. Ice is one the free list, but mineral waters are dutiable, therefore the canny Gothamite imported his precious mineral water in the form of cakes of ice. Inspected by the customs officials the innocent ice was passed; then came the transfer to the store and the melting back to the normal mineral water. The customs division is now planning to make it so hot for the New York importer that hereafter his mineral water cakes will have melted long before he can get bottles ready to contain them.

Soon after a Chinese girl is born her feet are tightly bound up in order to krevent them from growing. The result is that when she becomes a woman, indeed, long before this period is reached, she cannot walk, but only waddles awkwardly. At last, however, a good time seems to be coming for these babies. During the Boxer disturbances it was found that escape from the rebels was impossible for most of the women, for the simple reason that they were unable to run. It is believed that hundreds of the poor creatures who would otherwise have been alive at the present moment were killed by these ruffians (and afterwards by many European soldiers, too). The Chinamen are said to have been so shocked that they intend to put a stop to the cruel and absurd practice of footbinding. So this is one benefit that will come to Chinese girl babies out of warfare. Sometimes it does look as if good would come out of evil.

Mrs. Macqueen, nee Livingstone, a cousin of the famous African explorer, is living at Fishnish, Isle of Mull, aged 107 years. She has a daughter, aged 70, who resides at Glasgow.

TRAGEDY IN LONDON

STOCK EXCHANGE MEMBER KILLED BY HIS MISTRESS

Kitty Byron Stabs A. R. Baker to Death on the Steps of Lombard Street Post Office in the Sight of Hundreds of Witnesses.

A London correspondent to a New York paper cables as follows: A sensational love tragedy has been enacted in this city in full view of hundreds of people.

A young woman, named Kitty Byron, stabbed to death her lover, Arthur Reginald Baker, a well known member of the Stock Exchange. Before the young woman could move she was seized by several witnesses of the deed and given into custody. The crime, which had every element of sensationalism, took place just outside the Lombard street postoffice. Although the city was generally making merry over the lord mayor's procession, there was the usual press at this always busy office. Scores of men and boys were passing the spot every few minutes. Shortly after 2 o'clock a young woman of attractive appearance, with slight figure, dark eyebrows, black hair and handsome features, went into the post office and sent an express letter to the stock exchange. She waited a few minutes, when she was joined by Mr. Baker, to whom the letter had been addressed. For several minutes the couple engaged in conversatioo near the counter. Then their voices rose, and the clerks noticed they were quarrelling.

Finally the man turned toward the street with a gesture intimating that he wished to end the interview. He passed through the door. The woman followed, nervously handling her muff. Suddenly she pulled a knife from the muff and dealt the man a terrible blow in the back. As he half staggered and then partially turned around, with one foot on the lower step, the woman withdrew the weapon and struck again, this time plunging it into his left breast. The man gasped and fell heavily forward, his head striking the stone pavement.

Two clerks seized the woman, who was leaning over the prostrate form as though preparing to strike a third blow.

Mr. Baker died on the way to the hospital.

The young woman was taken to the police court, where she gave her name as Kitty Byron, aged 22, but refused to say anything further.

Baker's wife lately instituted divorce proceedings.

A SINGULAR CASE.

A woman Fined For Shooting a Moose to Save Her Own Life.

Fined a hundred dollars for shooting a moose in order to save her own life was the experience of Mrs. Martin, wife of Dr. James Martin, of Boston, who has been in camp at Spednic Lake, near the New Brunswick line. This is the fifth season that Dr. and Mrs. Martin have visited eastern Maine in quest of bears. It has been their custom to hunt on both sides of the state line, Mrs. Martin boarding at Osgood's camp, on Spednic Lake, and her husband camping on Mushquash lake. Mrs. Martin shot a bear, and was returning from a long trip after another, when she was met by a large moose, which disputed her right of way and showed so much verocity that she climbed a tree for safety. As soon as she was beyond reach of the animal she began to shoot at it with her magazine rifle, which she had carried aloft to use in case the moose remained within range. Having no cartridges except those in the rifle, she saved her ammunition and succeeded in bringing down her jailer with the last shot. By this time night had fallen, and fearing to walk home and encounter another angry moose with no means of defending herself, she waited until she felt sure the animal she had shot was dead, and then descended to the ground and was kindling a fire, intending to passthe night in the woods, when a rescue party from the camp where she boarded arrived and escorted her home. As the moose was shot in New Brunswick, where non-resident hunters are required to procure a license, and as Mrs. Martin had come to Maine to hunt bears, the provincial protectors fined her $100 for shooting the moose which threatened to take her life.

A cable from Melbourne, Australia, dated Nov. 11 says: The British steamer Elingamite, bound from Sydney, N.S.W., for Auckland, N.Z., has been wrecked on Three Kings Island. Forty-one of those on board the steamer were saved and 96 are missing. The lost steamer Elingamite carried 110 passengers. She was wrecked Sunday morning. Six of her boats and two rafts left the vessel. Twenty-seven of the steamer's passengers and fifteen of her crew have landed in New Zealand. Steamers have been sent out to search for the rafts and four of the boats, which are missing.

...The Crow's Nest Trading Company...

THE POLICE COURT.

All Concerned in the Morrissey Robbery go to Nelson—Indecent Exposure—Violation of Liquor Act—Getting Money Under False Pretences.

The long-dragged out case of Jagger and Moody and Myrtle Wilks came to an end this week. The men brought a counter charge against the woman and Stipendiary Magistrate Armstrong ordered them all to stand for trial at Nelson. He spoke disparagingly of the evidence stating as his belief that Constable Tranter was the only witness in the case that told the truth.

William Middleton was up for indecent exposure to little girls. The Magistrate gave him the maximun term, 2 months and stated that he wished he had the power to flog him.

Andrew Gross, a Slav, from Michel, was brought in by Constable Henderson on the charge of selling liquor without a license. He pleaded guilty and was given 3 months or $100 fine. He paid the money.

Several trivial cases of drunks and thefts were also disposed of.

A. Holloway a clever Englishman was brought in from Morrissey by Constable Tranter. He is charged with tampering with his bank book, by adding fictitious deposits. He is said to have cashed checks on the strength of these entries. His case was remanded until next Friday when the teller of the Cranbrook bank will give evidence.

A DRAW.

The Ten Round Bout Between Jas. Burrows and Frank Lewis Ends in a Draw.

It is the general opinion of those who witnessed the mill between Burrows, of Fernie, and Frank Lewis, of Spokane, on Monday evening last in Princess Hall, that it was the most evenly contested battle that has yet taken place in Fernie.

The bout commenced at 9:30 before a large audience. Tom Whalen and Jos. acted as timekeepers. The seconds were Geo. Wilson, for Burrows, and Con. Whalen, for Lewis.

In the first Lewis rushed his opponent who fought very warily and avoided his heavy blows although he received several light punches on the ribs.

In the second Lewis again started off with a rush and Burrows got in several hard body blows which put his opponent on the defensive. Lewis was apparently short winded as he did not seem to be able to maintain the pace at which he started the rounds.

In the third Burrows landed on Lewis' nose and started the blood running. After that the round consisted mainly of clinches, there being no really effective blows struck.

Burrows started the fourth round off very much in the aggressive. He kept his opponent busy parrying and succeeded in landing twice with telling effect. Toward the end of the round Lewis again recovered his former energy and forced Burrows back in his corner as the gong sounded.

Both men came up quite fresh in the fifth, Burrows led off with an upper cut from his left and landed with right. Lewis got in stiff punches, some of them a little low and he was warned by the referee to be careful.

The seventh round was Burrows'. He had his opponent down on his knees twice, but he was apparently not hurt much as he got up and went at it again as hard as ever.

In the eighth Lewis got in a right swing on Burrows and he went down, but was on his feet again before the referee had counted eight. They clinched for a moment and then went at it again, Burrows sending Lewis to his knees with a left swing on the jaw.

The ninth and tenth rounds were also very even. Towards the close of the tenth Lewis forced Burrows to the ropes and made a desperate effort to put him out, but without success and Referee Tuttle decided the affair a draw.

Another contest has been arranged between the two men for Saturday evening next. It will be a fifteen-round bout for a decision.

THE COAL AREAS.

Of South East Kootenay—C. P. R. Exploratory Work.

The Canadian Pacific Railway company has had a party of explorers and surveyors in the Flathead Valley during the past summer locating large areas of coal, and making surveys for a branch line from different points on the Crow's Nest line to the coal fields.

A preliminary line has been run from the Morrissey fields in a southeasterly direction down a tributary of Lodge Pole creek, thence east to the headwaters of the Flathead river.

Another trial line has been run from a point on the Crow's Nest branch railway, near Elko, south down the Wigwam river, thence north and east to the Flathead. The objective point of these trial lines is the immense coal areas of the Flathead valley

According to the Fort Steele Prospector the explorers of the company have discovered large seams of coal near the headwaters of Lodge Pole creek, on the 50,000 acres of Dominion coal land. The quality of the coal is said to be the same as that found on the Morrissey creek.

Between Lodge Pole creek and the headwaters of the Flathead river, the explorers have discovered some 22 seams of workable coal varying from four to thirty feet thickness. At the point of discovery of these seams, workmen have run open cuts, and faced off the seams, ready for taking out coal as soon as the necessary means of transportation is afforded by the construction of branch lines in the Flathead.

Seven other seams of workable coal have been discovered, and faced up, similar to the above 22 seams south and east of Lodge Pole creek.

The district where these large bodies of coal have been discovered, lies on the western slope of the Rocky Mountains, near the north Kootenay Pass, an old-time pack trail much used by the Indians, entering the district from Alberta.

In addition to the coal seams located by the Canadian Pacific company, a large area covering a territory of nearly 200 square miles has been located, and the coal found upon every location, demonstrates the fact that the coal areas of southeast Kootenay are of vast extent.—Nelson News.

In the Supreme Court of British Columbia, before J. A. Forin, Esq. Judge, in Chambers. In Probate.

Notice is hereby given that on the 5th day of November 1902 it was ordered by J. A. Forin Esq., local Judge of the said court that James Ferguson Armstrong, Official Administartor of the County of Kootenay, be administrator of all and singular the estate of Peter Waugh, of Frank, North West Territories, Miner, deceased intestate.

Every person indebted to the said deceased is required to make payment forthwith to the undersigned.

Every person having in possession effects belonging to the deceased is required forthwith to notify the undersigned.

Every creditor or other person having any claim upon or interest in the distribution of the personal estate of the said deceased is required within thirty days of this date to send by registered letter, addressed to the undersigned, his name and address and the full particulars of his claim or interest, and a statement of his account and the nature of the security (if any) held by him.

After the expiration of the said thirty days the Administrator will proceed with this distribution of the estate having regard to those claims only of which he shall have had notice.

Dated at Fort Steele, this 10th day of Nov., 1902.

JAMES FERGUSON ARMSTRONG,
Official Administrator, Fort Steele, B.C.

Notice is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal and petroleum on the following described lands situate about two miles south of the C. P R depot, Morrissey, B.C., East Kotenay district, on west side of Elk River, commencing at a post marked Mrs. H. A. Senkbeil's southwest corner, thence north 80 chains, thence east 80 chains, thence south 80 chains, thence west 80 chains to place of commencement.

MRS. H. A. SENKBEIL,
Daniel McKenzie, agent.

Nov. 14th, 1902.

In the County Court of Kootenay Holden at Fort Steele. In Probate

Notice is hereby given that on the 5th day of November 1902 it was ordered by His Honour J. A. Forin, Esq., Judge of the said Court, that James Ferguson Armstrong, Official Administrator of the County of Kootenay, be Administrator of all and singular the Estates of the following deceased intestates, namely :—

Frank Bosso, of Fernie, Miner.

John Kearney, alias John Thomas Karney, of Fernie, Miner.

Ignace Matulack, alias Jack Matulack, of Fernie, Miner.

Thomas Stevens, of Fernie, Miner.

Elzear Tremblay, of Fernie, Merchant.

Every person indebted to the said deceased is required to make payment forthwith to the undersigned.

Every person having in possession effects belonging to the deceased is required forthwith to notify the undersigned.

Every creditor, or other person, having any claim or interest in the distribution of the personal estates of the said deceased is required within thirty days of this date to send by registered letter addressed to the undersigned, his name and address, and full particulars of his claim or interest, and a statement of his account, and the nature of the security (if any) held by him.

After the expiration of the said thirty days the administrator will proceed with the distribution of the estate, having regard to those claims only of which he shall have had notice.

Dated at Fort Steele this 10th day of November 1902.

JAMES FERGUSON ARMSTRONG,
Official Administrator,
County of Kootenay.

G. Blaylock's coal and petroleum claim, thence east 80 chains, thence north 80 chains, thence west 80 chains, thence south 80 chains to point of beginning and containing 640 acres.
R. MARPOLE
Dated this 14th day of Oct., 1902. 200-5

Notice is hereby given that I, the undersigned, intend thirty days after the first publication of this notice, or as soon thereafter as the application can be heard, to apply to the Assistant Commissioner of Lands and Works at Fort Steel, for license to prospect for coal and petroleum, upon the following described land, situate in East Kootenay, on the east side of Elk river, beginning at a post marked J. W. Leonard south-west corner post, which is the south-east corner of J. F. Miller's coal and petroleum claim, thence east 80 chains, thence north 80 chains, thence west 80 chains, thence south 80 chains to the point of beginning and containing 640 acres.
J. W. LEONARD.

FIRE AT GORMAN.

Rat Portage, Ont., Nov., 28 The most disastrous conflagration that has ever visited this district for years started about 3.30 this morning in the Rat Porage Lumber Company Lumber yard No. 4, Gorman, and has been raging for nine hours aided by a stiff wind from the east and south. The fire started from a spark being blown into a pile of cedar behind the planing mill and being fanned by the wind soon got into the lumber piles and beyond the control of the fire apparatus. At the present wiring 25 million feet of lumber have gone up in smoke as well as Lemays shipyard and six steamboats, two barges, eleven dwellings and one stable. The steamboat Rambler was hauled up on the slip for the winter and would have been burned had not Captain Kendall hitched a line to her propeller and with her sister boat the Clipper pulled her back into the water with her cabin burning which was soon extinguished with the clippers hose. The boats burned were Day Star belonging to the Presbyterian Indian Mission, valued at $700, Phantom owned by Capt. Lewis, valued at $6,000, Kenyon owned by L. R. McKay, valued at $2,000, Spray owned by B. Knight valued at $700 owned by Dom. Fish Co. valued at $500. No insurance on steamboats.

LEAD DUTIES.

A Meeting of the Nelson Board of Trade Advises Mr. Galliher.

A large and representative gathering of men interested and versed in lead and silver mining took place on Monday. The afternoon and evening were taken up in discussing the subject. It was the unanimous opinion that the government should assist the industry but different views were expressed as to how it should be done. Some favored a bounty thus allowing the government an opportunity of discriminating in favor of localities particularly needing assistance. Others spoke in favor of raising the duty on lead. Finally the following resolution moved by John Houston was adopted.

"Whereas it is desirable in the interest of the silver-lead mining industry of British Columbia that the duties on pig lead and the products thereof imposed by the Dominion should be increased so as to be on a parity with the duties on other raw materials and their manufactures which are the products of Canada;

And, whereas, it is desirable, in the interest of the mining industry generally that all machinery and supplies used in mines and smelters no manufactured in Canada be admitted duty free;

Therefore be it resolved that we request the members in the Dominion House of Commons for Yale-Cariboo, W. A. Galliher, Esq., to press upon the government the necessity for the legislation outlined above, and that he ask all the members from British Columbia to unite with him so that any representations he may make will be backed up by a united delegation."

G. O. Buchanan and W. A. Galliher, M. P., will lay the resolution before the Sandon mine owners and endeavor to get joint unanimous action taken on it.

A committee of four, one each from the lead mine owners, the smelters, the boards of trade and the gold-copper mining association will go to Ottawa with Mr. Galliher and will present the case of the mining industry of B. C. to the Dominion Government.

To the Editor.

A matter of great importance to the settlers of that part of South East Kootenay situated south east of the junction of the Kootenay and Elk rivers is the replacement of the bridge over the Elk river, which was carried ont by the floods of last spring. Owing to the loss of the aforesaid bridge the people of the district have no means of marketing their produce, being hemmed in on the west and north by the Kootenay and Elk rivers, on the east by the Rockies and south by the boundary line. The loss has been a heavy one to the settlers and in the case of the writer amounting to $500, which means the whole summer's work.

The bridge has been promised us for about five months but as far as I know no move has been made to start building.

Thanking you for your valuable space.

I am,
A SETTLER.

THE LUMBER INDUSTRY

WHAT THE TIMBER INSPECTOR SAW ON HIS OFFICIAL TOUR.

Over Twenty Mills Between the Summit and the Landing. The Elk Valley has the Best Timber.

An interesting report of our lumber industry has been made by J. R. Martin, timber inspector, who has just completed an official tour through East Kootenay. He says that the industry is booming all along the line and that it is difficult for the majority of the mills to fill their orders, owing to a shortage of men. The greatest activity he reports along the Elk river, from the mouth of Michel Creek down to the mouth of the Elk.

The valley along here for over 100 miles is clothed on both sides with magnificent forest of pine and fir and occassional cedar. Forest fires have here as elsewhere done their share towards destroying valuable timber, but there is still enough left to keep the mills busy for years. All the streams emptying into the Elk have in their valleys large tracts of spleneid timber but in many cases the difficulty of getting at it is great and is not being cut as yet. The machinery installed in all the mills is necessarily of the highest order as most of the manufactured lumber is shipped to the territories where competition with the cheap labor of the Coast is keen. During the past two years all the old mills have had to close down or get new machinery to keep pace with the times. Five years ago there were only two mills between the summit and Kootenay Landing while now there are over twenty mills with a daily capacity of over 300,000 feet.

Mr. Martin starting at the summit of the pass, describes each mill in turn. Coming to Michel he writes:

"The mill at Michel is not working. At Sparwood, six miles west of Michel, close to where Michel creek empties into the Elk, the Crow's Nest Pass Coal Company have put in a small mill, to take out lumber for their mines and buildings. Here is one of the best forests of marketable timber along the Elk, the trees growing tall and straight, the average diameter being from two to three feet, fifty feet from the ground. The company have quite a force of men at work there and are taking out a large quantity of logs. Near Sparwood is some of the best hunting along the Elk valley. Quite recently a freight train ran into a herd of six deer on the track, killing one which was taken up by the trainmen. Earlier in the season a dead Indian, dog and bear were found piled in one heap close to the track by the section men. Grouse and other small game are abundant.

At Fernie, the Fernie Lumber Company have put in a first class plant with two boilers and engines a d three planers. The Cedar Valley Mills have also put in well equipped saw, shingle and lath mills.

Opposite Fernie, across the Elk, Mott Son & Co., have put in a plant which they are now enlarging, and are also cutting a wagon road. All these mills near Fernie are obtaining their timber from pre-emptions taken up by settlers. At Coal creek a few miles west of Fernie all the machinery for the immense C. P. R. mill which was built while the Crow's Nest branch was under construction, has been taken out and shipped to the coast. A. D. Macrae, who now has a mill there has completed a contract for the cutting up of 10,000,000 feet of logs, which had been stored there by the C. P. R. MacRae now has a gang of men at work along the Elk above Fernie.

At Morrissey, Foss and Macdonald are working a force of men taking out logs, and at the south of the Elk, near the Boundary, Hayes & Simpson are cutting timber on a pre-emption for their mill. This latter is shortly to be moved to Hosmer, above Fernie, where there is magnificent timber."

Leaving the Elk, the large mill of Breckenbridge & Lund, at Wardner, where the C. P. R. crosses the Kootenay river, is described as being, when completed, one of the largest in the Kootenay. At Jaffray the East Kootenay Lumber Co. is moving its plant to a small lake about a mile and a half east of the present site. This same company has mills at Cranbrook, Yahk and Moyie. The Robinson, McKenzie Lumber Co., The King Mercantile Co., and Leask & Slater all have mills in operation in Cranbrook.

Further milling operations are being pushed at Moyie, Wasa, Marysville and Kimberley. The winter's work throughout the whole valley will be heavy, and besides the regular mill logs several large contracts for railway ties and fence posts have been let.

A TERRIBLE ACCIDENT.

A man Killed in Morrissey Mines A crude Burial No Inquest.

On Tuesday a fatal accident occurred in the mines at Morrissey. The fireman, whose duty it is to keep tally of the men as they come from the mine, neglected to report any missing on that afternoon. The next shift discovered a cave-in in one of the rooms and after removing several tons of rock which had fallen in from the side of the room, the dead body of a young Englishman was recovered. His body was removed to the company's old store building and examined by Dr. Wilson, One of the old coffins left over from the explosion at Fernie was procured and the body without much preparation was placed in it. On Wednesday without any inquest being held, the burial took place at the new town. No service was read and the union, of which the deceased was a member, took no special part.

Deceased was a young man of about thirty. He had been in the camp only a few weeks. It is known that his father served in the British army under Gordon and had a brother who fought in the Boer war.

A SUCCESSFUL SOCIAL.

The social given by the Ladies Aid of the Presbyterian Church in Princess Hall on Wednesday evening was a marked success. One of the largest crowds ever at a social in Fernie attended and the management is to be congratulated upon the exemplary manner in which all the details were arranged. The program was short and very entertaining, Mrs. Nichol, Rev. Mr. Houghton, Mr. Hazel and Mr. Jarvis sang solos all of which were highly appreciated by the large audience. Rev. Gordon who acted as chairman recited a humorous selection and Mr. McMordie gave an interesting reading from Robert's nature study.

After the program was rendered a pleasant hour was spent in games and social intercourse and every one seemed bent on having a good time. This was followed by an excellent repast of coffee and all manner of cakes and the affair broke up about 10.30.

LABOR UNION NEWS.

The first regular meeting of the Crow's Nest Valley Lumbermen's Union, No. 304, of the A. L. U. was held in the cigar factory last Saturday evening. Most of the members were present several new members joined and others promised to join later on. Until the end of the year the Union will admit members on charter members fees and it is hoped by the officers that all the lumbermen in the district will come into the union. Wm. Tustian of Mott's mill is the Secy-Treas. of the union. The next meeting will be held in Joyce's Hall on Sunday evening Nov. 30th at 8 o'clock. Sunday being chosen as it is the only day that a suitable place can be got.

The Fernie Federal Labor Union No. 310 of the A. L. U. holds its regular meeting on Wednesday evenings at 8 o'clock in the soda water factory.

The tailors are talking of forming a tailors' union.

A district Miners' Union has been organized by consolidating the unions at the three points operated by the Crow's Nest Pass Coal Co. All business equally affecting these places will be dealt with by this Union. The officers are, J. Howbrook, Fernie; Vice-Prec., Christopher, Morrissey; Secy.-Treas., E. Neale, Fernie.

The change in guage of the branch railway from Lethbridge to Great Falls, Montana, is expected to be completed by the end of the year.

THE NEW - CABINET.

HON. D. M. EBERTS RETAINS THE ATTORNEY-GENERALSHIP.

Cabinet Now Filled. Some Incongruous Features on Both Sides.

Premier and Minister of Mines, Hon. Col. E. G. Prior.

Attorney-General, Hon. D. M. Eberts.

Minister of Finance and Agriculture, Hon. J. D. Prentice.

Chief Commissioner of Lands and Works, Hon. W. C. Wells.

Provincial Secretary and Minister of Education, Hon. Denis Murphy.

President of the Council, Hon. W. W. McInnes.

Hon. D. M. Eberts who has been casting covetous eyes towards the premier's chair hesitated when asked to serve under Col. Prior, but rather than give up office swallowed his pride and was at once sworn in as attorney-general. Hon. Denis Murphy, of West Yale, has thrown in his lot with the new ship of state and the election in his constituency is being rushed. Mr. W. W. B. McInnes, a former bitter apponent of the new premier consented to act as President of the Council and with the retention of the old ministers Wells and Prentice, this completes the most grotesque cabinet that ever graced the B.C. legislative halls.

Never has the saying that "politics makes strange bed-fellops" been more aptly demonstrated than in the latest whirl of the kaleidoscope which brings Col. Prior and Mr. W. W. B. McInnes into ministerial partnership as premier and attorney-general, respectively, while grotesquely wedded in Opposition are such Conservatives as Capt. Tatlow and Richard McBride, with the provincial Liberal leader, Mr. Joteph Martin, and the majority of his personal following.

The very basis of their odd cohesion presages curiously, however, the beginning of the end of chaotic misgovernment on the non-party plan, for it is an expediency as well as a stop-gap government, united only upon the desirability of a dissolution and a reconstruction by the people on a straight-cut party cleavage.

The list as made out by the Opposition leaders is as follows, Mr. Houston, of Nelson, not being enumerated, and the constituency of North Victoria being vacant:

GOVERNMENT.

Clifford, C. W. D., Cassiar; Dickie, C. H., Cowichan; Dunsmuir, James, South Nanaimo; Eberts, Hon. D. M., South Victoria; Hall, R., Victoria; Helmcken H. D., Victoria city; Hunter, Joseph, Cariboo; Mounce, L. A., Comox; Murphy, Denis, Yale, West Riding; McInnes, W. W. B., North Nanaimo; Neill, Alan W., Alberni; Pooley, C. E., Esquimalt; Prentice, Hon. J. D., Lillooet, East Riding; Rogers, S. A., Cariboo; Smith, A. W., Lillooet, West Riding; Stables, James, Cassiar; Wells, Hon. W. C., East Kootenay, North Riding; Hayward, W. H., Esquimalt, 18.

OPPOSITION.

Gifford, Thomas, New Westminster, city; Curtis, Smith, West Kootenay, Rossland Riding; Ellison, Price, Yale, East Riding; Fulton, F. J., Yale, North Riding; Garden, J. F., Vancouver city; Gilmour, H. B., Vancouver city; Green, R. F., West Kootenay, Slocan Riding; Kidd, Thomas, Westminster, Richmond Riding; Munro, C. W., Westminster, Chilliwack Riding; McBride, Richard, Westminster, Dewdney Riding; McPhillips, A. E., Victoria City; Oliver, John, Westminster, Delta Riding; Smith, E. C., East Kootenay, South Riding; Tatlow, R. G., Vancouver city; Taylor, Thomas, West Kootenay, Revelstoke Riding; Hawthorathwaite, J. H. Nanaimo city; Martin, Joseph, Vancouver city, 17.

The government however have another way of counting and claim a majority of six.

Dentistry

Dr. Barber can now be found at his office in the Hill Block from 8 a. m. until 8 p. m. He has installed a system of incandescent lights which enables him to do dental work in the evenings. x

My Heart's Darling

BY W. HEIMBURG

Author of "A Penniless Orphan," "Gertrude's Marriage," "Her Only Brother," Etc., Etc.

Oh, very well, thank you. She is still with me; has grown very stout and whimsical."

Lucie was silent again. Then she remembered how Hortense had once received a wonderful doll from her uncle, who had been making them a visit, and how she immediately presented it to Lucie, saying she did not care for such foolish things as dolls. "How is your old Uncle Ludoli? I remember the doll he bought you," she added, hesitatingly, as Hortense let her book fall, and looked at her with surprise.

"Old? Yes, he was seven years older than my papa," she answered. "You knew him—right! I married him afterward, just as I left school. Then, four weeks after our marriage he was thrown from his horse at Baden-Baden, at the races, and died the next day."

Lucie's eyes grew large with astonishment.

"Oh, how sad!" she said warmly. "I am so sorry. And now are you all alone?"

The young lady did not answer, only shrugged her shoulders, as if to say: "That is not the worst by a good deal." After a pause, she added, hastily, as she took up her book again:

"I am engaged again, and shall be married in four weeks."

Lucie did not care to ask "To whom?" but Hortense gave her the information she wanted.

"My future husband is named Von Wilken, and is in the H— Dragoons." She turned again to her book, and appeared to be reading. At last she laid the book aside, leaned her head against the cushions, and shut her eyes. Lucie, too, leaned back and made herself more comfortable. Her thoughts turned to her new home, and she lost herself in thinking of her future life.

As she thought of her unknown mother-in-law, she began to feel anxious. She took a little looking-glass out of her pocket, and began to look if the flowers on her hat were straight, and if the little curls on her forehead were in place. At last she took out thread and needle, and mended a very minute hole in her brown silk gloves. So the two traveled on in silence. The regular motion of the car had such a soothing effect on the young girl that she fell asleep, only waking as Frau von Lowen touched her on the shoulder. "We are almost in Hohenberg."

Lucie's heart began to beat; and with trembling hands she made herself ready to leave the train.

Hortense looked at her, half amused and half sympathetic.

"You seem to be a good deal disturbed," said she.

"I feel nervous," said the girl.

"Why? He will be standing with a bouquet on the platform. Is not that so?"

Lucie blushed deeply. "Ach, I do not think so," she stammered; but her beaming eyes contradicted the words.

The train now stopped, and Hortense von Lowen bade her companion adieu.

"I shall be very glad if you will come with me, Lucie."

"I will come," said Lucie, hardly knowing what she said, so nervous did she feel; "and again, many thanks."

CHAPTER II.

Hortense left the car and walked across the platform, by which a handsome carriage was standing. She stepped up to the horse, patted his shining neck and head, sprung into the high coachman's seat, and took the reins. She was waiting for her little trunk as two ladies walked by her, and a pair of brown eyes looked up at her. It was her little traveling companion and her future mother-in-law. So the lover had not come. She looked after them. The thin, sharp-featured old lady in the faded old-fashioned cashmere dress had not deigned to look at her.

Hortense compressed her lips in a scornful manner, as if she had heard what they were saying about her.

"Do you know the lady, my child?"

"Yes; I traveled on with her. Yes; I used to know her long ago. We used to be playfellows, and to-day we met by chance."

"That is by no means an acquaintance that you ought to keep up. This Frau von Lowen is a very fast, queer person; she rides, drives and smokes cigars."

At this moment the person of whom they were speaking drove rapidly by.

Hortense saw a shocked, hurt expression, and the scornful smile deepened about her mouth.

"She looks very disagreeable," sighed Frau Counselor Adler. "If she were my daughter—"

Lucie did not dare to contradict her, although she longed to speak a word for her quondam playmate. And that twenty-mark piece in her porte-monnaie, which she had borrowed from this woman, who was disappearing on the chaussee in a cloud of dust, burned in her pocket like fire.

She had been such a good, sweet child, and now—

In the meantime, the carriage rolled quickly over the rough pavements, turned at the end of a narrow street into a gate, that closed at once behind it, and stopped before an old-fashioned house surrounded by high elms. In the open door stood an old gentleman with white hair and in faultless attire, waiting for the arrival of the lady. He was supporting himself with a cane, and stretched out his trembling hand to the young lady.

"Welcome back, Hortense; it is good to have you at home again."

"How do you do, grandpapa?" she returned, and taking his arm entered with him the spacious hall, and led him to a room on the ground floor, the handsome apartment of a cavalier of the olden time. Here were costly inlaid pieces of furniture with bronze ornaments. At the window looking into the garden was an armchair covered with faded brocade, and before it, on the little table, was a history of the Crusades and a heavy golden box beside the Gotha Almanac. Thick curtains hung at the doors and windows, and the walls were covered with pictures, many of them scenes in the war for freedom; a picture of Queen Louisa surrounded by her children, and family portraits without number, some powdered and rouged, some of a later date, with Titian-colored hair. On one side was a stand for pipes, some with very handsome meerschaum bowls. A stuffed setter dog was in front of the mirror. Two cases of rare old weapons and a statue of the emperor on horseback, half covered with a wreath of laurel, completed the furniture of the room. The room was suffocatingly warm, and a strong smell of tobacco pervaded it.

"Will you have a cup of chocolate?" asked the old gentleman, sinking down in a chair by the fire, where stood a little table with a half-empty cup ornamented with a coat of arms, and near it a chessboard, all set out and ready to play.

"No, thank you, grandpapa." She remained standing quietly before him.

"What kind of a time have you had, Hortense?"

"Oh, not so very bad, grandpapa. The matter is settled; but it has cost a great deal. Papa is now on his way to Switzerland. He intends to live in Geneva."

"Hortense, tell the truth, how much is it? Could you settle all his debts? Was it not too late? Had anything became known? It must have been very painful, Hortense. Was the landlord appeased?"

"With money everything can be settled, grandpapa," she said, indifferently.

"Be candid with me. How great is the sacrifice you have had to make?"

"So great that I have ordered Dillendorf to be sold."

The old gentleman turned pale, and a shiver passed over him.

"You ought not to have done that," he said, with a horrified look.

"What could I do, grandpapa? There was only the choice of shame or to part with Dillendorf."

"The rascal!" muttered the old man, and wiped his brow with a silk handkerchief. A long pause ensued.

She leaned, as if weak, against the chimney, with compressed lips.

"Is there any letter here from Wilken?" she asked, tremblingly.

"Oh, yes! oh yes! upstairs in your room," returned Herr von Meerfeldt.

It seemed as if she breathed more freely. "I have not had any news from him for a week," said she, "although I sent him my Berlin address. I will go up and change my dress. And please, grandpapa, do not say any more about Dillendorf; it is painful for me to think about it."

"For two hundred years it has belonged to the Lowens," sighed the old gentleman. "How you late husband loved it! and to think it should be lost through this dishonorable man!"

Hortense blushed deeply. This dishonorable man was her father.

"Yes," she said, "it was as if a piece were torn from my own heart when I gave the agent orders to sell it. But now let us be silent about it; it can not be helped."

"You could mortgage it."

[CONTINUED.]

Knew Women.

Stranger—How soon will the next trolley car go by here?

Farmer—Maria, how soon 'll yew be ready tew take th' next trolley car?

His Wife—Just ten minutes, Josh.

Farmer—Then th' next car 'll go by here in jes' nine minuits, an' thar won't be another fer an hour.

SHE WAS GIVEN UP.

Doctors Held out no Hope to Mrs. Huffman of Napanee.

A Wonderful Case and One which goes to Show the Wonderful Advancement Recently Made in the Science of Medicine.

Napanee, Ont., Nov. 23.—(Special)—This town has furnished a case which has caused considerable talk in the county.

Mrs. John C. Huffman had been troubled for over six years with female weakness and kidney trouble. The pain was so great that she could not bear it and her kidneys gave her so much bother that she could not entertain any company in her home or take any social pleasures whatever. Her urine was very much discolored and gave her great trouble in passing.

In addition to these symptoms she had all the pains, headaches, and weakness of Female Trouble.

Mrs. Huffman tried physician's treatment and many other medicines, but instead of getting better she was gradually growing worse and was very much discouraged.

Many of her friends thought she would never get better, but one day she picked up a newspaper and read an advertisement which said that Dodd's Kidney Pills would cure Female trouble.

As she had tried so many other things without being able to get any help, she was very doubtful, but concluded to try this remedy.

She used six boxes and was completely cured. She is today as sound and well a woman as there is in Napanee. She says:

"I can confidently recommend Kidney Pills to every woman in Canada, for they cured me completely, and mine was a very bad case.

"They are certainly a great medicine, and I will always recommend them to women who may be suffering as I was with Female Weakness and Kidney Trouble."

"My love for you," he wrote, "is so deep, so vast, so powerful, I cannot express it." "Why don't you send it by freight?" she wrote back. And then it was all off.

Minard's Liniment for Rheumatism.

One-tenth of the inhabitants of the Village of Long Marston, in Hertfordshire, England, are said by a statistician to have reached the age of 90 years.

REJECTED BECAUSE OF BAD COLOR.

Hundreds of packages of butter are rejected each week by expert butter buyers in Canada, simply because the color is bad. The shade demanded by home consumers and for export is the June golden tint, which can only be produced by Wells, Richardson & Co.'s Improved Butter Color. Other colors sold by some dealers are poor imitations, and must continue to give trouble and cause loss of money to all who use them. The government creameries and schools and the most experienced creamerymen and dairymen in Canada use Wells, Richardson & Co.'s Improved Butter Color at all seasons for the production of prize butter. No mud, no impurities; every drop pure and clear. All druggists and dealers.

The decision of the directors of the theatre at Halle, in Germany, to distinguish by means of red and white advertising posters between plays that are fit for young persons to witness and those that are not is causing some amusement.

A London clockmaker has placed the following notice in his window: "The misguided creature who removed the thermometer from this door had better return it, as it will be of no use where he is going, as it only registers 125 degrees."

HE WON ON TAILS.

Was Fast In Quicksand, but He Took the Chance.

There were five or six of us, under the pilotage of a cowboy, looking for a crossing of the Republican river when we caught sight of a man fast in a quicksand.

"Hello, you!" shouted the cowboy as we halted our horses.

"Hello, yourself!" was the reply.

"What you doin' thar?"

"Sorter waitin'."

"You are one of the fellers we hustled off'n Big Four t'other day?"

"And what of it?"

"Nuthin', only you won't bother us no more! You'll be out of sight in an hour!"

"Don't you bank on that," growled the stranger. "I've bin in wuss fixes nor this and come out all right."

"You'll never come out o' that, and it'll sarve you jest right!"

The man thrust a hand into his vest pocket and brought up a coin, and, holding it between thumb and finger, he called out:

"I'm willin' to take chances. If I win, you help me out; if I lose you kin ride on and be hanged to you!"

It was an appeal the cowboy couldn't refuse, and after a minute he replied:

"You rustlers don't deserve no show, but let 'er go. If you lose, though, I'll leave you to go to the bottom! Toss 'er up and call out!"

"I say tails!" exclaimed the man as he flirted the half dollar to the bank.

"Tails she is," replied the cowboy as he bent in his saddle. "Now, then, ketch the end of this lariat and come ashore and jest let me tell you that if you don't make yourself skeerce the boys will either hang or shoot you!"

"Skeerce she am!" said the man as he got his breath and cast off the lariat, and without waiting to scrape off the mud he started off up the river and was soon lost to sight.

M. QUAD.

Hopeless.

A fat French lady despairingly says, "I am so fat that I pray for a disappointment to make me thin, but no sooner does the disappointment come than the joy at the prospect of getting thin makes me fatter than ever."

Some one should invent a powder to take when you feel that yearning to tell a secret confided to you.—Atchison Globe.

Nearly all infants are more or less subject to diarrhoea and such complaints while teething, and as this period of their lives is the most critical, mothers should not be without a bottle of Dr. J. D. Kellogg's Dysentery Cordial. This medicine is a specific for such complaints and is highly spoken of by those who have used it. The proprietors claim it will cure any case of cholera or summer complaint.

"Are you not sensitive about being bald?" asked the man with a shock of hair.

"Not at all," replied the man with the smooth pate, "I was born that way."

Minard's Liniment is best Hair Restorer.

Cholly—D'you know, Miss Sharp, I believe some people inherit their stupidity. Miss Sharp—But, Mr. Sharp, It is not proper to speak that way of your parents.

THEY NEVER FAIL.—Mr. S. M. Boughner, Langton, writes: "For about two years I was troubled with Inward Piles, but by using Parmelee's Pills, I was completely cured, and although four years have elapsed since then they have not returned." Parmelee's Pills are antibilious and a specific for the cure of Liver and Kidney Complaints, Dyspepsia, Costiveness, Headache, Piles, etc., and will regulate the secretions and remove all bilious matter.

It is only by labor that thought can be made healthy, and only by thought that labor can be made happy; and the two cannot be separated with impunity.—John Ruskin.

Sleeplessness is due to nervous excitement. The delicately constituted, the financier, the business man, and those whose occupation necessitates great mental worry, all suffer less or more from it. Sleep is the great restorer of a worried brain, and to get sleep cleanse the stomach from all impurities with a few doses of Parmelee's Vegetable Pills, gelatine coated, containing no mercury, and are guaranteed to give satisfaction or the money will be refunded.

It may not be ours to utter convincing arguments, but it may be ours to live holy lives. It may not be ours to be subtle and learned and logical, but it may be ours to be noble and sweet and pure.—Canon Farrar.

The Spirit of Christ, when it enters the mind, destroys selfishness and makes us feel that every human being has a claim upon us.—Stalker.

The happiest life on earth belongs to the Christian, when Christianity is understood. Those who advocate the contrary do not know what it is.

For all Throat and Gland Troubles, Lumps, Abscesses, Old Sores, Ulcers, Felons, Skin Diseases, Eczema, Pimples, Stiff Joints, Rheumatism, Lumbago, Sprains, Bruises, Piles, Cuts, Sore Feet, Pleurisy.
Sold by Druggists, 25c. Try it once.

The evils of intemperance are well-known. The momentous question is: Will the referendum?

Thousands of Women Are Kept in Suffering and Many Die Owing to False Treatment.

Paine's Celery Compound

Never Fails to Banish Disease and Re-Establish Lasting Health.

Thousands of women are kept in sickness for months and years, owing to false treatment and the use of worthless medicines, and we are inclined to believe that Milton thought of this class of almost dying women when he said:

"The angelic guards ascended, mute and sad."

The common sense treatment of today for weak, run-down and suffering women is Paine's Celery Compound. This marvellous medicine is spoken of in every part of the civilized world, and men and women of all classes find a new life from its use. A glorious example of the curing powers of the great compound comes from Winnipeg, Man.; Mrs. H. Harbor writes as follows:

A month ago I was very sick and happened to see one of your publications, in which I read of others being cured. I concluded to try Paine's Celery Compound myself, and I now thank God for the wonders it accomplished for me. I was suffering from heart disease, kidney trouble and general weakness, and some days was not able to stand without experiencing great pain. Since I used the compound I am able to get about the house and work, and can now eat anything put before me."

"Uncle Ephr'm, how did such a notorious old sinner as you ever manage to get into the church?"

"Ise one of the chahtah membahs, suh."

MISERABLE NIGHTS.

What to Do When Baby Is Fretful and Sleepless.

It is wrong to take up a wakeful baby from the cradle and walk it up and down the floor all night. It demoralizes the infant and enslaves the parents. Baby does not cry for the fun of the thing; it cries because it is not well—generally because its stomach is sour, its little bowels congested, its skin hot and feverish. Relieve it and it will sleep all night, every night growing stronger in proportion. Just what mothers need is told in a letter from Mrs. E. J. Flanders, Marbleton, Que., who says: "I cannot say too much in favor of Baby's Own Tablets. They have worked like a charm with my baby, who was very restless at night, but Baby's Own Tablets soon brought quiet sleep and rest. I shall never be without a box while I have a baby." Baby's Own Tablets cure all minor ailments of little ones, and are guaranteed to contain no opiate or harmful drug. They are sold at 25 cents a box by all dealers, or you can get them by mail, post paid, by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y.

"Dr. August Koenig's Hamburg Breast Tea," writes Mr. F. Batsch, of Horicon, Wis., "enabled me to get rid of an obstinate cough; we feel very grateful to the discoverer of this medicine."

A Pessimist Unmasked.

"Br'er Jimson he say he done tired o' de hollerness o' dis yer sinful worl'."

"I nebber heered him say nuffin o' dat kind until ole Squar Hickery done put dem spring guns roun' his chicken coop."

Why She Quit.

"Why was it that they couldn't get along together?"

"Oh, he stuttered so badly that she never had time to wait around and get in the last word."—Chicago Record-Herald.

High and Low.

"A woman, I notice, always lowers her voice to ask a favor."

"Yes, and raises her voice if she doesn't get it."

The Printer's Devil.

The familiar term "printer's devil," as applied to the boy of all work about a printing office, is said by the Fourth Estate to have originated with Aldus Manutius. He employed a small negro boy, a curiosity in those days in Europe, who became known as the "Little Black Devil." Printing was then a mystery, and a superstition spread that Aldus was invoking the black art and that the negro boy was the embodiment of Satan. To correct this opinion Aldus publicly exhibited the black boy and declared: "Be it known to Venice that I, Aldus Manutius, printer to the holy church and to the doge, have this day made public exposure of the printer's devil. All those who think he is not flesh and blood may come and pinch him."

The Gentiles of Utah will wage a vigorous fight against Apostle Smoot's election in the United States senate.

Mgr. Sherritti, of Washington, is the new apostolic delegate for Canada.

Captain McMillan, for eight years at the Winnipeg barracks, and for the past three years in South Africa, has been decorated with the D. S. O.

The governor of the Windward islands has cabled Colonial Secretary Chamberlain that the conditions on St. Vincent are exceedingly grave, and that it may be necessary to evacuate Georgetown.

Norman Jaffray, son of Alexander Jaffray, bursar of the Central prison at Toronto, accidentally shot himself in the leg while searching for supposed burglars at his home about midnight on Nov. 18. The bullet entered the calf of his leg and was afterwards extracted.

The C. P. R. and the G. T. R. are considering an advance in freight rates owing to the increased cost of operating labor and supplies of all kinds.

Harry Williams, who resides near Harrietsville, has been advised of a £1,000 legacy bequeathed him by Mrs. Beveridge, of Liverpool. Williams at one time helped Mrs. Beveridge when she was knocked down by a street car and had her leg broken. She appreciated the kindness and remembered him in her will.

The Anchor Line warehouses at Glasgow, Scotland, were destroyed by fire on November 18. One man was killed and several injured. The loss sustained by the company is very heavy.

William Stewart, counterfeiter, who was arrested at Raymond hotel, Toronto, was sentenced on Nov. 18 to four years in the penitentiary on two charges of making and uttering counterfeit money, the sentences to run concurrently.

A cable from Jerusalem says that the cholera epidemic is spreading rapidly. The populations of Gaza and Lydda (Ludd), have been decimated and the authorities are taking flight. At Jaffa there have been 57 deaths in three days. The disease is raging in neighboring villages. No complete returns of the mortality are available. The people in the stricken districts are in a sad plight and relief is needed everywhere.

Agitation for a national highway from the Atlantic to the Pacific is the winter programme mapped out at a meeting of the directors of the American Automobile association. The proposed road is to start at Boston and reach Chicago by way of the lake cities. From Chicago it is to follow the old overland route by way of Salt Lake City to San Francisco.

A wireless message received at San Francisco from the Island of Hawaii states that the volcano Kilauca has broken out in the most violent eruption for the past 20 years. Kilauca has shown mild intermittent activity since the outbreak of St. Pierre.

Clock Don, a Chinese tailor, and lessee of the Chinese theatre at Victoria, had his head split with a hatchet as he slept on Nov. 18. His assailant stole $100 from a hiding place beneath the bed, which gives the police the impression that the assailant was well acquainted with his victim, who has been an invalid for some time.

The embarrassment suffered by the farmers of Ontario in recent seasons owing to the scarcity of labor is likely to be relieved by measures initiated by the commissioner of crown lands, Hon. E. J. Davis, who has charge of the colonization and the immigration branches. It is intended to work in conjunction with Dominion immigration officials in England and secure for Ontario the services of hundreds of young men desirous of settling in Canada. A system of distribution will be evolved through farmers' institutes and other means. Applications from those wanting help will be received and filled as far as possible by the bureau of colonization.

SHORT SKIRT COSTUMES.

They Are Made of Hairy Goods In All Shades.

The new short skirt costumes are very popular for street wear. They are made much longer than formerly. The skirts barely escape the ground, and the jackets are made in a variety of pretty ways. Chief among these is the norfolk jacket with its three plaits modified into a pouched effect in front.

The majority of these walking costumes are made of zibeline and all the

EMPIRE NEGLIGEE.

fancy hairy goods. Gray, ranging from the pale shade to gun metal, is the favorite color.

Very smart little suits are also made of rough blue goods, the jackets box shaped and the skirts with a stitched front gore, sometimes ornamented with bone buttons to match those on the jacket.

The skirts of these suits are almost invariably lined with silk to match and the jackets with white or pale gray satin.

The empire negligee shown in the cut is of pale blue cashmere, with the bolero of Irish lace.

JUDIC CHOLLET.

THE NEWS IN BRIEF.

Wm. Hubbard, a deaf mute, was run hown by a G.T.R. train at Owen Sound and kill?d.

Leland D. Kent, the Buffa,o medical student under indictment for manslaughter in advising and abetting Ethel B. Dingle in ending her life at the Whitcomb hotel in Rochester several weeks ago, will be admitted to bail. Three bondsmen hape qualified in the sum of $5,000.

The grievance committee representing the conductors, the trainmen and the brakemen of the Canadian Pacific system had another conference with Mr. Tait, manager of transportation, but the deliberations regarding the new schedule have not been brought to a close. Beyond the fact that the men are insisting upon an advance, no official information is obtaigable regarding the negotiations.

George Dyle Elder, a widower, a stonemason by trade, was founh dead in a room on Church street, Toronto, on Wednesday. The coroner thinks he fell against the stove in a fit of apoplexy.

The late John Woode, of Hamilton, leaves an estate valued at $207,000. Deceased was a pioneer in the development of electricity by water power in Canada.

While at work on a stack recently where threshing was in urogress near Cardston, Joseph Jenson was accidentally wounded in the head by a fork in the hands of a fellow laborer named Leischman. One of the tines pierced tne unfrotunate young fellow's skull and entered the brain just above the eye, causing death two days later.

At Kincardine, Ont., Harry Ross, 21 years of age, employed at the Farmers' elevator, was found dead on November 14. Grain was being loaded on cars and Ross was alone in the building shovelling into the chute. He is supposed to have been seized with a weak spell and have fallen head foremost into the grain. Life was extinct when he was discovered. He was a young man of strong physique, though subject to weak spells.

TERRIBLE SUFFERING

HARROWING TALE OF THE SOUTH SEAS.

Eight Survivors of the Steamship Elingmite Lived Five Days on Two Apples While Adrift on a Raft—Eight Others Succumbed to Sufferings.

The London Daily Mail's correspondent at Wellington, N.Z., telegraphs that the eight survivors from the wrecked British steamer Elingmite, who were rescued on the raft by the British survey steamer Penguin, went through a dreadful experience. The raft from which they were taken measured only twelve feet long by seven feet wide, and had sixteen persons on it when it left the wreck. The only food on board consisted of two apples. The first apple was consumed on Tuesday, and the second on Wednesday, each being divided into sixteen portions. From Sunday, the day they were wrecked, until Thursday, when they were rescued, the survivors drifted 66 miles on the half-submerged raft. Several attempts were made to land on the Three Kings islands, but without success.

Three men died on Monday through drinking salt water; all of the survivors suffered the tortures of thirst, and four other men and the stewardess died of exhaustion before they were picked up. They had a cruel disappointment on Tuesday night. A steamer was sighted in the distance and frantic shouts were raised by those on the raft to attract attention. The steamer lowered a boat, which passed within fifty yards of them, but the boat's crew apparently did not see the raft and returned to their vessel. When the Penguin was sighted only one of the survivors was able to stand. All were terribly emaciated.

CHICAGO SHARPS.

Try a Novel Scheme to Do Up a Woodstock Citizen.

A dispatch from Woodstock, Ont., says: Julius Dubrule, a lineman in the emuloy of the G. N. W. Telegraph company, was nearly the victim of some Chicago swindlers during the past week.

On Monday last he received a telegram from Chicago, announcing the death of his sister, Mrs. Josephine Lombard, in the county hospital in Chicago, and asking what he wanted done with the remains. This telegram was signed with a man's name.

Dubrule telegraphed back to send the remains to Woodstock and received in reply another telegram, signed, supposed to be by the wife of the sender of the first message. It asked him to send $82 for expenses. He replied that he had deposited the money with the agent of the American express company here, who would pay when the remains reached Woodstock.

Later on Mr. Dubrule called the woman up by long distance telephone, and she agreed to send the remains by the first train, and Dubrule anxiously waited till Saturday for them. When the body did not arrive, the express agency in Chicago was notified to make enquiries at the hospital.

It was then learned that no woman by the name of Mrs. Lombard had been a patient there. The Chicago police were communicated with, and asked to find the man and woman, if possible, who sent the telegram, and also find Mrs. Lombard.

Mr. Dubrule has not heard from his sister for some time, and her address is not in his possession. The message stated she was 26 years of age, but her correct age is 33.

Heavy Sentences.

Judge Dubuc sentenced six prisoners found guilty at the Winnipeg assizes on Monday as follows:

Joseph Mascotte, convicted of rape. This is the man who swam the Red river and defied his pursuers for a length of time to overtake him. He asked for mercy on the ground that he was in liquor at the time. Judge Dubuc told him that he might have received a death penalty. He was sent to the penitentiary for five years

Keefe, for robbery with violence, from the cattle dealer Miller, had nothing to say. The judge told him that he was subject to a sentence of 14 years, and reproached him with his cowardly conduct towards Miller. He sentenced him to five years.

Lavallee, for the same crime, was sent up for three years and six months. He also pleaded for mercy.

John Bates, who received some of the stolen property taken from Miller by Keefe and Lavalee, had nothing to say except: "I hope your worship will be as lenient as possible." He received a sentence of three years, after being reminded from the bench that he spent a large portion of the stolen money, well knowing that it was stolen.

Brown, for burglary at the Roblin house, said: "I hope you have looked into this case and will be as lenient as possible." The sentence was two years in the penitentiary.

James Scott Halliday, for forgery, said that he was innocent of the charge. He was reminded from the bench that he might have received a sentence of 14 years. However, the amount of the cheque was small. He was sentenced to five months in the common jail. In the meantime a case reserved by his counsel might be heard.

TELEGRAPHIC BRIEFS.

Short Dispatches From the Four Quarters of the World.

Walter Herbert, the confessed murderer of Sifton, will be tried at the next assizes at London, Ont.

The beef monopoly in England has ended. South American cattle are again on the market.

Capt. Dietrichs, a Russian officer, who has great influence with the Doukhobors, has come west to visit and advise the fanatical leaders.

Robert Adams, of Rossland, recovered after being shot through the lungs and liver with a 44-calibre revolver.

La Patrie, Mr. Tarte's paper, has declared for a Dominion bureau of education, which it says would assist the province of Quebec in reforming its system.

Joseph Chamberlain, colonial secretary was given a farewell banquet at Birmingham previous to his departure for South Africa.

Charles H. Cornell, a butcher, living at 300 Robert street, Toronto, went to the Rosedale ravine on Nov. 17 and shot himself through the mouth.

The Belgian police arrested James Kier Hardie, M.P., in Brussels, in mistake, on suspicion of having been connected with the attempt on the life of King Leopold. Hardie was released, and he lodged a complaint at the British legation.

The people of Wilmer, B.C., have changed the name of Mount St. St. Thomas, one of the most prominent peaks of the Selkirks, to Mt. Hammond, after H. C. Hammond, of Toronto, who has been one of the heaviest mine investors in East Kootenay. Another Peak is called Mt. Farnham, after Paulding Farnham, of New York, and who is heavily interested in the iron cap mines.

Prince Edward, of Saxe-Weimar, who died on Nov. 16 at the advanced age of 78 years, was a Crimean veteran, and held the rank of field marshal. He was a great favorite of Queen Victoria, but had not been in the public eye of late years. He was married to Lady Augusta Gordon-Lennox.

Advance sheets of DeWet's book on the South African war have been published in Berlin, and contain some startling accusations against the Boers. DeWet says that they were guilty of cowardice, faithlessness and disgraceful treachery.

The world's most modern railway, which runs from Narvick on the west coast of Norway, to Gellivara, in Sweden was openeh on Saturday. It is a unique railway, situated north of the Polar Circle, in a veritable land of midnight sun. It lies in 68.5 degrees, whereas Russia's European lines only reach 66, and Russia's Asiatic lines only 56.

A poll of the Irish landlords which was undertaken by a committee of gentlemen interested in the Irish question on the proposal to call a conference of landlords and tenants with a view to the sale of the land to the latter has resulted in a vote of 1,128 to 578 in favor of holding the conference, for which arrangements will be immediately proceeded with. A circular announcing the result of the poll has been sent to 4,000 landlords who possess 500 acres and upwards.

A man named D. McConnell, while under the influence of liquor, fell off a passenger train near Sicamous, B. C., last Tuesday night, and the accident was not observed by any of his fellow passengers. He was picked up later by the crew of a freight train, and taken to the Kamloops hospital, where he died the following morning from the effects of his injuries and exposure. He gave his address as the Windsor Hotel, Nancouver.

Rev. Hugh Price Hughes, the celebrated Wesleyan preacher, died suddenly in London on November 17. Deceased was one of the most prominent clergymen in England, and represented his church at the last ecumenical conference in Washington. He was born at Caermarthen in 1847, and was the son of John Hughes, a surgeon. His education was received at University College, London, and Wesleyan Theological at Richmond. He was recently president of the Wesleyan conference, and for a time edited the Methodist Times. He had ministered at West London mission for many years, and was interested in the Social Purity movement and the Anti-Gambling league. Among his publications are: Social Christianity, Ethical Christianity, Essential Christianity, The Atheist Shoemaker, The Philanthropy of God.

MURDER AND SUICIDE

A LOVERS QUARREL.

Trooper Darlington, Formerly of Strathcona, Alberta, Who Served Through the South African War, Shoots His Sweetheart and Himself.

Because Bertha Sheldon allowed another man to escort her home Friday night from the store where she is employed, G. A. Darlington, a packer for the Ann Arbor Organ Co., and a student in the University School of Music, shot her in the arm; then shot himself to death. Darlington and she had quarrelled. He came there from Strathcona, Alberta, and had served with the Canadian soldiers in the South African war. He was about 24 years of age.

Roberts and the Czar.

Lord Roberts was the leader of the biggest army which England has ever sent to war. Lord Roberts' services to his country, rewarded by the highest honor which can fall to a British soldier, cover half a century in the history of the British empire, and few lives of public men are better known than the exciting career which Lord Roberts crowned by carrying the flag into Pretoria. But it is perhaps not generally known that Lord Roberts is a friend of the Czar, whom he knew well enough years ago to ask when the Russians were 'coming to India.' 'Never!' replied the Czar, with emphasis; 'I could not conceive a greater disaster for Russia than that we should ever make the attempt.'

'But you don't expect me to believe that,' said the daring Bobs; 'some day we shall have to fight you here.' The Czar's reply belongs to history: 'No such a thing is altogether outside our ideas—it would be madness,' said the Emperor. 'Look at the immense distances, the enormous difficulties of transport, the loftiest mountains in the world to cross. It is impossible.' Bobs was skeptical. 'All the same,' he said, 'you will come some day. There is not a village in India, where there is not to be heard the traditional prophecy that some day a white people from the north will conquer India.' 'Then why in the world,' burst out the Czar, 'should you not claim that you are the white people of the prophecy? You are white, you come from the north; why should you do yourselves the harm of always assuming the prophecy was still unfulfilled, and that it relates to us?'

The epidemic of plague which has been raging in Odessa for five months had its origin in a curious way. An Austrian vessel arrived at Odessa with one of its crew dead. The body was buried in the Catholic cemetery. During the ceremony an Austrian flag was hoisted over the grave. At the conclusion of the service the flag was carried away by two seamen of the ship, who, on the way to the quay to board the vessel, stopped at several saloons. In each place they laid down the flag while getting their drinks. Shortly afterwards the two seamen died of the disease, and it was discovered that the people in every public house they had entered were ill of the plague. This has led to the belief that the flag contained plague bacilli in its folds.

Mrs. Laflamme, of Brockville, Ont., visiting in St. Mary's, Ont., with her daughter, Mrs. K. C. Smith, has had her right arm amputated at the elbow. She was suffering from blood poisoning, and an operation was necessary to save her life. Some time ago while peeling a pear she accidentally cut her thumb. Blood poisoning developed, with the result stated.

At a reception of 500 Piedmontese pilgrims Friday the Pope jocularly referred to the unfounded rumors of his indisposition, adding: "My time has not yet come. We have many things to accomplish before death."

Geo. W. Ryer, who was joint author with Denman Thompson of "The Old Homestead," died in Brooklyn Friday night. He was born in New York in 1845. He wrote "The Sunshine of Paradise Alley," and "The Two Sisters," a melodrama.

Stephen Wilson, of Red Deer, Alberta, homestead inspector, will apply next session for a divorce from his wife, Rachel Wilson, formerly of Red Deer, but now residing at Princeton, British Columbia.

A rumor is current in Toronto that the McCormick Mfg. Co., of Chicago, purposes the establishment of works in York township, immediately west of the Juncton.

An electric street car took fire at Hintonburg in the vicinity of Ottawa Friday night and was burned so that there was nothing left but the trucks. There were ten people in the car and they managed to get out in time, although the conductor had to leave his fare box behind.

COKE SUPPLY.

The editor of The Boundary Creek Times reviewing in his last weeks's issue the coke supply question in a long editorial presents to its readers a dismal picture of closed smelters and idle mines, in consequence of recent shortages in coke. Upon the authority of Mr. Graves he states that the increasing activity in the gold-copper mining camps of the Boundary country and the silver-lead industry of the Nelson district is already making urgent demands for more smelters and he argues that since the fuel supply is insufficient to meet the present requirements the growth of those industries will be starved for the want of fuel food, and the only cloud in his bright picture of the future is this much talked of coke shortage.

He speaks of the recent labor trouble and questions the right of either men or company to do anything to cause a strike and thus tie up the other industries of the district, and he suggests a government commission not only to adjust their differences but to enquire into the matter of securing a full supply of fuel for the smelters.

We believe The Times to be sincere in its pessimistic views and for that reason we will try to briefly explain some wrong conceptions it has taken of our main industry. The labor trouble is settled and we believe settled for good. The recent strike at Michel was merely a family quarrel which Manager Tonkin hae nothing to do with. The mines at the Crow's Nest Pass Coal Company's three districts were never worked to better advantage, both of employees and employer, than at the present time. The men are earning larger wages than they ever did, and the mines, considering the workable territory, never turned out more coal than at the present time. The prospects never were brighter for a long, uninterrupted season of industrious activity and we assure the Times that neither the Company nor the men are looking for trouble.

Now let us see if we cannot let more sunlight on the Times picture by dispelling the cloud with which he has hidden the sun of prosperity. At the present time the ovens of Fernie and Michel export 700 tons of coke daily. Next year those new smelters of the boundary country may draw supplies from 250 more ovens at Michel, and Morrissey which at the present time has no ovens will be one of the largest supply points for this important fuel. If then the demand is greater than the output no reason presents itself to our mind why the supply cannot be increased to any required extent. The coal is here in incomputable quantities, and of a quality surpassing any other for coking purposes.

In reviewing the past season The Times should not forget that strikes are not the only drawback the Coal Co. has had to contend with. The effects of the explosion of May 22nd are still seen in our coke exports, and as the crippled condition of the wrecked mine is being improved the output as steadily increases. Coupled with this is the fact that the coal demand for domestic and other purposes is becoming greater and this market is necessarily satisfied first.

Operators of metalliferous mines are apt to forget that coal mines are not developed in a day. The Crow's Nest Pass Coal Company has spent millions in development work and the mines are still in their infancy. By far the greater part of the work done as yet is in the way of preparation for permanent and future operations and when these mines emerge from infancy into the full strength of maturity we feel confident that all the metalliferous industries of the interior will be able to get its fuel supply from our inexhaustable deposits.

Shake! therefore Brother Ross and let us rejoice in the mutual advantages our districts give. Go ahead with your mines as fast as you like and you will find the coke industry of this valley keeping even pace with you.

THE POLITICAL SITUATION.

The cabinet at Victoria is full and the new blood brought into the government will add strength to that body. Murphy and McInnes are clever young men and what they lack in experience they will make up in brains and energy. The old members are too well known to need comment. Wells and Prentice are good enough business men and probably with a statesman at the helm would faithfuly do their part in running the ship of state. Eberts with all his brains is so notoriously lazy as to be utterly useless in the Cabinet, our genial Colonel can perform well in the drawing room but no one seriously regards him as a statesman. He has three ministers who have no great love for him and he has his work cut out in preserving family unity. Eberts worked hard to get the premiership and Murphy and McInnes were opponents of the Colonel in many previous debates.

On the whole it is more than probable that the Prior government is preferable to its predecessor. The infusion of young blood may stir up the sluggish pulse of old fogeys growing mouldy in our legislature. The opposition are hopelessly torn by cliques and factions and this fact will doubtless enable the government to live its natural life-time. The opposition do not claim to be able to form a government, if called upon to do so, all they hope to do is defeat the present administration. Mr. Richard McBride is the recognized leader of the opposition but it is certain that neither Gilmour nor Martin would serve under him and it is equally certain that Messrs. McPhillips Ta low and Gardner would not enter a cabinet as colleagues of Mr. Martin.

J. F. McRae, manager of the Rat Portage Lumber Co. is in town on business connected with the industry. Mr. McRae is enthusiastic over the possibilities of lumbering in this valley.

LOCAL AND GENERAL.

Dan Hayes was in town on Wednesday.

G. O. Foss, of Morrissey, is registered at the Royal.

C. P. Hill is spending several days in town this week.

The Imperial Bank will open a branch at Cranbrook on Monday.

Gramophone and 15 records for sale cheap. Apply Box 217, Fernie P. O. 2t

Mrs. McPhee a professinal nurse from MacLeod arrived on Wednesday to nurse Mrs. Treleaven, a daugher of Mr. Tazzaman who is very ill.

Wm Huggins, a nephew of Mrs. H. J. Johnson was up from MacLeod this week. Mr. Huggins is engaged in the wholesale meat trade at that point.

John Nave, tracklayer at Michel, was hurt last week while engaged at his work The end of a rail struck him in the body inflicting internal injuries, which will lay him up for some time

John Lawson came up before Judge Forin at Nelson on Monday on two charges of theft. He pleaded not guilty and elected to take speedy trial which will be held on Monday, Dec. 1st.

Chief Forbes, of the police force, moved into his commodious cottage, West Fernie, on Wednesday. Mr. Forbes has a pleasant site, overlooking the Elk and close to Mr. H. J. Turner's residence.

The Coal Company has decided not to open the townsite at Morrissey for the present owing to the unfavorable season for building. The town will be opened in the early spring, probably in the latter part of February.

Mr. C. Clapp, Division S. and T. of Division No. 234 Brotherhood of Railway Trackmen of America, left by C. P. R. train Thursday evening for St. Louis, Mo. as a delegate for the Crow's Nest branch, at their fourth biennial convention.

The youngsters of the town have a cinch now in the coasting line in the new grade recently built down the hill towards Mott's mill. The sport is doubtless quite legitimate so long as they use some judgement and don't run into teams or over the embankment.

C. Devore, who has for the past few weeks been working in the Royal barber shop has opened up a business of his own across the road from the Northern. He is getting the place fixed up in good style and his ability as a first class barber will doubtless bring him a fair trade.

A painful accident occurred at Burns' Corner on Wednesday fornoon. W. Bennett, who started that day to work for the Burns Co., was unloading meat from a sleigh and while shouldering a carcass his foot slipped under the side-walk and the knee was dislocated. Drs. Corson and Bonnell put it back in place and took him to the hospital where he will remain for a few days. Bennett came from Nelson and says that his knee has been in a similar condition before.

B. O. Nettleship whose death was reported last week did not suicide as was supposed. He had been drinking very heavily for several days previous and not having any other liquor he drank methylated spirits. He did not make the exact statement that he would be dead by noon and Dr. McSorley did not attend him as he was out of town. An inquest was not thought necessary as it was perfectly clear that he died from natural causes and that there was no suicidal intention on his part.

The Grand Trunk Railway has announced its intention of building a transcontinental line. The line will be entirely separate from the C. P. R. and C. N. R. The proposed route is through New Ontario to Winnipeg, from that point it gradually leaves the C. P. R, on the south and finally crosses the mountains through the Peace River Pass, and terminates on the North Pacific. The line will be constructed under a seperate corporation to be the Grand Trunk Pacific Railway Co. and will be of the most up-to-date character.

Ontario apples shipped to B. C. points have been condemned in a wholesale manner by our inspectors. Between nteen and twenty carloads are known to ave been condemned, and others on the way got as far as McLeod and Calgary where they were disposed of. The fruit is entirely infested with the Codlin moth and this pest affords the primary reason for the summary treatment it received but even were it free from this fault, the packing and lack of uniformity and size would be sufficient to condemn it as A. 1. stock. Several cars were designated for Fernie and at the last moment our market had to be filled with B. C. fruit. Fruit importations require no inspection on the prairie and there will be some cheap apples for sale down there.

A. Mutz registered at the Hume hotel, Nelson, on Tuesday.

Rev. D. L. Gordon went down to Cranbrook yesterday and will be back to-day.

Fred Vance, of the Alberta Barber shop is moving his shop three doors west in the same building.

H. E. Gillis, of Vancouver, Inspector of the Canadian Birkpeck Investment and Savings Co., is in town.

Rev. F. W. Auvoche, of Cranbrook, will preach every Thursday evenihg at 8 o'clock in the Baptist Church here.

Constable Henderson brought two Slav prisoners in from Michel yesterday. Ti ey got into a drunken row and are charged with disturbing the peace.

The B. C. Southern Railway Co will apply next session for an extension of time for the commencement of a railway from the Crow's Nest branch to Golden.

The frame work of Motts Son & Co.'s new mill is up and if the machinery is not delayed in transportation, the plant will be in operation by the end of the year.

The Board of License Commissioners will hold their regular meeting to grant licenses for the ensuing term, at Cranbrook, on Dec. 15th. Spence Lyons name appears among the applicants. He is applying for a license for the Union Hotel, Fernie, Old Town.

The Methodist Church, at Michel, gave an enjoyable ertertainment on Monday evening in the hall. Rev. S. J. Thomson, of Cranbrook, gave his interesting lectnre entitled "Love, Courtship and Marriage." Miss Sinister sang and Rev. D. L. Gordon recited. The hall was well filled.

The Ladies' Aid of the Presbyterian church has booked an engagement with Miss Flora MacDonald and Mr. Gravin Spence for a concert in Princess Hall on Jan. 2nd. The entertainment offered by this Scotch company is of a superior order and every lover of Scotch music and lore will look forward to this treat.

The town of Frank is to have an open air skating rink 60 x 160. Mr. Frank Drumm has the contract and is building it on the townsite just west of the spur. The hockey club has organized with J. W. Ashdown as secretary and W. H. Buchanan as captain. The club is making arrangements to enter the Crow's Nest League.

Last Sunday's west bound express ran over a man about a mile east of Fort Steele junction. Apparently the man had made his bed on the track with the rail for a pillow. Upon stopping the train it was found that the head had been completely severed from the body, and the latter was terribly mangled. There were no means of identifying the deceased.

Christmas Bazaar

The ladies of Christ Church have succeeded in making and otherwise obtaining a splendid collection of articles for their annual bazaar, to be held on Thursday, Dec. 11th. They consist of some beautiful specimens of artneedlework, embroidery, etc., as well as useful wearing apparel for all classes. Useful and fancy articles for Xmas presents will be found in great profusion, as well as home made candy. Refreshments will be served. Music at intervals. Don't forget the date, Dec. 11th.

An appeal has been entered in the twenty-nine damage suits brought against the Crew's Nest Pass Coal company by the relatives of the men killed in the disaster at Coal Creek last May. The first application by the C. N. P. C. Co. was to have further particulars of, and to have statements of claim filed struck out. This application was dismissed, as also an appeal on one of the cases and for an extension of time to appeal in the other twenty-eight cases. An appeal has now been entered against the ruling of Mr. Justice Martin in dismissing the first application. —Nelson News.

Lecture.

Rev. S. J. Thomson, of Cranbrook, gave an interesting lecture in the Methodist church on Wednesday evening entitled "Lincoln as Liberator." The lecturer with vivid powers of narration and description told the life story of this wonderful man of American history. The early struggles and unconquerable ambitions of the backwoods boy were forceably brought out and made to show their bearings upon his after life when the weight of a nation's responsibilities was thrust upon him. The strong, characteristic convictions of Lincoln which carried him through the bloodiest civil war in the history and at last gave him a martyrs crown were feelingly described by the talented lecturer.

Greenwood is to have a $10,000 court house.

DR. PARKER DYING.

SKETCH OF HIS LIFE.

One of the Greatest Modern Preachers is Passing Away in London--- Railway President Divides Profits With Employees---The Electric Post.

The condition of Dr. Parker, minister of the City Temple, is now considered hopeless. Dropsy set in Friday, since when oxygen has been administered to him. Dr. Parker himself wrote a bulletin which was read in the City Temple Sunday, remarking that it was the last thing he would ever write.

Dr. Parker ranks with Spurgeon and Canon Liddon as being one of the greatest of modern British preachers. His church on Holborn Viaduct—the City Temple—is one of the largest in London, England, yet it is each week tried to its utmost capacity to accommodate its huge congregation. For nearly thirty-three years Dr. Parker has occupied the pulpit at the City Temple, and during that time he has endeared himself to Christian workers throughout London. His Thursday noon hour sermons to business men were instituted by him twenty years ago, and have been among the most popular and widely known of all his pulpit utterances.

Dr. Parker is in his seventy-second year, coming of Northumberland stock. He has been twice married, both wives being deceased. He has been twice chairman of the Congregational Union of England and Wales—the highest honor in the gift of the denomination—and has held many other positions of worth and responsibility in the religious world. Dr. Parker has been a prolific writer. His monumeotal work, "The People's Bible," in twenty-five volumes, is a standard of theology everywhere, both for its spiritual and evangelical insight, and for its frank recognition of modern thought-difficulties. Dr. Parker's "To-day's Christ," "The Preacher's Life," and "Christian Profiles in a Pagan Mirror" are also valuable contributions to recent theology.

While David Hutchison was returning home from the cheese factory at Mallorytown Tuesday, a team owned by George Thompson ran into the rig. The force of the collision threw Hutchison several feet into the air. In the fall his head struck the ground and nearly severed the scalp from the skull. He lies in a critical condition, and is not expected to recover. Hutchison is one of the most prominent farmers in Leeds county.

A special cable from London says: Signor Pischielli, inventor of a remarkable system of dispatching letters known as "the electric post," arrived yesterday morning from Italy. His object in coming to England is to continue negotiations, opened with the British postal authorities, for the introduction of the system into this country. Signor Pischielli wants the postmaster-general to give him permission to construct an experimental line for the dispatch of letters.

As a result of his investigations, Street Commissioner Jones of Toronto, declares that the fuel question is ten times more serious than was expected. There is practically no hard coal available. Deputy Commissioner Evans has just returned from Buffalo where he interviewed a number of dealers with a view to securing supplies.

Students of the Toronto University and Medical College have decided to offer to pay the fines of Mounted Policemen Guthrie, Ide and Ward, who were disciplined for assaulting students on Hallowe'en, and to petition the police commissioners not to set the offence against the good conduct in the standing of the men. The fines amount of $6 each. No offer has been made to pay Sergeant Goulding's fine. It is said the policemen interested will refuse.

At a special meeting of the St. Thomas city council Tuesday night the street railway was taken over, the company not having operated it for sixty days, and therefore by agreement forfeiting their franchise and giving the city the right to take over the property in satisfaction of $50,000, the guarantee bonus given by the city.

A. J. Cassatt believes that a great railroad should divide the benefits of prosperity with faithful employees. This was demonstrated when the Pennsylvania railroad increased by 10 per cent. the salaries of 96,900 of its 102,000 employees who have been getting less than $200 a month. This will require an additional outlay of from $5,000,000 to $6,000,000 a year.

A ten-cent piece was found inside a dog salmon 20 miles above Essington on the Skeena river the other day.

TAILOR HINTS.

The Basque Coat Coming In—Pedestrian Skirts.

The basque coat is coming in with the shorter skirt much strapped and stitched. Collars and revers are once again braided, and new braids will be used as winter advances.

The lace cravat is a pretty finish to a tailor made frock, while the old fashioned jabot must of necessity be in vogue with anything approaching the swallowtail or cutaway jacket.

There is no doubt that on all practical costumes the skirts will be much shorter, but the really short skirt to show the ankles should be kept exclu-

A USEFUL GOWN.

sively for country wear. For town wear the skirt is cut to escape the ground barely all the way around.

There is no doubt that some women never look well without a wide collar; consequently they must not be deluded by new fashions in this respect. Some of the very latest coats are made without the sailor collar and with the little upstanding military affair, but in all such matters individuality must be considered.

A very useful gown is the one shown in the cut. It is of dark red rough goods trimmed with gold and white braid. JUDIC CHOLLET.

The Versatile Name of Smith.

(London 'Tatler.')

I was amused on looking at the Clergy List the other day to note how men of the name of Smith seek to obscure the fact, says a correspondent of 'The Tatler.' Under the name of Smith the reader is directed thus:

Smith, vide Abbott-Smith, or Allis-Amith, or Angel-Smith, or Bowden-Smith, or Boys-Smith, or Clark-Smith, or Clementi-Smith, or Cowper-Smith, or Dawson-Smith, or Finch-Smith, or Harper-Smith, or Hart-Smith, or Hibbert-Smith, or Jackson-Smith, or Jervis-Smith, or Kerr-Smith, or Landon-Smith, or Langdale-Smith, or Litt-Smith, or Manners-Smith, or Maynard-Smith, or Morgan-Smith, or Newland-Smith, or Owen-Smith, or Payne-Smith, or Pressley-Smith, or Sadmarez-Smith, or Scott-Smith, or Spencer-Smith, or Spriggs-Smith, or Wade-Smith, or Woodd-Smith, or Wyatt-Smith, or Wyldbore-Smith.

In addition to these there are the following compounds:—

Smith-Bingham, Smith-Dampier, Smith-de-Heriz, Smith-Heriz, Smith-Huon, Smith-Marriott, Smith-Masters, Smith-Rewse.

Smith itself appears in several forms as Smyth, Smythe, and even Smijth (Bowyer-Smijth being the name of the baronet of Hill Hall, Essex). One of the most curious cases is that of Dorrien-Smith. Their name was originally Smith, for they came from the family which was ennobled as Carrington. The baroneted branch of the family took the name of Bromley; the peer's name is now Wynn-Carrington. A third branch took the name of Smith-Dorrien, while the present king of the Sullies, as if he felt that an injustice had been done to the historic name of Smith, added Smith to his already compounded surname—Smith-Dorrien-Smith. A not infrequent method is to incorporate a 'smith' with the rest of the name. Thus 'Bain Smith' becomes 'Bainsmith.'

The Victoria Colonist boasts of having received a bunch of flowers picked in a garden at Cherry Creek, 1,500 ft. above the sea, October 31, as a specimen of what the climate at the upper country will produce at this time of the year.

HENRY ROSE HANGED

SAID HE WAS INNOCENT.

Pays the Penalty for John Cole's Murder. ---Condemned Man Calm to the End and Dictates Farewell to Friends. Forgives Those Who Sentenced Him.

Henry Rose, who was sentenced to death for the murder of John Cole, was executed in the Nelson jail yard at eight o'clock Friday morning, by the official executioner, Radcliffe.

Rose was attended by Father Althoff, of the Romish Church, who was with him from early morning until the time of the execution and attending him on the scaffold. Immediately before the drop fell Father Althoff read a statement, dictated by Rose, in which the murderer bade good-bye to the world and all his friends.

PROTESTED INNOCENCE.

He protested his innocence of the crime for which he was suffering the death penalty and forgave all who were instrumental in placing him in his position. He died at peace with the world and in sure and certain hope of a glorious resurrection.

The execution took place without any interruption or misadventures.

THE CRIME.

The murder took place near Nakusp on June 4 last. Rose, in company with Nelson Demars, an old prosuector, 78 years of age, and Cole, started from Nakusp in a small boat for Rose's ranch, which is situated a few miles below Nakusp. The men were all more or less under the influence of liquor. Demars claims Rose started to quarrel soon after leaving Nakusp, and the lake being rough, they rowed ashore. Rose and Cole continued their quarrel, and upon Demars remonstrated Rose turned on him and hit him on the head, knocking him unconscious. When Demars recovered his sense he saw Cole on his hands and knees and Rose standing over him. Demars started to light a fire, and Rose came after him again, struck him over the face with a club, knocking out one of the old man's eyes and again rendering him insensible.

After this Rose went to Nakusp and told the authorities that he had started away in a rowboat to fish, leaving Cole and Demars ashore, as they were quarreling, but hearing cries he returned to shore as quickly as possible, and found Cole dead and Demars in very bad shape. He said Demars told him "two men came out of the woods and clubbed them and ran away."

When the authorities arrived at the scene of the murder, they found that Cole's jaw had been broken with a club, which was found near by, and other bruises on the back of the head and neck, which must have caused almost instant death.

At the trial Rose's counsel endeavored to make it appear that Demars committed the murder, but according to the doctor's evidence the condition in which the old man was found, it would have been a physical impossibility for him to do it.

Cole is about 58 years old.

Novelist Henty's Death.

Mr. George A. Henty, the well-known correspondent and author, who died on board his yacht at Weymouth, was born in 1832 at Cambridge, and was educated at Cambridge. He went to the Crimea in the purveyor's department of the army, and was subsequently promoted to the rank of purveyor. At the end of the war he was in charge of the Belfast, and afterwards of the Portsmouth district. He subsequently resigned his commission. In 1855 he was appointed special correspondent of the London Standard, and was through the Austro-Italian, Franco-German and Turco-Servian wars, as well as the Abyssinian and Ashanti expeditions, and with Garibaldi in the Tyrol. Mr. Henty was the author of a number of novels, but was best known as the author of books for boys, having published over seventy such works, which have gained wide popularity.

Eddie Beaver, aged about fourteen years, met a peculiar accident on his mother's farm at Hespeler, Ont. He slipped off a straw stack, and a manure fork dropping after him, a prong was driven clean through the top of the boy's head, coming out at the side and then piercing his ear. If blood poisoning does not set in, the lad will probably recover.

Jos. Gentile, Italian counterfeiter arrested at Toronto a few days ago, was found guilty Friday morning in the police court, first of utter Canadian counterfeit coins and second of uttering U.S. counterfeit coins. On the first he was sentenced to ten years, and on the second to the three years' imprisonment; sentences to run concurrently.

The coroner's jury has exonerated Miss Gobeille, of sanitarium fame, in connection with the death of J. B. Van Allen, of Montreal, declaring he died of reutonitis. The jury recommends that the sanitarium and private hospital be placed under government control.

VELVET POPULAR.

The New Metallic Weaves—Hats of Rough Felt.

All kinds of lace still retain their popularity, particularly Irish points and guipures.

Velvets will be worn as much as last season. The metallic velvets are the newest and are particularly effective in black and gray. Velvet hats will be somewhat supplanted by those of rough felt, but these will be trimmed and even faced with velvet. Burnt orange is very smart, especially when combined with white or pearl gray. There is a most becoming shape in felt known

CARRIAGE CLOAK.

as the Marie Stuart. This has a low, broad crown, and the brim falls into a round point in front, showing the hair perfectly. It then rises into very much arched sides and fits close to the hair in the back.

Many smart hats are made of zibeline, especially in the dull red shades, and the hat is then trimmed with poppies in all shades of velvet.

The illustration shows a carriage cloak of putty colored cloth. It has the wide sleeves now so fashionable and a V shaped yoke and high collar of fur. The smart hat is of the same color of felt, trimmed with orange velvet and a black feather. JUDIC CHOLLET.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

The teachers of Ontario have formed a union.

The Pacific coast seal industry is dwindling away.

Emperor William has left Edinburgh for home.

Lindsay's new hospital, costing $75,000, was opened

The Bradley block at Elkhorn, Man., was destroyed by fire.

Dominion Square Methodist church and site, Ottawa, will be sold.

The murders of the missionaries, Revs. Lewis and Bruce, have been revenged.

G. L. Orme's store and stock in Ottawa were damaged by fire some $60,000.

J. B. Van Allan, of Morrisburgh, Ont., fasted 15 days and died in a Montreal sanitarium.

The Southern Pacific depot and the ferry slip at San Francisco were destroyed by fire.

Agent C. W. Speers reports the Doukhobors are recovering from the effects of their pilgrimage.

Mrs. Carrie Nation lectured the Vanderbilts on over-dress at the New York horse show.

Plans for the Carnegie library, Winnipeg, will be open to local architects until Jan. 15.

Two C. N. R. survey parties are leaving Fort William to locate a line to White River.

The Duke of Marlborough has resigned as paymaster-general and is succeeded by Sir S. Crossely.

The Canadian Northern Co. has purchased two monster locomotives built for the Chignecto railway.

President Gompers, of the Federation of Labor, has been exonerated from all chgrges of infidelity to trades unionism.

Mr. Robert Beith, M.P., of Bowmanville, Ont., has won the championship of America at the New York horse show.

A Holmfield, Man., breach of promise case, Alice Cockerill vs. G. Harrison, is being heard at the Winnipeg assizes.

Rev. Dr. Gordon, of the Presbyterian college, Halifax, has accepted the principalship of Queen's University, Kingston.

MADE BOGUS MONEY

A SILVER COUNTERFEITER.

Had a Good Supply on Hand and was Prepared to Defend It--- Martial Law in South Africa Repealed--- Sustained Life by Drinking Each Others Blood.

Joseph Gentile, arrested in Toronto on Wednesday, is one of a gang of eight, the most exuert counterfeiters, who ever operated on the continent, seven of whom were recently capturech in New Nork. The arrest was made by W. J. Flynn, U.S. secret service officer, and Detective Murphy, of New York, who oad traced Gentile to Toronto, after chasing him from New York, Cnicago and Detroit. They were accompanied by Detective Davis, of the local force. The prisoner was found in the kitchen of 353 Spadina avenue, making counterfeit Canadian 25 cent pieces. He had two 38-calibre revolvers and a stiletto on his person, but was manacled before he had a chance to use the weapons. In the kitchen was found the following counterfeit coins: 65 U. S. 50 cent pieces, about 200 25 and 10 cent Canadian pieces, 1 plaster of paris moulds and other equipment. Gentile was using the front part of the building as a fruit store, doing a good business, and was unsuspected by neighbors. The U.S. officers want to take him over the line for trial; local authorities, it is understood, will consent.

Martial law was repealed throughout the new South African colonies on Wednesday. The proclamation, however, announces that the authorities reserve the right to re-impose military rule in case of necessity. It provides for the expulsion of eperyone consider?d dangerous to the peace of the country, and authorizes arrest, without warrant, of any one suspected of sedition.

A Tale of Horror.

The correspondent of the Daily Mail, of Wellington, N.Z., cables that the eight survivors of the steamer Elingamite, who were rescued on a raft by the British steamer Penguin, admit that while their minds were unhinged by hunger some of them prolonged life by drinking the blood of their companions.

This was mostly done by mutual consent of two parties, incisions being made in their skins, and each sdcking the blood of the other simultaneously. Those of the castaways refusing to do this were "tapped," whilst they were asleep and it is alleged that the stewardess died of exhaustion through loss of blood, taken by thos process. The correspondent adds that the story of the survivors has caused a feeling of horror in Wellington, their acting being regarded as inexcusable, as the ralt was only four days and a half afloat.

CANADA AND ABROAD.

A Budget of Important News in Short Paragraphs.

December wheat prices were very actipe in Chicago.

Masked men held up a Minneapolis gambling house.

Servia's king intends to assume a military dictatorship.

Delia Wulligan has been asleep for 23 days in a New York hospital.

The city of St. Thomas, Ont., has taken over the street railway system.

The British Waziri expedition in Eorthern India has met with greater success.

Another expert counterfeiter was arrested in Toronto and his premises searched.

For the three months ending Oct. 31, Dominion homestead entries show a very large increase.

Fort William residents bellepe an effort should be made to induce boats to winter at the port.

Survivors of the wrecked steamer Elingamite prolonged life by drinking the blood of companions.

A Hamilton bridegroom refused to be married just previous to the commencement of the ceremony.

Mr. Gibbs, grain inspector at Fort William, reports 14,426,000 busnels of wheat have been received at the lake ports this season.

A princess was born to the King and Queen of Italy, and there is much disappointment in the nation that there is no heir to the throne.

Breach of promise cases, which were on the docket of the Winnipeg assizes, have been settled.

Guests were assembled and all was ready for the wedding of Mrs. Wm. McGee, of Hamilton, to Charles Vosper, when the groom backed out because he suspected the bride of mercenary motives.

FERNIE FREE PRESS.

FERNIE, B.C.

"I haven't had a single call since I opened my office ten days ago," complained the newly-fledged M.D. "Here I sit day after day like Patience on a monument."

"Oh, well, don't get discouraged," rejoined the sympathetic friend. "It's only a matter of time until you have patients under monuments."—Chicago Daily News.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed for ever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Address, F. J. CHENEY & Co., Toledo, O.

Sold by druggists, 75c.

Hall's Family Pills are the best.

We mark the weather when it's hot,
We talk of cold and rain;
Perhaps all this attention's what
Has made the weathervane.

Messrs. C. C. Richards & Co.

Gentlemen,—Theodore Dorais, a customer of mine was completely cured of rheumatism after five years of suffering, by the judicious use of MINARD'S LINIMENT.

The above fact can be verified by writing to him, to the Parish priest or any of his neighbors.

A. COTE.

Merchant, St. Isadore, Que.,
May 12th, 1898.

There is no greater sign of a general decay in virtue in a nation than a want of zeal in its inhabitants for the good of their country.— Joseph Addison.

Minard's Liniment is the best.

A Highland woman, selling a hen to her neighbor, was asked :—

"Is she a good hen, and has she any faults ?"

Reply—"Ay, Margaret, she has got ae fau't. She lays a bit egg on the Lord's Day!"

The Flow of Milk will be increased.

Why go to all the trouble of keeping cows and get only about half the milk they should produce.

Dick's Blood Purifier

strengthens the digestion and invigorates the whole system so that the nutriment is all drawn from the food. It takes just the same trouble to care for a cow when she gives three quarts as when she gives a pail. Dick's Blood Purifier will pay back its cost with good interest in a few weeks.

50 cents a package.

Leeming, Miles & Co., Agents, MONTREAL.

No. 600

We illustrate here our No. 600 "SOLITAIRE" DIAMOND RING, which sells for $100.

This stone is of the finest quality, and is mounted in 18k. gold.

We personally select our Diamonds from the "cutters" stock, and with our expert knowledge of gems, an inferior quality never enters our stock.

Our new illustrated catalogue will be forwarded on request.

We cheerfully refund the purchase price where any article selected is not perfectly satisfactory.

Jewelers,
Yonge and Adelaide Streets,
Toronto.

THE FASTING FAD.

There Is No Advantage to Be Gained From Going Hungry.

We are living in an age of fads, remarks Good Health, and as its opinion has been solicited in regard to the "fasting fad" it proceeds to give it as follows:

There is no particular advantage to be gained from going hungry. Hunger is the voice of nature telling us that the system needs food and, like all of nature's warnings, should be heeded. To be sure, a great many, we might say the majority, of people eat too much as well as too often. But the entire abstinence from food is an exceptional remedy if it is used at all. In cases where one's stomach is filled with germs it is far better to fast than to go on eating in the usual way, but even then it is not necessary, for one can get all the benefits of fasting and more without discomfort by subsisting for a time upon a fruit diet. In this way the germs are starved out, the fruit juice acting as a disinfectant. Usually one or two days of this kind of fasting is all that is needed, and it is not always necessary to use the fruit entirely alone even then. Some dry sterilized bread, such as zwieback or granose, may be taken with it without interfering with the purpose of the fast. It is really wonderful what can be accomplished by the use of fruit in ridding the digestive tract of germs.

Eau de Cologne.

How many of those who use eau de cologne from Cologne daily, one might almost say hourly, are aware of the fact that it was invented by an Italian and not by a son of the Fatherland, which gives its name?

Almost 200 years ago an Italian priest, Giovan Maria Farina, eked out his modest fortune by selling perfumery, little art objects and so on at Domodossola. In 1702, happening to be in Cologne and making use of some of the finest vegetable productions of the country, he discovered the secret of the miraculous perfume, which has never been revealed to this day except to his descendants. He soon devoted himself to the sale of his invention, which was so satisfactory that, needing help in its manufacture, he had his brother and nephew join him from Italy.

The increasing fame of the water brought increasing difficulties of rivalry. New firms who stole his name, his trademarks, stamps and so on sprang up like mushrooms, but they could not steal his secret.

Smoking a Narghile.

"The narghile is the best instrument to smoke tobacco through, provided you use it in the right way," said a man who knows. "Most people use it in the wrong way. They load it with tobacco and light up with a match as though it was a pipe they were smoking. This is incorrect, and the narghile, so abused, has an abominable taste and odor. The right way to use the narghile is first to dip your tobacco in water, squeeze the water out and place the soaked, damp mass in the pipe bowl. Then you take a lump of burning charcoal and set it on the top of the wet tobacco and begin to smoke. The tobacco itself, you see, is not really alight; it's the charcoal that's alight; it is the burning charcoal that eats the tobacco up. This is the secret of narghile smoking. And a narghile, smoked properly, is delicious—makes, in fact, the very best smoke in the world."

Her Great Fault.

A Georgia citizen recently said that while riding out from Savannah on horseback he saw a typical southern matron outside a whitewashed cabin, while on the lawn in front a bevy of young colored children were playing. There were eight of them altogether, seven of their number being very, very dark, while the eighth one was light complexioned.

"You've got some fine looking children there, auntie," he said.

"Deed I hab, boss," she replied. "Dere ain't any better pickaninnies in de whole state of Georgia den dat first seben, but dat eighth one, dat mulatto, she done make me more trouble dan de whole oder seben put togedder."

"In what way?" I asked. And she replied:

"'Cause she done show dirt so easy!"

Chased and Refined.

At a recent police court sitting a man was fined 40 shillings and costs for assaulting a policeman. Considering himself a much injured man, on reaching the door he began abusing the magistrate in very violent language. The magistrate sent an officer after him, and the delinquent found himself once more in the dock and fined again for contempt of court.

"My man, if you had been more chaste and refined in your language," said the magistrate, "you would not have been chased and re-fined."—London Tit-Bits.

A Lovers' Quarrel.

"Hallo, Fitzy! where did you get that black eye?"

"Oh, it was only a lovers' quarrel."

"Lovers' quarrel! Why, your girl did not give you that, did she?"

"No; it was her other lover."

AFTER THREE YEARS

MR. JOSEPH ROCHETTE RELEASED FROM RHEUMATISM.

Suffered Much Agony, His Appetite Failed, and His Strength Left Him---Hope For Similar Sufferers.

Only those who have suffered from the pangs of rheumatism know how much agony the sufferer has at times to endure. The symptoms often vary, but among them will be found acute pains in the muscles and joints, the latter sometimes much swollen. At times the patient is unable to dress himself, and the slightest jarring sound aggravates the pain. Liniments and outward applications cannot possibly cure rheumatism; it must be treated through the blood, and for this purpose there is no medicine yet discovered can equal Dr. Williams' Pink Pills. When given a fair trial these pills never fail to cure even the most stubborn cases of rheumatism. Mr. Jos. Rochette, a well known resident of St. Jerome, Que., in an interview with a reporter of L'Avenir du Nord, offers strong proof of the value of Dr. Williams' Pink Pills in cases of this kind. Mr. Rochette says:—"For nearly three years I was a great sufferer from rheumatism. The pains seemed at times to affect every joint, and the agony I endured was terrible. Sometimes I could scarcely move about, and was unfitted for work. The trouble affected my appetite, and in this way my weakness increased and my condition became more deplorable. I tried a number of remedies, but nothing helped me until I was advised to take Dr. Williams' Pink Pills, and then relief came. Gradually the pains left me, my appetite improved, and I became greatly strengthened. Before I had taken a dozen boxes my health and vigor was such that I felt better than I did before the trouble began. I have not since had an ache or pain, and I feel convinced that Dr. Williams' Pink Pills are the best medicine in the world for rheumatism."

Dr. Williams' Pink Pills are sold in every civilized land, and their enormous sale is due entirely to their great merit as a medicine. They cure all such troubles as rheumatism, sciatica, locomotor ataxia, partial paralysis, nervous headache, kidney ailments, neuralgia and the weaknesses that afflict so many women. Do not let any dealer persuade you to try something else which he may say is "just as good." See that the full name "Dr. Williams' Pink Pills for Pale People" is on the wrapper around every box. If in doubt, send direct to the Dr. Williams Medicine Co., Brockville, Ont., and the pills will be mailed, post paid, at 50c per box, or six boxes for $2.50.

The boy's father—Madam, let me ask if your daughter knows how to ask if your daughter knows how to and nurse the sick, mend clothes, and, in fact, is familiar with all the multifarious details of domesticity?"

The girl's mother—Certainly not. Why, if she had learned all those things her education would have been neglected.—Judge.

There never was and never will be, a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient — what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in sound, unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses through the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrop & Lyman, of Toronto, have given to the public their Superior Quinine Wine at the usual rate, and, guaged by the opinions of scientists, this wine approaches nearest perfection of any in the market. All druggists sell it.

Gayboy—They never say in Kentucky that a man takes to anything like a duck to water. They have a better phrase.

Rounder—What is it ?

Gayboy—Like a colonel to corn-juice.

Kidder—The proverb "Every dog has his day" doesn't go in Algiers.

Easly—For the very good reason that there every dey has his dog.

Schoolmaster—Now, let us have "Little Drops of Water" again, and do, please, put a little spirit into it. —Glasgow Evening Times.

TOTALLY DEAF.—Mr. S. E. Crandell, Port Perry, writes: "I contracted a severe cold last winter, which resulted in my becoming totally deaf in one ear and partially so in the other. After trying various remedies and consulting several doctors, without obtaining any relief, I was advised to try Dr. Thomas' Eclectric Oil. I warmed the Oil and poured a little of it into my ear, and before one-half the bottle was used, my hearing was completely restored. I have heard of other cases of deafness being cured by the use of this medicine."

In the Conservatory—He—There is something, darling, I want to tell you. She—Oh, then, let us get away from the rubber plant. Come, tell me under the rose.

If trouble drives you to prayer, prayer will drive away trouble.—Melanchthon.

COMMUNICATIONS.

The Editor does not hold himself responsible for the opinions expressed by correspondents.

To the Editor:

The Fernie Socialist League met again on Monday last at the new house of Mr. Neale's near the hospital. The business took up so much of the time that the subject, "It is more educative to advocate the millenium than petty reform," was hardly entered upon and so it was decided to leave this advanced subject to some future time, when the members of the league were more numerous, when they were better learned in scientific socialism and when the solution of the labor problem was permeating more intelligent minds in Fernie." However your readers have not yet had the report on the last meeting, have not read the thoughts evolved on that most interesting subject 'What is socialism and what is it doing.' According to the Standard Dictionary, it is a theory of civil polity that aims to secure the reconstruction of society, increase of wealth and a more equal distribution of the products of labor through the public collective ownership of land and capital and the public collective management of all industries. The evolution of the worker from the old historic serfdom to the more advanced stage of wage earning was scientifically traced by Com. Craig who thought each successive step an advance on the preceding one. Comrade O'Brien took exception to this and thought that in the early childhood of modern industry, namely the hand machine stage, the people's freedom was much greater, for in that day men owned their own tools or their own means of producing food and worked them in their own houses, whereas now as a result of modern invention, the capitalist owns them and asking a man for work is equivalent to asking for permission to live. The gradual emancipation of the worker has been and still is being gradually wrought out by the workers themselves without the aid of either the church or the newspaper press. What have either done in those great movements that are the corner stones of our liberty? What have either done for the vote by ballot, representative government, slave emancipation, etc. Is it not strange that socialism, which contains the essence of Christianity, yet labors under the stigma of being an irreligious movement? If the churches will not advance with the people the people must march without them but is it not just as necessary to tell people how to live as how to die? The church has just as much to do with the economic condition of the people as the spiritual, only let her see that in a man for example who steals, that the harm is not in the stealing but in the conditions that make a recourse to such means necessary, only let her perceive that socialism ought and should come through the church. At no prior time since civilization began has the gulf between the rich and poor been so wide as now, notwithstanding that to-day the beggar has sources of wealth and comfort undreamt of by ancient kings. Years ago Franklin computed that if everyone worked, the duration of the working day need only be five hours. How much shorter then, should the present working day be when the far greater increase of productive force—machine improvements, inventions, etc., is compared with the increase of the population. The next century we believe will as much perfect the distribution of wealth or the fruit of labor as this did its production. The only badge of nobility is that of labor and the most glorious product of Almighty God is a sober, honest workman. The great aim of socialism is to educate the masses, to place the wage slave upon his dignity, to obtain for him the full fruits of his labor. That great lever to uplift the working class—representative government—has not yet been taken advantage of by them at all perhaps owing to their inferior education when compared with that of the wealthy or privileged class. When will the workers understand what enormous power they have in the representation which their forefathers agitated for, fought for and died for? When will they understand that to use this power successfully they must combine for political purposes or mutual benefit, that they must draw up a platform and be certain that the M. P. they elect will carry it out? They can only do this by becoming class conscious, by recognizing that they are used as machines to make the wealthy still more wealthy and that the interests of the worker and capitalist are not and never can be in harmony. Music halls, jingo papers and medalled heroes are of necessity supported by the rich to keep men's minds in the dark. Another good thing for the rich to do would be to strive strenuously for cheaper whiskey and beer for some men with their bestial passion think only of these and never of helping their brothers or trying to improve their condition. By interchange of ideas through bright, lively meetings good cheap wholesome socialist literature men's minds are becoming educated in equity, truth, justice. They recognize no blowing patriotism, flimsy ribbon decorations and race distinction but the brotherhood of mankind, and learn to see something worth striving and hoping for. Pleasant variety has been introduced into a life of toil and socialistic ideas are at permeating all the nations of the world, where they are most oppressed there they spread most rapidly.

The stigma of the party being called a body of illiterate men raving about imaginary wrongs and akin to anarchists has been entirely swept away and few enlightened governments exist in our day but what have socialist members in the ranks. Fernieites let us see one elected in the coming election for he only can have our true interest at heart. A hearty invitation is given to all, to our next meeting which will be held in Mr. Neale's residence near the hospital at 8 o'clock and when 'which is better government or collective ownership?' will be discussed. Any communications, criticisms, etc. should be addressed to the Secretary.

THOS. B. CRAIG,
Secy.

Fernie, Nov. 27, 1902.

Zamloch Here.

Zamloch gave his celebrated entertainment on Thursday and Frieay evenings. This show is one of the best of its kind on the road, and as advertised, is not a catch penny carpet-bag affair. Zamloch is a clever, up-to-date conjurer and necromancer. Many of his tricks are marvellous exhibitions of sleight-of-hand work, and there is nothing of an objectionable nature about the whole performance. This form of entertainment is often made wearisome by its length and delays, Zamloch wasted little time between acts and got through his long program in an hour and a half. His attendant who doubtless takes a greater part than he gets credit for, acts the sleepy, weary Willie role and is apparently indifferent to both audience and professor. The special feature of Thursday evening was the closing act where in plain view Zamloch gets into a large basket raised above the stage and closes the lid. In about three minutes he walks up the stairs and through the hall to the stage dressed in another outfit. He opens the basket and of course it is empty. On Friday evening he gave a complete change of program, which ended with the famous skeleton dance. Should Zamloch ever come this way again he can count on bumper houses in Fernie.

Notice is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal and petroleum on the following described lands situate about two miles south of the C.P.R depot, Morrissey, B.C., East Kootenay district, on west side of Elk River, commencing at a post marked Mrs. H. A. Senkbeil's southwest corner, thence north 80 chains, thence east 80 chains, thence south 80 chains, thence west 80 chains to place of commencement.

MRS. H. A. SENKBEIL,
Daniel McKenzie, agent.

Nov. 14th, 1902.

In the County Court of Kootenay Holden at Fort Steele. In Probate

Notice is hereby given that on the 5th day of November 1902 it was ordered by His Honour J. A. Forin, Esq., Judge of the said Court, that James Ferguson Armstrong, Official Administrator of the County of Kootenay, be Administrator of all and singular the Estates of the following deceased intestates, namely :—

Frank Bosso, of Fernie, Miner.

John Kearney, alias John Thomas Karney, of Fernie, Miner.

Ignace Matulack, alias Jack Matulack, of Fernie, Miner.

Thomas Stevens, of Fernie, Miner.

Elzear Tremblay, of Fernie, Merchant.

Every person indebted to the said deceased is required to make payment forthwith to the undersigned.

Every person having in possession effects belonging to the deceased is required forthwith to notify the undersigned.

Every creditor, or other person, having any claim or interest in the distribution of the personal estates of the said deceased is required within thirty days of this date to send by registered letter addressed to the undersigned, his name and address, and full particulars of his claim or interest, and a statement of his account, and the nature of the security (if any) held by him.

After the expiration of the said thirty days the administrator will proceed with the distribution of the estate, having regard to those claims only of which he shall have had notice.

Dated at Fort Steele this 10th day of November 1902.

JAMES FERGUSON ARMSTRONG,
Official Administrator,
County of Kootenay.

HEADQUARTERS AT NELSON

The Northwest Coal and Coke Company Incorporated

The Northwest Coal and Coke Company has been incorporated. The headquarters for the Company will be at Nelson and there will be a registered office at Macleod.

The company has been formed to take over a large area of coal land just north of Cowley, consisting of about thirty thousand acres. Mr. Frank B. Smith, P. P. S. C., M. E., formerly connected with the Crow's Nest Pass Coal Company, and now Inspector of coal lands for the Dominion Government, has been engaged as consulting engineer for the company. He has made an examination of the property and given a report of the same, which shows eleven seams of bituminous and coking coal, three of which are thirty feet and none are less than four feet in width.

Professor Dawson in 1882 and 1884 examined this property and reported favorably of it, stating that the coal was of a high grade, bituminous character with coking qualities.

The Company have a representative in London, England arranging to put the stock on the outside markets and his reports are very encouraging; Stock will also be put on the Canadian market at once. Many Nelson people are interested in this company and several of the directors are residents there.

LOOKED LIKE A FAKE

Burrows Quit in the Fifth Round

The boxing bout between Frank Lewis and Jas. Burrows, which came off in Princess Hall on Saturday evening, has created considerable ill-feeling in sporting circles, and it will probably be some time before Fernie is the scene of another affair of this kind.

The men went into the ring at 10 o'clock and it was apparent from the start that the fight would not last long. Burrows looked as though he wanted to wind himself as quickly as possible. He went after his opponent with wild swings and lunges, Lewis acting entirely on the defensive.

By the time the fifth round had been reached Burrows was almost in a state of collapse and a slight blow on the jaw knocked him down. He got up on his feet but another in the same place again laid him low. His seconds then jumped into the ring and threw up the fight before he could be counted out.

SURPRISE PARTY AND PRESENTATION AT MICHEL.

On Thursday evening last the numerous friends of Mr. and Mrs. Frank Sample gathered to do them homage and to show appreciation of their many kindly acts towards better social conditions in Michel. Some fifty of their friends called upon them in the old surprise party fashion, and after a short time of social intercourse the gathering went to Michel hall to indulge in the gay fantastic. At midnight the party sat down to a sumptuous repast at the restaurant of Dudley & McNeil, after which the following address and presentation was made:

TO OUR BELOVED FRIENDS, MR. AND MRS. SAMPLE:

We have been brought together this evening to show you that homage, that honor, that most friendly feeling which exists towards yourselves in Michel. Since you have been among us you have shown not only those characters which make men and women among a community, but also those characteristics which draw fellow men and women together in a bond of friendship not soon forgotten; and on behalf of your fellow men in your service, Mr. Sample, and on behalf of the Maple Leaf Dancing Club and your many friends in Michel, we beg to present to you this writing desk as a reminder of the many arduous and complicated tasks that have been your lot while with us, and hope that your son, too, may use the same while following in the footsteps of his parents; and to present to you, Mrs. Sample, this dinner set, with the wish that in times to come you and your esteemed family may sup with as warm-hearted friends as you have supped with in Michel; and to present to you both this rocking chair, that in your leisure hours (and may they be many) you may dream of that feeling of friendship which exists for you here.

Government agent Armstrong accompanied by Miss Armstrong are in town.

The Cranbrook Herald is getting out a special Christmas edition.

The East Kootenay Lumber Company has received from the C.P. R. a contract to get out 750,000 ties.

MURPHY OUT OF IT.

ANOTHER PEEP AT THE POLITICAL KALEIDOSCOPE AT VICTORIA.

John Houston Describes a Humorous Feature of Last Election.

After tasting of the sweets of office as Provincial Secretary and Minister of Education for a week, Mr. Denis Murphy threw up the sponge and dropped out of politics as suddenly and effectively as if he had been snowed under in a general election. Personal reasons is vaguely given as the cause, but this thunderbolt in his bright political sky is not so easily accounted for, and the significant fact that he left the coast for his constituency full of fight and returned to resign after remaining only one day naturally lends color to the theory that his constituents were not willing to pay such a heavy sacrifice for representation in the cabinet. Murphy having accepted office was without a seat until re-elected and having resigned the position he is now out of politics entirely. Ex-Premier Simlin is out for the vacant seat and it is likely that West Yale will give him no opposition.

Hon. W. W. B. McInnes was offered the position vacated by Murphy and he at once accepted, thus all the offices are filled with the exception of the President of the Council. Mr. McInnes is to be opposed in North Nanaimo, by a Socialist and his election is conceded.

Mr. John Houston in the Nelson Tribune gives a very interesting history of the Dunsmuir Government. He says:

The Semlin government was defeated in March, 1900, and the election that followed in June resulted in returning 38 members elect to the legislative assembly, and they belonged to as many different groups as the French legislature or German parliament are said to be made up of. The following is a fairly accurate grouping:

The following-named sat in the house as members of the Provincial Party or were elected in 1900 as candidate of that party;

GREEN, of Slocan, re-elected.
KIDD, of Richmond, re-elected.
NEILL, of Alberni, re-elected.
WELLS, or Northeast Kootenay, re-elected.
MUNRO, of Chilliwack, re-elected.
PRENTICE, of East Lillooet, re-elected.
HOUSTON, of Nelson.
MURPHY, of West Yale.
HAYWARD, of Esquimalt, and
RALPH SMITH, of Nanaimo, might also be classed as an adherent of the Provincial Party.

The following named were elected as Martinites:

MARTIN, of Vancouver.
GILMOUR, of Vancouver.
BROWN, of New Westminister.
OLIVER, of Delta.
McINNES, of North Nanaimo.
STABLES, of Cassiar.
CURTIS, of Rossland.
SMITH, of Southeast Kootenay.

The following named were elected as Turnerites.

TURNER, of Victoria.
HELMECKEN, of Victoria.
HALL, of Victoria.
McPHILLIPS, of Victoria.
POOLEY, of Esquimalt.
EBERTS, os South Victoria.
BOOTH, of North Victoria.
DUNSMUIR, of North Nanaimo.

and the following named might also be classed as Turnerites.

HUNTER, of Cariboo.
SMITH, of West Lillooet,
MOUNCE of comox.
DICKIE, of Cowichan.
CLIFFORD, of Cassiar.

The Wilson Conservatives elected were:

TATLOW, of Vancouver.
GARDEN, of Vancouver.
McBRIDE, of Dewdney.
FULTON, of North Yale.
ELLISON, of East Yale.
ROGERS, of Cariboo.
TAYLOR, of Revelstoke.

DIED

TRELEAVEN—At Fernie, B. C., on Saturday, December 6th, 1902, Ethel Treleaven, aged 25 years.

TO-DAY'S DESPATCHES.

The Canadian Pacific Railway to-day increased the pay of all its conductors and trainmen on its lines east of Fort William by an average of 12 1 2 per cent. The increase adds $2,500,000 per annum to the company's pay roll.

Toronto, Dec. 5.—The latest returns in the referendum vote give 101,033 for and 60,469 against the Liquor Act. It required 212,723 votes to put the act in force.

Scranton, Dec. 5—The lawyers for the mine workers continued to call witnesses today before the strike commission to testify to the alleged blacklisting methods pursued by several coal companies on refusing to re-employ strikers who took a more or less prominent part in the affairs of the mine workers' union during the recent trouble. All of them said they had been employed before the strike but were refused their old positions after the strike was ended. In most cases according to the testimony no satisfactory reason was given why they were not taken back. Two blind men who were otherwise badly injured by underground explosions were presented as living examples of the dangers of the mines. When the commission adjourned for the day Rev. J. Curran, the Roman Catholic clergyman of Wilkesbarre, who took a prominent part in the miners' cause during the recent strike, was on the witness stand. Only one session will be held tomorrow, adjournment to be taken at 10 o'clock. Nothing could be learned here today with reference to the reported efforts at a settlement outside the Commission.

FRED JOHNSON BANQUETTED.

The Fernie Club entertained a large number of the young men of the town on Wednesday evening of this week, upon the occasion of a banquet given to Mr Fred Johnson upon the eve of his departure for Pittsburg, Penn. Fred has resided in Fernie for over two years and a half and has made scores of friends among those with whom he came in contact, and his fellow club members thought the very least that they could do would be to give him a grand send-off.

The feast prepared by Chas Estez, the steward of the club, certainly did him honor as a first class caterer.

After everyone had done justice to the abundant supply of good things the remainder of the evening was devoted to a programme of toasts, songs and stories. Harry Bentley, the prince of story-tellers, occupied the chair and during the intervals between the regular toasts kept those present in the best of humor. Following is the toast list for the evening:

"The King," responded to by the National Anthem.

"Canada," by A. H. Cree

"Our Mining Interests," by C. M. Henretta and H. A. Kanouse.

"Our Guest," by J. S. T. Alexander and Jas. McLean.

"The Ladies" by M. Kastner and D. Walmsly.

"The Press," by J. R. Wallace.

Messrs. R. Coulthard, C. Clowers, J. S. T. Alexander and J. Lorsch rendered several vocal selections and Messrs. McLeod, and Blundell, kept up their end of the program by relating humorous stories. The vocal selection by Mr. Coulthard entitled "Work" will long be remembered by those who had the pleasure of being present.

SILVER-LEAD AND ZINC MINING.

The Fort Steele Board of Trade assisted by a large number of outside mining men at a meeting in that town on Dec. 1st, discussed how these industries could best be improved and encouraged. The result of the meeting shows clearly that the mine owners of South East Kootenay realize the necessity of Dominion legislation in assistiug silver lead and zinc mining.

Resolutions were drawn up and forwarded to Mr. Galliher, M. P., to assist him in pressing for legislation along these lines. The resolutions embody four points, a government expert to examine into every detail of these industries; a bonus of $7.50 for every ton of metallic lead and zinc mined; an increase of duty on lead and zinc and the removal of duty on mining machinery and powder.

There will probably be no Kootenay-Boundary Hockey League this year, Rossland having decided not to take hold on account of the expense.

COAL COMPANY'S NEW STOCK

The directors of the Crow's Nest Coal Company have issued to shareholders a circular announcing terms of the new issue of stock. There will be issued $1,000,000 of stock at 250 to shareholders of record of November 19th. The allotment will be in the proportion of one share of new stock to 2½ of old. The shares are of a par value of $25, and will be issued at $62.50, from which will be realized $2,500,000, to be used for development and improvements. This issue will be 40,000 shares, and will exhaust the additional 60,000 shares for which supplementary letters patent were secured some time ago and will bring the capital stock issued up to $3,500,000. Shareholders have up to December 10th, to subscribe, and payments will be in ten monthly payments of $6.25, beginning January 12th, 1903.

MAIL AND TRAIN SERVICE.

Week after week THE FREE PRESS has called the attention of the public to the wretched condition of the train service on the Crow's Nest Branch.

Not one morning in a dozen is the express on time and if it is more than two hours late the mail is sure to be left at Medicine Hat as that is a certain sign that the trains did not connect. Thus it will be seen that the fault does not lie wholly with the branch line.

Several explanations may account for this backward state of affairs. It is said that the unprecedented amount of freight being moved on the prairie handicaps the passenger traffic, and defective track and weak engines also are said to have their share in causing the present wretched conditions.

With the causes we have nothing to do. We do know that the service is thoroughly incapable and unsatisfactory and we as surely know that the C. P. R. is under heavy moral and legal obligations to give us a first-class up-to-date service.

Here is a good opportunity for Postmaster Mulock and Railway Minister Blair to get their heads together. Both departments are responsible inasmuch as both passenger and mail transportation is affected. The people of the Crow are a long suffering people but there is a limit beyond which even we cannot go.

There being no further danger from diphtheria children should resume their studies at once.

STILL ANOTHER COAL COMPANY.

The Boundary Coal Mines, Ltd., is the name of a new corporation being formed to take up and develop four coal claims at the headwaters of the North Fork of Kettle river. P. F. Goldenwrath is promoting the enterprise. The company will have $1,200,000 capital in one dollar shares, and the properties to be worked are favorably spoken of.—Pheonix Pioneer.

Mr. and Mrs. Liphardt entertained a number of friends at a whist party on Tuesday evening.

Mr. Elias Rogers, managing director of the Crow's Nest Pass Coal Co., paid a hurried visit to Fernie this week on business connected with his Company. Miss Rogers who came with him is remaining here for a time, a guest of Mrs. J. H. Tonkin.

NORMAN IN FLAMES

ENTIRE TOWN IN DANGER.

Steamers Burned—Rat Portage Lumber Co. Will Lose 25,000,000 Feet of Lumber—Rat Portage Fire Brigade Unable to Cope With the Flames.

Rat Portage, Nov. 28.—The worst fire that has visited the community for a long time broke out at about 4 o'clock this morning at the lumber yards of No. 4 mill at Norman, belonging to the Rat Portage Lumber company.

There is in the neighborhood of 25,000,000 feet of lumber in the yard and at the present time more than one-half is destroyed, with every probability that the whole will be consumed unless help arrives from some quarter.

It is reported that telegraphic messages were sent to Winnipeg asking for help, but up to the present none has arrived.

The appliances to hand here are altogether too inadequate to cope with the conflagration. In addition to the lumber being burned there are eleven dwelling houses, one stable and six steamers with two barges totally consumed.

FIRE STARTS AT 3.30 A. M.

The alarm was sent in about 3.30 o'clock, and Capt. Kendall, owner of the steamers Clipper and Rambler, set out for the scene of the fire and arrived at the slip where the Clipper was being made ready to be hauled up for the winter. Fortunately she was in the water and steam was gotten up as quickly as possible, when they set out for Rat Portage to take the steamer over on a barge.

In the meantime the fire had extended to the slip, on which were the steamers Phantom, Kenina Pearl, Spray, Midge and Day Star.

The Presbyterian mission boat, the Sampler, was on the slip and was burning when the Clipper arrived with the engine. They immediately made fast to the slip and pulled the whole thing into the water. The wheel house was on fire and otherwise badly burned, but it can be made good as ever.

Mr. Lemay, who owns the slip, had his house and effects, together with all appliances for hauling boats on the ways, totally destroyed.

Another house close beside was also razed to the ground.

The fire then spread to the residential part of the town and consumed three empty houses, owned formerly by J. B. Davies; a dwelling occupied by Laverie, another by Eastabrook, another by Ernest Lehereux.

NORMAN HOTEL SAVED.

The Norman hotel formed a barrier for the flames for a time, and was saved after some heroic efforts on the part of the workmen.

The flames shot past the corner of the hotel and ignited another empty dwelling owned by J. B. Davies, which was totally consumed.

A large red hot cinder blew over a quarter of a mile on the Keewatin road and went in through an open bed room window of a dwelling owned by Louis DeMarais, and before the inmates were aware of it the house was a mass of flames. It was totally destroyed.

A stable owned by Mr. Bilodeau, about the same distance away, was ignited in the same manner and destroyed.

The insurance as far as can be ascertained is from $8 to $10 per thousand on the lumber. On the dwelling occupied by Eastabrook, owned by Snider, there is $600 insurance in the London and Lancaster; Louis DeMarais $1,100 in the Union and Alliance.

Unless the wind changes the mill and planer will be saved.

A terriffic gale is blowing about 35 miles an hour, and has been blowing that hard from the commencement of the fire.

The origin of the fire is supposed to have been a spark from the planer igniting a pile of dry cedar.

ANOTHER ACCOUNT.

Rat Portage, Nov. 28.—The most disastrous conflagration that has ever visited this district for years started about 3.30 this morning in the Rat Portage Lumber company lumber yard No. 4, Norman, and has been raging now for nine hours aided by a stiff wind from the southeast. The fire started from a spark being thrown into a pile of cedar behind the planing mill and being fanned by the wind soon got into the lumber piles, and beyond the control of the fire appliances. Lemay's house and shipyard is a total loss and is insured in the Hartford Insurance company.

The other buildings consumed were, L. Demarais, loss $2,000; J. H. Snider (occupied by J. E. Easterbrook), loss $1,000; E. L. Heureux, $700; S. Lavarys, $200. The balance were vacant houses and the insurance small. The lumber company's insurance is said to be from $8,000 to $10,000.

RESEMBLES HULL FIRE.

From present appearances it would remind one of the Hull fire. A roaring mass of flame shooting skyward and across streets, licking up everything in its way.

At present writing 25,000,000 feet of lumber have gone up in smoke, as well as Lemay's shipyard and six steamers, two barges, eleven dwellings and one stable. The steamer Rambler was hauled up on the slip for the winter and would have been burned had not Capt. Kendall hitched a line to her propeller and with her sister boat, the Clipper, pulled her back into the water with cabin burning, which was soon extinguished with the Clipper's hose.

STEAMERS BURNED.

The boats burned were the Day Star, belonging to the Presbyterian Indian mission, valued at $500, Phantom, owned by Capt. Lewis, valued at $2,000; Kenina, owned by L. R. Mackey, valued at $2,000; Spray, owned by R. Knight, valued at $1,000; Pearl, owned by Gardiner & Co., valued at $700; Midge, owned by Dominion Fish Co., valued at $500. There is no insurance on the steamboats.

Women and children hurring away to places of safety, dray loads of household goods going in every direction and a half dazed multitude of men endeavoring to head off the devouring elements, which is now backing up towards the residence portion of the town and mill buildings. More fire appliances are being sent over on a barge from here and if the wind does not change it is expected to prevent it from spreading.

NEWS IN THE CITY.

Among the first to bring the news of the big fire to Winnipeg was Mr. E. S. Nixon, of the C.P.R. ticket office at Norman. Mr. Nixon left Norman at 8.30 this morning, and at that time the fire, which atarted at 3.30 g.m., was at its height. The people of the town, Mr. Nixon says, are frantic at the terrible onslaught of the flames, which overpowers every effort of the small force of firemen obtainable.

Every man from Rat Portage and Keewatin was on the scene early this morning. The appliances, in the face of the start the flames had got and the material burning, are totally inadequate. The burning lumber makes the heat so great that it is impossible to attempt to stay the flames to windward of them.

The lumber yard is piled with sawn lumber, which is spread over a vast area, as all the summer cut is there.

When Mr. Nixon left the mill was not damaged, though the gravest fears are felt that the wind might veer around. In this event the mill could not be saved.

The man with fringed trousers walked into the swell cafe and said: "Gimme a white-apron cocktail!" The bartender was a little surprised, but not defeated.

"Tell me what to put in it and I'll mix you one."

The stranger named a few choice brands and after it was placed before him he drank it down.

"But why do you call it a 'white-apron' cocktail?" asked the puzzled drink-mixer.

"Because it is on the bartender!" And then the man in the fringed trousers drifted out like an aspen leaf on a November gale.—Chicago News.

James Douglas, a laborer, despondent over his poverty, cut his throat, his body being found in the creek at Procton Station. He leaves a widow 19 years of age and two children, the eldest of whom is 2 years, and the youngest of whom is but six days old.

Biggs—I understand that you lost money on that chicken-raising experiment of yours. Boggs—Yes, I did; but I expect to get it back again. I'm writing a book on how to raise chickens.

"Is this, then, to be the end of our romance?" he said. "No," she answered. "My lawyer will call on you in the morning. I have a bushel and a half of your letters."

Doctor—Your temparature is up to 107. Auctioneer (drowsily)—Hundred an' seven! Hundred an' seven! Going, going at hundred an' seven! Who'll make it a hundred an' eight?

An open winter has been predicted by the Indians. They give as their reason that as yet the bears have not gone into their winter homes, and this is a good criterion of mild weather.

Some musical composers are like men without credit. They can't get any one to take their notes.

FT. WILLIAM MURDER

WAS BEATEN TO DEATH.

Seven Suspects Arrested in the Foreign District, Charged with a Brutal Assault on a Polander—Marks of a Terrible Struggle in the Snow.

Thursday morning about 1.30 a foreigner went into the freight sheds and informed the man that there was a fight on near one of the shacks in the foreign end of the town. The workman did not pay any attention to his story as there is generally a fight in progress among the foreign element in that district. To-day seven Galicians are in custody as suspects of the murder of Steven Roebak, a Russian Polander.

It appears, as near as can be learned from the foreigners, that seven Galicians are supposed to have beat the man with clubs, pieces of iron, or anything that was within reach, with the result that the Russian was most unmercifully beaten and so cut about the head that he died Thursday at 12.40 from the wounds received at the Galicians' hands. Although the man was left to his doom at 3 o'clock, he was not removed to his shack until about 5 o'clock in the morning.

Around about within eighty feet of the line of the shack is blood on the snow where the victim was followed by his assailants, and directly in front of his shack in the ditch, where the man was no doubt, brutally assaulted, there is a pool of blood in the hard snow and ice. The man was powerful and strong, and he must have fought gamely for life, only to be knocked down time and again, as the marks of his life's struggles in the snow show.

Chief Campbell was informed on Thursday morning of the fight, and investigated the spot. He sent for Dr. Birdsall, and the latter found the man lying on a bed of old straw, literally covered with blood, his ear cut off and nose broken, while back of his ear was a deep wound. A cut was noticed across the neck and chin, a deep cut across his forehead and his eyes were laid open. The back of his head was cut and slashed and the doctor thinks they must have used a piece of iron to do the deadly execution. The doctor couldn't get any of the neighbors to help him. They all appeared to be afraid. Finally a woman got him some warm water and he washed the man's wounds and dressed them. He stopped with the man until he died at 12.30, noon.

Constables Dodds and O'Brien were informed by a companion of the murdered man who the Galicians were, and the following are the names of the men arrested: Dontyre Koyneyka, Styenko Pauluck, Michal Koyroucgka, Jakia Fyter, Nikolog Parancuik, Joan Koluk and Michal Pytrowoy. An inquest was held on Thursday evening by Coroner Hamilton.

Shelled Five Villages.

According to advices received from Sydney by the steamer Aorangi, H. M. S. Sparrow has returned from a protracted cruise through the South Sea groups. During her cruise the warship's officers annexed Suwarrow Ysabel and Choiseul Islands for Great Britain.

At Malieta Islands five villages of the natives were shelled to punish the islanders for having killed a Fijian woman because she embraced Christianity.

With a view to impressing the natives with the seriousness of the crime committed by them, and of warning them against a recurrence of such acts, the Sparrow visited five places in the Island of Malieta, namely, Auki, Sio, Uras, Kwi and Port Diamond and at each place the villages were shelled and partially destroyed.

Chinese Buried at Sea.

The steamer Ventnor, which recently took lumber from Victoria to the Orient, has foundered near Hokianga, near New Zealand, when bound from Wellington to Hong Kong, with 5,347 tons of coal and 500 coffins containing the remains of Chinese for re-interment in China.

The Aorangi brings news that on Oct. 28 she struck the rocks southwest of Mount Egmont, and being floated, continued her voyage. Next day she began to fill, and soon she became unmanageable, and started to sink slowly. All hands took to the boats, and had barely time to get clear before the steamer sank. One of the boats, containing the captain, third officer and eleven of the crew, failed to reach shore. Those in the other boats which made the land say the missing boat was drawn down when the steamer foundered.

Tenspot—"You should have seen the pair Harker held last night."

Tray—"I thought he had given up poker since his marriage."

Tenspot—"He has. He was holding his twins."

Spontaneous combustion is sometimes due to an accumulation of insurance policies.

MURDEROUS ROBBERS

GANG OF SAFE-BLOWERS.

C. E. Osborne, of Warren, Mich., Killed Attempting to Catch Burglars—Boy Released Who Sent Immoral Literature Through the Mails.

Clint E. Osborne, assistant postmaster and proprietor of the general store at Warren, Mich., was shot dead early on Wednesday by one of a gang of robbers who had entered the Warren bank and blew open the safe.

There were three or four men in the gang. About 2.30 o'clock they drove into town and broke into the bank. They drilled the safe and inserted a large charge of nitro-glycerine in the hole. The explosion aroused Osborne, who telephoned to one of the neighbors that he thought burglars were at work in either the bank or post office. All the telephones in the village are connected at night and it is thought that the cracksmen heard the bell on the bank 'phone ring and listened to Osborne's conversation.

Osborne then started down the street and had not gone but a short distance when one of the robbers acting as outside guard shot him in the face with a charge of buckshot, killing him instantly.

Then without securing anything from the safe the robbers rushed from the bank to where they had tied a team of horses. They drove rapidly away and no trace of them has since been discovered.

Frank J. Tilley, dairy superintendent, and Harvey Mitchell, both of New Brunswick, have entered into a five years' contract to go to South Africa to instruct farmers in dairying methods, and to supervise the establishment of butter and cheese factories. It is understood that Saxby Blair, of the Nappan agricultural farm, has made a similar engagement.

The body of Wm. Brown, a carpenter, was found Wednesday morning lying on the rails at the platform of St. Thomas station. It is thought he crawled under the train to make some repairs and the wheels passed over him. He leaves a widow, one son and a daughter.

The Regina town council is at last considering means of lighting the town and at the last meeting of the town council it was decided to try the Hydes carbon gasoline system on a small scale to ascertain if it is suitable.

The department of justice has recommended that J. B. Hoch, who was sent down by Col. Denison, Toronto, for sending immoral literature through the mails, be released at once. It has since the boy was sentenced been discovered that he was practically innocent, and was merely made the tool of others. Col. Denison recommended the release, and the department of justice sent an order for the release on Wednesday. The lad comes from Berlin and is of very respectable people.

In 1899 Prof. Robertson inaugurated a plan for the improvement of crops by the systematic selection of seed grain on farms throughout Canada. A competition extending over three years was carried on by over five hundred boys and girls. Ten thousand dollars of the Macdonald fund was devoted to prizes. The new practice of having a special plot on the farm for the growing of seed grain, from seed systematically bred up by the selection of seed from the most vigorous and productive in each year's crop, bids fair to become a permanent and most valuable feature of Canadian farming. A further organization of means and agencies for advancing that movement is the next big thing on his programme.

Acting on a telegram, Chief Constable Ruse met the noon express from the east at Cobourg and arrested Thomas Farsides and Mary Ethel Sager. On the same train was Geo. J. Sager, husband of the woman, upon whose information the couple were arrested. Sager charges his wife with the theft of $40. The parties live in Deseronto.

A representative of a Winnipeg fruit house has returned from a three weeks' visit to the orchards of Ontario, where he was inspecting the packing of apples. It is his opinion that the west this year is getting the best quality of apples in the history of the trade, and this is largely due to the operation of the Fruit Marks act. Packers will not take any chances in packing apples in a barrel inferior to the mark on the outside, and were it not that the crop is generally affected with a small scale the brand sent west would be equal to anything ever marketed. When packers went into an orchard the culls were fully 65 per cent. and he had seen packers driven from an orchard by enraged farmers, owing to the large percentage of culls set aside by the buyers as unacceptable.

Silence is golden. Large fortunes have been made from stills.

FERNIE FREE PRESS.

FERNIE, B.C.

"Did you see any sharks when you crossed the ocean, Mr. Spifkins?" asked Miss Purling.

"Yes, I played cards with a couple."

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed for ever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

VIRGINIA SWALLOWWORT.

Its Beautiful Blossoms Are Pitfalls For Bees and Bugs.

Honey bees and insects and bugs of less degree find pitfalls and often death in the beautiful blossoms of the milkweed, otherwise known as the Virginia swallowwort. If these flowers are examined any sunny day, one will be pretty sure to find them decorated with a miscellaneous assortment of struggling or dead insects with their legs fast in the slits of the peculiar blossoms. The pollen of this common plant, instead of being a powder, as in the case of most plants, consists of sticky, waxen masses hidden within the blossom. When a visiting insect thrusts a proboscis or leg into the opening of such a flower, some of these masses stick to it, and the natural course is for the insect to flay off to another flower and fertilize this with the adhering pollen. All insects, however, are not strong enough to extricate their legs from the sticky places, and then ensues the slow torture of hanging there until death or a helping hand releases them from misery. Besides being beautiful, it could be quite a useful plant if we cared to develop its virtues. Thus its milky juice contains caoutchouc. Brown sugar has been made from the flowers. The silky hairs of the seeds are serviceable in the manufacture of textile fabrics, as cotton is, and a fiber of good quality for ropemaking may be extracted from the stalk.

The London Silly Season.

"Always at the beginning of August," says Sydney Brooks, "the editor of each London daily casts about for a subject that will 'fetch' the great British public and fill the correspondence column, such as 'Is Marriage a Failure?' 'The Decay of Domesticity,' 'English Versus American Women,' 'Why Don't Young Men Marry?' 'Should Women Work?' or 'Are We Improvident?' A member of the paper's staff will write a letter to the editor opening the ball. Another member will reply to him. Instantly from Clapham and Brixton and throbbing provincial households there sets in a steady stream of letters—all genuine and argumentative and for the most part quite appallingly earnest. It is a most curious phenomenon, such, I suppose, as no other country can show. For thousands of men and women these annual discussions would seem to be their one chance of really opening their hearts and minds to the world, and a very strange spectacle they make when opened, the minds especially. No one who really wanted to study England could ignore these debates. They throw more than a little light on the English character and the average English intelligence."

Chinese Etiquette.

The polite Chinaman will always refer to himself in deprecatory terms. This trait of Chinese etiquette is aptly expressed in one of their own tales, in which a visitor is represented as calling in his best clothes and seated in the reception room awaiting the arrival of his host. A rat that had been prying in a jar of oil on a rafter above, frightened at the intrusion of the caller, ran away and in so doing upset the oil jar, which fell on the visitor, saturating his elegant robes with oil. Just as the face of the guest was purple with rage the host entered, when the proper salutations were performed, after which the guest proceeded to explain the situation, "As I entered your honorable apartment and seated myself under your honorable beam I inadvertently terrified your honorable rat, which fled and upset your honorable oil jar upon my insignificant person, which is the reason of my contemptible appearance in your honorable presence."

Unjustly Punished.

A friend of mine returning to camp after a day's shooting, says a writer in Navy and Army, suddenly came in sight of a big she bear with two cubs following in single file proceeding along a ridge, the forms of the three being sharply silhouetted against the sky. It was a very long shot, but he determined to try it, so drew a bead on the old she bear and fired. The result was curious. The procession stopped, the she bear scratched herself hastily, then turned around and, regarding the cub immediately behind with grave disapproval, boxed its ears soundly and then went trundling on along the ridge, evidently under the impression that her frolicsome offspring had been up to some unusually objectionable tricks.

Satirical.

"Did you know," said the young man who tried to pose as a handy volume of information, "that there was a time when it was considered a crime for a man to kiss his wife on Sunday?"

"Indeed!" rejoined Miss Cayenne. "And now there are a number of instances in which it would probably be looked on more as a penance."

The Stopover No Trouble.

Hennepeck—Do our tickets allow us to stop over?

Mrs. Hennepeck—You can stop over anywhere you like. The trouble will all come when you get on the next train to continue the trip with the same old ticket.

AN AWFUL MISTAKE.

Physician Prescribes Nuxvomica for a Kingston Lady with the Result that She is Paralyzed.

A Thrilling Experience Resulting from a Doctor's Blunder—Fortunately She Recovered and tells the Story of the whole Incident.

Kingston, Ont., Nov. 30th (Special).—That Mrs. E. Lake, of 112 Clarence street, this city, is alive to-day, is a matter for wonder. She says:—

"My sickness was brought about by overdose of Strychnine prescribed by a physician. It brought on Paralysis affecting my left side, brain, arm and limbs.

"I was perfectly helpless and it was impossible for me to raise my left limb or open my fingers. I got no sleep and often when I dosed my eyes remained open. I had not the power to close my eyelids.

"I suffered almost continually with headache.

"My brain felt as though it was too large for the skull. My appetite failed and I became very emaciated, indeed, I was nothing but skin and bones.

"I was three years under treatment, many physicians having me under their care, but without avail. At last I became discouraged and gave up all treatment.

"While reading a paper one day I noticed a testimony of one who was cured by Dodd's Kidney Pills.

"My sister procured me a box of the pills and I started on three pills three times a day. I soon began to experience a change for the better, which continued until I regained the use of my arm, hand and limb. My headache also ceased and my appetite returned.

"From this I soon picked up flesh and strength until I was as well as ever.

"I thank God and Dodd's Kidney Pills for my health for by prayer and this wonderful remedy, I was cured, and have remained in good health ever since, although this was over five years ago."

Kicking a man when he is down is one way to make him get up—but it isn't always safe to do it.

There are so many cough cures on the market, that it is sometimes difficult to tell which to buy; but if we had a cough a cold or any affliction of the throat or lungs, we would try Bickle's Anti-Consumptive Syrup. Those who have tried it think it is far ahead of all other preparations recommended for such complaints. The little folks like it as it is as pleasant as syrup.

The first day that a girl gets her new pictures home from the photographer's she doesn't do anything but look at them, and wonder if they are "good."

In addition to his age, an old man becomes fearfully lonesome.

Lifebuoy Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases.

Gossip never dies; people are still gossipping about Lord his wife, although they never lived in this country, and have been dead a great many years.

They are a never-failing remedy for all Rheumatic troubles.

TERMS—$15 to $18 per week, according to residence in Hotel or Villas.

A few years ago Blue Ribbon Ceylon Tea was unknown, today it is a household word. Why?

Fine feathers are apt to make short lived birds.

A woman never knows what it is to love until she has a daughter over fifteen years old.

WAKE UP BABY!

A New Game for Mothers.

Baby's awakening ought to be looked forward to as a pleasure, not dreaded as a scourge. He should awaken bright, merry, and full of fun, refreshed by sleep, ready for a good time.

How many mothers dread his awakening howls, knowing that he will keep everyone miserable until he goes to sleep again or gets his food. These crying fits are the terror of every inexperienced mother. Mrs. Gabriel Barnes, Six Mile Lake, Ont., is a mother who has learned how this trouble can be best met, and writes us as follows: "My baby suffered much from indigestion, and was cross and restless. I gave him several medicines, but they did not help him. I then got a box of Baby's Own Tablets and they helped him almost at once, and have done him so much good that I would not now be without them. I can recommend Baby's Own Tablets to all mothers as the best medicine I have ever used for children." These Tablets are guaranteed to contain no opiate or harmful drug and can be given with absolute safety to the youngest, weakest infant. Sold by all druggists or sent by mail, post paid, at 25 cents a box by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N.Y.

Active service saves many a man from foolish fears and speculations.

Mrs. Celeste Coon, Syracuse, N. Y., writes: "For years I could not eat many kinds of food without producing a burning, excruciating pain in my stomach I took Parmelee's Pills according to kirections under the head of 'Dyspepsia or Indigestion.' One box entirely cured me. I can now eat anything I choose, without distressing me in the least." These Pills do not cause pain or griping, and should be used when a cathartic is required.

The sugar on satan's pills may be very sweet, but it is very thin.

Are your corns harder to remove than those that others have had? Have they not had the same kind? Have they not been cured by Holloway's Corn Cure? Try a bottle.

When religion ceases to go to service it will run to superstition.

SAYS MR. LUCINA CIGAR:—

"What a terrible case of cigar murder! How pleasant it is to look like me and also have that nice sweet flavor and lovely aroma."

"DROPPING THE PILOT."

Tenniel's famous cartoon pourtraying the departure of Bismark from the German ship of state must have been recalled to many minds when it was announced that the Globe had dropped Mr. Willison True he resigned the highest position in the gift of Canadian journalism but for that very reason it cannot be pretended that he would have done it unless he had been pratically compelled. There are at least two points of difference in these otherwise parallel instances, In the case of the great German Chancellor a young man was administering the "coup de grace" to an old one, in the present instance the position is reversed The sequel also is likely to be entirely different for whereas the old Chancellor has seen his day and was too far gone to enter on a second period of activity and success the discarded pilot of the Globe is young with the hot blood and fierce determination of ambition in his veins, with a policy to vindicate and an object to attain and he will come very near doing both. The Montreal Herald in a leader on the situation characterizes Mr. Willison as a "Great Editor" and then goes on to compare him favorably with George Brown and E. L. Godkin. This is unkind and no one will be quicker to realize it than the subject of the comparison. Under the controlling policy of the Globe for the last five years neither of the men would have been willing to retain the position of Editor for five minutes. If to make a paper a commercial success is to be a "great editor" then the greatest editor in the world is Pulitzer, of New York, but if to stand firm on well known and recognized principles immemorially identified with one's paper—to be consistent in advocating the policy which the paper has once made its own and to fight every enemy of those principles and of that policy to the last ditch and if need he die there rather than surrender—if these be the marks of a great editor then it was unkind of the Herald to compare the ex-editor of the Globe with men who by universal consent would have done all this and done it cheerfully.

That during Mr. Willison's editorship the Globe has been rescued from the financial chaos in which he found it must be admitted but it is doubtful if the president would not claim more than the lions share of the credit. On the other hand the Globe has long ceased to be the fearless, independent, reform journal to which every true grit in Canada looked for guidance in the days of Geo. Brown. Public opinion by universal consent conceded him a statue in the courtyard of Toronto, in this respect history is hardly likely to repeat itself. The truth is that circumstances have been too strong both for the Globe and its late editor. He has had to see the journal which was the pride of the independent liberal and the foe of corruption defend gigantic monopolies, enormous subsidies and immoral tactics. It has had to swallow the "machine" and the "jerrymander" and to support the advancement to high places in the party of men of known dishonesty and unscrupulousness. Against this a truly "Great Editor" would have protested long ago and have resigned promptly if resisted. It takes men like Frederic Greenwood and Alfred Fletcher to do this and they are great.

Still Mr. Willison is an able man and as we have already said he can yet do great work—that is if he can shake off that "last infirmity of noble minds" which afflicted his great proto-type—the letting "I dare not wait upon I would." In this respect he resembles Hamlet as does Lord Rosebery. It is ever, "to be or not to be." Let us hope that by his recent decisive action he has cut the Gordian knot and launched on a career of noble independence.

There could he no better augury for his future success than that he has secured the co-operation of Mr. J. W. Flavelle—a man of the highest character and aims, and one who in common with himself has suffered severely from his connection with the same crowd. With such assistance Mr. Willison may yet do much to combat that corruption in public life which is the bane of our country and at the end perhaps come very near deserving the Herald's epitaph a "Great Editor."

C. M. Henrietta returned on Wednesday from a trip to the coast.

Miss Andrews, who has been visiting friends in town during the last week leaves for the east on to-night's express.

The Methodist Church at Morrissey was opened on Sunday, Rev. S. J. Thomson, of Cranbrook preached the sermon. On the following evening a grand opening concert was given which proved a success in every sense.

The Indians are bringing in a great number of deer. Most of them are got in the direction of Elko. The great depth of snow in the mountains make it easy, with the aid of snowshoes, to secure the deer.

The Quadrille Club gave a regular ball on Thursday evening. Those who were there report that it was the most successful yet given. A larger crowd attended and if possible the music was superior to that of former occasions. This popular form of amusement is filling a much felt want. The management wish us to announce that any complaints should be made to Mr. Heath, the floor-manager Also, that owing to heavy expenditures they have been obliged to raise the fee from 75 cents to one dollar.

The snow is steadily increasing. Every day adds a liberal coating of the beautiful and as the whole steadily settles it is difficult to guage the snowfall for the season. Many beautiful and striking effects are produced by this thick covering. The law of gravitation has been uninfluenced by a breath of wind and as each flake remains exactly where it gently lights, every surface is deeply capped with white. Trees are literally filled with snow and the whole landscape presents a typical Christmas appearance.

The Mountain Lumber and Manufacturers' Association held a special meeting in Cranbrook on Monday. A large number of mills were represented. Those who represented this district were A. McDougal and T. H. Proctor, of the Fernie Lumber Co.; A. J. Mott, of the D. V. Mott, Son & Co; and A. D. McRae, of the McRae Lumber Co., of Coal Creek. In the evening a banquet was tendered the visitors by the local lumber men and a very happy time was spent,

Mr. McEvoy and Mr. Tonkin, of the Crow's Nest Pass Coal Co., have been compelled to postpone their intended trip to the Nicola basin. Mr. McEvoy was recently called to Toronto on special business. It is not yet fully decided that these gentlemen will not come to the valley this year, much depending on the circumstances. Should they not come before the end of the present year, they will not visit the valley until spring. They will make an extensive examination of the coal conditions in the Nicola basin.—Kamloops Sentinel.

Mr. Elias Rogers in an interview at the coast announced that fully one million dollars is being spent this year out of capital account in the development of the company's British Columbia colliery properties, the intention being to maintain their absolute safety by continued insistance upon the most improved mining methods throughout. It is significant of the company's devotion to the material interests of British Columbia, that they many months ago, entered into a contract with the representative smelters in the Kootenay to furnish coke to them in unlimited quantities at a rate of $4, which rate is still in force, although it does not allow any margin of profit to the company.

Notices hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal and petroleum on the following described lands situate about two miles south of the C.P.R depot, Morrissey, B.C., East Kootenay district, on west side of Elk River, commencing at a post marked Mrs. H. A. Senkbeil's southwest corner, thence north 80 chains, thence east 80 chains thence south 80 chains, thence west 80 chains to place of commencement.

MRS. H. A. SENKBEIL,
Daniel McKenzie, agent.

A. C. Liphardt.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

Furnished house to rent—apply to F. J. Watson.

The town of Frank is to have a first-class electric light plant.

Dr. Willson, C. H. Levers and Mr. Woods were down from Morrissey this week.

Mr. Digby informs us that he will open the rink for skating on Monday evening. The ice will be first-class.

The new C. P. R. depot at Morrissey is under way. It will be 80 x 26 and the foundation alone will require 22 car loads of stone.

Nurse McDonald arrived in Fernie last Sunday to take charge of the Fernie hospital. She is a graduate of the Winnipeg general hospital.

"The Round Up," a new weekly publication will be issued from Pincher Creek within a few days with Herbert Lake in the editorial chair.

Robert Belshaw, of Michel, B. C., was killed on Tuesday by a fall of coal in one of the rooms of the Frank coal mines. He leaves a wife and large family.

Rev. D. L. Gordon was down to Michel this week for a couple of days and it is said that while there he made a couple happy by performing the marriage rites.

P. C. Elliott, brother-in-law of C. W. Sheppard, came in from Leduc on Friday. Mr. Elliott will occupy the position of clerk in Sheppard & Elliot's hardware store

A. Halloway who was arrested in Morrissey for altering his bank book and passing valueless checks, was up before Magistrate Armstrong and received a sentence of two months.

Blairmore has been given the go-by by the C. P. R., the station at this point is now designated on the time table as a flag station. Indignation meetings are being held in consequence.

Dentistry

Dr. Barber can now be found at his office in the Hill Block from 8 a. m. until 8 p. m. He has installed a system of incandescent lights which enables him to do dental work in the evenings. x

Mr. Richard Joyce, of Kimberley, is in Fernie and will shortly start up housekeeping here. The Joyce Bros. are disposing of their business in Kimberley and will devote more attention to their Fernie store.

A miner by the name of John Simon was brought to the hospital from Morrissey on Sunday with a broken and dislocated foot. It appears that the foot was crushed by a falling rock. It is feared that gangrene has set in and that the foot may have to be amputated.

Nurse MacDonald, of Winnipeg, who has been on the Vancouver Hospital staff for some time, is now in town, the guest of Miss Matheson. Miss MacDonald leaves tonight for Fernie, B.C., to take charge of the hospital.—Kamloops Sentinel.

A grand bazaar under the auspices of the Ladies' Guilds of Christ Church, will be held on Thursday, Dec. 11th, in Princess Hall, in the afternoon and evening commencing at 2:30. A choice collection of useful and fancy articles for sale, home made candy, fish pond and refreshment of the best quality.

Mrs. Wesley Cline, of Moyie, scalded herself severely last Saturday at the Australian Hotel, Morrissey, While lifting a can of hot water from the range she slipped and fell, emptying the contents over her shoulder and back. Dr. Willson attended the lady and on Wednesday she was taken to her home.

Get out and clear your sidewalks of snow. Don't wait until it gets tramped as hard as adamant. A little muscular effort with a shovel would save much discomfort and inconvenience. "Cow paths" are not satisfactory in the outlying districts, the paths need to be wide in order to protect sweeping skirts.

Mr. W. Blakemore returned to town on Thursday evening from a trip through the west. He went as far as Princeton and on his way back called at Trout Creek on the Okanagan Lake where some Fernie boys under John McPhail are prospecting for coal. He found the camp well and happy and brought good wills for the Fernie friends. Mr Blakemore goes east next week.

Mrs. H. J. Johnson gave a party last evening in honor of Miss Andrews who is departing for the east. A large number of friends were present, and the commodious new house was taxed to its utmost. A most enjoyable evening was spent by everybody. After progressive pedro, refreshments were served and this was followed by a couple of hours of dancing. The efforts of host and hostess to give all a pleasant time were highly appreciated by the guests.

G. O. Foss, of Morrissey. was up this week.

Dominion Express orders are now written or cashed at F. J. Watson's.

Miss Mott entertained a number of friends on Wednesday evening.

Dr. Bonnell, James McDonnell and C. P. Hill went to Nelson on Wednesday.

Fred Johnson left for the east on last night's express. His place in the Coal Company office is at present filled by Mr. Barrow.

John Balko opened the Muskoka Hotel on Thursday. The fittings are not permanent and it will be some little time before the hotel is fully equipped.

On the 10th inst. an election of a school trustee will be held to fill the place on the board of the late T. C. Thompson. As this is an important matter it is hoped the citizens will take an interest in the event and ensure the return of a suitable representative.

The C. P. R Christmas rates commenced on Dec. 1st. These reductions do not extend into the mountains, Pincher Creek being the nearest point at which they are available. The rate from that place is $51.75 good for three months. A large number of Fernie people are taking this opportunity of visiting their relatives in the east.

A meeting is called for the organization of a Trade and Labor Council, at Mr. Neale's house, on Monday morning at 9 o'clock. **The meeting will be attended by representatives from the socialist league and the different unions. The chief object of the meeting is to discuss the question of bringing a labor candidate out at the next election.**

The latest army gazette announces the appointment of a South African Commission consisting of Colonel Leggatt, Captain Percy Blakemore and General Piet de Wet (brother of General de Wet) to control the pacification of the Transvaal and the Orange River State and the re-patriation of the Boers. The many friends of Captain Blakemore will be delighted to hear of this well earned promotion to such a honorable position. He has stuck to his gun, remaining at his post for three years and as far as we know is the only Strathcona to continue the military service after the disbanding of his corps. It is expected that the work of the Commission will last at least a year when Captain Blakemore hopes to get a furlough and visit old friends. He is assured of a hearty welcome.

The Canadian Pacific Railway Company have located some thirty-eight claims on the east side of Elk river in the vicinity of Fording creek, East Kootenay. During the past summer the company have had a prospecting party in the vicinity, which was reinforced by a number of surveyors in August, who surveyed the locations discovered. Application has been made to the provincial government for coal licenses to prospect the ground located. It is reported that eleven seams, having a varying width of from four to twenty feet have been discovered. The coal is much firmer than that found at Michel creek. The application for a license to prospect for coal, by the locators, **who are agents for the Canadian Pacific will be watched with much interest by parties who have located coal lands further to the south in the Flathead valley, as the locations made by the company are on government land, held, or reported to be held in reserve for railway purposes.**

Mrs. Cooley, of Nelson, an experienced lady in Post-Office work has been engaged by Postmaster Johnson to take his place in the office for a time. Mr. Johnson is taking a trip to his old home in Ontario.

My Heart's Darling

* * *

BY W. HEIMBURG

Auther of "A Penniless Orphan," "Gertrude's Marriage," "Her Only Brother," Etc., Etc.

She shook her head. "You do not know how heavily it was mortgaged already. It is not the first time that I have gone to papa's assistance in such matters."

"And you? Hortense, what if Wilken had come forward with his money?"

"I would never have accepted it! Could I have gone to him and said my father has been dishonorable? I will merely write to him, and that immediately, that I have met with great pecuniary losses."

"Will it be very cheerful for him?" said the old gentleman, ironically.

"He is not one who cares much for luxuries."

"Yes, yes, I know. He is the kind that eats bread and cheese for his supper, and thinks oysters detestable food. But still you have your mother's property; but what is that to Dillendorf and the sums you have had to throw away?"

"I must give you a greeting from the Baroness Sauten," said the young lady, interrupting him quickly, as she took her parasol to leave the room.

"Hortense, Hortense!" called the old man after her, "tell me where was she? How did she look?"

"I will be back soon, only half an hour to rest."

She shut the door, and went through the spacious entrance hall and up the broad wooden stairs to the upper story. An elderly chamber-maid opened a door in the long corridor, and she entered her own boudoir. It was a lofty, handsome room, with the ceiling highly ornamented, and the richly gilded leather wall-hangings of a period long passed made the comfortably upholstered chairs and sofas of a later date, and also the rich Smyrna rug which covered the floor, look almost out of place. The windows were shut, and through the leaves of the elms an odd green light shone into the room, toned down by the heavy Turkish curtains. On the open writing-table which stood across one corner of the room lay a letter. Hortense crossed the room and looked at the address without touching it, laid aside her hat and parasol, and stood with folded arms before a life-size portrait of a man which was placed on an easel near the writing-table. There was an expression of deep sorrow in her eyes.

"Dishonorable!" she muttered. "It hurts me so deeply; and I know, too, as no one else does, how true it is!" Her voice became gradually louder, she pressed her hands to her temples. The last words sounded like a cry.

She sat down on the chair in front of the writing-table and looked at the letter. Once she stretched out her hand to take it, but drew it back again, and sat for a long time without moving. At last she took the letter, broke the seal, and read it. At the first lines she straightened herself up, and as she continued reading it she held herself still more erect, and the color deepened in her cheeks. She read the sheet through, and laughed aloud. "Oh, of course!" she said, and her eyes sparkled. "It is amusing, it is too laughable!" She sprung up and rushed, the letter in her hand, through the corridor, down the stairs, and into the old gentleman's room.

"Another piece of news, grandpapa," she cried, in a loud, unnatural voice.

The old gentleman started out of the light nap he was taking in his arm-chair, and looked vaguely at her as she stood before him.

"A piece of good news? I hope a good one, Hortense."

"Oh, yes, grandpapa. My engagement with Wilken is broken." She laughed again, and her shoulders heaved with excitement as if she had fever.

"But, Hortense, you have been too quick; that is a mistaken feeling of duty on your part. What are your father's misdeeds to him? I beg of you, Hortense, do not send your letter; think the matter over."

"I?" she cried, loudly. "He takes the matter in hand himself. Here it is in black and white — there. Papa has had something to do with him some time or other. He expresses it so delicately, is so desirous of sparing my feelings. I suppose papa has, as often before, tried to improve his fortunes by gambling. Apparently some one has caught him at it; and how ridiculous it just happens to be one of Wilken's comrades. Now is it not laughable, grandpapa? I do not understand why you—"

The old man reached out toward her hand, with which she was gesticulating eagerly. "Hortense, my poor, dear child," said he, gently, "do, for Heaven's sake, quiet yourself! Do not grieve, Hortense. Listen to me; do not cry. One who would give you up so easily is not worth your tears."

"I shall not weep."

"Truly, my child, it would be better for you if you could weep. Your lamented mother, my poor Agnes, she could weep all her sorrows away. Please, Hortense, do not laugh so. I cannot bear it, it is unnatural," he continued, anxiously, as Hortense laughed again. "You know I never could bear Wilken, and you are still so young and handsome the right one will come yet."

She had stopped laughing, and turned to go, holding her hands over her ears.

"Stay by me a little while," he called after her.

She shook her head and hastened back into her room without giving heed to the old gentleman's anxious entreaty.

He wiped his face nervously with his handkerchief, and in rising knocked over the cup with the coat of arms, out of which he had drunk for forty years, and it broke in pieces; then he pulled the bell-rope so hard that the tassel remained in his hand.

"Tell Bertin to come," he cried to the servant. Upon this a stout little woman appeared, her face pale with fright, and so out of breath that she could not speak.

"Bertin," he stammered, seizing her sleeve with his trembling hands. "Bertin, hurry! quick! quick! Madame is beside herself with grief, she had had bad news; you know—about my son-in-law?"

The old French woman cast down her eyes and sighed deeply. "I can understand that, Herr Baron," she said, and went out. Her room was separated by the whole width of that story from that of the old gentleman. She could only go upstairs with great difficulty, and went very seldom to the apartments of her former pupil. She led a very quiet life, having nothing but recollections of the past and her Angora cat to occupy her time, grumbled when she was out of humor at the sameness of her existence, wrote her memoirs, making use in them of all her old books of instruction, and every afternoon she played chess with M. le Baron, which was always a most agreeable pastime. She had but one grievance, and that was the ingratitude with which Hortense, to whom she had been as a second mother, treated her. Hortense was in every respect very self-reliant. She never confided her griefs or annoyances to any one, never asked for advice; so, of course, she did many foolish things. If she would find her way oftener to mademoiselle's room, yes—then— But to-day she had gone upstairs without even wishing her good-day. It is so hard to be treated as a nonentity. Mademoiselle was slowly mounting the stairs, helping herself up by the balusters, then stopping in the hall to recover her breath. She then walked quickly into Frau von Lowen's room; but at the same moment the door of the opposite room went to with a slam, and the key was turned very audibly. On the floor lay the large photograph of Hortense's father, the frame broken, the glass shattered, and on the picture a spot of blood.

"Mon Dieu! mon Dieu!" moaned the horrified old lady, "what has happened? Pauvre enfant! Hortense!" she cried, going to the bedroom door, "it is I; let me in; tell me your trouble. We have before this borne much together."

But all remained still as death within.

CHAPTER III.

In the meantime Lucie Walter was sitting at the neatly-arranged tea-table in the painfully neat room of her mother-in-law, the Frau Counselor Adler, at tea. She sat there, feeling strange and alone, and scarcely dared to look up under the searching glance of those gray eyes which seemed to be so incessantly watching her every look. She could have cried, it was all so different from what she had pictured to herself. She had expected a comfortable, lovable mother-in-law, who would take her, an orphan, in her arms and kiss her cordially. She could still feel that cold touch upon her forehead, and from this spot a chill seemed to spread through her whole body, and made it impossible for her to appear cordial herself.

Her Best Play.

"How do you like Miss de Soie in her new play?"

"I think it is the best thing in her wardrobe."

"Why do you call your neighbor's pig 'Maude?'"

"Because it always comes into the garden."

"Mamma," said 5-year-old Tommy, "I'll bet my pony can beat you."

"Why, dear, what do you mean?" asked the astonished mother.

"I mean in a race," replied the youngster. "I heard papa say that you could talk faster than a horse can trot."

"When I want to borrow a dollar I never go to a friend,, he said, as if he were leading up to something. "Ah, well," replied the other, extending his hand, "let us be friends."

Females of All Ages

find these Pills simply invaluable, as a few doses will restore free and regular conditions and effectually remove the causes of much suffering to the sex.

Beecham's Pills.

Sold Everywhere. In boxes, 25 cents.

Blood will tell

When an animal is all run down, has a rough coat and a tight hide, anyone knows that his blood is out of order. To keep an animal economically he must be in good health.

DICK'S BLOOD PURIFIER

is a necessity where the best results from feeding would be obtained. It tones up the system, rids the stomach of bots, worms and other parasites that suck the life blood away.

Nothing like Dick's powder for a run down horse.

The Car Shortage.

Canadian railways can at least take comfort as they listen to the grumbling about the car shortage, in the reflection that they are not the only sufferers from the general prosperity. The latest description of the situation in Chicago is. "Never in the history of Chicago, except during a big strike, was there such a congestion of freight in the railroad yards of the city as there is at the present time. The shortage of cars and motive power, of which the roads and shippers have been complaining for months, has become more and more pronounced in view of the vast increase in trafic due to the moving of the crops, until now an unprecedented condition exists. Shipments of all kinds are days behind and the freight offices are fairly deluged with urgent requests from shippers that their goods be traced to learn what has become of them. So numerous have these demands become that the local Freight Agents' Association is urging shippers to forbear from making enquiries unless goods are perishable or have been delayed more than a week. The delay in getting merchandise out of Chicago is said by wholesalers to be the most serious ever known here."

In the coal districts of Pennsylvania the conditions are, if possible, a little worse. The freight blockade threatens the industrial prosperity by keeping idle many furnaces and mills.

Interests suffering most from the so-called car shortage vast sums of money. Due to the freight blockade there are idle in the Pittsburg district 59,600 men, who are losing in daily wages $162,000, as follows:—

Miners	20,600	losing	$66,000
Furnace work's	6,000	losing	13,000
Mill men	13,000	losing	43,000
Others idle	20,000	losing	40,000
Totals	59,600		$162,000

Sometimes the course of true love fails to run smooth because it ends in marriage.

WOMAN'S WORK

OFTEN LEADS TO A BREAKDOWN IN HEALTH.

Severe Headaches, Loss of Appetite, Dizziness, Palpitation of the Heart and Other Distressing Symptoms Follow.

Woman's cares about the household are many and often worrying, and it is no wonder that the health of so many give way under the strain. To weak, tired-out, depressed women everywhere, the story of Mrs. Geo. L. Horton, the wife of a well-known farmer living near Fenwick, Ont., will come as a message of hope. To a reporter who interviewed her on the subject, Mrs. Fenwick said:—"Yes, I am quite willing to give my testimony to the great good Dr. Williams' Pink Pills have done me, as my experience may help some other sufferer. A couple of years ago my health began to give way, and I suffered from anaemia, with most of the depressing symptoms of that trouble. I became much emaciated, had distressing headaches, and a very poor appetite. At first I thought the trouble would pass away, but in this I was mistaken, as I continued to grow worse. My heart began to palpitate violently at the least exertion; my rest at night was broken and finally a bad cough set in, and I was scarcely able to do a bit of work about the house. An aunt in England, who had been ill, had written me that Dr. Williams' Pink Pills had restored her to health, and I determined to give the pills a trial. After the use of a few boxes I noticed a distinct improvement in my condition, and after using the pills for a few weeks more the trouble had completely left me. I could sleep well at night, the cough left me; the headacnes that had made me so miserable vanished, my appetite returned, and I could again perform my housework with ease. I shall always feel grateful for what Dr. Williams' Pink Pills have done for me, and strongly recommend them to other ailing women."

Dr. Williams' Pink Pills have accomplished just such good results in thousands of other cases among ailing men and women, and sufferers from any of the numerous ailments resulting from poor, watery blood who will give these pills a fair trial will soon be on the high road to health and strength. Imitations are sometimes offered by unscrupulous dealers, who care more for their own profit than for their customers' health. Be sure that the full name, "Dr. Williams' Pink Pills for Pale People" is found on the wrapper around every box you buy. If your dealer does not keep these pills send to the Dr. Williams' Medicine Co., Brockville, Ont., and they will be mailed post paid at 50c per box or six boxes for $2.50.

"Good men, you know, are scarce." "Yes, I know, and even bad men have to make themselves so at times!"

A SURPRISED PHYSICIAN.

A Dying Patient Recovers Through the Intercposition of a Humble German.

Chicago, Nov. 15.

Some weeks ago Dr. G——, a very reputable and widely-known physician, living on C—— Street, was called to attend a very complicated case of Rheumatism. Upon arriving at the house he found a man about forty years of age, lying in a prostrated and serious condition, with his whole frame dangerously affected with the painful disease. He prescribed for the patient, but the man continued to grow worse, and on Sunday evening he was found to be in a very alarming condition. The knees and elbows and larger joints were greatly inflamed, and could not be moved. It was only with extreme difficulty that the patient could be turned in bed, with the aid of three or four persons. The weight of the clothing was so painful that means had to be adopted to keep it from the patient's body.

The doctor saw that his assistance would be of no avail, and left the house, the members of the family following him to the door, weeping. Almost immediately the grief stricken ones were addressed by an humble German. He had heard of the despair of the family, and now asked them to try his remedy, and accordingly brought forth a bottle of St. Jacob's Oil. The poor wife applied this remedy. The first application eased the patient very much; after a few hours they used it again, and, wonder of wonders, the pain vanished entirely! Every subsequent application improved the patient, and in two days he was well and out. When the doctor called a few days after, he was surprised.

Men think up schemes to make money and women think up schemes to spend it.

The healthy glow disappearing from the cheek and moaning and restlessness are sure symptoms of worms in children. Do not fail to get a bottle of Mother Graves' Worm Exterminator; it is an effectual medicine.

God sends the seed, but we must furnish the soil.

THE GRAND TRUNK.

A TRANSCONTINENTAL.

The Company Will Build via Winnipeg. ---Independent of Canadian Northern or Any Other Lines --May Possibly follow Mackenzie Route.

Montreal, Nov. 23.—Canada's second transcontinental highway will be built by the Grand Trunk Railway company, the undertaking involving the construction of from 2,500 to 3,000 miles of track and an expenditure including equipments, stations, bridges, shops and other facilities, of from $75,000,000 to $100,000,000.

According to the present arrangements the new system will run through that portion of northern Ontario familiarly known as "New Ontario"; through Manitoba via Winnipeg, traversing Saskatchewan, Assiniboia and Alberta, to the Peace River of Pine River pass, then through British Columbia, making its terminus on the north Pacific coast. Work will begin as soon as the necessary legislation can be obtained and it is expected that five years after the surveys are completed the big system will be in operation.

"Like our Grand Trunk western system, extending from Port Huron, Mich., to Chicago," said Mr. Chas. M. Hays, second vice-president and general manager of the Grand Trunk railway, to-night, in making the official announcement regarding the new steel pathway, which will tap the rich chain of agricultural strongholds that extends from the upper great lakes to the north Pacific coast, "this line will be constructed under a separate corporation to be the 'Grand Trunk Pacific railway company,' and will be of the most modern and up-to-date character, having especially in view low grades, long tangents, steel bridges and heavy rails, as well as ample station facilities and equipments for the handling of both freight and passenger traffic; in fact, the road will be of the highest standard in every respect."

STARTING POINT.

The foregoing project has been under consideration for a long time by the directorate of the Grand Trunk company, and during Mr. Hays' last visit to England, the resources and possibilities of the great Canadian Northwest were laid before Sir Charles Rivers-Wilson and other members of the board in a most comprehensive and convincing way by the company's chief executive in Canada, the result being that they are now prepared to go right ahead with a railroad extending from North Bay or Gravenhurst, Ont., on the line of the Grand Trunk system, to either Bute Inlet or Port Simpson, B.C., as may be decided.

"No one who has been studying the wonderful developments that have taken place in the Northwest during the last few years," said Mr. Hays, "can fail to be deeply impressed with the growth of that extensive and rich territory, and our directorate feel that in view of the apparent need of additional railway facilities, and in order to guarantee to the present Grand Trunk system direct connection with that very important anh growing section of Canada, the only wise policy is to take active steps toward this extension, which, I may add, will be commenced as soon as the necessary legislation can be obtained from the government."

Interviewed further regarding the proposed new line of the Grand Trung through Winnipeg to the Pacific coast, General Manager Hays said to-day:

"Our new trunk line will not depend upon any existing roads, the utilization of the roads, which at present are in operation not entering into the plans which have been prepared. What is aimed at is an independent route to the Pacific, and to reach that terminus rails will be laid across land which heretofore has been known only to the hunter or the bold prospector."

Iron Range Near Sudbury.

The announcement has just been made of the discovery of one of the largest iron ranges in Canada and what will probably develop into one of the most important in America, in the Wahnapitae district, north of Sudbury.

Chicago and Michigan capitalists, it is reported, who have interests in the iron range of the Upper Michigan are interested in the new discovery. Thos. Drew, a well-known prospertor, who about a year ago was first to discover the great extent of the ore deposits and who at present is at Sault Ste. Marie, having come up from Sudbury in which vicinity he has been working for several months, says that when the work of development has been gone on with the people of Canada will be astonished at its magnitude. The ore is of the high quality and deposits are found about forty miles north of Sudbury, north of the great nickel ranges.

THE NEW MATERIALS.

Flowered Silks For Evening Wear. Fashionable Rough Goods.

Pompadour and flowered silks of all kinds are very much the fashion. These beautiful silks and brocades are made up into evening gowns and cut very simply. They are often finished around the neck with a bertha of rare lace which almost hides the small sleeve puffs.

The flowered brocades are also handsome for lining evening wraps, the lining nowadays being more than two thirds of the garment.

Three-quarter raincoats made of diagonal are very smart for rainy day and cool weather wear. They are

GIRL'S TAILOR MADE DRESS

made with half fitted backs or else with the fullness belted in with a short strap.

The new tailor mades are very fancy in the way of tucks and strappings. Many of the skirts are made habit back and finished simply with three long strappings or one long and two short. The long skirts have fairly long trains, and the sides and front are very long.

Rough goods, zibelines and camel's hairs are worn on even dressy occasions when a tailor made is required.

The girl's tailor made illustrated is of dark blue cloth. The blouse jacket is laid in perpendicular folds stitched flat, the wide revers are of embroidery and the little vest is of the same. The skirt has a plain front breadth, and the sides and back have three gored flounces.

JUDIC CHOLLET.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

Work on the Canadian Northern elevator at Port Arthur is progressing rapidly.

Mr. Dennis Murphy, M.P.P., has been sworn into the British Columbia cabinet.

E. LeRoy Pelkey, formerly of Winnipeg, is going after the North Pole.

Masked men held up a train on the Rock Island road near Davenport, Ia.

The gift of Osborne House to the nation is contrary to the Queen's desire.

There was a dynamite explosion at Michel, B.C., and several miners were injured.

The Grand Trunk railway will be built across western Canada to the Pacific coast.

S. J. Bergstra, an Almeda district farmer, was thrown from a horse and sustained concussion of the brain. He will probably recover.

Mueller, who was accused of murder in Winnipeg, but against whom "no bill" was brought in at the asizes, has charged a witness with perjury.

KAUFFMAN GUILTY

MURDERED A POLICEMAN.

Notorious Thug Captured at Fort William Adjudged a Murderer by a San Francisco Jury—Boiler Explosion at Chicago—Thirteen Killed.

William Kauffman, alias "St. Louis Fat," captured at Fort William, Ont., and brought via British Columbia to San Francisco, has been convicted of being an accomplice of murderer Woods in the killing of Policeman Eugene Robinson, last January, and is found guilty of murder in the first degree.

Sensational testimony was given which disclosed the identity of William Henderson, who turned state's evidence against his partners in crime. Henderson is really Jack Fraser, formerly a well-known athlete and clubman of Montreal, where he was a law student in the office of MacMaster & MacLennan. Fraser was ten years ago one of the best known young men of the Eastern Canadian city, was clever and well educated and his standing in society was of the best. He came to the United States, gradually drifted into bad companionship, and became a member of the Kauffman-Woods gang in San Francisco. They were thieves and hold-up men, and consorted with other criminals of the worst class.

One of their escapades resulted last January in an encounter with Policeman Robinson, and the latter was killed in the pistol duel. The men all escaped, and scattering, disappeared from San Francisco. Kauffman went to Victoria, then to Vancouver and finally left for the east. Before he was arrested Woods was caught near Los Angeles and other members of the gang, including Henderson, were gradually roped in. Henderson gave away the story, and it was on his evidence that Woods and Kauffman have been convicted. Woods is to be hanged next month.

The disclosures regarding Henderson were made after the verdict had been returned against Kauffman.

A serious accident occurred to the dam at Chambly on the Richelieu belonging to the light, heat and power company early on Sunday morning. About 200 feet of the centre wing dam was carried away but the main dam was not injured. Owing to the sudden lowering of the water the city of Montreal was without light for a while, but arrangements have been made with other companies temporarily and it is expected that in two weeks the damage will be repaired.

Jenny Kelly, eleven years of age, who lived on a farm south of Glencoe, Ont., fell into a well while drawing a pail of water and was drowned.

Engineer Barnes was crushed to death under his own engine in a freight yard at Lindsay, Ont. Saturday morning. He was unmarried and is said to belong to Allandale.

With a deafening report a boiler in Swift & Co's exploded shortly after 10 o'clock Saturday morning. Thirteen lives were sacrificed and scores of employees, visitors and others were injured. Huge boilers were sent through the roof of the structure and hurled hundreds of feet. Nobody within the boiler room survived to tell the story of the accident, and it may never be known what caused the explosion.

A special despatch from Garrero, Somaliland, announces that the Mad Mullah recently sent into the British camp the train of supply camels captured from Col. Swayne's column. He was careful to previously render all the stores unfit for use, and accompanied his present with a defiant message, promising to whip the British whenever they are ready to risk a second defeat.

The Prairie Premier.

When the Hon. Frederick Haultain, premier of the Northwest Territories was presented to the King at Windsor castle, he was somewhat surprised to see in the courtyard a couple of vicious looking bronchos, a small bunch of steers and a coil of rope. It appears that some of the King's retinue, haw-haws of the household brigade, had told His Majesty that Mr. Haultain being from the western plains must of necessity be a wild western cowboy, and that it would be regarded as a compliment by that country if its premier were afforded an opportunity of showing his prowess in broncho busting and in roping and tying down a bally bullock, don't you know. Fortunately they had forgotten to provide a stock saddle, so that the genial Fred, after affecting great disappointment, was able to wiggle out of the difficulty gracefully. It was the perspiration thus caused that resulted in a chill and confined Mr. Haultain to a sick bed from which he has not yet risen. —High River Eye-Opener.

CANADA AND ABROAD.

A Budget of Important News in Short Paragraphs.

Britain has quarantined New England cattle shipments.

The reports of B. C. mines shows a satisfactory growth.

Inland revenue reports show that Canada's coffee is badly adulterated.

Rev. Dr. Parker, the famous Congregational minister in London, is dead.

A new Northwest bank, with headquarters at Winnipeg, is being organized.

Residents of Proud street, Winnipeg, have entered a protest against the name.

E. F. Staples, an engineer on the C.P.R., was badly scalded near Varcoe, Man.

Thirteen lives were lost in a boiler explosion in Chicago.

Dr. McCabe, principal of the normal school, Ottawa, is dead.

De Wet's interesting book on the South African war has been issued.

A bricklayer named Russell, of Winnipeg, fell from a Port Arthur elevator.

Heavy fighting in Northern British India is reported, the natives losing heavily.

Some $2,000 damage was done to Gordon, Ironside and Fares' abbattoir, Winnipeg, by fire.

Kauffmen, the murderer captured at Fort William, has been found guilty at San Francisco.

General Manager Hays states the G.T.R. will seek government aid for its transcontinental line.

A Rosthern, N.W.T., farmer states the method adopted by the railways for distributing cars is illegal.

The machinery for the electric plant to be erected at Lac du Bonnet is being taken out from Winnipeg.

The Dominion has taken stringent measures to prevent the cattle disease from New England spreading to Canada.

The general manager of the Bank of Commerce denies that the institution has a dollar in the Canadian Northern.

J. S. Willison has resigned as editor-in-chief of the Globe, Toronto, to assume the editorship of a new independent paper.

Saturday morning Frank Deyo, a brakeman on the Kingston and Pembroke railway, was killed by contact with an overhead bridge near the cotton mills.

Hon. Denis Murphy, member for West Yale, who was appointed provincial secretary of British Columbia by Col. Prior, the new premier, has resigned and his resignation was accepted.

The quarantine department at Ottawa has ordered that during the outbreak of the foot and mouth disease in the New England states all cattle entering Canada from the eastern states shall be cleaned and thoroughly disinfected at the border.

A London cable says:—The order of the board of agriculture excluding live cattle from Boston on account of the foot and mouth disease is bound to increase the price of meat on the eve of the great meat-eating season of Christmas. Canada must benefit considerably unless the board finds an excuse to include Canadian ports in the exclusion order.

Mr. Geo. Johnson, the Dominion statistican, has secured the original records of the first test messages sent over the Pacific cable, and intends to have them lithographed for publication. These records, taken on paper tapes, show the difference in motion of the delicate cable instruments at the several speeds of eighty letters, ninety letters and one hundred letters, the highest speed reached. The last named record shows the closest marking, and the paper used to record it is shorter than the others, although the messages were all of the same length.

Hon. E. J. Davis, commissioner of crown lands for Ontario, stated Saturday that there had been sent out from the department by the afternoon mail over six thousand certificates to veterans entitled to land grants under the act passed for that purpose in the session of 1900.

Mrs. Horace Birch committed suicide at Ballycanoe by taking a quantity of Paris green. The discovery was not made until too late to save her life. She is survived by a husband and a family of four children. She was about 65 years of age.

Bologna's Leaning Towers.

Bologna's two square leaning towers, the Garisenda and the Asinelli, are more startling than the tower at Pisa. The Asinelli tower is 315 feet high and was built in 1109. The Garisenda was built a year later and was originally taller, but is now only 153 feet high. Its inclination, however, is greater than that of the other tower.

The rural telephone system in Ontario is being established at little cost.

Three engines were derailed by a collision in the C.P.R. yards at Brandon.

There was a freight train collision on the C.P.R. main line near Claremont, Ont.

Ambassador White has protested against the treatment of the Jews by Roumania.

The death watch has been set on Edouard Labelle, the condemned Dawson murderer.

The opening of the Co-Operative bakery, Winnipeg, was celebrated by an entertainment.

The trustees of Zion church, Winnipeg, have decided to sell the edifice and site for $20,000.

The Massachusetts board of trade passed a resolution favoring reciprocity with Canada.

Two men were caught at Plattsburg, N.Y., smuggling Canadian butter into the United States.

Twelve horses and a large quantity of oats were burned on the farm of Mr. Bateman, near Souris.

The 3rd, 4th, 5th and 6th regiments of the C. M. R. will not receive medals or a gratuity.

The first of the arrivals over the ice from Yukon had a trying time. A boat purser was murdered.

A young man named Woods, a fireman on the C.N.R., whose family lives in Winnipeg, was killed east of Atikokan.

Harry Cowan, a boy, was drowned at Ottawa, in the presence of a number of men, who made no effort to rescue him.

The coal conference in New York resulted in a set-back for the miners, and the settlement will be left to the commission.

The feeling in Britain favors the guaranteeing of G.T.R. bonds by the government to aid in the construction of the trans-continental line.

The Winnipeg city engineer has submitted as estimate for the construction and equipment of a railway to the city quarry. The cost of the work would be $138,425.

General Colonization Agent Speers has returned from a visit to the loukhobor villages. He said the pilgrims were not welcomed home like prodigal sons. They have seen the error of their ways. Many are purchasing horses.

Bruce Bell, of the Portage Plains, in company with a friend, while out hunting south of Oakville, a few days ago, shot one of the largest moose ever secured in this part of the country, which is said to weigh, when dressed, over seven hundred pounds.

The Seven Golden Cities.

The "Seven Golden Cities," one of the most popular legends of the latter part of the dark ages, were said to be situated on an island west of the African coast. The island is represented as abounding in gold, with magnificent houses and temples, "the high towers of which shown at a great distance." The legend also relates that at the time of the conquest of Spain and Portugal by the Moors, when the inhabitants fled in every direction to escape slavery, seven bishops, followed by a great number of people, took to ships and put boldly out on the high seas. After tossing about for some time they landed on an unknown island, the famous spot which in after years became the seat of the "Seven Golden Cities."

"This island," Heylyn says, "was exactly in midocean." After all had landed safely the wise old bishops burned the ships to prevent their followers from returning and founded the cities which have become so famous in song and story. This mysterious island was often sought by the early navigators. Those who went in search of it and never returned were popularly believed to have been detained by its inhabitants.

Leprosy, Fish and Arsenic.

A lecturer at the London polychnic declared at a recent meeting that the progress of leprosy could be arrested if sufferers would abstain wholly from eating fish. He cited several cases in his own experience. One was that of a man who was blind from leprosy and who had had muscular atrophy for fifteen years. After eighteen months' abstinence, taking at the same time small doses of arsenic, all traces of patches had disappeared from his hands and feet.

Nice Glassware & Chinaware are Things that Delight the Heart of every Lady

REPLY TO THE SOCIALISTS

In our last issue was published a lengthy contribution from our Socialistic friend. Not satisfied with maintaining the excellence of their cause and the purity of their motives, they bring a "railing accusation" against the press and the church. These they insinuate have done nothing for "the emancipation of the worker, for the vote by ballot, representative government, slave emancipation, etc." They were silent or passive during "those great movements that are the corner stones of our liberty." The writer or teacher of such sentiments shows a lamentable ignorance of the growth of that freedom, which has "broadened slowly down from precedent to precedent." The struggle for the liberty of conscience, the liberty of the press, the right to hold private or public meetings for the discussion of social questions, or the criticism of existing conditions, which which our friends seem to so much enjoy, was fought and won by men within the church who used the press to awaken and educate the people. It is interesting to note how these two great forces worked together in the emancipation of the race from spiritual as well as physical slavery. From the introduction of printing into England an irregular censorship had been exercised over the press; but it was not until the oppressed Puritans began to use the press to advocate the rights of the individual with regard to things spiritual that censorship was strictly enforced. Authors and editors who continued to advocate the cause of the oppressed were rudely thrown into prison. When the tyrannical Stuarts threatened to subvert the fundamental principles of the constitution and to rob the people of their liberties, it was Cromwell and his Ironsides that saved the situation and they were above everything men of the church. A great advance was made by the overthrow of the Stuarts and the accession of William III, but it was not until the reign of Geo. III that these corner stones of our liberties were securely laid. The right of private judgement and freedom to worship God according to the dictates of conscience were secured to every man; also the right of the press to criticize the conduct not of ministers or parliament only, but of the King himself. Without these rights and privileges "representative government" would be simply a farce.

Since that time the church and press have as a rule worked together for the good of the people. They prevented a resolution in England similar to that which desolated France. During the last century special attention was paid to the down-trodden masses, to the children of the poor to the slaves, to the prisoners, etc. It was Robert Raikes, an editor, who first directed attention to the children working in factories, which resulted in wise legislation regulating child labor and providing for the education of the children of the poor. The church and the press working hand in hand were chiefly instrumental in bringing freedom to millions of slaves last century and since then the power and influence of these two great forces is further seen in the prison reforms, temperance reforms, mitigation of sufferings by war, and in countless benevolent institutions.

There have been Socialists from the earliest times, but it is in quite recent years that Socialism as an organized force came into existence. It has many branches scattered over the world. These are held together more by their negative teaching than by their positive. They are all one in criticising and condemning the existing conditions of society, but present many divergent views as to the ideal state and the best method of introducing it. Their theories with regard to it are largely incoherent and visionary. This may be seen in the letter under consideration. In the first paragraph a definition of Socialism is given. According to that definition Socialism is interested only in the reconstruction of society as will secure a better destribution of wealth, or the products of labor. Later in the same letter it is claimed that Socialism contains the essence of Christianity. If the first definition be true, this latter statement cannot, for the Founder of Christianity charged His followers not to be anxious about these things "for after these things the Gentiles seek, but rather to seek first His Kingdom and His righteousness, His mind, His Spirit and His character and all these things should be added unto them." Again we read, 'the great aim of Socialism is to educate the masses.' In this part of its programme Socialism has the hearty cooperation of both church and press. But when Socialism teaches 'that the interests of the worker and the capitalist are not and never can be in harmony' it ceases to command the respect and support of intelligent men. Salvation for the poor will not be achieved by antagonizing capital and labor. They must be made to recognize their mutual dependence. Capital is just as necessary for the development of our country, as is labor. When capitalists come to recognize the fact that their wealth is not their own, but committed to them in trust, that they are but stewards of the great Master, and that they must use their wealth for the good of all, and when laborers recognize the fact that they too are stewarts, though perhaps possessed of fewer talents, and that they labor not for the good of any particular man, but for the good of all, then and not till then will the interests of both capitalists and laborers be the same and we shall have peace instead of discord, confidence instead of unrest, and prosperity instead of depression, in short we shall have the millennium.

The Editor does not hold himself responsible for the opinions expressed by correspondents.

To the Editor.

The Fernie Socialist League met as usual on the 1st inst., Com. Neale taking the chair. Much business was done. The progressive work accomplished by the league is manifesting itself already in the formation of a trades and labor council. We believe that too much talking is done with regard to the labor question and too little practical good; this we mean to change. The worker is to some extent class conscious and shows that he understands his class as antagonistic to the capitalist by the mere fact of his being a unionist. He would not have his master in his union and to hold office, then why in his politics? Who can doubt that what will benefit one worker will benefit all? Who can doubt but that there should only be one political party for the workers? Then why split the workers' vote between two parties—Liberals and Conservatives—both of which contain capitalists, instead of co-operating to form a party solely for the good of wage slaves. Government should exist for the majority—the wage earners—not the minority—the capitalists. Take the plain facts of the case in regard to the States, was not the government democratic in the time of such grand men as Washington and Lincoln? Is it not now anti-democratic in the times of such men as Mark Hanna, a republican, and P. Morgan who professes to be a democrat and this in spite of the fact of the fabulous growth of unionism.

Eugene N. Debs said, "It was no use being a unionist 364 days in the year and a scab the 365th—election day. No men! we must co-operate for our only hope is the ballot box. Anarchists fight with bullets, but socialists with ballots, for we strongly believe that it is only the latter that will enancipate wage slaves. Does every man realize all the destines that depend on that little cross. Some would defend their families with their lives and yet are not brave enough to defend them with their ballots. Oh the sin of that man who unthinkingly harms his family and all his creatures. Next week the benefits that would accrue from affiliating with the Socialist party of B. C. will be discussed, meeting commences at 7:30 at Mr. Neale's house near the hospital. A hearty invitation is given to all.

THOS. B. CRAIG.

Fernie, Dec. 3rd.

To the Editor.

I am in a position to know that on the night the new saloon was opened opposite the Victoria Hotel, several boys under age got beer without restriction and some were drunk and others could have got it if they wanted it. The proprietor should know and common sense should teach him that this is wrong and he should have more respect for the families of these boys than to allow it. He also should know that his license does not grant him the privilege of giving liquor to boys and whether he does or not the families of these boys will not stand it. A word to the wise should be sufficient.

A CITIZEN.

Fernie, Dec. 5th, 1902.

J. W. LEONARD.
Dated this 14th day of Oct., 1902. 200-5

which goes with a steady job and a self-respecting though humble or unobserved career. These five conditions of humane employment, President Eliot said, were realized to-day in Harvard University. Plainly they were not realized in the great American industries employing unskilled labor, where the terms of service were often those of "instant dismissal." Another serious difficulty with American employment was that it was spasmodic.

Pass Coal Company with carrying matches into the mines. They all pleaded guilty and Houston was ordered to pay a fine of $10 and costs, and Wilkinson and Loyd $5 and costs.

H. Kennedy pleaded guilty before Magistrate Turner this morning on a charge of being drunk and disorderly on Victoria avenue. He was let off with a light fine upon promising to reform.

that they should have the eight hour day because the mines are unhealthy and dangerous and that they ought to receive higher wages. Later in the day President Mitchell was called to the witness stand and represented comparative figures, which showed that men paid by the day receive 40 to 50 cents higher wages in the bituminous regions than they do in the Anthracite field were

ested in the success of the new company which will require our coal and lumber.

O. and W. Kummar, Frank Dunn and C. Underwood went out on Monday's train bound for Toronto. They are taking advantage of the Christmas rates and will remain in the east for a couple of months.

Nice Glassware & Chinaware are Things that Delight the Heart of every Lady

AND HELP TO MAKE HOME MORE COMFORTABLE

Nothing is nicer than to see the table garnished with dainty Crockery and Glass; it not only helps the appetite and makes the food taste a long way better, but brightens up everything fifty per cent.

Christmas is Approaching Rapidly

This is the time when we want everything in the house looking at its best, and now is the time to buy, before all the best designs and patterns are picked up. We have just stocked up with the newest goods, imported direct from the Old Country and Japan, and if you call in and inspect, we know you will be pleased. We have the sole control of two very pretty designs in crockery, "The Daisy" and "Kootenay." In these designs we can give you a Dinner or Tea Set, any size you want, a half or any part of a set, and if at any time you wish to replace any broke dishes (for dishes will get broken) so as to make up your set again; we can always supply you from stock.

Heavy Glass sets, 6 pcs., 90c. up
" " Punch Bowls 75c. up
" " Decanters $1 up
" " celery dishes 50c. up

Syrup Jugs, 35c. up; Olive Dishes 15c., Pickle Dishes, 20c. Imitation cut glass salt, pepper & tray, ster. silver tops, 50c. Vinegar cruets, 30c.

Call in and see these goods, even if you do not want to buy you will be made welcome as the flowers in May

The Crow's Nest Trading Coy.

REPLY TO THE SOCIALISTS

In our last issue was published a lengthy contribution from our Socialistic friend. Not satisfied with maintaining the excellence of their cause and the purity of their motives, they bring a "railing accusation" against the press and the church. These they insinuate have done nothing for "the emancipation of the worker, for the vote by ballot, representative government, slave emancipation, etc." They were silent or passive during "those great movements that are the corner stones of our liberty." The writer or teacher of such sentiments shows a lamentable ignorance of the growth of that freedom, which has "broadened slowly down from precedent to precedent." The struggle for the liberty of conscience, the liberty of the press, the right to hold private or public meetings for the discussion of social questions, or the criticism of existing conditions, which which our friends seem to so much enjoy, was fought and won by men within the church who used the press to awaken and educate the people. It is interesting to note how these two great forces worked together in the emancipation of the race from spiritual as well as physical slavery. From the introduction of printing into England an irregular censorship had been exercised over the press; but it was not until the oppressed Puritans began to use the press to advocate the rights of the individual with regard to things spiritual that censorship was strictly enforced. Authors and editors who continued to advocate the cause of the oppressed were rudely thrown into prison. When the tyrannical Stuarts threatened to subvert the fundamental principles of the constitution and to rob the people of their liberties, it was Cromwell and his Ironsides that saved the situation and they were above everything men of the church. A great advance was made by the overthrow of the Stuarts and the accession of William III, but it was not until the reign of Geo. III that these corner stones of our liberties were securely laid. The right of private judgement and freedom to worship God according to the dictates of conscience were secured to every man; also the right of the press to criticize the conduct not of ministers or parliament only, but of the King himself. Without these rights and privileges "representative government" would be simply a farce.

Since that time the church and press have as a rule worked together for the good of the people. They prevented a resolution in England similar to that which desolated France. During the last century special attention was paid to the down-trodden masses, to the children of the poor to the slaves, to the prisoners, etc. It was Robert Raikes, an editor, who first directed attention to the children working in factories, which resulted in wise legislation regulating child labor and providing for the education of the children of the poor. The church and the press working hand in hand were chiefly instrumental in bringing freedom to millions of slaves last century and since then the power and influence of these two great forces is further seen in the prison reforms, temperance reforms, mitigation of sufferings by war, and in countless benevolent institutions.

There have been Socialists from the earliest times, but it is in quite recent years that Socialism as an organized force came into existence. It has many branches scattered over the world. These are held together more by their negative teaching than by their positive. They are all one in criticising and condemning the existing conditions of society, but present many divergent views as to the ideal state and the best method of introducing it. Their theories with regard to it are largely incoherent and visionary. This may be seen in the letter under consideration. In the first paragraph a definition of Socialism is given. According to that definition Socialism is interested only in the reconstruction of society as will secure a better destribution of wealth, or the products of labor. Later in the same letter it is claimed that Socialism contains the essence of Christianity. If the first definition be true, this latter statement cannot, for the Founder of Christianity charged His followers not to be anxious about these things "for after these things the Gentiles seek, but rather to seek first His Kingdom and His righteousness, His mind, His Spirit and His character and all these things should be added unto them." Again we read, 'the great aim of Socialism is to educate the masses.' In this part of its programme Socialism has the hearty co-operation of both church and press. But when Socialism teaches 'that the interests of the worker and the capitalist are not and never can be in harmony' it ceases to command the respect and support of intelligent men. Salvation for the poor will not be achieved by antagonizing capital and labor. They must be made to recognize their mutual dependence. Capital is just as necessary for the development of our country, as is labor. When capitalists come to recognize the fact that their wealth is not their own, but committed to them in trust, that they are but stewards of the great Master, and that they must use their wealth for the good of all, and when laborers recognize the fact that they too are stewarts, though perhaps possessed of fewer talents, and that they labor not for the good of any particular man, but for the good of all, then and not till then will the interests of both capitalists and laborers be the same and we shall have peace instead of discord, confidence instead of unrest, and prosperity instead of depression, in short we shall have the millennium.

The Editor does not hold himself responsible for the opinions expressed by correspondents.

To the Editor.

The Fernie Socialist League met as usual on the 1st inst., Com. Neale taking the chair. Much business was done. The progressive work accomplished by the league is manifesting itself already in the formation of a trades and labor council. We believe that too much talking is done with regard to the labor question and too little practical good; this we mean to change. The worker is to some extent class conscious and shows that he understands his class as antagonistic to the capitalist by the mere fact of his being a unionist. He would not have his master in his union and to hold office, then why in his politics? Who can doubt that what will benefit one worker will benefit all? Who can doubt but that there should only be one political party for the workers? Then why split the workers' vote between two parties—Liberals and Conservatives—both of which contain capitalists, instead of co-operating to form a party solely for the good of wage slaves. Government should exist for the majority—the wage earners—not the minority—the capitalists. Take the plain facts of the case in regard to the States, was not the government democratic in the time of such grand men as Washington and Lincoln? Is it not now anti-democratic in the times of such men as Mark Hanna, a republican, and P. Morgan who professes to be a democrat and this in spite of the fact of the fabulous growth of unionism.

Eugene N. Debs said, "It was no use being a unionist 364 days in the year and a scab the 365th—election day. No men! we must co-operate for our only hope is the ballot box. Anarchists fight with bullets, but socialists with ballots, for we strongly believe that it is only the latter that will enancipate wage slaves. Does every man realize all the destines that depend on that little cross. Some would defend their families with their lives and yet are not brave enough to defend them with their ballots. Oh the sin of that man who unthinkingly harms his family and all his creatures. Next week the benefits that would accrue from affiliating with the Socialist party of B. C. will be discussed, meeting commences at 7:30 at Mr. Neale's house near the hospital. A hearty invitation is given to all.

THOS. B. CRAIG.

Fernie, Dec. 3rd.

To the Editor.

I am in a position to know that on the night the new saloon was opened opposite the Victoria Hotel, several boys under age got beer without restriction and some were drunk and others could have got it if they wanted it. The proprietor should know and common sense should teach him that this is wrong and he should have more respect for the families of these boys than to allow it. He also should know that his license does not grant him the privilege of giving liquor to boys and whether he does or not the families of these boys will not stand it. A word to the wise should be sufficient.

A CITIZEN.

Fernie, Dec. 5th, 1902.

C. N. HOCKEY LEAGUE.

DELEGATES FROM FIVE TOWNS MEET AT PINCHER CREEK.

Officers Elected, Schedule of Games, Another Cup in the League

The annual meeting of the Crow's Nest Pass Hockey Association took place at Pincher Creek on Wednesday, Dec. 10th.

Five towns were represented as follows,—Fernie. M. A. Kastner; Frank, W. Bleasdell; Pincher Creek, Rev. H. Grant: Macleod, Mr. Kemist; Medicine Hat, T. Moore. Cranbrook wired that they would not enter the League this year.

The officers for the ensuing year were elected. Patrons, Premier Haultain, Regina; Dr. Malcomson, Frank; and J. H. Tonkin, Fernie.

Honorary President, A. C. Liphardt.

President, J. H. Schofield.

Vice Presidents, A. J. Purdy, Fernie: W. C. Hamilton, Frank; T. Moore, Pincher Creek; T. Andrews, Macleod; and J. Turnbull, Medicine Hat.

Secretary-Treasurer, W. A. Ross, Pincher Creek.

After drafting the by-laws, a copy of which has not yet come to hand, the schedule of games were arranged as follows:—

Jan.	1,	Frank at Macleod.
"	5,	Macleod at Medicine Hat.
"	5,	Pincher Creek at Fernie.
"	9,	Fernie at Medicine Hat.
"	9,	Frank at Pincher Creek.
"	10,	Fernie at Macleod.
"	13,	Medicine Hat at Macleod.
"	14,	Medicine Hat at Pincher Creek.
"	15,	Medicine Hat at Frank.
"	17,	Medicine Hat at Fernie.
"	19,	Macleod at Pincher Creek.
"	21,	Frank at Fernie.
"	23,	Pincher Creek at Medicine Hat.
"	29,	Pincher Creek at Frank.
"	29,	Macleod at Fernie.
Feb.	2,	Fernie at Pincher Creek.
"	2,	Frank at Medicine Hat.
"	6,	Macleod at Frank.
"	9,	Pincher Creek at Macleod
"	9,	Fernie at Frank.

Mr. J. Henderson, proprietor of the Alberta Hotel offered the Association a cup to be played for by the competing clubs. This generous gift was gratefully accepted, and it was arranged that the cup was to belong permanently to the Association and should be held each year by the winning team. So that the successful team will have two cups on which to hang their colors.

LABOR AND CAPITAL

The views of President Eliot of Cambridge University on the labor problems of the day were not, it appears, correctly reported by the Associated Press. The Professor has made no complaint, but his remarks as they appear in the New York Times are commendatory rather than censorious.

He said that the work of the labor union must be counted among the efforts to make the lot of mankind more satisfying and happier and that their strength lay in their belief in this work as their mission. He then enumerated the condition which he designated as humane conditions of employment—those to which laboring men may rightly aspire.

First was a rising wage based on increased experience, attainments, and age; second, steady employment after adequate probation; third, the opportunty for the workingmen to establish a permanent home; fourth, conditions which enables him to give his employer generous service and to take pride in it; fifth, the right to a pension on disability, which gives throughout life relief from one great anxiety, and that public consideration which goes with a steady job and a self-respecting though humble or unobserved career. These five conditions of humane employment, President Eliot said, were realized to-day in Harvard University. Plainly they were not realized in the great American industries employing unskilled labor, where the terms of service were often those of "instant dismissal." Another serious difficulty with American employment was that it was spasmodic. Complaints from employees were often made the ground for dismissal. The present antagonism of employers and the unions was the fault of both parties, but, on the whole, the former were more to blame because their situation was more comfortable and their education superior. The industrial community was under many obligations to unions for evils they have mitigated, such as poor sanitary conditions in factories, an unreasonable number of hours of work, child labor, and the company store. The oligarchy of capital had combined effectively, and the corresponding combination of laboring men was a wholesome check upon that oligarchy. There is no question but that the labor union had come to stay. On the other hand, its cause was injured by certain evils which were subversive of fundamental American doctrines of liberty. One of these evils was the limit placed on the number of apprentices, whereas in the learned professions every encouragement was given to the training of novice. Other evils were the limitation of output which destroys the self-respect of the efficient workman, and the uniform wage, which has a cruel reaction on the less capable workman, because, with a uniform wage, he loses his job at every slack in business, whereas, if he were paid according to his earning capacity, his employer could afford to keep him the year round.

A fourth evil was the violence which was an inevitable feature of every strike in industries employing unskilled labor. The unskilled laborer on strike had no other weapon unless it was the boycott, which was a cruel, cowardly interference with the rights of the people.

President Eliot declared that he saw grounds for hoping that the relations of capital and labor would be improved, in spite of their present unintelligent antagonism, partly by frank public discussion of abuses, partly by pre-arranged agreements for conciliation or arbitration, and partly by the service which labor unions would render to capital through their constant command of the labor resources of which capital comes in need.

CROW'S NEST COAL CO.

Remaining 40,000 Shares are Issued, Bringing $2,500,000.

Toronto, Dec. 11.—The directors of the Crow's Nest Coal Company yesterday allotted the 40,000 remaining shares of the company's stock authorized to be issued by the recent meeting of the shareholders. The stock was all taken by present shareholders. The shares are $25 each, which makes the capital now issued $5,500,000, all that is authorized. The stock was issued at a premium of 150, that is $62.50 per share, so that the company's treasury will receive $2,500,000 for the new issue.

ANOTHER COAL COMPANY REPORTED.

Spkesman Review: The East Crow's Nest Coal & Coke company has been organized to develop a coal property near Blairmore, Alberta, Canada. The property taken over consists of 540 acres of land on which A. L. Paine, L. A. Davenport and Robert Ewart held a bond. The consideration was $35,000. Six veins of coal from 5 to 14 feet, and aggregating 60 feet, have been uncovered. The directors and principal stockholders of the new company are A. L. Paine, L. A. Davenport, Robert Ewart, Fred H. Mason and A. S. Crowder.

CARRIED MATCHES INTO THE MINE.

Three Men Fined for Committing This Serious Offence.

On Thursday, James Houston, Andrew Wilkinson and Eli Loyd, all of Coal Creek mines, were brought up before P. M. Turner charged by the Crow's Nest Pass Coal Company with carrying matches into the mines. They all pleaded guilty and Houston was ordered to pay a fine of $10 and costs, and Wilkinson and Loyd $5 and costs.

H. Kennedy pleaded guilty before Magistrate Turner this morning on a charge of being drunk and disorderly on Victoria avenue. He was let off with a light fine upon promising to reform.

PROVINCIAL POLITICS.

MCINNES AND ROBERTSON HAVE A SURE THING.

Jno. Houston. of Nelson, Gives His Opinion on Murphy's Resignation.

Mr. John Houston gives a more lenient view of Mr. Denis Murphy's resignation of the Provincial Secretaryship. After reviewing that gentleman's career first as a government supporter, then as a clear outspoken opposition member, he goes on to say.

"He was known to be a trifle "sick" of the Opposition crowd before the session closed, and his return to the Government side of the fence was no great surprise to either the Government or the Opposition. His acceptance of the office of provincial secretary was not very harshly criticized expect by a few of ultra-McBridites; but his resignation came as a surprise to both parties. Mr. Murphy has made no statement to the public regarding the matter, and it is not likely that he will make one, now that he has announced that he has quit politics for good. Mr. Murphy lives in Ashcroft, a town that owes its importance to the fact that it is the shipping point for Cariboo district. Its business men are all interested in freighting. Like the people of other towns in the province, not even excepting Vancouver and Victoria, they are jealous of their vested and business interests. They take it, that the policy of the Prior government in subsidizing the Canadian Northern railway, if carried out successfully, will injure Ashcroft. As Mr. Murphy's friends and neighbors they, no doubt, asked him to first consider their interests. That he has stepped down from his high office in deference to their wishes shows that his heart is in the right place. And it is just possible that the good-will and the friendship of the people of Ashcroft, the people among whom Mr. Murphy lives and from whom he gets his living, is in the long run more desirable than the empty honors that comes from carrying out the wishes of intriguing politicians and corporation grafters.

TO-DAY'S DESPATCHES.

Ottawa, Ont., Dec. 12. An act passed by the British Columbia Legislature to further amend the Coal Mines Regulations Act has been disallowed by an order in Council. Another act to regulate immigration into British Columbia has been disallowed as well as an act relating to employment at works carried on under franchises granted by private act.

Victoria, B. C., Dec. 12. No great interest is being taken in the provincial bye-elections. In North Nanaimo W. W. B. McInnes has a walk-over. In the North Victoria race Robertson may be hard pressed by T. W. Patterson, but the Government feel that even in the event of the defeat of their candidate Patterson will in all likelihood give them independent support. No new date has yet been fixed for the West Yale election It is understood that the date will not be set until after the results of the two island constituencies are known. In the event of the Government carrying both these seats, the West Yale election will be brought on at an early date.

Scranton Pa., Dec. 12. The greater part of the days session of the Anthracite coal strike commission was taken up in procuring cumulative testimony on matters that have already been heard by the commission. The testimony tended to show that there has been excessive docking, that many men were discriminated against because they went on strike rather than do the work of strikers, that they are paid one price for mine cars of all sizes, that they do not get paid for all the coal mined, that they should have the eight hour day because the mines are unhealthy and dangerous and that they ought to receive higher wages. Later in the day President Mitchell was called to the witness stand and represented comparative figures, which showed that men paid by the day receive 40 to 50 cents higher wages in the bituminous regions than they do in the Anthracite field were gathered by his officers and a hurried comparison with the figures handed to the commission by the Delaware and Hudson Company he said showed that his were generally higher. The Delaware and Hudson statistics were the only ones officially before the commission, and an investigation by the company's accountant late to-day showed that they contained many errors, which will be corrected.

THE EVENT OF THE SEASON.

The ladies of Christ Church, Fernie are to be congratulated on the huge success of their annual Bazaar, not only from a financial point of view, but also the social aspect.

The members of both Guilds have worked hard for some time making up the various articles for sale, assisted by many outside friends and well-wishers, as well as by former members of the Guild who have left town but who still retain kindly feelings of sympathy for the parish. The bazaar was opened at 3 p. m. on Thursday, Dec. 11th, and continued until 10.30.

There was a constant stream of visitors, which toward evening swelled into a decided crowd. The beautifully decorated stalls called forth many pleasing remarks and certainly the general effect of the display was such as had never been seen in this part of the Dominion before. Amongst other attractions were the indepensable fish pond, grab bag, etc.

The proceedings were enlivened at intervals by selections rendered on the piano by various local artists, whilst in the evening a short but high class programme of vocal and instrumental music was given, which judging by the frequent applause, was much appreciated. Amongst those taking part in the above were the following, Miss Edmonds, Miss Turner, Mrs. Ganong, Mrs. Nicol, Mrs. Jarvis, Messrs. Letcher, Stabler, Higgins, Hazel, Jarvis and Colelough.

The refreshments were of a high order and were duly appreciated.

The total proceeds amounted to about $300, which will go a great way toward purchasing the pews the ladies desire to see in the church.

The thanks of the ladies of both Guilds are hereby tendered to all who kindly helped towards such a gratifying success.

The Grand Trunk Pacific Railway

At last the cat is out of the bag and we now know that from the first the Canadian Northern has been a "kite" for the Grand Trunk and that the astute financiers who have helped to keep MacKenzie and Mann on their legs for four years only did so until the psychological moment arrived to hand them over to the larger corporation. We cannot affect to sympathize with MacKenzie and Mann. They will have their reward and the country will be immensely benefitted by the change as the Grand Trunk will be able to make competition effective and to provide a service altogether beyond the capacity of the Canadian Northern.

There is however one aspect of the case which is not so satisfactory and that is that the smaller corporation whilst supposed by those who did not know to have been working for its own hand has raked in a lot of valuable subsidies which would never have been granted to the G. T. R. and now that Mr. Hayes has openly declared that his company want all they can get in this line, it behoves us to look out for something prodigious. The flutter in the political camp convinces us that there is mischief brewing and that a desperate fight will have to be made to prevent a repetition in northern Canada of the alienation of land, mines and lumber which has been the curse of the south. Let our watchword be "Cash subsidies only."

Meanwhile the Kootenays in general and Fernie in particular are deeply interested in the success of the new company which will require our coal and lumber.

O. and W. Kummar, Frank Dunn and C. Underwood went out on Monday's train bound for Toronto. They are taking advantage of the Christmas rates and will remain in the east for a couple of months.

IN ARCTIC REGIONS

THRILLING ADVENTURE OF A ST. LOUIS MAN.

Caught by Ice, the Steamship Portland From Seattle is Drifted to Within Six Hundred Miles of the North Pole---A Passenger's Story.

A dispatch from St. Louis, Mo., says: Wilson R. Mizner, brother of Rev. W. Mizner, pastor of the St. Stephen's house Episcopal mission, of this city, has returned from an involuntary and perilous trip to the Arctic regions, in which an ordinary ship caught in a mass of swift moving icebergs, reached a point as near or nearer to the North Pole as was ever attained by professional explorers who ever set out with a magnificently equipped expedition.

Mr. Mizner had been gone six years. He returns perceptibly aged and worn from the perils and privations he has suffered, and he says the experience was worth it all. He relates a most thrilling tale of the remarkable voyage to within six hundred miles of the goal of all Arctic expeditions. The ship, he says, narrowly escaped being dashed to pieces by the huge blocks of ice, only the bravery and ingenuity of her captain saving the passengers and crew from terrible deaths.

The party was on its way from Seattle to Cape Nome and had almost reached its destination when hurled from its course by icebergs and carried away in a northerly direction to a point several miles north of Herald Island, in the Pacific ocean. All efforts to rescue the ship from her perilous positions in the bergs were futile, and only the heroic measures by the captain in using fuel to keep the machinery from freezing saved the ship from being wrecked.

A United States revenue cutter, sent out to locate the missing ship spent two months in a fruitless search, and then reported that the vessel had been sunk in the ice north of Behring Straits.

"We started from Seattle April 26," said Mr. Mizner, in describing his journey, "expecting at the time to avoid the ice and reach Cape Nome in about fourteen days. We got to Dutch harbour in the Aleutian Islands all right, but two days out from there we encountered huge fields of slush ice. Nevertheless, we were enabled to steam through, aideh by strong southerly winds, and about May 13 we began packing trunks and writing letters expecting to reach Nome on the morrow.

"On the 14th we became aware that we had drifted into a different species of ice. Great icebergs loomed up on either side of us fifteen hundred feet thick, and as far as the eye could follow from the crow's nest on the topmast. Ice banked up fifty feet above the decks of the ship. Finally we became aware with horror that we were in the Arctic drift and were being borne away from Nome. Two days later we passed through the Behring Straits at the rete of 16 miles an hour without steam, the huge drifts of ice moving with us, carrying us along and rendering escape out of the question."

Mr. Mizner's account of the perils and experiences of the trip with the icebergs to within 600 miles of the pole is detailed and full. He says that the whaling ship Genia, which left Seattle, bound also for Nome, became imprisoned in the same drift, and was sighted in the Arctic ocean about 150 miles southwest of Cape Lisborne, seventy or eighty days after leaving the Aleutian Islands. They were in need of food, which was furnished them. The two vessels lay in sight of each other far several days, then the drift parted them and Mizner and his comrades drifted on and on, nearer and nearer to the pole, the sun never sinking below the horizon, and the weather being unendurably cold.

Three tons of coal were used daily to keep the machinery from freezing. A gale from the north helped the ship to escape. The captain took advantage of splits in the berg to ram his vessel through the cracks. The vessel on which Mizner sailed was the Portland.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

The C. P. R. will build a new line of railway from Toronto to Sudbury.

An oil vessel in a San Francisco ship yards exploded and twelve men are missing.

A severe snow storm has interrupted railway communications in the Twin Cities.

Sir Frank Green, who was lord mayor of London in 1900-1901, is dead. He was born in 1835.

Britain and Germany will make a naval demonstration against Venezuela in a few days.

The British admiralty has ordered that all warships shall be painted grey instead of black, as in the past.

A couple of iron mines are being developed in the Fort Frances district.

Hon. Hugh J. Macdonald, K.C., who has returned from England, says manufacturers there are suffering from German competition.

The grain shipments from the C. P. R. elevators show an increase of two million bushels over last year.

ONTARIO REFERENDUM.

Indications Are That an Insufficient Vote Was Cast to Enforce the Act.

Toronto, Dec. 4.—The referendum on the Liquor act which was adopted by the Ontario legislature last session was taken throughout the province today, and resulted in a sweeping majority of the total vote cast in favor of the act, but the prohibitionists failed to secure the 213,507 votes necessary in order to give it the force of law. The returns are very incomplete, several polls having to be heard from in a majority of the constituencies.

The total vote polled for the act according to the figures to hand is 105,193 for and 65,669 against, a majority of 39,524. The complete returns, however, however, will increase the total by many thousands, but, as stated, these is not the slightest chance tbat the 213,000 favorable votes were recorded.

One of the surprising features of the contest was the heavy vote polled in Toronto, 27,930 ballots being cast, a majority of 1,564 of which were in favor of the act. In most of the cities the vote was only about two-thirds that polled at the general election of 1898.

It is necessary that the act shall receive 50 per cent of the votes polled in 1898.

The total votes secured by the prohibitionists will fall short by 60,000 of the total of 213,000 required to bring the act into force. In the majority of the constituencies only about one-third the vote was cast.

In the cities and towns the total vote cast was about two-thirds that cast at the general election of 1898.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

Smallpox has broken out at the Indian school at Norway House.

Marconi is satisfied with his Cape Breton wireless telegraph experiments

Higgins, the boy murderer, of St. John, N.B., will be hanged on the 18th inst.

Angus Leslie, of Elgin, Man., has succumbed to injuries received at a turkey shoot.

There were about 3,000 deaths from Santa Maria volcano eruptions in Guatamala.

Fire in Denny's shipyards came nearly destroying the Shamrock III.; $100,000 damage was done to the industry.

The first conversation between Winnipeg and Chicago, over the long distance telephone, was carried on on Dec. 5.

Two men were arrested at Kingston for personation in the vote on the referendum.

The Grand Trunk has made application to the British Columbia government for a charter to build in that province.

The Montreal chamber of commerce passed a resolution opposing the granting of government aid to the Grand Trunk Pacific.

A dispatch from Shelburn, Ont., says: Mrs. Edward Ferris, a pioneer and without doubt the oldest person in this section, died on Dec. 4 at her home in Mulmur. Had she lived until March next she would have been 101 years old. She never wore spectacles and was quite active and healthy up to a couple of weeks ago

A settler named George H. Parker, living ten miles out of Battleford, was frozen to death on Dec. 4 within three hundred yards of his house. He had been to town and evidently lost himself in the storm, when returning home in the evening, as he was found away off the road. He leaves a wife and six children.

In a fit of despondency, Thomas M. Parker, formerly proprietor of Parker's dye works, Winnipeg, attempted suicide by shooting himself with a revolver. The act was apparently premeditated, and that it was not successful in its object was not the victim's fault. He evidently aimed for his heart, and the bullet missed it by a very small margin, entering the breast just above the vital point. The shot was heard by the family, and they rushed to the spot, to find the victim in a pool of blood. He may recover.

A dispatch from New York says: Harry Ruit, an employee of a locomotive works in Paterson, N.J., died in a hospital there as a result of a practical joke played on him by five of his fellow-employees. They were arrested charged with having caused his death. It is alleged that they blew up Ruit with a pneumatic air pump, having a pressure of 110 pounds to the inch. Soon after this the boy's stomach became greatly distended. After several hours of great suffering he died. When the men accused of having caused Ruit's death were arraigned in court the dead boy's father rushed at one of them named Dorn, knocked him fown and started to kick him. The lather was restrained by the court officers. The accused men were held without bail on a charge of manslaughter.

CH CAGO HOTEL FIRE

FOURTEEN PEOPLE INCINERATED.

Conflagration Breaks Out in Lincoln Hotel When Crowded With Guests Attending the International Live Stock Show.

Twenty-three persons met death in a fire in the Lincoln Hotel, 176 Madson street, Chicago, on December 4th. Nineteen of the bodies have been recovered.

Little damage was done to the hotel, but the smoke was so dense that the persons who met their death were overcome and died before assistance could reach them. Many jumped from the fourth story window, others tried to save themselves by climbing down the fire escape in the front of the building only to lose their grasp on the cold iron bars and fall to the ground.

The persons sleeping in the rear of the building on the top floors had no chance for their lives. A narrow stairway leading to all the floors of the structure was afire and the escape of the lodgers in the rear of the building was cut off.

The firemen and policemen in speaking of what they witnessed at the catastrophe, condemned the building as a fire-trap.

Ambulances and patrol wagons from all parts of the city were called to the place to carry away the dead and injured.

All but fourteen of the guests at the hotel were out of town persons. Most of them came to Chicago to attend the International Live Stock show.

Shortly after the fire broke out the firemen rushed up the stairway into the place and began the work of rescue. Men, women and children were carried down ladders, fire escapes and smoke filled halls. The building is constructed of brick with one stairleading to the upper floors and a fire escape in the front of the building.

A short time after the fire was discovered consternation reigned on the upper floors. A Mrs. Sheppard's son was one of the first to be awakened by the presence of smoke. He awakened his mother and both began screaming. Many persons were thus warned of the danger and made their escape. The woman was so panic-stricken, however, that she was not among the first to attempt to escape and she was making her way into the most dangerous part of the building when a fireman seized her and her son and conducted them to the floor below, where he dropped them out of a window.

J. E. Herbert, of Salineville, Ohio, jumped from the fourth floor; where he had been sleeping. He struck the roof of 158 Madison street. His right leg was broken, and he suffered internal injuries. He was taken to the County hospital; W. J. Thomas, a mail clerk of Cedar Rapids, jumped through a window on the fourth floor. He managed to make his way to the fire escape and climbed to the ground. Previous to Thomas' escape twenty-five to thirty persons had climbed down the fire escape to the street. All were in their night clothing.

From what could be learned from persons who escaped from the building it appeared that the fire was was started probably by the dropping of a lighted cigar on the carpet in the hallway on the second floor.

Allen Olderff, of Milwaukee, made a perilous descent from the fourth floor by scaling the wall by means of the iron shutters. Olderff stated that he had seen at least a dozen persons on the top floor, vainly endeavoring to make their way from the building by means of the front stairway.

Many of the bodies were found in the beds in positions of slumber. Others were found in the hallways face downwards, in positions that mutely portrayed how they had vainly endeavored to save their lives.

Some were half-clad and others wore nothing but night clothing. It was by means of articles and letters in the pockets of what little clothing some of the dead persons wore that many identifications were made.

F. A. Smith, proprietor of the hotel, said: "I am certainly not to blame for this awful catastrophe. Three weeks ago the agents of this building were notified to place a stairway in the rear of the building and also to build a fire wall around the freight elevator shaft in the rear. The contractors came and looked the building over, but nothing was done. Last night our seventy rooms were all filled, and I should judge that we had about 125 or 150 guests."

Chief Musham of the fire department, said in some ways it was the worst fire he ever encountered in his career as a fireman, and that so dense was the smoke that it was impossible to reach the imprisoned guests, who died like rats in a cage. When the firemen finally managed to make their way into the place men and boys lay about the floors of the rooms and hallways where they had fallen in their eagerness to escape. "The building," said the chief, "was one of the worst fire traps I have ever seen."

Latest reports reduce the number of dead to fourteen persons.

WESTERN IRRIGATION.

Engineer Dennis Outlines Proposed Improvements for Alberta.

"There are certain very large areas of land belonging to the Canadian Pacific railway in the Northwest, and especially in Southern Alberta, which only require the construction of irrigation canals to change them from unoccupied districts into thriving villages. We have just prepared a plan for a system of irrigation, and have presented it to Sir Thomas Shaughnessy, president of the company."

Such was the statement made by Mr. F. S. Dennis at Montreal, who for some time past has been studying the problem of irrigation that will mean that millions of acres of acres of land at present of little value will become worth many millions of dollars.

Mr. Dennis was for some years acting deputy minister of public works, and was the first to find out a practical solution of a great problem with which the great west is confronted.

"For instance," Mr. Dennis continued, "there is a district containing over two and a half million acres lying east of Calgary, which is traversed by the main line of the Canadian Pacific railway, and which we propose to irrigate by water taken from the Bow river near Calgary. Its completion will mark a great advance in the development of Southern Alberta, and of large areas lying contiguous to the main line of the Canadian Pacific railway. This will be only the beginning, for there are also millions of acres in Western Assiniboia, generally spoken of as the great ranching district, in which the rainfall during the majority of years is insufficient to bring crops to maturity. If these districts are to keep pace with and share in the wonderful development now taking place in the eastern and northern portions of the Territories, irrigation must be resorted to. In my former position f acting deputy minister of public works, I made a general survey, with a result that 490 miles of canals were constructed that are now capable of supplying water for the irrigation of 615,000 acres.

"Then, again, the Northwest Irrigation company has worked a wonderful transformation by the construction of their large canals, for already there are four thriving villages in a district that a year ago was deserted, and this year it required some forty self-binders to harvest the crop grown in the district."

Mr. Dennis will spend some days in Montreal conferring with the president of the company with regard to the course that will be followed by the company.

THE NEWS IN BRIEF.

Telegrams and Cablegrams Condensed for Busy Readers.

A. E. Buck, United States minister to Japan, died suddenly while hunting.

C. P. R. train employees have secured a wage increase aggregating nearly 15 per cent.

The United States government is alarmed at Cuba's renewed indifference to closer trade relations.

Macleod and Lethbridge will have handsome new bridges to replace those destroyed by floods.

Rev. James Endicott has written to Winnipeg from China that the Boxers are still murderously inclined.

An application to the British Columbia legislature has been made for a railway from Hazelton to Burrard via the Peace river pass.

Sir Sandford Fleming sent a message from Ottawa around the world by the Pacific cable; the time occupied was six hours.

The Brandon and Southwestern Railway company will apply next session for an extension of time to construct from Gladstone to Winnipegosis.

A St. Louis dispatch says: After two days' trial, Charles Denny, the millionaire brewer and director of the House of Delegates, charged with perjury in connection with the suburban bill boodle deal, was found on Dec. 6 and his punishment fixed at two years in the penitentiary.

Mutiny at Sea.

A cablegram from Queenstown, Ireland, says the steamship Leicester Castle, from San Francisco, arrived there on Dec. 5. Her commander reported that on September 3 three Americans mutinied and Captain Beattie and the second officer were shot, the latter fatally, after an encounter with the mutineers, who left the ship on a raft in mid-ocean. Captain Beattie gives the names of the mutineers as W. A. Hobbs, Ernest Sears and Turner. They were all shipped at San Francisco. The second officer, Mr. Nixon, was shot while attempting to rescue the captain. In the darkness the mutineers got a few coops and planks, formed a raft, and launched it from the ship, which was then about 300 miles north of the Pitcairn Islands. The captain searched for the raft next day, but it was not sighted, and it is surmised that it went to pieces.

BURNED TO DEATH

SHOCKING TRAGEDY NEAR RUSSELL, MAN.

Mrs. Hartook and Her Four Children Found Dead in the Charred Ruins of Their House—Suspicions of a Terrible Crime.

A dispatch from Russell, Man., of Dec. 2, says: Word was brought to town yesterday of a most shocking accident or what may prove to be a crime of fiendish conception, whereby five Galicians, comprising a mother, and her four children, lost their lives.

The names of the victims of the holocaust are:

Mrs. Hartook, aged 34.
Mary Hartook, aged 9.
McKay Hartook, aged 7.
John Hartook, aged 6.
Baby Hartook, aged 5 months.

The family lives in a log house with a stable near, some ten miles east of Russell. The father had been working for John Rutherford, a Silver Creek farmer, and had been at his home on Wednesday last. He went home as usual on Saturday night and as he neared the place, found that his house had been partially burned down. It was dark by this time, and never thinking but that his family would be somewhere in the neighborhood, he tramped over to a neighbor's place, only to learn that none of them knew even that his house had been burned, much less the whereabouts of his family. Returning to his home with lanterns, the horrible sight met his eyes of his wife with her baby clasped in her arms lying on the floor of the unconsumed portion of the house, and the three elder children lying under a mass of charred sticks, which had fallen on them. These children were all more or less burned, but the mother and baby were not marked in any way. A dog, too, was found dead on the floor. All had been dead some time, as the bodies were frozen hard.

Considerable mystery surrounds the matter. It seems that the fire was near the doorway and escape was probably cut off at that point. But the window was intact and could have been used as an avenue of escape. So unexplainable was the tragedy that when Dr. Wright, the coroner, went out and heard the story he decided to communicate with the attorney-general's department with a view to having the matter investigated. It is understood that Dr. Rogers has sent the stomachs of the dog and one of the children to Winnipeg for analysis, for the circumstances so far as known would fit such a case as poisoning, followed by an attempt to cover all traces of the crime by burning the home and the bodies.

Another story is that the mother was away from the house and returned to find it burning, and perished in an attempt to save her children. This is the more credible, as when found she was fully dressed and had on an outdoor coat. Other circumstances do not fit in so well with this. However, any theory that will include all the circumstances is very hard to formulate.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

Two men are reported to have been killed on the C. N. R. near Fort Francis.

Seventeen large United States iron companies have amalgamated.

Messrs. Blake and Devlin made an appeal for Ireland in Montreal.

Fireman Tierney, of the C. N. R., was killed east of Fort Frances on Dec. 2.

United States Senator Clark, of Montana, has given a million dollar prize to the first born in his children's families.

Pulp and paper manufacturers of Canada met at Montreal and decided to ask for an export duty on pulp wood.

The Great Northern and the Canadian Northern have reached an agreement on tariffs. Trains will be connected at St. Vincent.

To Eastern Canada and Return.

Round trip tickets will be sold from Winnipeg to points in Eastern Canada and return, via the Great Northern railway for $40, to Montreal and points west thereof in Ontario. To points east of Montreal a small additional fare will be charged. Tickets will be sold from Dec. 1 to December 31st., good for three months, with privilege of extension at small additional cost. Stop-over privileges going and returning.

Be sure to select the Great Northern for this eastern trip, as it affords many advantages over the other lines. Information can be had from your nearest ticket agent, R. J. Smith, D.P.A., 498 Main street, Winnipeg, Man., or F. I. Whitney, G. P. & T. A., St. Paul, Minn.

FERNIE FREE PRESS.

FERNIE, B.C.

Queen Victoria was baptized, married, and crowned by Archbishop Howley. It is remarkable that George III. was also baptized, married and crowned by one man—Archbishop Secker.

Messrs. C. C. Richards & Co.

Gentlemen,—My three children were dangerously low with diphtheria. On the advice of our priest my wife began the use of MINARD'S LINIMENT. In two hours they were greatly relieved, and in five days they were completely well, and I firmly believe your valuable Liniment saved the lives of my children.

Gratefully yours,
ADELBERT LEFEBVRE.
Mair's Mills, June 10th, 1899.

Of 575 plants, a goat was found to eat 449, and refuse 126. A pig, on the other hand, would only eat 72 out of 243 offered to it.

The best way to cure indigestion is to remove its cause. This is best done by the prompt use of Dr. August Koenig's Hamburg Drops, which regulate the stomach in an effectual manner.

20 MILLION BOTTLES
SOLD EVERY YEAR.

Happiness is the absence of pain, and millions have been made happy through being cured by ST JACOBS OIL of RHEUMATISM, NEURALGIA, TOOTHACHE, HEADACHE, LAMENESS, SCALDS, BURNS, SPRAINS, BRUISES and all pains for which an external remedy can be applied. It never fails to cure. Thousands who have been declared incurable at baths and in hospitals have thrown away their crutches, being cured after using ST. JACOBS OIL. Directions in eleven languages accompany every bottle.

CONQUERS PAIN

MARKET REVIEW.

Compiled from The Commercial.

WHEAT—The week's speculative wheat market has ruled generally quiet, with values showing an easier tendency, Saturday's closing figures at Chicago being ½ to 1 cent lower than the previous week's close. Reports on the world's crops are generally favorable. Harvesting is now under way in Argentine, and latest reports indicate that the prospects for a large surplus are particularly bright. The European crop situation is far from satisfactory, while India has been exporting liberally.

The local grain trade has settled down to regular winter proportions and owing to the fact that navigation is now practically closed, business is stagnant, and has been so throughout the week. Prices have held fairly firm considering the lack of any important demand. Saturday's prices being 69c for December, and 73c for May, a decline of about ½c for the week. The movement of grain from interior points has been small, the daily inspection returns showing a large falling off as compared with the previous week's, when the grain was being rushed east for shipment from the lake ports.

OATS—The market is firm though unchanged at: No. 1 white, 29½c; No. 2 white, 28½c; in store at Fort William or port Arthur. On track, 2 white oats are quoted at 27½c per bushel; feed oats 25 to 26c per bushel.

BARLEY—Prices are considerably easier at 31 to 32c per bushel for malting grades, and 26 to 27c for feed grades.

FLAXSEED—Receipts are moderate, and the market steady at $1.00 per bushel for carlots at country

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $6 to $6.50 per ton for carlots on track.

POTATOES—30c per bushel.

POULTRY—Dressed chickens are worth 9 to 10c per pound, ducks and geese, 10c, and turkeys 12½c.

BUTTER—Creamery—The season is about over and receipts are light. Creameries are asking 25c per pound from city customers for choice makes, which is an advance of 2c per lb.

BUTTER—Dairy—Receipts are light with the demand about the same. Prices are firm at 19 to 20c per lb for dairy separator butter in bricks, and 14 to 17c per lb. for fresh tub butter and rolls.

DRESSED MEATS — Beef, city dressed, 5½ to 6½c, country stock, ½c less; mutton, 8 to 9c; lamb, 11½c; hogs, 9 to 10½c.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—Eggs are scarce and have advanced to 22c per dozen, net, in Winnipeg, subject to candling.

HIDES—Dealers are now paying 6½c for No. 1 hides, 5½c for No. 2, and 4½ for No. 3. Calfskins same price as hides. Horse hides 50c to $1 each.

SENECA—Best root, 52c per lb.

LIVE STOCK.

CATTLE—The export movement, which has been a heavy one during the season, is now over. Stockers have not been moved to any extent yet, but they should do so now that the shipment of grain will ease off with the close of navigation. Yearling stockers are quoted at $16 a head, and two-year-olds at $22. Beef cattle are quoted at from 2¾c to 3½c per pound, according to quality, the demand being good.

SHEEP—Receipts are moderate and the market steady at 3½c per pound off cars Winnipeg. Lambs are lower at 4½ to 4½c.

HOGS.—Hogs seem to be more plentiful than usual this season, and the market has weakened in the face of prospective heavy receipts. Packers are now offering 6c per pound for best weights; heavies and lights are worth ½c less.

MILCH COWS—There are very few milkers to be had, and prices are firm at $30 to $45 each, for such as are to be had, according to quality.

HORSES—There is a good demand for teams for the bush, and prices are stiff. General purpose horses are also wanted.

The Sun on Every Side.

A Texas citizen, says an exchange, is worried because the sun shines on each of the four sides of his house at some time of the day. The structure faces due north and south and is situated on parallel 29½ of latitude, or practically 6 degrees north of the tropic of Cancer, where the sun is vertical in summer. He is carrying the problem about the country, offering prizes for its solution among school children. "Why," he asks, "should the sun penetrate my front door in the morning, desert it for the greater part of the day and again penetrate it in the afternoon?"

London Climate.

An English wit made an epigram to describe the climate of London: "In a fine day, looking up a chimney; in a foul day, locking down one."

A TRYING TIME

IS THE PERIOD WHEN YOUNG GIRLS ARE MERGING INTO WOMANHOOD.

Marked by Pale Faces, Heart Palpitation Loss of Appetite and General Lassitude --How to Overcome This Condition.

After babyhood, the most perilous time in a young girl's life is when she is just entering womanhood. It is then that she is subject to headaches, dizziness, heart palpitation, feeble appetite, and bloodless cheeks and lips. This condition may easily develop into consumption, and to prevent this—to keep the young girl in good health and strength, mothers should insist upon their taking a blood making tonic, such as Dr. Williams' Pink Pills. Mrs. Henry McIntyre, Port Dalhousie, Ont., gives sound advice to other mothers in cases of this kind. She says:—"About three years ago the health of my daughter, Bertha, began to fail. She grew weak and seemed unable to stand the least exertion. She suffered from distressing headaches, and fainting fits; her appetite left her and she lost flesh. I spent much money on medicines, but they did not help her. Then I took her to a doctor, and although his treatment was persisted in for a long time, she seemed to be growing worse, and I began to fear she was going into consumption. Then I took her to a specialist, but his treatment was likewise unsuccessful. Finally upon the advice of a lady friend, a doctor practising in Chicago, Bertha began using Dr. Williams' Pink Pills, and before long there was a decided improvement in her condition, and by the time she had taken nine boxes she was once more enjoying the best of health and had gained fifteen pounds in weight. I would strongly advise all similar sufferers to give Dr. Williams' Pink Pills a fair trial, as her case seemed as hopeless as could be."

"All weak and ailing girls and women, sufferers from backache, headaches, indisposition to work or exercise, who show by their pale and sallow cheeks that they are in ill health, will find prompt relief, bright eyes, rosy cheeks and active health in a fair use of Dr. Williams' Pink Pills. You can obtain these pills from any medicine dealer or by mail, postpaid, at 50c. a box or six boxes for $2.50, by writing direct to the Dr. Williams Medicine Co., Brockville, Ont. Never accept anything else which a dealer may say is "just as good."

In order to reach success you must pass through a door labeled "Push."

Minard's Liniment Cures Diphtheria.

When money is tight it makes itself scarce, but it is somewhat different with men.

A LITTLE TYRANT.

The Trouble Not Due to Original Sin.

There is no tyrant like a teething baby. His temper isn't due to original sin, however; the tyrant suffers more than the rest of the family. He don't know what is the matter. They do. The trouble is they do not always know what to do for his lordship. An Ontario mother writes to tell what is best to do: "When my baby was teething," she says, "he was so cross and restless that I hardly knew what to do with him. He had a poor appetite, and was growing thin. I got a box of Baby's Own Tablets and they made a great change. He now rests well; has a splendid appetite, and gives me no trouble at all." This is the experience not only of Mrs. D. K. Schroeder, of Hanover, Ont., but also of thousands of mothers all over the Dominion. A baby teething is cross because his blood is heated and his little bowels constipated or unhealthily relaxed, and his system heated by the effort of getting the teeth through the gums. Baby's Own Tablets act like magic not only in this, but in all ailments of little ones. Sold by druggists or sent post paid at 25 cents a box by writing direct to the Dr. Williams Medicine Co., Brockville, Ont., or Schenectady, N.Y.

A famine of silver dimes annoys the average man more than the scarcity of $1,000 bills.

When a man compliments a woman she isn't satisfied until she can induce him to repeat it at least seven times.

LAND SUBSIDIES.

No one was deceived when the public press assumed for about forty-eight hours that the Grand Trunk Pacific was going to be built without subsidies, least of all the astute president of the C.P.R., who so promptly acquiesced in the suggestion. Mr. C. M. Hays removed this impression the first time he was interviewed on the subject, and it is now generally conceded that the latest transcontinental scheme is to be an applicant for just all it can get in the way of subsidies.

The Globe, which, now that Mr. Wilfison's restraining influence is removed, is free to pave the way for generous government support, is evidently afraid that the very general protest against a land grant should grow into a national demonstration, and in a recent issue urges the public not to be in a hurry to make up its mind—in short, to suspend its judgment. This is poor advice, there need be no hesitation and should be no delay in making it clearly known that the country will not stand for government support which involves the gift to a railway corporation of land, minerals or timber in addition to a cash subsidy.

Just how greedy charter promoters can become is well illustrated by the recent experience of Mr. Parent, the premier of Quebec, who says the promoters of the Central Canada railway have demanded 20,000 acres of land per mile, equal to 8,000,000 acres, which the premier says he could recently have sold for sufficient money to pay the provincial debt. The fact of the case is that of late years charter promoting has become a business pure and simple in which political pull enabled a few favored individuals to secure legislation and attractive subsidy, only to be passed on to other parties for a substantial consideration, the amount of which depended upon the extent of the subsidy.

But the most iniquitous feature of these deals is the alienation of public lands of unascertained but invariably of great value. The revolt of public opinion against this iniquity led to the withholding of a land grant to the Canadian Northern and the V. V. & E. last session and if the country is determined and vigilant we may have seen the last of the evil.

If any government support is given it should be strictly in cash, but so far as the Grand Trunk Pacific is concerned we do not see the slightest reason for a government subsidy in any form. The route lies through the most fertile part of the Dominion. Existing railways are sufficiently near to be easily available for the conveyance of construction material. The country is already partly settled, and in fact the whole of the conditions are so entirely different from those which existed when the C. P. R. was built that if the G. T. R. will not build without a subsidy there is no doubt that some other corporation will do so in the near future.

The Cabinet Trick

The politicians at Victoria have performed a cabinet trick beside which that of the celebrated Davenport brothers pales into insignificance. The simile of the lion and the lamb lying down together is a mild comparison to the aggregation which included Prior, Denis Murphy and McInnes. Nothing is more certain than that no legitimate bond could unite such men and it did not take Murphy's constituents three days to tell him plainly that the combination was just a little too much for them. Everyone knows that the chain that binds them is a golden one. They have to relieve Dunsmuir of his white elephant, the Island Railway, to give the Canadian Northern—in trust for the Grand Trunk—the northern half of the province for building the Yellowhead Pass to the coast, and in some way to increase the V. V. and E. subsidy until it exceeds the cost of construction, and no one doubts they will do it. When the master pulls the string the puppets must dance.

* * *

The Lead Situation

Of great importance to Fernie is the present crisis in the lead mining industry. From a production of 60,000 tons in 1900 to less than 20,000 this year is a staggering fall. It is due entirely to economic conditions. When two years ago American production reached their own requirements, they simply shut us out of their market and ceased to buy our ore. Thanks to a "scientific" tariff. American producers are paid 2 cts a lb. or $40 a ton more for lead than Canadian producers, which is an effective question to competition. Still under a low Canadian tarriff we import all our corroded lead, litharge. etc., from the States. Lead producers here ask that under the circumstances the Canadian government should raise the tariff to the American level so that it would pay to corrode our own lead on this side and so retain at least our own market for ourselves. This is a fair proposal and one which cannot reasonably be refused as long as we protect other industries much better able to do without assistance than the lead mines even to the extent of subsidizing and bountying.

The iron and steel industries which are making enormous and increasing profits have a bounty large enough to pay a respectable dividend on their actual capital. We are not in favor of protection as a principle, but a young and struggling industry which is the mainstay of a new province is of all cases the most deserving and to be consistent the least that the government can do is to equalize the tariff with the American and to admit mining machinery free.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater
Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

The parents and brother of John and Stephen Podbielancik arrived this morning from Fort William. They will make their home here in the future.

PAY-DAY.—Pay will be given out by the Crow's Nest Pass Coal Co. at Michel and Morrissey on Wednesday, Dec. 17th, and at Fernie on Saturday, Dec. 20th.

The Rev. P. H. McEwen, of Victoria, superintendent of British Columbia Baptist Missions will preach in the Fernie Baptist church to-morrow at 7.30 p. m.

The Sunday street car by-law was voted on in Winnipeg on the 9th and it was decided by a vote of 2166 for, and 2370 against, that street cars should not be run in that city on Sunday.

Have just received a large shipment of Suitings and Pantings for the Xmas trade, and now is the time to order and get the Union Label on your clothes, from F. J. Mitchell, Fernie, Union Tailor.

Mr. J. H. Tonkin met with an accident at Nelson early this week. He slipped on the sidewalk near the Phair hotel and received a severe fall which broke one of his ribs. He was laid up a few days but is now able to get around again.

The services at Christ church to-morrow will be held as follows: Matins and celebration of Holy Communion, 11 a.m.; Sunday school and young men's bible class, 2.30. Even song and sermon, 7.30 p.m. All are earnestly invited. Collection in aid of church expenses.

DANCING CLASS.—In response to numerous requests Mr. Heath has decided to start a private class in dancing. The first class will be held in Joyce's hall, which has been secured for the purpose, on Monday, Dec. 15th, at 8 p.m. For particulars apply to Mr. Heath or Mr. Stæbler, or be present at first meeting.

Services in Presbyterian church tomorrow as follows: Morning service at 11 o'clock; subject, "Not Ashamed of the Gospel. Mr. W. McKenzie, the Scottish vocalist, will sing the sacred song "Calvary." Evening service, 7.30 o'clock; subject, "A Sermon for Young Men." Pews are free. All are cordially invited to attend.

Mrs. D. J. McInnes, of Wardner, was accidentally shot in the leg last Sunday. A young man, H. H. Jamison by name, was cleaning a 30-30 rifle and in some unaccountable manner it was discharged the bullet shattering Mrs. McInnes' leg at the ankle. The unfortunate lady was removed to the Cranbrook hospital where Dr. King amputated the limb.

An explosion due to a peculiar cause took place in a Nelson residence this week. The house had not been tenanted for some time and on Monday about ten minutes after a fire was started in the kitchen stove it exploded with terrific force, badly wrecking the kitchen. Apparently the frozen hot water pipes and tank attached to the stove was the cause of the disaster.

The skating rink opened on Monday evening. The ice was fairly hard but a little rough in places. It has been in full blast every evening since and the ice is steadily improving. Large numbers of skaters, children and adults, attend and the season promises to be a good one. The hockey players have got down to business the first practice taking place on Thursday evening.

Mr. MacKenzie, the famous baritone Scottish humorist and vocalist and his company, are announced to appear in Princess Hall next Tuesday and Wednesday. They come with exceptionally good press notices, letters from clergymen and testimonials. Lovers of refined humor and of clean entertainment can be assured of a thoroughly enjoyable night's amusement. The plan of seats is now at the Fernie drug store. See advertisement in another column.

In order to make room for their large importations of Fancy Goods for the Christmas trade, A. J. Purdy & Co. are clearing out their large stock of china at cost.

F. J. Mitchell has the only union tailor shop on Crow's Nest Pass.

Help yourself to the bargains in delicate china at A. J. Purdy & Co.'s, at cost price for 5 days.

Have a look at the lamp display in Quail's window, and then walk in and see the large assortment inside. The finest display of lamps ever seen in Fernie.

A dispatch has been received by the C. P. R. agent at Blairmore, from the head office of the company at Montreal, to remain on duty at that place. This goes to show that the C.P.R. has changed its mind about abandoning that place and will maintain their station there.

Last evening a large party of young people gathered at the Methodist parsonage in honor of Mr. A. T. Claxton, who is leaving shortly for the east. A very enjoyable evening was spent in games, etc. The Epworth League presented their departing president with an address and a beautiful gift.

The Gold Creek Collieres at Frank have christened their village and camp Lille and their coal, when placed upon the market, will be known as Lille coal. This company which has been developing for a long time are now getting their various coal properties into shape to produce and will soon have Lille coal on the market.

The windows of Liphardt's jewelry store are very artistically decorated. The delicate green background and evergreen arches together with the elegant display of dainty silverware and other attractive goods make a combination very suggestive of the Christmas tide. The engraving department, in keeping with the season, is kept busy.

Burn's Club

On the evening of Dec. 4th a meeting of Old Scotia's Sons was held to organize a Burn's Club. The scheme was successfully launched and the following officers appointed:—J. A. Rennie, President, R. Duthie, Vice-President, and J. F. Jarvis, Secretary.

It is the intention of the Club to celebrate Burn's Anniversary on Jan. 24th in some approbriate manner and the secretary wishes us to announce that a general meeting of the Club will be held at the Royal Hotel on Monday evening next at 8 o'clock, when arrangements will be made for this purpose. The present members as well as all those who desire to join the Club are requested to attend.

Notices hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal and petroleum on the following described lands situate about two miles south of the C.P.R depot, Morrissey, B.C., East Kootenay district, on west side of Elk River, commencing ata post marked Mrs. H. A. Senkbeil's southwest corner, thence north 80 chains, thence east 80 chains, thence south 80 chains, thence west 80 chains to place of commencement.

MRS. H. A. SENKBEIL,
Daniel McKenzie, agent.

Nov. 14th, 1902.

My Heart's Darling

* * *

BY W. HEIMBURG

Author of "A Penniless Orphan," "Gertrude's Marriage," "Her Only Brother," Etc., Etc.

Before her on the table stood a stiff bouquet of forget-me-nots and wall-flowers, a welcome from her lover, who, unfortunately, was prevented from being there to receive her, as he had suddenly been called out into the country. One could see from the nosegay that it had been bought from some vegetable woman at market. The slices of sausage were so very thin, the tea so remarkably light colored, the little waitress so thin and undergrown, and the mamma so stiff and punctilious, with the bitter-sweet lines about her mouth.

Tante Dettchen, the sister of Alfred's father, whose place was on the other side of the young girl, was the only friendly thing, as she sat there so fat and comfortable, with such a good-natured face. After Alfred had been praised up to the skies and Lucie had been told over and over again that no one in the world deserved a good wife more than he, the Frau Counselor took a fresh cup of tea, and straightening herself up, began, turning to her sister-in-law:

"And only think how unpleasant, my dear Dettchen, Lucie happened to travel on in the same coupe with Frau von Lowen!"

Dettchen did not seem to find so much to shock her in that. She spread a piece of bread with butter—that is, she took the smallest imaginable piece of butter, and scratched with her knife energetically over the slice. Lucie could not discover, although she tried hard, on which side the butter was.

"Oh! Ach!" she said, shaking her head; "and they spoke to each other," continued the old lady.

"And why not, my dear Clara?"

"I should think people knew enough about that family. Dettchen, do not ask such odd questions."

"But the daughter can not help that."

"Children must bear the sins of their fathers," said the old lady, icily. "I know positively that Alfred will not like it at all when he hears of this meeting. The father is a dissipated, bad man, and the daughter is a fast, unwomanly, stuck-up thing."

Dettchen did not contradict any more; she eat her bread and butter.

"How has the father been living in Berlin?" continued the Frau Counselor. "Like a prince. There is not a Jew in the whole market to whom he is not in debt. Lucie has been telling me that at one time the family lived in their house. They move about everywhere, and stay until they are turned out by their creditors. Then they go to another town, that is, as soon as the elder brother helps them off. Several times he has lost patience, and the Herr Baron had to stay where he was against his will on account of his debts; but that was no shame; that is aristocratic. At last the brother married the young thing, and they meant to send the father off to America. But that did not succeed; the brother died, the young wife inherited everything, and now he swindles her out of no one knows how much. Now he would like to kill off the old grandfather to get possession of the money the daughter will inherit from her mother's side; but there he has to stop. I wish I knew why such drones, such human vermin, are created!"

"But, Clara—" interrupted Tante Dettchen.

"Be quiet, Dettchen!" cried her sister-in-law. "Did not the monster kill his wife? Every child knows that. He drove her to the grave with his extravagances, his bad treatment. But such things are never treated as murder! And what has he made of his daughter? a perfectly useless person, insane with pride. If any one greets her on the street, they never know whether she will acknowledge it, she has such a contemptuous way of passing people as if she did not see them."

"But, sister-in-law, why do you bow to her, then?"

"I—bow to her? I should like to see myself The Frau Counselor Wachsmann was telling me about it. She went to her once to speak about that Woman's Union and the institution for taking care of small children. She was ready enough to give money, she said, but must be excused from giving any personal assistance. There are plenty other persons in our Sewing Society to examine the children, and see if they are well washed and combed besides Frau von Lowen; for example, there is the Frau Counselor of Administration; and, what is most ridiculous of all, is that her old governess is just as disdainful as she is."

The old woman stopped, quite out of breath, cleared her throat, took a piece of sugar in her mouth, and drank her tea. In this way she sweetened a large cup of tea with a very small lump of sugar. Tante Dettchen having nothing tosay in answer to these accusations, folded her napkin thoughtfully, and looking kindly at Lucie, said: "Shall I show you the garden, child, so the time will not seem so long till your lover comes?"

The young girl gave a sigh of relief, and saying to her future mother-in-law, as was the custom, "I hope you have supped well," prepared to follow the aunt. A shrill voice called out after her:

"Did she say when she was to be married?"

Lucie turned round. "In four weeks, if you mean Frau von Lowen, mother,"

"Oh, I congratulate him! There are always simpletons to be caught, it happens to the best of them."

"Come, child," remonstrated Tante Dettchen, and Lucie followed her guide down the steep little wooden steps, across the tiny yard into the garden.

It was an odd kind of a garden in which Lucie and Tante Dettchen wandered up and down. A single pear-tree stood in the middle of the square; the only path was along the wall, and ended in the arbor, over which wild grapes grew in rank luxuriance. Besides this, with the exception of two running roses on pillars, all was devoted to vegetables—pease, beans, onions, and salad—all were in the neatest of beds; but it was pure irony to call it a garden.

Beyond and behind the high massive wall the west wind whispered in the tree-tops, and the evening glow rested on the grand old lindens and elms. "It belongs to the Meerfeldt estate; the grandfather of Hortense von Lowen, you know," explained Tante Dettchen.

Lucie was silent. This meeting with Hortense again she now felt was very painful. She sat silently in the arbor by her aunt, and thought how alone and strange she felt in this new home, which was to replace the cozy brightness of her sister's house. Instinctively she felt an aversion for this woman who was the mother of her future husband. If he only would come! He knew in what a bright, sunny household she had grown up; he knew her sister, who, in spite of her ill health, was so gentle and so kind; he knew the blunt, kindly nature of her brother-in-law, whose good nature spoke in every line of his face, and the children with their shouting and merry games; he knew the lindens before the door, in which the forester apprentices had built an airy seat, and the deep wood, and the mountains.

"Are you crying?" asked Tante Dettchen.

"Don't be angry, aunt; I was thinking about parting from them all"

"Yes; it is hard to leave home," and the good-natured little face nodded. "How did you come to know Alfred?" she asked, with the intention of drawing the girl's thoughts into a new channel; and she succeeded very well.

"Oh, he was at our house every day for six weeks," replied Lucie, and her melancholy expression quickly changed to a beaming one. "My sister was very ill; has he not told you? Once he came toward evening. I was standing at the window of my room. I did not go down to Mathilda—she was really quite well then—because I was so shy when with him; he looked so curiously at me that it made my heart beat." She stopped and twisted her handkerchief into a knot in her hand. "Then, as I was still standing there—it was such a beautiful evening; a few misty clouds were in the sky, which was in a rose-colored glow—I will never forget it, I felt as if something were going to happen to me; then all at once the children came and carried me off down to the sitting-room, and there—"

She stopped; a deep blush mantled her sweet little face.

"Had you cared for him a long time, child?"

She shook her head. "I don't know; it seems as if I had always loved him; but I had never thought of his marrying me. It is great luck for me, they all say," she added.

"They are right. He is a jewel of a man, just like his father—his good father."

At this moment Lucie started; she had heard the rumble of a carriage.

"There he is! there he is!" cried his aunt. "I will go at once to him, so that he shall not go upstairs first." And she ran along the path as fast as her size allowed. But before she reached the gate in the wall she was stopped, and a middle-sized, well-built man stepped by her, with a quiet "Good evening! I thought so," and came with a measured step through the twilight of the little arbor with the girl, pale from excitement, was leaning against one of the posts, a shy expectancy in her large eyes.

He seized both her hands eagerly and bent down with rather stiff courtesy to kiss her.

(To be Continued.)

CANADA LEADS THE WORLD IN THE FIELD OF MEDICAL RESEARCH

William Henry, the Celebrated English Medical Authority, Experiments on Himself with Dodd's Kidney Pills, and Gives the Results.

Englishmen are proverbially slow to take up new things. They cling to the old till the new has been tried and tested, till it has been proven beyond a doubt that it is sound in its every principle.

But once they have passed on it, and passed favorably, it goes forth to the world bearing a stamp of genuine value that nothing else could give it. And from that time forth that new thing, be it a thought, a fabric or a remedy, bears the hallmark of sterling worth that nothing can destroy.

Why Canada is Proud.

It is for this reason that Canada has now cause to be proud of her advance along the walks of science. For an English authority, one of the highest in all England, one of the highest in the world, has declared and declared as emphatically as man can do it that Dodd's Kidney Pills a Canadian discovery, is the one remedy that treats diseased Kidneys as they should be treated, and effectually and permanently cures them.

An Eminent Authority.

William Henry is the name of the English scientist who makes this statement. He is known, respected, and followed in thousands of British homes, for as the author of "The Penny Medical Library" and kindred works he has talked medical science in simple words to almost the entire British family. And William Henry makes this statement concerning Dodd's Kidney Pills, because he has tested Dodd's Kidney Pills thoroughly, because he has given Dodd's Kidney Pills the most thorough and practical of all tests, he has used Dodd's Kidney Pills himself for Kidney Trouble, and has been cured by them.

Nor is this eminent Englishman mild in his expressions of the satisfaction he feels at the result produced by this remedy. "Dodd's Kidney Pills is certainly a wonderful remedy," he declares. "As a Kidney remedy, I would back it against all the drugs in the Pharmacopaeia."

William Henry has of course watched the working of Dodd's Kidney Pills from a scientific standpoint, and he affirms they are alike right in theory and practice. He says of the theory:

WILLIAM HENRY,
Author of "The Penny Medical Library."

As a Kidney remedy I would back Dodd's Kidney Pills against all the drugs in the Pharmacopæia,

Kidney Therapeutics.

"I had read one of Dodd's Kidney Pills pamphlets, and could tell from may call Kidney Therapeutics, I saw ney Pills had really studied what I he was often unable to follow his that he was on the right track, cleanse and tone up the kidneys, and they will not only get rid of the uric acid, but will prevent it accumulating. That is his argument, I take it, and it is a sound one. This soundness has been strongly proved in my case."

Mr. Henry goes on to relate how he was so troubled with Gravel that he was often unable to follow his literary calling—he could not stoop or sit, and so could not work. The pains in the back and loins were excruciating. Another marked symptom was bladder irritation. He also had heart "fluttering." He was depressed, irritable, and subject to bad dreams. He was frequently oppressed by a drowsiness he could not throw off.

Results Obtained.

He tried all sorts of things for his trouble, medicines old and medicines new. Some gave him temporary relief, but that was all. Then he tried Dodd's Kidney Pills, and he gives the following results of his experiment:

"(1.) Before I had finished one box of Dodd's Kidney Pills I was perfectly free from uric acid, my water being quite normal.

"(2.) Three doses brought a great improvement, though I was extremely bad before taking the first one.

"(3.) Every one of the symptoms I have mentioned, as well as the violent headaches which I had forgot to mention, had disappeared.

"(4.) Though it is now six months since I took the last dose of Dodd's Kidney Pills, there is not now a trace of uric acid in my urine, notwithstanding that my diet and mode of life are just the same as they always were."

What it Means.

This, in brief, is the experience of William Henry, perhaps England's greatest and best known medical authority. It puts the stamp of genuine worth on Canada's greatest medical discovery, Dodd's Kidney Pills. This, added to the testimony of the thousands who have been relieved and permanently cured by Dodd's Kidney Pills, must convince even the most sceptical that Canada stands in the front rank of medical research, and that chief among the remedies she has furnished the world stands that sure cure for Rheumatism, Bright's Disease, Diabetes, and all other forms of Kidney Complaint Dodd's Kidney Pills.

The vizcacha of the South American pampas has exactly the same trick of collecting objects that we know so well in the magpie. The vizcacha is a badger-like animal.

Card Gifts.

A Christmas Gift of utmost satisfaction to both giver and recipient is:

An Engraved Visiting Card Plate of the Finest "Script,"
100 Choicest Visiting Cards printed from the plate,
A Fine Seal Leather Visiting Card Case.

We send these complete to any address, prepaying delivery charges, for $3.00.

Write for our new catalogue. It will acquaint you with hundreds of new ideas. We mail it on request.

The man who can catch a flea in the dark can hoe his own row in politics.

Minard's Liniment Cures Distemper.

The world seems all the brighter to some lovers when they turn down the gas.

Spinning coins is uncertain, but it enables a man to turn his money quickly.

HOW TO CURE HEADACHE.—Some people suffer untold misery day after day with Headache. There is rest neither day or night until the nerves are all unstrung. The cause is generally a disordered stomach, and a cure can be effected by using Parmelee's Vegetable Pills, containing Mandrake and Dandelion. Mr. Finlay Wark, Lysander, P. Q., writes: "I find Parmelee's Pills a first-class article for bilious headache."

The smallest flowering plant is a kind of duck weed, known as Wolffia microscopica. Each plant has two flowers.

The solar system is travelling towards the constellation Hercules at fully 20,000 miles an hour. It will take a million years to get there.

Why will you allow a cough to lacerate your throat or lungs and run the risk of filling a consumptive's grave, when, by the timely use of Bickle's Anti-Consumptive Syrup the pain can be allayed and the danger avoided. The syrup is pleasant to the taste, and unsurpassed for relieving, healing and curing all affections of the throat and lungs, coughs, colds, bronchitis, etc., ets.

The New Forest, in Hampshire, is the largest English forest, containing 60,000 acres. The Forest of Dean was 22,500 acres, and Windsor Forest 14,000.

A Rattlesnake Barometer.

The skin of the diamond black rattler is utilized in Florida as a barometer. When preserved like rawhide and hung up, the skin will begin to sweat at the first indications of a storm, even though several hours before the arrival of the atmospheric disturbance.

Violet and Lavender.

Violet and lavender are reckoned among the most important of the many perfume remedies, and both are particularly soothing for the nerves.

Shark Fishing.

A fleet of 100 vessels is engaged from January until August each year in the capture of sharks near Iceland. Only the livers are sought. That of each yields five gallons of oil, which has medicinal virtues resembling those of cod liver oil.

Fruit and Alcohol.

It is claimed that in regions where much fruit is consumed there is much less desire than elsewhere for alcoholic stimulants.

Some people seem to think you ought to pay rent for the place you occupy in their daily thoughts.

MONEY SAVED and pain relieved by the leading household remedy, Dr. Thomas' Eclectric Oil—a small quantity of which usually suffices to cure a cough, heal a sore, cut, bruise or sprain, relieve lumbago, rheumatism, neuralgia, excoriated nipples, or inflamed breast.

The utmost distance from cloud to earth crossed by a lightning flash is about four miles.

Minard's Liniment Cures Colds, Etc.

The Amazon is navigable for 2,200 miles from the sea; the Mississippi for about 2,800.

Many watches tick five times to the second. This means 157,788,000 ticks in the course of a year.

The proprietors of Parmelee's Pills are constantly receiving letters similar to the following, which explains itself. Mr. John A. Beam, Waterloo, Ont., writes: "I never used any medicine that can equal Parmelee's Pills for Dyspepsia or Liver and Kidney Complaints. The relief experienced after using them was wonderful." As a safe family medicine Parmelee's Vegetable Pills can be given in all cases requiring a cathartic.

Hard coal, exposed to the weather, loses in bulk 8 per cent. per annum; soft coal loses fully 12 per cent.

Lake Manasanovara, in Thibet, is the loftiest in the world, being between 19,000 feet and 20,000 feet above sea level.

The battle of tours, in 732 A.D., is said to have been the most murderous on record. Three hundred and fifty thousand men in all were killed.

Don't Monkey with a Cough.

Just a little tickling cough may not suggest any trouble but it is often the fore-runner of very serious lung disease. **Gray's Syrup of Red Spruce Gum** soothes and heals the irritated membrane and the cough passes away. Gray's Syrup of Red Spruce Gum is a carefully compounded preparation and is a specific remedy for all throat and lung affections. 25 cents a bottle.

One bottle will demonstrate its virtue.

Gray's Syrup of Red Spruce Gum

FROM OLD LONDON

NEWS OF THE WORLD'S METROPOLIS.

Rumor That Lord Milner Will Succeed the Earl of Minto as Governor-General of Canaea—Grave Unemployed Problem,

London, Dec. 9.—Ottawa cablegrams repeat the rumor that Lord Milner will succeed Lord Minto next year. The previous idea here was that Lord Milner would be offered the succession ol Lord Curzon in India, though the fact the Lord Milner is a bachelor would probably create greater diMculties in India than in Canada. The Ottawa correspondent of the London Express says the popularity of Lord Minto is declining in the Dominion because the charge he recently made in attempting to interfere too strongly with governmental activity.

* * *

The West End is ablaze with light nightly; all the amusement places are crowded, and theatre supper parties keep the fashionable hotels and restaurants busy long after midnight. In East London the winter is having a very different effect. Thousands of unemployed persons daily congregate at the dockyard gates, eager for a day's work. Unskilled laborers are there in strong force and the police find it necessary to protect the foremen who distribute the work tickets each morning. It is estimated that 500,000 persons are idle in the United Kingdom, and the board of trade returns show the largest percentage for ten years past of unskilled persons out of work, while the proportion of skilled men without employment is constantly growing. The Woolwich arsenal authorities have discharged 2,000 mechanics since the winter set in and are preparing to let out 4,000 more. To the army of people out of work must be added 56,000 members of the army reserpe, who have been released from service with the colors.

A number of the newspapers have started subscription columns and daily print harrowing stories. A number of the London suburban councils are starting public works in order to employ a small proportion of the idle persons. The London council will meet to consider the proposition for calling a conference of municipal bodies throughout the country to discuss what can be done towards establishing a permanent system for relieving the unemployed.

Coincident with the general distress and idleness the shipbuilders' federation is quietly preparing for a test with the labor unions that may precipitate a general strike equal to the great engineer's strike of a few years ago. The shipbuilders who have suffered for years from the restriction of output countenanced by the unions have decided that it is necessary to introduce radical reforms in the way of labor-saving machinery. This means a reduction in the price of piece work, on which almost all the yards are running. Since the new machines in many cases can be run by unskilled laborers, if the unions elect to strike there is a good chance of replacing the union workmen from the army of persons now clamoring for employment.

* * *

It is understood that Premier Balfour will appoint a royal commission to inquire into the subject of municipal trading. The government has long been desirous of grappling with this question, which admittedly rises to an issue of the first importance. The success of municipal trading in certain of the municipalities is encouraging the smallest bodies to embark upon undertakings for which they are hardly financially strong enough.

Over a dozen municipalities have this year applied to parliament for power to deal not only with the ordinary administration of electrical systems, but also with those developments and accessories, which have hitherto been left in private hands. This condition of things has led to a strong demand for an impartial investigation into the probabilities of the future and into the security that ought to be exacted on behalf of ratepayers.

* * *

Premier Balfour announced in the House of Commons on Monday that an ultimatum had been sent to Venezuela, and that in the event of a satisfactory reply not being received, the British and German governments will take measures to enforce their claims against that country.

* * *

The widespread suffering in Denmark, resulting from industrial stagnation and commcecial depression has been intensified by the unusual severity of the winter, which set in a month earlier than usual. Building operations were largely abandoned, increasing the number of persons unemployed and seriously taxing the resources of the charity organizations.

The latest way of cutting diamonds has increased the number of facets from 58 to 80, and greatly heightened the beauty of the stone.

The Doukhobor pilgrims are settling down to a quiet life.

The first contest for the America's Cup will take place August 20.

The Duke and Duchess of Connaught were heartily welcomed to Cairo on Dec. 6.

James Slathers, a C. P. R. fireman was badly scalded at Bonheur.

The mayor of Denver and eleven aldermen were sentenced to serve four months in jail for contempt of court.

The C. P. R. will accept western cattle shipments for St. John, handing the cars over to the Intercolonial at Montreal.

Permits to enter the Transvaal or Orange River will be issued only at South African ports. Persons are advised to ascertain before leaving whether permits will be granted them.

Western Business.

Toronto Globe: Tuesday saw the closing of the lake and rail route for freight to the west, and the withdrawal of lake and rail rates, and in future shipments from the east will ship of the Northwest Transportahave to go all rail. * * *The movement of freight from eastern Ontario to the west this season has been of an exceptionally heavy nature, and with the closing of the lake route the railway men are in a position to say something about it. The Canadian Pacific will show an increase of probably at least 20 per cent. on its business, perhaps more, while the Canadian Northern, handling business exclusively from Port Arthur, has handled an amount of freight tonnage that has far exceeded expectations. As to the Northern Pacific, the Canadian Northern cut it out of all the lake business that was formerly handed over to it at Duluth, yet it is stated that without the lake traffic, the all-rail business this year of the Northern Pacific into Manitoba exceeds its entire lake and rail business last season by nearly 20 per cent.

To the Pacific coast the movement of freight has also largely increased. The business of the Great Northern railway to coast points from eastern Canada shows an increase of nearly 30 per cent., and other roads will probably be able to boast of proportionate increases. The Kootenay business does not appear to show any increase, and the railroads will notice this in receipts, for on many classes of goods to the Kootenay rates are from 60 to 70 cents a hundred higher actually than to Pacific coast points.

One line in which western business fell off was in canned tomatoes. Ontario canners were able to fill only about one-third of the business offered because of the failure of the tomato crop here. Shipments of eggs, apples and grapes have been remarkably heavy to Manitoba, and in the Pacific coast a remarkable expansion in the trade in pianos and organs, and all other musical instruments. This is shown in the fact that while a few years ago practically only three musical instrument firms shipped to the coast nearly every manufacturer in Ontario is now a shipper, and apart from Toronto, such places as Woodstock, Clinton, Bowmanville, Guelph, Listowel and Goderich are all participating in the benefits of this increased demand for musical instruments.

DIDN'T LOSE MUCH.

At one of the annual fairs which are held at a small town in Russia a gentleman observed a gypsy and a Pole haggling over the sale of a horse. Full of curiosity, when the two separated, and anxious to know how two such shrewd characters had bargained, the gentleman called the gypsy to him and enquired how much he had got for his animal. The gypsy opened his hand and showed a ten-rouble note (valued about a guinea.)

"But isn't that very cheap?"

"No," said the gypsy, "he is dead lame."

The gentleman then sought out the Pole and said:

"So you have given ten roubles for a lame horse?"

The Pole, however, with a knowing look, said:

"Lame! He's as sound as you are. I saw he was badly shod and only limped in consequence."

The enquirer returned to the gypsy and reported what the other said. The former gave a tremendous and most significant wink and whispered:

"He's as lame as a two-legged stool. I had him badly shod on purpose to make people believe that that was the cause of his limping."

When this was communicated to the Pole he seemed for the moment taken aback, and hung his head; then, with a little sigh and a shrug of his shoulders, he said, quietly:

"All, well, it's all right; it was a bad ten-rouble note!"

RAILWAY ACCIDENTS

C. P. R. PASSENGER TRAIN COLLIDES WITH A BULL.

Locomotive and Three Cars Go Into the Ditch Near Caron, Killing the Fireman and Injuring the Engineer---Passengers Escape.

About nine o'clock on the night of Dec. 5 No. 2 eastbound C. P. R. express ran into a bull five miles east left the track and were thrown into the ditch. Fireman James Armstrong was killed. Engineer McLeod escaped with a few bruises. The engine and two cars were badly smashed. No passengers were hurt. Eighty-five dollars was collected on the train for Armstrong's widow.

The accident happened fifty feet west of the crossing, five miles east of Caron. There is a down grade there and the train was going at a lively pace. The night was cold and a nasty wind blew the steam and smoke right in the cab window, rendering the engineer's vision difficult. Engineer McLeod thinks the bull must have been lying right across the track, for when the train struck the animal, the engine went about five feet into the air and then turned over into the ditch. McLeod had presence of mind enough to apply the emergency brakes and thus saved worse consequences. As it was he was thrown from the engine and landed on his hands and knees, escaping with a bad shaking, a few bruises and scalds. He is one of the best engineers on the road.

Fireman Armstrong was less fortunate. He was found right under the tender, buried in coal, only his legs showing. He must have been killed instantly and the position indicated an attempt to escape by jumping. He was a young man, 28 years of age, and came from Montreal. His wife and child arrived in Moose Jaw only about two weeks ago. Fortunately the agent at Parkberg and a dispatcher were on board and had an instrument with them. They tapped the wires and brought a wrecking crew from Moose Jaw, and on board were Dr. Turnbull and the two superintendents. The engineer was the only one to need medical aid as no passengers were hurt, probably owing to the quick action of Engineer McLeod.

The bull that caused the accident is an old offender and has given more than one engineer a bad fright.

SEVEN KILLED ON I. C. R.

Seven persons killed and an equal number injured, some seriously, in a railway accident at Belmont station, on the Intercolonial, eight miles from Truro, early on Saturday morning. The dead are:

Engineer Samuel Trider.
W. B. McDonald, passenger.
Wm. Kenndy, of Newfoundland.
Malcolm McLean, Atherton, P.E.I.
Philip Toole, Newfoundland.
Wm. Hall, Newfoundland.
Miss Minnie Croake, Halifax.

Passenger express No. 25, of the C. P. R., from Halifax for Montreal, was the one derailed, and in addition to the appalling list of fatalities, the big locomotive was piled up on the trackside and three cars smashed to splinters. It is supposed that the engine jumped the track, plunged along the ditch for three lengths and toppled over on the side, burying beneath the boiler Samuel Trider, who died at his post. The baggage, postal, and second class cars were piled together in a heap, and the track strewn with wreckage.

Five passengers were killed instantly, and the other two victims died shortly after being taken from the wreck. The second class coach was occupied by the victims, who were buried beneath the guins, disfigured almost beyond recognition. Harry Campbell, the fireman, had crawled half way from the cab window, and as the engine careered was thrown clear of the wreck, and escaped with slight injury. The escape of Express Messenger Morton and Postal Clerks Pipwell and Belyea who were in the two first cars of the train was almost equally miraculous. All three were injured, but not seriously.

While the Cunard liner Etruria was ascending the Mersey Saturday morning, Col. Lamb, a member of the English Rifle team, returning from the international competition in Canada, committed suicide. He shot the top of his head entirely away with his rifle.

James Rodgers, of Belmont township, Ont., was driving across the Canadian Pacific tracks with his family when a train struck the sleigh. Mrs. Rogers and William Rogers, aged 12, were killed. Mr. Rogers and his daughter, aged 9, were fatally injured and another fourteen-year-old lad was badly hurt.

George Bell, a miller of Erin, Ont., was caught in a shaft making 212 revolutions a minute. He was swung around till his clothes were all torn off except boots and collar, and was flung unconscious into a bin. He escaped with a few bruises and a shock

ROOSEVELT'S MESSAGE.

It Embraces all Questions of National Importance.

Among the important expressions of President Roosevelt in his message to the two houses of Congress at the beginning of the second session of the 57th Congress are the following:

"We will continue in a period of unbounded prosperity. A fundamental base of civilization is the inviolability of property; but this is in no wise inconsistent with the right of society to regulate the exercise of the artificial powers which it confers upon the owners of property under the name of corporate franchises in such a way as to prevent the misuse of these powers. We are not hostile to them, we are merely determined that they shall be so handled as to subserve the public good.

"I believe that monopolies, unjust discriminations which prevent or cripple competition, fraudulent overcapitalization and other evils in trust organizations, and practices which injuriously affect interstate trade, can be prevented under the power of congress to regulate commerce with foreign nations, and among the several states through regulations and requirements operating directly upon such commerce, the instrumentalities thereof and those engaged therein.

"We should not shrink from amending the constitution so as to secure beyond peradventure the power sought. The question of regulation of the trusts stands apart from the question of tariff revision. Wherever the tariff conditions are such that a needed change cannot with advantage be made by the application of the reciprocity idea, then it can be made outright by a lowering of duties on a given article.

"In my judgment the tariff on anthracite coal should be removed.

"It is earnestly hoped that a secretary of commerce may be created, with a seat in the cabinet.

"The formation of the international tribunal which sits at The Hague is an event of good omen, from which great consequences for the welfare of all mankind may flow.

"The congress has wisely provided that we shall build at once an Isthmian canal, if possible, at Panama. The attorney-general reports that we can undoubtedly acquire good title from the French Panama Canal company.

"There should be no halt in the work of building up the navy; it is the surest guarantee of peace."

Mgr. Langevin on the School Question

Le Journal, of Montreal, publishes a second letter from Archbishop Langebin, of St. Boniface, on the Manitoba school question, addressed, "To my French compatriots of Quebec," reiterating his former declaration that the Manitoba school question is not settled, nor have the Manitoba minority any reason to be satisfied. In a letter he gives six reasons why it is not settled: First, because they are not permitted to explain the commandments of God from a Catholic standpoint; second, because they are unable to recite Catholic prayers; third, because they are not allowed to supply Catholic books; fourth, because they are not allowed to place the crucifix or other sign of religion in schools; fifth, because sisters are not permitted to wear uniforms in the schools; and sixth, because the master or mistress is called upon to take an oath to safeguard the interests of neutral schools.

He says that if any man says in view of this that the school question is settled he is a man of bad faith. He points to the example of England where parliament has by the celebrated Education Bill recognized the principle of separate schools in order to respect the conscience of parents.

Here's a Pretty Mess!

A dispatch from Niagara Falls Ont., says: A four-page leaflet was distributed in town with the headline, "Whisky Sold Privately by Ladies' Aid Society of Methodist Church in Aid of the Organ Fund."

Rev. Father Collings, pastor, said in regard to the matter that he was astonished, but would not discuss it. Mrs. Stephens, president of the Ladies' Aid, declared the matter had occurred through an error of her daughter, Carrie, who had received a list of the manufacturers of Canada from Secretary Young, of the Manufacturers' association. She had taken the list and sent a letter requesting a contribution to each one. In due course Hiram Walker & Sons sent samples of their wares. Then, in consultation with her friends, and not desiring to offend the generous donors, she suggested to sell them privately, and not at a public church sale, devoting the money to the organ fund. Permission was given her, and she did so. The pamphlet has been withdrawn.

Joseph Johnston broke into the Singer office on Queen Street West, Toronto, on Dec. 2. After going through the store he got out of the cellar window under the sidewalk. Here he stuck fast till P. C. Clark came along and lifted him out and took him to the police station. The police are not sorry to get Johnston as there are other charges against him.

THE WIDE WORLD.

Telegraphic News of Two Hemisphere Briefly Told.

The C. P. R. is surveying an air line via Saskatoon to Battleford.

The defender of America's cup may be named the Eagle.

Bread prices raised one cent a loaf in the East End of London on Dec. 8, thus intensifying the distress of persons out of work.

The latest returns of the referendum vote in Ontario are: For the act, 154,974; against, 84,742. Majority, 70,232.

Lord Strathcona's and Lord Mount Stephen's Gift to King Edward's hospital fund amounts to £16,376 13s. 4d. per annum.

The California limited on the Santa Fe road was wrecked between Marceline and Rothville on Dec. 8. The engineer and fireman were killed. The wreck is a very bad one and many passengers are believed to be injured.

The trustees of the C. P. R. pension fund will issue a circular this week, notifying employees of the regulations for operating the fund. There are said to be very liberal terms for the men.

A bad accident occurred on the Minnesota and International railway at Bermidji, Minn., on Dec. 8. A chair car on the north-bound passenger train left the track while switching. It was filled with passengers, and rolled down the embankment. None on board were killed, but nearly every occupant of the car was more or less bruised. People in the other cars were thrown from their seats, and passengers in every section of the train received minor injuries.

The crops in the northern district of Sweden, and in a part of Dale-Carlia, have failed entirely owing to the cold, wet summer, and collections are being made in all cities and towns, by banks corporations and private individuals for the relief of the sufferers. From the country, especially from Scania, large quantities of supplies are sent daily to the distributing committees.

A dispatch from Thessalon, Ont., Dayton, met a shocking fate, having says: James Lovatt, postmaster at been almost entirely eaten by a sow while in a fit. Deceased was subject to fainting spells, and while doing some chores about the yard he fell unconscious to the ground. A sow which was running at large on the place, at once began to devour her helpless victim, and when the body was found it presented a horrible spectacle. The flesh was gouged entirely from the face and head, and the breast was almost free of flesh, the stomach torn out and the arms and legs fearfully lacerated. Deceased's wife with two little daughters left him a couple of weeks ago, and went to reside with friends in Michigan, and at the time there was no one about. One of the neighbor's children was first to discover the tragedy.

MYSTERY DISSOLVED.

Remains of Missing John Mode Found in the Klondike.

Advices from Dawson City say the mystery which has surrounded the disappearance of John Mode, on German creek, near Dawson, has ended with a gruesome sequel. The bones of Mode were found in the wilds back of German creek by an Indian, and have been brought here and fully identified by the Northwest Mounted Police. Thus is chronicled the last chapter in one of the most puzzling mysteries that have arisen in the north.

Mode was 55 years old and hailed from Vankleek Hill, Ontario. All his years he followed mining, and it was while on a prospecting tour on German creek that he became lost two years ago. It was feared by his friends that he had been murdered for his money, but the circumstances under which his remains have been found dissipate all such belief.

In the man's pockets were found $28 in money of the United States and Canada, and a gold watch and other articles. The miner's license issued by the government to Mode was found in the rotten clothing, and was plain enough yet to identify the man fully. The dentist who filled the man's teeth identifies the skull.

The trip on which Mode perished was taken in the fall of 1900 with a man named Rankin. As is a common occurrence among miners, Rankin went down the creek ahead of Mode. It was expected that Mode would be along soon, but he was never seen alive again. The police are satsified from the position in which they found the bones of Mode that he wandered off the trail and became lost in a heavy snow storm, which prevailed about that time.

German creek is little populated at the best, and is not traversed much, so it was mere accident that the bones of the man were ever found. He had wandered miles from the trail, and there was not the remotest probability of him reaching a place of safety by following the course he was pursuing when he was overcome.

COMMUNICATIONS.

The Editor does not hold himself responsib l for the opinions expressed by correspondents.

To the Editor.

TO THE EDITOR:—It is commonly reported that I gave orders that the body of the young Englishman recently killed in the accident in the Morrissey mines should be buried without an inquest, as this was not necessary.

Now, sir, I wish to take this opportunity of denying the truth of these reports. I was notiefid of the case by the coal company officials, and being quite unable to attend to the matter at the time on account of illness I went to the coal company's office and told them of my inability to go to Morrissey. I advised them to wire for Mr. Moffat, the coroner at Cranbrook, and in the meantime have the body prepared for burial, but not to proceed further until a coroner arrived. These are the facts of the case so far as I am concerned.

Yours, etc.,
H. H. TRITES.

DEAR EDITOR,—Many thanks for the impartiality you have shown in permitting both sides of the question to be placed before your readers, but as socialists we must reply to an epistle that entirely sweeps away socialism. You state first the excellence of our cause and then the fact "that capitalists must recognize that their wealth is committed to them in trust by the greater Master." We ask you is wealth, power, riches, compatible with meekness and goodness or with deceit, craft, envy, spite? President Baer, with his co-operators in the States, disgusted a whole nation with their heartlessness, cruelty, indifference to poverty, and yet they held such tenets as these. The marvellous rapidity with which wealth changes hands, the big fishes eating up the little ones, the way wealth is concentrating more and more in the hands of a few, should show the inconsistancy of such a belief. That men should put it forth in this 20th century is incredible to us. Was not this preached from the pulpit against slave emancipation? You could find no existing tyranny it could not be preached in favor of. We will show "our lamentable ignorance of that freedom" again by stating that the church and newspaper press instead of remaining passive in those great movements actually opposed them. We know that the men who fought for liberty of conscience, liberty of the press, the right to hold private meetings, were professed church-goers, but turn up the leaves of your mouldy history and see that if the church as a body did not oppose them. Read the greatest authorities on English history—Macaulay, Green, Hallam. Read Tolstoi, the 1st philosopher of tho age. Read Hall Caine, the eminent novelist, and defy us on these facts. "It is interesting to note how the church and press did 'not' work together in the emancipation of the race from spiritual as well as physical slavery." Can you give the name of "those authors and editors who continued to advocate the cause of the oppressed and were thrown into prison?" We know af only two in history, one that of Dr. Henry Sachaveral, who wrote in favor of ritualism; the other that of John Wilkes, editor of the North Briton who published a libel on George III. From the former we can trace no results, but from the latter, a worthless man of no principle, who had no desire to advocate the rights of the people. indirectly through his imprisonment and ill-treatment, caused the agitation for the press freedom to revive.

With regard to the Puritans, could the church do otherwise than stand against the Catholicism of James? The very press are of parliament and people prevented these from doing otherwise, and this proves itself in the glorious revolution.

"Again, Cromwell and his Ironsides were above all things men of the church" They raised England from the lowest to the highest position, commercially and politically (as a force) of any country of that time; yet the despotism was more complete under Cromwell than under the deposed king. His opponents were perhaps as much imbued with religious sentiment as the Roundheads and held those ideas of divine ordination you so greatly extol. In the beginning, you state the church and press worked together and later, after the reign of George III, as a rule they worked together. We say they did not and have never done. How can the interests of the newspaper press and church be in harmony? When you dogmatically state that these forces prevented a revolution similar to that in Erance you show that "lamentable ignorance." We think the French revolution just and glorious; we believe it to be that of an oppressed people against a corrupt, cruel, despotic oligarchy, and yet the church, the instruments of the upper classes, thundered against it with all their power. That there are conscientious men in every profession we fully believe, and Raikes was one of these. If he directed attention to the awful state of our workhouses, prisons, and the terrible atrocity of child labor please find who brought about reform—not the church and press, either individually or co-operatively.

We know that various sects claim the leaders of Emancipation in their respective denomiuations, but no record exists of the church or press as a unit helping to propogate these movements. Hall Caine says 'they actually opposed it.' The following is an extract from many in my possession and which I will forward to the writer who discloses his name:

"Rev. J. C. Pistol, Orange, South Carolina, in an address at a public meeting stated that slavery is supported by the bible and the fact that it is of divine appointment should be proof enough with the christian that it cannot be a moral evil. It is the Lord's doings, and it is marvellous in our eyes, and had it not been for the best, God alone who is able, long since would have over-ruled it."

We have sermons from all sects and nearly all the southern States, and hence have no other course open to us but to regard that statement of the church and press being instrumental in bringing about freedom to millions of slaves as an absolute falsehood. You could have charged us with being indefinite but never with being negative. Now, however. we will put the charge on you and advise you to write a new history. You who have shown by this letter that you do not understood the first principles of socialism charge us with being incoherent and visionary.

Can you or anyone else give an exact definition of socialism? Then why charge us because we did not? Did we not state the brotherhood of man, the uplifting of the poor, the bettering of the condition of the workers, the education of the masses, the stand against drink, crime and force of all kinds; and if this is not the essence of christianity, what is? Not only the Gentiles seek after these things but also the church. Two forces have ever kept the church in bondage and kept it from holding its right place as the champion of the people. One is a low, unworthy material one and the other a high mistaken one. We dare say you can see that we mean (1) the money part, by which the church must stick to those in power; (2) the idea in this letter of divine ordination. We honestly believe the laborer should have just as many talents as his master. Take the plain facts of the case. Christ was born poor instead of being powerful and rich. His opinions therefore were those of a poor man.

Again, we declare that the interests of the capitalist and worker are not and can never be in harmony, since the aim of one is to make a living, that of the other to make a profit. Because you fail to see this "we cease to command the respect and support of intelligent men" You yourself bear me out in this, by saying "that until the capitalists recognize the fact that they must use their wealth for the good of all, and the laborers likewise, their interests will never be in harmony." I conclude they are now antagonistic.

THE LEAGUE,
THOS. B. CRAIG Dec. 8th.
Secretary.

A DISASTROUS SLIDE

EIGHT MEN KILLED AND SEVERAL INJURED.

Molly Gibson Mine the Scene of Disaster

Nelson, B.C., Dec. 27—One of the most destructive snow slides that have ever occurred in the Kootenays took place on Christmas night resulting in the raising of the Molly Gibson bunkhouse, probably the death of eight men and the maining of several others. The slide was totally unexpected, as since the buildings have been erected no slide has ever threatened them. Tha bunkhouse which was a two storied frame structure stood on a small ridge at the lower edge of the basin sloping gradually up to the glacier that can be seen from Nelson, below the Kokanee peaks. The mine is above the timber line and is about 10 miles from Kootenay Lake. The men who were in the bunkhouse and have not yet been accounted for, and although there possibly may be some of them alive, as given by one of the survivors who reached the landing yesterday, are L. Brownlee, M. E. Hall, Assayer, Nelson; W. G. Murphy, Ainsworth; T. Rousse, Silverton; W. Collins, Nelson; two unknown Italians, and Gee Chip, Chinese cook. Those accounted for are J. A. Campbell, dead; D. McLaughlin, shoulder dislocated and leg broken; J. R. Dunlop, leg injured; McInnes, slightly injured: John A. Bell, foreman, one arm cut; McCreath, safe; Harris, safe; Johnston, safe; "Billy" D—, safe; J. McDonald, safe; unknown Italian safe; Jules Labelle, safe.

The first information as to there being anything at the mine was received at 1:30 yesterday afternoon when Jules Labelle staggered into the McGuire at the Molly Gibson Lodge. McGuire saw. by his appearance that something had happened and getting a few particulars from him as soon as possible telephoned to Nelson for assistance to W. C. Koch, who has contracted for hauling ore from the mine.

According to Labelle's story, there were 19 or 20 men in the bunkhouse at the time of the slide only one shift is worked and as it was Christmas day had knocked off at noon and stayed in in all afternoon. After supper an impromptu concert was held which was kept up till 10 o'clock, they all turned in but Labelle and all lights were extinguished except a candle which he stuck up at the window at his bunk to read by. After reading a short time he blew out his light and turned over to go to sleep. The weather was then very stormy. it was snowing hard and a regular gale was blowing. As he was sinking off to sleep he heard a distant rumble which rapidly grew louder, he knew it was a slide but never dreamt of it coming close till a sudden crash came and the building seemed to go to pieces. The roof came right down on top of Labelle but although the upper bunk was destroyed he was unhurt, though there was not an inch to spare between the scantling and his body. He managed to crawl out, pulling out his clothes which had been rolled up for a pillow under his his head, with him, above the roar of the wind he could hear a dozen voices calling for help away down the hillside below. He helped Johnson and McGinnes out and John Bell, the foreman, showed up. He and Bell then made their way down the hillside hoping to extricate some of the victims. There was from four to ten feet of loose snow along the trail and it was only with the greatest difficulty that any progress was made. McLaughlin was found about 300 feet below the site of bunkhouse. Despite his dislocated shoulder and broken leg he managed to partially crawl out and then with the aid of Labelle and Bell was finally got over to the blacksmith shop which was in the mouth of No. 5 tunnel a short distance away, Here they made a fire and went back to the office for some blankets to make an easy bed for him and to warm him as in common with all who had been carried down the hill he was practically without clothes, the snow having ripped the thin night clothes and underware rom their bodies.

CHRISTMAS IN THE STORES.

Beautiful Displays of Goods and Artistic Window Decorations.

The Christmas tide is here and the merchants of the town have stocked their stores and decorated their windows as becomes the festive season.

Space will not permit a minute description of each store but it may be said in general that the mercantile houses of Fernie are far above the average in their efforts to meet the requirements of the Christmas trade.

Santa Claus had all kinds of chances of getting his stock replenished in this town, and judging from the large sales in the toy departments it is thought that he paid many stealthy visits to these places.

The Christmas trade so far is very satisfactory and when the holiday season is over no doubt the merchants will find this Christmas the best in the history of the town.

TheP. Burns butcher shop is worthy of special notice here. The walls are covered on all sides with the finest dressed meats of all kinds, the pride of the prairie. But it is not alone the fine display of meats that make this the most charming corner in town. This Company has gone to much expense and trouble in decorations of evergreens, both native and foreign, which have been arranged with taste and skill. A 41 lb. turkey hanging like a high chandalier from the ceiling and a graceful deer are special features. These decorations will remain until after New Years and the citizens who haven't examined this display should call.

The London and Liverpool presents a beautiful appearance in the evenings, when the many colored Chinese lanterns are lighted. The windows are models of art, one representing beautiful fabrics and the other Christmas confectioneries, etc., appearing behind falling snow flakes.

The store of A. J. Purdy & Co. is a marvel to all who have seen it in its holiday attire. An immense stock of special Christmas stock has been put in and the whole of the large store is crammed with beautiful objects. It is all just as pretty as the window show, and no hne should miss seeing this stock before it all goes.

THE WRESTLING MATCH.

Lewis Gets Three Out of Four Falls and Wins.

The catch-as-catch-can wrestling match between Unfriend and Lewis in Princess Hall on Tuesday evening was witnessed by a thin gathering which keenly appreciatod this fair struggle beween two well matched men.

Lewis had considerable advantage in weight and Frank partly made this up in agility and both seemed to be well muscled. The clinching was mostly confined to the head and very little leg work was done.

The first fall was won by Lewis in 10½ minutes. The second was also won by Lewis in 8½ minutes. The third was a grand struggle and the strong German Boy succeeded in forcing Lewis' shoulders to the mat. This lasted 9 minutes. The fourth fall was won by Lewis on the strangle hold in 11 minutes.

Tom Whalen acted as referee and "Con" as timekeeper. The match was fair and square and was a good exhibition of the game.

Unfriend objected to the strangle hold and challenged Lewis to a mixed match of catch-as-catch-can and Graeco-Roman rules, $100 a side. This offer was accepted and this inteesrting contest will take place in Princess Hall on New Year's night.

Judge Wetmore has filed with the Exchequer court at Ottawa. his finding of the court which came up last August over the ownership of Blairmore townsite. This vexed question has often been reported as settled but these were incorrect. The fight is between H. E. Lyon and M. McKenzie and Felix Montalbetti. The judgt finds the evidence of Montalbetti very irregular. It is expected that the final decision will be given out from Ottawa before the end of December.

The Moyie Leader came out with a big leader last week dealing with the great progress made in the lumber industry of that district, which has taken the place of mining. There are now 300 men at work in and around the camp. The Moyie Lumber Co- are running four camps and employing 150 men and the East Kootenay Lumber Co. have between 150 ond 175 men employed.

COAL SUPPLY AND STRIKES.

The following article which appeared in the December number of "The Mining Record," will prove of interest to our readers:

Judging from recent occurrences it would appear that the Crow's Nest Pass coal miners are displaying an ill-advised provocation, the strike this month at Michel, happily short-lived, being a case in point. The men are creating by their tendency in this regard a prejudice against themselves in the public mind and selfishly injuring important interests in other localities. The feeling of the great body of the people towards mine laborers and workers is that they merit every reasonable consideration that can be extended towards them. Indeed it may be said with truth that the dangerous and difficult nature of their occupation entitles miners, and coal miners especially, to the hearty sympathy of all classes of the community, and the general disposition is to extend to them every protection and advantage to which they can make any color of claim. Our statute books furnish evidence of this, and the attitude of the press towards miners on strike is corborative. But this sympathy may easily be alienated, and there is no surer way of bringing about such a result than the course which apparently commends itself to the judgment of the Crow's Nest Pass Miners' Union leaders.

The relation of the coal miners in the locality mentioned towards the mining industry of southern British Columbia is very intimate. If coal is not mined, coke cannot be produced, if coke is not produced smelting operations cannot be carried on, and without the operation of smelters near at hand the profitable working of most of the British Columbian mines is impossible. A stage has been reached in this province, when by the production of good coke at a moderate price, the provision of transportation facilities and the erection of smelters, the successful working of our copper mines has been removed from the field of doubt. If labor conditions remain tranquil there is every reason to look for a considerable investment of capital and the consequent employment of a very large number of people at good wages, and a consequent increased prosperity for the whole community. The harmonious working of the several interests concerned can be dislocated by a refusal of either one of them to act fairly. But if a smelter owner is unreasonable he can be brought to terms. If a railway company is exorbitant in its charges, there is a remedy at hand. The owners of the Crow's Nest Pass coal mines are tied down by their agreement with the Government as to prices. Even if these things were not so, the several businesses mentioned would be compelled by self interest to take a reasonable attitude toward each other. Capitulists are not likely to be guilty of the egregious folly of rendering each other's investments unprofitable if they can avoid doing so. Each may endeavor, and naturally will endeavor to make the best possible bargain for himself, but none of them is ever likely to adopt the suicidal policy of tying up industry, that is, of rendering invested capital unproductive, simply because he cannot have his own way. It is only among the miners that we find such a course favored. At the instigation of, generally, irresponsible leaders, who in many cases foment trouble only for the sake of justifying their leadership, coal miners do not hesitate to go on strike and throw the whole industrial machinery out of gear. Because some grievance, which may be relatively trivial, is not remedied in such a manner as he deems proper, the agitator orders a strike, and the men respond without taking into consideration that their action is almost certain to be far reaching and affect hundreds of innocent wage-earners in other localities.

It is very clear that, if the mining interests of British Columbia are to be placed upon a sound basis and if the general prosperity of the country is to be promoted, steps must be taken to prevent the dislocation of connections that are absolutely necessary to the successful prosecution of business. No one wishes to deny to coal miners that reasonable measure of protection, to which they in common with every one else, are entitled, but it is insufferable that great industries shall be brought to a standstill arbitrarily for causes, which are inconsiderable and unimportant compared to the consequence resulting from strikes. Without entering into any discussion of the labor question, as it is viewed by the miners' unions, it may be incontrovertibly asserted that the strike should be the last resort of employees who have a grievance, instead of being, as it often is, the first to be proposed. If the laws of the country are not sufficient to secure this, they should be made sufficient. In a British country the right of an individual to refuse to work until objectionable conditions have been rectified will hardly be denied, but it is a fundamental principle of the common law that combinations may be unlawful even though the act for which they are founded might be lawful in the case of an individual. An effort on the part of one portion of the community to coerce another portion of it to a certain line of action ever was hateful to the common law, and we are drifting away from those principles which are the foundation of our liberty, when we permit the continuation of combinations, either of labor or capital, which attempt to bring about by coercion what cannot be secured by the regular operation of the laws. The establishment of an imperium in imperio in Canada would be intolerable even if it is regarded with complaisance in the United States. It is said that a prominent public man in the latter country on being ushered into the presence of President Roosevelt and Mr. Mitchell, president of the Mine Workers, grasped each of them by the hand exclaiming: "I have the honor to greet two great presidents." This sort of thing may suit the hysterical and spectacular politics of the United States, but it is certain to lead to disaster in the end. The government of all the people must be supreme, and it is a wrong principle which puts a voluntary association, no matter for what purpose it may be established, upon anything like an equal plane with the government of the state. Unless all men are equally subordinate to the general government; unless there is only one legislative body in the State whose mandates all the people must obey; unless there is only one tribunal recognized, either avowedly or acitly, for the settlement of disputed questions between citizens, confusion is bound to ensue, property rights are sure to be jeopardized and individual liberty will cease to exist. The government, the legislature, and the tribunal for the administration of the law may be subdued to whatever degree experience may show to be necessary, but they must all have their origin and sanction in the consent of the governed.

To this fundamental principle, without which liberty is a dream and permanent prosperity an impossibility, the right assumed by labor organizations to dictate strikes, when and upon such provocation as suits the sweet will of irresponsible leaders, is absolutely antagonistic, and the safety of the State and not less the safety of the miners and other wage-earners, than of anyone else, demands that the best judgment of the community shall be devoted to the discovery of a means by which the constantly recurring strikes can be prevented without doing an injustice to the wage-earning class. Than a strike there can be no more injurious course, whether the result is regarded as it affects wage-earners, employers or the community generally. The great anthracite strike in the United States proved this, and it also proved that the men who suffered least from it, were these against whom it was directed. The miners and the wage-earning classes in the great cities and elsewhere were those upon whom the force of the blow came. Therefore in pleading for legislation that will render strikes not only needless but impossible, we feel that we are consulting the interests not only of miners and mine owners, but of the community at large.

The little team of greys belonging to Messrs. McEwing and Slinn had an exciting run on Tuesday. They bolted in Old Town while Mr. Slinn was getting into the sleigh. The lines fell off the sleigh and Mr. Slinn wisely jumped. The spirited team took the railway track and raced ahead of the incoming express, they did not stop at the depot however but ran at an exhibition pace until they got tangled up with the harness about a half a mile north. The rig and harness was badly smashed.

My Heart's Darling

* * *

BY W. HEIMBURG

Author of "A Penniless Orphan," "Gertrude's Marriage," "Her Only Brother," Etc., Etc.

Entrez. How pretty you have grown! And you still remember us? How did you come here? You must tell me everything." The next moment Lucie found herself in Mlle. Bertin's room and in her arms.

"You want to go to Hortense?" sobbed the excitable little woman. "Oh, Lucie, perhaps it is a ray from heaven! She will not see any one; she has driven me away. Oh, I cannot tell you; she is in trouble—great trouble; but she is as unapproachable as ever. Just now she has made me promise **not** to disturb her for the next three hours, and I am worried to death."

During these lamentations Lucie had seated herself on a chair and mademoiselle had mixed her a glass of orange water, and brought her a biscuit. "Child, you look at me with surprise! I have grown old, Lucie—oh, yes! Ach! I know it—so much trouble! Such anxiety as I have here with Hortense!" She pressed her handkerchief to her eyes, and threw herself down in a deep arm-chair covered with bright chintz and sobbed piteously.

"What is the matter with Frau von Lowen?" asked the young girl, in an alarmed tone.

"Ah, ciel! if I only dared to say." lamented the old lady; "but I cannot. Perhaps she will tell you herself. Do me the favor to go to her; perhaps possibly you, who as a child had a good influence over her— Oh, I know, Mademoiselle Lucie, that she likes you; she had a tendre for you, and will be good if you go. Do go up, I beg you."

"But if Frau von Lowen wishes to be alone," said Lucie, painfully touched.

"Oh, she has dreadful caprices; she worries me half to death sometimes; she will not see me, and she will not see the baron; but you — who knows? Just think," continued Mlle. Bertin, "she has shut herself up since yesterday evening. This noon, after I had been up there every half hour, I met her at last in the sitting room. She looked like death—had such deep shadows under her eyes, and was tearing up old letters; she was so busy that she did not see me, and did not notice that I took the key from the door—vous comprenez—it is so horrid to be locked out. I tried to talk to her, but she said, in an agitated voice: 'Leave me alone, mademoiselle. I beg that you will not come to my room again before this evening. Those endless inquiries only trouble me—say that to grandpapa.' Que faire? I had to leave her."

Lucie promised to go up. First she had to hear why mademoiselle had come to this miserable hole of Hohenberg, and then extravagant congratulations on her engagement were mixed with complaints and tears. "Oh, mademoiselle, what a life I lead—I, who was born in Paris! Look at this view over the solitary park—the view from my room over the deserted garden is still more depressing. Here, at least, the grooms or the postman sometimes pass; but there I live behind walls as if in a cloister. I do not like to go on the street, it is so horribly dirty; and as for acquaintances, I have none. The people are so very ordinary—have so little chic. My one comfort was Monsieur le Docteur; now he is ill, hopelessly so; and as for the young man, your intended, I have never been able to make up my mind to have him. It is disagreeable when a physician is so young — it is genant. But a thousand pardons; the baron is waiting for me." She glanced at the little clock before the mirror and sprung up. "One game of chess, ma petite. I would beg you to leave me, he is mauvaise humeur if I keep him waiting."

During this conversation she had been carefully examining the nails on her well-kept hands. She now gave the right hand to the young girl. "Go to her, Lucie. You will do a good deed, je vous en prie. Please go up these stairs," she whispered as they were in the hall; "then along the corridor to the left, last door but one. Go right in; she will not answer if you knock."

Lucie went hesitatingly up the broad stairs, while mademoiselle hurried to the old baron's room. She did not feel at all at her ease; it was distasteful to her shy, modest nature to force herself upon any one. But something seemed to urge her on. She herself could not tell why. Was it the desire to thank her former playfellow, or was it a feeling of anxiety in consequence of what the queer French woman had told her? or was it opposition to her future mother-in-law and the double interest which she felt for the much-censured companion of former days? She stood before the door to which she had been directed, and turned the handle. A burned smell as of scorched paper, mingled with a little smoke, filled the large, comfortable room. Hortense was not there. Lucie saw for the first time the boudoir of a fashionable woman, and for the first moment she was entranced with the thousand tasteful things—the dainty pieces of furniture, the heavy curtains, the soft Smyrna rugs, which covered the entire floor, upon which arm-chairs of every shape were scattered, the costly Persian tapestry that was thrown carelessly over the chaise-longue, the dried palm branches in the vases, the delicate little figures of terra-cotta and old Dresden, and over the writing-table a life-sized portrait of a fair-haired young woman. On the main wall, over a pretty arrangement of sofa, table, and arm-chairs, hung two large oil-paintings, sea studies—one of the sea in a storm, the other a quiet sea at sunset.

Lucie stood for a few moments motionless, and gazed at all this, and then she turned to go. Might she come again, she wondered, and took out of the little card-case she held in her hand her visiting-card, wrote with a pencil: "Best thanks," laid it on the table, and slipped a twenty-mark piece under it. Then she changed her mind and took it over to the writing table. She was now close to the bedroom door, which was ajar, and there she heard a curious noise, as if some one were groaning and suffocating.

"Hortense!" she cried, softly, at the door.

No answer, but the gasping was still more audible. She pushed the door open and stepped into the darkened room.

A strong, sweet smell seemed to daze her, and she put her hand to her forehead. She recognized it from her sister's illness.

"Chloform!" she exclaimed, half aloud, and pushed aside the silken curtains at the bed. Hortense lay, unconscious on the pillow. The sickening smell of chloroform almost overcame Lucie; she ran to the window and opened it hastily, not noticing that she tore the beautiful lace curtain. Then she hastened back to the bed, and threw on the floor the white cloth which covered the young woman's face. A frightful smell! Even the pillows and coverings seemed to be saturated with the dreadful stuff. Her heart beat violently as she half raised the unconscious woman; the beautiful head fell upon her shoulder; but she groaned again, and whispered something that Lucie could not understand. She must have help, and yet—It would be dreadful to have anyone discover what had been done. What was it? Perhaps she had had toothache, and had unintentionally—No, No! She wished to die! Lucie seized the horrid cloth and the empty bottle and threw them both out of the window. Half dazed herself, she took the pillows and covering, there was a wardrobe near, and she pushed them in. Then she opened the other window. She brought a large bunch of liliacs from the other room, and fanned the pale face that lay so unconscious on the bolster. And now the letter that lay on the little table by her side—"For my grandfather, Herr Alexander von Meerfeldt."

Lucie put it in the pocket of her dress and pulled the bell-cord. It sounded like a thunder-clap through the quiet house. She was rubbing Hortense's temples with cologne as the maid hurried in; and behind her the voice of the mademoiselle and the old baron could be heard.

"Send for the doctor," said Lucie, quietly; "She has fainted."

The lamentations of the old people were hushed. Shyly they stepped up to the bed and looked at the pale face.

"En verite, only a fainting fit?" asked mademoiselle.

"Hortense, my child," whispered the old man softly, and raised her hand, which fell heavily down again.

"Mon Dieu, she will die!" cried the little French woman.

"If Alfred would only come?" sobbed the young girl. "Heaven grant that he is at home!" she prayed, softly. Now she thought she heard his step in the corridor. She ran over to the door by which the young doctor was just entering. "Come!" she said, drawing him back. "I want to tell you something."

"You are trembling, Lucie!"

"Yes," she said, in a hesitating voice. "I have—I found Hortense von Lowen as she—as she—she had taken chloroform. Alfred, don't let them know. She wished, I believe—she had some great trouble yesterday——and so—"

He took her hands. "Calm yourself, Lucie. What did you do?"

"I took the cloth from her face, and opened the window, and—"

"Is she unconscious?"

"Yes, yes! Ach! do not tell what she has done; say she has fainted, Alfred!"

(To be Continued.)

The Guillotine and Its Inventor.

One of the most widely disseminated of popular errors is that Dr. Guillotin invented the grim machine which still bears the name. The real inventor of this sinister contrivance was Dr Louis, a well known medical man and permanent secretary of the Parisian School of Medicine, or Academie de Medicine.

Dr. Guillotin, who died in 1814, energetically but vainly protested against the use of his name in connection with this disagreeable subject—an evidence if one were wanted, of the great difficulty there is of correcting a popular error. Needless to say that the legend that Dr. Guillotin was among the victims of his friend's ingenious and merciful instrument of destruction is wholly apocryphal. He died at a good old age and in his bed, surrounded by his children, who, however, obtained permission to change their name.

The Woes of Cupid.

"Men is sho' fickle," said Miss Miami Brown. "Dey goes back on you on de slightes' provocation."

"What's been happenin'?" asked Miss Olina Jefferson Tompkins.

"Mr. Rastus Pinkley come aroun tryin' to kiss me, an', so as not to seem too willin' an' audacious, I smashed 'im wif a flatiron, an' jes' foh dat he jilted me."

THE STORY OF A PIONEER.

H. S. Barnes, of Rat Portage, Tells of the Trials of the Early Settler.

Suffered Terribly Form Kidney Complaint but Was Speedily Relieved and Cured by Dodd's Kidney Pills.

Rat Portage, Ont., Dec. 22.—(Special)—Everybody in Rat Portage knows H. S. Barnes, father of a former mayor and one of the oldest inhabitants of the metropolis of New Ontario. Though seventy-nine years of age, Mr. Barnes looks younger than many men of many fewer years and is possessed of wonderful vitality and activity.

A pioneer of this district, Mr. Barnes tells many tales of early life in the wilds of New Ontario, but none more interesting than the following:

"I was terribly troubled with Kidney Complaint. I suffered severely with pains across my back, and with a scalding, burning sensation when urinating that was very painful.

"Though I had little faith in proprietary medicines, I had a box of Dodd's Kidney Pills in the house that I had procured for my wife, and commenced taking them with good effect.

"It was not long till my acquaintances started to greet me on the street with 'Hello, Mr. Barnes, how young you are looking!' They were not astray. I felt smart too, and feel younger and in better health than I have been for years. My Kidney Complaint was completely cured by Dodd's Kidney Pills."

Adam had a wife made to order, but she turned out to be a misfit.

Some people are unable to raise their hopes, while the hopes of others run to seed.

The great lung healer is found in that excellent medicine sold as Bickle's Anti-Consumptive Syrup. It soothes and diminishes the sensibility of the membrane of the throat and air passages, and is a sovereign remedy for all coughs, colds, hoarseness, pain or soreness in the chest, bronchitis, etc. It has cured many when supposed to be far advanced in consumption.

Sometimes the absent cashier's account book looks suspiciously like a figured screen.

Give Holloway's Corn Cure a trial. It removed ten corns from one pair of feet without any pain. What it has done once it will do again.

The man who is slow but sure always manages to get there, but he usually arrives too late.

Photographers are very charitable; they are always anxious to take the best view of manind.

Some people mistake spectacular effect for success.

The more a man owes the more conspicuous he is as a financier.

BABY'S FIRST TOOTH.

A Family Event That Does Not Always Bring Unmixed Joy.

Baby's first tooth does not come unannounced. Inflamed gums and impaired digestion produce a feverish and fretful condition, about which the mother often feels concern. The baby boy of Mrs. George McGregor, of Hamilton, Ont., was troubled with diarrhoea while teething and was cross and restless. He did not sleep well and matters became serious. The mother writes as follows: "My sister had used Baby's Own Tablets for her baby and advised me to try them. I got a box and after giving the Tablets to the baby a few times he began to improve and was soon well. He is now a big, healthy baby and whenever he gets fretful or does not feel well I give him a Tablet and he is soon all right again."

Baby's Own Tablets replace with great advantage castor oil and other nauseous, griping drugs. They sweeten the stomach, quiet the nerves and promote healthful sleep. They are guaranteed to contain no opiate and to be absolutely harmless. If your druggist does not keep them you can obtain a full-size box by mail, post paid, by sending 25 cents to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y.

When it comes to waltzing the awkward man gets there with both feet.

"It is never too late to mend," said the man who was too lazy to begin.

Minard's Liniment Cures Distemper.

The lingering guest would doubtless be surprised to learn that his long going is often regarded as a short coming.

THE PUBLIC should bear in mind that Dr. Thomas' Eclectric Oil has nothing in common with the impure, deteriorating class of so-called medicinal oils. It is eminently pure and really efficacious—relieving pain and lameness, stiffness of the joints and muscles, and sores or hurts, besides being an excellent specific for rheumatism, coughs and bronchial complaints.

Seediness and popularity go together during the watermelon season.

Minard's Liniment Cures Colds, Etc.

It is an easy matter to rush things when the grade is down hill.

Silence may be golden, yet the product of the still makes men noisy.

All men may be free and equal, but it is impossible to demonstrate it.

Many a man is considered a hopeless fool on account of his hopefulness.

It is easy to prove that the gun isn't loaded immediately after the accident.

A lot of unimportant happenings are postponed on account of the weather.

"Granby Rubbers wear like iron."

FROM OLD LONDON

NEWS OF THE WORLD'S METROPOLIS.

Venezuelan Affair is Causing Considerable Unfavorble Comment—A Society Divorce Case Shocks the Public Moralists.

London, Dec. 18.—The developments in the Venezuelan embroglio, as revealed by Premier Balfour's statements yesterday in parliament, have resulted in bringing out in the press stronger expressions than ever of the desire to reach some pacific settlement of the difficulty. It is said on behalf of the government that even last July when German co-operation was first mooted the British government fully recognized the possibility of war with Venezuela, and only postponed action until the winter at the suggestion of the admiralty and in order to avoid the unhealthy season.

On the other hand, those who declare that the government of Germany forced the government of Great Britain into a virtual declaration of war are not lacking. Certainly a considerable portion of the British public was rather disagreeably surprised to find that Great Britain was actually at war and that this war might for many months to come require the presence of a large naval force in Venezuela. Added to this is the apprehension as to whether or not Germany would be willing to accept the status of a beligerent blockade, which would entail the stoppage of her trade also.

Henry Norman, M.P., in a newspaper article, in which he emphasizes the dangers of the position into which Germany is dragging Great Britain, contends that the only safe and dignified course for Great Britain is to seek satisfaction through co-operation with the United States. Mr. Norman asserts that "serious and urgent warnings, private in their origin, but virtually official in their destination, have been cabled from the United States during the last few days."

* * *

A London cable says: The Hartopp divorce, which has been in progress for several weeks, was summed up with singular impartiality by Justice Barnes. The charge was so colorless that the jury were left to their own resources in unravelling the tangled skein of evidence. The trial has been a most discreditable revelation of the morals and manners of smart society in country houses, on the racing courses and the hunting fields. Sir Charles Hartopp, the racing baronet, and his wife, Lady Hartopp, brought servants into the court to prove charges and counter charges against each other, with the aid of fashionable acquaintances, private detectives, cabmen, spies and eaves-droppers. While the jury were warned from the bench that they were not censors to pass criticism upon the mode of life of people without other proper employment than the pursuit of their own pleasures, public moralists go outside the direct issues and find in the case a lamentable evidence of the decadence of London society. The jury dismissed both petitions for divorce, virtually deciding that neither charge nor counter charge had been proven, and that both contestants must pay immense law bills and get on as best they can without relief from the court.

* * *

The judicial committe of the privy council, at London, on Dec. 17 allowed the appeal of the collector of voters' lists for the electoral district of Vancouver city, and the attorney-general of British Columbia vs. Tomey Homma and the attorney general of the Dominion, each party to pay its own costs. The judgment now reversed is that of the British Columbia supreme court of March 9, 1901. This decision removes from the register a Japanese who became a naturalized Canadian, and seems to run directly counter to the spirit of the Anglo-Japanese treaty, also to the spirit of federal disallowance of British Columbia acts.

* * *

On Dec. 17 Queen Alexandra acted as godmother at the christening of Lord Mandeville, the heir of the Duke and Duchess of Manchester, in the Royal Chapel, St. James. Her Majesty signed the register with the Duke and Duchess of Manchester. The Marquis De Souverall, the Portuguese minister; Count Von Mendsdorff, secretary of the Austrian Hungarian embassy; Earl De Grey, Lady Lister-Kaye and others. The Queen's present to her god child was a silver bowl and spoon inscribed: "To Alexander George, Viscount Mandeville, from Alexandra Regina, Dec. 17, 1902."

Wyoming now has two women as justices af the peace. Mrs. Maggie H. Gillispie, of Lookout Station, has just been elected in Albany county on the Democratic ticket and will take office on January 1.

THE WIDE WORLD.

Telegraphic News of Two Hemispheres Briefly Chronicled.

United States duties on Philippine Island goods have been greatly reduced.

E. A. MacDonald, ex-mayor of Toronto, died on Dec. 18, aged 44 years.

Western Canada land entries for November were 2,000 ahead of a year ago.

The banking house of C. W. Anderson & Son, of Oakville, Ont., has closed its doors

Owing to the eratic work of a voting machine the Morden election may be nullified.

R. C. Whayne, of Louisville, Ky., who was mysteriously killed, carried $340,000 insurance.

The C. P. R. Atlantic line from Montreal to British ports has been announced in London.

T. J. Brown received a two years' sentence in the police court at Winnipeg for stealing an overcoat.

A British Columbia judge has sent some Japs to jail for violating the immigration act after the said act had been disallowed by the Dominion government.

The war blockade against Venezuela's chief ports goes into effect on Dec. 20. President Castro has appointed United States Minister Bowen the sole arbitrator for his country.

An animal with the body of a moose and the horns of a wapiti was shot at Lake Winnipegosis.

Next year the city of Winnipeg will double the output of stone from its quarry. A large new crusher is to be purchased.

At a conference of steamshippers trading with Canada, held last week at Liverpool, it was decided that the freight rates were not remunerative, and it was agreed to increase them by 5 to 10 per cent. in 1903.

The duels following the bombastic challenge of the Italian fencing champions, Vega and Pessina, to the French champions, Merignac and Kirchoffer, were fought at Nice on Dec. 18, and resulted in both Itelians being wounded. Their wounds are not dangerous.

The city of Montreal has decided to purchase fifty car loads of soft coal from Nova Scotia mines, at $3 a ton, to relieve the distress among the poor.

At the sitting of the supreme court at Nelson, B. C., on Dec. 18, Elizabeth Jane Hoskins and children were awarded $5,000, to be paid by the Le Roi Co., No. 2, of Rossland, for the loss of husband and father, who was killed in the company's mine some months ago.

A dispatch from Elmvale, Ont., says: Neil McEachren, treasurer of the Nottawasaga council was driving home from Duntroon after a meetibg of the council with J. L. Sinclair. McEachern had $7,000 tax money in a satchel, and when opposite Batteau Hill, two men sprang into the road and seized the bridle of the horse. Blows of the whip caused the horse to shake off the highwaymen, and McEachern discharged his revolver, one of the men firing at him in return.

Dr. Lorenz has, for the first time since his arrival in New York, operated on a club foot. The patient was a four-year-old girl. Dr. Lorenz kneaded and twisted the crippled foot until it was as soft and pliable as a piece of putty. Then he deftly moulded it into its proper form and announced that the operation was completed, and a plaster cast was fitted on the foot. The doctor said that the child should be allowed to use her foot as much as she could after four or five days, and that it would be necnecessary to keep the cast on for six or seven months, after which she could walk.

The postal department will, about Dec. 24, be in a position to supply a seven cent stamp to accounting post offices direct in the usual way. The stamp, which is of a yellow color, will be especially convenient for postage and registration fee on single rate letters, whilst it may also be used for other purposes to the extent of its face value. The minimum quantity of the 7 cent stamps to be issued to any postmaster will be a oalf-sheet, or 60 stamps. Non-accounting offices can obtain the seven cent stamp through the city post offices from which they are authorized to procure their stamp supplies.

Prof. A. Graham Bell and his father, Prof A. Melville Bell, inventor of the telephone, who have been spending the summer in Cape Breton, have been making a number of experiments with kites, and as a result developments and discoveries were made which may lead to the solution of the flying machine problem. Prof. A. Graham Bell says he is not ready to give out details, as the results of the summer's work will be first made public before a scientific body either in New York or Boston.

Harold Machin, a Rat Portage boy, who enlisted in the first Canadian contingent, and who served throughout the entire war, earning his sergeant's stripes and the D. S. O. by his bravery, has just received a captain's commission in the Constabulary. His appointment has been followed closely by his wedding, the young officer having led to the altar Miss Ida Knight a young English heiress whom he had known in England in his boyhood and whom he met again after the war.

It isn't a case of true love if the girl doesn't lose her appetite.

THE NEWS IN BRIEF

A BUDGET OF IMPORTANT INFORMATION.

Items of Interest Gathered From All Parts of the Two Hemispheres Presented in Condensed Form For Busy Readers.

Fire, on Dec. 17, did $1,500 damage to Messrs. Kobold & Co.'s elevator at Winnipeg.

A sale of 10,000 acres of land near Plumas for $65,000 has taken place.

Six thousand acres of land near La Broquerie was sold to a Winnipegger for $36,000.

A special appeal is being made by the Salvation army in Winnipeg for help to feed 1,200 poor people on Christmas day.

Winnipeg's smallpox quarantine has been opened. A carpenter named John Taylor, arrived from William's Siding with the disease.

A machine has been introduced in the Winnipeg post office which cancels the stamps on letters and at the same time postmarks the latter.

One million bushels of grain has already been shipped all rail for export, and 6,000,000 bushels more will be shipped during the winter.

An extraordinary number of Manitobans are going east to spend their Christmas holidays. On Tuesday of last week 500 left by C. P. R.

Japan is sending a fleet of warships to the north Pacific coast.

The dry dock at Esquimalt, B. C., is to be made the largest on the Pacific coast.

Three cases of bubomic plague have been discovered on a vessel from South Africa which is lying in New York harbor.

Gen. Botha has discouraged collections for Boers in America.

Rockefeller has given another million dollars to Chicago university.

Large Pittsburg steel plants have been purchased by the United steel trust.

Reports to the Winnipeg Relief association indicate that few people in the city are in want.

Poultry is high in price in Winnipeg and the outlook for Christmas feasts is not the brightest.

Mr. John Fleming has been elected mayor of Brandon.

Mr. F. W. Peters, of Vancouver, is returning to Winnipeg as general freight agent of the C. P. R.

Britain has no intention of allowing Venezuela to go unpunished for insulting her minister and the Union Jack.

The board of aldermen of New York have voted $250,000 to buy coal for the poor of that city.

Zerme Ernux, of Aylmer, Ont., was on Dec. 16 sentenced to three years in Kingston penitentiary by Judge McTavish, on a charge of stealing a horse from George Boyd, of Gloucester. Ernux was also given two years for obtaining a horse under false pretences by trading the horse he stole. This sentence will run concurrently with the other.

Baroness Desroques visited her daughter, Mrs. Maybrick, in Aylesbury prison on Dec. 16. She found Mrs. Maybrick to be in delicate health, but cheerful. Owing to the interest taken in Mrs. Maybrick by the Duchess of Radford and others, the prisoner is now receiving better treatment. She has been transferred from the manual labor department of the prison to the library.

Duncan McEachren, one of the hands employed in the Northern Lumber company's mill at Garland, Man., met with a serious accident on Monday. He was working in the vicinity of a broken pulley and accidentally came in contact with the revolving hub, which broke his left arm, badly tore his scalp and other wise injured him.

A dispatch from Port Au Prince, says that Gen. Saint Foix Colin, minister of the interior and opponent of General Alexis Nord in the contest for the presidency, has sought refuge in the United States legation. There has been much excitement in the city, and the condition still prevails. All the military authorities who have been supporters of Seneque Pierros' candidacy for the presidency, and those opposed to General Nord also sought refuge in the consulates. Gen. Nord is acclaimed president by the troops, and seems to be master of the situation, notwithstanding the fact that the majority of congress is in favor of Seneque Pierros. Gen. Nord will dissolve the chamber of communes and the senate, and will order the elections, which will result in his favor.

The Ontario government has received the long talked of offer from an English syndicate for the purchase of 2,000,000 acres of New Ontario land.

A good many people would say more if they didn't talk so much.

BRAVERY REWARDED

Mr. Murphy Saved the Lives of 24 Persons From Drowning.

A dispatch from Quebec says Mr. Patrick Murohy, a ship laborer, was the recipient of a cheque for the sum of $520, a bronze eight-day clock, valued at $40, and an illuminated address in recognition of his bravery in saving twenty-four persons from a watery grave. Mr. Murphy, who is a modest, hard-working man, steady in habits, and well known and respected for his generally upright character, commenced his career of life-saving when he was twenty years of age, and, in every instance performed daring rescues at the risk of his own life. In 1892 he saved the life of a young French immigrant, who fell between the Grand Trunk wharf at Levis and the ocean steamer Vancouver, a feat which was in every respect one of great bravery. It was late in the fall and the river was filled with floating ice, while the wharves and steamer's deck were in a slippery condition. The young woman had descended the gangway from the ship and had just reached the wharf when she slipped and fell into the river. Murphy was on the deck with a number of ship laborers assisting in removing the baggage from the hold, and saw the woman go overboard, and lost no time in jumping in after her, and after succeeding in getting a hold on her, kept her head above water until a rope was lowered. The risk he incurred was greater than can be imagined. This is only one of the daring rescues effected by Murphy. His latest deed of bravery was saving a man named Cote, a stranger in Quebec, who one month ago accidentally fell over the Richelieu and Ontario Navigation company's wharf into the river. The accident was witnessed by scores of people who threw boards and planks into the river for the drowning man to seize hold of, but he was too frightened to notice them. Mr. Murphy was proceeding along Dalhousie street at the time, and fully 200 yards away from the edge of the river. He heard the excited cries of men on the wharf, and, suspecting that a man had fallen overboard, immediately ran to the spot, where he saw an old man about to disappear for the third time. Mr. Murphy did not stop to make enquiries or take off his coat, he simply dived from the high wharf and caught hold of the man just as he was going down for the last time, and swam ashore with his burden.

Great Wealth in Oil.

Some day Alberta may be famed for something more than its agricultural possibilities or for its fat cattle, says the Calgary Albertan. There is a wealth in the bowels of the earth. There is great wealth in coal, and as great wealth perhaps, in oil. In the extreme southwest corner of Alberta, in township one, in fact, there are oil fields, the richness of which it is difficult as yet to ascertain, but according to all appearances is enormous. It has been known for years that there was oil in this district, but it remained for Calgary capitalists to go forth and possess the land and put in work upon it. At the present time from nine to ten thousand dollars have been spent upon it, and the expenditure seems to be justified. There is an enormous amount of oil in the district. In September when a change had to be made in operations it was running three hundred barrels daily, and the oil could be compared only with that in the Southern States.

Now the well is down 1,020 feet A meeting of the Rocky Mountain Development company, which controls the lands, was held in Calgary on Wednesday last. It was decided to proceed vigorously with operations. An entire new plant will be ordered and both old and new will be kept running. The company will be capitalized at $500,000.

Engine Ran Light.

A unique mishap is recorded by an Ottawa paper. The passenger train due to leave the central station over the Montreal and Ottawa division of the Canadian Pacific railway at 8.45 a. m., was late in getting away. The delay was due to the fact that the engine parted company with the train at the station, and ran light as far as Navan, thirteen miles down the line. There the engineer noticed for the first time that he had left his train behind him. He was also apprised of the fact by a telegraphic message from Ottawa, and lost no time in getting back to the city. The second time the engine was coupled securely to the train and a successful start made for Montreal.

The mishap was one of the most unique recorded in railway circles. The engine, one of large compound type, carried a crew of three, engineer and two firemen. The trip was the first made with the train, and on this account the engineer was paying particular attention to his ponderous charge. The extra strong pull of the heavy engine evidently proved too much for the attachment connecting the tender with the foremost car on the train. On account of the blustery weather and the extra attention he was giving to his work in the cab, the engineer failed to notice the mishap.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

Father Lacombe has been appointed parish priest at Calgary.

Steps are being taken to bridge the Detroit river at Detroit.

Nelson, B. C., will spend $150,000 on a power plant and electric light system.

Bishop Quigley, of Buffalo, a Canadian, has been appointed Archbishop of Chicago.

S. J. Jackson, ex-M.P.P., has been appointed inspector of western Indian agencies.

On Dec. 17 H. Forsyth received a five years' sentence for burglary at Maple Creek, N.W.T., in August last.

Nearly 28,000,000 bushels of wheat in Manitoba and the Northwest Territories remain to be forwarded to lake ports.

Mr. Tait, manager of transportation on the C. P. R., partly blames the bad water for the delay in the western freight movement.

The town collector of North Bay has been arrested for embezzlement.

The United States House of Representatives has decided that violaters of the anti-trust law shall be punished.

It has been decided that the Venezuelan difficulty shall be arbitrated, and the discussion of terms of settlement is now going on. United States Minister Bowen undoubtedly will be one of the arbitrators.

The Port Huron Engine and American company are organizing to start a branch of their business in Winnipeg.

The South Australian government will shortly advertise for bids in America, England, Germany and France for the construction of a transcontinental railway from Adelaide to Port Darwin, on the land grant principle.

The Darmstadter Bank at Berlin has been defrauded of $195,000, owing to false entries on the part of Bookkeeper Nessler, who had charge of the deposits. Nessler has been missing since Sunday.

William Gibson, a laborer, aged 65 years, whose home is at St. Catharines, was instantly killed at the International paper mills at Niagara Falls on Dec. 17. While working on a scaffold, he was caught by the belt and thrown between it and the pulley.

A dispatch from Ottawa says it is likely that at the next session legislation will be introduced whereby special pensions will be provided for those Canadians who have been totally disabled on service in South Africa. These men are not provided for in the Canadian pension act, and a pension for them will have to be provided by special act of parliament. It is understood that the matter will shortly be taken up by the minister for consideration.

A meeting of the Dominion Alliance, representing all temperance organizations in the Methodist, Presbyterian churches was held in Toronto on Dec. 18 to discuss action regarding prohibitory legislation. It was decided that a deputation should wait upon the government and ask that a measure be enacted at the next session of the legislature to close the bar rooms and make the sale of liquor in clubs and the treating system illegal.

Ely Hyman, a Jewish rag-picker, of Toronto, believed to be in extreme poverty, induced charitable citizens to get him admitted to a semi-private ward at the general hospital, where he died suddenly on Dec. 18. When the hospital authorities searched his clothing they found sewed up in the lining securities worth $75,000. The stock was chiefly Canadian General Electric and Canada Permanent Western. Hyman has a wife in Churchville, Ont., and children by a first wife live in California.

A dispatch from Sault Ste. Marie says that the Algoma Central car shops have received a telegram from Montreal ordering 500 flat cars. This order will keep the shops going night and day all winter. The C. P. R. shops at Montreal are so busy they cannot turn out the cars required by the company. Nelson, Reid & Co., of Glasgow, have been given a contract for building a large number of locomotives for the Canadian Pacific Railway company. Canadian and American builders were in keen competition for the contract, but Nelson, Reid & Co. secured it because they promised quicker delivery.

Mme. Gouyon, wife of a French barrister at Brive, and daughter of a judge, has just died in great agany from hydrophobia. The unfortunate lady was playing with a pet cat last month, when the animal suddenly seized her thumb, anh had to be killed before it could be made to release its hold. The lady immediately had the animal's body examined and it was discovered to have been suffering from hydrophobia. Mme. Gouyon immediately went to Paris, and followed the Pasteur treatment, but a few days ago the first symptoms of the dread disease manifested themselves.

The Fernie Free Press

ESTABLISHED 1898.

Subscription: $2.00 Per Year in Advance

SATURDAY, DEC. 27, 1902.

EDITORIAL NOTES.

We are obliged to decline the publication of an article this week from the secretary of the local socialist league in answer to our editorial of last week. If our correspondent will deal practically with the "social problems" as outlined by us last week we will gladly give him space.

* * *

The Freeman's Labor Journal, of Spokane, in a recent issue made a vile attack upon the character of our sovereign, King Edward VII. This journal is receiving considerable support from Canadians, but we venture to predict that this single article will do much towards turning right thinking Canadians against a journal that resorts to such mud-slinging principles in order to prejudice the laborer against the rich. Of the forty Fernie subscribers to this paper it is interesting to note that less than half a dozen are laborers, so that it is clear that according to this ratio such sentiment sent to Canadian patrons will cause more injury than benefit to themselves. The letter of a prominent man of the town cancelling his subscription to this journal afforded us much pleasure as it expressed our own ideas exactly. It told the editor of the Freemen's Labor Journal that his impudence was only equalled by his ignorance, that Canadians had no use for the mudslinger, and that all such contemptible attacks upon our respected sovereign were resented by the loyal Canadian public.

* * *

It is a pity that the latest gift to the Hockey Association has been in the form of another cup. The purpose of having a trophy of this sort is simply to stimulate the sport and keep alive the competitive interest of the several clubs of the league. Will two cups, or a dozen, accomplish more towards this object than will one? We think not. A cup, in itself, is a useless article and when possessed by a club should always be kept in a public place. Will any club take more pleasure in exhibiting two cups than one? All honor and gratitude is due Mr. Henderson for his generous act and we hope that some arrangement may yet be made whereby this gift may take a more useful form and thus bring more satisfaction to the Association which Mr. Henderson is so anxious to serve.

EXIT 1902.

With this issue our fyle for 1902 is complete. The year has been an important one to Canada and the British Empire in more senses than one.

In the commercial world much progress has been made. Canada has enjoyed greater prosperity than ever in its history. The bountiful crops of the east and the prairie country has given a marvellous impetus to trade and the unprecedented rush of settlers to Manitoba and the North-west Territories, many of them ex-Canadians from across the border is attracting world-wide attention. Nearly all of these new-comers have money and are coming with the intention of investing it, thus enriching our country to that extent. During the present year the silver-lead industry of the Kootenays has reached its lowest ebb and already the down-trodden industry is rising on the flow tide of prosperity.

The British Empire has witnessed the triumph of her arms and the unfurling of the flag of peace over her wide dominions, and a new race has been added to her charge. It has sorrowed and rejoiced over the illness and recovery of her honored sovereign, and afterwards went mad with enthusiasm in the grand pageant at Westminster Abbey. The aged minister of state has placed the helm in a younger hand and the ship sails majestically on. The building of the "all-red" cable line this year more thoroughly welds the Empire into closer harmony.

In the world of science no greater invention has been brought to completion than that of the young Marconi, who mystically flashes his thoughts across thousands of miles of heaving, lonely waters unaided even by the frail connecting wire.

And still the world wags on! Of the future we are happily ignorant, but standing on the threshold of 1903 the prospects look bright and the continuation of the present "good times" seems reasonably certain.

CHRISTMAS CHEER.

Some of the Good Things Provided by Some Of Our Hotels.

Thursday was a typical oldtime Christmas day. The twelve inches of snow which fell on Christmas Eve made it more difficult for the people to get around, but they did get around somehow to the feasting places and altogether the day was most enjoyably spent.

At the hotels no efforts were spared to make everything as home-like as possible, and the many guests thoroughly enjoyed the day.

The Royal was beautifully decorated with evergreens and holly and flowers and the genial manager, Mr. Ganong, excelled himself in the bountiful manner in which he catered to the grand dinner spread for his guests and his many outside friends. His menu card were the most artistic ever seen in Fernie.

We publish the Christmas dinner menu of some of our hotels.

ROYAL HOTEL DINNER

Oysters Raw Celery Queen Olives

Mock Turtle a l'Anglais Creme of Chicken

It keeps time, pleases the eye and leans lightly on the pocketbook.

A Blackwood Clock.

that looks like black marble, strikes the hours on a musical gong bell and the half hours on a tinkling cup bell; is tastefully decorated in gilt scrolls, and has a face that reflects the beauty and worth of the movements behind it.

Only $s Remember.

Some who were buying for presentation to their housekeeping fr ends involuntarily purchased one for themselves.

A. C. Liphardt.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4.50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

Try Elliott's home-made bread, Turner block.

Mrs. Keegan is spending the Christmas holidays at Pincher Creek.

J. A. MacLean went east on Sunday to spend six weeks holidays.

Mrs. Pitblado went down to Lethbridge last evening to visit friends.

Dentistry

Dr. Barber is in town and can be found at his office in the Hill block all next week. x

Mr. and Mrs. A. C. Liphardt left on Christmas evening for Ontario to spend the winter with friends.

Mr. H. J. Johnson, postmaster, left for Ontario last evening. He purposes visiting friends there for a couple of months.

Mr. A. B. Trites invited his staff of clerks to his home on Christmas eve where a most enjoyable time was spent by all.

The Quadrille club gave a dance last evening but owing probably to it being an irregular meeting, it was not largely attended.

Mr. Elliott invites all lovers of good bread to come and sample his special make of home-made bread and to see the new oven.

Mr. A. Bricker and bride, of Okotoks, Alta., are visiting Fernie on their honeymoon trip. Mr. Bricker is a brother of Mr. J. H. Bricker.

Mr. and Mrs. Hugh Dunlop and Miss Jean Dunlop left on Christmas evening for Nova Scotia, where they will visit friends for a month or two.

The barber shop opposite the Northern has been occupied by W. R. Rainey for the past four weeks. Mr. Rainey is a good barber and we believe he is working up a good trade in the old stand.

Mr. Fred Stork goes east to-night. He will visit friends in Ontario for six weeks and will be accompanied back by Mrs. Stork who went east some months ago.

Mr. A. Smith has resigned his position as teacher of the mine school and leaves next week for Revelstoke where he assumes the position of first assistant. Mr. Smith's many friends will regret his departure from Fernie.

The Presbyterian Sunday School will hold their annual Christmas entertainment in the church on Tuesday evening. The cantata which has been under preparation for some time, under the skilled training of Mr. H. L. Staebler, will be given.

The ball at the Australian hotel, Morrissey, on Christmas eve was fairly attended. The large dining room used for dancing was appropriately decorated for the occasion. The Fernie orchestra supplied the music in their usual good style.

The Masonic ball on Wednesday evening promises to be a great success. A great number of invitations have been issued and no doubt a large crowd will attend. The details are being carefully arranged and nothing will be wanting to make this the great event of the season

Be sure and try one of Elliott's crust-all-around loaves of home-made bread. His famous bread will remind you of the bread "mother" used to make ; sweet as a nut, will keep a week, full 2 lb loaf for 25 cts., or special delivery to order, two for 25 cents, Don't forget the place, Turner block, rear of Victoria Hotel.

The west bound express was stuck in the snow between Sparwood and Hosmer on Christmas Day for about 8 hours. A freight train between that point and Fernie also got mixed up in a slide, but the engine managed to pull half the train into Fernie. Engine 342 was sent down to help bring the remaining part up and the two engines ran into a fresh slide just below Proctor's mill. The other yard engine had to be got to extricate them.

A serious accident occurred on the C. P. R. near Coal Creek about 2 o'clock on Sunday morning, by which Frank Povlitzki, a young man who worked at Mott's mill, lost his leg below the knee. Engine 342 was sent down to Coal Creek at the time on special work and rounding a sharp curve on a steep grade the driver saw the form of a man lying inside of and parallel with the rails, just a few yards ahead, and his utmost efforts were powerless to prevent the engine from going over him. It appears that the body was caught by some projecting rod and dragged some distance and one leg being thrown over the track was taken off by the wheel. The only wonder is that the man was not killed outright. He was taken to the hospital where his leg was dressed. He is a young man of twenty and was under the influence of liquor.

Miss Richardson has returned from Nelson and is visiting her sister, Mrs. O. Kirkpatrick.

All visiting brethern are cordially invited to attend the Masonic ball to be held on New Year's Eve.

Mr. J. L. Gates, proprietor of the Victoria Hotel, leaves on Monday via the Great Northern for Ontario. Mr. Gates has not been east since he first came west ten years ago.

The Methodist Sunday school held its annual Christmas entertainment on Christmas night. The entertainment given by the children was well rendered after which the heavily loaded tree was relieved of its many pretty gifts.

The meeting for the election of a school trustee for the vacancy caused by the death of the late T. C. Thompson was held to-day and resulted in the unanimous election of Mr. J. A. Rennie, the four other gentlemen nominated two weeks ago all withdrawing in his favor.

The Christ Church Sunday school held its Christmas entertainment on Christmas Eve in Princess Hall. The children gave an interesting program of music and recitations, after which the beautiful tree was stripped of its presents and every boy and girl made happy.

SNOW ON ROOFS.

A Continual Menace to Life and Property.

The ever-increasing depth of snow that covers every object resulted in disaster to one building in Fernie early in the week. The large, wholesale feed warehouse of Frank Labele collapsed under the tremendous weight of congealed water resting on its roof and the whole building is a total wreck, not worth the lumber that's in it.

This came as a timely warning to others, many of who found upon examination, that the rafters of their buildings were bending to a threatening degree, and during the past few days it is a common sight to see men on the tops of buildings shoveling off the snow which reaches to their waists.

The chinook wind of yesterday settled the snow some but did not relieve the situation and many buildings are yet in grave danger.

Leaking roofs is another trouble seen in many residences of the town. This is caused by the snow melting near the top and the water freezing near the edge of the roof forming a ridge of ice. As this ridge increases it backs the water up the roof, which finds its way under the shingles and into the houses. This is a difficulty that may crop up every winter and it would be well for contractors to take it into consideration with a view to overcoming the defect.

The ice and snow that thus forms on the edge of the buildings is a continual menance to the safety of passersby and some day some one is liable to be killed by these heavy masses that become loosened during the thaw. Precautions should be taken to have it removed periodically.

AT THE HOTELS.

POLICE COURT

A heavy docket of cases was up before Stipendary Magistrate Armstrong this week but most of them were of a trivial character. Lena Hill, of Morrissey, was fined $2 for disorderly conduct and upon refusing to pay she was sent to Nelson.

Several men were up for refusing to pay their poll-tax with the result that next time they will be very willing to pay their three dollars without having costs added.

The Central, the Union, the Northern and the Victoria hotels were pulled for selling liquor on Sunday. The case was not proved against the Victoria but the others were each fined $25 and costs.

J. Fitzgerald was charged with stealing a watch but the case was not proved He also figured as the principal in two separate assault cases and the trial is set for January 3rd. He is out on bail.

Sailor Jack was charged with resisting arrest by Constable Farquharson and received a light sentence. Several drunks were disposed of.

COMMONS PROROGUED

KING'S SPEECH IS UNUSUALLY LENGTHY.

The Venezuelan Trouble, the Conclusion of the South African War, and the Expedition Against the Mad Mullah Referred to,

A London cable of Dec. 18, says: Parliament was prorogued this afternoon by royal commission. Only a score of members of the House of Commons were present when Black Rod summoned the lower house to the House of Lords to hear the King's speech, which was an unusually lengthy recapitulation of public events since January, including the action taken in connection with Venezuela, regarding which the speech said: "I regret that the constant complaints which my government found it necessary to address to the government of Venezuela in regard to unjustifiable and arbitrary acts against British subjects and property during the last two years have been persistently disregarded and that it has become necessary for my government, acting in concert with that of his imperial majesty, the German emperor, which also has serious causes for complaint against the republic, to insist on measures of redress."

The speech refers to the conclusion of the South African war, and adds: "There seems to be every reason to hope that material prosperity, greater than any the Transvaal and Orange River colonies have yet experienced, may visit these regions and that all sections of the population may live together in friendship for each other and loyalty to the crown."

Paragraphs deal with the postponed coronation, the colonial conference and Colonial Secretary Chamberlain's tour, which together are expected to be of the "utmost value both in respect to their immediate effect and as precedents in the future."

Other topics touched upon were the expedition against the Mad Mullah and the co-operation of Italy therein, the acceptance by Chili and Argentina of the British boundary award by the Brussels sugar convention, and the alliance between Great Britain and Japan," which I believe will be of advantage to both countries and contribute to the maintenance of a general peace in the extreme east."

The Anglo-Chinese treaty is referred to as promising to secure, not only for this country, but for the commerce of the world, valuable facilities and advantages.

The speech closes with a reference to India, where the anxiety regarding another famine has been averted by a plentiful rainfall, and where the coronation durbar will be asserted with a period of an unusual commercial and financial prosperity. The speech entirely omits the usual references to foreign relations.

Parliament was prorogued until Feb. 17th.

TO PUNISH TRADUCERS

Minister of Agriculture Will Prosecute Authors of False Stories.

An Ottawa dispatch says steps are to be taken by the government to stop the sending of false and malicious reports about foot and mouth disease in Canada and about Canada being quarantined. Most of these telegrams are being concocted and sent out from Montreal. The minister of agriculture intends to see what can be done to reach these correspondents, as well as the papers that publish their reports, who are doing their best to get the embargo applied against Canada.

A cable from Lord Strathcona shows that parties are engaged in circulating reports and prejudicing the British people against Canadian cattle trade.

No such rumors or reports such as these parties are publishing, ever existed in Ottawa, and when they were told officially that such was the case and that there was not a word of truth in them, they published them, to the detrimentof the country, all the same.

"If the criminal code can cover the case," said a prominent official, "the traducers of the Dominion will be brought to book."

Want State Saloons Closed.

Advices from St. Petersburg say that many provincial authorities are petitioning M. S. J. Witte, minister of finance, to close the state saloons. They assert that the government vodka monopoly has resulted in the secret sale of spirits everywhere, and in a large increase of drunkenness.

"Formerly," says a petitioner, "intoxication was seen only in saloons. Now the streets and public places are frequented by drunkards. This sad state of affairs is directly due to the prohibition of the consumption of liquor where it has been bought."

Further, the monoppoly should be abolished on the ground that it is taking a lucrative source of revenue from the schools and giving it to the state, which is expected to dismiss the petitions without much delay. The vodka monopoly increases the imperial revenue.

The annual income from alcohol was 280,000,000 roubles ($144,200,000) in 1897; last year it amounted to 316,000,000 roubles ($162,740,000).

We wish we could be as happy as college students think they are.

THE NEWS IN BRIEF.

Telegrams and Cablegrams Condensed for Busy Readers.

The marriage of Mr. St. John Brodrick, secretary of state for war, and Miss Madeline Stanley, elder daughter of Lady Jeune, will take place in London on Monday, January 5.

At the next session of parliament Hon. John Costigan will introduce a resolution re-affirming Canada's sympathy with Home Rule for Ireland.

At Montmagny, Que., a verdict was returned against Joseph Gosselin for the murder of Mrs. Octave Trihan, wife of a laborer of St. Lazare.

Edward Passmore, aged about 20, was instantly killed at Lemon's saw mill, near Schomberg, Ont., by falling on a circular saw. His body was cut in two.

Macartney, McElroy & Co., of London, have obtained a contract for the construction of electric tramways at Lorenzo Marquez, Portuguese East Africa. The value of the contract is $500,000. The English firm defeated keen German and American competition. They offered to do the work quicker than the Germans and at a less price than the Americans.

Dr. Hezekiel, of Berlin, has patented an invention which, he says, will dispense with the services of the dark room for developing in photography. All you have to do is to place your plate in his reddish colored solution, which he has christened "Toxin," for two minutes, after which the film is impervious to light. Yau can then develop in broad daylight, and watch the figures in the negative as they gradually assume shape.

Three hundred vessels in the Lower Danube have been crushed or sunk by the immense blocks of ice which fill the river. All the vessels were loaded with grain, and the loss will amount up in the millions. Four hundred other vessels are in danger of suffering a similar fate. No loss of life has as yet been reported.

A cable from London says the grand jury summoned to consider the indictment of Colonel Arthur Lynch, member of parliament for Galway, who was arrested June 11 on landing in England from the continent on the charge of high treason in connection with the part he took in the South African war, where he is alleged to have commanded the Irish brigade, has returned a true bill against the defendant. The lord chief justice, Baron Alverstone, in charging the jury, remarked that it was sixty-two years since a grand jury had to deal with such a charge, which was the highest crime known in law. Colonel Lynch's trial at the bar is expected to begin Jan. 20.

Reading, Pa.—Antonio Taddai, an Italian, who on July 4 last shot John Trayer, Edward Hartman and Samuel Stizel, three young men who had assaulted him while he was playing a street piano, and all of whom subsequently died, has been acquitted. Taddai maintained that he killed the men so save his own life.

London, Dec. 19.—After a long trial in the King's Bench division of the high court of justice, the case of the Taff Vale Railway company against the Amalgamated Society of Railway Serpants, involving many questions of the utmost importance to trades unionism, has resulted in a verdict in favor of the of the plaintiffs. The latter complained of malicious molestation, picketing, intimidation, etc., during the strike of 1900 The judge reserved his decision on the question of damages until the next sitting of the court.

Describing the Accident.

The folowing incident shows how a Western States reporter contrives to extract humor out of such an unpromising subject as a railway accident:

"Speaking about the sociability of railway travellers," said the man with the crutches and a watch-pocket over his eye, "I never got so well acquainted with the passengers on a train as I did the other day on a Milwaukee and St. Paul train. We were going at the rate of about thirty miles an hour when another train from the other direction telescoped us. We were all thrown into each other's society and brought into immediate social contact, so to speak.

"I went over and sat in the lap of a lady from Manitoba, and a girl from Chicago jumped over several seats and sat on the plug hat of a preacher from La Crosse with so much timid, girlish enthusiasm that it shoved his hat clear down on his shoulders.

"Everybody seemed with one accord to lay aside the usual reserve of strangers, and without exception, we made ourselves entirely at home.

"A shy young man, with an emaciated oil-cloth valise, left his own seat and went and sat down in a lunch basket, where a bridal couple seemed to be wrestling with their first picnic. Do you suppose that that diffident young man wodld have done such a thing on any ordinary occasion? Do you think if it had been at a celebration at home that he would have risen impetuously and gone where those people were eating by themselves and sat down in the cranberry jelly of a total stranger?

"I should rather think not.

"Why, one old man, who probably at home led the class meeting, and who was as dignified as Roscoe Conkling's father, was eating a piece of custard pie when we met the other train, and he left his own seat and went over to the front end of the car and shot that piece of custard pie into the ear of a beautiful widow from Iowa.

"People travelling somehow forget the austerities of home life, and form friendships which last to the end of their days."

PRINCESS VANISHES

FLUTTER IN A ROYAL DOVE COTE.

Crown Princess of Saxony Mysteriously Disappears From the Castle at Salzburg—Her Husband Was Infatuated With an Actress.

The Crown Princess of Saxony fled from her home during the night of Dec. 11-12. The Dresdener Journal says:

"The princess in a state of intense mental excitement suddenly deserted her family at Salzburg and went abroad. The Saxony court functions for the winter, including the New Year's reception, have been cancelled."

The foregoing paragraph in the official journal, which was inserted by order of the king and the crown prince has turned into truth what for several days past has been regarded as an incredible tale. The crown princess, surrounded by her ladies in waiting and numerous attendants and servants of the royal household, has vanished so utterly that the police of every kingdom of Europe have for ten days been unable to trace her. The official announcement was made in order to obtain the aid of the general public in finding the princess and because the court fiction that she preferred to remain in retirement at Salzburg rather than return to her husband and children at Dresden cannot longer be maintained.

Accompanied by the Crown Prince, the Princess went to the castle of Emperor Francis Joseph, near Salzburg, a month ago. A week after their arrival at the castle the prince broke his leg while hunting, and was brought back to Dresden. The princess, however, still remained at the castle. Why she did so the people of the court did not know, except that the princess, with gloomy tenacity, usually does what she wants. For a little while this explanation sufficed; then fragments of gossip began to reach Dresden. It was said that the princess had surrendered herself to periods of nervous excitement and that her excentricities of deportment caused much concern to her suite and to some of her Austrian kinsfolk who were staying in the castle with her. It is now believed that she was under surveillance.

The narrative of the events at Salzburg during the night of December 11-12, as told in Dresden, is that the princess, who appeared to be in an unusual tranquil mood, retired before 12 o'clock and after the music in the saloon. Three hours later, when a maid looked into the royal bedchamber, something in the appearance of the bed led her to closer examination. Instead of the princess the maid perceived a dummy figure. She awakened the lady in waiting, and the latter, with other members of the princess' suite, searched all the neighboring apartments, then the entire castle and finally the grounds of the castle, but no trace of the princess was found.

At dawn the police were informed of the disappearance and enquiries were made throughout the whole country side, but with no tangible result. The enquiry by the end of that day had extended to all parts of the Kingdom of Saxony, and by the end of the second day all over Europe. The theory of suicide was suggested and a fruitless search for the princess has been made. All the ponds and other pieces of water in the vicinity of the castle have been dragged without result. The disappearance of the princess will doubtless cause the circulation of many a story. It is freely related that she eloped, but enquiries made here have brought nothing to substantiate or support this supposition.

Vienna—The flight of the Crown Princess of Saxony has caused great excitement here. It is reported that the Archduke Ferdinand, accompanied by one of the court chamberlains, went to Geneva, whither it was supposed the princess had fled, but failed to find any trace of her. The princess' brother, the Archduke Leopold Ferdinand, is said to be with her, but nothing can be ascertained as to her whereabouts.

It is officially explained that the princess' disappearance is due to mental derangement. There is little doubt, however, that it is caused by domestic discord, growing out of her husband's relations with an actress of the Dresden court theatre. It is asserted here that the princess frequently threatened flight on this account, and that she was incensed at her father, the Grand Duke of Tuscany, for counselling her to forgive her husband. She is said to be enciente. It is rumored here that the princess was accompanied by the French tutor of her children.

Prince Friedrich August, Crown Prince of Saxony, was married November 21, 1891, to Princess Louise of Tuscany. They have five children

Bert Barker, an English boy, 18 years of age, was struck in the neck by the breaking of a whiffletree and killed at Toronto. His neck was broken.

TELEGRAPHIC BRIEFS.

Short Dispatches From the Four Quarters of the World.

Brandon has organized a gentleman's driving club.

A large party of Scottish farm laborers has reached Winnipeg.

Three Galicians have been committed for trial at Port Arthur for the murder of one Rebbuk.

The Calgary and Edmonton railway will ask permission at the next session of the Dominion House to build several branch lines.

Blackfoot Indians on the reserve at Gleichen have smallpox.

Canadian footballers were defeated at Glasgow by 11 points to 3 on Saturday.

The coal mines of North Dakota have been amalgamated.

Open water was still reported from Port Arthur harbor on Dec. 20.

Agnes Cousins, a patient in the Winnipeg general hospital attempted suicide.

Nineteen persons were killed in a wreck on the Southern Pacific in California.

James Wilson, of Elm Creek, Man., was killed by the breaking of a circular saw.

An elevator man at Moosomin who took a farmer's car was fined for stealing.

The Dominion cabinet has decided that Labelle and Fourier, the Yukon murderers, shall hang.

The immigrant arrivals in Winnipeg for the past five months were almost double those of 1901.

Marconi has sent wireless messages from Cape Breton to the King and the London Times.

Lieut. Todd, a Winnipeg fireman, was seriously injured by being thrown violently from a hose wagon in responding to an alarm of fire.

Five thousand engineers and firemen on the Northwestern road will receive an increase in wages.

C. P. R. wheat cars have been robbed in transit to the lakes, and the arrest of four Rat Portage men has followed.

Britain and Germany have asked President Roosevelt to arbitrate the Venezuelan dispute on certain conditions. British cruisers have seized three merchant vessels.

The C. P. R. has decided to build a new station at Winnipeg, commensurate with the importance of the city, and an announcement is expected in the near future.

Crop failures have been general throughout Finland, and great distress prevails.

The Princess of Wales gave birth to a son on Dec. 20. Mother and son are doing well.

The remains of Henry Baker, a farmer residing a few miles east of Oakville, Ont., were found in the ruins of his barn. No one knows how it happened, as Baker lived alone.

Peter Veregin, the Doukhobor leader, who is expected to arrive shortly, will settle in the Yorkton colony. Great hopes are entertained of his power for good among his countrymen.

Revealed Her Sex.

A Buffalo dispatch says: After 10 years masquerading as a man, the unmasking came suddenly for "Harry Norman," and disclosed her to be a woman. The disclosure was caused by an icy sidewalk.

At 11 o'clock last night an Emergency hospital ambulance was called to Swan and Michigan streets. Ambulance Surgeon Cutting found a person lying on the sidewalk, disabled by a fractured ankle. The injured individual was short and thickly set, being about 5 feet 3 inches in height, and was clad in checked trousers of cheap material, brown coat, blue shirt and blue cap, with leather peak. The patient was lifted into the ambulance and taken to the Emergency hospital. When laid upon the operating table and under the light, the surgeon noticed that although about 34 years old, the sufferer's face was remarkably beardless, and next discovered that the hands and feet were small for a man. With their suspicion aroused by these facts, the surgeon learned before the operation of setting the broken ankle was over that the patient was a woman.

The woman came to this country from England ten years ago, and found no welcome from employers who had work to give out. The work was not suitable for a woman, they said. Determined to make her way, she donned men's clothes, and since that time has drifted from one position to another, finding no difficulty in obtaining work. Up to the time of the unfortunate accident that revealed her secret she was employed as cook in Jack's Quick Lunch House on Seneca street.

On Sept. 26, 1896, Harry was married by Ald. Joseph Butler to Agnes Golden. At the time of the marriage the bridegroom gave the age as 32 years, occupation cook, and birth place, Yorkshire, England. This was his second marriage.

HUMBERTS ARRESTED

FRENCH SWINDLERS IN THE TOILS.

Perpetrators of the Great Safe Fraud in Paris, by Which Bankers were Fleeced Out of $12,000,000, Captured by Madrid Police.

Advices from Madrid, of Dec. 20, say: Madame Humbert, other members of the Humbert family, and Mons. and Mdme. D'Aurignac, the brother and sister-in-law of Madame Humbert, who became notorious in connection with the great safe fraud in Paris, have been arrested at a hotel here. They had been in Madrid since May 9.

The interest of all Paris was centered, May 9 last, on an empty safe at 65 Avenue De La Gounn Armee. It was supposed to contain twenty million dollars, left by Robert Henry Crawford, said to be an American "millionaire," This sum was alleged to be held in trust by Madame Therese Humbert, who, under Mr. Crawford's first will, was constituted his sole legatee, and who, on the strength of her title to the fictitious vast estate succeeded in borrowing over $12,000,000 from bankers, money lenders and others in France and Belgium. Eventually an investigation was started, the Humberts and others connected with them in the operations, fled from Paris, and May 9, when the chief of the detective department of Paris, M. Cochfort, opened the safe, brought to light the greatest swindle of the century, for the safe was found to contain nothing but an old jewel box, some old papers, and the official seals, which had made the swindle possible, the fortune having, under the terms of the second will, been represented as being held in trust until Mlle. D'Aurignac. Madame Humbert's niece, attained her majority, when all the heirs mentioned in the two wills were to come to an amicable agreement for an equitable division of the property.

Later it became known that the police made a clean haul of the whole family, Madame Humbert, her husband, Eva Humbert and three D'Aurignacs, Romain, Emile and Marie. The police suspected a house on the Calle Ferray. Some time yesterday Romain D'Aurignac was seen to enter the building, a search warrant was obtained, and the house surrounded. After some difficulty, the police were admitted and arrested the long sought for defaulters. The prisoners protested that they were the victims of infamous proceedings. They threatened to "get even" with certain persons in France, and said they had come direct to Madrid from Paris. Mlle. Eva became hysterical, and Madame Humbert clasped Marie D'Aurignac and her daughter in her arms, pleading with the police, "for the love of God," not to "separate me from my daughter." The police made an inventory of the contents of the apartments and found a parcel of jewels, valued at $2,000, a couple of lottery tickets, and about $115 in cash. Seals were then attached to the house and the whole family was removed to jail and placed at the disposition of the French amabassador.

The police suspect the Humberts of of having disposed of important papers in the lavatories while delaying the entry of the officers. The family tried to escape by the windows, but failed, as the house was cordoned.

The presence of the Humberts in Madrid was first brought to light through an anonymous letter sent to the French ambassador, M. Patenotre, who notified the Spanish police.

Traded His Wife For a Watch.

A dispatch from Cobourg, Ont., A very strange couple has been committed for trial here for a crime which savors somewhat of Arizona and Texas. It appears that Walter Reynolds, who is about 20 years of age, recently returned from Michigan, the possessor of a gold watch. He went to visit with his brother, Geo. A. Reynolds, in the township of Percy. He had hardly got rid of the dust of travel before he started to make love to his brother's wife, Allie Clarke Reynolds, also about 20 years of age, and the mother of two children, the youngest being only about two months old. The tender feeling was returned by Mrs. Reynolds.

Reynolds himself did not object, so a bargain was struck between the two brothers, by which Walter was to exchange his gold watch for George's wife, and Walter was to buy the household effects.

The brothers went to Roseneath together and purchased the marriage license and the next day Walter and Mrs. Reynolds went to Harwood and were married, while George stayed at home and took care of the baby. They were brought before John Miller, J. P., and committed for trial, she being charged with bigamy and Walter with inciting her to commit bigamy. They pleaded ignorance of the law.

FERNIE FREE PRESS.

FERNIE, B.C.

Men who make a specialty of picking quarrels rarely complain of a short crop.

Possession may be nine points of the law, but self-possession is a law unto itself.

Messrs. C. C. Richards & Co.

Gentlemen,—My three children were dangerously low with diphtheria. On the advice of our priest my wife began the use of MINARD'S LINIMENT. In two hours they were greatly relieved, and in five days they were completely well, and I firmly believe your valuable Liniment saved the lives of my children.

Gratefully yours,
ADELBERT LEFEBVRE.
Mair's Mills, June 10th, 1899.

Some brokers make it a point to see that their patrons go broke.

It's usually easier for one father to support ten small children than it is for ten grown up children to support one father.

MINARD'S LINIMENT Relieves Neuralgia.

It's a put-up-job on a man when his wife orders a new stove.

No man can be expected to foot his wife's bills without kicking.

KIDNEY TROUBLE.

A DISEASE THAT OFTEN TERMINATES FATALLY.

Mr. L. Lussier, of Sorel, Tells How He Overcame the Trouble After Repeated Failures.

There is no trouble more dangerous to life than disease of the kidneys, for the reason that before any special symptoms have made themselves manifest, the disease has usually assumed a formidable character. The symptoms that first manifest themselves are usually weakness in the small of the back, pains in the region of the loins. The urine is sometimes highly colored, while in other cases it is extremely pale, frequently depositing a sediment. As the trouble progresses these symptoms grow more severe, and frequently terminate in dropsy, Bright's disease or diabetes. Dr. Williams' Pink Pills are a specific for all kidney troubles, and have cured many cases after all other medicines have failed. Mr. L. Lussier, a well known navigator of Sorel, Que., gives his experience for the benefit of other sufferers. He says: "For several years I suffered very much from kidney trouble. The symptoms usually made themselves manifest by severe pains in the back and kidneys, and sometimes they would be so bad that I would be confined to my bed for several days at a time. I tried a number of different medicines, recommended for the trouble, but got no relief, and finally became so discouraged that I thought a cure was impossible, and stopped taking medicine. Shortly alter this I read in our local paper of a case of kidney trouble cured by the use of Dr. Williams' Pink Pills, and this induced me to try this medicine. I soon felt that these pills were not like the other medicines I had been taking, for in the course of a few weeks I began to experience great relief. I continued taking the pills for a couple of months, by which time all symptoms of the trouble had disappeared, and I have not since had the slightest return of the disease. The pills also strengthened me in other ways and I believe them to be the best of all medicines."

Dr. Williams' Pink Pills enrich and nourish the blood and strengthen the nerves. It is thus that they cure such troubles as dyspepsia, kidney ailments, rheumatism, partial paralysis, heart troubles, St. Vitus' dance and the ailments that make the lives of so many women a source of misery. Do not take any pills without the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around the box. Sold by all medicine dealers or sent post paid at 50 cents a box or six boxes for $2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

It is easier to make a dollar than it is to avoid arrest for counterfeiting.

The Flow of Milk will be increased.

Why go to all the trouble of keeping cows and get only about half the milk they should produce.

Dick's Blood Purifier

strengthens the digestion and invigorates the whole system so that the nutriment is all drawn from the food. It takes just the same trouble to care for a cow when she gives three quarts as when she gives a pail. Dick's Blood Purifier will pay back its cost with good interest in a few weeks.

50 cents a package.

MARKET REVIEW.

Compiled from The Commercial.

WHEAT—The movement forward from interior points is not as large as it was before the close of navigation, but it keeps up at a fairly large volume, inspection returns showing shipments from the interior to run about 200 cars per day last week. The railways have been giving more attention to moving fuel and general freight, which was somewhat neglected during the rush to get wheat out before the close of navigation, otherwise the movement would be heavier. Quite a number of country points are blocked up with wheat elevators being full, so that there is no lack of grain for shipment. There is plenty of storage space at lake ports yet, though it is possible that Fort William and Port Arthur may be also filled up before spring. The railways talk about moving wheat all rail to the eastern ports, but it is not expected that much will be done in all rail shipments, even if the railways were able to handle a considerable quantity, which they are not. A feature of the situation is the shipment of Manitoba wheat in bond to Minneapolis. One of the big Minneapolis milling companies has been buying quite freely here. Some wheat is also going from Canadian Northern railway points in Manitoba to Duluth, presumably owing to inability of that railway to handle the traffic to Port Arthur. The local market has been quiet most of the week. Buyers picked up a good deal of wheat for May delivery last week, and as there is very little doing in all rail shipment, they have a downward tendency. The holiday time is also helping to make trade quiet, as some of the principal buyers are away from business. At the close of business Saturday prices were ½c lower than a week ago, and we quote December delivery: 1 hard, 70c; 1 northern, 68c; 2 northern, 66½c; 3 northern, 64½c; in store, Fort William, Port Arthur or Duluth. For January delivery the price is ½ cent. higher than December for May delivery: 1 hard, 75c; 1 northern, 73c; 2 northern, 71c; and 3 northern, 69c.

OATS—There are hardly any oats in the market owing to car shortage. Dealers have orders dating back for a considerable time, and cannot get them filled for want of oats. This makes the market uncertain. Any sudden movement of oats would flatten out the price which is now above the actual value. There are large stocks of oats in the country, but as they cannot be moved they are not a factor in the market at present. No. 2 white oats are worth 28½c per bushel at Fort William. On track at Winnipeg this grade is worth 27c per bushel, and about 25c is the price for feed white. At country points farmers are getting 20c per bushel at central points.

BARLEY—Shipments are very light for want of cars. Brewers are bidding 32c per bushel for No. 3 extra barley, in carlots, on track. Feed grades are worth 26 to 27c.

FLAXSEED—The Manitoba crop is practically all out of first hands. Some districts in the Territories still have some flaxseed to sell. The price is about 98 cents to farmers at country points.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $6 to $6.50 per ton for carlots on track.

POTATOES—30c per bushel.

DRESSED POULTRY—Dealers are offering in a wholesale way 10c per pound for chickens, dressed; 9½c to 10c for ducks and geese, and 15c for turkeys.

BUTTER—Dairy—Very little butter is coming in and the market is quiet at unchanged prices. Dealers are paying 21c per pound net at Winnipeg for dairy, separator butter in bricks, and 14 to 17c net for choice tub butter.

DRESSED MEATS — Beef, city dressed, 5½ to 6½c, country stock, ½c less; mutton, 8 to 9c; lamb, 11½c; hogs, 9 to 10½c.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—Eggs are scarce and have advanced to 22c per dozen, net, in Winnipeg, subject to candling.

HIDES—Dealers are now paying 6½c for No. 1 hides, 5½c for No. 2, and 4½ for No. 3. Calfskins same price as hides. Horse hides 50c to $1 each.

SENECA—Best root, 52c per lb.

LIVE STOCK.

CATTLE—Butchers' ordinary are worth 3½c per pound and from that down to 2½c.

SHEEP—Worth 3½c per pound, off cars at Winnipeg. Lambs, 4½ to 4½.

HOGS—The price is 6c per pound for hogs weighing from 100 to 200 pounds. Heavies and lights are ½c to 1c less.

MILCH COWS—$30 to $45 each.

HORSES—There is a good demand for horses for bush work.

While over 80,000 bacteria per liter were found in the air of old houses in Paris, only six were to be found in the same quantity of air of the mountain tops.

Every Convenience.

There is a dock laborer in Glasgow who is possessed of a great sense of humor. Perhaps it's because he's an Irishman. Pat had been disturbed several times in his single apartment by a well meaning lady missionary. Seeing Pat was rather an exemplary sort of a husband, she suggested that he might be able to afford a room and kitchen soon.

"An' phwat wad Oi want lavin' such a comfortable house as this for?" asked Pat.

"Well," she replied, "you would have more room—more conveniences."

"Convaniences is it?" said Pat, with a smile. "Sure, an' at prisint if Oi want to go to the drawin' room or the dinin' room or the conservatory, begorra, Oi've just got to sit still. Phwat could be handier?"

The lady couldn't say.—London Answers.

Not an Occasion For Haste.

During the Sikh war the late Field Marshal Sir Neville Chamberlain, who then held the rank of colonel, called for volunteers to assist him in blowing up a bastion. Three or four responded, and the colonel led the little party close up to the point where the mine was to be fired. As soon as the explosives were in place and the fuse lighted the volunteers started to run in order to get out of the way of the explosion no less than to effect, as speedily as possible to retreat to the safety of the British lines. They had not gone a dozen yards before Chamberlain shouted: "Come back! There's to be no indecent haste, young men. We'll walk." And walk they did, while the fuse slowly sputtered down to the waiting powder.

A Minor Consideration.

The ambitious young woman was attracted by an advertisement, one line of which read, "How to Become an Author." The advertiser claimed that by his method failure was impossible.

So the ambitious young woman sent on the necessary trifling sum of money, and by return mail she received a slip on which was printed this bit of advice, "Write something."

"But," she protested by letter, "I already have done that, and it hasn't been printed."

"We congratulate you," was the reply. "If you have written something, you already are an author. Publication is a minor consideration, with which we have nothing to do."

Managing the Baby.

Young Matron (with theories on the care of children, to nurse)—Jane.

Nurse—Yessum.

Young Matron—When the baby has finished his bottle, lay him in the cradle on his right side. After eating a child should always lie on the right side. That relieves the pressure on the heart. Still (reflectively) the liver is on the right side. Perhaps, after all, you had better lay him on the left side. No, I am sure the treatise on "Infant Digestion" said right side. On the whole, Jane, you may lay the baby on his back until I have looked up the matter more thoroughly.

An Earnest Salutation.

"Ah," said Biggs as a prosperous looking man who had cordially saluted Diggs passed on, "that's the way I like to hear a man speak. He seemed sincerely glad to find you alive and well."

"Yes," replied Diggs. "He probably was. He's the president of the company my life's insured in."

THE MASONIC BALL.

A GRAND EVENT ON NEW YEAR'S EVE.

Beautiful Decorations—Good Music—Well Served Refreshments—Some of Those Present.

One of the most important events of its kind ever held in Fernie was the grand ball given by the Elk River Lodge, A. F. & A. M., on New Year's Eve. The Masons of Fernie spared no effort or expense to make their first annual ball a success and they succeeded in every detail.

Princess Hall was decked out in its best holiday attire. For two days careful preparations under the skilled management of W. Hawthorne assisted by the committee had been going on and the large hall was transferred into a fairly land of evergreens, flags, buntings, etc, arranged most artistically over walls, projecting arches and lofty ceilings. The decorations were not over done, but were judiciously and tastefully distributed to make the most charming effect. Suitable mottoes of greeting and welcome appeared in large letters on the walls.

An unique and beautiful feature of the decoration was the magnificent electrical display, consisting of 100 incondescent lights arranged in a circular frame in the shape of a huge square and compass. This beautiful ornament was hung in front of the stage and arranged under the superintendence of Mr. W. W. Brown. chief electrical engineer of the Coal Company. The lights were supplied gratituously by the Company.

The music was of the highest order. The orchestra had Keith Whimster back in his old place and the six instruments made excellent music which greatly enhanced the pleasure of dancing.

The general committee consisting of J. A. Rennie, Jas. Falconer, J. H. Bricker, Dr. S. Bonnell, E. L. Wriglesworth, S. Graham, A. W. Bleasdell, J. B. Turney, C. W. Laidley, J. McEwing, W. W. Brown and A. Joyce, secretary, had previously arranged every detail with careful precision and during the evening looked after the comfort and pleasure of their guests. Mrs. Rennie, Bonnell, Graham, Herchmer, Proctor and Bleasdell acted as a reception committee.

A large number of guests from Fernie and surrounding district attended the ball, and the capacity of the spacious hall was taxed to its utmost. The stage was utilized by the orchestra and the refreshment tables which were arranged to seat 24 at one time. A continuous supper was served from 11:30 to 3. Too much cannot be said in praise of the catering of Messrs. McEwing & Slinn. Everything that could oe desired was served in elegant style.

At 12 o'clock, just as the old year gave place to the new, the large gathering, at the suggestion of Mr. Rennie, joined hands and sang with appropriate feeling "Auld Lang Syne," after which the compliments of the New Year were freely exchanged.

Among those present were:

To fittingly deseribe the brilliant dresses seen at this event is quite beyond our powers. It is no exaggeration to say that seldom have so many pretty and costly gowns been seen at a gathering in Fernie. Among those worthy of more than ordinary notice in this respect may be mentioned Mrs. W. R. Ross, Miss McBroom, Mrs. L. Forbes, Mrs. A. B. Trites, Mrs. Clode, Miss Digby, Mrs. Rennie, Miss Todhunter, Miss Macdonald.

TAFF VALE CASE.

Most Important Contest Ever Waged in Great Britain.

The decision of the judge, who with a jury, last week tried the case of the Taff Vale Railroad company against the Amalgamated Society of Railroad Servants, is awaited with great interest.

The case, itself a precedent, follows a precedent in the most important contest between capital and organized labor ever waged in Britain. It arose out of the strike of the Taff Vale railway employees in 1900, was first looked upon as a matter of purely local interest, but later assumed a national importance, and undoubtedly will have no small effect in decisions on labor disputes the empire over. When the union employees of the Taff Vale Railroad company went out on strike in the year above mentioned they did so with the authorization of the central body, the Amalgamated Society of Railroad Servants, which, as usual in such cases, largely supplied the "sinews of war." Subsequently the company took the ground that trade unions were responsible for their conduct or the conduct of their members; that such responsibility could be legally enforced by levying upon the funds of unions for indeminity for illegal acts, and on this basis it entered a suit against the Amalgamated Society, claiming damages for malicious intimidation, picketing, and unlawful combination to carry on the strike. The queston as to the responsibility of trades unions was first taken up, and resulted after an appeal to the highest tribunal in the land, in the upholding of the company's contention. Thereupon action to recover damages of £28,000 from the Amalgamated Society was commenced, and this has ended with the verdict that the company is entitled to damages, the judge reserving decision as to the amount.

OUTPUT OF OUR MINES.

December Was a good Month—Steady Increase Shown.

The output of the Crow's Nest Pass Coal Company's collieries for the month of December shows a marked increase over any month since last spring. The following are the figures for the past three months, for the three colleries:

October.....	42,577 tons
November.....	34,410 tons
December.....	43,631 tons

November output was curtailed by the Michel strike.

The following shows the amount contributed by each camp for the month of December.

Coal Creek.....	19,336 tons
Michel.....	13,927 tons
Morrissey.....	10,369tons

It is expected that the output for 1903 will reach the grand total of 1,000,000 tons.

COAL COMPANY APPOINTMENTS.

Several Important Changes Among the Company's Officials.

Many changes have been made in the C. N. P. Coal Company's management at the beginning of the year as a result of several resignations. The following is a list of the changes:

A. R. Wilson, formerly chief engineer, has been appointed superintendent of the Michel collieries, in the place of D. Evans, who has resigned.

Chas, Simister, formerly overman of Nos. 3, 4 and 5 tunnels, Michel, has received the appointment of mine manager at Morrissey, vice T. R. Morton, overman, resigned.

Wm. Powell, formerly fire boss at Coal Creek mines, assumes the position of overman of tunnels 3, 4 and 5, Michel, vice Chas. Simister, removed to Morrissey.

A. Colville, formerly fire boss, Coal Creek, No. 2, appointed overman Nos. 2 and 3, vice Thos. Graham, resigned.

These officials took charge of their new duties on the first of the year.

NEW YEAR'S DAY.

The first day of the year, according to the time-honored custom was strictly kept as a holiday in Fernie. The day was bright and beautiful and many enjoyed a pleasant outing. The usual feastings on turkey and plum pudding marked the day and the custom of making New Year's calls was followed by many.

The hotels of the town were not behind in furnishing extra cheer for their guests. W. B. Ganong, of the Royal, in his usual generous manner prepared a grand dinner for his guests and many invited friends. The Royal menu card explains more fully.

ROYAL HOTEL DINNER

Celery Savin Rock Oysters Raw Queen Olives

Cheese Coffee Crackers

Burrows Wins from Madden

The boxing bout between James Burrows, of Fernie, and Jack Madden, better known as "Kid," which took place in Princess Hall on Monday evening, ended rather disastrously for the American. The men came into the ring about 9 o'clock and by mutual consent Frank Unfried, of Rossland, was chosen to referee the affair. Both men looked to be in the pink of condition, but the difference in weight, which amounted to about twenty pounds, gave Burrows the advantage over the American. However his backers had confidence in him and Madden money went begging. The contest was brief. From the start Burrows showed his superiority over his antagonist. In fact Madden was not in it for a minute. He was knocked down repeatedly, but pluckily returned to the fight until the middle of the second round when he received a heavy punch on the side, which put him out.

THE SCOTTISH CONCERT.

Gavin Spence and Flora Macdonald Entertain a Large Fernie Audience.

In all that constitutes a strictly high class attraction, the entertainment given by Gavin Spence and Flora Macdonald last night certainly excels. While the program abounds with humor, there is not the slightest intimation of anything of the nature we are often subjected to on this line. Quiet, unostentatious, and yet thoroughly conversant with their art, they held the large audience with a seeming thrall from start to finish. Considering the fact that they have given five nights entertainments in succession, despite the inconvenience incurred while travelling on the Crow's Nest route, makes it the more obvious that they are certainly gifted with extraordinary ability. The program consists of songs, readings, duets, anecdotes, and highland dancing, so arranged that the evening is gone before you realize it. We learned a number of things about Scotland and her history last night that we never had brought to our notice before. Both performers are experts in vocalism and Miss Macdonald truly excels in dancing, her exhibition being the neatest piece of footwork we have had the pleasure of witnessing.

Mr. Spence can apparently understand just what his audience needs, and as he uses no printed programs he generally caters to the individual tastes of his audiences. His realistic Highland dress, his native inflection, his winning "naturalness" on the stage, his keen humor, and his ability to tell a good story all go to make him an entertainer of rare ability.

They were asked to repeat, or give another program this evening, but felt that they needed their rest too badly to appear to advantage, but promised to give Fernie a call whenever they return to this section.

That the "standing room only" sign will be in evidence before the time of raising the curtain is a foregone conclusion.

The Ladies' Aid of the Presbyterian church are to be congratulated upon the big house that they got for this entertainment. While their expenses were heavy they will make a large sum clear. The large hall was well filled.

PRESBYTERIAN S. S. CANTATA.

On Tuesday evening the Presbyterian Sunday school held its annual Chrismas entertainment.

The children of the school rendered in good style an appropriate Christmas cantata in which Santa Claus figured prominently. He had prepared a treat for them and they in their turn surprised and charmed him by the hearty way in which they sang and recited his praises.

The many helpers of this popular old gentleman appeared in turn and told of their especial duties in Clausville Town. A row of sailor boys sang of the part they did in fetching his toys. A long row of pretty little girls each bearing a lighted candle sang that they were his candle-makers. Another row each carrying dolls, in a like manner proclaimed that they dressed his dolls. Many other branches of the great family were represented, and there was also a Mrs Claus and several committees.

The children were well trained, and the large audience was much pleased with the preformance. Old Santa treated each of the children liberally with a bag of good things to eat; and last of all presented Mr. Staebler with a handsome volume in recognition of the work he had so faithfully done.

RUSSIAN MINE DISASTER

St. Petersburg, Jan. 1.—Fifty-eight lives were lost in the recent fire in a coal mine at Bachmut, Ykatorino, Slav province. Eleven men were rescued after having been sixty hours in the mine. Twenty-one others were saved after five days imprisonment.

My Heart's Darling

BY W. HEIMBURG

Auther of "A Penniless Orphan," "Gertrude's Marriage," "Her Only Brother," Etc., Etc.

He stroked her hair caressingly, and looked tenderly at her. She did not notice it; she was trembling in every nerve. Now that she had him to take her place, her strength seemed leave her.

"Sit down," he begged, and put her in an arm-chair. "Be quiet now; you have been very brave, Lucie."

He nodded to her, and went into the bedroom, the door of which had remained open.

It was not long before mademoiselle also appeared. "She is awaking," she cried. "Thank God, it was only a fainting fit! Heavens, how often I used to faint as a girl! And to make such a noise about it! Dearest, you rang as if there were a fire or a murder. I shall never forget the trouble it gave me, jamais!"

"I do not want her to see me here," Lucie now heard her lover say; "and perhaps it would be better, too, if she did not find either mademoiselle or the Herr Baron here when she wakes. The less one makes of these attacks the better. for the patient," he continued.

"But some one must be here," said mademoiselle; going up to the doctor, "and I know her maid is never allowed to come here unless called."

"I will stay here, Alfred," said Lucie. "I will act as if I had just come, or—"

"That is the best," said he. "If Frau von Lowen should be very restless, send for me."

She stepped out into the corridor with him.

"What a frightful struggle she must have had before she came to that!" whispered the young girl, leaning against him.

"She is nervous and fanciful, child," he returned, coolly; "that kind of thing happens oftener than you imagine. Only take care that she does not think too much about this foolish attempt of hers; don't be embarrassed; talk to her about other things. You must help me sometimes, Lucie." He kissed her tenderly on the forehead, and bade her go back. "Make everything quiet as soon as possible," he begged.

Lucie sat more than a quarter of an hour in the deep arm-chair in the boudoir, looking through the open door of the bedroom at Frau von Lowen's bed. They had all, in accordance with the doctor's orders, left the room. On a little table stood some wine and refreshments in readiness. They had shut one of the windows again, and now it looked only as if some tired child were sleeping sweetly, watched over carefully. The twilight of the spring evening filled the room, and without, in the garden, the nightingales were singing.

Hortense did not move; but Lucie saw that she lay there with her large eyes wide open; perhaps she did not yet know what had happened. At last she sat up in bed, and looked round, her hands on her temples; then she began to look for something.

"Hortense," cried the young girl, "may I come in? You were sleeping so sweetly, I did not want to wake you. I have been waiting here a long while to thank you for your kindness yesterday."

While saying these words, she drew near the bed, and took Hortense's hand. Two large, frightened eyes stared out of the white face of the young baroness at the slender girl, did not answer.

"Do not disturb yourself, Hortense, and do not be offended that I have surprised you asleep; I was sent up. Are you angry with me? You know me—Lucie Walter." She sat down on the edge of the bed, and laid her arm on the shoulder of the sick woman. "My dear, good Hortense," she said, warmly.

"You!" said the young woman, and pushed her arm away. "What are you pretending about, and why do you tell me lies? Why did you come to-day?"

"It was well that I came to-day, Hortense."

"Very well, as one may take it; but I beg you will not trouble yourself any further. But just tell me what time it was when you were shown in?"

"It was about half past five."

"And what time is it now?"

"It is half past seven."

"Who announced you? Who came first to my bedside?"

"No one; I found you so," returned the young girl, emphasizing each word.

"You?"

"Yes, I, Hortense."

"And the others?"

"They think we are talking together."

Hortense was silent. "Go," she said; "forget it. I can not be thankful; it is too bitter, what you have done to me."

"No, will not go," returned the young girl, although Hortense turned away, buried her face in the pillow, and clutched at her hair with her slender hands. She remained quietly seated, and began to talk softly. "It was really wonderful that we should meet yesterday, Hortense. It has brought back my childhood so vividly to me. Do you remember, pet, papa's little monkey? What a good little thing it was, and how droll it used to look in the little goat-cart. I could paint the place where we buried him with so many tears. Do you remember how we once fell down, and you got such a cut on your forehead that my father had to sew it up? You clung so to my mother, and I cried so bitterly with you. Ah, my dear mother! I can never forget her, she was so good and kind! Many a time at night when I lie in bed, it seems to me before I go to sleep that I feel her soft hand stroking my forehead, and then I have to cry. Do you ever feel that?"

Hortense turned round. "No," she said, doubling her fist. "It makes me enraged to think of my mother, for she was worried to death and into the grave, and I was deceived about the only person who ever really loved me."

"Hortense, a fiancee should not speak so," said the young girl, reproachfully.

"Fiancee?" she laughed, scornfully. "Fiancee?"

Lucie stopped, quite frightened.

"Give me a glass of wine," begged the young baroness. Lucie brought it to her and she emptied it at a draught. "Do you know the old Baroness Lubeska?" she asked.

"That horrid person that all the children run after, because she is almost always drunk?"

"Yes; she got in the habit of it because her husband deserted her. Is it not better to be dead than to come to that. I have not been able to get that woman out of my thoughts since yesterday. Give me half a glass more, Lucie."

"No."

"How careful you are! But do me another favor: there was an envelope here; read me one of the letters in it. You must have taken it away."

"Yes; here it is," said Lucie, and she took it out of her pocket. "I thought it was a farewell to your grandfather."

"Of course, so it was; but a letter to me was inclosed in it from him—to keep for my father; there, read it—it is the white heavy paper."

"To-morrow, Hortense. It will only excite you again."

"Read," she said, in a commanding voice.

And Lucie read:

"Dearest Hortense,—I cannot express to you how unutterably hard it is for me to write these few lines to you. You know how I love you, and will understand the pain it gives me, and will believe that nothing but the stetnest necessity obliges me to give you back your promise. We must part, Hortense. Why? Your father. I dare not tell his daughter of all the bitter debts he has incurred, and yet I almost believe you are not unprepared. My position you will understand—"

"Stop," interrupted Hortense.

"My poor, dear Hortense!" sobbed Lucie, kneeling down at the side of the bed.

"Before this I could cry, too," murmured the young baroness. "But get up! Ach! I am so tired of it all. If you had only let me sleep! All that I have loved have decieved me, have rewarded me with hatred and ingratitude. They have taught me suspicion and contempt."

Lucie sobbed silently. She thought of the bright, sunny child that used to hang so lovingly on her father's neck, that used to talk so much about her handsome papa, and she saw before her a pale, despairing woman who longed for death on account of this same father.

"I am very tired," moaned Hortense.

"Sleep—rest on," begged the young girl, and arranged the pillows.

"Give me your hand, Lucie; stay by me till I fall asleep. Come again to-morrow; your voice quiets me. No, no; you shall not watch here; Minna can sit in there on the sofa." She held the little girlish hand fast in hers. "Do not cry," she said once more. "Can you understand me now?" Then after a pause, when Lucie thought she had been asleep some time: "It has done me so much good to talk to you, Lucie. Do you remember the nightingales used to sing just so sweetly in your garden?"

She spoke a few more words in a low tone, half intelligibly, and at last she fell asleep.

Lucie slipped out on tiptoe; the maid sat in an armchair by the salon door. Lucie gave her the necessary directions, sent her in, and went home.

(To be Continued.)

What Washington Lacks.

There is no avenue in Washington which measures adequately up to the full demands of civic beauty. Woodward avenue in Detroit, Euclid avenue in Cleveland, Peachtree avenue in Atlanta, Independence avenue in Kansas City and Summit avenue in St. Paul are all examples of handsome thoroughfares, where magnificent private residences are set in miniature parks. On a larger scale Brookline, near Boston, presents a charming picture of suburban development along picturesque and artistic lines. There is nothing of the kind in Washington.

An Artist's Trials.

Brownly—Dauber certainly has his own troubles.

Pinder—Why, I thought he was doing splendidly.

Brownly—He was until he painted that last landscape. He painted the sun in too natural.

Pinder—How could that be?

Brownly—Well, it dries up the water in the pond so fast that he has to paint in new water every two or three days.

The ink of the Greeks and Romans was merely lampblack mingled with gum in the proportion of three parts of the former to one of the latter.

"THE PROOF OF THE PUDDING LIES IN THE EATING."

The doctors are dumbfounded, the druggists astonished, and the people excited and joyful over the wonderful cures and tremendous sales of the great Remedy, St. Jacobs Oil. Every case of Rheumatism—some of many years' standing—has given way to this powerful remedy. Thousands of certificates like the following can be furnished as to its value :—

George Scleyer, Publisher of the Chilton, Wis., "Volksbote," used St. Jacobs Oil for "almost unbearable pains in the back, which had completely prostrated him." A few applications cured him entirely.

Mrs. Fred. Eberle, Bellaire, O., was for a long time severely troubled with Rheumatism. St. Jacobs Oil instantly relieved and entirely cured her.

Rev. Dr. B. Pick, of Rochester, N. Y., suffered so invensely from Rheumatic pains that he was unable to preach. Several applications from a bottle of St. Jacobs Oil, "relieved him."

F. Radder, Cleveland, Ohio, says: "Two applications of St. Jacobs Oil cured me of great and long-continued pain in my foot."

Messrs. C. L. Brundage and Son, Druggists, Muskegon, Mich., write:—"St. Jacobs Oil has a wonderful sale. We sold eight bottles at retail yesterday. This will give you some idea of how well it is liked in this section."

Mr. Louis Hinkel, of East Poesten, Kill. N.Y., says :—"I call St. Jacobs Oil the best liniment I ever used. It cured me of Rheumatism and pain in the back."

Herman Rittner, Manchester, N.H.: "I have tried St. Jacobs Oil and found it excellent. All those who have purchased it speak of it as 'simply incomparable.'"

Geo. G. Erifle, Palestine, Ill.:—"I was in bed suffering from a swollen leg. I used St. Jacobs Oil, its effect was wonderful. The following day I attended to my business again."

Dr. Otto Fuls, Reading, O., writes: "The sale of St. Jacobs Oil is constantly increasing; it is praised by everybody and never fails to give entire satisfaction."

A woman can test a man's patience by asking him to thread a needle.

The total number of deaths in Indiana in September was 2,512.

From His Back And Hips

"Pinto Shell" Cordovan for H.B.K. mitts and gloves is made from the "shell" or back and hips of the Western Bronco, the toughest hide weight for weight worn by any animal.

Tanned by a pure vegetable process without oil or minerals to conduct cold.

The toughest most pliable leather used in mitts or gloves.

Scorch and boil proof—will not stiffen in cold weather nor crack when dried out quickly.

H.B.K. BRAND

Sold by all dealers. See this brand
If your dealer has not got them write us and send his name.

Makers of Warm Clothing, Mitts, Gloves, Underwear, Sox, Moccasins, etc. 102

After all, there is no better test of an article than popularity. Ask your friends what they think of Blue Ribbon Ceylon Tea.

The proverbial luck of fools is never mentioned by the lucky individual.

Minard's Liniment Cures Colds, Etc.

Children put grown people to shame when it comes to telling the truth.

All men make mistakes, but what the newspaper man does is write.

No family living in a bilious country should be without Parmelee's Vegetable Pills. A few doses taken now and then will keep the liver active, cleanse the stomach and bowels from all bilious matter and prevent Ague. Mr. J. L. Price, Shoals, Martin Co., Ind., writes: "I have tried a box of Parmelee's Pills and find them the best medicine for Fever and Ague I have ever used.

If a man is satisfied with himself he is usually disappointed in other people.

If you see a book agent who has not called on you, do not worry. He'll get around.

Minard's Liniment Cures Distemper.

Some people have a mania for saying smart things that make other people smart.

Lawyers have no excuse for going hungry, as the statutes have lots of provisions in them.

SAFE, CERTAIN, PROMPT, ECONOMIC.—These few adjectives apply with peculiar force to Dr. Thomas' Eclectric Oil, a standard external and internal remedy, adapted to the relief and cure of coughs, sore throat, hoarseness, and all affections of the breathing organs, kidney troubles, sores, lameness and physical pain.

Lawyers are men who work with a will, and doctors often go ahead and prepare the way.

Marriage is a lottery in which the blanks are husbands—so says a wife who takes in washing.

One young man wants to know how long girls should be courted. The same as short ones, of course.

He — I love the true, the good, the beautiful.

Miss Sereleaf—Oh, Mr. Blank, this is so sudden.

Some of the people who think they were born to command do not discover their mistake until they get married.

The average man's little troubles would not amount to much were it not for the uncalled for comment of his friends upon them.

Men of leisure seldom have time to do anything.

The artist always has the best of it in a drawn battle.

It is not every client who is able to keep his own counsel.

Habits grow on a man, but a small boy soon outgrows his habits.

It is the man who snores loudest who always manages to get to sleep first in a sleeping car.

CURED ONCE AND FOR ALL

Dodd's Kidney Pills Make No Halfway Work of Kidney Disease.

J. J. McDonald Had Rheumatism and Dropsy, Was Cured by Dodd's Kidney Pills, and Has Had no Return of the Trouble For Five Years.

Windsor, Ont., Dec. 29.—(Special)—It has been acknowledged for some years that Dodd's Kidney Pills would cure any case of Kidney Disease, and of late those interested in medical science have been watching those cures to convince themselves that they were permanent. Gradually the conviction is forced that Dodd's Kidney Pills cure once and for all. One more proof of this is furnished by John J. McDonald, a well known farmer, now residing at 130 Langlois avenue. Five years ago he was troubled with Rheumatism and Dropsy. For two years he suffered terribly, and the different medicines he tried failed to relieve him. His legs were swollen and the pains he suffered were most acute. He used Dodd's Kidney Pills, was cured, and his cure caused quite a sensation at the time.

Mr. McDonald, speaking of his cure recently, says:

"I have had no return of my trouble up to the present, and I am not anxious for any. It is with pleasure I acknowledge that Dodd's Kidney Pills cured me. I found them just as represented, and they did for me far more than I expected they would."

A philosopher has an excuse for any old thing except the toothache.

Lever's Y-Z. (Wise Head) Disinfectant Soap Powder dusted in the bath softens the water at the same time that it disinfects.

SMART YOUNG ROGUE

CAREER OF A BAD BOY IN ALBERTA.

Ernest Cashel is Arres ed Charged With Forgery, But Escaped at Red Deer Without Hat or Coat—He is Now Believed to be in Portland, Ore.

A dispatch from Calgary says :—There are few fugitives from justice who have had the short, sharp and intensely interesting career as that which has come in the last few days to Ernest Cashel.

Cashel is only a bit of a boy. He is a delicate, innocent looking boy at that. He came to Calgary about two months ago, and it is said forged or uttered a forged cheque, or obtained money under false pretences.

He went back to his home in or near Ponoka. Cashel is a member of the American invaders, who according to eastern papers have come to this land for the express purpose of swallowing us up. He went back to Ponoka. The first knowledge that the crime had been detected was the appearance on the scene of Chief English. The chief arrested the boy, who made no resistance, but who escaped hatless and coatless and vestless at Red Deer in a manner described some time ago.

How Cashel has lived since he evaded justice on that day is difficult to say. It is said that he broke his arm in the fall from the train. It is said that he turned into a desperado, that he had acquired the habit of helping himself to his neighbors' horses. In fact, one story is to the effect that the owner of one horse, upon which young Cashel was riding, had been missing. However that may be, Cashel avoided arrest. Two members of the Calgary police force went north at different times but could not reach the youthful adventurer. One member of the Mounted Police force got on the trail, but failed. A second met with a similar fate, and then Pennyquick, the man who gained fame by the detection and arrest of O'Brien, the Yukon murderer, started on the hunt. Pennyquick is still on the chase.

In the meantime Cashel got tired of Ponoka, or the perpetual chase after him, or perhaps both, so he decided to walk out. He came to the "Main Artery" by a roundabout way and last week arrived in Sheppard. He got a ticket for Calgary. He passed through Calgary on one of the daylight trains and watched the chief of police on the platform. He did not get off here, but passed on to Laggan, to Kamloops and from there on west, and where he is now it is extremely difficult to tell.

However, the police are keeping close at his heels, and it would not be a matter of surprise if he was taken any day. It is believed he is in Portland, Ore.

Perished in a Snowslide.

A dispatch from Nelson, B. C., of Dec. 26, says: Last night at 11 o'clock a snowslide at the Molly Gibson mine, 22 miles from Nelson, killed eight men and badly injured two.

The most disastrous snowslide in years came down the mountain side on which the Molly Gibson mine is located on Christmas night. The stupendous avalanche of snow came tearing down the mountain at terrific speed, and with deafening roar, breaking great trees into matchwood and carrying all before it. The large bunk house at the mine, in which 12 miners were sleeping at the time, was partly demolished. Two only of the twelve escaped; two others were badly injured, one having his legs and arms broken. Of the eight miners killed, the bodies of two have been recovered. The other six men are missing, having been swept away and embedded in the great mass of snow and debris.

A relief party has gone out from Nelson to endeavor to dig out the missing bodies in the very faint hope that some of the unfortunate miners may yet be found alive.

Directors of the Paris exposition have awarded St. Paul, Minn., the medal, showing it is the healthiest city in the civilized world, and having the lowest death rate. It is also decided that that city has the best system of sanitation in the world. Nearly all the prominent cities in America, Great Britain and the continent of Europe were in competition, of which this is the outcome.

As the result of an accident at the gas main, Notre Dame street, St. Henri, Montreal, on Dec. 27, William McBride, gas fitter, is dead, and two companions, James Staton and Matthew Land, are in a bad way. The men were making an excavation to repair the gas main when they were overcome by escaping gas. They were found unconscious and taken to the hospital. McBride died before he reached the hospital.

Royal permission has been given to call the new chair of music at the University of London "The King Edward Professorship of Music."

THE WIDE WORLD.

Telegraphic News of Two Hemispheres Briefly Chronicled.

The land entries at Regina and Lethbridge offices have trebled.

The C. P. R. irrigation scheme in the Territories will cost $7,500,000.

Rt. Hon. Joseph Chamberlain has reached Durban, South Africa, where he addressed a public gathering.

The Dominion parliament is to meet early in March.

The mills of the William Boake Manufacturing company in Toronto, were destroyed by fire on Dec. 26.

Terrific gales have swept the coast of Denmark and caused heavy loss of life.

Hadda Mullah, who caused so many outbreaks on the northwest frontier of India, died on Dec. 22.

It is reported in Vienna on good authority that Archduke Ferdinand and the Crown Prince of Saxony and their companions purpose going to the United States, there being little probability of their finding congenial homes in Europe.

In the sessions court at Toronto on Dec. 26, Judge McDougall sentenced John Brady, alias Perkins, to two years less one day, in Central prison, and to be given 30 lashes with the "cat," 15 in the first month of his imprisonment and 15 six weeks before his release. The charge was indecent assault on a six-year-old child named Louisa Bruce.

The returns of the referendum vote in Ontario are complete, except that East Nipissing is left out and Fort William is incomplete. The vote shows 198,630 votes for the Liquor Act; against it, 102,638; majority for the act, 95,993.

The house that is being built for Mr. Schwab, the president of the Steel Trust, on Riverside Drive, in New York, will be regal in its magnificence. The tapestries for its interior decoration will alone cost 850,000. The whole establishment will cost in the neighborhood of $5,000,000.

The Single Tax association of Toronto has sent a letter to members of the government protesting against the granting of any further aid to private corporations, mentioning in this case the Grand Trunk Pacific, which the association asks should be constructed as a national road.

At Severn Bridge, Ont., two little boys named Cottrell were playing with a gun when the elder placed the muzzle against his chest and told his little brother to pull the trigger. The result was instant death.

Word has been received in Winnipeg that Captain J. Petherill, of Windsor, Ont., who has been captain of the Dominion Fish company's tug Daisy for the last two seasons was found dead in a shanty at Snake Island, Lake Winnipeg. A companion, a Frenchman, was found insensible in the shanty with marks of blood upon him.

The Austrian manufacturers have decided to advance the price of shoes 10 per cent. on account of the higher cost of leather. They claim this step is due to the extensive purchases of hides in the European markets by Americans, who have practically cleaned out the continental stocks. The Austrians also profess to see increased danger to the European shoe industry from America, owing to the United States government refunding 99 per cent. of the tariff on the raw article when manufactured and exported. They claim this procedure is too greatly facilitated by Secretary Shaw's order admitting proof of identity by simple declaration instead of by affidavit.

The United States demand for English coal is again in evidence says a dispatch from London. Four large steamers, carrying among them 17,500 tons, have this week been chartered at the Newcastle market for New York and Boston. The coal covered by these transactions is for January loading, and the rates at which the vessels nave been chartered show smart advances.

Belfast shipbuilding returns for 1902 constitute a remarkable record. The two great firms o Harland & Wolff, and Workman, Clark & Co., have carried all before them, and left the highest outputs of both Scotch and English firms about ten thousand tons in the rear. Harland & Wolff's yards turned out six huge liners, with an aggregate of 79,497 tons, and Workman, Clark & Co., 12 vessels, of 73,833 tons. Adding a small steamer of 130 tons build, MacColl & Co., the Belfast firm, has been responsible for nineteen vessels, with an aggregate of 153,560 tons, an increase of 7,533 tons compared with last year.

F. Chapin, of Winnipeg, a brakeman on the C. N. R., was on Dec. 26, run over by a freight engine and one leg was completely severed, while the other had to be removed. He will probably not recover, although he remained conscious, and calmly gave orders to the surgeon and those around.

TELLING THE STORY

INQUEST ON VICTIMS OF G. T. R. DISASTER.

Station Agent Carson and Despatcher Kerr Give Contradictory Accounts of the Fatal Order—A Series of Unfortunate Happenings.

Wyoming, Ont., Dec. 30.—At the inquest yesterday a railroad story as dramatic and as tragic as any in the history of railroads was told by the train despatcher, J. B. Kerr, and the station agent, Andrew Carson, who gave different versions of the causes which led to the Wanstead horror. Their statements are different in no degree from those already reported, but they were made on oath, and the two employees both added details to support the evidence which, on the vital point of direct responsibility for the wreck, contradicted each other.

The testimony of the two men agreed up to the statement by Carson that Kerr had told him to 'bust or cancel the order giving instructions for express train No. 5 and the eastbound freight to pass at Wanstead. Kerr denied sending this message, and his denial is supported by all documentary evidence which will remain as a record of the tragedy. Carson has only in black and white the words, "Bust it," written on an order by himself to support his word. The curious chain of mishaps which led to the disaster was, perhaps, the most impressive feature brought out by the day's proceedings. Carson, in the first place, either misunderstood or failed to deliver the order, or else the order was improperly given. Either of these circumstances might have occurred, and the wreck been impossible if the operator at Kingscourt had been at his key, instead of, as he probably was, out on the platform. There was a clear four miles between the two stations in which to stop the express. If the great mogul engine, with its watchful engineer, had passed Kingscourt danger signal, and the Wanstead operator had been working in his office, as he often does at night, he would have had five minutes to raise his semaphore, and the express could not have got by that.

With No. 5 past these two stations the agent at Wyoming had a chance to hold the freight. He was imperatively ordered to do this by the dispatcher, and gave the signal to the rear brakeman on the van of the long line of cars. The brakeman saw the lantern wave and transmitted the stop signal to the head of the train. He supposed that the conductor had been left behind, but from the engine came an answer by lantern that everything was all right, sent by both conductor and front brakeman, so he did not repeat the signal. The Wyoming agent, content with having his stop signal acknowledged, walked back to the station, not knowing that he had failed to carry out instructions to 'stop' the freight. Conductor Graham knew that he had to pass the freight at Wanstead, and but for the final mishap to his plans, the express would have swept by in safety. Graham knew better than to keep the fast passenger train waiting, and in his own words, he "did not want any truck with those big mogul engines," so when the freight was nearing the switch at Wanstead he ordered the driver to slacken speed, and the brakeman jumped off and ran ahead to turn the switch. This was to save the time that would be lost by bringing the heavy train of beef cars to a dead standstill and then start again. The ground at the switch was slippery with soft snow, and the brakeman's feet went from under him. He failed to throw the switch and the freight engine and cars rolled along the main track past him. Then the train had to be stopped and backed up to the switch. This took a minute and a half, only a little time, but longer than would have been required to pull the train securely into the siding. With that little time expired the crew were jumping for their lives before the awful rush of No.5 express.

The hearing of the evidence is being proceeded with in a little hall near Wyoming station, itself once the shelter of many sufferers from the railway wreck.

Carson was called first, but his lawyer objected. He said he wanted to hear the first evidence dealing with the incidents leading up to Carson's part. This being practically an intimation that the dispatcher's version should be given first. J. B. Kerr, author of the order for the crossing of the trains at Wanstead, was called to the stand. Kerr denied positively that he ever cancelled the order once given without substituting another specific order. He told the story of the orders given and the efforts to stop both trains at intervening stations, which efforts were too late in every case by two seconds.

Carson complained that the books were taken from his office, but the railway solicitor produced the books in court. Carson said he had frequently received orders to "bust" previous orders, but could not give the date for any.

M. G. Watson, the Wyoming agent, Brakeman Harkness and Conductor Graham, of the freight, were the other witness, and the inquest continues

Most of the wounded have left London for their homes, and most of the dead have been sent to friends for interment.

The business men of Watford have passed a strong resolution in favor of Carson as an overworked and under-paid official.

The Scottish curlers have arrived at Halifax.

THE NEWS IN BRIEF.

Telegrams and Cablegrams Condensed for Busy Readers.

The victims in the Andijan earthquake now number 4,800.

Mayor Cook, of Ottawa, gets another term by acclamation.

At Moosomin 275,000 bushels of grain have been marketed.

The curling rink at the Soo, Mich., the finest in America, has collapsed.

There is a meat combine at Dawson City and prices have advanced materally.

The coal stringency in New England is seriously affecting the railroads.

M Prefontaine and his friends have decided to start a new daily paper in Montreal.

The Rowing club hockey team defeated the Winnipeg Victorias by 5 goals to three in the first match of the season.

Wm. Emery, a deaf mute, was killed on the Grand Trunk track north of Peterboro on Dec. 29. He was walking on the track when struck. He leaves a wife and one child.

A steer weighing 1,870 pounds was sold on the Toronto market for the Christmas trade. The price paid was 7c per pound.

August Chambrone, an Italian, was murderously attacked in Fort William with an axe in the hands of an unknown.

Commercial travellers of Winnipeg, at a public meeting on Dec. 27, censured the hotal accommodation and the train service of the west.

Montana police and the Canadian Mounted Police will ignore the boundary line in running to earth the Johnson and Jones gang of desperadoes.

William Duffield, a Hartney man, got lost in the storm last Tuesday while going from a neighbor's house to his own, about 600 yards distant. Search parties have been out but so far have proved unsuccessful.

Correspondence received from Yokohama by the steamer Tartar last Saturday night, includes the details of a horrible baby farming conspiracy in Osaka. An elderly woman, her married daughter, husband and two others have been arrested for infanticide, and it is learned that since they have started operations they have killed 300 children, 80 this year.

The Japan Times has an account of how a Japanese of Kochi, was married to a corpse. His bride-elect, the daughter of Kintarasawada, committed suicide on the eve of her marriage. The body was recovered, and at the request of the dead woman's parents the ceremony 6took place between the living and the dead.

Because of a number of very serious assaults upon girls under fourteen years, the grand jury, at the general sessions just closed in Toronto, recommended in their presentment to Judge McDougall that the heaviest sentences be imposed on offenders. Some of the jurors favor corporal punishment.

That lemon juice will destroy the typhoid germs in water is authoritively announced by the Chicago health department after careful experiments extending over the last three days. One teaspoonful of the juice to half a glassful of the water is known to be a good combination, and repeated trials have invariably produced the same result—every germ was killed. Investigations followed and their result confirms the announcement made on Christmas day by Dr. Asa Fergus, a London physician, to the effect that lemon juice was a deadly foe to typhoid.

Dispatches from Baku disclose what, in Persian circles, are regarded as most dangerous unsuspected revolutionary tendencies in the Shah. He has just reduced the number of his harem from 1,700 to 60. It smacks of the west and sacrilege, and it is feared that the anti-foreign subjects of his majesty may rise up in rebellion against him. No shah ever had less than 1,500 wives, and when the present shah ascended the throne his father's legacy included 1,600 wives and several hundred children. The shah's act in reducing his harem to an unheard-of number is looked upon as the most astounding innovation ever accomplished. It gives yet another cause of grievance to those who looked with anything but favor upon his recent western tour.

THE PRIMATE IS DEAD

ARCHBISHOP OF CANTERBURY PASSES AWAY.

Aged Prelate Did Not Rally From the Collapse Which Occurred During His Memorable Speech in the House of Lords on the Education Bill.

London, Dec. 23.—The Most Rev. Frederick Temple, Archbishop of Canterbury and Primate of all England, who has been ill for some time past, died today.

The Archbishop of Canterbury passed away quite peacefully at 8.15 o'clock in the presence of his wife and two sons. His death was anticipated for some days, and only the archbishop's remarkable vitality enabled him to counteract his extreme weakness. The final collapse occurred at 6 o'clock, and he was unconscious towards the end. The primate died of old age.

The pathetic scene in Westminster Abbey at the coronation of King Edward was one of the earlier indications of his failing strength. Then came the collapse in the House of Lords at the conclusion of a vigorous speech in support of the Educational bill. He had not left his bed since. He will be buried at Canterbury.

The Most Rev. Frederick Temple, P.C., D.D., LL.D., was born at Santa Maura, Ionian Islands, Nov. 30, 1821. He was the son of Major Octavius Temple, late governor of Sierra Leone. The dead prelate was educated at Blundell's school, Tiverton, Devon, and Balliol college, Oxford, where he graduated first class classics and mathematics. He was appointed Fellow of Balliol college on the Blundell foundation, 1843; principal of Kneller Hall, 1848; Her Majesty's inspector of training colleges, 1856; head master of Rugby school, 1858; Bishop of Exeter, 1969; Bishop of London, 1885. Among his publications are: "Sermons at Rugby School," "Bampton Lectures," "Tracts and Pamphlets."

SHE GETS A TITLE.

Miss Violet Twining, a Canadian, Weds an Eighty-Year-Old Nobleman.

A special cable says: "Just five weeks ago the Marquis of Donegal, who all his life has been a beau of the old school, was presented to the beautiful Canadian, Miss Violet Twining, who created a sensation when she was presented at the King's first court by Lady Strathcona, wife of the lord high commissioner for Canada.

The marquis, who is 80 years old, led the young lady to the altar in St. George's church, Hanover square, on Christmas Eve. The civil ceremony was performed the previous afternoon before the registrar of the same parish. No more than half a dozen people knew of the quiet ceremony at the registrar's. An intimate friend of the marquis said that his brother, Henry Fitz-Warren, who, in the absence of a direct heir, has regarded himself for years as the successor to the title, had opposed the wedding in every way possible.

The marquis was introduced to Miss Twining at a tea at the Isthmian Club by Col. A. J. Gordon-Kane, formerly of Brooklyn, an old friend. Admiration soon developed into a deeper feeling and the marquis woed swiftly and successfully.

Miss Violet Twining is a daughter of Mrs. Twining and of the late Henry St. George Twining, of Halifax, N.S.

A dispatch from Tangier, Morocco, says the imperial troops have been totally defeated after a sanguinary battle with the rebels, headed by the pretender to the throne. The latter decapitated forty of the sultan's soldiers. Their heads are now ornamenting his tent. Imperial reinforcements have been sent to attempt the capture of Taza, the headquarters of the pretender. Incensed by the successes of the rebels, the sultan has ordered his soldiers to spare no one at Taza, in spite of the advice of the chiefs, who counselled him not to indulge in excesses.

The Twentieth Century limited on the Lake shore railway, on Dec. 23, made the run of 134 miles between Toledo and Elkhart, Ind., in 120 minutes. A part of this run was made in a dense fog.

An outbreak of smallpox is reported in Mulock township, Ontario, near the Temiscamingue railway construction works.

Prisoners when arrested in Morocco are required to pay the policeman fos his trouble in taking them to jail.

Two are company until they are made one.

A cylinder of the German-Lloyd steamer Deutschland exploded when the vessel was near the Silly Isles, badly scaring the passengers.

FERNIE BRITISH COLUMBI

SATURDAY, JAN. 3, 1903.

THE OLD AND THE NEW.

Before this issue reaches our readers another year will have gone to be buried with the dead past and a new year will have been already ushered to take its place. The passing of a year has a mysterious charm for the most indifferent. It is, as it were, a mile stone which but too plainly indicates the inexorable march of time. It closes a chapter in the life of each individual and the new year turns a new leaf for the continued story. Few who think or feel can come to this "parting of the ways" unmoved. For the past year lies before us and we are impelled to review it, that we may profit by our mistakes and learn to know ourselves. In every strong soul a spirit of resolution is sure to arise, a determination to make the year that is ours nobler and more productive of moral and spiritual results than has been the one that we have lost.

Of one thing we may rest assured, "the results of the past are the future." We go on to meet them. There are evolutions downward as well as upward and the past years ever lie before us." Yet we can do much to counteract the evil results of past indulgences, follies and mistakes. It has been said that New Year resolutions are made simply to be broken. We cannot accept any such statement; for only those who resolve, ever succeed in accomplishing anything. Failure is the child of irresolution, while success is born of determination. The man of determination is able to analyze his life, take up its tangled or broken threads and weave them into the whole web in such a way that the pattern is scarcely marred. We doubt not but the year that is before us will afford ample opportunities for us all to improve upon the past. May we therefore highly resolve to prove ourselves true and worthy citizens of this young town, and to earnestly labor for its material and moral improvement.

The year that is past has brought woe and sorrow to many a home in Fernie The grim reaper has put forth his sickle and spared not. The young and the old the weak and the strong alike have fallen. We have surely been made to feel how uncertain, how unreal, how unsatisfactory are all things here below. The river of time sweeps everything away. Powerless we stand upon its bank as it rolls on, until one day the bank shall crumble beneath our feet and we too shall be borne on and on where millions have been borne before us. Everything did we say! Not so; for there is one thing that does abide and that is character. Character alone endures for time and for eternity. If the experiences of the past year have in any way impressed these facts on the living, then the dead have not died in vain.

With faith in the future of the town, with faith in each other, and with unshaken faith in Him who ruleth over all we bid you forget the past and look bravely forward to the things that are before. Steel hearts and resolute wills will assuredly bring success. That the year that now is may bring increased happiness and prosperity to all our readers, is the fervent wish of THE FREE PRESS.

We take this opportunity of thanking our many patrons for their kind patronage during the past year and especially for their hearty co-operation in getting out our souvenir edition, without which assistance it would never have been a success.

THE FREE PRESS will continue its independent course and during the year 1903 will endeavor to make many improvements in its get-up.

* * *

WE regret that there are still low rumblings of a proposed strike among a certain element of the miners of Fernie. The bone of contention is an old one and does not affect the agitators in the slightest degree. The greater part of our miners are too sensible of the advantages of their present condition to hope for or even desire any changes, and the uselessness and criminality of agitating for a strike as a result of mere spite cannot be too strongly condemned. We would strongly recommend men who think to improve their condition by a causeless strike to carefully study the article we reprinted last week from The Mining Record on "Strikes and Coke Supply." This article was written by a disinterested party and presents a fair discussion from both standpoints.

* * *

IN another column will be found a copy of the by-laws of the C. N. P. Hockey Association. We see nothing objectionable in them excepting rule 16, which strikes us as being ridiculouis. The people of Fernie cannot attend matches of this kind in the afternoon so readily as in the evening, and we think that every town along the Crow has had experience to the same effect. Our representative at the annual convention clearly realized this point and did all in his power to oppose the clause but the Pincher Creek boys were too strong for him, as two of them acted as proxies for Macleod and Medicine Hat. They gave as their reason for favoring the rule, that their rink was an open air one and was not therefore suitable for evening games. Granted that, why should other towns be subjected to such unreasonable legislation? No one objected to playing the games at Pincher Creek in the afternoon and such could have been specially stated in the clause, leaving the other towns with closed rinks the privilege of night games. Only one reason can be thought to account for their actions in this matter, and we are loath to express it as it stamps them as anything but true sports. It must be that this arrangement allows them to play outside games without as much expense and loss of time as would be incurred were the motion of Mr. Kastner adopted. This view is narrower than it at first appears, when it is considered that one club is seeking individual benefit at the expense of several clubs.

A. C. Liphardt.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

School re-opens on Monday.

Mr. J. A. Arnold, of Cranbrook. spent several days in Fernie this week.

Mr. Fred Kanouse is able to get around again after his attack of pneumonia,

Mr. Mutz was down to Pincher Creek this week on business.

William Forsyth, Almonte, Ont., is a guest of his cousin, Mrs. A. Joyce.

Mr. F. Clapp, of Cranbrook, is in town looking up this end of his business.

Dentistry

Dr. Barber is in town and can be found at his office in the Hill block all next week. x

Good general servant wanted at once. Apply to Mrs. J. A. Rennie. x

Don't forget to get out and root for the locals on Monday afternoon.

Remember the dress carnival on Thursday evening. Big time.

Mr. Elliot sells his 2lb loaves for 10 cts not 25 cents as a typographical error made it appear in our last issue.

Mrs. A. Joyce and baby Alice returned from a four months visit to Ontario, on Thursday.

A. Smith left on Thurday for Revelstoke, where he will take up his duties as first assistant in the school on Monday.

Dentistry

Call and consult Dr. Barber any time next week if you are in need of his services. Office over Liphardt's.

Mr. Thos. Cunningham, of Vancouver, provincial fruit inspector, is in town on business connected with his department.

We have a few more souvenirs on hand, Better call and get your order filled before they all go. Old subscribers who renew now can get one free.

The ladies interested in the Hospital Aid Society are requested to meet at the home of Mrs. Bonnel on Monday afternoon, Jan. 5, at half past three o'clock.

Ask for British Lion or Mainland cigars For sale at all first-class places. Union made. Manufactured by Wm. Lietjan, Vancouver.. x

The merchants are requested to close their stores from 2.30 till 4 o'clock on Monday afternoon to give their employees an opportunity of attending the Hockey match.

The first game of the C. N. P. Hockey Association was played at Macleod on New Year's Day between Frank and Macleod. The former won by three goals to two.

Miss Kidd, of Vancouver has accepted the position of nurse in the hospital vice Miss Haslam resigned. Miss Kidd is a graduate of the Winnepeg General Hospital and was a class mote of Miss MacDonald, the Matron of our hospital.

The Company store at Michel is doing a big business. There is a staff now of six attending to this business, two new clerks lately being added. They are Mr. Armstrong, of Toronto, and Mr. McGregor, of Rossland.

The first hockey game of the seaso will be played on Monday afternoon at 2.30, between the Pincher Creek team and the locals. A warm game is expected and everybody should turn out to see the season opened. Prices, 50 cents and 25 cents.

Mr. W. B- Ganong, of the Royal, treated the prisoners in the Fernie jail to a regular Christmas dinner on Christmas Day. The nine men who partook of the repast forgot their misfortunes and thoroughly enjoyed the feast. No doubt this kindly act of Mr. Ganong will live in their memories for many a day.

Miss Haslam, nurse at the hospital, has accepted the position of teacher of the 3rd room of the Cranbrook public school and she left yesterday for that town to take charge. Miss Haslam holds Prince Edwards Island certificates and has been granted a temporary by our Department of Education until next July.

The Douglas block has been undergoing some alterations during the week. A petition has been built dividing the lower floor into two stores and the old firm will occupy the north half and will specially push the grocery department of his business. The other half will be occupied by Mrs. E. Todd who is moving her millinery stock across the street from the Farquharson block.

Mr. Gavin Spence and Miss Flora Macdonald are staying in Fernie over Sunday. They leave for Cranbrook on Monday where they will give their entertainment in the evening. They complain of the wretched facilities over the Crow, late midnight dates of arriving and leaving different places breaking their rest, and they welcome a day or two of relaxation in Fernie.

On New Year's eve. the Maple Leaf Dancing Club, of Michel, gave a ball in the town hall· A large number of Michel residents attended and the affair is reported as being a huge success.

The Ladies' Aid of the Methodist church have secured Rev. W. W. Baer, of Nanaimo, who will give his celebrated entertainment "Six Months in New York," illustrated with superb limelight views, on Wednesday, Jan. 28th. Refreshments will be served at the close. Don't forget the date. Admission 50c., children 25c.

The souvenir edition of the FERNIE FREE PRESS reached the Daily News yesterday. It is extremely well got up and profusely illustrated, the cuts being wisely selected and clearly executed. The history of Fernie from 1897 to 1903 is set forth and many interesting local sketches are given. It should have a large circulation.—Nelson News.

Mr. W. R. Ross, president of the Board of Trade, Fernie, B. C., has sent to the Free Press a copy of the souvenir edition of the Fernie FREE PRESS, which is a credit to the publication and the enterprise of the townsmen. It contains a comprehensive description of the town's industries and sketches of the leading residents.—Winnipeg Free Press.

The first carnival of the season will be held at the skating rink next Thursday evening. Suitable prizes will be given for the best dressed lady, the best dressed gentleman, the best represented character and the best comic. Every possible care will be taken to have the ice in first-class shape. Music will be provided. An evening of good, solid enjoyment is anticipated.

Entertainment at Michel.

The Sunday schools at Michel held a union Christmas entertainment on Christmas eve. The hall was artistically decorated and two large trees were loaded with presents for the children. The program, consisting of choruses, drills and recitations was rendered in a creditable manner by the children, who were trained by Miss Marshall, the school teacher. Mr. Evans occupied the chair. About 200 were present.

Presentation at the Mines.

A very pleasant gathering was held at the Duthie boarding house on Christmas Day, when the boarders of the house made Mrs. Duthie a present of a handsome silver tea set and a silver mounted meerschaum pipe for Mr. Duthie.

Mr. Wm. Piper, on behalf of the boarders made the presentation and expressed in his remarks the high esteem in which Mr. and Mrs. Duthie were held by the boarders, and that the present was a small token of their gratitude to both of them for the kind attention they had received.

Mr. and Mrs. Duthie both thanked their l oarders for the present and kind wishes and said that it was a pleasure to them to make their boarders as comfortable and content as possible.

The rest of the evening was spent in harmony.

About three o'clock on Thursday morning, while the dance was in progress in Princess hall, the snow from the south side of the roof slid with a great rush and thud upon the roof of Joyce Bros. store. The great height of Princess hall, 50 feet, gave it a considerable drop to the adjoining roof, which was already bearing a heavy load of snow, and the strain proved too much for the rafters. The front end of the roof partly collapsed, breaking 17 rafters. The flattening of the roof spread the walls, the north side of which was pushed out to meet the support of the hall wall, while the south side had to be supported with props from the next building. The ceiling in Joyce's hall was injured in one or two places. Many of those present at the dance were frightened when the slide occurred but were easily assured that the hall was in no danger. Within a few hours Mr. Geo. Cody was given the contract for repairing the building and the work is being proceeded with at once.

C. P. R. Bridge.

The bridge on the C. P. R. across Coal Creek which was injured by the floods of last summer is now being repaired. A large cement pier has been built about twenty feet south of the wood buttment that was injured and another is being erected a corresponding distance south of the other buttment. When this one is completed the whole bridge will be swung onto its new foundation and a lot of filling in will be done at the north end of the bridge. By moving the bridge southward the current is kept in the centre. A large force of men are at work and it will yet take two months to complete the job. Some idea of the immensity of work may be gathered from the fact that 1000 barrels of cement and 22 carloads of gravel and sand are needed. The cement is of an expensive German make. It is safe to predict that this foundation will not be washed out by the worst flood that Coal Creek ever experiences.

THE CANADIAN BANK OF COMMERCE.

Head Office, Toronto.

Paid Up Capital, $8,000,000. Reserve Fund, $2,500,000.

FERNIE BRANCH: E. H. BIRD, Manager.

Birth-day Party.

On New Year's evening the home of Mr. and Mrs. D. Clark, Pellatt avenue, was the scene of a very pleasant party in celebration of the 21st birthday of Mr. Albert Colclough. Among those present were Mr. and Mrs. Hutchison, Misses Philips, Mott, Crawford, Church' Kidwell, Elliot; Rev. R. F. Stillman, Messrs. Rutledge, Beck, E. Stephens, Bastian, Spear, Burton, Cartlidge, Gendrean, F. Wilkes, Oakley, Scritch. At 6 p.m. the party sat down to a table groaning with the weight of good Christmas cheer, and adorned with a skill and taste that did honor to the hostess. After supper Rev. R. F. Stillman, on behalf of Mr. and Mrs. D. Clark, presented Mr. Colclough with a handsome bible, bound in morocco and beautifully illustrated, at the same time giving a suitable address. Afterwards the party spent a very pleasant evening in playing various games. The party broke up after singing "Wormwood," an old English favorite, under the able direction of Mr. Bastian.—Com.

EPILEPTIC FELL OFF THE TRAIN.

Sad Accident Occurred Near Michel—40 Hours in the Snow.

The east bound train which passed through Fernie on Tuesday evening contained among its passengers a man by the name of Peter Loubear, who was on his way from his home in Washington State to Quebec.

On Thursday afternoon about 1 o'clock a man by the name of Thomson, who works on the MacDonald ranch, while walking on the track about two miles west of Michel came across this man in a demented state, floundering about in the deep snow. He took him to Michel and Constable Henderson brought him to the Fernie hospital on the evening train.

The doctors here find that the unfortunate man has suffered greatly from the shock and exposure and some from frost bites. He has been unconscious since his arrival and little can be learned of him. His condition is very dangerous and small hopes are entertained for his recovery. He is a man of about 30 years.

The Holiday Rush is Over...

We thank our many customers for their patronage during the past year, and solicit a continuance of the same for 1903.

APPALLING ACCIDENT ON THE GRAND TRUNK

Twenty-eight Persons Killed and Fifty Injured in a Head-on Collision.

An awful accident occurred at 10 o'clock Friday night, 26th inst., at Wanstead station on the Sarnia branch of the G. T. R. It was a head-on collision between the Pacific express No. 5 and an eastbound freight.

The express was proceeding west at its usual high rate of speed while the freight was under slow headway and was to have taken the switch at Wanstead to allow the passenger to pass. Apparently neither engineers saw the danger ahead in time to avert the accident, for the two engines came together near the east switch with a frightful crash, overturning into the ditch.

The baggage and express cars telescoped into the smoker with appalling results. Latest reports give the figures as 28 killed and 50 injured.

A train crowded with Yuletide travellers, fresh from loving leave-takings and family re-unions, the blunder of a station agent, a crashing together of colossal forces, 28 souls hurled into eternity.

Such briefly in the story of the Wanstead railway catastrophe, which occurred on Friday night.

Just where the blame for the terrible loss of life lies has not yet been accurately determined, but there is no doubt that the disaster arose from the fact that a special freight train coming east received orders to cross the Chicago express, known technically as No. 5, at Wanstead; and the conductor of No. 5 received orders to cross a special freight at Wyoming, three and three-quarter miles west of Wanstead. The express train, which is a connection of the International Limited leaving London at 7.52 p.m. was owing to unusually heavy traffic, being the last day upon which cheap tickets were accepted, filled with homeward bound excursionists, running about two hours late, and the difficulties caused by unusually heavy passenger travel were increased by the heavy blizzard raging, and the snow falling thickly.

The system under which the Grand Trunk passenger trains operate provides that a passenger conductor goes ahead from one station to another as soon as the schedule time for departure arrives, unless he gets what is technically called "a board." To the uninitiated it may be explained that a board is an oblong disc, painted red with circles upon it. If this disc is turned parallel to the tracks the road is clear, and the situation is described as no board. But if the disc is turned at right angles to or across the track, it is called "a board," and no conductor dares to take a train farther until it is turned or unless he gets a spetific order in writing from the dispatcher.

Upon arriving at Watford, Conductor McAuliffe found "a board" against him, and, entering the office, asked the station agent and operator, A. Carson, what he had for him. The exact language of the reply is a matter of controversy, which will probably be solved at the inquest. Whatever it was, it was to the effect, and was so accepted by Conductor McAuliffe, that there had been a board, but that the dispatcher had "bust" the order and that the board was anulled. Conductor McAuliffe, having received a clearance order, went out on the platform, shouted "All Aboard," gave the signal, and the heavy train, rapidly gathering momentum under a full head of steam from the powerful boiler of the great mogul locomotive, rolled swiftly out of the station, and the glaring red lights hanging on the rear car speedily disappeared in the distance.

Wesley Young, the operator at Wanstead, was sitting at the window in his house across the road from the station, and watching the freight slow up to run on the switch, a quarter of a mile west of the station, when he saw the express tear by. He heard three great crashes as the wreck occurred. Like a madman he rushed to the station; he reached it a moment before the assistant superintendent, Mr. Costello, who had been on the rear Pullman.

As the two entered the office they could ear with the ears of trained telegraphers the ticker frantically spelling "Stop No. 5." and to the operators at London, trembling with suspense, went the reply: "Wreck at Wanstead."

It would seem as though there were an element of fatality in the catastrophe. A few minutes more time at Watford; a minute more at King's Court; a minute more at Wyoming; a minute more at Wanstead would have saved both trains. All had occurred in less than twenty-five minutes after the first order was sent.

The freight train was almost at a standstill, and the brakeman was at the switch in preparation to run aside and await the passing of the express as had been ordered.

It is said that the passenger train was running at the rate of over 60 miles an hour.

The collision was of the head-on variety. Both engines fell into the ditch, the great mogul upside down, across the frame of the freight engine.

The point of greatest violence, where the two propelling forces met, appears to have been the first day coach, which was the third from the engine. The baggage car ahead completely telescoped it, leaving but the space of three windows uncovered. The coach was crowded with passengers, and the baggage car rushed over the seats, decapitating some, crushing others and pinioning them in almost inextricable positions.

Twenty-six persons in all were killed in that car, and many more were wounded:

The hinder portions of both trains were quite uninjured, and did not even leave the tracks. The occupants of the second passenger coach and of the two Pullmans were quite unhurt, and merely got a shaking up. Some had already retired to their berths, and it is related that one or two fell asleep again after the crash, before it was known what had occurred.

Only three cars of the freight train were injured. These were Swift cars, conveying dressed meats.

The sight which confronted those who at once undertook the work of rescue was a terrible one. Broken, blood-stained timbers, twisted iron, human limbs, articles of clothing, dying men, were mingled in heaps. In a blinding snow storm, with the thermometer down in the neighborhood of zero, the rescuers worked like Trojans, led by the natural leaders, who always come to the front in such emergencies.

The first danger to be encountered was that from fire, and the rescuers had a resource to hand in the large snow drifts on the tracks.

Whenever the flames would break out willing hands carrying snow on cushions and broken timbers would quench them.

Thus, of all the twenty-eight bodies taken from the wreck, hideously mutilated as many of them are, not one is charred or burned., and to the groans of the mangled and dying were not added the screams of living persons burning to death, as has been so frequent an occurrence in the annals of railroad wrecks.

The hyperborean atmosphere added immeasurably to the sufferings of the poor dying and bleeding folk. In one sense, however, it was a blessing in disguise, for many of the injured might have bled to death but for the rapid coagulation of the blood as it flowed from the wounds.

The absence of water was another cause of suffering. The fevered victims cried out for water in the pangs of their thirst, and there was only snow to give them.

The Pullman cars were turned into hospitals, and luckily there were three trained nurses on the train, who had been home for Christmas, and none of them were injured. They were able to keep their nerves in control, and lent valuable aid to the physicians, two of whom happened to be passengers on the train.

The first attempt to release the living and take out the dead from the day coach, which was the death trap of the wreck, was made with axes. This proved a very unsatisfactory means of aid, however, and it was not until the wrecking train arrived with jacks wherewith to lift the heavy timbers pinning down the victims, that any real progress was made.

THE DEAD.

Alexander Stewart, Petrolea.
Mrs. Alexander Stewart, Petrolea.
J. Gillis, Sarnia Tunnel, (engineer on the freight.)
A. Ricketts, Sarnia Tunnel, (fireman on the freight!.
Henry H. Lawrence, Watford.
Miss J. Trotter, Petrolea.
Thomas Kelly, Stouffville.
Nicholas Jeffrey, London.
Clem. Bodley, Port Huron, Mich.
Mrs. Bodley, mother of above.

One woman unidentified, with ticket Toronto to Duluth.

THE INJURED.

Alex. M. Stewart, Wingham, Ont., face slightly bruised.
Mrs. J. J. Cuthbertson, Port Huron; face, head and hands bruised; possibility of internal injury.
James P. Ramplin, Amelia street, Toronto, bruised and shaken up.
Mrs. Samuel Cummings, Port Huron, not serious.
Hattie Northey, Peterboro, very slight.
James R. Northey, Peterboro, bruised, not seriously.
Mrs. Coote, Chicago, serious internal injuries.
Frank E. Baker, London, dislocated shoulder and other injuries, not serious.
W. M. Morse, wife and one child, Sarnia.
Mr. Morse, fractured arm, chest injured.
Mrs. Morse, considerably shaken up, child, slightly in-ured, not serious.
Thomas Coote, London, hip slightly injured.
George Stacey, Wanstead, slightly injured.
Dr. Harvey, Chicago, lacerated wound in head, some bruises, not serious.
Mrs. J. M. Stewart and two children, Oskosh, Wis. Mrs. Stewart, fractured jaw and lacerations; Earl Stewart, broken arm and collar bone; Hobart Stewart, fractured hip.
Russell Quinn, Chicago, burns on hands and scalp wounds; considered serious.
James Barnes, Woodstock, injured leg and hip; not serious.
Beatrice Geddes, Sarnia, slightly injured.
J. J. Cuthbertson, Port Huron, fractured jaw and bruises.
John Bird, Chicago, fractured arm, injured back, scalp wounds, and lacerations.
J. A. Lamont, Wyoming, fractured leg and lacerations.
Mrs. W. Gott and daughter, London, very slightly injured.
Mr. J. W. Lawlor, Strathroy, slightly injured.
W. H. Cole and wife, Flint, Mich.: slightly injured.
R. K. McDonald, Strathroy, slightly injured.
Mrs. I. N. Byrnes, Sarnia, slightly injured.
Mrs. Pugsley, London, slightly injured.
Mrs. Pugsley, London, slightly injured.
Mr. Robert Jackson, Petrolea, slightly injured.
Miss Flossie Cuthbertson, slightly injured.
Annie Sinclair, Komoka, slightly injured.

Desperate Fight For A Deer.

A dispatch from Bangor, Me., says: Walter E. Bucknam, of North Dixmont, had a furious hand to hand struggle with a deer in that town recently, which resulted in the death of the deer and the temporary destruction of Bucknam's personal appearance.

It was early in the morning when Bucknam first discovered the animal, a fine buck, in the orchard near his house. His gun was loaded with nothing heavier than bird shot, but he crept within thirty yards of the game and fired, the charge striking the buck in the neck.

With a mighty bound the deer took to the woods, with Bucknam in close pursuit. He was too much excited to reload his gun, and soon, with empty weapon, he overtook the buck, standing behind some bushes. The animal was not so badly wounded as Bucknam had supposed, and charged fiercely, and then began a most exciting battle.

Bucknam seized the deer by the horns and threw it, but when he let go to draw his hunting knife the deer was up like a flash and at him with hoofs and horns. Time and again did Buchnam throw the deer, and as many times did the deer spring to the attack before he could draw his knife. Finally, by dodging behind a tree, Bucknam managed to gain time enough to get his knife out and in the next clinch he cut the deer's throat. When the fight was over the hunter's clothes were in ribbons and his face, arms and body covered with cuts and bruises from the buck's sharp hoofs, which are most effective weapons.

The Bishop of St. Alban's, England, died Dec. 28.

The freedom of the city of New York will be conferred upon Dr. Lorenz, the Vienna surgeon.

The mayor of Wolseley has wired to Sir Wilfrid Laurier the urgent fuel needs of his town.

Bagshaw's boodstore and contents, Portage la Prairie, were destroyed by fire on December 27th. Loss, $10,000.

Marconi gives credit to James Bowman Lindsay, a Scotchman, for the discovery of wireless telegraphy.

The Canadian Pacific has decided to enter Spokane, Wash., and a 200-mile road will be built to tne Crow's Nest line.

THE NEWS IN BRIEF

A BUDGET OF IMPORTANT INFORMATION.

Items of Interest Gathered From All Parts of the Two Hemispheres Presented in Condensed Form For Busy Readers.

The Canadian Northern has the choice of three passes through the Rockies.

Three persons were killed in the wreck of a pool room at Hot Springs, Ark.

Two New York firemen were killed, on Christmas Day, being buried under a mass of brick.

The opening of a new elevator has relieved the grain blockade at Carnduff, N.W.T.

The British government desires to secure a half interest in Fanning Island, in the Pacific.

President Castro, of Venezuela, now prefers The Hague for the arbitration tribunal.

Two million dollars has been offered for the Sudbury iron mines.

The pope may try to effect a reconciliation among the royal family of Saxony.

Dan McLeod, of Hamilton, Ont., ilton, Ont., defeated Jenkins in a wrestling match for the championship of Ontario.

At a meeting of the Letellier club, Montreal, a resolution was passed favoring free schools and compulsory education in the Province of Quebec.

Mr. Morse, vice-president of the Grand Trunk, when questioned as to the distance the main line of the Grand Trunk Pacific would be from Winnipeg gave an evasive answer. He regretted that their line would not pass through Ottawa and was sorry that Hon. Clifford Sifton had declared himself in opposition to a land grant to the project.

A dispatch from Mannington, W. V., says: The residence of Robert Floyd, two miles north of here, was blown up with dynamite by robbers on Christmas eve. Mr. Floyd was killed instantly and Mrs. Floyd and the servant girl were seriously injured. The house was completely demolished. One thousand dollars is missing.

The pastoral gown question at the Dominion Methodist Church, Ottawa, which has been somewhat of a controversial character, has been settled. The ladies of the congregation who first started the movement could not agree, consequently a few gentlemen friends of the Rev. Dr. Rose sprang a surprise on him on Christmas eve by presenting him with a beautiful gown, and he wore it at the Christmas service. The congregation present approved of the change.

A London dispatch says: The City of Rome, once one of the most famous of Atlantic liners, is now no more. She has been torn asunder into fittings and old iron by Messrs. R. Neugabauer & Co., of Hamburg, who purchased her for £17,000. By a curious coincidence, the name of the firm, if translated into English, would be New Builder. The life of the City of Rome has not been a long one. She was built in 1881, and was thus only 21 years old.

The net result of the Local Option polls in New Zealand is that prohibition has been carried in six electorates and reduction of licenses in ten. The total number of votes cast in favor of prohibition is 160,000; in favor of the reduction of licenses, 134,000, and in favor of the continuance of the present system, 147,000.

Referring in his sermon on Christmas day to the death of the Archbishop of Canterbury, Canon Welch, of St. James' cathedral, Toronto, said: "Fortunately we owe no allegiance to the see of Canterbury. Indeed, anything like the establishment of the Anglican papacy would be a calamity of the direst kind."

According to advices from Honolulu, the British cruiser Shearwater, which has left there for Pitcairn and other South Sea Islands, will make a search for the mutineers, who left the ship Leicester Castle after shooting the captain and killing Second Mate Dixon. The mutiny occurred 300 miles from Pitcairn, and it was believed the mutineers might reach that island, if they did not perish at sea.

It was a sad Christmas morning that came to the wife of Mr. Edward H. Walker, of Union Park, a suburb of St. Paul, Minn. She called her husband to have him see the Christmas presents, and found he had died of heart failure during the night. He had been dead several hours. Deceased had retired in apparent good health. He was 63 years old and was a veteran of the civil war.

While the sisters of the Provident convent, at Maisonneuve, were attending midnight mass on Christmas, some miscreant entered the building and set fire to two of the rooms. The sisters on their return discovered the fire and by prompt action were able to put it out. The offender has not yet been apprehended.

MURDERED BY NATIVES.

Captain of a British Vessel Killed in the Pacific.

The steamer Moana from Australia, which arrived at Victoria on Christmas day brought news of an attack on the recruiting steamer Lily by the natives of Mallicolo in the New Hebrides, who murdered Captain Henry Amos Atkinson, a Britisher, and wounded two of the Lily's crew. The schooner was employed in taking a large number of natives who had been employed in New Caledonia by French planters, to their homes, and one of those consigned to Mallicolo died when near there, and Captain Atkinson decided to bury the body ashore instead of at sea.

When Captain Atkinson landed from the whaler which brought the natives ashore, he was rushed, and his rifle taken by a crowd of blacks. He was then shot and killed with his own rifle, two balls being sent into his breast.

Some of the native crew tried to save the dead captain's body, but the natives who were just landed aided those ashore, and the crew fled, two of them being wounded as they swam back to the schooner.

The attack was the result of superstition attached to the burying of the dead body, the natives believing it to be necessary to kill the whites to prevent further deaths from occurring.

The schooner Pearl was attacked this island a few days later. She caled at Espiegie bay, another part of the island, to land natives, when she was fired upon and several of the native crew wounded.

Horrible!

A dispatch from Pittsburg, Kansas, says: Montgomery Godley, a colored man, was taken from the jail on Christmas day and lynched by a mob. He had shot and killed Milton Hinkle, a policeman, while the officer was trying to protect himself against a crowd of unruly negroes.

At the first effort to lynch the negro the rope broke. Someone in the crowd then cut Godley's throat, severing the jugular vein. After this he was hanged a second time.

The shooting of Policeman Hinkle occurred at a dance which was attended by a large number of negroes from the neighboring mining camps. Godley and his brother were drinking and had become very disorderly, when Policeman Hinkle interfered.

The negroes attacked the policeman and when Hinkle drew his club to defend himself Montgomery slipped behind him, grabbed the officer's pistol and shot him behind the ear. The policeman died soon afterwards.

The news of the shooting spread rapidly and a mob gathered in front of the jail, where the brothers were locked up. The doors were battered in and the mob seized Montgomery Godley. They took the slayer to a telephone pole and strung him up.

Kruger Wants to Return.

A London cable says: Mr. Kruger who, as is known, has been living for some time at Mentone, lately expressed a strong desire to return to South Africa, with the intention of taking up a permanent residence near Pretoria. He obtained the aid of some rich and sympathetic friends, and, as we are informed, an attempt was made to approach the colonial office upon the subject. Two of these friends, one of whom is already well known for his Boer sympathies, offered bail to the extent of £100,000 each for the ex-president's good behaviour in the Transvaal. There is no chance of Mr. Kruger being allowed to return. It is thought that his presence would be an excuse for the gathering together of disloyal elements, and would offer an opportunity for the commencement of any anti-British propaganda that might be agreed upon.

Ten years ago there was only one pagan found in the whole of Canada. That one has evidently increased, as according to the census there are 13 in Toronto, one in Ottawa, besides others scattered all over the Dominion.

In Moscow a young married lady of one of the leading families received recently a letter through the post addressed to her husband in a woman's hand-writing. As she opened it a piece of paper fell out with the words, 'Think of me,' with no signature. The next moment she sank insensible to the ground. Her little two-y?ar-old boy picked up the envelope and was likewise overpowered with the poison with which the letter was impregnated. The mother and child were found some time afterward in a death-like trance.

The Braden case was again revived by a French woman calling at Barrie and having the body, buried in mistake for Braden in the family plot at Barrie cemetery, exhumed. After a look at the corpse she ordered it to be put back without telling whether she identified it or not. From the remarks the visitor let fall it is thought she wanted to prove her husband dead and to marry again. The owner of the body was killed in Winnipeg two months ago. The identity was established by the wife and sister. It is thought the woman is Mrs. St. Dennis, whose husband was thought to have been the victim of the accident.

FERNIE FREE PRESS.

FERNIE, B.C.

A bookkeeper should always keep sober—otherwise he may lose his balance.

Messrs. C. C. Richards & Co.

Gentlemen,—My three children were dangerously low with diphtheria. On the advice of our priest my wife began the use of MINARD'S LINIMENT. In two hours they were greatly relieved, and in five days they were completely well, and I firmly believe your valuable Liniment saved the lives of my children.

Gratefully yours,
ADELBERT LEFEBVRE.
Mair's Mills, June 10th, 1899.

A man is very apt to be cut by his best friend when he attempts to shave himself.

MINARD'S LINIMENT Relieves Neuralgia.

If tombstones always told the truth Satan would turn the hose on his fire and quit in disgust.

Cholera morbus, cramps, and kindred complaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debarred from eating these tempting fruits, but they need not abstain if they have Dr. J. D. Kellogg's Dysentery Cordial, and take a few drops in water. It cures the cramps and cholera in a remarkable manner, and is sure to check every disturbance of the bowels.

When a man wants to talk he nearly always bumps up against some man who doesn't want to listen.

STATE OF OHIO, CITY OF TOLEDO, } ss
LUCAS COUNTY }

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure. FRANK J. CHENEY.

Sworn to before me and subscribed in my presence this 6th day of December, A. D. 1886.

MRS. YOUNG'S CASE

A STRANGE CASE THAT BAFFLED DOCTORS.

None of Her Friends Believed She Could Recover and Her Case Has Excited Great Interest.

From the Courier, Trenton, Ont.

The case of Mrs. Robert Young, of Stanley street, Trenton, is one that has caused great deal of talk among those who are acquainted with her. Mrs. Young is now in her seventy-eighth year, and is quite vigorous for a woman of that age. Three years ago she took a chill, which appeared to affect her whole system. Her lower limbs and body swelled to such an extent that she could scarcely move them. Her stomach became so disordered that she could not lie in bed, and for two years she had to be bolstered up day and night. The chills which were apparently the original cause of the trouble, became chronic, and affected ter two or three times a week, and after a chill her skin would turn a dark brown color. Her friends did not believe she could recover, but nevertheless did all they could for her. Three doctors tried their skill, but to no purpose, and the strongest consolation they could offer was: "Well, you know we are all growing old." Several advertised medicines were then given her, but with no better results. In August, 1901, Mrs. Young had become so bad that her daughter-in-law had to come from a distance to nurse her. She brought with her some Dr. Williams' Pink Pills, and persuaded the old lady to begin their use. In the course of a few weeks there could be no doubt that they were helping her, and the doctor advised continuing their use, and now, after using them for some months, the swelling that had affected her limbs is gone; the chills no longer bother her; her stomach is restored to its normal condition, and the heart fluttering that had made it necessary to bolster her up in bed has also disappeared. It is no wonder that the case has excited much comment, and the editor of the Courier, who has personally investigated it, can vouch for the facts related above. Such marvellous cures as this prove Dr. Williams' Pink Pills to be the best medicine offered the public today, and all those who are ailing should promptly give them a trial. All druggists sell these pills, or they can be obtained by mail at 50c. a box, or six boxes for $2.50, by writing direct to the Dr. Williams Medicine Co., Brockville, Ont.

Most bachelor's idea of misery is being alone with a noisy baby.

When a man is in love he doesn't know axle grease from butter.

Cure Your Cold

with the old standard remedy that has stood the test of 40 years experience and is more popular to-day than ever before.

Gray's Syrup of Red Spruce Gum

is carefully prepared from Red Spruce Gum, retaining all its healing, soothing properties. It is pleasant to take and is always effectual. 25 cents. At all Druggists.

Blood will tell

When an animal is all run down, has a rough coat and a tight hide, anyone knows that his blood is out of order. To keep an animal economically he must be in good health.

DICK'S BLOOD PURIFIER

is a necessity where the best results from feeding would be obtained. It tones up the system, rids the stomach of bots, worms and other parasites that suck the life blood away.

Nothing like Dick's powder for a run down horse.

50 cents a package.

Leeming, Miles & Co., Agents, MONTREAL.

MARKET REVIEW.

Compiled from The Commercial.

Manitoba wheat has been quiet and dull all week, but fairly firm in price, which has gained ½c on the week. Most of the wheat moving eastward is going into the terminal elevators at Fort William, Port Arthur and Duluth. A moderate quantity is going all rail for export via St. John and a few cars to the Washburn-Crosby mill at Minneapolis. Prices in store terminal elevators for December delivery are 70½c 1 hard, 68½c 1 northern, 67c 2 northern, 65c 3 northern. For delivery first half January the price is ¼c higher than for December delivery and for delivery the last half of January ½c higher than December. For May delivery prices are: No. 1 hard, 75¼c; 1 northern, 73¼c; 2 northern, 71¼c, and 3 northern, 69¼c.

FLOUR—Demand is active and prices steady. Best Hungarian Patent is worth $2 per sack of 98 lbs., delivered to the trade; Glenora patent, $1.85; strong bakers, $1.55; and XXXX at $1.25.

MILLFEED—Bran is quoted at $15 per ton in sacks, and shorts at $17 per ton.

OATS—The market is not by any means well supplied with oats—owing to the shortage of cars—and prices are holding above the basis which stocks in the country would justify if transportation were available. There is really no change in prices, but a drop may come at any moment if receipts show signs of permanent improvement. No. 2 white oats are worth 28½c per bushel at Fort William. On track at Winnipeg this grade is worth 27 to 28 cents per bushel, and about 25c is the price for feed white. At country points farmers are getting 20c per bushel at central points.

BARLEY—Shipments are very light for want of cars. Brewers are bidding 32c per bushel for No. 3 extra barley, in carlots, on track. Feed grades are worth 26 to 27c.

FLAXSEED—The Manitoba crop is practically all out of first hands. Some districts in the Territories still have some flaxseed to sell. The price is about 98 cents to farmers at country points.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $6 to $6.50 per ton for carlots on track.

POTATOES—30c per bushel.

DRESSED POULTRY—Dealers are offering in a wholesale way 10c per pound for chickens, dressed; 9½c to 10c for ducks and geese, and 15c for turkeys.

BUTTER—Dairy—Very little butter is coming in and the market is quiet at unchanged prices. Dealers are paying 21c per pound net at Winnipeg for dairy separator butter in bricks, and 14 to 17c net for choice tub butter.

DRESSED MEATS — Beef, city dressed, 5½ to 6¼c, country stock, ½c less; mutton, 8 to 9c; lamb, 11½c; hogs, 9 to 10½c.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—Eggs are scarce and have advanced to 22c per dozen, net, in Winnipeg, subject to candling.

HIDES—Dealers are now paying 6½c for No. 1 hides, 5½c for No. 2, and 4½ for No. 3. Calfskins same price as hides. Horse hides 50c to $1 each.

SENECA—Best root, 52c per lb.

LIVE STOCK.

CATTLE—The market is quiet. Finest steers are worth 4c; butchers' orninary, 3½c, and from that down to 2½c, according to quality. There is nothing doing in stocker cattle.

SHEEP—Worth 3½c per pound, off cars at Winnipeg. Lambs, 4¼ to 4½.

HOGS—The price is 6c per pound for hogs weighing from 100 to 200 pounds. Heavies and lights are ½c to 1c less.

MILCH COWS—$30 to $45 each.

HORSES—There is a good demand for horses for bush work.

Carlyle and Emerson.

The contrast offered by the sunny, cheerful Sage of Concord to his gloomy, dyspeptic friend, the Sage of Chelsea, is brought into striking relief by the revival of an anecdote of Charles Kingsley's. Carlyle, it seems, had been bored by Emerson's persistent optimism, and undertook to cure him of it. "I took him," he said, "to the lowest parts of London and showed him all that was going on there. This done, I turned to him, saying: 'And noo, man, d'ye believe in the devil noo?' 'Oh, no,' replied Emerson, 'all these people seem to me only parts of the great machine, and, on the whole, I think they are doing their work satisfactorily.' "Then," continued Carlyle, "I took him doon to the House of Commons, where they put us under the gallery. There I showed him ae chiel getting up after anither and leeing and leeing. There I turned to him and said: 'And noo, man, d'ye belive in the devil noo?" He made me, however, just the same answer as before, and I then gave him up in despair."

CARNEFAC
STOCK FOOD.
A Veterinary Conditioner.

Manitou, June 28th 1902.

W. G. Douglas, Esq.

Dear Sir—Yours of the 23rd inst. was received, also a sample of your Carnefac Stock Food by same mail, and I am pleased to be able to recommend its use. I have had an opportunity of testing it in several cases of "scours" in calves, and found that about a tablespoonful to each, given in separated milk, had the effect of restoring a healthy action of the bowels after two doses only. I am satisfied that your "Carnefac" preparation will prove itself to be very valuable to live stock owners.—I remain, yours truly, M. YOUNG, V. S.

You can obtain it from your dealer.

Many a young man gets to the front by securing a job as a motorman on a trolley car.

MOTHERLY ADVICE.

To Mothers Who Have Cross or Sickly Babies.

Cross or crying babies are either sick or in pain, and make everyone in the house miserable. Healthy babies are always happy babies, and all little ones can be kept both healthy and happy by the occasional use of Baby's Own Tablets. If your little one is cross, give him a Tablet and see how quickly it will work a change for the better. Mrs. W. H. Austin, Farmington, N.S., says:—"Baby's Own Tablets are just what every mother needs, when her little ones are cutting their teeth. When my little one cries I give him a Tablet, and it helps him at once. Mothers who use the Tablets will have no trouble with their babies." These Tablets are sold under a positive guarantee to contain neither opiate nor any poisonous drug, and they will promptly cure all the minor ailments of little ones. Sold by druggists, or sent by mail post paid, at 25 cents a box by writing direct to the Dr. Williams Medicine Co., Brockville, Ont., or Schenectady, N. Y.

It is hard for the man who is flat on his back to face the world.

There never was and never will be a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have however, in Quinine Wine, when obtainable in sound, unadulterated state, a remedy for many and grevious ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease and by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses through the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrup & Lyman, of Toronto, have given to the public their Superior Quinine Wine at the usual rate, and, guaged by the opinions of scientists, this wine approaches nearest perfection of any on the market. All druggists sell it.

A Michigan man who advertised for a wife received nineteen replies from husbands offering him theirs.

Wife (during the quarrel) —"What made you marry me, then?"

Husband — "Why, you did, of course."

After a woman is married, all the lace and ruffles and things she used to buy for herself go into the children's clothes.

No man is in a position to teach other men until after he has burnt his fingers a few times.

HOCKEY ASSOCIATION.

By-Laws Drawn Up at the Annual Meeting.

We are in receipt of the by-laws of the Crow's Nest Pass Hockey Association, and we copy a few of most interest to the general public:

Rule 6. That no league match be played without nets.

Rules 7, 8, 9, and 10. That the Ontario Hockey Association by-laws shall govern protests, ties, selection of umpires and timekeepers, and the playing rules of the Association.

11. That in all rinks having less than 43 feet of ice in width there be six players on a side.

12. That the clubs adopt the following colors:

Fernie—Black and old gold sweaters.

Frank—White sweaters, brown stockings.

Macleod—Light blue sweaters and stockings.

Pincher Creek—Red sweaters and stockings.

Medicine Hat—Some other combination than that of the other clubs.

13. That each member of each club have standing called for by the O. H. A.

14. That every player be registered with the secretary of the association ten days before he plays a game, and be a resident of the district at least 10 days before registration.

15. The district covered by each club includes a radius of 10 miles of its respective town.

16. That all games be played at 2.30 p.m. unless mutually agreed upon otherwise.

17. That "no ice" or quarantine be the only excuse for the postponement of a game.

17. That there be a board of referees composed of 10 qualified men, each club sending in the names of two to the secretary of the Association.

16. That any omissions in these by-laws be settled by the O. H. A. by-laws in so far as possible.

MEDICINE HAT NEWS SOUVENIR

We have received a copy of the Medicine Hat News Souvenir. The paper is much enlarged and is replete with a full description of the town and district and is accompanied by a neat booklet of clear half tone cuts of interesting scenes.

From this issue we learn much of the marvellous growth of the stock industry in that locality. We copy some figures for 1901 and 1902, showing exports from Medicine Hat in different kinds of stook.

THE GERMAN STRONG BOY WINS

Two Out of Three Falls—A Small House.

A very slim crowd gathered in Princess hall on New Year's night to witness the second contest between Frank Unfried and F. S. Lewis, and the former expressed himself as unwilling to wrestle for three falls out of five owing to the small attendance, but would change it to two out of three if the audience were satisfied, to which no objection was made by anyone.

The first try was according to the catch-as-catch-can rules, and Lewis, after 8 minutes of hard, aggressive struggling managed to bring the Strong Boy to the mat. The second try was by the Graeco-Roman rules, which prohibit any hold below the belt. This seemed to suit the German's style of wrestling and he clearly showed his superiority over Lewis, although the latter at one exciting moment almost won the decision. Unfried, by his merciless wrist grip brought his opponent to the floor and finally won the fall in 6 minutes. The third try, according to the toss was to be another Graeco-Roman test, and Unfried again proved his skill by throwing his opponent, who acted mostly on the defensive, in 11 minutes.

Unfried's strength is most evident in his arms, while Lewis, when the rules allowed, did marvellous work with his legs.

WEDDING.

A pretty wedding occurred at the home of Mrs. Wansborough on New Year's eve. when her daughter, Miss Nellie A., was married to George W. Carruthers, tailor, of this place. Rev. D. L. Gordon performed the ceremony in the presence of a large number of friends. Miss Maud Whitney acted as bridesmaid, while Mr. Thomas Carruthers, brother of the groom, was the groomsman.

The bride received a large number of beautiful presents.

POLICE COURT

John Fitzgerald was up before Stipendiary Magistrate Armstrong on a charge of assaulting F. Briscoe, on the 22nd ult. He was fined $20 and costs or 30 days. He payed the fine.

J. MacKay on New Year's day got a little gay, about the Fernie Hotel, and had to be reprimanded by the proprietor, Becoming offended he pulied a flask out of his pocket and shot it through the large plate window. He had his preliminary hearing this morning and he is committed for trial.

A DUST EXPLOSION

Stoughton, Massachusetts, Jan. 1—A dust explosion today in a dryer on the machines used in preparing shoddy material, was followed by a fire which destroyed the two-story building of the Stoughton Mills company, and burned to death Thomas Downey, an employee. The property loss is $35,000.

EXPERTS' OPINION.

REPORT ON THE CAUSES OF THE FERNIE EXPLOSION.

Mining Engineers Agree With Provincial Mineralogist That a Naked Flame Was Introduced.

The reports on the Fernie coal mines explosion, have been issued from the government printing office. These contain the report of the circumstances surrounding the explosion prepared by W. F. Robertson, the provincial mineralogist, and also the reports prepared by the mining engineers appointed to investigate matters, F. H. Shepherd and Alex. Faulds. The explosion occurred May 22nd.

W. F. Robertson, after examining the mines, states that "the most tenable theory as to the cause of the explosion is that an explosion of gas or gas and dust was started in McDonald's level, which in itself was probably not very great; that this initial explosion was conveyed against the air, being transmitted by the suspended coal dust, which the explosion rendered explosive, and which dust was put into the air by the act of loading; that at each loading place it received an augmentation; that the line of greatest force followed such links of augmentation until it came to the narrow neck at the entrance of this section. Here it spread fan-shaped following the line of least resistance through the old workings. In these old workings, the greatest force was still against the air, with its greater amount of available oxygen, and also for the reasons that along this line there was deposited by the incoming air current a considerable amount of impalpable dust carried from the main entry and its workings and dropped here under the decreased velocity of the air current caused by the increased area of the airway. This expanding force, meeting with some temporary resistance near the machine section, was halted for an instant, caused thereby coking with consequent further production of gas. The flame swept along through the machine section and hoist entry this time with the air receiving augmentation at each working room until finally it came to a 'dead end' in the face of the hoist entry, where the greatest concussion was produced, as evidenced by the greatest amount of caving. Between Beaver slope and the No. 1 district there is wet 'sag' or swamp. No dust was here available to feed the flame. The same condition probably prevailed north of the hoist entry, which is reported as wet near the fault, so that although No. 1 district got the shock it was partly spent and devoid of flame.

"Every working place in the mine was carefully examined and the evidence is most conclusive that not a single shot had been fired in the affected districts immediately previous to the explosion, so that all questions as to 'blown-out shots' or 'badly placed shots,' or 'quality of powder' may be dismissed as having nothing to do with this explosion, whatever else may be said of them. This is further confirmed by the position in which the shot lighter of the district, Beach, was found. He was away from all workings at the time, and as he alone was allowed to or did fire a shot, this in itself would almost prove that no shot was fired."

He explains the working of the "Bonneted Clanny" safety lamp, which was the only one used in the mines. False keys were easily made for it, and it was on record, he reports, that a number of miners had such false keys in defiance of the law against it. Matches were also found on several of the bodies recovered. While the igniting cause will probably remain a mystery "it is," he says, "almost certain to have been a naked light of some sort which set fire to the gas."

F. H. Shepherd, M. E., agrees that the trouble originated in McDonald's level.

After giving the conditions in which the mine was found, he says: "It is asserted that coal dust even in the total absence of fire-damp may by reason of a blown-out shot give rise to violent explosions, but the presence of even a low percentage of fire-damp will render the atmosphere in a dusty coal mine extremely sensitive and dangerous. The combination of dangers which appear to have caused the initial explosion in McDonald's level are: (1) The dry and dusty condition of the rooms off McDonald's level and particularly room 7; (2) The uncovering of a blower of gas in the roof of McDonald's level near the face on the afternoon of May 22nd. As there is no evidence of a blown-out shot or of any shot being fired in that district immediately preceding the explosion, the only inference that can be reasonably drawn is that a gas explosion or a combined gas and dust explosion under ripe conditions took place by coming in contact with a naked light. What this naked light was there is no evidence to show and probably the truth may never be known; but the fact given in evidence at the inquest remains that a body taken from McDonald's level was found with matches upon it. In reference to the dust on the hauling roads this appears to have been periodically loaded out, but a contributing cause to the dusty condition of these roads is the loose condition of the rolling stock, especially the end doors of the cars which appear to be loose and ill-fitting."

The safety lamp used at the mines, the "Bonneted Clanny," is condemned by Mr. Shepherd as being not safe in gas at a high velocity. "Probably the cause that has contributed more largely than any other to the explosive condition of the mine as a whole is the fact that these mines were working a double shift. The explosion took place about the middle of the second shift and the dusty condition naturally had increased all day and no cooling or settling interval had intervened, and instances are on record which go to show that the second shift followed immediately upon the first produces conditions in a dusty mine which are dangerous."

He concludes, "that the greatest danger lay not in the hauling road or old workings, but in the newly created dust of the working faces. The fact that dust may be created as freely where blasting conditions do not obtain, to wit: where coal is soft and firable as in room 7, off McDonald's level, suggests that watering precautions may be necessary irrespective of those provided for in the Mining Act governing blasting conditions. Some practical method or appliance is much needed to determine the condition of mine atmospheres both with regard to low percentage of fire-damp and dangerous conditions as to the presence of dust. The installation of a thoroughly efficient watering appliance in dry and dusty mines should be made imperative. While the use of ordinary blasting powder does not appear to have contributed to this explosion, its continued use under conditions prevailing in portions of No. 2 mine will always be a source of danger and the substitution of more modern and safer explosives is suggested."

Alex Faulds, M. E., in his report, calls attention to several dangerous practices which he found in use at the mines. There was not the proper methods adopted with regard to ventilating all the workings. There was also needed some means of watering the dusty parts or treating them in some way which would be equivalent to watering. These conclusions are reached after finding "first, that the explosion followed the course of the intake workings used for haulage where there was dust and no fire-damp, scarcely touching the return airway; and second, that the explosion failed to affect those parts of the workings which were permanently wet from natural causes. The use of dust-tight cases would greatly minimize it and supplemented by thorough watering would no doubt be adequate. The main difficulty lies in insuring that the wetting is done regularly, though a more systematic inspection for dust on the roof and sides of the workings might correct slackness in this regard. If it were generally recognized by the miners themselves that the real danger of explosion, at any rate on a large scale, is due to dust, and not to fire-damp, greater progress would be made towards the fulfilment of the hope that with a better understanding of their cause great colliery explosions will soon disappear from the record of disastrous events. The verdict of the jury is not consistent with our location and cause of explosion as given in our evidence at the inquest at Fernie."

He is more definite in ascribing a cause for the explosion than either the provincial mineralogist or Mr. Shepherd. He ascribes the flame causing the explosion "being either from miner James Muir's safety lamp in some way, or more probable, from another miner who had matches in his possession by his either striking a match or drawing the flame of his safety lamp through the gauze for a smoke." —Victoria Times.

COAST TO THE TERRITORIES.

New Railway Company Seeks Incorporation.

Ottawa, Jan. 3.—Application will be made at the next session for an act to incorporate "The Southern Central Pacific Railway Co.," to construct a line from Vancouver, in British Columbia, northerly and easterly by way of Kootenay Pass to some Point on the Old Man river, in the district of Alberta, thence northeasterly through Saskatchewan to some point on the Churchill river, with power to construct telegraph and telephone lines, etc.

Ask at your hotel or cafe for Elliott's famous home made bread. x

THE BOARD OF TRADE.

ENDORSE THE RESOLUTIONS OF LEAD-MINE OWNERS.

G. O. Buchanan Appointed to Represent Fernie. Letter and Telegram from Kaslo Board of Trade.

The Fernie Board of Trade took important action this week in the silver-lead problem which is felt throughout the Kootenays as most vital to the prosperity of the country. A meeting of this council was called for Tuesday evening in answer to a request from the Kaslo Board of Trade who wired as follows:—

Kaslo, Jan. 2, 1903.

To Board of Trade,
Fernie, B. C.,

We request your co-operation and endorsement of unanimous resolution of lead-miners convention at Sandon and the appointment of G. O Buchanan already representing Nelson and Kaslo to represent you in Ottawa. Delegation are leaving Nelson on the 5th and will interview the Government on the 15th. Smith Curtis' speeches purporting to represent local public opinion and directly opposing lead-miners resolutions are being published in the East in active campaign against us. It is very essential that this be discredited and the attitude of your community be correctly reported by press despatches to the east.

O. A. Sutherland, Secretary.

This was followed by a letter.

Office of the Kaslo Board of Trade.

Kaslo, Jan., 2, 1903.

Secretary Fernie Board of Trade,
Fernie, B. C.,

Dear Sir:—We enclose herewith an important statement on the lead question of British Columbia. We endeavor to show in a brief article the existing conditions; the result of those conditions if allowed to continue; and the remedy.

This matter has been gone into very carefully and we would state that the conditions are even worse than outlined, and unless we get the remedy asked for, the profitable field enjoyed by the eastern manufacturer in this district will soon be a thing of the past. This matter affects every channel of trade, as we are producers of metals only, and are large consumers of all other products.

We should be pleased to have your co-operation, and, as prompt action is necessary to accomplish the desired end we would urge that you call a meeting at once and endorse our report. A delegation leaves for Ottawa on the 5th inst. and expects to arrive there about the 10th inst. Our Mr. W. A. Galligher, M. P., is already there in our interests, and your endorsation, wired or mailed to him immediately will assist him very materially in furthering this important measure. A copy of our report has been mailed to each member and senator.

Yours Very Truly,
H. Giegerich, President.
O. A. Sutherland, Secretary.

There is no uncertain sound about the resolution passed by the silver-lead mine-owners of British Columbia at Sandon on the 10th of December and forwarded in this letter. It reads as follows:

1. Whereas, the silver lead industry of British Columbia, notwithstanding the usual richness of the ore, the proved continuity of the veins, and the favorable natural conditions of mining in the province, is, and for some time has been in a declining condition, which, if not ameliorated, will end in total stagnation; and

2. Whereas, the lead-mining camps of the United States, and particlurly those in the adjoining state of Idaho, are, and for years have been enjoying great prosperity, due to a protective tariff conversing the home market; and

3. Whereas, the silver-lead mining industry has been for some years of national importance, and, unless allowed to decline, will speedily attain to a much greater degree of importance, benefiting by its increased expenditure the trade and advancement of both Eastern and Western Canada; And

4. Whereas, our domestic market for the manufactured products of lead is chiefly supplied from the products of ores mined in Mexico and Europe; where the labor cost of production is much lower than in this country; a condition of affairs permitted by the wholly inadequate protection afforded by the existing tariff; while the prices of white lead, lead pipe, sheet lead and shot, in the Dominion of Canada, are approximately equal to the prices charged for the same commodities in the United States, all to the detriment of the producers, consumers, and transporters of lead in this country; and

5. Whereas, under the existing tariff, little or no protection is afforded to the lead producing industries, whilst adequate protection is afforded to all other industries of equal importance, known to us; and

6. Whereas, these conditions result in the exportation of a preponderance of our crude ore and bullion, the former to American smelters and the latter to the markets of the world; there to enter into competition with the products of cheap European and Mexican labor, and the surplus product of the protected lead industry of the United States;

7. Therefore, we the silver-lead miners of the East and West Kootenay districts of British Columbia in convention assembled, do hereby recommend and respectfully urge the enactment of a tariff act which will afford ample protection to the producers, manufacturers and transporters of lead, thereby creating and fostering a new and expansive home industry calculated to benefit all classes by the stimulation of national trade and commerce.

Having in view the intesests of the producers, manufacturers and consumers of lead we would recommend a duty equal to that imposed by the United States, viz.

On lead in ores, 1½cents per pound.

On lead in bullion, pigs, bars, and old lead, 2⅛ cents per pound.

On lead in sheets, pipe, shot, etc, 2½ cents per pound.

On white lead, etc., 2⅞ cents per pound.

On all other products of lead as provided in the Dingley Tariff Act of July 24, 1897.

Provided always that if at any time it shall be proved that a combination has been formed for the purpose of unduly increasing the charges made for smelting lead ores produced in Canada, or for refining or marketing lead bullion, or if the charge for smelting and refining in Canada is proved exorbitant, then the Governor-General-in-Council, may at his discretion permit the admission into Canada of lead bullion smelted and refined, or smelted and refined in foreign countries, from Canadian lead ores, upon payment of an ad valorem duty of 15 per cent. upon the cast of such smelting and refining.

8. And the secretary is hereby instructed to forward copies of the foregoing resolutions to the senators and members of the Dominion parliament, representing British Columbia, with the request that they present the same to the federal government as a memorial with their endorsement.

LOUIS PRATT,
Secretary silver-lead mine owners' meeting.

The Fernie Board of Trade on Tuesday evening thoroughly discussed the grievances of the lead-miners. The importance of the question to Fernie was generally admitted and the following resolution was unanimously adopted:—

"Resolved that this council endorse in full the resolutions passed by the silver-lead mine owners' meeting held at Sandon on the 10th of December last, and that Mr. G. O. Buchanan be appointed to represent the Fernie Board of Trade on the delegation sent to Ottawa to place the matter before the Dominion government."

SERIOUS HOLD-UP.

Donald McAulay Relieved of $57 Between Proctor's Mill and Fernie.

On Tuesday evening a most glaring hold-up occurred on the C. P R. track midway between Fernie and Proctor's mill whereby Donald McAulay, night watchman of the mill, was relieved of $57 in cash.

Mr. McAulay came to the town in the afternoon to transact some business. He drew $98 out of the bank and afterwards sent $33 by an express order to his daughter living in Edmonton. He left for home at about 5.30 p.m. As he approached the yard limit board he noticed two men standing by the post, and as he got nearer the men stepped out on the track turned towards the town and separated to allow their victim to walk between them. Just as McAulay got past them something struck him on the back of his head and he fell, unconscious He remained in that condition nearly three hours and then regained his senses sufficiently to reach his cabin. He found upon examining his pockets that all his money, $57, had been stolen but that the highwayman had left his watch

Mr. McAulay thinks he was struck by a sand bag and it was used with such force as to confine him to his cabin ever since. The men, he says, were both low set and one wore a cap. They had no masks but the darkness prevented a good view of their features. None of his comrades knew of his mission to Fernie as he is a man who keeps his business to himself and he hasn't the faintest clue to the perpetrators of the dastardly robbery. The police are in possession of every possible fact and it is hoped that their earnest efforts will result in bringing these men to justice.

THE HOCKEY MATCH.

FERNIE LOSSES AT MEDICINE HAT YESTERDAY.

Score 4—0 for the Prairie team Pincher Creek also Defeats Frank 4—0 The Score Card

The hockey game between Medicine Hat and Fernie took place yesterday afternoon at 2.30 before a large crowd. The game was a poor exhibition of the King of Winter Sports, the combination work of the visiting team being weak. Medicine Hat won the game by 4 goals to nil.

The team representing Fernie left here on Thursday evening; it was composed of the following players: goal, J. Miller; point, H. Dowsley; cover point, C. Ziegler, forwards, M. Kastner, W. Fair, P. Elliott and D. Lafortune. Mr. Pringle, of Medicine Hat, referred the game. Messrs. J. R. Wallace and E. Wrigleswortb accompanied the boys.

A full report of the game was mailed us last evening and through some mistake of the postal department it failed to reach us and we have nothing more than meagre despatches with which to size up the match. The Fernie boys are reported as feeling confident of winning from the Hat when they come this way. It must be remembered that this, our first league game, was played on foreign ice and with the team generally acknowledged as our strongest foe. Fernie is playing Macleod today and more favorable returns are expected from this game.

FRANK ALSO LOST YESTERDAY.

The Frank Hockey team went to Pincher Creek yesterday, to play their first league game with that town and were beaten by a similar score of four goals to nothing. The score card so far reads:

January 1st, Frank 5, Macleod 2, at Macleod.

January 5th, Medicine Hat 14, Macleod 2, at Medicine Hat.

January 5th, no ice, at Fernie.

January 9th, Medicine Hat 4, Fernie 0, at Medicine Hat.

January 9th, Pincher Creek 4, Frank 0, at Pincher Creek.

RAISING MONEY IN FERNIE

Hockey Boys Gather in $135 in a few hours to Tide them over their First Game.

Owing to the hockey game not coming off last Monday our boys had to face the problem of defraying the expenses of the trip to Medicine Hat. Messrs. A. Matheson and A. Thomson prepared a subscription sheet and within a few hours had $135 contributed by the enthusiastic supporters of our club. The Hockey Club wish to thank their many supporters through the columns of the FREE PRESS for their loyal assistance. Mr. Ganong who heads the list with $20 they vote a prince amongst sportsmen.

We publish the names of those who gave $5 and more.

W. B. Ganong	$ 20 00
Fort Steele Brewing Co.	10 00
J. R. Pollock	5 00
Wm. Eschwig	5 00
L. Mills	5 00
A. H. Cree	5 00
Ingram & McIntyre	5 00
Crow's Nest Trading Co.	5 00

Many others contributed $3, $2 or $1 each. The town of Fernie is to be congratulated upon the ready manner in which its citizens meet these little financial pinches in the interests of amateur sport.

IN EAST KOOTENAY.

Coal and Oil Fields That are Coming to the Front.

The coal beds of the Crow's Nest Pass consisting of some 250,000 acres, lie east of the Elk river, and north of Lodge Pole creek. The past year has demonstrated that the areas owned by the Crow's Nest Coal Company are but a small portion of the coal beds of south east Kootenay. The government records show that 250 applications were made for coal and petroleum licenses during 1902. It is estimated that 160,000 acres of coal lands have been discovered during the past year on the government reserve in the Flathead valley.

In the southern portion of the district and extending into Alberta and Montana indications appear, and which have been proved south of the boundary line, in Montana; and west of Alberta of the the existence of crude oil, or petroleum. Extensive prospecting has been done, and there is a great future for the district when the oil fields are developed.—Nelson News.

CABLE GOSSIP.

NEWS OF THE WORLD'S METROPOLIS.

Durbar in India Causes the Newspapers to Spread Themselves—Many Hindoos Believe That King Edward Was Impersonated at the Coronation.

A London cable says: "For the time being eyes have been turned from the west to the east. Venezuela, which has been the chief subject of discussion for some time, has now given place in public interest to the great durbar ceremonies which have been taking place in British India. The interest may be gauged from the columns which have been appearing, wired by special correspondents at the cost of a dollar a word. Such word painting displays have seldom been read in the London papers. People naturally ask: "Why such awful extravagance at the durbar?" The answer is: "It is absolutely necessary to impress the natives, who otherwise would have a very poor opinion of their emperor."

If all stories are true, it looks as if some extraordinary tales have already been circulated among the mild and credulous Hindoos regarding their emperor. Here is a remarkable instance. Mr. Labouchere has received a letter from a Hindoo gentleman of some standing, which says: "We are having awfully serious news circulated in the papers here. Extracts purporting to be from one London paper and one Spanish paper impress us that the emperor on his coronation day was so dangerously ill that he never was really crowned, for the ministers caused him to be personated by a beggar of Whitechapel. We are really very much concerned to hear this, and wonder why the government is inactive in taking any steps to punish the author of so foul a calumny."

Mr. Labouchere's comments on the seriousness of such stories being circulated in India are quite to the point, for only they who know how ignorant, superstitious and credulous are the natives of the Indian empire, understand that the bigger and more preposterous a lie is the more readily it is believed. Mr. Labouchere remarks: "It is rather disheartening after having incurred the expense of bringing a large and representative gathering of Indian fellow subjects to witness the coronation to find that the idea should have got about in India that the main figure in the ceremony was only a beggar from Whitechapel.

Such a stupid story is nevertheless so serious that Mr. Labouchere urges all the Indian visitors to join in an affidavit testifying to their conviction that they really saw His Majesty crowned at Westminster.

* * *

The Irish land conference has issued a voluminous report of its deliberations, in which it is declared that the only satisfactory settlement of the existing land question is the substituting of an occupying, or proprietary ownership of land for the existing dual ownership. The report recommends that a settlement should be made between the owner and the occupier, subject to the necessary investigation by the state as to the title, rental and security. It emphasizes the desirability of inducing landlords to continue to reside in Ireland, and, with this purpose in view, it says that an equitable price should be paid for the re-sale to owners of mansion houses and demesnes. The purchase price should either be an assurance by the state of such income or the payment of a capital sum producing it at 3 per cent. or 3½ per cent. The report offers no definite financial proposals, but it considers that an unexampled opportunity exists at the present moment to deal with this question successfully. It declares also that the solution of the land question should be accompanied by a settlement of the evicted tenants question upon an equitable basis.

* * *

There are all sorts of rumors about as to who will be the next Archbishop of Canterbury. It is generally expected that the Bishop of Westchester, who is persona grata at the court, may get the appointment. In fact, Truth goes to the length of stating definitely that the Bishop of Winshester will be offered the appointment. But there are others who are desirous that the Bishop of London shall get the coveted post. Then it is expected that, should the Bishop of Winchester be made primate, the Bishop of Ripon will be transferred to Winchester.

* * *

It is officially announced that King Edward has appointed Sir Francis Leveson Bertie, K.C.B., now assistant under secretary for foreign affairs, to succeed Lord Currie, of Hawley, as British amabassador at Rome. Lord Currie resigned his post on Dec. 19.

At an inquest on a case of suicide recently held in England the foreman returned this remarkable verdict: "The jury are all of one mind—temporarily insane."

Bishop Terregianni, of Australia, is said to be the heaviest prelate in the world, his alleged weight being 394 pounds.

The Northwest Mounted Police have completed an investigation of alleged murders by Yukon Indians, and find nothing in them.

Peter Binkley, a rich farmer of Flamboro Centre, hanged himself to a rafter in his barn while temporarily insane.

FROM BOTH HEMISPHERES

Important News Condensed Into Brief Paragraphs.

The King of Saxony thought to be dying.

A new $1,500,000 hotel will be erected in Montreal.

The Canadian Rugby footballers defeated the Jedburg, Scotland, team on Saturday by 8 points to 3.

Farmers will erect a 70,000 bushel elevator at Hartney, Man.

Mgr. Staretti, the new apostolic delegate, was welcomed to Ottawa on Sunday.

Boston people are planning a royal reception for Lord Roberts and his party when they arrive.

Montreal's new locomotive works at Longue Point will employ 600 hands.

C. D. Rose, Liberal, a Canadian, was on Saturday last elected member of parliament for Newmarket, England, at a bye-election.

Lord Milner and Right Hon. Jos. Chamberlain had a cordial meeting at Charleston, Natal.

St. John, N. B., gave a hearty welcome to the Scottish curlers; the government has given a grant to assist in the reception.

Portage Plains farmers have asked the C. N. R. president to construct a branch through Longburn district to White Mud river.

The Canada Atlantic company will apply at the next session of parliament for right to extend its road.

The minister of public works suggests a land cable over certain parts of the Yukon telegraph route.

The Sultan of Morocco has outwitted the pretender, who has retired from the siege of Fez.

John Craig's farm house, near Madoc, Ont., was burned, and his little daughter lost her life. Mrs. Craig escaped to a barn in her night dress and had her feet frozen.

A dispatch from Oakville, Ont., says the affairs of C. W. Anderson & Son are more serious than most people thought possible. From the facts that have leaked out it is known that depositors have practically nothing to hope for. There are about 500 depositors, and they will not receive more than five cents on the dollar. The Bank of Hamilton holds a blanket mortgage on all the assets to cover advances amounting to one hundred thousand dollars.

Joseph Botiner, an employee of the Hudson's Bay company at Yorkton, was seriously injured by the explosion of an acetylene gas machine in the company's store on Jan. 3. The top blew off the generator, and from the nature of the injuries inflicted, is is thought that a heavy nut struck Botiner in the head. He was removed to the hospital, where he died the same evening.

A dispatch from Victoria says: The steamer Moyune, which arrived last night, reports that the crown prince of Siam, who arrived at Yokohama the day prior to the sailing of the Moyune, December 17, was received by a fleet of warships all dressed with bunting. The C. P. R. steamer, Empress of China, on which the royal party were passengers, had a terrible passage, her saloon being stove in by the force of the waves, two boats smashed and other injuries received; while two sailors sustained fatal injuries. The liner flew the Siamese flag at her peak, and as she entered the harbor the Japanese battleships Chinyen and Fuso, and two torpedo boats, the United States warship Oregon, the Russian battleship Rurik, and the Siamese royal yacht Maha Chakrin, fired salutes. There was a large and distinguished party of Japanese present to receive the prince and party, who left at once by special train for Tokio, where he will be the guest of the Japanese emperor.

A Thrilling Race.

Wilkesbarre, Pa., Jan. 5,—There was a thrilling race on the Wilkesbarre & Eastern railroad on Saturday in an attempt to avoid a collission.

A freight car loaded with ties ran away on the steep grade at Yatesville.

The passenger train for Wilkesbarre had just left the station.

The flagman heard the noise of the on-coming run-away car, and the engineer was signalled to put on all speed.

The engine driver opened up the throttle, but the freight car continued to gain on the passenger train.

Seeing that a colision was inevitable the passengers from the rear car were hurried into the front one.

At Kinneytown, three miles from Yatesville, the run-away car crashed into the rear passenger coach, derailing it and also throwing the freight car from the track.

No one was injured, but the passengers received a shaking up.

Another G. T. R. Wreck.

A head-on collision occurred on Jan. 3 on the Grand Trunk, about two hundred yards west of the tunnel under the Welland canal, between No. 4 express, due at Merritton at 6.29, and a light engine, No. 975, from Niagara Falls. The express was 31 minutes late, and the collision occurred at 7.03 a. m. The light engine was in charge of Engineer Buckpitt and Fireman Waring, of London. Fireman Waring was instantly killed. Conductor Neill, of Niagara Falls, Engineer Duke, and Fireman Desault, of Sarnia Tunnel and about thirty passengers were on the express. Of these Fireman Desault was fatally injured. The passengers on the express escaped with a shaking up.

A TEE-SPOON.

Oh, I would be the caddie boy,
Down at her feet to drop,
And build for her the sandy tee
And put the ball on top.

And I would be the driver slim,
Around her still to swing,
E'en though my head should never reach
The centre of that ring.

And I would be the tiny sphere,
To thrill 'neath her address;
Not the wide atmosphere itself
Would hold such happiness.

And I would be the shaven green
(No metaphor is meant);
She would approach, to find in me
The (w)hole of her intent.

Ah, club; ah, ball; ah, senseless things!
Might I so favored be,
To her I would the question put(t),
And she would make my tea.

—E. Maud Griffith, Galt.

MISTAKES ABOUT GRIZZLIES.

According to an Old Hunter They Do Not Attack Man.

A good many popular theories about the habits of big game in British Columbia are exploded by the stories told by the well-known guide, W. G. Manson, a son of the former Hudson Bay factor at Lilooet. The blood of many centuries of Indian hunters runs in Manson's veins and as he is a man of education as well as of keen insight, and has been a hunter since he was ten years old, his stories of the grizzlies and mountain sheep and goats of the Pacific Province are entitled to credit.

It was in the company of F. S. Boden that Manson recently had a remarkable experience with a grizzly, probably one of the largest ever killed. When discovered, the big brute was quietly standing on his hind legs, biting a tender branch from a tree far above a man's reach.

He did not attempt to tackle the hunters, nor yet to run away, but gave his immediate attention to two valuable dogs, Tom and Jerry, which were used by Manson for hunting mountain sheep. They both paid with their lives the penalty of venturing too near the dying grizzly after he had been brought to the ground by the bullets of the hunters.

They were literally torn to pieces by bruin's big five-inch claws during his death struggles. This particular grizzly measured 10½ feet in length and had a reach of 12 feet.

Manson was never threatened by a grizzly but once in his experience of 30 years, and, therefore, does not believe that this animal is likely to attack a man. On the contrary, the grizzly makes every effort to avoid man, and to the hunter it becomes a question of stalking him.

After camping at night on the side of a hill in the Rocky Mountains, with English hunters, Manson has frequently pointed out the bears browsing in full view, when his party had risen for breakfast in the morning. It then, of course, became a problem how to approach near enough to get a shot. Grizzlies are always ready to show fight to dogs, if they get into anything like close quarters with them.

Another popular impression respecting bears which Manson would have discredited is that they live all winter upon the fat which they put on during the summer, and come out of their sleeping caves gaunt and hungry in the spring.

"This is all wrong," says the famous hunter. "Bears crawl into their retreats in November. These sleeping chambers are nothing more than big cracks in the rocks, so far as the grizzlies of British Columbia are concerned, and generally from 10 to 20 feet deep.

"I have often seen them and examined them. They are usually at the top of the precipice, where they cannot be affected by snow and landslides.

"The bear makes a bed of grass in this retreat, and after feeding himself up as fat as a Yorkshire hog, he crawls into his cave and sleeps for six months, coming out, however, in April, as fat as he went in."

Manson says he has killed bears immediately after they have awakened out of a six months' sleep and has taken as much as 180 pounds of fat from one carcase. He is positive that bears are always in a fine, fat condition immediately after their long sleep and believes that most of the functions of their bodies cease through it.

"Sheep," says Mr. Manson, "are rare sport to the true sportsman, one mountain ram being worth two grizzlies, while the amateur who can bring him down has reason to be proud of himself.

"Another popular blunder is that mountain goats are hard to shoot or to catch alive. If one professional hunter in British Columbia wishes to speak disparagingly of another he calls him 'only a goat hunter.' In a recent trip with Mr. Burton, an enthusiastic young English hunter, I came upon a herd of 300 goats, and Mr. Burton charged them with a bludgeon, driving them right and left. Numbers of them could have been killed with a spear.

"Last year I saw 90 rams together, though this is a rare sight. It is curious, however, that the killing of sheep and goats is prohibited by the law in July and August, when they are so wild that you cannot get near them, and it is next to impossible to kill them in any case, and that you are permitted to kill them at other seasons when they are so tame that they can be knocked over with a stick. The mountain ram leads the hunter a perilous chase along the side of precipices and over chasms which are sheer drops to certain death."

The Prayer of the Cheerful Man.

The day returns and brings us the pretty round of irritating concerns and duties. Help us to play the man, help us to perform them with laughter and kind faces; let cheerfulness abound with industry. Give us to go blithely on our business all this day, bring us to our resting beds weary and content and undishonored, and grant us in the end the gift of sleep. Amen.—Robert Louis Stevenson.

Mayor Maybury, of Detroit, has approved an appropriation of $50,000 for the purchase of coal to be sold at cost by the municipality. Bids will be invited on anthracite and bituminous coal in lots of 1,000 tons, to be sold as indicated.

A London train despatcher named John Auld admits that he made the mistake which resulted in the fatal collision on the G. T. R. at Merritton, in which two men were killed.

Messrs. Alexander & McPherson, of Montreal, have, it is reported, secured control of the cheese stock in Canada, and a sharp advance in price is anticipated.

Prof. Robert Koch has delivered a lecture in Berlin upon the typhus. He claims this disease can be combatted successfully through isolation as cholera is combatted, for the reason that typhus is only contracted by contact with a person already infected.

According to the London Daily Telegraph, contracts have been completed to start a daily paper to be supplied with news by the Marconi system of wireless telegraphy on board a British liner running between Liverpool and New York. The first publication will occur the end of this month.

On account of Organist Pasker's forced resignation, the volunteer members of the Centenary church at Hamilton, Ont., are on strike. The music on Sunday was furnished by a paid quartette. The new organist, Hewlett, of London, will reorganize the choir.

Henry Bath has been committed for trial in the Brockville police court on the charge of arson. According to his confession he made two deliberate attempts to burn the Roman Catholic church there, also St. Mark's Roman Catholic church at Prescott. The young man is evidently insane.

Mrs. Francis Spyhalski, aged 22, wife of Stanislaus Spyhalski, aged 29, of Toleho, O., gave birth to quadruplets, two girls and two boys, ranging in weight from three to six pounds. Six years ago this woman gave birth to twins and about a year later to triplets. There is another child nine and a half years old. The boys have been named Samuel Jones and Theodore Roosevelt.

An accident occurred at the home of John Pratt, Perth, Ont., on Friday morning by which two lives were lost. About a dozen men were engaged sawing wood with a circular sawing machine operated by horse-power, when the fly-wheel of the machine burst and flew off. A large piece, weighing about 75 pounds, struck George Pratt, aged 28 years, in the stomach and almost cut him in two. The unfortunate man lingered for about two hours. A young son of John Pratt was also struck by a part of the wheel and was killed outright. The boy was 14 years of age.

Muggs—"My wife is a very handsome woman."

Pluggs—"Still she has one homely feature."

Muggs—"What is that?"

Pluggs—"You!"

MR. BRODRICK MARRIED.

The British War Secretary Conducts Miss Madeleine Stanley to the Altar.

A London cable, of Jan. 5, says: War Secretary Brodrick and Madeleine Stanley, daughter of Lady Jeune, were married at St. George's church, Hanover Square, this afternoon. The scene was brilliant.

The church was crowded with fashionable people, and the centre aisle was lined with non-commissioned officers and men belonging to the Surrey Yeomanry, of which Mr. Brodrick is honorary colonel. Premier Balfour was the best man.

The bride, who was given away by her stepfather, Mr. Justice Jeune, was supported by seven bridesmaids dressed in ivory satin, and wearing large pale blue picture hats. The bride's dress was of soft chiffon over duchesse satin, with a full court train of old lace and chiffon. There were upwards of 600 presents. King Edward gave a massive silver gilt inkstand bearing the royal arms. Among the guests in the church were Princess Christian, the Duke of Cambridge und other members of the cabinet, Lord and Lady Roberts, Sir Henry and Lady Stanley, and Mr. White, the United States charge d'affaires.

Public interest in the event was marked by the crowd outside, which was so great that people broke through the police lines and almost mobbed the carriages containing Justice Jeune and the bride in the anxiety to see the latter.

Pontifical Silver Jubilee.

On Feb. 20 next Pope Leo. XIII. will celebrate his pontifical silver jubilee. It is proposed on that day by the international committee having charge of the celebrations, that each family, diocese, parish and nation shall observe that day as a day of thanksgiving to God for the long and successful reign of His vicar.

On that day a tiara of gold will be presented to the Pope as "the offering of filial love from all his children," and this will be worn by him on the anniversary of his consecration, March 3.

The tiara is described as follows: The three crowns will stand superimposed in high relief, representing the triple power of the papacy. The tiara is surmounted by a cross.

Canadian Live Stock Exports ade Dairy.

Some good advice from a disinterested standpoint is given by Mr. Arch. MacNeilage, of Glasgow, in a talk on Canadian live stock products exported to Great Britain and how to improve that trade. He said that Great Britain must consume the surplus products of other countries. Canadian cattle and beef were good, but not as good as the best beef from the United States. The demand in Great Britain was altogether for "baby" beef. At the Smithfield show they had no classes for old animals. Many were putting steers on the market at 22 months old. Baby beef was lacking in flavor, perhaps, but the public wanted it, and it was more profitable to produce. In cheese Canada easily led, great credit being due to Prof. Robertson for his efforts to secure better transportation facilities. Canadian butter had not as good a reputation; the Danish and New Zealand butter surpassed it; the Irish was about equal to it, and the Siberian was rapidly approaching it. A weak point in Canadian butter was that many samples of it contained too much moisture. The manner of packing was also defective, especially as regards the parchment paper, which was found inferior, flabby and soft when the package was opened. The keeping qualities of the butter might also be improved.

As to horses, there was a universal feeling in favor of Canadian horses, draft, van or express horses, and carriage horses. The trouble was that they could not get enough. Canadian horses were well mouthed, well broken, docile, full of spirit and singularly handsome. Prime draft horses weighing 1,700 lbs. and upwards would command as high as $400 to $500 in Glasgow. Carriage horses, for which there is an unlimited demand, range in price from $300 to $375 for first class animals, $240 to $275 for seconds, and $150 to $225 for cobs. "Van" horses, used largely by the railway companies, brought $325 to $375 for first class, and $200 to $275 for seconds.

A new bank with a capital of $5,000,000, is to be opened shortly in New York. The post of president has been offered to Miss Sarah Dick, cashier of the National Bank at Hemlington, Indiana, who was for many years the only female employed in United States banking institutions. A novel feature of the new establishment is that it will be managed entirely by women, but presumably men will be allowed to deposit their savings.

An English paper records the recent marriage near Cornwall,, England, of Miss Jane Weeks to Thomas Day, and adds: "A Day is gained, a week is lost, but time cannot complain: for soon there will be Days enough to make a week again."

A man seven years in arrears for his local paper, who had never said a good word for the editor and who was always opposed to public improvement, was dying. "How do you feel?" asked the editor who was on hand to write the obituary. "All looks bright before me," gasped the dying man. "I thought so," returned the editor, "you'll see the blaze in about ten minutes."

The Rev. Principal Patrick, of Manitoba college, advocates the adoption of the Gothenburg system in Manitoba.

PRINCESS LOUISE.

SHE SAYS CROWN PRINCE WAS A ROUGH OFFICER,

While She Was Full of Ideals, and That M. Giron Was the Only Man She Could Ever Truly Love—Her Father's Threatenings.

The New York Herald correspondent at Zurich, Switzerland, cables the report of an interview with the Crown Princess of Saxony, in which she is quoted as saying that M. Giron is the only man she ever met whom she felt she could love, and that it was a question of mutual love.

"Between my husband and myself," said the princess, "there was no bond of sympathy. He was a typical rough officer. I myself was full of ideals How miserable that life was! I tried so hard to bear it for the sake of my darling children, whom I adore. I also hesitated for the sake of the Saxon people, whom I love dearly, as they love me. But all that could not alter my resolution. The ills of my life at the court were too great to bear."

Another dispatch from Berlin says: King George of Saxony has ordered the preparation of a full official account of the elopement of the Crown Prince Louise and the circumstances leading up to it, for the Saxon people, among whom the most fantastic stories are in circulation to the detriment of the royal house especially with reference to the future king. The scandal is undermining, according to some opinions, the people's loyalty and respect for the throne. The dynasty being Catholic and the people Protestant, the affair is being utilized for sectarian controversy.

The crown princess' own account of the immediate cause of her flight from Salzburg, written to an intimate friend, presumably the Princess Therese of Bavaria was telegraphed from Munich. It says her father, the Grand Duke of Tuscany, intended to imprison his daughter either in a lunatic asylum or in an Italian convent. He had already consulted the court physician and several medical authorities in Vienna, with the object of obtaining certificates warranting him in shutting her up. Her father, the Crown Princess adds, was giving her no time for deliberation. He demanded first, that she be taken under guard to Dresden, to apologize to the crown prince, and that she then choose between confinement in a convent or in a mad house. The crown princess asks the Bavarian court to use its influence with the court at Dresden to permit her children to choose their vocation in life freely.

The Lutheran clergy of Saxony have issued an order striking the name of the Crown Princess from public prayers.

The Petit Bleu, of Paris, has published M. Giron's own story of his relations with the Crown Princess of Saxony, in which he admits the paternity of her sixth child.

THE FREIGHT CONGESTION.

How an Eminent Railway Journal Views the Situation.

The recent congestion of freight traffic has served to emphasize one great need in railroad service. The business of the country moves in cycles. A period of depression is followed by a corresponding period of expansion, which in turn gives way to another of contraction, and so on. It has been the evident aim of the railroads to keep somewhat in advance of the normal average requirements and under the circumstances they cannot be blamed. It costs money to provide second, third and fourth tracks, yard facilities, engines and cars, and with a constantly declining scale of railway rates it was the exercise of the soundest business sense to proceed cautiously. The general notion that a railroad is obliged to be at all times fully equipped for promptly handling everything that may be offered for transportation is altogether a mistaken one. There is not a road in the country that could have afforded to provide itself with adequate facilities for the present year's business. To have done so would have required the outlay of immense sums of money in the way of track, engines, and cars which probably would be forced to lie idle most of the time in the next few years to come. It is easy to say that the new conditions must be met, but if railroads are to make the maximum requirements the measurement of regular supply, they will have to be put in a position to earn a great deal more money. It should be understood that the ultimate cost of all railroading is paid for by the people, and that the railroads on their part are willing to do all that is necessary, provided only that the bills are paid. The amount of protest against any advance in rates in the face of continual and urgent demands for greater facilities is one of the inconsistencies which abound in all the dealings of the public with the railroads.—Chicago Railway Age.

Premier Ross, of Ontario, announces a total cash surplus at the end of the year of $1,384,000.

The Sultan of Morocco is said to have retired to the palace at Fez, with all his available artillery and to have barricaded himself in in consequence of a threatened attack on the part of the rebels.

The railways have raised the rates on grain throughout Ontario from 1 to 8 cents per hundredweight, according to length of haul.

FERNIE FREE PRESS.

FERNIE, B.C.

HINTS FOR HOUSEWIVES.

What to do with yesterday's mutton--eat it yesterday.

Soups should be made the day before they are required—never the day after.

For keeping the bed deliciously cool in the summer months there is nothing like sleeping on the sofa.

To make people feel at home—Visit them at their own houses.

To prevent sunburn—Keep in the shade.

The best thing to do if you desire to have soft, white hands—Nothing.

TAKE NOTICE.

During the year the space devoted to advertising MINARD'S LINIMENT will contain expressions of no uncertain sound from people who speak from personal experience as to the merits of this best of Household Remedies.

There has been a fire at the Amsterdam Zoological gardens. It is said to have been caused by a careless smoker who threw away an unextinguished match, which lighted the tapir.

You cannot be happy while you have corns. Then do not delay in getting a bottle of Holloway's Corn Cure. It removes all kinds of corns without pain. Failure with it is unknown.

Some women grow weary trying to look young, but they do not tire themselves half as much as they tire others.

Minard's Liniment is the best.

Like Queen Victoria, Queen Alexandra has tombstones erected over the graves of her pet dogs. At Sandringham are the graves of two dogs, a Siberian and a St. Bernard, and on the stones are inscribed their names, the length of time they were owned by Queen Alexandra, and the dates of their deaths.

Many of us might be happy if we did not suffer from disorders of the liver. Then we ought to use Dr. August Koenig's Hamburg Drops, which cure the disorders and bring the whole system to a healthy condition.

Girls are weak creatures at best, yet the weakest of them is capable of throwing a strong man over with the greatest of ease.

Beware of Ointments for Catarrh That Contain Mercury

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, O., by F. J. Cheney & Co. Testimonials free.

Sold by druggists. Price, 75c per bottle.

Hall's Family Pills are the best.

Though the wind is invisible the same cannot be said of a sight draft.

Horses are like eggs. It is impossible to tell what's in 'them until they are broken.

In his Vegetable Pills, Dr. Parmelee has given to the world the fruits of long scientific research in the whole realm of medical science, combined with new and valuable discoveries never before known to man. For delicate and debilitated Constitutions Parmelee's Pills act like a charm. Taken in small doses, the effect is both a tonic and a stimulant, mildly exciting the secretions of the body, giving tone and vigor.

When some men give a dollar to charity they manage to get two dollars' worth of satisfaction from the contemplation of their generosity.

Minard's Liniment for Rheumatism.

The more you pelt a tanner the better he seems to like it.

Ask a conceited man a question and he will never say, "I don't know."

An upright life is a safe one under any system of religion.

Two good listeners may be friends, but two good talkers—never .

All sorts of useless things are to be found in the upper stories of men and old houses.

The mirror isn't a wise-looking piece of furniture, yet it does a lot of reflecting.

The man who is trying to lead a double life is generally a man who can't live one decently.

Turkish Harems.

In every harem of any pretensions in Turkey there are French, English and German governesses. In Constantinople there is a great high school called the "Gate to Knowledge," where Turkish girls are being trained as teachers.

Licorice Root Beds.

It is stated that large beds of licorice root exists in an unimproved condition in the northern Caucasus region, near the shore of the Black sea.

Boys in India.

Only ten boys in a hundred receive any education at all in India.

MISERABLE NIGHTS

What to Do When Baby is Fretful and Sleepless.

It is wrong to take up a wakeful baby from the cradle and walk it up and down the floor all night. It demoralizes the infant and enslaves the parents. Baby does not cry for the fun of the thing; it cries because it is not well—generally because its stomach is sour, its little bowels congested, its skin hot and feverish. Relieve it and it will sleep all night, every night growing stronger in proportion. Just what mothers need is told in a letter from Mrs. E. J. Flanders, Marbleton, Que., who says: "I cannot say too much in favor of Baby's Own Tablets. They have worked like a charm with my baby, who was very restless at night, but Baby's Own Tablets soon brought quiet sleep and rest. I shall never be without a box while I have a baby." Baby's Own Tablets cure all minor ailments of little ones, and are guaranteed to contain no opiate or harmful drug. They are sold at 25 cents a box by all dealers, or you can get them by mail, post paid, by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N.Y.

When a man's collar gets unbuttoned in church and begins to climb up the back of his neck he might as well get up and go out; the sermon will not do him much good.

Minard's Liniment Cures LaGrippe.

Luck is a combination of an opportunity and the man.

Help your children to grow strong and robust by counteracting anything that causes ill-heath. One great cause if disease in children is worms. Remove them with Mother Graves' Worm Exterminator. It never fails.

A man with a lot of money should be satisfied with his lot.

Some people experience but little difficulty in making fools of themselves.

UNEQUALLED.—Mr. Thos. Brunt, Tyendinaga, Ont., writes:—"I have to thank you for recommending Dr. Thomas' Eclectric Oil for bleeding piles. I was troubled with them for nearly fifteen years, and tried almost everything I could hear or think of. I have now been free from the distressing complaint for nearly eighteen months. I hope you will continue to recommend it."

If the average woman knew what her neighbors say of her she would probably talk about them worse than ever.

A lazy man is always trying to work other people.

In washing woollens and flannels, Lever's Dry Soap (a powder) will be found very satisfactory.

Naturally the man who leads a crooked life is unable to keep both feet in the straight and narrow path.

A mule imagines he has a musical voice—and a good many people seem to be built on the same mistaken plan.

If a man always pays cash he is entitled to a lot more credit than he ever gets.

The easier it is for a man to run into debt the harder it is for him to get ahead.

20 MILLION BOTTLES
SOLD EVERY YEAR.

Happiness is the absence of pain, and millions have been made happy through being cured by ST JACOBS OIL of RHEUMATISM, NEURALGIA, TOOTHACHE, HEADACHE, LAMENESS, SCALDS, BURNS, SPRAINS, BRUISES and all pains for which an external remedy can be applied. It never fails to cure. Thousands who have been declared incurable at baths and in hospitals have thrown away their crutches, being cured after using ST. JACOBS OIL. Directions in eleven languages accompany every bottle.

CONQUERS PAIN

A Common Bred Cow

When toned up by Dick's Blood Purifier will give as much and as rich milk as a highly bred aristocratic Jersey cow gives upon ordinary feed, and a Jersey cow when given.

DICK'S BLOOD PURIFIER

will wonderfully increase her yield of milk. It saves feed too, because a smaller amount of well digested food satisfies the demands of the system and every particle of nourishment sticks.

50 cents a package.

Leeming, Miles & Co., Agents, MONTREAL.

MARKETS.

(Compiled from The Commercial)

Manitoba wheat has been dull but firm this week, and prices have only declined ½c to ¾c on the week as against 1½ to 2c decline in United States markets. There is a steady demand for wheat, both for nearby and future delivery, and it is only restricted by the unwillingness of holders to let go of more than they are doing. At the close of business last week prices were: No. 1 hard, 70c; 1 northern, 68c; 2 northern, 67c; 3 northern, 65c. For February delivery: 1 hard, 70½c; 1 northern, 68½; 2 northern, 67½c; 3 northern, 65½c; and for May delivery: 1 hard, 74¼c; 1 northern, 72¼c; 2 northern, 70¼c; and 3 northern, 68¼c, all in store, Fort William, Port Arthur or Duluth.

FLOUR—Demand is active and prices steady. Best Hungarian Patent is worth $2 per sack of 98 lbs., delivered to the trade; Glenora patent, $1.85; strong bakers, $1.55; and XXXX at $1.25.

MILLFEED—Bran is quoted at $15 per ton in sacks, and shorts at $17 per ton.

OATS—The price of oats keeps high notwithstanding the current belief that stocks in farmers' hands are very large. Car shortage is the principal reason given for continued high prices, and no doubt this has a good deal to do with it. If transportation were easy to obtain distribution would be free and prices lower. While there is a good demand for oats there is also a large supply, and an outside market will have to be found for some of these. This will probably be forthcoming, as already some inquiries have been received from foreign ports and at least one large order placed.. No. 2 white oats are worth 28½c per bushel at Fort William. On track at Winnipeg this grade is worth 27 to 28 cents per bushel, and about 25c is the price for feed white. At country points farmers are getting 20c per bushel at central points.

BARLEY—The market has declined as local brewers have about all the barley they want at present. The best price they offer today is 28c for No. 3 extra in carlots on track. Feed barley is worth 25 to 26c.

FLAXSEED—Market nominal.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $6 to $6.50 per ton for carlots on track.

POTATOES—35c per bushel.

BUTTER — Creamery— Creameries are asking 26c per pound from city customers for choice makes.

BUTTER—Dairy—Very little butter is coming in and the market is quiet at unchanged prices. Dealers are paying 21c per pound net at Winnipeg for dairy separator butter in bricks, and 14 to 17c net for choice tub butter.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—Eggs are scarce and have advanced to 22c per dozen, net, in Winnipeg, subject to candling.

DRESSED POULTRY—Dealers are offering in a wholesale way 10c per pound for chickens, dressed; 9½c to 10c for ducks and geese, and 15c for turkeys.

DRESSED MEATS — Beef, city dressed, 6 to 6½c per pound; country stock, ½c under these figures; mutton, 8 to 9c; lamb, 11½c; hogs, 7c.

HIDES—Country frozen hides are bringing from 6c to 6¼c per pound, delivered at Winnipeg, less 5 pounds tare. sheep pelts, 50 to 60c.

WOOL—Market nominal.

SENECA ROOT—Last purchases were made at 58c per pound for clean dry root, delivered at Winnipeg.

LIVE STOCK.

CATTLE—The market is quiet. Finest steers are worth 4c; butchers' orninary, 3½c, and from that down to 2½c, according to quality. There is nothing doing in stocker cattle.

SHEEP—Worth 3½c per pound off cars here. Lambs, 4¼ to 4½c.

HOGS—The market is unchanged at 6c per pound for hogs weighing from 100 to 200 pounds. Heavies and lights are worth ½ to 1c less.

MILCH COWS—There are very few milkers to be had, and prices are firm at $30 to $45 each, for such as are to be had, according to quality.

HORSES—There is a good demand

HORSES—Trade is now confined to a limited demand for general purpose horses, for which prices still rule high. Good teams of work horses are worth $300 to $400, according to weight and quality.

A man's shadow is like most of his friends. It only stocks to him in sunshine.

Men admire clever women more than handsome ones, because they are scarcer.

It is almost as hard to keep a friend as it is to lose an enemy.

The Bubble Reputation.

The Governor—Colonel, don't you know Judge Blank? Shake hands with him.

The Colonel—Ah, you are Judge Blank of Blankville?

The Judge—Yes; Blankville is my home.

The Colonel—Of course I know you by reputation then.

The Governor—Colonel, don't you know it always makes me feel mighty uncomfortable when a man says that about me—that he knows me by reputation?

The Colonel—How is that, governor? Why should it make you feel uncomfortable?

The Governor—Because, by jingo, I always wonder which reputation he means.

SENSATION IN QUEBEC

Wonderful Cures By Dodd's Kidney Pills Causing Much Talk.

Dame Joseph Millette, of St. Rosaire, Tells of Her Pains, and How Easily She Got Rid of Them.

St. Rosaire, D'Arthabasca, Que., Jan. 5.—(Special)—Among the people of this neighborhood there has been much talk of late of the numerous cures resulting from the use of Dodd's Kidney Pills. Such diseases as Rheumatism, Backache, Heart Disease and even Catarrh have yielded readily to this wonderful remedy, and people are fast learning how important it is that the Kidneys should be kept in shape to perform their duty of removing impurities from the blood.

One of those who speak out often and earnestly for the good that Dodd's Kidney Pills have done is good Dame Joseph Milette. She suffered from Kidney Complaint and Catarrh and is now completely cured. It is not to be wondered at that she speaks as follows:

"I suffered much from malady of the Kidneys. It settled in the loins and gave me great pain and discomfort. I took two boxes of Dodd's Kidney Pills and am perfectly well.

Dodd's Kidney Pills are a grand remedy for me. I give Dodd's Kidney Pills my certificate from a big heart."

Many others, once suffererd but now in good health, unite with Dame Joseph Milette in singing the praises of Dodd's Kidney Pills. They have proved conclusively that no disease arising from diseased kidneys can stand before them.

No man is a good talker unless he is able to shut up when he has said enough.

Minard's Liniment is best Hair Restorer.

When the heroine drops her eyes the novelist always forgets to have her pick them up.

Severe colds are easily cured by the use of Bickle's Anti-Consumptive Syrup, a medicine of extraordinary penetrating and healing properties. It is acknowledged by those who have used it as being the best medicine sold for coughs, colds, inflammation of the lungs, and all affections of the throat and chest. Its agreeableness to the taste makes it a favorite with the ladies and children.

Ask the devil to dine with you once and you can count on him as a regular boarder.

Woman may never break into parliament, but she will continue to be speaker of the house just the same.

POINTED QUESTIONS.

Put Yourself In the Other One's Place and Answer.

The great task of sound ethics is to stimulate the social imagination. We must be continually prodding our sense of social consequence to keep it wide awake. We must be asking ourselves at each point of contact with the lives of others such pointed questions as these:

How would you like to be the tailor or washerwoman whose bill you have neglected to pay?

How would you like to be the customer to whom you are selling these adulterated or inferior goods?

How would you like to be the investor in this stock company which you are promoting with water?

How would you like to be the employer whose time and tools and material you are wasting at every chance you get to loaf and shirk and neglect the duties you are paid to perform?

How would you like to be the clerk or saleswoman in the store where you are reaping extra dividends by imposing harder conditions than the state of trade and the market compel you to adopt?

How would you like to be the stoker or weaver or mechanic on the wages you pay and the conditions of labor you impose?

How would you like to be the business rival whom you deprive of his little all by using your greater wealth in temporary cutthroat competition?—William De Witt Hyde in Atlantic.

Religion.

Attention of unwonted kind
The Bible now receives.
It is a splendid thing, we find,
For pressing autumn leaves.

Ardennes Poachers.

Poachers in the Ardennes are ingenious. One had the heels of his boots fixed under his toes, so that his tracks appeared to be going in an opposite direction. Hares and other game are sent to Brussels in firkins of butter, so that the scent shall not betray them.

An Object Lesson.

A French reformer delivered a lecture at Lyons against corsets and lacing. In course of the lecture a woman fainted. It proved to be the lecturer's wife, who wore a corset and was too tightly laced.

Ragged clothes quickly—that's what common soaps with "premiums" cost; but

Local or special notices, set in regular body type of paper and inserted amongst pure reading matter, will be charged for at the rate of twenty cents per line for each insertion. If set in black type, the rate will be twenty-five cents per line for each insertion.

Dissolution of Partnership Notices, $5.00.

Liquor License and Mineral Claim Notices, Etc., $5.00.

Changes for advertisements will not be received for publication after 6 P. M. Tuesday.

THE FERNIE FREE PRESS,
FERNIE BRITISH CO LUMBI

SATURDAY, JAN. 10, 1903.

ABOUT OURSELVES.

With this issue the FERNIE FREE PRESS commences its fifth year and it is fittingly commemorating the anniversary by presenting its readers with a larger paper. The FERNIE FREE PRESS will hereafter appear as a regular six-column paper, being one column wider, and about two inches longer than our former production and therefore affording about six columns more space for local news.

The plant has been correspondingly improved. A large Hoe Cylinder Press has been installed at a cost of $1200 and new type to the value of $500 has been added within the past few weeks bringing the total value of the plant to $8000 and we venture to state that few offices in the interior are so well equipped for newspaper and job work as is the FERNIE FREE PRESS office. The new press is run by water power and the work of printing the regular issue is reduced to a minimun. Our patrons are invited to drop in to see it at work.

The enlargement of our publication necessarily means a better news service, this will naturally result in a larger subscription list which in turn brings greater advantages to our advertisers. Heretofore we have often been crowded for space for our advertisers and this drawback will now be overcome and plenty of room will be reserved to meet all their requirements.

SUNDAY MAIL SERVICE.

That our present mail service is inadequate is generally conceded, though, to be fair, we believe that if those who do the most complaining would use more judgment with their censure many idle criticisms would be spared the postoffice department and the C. P. R. Neither of these powers can overcome the fury of the elements, and delays will happen on the best regulated roads, the results of storms and many other possible causes. It is folly to always expect our mail on schedule time and if even some days we do not get it at all there may be a pardonable reason for the trains failing to make connections. But in the question of the Sunday service the post office department is clearly lax in its attention to our pressing needs In the other instances some reasonable excuse may be found for the wretched existing conditions, but it would be hard indeed to convince us of any good reason why a mail coach should not be attached to our regular Sunday trains. It is bad enough for our mail to lie over at either end of the line for a few hours as a result of failure to connect, but when the branch train steams out of Medicine Hat on Saturday evenings with orders to leave the mail waiting there until Sunday evening, a straight wait of 24 hours, it is high time that a strong kick was registered. Often too, to-day's mail being a ready example, the train may fail to connect on Friday evening and then the mail bags with their important contents must idly lie in Medicine Hat for nearly 48 hours. Then think of the out-going inconveniences! Imagine a letter addressed to Michel and posted in the Fernie office at 6 p.m. on Saturday not leaving the town until 6:17 p.m. on Monday!

It is said that the C. P. R. want more than the regular rates for running the mail coach on Sunday and that this is the sticking point with the department. We admired Postmaster General Mulock's economical management of the post office last year, but if his $5,000 surplus was based on many false ideas of economy, such is this one, it would perhaps be as advantageous to the country at large to draw a few thousand from the public treasury instead of replenishing it with the earnings of this penny-wise-pound-foolish-system. Our member, we believe, understands this defect and it is earnestly hoped that he will do all in his power to expose its glaring nature to Mr. Mulock and by so doing he will have earned the thanks of all right thinking people along the Crow.

Marconi News Service.

The entire success of the Marconi wireless telegraphy as witnessed in the recent tests between Canada and England has awakened within Canadian publishers a keen interest. Many far-seeing members of this profession whose business it is to supply the public with the daily news of the world discern in this marvellous invention the solution of the question of a reliable news service between Canada and the Mother Land.

The Canadian newspapers have heretofore not thought themselves financially capable of establishing an independent Enropean cable service of their own and have been at the mercy of American cables. The news to be got from these channels is most unsatisfactory to the Canadians, much of it being of a sensational nature while the little of real interest and particularly relating to Canada that filters through this source is often unreliable. This country is sick and tired of this wretched system and should hail with delight the prospect of a Marconigraph service. It is particularly gratifying to know that our government co-operated so readily with Mr. Marconi in giving his theories a fair test and this country will doubtless be well rewarded for the kindly interest in his invention for Marconi has already promised to give Canada a five cent a word press rate, and that should bring an all British-Canadian news service within immediate reach of the whole Canadian Press.

Marconi has said that a one-cent rate is not beyond the range of probability, in which event it will be possible for the leading Canadian dailies to have special correspondents on the other side of the Atlantic to daily forward their respective journals despatches of real Canadian and Imperial interest. We believe the next year or two will see a grand evolution in trans-oceanic news transmission.

The advantages that this marvellous system will offer for cross country telegraphy may exceed our wildest dreams. The talented inventor at a grand dinner given in his honor at Glace Bay the other day stated that the post office would be superceded by this mysterious method of communicating between distant places.

* * *

The Strike.

It gives us pleasure to publish this week the letter authorized by the Executive of the Gladstone Miners Union. We rejoice to know that "there is not any low rumblings of a strike," and that "such a thing has not been hinted at in the only place where a strike can be ordered—the union hall." Incidentally the writer is a little rude in his inferences but we can easily overlook this in the general satisfaction that the above quotations convey.

* * *

THE Calgary Albertan in an editorial lamenting the isolation of that town in matters pertaining to Hockey leagues gets mixed in its dates in incidentally describing our league by giving Lethbridge a place instead of Fernie. We wish to remind the Albertan that the Fernie Hockey Club is in it, decidedly in it and will be in it at the finish too. Probably the Albertan thinks that because our club defeated every club between Brandon and Nelson last season we have joined the Winnipeg league this winter.

* * *

THE Pincher Creek "Round Up" in its third number appears in its own clothes. It consists of 12 pages in magazine form. It is printed on good paper and from a typographical standpoint is a first-class production. Herbert Lake, the editor, gives his readers a number of breezy, readable articles and the news columns are well filled. The only regrettable feature is that this very enterprising business was not situated in a larger town where two papers could find space to work with elbow room.

WHAT BRITISH COLUMBIA OFFERS.

Mr. J. H. Turner, agent-general for British Columbia in England in a recent address before a London audience reviewed the many advantages offered by British Columbia. Touching on the coal deposits he say:—

"In addition to what are known as the metalliferous mines, there are great coal areas. At present the supply of coal is drawn frem practically only two districts, the Crow's Nest Mine of Southern British Columbia, and the Nanaimo and Comox mines of Vancouver Island. The Crow's Nest commenced work about three years ago, and already put out some 2,000 tons of coal daily, and will shortly increase the output to 5,000 tons and is expected to eventually go up to 15,000 tons daily. None of this coal or coke goes to the Coast, being all used in the district. This wonderful deposit consists of 10 seams varying from 6 to 20 feet in thickness. The coal produces a very superior coke, such as is required in very large quantities in the copper mining districts, and owing to the proximity of the Crow's Nest to these mines, it has helped to give new life to the smelting and mining industry gonerally as may be judged from the fact that coke a few years ago sold in that district for not less than $16 a ton and is now supplied at from $8 to $9 a ton. A recent estimate made by mining engineers places the amount of coal at the Crow's Nest Mines as 22,595,000,000 tons.

The Vancouvor Island Coal mines are the best known on the Pacific, as they, up to the present, produce the only good quality of coal found on the coast, and have for years been supplying the city of San Francisco and other foreign ports and the principal steamship lines on that ocean with the best steam coal. The output last year was 1,589,179 tons. Some of the Vancouver Island coal also makes good coke."

AS OTHERS SEE US.

What the Press Think of the Fernie Free Press Christmas Souvenir.

The Miner acknowledges the receipt of the souvenir number of FERNIE FREE PRESS issued Christmas day. It is printed in booklet form, and is not only full of historical and other matter relating to the great coal regions surrounding Fernie but is a typographical gem, beautifully and profusely illustrated. The pictures are almost as perfect as steel engravings. and gives the reader a correct idea of the majestic mountain scenery of the Crow's Nest region, as well as everything connected with coal mining, including the great coke ovens.—Rossland Miner.

The souvenir edition of the FERNIE FREE PRESS has been received at the office. It is gotten out in magazine form and is filled to the brim with interesting articles on Fernie and surrouuding country. Its makeup, illustrations and press work are of a high order, and the issue reflects great credit on the publisher Mr. Wallace, who did not let the extra work interfere with the regular issuing of the FREE PRESS.—Morrissey Miner.

A highly creditable typographical production in every sense of the term is the Christmas souvenir number of the FERNIE FREE PRESS. It is issued in quarto folder form, printed on heavy paper and embellished throughout with numerous halftones illustrating interesting features of the great coal town. The letterpress is really excellent while the material is comprehensive and interesting.—Winnipeg Free Press.

The FERNIE FREE PRESS did itself proud with its Christmas edition. It is complete in every way and is a credit to Fernie and to J. R. Wallace, publisher of the paper.—Moyie Leader.

The FERNIE FREE PRESS has issued a very handsome souvenir booklet descriptive of Fernie. It is profusely illustrated and being neatly printed on good paper, presents a handsome appearance, and is in every way a credit to its producers.—Kamloops Sentinel.

THE FERNIE FREE PRESS issued a neat Christmas souvenir. It was a complete review of Fernie since the founding of the town, pictures of public places, private houses and individuals that combined to make the book interesting from cover to cover. The work was done in the FREE PRESS office, and is a credit to the office and the manager, Mr. Wallace. —Cranbrook Herald.

Congratulations are due the FERNIE FREE PRESS upon the uniform excellence of its special souvenir number. It is interesting and creditable from one of its royal purple covers to the other.—Vancouver World.

Owing to the change in the size of the FREE PRESS we are unable to give our readers the usual installment of our story, but it will appear regularly after this issue.

ATTACK A MINE MANAGER.

Resulted in Death of Three of His Assailants and Wounding of Three More.

Eureka, Nevada, Jan. 7.—J. V. Traylor, manager of the York & Nevada Copper company's mine near Ely, was attacked today in the company's office at Keystone by twelve men, said to be members of the miners' union, who intended running him out of the town. They caught Traylor and threw him down, but he managed to break away and commenced shooting, killing James Stagger, Sam Johnson and J. S. Smith, and wounding three other other members of the party. A strike has been on against the company for several weeks on account of a reduction in wages ordered by manager Traylor.

Ladies and Gentlemen's Watches, Chains, Stick Pins, Cuff Buttons, Belts, Buckles, Etc.,

are less then equally good articles can be purchased for elsewhere.

A. C. Liphardt.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

Rev. C. F. Connor, of Morrissey, was up on Tuesday.

Mr. and Mrs. A. Bricker left for their home at Okotoks on Sunday evening.

Dentistry

Dr. Barber is in town and can be found at his office in the Hill block all next week. x

E. J. Cann, Fort Steele, is in town. Mr. Cann is in the piano business and is on his way home from a trip to Frank.

Miss Neil, who was up from Frank visiting friends during the Christmas holidays, went back to her home on Monday.

Ask for British Lion or Mainland cigars For sale at all first-class places. Union made. Manufactured by Wm. Lietjan, Vancouver.. x

Mrs. R. L. Henderson, Michel, was visiting friends in town on Thursday and Friday. Mr. Henderson was also here yesterday on business.

Mrs. Chas. Reid, whose husband keeps a drug store in Frank, was in Fernie for a couple of days this week, the guest of Rev. Mr. and Mrs. Stillman.

Mr. E. Hazell received a wire from Toronto last Saturday conveying the sad intelligence of the death of his eldest child, a little girl, who died in that city after a short illness.

The new suits for the Hockey Club have arrived, and the boys will look spic and span in their new outfits. The sweaters are black with old gold collars, cuffs and belts. The stockings are also black with old gold rings.

Mr. Robert Duthie gave a turkey shoot on New Year's Day which proved an event of great interest for those living at the mines. Mr. H. S. Talbot, Dr. Ker and Wm. Yates were the winners, Mr. Talbot getting four turkeys and the other gentlemen one each.

Joseph Jean, of The Gem Restaurant and Frank Labelle, bar-tender of the Hotel Northern, have leased H. A. Kanouse's hotel, on Baker Ave. They take possession on the 15th inst. In the spring this hotel will be enlarged to double its present size and fitted in modern style. Mr. Kanouse purposes devoting his time to his many other interests.

A peculiar mix-up occurred at the rink on carnival night which is almost as puzzliug as many professional brain twisters. R. L. Henderson, J. McIntyre and an unknown got their shoes hopelessly mixed, but in checking off the results it was found that the stranger and Bob each got off with odd shoes, while Jack now sports a pair of mated shoes which he never saw before. How was it done?

There are now four daily newspapers in Vancouver, the Ledger being the latest addition to the list. The Ledger is scarcely up-to-date in form though it is well filled with news. It is issued at midday. It is Conservative in politics and takes a lienient view of the present provincial government. Four dailies ought to keep the citizens of the Terminal City well posted on the news of the day.

The secretary of our hockey club is in receipt of a letter from the Pincher Creek club asking that the scheduled league game of Feb. 2nd between Pincher Creek and Fernie be played in Fernie instead of Pincher Creek, and that an extra game be played in Pincher Creek on Feb. 6th in place of the game that was booked for last Monday. Our club has answered that the schedule is satisfactory as originally arranged and that the proposed change would bring too many home games in succession.

Barrister J. S. T. Alexander returned on Monday from a visit to Lethbridge and vicinity, where he went to spend the Christmas holidays. He reports no snow on the prairie. The coal industry in Lethbridge is seriously handicapped by the shortage of cars, which is an old time grievance. Mr. Alexander was down to Great Falls over the narrow guage road. The standard road was almost complete and he reports that the first regular standard train was due to run on the 5th. A regular passenger service will be installed.

The twin cities of Grand Forks and Columbia have been amalgamated by special act of the legislature and on the 1st of January, 1903, the new city under the name of Grand Forks came into existence. The two places are quite close together and considerable rivalry has existed between them. Under one municipal government, which will be elected on Jan. 15th, this locality should make still greater progress. The proclamation was issued on New Year's Day and Attorney General Eberts sent a congratulatory message to Mayor Holland of Grand Forks.

Removing Snow

The Fernie C. P. R. yards have been cleared of an immence amount of snow during the past week. The company at great expense has kept a special train and a large force of men steadily at work. The long train of flat cars are loaded with the snow and it is then taken to the Coal Creek bridge where it is dumped over-board. The train is from Cranbrook and H. Dowsley is in charge. The work, though costly, was absolutely necessary as the trainsmen found it impossible to do the regular yard work with every track lined on both sides with long snow banks, and the general improvement in the appearance of the yard, since the removal of the begrimed snow is marked.

A. Mutz was down to Pincher Creek this week.

A good girl wanted at once. Apply to Mrs. J. A. Rennie. x

Just in from Webb's, Xmas confectionery. Fernie Drug Store. x

The Misses Todhunter entertained a number of friends last evening.

James Gun, carpenter, has gone to Morrissey mine to work for the company.

Dentistry

Call and consult Dr. Barber any time next week if you are in need of his services. Office over Liphardt's.

A surveying party from Morrissey went out to the Flathead country last week to survey a large tract of coal lands for the C. N. P. Coal Company.

Mr. Thos Graham who recently resigned his position as overman of Nos. 2 and 3 mines at Coal Creek, left for his old home in Montana on Tuesday.

A Junior Epworth League was organized on Wednesday. Regular meetings will be held in the Reading room of the Methodist church every Wednesday afternoon at three o'clock.

Messrs. S. Herchmer, R. W. Coulthard and A. H. Cree returned on Wednesday's train from Calgary, where they have been spending their Christmas holidays.

Mrs. Dr. Higgin's many friends will be sorry to learn of her indisposition for several days this week. We are pleased to report that Mrs. Higgins has almost fully recovered her usual health.

Mr. C. W. Laidley left very suddenly for Omemee, Ontario, on Sunday evening, having been summoned by a telegram that his father was very ill, suffering from cancer and not expected to recover.

Macleod seems to be up against it. In the second league Hockey match played at Medicine Hat on Monday between the local team and Macleod the latter were defeated to the tune of 14 goals to 2.

Mr. J. Ascroft, of Fernie, spent several days in town this week, returning Saturday. He brought down his three children to leave in care of their grandmother, Mrs. W. Green, their mother being seriously ill.—Lethbridge News.

The public school opened on Monday with a fair attendance. The school at the mines is still closed as since the resignation of Mr. Smith the Board has been unable to secure a teacher. The new school house there is ready for occupancy.

The hockey game billed for Monday, the 5th, between Pincher Creek and Fernie did not materialize owing to the mild weather prevailing and "no ice" was wired them on Sunday. It was afterwards learned that Pincher Creek was likewise without skating ice.

Those interested in the timber on the west side of the Elk river are circulating a petition around Fernie asking the provincial government to build a bridge across the Elk a couple of miles north of Fernie. The petition is receiving the endorsation of all who are asked to sign it as it is a work that is very necessary for the advancement of this important timber district.

Messrs. W. Liphardt and A. Matheson entertained a number of their bachelor friends to a smoking party at the home of Mr. A. C. Liphardt on Tuesday evening. Progressive whist was played until a late hour, after which refreshments were served in first-class bachelor style. Cigars were circulated at short intervals throughout the evening and every one present had a most enjoyable time.

Appeal Dismissed.

A recent decision of the judge of the county court recalls a double case tried in Fernie some time ago before Magistrate Trites. Joe Gaul was fined for assaulting Wardrobe. The latter was afterwards fined $20 and $20 damages, besides costs, for destroying a bridge at Morrissey belonging to Gaul. Mr. Wardrobe appealed to the county court and the case was heard at Fort Steele on the 5th of November. The judge has just givon judgment dismissing the appeal. Mr. W. R. Ross represented the respondent.

The Fernie Lumber Company are making extensive improvements and repairs to their plant. The saw mill is being raised, which will insure it against further damage from the high water. In consequence of these alterations the saw mill is shut down, though the planing mill is running steadily. A quantity of rough lumber was purchased from Mr. McRae and this is being run through the planer. It is estimated that the improvements will take six weeks and in the meantime the large force will not be laid off as the company is finding ample work for them in the woods.

Geo. Chapman, brakeman, met with a very painful accident on Saturday night while at work on the highline. He was passing over loaded slack cars and slipped on the platform in front of a car where it had filled up with snow and ice. He slipped onto the bumpers and the engineer noticing his mishap applied the brakes causing the bumpers to come together catching Mr. Chapman's leg at the ankle. Fortunately the bumpers pinched in such a manner as to force the leg from their grip or he would have lost his leg. As it is, the bone and the cords of the leg are seriously injured and the unfortunate man suffered much pain. On Wednesday he was removed to the Cranbrook hospital for treatment.

J. Dougherty went west to Nelson this week.

Wm. Sneddon and family have gone to Coal Creek mines to live.

Miss B. Elliott is visiting in Morrissey at the home of Mrs. Rogers.

Miss Maud Whitney, of Lethbridge, is the guest of Miss Ethel Digby.

R. Joyce went to Kimberley this morning and will remain there a few days on business.

Mrs. Wm. Keay returned on Thursday from the East, where she was visiting friends.

Frank McDowell has gone to Toronto on a business trip. He expects to return about the beginning of February.

Mr. A. W. Purdy, brother of A. J. and Harry, left on Tuesday for Mullan, Idaho, where he intends starting a furniture business.

Harry Hill, the tailor, is putting a traveller on the road. He has engaged John Lyons to solicit business in the neighboring towns along the Crow.

David Martin and family have vacated the company house on Victoria Ave. and have gone to live at the mines. Mr. Martin can better attend to his duties as foreman by living there.

Dancing Lessons

Mr Heath wishes to announce that he will recommence his dancing classes on Monday evening in Joyces' Hall. Instruction will be given to Ladies from 8 to 9, to gentlemen from 9 to 10. x

Fred Burn gave a sleighing party last evening to a number of his friends. The moon light, the good sleighing and the merry company each did its share towards making the ride very enjoyable.

Mr. R. W. Woods, manager of the Coal Company store at Morrissey, leaves for the East this evening, and it is rumored that he will not return alone. It is also rumored in this connection that Park Cottage will soon be occupied once more.

Mr. J. McEvoy and his bride returned from the east yesterday and congratulations are being showered upon him since. Mr. and Mrs. McEvoy will live in the house at the corner of Humphreys street and Victoria Ave. until their residence in the park is completed.

The services in the Methodist church on Sunday next will be as follows:—Morning service, subject, "The settling up of our account." Evening service, subject, "Some modern lessons from an ancient story." "The Better Land" will be rendered by the male quartette.

The interior of the court house is nearing completion, and presents a very up-to-date appearance. It has the regular box for the offender, the jury bench, the judge's platform and a little railing fences the audience off from the part occupied by the court officers. Then in the rear are several offices and much more accommodation for prisoners.

H. Lorsch met with an unfortunate accident recently at the Cedar Valley Improvement Co.'s mill at Morrissey. While feeding the small saw the back of his hand accidentally got in the track of the whirling teeth badly cutting and lacerating it. The doctor says Bert will not be able to work for six weeks and he is spending enforced holidays with his friends in Fernie.

Death of J. R. Costigan.

John R. Costigan, son of Hon. John Costigan, prominent in Dominion politics, dropped dead of apoplexy in Calgary on Tuesday last. Mr. Costigan is well known throughout this valley. In early days he had a law office in Cranbrook and he was widely known as a very clever K. C. He was once an aspirant for political honors himself. Many old Fernie citizens regret to learn of his demise.

OUTPUT OF C. N. P. COAL COMPANY.

Returns for Yesterday and for the Week Were Record Breakers.

Information gathered at the Coal Co. office to-day reveals the fact that the output at the Coal Creek and the Morrissey collieries yesterday surpassed any previous daily record since the explosion, and the returns from the Michel and the Morrissey collieries for the past week has a similar record.

POLICE COURT.

The docket this week was very light. John Smith was up for vagrancy and got two months at hard labor.

Alphonse Drona was charged with breaking the lock of a tool house near the coke ovens and using the tools. The case was dismissed.

Twelve witnesses are summoned to appear in the Beltner assault case at Michel, which will be tried here on Tuesday.

THE ICE CARNIVAL.

Excellent Ice, Band Music and a Large Attendance.

The carnival given by Mr, C. J. Digby on Thursday evening was well attended The ice never was better and all arrangements were complete to make it a success. The rink was decorated with evergreen erees, ffags and Chinese lanteens and the music of the Fernie band, resurrected for the occasion, was appreciated by all the skaters.

The masquerade was the least successful feature of the evening, as the number of those who came in costume was not large and in many cases the dress was not strongly representative of any particular character. Financially the carnival was a success. The following is a list of some of those who came in costume:

Miss Mott and N. E. Suddaby, Ellen and Douglas of Scotland.
Mrs. Geo. Clode, nurse.
Mr. Geo. Clode, Reuben.
H. E. Prass, soldier.
Chas. Stephens, label man.
Miss Jessie Dunlop, Duchess of Marlborough.
Wm. Forsyth, The Man Erom Glengary.
Gertrude Crawford, Don Pedro's Daughter.
Miss Hall, nurse.
George Alridge and Martin Robischeaud, hobo and his kid.
H.W.Gendreau, Little Lord Fauntleroy
Jas. Crawford, clown.
Duncan Cody, nigger boy.
Harry Harris, nigger girl.
W. Ross, tramp.
Leslie Mills clown.
Ed. Quig, southern lady.
Neil Dunlap, little darkey.

Messrs. R. McMordie, H. L. Staebler, and E. Kummer acted as judges, and the following prizes were awarded:

Miss Gertrude Crawford, best dressed lady, received a cut glass bottle of perfume, given by the Fernie drug store.

Mr. Chas. Stevens, best dressed gentleman, received a pair of gold cuff buttons, the gift of W. C. Liphardt.

Mr. N. E. Suddaby, best representative character, received a handsome dressing case, given by the Crow's Nest Trading Company.

Mr. Geo. Alridge, best comic character, received a box of cigars from Mr. A. B. Trites.

After the prizes were awarded a large crowd of skaters took advantage of the good ice and the accompanying music.

It is hoped that by the time another carnival is announced the merchants dealing in fancy goods will be better prepared to supply the wants of masqueraders. The difficulty of getting hold of masks, etc., was a drawback which prevented many from dressing for this carnival.

Mr. Digby wishes to announce that he will give another carnival in the near future.

THE CANADIAN BANK OF COMMERCE.

Head Office, Toronto.

Paid Up Capital, $8,000,000. Reserve Fund, $2,500,000.

CHARGING *the* ENEMY

By Martha McCulloch-Williams

Copyright, 1901, by A. S. Richardson

Old Gib Ezell went swinging and stumping upon his crutches down the street and up the steps of his store. It was the biggest store in town, though not the smartest. Joe Beenam, who had opened up the spring before, just across the street, was running old Gib hard in groceries and hardware and leaving him out of sight when it came to knickknacks or dry goods pure and simple.

A man who half knew looked after old Gib, then across at the sign of his young rival and murmured half to himself, "What a pity!" Another man who knew also looked, listened to the exclamation and answered it, sticking out his chin as he spoke, "Better say, 'What a shame!'"

"What's a shame, doc?" a third said, coming up behind them. Doctor Waters smiled half grimly. "I'm not quite sure—it seems to be the hitch in the course of a true love," he answered.

Lew Bayne, the man who had spoken first, shook his head energetically. "I meant that poor old fellow's legs," he said. "I suppose, doc, it's certain he'll never walk again."

"Now you've got me," the doctor protested. "I'd risk my professional reputation that fall he got on the sleety pavement did no worse harm to his shrunken shanks than bark them up pretty generally. There were bruises, of course, and on the shoulder and side as well. I told him he'd be out and about in plenty time for the Christmas trade, but from the first he stood me up and down that he'd never take another steady step, and so far, I'm bound to admit, he was right. There's nothing on earth the matter with his legs, nothing at least that I or the other doctors can see. Against that there is the fact that the minute he tries to stand on them they do the joint rule act—double under him as though they hadn't strength to bear up a spider. The trouble must lie in the nerves. If that's what you meant, I agree with you that it's a pity. I thought you had reference to the trick he's played on Joe Beenam."

"What is it?" asked Merton, the third of the group. "You know I've been away six months! Tell me all about it."

"Not much to tell," Dr. Waters said. "You know Florrie Ezell"—

"I ought to, considering she sent me away," Merton broke in ruefully. "You don't mean Joe is gone on her like the rest of us? I thought"—

"You've hit it," the doctor said. "Joe did stand out mighty well against the prevailing infection, but a man never knows what's coming to him until it hits him square in the face."

"Lord! To think of Joe, the 'bomb-proof,' we called him," Merton chuckled. "How did it happen? Tell me all about it."

Merton, a newly evolved drummer, had given what he would have called "a comprehensive order." Dr. Waters also chuckled as he answered, nodding his head by way of emphasizing his points: "Well, you see, it's this way: The hour struck for Joe when he saw Florrie Ezell swirling around, a blue tarlatan angel, in a waltz with Bob Acton at the Pattons' party. Florrie's a pretty girl anyway you see her. That night she was particularly fetching. But that wasn't the thing. I insist Joe's time had come. He knew it. Soon as the waltz was over he flew to Florrie—didn't get a yard away from her all the evening."

"It was a freezing time, as I remember," Lew Bayne interrupted, with a laugh. "Indian summer up to dusk; then a cold rain, that turned to sleet in short order. Say, didn't old Gib get his fall that very night?"

"I'm coming to that, if you'll wait," the doctor ran on. "I tell you that was a sleet to remember. Joe, of course, wouldn't let Florrie walk home, though the Ezell house is only six blocks from the Pattons'. No, siree! He telephoned for the finest rig at the livery stable and bundled all that blue tarlatan in it as snug as you please. I heard Florrie protesting that she ought really to wait for papa, but we all persuaded her papa wouldn't think of risking himself upon pavement like glass. We ought to have known better. Old Gib always does the thing that any other man would let alone."

"Bet a hat he came," Merton said, chuckling more than ever.

"You win—from yourself," Dr. Waters answered. "He came, he didn't see his daughter, he went back swearing like a trooper, though he is a deacon, and he fell right before Master Joe's fine rig, coming back from leaving Miss Florrie safe at the gate. Of course Joe picked him up and carried him home. Equally, of course, old Gib hates him for doing it. By the time I got to him next morning he was fully persuaded Joe was at the bottom of his fall, with Florrie as accessory; said they ran away and left him, hoping he'd break his neck, so Joe could have both his daughter and his store. You know he didn't take overkindly to competition anyway"—

"That he didn't! Why, he even wrote to our credit man to keep a peeled eye on Joe," Merton interrupted.

"That's like him," Dr. Waters said. "I tell you, boys, nature must work along a certain line of compensation. I'm sure she slapped into old Gib all the small meannesses due to two generations of Ezells—it may even be three. His father was a fine man, and his daughter is just as good a woman as ever was made."

"About Joe, now?" Merton queried. Dr. Waters frowned.

"Joe courted Florrie with such a rush that in a week they were engaged. Then he went right in to old Gib and had it out with him—told him all about himself and his business, in and out, up and down—but the substance of it was he wanted Florrie for his wife, and would do whatever old Gib said if only he could get her. And then the old crocodile pretended to cry; said Florrie was all he had to live for; he hoped Joe wouldn't press him for an answer then, nor, indeed, talk of an engagement until he was either dead or himself again. You know how soft hearted old Joe is, and how he hangs on to his word once he passes it. Of course he promised, never mistrusting the old wretch was playing him. So there you are! Florrie's worrying and losing color because Joe only speaks when they pass by, but don't come to the house. Joe's about desperate, and old Gib is fattening and getting ten years younger—on spite and crutches. What the end is to be nobody can guess."

"Can old Gib be shamming?" Merton asked. Dr. Waters shook his head. "I thought so at first," he said. "But if he is it beats anything in the books. There's certainly nothing wrong with his legs, except that they're a bit flabby. It's equally as certain he can't walk on them. I think sometimes he has hypnotized himself. If it was just deceit and what I call cussedness, I would have been able before this to take him off his guard."

"Well, I can at least go over and condole with Joe," Merton said, stepping across the street. "And maybe sympathy will be worth an order," he called back over his shoulder as he struck the store steps.

* * * * * * *

Although it was late March, it was still nipping cold. A red fire roared in the base burner inside old Gib's store. Old Gib himself sat close beside it, his eye ranging all the miscellaneous merchandise which crowded shelves and floor. His three clerks had been on the jump all morning, but toward noon there came a lull. He was about to send two of them off to dinner when the door opened wide, and Merton came through, with Joe Beenam in his wake and Dr. Waters and Lew Bayne marching solemnly behind. Joe's face was white, his eyes brilliant, his figure tense in every line. Indeed he looked desperate, and his voice rang hard as he said, stopping short three feet away:

"Mr. Ezell, I have come to ask you, here in the presence of these witnesses, to release me from my promise. You know well how it was given—with a total misapprehension of the truth."

"You mean you want to take my daughter, as well as my trade, and leave me, a cripple, to starve!" old Gib roared.

Joe set his teeth. "I mean nothing of the sort!" he said. "Give me your daughter, and our home shall be yours. I will serve and care for you as I would for my own father"—

"You won't get the chance," old Gib sneered. Joe half turned to his friends and whispered sepulchrally: "Go away! Quick!"

"Going to murder me, hey?" old Gib sniffed.

Joe stood very straight. The others had slunk toward the door, with the awed clerks huddling after. They heard Joe shout:

"It is not murder! I shall give my life to free Florrie from your intolerable tyranny!"

Then they saw him fling wide the stove door and dash into it what seemed like several pounds of gunpowder.

Old Gib saw it too. With one wild, whooping yell he leaped from his chair, regardless of crutches, of everything but flight, rushed madly for the door, darted through it and did not pause until he came panting and trembling to his own gate. As he clung there the others overtook him, as breathless as himself betwixt running and laughing.

Dr. Waters made a low bow. "If I had thought three pounds of black sand would be so effectual, I would have had you well long ago," he said.

Merton dragged Joe forward. "If you want to kick anybody, kick me," he said to old Gib. "I put this lad," patting Joe's shoulder, "up to playing you that trick."

"Humph! I knew he didn't have the brains for it himself," old Gib snorted. But, though he had found his legs, he was none the less old Gib. The fact was proved by his letting Joe and Florrie marry almost out of hand and presenting them with both his store and his blessing.

Knew Him as a Sharper.

Lord Brampton, when he was Mr. Justice Hawkins, when on circuit, finding a long summer evening drag on his hands, took a turn in the lanes, and, staying at a rural inn for a cup of tea, his ears were assailed by the charmed sound of the falling ninepins.

With a lively eagerness he inquired of the landlord if there was an alley on the premises. By way of answer the landlord conducted him thither. The goodly company assembled eyed the newcomer with greedy eyes, thinking they would lead him on to an advantageous game.

The learned judge at once acceded to their invitation, in the course of a very short time relieving every gentleman in the place of his spare shillings.

Then the landlord thought it time to intervene and, touching his lordship on the back, said:

"Look here, my fine friend, we have had your sort here before, and if you don't want to shake hands with the police you'd better get out of this!"

His lordship went.—London Standard.

CAPTAIN FYFE OF THE SIXTH

By J. M. LYALL

Copyright, 1901, by A. S. Richardson.

When the Indians of the United States begin the ghost dance, the army prepares for an outbreak. In India when a new prophet comes down from the Himalaya mountains and begins to stir up the people orders are issued to suppress him at once. He is either captured by the military and banished from the province or arrested by the civil authorities and immured in a dungeon until forgotten. The English in India are arbitrary and autocratic. They realize that they are living over a volcano which may spout flame and death any hour. They move quickly and strike hard.

The coming of a prophet means popular excitement, plots and conspiracies, rekindling of the flames of hatred, danger to the English rule. Strong hands must be laid on the holy man at once. Perhaps there will be resistance, and a score of natives will be killed, and the resistance may even grow into an incipient rebellion, but the English put it down, bury the dead and give out nothing for publication. To rule India without gloves of steel would be to lose her in a year.

When the Prophet Rajmahal came down to the province of Behar from his mountain retreat, in which he claimed to have slept and dreamed for twenty years, intense excitement followed in his track. He headed straight for Moorshedabad, on the Ganges, to visit the ruins of an ancient temple and the tombs of his long dead ancestors, but he was headed off sixty miles to the north of that place. A lieutenant in the Sixth rifles had been detailed with half the troop on this special duty.

While it is true that most of the so-called prophets and holy men wandering about India are fakirs of the worst sort, who stir up excitement and sedition for the money there is in it, it is also true that a few of them are earnest and conscientious and should be dealt with harshly only after argument has been exhausted. The lieutenant found the Prophet Rajmahal to be a venerable and distinguished looking man. His age must have been eighty years or more, and yet he was sturdy and upright and had a voice like a clarion. He was a fluent speaker, full of argument, reason and appeal, and he was lighting a flame of zeal in every village he passed through. He utterly refused any cash contributions, lived on what the dogs would hardly eat and addressed the people without fear of consequences. He had dreamed of emancipation and a new ruler. It was sedition straight from the shoulder, and in less than a month he could set the whole province in rebellion.

When the lieutenant came face to face with the prophet, he resolved to try reason and argument. The officer could but yield respect and did not desire to see him dragged around the country, disgraced and degraded. Rajmahal was for defiance at first, and he had enough adherents in his train to have eaten the troops ten times over, but after an interview lasting for hours he recognized the force of English logic and announced that he would return to his mountain lair.

The prophet was as good as his word, but his return was slow. This was caused solely by the crowds blocking his way and exhorting him to defy the government. He had not yet made fifty miles on the backward track when Captain Fyfe came on with the rest of the troop. The lieutenant was relieved from duty under a cloud, and orders were issued to push the old man out of the province at the point of the saber. Captain Fyfe overtook him, pronounced him a fakir, an impostor and a charlatan, and, wishing to make the degradation complete, pulled him by the beard and spat on his raiment.

This scene took place in the open air in sight of 3,000 people and the full company of soldiers. The act mortally offended every law of caste and religion, and instead of raising shouts of indignation the natives simply groaned in horror. It was the handsome, contemptuous Captain Fyfe, clad in full uniform, who stepped forward and gathered the long white beard in his clutch. It was a wan faced, misshapen and cringing native who fell back before the uplifted hand of the prophet. Captain Fyfe had disappeared off the face of the earth while the eyes of all that vast crowd were full upon him. Three thousand people looked upon the strange scene, and 100 of them were English soldiers. A hundred different men swore to it, and it was talked over wherever two Englishmen met in India. But the press dared not refer to it for fear of encouraging the natives.

The second lieutenant, now in charge of the troop, rode through that crowd a score of times, but his captain was not to be found. He beat up the country around, he coaxed and threatened, but the Prophet Rajmahal strode on, with his face to the mountains, and his followers were dumb. The troops had to turn back. No sooner had the report reached the colonel at Gyah than the second officer was put under arrest. At his trial every man in the command testified to the facts as above related. It was against common sense to believe the story, but could they say that a hundred men had conspired to lie? They had to accept their testimony and clear the officer, and the only thing left was to poohpooh it and forbid the soldiers to talk.

What had become of the native who had stepped into Captain Fyfe's boots, as it were, no one could say. He had drawn back and mingled with the crowd and then disappeared.

Weeks and months went by. Then one day a strange Hindoo was seen hanging about the cantonment. His face was like that of a monkey rather than of a man, and his misshapen legs gave him a queer gait. A soldier went forward with a stick to drive him away, but the idler protested, weeping, and after speaking in a strange jargon he forced out the words:

"Take me—take me to the colonel!"

Ambling and clucking and chattering, he was passed to the colonel. Now and then a native came in with reports worth heeding, and this "thing" was supposed to be the bearer of some such news. Standing before the colonel, he stuttered and stammered and giggled like a fool. What few words he did utter no one could understand. The colonel lost patience and spoke to him sharply, and the "thing" groveled at his feet.

"Try your cane on him," said the colonel to a captain who had been drawn thither by curiosity.

"That will make him speak," replied the captain as he brought the cane down over the chatterer's shoulders.

So it did. He sprang up, screamed out like a wild beast two or three times, and then, holding out his hands in appeal, he cried distinctly:

"Colonel, don't you know me? I am Captain Fyfe!"

"God in heaven!" gasped the colonel, springing to his feet.

"I am! I am! I tell you, I am Captain Fyfe, and I want to come back here!"

Horror struck, the officers looked into his hideous face and at his deformed limbs, and no man could speak.

"I tell you, I am Captain Fyfe!" screamed the "thing," "but you won't believe it—you don't want me. I will go back!"

And as the group continued to stare and wonder and feel their blood run chill he ran out of the room, fled across the grounds with growls and cackles, and before a move was made to prevent he was out of sight behind some buildings. The closest search was made, but in vain. For months and months watch was kept for him, but he never returned.

Nature Study That Failed.

A certain clever teacher in a public school once congratulated herself on having given her geography class a vivid idea of islands by cutting out pieces of brown paper and pinning them on the wall. "That's all very well," said the master of the school, speaking from a longer experience of the youthful mind, "but those children will go out into life with a fixed idea that an island is a piece of brown paper pinned on the wall." The New York Post says that two little "fresh air" girls were noticed on the morning after their arrival gazing at the landscape with evident disapproval.

"What's the matter, children?" asked their hostess. "Why are you disappointed with the country?"

"Why, there's no grass here," said one, pulling a blade and biting the end of it.

The lady could only stare. "What is your idea of grass?" she asked at last.

Little by little the truth came out. To begin with, grass, they thought, was about the height of a man.

"If this were taller, would it be like grass?" asked the lady.

"Oh, no!"

"How is it different?"

"Why, grass is black," said one child.

"Black and white," added the other.

Then the explanation became apparent. They had drawn their ideas of vegetation from the black and white prints of newspapers and books.

Lines In Maple Wood.

Nobody seems to know what cause it is which produces those delicate and beautiful lines in maple known as birdseye. Some people think they come from the hundreds of little branches which shoot out over the trunk of the tree as soon as a clearing is made around it. Expert timbermen say that is not the case. The only way to tell a birdseye maple tree is to cut it. There are no outward signs by which one can judge. The Railroad Gazette tells a story of the late George M. Pullman. Many years ago he was offered a mahogany log for $3,000, to be cut into veneers. It was supposed to be a very fine piece of wood, but this could only be determined by cutting it. He declined the offer, but agreed to take the log cut into veneers for what it was worth. The owner had it sawed and was paid $7,000 for his veneers. Any one who can discover the secret of determining the interior nature of wood from the outside will have a fortune.

Unhappy Princesses.

The figures the old maids presented to the astonished court when they returned to take their places at Versailles may be seen today in the portraits by Nattier, which adorn the walls of the palace where they lived their futile, often mischievous lives. The very names Louis jovially fastened upon these melancholy dames illuminate the scene and the attributes of the royal maidens. Loque, Coche, Graille and Chiffe were the endearing titles by which the fond father addressed his daughters. The terms are not quite translatable, but they signify Rag, Piggy, Sloppy, Tatters. None possessed a single trait of beauty, none had intellectual resources above the ordinary scullion maid save the elder, Mme. Adelaide, who had just enough ability to make misery in court and camp. Their existence was a constant mortification of the flesh.—Era.

Oil In Your Mitts And Gloves

Oil in leather makes cold mitts or gloves, because oil is a "good conductor" of cold. That's why Indian tanned buckskin is warmer than common oil tanned leathers.

But buckskin is porous, and lets in the wind and absorbs wet. Now "Pinto Shell" Cordovan is tanned without oil or minerals, and it is absolutely wind, water, boil, scorch and cold proof—it is the toughest glove and mitt leather tanned. It can be had only in H.B.K. mitts and gloves.

Will not crack or harden, always flexible, warm and dry.

Sold by all dealers. See this trade mark ☞ H.B.K.
If your dealer has not got them write us and send his name.
Every pair stamped **"Pinto Shell" Cordovan** by

Hudson Bay Knitting Co.

30 St. George Street, Montreal. 128 Princess Street, Winnipeg.
Makers of Warm Clothing, Mitts, Gloves, Underwear, Sox, Moccasins, etc. 103

MENTAL TENSION.

Hard to Realize the Difficulty of Keeping a Natural Pose.

We never know how active our imaginations can be till we let them out or till they get the better of us for some reason. A major in the army recently admitted that when he went into action for the first time he was so scared that he did not know which way was north, but he had an overwhelming desire to reach it, wherever it was. Yet, after six or eight battles and after being wounded a couple of times, he regarded battles very much as people hereabout regard the evening fight at the Manhattan end of the bridge, says the Brooklyn Eagle.

Cases of wanting to run when bullets fly are by no means difficult to find. But a young soldier in Brooklyn confesses to a more queer experience. His regiment was in camp and had been ordered out for dress parade, as usual. When lined up for inspection, every man as stiff as a ramrod and not a white glove moving, this young man, a lieutenant, began to ask himself: "Suppose I should slip, or anything, to break the quiet? Suppose I should fall?" The idea of falling kept growing in his mind till before the inspection was over and the regiment was allowed to use its feet once more he could hardly keep on his legs and was in a great sweat of agony from the dread of tumbling over and making an exhibition of himself.

People who have never tried it do not realize how hard it is to stand absolutely still and yet appear interested and at ease. Artists' models succeed at it, especially those in Italy, and will hold a pose not too difficult for an hour. Actors, when they group about the man in the center of the stage, who is enjoying all the limelight—and how they hate them for it—are required to keep still, so as not to distract attention from the great man's sayings and motions, and because they must group in such a way as to form a picture and keep it till it can be realized by the eyes in front. But this enforced statuesqueness is hard on the supes. They are not used to it. When they are put under the strain, and when as Roman warriors they must stand at the back without winking while Brutus or Virginius or some other ponderous person discourses himself respecting love or politics, they are in a small torture. One such last season who could no longer abide it to listen to the soliloquy by the head man pitched over on his face and had to be lugged out by the arms to the spoiling of the scene.

Babies Never Get Seasick.

"Babies never get seasick. I have carried thousands of them in my time," said an American line steward, according to the Philadelphia Record, "and in rough weather I have seen their fathers, mothers, brothers and sisters keel over like soldiers before a cannon ball; but not so with the babies. Whether it be rough or smooth at sea, a baby is always an excellent sailor—rosy, jolly and with the appetite of a horse. Do you know the explanation of this singular fact? It is as simple as the fact is strange. Babies don't get seasick because they are accustomed to the rocking of the cradle. That movement is much like the rocking of a ship. A baby aboard ship, therefore, is merely a baby in an unusually big cradle, and there is nothing odd to him about the rocking, for it is what he has been accustomed to all his life."

Capacity of Boxes.

A box 4 inches square and 4 1-5 inches deep will contain one quart; 8 inches long by 4 inches wide and 4 inches deep, one-half gallon; 8 inches long by 8 2-5 inches wide and 4 inches deep, one gallon; 8 inches square and 8 2-5 inches deep, one peck; 16 inches long by 8 2-5 inches wide and 8 inches deep, one-half bushel; 16 inches square and 8 2-5 inches deep, one bushel; 14 inches wide, 23 1-5 inches long and 10 inches deep, one and a half bushels; 24 inches long by 16 inches wide and 14 inches deep, two and a half bushels; 24 inches long by 16 inches wide and 28 inches deep, five bushels.

Rainwater Good if You Like It.

"When a man gets used to drinking rainwater," said a New Orleans man to the Washington Post, "there is no other water in the world that tastes so good. Most of the people in New Orleans have cisterns in their yards which hold an abundant supply of water caught from the clouds, the purest and best in the world, according to my notion. The winter rainfall alone is used, the summer catch not being desirable. It is somewhat curious that in northern latitudes the cistern water does not keep wholesome and sweet as it does in our country."

Had No Time.

The Boy's Father—Madam, let me ask if your daughter knows how to run a house—can cook, for example, and nurse the sick, mend clothes and, in fact, is familiar with all the multifarious details of domesticity?

The Girl's Mother—Certainly not, sir! Why, if she had learned all those things, her education would have been neglected.

A Change.

"Well," said Noah as he hunted for a dry spot on the top of Ararat, "a lot of people came down to the pier to josh us when we started, but I don't see any of them around to poke fun at our home coming."

How It Happened.

Judge—How did you come to club this man so severely?

Officer—Well, yer honor, he kept perfictly shtill an' wudn't dodge a single crack Oi made at him.

He who gives a trifle meanly is meaner than the trifle.

Low Branching Trees.

The advantages of low branching trees are that the fruit hangs so near the ground it is not injured by dropping, the thick shading of the trees prevents the growth of grass and weeds under the branches, the trees are not so liable to be blown over or the limbs broken by hard winds.

Birmingham's Houses.

Birmingham, England, has upward of 40,000 back to back houses and 6,000 courts which are entered by tunnels from the street.

Bark Shirts.

Shirts and hats that are never in need of ironing are worn by the Indians of the interior of Bolivia. They are made of the bark of a tree, which is soaked in water until the fiber is softened and then beaten with stones to make it pliable.

A Maniac's Delusion.

One of the delusions of a lunatic recently sent to an asylum at Ararat, Victoria, was that he was being pursued by a ghost which had come all the way from the Galtee mountains, in Ireland, to haunt him.

Alcohol In Russia.

The Russian ministry of finance monopolizes the alcohol industry, and some idea of the value of the output may be gained by the fact that 6,000,000,000 corks are used annually, one-third of which are produced in government works.

We make Granby Rubbers and Overshoes out of pure *new* rubber. Can as much be said of any other make?

Granby Rubbers

cost the maker more, but they cost the wearer less, for one pair does the work of two pairs of ordinary rubbers.

"Granby Rubbers wear like iron."

THE DURBAR.

INDIA PROCLAIMS EDWARD EMPEROR.

A Multitude Assembles at Delhi to Witness the Impressive Ceremony—Duke of Connaught and Lord Curzon the Central Figures.

Tens of thousands of people from the city of Delhi and from villages far and near, began gathering at daybreak on Jan. 1 on the great plains outside the city. There they waited patiently for the supreme announcement of the durbar that King Edward was Emperor of India. Soon the plain was filled with crowding masses of people, and the brightly colored clothing of the vast throng covered the space with gorgeous hues. The crowd on the plains was composed largely of the common people, but among it could be seen the retainers of the various rajahs who had assembled for the function.

The arrival at the amphitheatre of the Viceroy af India, Lord Curzon of Kedleston, and other dignitaries and the princes, was one of the brilliant episodes of the day. The princes were clad in silks and adorned with jewels and their horses and carriages were brilliant with trappings of gold.

The carriage of the Duke of Connaught, who represents King Edward was escorted by a detachment of cavalry. As the Duke and Duchess were driven around the arena the assemblage gave them an enthusiastic welcome. Amid the acclamations of the people, the duke took his seat at the left of the throne, while the duchess proceeded to a place behind the throne. When the great amphitheatre was filled, and as the hour for the announcement drew near, the multitude within and without awaited expectantly the first act of the proclamation ceremony.

Then the approach of the viceroy was heralded. Proceeded by members of his body guard, clad in white, blue, and gold, and under the command of Major Grimston, Lord Curzon appeared at the entrance of the arena in his carriage. The postilions wore uniforms of scarlet and gold, and the carriage was drawn by four bay horses. The viceroy was escorted by Sir Pertab Fingh.

Alighting from his carriage, Lord Curzon mounted the dais to the throne, which was decorated with golden lions, and around which were placed massive silver footstools. The throne itself was surmounted by a canopy of white and gold. When the viceroy reached the throne the national anthem was played and a salute of twenty-one guns was fired.

When the spectators had resumed their seats after the anthem, there was a flourish of trumpets from the heralds, and Major Maxwell, at the command of the viceroy, read the proclamation opening the durbar. The royal standard was then raised on high and the imperial salute was fired. The massed bands marched by playing, bonfires were started by the troops outside, and it was announced that King Edward was Emperor of India.

There was another flourish of trumpets, and Lord Curzon rose and stood for a moment impassive. Then in impressive tones he delivered a speech and read the message from King Edward. In his address the viceroy announced the coronation of the King, he extolled the loyal Indian people, and prophesied prosperity for the Indian empire. He said also that it had been decided not to exact interest for three years on all loans made or guaranteed by the government of India to the native states in connection with the recent famine. The viceroy announced also the abolition of the Indian staff corps, which has long been an army sinecure.

In the King's message, which was then read by Lord Curzon, His majesty said that the Prince and Princess of Wales would shortly visit India. He regretted his absence from the durbar and sent his greetings to the Indian people.

In conclusion King Edward said: "I renew the assurances of my regard for the liberties of the Indian people, of my respect for their dignities and rights; of my interest in their advancement, and of my devotion to their welfare. These are the supreme aims and objects of my rule, which, under the blessing of Almighty God, will lead to the increasing prosperity of my Indian empire and to the greater happiness of its people."

As the viceroy finished reading the King's words, the assembled people broke into cheers for the King and Emperor. The cheering was taken up by the multitude outside the amphitheatre, and was long sustained.

Then there followed the presentation of Indian princes to the viceroy and the Duke of Connaught, and political officers paid homage to the sovereign. This ended the ceremony and the royal cortege then left the arena, followed by the delegates from foreign powers and the Indian princes.

Mrs. Isaac Schooley, an old lady of the village of Humberstone, Ont., was burned to death on Dec. 31 by the explosion of natural gas. When she was staring a fire she turned on the gas before lighting a match, thus causing the gas to explode and setting fire to her clothes.

Lord Roberts will visit America next September.

The Scotch curlers defeated the Halifax rinks on New Year's day.

Frederick Westgate, a C. P. R. brakeman, was crushed to death at Tyndall, Man., on Jan. 1.

A COMPLICATED CASE

Two Widows Claim the Estate of Wilson Morton

A legal battle for the possession of the estate of Wilson Morton, a victim of the railway accident at Wanstead, is a possibility of the future. Wilson Morton's wife lives at 28 Follis avenue, Toronto, but she is not alone in claiming the property, for Morton was married a second time about a year and a half ago in Hamilton to Miss Morley Mutter.

Morton had two children by his first wife. Edgar is now in the news paper business in Calgary, and is at present in Toronto looking after his father's affairs; and Clara, a young woman who worked in Morton,s former establishment in Toronto

Deceased was a printer, and patentee of a good press. He lived in Chicago lately, and claimed to have got a divorce from his first wife there. Both wives have employed lawyers.

Consolidation of Rural Schools.

The tendency of the times to concentrate energies is not confined to commercial and industrial concerns alone. We are now to have it applied to the public schools. A few years ago the plan of centralizing educational work was tried in a rural district in Ohio. In one township in that state there were nine small schools, in nine separate localities. These were all amalgamated into one district, and a central school was established. The consolidation is said to have worked admirably. The cost has been reduced, the average attendance of scholars has increased and far better results are obtained from an educational point of view. The scholars are taken to the schools in vans. Five teachers now do the work of nine separate schools, and they can do it to far better advantage to the scholars, as the pupils can be graded according to their standing, and each teacher assigned to a separate department. It is not necessary to go into a lengthy argument to prove that the graded school—in charge of a competent principal and four assistants—would be capable of doing far better work than the nine little separate schools under the old system. Another advantage of the centralization plan is that more comfortable and healthful buildings can be secured. The increase in the attendance under the consolidation plan is a very important feature. Several other townships in the same state have since adopted the plan, and an increased attendance has followed in every case, and the plan has given satisfactory results generally. The system affords advantages to the more advanced scholars who would otherwise be obliged to go away from home to continue their studies or give up further work after they had got to the top of the ladder in the little rural school. The increase in attendance under the new plan is found to be made up largely of the younger children who are just beginning their studies and of the more advanced scholars. Under the old plan the little ones were often obliged to stay away from school in bad weather, while the advanced scholars had passed beyond the usefulness of the old school.

Prof. Robertson, Canadian commissioner of agriculture; R. H. Cowley, inspector of schools for the county of Carleton, Ont., and Prof. Lochead of the Ontario Agricultural College, recently visited some of these Ohio schools, and their report is very flattering to the new system. Prof. Robertson sums up some of the advantages of the new system as follows:

It ensures the engagement and retention of some teachers of higher qualifications and longer experience in rural schools.

It permits the time table to be so arranged that teachers can give each class and every pupil in the class more direct help nnd supervision.

It makes it convenient for boys and girls in rural districts to gain a high school education without leaving home.

It leads to the erection of better school buildings and more satisfactory equipment in all the requisites of a good school.

It makes it practical for rural schools to enrich their courses for all pupils by nature study, manual training and household science, as well as by better music, and of advanced pupils by instruction in agriculture, horticulture and allied subjects.

Advices from New Quinea say the natives there have brutally murdered two European prospectors and many other persons. It is feared the drought has caused the natives to resort to cannibalism. Thousands are starving or subsisting on roots. Twenty-five natives were recently killed in a tribal fight.

Dora Meek, who went into a trance like sleep on Sept. 28, as a result of a lover's quarrel, and has never since awakened, is believed to be dying, says a dispatch from Centralia, Ill. Since Sunday she has shown an abnormally high pulse, which the doctors believe is due to exhaustion. There is very little fever and respiration is normal.

The geyser at Eldorado, in the Klondike, is giving the territorial authorities a great deal of trouble and has already done much damage, according to a dispatch received by the steamer City of Seattle. The geyser, which began flowing early in the month, and which the gonernment had succeeded in capping, has broken out again, and is sending an immense volume of water all over the surrounding country. The glacier formed from the geyser extends over an area of three miles, and is increasing in scope.

Dr. Ross, coroner, has returned to Selkirk from Snake Island, where he went a few days ago in connection with the mysterious death of Capt. Prothero, of the tug Daisy, shortly before Christmas. Dr. Ross held an inquest, but no further particulars could be learned.

Two girls, Ethel Rollinson, 20, and Eva Eastwood, 17, were condemned to death at the Liverpool (England) assizes recently. After half an hour of consultation the jury found them guilty of suffocating their mistress, Eliza Marsden, an aged spinster of independent means, at Oriel road, Bootle

An employee of the C. P. R. shops at Montreal named Foster, has been awarded $1,909 for the loss of an eye due to an accident caused by the use of defective rivets.

In a recent fight between Bulgarians and Turkish troops at the village of Drenove, in the Moastir district, a number of the latter were killed or wounded. The Turkish commander was among the killed. The Bulgarians, who were barricaded in a house, also sustained losses, but the survivors escaped.

At a meeting of the Dominion cabinet in Ottawa on Jan. 2 an order-in-council was passed appointing Mr. R. H. Myers, M.P.P., Minnedosa, to be judge of the county court of the province in the place of Judge Prendergast, who was promoted to the supreme court of the Northwest Territories. Justice Maguire, chief justice of the supreme court of the Northwest Territories, has resigned, and it is understood that Hon. A. L. Sifton has been appointed to succeed him as chief justice of the Territories. Mr. Sifton is commissioner of public works in the Haultain government.

One great cause of the reduction of cattle supplies in the United States is said to be the policy lately inaugurated throughout the western range States of replacing the former herds of hardened range cattle with high breeds. While the quality of beef is thus improved the quantity is enormously reduced and prices correspondingly affected. The shortage in hog receipts is due to the partial drought of last year. The receipts of all stockyards in the country this year have fallen off nearly 20 per cent. The alfalfa raising districts promise a larger supply for next year, when the price of pork may be reduced.

Advices from Washington, D. C., of Jan. 3, say: "Two hundred thousand tons of breadstuffs must be imported from wheat producing centers to Australia during the coming season to meet the harvest deficiencies." says United States Consul Golding at Newcastle, in a report to the state department, dated Nov. 11. The crop in New South Wales, he says, will not reach 50 per cent. of the quantity reached last year, and Victoria will require imports of 9,637,929 bushels of wheat to supply her needs. The situation is not so bad in South Australia, though there the crop is less than last year. Fifflour are afloat for New South Wales, teen thousand tons of California but the consul says the price of California flour has risen so greatly that the effect will be to divert a good deal of trade to Canada, which raises hard wheat of a class well suited to mix with California flour.

GOLD AND GRIZZLIES.

Capt. Hansen's Experiences in the Wilds of Cassiar.

Among the arrivals recently in Winnipeg was Captain John C. Hansen, who was on his way back to his old home at Harperville, near Stonewall. Captain Hansen was well known a few years ago as one of the most popular captains on Lake Winnipeg.

When the Klondike fever broke out Captain Hansen went north. He prospected for a time, and finally, not in the Yukon, but in Cassiar, in northern British Columbia, "struck it rich." Three years ago he went back with five companions and many horses. Of the six men only two—Captain Hansen and a Mexican—came back. One was killed by Indians, and three died of scurvy. It took Mr. Hansen nine months to get his location—being overtaken by winter and having to camp in a valley in order to get feed for his horses. The other five members of the party pushed on. They made forty miles, when their horses died for lack of feed, and three of the men succumbed to scurvy. The fourth man—the Mexican—crawled back to Captain Hansen's camp. His sleeves were torn away and worn out by climbing across the frozen snow, and the man was for two weeks after reaching camp demented by exposure.

After his recovery, Captain Hansen for a second time saved his life. He had gone down to fill a camp kettle at the spring when he was attacked by a grizzly.

"People say grizzlies won't attck humans unless they are motested," said Captain Hansen. "That's not so. This fellow came behind my companion and clawed him by the shoulder without any provocation, for the man was not aware of his presence. The man wrenched himself round and struck the brute with the camp kettle. The bear knocked him down and chewed his left arm. I heard the man call "Rifle," and seized my Savage and rushed down to the stream. In the dim light I could hardly distinguish between man and beast, but as soon as possible I shot the bear through the head, killing him instantly. He had such a grip, however, on the Mexican's arm that I was obliged to pry his jaws apart with a stick."

Captain Hansen found his mine next summer and worked there for two seasons. Two of them cleaned up $22,000 the following spring. Near the property he found some magnificent quartz, samples of which he has brought with him, in which the free gold is plainly visible. He also has a splendid collection of nuggets.

The timber wolves killed all his horses last winter, and, consequently, Captain Hansen was unable to bring out all the gold he had secured. He brought out 1,100 ounces—about 75 pounds weight—which, with his axe, his rifle, kettles and grub was all he could carry. He exchanged it at the Seattle assay office, getting $19.50 an ounce for it. It is Mr. Hansen's intention to return to his claim next spring.

"Where is this claim of yours?" asked the reporter.

"I'll never tell you, or anyone else," answered the captain. "You're not the first who has asked me that. In Seattle and Los Angeles they tried all kinds of schemes to find out. Put they didn't. And no Winnipegger will. It's enough to know that here's the stuff"—and he produced a leather bag full of nuggets,—"and that I can show the certificate of assay for 1,100 ounces. And I've got more cached up in Cassiar. I've some friends in Winnipeg that I'm going to let into this thing, for they invested in the original venture five years ago. But we've got a good thing, and will have sense enough to keep it to ourselves."

During his stay in the north Captain Hansen had for months together to depend upon his gun for his livelihood.

In the Hull superior court on Dec. 30, in the case of Mrs. Cook, of Buckingham, against her husband, who was at one time a Catholic priest, for separation as to bed and board, judgment was given in favor of the plaintiff, who, besides securing the act of separation will obtain her share of the property which she held in common with her husband. The defendant husband pleaded that his vows as a priest made his marriage impossible, but the court held that if such was the case he should long ago have gone to the courts, and had his marriage declared null.

A LAND OF PROMISE.

Wonderful Fertility Hidden in Its Deep Rich Soil—Invigorating Climate—The Peace River Country

The reports of the early explorers sent out by the Government indicated that the land in the North Saskatchewan and the Peace and Mackenzie Rivers districts was equally fertile to that farther south. It was also found that with the increase of latitude the altitude was much reduced, resulting in a corresponding modification of climate, so that as far north as Fort Laird, in latitude 61, the summer temperature is said to be just as high as in the country along the Smoky River and Dunvegan, situate five degrees of latitude farther south. In an official report by Prof. John Macoun, M. A., the well-known Canadian botanist, giving the result of his observations during two exploring expeditions which he made with Sir Sandford Fleming in 1872 and in 1875, and which is filed in the records of Parliament, that gentleman divided the Canadian west into five areas, the first three embracing Manitoba, the dry, arid pastures lying between the south Saskatchewan and the boundary, and bounded by the 103rd and 108th meridians, and the prairie and copsewood country immediately surrounding the latter. These combined areas contain 66,000,000 acres in extent, of which 39,000,000 were classed as arable.

The forest country, comprising the fourth area, extended from Lake Winnipeg to the Rocky Mountains, including the Saskatchewan country belown Fort La Corne, the basin of the Upper Churchill and the Athabasca from the forks of the Clearwater westward, and contained 89,000,000 acres, of which 25,000,000 were classed as arable. The Peace River country, comprising all the lands drained by that river east of the Rocky Mountains, was the fifth area, with 16,000,000 acres of arable land. The extent of arable land in the two last named areas aggregates 41,000,000 acres, as compared with 39,000,000 in the three first-named areas.

Of the Peace River and Mackenzie River districts the most favorable reports have been received. Prof. Macoun in 1877 reported the whole country between the mountains and Athabasca and Great Slave Lakes, a gently sloping plain, being under 2,500 feet above sea level, in latitude 55, and less than 400 feet above at the mouth of the Laird, five degrees farther north. He says:

"The whole country seen or heard of throughout the region in question is covered with a deep, rich soil of wonderful fertility, free from boulders, and having very few swamps or marshes. The rainfall seems to be less than that of Ontario, but this is compensated for by copious dews, which keep the grass and herbs growing all summer. The clear skies and long summer days, combined with the lowering of the temperature at night, seem to give astonishing vigor to vegetable growth, and to cause grain and seeds of all kinds to be far more prolific here than farther south."

Speaking of the country between the Little Slave Lake and Smoky River, he says: "The last eight miles have exceeded anything in beauty and fertility I have seen since leaving Edmonton. Far as the eye could reach on the prairie, the view extended many miles, aspen copse interspersed with willows met the eye. The prairie had at one time been covered with trees, as the blackened stumps scattered over the ground plainly showed. On the grassy slopes leading down to the river I found the three flowered Geum (Geum triflora), the Pasque flower (Anemone Patens), and an Oxytropis (Oxyptropis splendens), in full flower in October. Between Dunvegan and St. John's, a distance of 120 miles by land, the trail passes through many miles of beautiful farming country, alternating with spruce, aspen, cypre woods on the divides between the various streams which flow into the Peace River."

Of the country around St. John's, Prof. Macoun says: "The whole country was covered with the most luxuriant vegetation. It would be folly to attempt to depict the appearance of the country, as it was so utterly beyond what I ever saw before that I dare hardly make use of truthful words to portray it. Mr. Selwyn, who made an excursion ten miles to the northwest, reports a very luxuriant vegetation where he was—much greater than he ever saw at Edmonton or anywhere in the Saskatchewan country."

At Fort Vermilion Prof. Macoun was asked by the man in charge of the fort to look at a strange plant which had sprung up in the garden, and found, upon examination, a bed of cucumbers with a number ripe on the vines, and many green ones. Prof. Macoun quotes numerous authorities in support of his enthusiastic views respecting the adaptability of the country to supply the needs of man. Capt. Butler in his "Wild North Land" speaks of the whole hillside at St. John's being blue with anemones as early as April 22, 1873; Sir Alexander Mackenzie records in his journal that anemones were in flower on April 20, 1793, and the Hudson Bay Co.'s records show that the average opening of the river in ten years at St. John's was on April 20. Wheat, barley, oats, potatoes and garden stuff, including pole beans and peas, grow and ripen in the open, and melons started under glass also ripen well.

Prof. Macoun made careful observations and found the flora of the Peace River country much like that of central Ontario, and of the prairie region. Of an average of 200 plants noted at six different points scattered over the whole territory, only seven were observed which showed any sign of boreal climate, and these are found also in Quebec. He concludes his remarks upon his botanical studies with the observation: "The most prominent feature in the whole region was a richness in the soil and rankness of vegetation never seen in Ontario."

One should look beneath the foam on the sea to see that which lies in the depths below.

A Kansas Raleigh.

Nature's gentlemen still are found in Kansas despite the refinements of luxury that big crops have brought. On the Rock island railway, recently, near Marion, according to The Record of that town, two well-dressed, ardent lovers, evidently a newly married couple, amused the other passengers with their cooing. After a while the fair young bride leaned back in her chair and fell asleep. Her companion took advantage of the lull in affectionate demonstrations, and went into the smoker. While he was gone a long, lean, lank, grizzly specimen of humanity came in and sat down in the vacant chair beside the sleeping beauty. Presently the young woman, half asleep, turned and laid her head lovingly on the shoulder of the stranger and put her plump arm around his neck. The green, gawky stranger seemed a trifle surprised at this unexpected familiarity, but made no desperate effort to green, gawky stranger seemed a trifle the convulsed passengers and grinned. Then the hilarity awoke the young woman and, opening her large blue eyes, she saw her mistake. With flushed cheek she stammered her apology. "You needn't 'pologize to me," drawled the stranger. "I don't keer.'

The Australian Wool Trade.

The British Board of Trade Journal observes that in 1795 there were just 105 sheep in Australia, while in 1895 there were 106,000,000. The development of the wool trade in Australia was commenced by a man from Farsley, near Bradford, who had a suit made from the wool brought from that colony. He appeared with great pride before George III. in that suit, and that monarch encouraged him by sending some sheep to Australia from Windsor. At a wool sale in London in 1842 just 225 bales were offered; in 1899 the sales in London amounted to 1,463,000 bales. Forty years ago the Australian growers began to cross the merino sheep with the English Leicester, and now the celebrated "cross-bred" runs the pure merino hard for first place. For the first twenty years the cross-bred had to rely on the wool trade for its existence, but the trade in frozen mutton afterwards sprang up. The cross-bred was an ideal mutton sheep, and this trade has grown from 400 carcasses in 1880 to 7,000,000 carcasses at the present time. In the past 40 years the price of second-year sheep has fallen from 32½ pence to 7¾ pence, and wethers from 28 pence to 4¾ pence. This remarkable drop in prices may be almost directly traced to the increased production of cross-bred wool.

Did the Kaiser Malign the King?

London—The National Review in its January number reproduces a story which appeared in December to the effect that the German emperor made disparaging remarks about the King of Great Britain, the British government and the people while on board an American yacht off the coast of Norway last summer. The North German Gazette, the semi-official organ of the Berlin foreign office, characterized the story as an audacious invention and now the National Review says: "Our readers may rest assured as to the absolute accuracy of the recital, which we only abstain from making more circumstantial because we have no desire to bring in the names of private individuals, which are, however, perfectly familiar in all informed circles both in the United States and Great Britain. However wildly improbable the story may seem to the Anglo-Germanizing journalists of London, it happens to be substantially and literally true, though we have given an exceedingly moderate version of the actual incident. The denial of the North German Gazette is inspired either by ignorance or falsehood."

Australia's Climbing Frogs.

It is said that one of the great enemies of the overland telegraph line in Central Australia is the common green frog. In order to save the insulators from being broken by the lightning they are provided with wire 'droppers' leading round them at a little distance to conduct on to the iron pole in case of need. The frogs climb the poles and find the insulators cool and pleasant to their bodies, and fancy that the 'dropper' is put there to furnish them with a back seat. After a nap they yawn and stretch out a leg until it touches the pole—result, sudden death to the frog, and as the body continues to conduct the current to earth we have a paragraph in the papers to the effect that 'in consequence of an interruption to the lines probably caused by a cyclone disturbance in the interior, we are unable to present our readers with the usual cables from England.'—Argonaut.

Right Hon. Joseph Chamberlain's power of exciting colonial enthusiasm is considered magical. A shrewd comment of one of his critics is that after his remarkable achievement in inducing the people of Natal to shout themselves hoarse over the privilege of taxing themselves for the payment of the £2,000,000 war losses he ought to be sent from end of the empire to the other as a seductive recruiting sergeant and practical tax-gatherer of the imperial federation.

A holiday carouse caused the death of Phileas Pichette and his wife, Marie Pichette, who resided alone in a house at West Templeton, about two miles from Gatineau Point. By the overturning of a lamp their humble home was destroyed and the couple perished in the flames. Pichette visited the village of Gatineau Point and imbibed rather freely. He is said to have taken liquor home with him to celebrate the new year, and it is believed that he and his wife while partaking of it overturned the lamp. Pichette was 62 years of age and his wife was 58.

MICHEL

From Our Own Correspondent.

Miss Gray is the guest of Mrs. Alex. Fraser.

Mrs. R. L. Henderson visited Fernie friends this week.

Mr. C. L. Smith, Elk river, visited Fernie this week on business.

If that railway goes up Elk river, look out for a boom around these parts.

Mr. A. R. Wilson has taken charge of the company's mining interests here.

Mr. Arthur Johns has been confined to his bed with serious illness for the past week.

Mr. Robert Marlowe, who has been serving in South Africa with the volunteers, has returned to Michel.

Mr. Wm. Moon, our popular tonsorial artist, has installed bath tubs in connection with his parlors, making a great convenience for many citizens.

The Maple Leaf Dancing Club have changed their practice nights from Friday to Wednesday. Their regular weekly dance night will also be changed.

Rev. Mr. Stoney, Episcopal clergyman, now holds service in Michel hall every other Sunday evening, and Catholic church service held is regularly every Sunday.

Mr. Robert Gordon, who left for the east last summer, has returned to town and taken a position with the Coal Co again. He will bring his family out as soon as acoommodation can be had.

The new boarding house, being built to take the place of the one burned by the fire of last June, is nearing completion. It will be the best building of its kind in Michel, being plastered throughout.

Mrs. Chas. Simister and daughter, Miss Rhoda, are moving to Morrissey. The loss of their influence in Methodist church circles will be greatly felt, and their many friends in Michel will be sorry to see them go.

Mr. J. Fraser, manager of the Coal Co's. store here, was in Fernie this week in connection with stock taking at the Coal Creek store, and Mr. Wood, manager of the Morrissey store was here in regard to the same business.

Hundreds of pounds of fish are being caught at Elk river bridge by citizens of Michel. This is out of the fishing season, which closes Oct. 15, and the law should be enforced so as to prevent the depletion of our streams.

Harry D. Turner, who left Michel to spend his holidays in the east had a narrow escape from being on the ill-fated express that was wrecked at Wanstead. Mr. Turner tried to catch this train at London and missed it by a few moments.

A family brawl was up for airing before the Fernie police court on Friday. It appears that Louis and Anthony Beltner indulged in too much of the cup that cheers, on New Years eve, with the result that they tried to break down the partition in a double house to get at each other. The case was postponed until Tuesday next, Anthony Beltner pleading guilty, but sentence being deferred.

Mr. Harry Chapman, foreman painter for the Crow's Nest Pass Coal Co., met with a most unfortunate accident Thursday afternoon. While engaged in the paint shop, in reaching for a lantern in the dark, he came in contact with some glass, a sharp corner entering the eye just above the pupil, making a cut about half an inch long. He was taken to the Fernie hospital on Friday morning, and will go to Spokane for treatment. Small hopes are entertained for the saving of the sight of the injured optic.

CRANBROOK ITEMS.

Cranbrook Herald.

The electric light company has installed the new dynamo giving a light capacity now of 1,400.

The new saw mill at Wardner will be ready by next spring. It will be one of the largest in the province.

Died, infant son of Mr. and Mrs. Thos. Boyter, Saturday, Jan. 3rd, 1903. Funeral services were held Sunday.

Harry J Mathison, publisher of the Frank Sentinel, passed through town last Saturday for Spokane, where he was married the first of the week.

A prominent man of Fort Steele recently made this pointed statement: "We have the government offices in the only town in the district where there is no legal business."

Miss Haslam, recently of Fernie, and formerly of Prince Edward Island, will take Miss Carter's place in the public school, Miss Carter having been assigned to the room formerly in charge of Mrs. McKim.

Inspector Schofield, of the C. P. R., returned last week from his holiday trip bringing his bride from Rat Portage, Ont. Mr. and Mrs. Schofield will live in Cranbrook. The Herald extends congratulations.

The mail facilities at Cranbrook now are no better than in early days, when there were only three trains a week. The mail came regularly in those days while now it is held at Medicine Hat for one or two days. A pony mail service will have to be established between Medicine Hat and Cranbrook if the people want their mail regularly.

A miner, named, Wm. Chegwiddin, met with an accident last Friday at the North Star mine, that resulted in the loss of both eyes. While engaged in blasting two shots missed fire and he was picking one of these when it went off, throwing the mud and rock into his face. He was taken to the St. Eugene hospital where the sightless balls were removed. The Mackenzies will give a benefit entertainment at Kimberly in his behalf.

COMMUNICATIONS.

The Editor does not hold himself responsible for the opinions expressed by correspondents.

To the Editor.

SIR,—Your editorial of last week contained a misleading and altogether unanticipated statement regarding the position of affairs in connection with the miners of Coal Creek mines.

It is not always wise, Mr. Editor, to listen to the man on the street, for as you know from past experience that outsiders seem to know more of your business than you know yourselves; and it is certainly so in this case There is not any low rumblings of a strike. Such a thing has not been hinted on in the only place where a strike can be ordered, the union hall.

Don't think, Mr. Editor, that the whole body of miners are ignoramouses. We have no desire te strike, but are using every legitimate means to keep the wheels of progress moving. Nor, Mr. Editor, is the whole body of miners like an electric apparatus set going by a button of as you term them "a few sore heads."

But, remember, if there are a "few sore heads" there must be a cause for the soreness. That lies with ourselves. I am afraid there would not be much hope for this community were it not for the miners, and even the "sore heads." The "sore heads" are those who aro seeking to better their condition and surroundings, and remember so long as the condition of the miners improves, so long will this town improve, but directly the miner becomes forced into such conditions when lying still, taking all and seeking for none, that he becomes a tool in the hands of a master, then this town and any other town existing under such like conditions as ourselves will decline. You don't know "the good times" the miners are having. You may hear of a few who are making a reasonable wage, but you don't seem to hear of the many that are not. Besides, Mr. Editor, even if all the miners were having "the good times" is that any reason for them to lie low and be satisfied. No sir, this is an age of progress. The business man, although he may have done more business this last month than in previous months, does not give up trying to do better. The same with the miner. It certainly seems to be a spirit pervading many business men in this town that he must get all that is possible, but the miner, oh, no, he must bear all and get what he can.

You refer to the article you published last week copied from the magazine. We can afford to pity the writer. There is such a thing as men being paid for that kind of thing and it is only a man whom nobody can trust that will sell himself or his principles for paltry sums of money, or to gain favors. Thanking you for so much space.

EDWIN NEALE,
Sec'y-treas. Gladstone Miners Union.

By order of the Executive Board of Gladstone Miners Union.

Fernie, B.C., Jan. 9, '03.

DEATH OF DUNCAN BUCHANAN.

Another Victim of the Michel Explosion—Past Grand of Oddfellow Lodge.

Duncan Buchanan, aged 57 years, died at the Fernie hospital on Jan. 7th. Deceased is a brother-in-law of J. A. Williams, master mechanic for the Coal Co., and was one of those who were injured in the Michel explosion.

He was brought to the Fernie hospital at the time, suffering from a wound in his leg below the knee, caused by a piece of flying metal from the stove. The wound was dressed and as it did not appear to be serious he went back to Michel. After about two weeks, finding that the injured leg was not healing as it should, Dr. McSorley sent his patient back to the Fernie hospital. Since then the patient gradually sank in strength though the wound slowly improved and the day before he died was healed over. It is the opinion of the medical men that the terrific shock affected his nervous system and brain and resulted in his death.

Mr. Buchanan was the Past Grand Master of Newcastle, Wash., I. O. O. F., and the Fernie lodge held a regular burial service in his honor, in the lodge room last evening, after which they marched with the body to the depot. The body left on this morning's train for Seattle, where his widow and four children live.

A GALLERY OF PICTURES.

The special set of ten pictures which the Free Press, Winnipeg, have been giving to subscribers to their Weekly, has been withdrawn. Hereafter subscribers to the Weekly Free Press will receive twelve pictures on receipt of their order, and one additional every month during 1903. We have received from the Free Press the special twelve painting reproductions. They are beauties, and well worthy of a place in any home. The pictures have evidently been selected with great care and cover, a pleasing variety of subjects.

TOMMY AND GRANDPA.

GRANDPA lay sleeping serenely
Where the shade of the maples was cast;
The hammock was swayed by the zephyrs
That kissed his high brow as they passed.
Perhaps he was dreaming of angels
As Tommy played near him out there,
Chasing butterflies out of the flowers
And tossing his curls in the air.

The hose was attached to the hydrant,
With a full head of water turned on,
And the nozzle lay harmless, unnoticed,
Where the grass had grown brown on the lawn.
Dear grandpa, with one leg hung over
The side of the hammock, still swayed,
And the leaves fluttered gayly above him.
It was eighty or so in the shade.

A smile was on grandpa's glad features
When Tommy discovered the hose.
Perhaps he was dreaming of cherubs
Or beautiful fairies, who knows?
But the smile disappeared when sweet Tommy,
Forgetting that grandpa was there,
Stood carelessly letting the water
Squirt forty feet up in the air.

With a yell like a grown up Comanche
Dear grandpa attempted to rise;
The water streamed under his collar
And into his ears and his eyes!
With a foot tangled up in the hammock
He leaped like a trout on the hook
And turned three flipflaps without stopping
To pick out the course that he took.

• • • • • • •

A child who had stains on his features,
Whose eyes were still tearful and red,
Lay sobbing, with sad recollections,
And tossing alone in his bed.
His breast was o'erburdened with sorrow;
In his heart and elsewhere he was sore,
And he murmured, "I don't want to never
Go visitin' grandpa no more!'

A Practical Difficulty.

He—I'd go to the end of the world with you, darling.

She—Yes, but have you got the car fare?

Pertinent Advice.

"Doctor," she said, "did you ever lose a patient?"

"Lots of them," he replied gruffly.

"Well, I'm afraid I shouldn't be at all satisfied with you," she explained. "I must have so much confidence in my doctor, you know, or I will be perfectly miserable, especially about the baby."

"You'd better try young Dr. Jinks in the next block," advised the old practitioner. "He's never lost a patient."

"Are you sure?"

"Positive He's never had one to lose."

KOOTENAY CENTRAL RAILWAY.

Survey Parties are Making Trial Lines Through the District.

A survey party consisting of J. T. Laidlaw, C. E., and C. H. Pollen, were out for the past two weeks making a preliminary survey of the projected railway which will run north and south through the Kootenay and upper Columbia valleys. The route from a point near Jaffray to Fort Steele along the foothills is comparatively easy to build, and once started will be completed inside of two months. From Fort Steele to Golden, the route was found to be most favorable to railway construction, in fact, no engineering difficulties were discovered along the proposed route. The distance from a point where connections can be made with the Crow's Nest branch and the British Columbia Southern railway to Fort Steele is about 30 miles. From Fort Steele to Golden about 160 miles.

In about two weeks T. T. McVittie, P. L. S., with a party of surveyors will run a trial line from Jaffray north to Fort Steele, thence north to Sheep creek, and possibly to Windermere if not impeded by unfavorable weather.

NOTICE.

The Crows Nest Pass Electric Light and Power Co., Limited, after this date will not make wire connections to any premises which have been wired by any party or parties not its accredited representative, and any consumer adding additional lights without the consent of the company, will not only be liable for damages but will have the entire service discontinued.

Any person or persons making connections to, or tampering with, the Company's water mains will be prosecuted, and their water service discontinued.

MACLEOD DEFEATED.

FERNIE SCORES A MAGNIFICENT VICTORY.

Score 12--1. A Fast Game at the Prairie Town.

The defeat of the Fernie Hockey team at Medicine Hat on Friday last was more than wiped out by the brilliant success they scored at Macleod on Saturday. The boys were feeling rather sore over their first defeat and determined to put forth every effort to wipe out the stain and this they certainly did, defeating their opponents by the handsome score of 12-1.

The game was played in the evening and the small rink was crowded with enthusiastic supporters of the home team. The match was called for 9.30 and the teams lined up as folllows

MACLEOD		FERNIE
Forrie	Goal	Miller
Grady	Point	Dowsley
Andrews	Cover Point	Kastner
Murphy	Forwards	Zeigler
Sylvester		Fair
Hamilton		Lafortune

Owing to the association regulation only six men were played on the teams.

The play was fast from the start. The Macleod boys were much heavier than the Fernie lads and seemed to depend upon their weight to win them the victory. Time and again they would hurl their weight against their smaller opponents, bnt speed and a thorough knowledge of the game soon began to tell and six minutes after the start Zeigler scored the first goal for Fernie. This seemed to start the ball going, for half a minute later he again did the same trick. Then Fair got in a brilliant rush and scored again. The Macleod team seemed to recover themselves at this point and kept the Fernie boys on the move, but Kastner, Dowsley and Miller put up a stonewall defence and effectually prevented them from scoring. Ten minutes elapsed before this supreme effort on the part of the Macleod team was defeated and Fernie again began to score, Fair, Lafortune, Kastner and Zeigler each planted the puck in quich succession in the enemy's net.

The latter part of the game was but a repetition of the first, with the exception that Macleod succeeded in scoring once. This was mainly the work of Hamilton, the star player of the Macleod team. Fair scored twice and Lafortune, Kastner and Zeigler each put one in, making the score 12-1 in favor of the visitors.

Mr. E. Wriglesworth acted as referee and his decisions were fair and impartial. The best of feeling prevailed throughout the match and the Macleod team entertained the visitors at one of the restaurants until the hour of their departure.

HOCKEY MATCH TONIGHT.

Medicine Hat Record—Important changes on Home Team—A Good Game Anticipated.

The game at our rink tonight between the victorious Medicine Hat team and the local stars will be the great game of the season. The Prairie boys have had a victorious tour westward defeating every team in turn between their home and Fernie, and now at the end of their journey they have run up against an aggregation which will test the quality of their steel.

The visiting team have five straight victories to their credit, having defeated Macleod and Fernie on their own ice and adding the other three on their way up as follows: At Macleod the game was given to the Hat boys by default. The game the following day at Pincher Creek was a close contest and resulted in the defeat of the local team by a score of 3 to 2. The Frank team met an overwhelming defeat on Thursday, the 15th, the railroad boys winning to the tune of 9--1.

The teams that will play this evening are not the same as those that fought it out last Friday, for while no changes have been made on the visitors' side, the Fernie aggregation has been greatly strengthened by the addition of two crack players, Kenny and Sturdy. The teams will line up tonight as follows:

MEDICINE HAT		FERNIE
Walton	Goal	Miller
Krauss	Point	Dowsley
Turnbull	Cover point	Kastner
Wilson	Rover	Kenny
Turnbull	Forwards	Sturdy
Porter		Fair
Adsit		Lafortune

C. H. Prest, of Cranbrook, will referee the game.

The starting whistle will blow at 9:30. Every possible provision has been made to accomodate the crowd by building platforms, seats and galleries.

The lighting facilities of the rink has been greatly improved. Two new gasoline lamps each of 600 candle power have been secured by Mr. Digby, and these together with the regular oil lamps ought to furnish good light all over the ice.

The score card to date shows as follows:

Club	Won	Lost	To play
Fernie	1	1	6
Frank	1	2	5
Pincher Creek	1	1	6
Macleod	0	4	4
Medicine Hat	5	0	3

THE GAME AT MEDICINE HAT.

The report of last Friday's game at Medicine Hat reached this office too late for publication in our last issue. The Medicine Hat team lined up as follows:—Goal, Walton; point, Krauss; cover point, Turnbull; rover, Wilson: forwards, Turnbull, Proctor and Adsit.

The score of 4-0 does not give an adequate idea of the relative merits of the opposing teams as we will endeavor to prove, and which we confidently expect the game here this evening to further demonstrate. The game was late in starting and the short afternoon had darkened into the dusk of the evening before the game was over The rink at one end where the gallery is situated was very dark under most favorable conditions and it was the luck of the visitors to have that end during the last half. The defence complained that it was impossible to see the puck by keeping their regular positions and point and cover point found it best under existing conditions to play near centre. The ice was very keen, being somewhat better than what our boys have been accustomed to and the unusual width of the rink, 60 feet, also is a factor which gave the home boys a decided gain.

The boys arrived home on Sunday morning much pleased with their trip and more confident than ever of landing the Henderson trophy as well as retaining the one now in their possession.

POLICE COURT.

J. Ritchie, of Elko, was given four months for stealing a box of cigars from Elk Hotel. The proprietor, Mr. Hoggarth, stated that he had missed cigars for some time and this box was marked to catch the thief, with the result that the accused is now in the toils.

J. Kenny had Harry Sheppard up for assaulting him. It appears that the pair were drunk, and the former used abusive language towards Sheppard who according to the methods in vogue across the line, from where he recently came, at once undertook to punish him summarily; with the result that Kenny appeared in court in a very battered condition. Sheppard paid $15 and costs for the privilege he enjoyed.

The Beltner assault case which occurred at Michel last week came up for airing yesterday before Stipendiary Magistrate Armstrong. It appears that Louis and Anthony Beltner, two brothers, lived as neighbors in a double house. In a drunken row the wall separating them received some damage and Anthony was charged with being the cause. A counter charge was brought against Louis of threatening to shoot Anthony. Many witnesses were summoned by both sides and much contradictory evidence was given. The chief prosecuting witness was absent however. An effort was also made to prove that the defendent had used abusive language towards the brother's wife, but he got the benefit of the doubt in both cases, and the case was dismissed.

TO-DAY'S DESPATCHES.

Montreal, Jan. 16.—Prominent Montrealers strongly favor Canada falling in line with the U. S. on removing the duty on Bituminous coal. Sir Thos. Shaughnessy says that it would save the C. P. R. $400,000 per year and that at the same time he did not believe Nova Scotian miners could lose a dollar. Looking at the question in its broadest light Sir Thomas did not think that as a company they had any right to pick and choose such items of the tariff as would be to their own advantage. They were bound to consider the question as bearing upon the Dominion and its industries. Proprietors of the Nova Scotia mines and manufacturers were better able to judge of the effect than he was, but he still believed it would open a large new field for Nova Scotia in coal. F. D. Monk believed the duty should be removed at least for the present.

Winnipeg, Man., Jan. 16.—John A. Graham, local treasurer of the C. P. R., died at his residence here this evening after a few weeks' illness. Deceased was one of the pioneer railway men of the west. His sister is the wife of C. Drinkwater, sec'y of the C. P. R. Company, Montreal.

HUNTING A CANDIDATE

A TRIP THROUGH WEST YALE.

Prior and McInnes Making Frantic Efforts. A "Jollying" Campaign is in Progress.

Savona, Jan. 12.—This usual quiet and peaceful spot was thrown into a condition approaching a riot on Friday evening by the unexpected arrival by team from Ashcroft of Premier Prior and his colleague, the provincial secretary, Hon. W. W. B. McInnes.

Nobody appeared to know why they had come, nor did they say what had brought them. Perhaps the renown of the place as a fishing ground may have attracted them, but they had poor fishing and caught absolutely nothing, not even suckers,

They possessed one redeeming feature of the veteran fisherman, an insatiable thirst, and a much appreciated readiness to set 'em up for the boys. The "boys" were much in evidence and they kept up a lively time until No 1 came in, when the premier and his colleague boarded the train and set off for Spences Bridge.

While here, Colonel Prior stated that he did not think Mr. Dewdney would be a candidate for West Yale, and he did not have any doubt as to the result of the election nor of having a majority in the house. As for the bridge at Savona, why yes, three bridges if you like.

From 8.30 to 1.30 the hotel was a scene of revelry, and many were the heavy heads next morning. The gallant colonel and his right bower did not remain long at Spences Bridge, but took a run to lower Nicola to see the boys there "for they are jolly good fellows." That is the campaign.

Every little town and hamlet in the riding is being visited by the two ministers, and what a glib tongue cannot do a "jollying" may accomplish.

At any rate that is the programme; but the feeling here is that Semlin will be hard to beat, do what they will.

Nicola Lake, Jan. 12.--Premier Prior and provincial secretary McInnes arrived here Saturday night from Coultees and Spences Bridge.

They interviewed John Clapperton and several others and were apparently making frantic efforts to induce a Nicola man to run as government candidate. H. D. Green Armytage was asked to run, but declined. They had been at Ashcroft, at Savonas, and although they had not succeeded in finding a suitable man, Prior said that he had been assured there that if a good man from Nicola would take the field in the government's interest, they would support him. He further stated that at Savona they had not met a single opponent of the government, and that at lower Nicola the feeling was unanimously in favor of the government.

As for the West Yale writ, he had never intended to cancel it. The election would be in February and the house would assemble in March.

"When the house meets," said the premier, "the government will have a majority of five." He did not know who the government candidate would be, but it would not be Dewdney. He would not be asked to run, and there was absolutely nothing in the report that he was the government's choice.

There may be some truth in the statement that lower Nicola and Coutlees may support the government, for it is well known here that they have no particular use for Semlin and will not support him. —Nelson News.

IMPORTANT LUMBER DEAL.

R. M. Fullerton Buys an Interest In The Hayes Lumber Co.

R. M. Fullerton, of Brantford, Ont., has purchased an interest in the Hayes Lumber Company, of Elk Mouth. The price paid is $8,000. Mr. Fullerton is now in Nelson on business in connection with the deal. He leaves for his home shortly to wind up his affairs there after which, in about two months, he will move with his family to Elk Mouth where they will make their home. Mr. Fullerton will take an active interest in the business, which will go under the old name of The Hayes Lumber Company.

This lumber business is in a most promising position. The standing timber is estimated at thirty million feet. The firm intend to overhaul the machinery and increase the capacity of the plant in the spring. At the present time the men are in all the woods getting out logs. It is expected that three million feet of logs will be taken out during the winter. The Great Northern is going to build a depot close to the mill, and a post office will be opened at this point in the near future. The railway has a siding to the mill and most of the lumber is sent to the Territories via Morrissey.

ADDITIONAL LOCALS.

N. C. Douglas went to Morrissey on Monday.

A. J. Mott was in Morrissey on Wednesday.

J. Kennedy went down to Cranbrook on Thursday.

Try Elliott's home-made bread. If once used always used.

Dr. Barber went to Morrissey on Monday on professional business.

For Sale.—Heintzmaen, Bell, Stanley and Karn pianos at Watson's. x

Mr. and Mrs. C. M. Henretta returned yesterday from a two months trip to Pennsylvannia.

Mrs. J. A. Willlams accompanied the body of her brother, Duncan Buchanan, to Seattle last Saturday.

A son of J. W. Morrison, a lad of 5 years, died at the mines yesterday of diphtheria. The funeral took place this morning.

Mott Son & Co are installing the new machinery for their mill. The new plant will be in operation about the 1st of March.

Mr. Harry Jarman gave a very enjoyable birthday party to his gentleman friends on Tuesday evening at the residence of Mr. E. Neale.

A. C. Cowan, who is engaged in the photo enlarging business, went to Cranbrook on Thursday, where he intends remaining for a month.

W. H. Dorman, of Vancouver, post office Inspector British Columbia, was in Fernie on Tuesday in his official capacity and inspected the Fernie office.

The Quadrille club held its regular dance on Thursday evening. Though not largely attended a most enjoyable time is reported from those who were there.

The Victoria hockey club, of Winnipeg, will play for the Stanley Cup against the Montreal club in the latter city on Jan. 29, 31 and Feb. 2. Mr. Percy Quinn, of the Shamrock club, will referee the games.

Mrs. Keegan is disposing of her millinery business in the Free Press block. She is leaving for the coast next week and intends in a short time to open a similar business in New Westminster, where she has friends.

A young man, Soloman Ivy by name, was brought up from Morrissey to the Fernie hospital suffering from a broken arm. It appears that the accident occurred while the unfortunate man was at work coupling cars.

Dr. W. O. Ross was elected mayor of Nelson over W. W. Beer by a majority of 179. The aldermen elected are J. Hamilton, H. Bell, Harold Selous, J. A. Kirkpatrick, J. A. Irving and C. Morrison.

The ladies interested in the Hospital Aid Sodiety held a meeting on Tuesday evening and elected the following officers: Pres., Mrs. Mott; Vice. Pres., Mrs. Herchmer; Sec. Treas., Mrs. Trites. The Society purpose having a ball on St. Valentine's Eve.

Mr. D. McNicol, general manager of the Canadian Pacific Railway Co., accompanied by the general superintendent, G. W. Leonard and the district superintendent, R. R. Jamieson, came to Fernie on their regular tour of inspection on Thursday evening and stayed over until Friday morning. They are travelling in a special train.

Editor Gonzales of "The State," Columbia, D. C., was mortally wounded by a pistol shot fired by Lieutenant-Governor Tillman on Jan. 15th The trouble between the two men first grew out of a fist tight between United States Senator Tillman and Senator McLaurin on the floor of the United States senate. Tillman is under arrest.

Moses Jackson, of Nelson, met with a fatal accident at the Venus mine on Tuesday night. While working in a stope a mass of rock fell on him crushing him badly around the hips. The unfortunate man was immediately released but he was hurt so badly that he died before he could be removed from the tunnel The deceased leaves a wife and five small children of whom he was the sole support.

John Kennedy who worked for the C. P. R. here for some time and who served on the Strathcona Horse met with a most unfortunate accident on Dec. 31st, at Crookston, Minnesota, where he was employed as yard master. While engaged at his work he fell between two moving cars. One car and the trucks of another passed over him when he caught hold of an iron rod and was dragged half a mile before being extricated. Mr. Kennedy's left leg was taken off below the knee and two toes of his right foot were amputated.

GOVERNMENT AGENT.

LESTOCK FORBES RECEIVES THE APPOINTMENT.

Letter From Premier Prior in Answer to a Largely Signed Petition.

The following letter in answer to a strong petition from the citizens of Fernie is self-explanatory. Mr. Forbes when asked about the appointment, said he had received no official notice of the appointment.

Victoria, January 3, 1903.

H. W. Herchmer, Esq.,
Barrister at Law,
Fernie, B. C.

Dear Sir:—Your letter of the 6th ult. was duly received. I am glad to be able to tell you that the government has decided to appoint Mr. Lestock Forbes as Government Agent, etc., for the Fernie district. As both political parties in Fernie, as well as the principal merchants and the officers of the Coal Company, all seem to be with one accord in favor of Mr. Forbes, I have do doubt the appointment will be a popular one, and that Mr. Forbes will prove that he is worthy of the trust reposed in him.

Yours Very Truly,
E. J. PRIOR,
Premier.

Stanley Mills & Co's large departmental store, Hamilton was burned on the 9th. The total loss was $125,000. Insurance $85,000.

A New Bank.

A largely signed petition is being circulated about the town asking the Bank of Montreal to open up a branch in Fernie.

County Court at Fernie.

The Board of Trade has received a communication from Mr. J. F. Armstrong stating that a regular sitting of the County Court will be held in Fernie on Feo. 26th, Judge Forin presiding. This is the first County Court ever held here.

Hockey in Cranbrook.

The Cranbrook Hockey team was organized last Saturday evening. A. L. McDermot is the secretary and manager and C. H. Prest was re-elected captain. The club have been making efforts to get the Medicine Hat team down from Fernie to play an exhibition game on Monday the 19th.

Marysville Smelter.

The Cranbrook Herald says that the Marysville smelter will be pushed to completion in the spring. The cost to complete the plant will be about $40,000 and it is thought that $100,000 will be raised, leaving $60,000 for a working capital. It is thought that the smelter will have a capacity of 150 tons per day.

Repairing Building.

The large warehouse of Frank Lebel which was so badly wrecked by the weight of the snow causing it to collapse is being repaired. W. J. Broley has the contract and the structure is assuming its old shape with surprising rapidity. Much of the studding and rafters were found to be broken and useless but the walls have been raised intact and without much trouble. The roof has been built over again. The building is being well braced with cross joists and upright supports and it is safe to say that a like occurrence will not happen to this building again.

Another Brick-making Plant

It appears to be certain that Lethbridge is to have another large brick making plant this year, and there should be no delay in building operations on account of scarcity of brick when this gets into working shape. The plant will be operated by steam power, and the season's output is expected to reach 4,000,000. The capital is being put up by local men, who expect to supply brick in town at $8 per 1000. With plenty of brick at this price we may expect to see it coming into more general use in the erection of all kinds of buildings.

Mines School.

Miss A. Kidwell consented to take charge of the school at the mines temporarily, until the Department at Victorian could supply a regular teacher and on Monday of this week the school was re-opened in the new building and under her charge. The roll is considerably increased owing to the improved facilities, the new room being lasge, well lighted, well heated, furnished with comfortable seats and with plenty of black board space, and in all of these particulars much surpassing the room formerly used. Miss Kidwell is staying at the mines at the home of Mr. Lightly.

ANOTHER WRECK.

NORWEGIAN BARK ASHORE ON PACIFIC COAST

Of the Twenty Members of the Crew Only Two Are Saved By Being Washed Ashore—A Canadian Tug Founders During a Gale.

A dispatch from Port Townsend, Wash., says news of the wreck of the Norwegian bark Prince Arthur and the death by drowning of 18 of the crew has been received.

The Prince Arthur was bound from Valparaiso for British Columbia to load lumber. On the night of Jan. 2 the vessel ran into the breakers and was soon hard and fast on the rocky shore. The scene of the disaster is about two miles south of Ozette on the Washington coast, 15 miles from Cape Flattery.

Of the 20 members of the Prince Arthur's crew only two were saved, and they were nearly exhausted when they were washed ashore.

The bodies of the 18 drowned seamen are being buried by ranchers and Indians living near the scene of the disaster.

Victoria—On the night of December 28 the tug Vladimir, belonging to the logging company operating at San Juan, disappeared from her moorings during a heavy southwest storm, and it was thought she had foundered. The steamer Queen City, which arrived here Jan. 6, reports that the wreck of the tug has been found on the rocks, two miles this side of Carmanah. There was no one on board the tug when she disappeared. She is a total wreck.

Consumption is Curable.

English expert medical opinion as expressed by the three winners of the prizes offered by King Edward for essays on tuberculosis, which have just been made public, holds that consumption is curable. Drs. Latham, Wethered and Morland, the prize-winners, agree that scientifically constructed sanitaria along with rigid adherence to sound principles in diet and exercise offer good hope to tuberculosis sufferers unless too far gone.

It is recommend that the sanitaria be dust-proof and germ-proof, and almost like the open air itself. The food prescribed is the most nourishing and most digestible. Just enough exercise must be taken to stimulate the physical organism without fatiguing it.

Dr. Wethered stated to a correspondent that the fact that consumption is frequently cured has been established by post-mortems conducted in connection with the hospitals of London. "We find," he said, "10 per cent. of the patients who die from accidents and diseases other than tuberculosis showing evidence of having formerly suffered from tuberculous affection."

Favors Compulsory Arbitration.

In his address to the Pennsylvania general assembly on Jan. 6, Gov. Stone devoted considerable space to the recent anthracite coal strike and urged the passage of a law to prevent future labor disturbance as follows:

"In my judgment a compulsory arbitration could and should be passed for the settlement of difficulties between employer and employees. Such a law is entirely constitutional and feasible, looking upon strikes as injurious to the public, harmful to society and destructive to life and property.

"They generally are settled after all the harm has been done. Why should they not be settled before the harm is done, and before large losses occur to life and property. We should recognize strikes as existing evils, and as dangerous to the public good, and while mindful of the rights of both employer and employe, adjust them from a higher standpoint, namely, for the good of society, the preservation of the public peace, and of life and property."

The governor recommends that some additional legislation be passed for the protection of children, who he says are too young to work in factories, but are employed in coal breakers and slate and coal quarries.

In his nightshirt, and with arms extended, a man was found wandering in the cemetery at Ballarat, Australia. When seized by a Mr. Montgomery, he was fast asleep. He was under the delusion that he was a tombstone. A cab was called, and the somnambulist conveyed to the hospital.

A dispatch from New York says: Levi Eicher, aged 95 years, and his wife, residing in Springfield township, have been tortured by masked thieves, until they told where their money was hidden. The robbers held a lighted lamp to Mrs. Eicher's feet and burned them until the flesh fell off before she would consent to show them where the strong box, containing $225 in bills was hidden.

London—There was considerable alarm at the Chapel Royal, St. James' Palace on the morning of Jan. 6, owing to the sudden outbreak of fire in the Christmas decorations above the altar. The chapel was crowded, the occasion being the annual Epiphany service, at which the King's offering of frankincense and myrrh is made. The draught carried the flame of a candle to the decorations, but before the blaze had made much headway the officiating clergyman mounted the altar and tore down the burning holly.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

There is an increase of 59 per cent. in British emigration to Canada.

Argentine cattle may be placed on the same footing as Canadians in the British market.

The Boer leaders attended a garden party given in honor o the colonial secretary.

The Ogilvie Mills company will erect a 500,000 bushel elevator and a mill at Fort William.

The British war office is calling for tenders for meat supplies, and wishes contracts kept within the empire.

During the past year over 2000 homestead entries were made at Yorkton.

A case of supposed murder has been reported from the district north of Tuelon, Man.

The C. P. R. has issued an interesting statement respecting the elevator capacity of the west, which is 30,045,300 bushels.

Mrs. David Patterson, an elderly lady of Chesley, Ont., is dead from burns received in a vapor bath.

Alfred Kennedy, a lad employed in Davis' packing establishment at Toronto, threw a knife at another lad Willie Glass, stabbing him in the back, and the latter is now in a serious condition.

John R. Costigan, K. C., one of the best known lawyers in the West, dropped dead at his home in Calgary on Jan. 6. Death came without any warning.

In order to meet the increased cost of operation the Canadian railways have decided to follow the action of American railways and raise rates from manufacturing points and the seaboard. The increase on iron commodities will be 10 per cent.

Arrangements have been made by the Great Western railway in England for an experimental adoption of one of the celebrated four cylinder compound locomotives used by the Northern railway of France. These compound engines are far ahead of the best types of English design.

A report comes from Halifax that Marconi is to marry Miss Nina McGillivray, the charming and accomplished daughter of Dr. McGillivray, of Sydney.

Three persons lost their lives, and a fourth was fatally injured, in a fire at the Hotel Summerset, Chicago, on Jan. 6. Three of the victims, Mrs. E. T. Perry, aged 35, and her two daughters, 8 and 9 years old, respectively, were burned or suffocated to death in their room on the fourth floor.

David Thompson, one of the best known prospectors in the Black Hills over which country he had hunted gold for seventeen years, struck a ledge of great richness, and after ten minutes of demonstrations of delight fell dead, says a dispatch from Rouboix, S.D. An examination made later by physicians showed a blood vessel in the brain to have been ruptured.

The case of Mrs. Sangai has been causing widespread controversy throughout Australia. For the murder of her husband, under the most atrocious circumstances, she and her paramour Tisler were condemned to death in September last. The man was duly hanged in the following month, but the female, upon the examination of two medical men, was declared to be about to become a mother, and her execution was postponed until her child should be born. Up to the receipt of the latest mails the shadow of the scaffold lay on the wretched woman.

Great Britain has vigorously protested to the Turkish government against the permission greanted in September last to four unarmed Russian torpedo boat destroyers to pass through the Dardanelles into the Black sea, under the commercial flag of Russia. These vessels were about to start on the proposed trip. The British note says the passage of the Dardanelles by the torpedo boat destroyers would be a violation of the existing international treaties, and that if Russian warships are thus allowed to use the Dardanelles, Great Britain will reserve the right to demand similar privileges. The protest has caused irritation in Russian circles and concern on the part of Turkish authorities, who fear that other powers will follow the example of Great Britain.

A Pig With Eight Legs.

A pig with eight legs is a sight that Mr. G. G. Cattenach, the well known lacrosse player, promises to present, says the Free Press. He did not raise it himself, but secured it himself, but secured it from Mr. McLeod's farm at Selkirk. The young porker is a healthy specimen of his class, and has the advantage over all other pigs by his marvellous collection of limbs. He came into the world in Manitoba with eight legs, and is thriving so well that it looks as if he will remaiin in the world. If he does, Mr. Cattenach will put him on exhibition and has already been offered $200 to sell, but up to date has refused to do so. As a commercial commodity the young porker presents some startling possibilities, not probably as a ham producer, as the legs branch out like tripods from the knees. A breed of eight-footed hogs, however, would be a factor in the market for consumers of pigs' trotters, and it may be that the prospective purchaser of Mr. Cattenach's find has this in view. The locomotive properties of the freak pig are extraordinary, and he covers the ground with a motion like a centipede.

FATAL COLLISION.

COLLISION ON A PENNSYLVANIA RAILWAY.

The Uninjured Stand Helplessly By and See Human Beings Burned Alive—Neglect of a Brakeman Causes the Awful Disaster.

A dispatch from Pittsburg, Pa., dated Jan. 7, says: As a result of a collsion between a passenger train and the rear end of a freight train on the Monongahela division of the Pennsylvania railroad tonight at Cochrane station, just above Duquesne, seven men are dead, one is dying and five others are injured.

The passenger train in the wreck was the West Elizabeth accommodation, which left Pittsburg at 3.20. It was on time and had a clear track according to the signals displayed.

At the siding at Cochrane, it ran into the rear car of an extra freight, which had taken the switch, but failed to clear the main line.

The officials of the road attribute the disaster to the failure of Patrick Quinn, the rear brakeman of the freight, to see that his train had fully cleared.

When the passenger train came along, the caboose of the freight over-lapped the track enough to catch the tender of the passenger engine, which was forced back upon the combination baggage and smoking car with terrific force.

JAMMED AND ROASTED.

The thirteen passengers were jammed against the rear end of the car into almost a solid mass. Three of the victims were apparently killed outright, two of the other four were literally roasted to death, and the two who died on the road to the hospital were so badly burned that recognition was impossible.

Almost immediately after the impact, fire from the stove in the smoker communicated to the wreckage, and the imprisoned victims were tortured beyond description.

All the victims were badly burned.

Conductor Cook was found unconscious under the charred body of Baggageman Stroud. He is so badly hurt that he cannot recover.

When the passenger engine struck the rear end of the last car of the freight the beam of the catcher knocked the cylinder on the left side off, and then dug in one end of the tank of the tender and shoved it from the trucks. This tank was driven back through the combination baggage and smoker. The tank cleaved through the shell of the combination car like a sheath knife. The roof fell after the tank had crushed the sides.

In the front end of the car was a stove, which was shoved back among the confused jumble. Any fire that might have been caused by the shock could easily have been extinguished without trouble in a short time, but when the tank came through it brought with it a fifteen gallon can of gasoline oil, which was instantly ignited by the coals of the stove fire.

There was a little puff of an explosion, and the wreckage commenced to burn furiously.

The most singular part of the whole accident was the fact that not one of th? other cars of the train, nor numerous other passengers occupying them, were injured in the slightest. Death and terror remained alone for the front car.

When the fire began to burn one man was discovered that his body half-extended out of the rear window of the car. His feet were pinned by a piece of wood in the car. He was alive and thoroughly conscious of his peril. He was a foreigner, and in broken English yelled for sone one to release him. "Chop her," he would shout, pointing back into the car, at something which held him. Heroic efforts were made to release him, but finally the poor fellow had to be deserted, and he slowly burned to death.

One of the other horrors of the wreck was the body of Baggagemaster Stroud, standing upright against the window which opens on the rear platform of the car. He was then in an erect posture. His head was above the top of the window so that his features could not be seen, but he was identified by a ring he wore on the hand which protruded through the window, and by his badge.

The Victoria Terminal and Ferry system, which has an agreement with the city of Victoria to establish a ferry system between Sydney and Liverpool via the Fraser, ultimately connecting by rail through the Delta district with the Great Northern system, will probably purchase the steamer Victorian, which has tied up at Tacoma since she retired from the Alaskan trade. Officers of the company are now at Tacoma for that purpose. The arrangement is to take the machinery of the Victorian and place it in a barge now at Portland built for rock carrying, and being 180 feet long, with 650 net tonnage. It will be made into a car ferry and passenger steamer to operate between Sydney and Liverpool, with a speed of sixteen miles an hour.

One of the largest families in St. Louis, Missouri—that of Arthur W. Becker—is joyously celebrating the birth of a baby girl. This is the first time in 140 years that a girl has been born in the family. The grandfather, J. Becker, had five boys, and his father, Jacob Becker, four male heirs. The father of Jacob Becker had no sisters and no daughters, and none of his sons had any daughters.

Smith is naturally the dominating name in the new London directory. There are some 2,000 plain Smiths. There are also, surprising as it may seem, seventeen other ways of spelling the name, varying from Smithyes to Schmidt. This, too, takes no account of such obvious relatives as Smithson, Smithers, etc.

A revolution is threatened in Honduras.

The new Masonic temple at Grand Forks, N. D., was destroyed by fire on Jan 7.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

Shilson's store at Snowflake, Man., was destroyed by fire on Jan. 7.

The Canadian football team was badly beaten at Cardiff, Wales. The score was 20 points to 3.

The Bank of Montreal will increase its capital to $14,000,000.

The British duties on grain have not raised the prices to consumers.

Premier Laurier has returned to Ottawa completely restored to health.

The C. P. R. will establish a line of steamers between Canada and Jamaica.

Protestant clergymen of Montreal have organized for the purpose of looking up people who do not attend church.

John Morris, of Toronto, was struck by an engine on a C. P. R. crossing near Port credit and killed on Jan. 7.

Cholera has broken out in an American garrison in the Philippines.

Mrs. Nichols paid Mrs. Salisbury $6000 at Grand Forks, N.D., or alienating her husband's affections.

The Canadian Hockey league has given the Montreal club permission to meet the Winnipeg Victorias for the Stanley cup in January.

A dispatch from Pittsburg, Pa., says - Mrs. Wylie, who was the widow of Stephen C. Foster, the famous writer of old melodies, among them "The Old Folks at Home," was burned to death on the night of January 7 at her home in that city. Her clothing became ignited while she was sitting before an open fireplace.

The department of trade and commerce at Ottawa has been advised that the Governor of Jamaica has passed an order prohibiting the importation of cattle from Canada and the United States on account of foot and mouth disease being prevalent in the New England States

A head-on collision occurred between two C. P. R. freight trains a short distance west of Sherbrooke, Que., on Jan. 7, just as they reached a 15-foot embankment. The locomotives remained on the track, but were badly damaged. Fireman Louis Lapatrie was killed and Engineer Arthur Wright injured. The other fireman jumped into the river and got a bad chill.

A BRILLIANT SPECTACLE

Representatives of His Majesty Review Retainers of Ruling Chiefs.

Delhi, India, Jan. 8.—The viceroy, Lord Curzon of Kedleston, and Lady Curzon, and the Duke and Duchess of Connaught yesterday reviewed the retainers of the ruling chiefs in the durbar arena. The variety of costumes and paraphernalia afforded one of the most striking pictures of the durbar festivities. Contingents from all parts of Greater India participated, mostly retaining the distinctive features of their customs.

The flags and other emblems of the State of Clutch were carried on camels and elephants, accompanied by armed men on stilts, while Arab irregulars danced passed the viceroy to the music of their own instruments. The famous gold and silver guns of the State of Baroda attracted much attention. The ancient Mahratta flags, descended from the Mogul emperors, were borne past on an elephant carriage. The martial Rajputs were clad in mail armour. State bards, camel kettledrums, richly caparisoned elephants and horses, and agile swordsmen, many shouting battle cries, followed one another in quick succession.

A royal elephant carriage, two stories high, showed how the ladies accompanied the princes of bygone days. The retinue of the State of Kashmir included a fine detachment of cuirassiers and a huge giant.

The great Sikh states were represented by large, soldierlike bodies of men armed with maces, spears, matchlocks and hand grenades. Each contingent was headed by an elephant, bearing a gorgeous howdah, in one of which the sacred book of the Sikhs occupied the place of honor. The book was guarded by the chief priest. The venerable chief of Nabha, escorted by men mounted on richly caparisoned horses and accompanied by hounds and hawks, was a striking feature of the display, which for wealth of coloring diversity of components, and number of spectators may be considered to have been the most brilliant of the durbar display.

Marconi Triumphs Over Elements

A dispatch from Sydney, N.S., dated Jan. 7, says: The first real news transmitted by wireless telegraph across the Atlantic was sent by Marconi late last night from Table Head station to the London Times during a violent storm. About 10 o'clock it began to snow hard and a northeast wind arose shortly afterward. At 11 o'clock a blizzard was raging around Table Head station. The snow came down thick and fast, the wind blew sixty miles an hour and there were intermittent flashes of lightning and faint rumblings of thunder. When the storm was at its height Marconi decided that he had an opportunity to test the power of the wireless station under the most adverse conditions. Like all the young Italian's undertakings, this one was a complete triumph, and he demonstrated conclusively that the elements, gales, and lightning could not in the least interfere with the wireless telegraph. The first message was sent to the London Times. It read: "Times, London.—Please insert following birth column. Third January, wife of R. N. Vyvyan, chief electrical engineer Marconi Canadian station, of a daughter.. (Signed) Marconi."

The next message was sent to Mrs. Frawler, mother of Mrs. Vyvyan. It read: "Frawler, Weymouth, daughter born 3rd January, both well. (Signed) Vyvyan."

Both messages went through without the slightest hitch, and Marconi declared that not the slightest difficulty will be encountered sending messages during storms There was also a severe storm raging in England at the time.

ATE HORSE FLESH

A UNIQUE BANQUET IN BERLIN.

Society for the Prevention of Cruelty to Animals Gives a Feast of Horseflesh With the Idea of Creating a Larger Market for Aged Equines.

A cable from Berlin says: Six Six hundred people sat down to the most remarkable banquet that has ever been given in Berlin. The dishes consisted entirely of horse meat and were served in various forms. The Society for the Prevention of Cruelty to Animals issued the invitations to the dinner, which was given for the purpose of demonstrating the nourishing and palatable qualities of horse meat, thereby causing increased consumption of meat and a ready market for old horses. This would prevent owners from working the poor animals to death, as well fed specimens would bring good prices. The bill of fare consisted of horse soup, pickled horse tongue, filet of horse, and roast horse. All of the dishes were nicely prepared and were evidently greatly relished. The presiding officer of the society, Privy Councillor Von Secfeld, said 30,000 horses had been eaten in Berlin last year, and that he hoped for a large increase in the future. Many prominent members of the reichstag and of the city council were present at the banquet.

POLICEMAN AS ROBBER.

Chicago Saloons Raided by Thieves—One Proprietor Killed.

A Chicago dispatch of Jan. 8 says: A gang of robbers created much excitement in the western part of the city last night. One of them was captured during a robbery of a saloon, and later three of his companions, robbed another saloon, and killed the proprietor.

The first robbery occurred in the saloon of Robert Kohler, West 22nd street. Four men compelled the proprietor and several men who were in the place, to remain quiet while they robbed the cash register. A small boy gave the alarm, and two policemen hurried to the place. The robbers fled, and in the chase, Sergeant Rose captured Edward Fitzgerald, an ex-policeman, who was one of the robbers. The companions of Fitzgerald attempted to kill Sergeant Rose, but he held Fitzgerald in front of him, and the prisoner was twice hit by the bullets of his friends, who were firing at the officer.

Two hours after the robbery of the Kohler saloon, three men, supposed to be the same as those that had figured in the first robbery, entered the saloon of Anton Duflek, at 927 California avenue, and attempted to rob the place. The proprietor showed fight, and was shot and instantly killed by one of the robbers. All three of the men escaped.

Virden farmers have organized a wheat growers association.

The Right Rev. Dr. Davidson, Bishop oi Winchester since 1895, has been appointed Archbishop of Canterbury, in succession to the Most Rev. Dr. Temple, who died Dec. 23.

Windsor, Ont., still holds the lead as a marriage centre, the number for the last six months being 682. There appeared to be a preponderance of Methodists in the number married, as the Methodist minister in Windsor married the largest number. Next in point of numbers is Rev. D. H. Hind, rector of St. John's church, Sandwich. He also tied innumerable knots for strangers, who went to Windsor simply to be wedded.

Judge Benson, of Cobourg, Ont., has sentenced George Albert Reynolds, of Percy township, to three months in jail for inciting to commit bigamy. Reynolds is the man who traded his wife off to his brother, Walter for a fifteen dollar watch. The pair were married and pleaded guilty to bigamy. They got four months each. The parties agreed in court to resume their legal relationships after serving the terms. The original couple have two young children and George was left in charge of them while the second marriage took place.

Dr. Fagan, secretary of the British Columbia board of Health, who went to San Francisco to investigate the reports regarding the bubonic plague, has made a report to the British Columbia government, in which he states that a force of men is employed at San Francisco in dissecting rats, and rats that have been found dead have shown plague bacilli when examined. He recommends that strict quarantine be maintained against vessels arriving from San Francisco.

The "Cannon Ball" express, one of the lastest passenger trains on the Pittsburg, Fort Wayne and Chicago railroad, crashed into the rear end of a local passenger train at Ada Ohio, on Jan. 8. Three passengers were killed and several injured. Both trains were bound west. The cars were badly wrecked.

The New York Chamber of Commerce has passed a resolution urging the senate to ratify the convention which has been negotiated with Great Britain for the improvement of commercial relations between the United States and Newfoundland.

TELEGRAPHIC BRIEFS.

Short Dispatches From the Four Quarters of the World.

A Toronto firm failed for $134,000.

The lake terminal elevators are full of grain.

Lord Curzon reviewed 30,000 Indian troops, led by Lord Kitchener, on Jan. 8.

The C. P. R. has let a contract for another car building shop at Montreal.

Winnipeg Rowing club defeated the Victorias in a senior hockey match on Jan, 8, by 5 goals to 3.

Portage la Prairie farmers are considering the formation of a Grain Growers' association.

The Boers have formulated their desires and made them known to Hon. Joseph Chamberlain in an address presented to him. They wish to have the Constabulary abolished. He held out no hopes to them.

J. H. M. Parker, Canadian government agent, after a lecturing tour through the Southern States, predicts that 200,000 Americans will settle in Western Canada this year.

Harry O'Neale, a G. T. R. sectionman, was sweeping snow out of a switch in the Grand Trunk yards at Niagara Falls when a Wabash engine backing up struck him and knocked him down between the rails. After the ash pan of the engine passed over him he grabbed the crossbar and held on, screaming for life. The engine dragged him 200 feet before it was stopped and the man crawled out, having suffered only a few scratches and bruises.

Barcelona, Spain, Jan. 8.—The car men's strike for higher wages is resulting in serious collisions with the police. Revolvers were used in the streets yesterday, strikers threw petroleum on the premises of the Northern railroad with the intention of setting fire to them, while hidden bombs were discovered near the city, leading to the belief that dynamiting was contemplated. The police have been largely reinforced, and special orders have been promulgated for the Civil Guard to be in readiness for action.

Baron Von Sternburg (the German consul-general at Calcutta), has been appointed charge d'affaires at Washington during the absence on sick leave of Ambassador Dr. Von Holleben, Chanecellor Von Buelów regarding the business at Washington so important at present as to require a special substitute for the ambassador.

Dr. McDiarmid, principaal of Brandon college, received on Jan. 7 a letter from Lord Strathcona in which he donated one thousand dollars to the institution.

There are contradictory rumors respecting Abbotsford, the home of Sir Walter Scott. One is that Mrs. Maxwell Scott, a great grand-daughter of Sir Walter has decided that the property must remain in the family. Another is that the house has been put hypothetically on the market, in the hope that Scotch pride will be touched and the property secured as a literary museum and goal for tourists and holiday trippers. Another is that proposals have been submitted by a rich Ohioan for the purchase of the famous estate.

A practical test of lignite briquettes for railroad purposes will be made by the Soo road. After long and laborious work with machinery, fuel has been prepared for a trial run and the officials of the road will watch the test with interest. The process costs $1.25 per ton, and tests have established the fact that the briquettes can compete with anthracite coal in every respect.

A dispatch from Toronto says: Fred. Wood, a fifteen-year-old lad, was taken to Halifax to-night by Dominion Constable Kribbs, to answer to a charge of tampering with mail bags. Wood was arrested at the Union station by Constables Robert Harrison and Brider, after a telegram had been received here notifying the police to look out for him. He begged a ride on the Intercolonial mail car, and cut the bags open while the clerk was not looking. He stole a bundle of registered letters containing about $50.

A dispatch from Nelson, B.C., says: Yesterday morning a patient was having a refractory tooth extracted in the office of a Nelson dentist, as an anesthetic he decided to take ether, which was duly administered. While under its influence, however, he went through a performance that cost him a good deal more than the dental operation. The deotist had hardly started to work on the tooth when the patient slid forward in the chair, and kicked out wildly with both feet, and swung his arms, smashing the window in front of him and strewing the dental instruments about the office. In the street below two passersby came under a shower of glass from the broken window, and a number of articles were broken in the office.

Some of the Canadians of the South African Constabulary arrived in England on Tuesday, Dec. 23, and more are expected soon. It is alleged that others resigned because they resented being put in different sections and under other officers. There is some difficulty regarding their passage back to Canada. Another authority confirms the statement that most of the men resigned on account of their dislike to the English officers. It is announced that Baden-Powell will retire from the command of the South African Constabulary though his future movements are not settled. The Cape papers are full of acrid comment on the general administration of the South African Constabulary.

FERNIE FREE PRESS.

FERNIE, B.C.

The capitol of Washington has cost more than $30,000,000. It covers three and one-half acres. The dome is 307 feet high and 135 in diameter, and is exceeded in size only by St. Peter's in Rome, St. Paul's in London, the Invalides in Paris, and St. Isaac's in St. Petersburg.

C. C. RICHARDS & CO.

Dear Sirs—Your MINARD'S LINIMENT is our remedy for sore throat, colds and all ordinary ailments.

It never fails to relieve and cure promptly.

CHARLES WHOOTEN.

Port Mulgrave.

Girls, don't marry a romantic youth who is willing to die for you. Select a man who is willing to earn a living for you.

HOW CAUSTIC BURNS.

Take a piece of woollen cloth, or a piece of a blanket, and boil it thoroughly in a strong solution of caustic soda, and you will find the wool will gradually be eaten away, leaving nothing but the skeleton. Women do not realize how "soap substitutes," which are generally surcharged with soda, or how common alkaline soaps destroy their clothing; consequently they, week by week, subject costly fabric to such treatment. The hands also are immersed for hours in such solutions, resulting in eczema, coarse skin, and brittle nails. The caustic soda may loosen the dirt, but it eats away the fabric and ruins the hands. There is no economy in such work. It is so easy for a woman to test the difference between an alkali charged soap and a neutral washing soap, that it is strange that there is room for any but a pure soap on the Canadian market. Sunlight Soap has been tested by chemists and analysts the world over, and its freedom from free alkali or caustic has been demonstrated by the highest medical authorities. Consequently the true saying, "Sunlight Soap reduces expenses." 602.

Many a man reserves the kind words his wife is entitled to for her tombstone.

Some men's only boast is that they are no judge of music.

Minard's Liniment is the best.

Pork should be quoted by the hogshead instead of by the barrel.

The art of conversation is not knowing what you ought to say, but what one ought not to say.

Beware of Ointments for Catarrh That Contain Mercury.

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, O., by F. J. Cheney & Co. Testimonials free.

Sold by druggists. Price, 75c per bottle.

Hall's Family Pills are the best.

No woman ever admits that she cares if another woman dislikes her.

A woman never feels absolutely sure that her husband has loose habits until he comes home tight.

Monkey Brand Soap cleans kitchen utensils, steel, iron and tinware, knives and forks, and all kinds of cutlery.

The Back View.

"Why is it," queried the girl who is trying to solve the problem of how to dress well of the girl who thinks she knows, "that you wear all your prettiest pins and brooches at the back of your dress collars and the more ordinary ones in front? I do exactly the opposite."

"I don't mind so much—that is, within reason—about what people think who see me face to face," said the girl who dresses well, "but the people who criticise me behind my back do it more deliberately. Whatever my appearance may be as I see myself face to face in the glass, I am resolved that no one shall say that my mirror has not two sides. One can protect one's face with a smile or a gesture, but the critic at the back has one entirely at his mercy."—Philadelphia Ledger.

The Sewing Girl's Lot.

The sewing girl is out of the way of getting a husband. She does not come in contact with men in her work, as other girls do, and with so little time for anything but her work she does not make the acquaintance of marriageable men. The very nature of her employment excludes men from her society during her working hours. Her associates and even her employers are almost invariably of her own sex. No class of women are more deserving of good husbands than are the women who make their living with their needles. They are usually modest, refined and domestic. They do not hunt husbands, and, being so withdrawn from the daily lives of men, husbands do not usually hunt them because they do not usually know of them.—Louisville Courier-Journal.

Naples Laborers.

Since 1860 the wages of laborers in Naples have doubled, but the taxes have trebled. Even now wages are only from 10 to 25 cents a day.

FREE BOOK on CATARRH

I will send my fine book on Catarrh to all sufferers from the disease. It explains the origin, dangers and cure for this treacherous trouble. It is fully illustrated by the best artists. Address, Specialist Sproule, 3 Doane St., Boston.

A foreign scientific journal gives the results of some recent experiments upon the vocal cords which will prove interesting to singers. A baritone who wished to become a tenor succeeded by taking a course of inhalations, beginning with benzoin, going on to cafeine and chloroform, and ending with curacoa, while the voice was deepened by using volatized Norwegian tar.

There are plenty of people who have become depressed and discouraged, because that dry, hacking cough hangs to them continually. They have taven much medicine, mostly of the advertised quack sort, nothing like Dr. August Koenig's Hamburg Breast Tea, the discovery of a then noted German physician 60 years ago. We do not say that this will cure a case where the lungs are badly diseased, for it will not, and up to this date, there is nothing that will cure under these conditions; but on the other hand, if the lungs are not hard hit, the patient should take Dr. August Koenig's Hamburg Breast Tea, a cup full every night on going to bed, have it hot, drink slowly, then every other night, rub the throat and top portion of the lungs with St. Jacob's Oil, cover with oil silk, let it remain an hour, then remove. Eat good, plain, nourishing food, live in the open air as much as possible. By all means sleep as near out of doors as possible, that is, windows wide open, except in the very severe weather. Take a cold sponge bath every morning; then immediately rub the body with a coarse towel. Take Dr. August Koenig's Hamburg Drops every other day according to directions. One can buy the three remedies for $1.25 of any reliable druggist. Begin the treatment at once, and see how much better you will be almost within a week's time.

A lawyer never mistakes the will for the deed.

Lots of poor men are the architects of other men's fortunes.

Minard's Liniment Cures LaGrippe.

Forgery is all right in the iron business.

Fair weather friends are often enemies in disguise.

FAGGED OUT—None but those who have become fagged out, know what a depressed, miserable feeling it is. All strength is gone, and despondency has taken hold of the sufferers. They feel as though there is nothing to live for. There, however, is a cure—one box of Parmelee's Vegetable Pills will do wonders in restoring health and strength. Mandrake and Dandelion are two of the articles entering into the composition of Parmelee's Pills.

It sometimes happens that a man is so reserved in his manners that they become rusty from disuse.

Cholera and all summer complaints are so quick in their action that the cold hand of death is upon their victims before they are aware that danger is near. If attacked do not delay in getting the proper medicine. Try a dose of Dr. J. D. Kellog's Dysentery Cordial, and you will get immediate relief. It acts with wonderful rapidity and never fails to effect a cure.

People who live in glass houses are in a position to raise early vegetables.

For Women With Big Feet.

Women with large feet should bear one or two things in mind. One is that if they are big women they have no right to expect to have very small feet. A woman of 5 feet 6 inches in height is entitled to a foot 9 1-3 inches long, and it might be a little longer without making her feel that the world was coming to an end. Another thing the large footed sister should recollect is that when she squeezes her foot into a shoe too small for her she does not disguise its size. On the contrary, she makes this more apparent. The foot spreads in its overtight covering and lumps out in the wrong place and stretches the shoe out of shape in no time at all.—Shoe and Leather Gazette.

Captive Bred Lions.

Lions born in captivity are less trustworthy from the trainer's point of view than those captured in the deserts.

40th Anniversary

For over Forty Years

Gray's Syrup of Red Spruce Gum

AS A SPECIFIC FOR COUGHS, COLDS, ETC.

Has been tested and has become the Family Cough Specific of thousands throughout Canada and the United States. It never was more popular nor more largely used than it is to-day.

MERIT ALWAYS TELLS.

Cough Remedies come and go. New preparations are tried and abandoned, but the old reliable remains. The present is a trying season for both old and young, and colds, easily caught now are apt to remain for the winter unless promptly cured. No better remedy can be found than

Gray's Syrup

SOLD BY ALL DRUGGISTS.

MARKETS.

(Compiled from The Commercial)

The most important occurrence this week was the order issued by the Canadian Pacific railway to its agents, last Thursday, not to accept further shipments of grain for Fort William. The reason given was that there was enough wheat now in transit to fill the elevators at that point. The repairs and enlargement of elevator D are not completed yet, but it is expected this elevator will be ready in about ten days, when shipments to Fort William will be resumed. The capacity of elevator D will be 3,000,000 bushels. The Canadian Northern elevator at Port Arthur is also about filled up, but that company expects to have its new 2,000,000 bushel elevator ready in a few days. The new Canadian Pacific railway elevator E, under construction at Fort William, will not be ready for some time yet.

The situation in Manitoba wheat has been quiet, but firm, with a tendency to follow the changes in the United States markets. Prices at the closing on Friday were: 71c for 1 hard; 69c 1 northern, 67¾c, 2 northern; 65¼c, 3 northern; spot, or first half January For May delivery, 1 hard, 75¼c; 1 northern, 73¼c; 2 northern, 71¾c; 3 northern, 69½c, all in store, Fort William, Port Arthur, or Duluth.

FLOUR—Demand is active and prices steady. Best Hungarian Patent is worth $2 per sack of 98 lbs., delivered to the trade; Glenora patent, $1.85; strong bakers, $1.55; and XXXX at $1.25.

MILLFEED—Bran is quoted at $15 per ton in sacks, and shorts at $17 per ton.

OATS—The oat market is easy and ½c lower. Oats are plentiful in the country, but lack of transportation facilities is keeping back supplies and prices are some cents above what they would be with prompt delivery. No. 2 white oats are worth 28½c per bushel at Fort William. On track in Winnipeg this grade is worth 26½c to 27c per bushel, and about 21½c is the price for feed white. At country points farmers are getting 19 to 20c bushel at central points.

BARLEY—The market is quiet and the best prices brewers will pay is 28c for No. 3 extra in carlots on track. Feed barley is worth 25 to 26c.

FLAXSEED—Market nominal.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $6 to $6.50 per ton for carlots on track.

POTATOES—35c per bushel.

BUTTER — Creamery— Creameries are asking 26c per pound from city customers for choice makes.

BUTTER—Dairy—Very little butter is coming in and the market is quiet at unchanged prices. Dealers are paying 21c per pound net at Winnipeg for dairy separator butter in bricks, and 14 to 17c net for choice tub butter.

CHEESE—The price is firmer at 13 to 13½c per pound.

EGGS—Eggs are scarce and have advanced to 22c per dozen, net, in Winnipeg, subject to candling.

DRESSED POULTRY—Dealers are offering in a wholesale way 10c per pound for chickens, dressed; 9½c to 10c for ducks and geese, and 15c for turkeys.

DRESSED MEATS — Beef, city dressed, 6 to 7½c per pound; country stock, ½c under these figures; mutton, 8 to 9c; lamb, 11½c; hogs, 7c.

HIDES—Country frozen hides are bringing from 5½ to 6c per pound, delivered at Winnipeg, less 5 pounds tare; sheep pelts, 30 to 50c.

WOOL—Market nominal.

SENECA ROOT—Last purchases were made at 58c per pound for clean dry root, delivered at Winnipeg.

LIVE STOCK.

CATTLE—The market is quiet. Finest steers are worth 4c; butchers' orninary, 3½c, and from that down to 2½c, according to quality. There is nothing doing in stocker cattle.

SHEEP—Worth 3½c per pound off cars here. Lambs, 4¼ to 4½c.

HOGS—The market is unchanged at 6c per pound for hogs weighing from 100 to 200 pounds. Heavies and lights are worth ½ to 1c less.

MILCH COWS—There are very few milkers to be had, and prices are firm at $30 to $45 each, for such as are to be had, according to quality.

HORSES—There is a good demand

HORSES—Trade is now confined to a limited demand for general purpose horses, for which prices still rule high. Good teams of work horses are worth $300 to $400, according to weight and quality.

A man's shadow is like most of his friends. It only stocks to him in sunshine.

Men admire clever women more than handsome ones, because they are scarcer.

It is almost as hard to keep a friend as it is to lose an enemy.

Ants as Gum Makers.

Walter Busse states that in East Africa practically all the excretion of gum is provoked by ants. They perforate the bark of the acacia in order to lay their eggs in the wood. The soft wood acacias generally show few wounds of this kind, but those of the hardwood species are riddled with them, each perforation being marked with a globule of gum. The ant makes no use of the gum. It is only an abstruction to her work, since it stops up the galleries she hollows out. Another species of ant, however, sometimes attacks the exuded gum before it has become completely hardened and gives it discoloration.

ACCIDENT TO A MINER

Strained His Back and Was Sent Home in Agony.

Laid Up all Winter, Dodd's Kidney Pills put Him on His Feet Again and Now He is Completely Cured.

Indian Brook, Victoria Co., N. S., Jan. 12.—(Special)—Angus D. McDonald, son of the postmaster here, is prominent among those in this district who swear by Dodd's Kidney Pills as a sure cure for those terrible pains in the back that are one of the surest symptoms of Kidney Disease. And Mr. McDonald has good reason for the stand he takes.

While at work in the coal pits he strained his back and was sent home in an agony of pain. The nearest doctor, twenty-five miles away, was sent for, but he could do little to relieve his suffering. This was in October, 1901, and he couldn't do a hand's turn of work till the spring of 1902.

Then a hotelkeeper advised him to try Dodd's Kidney Pills. That hotelkeeper didn't see him again until last August, and then his first question was: "Angus, how's your back?" "As well as ever it was," answered Angus. "What cured it?" "Dodd's Kidney Pills cured me completely."

And the postmaster at Indian Brook is always ready to testify to the truth of his son's statement.

Pains in the Back, Lumbago, Rheumatism, Dropsy gnd Heart Disease are caused by diseased kidneys. Dodd's Kidney Pills will cure them.

Despite the efforts of Winnipeg wood dealers to keep up the price of wood by claiming a shortage existed, the price has dropped a dollar a cord and will likely go still lower. There are eight or ten thousand cords in sight at Winnipeg, an ample supply for considerable time, and further, unlimited quantities of wood may be had.

Minard's Liniment is best Hair Restorer.

An Irish lawyer, in speaking of the demise of a colleague, said: "He left a brilliant future behind him."

Mr. Thomas Ballard, Syracuse, N. Y., writes: "I have been afflicted for nearly a year with that most to be dreaded disease Dyspepsia, and at times worn out with pain and want of sleep, and after trying almost everything recommended, I tried one box of Parmelee's Vegetable Pills. I am now nearly well, and believe they will cure me. I would not be without them for any money."

It may be well to remember that the best friend you have on earth is a better friend to himself that he is to you.

Waiters as a class are orderly men, yet they are frequently called to order.

WAKE UP, BABY!

A New Game For Mothers.

Baby's awakening ought to be looked forward to as a pleasure, not dreaded as a scourge. He should awaken bright, merry and full of fun, refreshed by sleep, ready for a good time.

How many mothers dread his awakening howls, knowing that he will keep everyone miserable until he goes to sleep again or gets his food. These crying fits are the terror of every inexperienced mother. Mrs. Gabriel Barnes, Six Mile Lake, Ont., is a mother who has learned how this trouble can be best met, and writes us as follows: "My baby suffered much from indigestion, and was cross and restless. I gave him several medicines, but they did not help him. I then got a box of Baby's Own Tablets, and they helped him almost at once, and have done him so much good that I would not now be without them. I can recommend Baby's Own Tablets to all mothers as the best medicine I have ever used for children." These Tablets are guaranteed to contain no opiate or harmful drug and can be given with absolute safety to the youngest, weakest infant. Sold by all druggists or sent by mail, post paid, at 25 cents a box by writing direct to the Dr. Williams Medicine Co., Brockville, Ont., or Schenectady, N.Y.

It may take nine tailors to make a man, but one tailor-made girl can unmake a dozen men.

Pride makes one man ridiculous and prevents another from appearing so.

There never was and never will be a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in sound, unadulterated state, a remedy for many and grevious ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease and by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses through the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrup & Lyman, of Toronto, have given to the public their Superior Quinine Wine at the usual rate, and, guaged by the opinions of scientists, this wine approaches nearest perfection of any on the market. All druggists sell it.

One trouble with some men who pay as they go is that they are slow goers.

Three things that beat a drum for noise are a small boy and two drumsticks.

Minard's Liniment for Rheumatism.

Speaking of clothes, a judge says lawsuits become attorneys.

It is difficult to convert a man unless you practice what you preach.

A SHORT ROAD to health was opened to those suffering from chronic coughs, asthma, bronchitis, catarrh, lumbago, tumors, rheumatism, excoriated nipples, or inflamed breast, and kidney complaint by the introduction of the inexpensive and effective remedy, Dr. Thomas' Eclectric Oil.

Sometimes musicians dispense music by measure, but the drummer works it off by the pound.

CARNEFAC STOCK FOOD.

A Veterinary Conditioner.

PROF. SHAW'S OPINION.

Read what Professor Shaw, formerly of the Ontario Agricultural College, Guelph, Ont., and now Editor of the St. Paul Farmer, says of Carnefac Stock Food:

St. Paul, Minn., Dec. 10, 1902.

This is to certify that the ingredients used by Mr. W. G. Douglas, Winnipeg, in the manufacture of his Carnefac Stock Food has been submitted to me for my opinion regarding their value. I may say with reference to them that I am satisfied they are all healthful. If properly blended they should make a splendid tonic for live stock, more especially when the digestion is not in the proper order. They will act as an appetizer and will also tend to stimulate the digestion so that when feh to animals not in good condition of thrift the result would be to quickly improve their condition. I would suppose that this food would be especially helpful in feeding horses in preparing them for spring work, and in putting in tone the stomach of cattle, sheep and swine that have been pushed too hard in feeding. It should also render good service when fed to calves that are not prospering because of indigestion. THOMAS SHAW.

THE FERNIE FREE PRESS,
FERNIE BRITISH COLUMBIA

SATURDAY, JAN. 17, 1903.

COKE QUESTION AGAIN.

The last issue of The Boundary Creek Times contains another article on coke shortage, in which after trying to prove the inability of the Crow's Nest Pass Coal Company to supply the necessary fuel requirements for the Boundary smelters the writer again suggests a government commission to control this supply and advises the opening of the coal measures at Morrissey as a likely method of relieving the shortage. Of an editorial in these columns in answer to their former pessimistic cry he says, "A presumably inspired article appeared in the The FERNIE FREE PRESS telling the smelters to go ahead and put in more furnaces, that they would get all the coke and coal required and that the Crow's Nest Pass Coal Co. could supply all demands."

We are correctly quoted, and we are glad to note that the writer discerns in our statements the source of our authority. It would be folly for any paper to make any such broad assertions without first seeking exact information from those who are in a position to know the plans of the Company and it was with the philanthropic view of dispelling the doubting fears of the Times, that we obtained those facts from headquarters and published them. It was with the same object that a FREE PRESS representative called upon Mr. Tonkin, the general manager of the Crow's Nest Pass Coal Company, yesterday and from figures cheerfully supplied by that gentleman found that the conditions among the Boundary smelters are not as represented by the Times.

The total output of coke from this district is now 850 tons per day while the daily average demand from the Boundary smelters including Northport smelter, which requires 7 cars daily, is 550 tons. This shows clearly that the supply allowing a fair estimate for the irregular small demands from other quarters, is ample to keep those smelters in constant supply. Every pound of coke is consumed in Canada, with the exception of that shipped to Northport and as that smelter treats only British Columbia ores it is regarded even by so correct an authority as Smith Curtis as deserving of the same privileges as regular B. C. smelters, Then where does the shortage come in, for in a limited sense a shortage does exist? It is accounted for in the fact that the demand is not constant. Some smelters stock their fuel, fearing further labor troubles. This is true of the Trail smelter which has 3000 tons of coke now on hand. Other smelters finding a heap of ore accumulating decide to blow in another furnace and without previous notice make an immediate demand for a much larger supply of coke, which if not forthcoming at once gives them the erroneous idea that the supply is not great enough. Mr. Tonkin showed a telegram received that morning from the Granby smelter increasing their standing order of 135 tons daily to 200 tons. The shipping fignres for the past six weeks shogs that this smelter had been receiving considerably over its daily demands and yet the Times mentions the Granby as one of the suffering smelters.

Before the explosion the daily output of coke was 600 tons, which now, with still 62 ovens idle, has been increased by 250 tons. The No. 2 mine was by far the best producing mine and as its condition is gradually being improved more ovens are being fed. Add to this the drawbacks offered by the unusual snow fall and delays incidental to scarcity of cars for slack and it will be seen that the Company is doing everything possible to meet the requirements of our sister towns. A year ago when the monthly output was 5000 tons less than at present the home markets were fully supplied and yet 200 hundred ton remained for daily export to the Montana smelters which fact shows the spasmodic nature of the home market.

We take pleasure in stating some facts regarding the future coke supply gathered from the general manager. There are now under construction 250 ovens at Morrissey and 212 more ovens at Michel. Operations of this nature cannot be pushed rapidly at this season, but a large force of men are at work, the brick are purchased and under fair conditions these 462 extra ovens will be in working shape by June 1st. This will increase the daily capacity about 600 tons which added to the present capacity brings the total to over 1500 tons per day, and surely this tremendous quantity will amply supply all home markets as predicted in our former article.

It is childish to bring into this argument the opening of the government coal property. Its bearing on the present case is nil, for granting that the supply is not large enough to supply the Boundary smelters, how could such a measure bring relief? At the best, it would take two years to produce coke in quantity from that source. Of the general benefit to the country at large that such a movement would bring nothing is said and it is not necessary to discuss it here.

As we go to press information reaches us that a sitting of the county court is to be held in Fernie on the 26th of February, and that a registry of the same will be established forthwith. This requirement is one of long standing in view of the heavy expense hitherto involved in transacting court business at Fort Steele and the transportation of witnesses to and from that point. Our only facilities previous to this time have been afforded by the small debts court, whose jurisdiction is limited to actions of debt not exceeding $100, and which has no jurisdiction whatever in actions involving damages on the titles to land.

This action on the part of the government indicatee that this community is commencing to make its presence felt and its requirements known, and bears eloquent testimony to the results achieved by united and persistent action on the part of some of our citizens.

The establishment of a Registry of the County Court is a subject upon which representations have been frequently and urgently made to the proper authorities without tangible result.

Recently, however, the Board of Trade have energetically followed up the matter along with others of a similar nature, and have at last achieved success.

We extend our congratulations to this useful institution on the attainments of their object, and hope they will continue in the good work until our other requirements of a public nature have been fulfilled.

MICHEL

From Our Own Correspondent.

Mr. D. Evans left for Blairmore on Tuesday evening on private business,

Miss Lillian Evans, of Calgary, is visiting her parents, Mr. and Mrs. D. Evans.

Mr. Joe Marcotte, of Moutreal, has taken the position of day operator for the C. P. R. here.

Mr. W. H. Dorman, provincial post office inspector, was in town Tuesday evening on business.

A large rink has been made on Michel creek, much to the enjoyment of our citizens. A hockey outfit has arrived and an attempt will be made to organize a team. Look out, Fernie!

The Young People's Society has been reorganized and is now known as the Michel Literary Society. A debate will take place on Tuesday evening next in Michel hall under the auspices of this society, and it promises to be most interesting, the subject being, "Is Foreign Immigration a Benefit to the Dominion of Canada." Messrs. R. G. Duggan, F. Brown and G. Dunn will speak for the affirmative and Messrs. R. L. Henderson, G. Curnock and J. Connally for the negative.

At the regular meeting of the Michel Literary Society on Tuesday evening last an address and presentation was made to Mr. R. L. Henderson, president of the Young People's Society, by the members. The presentation, a handsome tea set and a beautiful parlor lamp was made by Rev. F. Brown, and the address, which follows, was read by Mr. W. Farrow:

"We, the officers and members of the Young People's Society of Michel, desire to present you with this address of congratulation, as president of the above society, on the occasion of your recent marriage. During your stay in our midst we have found you to be very fair and impartial in your duties, which at times are not always the most pleasant for one in your present position in our town. As president of the society, we are pleased to congratulate you for the manner in which you have filled that office, in the transaction of business that arises from time to time. We further hope your future may still be one of prosperity and happiness, and that your name may still remain upon the rolls as a member of the Young People's Society of Michel."

Signed on behalf of the above,
C. C. SIMMONS, Hon. Pres.
FREDERICK BROWN, Vice Pres.
ANNIE K. W. EVANS, Secretary.
Dated Jan 13th, 1903.

MORRISSEY

From Our Own Correspondent.

Mr. and Mrs. T. R. Morton were visitors to Fernie on Wednesday.

Er. Barber is at the Australian hotel doing business in Dental work.

A Sheridan, of Elko, has opened up a bakery and restaurant business in Morrissey.

J. E. Aucliffe, late overman here, left with his family on Monday for Vancouver island.

W. H. Dorman, P. I., was here on Monday on business, connected with his department.

It is rumored that the mines here will soon be rechristened and instead of being Morrissey mines will be known as Pittsburg, B. C.

The Kid Madden vs. Murphy boxing contest comes off Saturday night in Elk hall, Morrissey.

Ed. Willson, lately doing business at Elko, has opened up a drug store with a first-class and up-to-date stock.

The shipment of coal from here now averages about 800 tons a day, by a few weeks time 1,000 tons will be the daily output.

Andy Johnson, of Moyie, B.C., has purchased the Pioneer Hotel, Morrissey, from H. A. Kanouse, Fernie, and has taken possession already.

Friday was pay-day here. It was the largest since the mines were opened. About $28,000 were paid out which is an increase of $5,000 over December pay.

The dance at the Australian Hotel on Tuesday evening was a great success; two sleighs of people from the mines helped to make the evening more enjoyable.

The new fan house for No. 4 mine is about completed and is one of the largest of its kind in Canada. This will be a great boom to the miners as considerable gas is in this mine all the time.

There is a great lack of accommodation for the men arriving to work here at the mines. The boarding houses are overflowing and men have to sleep on the bare floors. It is certainly time more houses for single men were erected or a few hotels put up to meet the demand.

Considerable excitement and talk is going on around here at the present time owing to the proposed town of the Coal Co. being put on the market. Every day sees new faces enquiring for information. It certainly will be a great boom here when the town site opens up.

Messrs. Clements & Greer's party of government surveyors, twenty strong, have been busy this past week packing in supplies to the summit of the hills, preparatory to making a start for the Flathead country. As each man carried 50 lbs. and wore snow shoes this is no light task.

The new C. P. R. depot here is nearly finished and by next week will be open for traffic. It consists of agent's office, ticket office, baggage and freight shed. The second story will be used by the agent, Mr. Lyman and family. Altogether it is one of the largest and best equipped depots on the branch.

TO-DAY'S PAY-ROLL.

Over One Hundred Thousand Dollars More Put In Circulation.

The pay-roll of the Crow's Nest Pass Coal Company for the month of December which is being paid to-day amounts to the magnificent sum of $102,666.45. This includes ths wages for the three camps.

Divide Your Attention

in our store between the strictly useful articles and those that are ornamental and you will see that our goods are not only excellent but very beautiful, too. If the thoughts are concentrated on the cost of these handsome things it will be seen that our prices on

Ladies and Gentlemen's Watches, Chains, Stick Pins, Cuff Buttons, Belts, Buckles, Etc.,

are less then equally good articles can be purchased for elsewhere.

A. C. Liphardt.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

To-day is pay-day.

General Manager J. H. Tonkin registered at The Phair Hotel, Nelson, last Saturday.

Mr. H. Fentley went down to Lethbridge on Wednesday on a business trip and returned to-day.

Mrs. C. Richards, of the Mines, entertained a number of friends on Tuesday evening of this week.

Tea and coffee supper to-night, Jan. 17th, at Salvation Army Hall. Admission, adults 15 cts., children 10 cts.

Messrs. F. E. Simpson, of the Cranbrook Herald and Matt Rockendorf, of the Morrissey Miner, were in town on Thursday.

Mr. Galer, assistant manager of the Granby smelter is coming to Fernie this evening on business connected with his company.

Mr. G. G. S. Lindsay, of Toronto, solicitor for the Crow's Nest Pass Coal Co., registered at the Phair Hotel, Nelson, on Saturday and left for Victoria on the following day.

Miss Kay has opened up a dress making shop over the store occupied by the Crow's Nest Trading Company. Miss Kay came in on Monday from Grand Forks where she had been residing.

Mr. S. Gibson has opened up the employment office in the Hill block, formerly occupied by Mr. Love. He says he is now prepared to furnish employment to all looking for the same.

The Victoria Hotel was inadvertently omitted last week from the list of subscribers towards the Hockey club. This Hotel liberally subscribed $5.00 towards this worthy cause.

C. E. Race, formerly editor of the Nelson Miner, and subsequently editor of the Rossland Miner until a couple of years ago, will again take full charge of the latter publication on and after Friday next.

The Rev. C. W. Houghton with Mrs. Houghton and Gordon will go to Michel tomorrow evening. Mr. Houghton will hold service in the hall at 8 p m. They will stay with the McSorleys for a few days visit.

A mistake was made last week in our account of Duncan Buchanan's death. The accident occurred on a Thursday and he was sent to the hospital the second time on the following Tuesday, the wound having been dressed by Dr. McSorley only twice, on Saturday and Monday.

An order has been given by the public administrator, Mr. J. F. Armstrong, to sell by public auction the effects of the late Elzear Tramblay. The sale will take place on Monday next. The building in which he conducted his small store, as well as several small lines of stock, will be sold.

Mr. Henry Johnston, postmaster of Fernie, B. C., and a former Waterloo boy is visiting his mother, and renewing old acquaintances in Waterloo Mr. Johnston left town twenty eight years ago, and his many friends will be pleased to learn that he has made his fortune in the west.—Waterloo Chronicle Telegraph.

Mr. Robert Watson received a telegram last week from Arnprior conveying the sad news of the death of his father, and he left on the first train to attend the funeral. The deceased, Wm. S. Watson, died of pneumonia after a few days' illness. He was one of the best known and most respected citizens of Arnprior.

Dentistry

Dr. Barber is in town and can be found at his office in the Hill block all next week. x

Mr. H. L. Manley who was called away suddenly about a month ago by the death of his father, which occurred at his old home in Pennsylvania, returned to Fernie on Sunday. Mr. Manley visited the anthracite regions whlie absent. He reports that much importance is attached to the findings of the commission now sitting.

Mr. J. H. Tonkin returned to Fernie via Nelson on Wednesday. He had a flying trip to Pennsylvania and other points on business matters connected with his Company, one of the most important of which was the purchasing of brick for the coke ovens being built at Morrissey and Michel. Mrs. Tonkin and daughter remained in the east for a more extended visit with friends.

Mr. J. Elliott, of the firm of Sheppard & Elliott, accompanied by his family arrived in Fernie from Leduc, Alta., early this week. Mr. Elliott intends to reside here in future and will take an active part in the management of the hardware business in which he is interested. The family have taken up housekeeping in Mr. Blakemore's residence, formerly occuppied by Mr. J. A. Rennie.

Mrs. Prest left on Saturday for Effingham, Illinois, where she will take a course in photography to perfect herself on some of the finer details of the work. The institution which she will atten d is the best of its kind on the American continent, and Mrs Prest will be better fitted than ever to do the latest and best work on her return. She expects to be there a month and will then go east to visit the leading galleries of the larger cities for further information, returning to Cranbrook in February.

Dentistry

Call and consult Dr. Barber any time next week if you are in need of his services. Office over Liphardt's.

Dancing Lessons

Mr Heath wishes to announce that he will recommence his dancing classes on Monday evening in Joyces' Hall. Instruction will be given to Ladies from 8 to 9, to gentlemen from 9 to 10. x

New Boarding House

Mr. A. Miller who opened up the English Restaurant in the Lundy Block some time ago has given up the business and has rented the Coal Company building, next to the Central Hotel, which he has fitted up for a boarding house. Mr Miller gives meals at all hours to transient customers, as well as supplying regular board. No doubt the central location as well as good service will build up a nice business. See his adv.

New Dentist

Dr. Morrison, dentist, formerly of Nelson, has located in Fernie, and will pay periodical visits to neighboring towns making this place his headquarters. He has rented the flat in the Henderson block over Sheppard & Elliott's hardware store which he is fitting up for his dental parlors. Dr. Morrison advertises himself as now prepared to do all the usual work of his profession.

Icy Sidewalks.

The sidewalks in Fernie are in many places in a most unsatisfactory condition owing to the fact that in some places the snow has been removed and in others it has been left and has become packed hard into ice making a drop of nearly a foot from one to the other. The icy condition of the whole walk added to the uneven surface necessitates the use of some care in getting around, especia ly in the evenings when the light is not to strong. The citizens should take advantage of the first soft spell to clear the walks where the ice has accumulated.

Junior Hockey Club

The Fernie Junior Hockey Club was organized last week. A. Kanouse is the captain and Wilmer Lawrence is secretary-treasurer. The boys have arranged to have practices on Wednesday evening from 10 to 11 and on Friday from 7 to 8 p.m. New suits have been secured, white sweaters and white padded pants being used. Challenges have been sent to the junior clubs of Lethbridge, Pincher Creek and Macleod, and favorable replies have been received from the latter two asking to arrange suitable dates. The organization is popular with the youthful puck drivers and great things are expected of them. Among the best players of the junior club might be mentioned, A. Kanouse, W. Todhunter, W. Lawrence, W. Ross and C. Sunberg.

Houses Numbered

The Coal Company has numbered all its houses in town. The numbers are printed neatly on tin and then are tacked in a conspicuous place on the front of the house. General Manager Tonkin's residence in the park is numbered one, Mr. J. McEvoy's is numbered two, then the numbers run along the west side of Victoria Ave. then along the east side towards the south and back towards the centre of the town along Baker Ave. The houses and shacks in the old town have also been numbered, but not so elaborately, the tin having evidently been cut up by hand and the numbers painted with a brush. Every building, if only 6x6 bears a number and no doubt this system will prove of great assistance to the Company in keeping a correct account of the lease rents.

Painful Accident.

On Saturday evening an accident occurred at the rink which will deprive one little lad of many a good skate this winter. It appears that about ten boys were engaged in playing on the ice, tripping one another, etc. Fred Eschwig, the victim of the mishap, received a fall while one skate was lodged deep in a crack in the ice. Another boy fell over his leg, while it was in this unnatural position and two or more others were piled on them again. When Fred was extricated from beneath it was found that his leg was seriously injured and he was carried home. Dr. Corsan upon examining the little patient found that a blood vessel below the knee had been injured, impeding the circulation of the blood, the cords of the leg had also received a severe wrenching but is thought that the bone is uninjured. Fred will not be able to use his leg for some time to come.

Two Runaways

Mr. E. Jarvis had a narrow escape from serious injury on Tuesday evening, while driving over some uneven ground the sleigh suddenly tipped, throwing him between the sleigh and the horse's heels. Instead of kicking as most horses would have done his horse made strenuous efforts to pull the sleigh out of the hole, with the result that the single tree broke thus freeing the horse from the vehicle. It then started on a mad career and ran until it was tired, being finally brought to bay in the old town. Mr. Jarvis was uninjured. Another horse attached to a milk a made a spurt for liberty on Monday at noon. It rounded the corner at the Fernie hotel at a good speed without any driver in sight and things began to look interesting. Mr. R. Hammond at this juncture, grasping the situation, decided to take a hand. He cut across, swung on the rear end of the sleigh and grabbing the reins soon checked what might have been a disastrous runaway.

Miss Gray returned this week from Michel and is the guest of Mrs. S. Graham.

Mr. Fred Thompson, tailor, of Frank, is spending the week in Fernie and is the guest of Mr. J. C. Hutchison.

Ross Tate, of Cranbrook, was in town on Tuesday and went down to Macleod on the evening train.

Gen -Supt. Thos. R. Stockett, Jr., went to Michel on Sunday evening on business connected with the mines and did not return until Wednesday.

Henry Wardrop has taken a timber contract at Sparwood which will keep him busy all winter. He intends to return to Morrissey in the spring.

As a result of the recent investigations of the Grand Jury of King county, a general exodus of undesirable citizens of Seattle has commenced. Tin-horns, petty criminals, sure-thing men and immoral women are moving to neighboring towns where the police regulations may be less stringent.

A dreadful explosion occurred at the Hamilton Powder works, Northfield, three miles distant from Nanaimo, on Wednesday morning, by which 12 men were blown into fragments and the buildings used in the manufacture of high explosives were reduced to match wood. The shock was felt for a radius of 20 miles, while in Nanaimo many windows andchimneys were damaged.

Another Carnival.

Mr. C. J. Digby wishes to announce that Wednesday evening, January 28th, he will give the second carnival of the season. The band will be in attendance. Prizes will be given. A notice is given that each in masquerade must hand in at the door a paper with name and character represented written on it. Carnival opens at 8 p. m. Adults 25 cts. children 15 cts.

BORN

HESCOTT—On January 16th the wife of Mr. J Hescott, a daugher.

CHURCH SERVICES.

The Rev. C. F. Conner will occupy the pulpit of the Methodist church morning and evening. Subjects, Morning "Gideon." Evening, "Success." The male quartette will render "Come Spirit Come" by Gowner.

The Rev. A. Stoney will conduct the service at Christ church tomorrow evening. The services at Clirist church will be as follows. Matins and Holy Communion, 11 a. m.. Sunday school and Bible Class, 2.30 p. m. Evensong 7.30 p. m.

MY HEART'S DARLING

BY W. HEIMBURG.

CHAPTER V.

"The ladies are in the garden," said Frau Counselor's thin little maiden.

Lucie felt her way down the dark stairs again, and went through the little garden to the arbor.

"Is it you?" said her lover, and stepped out to meet her. "Did you not just meet my mother and aunt? They went in to attend to something. But first of all, how are things over there?"

Instead of answering, she leaned her head on his shoulder and wept.

"What is it, then? Have you spoken to her?"

She nodded. "Her intended husband has written to break off his engagement," she whispered, "on account of her father."

"Poor woman!" he said, feelingly. "Did you talk to her and scold her about her foolish attempt, you good little Samaritan?"

"Yes, Alfred; I did everything that you wished me."

"As if I did not know the first time I saw you what a splendid doctor's wife you would make."

She leaned against him. "Where was that? Say—was it in Mathilda's sick room?"

"No, indeed; it was when you bound up Bebe's bad hand."

"Oh, yes!" said she. "And that made such an impression upon you?"

"Of course, and still more the delicate venison steaks that you used to prepare for my patient."

"Ach, for shame! how commonplace!"

"But allow me," he added, mockingly; "if housewifely ability does not impress a man, what should?" He patted her cheek and kissed her. "What won my heart was your cheerful disposition and your fresh nature," he thought.

But he did not put it in words; he belonged to that class of persons that keep what they value most shut down in their hearts, locked up in themselves, that can not express it, and pass for cold and indifferent. Only after long acquaintance and real study does one learn to know them and to prize them doubly.

They sat silently by each other. She had such high ideal thoughts of love—she found it so easy to understand that one could die if the object of one's affection were lost. Her young heart asked if he loved in that way, and she sat gazing dreamily at the blue sunshine.

After a few minutes the Frau Counselor came along the path. She returned the young girl's greeting coolly, and remained standing at the entrance to the arbor.

"Do you not think it would be better, Alfred," she asked, with her shrill voice, "if the man were to upholster the sofa in our house? He will certainly steal the beautiful horse-hair if it goes to him. It is quite full; it belongs to my mother's time, when people were not cheated with rags or sea-weed."

"Certainly, mother; certainly," he returned, cheerfully.

"Good-night, Alfred. Come, Lucie," she said, shortly; "we shall not be able to sleep again on account of the singing of the nightingales and croaking of the frogs. If I had only thought about that horrid garden, I would not have rented this house."

Lucie looked surprised and hurt into her lover's face. He smiled.

"I wonder if that woman ever was young," thought the girl. And she stood a long, long time at the open window of her room, and looked through the silvery shimmer of the spring night. A ray of moonlight had lighted up her little sister's photograph on the bureau, and now lay like a narrow line across the low, white-covered bed as Lucie sought her couch. She had scarcely fallen asleep, when a bell sounded through the house. With a beating heart she jumped up and listened. After a little while she heard Alfred's steps on the stairs, and soon after he shut the door. Then a strange voice spoke; she listened as he answered:

"I will come at once."

Where would he have to go? She shut her eyes and pictured to herself how quietly he would step up to the sick-bed, and could hear his cheerful voice, as he asked questions, comforting and quieting. "He is so good," she whispered, and folded her hands upon her breast. And she stayed awake until he came back some hours later.

CHAPTER VI.

Day began early in the Frau Counselor's house. The family were drinking their coffee at half-past six—Tante Dettchen in a red plaid jacket and quilted petticoat, and her night-cap over her thin little twist of hair. She could not give up this habit, although her sister-in-law did not spare her biting remarks. But one could hardly be vexed with her, this primitive neglige was of such spotless freshness that it was much more attractive than the old brown cashmere street-dress turned by the Frau Counselor into a morning gown, the worn seams and faded velvet trimming giving the impression that it had just been brought out of the rag-bag.

Lucie, in a dainty morning-cap and white apron, was pouring out the coffee as Dr. Adler entered.

"Good-morning," said his mother. "Where did you go last night?"

He first kissed Lucie's forehead thoughtfully, patted Dettchen on the shoulder, and then took his place before a cup which was adorned in large blue letters with the inscription: "For the head of the house," an attention from Dettchen to her nephew on his return home.

"To Frau von Lowen's," he said, quietly, and reached out for a roll.

"Is she worse?" cried Lucie, in an alarmed tone.

"She requires the greatest care and attention. I should be very glad, Lucie, if you would go over there this afternoon; she begged particularly to have you."

"Gladly," said the young girl.

"But that can not be," said his mother, "we are invited to a coffee party at the postmistress's. She has particularly invited Lucie."

"Then make her excuses. I have promised Frau von Lowen she should have a visit from Lucie, and I must keep my word to a sick person."

"What is the matter with her? She never troubles herself about anybody," said the old lady, angrily.

"She is nervous."

"That is, she is fanciful!" cried his mother.

"No, it is not that. You cannot judge of the matter, mother, as you do not know the circumstances. However, I wish that Lucie, for Frau von Lowen's sake as a sick person, and for mine as a physician, should go over and try to cheer her up a little." During this debate he had finished his coffee, and getting up took his hat from a chair. "Of course, only on condition that Lucie is willing," he added.

She nodded assent, and followed him to the door. "What was the matter with her?" she whispered.

She had a fit of despair; she has a very nervous temperament. I found her pacing her room, frightened and unable to get her breath; the whole house was alarmed. She kept longing to come to you."

"Is it very serious?" asked the girl, with anxious eyes.

"No, no, my child; she will be much quieter to-day. But she must first of all be made to think of other things."

As Lucie returned to the sitting-room, the Frau Counselor was saying to her sister-in-law:

"It will be very embarrassing to have to say that she has gone to Frau von Lowen. Alfred, with all his new-fangled ideas of tolerating such things, had better have remained in the large town of H—, where Sodom and Gomorrah are thought good style."

"But, sister-in-law," protested Dettchen, "what could he do? You can not refuse the young baroness."

The Frau Counselor could evidently think of nothing; she satisfied herself with a long-drawn "No, no!" and turning to Lucie, she said:

"Yesterday morning you forgot to dust the glass shade over the feather flowers. Yesterday afternoon, when the postmistress came, she made marks on it with her finger, and then held it up to the light. I pretended not to see it, but—"

"Ach! forgive me," said the girl, and began her dusting at once with the glass in question.

About four o'clock she went to Hortense. Before her, with a stately tread, marched Frau Adler, in a brown silk dress, her cap, basket, and wrap upon her arm. She had intended starting somewhat before Lucie, although they were going in the same direction, because she did not want to see her son's future wife enter the Meerfeldt house. But she had been detained by an acquaintance, and had to let herself be overtaken by a light step. Without turning her head she allowed the girl to accompany her, and only out of the corners of her eyes did she see the beaming face.

"She ought to thank you for neglecting respectable people for her," said the old lady. "Alfred will see some time that I am right; but then it is usually too late."

She nodded once more to Lucie as they came near the gate, and with her head erect strode on.

[TO BE CONTINUED.]

Only For Pleasure.

In a grand old city in the southwest of England, one so grave, so solemn, that it cannot see its own jokes, may be read on the notice board of a grassy inclosure: "Pleasure Grounds. Notice—These grounds are for pleasure only. No games or play allowed!"

Burn the Trash.

Oh, housewife, carrying that old chair with broken legs and missing seat up the attic stairs, pause and consider. Of what earthly use are the old broken pieces of furniture, old boxes of scraps and millinery and the general "lumber" that clutters up your attic, gathering dust, grime and germs? Why not make a rousing good bonfire a part of your house cleaning and make it the funeral pyre of the accumulated trash of years? You will be none the poorer by so doing.

French Working Women.

More than 6,300,000 Frenchwomen work for their living. Most of these outside workers (more than 2,700,000) are employed in forestry or agriculture, including women landowners. Industrial occupations claim nearly 2,000,000 more, the cloister 120,000, the theater about 12,000 and the liberal professions 128,460.

Summed Up.

Wall street arithmetic:
10 mills make one trust,
10 trusts make one combine,
10 combines make one merger,
10 mergers make one magnate,
1 magnate makes all the money.

Moths and Blankets.

To prevent moths in blankets sprinkle shavings of yellow soap among their folds before storing them away. The soap can easily be shaken out when the blankets are to be used, and in the meantime it will save you much worry and anxiety, for moths will not go near it.

When Rollo Saw the Pigs.

I think that God made little pigs,
Not for the pork man's trade,
But sent them here upon the earth
So footballs could be made.

Would Be His Salvation.

When hunters go beating the furze,
My feelings it badly unnerves,
For 'twould save me much pain
And be really a gain
To shoot on my wife's new preserves.

Missed a Trick.

Thespis—Why did she discharge her press agent?

Foyer—There was a fresh bit of scandal about her, and he never heard of it.

A NEW ERA MARKED.

First Sailing of New Steamship Line to South Africa a Success.

A copy of The Cape Town Argus, to hand, contains an interesting article on the arrival of Canadian produce in South Africa. In part, the article says:

"Tuesday last marked a day which, it may be confidently predicted, ushered in a new era in the relations between South Africa and her great sister, Canada. The Allan liner Ontarian, 4,300 tons, from Montreal and Quebec, entered Table Bay filled to the hatches with Canadian produce for the great South African market. She is the first steamer of the new direct monthly service, jointly run by the Allan, the Elder-Dempster and Furness lines, under contract with the Dominion Government, who pay them a total subsidy of about £25,000 per annum. The next to arrive will be the Elder-Dempster liner Melville, 4,391 tons, also from Montreal and Quebec, which sailed on the 18th inst., and is due to arrive about Dec. 12. She will be the last to leave these ports this season, as, on account of the ice, the Furness' liner Oriana, which follows her on Dec. 18, will sail from Halifax and St. John. The Ontarian also calls at Port Elizabeth and Durban; the Melville at Cape Town, East London and Durban. Messrs. Laing, Miller & Co. are the local agents.

"The Ontarian was filled up with a cargo, a great proportion of which consisted of butter; the Melville it seems is also full up. Some particulars of the Ontarian's cargo, totalling some 4,400 tons, should prove of interest to all who are concerned in the important question of the promotion of intercolonial trade. In addition to over 4,000 boxes of butter, she brought a quantity of machinery of various kinds for Johannesburg. Practically the whole of the butter was consigned to Cape Town, in addition to a quantity of furniture, timber, flour, peas and beans, canned fruit, etc. Cape Town's proportion of the 4,400 tons was 1,200. Port Elizabeth's was the same, being of much the same nature (with the exception of the butter), while Durban takes the largest share, with 2,000 tons, including flour, oats, apples, beans, hams and other articles."

Continuing the article contained an interview with James G. Jardine, Canadian Trade Commissioner in that country, in which he expressed his delight at the success of the first sailing of the new line, and a profound hope for increased trade relations between Canada and South Africa.

Thought He Was a Bookie.

Since the appearance of W. A. Fraser's novel of the racecourse, "Thoroughbreds," he has become the subject of many jokes devised by his fellow sportsmen whenever he appears at the tracks, at all of which he is well known as a horseowner and racer. Recently, as he was standing in the enclosure, a man, who was obviously a recent arrival from England, approached him and said, politely:

"My dear sir, I'd like to place a bet."

"Well, I've no objections," said Mr. Fraser.

"I want to put a fiver on Getaway to win. What odds do you offer?"

"I don't offer any odds," said the horseman, somewhat surprised, "What you want is a bookmaker."

"Aren't you a bookmaker?"

"See here," said the author, beginning to get exasperated, "I don't know what you mean by this extraordinary performance, but if you're trying to be impertinent——"

"My dear sir! my dear sir!" cried the other in distress, that was obviously genuine, "I meant no offence. Those gentlemen directed me to you as the man who made the best book that was ever made about the track."

Looking in the direction indicated, Mr. Fraser beheld three of his friends convulsed with glee.

"All right," he said, sadly; "that's one more on me."

A Costly Perfume.

Attar of ylang ylang, which rivals the attar of roses as an exquisite perfume and sells at $40 to $50 or more a pound, is the product of an Asiatic tree that reaches its highest development in the Philippine Islands. The tree grows to a height of sixty feet, when three years old begins bearing long greenish yellow flowers and at the age of eight may produce yearly 100 pounds of these flowers, blossoming every month. The attar is obtained by simple distillation of the choicest petals with water, no chemicals being used. Besides its value as a perfume for hair and toilet waters the product is prized among the natives as a medicine, being credited with curing toothache and numerous other pains.

Health Hints.

A healing soap is made by melting a small cake of pure toilet soap with an equal quantity of mutton tallow and half as much cornmeal. It should be well mixed and let cool. If the hands are washed with it they will never chap.

Insomnia is often caused by worry upsetting the stomach, for indigession will inflate the blood vessels of the brain. Recognizing this, doctors are now prescribing hot water internally and externally. Before going to bed the person so afflicted should put the feet into hot water. The object of this is to draw the blood from the head, for when the blood vessels are inflated they press against the skull, the result being fears, apprehensions and wakefulness.

Ah!

Absent-Minded Professor (after the introduction)—May I ask whether you are related to the Miss Ashton whom I met at the seaside last summer? Miss Ashton—Why, professor, I am the same Miss Ashton! Professor—Ah, indeed! That no doubt accounts for the remarkable resemblance.—Sydney Town and Country Journal.

A HORSE'S SOUNDNESS.

T. H. Haskett, of This Province, Gives Some Rules to Prove It.

First give the horse a quick trot or gallop to see if he is lame. As soon as he stops, put your ear to his nostrils and detect if possible any wheezing noise. In this way his wind is tested. Then examine his nostrils and mouth to see that there are no enlargements, discharges or anything unnatural. At the same time determine the age of the animal by his teeth. Look closely into the eye to see there is nothing wrong with the pupil or sight. If he steps high and awkward with front feet when approaching you, be more careful in examining his sight.

Pass your hand around his ears and over the poll of his head, watching for sores or discharge from the ear, and for poll evil, shown by a lump on the top of the neck behind the ears. Then examine one side of the horse first, commencing at the neck, running the hand down the side of the neck under the mane, watching carefully for warts, sores, etc. Then down the shoulder, watching for collar galls and tumors. After this, raise the hand to the withers, watching carefully for fistulous withers, which is an enlargement, usually accompanied by a discharge and soreness. Then down over the shoulder blade, watching for sweeney, which is shown by a hollowness of the shoulder. Follow down the fore leg, watching for enlargements, such as capped elbow, enlargements of the knees, splints, ringbone, sidebones, puffy enlargements around the fetlock, knuckling, etc. All of these are common diseases and are understood by horsemen.

Lift the foot to see if it is a well formed one, with good strong heels. Watch carefully for thrush and contracted heels. Look back along the belly for warts, swelling of the sheath, ruptures and running sores caused from castration. Then pass your hand down over the back and hips, paying special attention to see the hips are the same size and shape. If a gray horse, examine around the tail for enlargements, or what is known as melanotic tumors. Follow down the hind leg, noting the stifle joint. See that it is all right, and that both stifle joints are the same size. After this, examine the hock joint for enlargements, such as bog and bone spavins, thoroughpin, capped hock, curb, etc. Look down the leg for puffy enlargements, ringbones and sidebones. Then give the hind foot the same examination as the front. Examine the other side of the horse in the same way.

After this, stand back and take a look at him. Note how he stands on his legs, and how he holds his head and neck. It is a good sign if he stands with his feet well under him, head and neck erect, with a bright, cheerful expression. At the same time note if he is inclined to be weak in the knees or fetlocks. Beware of what is known as calf-kneed horses, as they are bad stumblers. See that his hind legs are not too straight or too crooked. Horses with straight hind legs are more inclined to have spavins. Horses with crooked hind legs are liable to curbs. Walk around to the front of the hprse and see if he has a good, wide, full, well-formed chest, and stands straight on his front legs, neither toeing in or out too much. Make a feint as though to strike him with a stick or whip over the side. If he grunts, examine him close to see he is not a roarer, by giving him another sharp trot or gallop for half a mile, then listen at his nostrils for wheezing noises.

Comic Pictures in Old Egypt.

A German savant describes a comic papyrus, unique of its kind. The artist pained burlesque scenes, in which cats and rats conduct themselves in human fashion, quite in the Louis Wain manner, and the manner of cats are attributed to rats, and inversely. In the first scene a rat, attired as a grand dame, is served by a cat that is clothed as a slave, and is presenting a mirror to the mistress. In the next scene the rat has the traits of a young Egyptian dandy, and an obsequious cat, having shaved him, places on his head a huge peruke. In the third sketch a cat cradles in her arms a young rat in the manner of a nurse.

A Profitable Little Flock.

Nearly $2 per hen profit was made for the year ending November 1 by I. B. Koons of Lehigh County, Pa., who started the year with 38 Plymouth Rocks. They laid 4,118 eggs, which at an average of 22 cents per dozen brought $78.65. Chickens sold and used brought $23.05 and the increase in the flock of 42 head was valued at $20, making a total income of $121.70. The expenses for feed were $48.97, leaving a net profit of $72.73. During the year four fowls were lost through disease. This shows that fowls well cared for are profitable live stock.—Orange Judd Farmer.

Strength of an Egg Shell.

An egg shell emptied through a small hole drilled in one end has been found by Mr. A. E. Guy to withstand an external pressure of 675 pounds per square inch, and an internal pressure of sixty-five pounds per square inch. The pressure was applied with an air pump, the shell's porosity being overcome by a thin rubber balloon, which for the respective tests was slipped over the outside of the shell and pushed into the interior through a small opening.

Losing the Match.

Captain Golding — Play cricket? Why, I haven't touched a bat or ball since I was at school. Harold— But this morning mamma was telling papa what a good catch you were!—Punch.

Wonderful All Round.

"I admire your wife's style of writing. Her diction is perfect." "Yes; her diction is all right. So is her contradiction. That's wonderful."—Sydney Town and Country Journal.

The Coming Thing

"Pinto Shell" Cordovan leather for H.B.K. mitts and gloves is bound to displace all other leathers for hard-wear mitts and gloves,

—because it is the toughest, most flexible and lightest leather made.

—because it is a pure vegetable tan without a vestige of oil to chill the hands or stiffen the glove in cold weather or crack it when dried out.

"Pinto Shell" Cordovan can be boiled without injury, in fact it is boil and scorch proof.

H.B.K. BRAND

Sold by all dealers. See this brand

Buy **GOLD STANDARD**

—best value in the world.

One of the experiments made by those whose business it is to test the strength of dynamite, gun-cotton and other explosives is to place fresh plucked leaves between two plates of panel steel and explode cartridges on the upper plate. The recoil in such cases is so great and sudden that the upper plate is driven downward with such force and rapidity as to catch exact impressions of the leaves before their delicate ribs have time to give way to the force of the blow. This novel method of engraving is one of the wonders of the century.

DYSPEPSIA BOOK FREE

A public-spirited association, anxious to relieve sickness, will be glad to send Dyspepsia sufferers an illustrated book explaining the cause of dyspepsia and pointing out a cure. It has brought joy and health to thousands. It is absolutely free. Write to-day. Do not pass by this generous offer. Address American Health Improvement Association, P. O. Box 5316, Boston.

Even those who paddle their own canoe try to borrow somebody else's paddle to do it with.

Stuffed Potatoes.

Choose moderately large potatoes, pare them and scoop out a moderately large hole in the middle. Fill these with sausage meat or a mince of any meat or poultry with a little thickened gravy. Lay the potatoes in a deep baking pan, with a little nice dripping, and bake for upward of an hour.

Height and Weight of Londoners.

The population of London is an inch and a half taller and eight pounds heavier on an average than the people of Hertfordshire, but in Scotland farm hands are found to excel in height by more than that amount the population of Glasgow.

Lombardy Poplar Wood.

Upon the basis of a cord of shellbark hickory wood being worth $6 as fuel, the wood of the Lombardy poplar is worth only $2.40.

A Valuable Badge.

The lord mayor of London wears a badge of office which contains diamonds valued at £120,000.

Why do we wear

Granby Rubbers and Overshoes

Dealers all over Dominion say they give better satisfaction than any others. The people say they fit better, look better, wear better.—Because they are honestly made out of pure new rubber.

"Granby Rubbers wear like iron."

Mrs. Belsom, wife of William Belsom, an engineer on the Grand Trunk transfer, Lansdowne, Ont., was burned to death on Saturday night, her clothing catching fire from a lamp. She fell while going down the cellar stairs.

Coal was selling in London, Ont., on Jan. 10 at $12 per ton. The Knox church services on Sunday were held in the school room, there being no coal for the church furnaces. The First Methodist church week night services for the coming week have been cancelled, except such as may be held in the parsonage, for the same reason.

A dispatch from Philadelphia, Pa., of Jan. 11 says ' One man was killed, half a dozen injured, and the women's wing of the House of Correction was partially wrecked by the explosion of several sticks of dynamite in a shaft of the new filtration plant at Homesburg, a suburb. The dead man, a laborer, was blown to pieces.

Ian MacLaren, in an address to the Head Teachers' association in London the other day, dropped a hint against over-education, which will find many sympathizers. No one, he said, ought to be educated beyond his measure and thus rendered useless for his natural work. On the other hand, no one should fail to receive that education, however, advanced or costly, which his talents deserve.

The Mayor of the City of Leon, in Mexico, which has a population of 80,000, has issued an order that every house in the city must be repainted within a month. Paint dealers have had their stocks depleted as a result of the remarkable order.

Official reports show that the immigration of children to Canada during the last year from Great Britain amounted to 1,256, as against 1,165 in 1901. These numbers are both considerably below those of former years, the cause being the rigid Canadian inspection conducted at Liverpool. There were but two important crimes charged against youths of this class during the year.

A dispatch from St. Catharines, Ont., says: Two freight trains, a double-header on the Grand Trunk and a Wabash, collided south of Port Robinson station, at what is known as the Gauntlet, close to the Chippewa river, on Friday morning. The double-header was going south on the Grand Trunk, and the Wabash was going north from Niagara Falls. Fireman Robert McHarg, of Fort Erie, was instantly killed, and both G. T. R. engineers were slightly injured. Several cars of both lines went over the embankment. The accident is supposed to have been caused by the air brakes failing to work.

A Madrid cable of Jan. 11, says: As King Alfonso, Dowager Queen Christina and the court were returning from church this afternoon, a man who afterwards gave his name as Feito, fired a pistol at one of the carriages in the royal procession. The bullet went wild and no one was injured. The king heard the shot and put his head out of the carriage window, but he was immediately dragged back into his seat by the queen mother, who was beside him. The escort of civil guards immediately jumped upon the would-be assassin and overpowered him.

In pursuance of a general plan for attracting attention, over a thousand unemployed persons, accompanied by a few mounted and unmounted police, marched through the city and west end of London on Jan. 9. There was no disorder of any kind.

Phillip Burtt, general traffic manager of the Northeastern railway, speaking at the Railway Institute of York, relative to his recent investigation of American railway methods, expressed his general admiration of them and said he was of the opinion that British railway men can learn much from America. At the same time, he added, the best American roads will find much to learn and admire in English railroad management.

A WORTHY HERO.

Man Named Dano Faces Death To Rescue a Helpless Comrade.

The story of a boating accident between Rockport and Pine Island, in the St. Lawrence, reveals a daring rescue.

Two men, named Dano and Kelly, were upset. They were returning from Alexandria Bay in a skiff, and when near Pine Island became surrounded with floating ice. Dano got out to shove the boat over a patch, when the ice gave way and the boat capsized, throwing both men into the river.

Dano told Kelly, who could not swim, to cling to the boat, while he himself would try to swim to Pine island, a little distance off, and see if he could get aid. Dano reached shore after an exhausting swim through the chilling water and broken ice. He shouted for help desperately, but before his cries were heard on the mainland he heard Kelly cry out that he could hold out but a short time longer, and appealed to him for help.

Dano, benumbed and half-paralyzed as he was by his swim from the boat to the island, could not resist the call for help, but plunged unhesitatingly once more into the icy St. Lawrence. He reached the boat, and brought the old man safely through the water across the fringe of ice surrounding Pine island to the shore.

There the men called for aid, and their cries attracted the attention of residents, who went to their assistance.

When help reached them, both men were unconscious. Kelly remained in this condition for several hours. Dano, being a younger man, did not sustain serious injuries.

The New Archbishop.

The Right Rev. Dr. Randall Thomas Davidson, Bishop of Winchester, who has been appointed Archbishop of Canterbury, is comparatively a young man for so important a post. He is only 55 years old, and, like his predecessor, is an ardent temperance reformer While Dr. Temple was rugged and astute, Dr. Davidson has always been courtly and urbane, and while Dr. Temple was a schoolmaster, Bishop Davidson brings to bear upon the great work which lies before him an experience gained wholly within the church. Dr. Davidson has not enfoyed good health for a long time past, and it is understood he would have preferred on this account to have declined the archbishopric had not the King personally requested him to accept the position. He was Dean of Windsor, and domestic chaplain to the late Queen Victoria from 1883 to 1891; Bishop of Rochester from 1891 to 1895, and in the latter year was appointed Bishop of Winchester by Her Majesty, with whom he was a great favorite. He was prominent in connection with the funeral services of the late Queen. His translation from Winchester to Canterbury will mean an increase in salary from £6,500 to £15,000. Churchmen are delighted by the new appointment, which is the first important ecclesiastical preferment Premier Balfour has been called upon to recommend.

AN AMNESTY.

CHAMBERLAIN'S STRAIGHT-FORWARD STATEMENT

He Tells the Boer Leaders at Pretoria That Amnesty Cannot Be Granted—Kruger and Others Asked to Account For Money Taken Away With Them.

London cable—Hon. Joseph Chamberlain says he is satisfied so far with the progress of his mission in South Africa. He told a Boer deputation yesterday that a general amnesty for rebels cannot be granted. He asked the members of the late Boer governments in Europe to prove their desire to become good citizens in South Africa by rendering an account of the money they took away with them. Chamberlain is exercising a benevolent directorship in South Africa. His speeches are printed, and details of his conferences with the Boer leaders are supplied by correspondents of the press, but the ordinary functions of public opinion are suspended. Unionist journals applaud in a perfunctory manner everything that he does and says, and the virulent pro-Boers content themselves with reflecting that the settlement is his as the war was also his. There can be no appeal from Chamberlain's decisions, and consequently the Boer leaders are attempting to make the best terms possible and settle compensation claims without delay. It is already evident that his energy and business capacity have made deep impressions upon the Boers, and that they are less resentful and implacable, albeit not yet reconciled to the terms of settlement. Many a practical question will be hastened by his presence, and representative institutions cannot long be deferred; but confederation, when it does come, can hardly be anything but Dutch in political control, and it will remain an open question whether the loyalty of the Boers to the British crown will be as sound as the loyalty of the French Canadians.

ELECTRICITY ON RAILWAYS

The Westinghouse Co. Attempting to Capture Contracts on English Roads.

George Westinghouse, the famous inventor and electrician, entertained a company of British railroad presidents and general managers in London on Jan. 9. The object of the gathering was nominally to witness an exhibition of the Cooper-Hewitt mercury-vapor lamp for lighting docks, factories, railway yards and tunnels, but the real intention is to inaugurate the British Westinghouse company's campaign for the capture of the contracts to introduce electricity on the principal steam railway lines in Great Britain. These contracts, when ready will be the richest prizes in the European field of electrical enterprise. Already the Great Northern, the pioneer railway of progress in England, is experimenting with electrical traction in the works of the Westinghouse company at Manchester, while that company itself is engaged in substituting electricity for steam on the Mersey railway.

Aside from the roads mentioned, the Great Eastern, the North Eastern, the South Eastern, the London, Chatham and Dover, the London, Brighton and South Coast and the Great Western have applied for parliamentary powers to use electricity on their properties. The contract for the Mersey line is a bagatelle compared with some others in prospect, yet it amounts to three-quarters of a million sterling ($3,649,820). The Westinghouse electricians state that the total sum likely to be expended on traction transformation in Great Britain during the ensuing decade defies calculation.

Statistics for 1902 demonstrate that Vienna continues in the front rank of the European capitals in the number of suicides. Last year the year's record shows that there were 453 deaths from suicide, and 467 attempts at self-destruction. The number of women suicides increased. The number of women suicides in ten years has increased from 57 to 124. Most of the deaths are attributed to love and to hunger. The former was responsible for 160 suicides, or attempts at self-destruction, poverty for 158, insanity for 127, domestic troubles for 72, and financial losses for 19. One hundred and sixty persons hanged themselves, 148 used firearms in taking their lives, 60 drowned themselves, and 35 took poison

Cracks have appeared in the arches of the Procuratie Vecchie, on the Piazza of St. Mark, Venice. Investigation shows that a portion of the facade has become detached and that immediate and extensive repairs are necessary to preserve this historic Venetian structure. The palaces on the north and south sides of the Piazza of St. Mark were at one time the residences of the nine "procurators," the highest officials in the Venetian republic after the Doge, whence their name, Procuratie. They were erected in 1496-1520.

It is stated in Montreal that Sir William Mulock, after a conference with representatives of labor, has abandoned his compulsory arbitration bill, introduced last session, and will approach the problem with a new bill on somewhat different lines. He will, however, first ascertain the views of railroad men on his second bill before introducing it in parliament.

TOOK HIS OWN LIFE.

Sad End of a Paardeberg Hero—Life's Worries Too Many.

A Vancouver dispatch says: Tragically pathetic is the simple story woven about the death by his own hand of Constable (formerly Trooper) Lohman, a veteran of the South African war, who, after fighting valiantly for King and country, received no fewer than nine serious wounds during the campaign, returned here to fall into the careless ways of a too "good fellow"; to suffer through his confidence in a friend and former comrade in arms, and finally to be placed under surveillance for departmental irregularities. Seizing an opportunity during the night he sent a revolver bullet crashing through his brain, being his own judge and the executor of an over-stern vigilance.

The immediate cause of Lohman's embarrassment is found in the fact that Trooper Powell during the days of his devotion to Carmen Doering, which preceded his self-murder, borrowed all that remained of Lohman's money and a trifle more under assurance of a prompt repayment and forthwith squandered the whole and then ended a misspent life with a revolver bullet. Lohman had since been cudgelling his brain to try and find ways to make good his shortages to the police department in which he was employed. Then the man for whom Boer bullets had no terrors succumbed completely to worry and despondency, the irritation of old and serious wounds playing a further part in the augmenting of his misery.

Yesterday Chief Constable Campbell found it his duty to put Officer Lohman under surveillance, pending an investigation of his irregularities by Supt. Hussey, who had arranged to come over this morning. At the same time he talked kindly to his subordinate, counselling him to stop drinking and be a man, and all would be right eventually. Lohman gripped his chief's hand, huskily muttering something as to being no good to himself or anyone else, and turned away. Early this morning while Constable McPherson slept, Lohman quietly made preparation for self-execution, leaving a letter for his young wife in San Francisco, of whose existence few had known before; not an historical or grandiloquent farewell, but just the despairing cry of one over-buffeted by fate, with whom the times are ever out of joint, and yet one brave enough to feel himself to blame, although too worn and weary to fairly solve the question of responsibility in life.

"Mein Leiber Guta Ada," he wrote, "this is the last letter I shall write in this world. I have no luck and no sense. I have always been the one that brought disgrace upon the family, on you and on all the friends. Lebe Wohl, mein leiber Ada. I wish I had always taken your advice. I would then be better off and more respected. Oh, why was I not killed in the war, then I would at least have had an honorable death?" The letter was signed "Albert." It had evidently been written and addressed but a moment before the fatal shot was fired. Half an hour later Supt. Hussey arrived by the Charmer to make his investigation. The dead man pleaded "guilty."

Married His Wife Twice.

A Toronto dispatch says: Mrs. Maty Kerr, who until the other day was a washerwoman, living on Richmond street, east, can boast of the distinction of having been twice married to the same man.

The first marriage took place fifty years ago, when she was a lass of 15 years, and on January 2 of this year Kerr again led her to the altar.

After their marriage they lived together for thirty-five years, and two daughters and a son were born to them. She was deserted by her husband, who took the three children with him and went to Manitoba, where he took up land. He is now a wealthy farmer.

The deserted wife had a hard struggle after that, but at last her prospects appear to have brightened, for on New Year's Day Kerr came back and the following day they were remarried, and he was accompanied back to the west by Mrs. Kerr.

He will endeavor to dispose of his farm, and when he does, he will return to Toronto to live.

An extraordinary accident was enquired into recently at the Paddington Coroner's court in London. A few days previous Mr. George Walls, a man 68 years of age, was found dead in bed. A post-mortem examination revealed some false teeth firmly fixed in the dead man's throat. There could be no doubt, said Dr. Angus, that Mr. Walls, while lying asleep on his back, had by snoring caused the plate with the false teeth to fall from the roof of his mouth and lodge in the throat. The sharp edge of the plate had ruptured the small blood vessels, and this had brought about death.

The president of the British Board of Agriculture, speaking at Leicester, promised the agriculturalists every assistance which the government was in a position to grant them. He said that, while the demand for the imposition of protective duties on imported agricultural produce was like "crying for the moon," it was interesting to see how far the foreigner could be made to pay on many of the articles he exported without injuring the home consumer. The existing grain duty was an object lesson in this line.

Water is so scarce in the Japanese Island of Oshima that it is a custom for a bride to take a large tub of drinking water with her to her new home as a kind of dowry.

LO ADVANCING.

ANNUAL REPORT OF INDIAN DEPARTMENT.

Many Are Earning Good Wages in Manitoba and British Columbia—Population is Increasing—Pessimistic Report From Edmonton.

The annual report of the department of Indian affairs has been issued for the year ending June 30 last. The deputy minister says that the Indians throughout the Dominion have by their industry and conduct contributed their quota towards the welfare of the country, and secured comfortable contentment for themselves. The aggregate earnings from the various farms of industry in which the Indians are engaged have exceeded those of the previous year by nearly $213,000. Although small pox continued to linger in the vicinity of many reservations, the disease was kept well under control. There was a somewhat heavy mortality among children during the year,, due largely to the prevalence of malignant measles. The disease was more or less epidemic on several reserves in Manitoba and the Northwest Territories, but the Battleford agency suffered most. Apart from measles and smallpox the other disease most prevalent was tuberculosis. There were during the year 2,500 births and 2,349 deaths, or a net gain of 151 as against 239 for the preceding year. There was a gain of 26 in Ontario, 62 in Quebec, 1 in Prince Edward Island, 34 in British Columbia, 13 in Manitoba and 19 in the Northwest Territories. There was a loss of 2 in Nova Scotia and 2 in New Brunswick. The adoption this year of the figures of the recent Daminion census has considerably augmented the numbers beyond treaty lines and caused some minor changes in the number of scattered or vagrant Indians in some of the provinces. There is a net increase in the population for the year of 8,585. There have been 7,518 added beyond the treaty limits, 1,000 in British Columbia, and 88 in Ontario, while 89 have been deducted from Quebec, leaving the aggregate increase from this cause at 8,517. After allowing for these changes comparison with last year's figures shows an increase of 68, and the difference between that number and 151, the gain through natural causes is no doubt attributed to immigration.

The Indian population by provinces is:—

	1901.	1902.
Ontario	20,753	20,983
Quebec	10,805	10,842
Nova Scotia	2,020	2,067
New Brunswick	1,055	1,044
Prince Edward Island	315	316
British Columbia	24,567	25,500
Manitoba	6,840	6,754
Northwest Territories	14,566	22,804
Outside limits	14,566	22,804
Totals	99,527	108,112

In Manitoba the main opportunities afforded the Indians for earning wages are in connection with the fisheries, although some of them get work from the lumber men and miners in the district.

In the Northwest Territories but few openings exist beyond engagements as farm hands with neighboring farmers.

In British Columbia the fish canneries, the mining operations and the various works connected with the opening up of the province afford many opportunities for employment, and of these the Indians are availing themselves more and more and proportionally discarding their more precarious and supplementary methods of providing for their wants. The Indians of British Columbia who depend on game and fur had a favorable season, and made $203,491 from these pursuits, being a slight increase over their earnings from the same source the year before. By fishing the large sum of $491,150 was realized, an increase of $42,9110.

In the Northwest Territories not many are within reach of fisheries, and only a few outlying bands made a business of hunting and trapping, but yet so many engage in these pursuits to some extent that the aggregate result is considerable, and for the year presenting a value of $149,366, an advance of $27,482 over the last year's total. Throughout the provinces, with the single exception of Manitoba, there has been an increase in the amount earned as wages. The aggregate amount was close upon $1,181,760, an increase not far short of $150,000. While the aggregate number of schools has decreased, it is satisfactory to note the number of pupils in the respective schools has increased. The aggregate enrollment was 9,669, of whom 5,177 were boys, and 4,492 girls. This, as compared with the preceding year shows an increase of 47 male and 46 female pupils.

Surrendered surveyed Indian lands to the extent of 10,346,108 acres were sold during the fiscal year and realized the sum of $160,591.90. At the close of the fiscal year the capital of the Indian trust fund, which at the end of the preceding year amounted to $3,941,393, had increased to $4,045,945. Collections aggregated $167,302 and disbursements $276,749.

Mr. Jas. Gibbons, of the Edmonton agency, in a report to the department, puts on record a pessimistic opinion of the Red man as follow: "In my forty years dealing with Indians I have never yet met a Christian, that is, defining the adjective as we understand it. This may appear a pretty hard statement, but I have yet to find the Indian who would not steal, lie, and be immoral, and as for keeping Sunday, it is only when they are in the presence of the missionaries that they appear to do so; when they are once out of sight they will be found gambling, hunting and dancing. This is as I have found it. I trust others will have had experience that will more favorably impress them.

Mr. Alex. McGibbon, of Qu'Appelle, furnishes a reply to Mr. Gibbons. Speaking of the Indians at Pelican Narrows, nearly a three week's journey northward from Prince Albert, he says: "I have said these Indians attend to their religious duties, and whenever there is a meeting they attend in full force. The four men I had were splendid specimens of the real Indian. They were careful, attentive, cautious, and I felt they were men that could be trusted. They belonged to the English church mission. These men met in their little tent every morning and evening, never missed saying their prayers, and there was no ostentation about them; but these hardy men would, when the time came, quietly walk to the tent, and with the greatest reverence, kneel in prayer, the eldest one leading. If some of our pessimistic friends on Indian missionary work would but witness scenes like this, it would change their views.

AN UNUSUAL OPINION.

George Barnes Thinks British Workmen Superior to American.

A London cable says: George M. Barnes, secretary of the Amalgamated Society of Engineers, and one of the British labor commissioners who recently returned from the United States, has made public some of his impressions which rather surprise those who have had experience on both sides of the Atlantic. Mr. Barnes says of the labor conditions of the two countries, that as far as wages are concerned, England lags considerably, but that in every other respect the comparison favors this country.

"The most noticeable drawbacks in America," he says, "are the congested character of the workshops, the disregard for the comfort of the workers, and the bad sanitation. I am persuaded that on the whole the workmanship of the American mechanic is inferior to that of his English cousin. This, however, is not so observable in the engineering industry as in others. With regard to working hours, as a rule they are longer than in England, especially in the engineering trade, but as I have indicated, wages are higher.

"I do not think the American works harder than the English mechanic, but there is a great difference in the point of view. The Americans point of view is dominant by the one central idea of labor-saving machinery, that being so, it follows that production is on a larger scale. But man for man, I do not think the output of the American exceeds that of his English compeer. With regard to the social conditions of the American workmen, I think they are considerably less pleasant than those prevailing in this country. There is also less sense of civic responsibility, and as a consequence the streets are less cleanly and the buildings more uneven and unsightly than here. That may sound incredible, but it is the impression I have formed. I have no hesitation in affirming that the English workmanship is more thorough than the American, and that our mechanics are on the whole much better trained."

New Brunswick Tragedy.

William Friars, of Point Duchene, N. B., aged 20, was burned to death, his sister-in-law, Mrs. J. D. Friars, and her sister, were severely injured in a fire which destroyed the premises of J. D. Friars at Waterford, N. B., Sunday night.

The cheese and butter factory, store and dwelling, cold storage warehouse and icehouse of J. D. Friars was entirely destroyed. Wm. Friars, a brother of the proprietor, and Edwin Robinson, a clerk, were in the room above the store where the fire originated. The clerk got out safely and Friars was crossing the floor to leave the building when an explosion took place, tearing the floor and precipitating Friars into the flames below. Mrs. Friars and her sister jumped from their dwelling window and sustained some injuries.

It is thought the fire started from an overheated stove in the store. The property loss is about $7,000 and the insurance $3,000.

The Manitoba legislature will meet on Feb. 19.

The United States Congress will remove the coal duties for 90 days.

R. Owen was killed by a fall of 60 feet from a Fort William elevator on Jan. 12.

The Scottish curlers met their second defeat in Montreal on Jan. 12.

Canadian footballers were defeated at Mountain Ash, England, on 12th inst., by 25 points to nil.

W. Henderson, of the Scottish curling team, will ask Canada's aid in urging Britain to remove the cattle embargo.

According to Col. Pope, who has been appointed receiver of the American Bicycle Co., the downfall of that concern and the death of the bicycle business generally is due to not advertising. He says: "The cessation of advertising killed the bicycle business, and the way to revive it is to resume that most important matter. I thoroughly believe in it. You can see how I feel in the matter when I tell you that I spent $500,000 in one year in that sort of publicity, and that is my idea for the future—to advertise."

Cranbrook

From the Herald.

Richard Joyce came down from Fernie last Saturday and visited Kimberley.

The Herald regrets to announce the fact that Hill & Co. are preparing to close out their business in Cranbrook.

Conditions are rapidly approaching a real famine in Cranbrook and several people are using wood in coal stoves.

Mr. Leitch, manager of the East Kootenay Lumber Company, has gone to Winnipeg to look after new machinery for the company's mills.

Cranbrook to-day is the most orderly town of its size in Canada. Its people are law abiding, and any attempt on the part of any faction to impress the world at large that this is a lawless community will fall flat. The facts will not bear out the assertion.

COMMUNICATIONS.

(Copied from the Victoria Daily Times by request of members of the Miners' Union).

The Editor does not hold himself responsible for the opinions expressed in this column.

To the Editor.

Hoping you will give me place in your valuable paper in reference to the report of the expert commission on the mine disaster at Fernie last May, whereby we lost a son. I read in the Colonist yesterday morning the heading that it was criminal carelessness. In that I quite agree, but that criminal carelessness must be put upon the right shoulders. They say that the verdict was arrived at by mining experts? Who do they consider experts? Which of those men was an experienced miner? Not Mr. Robinson, for he admitted at the inquest that he was not. Not Mr. Faulds, certainly. He had been up before the examination board time and again for some years, and only got a certificate about a month or over. In the report Mr. Sheppard's evidence was not given. Why? For he is an experienced miner, the only one that was amongst them. Would the Minister of Mines be honest enough to put in the full report Mr. Sheppard sent him last July? Why did he not do it? I now challenge him to do so, but I know he won't, as it is very interesting reading. I am a miner from boyhood, and was working in Fernie mines at the time of the explosion, and my work there took me through all the mines, No. 1, No. 2 and No. 3, so I was constantly through the mines, consequently I know more about the state the mines were in than any one of those experts miners. I have not a doubt that Mr. Robinson is a good mineralogist and geologist, but I feel that the most of his evidence was second-hand. In his report he says the explosion took place in the McDonald entry. He was heard to say that at the mouth of the mine before he went in, after talking with the officials. He also says that the igniting cause will probably remain a mystery. At the same time it must be a naked light. What a vague report. He is drawing on his imagination. When he was asked at the inquest by S. S. Taylor, K. C., how could he account for a seven hundred pound coal cutting machine thrown in the direction of the McDonald entry, he scratched his head and said he could not tell. He was no expert. He was further asked how he could account for the mule being before the car and the car knocked off the road with the back smashed in and pitched towards the McDonald entry. He could not tell. Now he says boldly he knows all about it. He also says that the man that was blasting in the machine room was named Beach, and that he was not there. That is not true. The man that was blaster was Andrew Patterson. I saw him when his corpse was brought out. He was so badly burned that he could only be known by some of the clothes left on him. His poor wife and three helpless children are living at South Wellington, on this island, and his body was got at the place his work was, and three or four men beside him where they had pulled the machine out on the main road to blast. Further, he says in his report there are only safety lamps used in the mines. That is not true. There were open lamps used in the mines, in all the main roads. He also says that the men had matches and also opened their lamps. It was very easy to do so. A piece of hard wood would do that, and trapper boys of twelve or fourteen years of age were given keys by the bosses to open the men's lamps if any went out. I have seen the driving bosses, the pit bosses and the fire boss thawing out air pipes last winter, three thousand feet in from the mouth of the mine, with bon-fires. Where is the difference between matches and bon-fires? He says, too, that there were men especially for blasting. They always open their lamps to blast. There was no safety in that. The miners often blasted themselves, and as for smoking, I have met the superintendent, Mr. Drennen, smoking often in all the mines. He was an inveterate smoker, and did not know when he was smoking.

I also will call the Minister of Mines' attention to what happened about three months before the explosion. One of the fire bosses took upon himself to enforce the law. He searched the miners going in to work and found matches and pipes on thirteen. He sent them to Fernie, and the magistrates did not know what to do. They wrote to Colonel Prior for instructions on the matter. He consulted the Attorney-General. Finally the magistrate got orders to fine one dollar and only three men were so fined, and they were all sent back to work, instead of getting six months in jail without a fine. But men were scarce and they wanted to get out coal, and thirteen men was a big loss. It would have been better for Mr. Robinson to have said nothing about it, for it is only adding insult to injury to the sufferers who lost their dear ones in the explosion, through the criminal carelessness, as they admit themselves, of those that owned and ran the mines.

As a practical miner, I think the report is very vague. Faulds says in his report there was not proper methods adopted to ventilate the workings. He further says they needed some means of watering. He says again that the explosion followed the course of the intake workings used for haulage, where there was dust and no fire-damp. Yes, Mr. Faulds, there was dust, thousands of tons of it. I think the law shows in British Columbia that all haulage roads and working places should be watered, and also sixty feet from the working places, before any shots are blasted, but that law was a dead letter in the Fernie mines, as there was no provision made for watering at all, and when Mr. McGregor, the mine inspector, wrote to the Minister of Mines that the mines were in a dangerous condition and that it filled him with apprehension and dread for the safety of the men and boys at work there, they quietly removed him and put a protegee of Dunsmuir's, named Dick, in his place, and the miners of Fernie hold Dick, along with the Minister of Mines, responsible for the explosion, as, if these men had done their duty according to the law for mines in British Columbia the disaster would never have occurred. The truth is, the mines were run in a slip-shod, cheap manner, and I quite agree with the Colonist that it was criminal carelessness; that also was the verdict of the jury. I was in court at the inquest for the eleven days and heard all the evidence and also the verdict of the jury. Faulds says the verdict of the jury is not consistent with the location of the place and cause of the explosion as given in our evidence at the inquest at Fernie. I assure you Mr. Editor that they took little notice of Faulds evidence, as he was not in the witness box five minutes, but Shepherd was in for hours, as they had a practical man to examine. As far as the location or cause of the explosion was concerned they gave in their verdict, it was a disputed point where it had started, as there were twenty miners swore it started in the machine room, by a shot blasted with common black powder. He says the flame causing the explosion came either from the lamp of James Muir in some way, or more probably from another miner who had matches, by either striking a match or drawing the flame through the gauze of a safety lamp for a smoke. His imagination must be very active. The idea of drawing a flame through the gauze of a safety lamp to light a pipe! The gauze of a lamp that will keep out carbonated hydrogen gas will let out no flame to light a pipe, and old practical miners must laugh at this part of his report. No, Mr. Faulds, you nor no man knows where it started or how it started. Twenty miners say it happened in the machine room; three so-called experts, and the company's officials say it started in McDonald's entry; but, wherever it started, the mine was in a dangerous state, and there were one hundred and thirty men and boys sacrificed, and some are in the mine yet. The Minister of Mines was away for five or six weeks through the Kootenays, wining and dining, and took no steps to get them out, and I think their excuse in their report is brutal. Also, Dick is still in the same position.

HUGH DIXON, Miner.

Victoria, Jan. 5th, 1903.

TO-DAY'S DESPATCHES.

Victoria, B. C., Jan. 16.—A new writ for the bye-election in West Yale has been issued returnable on March 2nd, but the date of the election has not yet been announced. The issuance of the new writ is supposed to be for the purpose of installing the mandamus proceedings. John Clapperton, former government agent at Nicola, is announced as the candidate. He is an old timer but a non resident of the constituency.

Rossland, B. C., Jan. 16.—At noon today the police commissioners issued an order to the police to close all gambling in the city. Notice was accordingly served on the eight or ten places where roulette, poker, and Black Jack have flourished undisturbed for the past eight months. The order is the result of the municipal elections yesterday, which resulted in the defeat of the officials who permitted gambling.

Mr. Harry J. Matheson, publisher of the Frank Sentinel, and Mrs. Ethella L. Bradshaw, of Rathdrum, Idaho, were married in Spokane on Jan. 6th. They passed through Fernie on their way home last Thursday.

The Elder Sothern's Tact.

It was in the year 1863 or 1864. During the summer months Sothern, with John T. Raymond and several other well known actors, occupied the local theater of a seaside summer resort, to which he and his company drew a houseful of people several nights in the week to hear and see them act—rehearse it really was in preparation for their next winter's New York season—the most important of Shakespeare's plays.

The little building had of course a gallery, and in the gallery the "gods" became so obstreperous on occasions that it was with great difficulty the play could be proceeded with. The ringleader, a well known rough of the town, was a man named Bill Hanrahan. One night a happy inspiration seized Sothern. Having learned the name of this prominent member of the rowdy element, he addressed him in the midst of the most unearthly noises as follows: "Mr. Hanrahan, will you be good enough to take charge of the gallery and keep order for me, and I shall feel very grateful." The result was magical. Bill became at once an official of the theater and as such cracked the heads of a few of his erstwhile fellow rioters with such good effect that it was only a little time before the best of order prevailed.

THE MOSQUITO AGAIN.

In the marshes where the bullfrog sings
his mellow serenade,
In the swamps where booms the bittern in
the gloomy cypress shade
And the cheerful alligator lurks within
the everglade;

In the cistern, where rainwater pours and
trickles down the spout;
In stagnant pools, in grasses and most
everywhere about,
The bloodthirsty mosquito from the egg is
hatching out.

And, once hatched, he comes among us
with his pesky little bill,
And he settles on our persons, very much
against our will,
And, inserting his proboscis, he proceeds
at once to drill,

And when through our epidermis he has
managed for to bore
He fills up his little carcass to the bursting point with gore.
This is strictly true, though doubtless you
suspected it before.

You think that you have got him and find
out that you have not,
For he keeps one eye wide open to elude
the sudden swat
And knows just how long it's healthy to
remain upon the spot.

You may screen up all your windows and
hang netting o'er your bed;
It doesn't keep him out, because he stays
inside instead.
And you wake up in the morning and find
that you've been bled.

Similarly you may smear yourself with
evil smelling stuff
That is guaranteed by druggists on mosquitoes to be rough,
But they seem to quite enjoy it, though it
does smell bad enough.

So he breaks our summer slumbers, robs
us of our needed rest;
So he drives us from our porches, where
the vines he doth infest,
And he spoils the fun of fishing, does this
sanguinary pest.

—Chicago News.

Humiliating.

"Have you seen poor Annette?"
"Neigh."
"Te-he! Her master is making her wear her last summer's hat again this season."—New York Journal.

The Faith Cure Sandwich.

"This," observes my companion at the quick lunch counter, "is the latest conceit of the purveyors to hungry man."

Here he showed me two thin slices of bread.

"And what is it?" I inquired, arranging my deviled crab and lemon pie artistically before me.

"This is the faith cure roast beef sandwich. You know you have the bread, but you have to turn on the faith when you wish to find the beef."—Judge.

NOTICE is hereby given that 30 days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase 320 acres of land situated in the District of East Kootenay in the Province of British Columbia on the west side of Elk River commencing at a post marked Mr. Whistle, north east corner post, thence 80 chains west, thence 40 chains north, thence 80 chains east to the bank of Elk River, thence 40 chains south along the sand bank o Elk River to the point of commencement.

J. H. SIMISTER

Dated this 11th day of January 1903 210-4

Notice is hereby given that 30 days after date, I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase one hundred and sixty acres of land, situate in the District of East Kootenay in the Province of British Columbia and on the east side of the Kootenay River and north of lot 123 and commencing at initial post marked Dan Hayes north west corder post, planted on the east bank of the Kootenay River and near John Brown's north east corner post (application for purchase) thence forty chains east following the bank of the Elk river up stream; thence forty chains south; thence forty chains west; thence forty chains north to the place of commencement, containing one hundred and sixty acres more or less.

DAN HAYES.

THE MORRISSEY FIRE.

BIG BLAZE AT THE NEW TOWN. SERIOUS LOSS OF LIFE AND PROPERTY.

The Pioneer Hotel Destroyed on Saturday Night. H. Marriott Burned to Death. Property Insured For $3000.

A serious conflagration took place at Morrissey last Saturday night by which considerable property was destroyed and one human life was lost. The reflection was seen in the sky by many Fernie citizens but they were scarcely prepared to believe the startling news which shortly after flashed over the wire that four lives were lost in a fire which burned the Pioneer Hotel to the ground. Considerable relief was felt when a later report limited the number of killed to one.

The day previous had been pay-day and considerable drinking had been indulged in. The crowd was greatly increased just previous to the fire by many who had attended the fight and the large barroom was crowded with men most of whom were under the influence of liquor. Drinks for the house had been called which the bartender, Cole Sedgwick, was preparing when a scuffle occurred near the bar. A man was raised by some means and the lamp, a large sized Rochester, was knocked from its holder onto the floor. The oil ran out freely and ignited. Sedgwick jumped over the bar and grasped the burning lamp to throw it out of the window when it was knocked out of his hands. He again picked it up and this time succeeded in landing it outside but by this time nearly all its contents, which was nearly a gallon of oil was scattered over the floor and smoke and flame filled the room. A stampede occurred and it was wiith difficulty that the crowd escaped through the two doors. It was only a matter of a few moments till the entire building was in flames and the occupants found it impossible to save any effects. Mr. Sedgwick made a heroic effort to save the cash in the register. After throwing the lamp out he rushed back for that purpose and finding it would not open he took it up under his arm. In jumping off the bar he slipped and the register fell from his grasp. By this time he was so choked with smoke that it was all he could do to save himself. There was about $200 in cash destroyed in the register.

Herbert Marriott, a young man of about 25, sleeping above the bar lost his life in the fire. The trunk of his body was afterward found and lying on it was some silver money and a knife which had evidently been in his vest pocket and the knife was recognized as one carried by Marriott. A. Johnson, the proprietor, who was upstairs when the first alarm was given rushed to the stair way and hearing a call for a blanket went in search of one, at the same time giving instructions to a servant girl to call Marriott, who was the only man known to be in bed. By the time he appeared with the blanket it was found that the fire was beyond control and in making his way down the front stairs and through the flame he was somewhat burned about the head, one of the servant girls also had her hair singed.

The loss to Mr. Kanouse will not be heavy as the building and furniture is insured to the amount of $1800 in the Anglo American and $1200 in the London Mutual by the local agent, F. J. Watson. Mr. Johnson loses his stock of liquors and cigars amounting to several hundred dollars, besides his personal effects, and the other inmates, with the exception of one servant girl who saved a bundle of clothes, lost everything.

Mr. Sedgwick is badly burned about the hands, especially the left one, which was chiefly used in carrying the lamp. He came down to the Fernie hospital on Sunday evening but is since able to be out.

Coroner H. H. Trites, Chief Forbes and officer McMullen went down on Monday and an inquest was held in the Australian hotel. The evidence taken from eight or ten witnesses examined was of a contradictory nature, as apparently the excitement or drink or both had rendered them unable to give a connected account of how the accident had occurred. It was shown that two or three men were having some sort of a scuffle and that one man was hoisted into the air and either his feet or his head struck the lamp which was about seven feet from the floor. S. Robinson, who was said by some to have grasped the lamp in his hands, clearly proved that such was not the case by showing his hands which were not burned at all. He said that he took off his coat with the intention of using it on the flames but in the excitement could accomplish little. Medical evidence went to show that the heat of the fire was not sufficient to entirely consume a human body and as no other remains were found it is certain that no other deaths occurred, and moreover no other person is missing. The inquest was adjourned until the 27th when further evidence will be taken.

The deceased recently came from Phoenix. He had been employed at the Australian hotel as kitchen help and had just drawn his pay and given up his job. He had been drinking heavily for several days and had been under the influence of liquor shortly before the time of the fire. Marriott had evidently been warned of his danger for Sedgwick in his retreat through the passage to the rear entrance came upon the body of a man lying on the floor and from the location of Marriott's body when found this evidently was he. He apparently left the room and walked towards the fire instead of away from it. The body was buried on Tuesday at Morrissey.

ACCOUNTS ARE SHORT.

E. NEALE LEAVES TOWN UNEXPECTEDLY.

Secretary-Treasurer of the Miners' Union In Trouble.

Edwin Neale who has for several months held the position of Secretary-Treasurer of the Gladstone Miners Union has got behind in his accounts. An auditing committee especially appointed to investigate the shortage reported at last Saturday's regular meeting that including the wages coming to the secretary he was within a few dollars of being clear and he was handed a clearance receipt and his bondsmen's papers. At the the same meeting Neale presented his resignation to the Union which was accepted and Thos. Craig was appointed secretary pro tem.

It is reported a more thorough investigation has since shown that a shortage still exists, owing to false entries being made in the cash book. The bank book of the union was also tampered with by the secretary, fictitious deposits having been entered. This was afterward made good by Mr. Neale.

On Monday evening Neale was asked to sign a 24 hour note for the money that was then known that he owed the Union This he refused to do and on the following morning left the town very unexpectedly on the west express. He did not buy a ticket at the depot and it is not known where his destination is.

It is reported that besides owing the local union he has left the books of the district miners' union, of which he was secretary-treasurer, in an unsatisfactory condition inasmuch as they show a deficit.

In addition to these troubles Mr. Neale has left large debts behind among the merchants. Including mortgages on furniture it is said that these sums will aggregate $1500.

Much sympathy is felt for Mrs. Neale by the townspeople and it is mostly owing to this fact that legal action was not taken.

Miss Jones, of Pincher Creek, is at present the guest of Mrs. S. Graham.

Miss Fernie entertained a number of her friends at a bridge-whist party on Wednesday evening.

Mr. Randall came up from Mott's survey camp at Hosmer on Thursday. He reports that the survey will be completed in a couple of weeks.

M. Kastner, local agent for the Sun Life Assurance Co. of Canada, wishes to direct your attention to the card of thanks signed by Thomas Hand, which appears in another column.

A meeting of the Ladies Hospital Auxiliary took place at Mrs. Bonnell's home on Thursday evening to complete the arrangements for the Hospital ball on St. Valentine's Eve.

Miss Todhunter has been visiting Mrs. Richards, of the Mines this week. Mrs. Richards has recently received the sad news of the death of her mother in England.

Returns for 1902

Customs collections at the outport of Fernie for the year ending December 31st, 1902 amounted to $37,335.72. The Inland Revenue collections for the same period were $16,876.36, making a total of $54,212.08.

Mr. and Mrs. Cudahee Leave.

A large number of friends of Mr. and Mrs. Cudahee were at the depot on Wednesday evening to see them off for their former home in Nova Scotia, where they will in future reside. "Bob" is one of nature's gentlemen, a man who leaves many friends and few enemies and all who know them wish them all kinds of prosperity and happiness.

THE HAT VS. FERNIE.

INTERESTING GAME OF HOCKEY LAST SATURDAY.

Locals Lose by 7-4. Large Crowd Witness Game.

The hockey match last Saturday evening between Medicine Hat and Fernie was witnessed by a large audience which turned out to see the momentous game of the season, and while the result was disappointing to every one, inasmuch as it practically meant the surrender of the Liphardt Cup, few have lost confidence in our club and with the practice that the victorious team has had it is felt that the locals could easily have won.

The individual rushes on the part of the Fernie aggregation were ofter brilliant but it was the combination work of the visitors which won them the game. C. H. Prest, the referee, gave the starting signal at 9:30. During the first ten minutes fast hockey was played without any score and then one of the gasoline lamps refused to work and a long delay occurred. When the game was resumed the visitors forged to the front scoring three games in 3 min., 9 min., and one half min. respectively. Fernie then woke up and played with a determination to win. In two minutes Kastner scored and in another two minutes he again did the trick. Turnbull then got the puck and landed it in the Fernie net in half a minute. Half time was called immediately after Sturdy scored the third game for the locals, leaving it 4-3 in favor of the Hat.

The best hockey of the match was played during the 15 minutes following half time. Five minutes of stiff playing resulted in another score by Kastner, leaving it a tie. Twice in rapid succession was the puck driven into the visitor's net but were not allowed as the whistle had previously blown for off-sides. During the last quarter the pace began to tell on our forwards and three goals were added by the Prairie boys. The first of these was a fluke being accidentally done by our defence.

The game was clean and the best of good feeling prevailed. The referee's decisions were fair and he did not find it necessary to reprimand any player. Turnbull on the forward line did the star playing for the visitors and nearly all their scores were made by him. Adsit on the right wing also did effective work. On the local team Kastner at cover point played a splendid game, and did much towards retrieving the lost honors. Sturdy at centre forward played an aggre sive game and Dowsley at point was always to be relied on. This game is the 6th in succession that Medicine Hat has won which practically means that the two cups will ornament conspicious places in that town during the next year.

POLICE COURT.

Stipendiary Magistrate Armstrong held sittings on Wednesday and Thursday. A lengthy case was that of Geo. Griffith proprietor of the Hoffman Hotel Elko, who was accused of receiving the stolen cigars which John Ritchie was convicted of stealing last week. W. R. Ross prosecuted the case while S. Herchmer pleaded for the defence. The magistrate dismissed the case giving the accused the benefit of the doubt.

Chas. Demaurez was accused of keeping a gaming house. The police had raided the house on a magistrate's search warrant and claimed to have gathered damaging evidence. W. R. Ross, who appeared for the accused, claimed that the raid was illegal as warrants for this purpose cannot be signed by any other than the leading magistrate of the district. Chief Forbes in prosecuting the case asked for an enlargement of the case for a week pending a decision from the Attorney-General and the case was adjourned for that period.

John Madden, the fighter, on a charge of being loose, idle and disorderly, was given 24 hours to leave the town, or otherwise one month in goal. The "Kid" consequently took the west bound express yesterday.

IMPROVEMENTS AT OUR SCHOOL

An Excellent Set of Flags and Pictures Purchased. A Teachers' Room Will be Fitted Up.

The teachers and pupils of the Fernie Public School are to be congratulated upon the success of their efforts to secure flags and pictures for decoration purposes.

Some time ago Principal McMordie energetically set to work to make certain improvements in this line and as a starter collected $50 from those interested in educational matters. This sum he expected to have supplemented by a grant of $25 from the Educational Department.

As a result of this collection a fine set of flags arrived yesterday. They consist of 112 good sized British and Canadian flags of cotton manufacture for wall decorations, 8 woollen flags 2½x4½ and a large pale flag 13½x8, which is a beauty. For the latter Messrs Mott, Son, & Co., have promised a pole that will stand at least 60 ft. above the ground. The staff of teachers will doubtless find these flags of much assistance in inculcating patriotic sentiment in their pupils and this object must appeal to all as most praise-worthy.

A set of 70 beautiful pictures, some framed, have been purchased and are now on the way. They are gems of art, consisting of portraits and nature studies calculated to beautify and instruct. These with the flags will greatly relieve the bare appearance of the walls.

The teachers are making an effort to get the Department to alter the two ante rooms and hall at the front of the second floor making one into a suitable Teacher's Room. The teachers have generously offered to furnish this at their own expense and their request should certainly met with the approval of the Department.

PINCHER VS. THE HAT

LATEST HOCKEY NOTES.

Pincher Creek vs Medicine Hat. Frank Game Postponed. Cranbrook Anxious for a Game.

Pincher Creek played Medicine Hat at the latter place on Thursday instead of yesterday. The day was changed owing to a bonspiel contest on the Friday. The game was very close and Pincher Creek is jubilant over a victory of 3-2, an exact reverse of their other game. Pincher Creek has still a fighting chance of tieing the Hat for the Cups.

The Frank game scheduled for last Wednesday on Fernie ice did not materialize. The boys wired up the day before that they could not come and desired to have the date changed to Monday 26th, which our boys allowed. If the ice recovers from its present soft condition there ought to be a good game for Monday afternoon. Fernie and Frank have never met on the ice but we have pleasant recollections of similar encounters on the lacrosse field, and the boys of Frank bear an excellent reputation of being good sports.

The Cranbrook visitors to town last Saturday expressed a desire to arrange a game with Fernie and a wire was sent down later asking for a game on our ice Thursday night which was promptly accepted. Owing, however, to the soft weather the game had to be called off.

The junior club is arranging dates for Pincher Creek and Macleod and these games will probably be played next week.

AT THE HOTELS.

ROYAL HOTEL.

C. E. Smith, A. G. Low, Montreal; R. H. Carley, J. G. Wilson, A. M. McMahon, W. J. McMillan, F. C. Douglas, F. G. Breen, Winnipeg; A. F. McMillan, F. E. Harrison, T. Gray, J. Fleishman, G. H. L. Hobson, Vancouver; T. Walker, G. O. Foss, J. Mecreely, Mrs. A. Hamilton, C. H. Levers, Morrissey: E. Evans Michel; J. G. Cummings, J. F. Armstrong, Fort Steele; W. S. Bell, F. Clapp, T. Lucas, R. R. Jamieson, Cranbrook. A. D. Drummond, Moyie; G. H. Hunter, Nelson; C. H. Spencer, Quebec; Thos. Conlan, W. F. Baird, Toronto; R. Milk, F. Irvine, Frank; J. N. Nivin, Lethbridge; R. M. Fullerton, Brantford.

ALBERTA HOTEL.

Mrs. Dr. Wilson, C. H. Levers, T. R. Morton, G. Halseler and wife, T. Crahan, R. McDonald and wife, Morrissey; A. J. Chindgreen, Elko; D. L. Dover, L. Harris, Nelson; A. Dick, S. Sutherland, G. A. Tangman, C. G. Lange, Macleod; J. H. Davidson, Kamloops; W. Wardrop, Sparwood; T. G. Roy, Robt. Black, Winnipeg; G. H. Bentley, Michel; E. L. Walker, Kalispell; T. Lebel, Jas. Scott, Pincher Creek.

Don't make a slave of your wife by asking her to bake bread when you can get good home made bread at Elliott's. Try it. x

Among the visitors to town last Saturday to see the big game were the following from Cranbrook, R. E. Beattie, A. K. Leitch, J. J. Miller, J. McSweyen, H. M. Patterson, S. A. Clancy, G. A. Mason, Ross Tate, A. L. McDermott and G. Pushee.

THE COMPANY STORES

GENERAL MANAGER TONKIN OPPOSED TO THEM AND ALL WILL BE SOLD

The Object of the Coal Co. is to Mine Coal. Stock Carried at the Three Camps Estemated at $150,000.—Will Sell to Highest Bidder.

The large stores erected and operated by the Crow's Nest Pass Coal Company at Coal Creek, Morrissey and Michel are to be sold. This information coming direct and authoritatively from General Manager Tonkin will be hailed with delight by every merchant operating in this town and will doubtless create much interest in business circles throughout the Canadian West.

The rumor had gained considerable headway around the town since the return of Mr. Tonkin from his trip east, when a representative of the Free Press called upon the General Manager and received a corroboration of the current report. Asked if the Crow's Nest Pass Coal Company contemplated selling their stores at Coal Creek, Michel and Morrissey, Mr. Tonkin gave a decidedly affirmative answer, "Yes" said he, "I have always been opposed to the principle of Coal Companies operating their own stores. I have known instances where such institutions were almost a necessity but I have always been opposed to the stores in the present instance and I believe that the best interests of the town, of the merchant and of the Coal Company demand their suppression. The one object of this Coal Company is to mine coal, and the selling of merchandise in connection is not conducive to the general prosperity. The stores will be sold as soon as we can find a purchaser or purchasers."

When asked if the stores would be sold individually the General Manager replied that it was his intention of selling all of them and going out of the business entirely and that his object would not be gained by selling only one or two. The three must be disposed of at one time though it was not necessary that one individual or one company should purchase them all and of course it was understood that the Coal Company would have nothing to do with collecting the purchasers store accounts. It was immaterial to him how they were sold or who bought them so long as he got his price. Probably they would be sold by auction to the highest bidder. The Company of course would not sell the store buildings but would be willing to rent them for mercantile purposes.

When asked if he did not consider the Coal Creek store the least necessary of the three and the most objectionable on the part of the merchants the general manager replied. "At the present time yes, but in a short time similar conditions will exist at the other places. The new townsite at Morrissey will be thrown open to the public just as soon as the dissappearance of the snow makes it practicable and doubtless many business houses will spring up, while at Michel it is only a matter of a little time until a townsite near the present one will be put on the market. The conditions at these points will then be the same as at Coal Creek.

When asked the approximate value of the three properties, Mr. Tonkin was unable to give an authoritative statement as no recent inventory was at hand and of course the selling price must largely depend on the stock carried, together with the good-will of the business. He roughly estimated that the stock at the three stores might reach the sum of $150,000.

Frank Lebel's warehouse is now fully repaired and is stronger than ever. R. T. Sims was the contractor and not W. J. Broley as stated last week. The stock of hay, oats and other goods which had been stored in a neighboring storehouse have been replaced and the firm is ready for business again.

A number of the working men of Nanaimo have organized a co-operative store. If the Nanaimo working men would consult the miners of Fernie who undertook a similar proposition some months ago, they might get some good advice along this line and at the same time save some hard earned cash.

* * *

The feeling in favor of public ownership and operation of railways is growing stronger. The economic soundness of furnishing such service at cost is recognized. Whether or not the new lines are granted subventions or aids, the right of public regulation and control must be maintained.—Toronto Globe.

MY HEART'S DARLING

BY W. HEIMBURG.

Lucie hurried up the broad stairs of the Meerfeldt mansion without being detained by mademoiselle, and stepped, quite out of breath, into the salon. From the chaise - lounge, which had been pushed with the head-end toward the window, two hands stretched out toward her.

"How good of you to come!" said a tired voice; "I have read myself half crazy, in order to get rid of my own thoughts." And as Lucie seized her hands, Hortense continued: "The night, Lucie—the horrible night! It was so dark about me, and in me—I had such a dread of living any longer! I do not know what I said and did. Then they brought your doctor, and I thought of you, and longed for you. Did they tell you? Will you stay here a little? Do you want to?" She said all this in an irresistibly winning way. "Come, sit down by me; Minna will bring you something. Will you have an ice, or a cup of chocolate? Tell me something, Lucie."

The young girl had taken off her hat and sat by the couch of the beautiful woman in a low arm-chair, so that she could look her in the face.

She now drew some work out of her pocket.

"Well, Hortense, what shall I tell you?"

"About yourself—about yourself, Lucie; it would sound like a fairy-tale to me, if there is any happiness in it. But please lay down your work; I can not stand the movement of your fingers. It is impossible to keep one's attention on a conversation when the hands are moving so."

Lucie gave a surprised look; she could not help it, but she put her work obediently in her pocket, and leaned back in the arm-chair.

"I believe you are right," she said, and her eyes wandered round the room and came back to Hortense, to the white cashmere wrapper trimmed with Turkish embroidery, and to the palm-leaf fan which she held in her hand. "What shall I tell you?" she asked again.

"About yourself and your future husband. I want to know if there is really any such thing as happiness! Of course you love him very much?"

Lucie looked at her much surprised.

"Yes, of course," she said, hastily—it sounded almost as if she were offended.

"Forgive me; it was an odd question, but I think one sometimes deceives one's self. It was so with me, Lucie. I have—and this is perhaps my only good quality—a recklessly honest nature; and yet in spite of this I deceived him and myself and others. I thought I loved him—that is, my dead husband—and yet I was a widow without any real grief. Then I first discovered that I had deceived myself, that it was only with feeling of thankfulness that I had found a home at his side. I told you before that I came from school, of course, to my father's house, if one may designate so respectfully the endless change of residences in which my father lived. Bertin, who, as long as I was in Dresden, had gone back to her own home, came back before me, and arranged a little room for me. I was childishly delighted to be 'at home.' My father was at the station to meet me. He appeared embarrassed. Bertin, however, came to me with streaming eyes, and in the stillness of my own room kept calling me 'pauvre enfant, pauvre petite!' which I did not at all understand. As we were dining, my father explained to me that he was to have a little party in the evening, but I had better go quietly to bed. I saw in the course of the afternoon that a table was being laid; baskets of wine and champagne came from a hotel, and candles were being placed everywhere. Why might not Bertin and I sup with them? I had been so delighted at the idea of being introduced into society. Bertin, however, silently, which was not her habit, arranged a simple repast for us, and made tea. When the time came for the guests to arrive, I heard spurs clanking in the corridor, and then the rustling of silken dresses. 'It is not a gentleman's supper, after all,' said I. 'Listen, mademoiselle.' 'You are mistaken,' she returned, gravely. But just then a woman's silvery laugh sounded, and another answered. I felt myself very much hurt and neglected. 'I will not be treated as a child any longer,' I cried, quite beside myself. The feast began in the rooms beyond ours, and lasted till deep in the night; the cheerfulness and gayety kept increasing till at last it was a wild tumult, in which women's shrill voices were raised. Bertin took me to bed, and sat with a pale, indignant face beside me. In the end she had to explain everything, and then I began to hate my father. The next day I shut myself up in my room, but Bertin took a despatch for Uncle Ludolf to the post. 'Come at once; I can not stay with papa.' By evening my father's brother was beside me. 'Why can not she remain here?' he asked Bertin. She gave up the German language in disgust, and told him everything in French. He kissed me on the forehead, and went to my father. At first all was quiet; then Ludolf's voice was raised in a terrible rage; he fairly shook when he came back to my room. 'Pack your and my niece's things,' he said, abruptly; 'the express train leaves in two hours.' We went, without saying adieu to papa, to my uncle's country place. A week later he asked me if I would marry him. My gratitude new no bounds. Dillendorf was a lovely place to live in; I had loved it from my childhood, and Uncle Ludolf was a fine-looking man. Three weeks afterward we were married. There was, I assure you, no talk of love, and yet I really thought I did love him. There, now, I have told you about myself," she said, looking into the grave, girlish face before her. "Forgive me."

"Poor Hortense!" whispered the girl again; "such a sad face, and so misjudged," she thought.

"Ach! child, that was not the worst of it. It is no wonder if I think that there are no more good men left in the world."

"Poor Hortense!" whispered the again; "such a sad face, and so misjudged," she thought.

"It is a matter of perfect indifference to me what most people think of me," continued the young baroness, as if she had heard Lucie's thoughts; "but to be falsely judged and given up by those whom I still trust, that is bitter unto death. Tell me," she said, after a pause, "what have people told you about me?"

Lucie blushed.

"Oh, of course," nodded Hortense. "I do not want to hear, but I thank you for coming to me in spite of all." She took the girl's outstretched hand and kissed it. "Do not desert me, I pray you!"

"No, Hortense," said Lucie, moved to tears by the young woman's request.

They talked together for awhile, then Hortense wanted fresh air.

"My head is still weak; but if you will support me, perhaps we could go into the garden a little while. We will take the hammocks with us."

"Oh, most willingly!"

They went arm in arm down stairs and across the quiet courtyard. Just then came a neighing sound from the stables.

"That is Hella; she recognizes my step. Come, you must see her."

They passed the windows of the old baron's room. He stood behind the glass and kissed his hand to them with a pleased expression, and opening the sash, cried out:

"I congratulate you—I congratulate you!"

"Why did you not go to your grandfather when you found you could not stay in your father's house?" asked Lucie, coming back to the former subject.

"Oh, he was then, I think, in Africa, on an antelope hunt with the Duke of H—. Perhaps you have never heard what a great Nimrod he has been. Does not your brother-in-law know him?"

"I do not know," said Lucie; "it is very possible."

"Well, as I said, he was seldom or never at home. He has hunted all sorts of creatures in all sorts of places. See, here is my Hella," said she, opening the stable door. "Is she not beautiful?"

The splendid chestnut mare came up to them and began to smell her mistress's hands and her dress.

"You miss your sugar, Hella," she said, and patted softly the slender neck. "I did not give her any yesterday—ah, yesterday! But I had provided for you. You should never have shared the fate of your companions; as an old worn-out horse you should have had your food insured to you. No one else should have sat upon your back."

She turned round and Lucie saw large tears in her eyes.

"It is sad, is it not, when one only has tears for an animal? I assure you that the fate of this horse was the only thing yesterday that made the thought of death hard to me. Will you get me a little sugar?"

(TO BE CONTINUED.)

A Monster Gold Nugget.

There is a monster gold nugget lying at the bottom of the Atlantic. It was shipped from Santo Domingo to the king of Spain 400 years ago as a tangible proof of the value of Columbus' discovery, but was lost in a storm, together with 30,000 ounces of smaller golden specimens.

Swimming Brides.

Girls inhabiting the island of Himla, near Rhodes, are not allowed to marry until they have brought up a specified number of sponges, each taken from a certain depth. The people of the island earn their living by the sponge fishery.

It Is Curious.

"It's curious," said Uncle Eben. "Nobody wouldn't think of tryin' to play de banjo wifout takin' a few lessons, but ev'rybody thinks he could step in an' run de gov'ment wifout no practice whatever."

Prizes For Politeness.

An inhabitant of Farmoutiers, France, left a legacy sufficient to provide prizes of 25 francs each yearly to the two most polite scholars, male and female, of the town. The winners are elected by a baliot of their schoolfellows.

Guadaloupe Duties.

Duties on articles imported into Guadaloupe are collected under several categories—first, customs duty, this being the regular French tariff; second, octroi duties; third, quay duties, and, fourth, statistics duty. The octroi duty is styled "tax for the benefit of the communes."

Shaving In Madeira.

If you want a shave in Madeira, be sure that for the rest of the day your time is absolutely of no value to you. A shave has never been known to take less than thirty minutes and more than once sixty minutes. This is a fact and a very common experience.

They Fear Rain.

The Chinese fear rain, believing that the raindrops breed vermin.

Repulsed by Bees.

A striking incident of the relief of Cawnpore was the rout of the Ninth lancers by a swarm of bees. A village in the line of march was found to be defended by a hastily improvised stockade, on the top of which a number of hives were stuck. Into one of these a young officer jabbed his sword, with a result that in far less time than it takes to tell it the whole advance guard was racing for dear life to the rear, and Sir Hope Grant hastily formed line of battle, believing it repulsed by the mutineers in force.

BLISS CARMAN'S SAY

CANADIAN POET SAYS SOUL OF SOCIALISM IS IN CHRISTIANITY.

His Recent Remarkable Article in a Commercial Newspaper—Tells of Divers Kinds of Socialism, But They All Aim to Benefit Society—A Somewhat Sweeping and Liberal Definition of a Much Moot Question.

Socialism is a very safe word. Its meaning is so vague and undetermined for the most part that even the conservative take it upon their lips without trepidation. They speak indulgently of socialists as erratic and harmless dreamers, lumping together their many different aims and creeds, much as one speaks of all manner of insects as "bugs."

But the truth is that every one is something of a socialist, and many of our institutions are purely socialistic. Free schools, for instance, and free libraries (where they really belong to a township of free people and are not the gift of well meaning but offensive and misguided affluence) are purely socialistic. They exist for the good of all and are supported by the contributions of all, though there may be some to whom they are of no value and by whom they are not wanted. Never mind, we must have them, for the sense of the community has decided they are good things. If you have no children to be educated and are a hater of books, it is just the same. You must put your hand in your pocket to buy books for your neighbor and educate his children. That surely is pure socialism. Also it is pure Christianity.

And that brings me to the point I wish to make—namely, that the soul of socialism is love, or Christianity, if you prefer that word. The divers kinds of socialism are as mushrooms in the morning. They spring up fresh every day until it seems that every man may be his own prophet in matters pertaining to the commonwealth. Yet all these schemes are alike in aim; they all have for their sole object the betterment of society. However foolish, however wrong headed, however visionary or even dangerous they may be, we must still credit them nearly always with nobility of purpose and sincerity of intention. They are so many formulas for the solution of a difficult problem in the science of life, and though many of them would not solve the perplexing equation for us at all, but would only make matters worse (in all probability), still their disinterested aim must enlist our sympathy even while we withhold our approval. That is to say the spirit that prompts them is all right, though the thought that goes to their construction is often so faulty.

For socialism in whatever form is, after all, only an ingenious device for putting in practice the generous impulses of the human heart. Socialistic schemes are just so many contrivances for the carrying out of our nobler purposes. In themselves they cannot directly foster goodness; they can only promote it by making its path easier. Under right social and industrial conditions it will be easier to be good than it is now; it will be easier for beauty to touch our everyday life; it will be easier for the truth to find us out and cheer us with illumination.

One would not call the constitution of the United States a socialist document, I suppose, and yet it certainly is an instrument invented to facilitate the betterment of mankind in its social state. The American Revolution, like the French revolution, like the great rebellion in England, has no other meaning than that, and the mistake we make in thinking of these movements is in putting our final trust in them rather than in the spirit of freedom and love in man which produced them. However great and important these events were, they were, after all, only so many steps in this direction or that. We believe in this country that a democratic form of government is better than older, more primitive forms. It is not therefore necessarily the best form. It may be itself but a step to another form still better which will bring us still more enlightenment and happiness. We must be careful not to make a fetich of it, as our fathers made of monarchy long ago. It is the tendency of conservative minds to respect the settled institution, the traditional ideal. Old institutions and established ideals are indeed to be respected, but they are not as much to be respected as the spirit of humanity which begot them. They are only inventions of the mind of man pondering on some plan to give his soul vent in free and beneficent action. It is our business to maintain and guard them only so long as they prove effective for that and to relinquish them without regret as soon as we outgrow them and find them hindering our progress or retarding our happiness. We shall have others in their stead more ample, more adequate, more nearly perfect and no less worthy of loyalty than they were.

And if we are not to have too great and inflexible a respect for authority and traditional institutions neither must we be overconfident of the newest plans of social management of our own devising. They, too, we must remember, are only methods or ways of doing things. And the great permanent fact to be remembered and reverenced is the spirit of love which prompted us human creatures from the first. If we are to respect the remembrance of it in those of past ages, surely we must so much more respect it as a living breath in ourselves.

No form of government ever yet devised has been equal to the task of making men perfectly happy. None ever will be, for the simple reason that men are not happy by putward conditions alone, but by the inward condition of their hearts as well. And if we pin our faith to this or that outward social institution we are necessarily disappointed. The more stable the institution the more quickly does it become insufficient. It remains fixed, but man grows. Let us fancy that some very admirable and sound social reform, like the single tax, for instance, could be put in operation. There is no doubt that we should all derive untold benefit from it. We should be freer, happier and saner as a people than we have ever been. But we should still be far from being perfectly happy unless we were sedulous in cultivating our spiritual selves and in giving effectiveness to our best personality. Socialism, in other words, is only an opportunity to live. It is not life. And we must beware of expecting too much from it. Were it once in operation we should still have our toil and our leisure, our joys and our sorrows, just as we do now. Our toil and our sorrows would be mitigated, we believe, and our joys and our leisure would be more widespread, but the same old problem of the conduct of life would still confront every mortal alive.

It seems to me, then, very evident that while we are giving our energies to the accomplishment of social progress, to the realization of socialism in some form, we should be careful to hold hard by the spirit of the matter. Let us be socialists by all means of one kind or another, but let us be loving men first of all, for what we are fighting for in socialism is only the chance for loving kindness to make itself felt, for whether we call it love or loving kindness or Christianity does not matter so long as we preserve the spirit itself and make it effective, only if we call it Christianity we must take care not to confound it with any formalism of creed or church, for the churches also are only social institutions, outward expressions in which various truths have been embodied and too often entombed. But Christianity, let us remember, is an attitude of mind, a habit of feeling, a condition of the soul; it is not an institution. And the very gist of Christianity may quite as readily be embodied in socialism as in any formal church, and socialism whenever it appears in any sincere guise always has an aim in accord with Christianity—it aims at giving more freedom to the spiritual side of man, it aims at putting man's life under such outward conditions that he can practice virtue more easily and find happiness more readily in this life. Christianity blazes the trail for man. Socialism cuts down the trees and makes the road more open and practicable. This is something of what I mean by saying that Christianity is the soul of socialism, and I don't believe it is very far wrong.—Bliss Carman in New York Commercial Advertiser.

Canada Very Much Alive.

The Canadians would make very good Americans if they were not so obstinately Canadian, says The Baltimore Sun. This is shown by the present wonderful prosperity of the Dominion. In 10 years her trade has increased by nearly $200,000,000. In a single year the increase is $40,000,000. Exports of manufactures are $18,500,000 in 1902, against $7,600,000 in 1893. In the same period agricultural exports have doubled. The tremendous energy and success of the Canadian workers are indicated in the fact that deposits in savings banks have doubled in four years. Assets of Canadian banks grew in that time from $243,400,000 to $448,300,000, the note circulation showing a like increase. Six years ago Canada was thought to be losing population by emigration to the United States. Massachusetts was complaining of the influx of peasants from Canada, and all along the line to Oregon there was said to be an incoming current. Now this is all changed. Immigrants are flocking into Canada from the United States—farmers, ranchmen, miners and other active classes. From 11,000 in 1897 the immigrants have increased to 75,000 in 1902, one-third of these being active workers from the United States. As respects the creation of needed railways across the continent and in the far Northwest, Canada is very progressive, as also in establishing transoceanic steamship lines and submarine cables to connect with Europe on one side and Asia and Australia on the other. Our northern neighbor seems to be very much alive.

Stories in Agriculture.

The bulletin on "Nature Study or Stories in Agriculture," promised by the Ontario Department of Agriculture has just been issued by the King's printer. It is neatly bound in a paper cover imitating brid's-eye maple, and contains stories dealing with the soil, plant roots, wheat, yeast, butter, insects, birds, and animals. The idea is to present a life-history of each plant and insect in popular form, so that children may grasp it. This bulletin, which contains about 80 pages and which is illustrated by suitable engravings, will be sent to each teacher of the province, with the intention of inducing teachers to deal with these subjects in class. This is the first bulletin of the kind issued, and it is proposed to issue one yearly. Something of this kind is required to draw the attention of teachers and children in the Public schools to the great and fascinating facts and processes of nature all about them, and this bulletin is a creditable beginning.

Bruno, the Hunter.

Rod and Gun in Canada, published in Montreal, has in its December number a new poem by Dr. Drummond, entitled "Bruno, the Hunter," who slew wild animals without mercy, until one day the devil changed him into a mouse and his hounds into loup garou, and once a year, these phantom hounds chase him across the country. It is a neat bit of verse, and concludes:

Dat's way for punish de hunter man
W'en murder is on hees min',
So he better stop w'ile de work is new,
Or mebbe de devil will ketch heem, too,
An' chase heem a'ound wit' de loup garou
Gallopin' close behin'!

A Tough Hide Makes Tough Leather

and a Western Bronco's hide is the toughest worn by any animal of his weight.

"Pinto Shell" Cordovan is tanned from his hide by the H.B.K. Co., by their own process, without oils or minerals.

Used only in H.B.K. mitts and gloves.

Water, wind, boil, scorch and cold proof.

Never cracks or hardens, never tears or rips, always soft and flexible.

Sold by all dealers. See this trade mark H.B.K. BRAND
If your dealer has not got them, write us and send his name.
Every pair branded "Pinto Shell" Cordovan by

Hudson Bay Knitting Co.

The Kangaroo is a lively animal, even when he is on his last legs.

Cigars should be entered in a man's expense account as "losses by fire."

DYSPEPSIA BOOK FREE

A public-spirited association, anxious to relieve sickness, will be glad to send Dyspepsia sufferers an illustrated book explaining the cause of dyspepsia and pointing out a cure. It has brought joy and health to thousands. It is absolutely free. Write to-day. Do not pass by this generous offer. Address American Health Improvement Association, P. O. Box 5316, Boston.

Grounds For Divorce.

A Salem (Mass.) man who sought a divorce proved, according to a Boston paper, that his wife tore the sign from his store, put into his tea something that made him vomit, threw his clothes downstairs, filled his shoes with cold water, put swill in his overcoat pocket, threw water over him as he went downstairs, put pepper in his bed, made him sleep in an attic, wouldn't do his washing, wouldn't mend his clothes, made him darn his socks and sew buttons on his shirts, spat on his toast when he was getting his breakfast, rocked in a squeaky chair for hours at a time to annoy him, put grease on his Sunday clothes, wouldn't let him have a fire on the coldest evenings so that he often had to go to bed at 7 p. m. to keep warm, and finally "she rubbed a butcher knife over his neck and threatened to blow out his brains."

Baking a Bluefish.

Before baking a bluefish the creole cooks pour over it a sauce made from fresh or canned tomatoes in which garlic is chopped. It is then baked until the flesh of the fish flakes, admitting the sauce.

Boats In China.

Next to coffins, the greatest use for lumber in China is in building boats, and it is safe to say that the number of craft runs into the millions.

Old Chinese Banknote.

One of the curiosities at the British museum is a Chinese banknote of the fourteenth century, which was discovered in the ruins of a statue of Buddha at Peking. Paper money was not introduced into Europe till the seventeenth century.

The Tea Plant.

In India the tea plant is naturally a tree, but by means of pruning it is kept so small that it seems to be only a bush.

Hunchbacks.

Spain has the most hunchbacks of any country. In one small village at the foot of the Sierra Morena there is one in every thirteen inhabitants. France, in the neighborhood of the Loire, has a great many people suffering from deformed shoulders. It has been reckoned that there are 1,000,000 hunchbacks in the world at present.

Oranges and Influenza.

Oranges are used as a cure for influenza, especially in Florida. Nearly every fruit will purify the blood, partly because of the soft water, which takes up more injurious material in the system than hard water, and partly because of its salts. Lemon is famous for this reason.

Horse as a Murderer.

A remarkable story comes from Mellor, England. A man noticed a horse circling continually round a lamb, urging it toward a fence and finally thrusting it through a hedge into a flooded dike beyond at an exact spot where another lamb was drowned. The horse was diverted from its murderous design with great difficulty.

Granby Rubbers

Style, fit and finish are almost as important. GRANBY RUBBERS have a stylish, clean cut appearance all their own, and are made in all the different shoe shapes.

"Granby Rubbers wear like iron."

SWEDISH FAMINE

MUCH SUFFERING IN THE NORTHERN PART.

People Are Living on Pine Bark Ground Into Flour, and are Threatened With an Epidemic of Typhoid Fever---Relief is Sorely Needed.

Telegrams from Stockholm, Sweden, confirm the distressing accounts of the famine in Northern Sweden. About 70,000 persons are affected by the famine, which extends from the sixty-first to the sixty-seventh degree, north latitude, and from the Gulf of Bothnia and the Russian border far into the interior. The starving people are eating pine bark, which is dried, ground to powder, mixed with stewed iceland moss, and made into a kind of famine bread.

Coincident with the failure of the crops is the extreme scarcity of fish. The fishermen return from their expeditions empty handed. Even ptarmigan (grouse of the northern regions) usually found in great numbers in the stricken district, have almost completely disappeared.

It is estimated that the expenditure of about $6,300,000 will be necessary to save the population from decimation. Thus far about $200,000 has been subscribed, of which sum over $12,500 was sent by Swedes in the United States. This amount does not include the money necessary to save the cattle or supply seed for the spring sowings. The peasants are making pathetic sacrifices to avert the extermination of the hardy northern cattle.

In previous times of scarcity good fodder was obtainable by mixing reindeer moss and aspen bark. Now this is not available and finely chopped twigs of birch, willow and ash are substituted. The mixture is boiled and fed to the cattle warm, but it is found that the milk of the cattle thus fed leads to typhoid fever. This and other diseases are certain to spread unless relief is hastened.

The situation threatens a repitition of the terrible famine of 1867, when thousands died from starvation and typhoid. A special commissioner of the Swedish government, who has just returned from the scene of the distress, emphasizes the necessity of the adoption of immediate plans to abate the distress. His report has caused the most painful impression, and will, it is hoped, enhance the national efforts to provide remedial measures. Up to the present 1,600 carloads, valued at $100,000, represent the total quantity of provisions and fodder shipped to the famine-stricken area.

GREAT NORTHERN WRECK

An Engineer and a Fireman Had a Leg Cut Off.

The Great Northern flyer, eastbound, running at full speed and one hour and forty minutes late, collided with the Great Northern fast freight which was switching on the main line and on the time of the flyer, causing one of the worse wrecks the Great Northern has had for years. The collision occurred on Jan. 14.

Engineer Nelson and Fireman Donahoe, in charge of the flyer, escaped with a few scratches and bruises by jumping. Engineer Hudson and Fireman Whippler, of the fast freight, both had a leg cut off below the knee. Several passengers were more or less injured, but none considered serious..

The steam from the machine shop of the Great Northern at Barnesville, Minn., where the collision occurred, was blowing across the tracks, making it impossible for either train to see the other until right together. It is claimed that the freight had eight minutes more time against the flyer, but this statement cannot be confirmed. The freight engine was totally demolished and the engine of the flyer was badly damaged, two baggage cars and a mail car next to the engine was almost totally destroyed, also deveral freight cars loaded with merchandise behind the freight engine was smashed into kindling wood, and the contents scattered broadcast.

Looking at the wreck it does not seem possible that anyone on either engine could escape alive, taking everything into consideration it was a most fortunate wreck.

The year 1902 was very unsatisfactory for the British cotton trade. The results of stock taking is that eighty-five important cotton spinning companies show a net loss of £1,436 and the prospects for the current year are not very encouraging. Spinners are handicapped by the fact that spindles are increasing in number, while there is no development worth speaking of in the weaving department.

A sad fatality occurred at the Verus mine on Morning mountain, B. C., on Tuesday night, which resulted in the death of Moses Jackson, a miner employed there. Jackson was working in a slope with three other men when a mass of rock fell on him, crushing him badly around the hips. He was rescued as quickly as possible from under the rock, but had been so severely injured that there was no hope of saving his life, and he died before he was taken from the tunnel. Deceased leaves a widow and five small children, of whom he was the sole support.

The official statement of the Winnipeg bank clearings for last year show an increase of over 40 per cent.

CABLE NOTES.

Distress in London is Very Acute—New Liquor Act a Success.

A London cable says: There can no longer be a question as to the extent or gravity of the distress now prevailing in London. Many thousands of men in excess of the usual average are out of employment this winter, and the work houses cannot accommodate all the people demanding shelter. Things have reached a serious pass in the east end of the metropolis, with the tide of alien immigration steadily rising higher and higher. A serious state of affairs also exists in other parts of Great Britain, with an endless stream of the country-bred pouring into the overcrowded cities.

While Canadian farmers organize expeditions to search the old country for much needed labor, and offer good wages for efficient men without a satisfactory response, official statistics show that British emigrants do not generally elect to make their homes in the British colonies. Of 205,910 emigrants from this country last year 108,501 went to the United States. This condition of things has induced one newspaper to declare that the future of the race is imperilled by the draughts made upon it from the United States, and that the greatest and most beneficial work that British statesmen could perform for the welfare of the nation would be the inauguration of some scheme for redistributing the British people in the British empire.

Seldom has legislation met a more immediate success than the new licensing act. For once the law would seem to have got even with the great army of topers, who are touched in the tenderest spot. These interesting individuals are foreswearing drink with an alacrity which seems to show conclusively that there is after all some virtue in what was once contemptuously called by a great statesman "grandmotherly legislation."

THE NEWS IN BRIEF.

Telegrams and Cablegrams Condensed for Busy Readers.

The Winnipeg General hospital is overcrowded with patients.

The Consumers' Gas company of Toronto, has reduced the price of gas.

John Foster and Elmer Moyer were killed by a train at Jordan, Ont.

Rich oil wells have been discovered in Southern Alberta, near the Blood reserve.

An engine on the New York Central exploded, killing the engineer and fireman.

The new 2,000,000 bushel elevator of the C. N. R. at Port Arthur is receiving streams of wheat.

The Dominion department of the interior did not encourage the Persian Nestorians to come west.

Mr. John England, a Regina baker, has fallen heir to $5,000 through the death of an uncle in Cobourg, Ont.

The Archbishop of St. Boniface in his sermon last Sunday declared that Catholics must vote as instructed by the clergy.

A dispatch from Ottawa, dated Jan. 19, says the following circular has been issued by the customs department: "Round-up parties entering Canada for the purpose of taking out cattle or other livestock are required to report at the nearest custom house after crossing the frontier and obtain a permit from the customs officer in the regular way. The permits shall be subject to the conditions that the round-up while in Canada shall be accompanied by a member of the police force or by an officer of customs whose duty it will be especially to see that Canadian cattle are not disturbed on their range and that American live stock are taken across the line and properly reported outwards; and also that foreign live stock, unearthed for duty, are not branded on Canadian territory.

"The pasturing of foreign live stock in Canada is not permitted without due entry at the custom house. The owners will be held strictly accountable after June 1903 for keeping foreign live stock in Canada, under penalty of seizure and forfeiture. Casual estrays will be especially dealt with from time to time, but the onus of proof that cattle are estrays, in any instance will rest on their owners."

Murderer Toews Dead.

Death claimed Henry I. Toews, the Altona school teacher, who has been held at the provincial jail in Winnipeg on a charge of murdering the little daughter of Peter Kehler. His end came on Jan. 19, caused by convulsions brought on by an abcess in the head, the result of the self-inflicted bullet wound.

Toews' crime, though never proven by trial, is surrounded with too much evidence to leave any doubt of his guilt. His crime is probably without precedence and was so terrible as to leave small question of his sanity at the time it was committed. He was school teacher for Altona and after an altercation with the trustees, Abraham Kehler, John Hiebert and Peter Kehler, he fired at the men with a revolver and afterwards to avenge himself carried his menace to the children of the trustees and shot two of Kehler's children, 1 of them dying from the effects Toews turned the revolver on himself, shooting himself in the temple. He lay at the general hospital here for weeks dangerously ill, but recovered sufficiently to be taken to the jail. He was doing well when seized by the convulsion which carried him to a higher judge.

The Dominion government has thrown open all unappropriated Dominion lands in Manitoba, the North West and the Yukon for prospecting for petroleum.

J. J. Hill, discussing the Canadian railway problem, said that what the west needed was not more railways, but more equipment.

The Chinese government has dedicated a memorial arch to Baron Von Kettler, as amends for the ambassador's murder by Boxers.

The United States is taking steps to police the international boundary between Washington state and British Columbia, in order to keep out the Chinese.

The Crown Princess of Saxony and M. Giron, with whom she eloped, have arrived at Mentone, France, and intend to stay two months. They have taken the name of M. amd Mme. Andre Gerard.

Miss Lillie Purdy, aged 22, was struck by an express train while driving at Gilmour's Crossing, near Trenton, Ont., on Jan. 17, and instantly killed. She lived with her father and five brothers on the second concession of Sydney.

Admiral Higginson cables from San Juan, Porto Rico, under date of January 17, that by an explosion of powder in the 8-inch turret of the United States battleship Massachusetts, five men were killed and four injured. There were no commissioned officers among them.

Mayor Chas. H. Leeds, of Stamford, Conn., has announced that he will not permit the field trials of kittens, which was to have been a feature of the annual meeting of the Poultry association and the Connecticut Cat club. It was intended to have kittens entered in the show display their ability as mice catchers. The mayor believes this would be cruelty, and declares he will use the whole police force, if necessary, to prevent it.

"It will interest all fruit growers to know," says Mr. Whitney, "that the management of the Lord Aberdeen ranch sold one entire crop of apples in Hong Kong at $3.50 a box thus showing the possibilities of our western apple growers in the oriental trade. Last year the orchard paid $14,000 over all expenses. The 30,000 acre ranch is divided into departments for the maintenance of horses, sheep, rattle and the culture of fruit. The orchard pays best of all. The ranch is located at Vernon, B. C.

Speaking at the meeting of the Province of Quebec Dairy association the Hon. Sidney Fisher, the minister of agriculture, announced that next season he would allow no butter to be put on board cars for shipment unless it was at a temperature of not more than 40 degrees. The minister said that some months since the department of agriculture at Ottawa offered bonuses of $100 to farmers building refrigerating rooms, but he regretted he had received unfavorable reports as to how these rooms were kept. One complaint of Montreal exporters was that the butter was "warm." A system of cold storage had been organized in connection with the exportation of dairy produce on cars and ocean steamers. "But," added Mr. Fisher, "these refrigerator cars and those cold storage apartments in ocean vessels were not established to make the butter and cheese over again, nor, indeed, to cool them. It was established to maintain the produce at the degree of temperature at which it should have been when shipped."

A LARGE COLONY.

Pioneers of Five Thousand Nestorian Families Arrive.

A party of thirty-one Nestorians, who say they are the pioneers of five thousand families of the same persuasion from Persia, arrived in Winnipeg on Jan. 16.

The Rev. Isaac Adams, M.D., a Persian missionary, and author of "Darkness and Daybreak," which has been translated into the English, Dutch, German and Swedish languages; "Persia by a Persian," and other works, is their leader.

Dr. Adams spent twelve years in the United States, where he successfully studied medicine and theology.

In an interview, Dr. Adams said: "The Nestorians are, of course, Christians, and are willing to submit to all the laws of Canada as they exist. They have nothing odd in their beliefs like some other races. It will be the earnest desire of all to learn your language, adopt your customs and dress, and become loyal Canadians."

"Do the Nestorians refuse to carry arms?"

"No; they have no such objection. I have lived on this continent twelve years, and am acquainted with British and Canadian law, and there is nothing to which the religion and disposition of the Nestorian Christian can object."

"How many Nestorians are there in Persia."

"About 150,000 souls. They have been persecuted for centuries by Turks and Persians, and all on account of their religious belief. I have brought out a number at my own expense, but am making arrangements by which I expect about 5,000 families will follow, the movement commencing in the spring. These people are good farmers and frugal, and will prove themselves an acquisition to the country.

"Have you decided on their locations?"

"No. But I will discuss the matter with the immigration commissioner, and will then go out and look over the country, considered suitable for them. In the meantime they will remain in the immigration hall."

Nestorius, the founder of Nestorianism, was born near the close of the fourth century. His doctrine is that Christ is a true man, born of the Virgin Mary. This man God chose as his temple. So that God was in Christ, but that God, the Divine, did not, could not suffer and die. He refused to call Mary the mother of God, saying: "Has God a mother? The creature has not borne Him who is uncreate."

Among the Nestorians marriage is considered a sacred duty, and the marriage of a son is looked upon as the happiest event in the parents' lives, and an occasion of the greatest rejoicing; for an unmarried man is considered the most miserable of beings. He is compared to a bird sitting on the top of a tree, and not knowing where to fly.

In some cases children are betrothed in their infancy by their parents, and cases of marriage in infancy have been known. Under no circumstances in Persia are young people allowed to make love or to speak to each other of marriage, or enter into an engagement. To kiss a girl in Persia means that you rob her of her beauty, and the act would be considered a great and unpardonable crime.

TELEGRAPHIC BRIEFS.

Short Dispatches From the Four Quarters of the World.

The civic officials of Rossland, B. C., have taken steps to close all the gambling dens in the city.

Sir Thomas Shaughnessy says the removal of the duty on coal will mean a saving of $400,000 a year to the C. P. R.

It is reported in Wall street that the C. P. R. will declare an extra dividend shortly, and also that the company's capital stock will be increased.

The Rat Portage hockey team defeated Brandon on Friday last by a score of 12 goals to 3.

The Dominion parliament will probably meet on March 12.

Application will be made at the next session of parliament to build a line of railway from Winnipeg to the Gulf of St. Lawrence.

Mrs. Esther Wertheimer, of San Francisco, has claimed that the rich beggar who died in Toronto worth $65,000, is her father.

Rev. George Cuthbertson, a well known Presbyterian minister, dropped dead in the College Street Presbyterian church, Toronto, on Jan. 16, within a few minutes after having given an address.

The announcement that arrangements had been made to publish daily papers on Atlantic steamers supplied with the wireless telegraph system, seems to be founded on a plan, which goes into effect within a fortnight to send news bulletins to certain steamers approaching the coast. The messages will be sent from a wireless station, now nearly completed at Browhead. The Marconi company will only undertake to send messages a distance of forty miles seaward, and for the present at least there will be no daily newspapers published on board ships. News bulletins will shortly be displayed in various parts of the steamers.

He (very stout)—(—I cannot express myself!

She (looking at the clock)—O, hum! —well, go by freight, then.

TWO TRANSVAAL LOANS

Mr. Chamberlain Makes the First Official Announcement.

A cable from Johannesburg dated Jan. 19, says: Colonial Secretary Chamberlain, at the banquet given him on Saturday evening, delivered a speech in which he gave for the first time the details which have been arranged for the financing of the new colonies. He described the arrangement as "an unique and unprecedented action on the part of the imperial government," and one which was satisfactory to the representative associations which met in Johannesburg that day.

The proposal, he said, was first that the government undertakes to submit to the imperial parliament a bill to guarantee a loan of $175,000,000 on the security of the assets of the Transvaal and of Orangia, which were being united for this purpose. The loan would be raised as soon as the imperial parliament shall give its consent, the money being deing devoted to paying the existing debts of the Transvaal, laying the existing railroads, providing for the construction of new lines, allowing the necessary expenditure for public works and also providing for the land settlement. This part of the plan will give Orangia and the Transvaal funds to carry out the developments of the country. The second part of the agreement provides that as soon as possible after placing the first, another loan of $150,000,000 shall be raised, to be called up in annual instalments of $50,000,000. This second loan will be treated as a war debt, and will be secured on the assets of the Transvaal.

Mr. Chamberlain said he hoped that his hearers would agree to these arrangements, which would be a happy augury for the unification of the two colonies. He then refrred to the labor problem at the mines and suggested that the imperial government should appoint a commission to inquire into the matters in all their details.

A number of South African financiers had undertaken to subscribe the first $50,000,000 without receiving preferential security. Up to a few hours previous to the banquet he had not received the authority of the home government to deal finally with the matter of the war contribution, and he declared that the reports hitherto published, which purported to give details of the financial arrangement were premature, unauthorized and for the most part incorrect.

PEACE IN IRELAND.

Mr. Redmond So Prophesies If the New Land Measure Is Passed.

A cable from London says: John Redmond, M.P., the Irish leader, responding to a Nationalist address presented to him at Edinburgh on Jan. 17, said he believed that the friends of Ireland would soon see a measure become law which would heal the wounds of centuries and give the Irish people a chance of living in peace and prosperity on their own soil. If this chance of settling the Irish land question was lost by the rejection of the measure, continued Mr. Redmond, there would be an overwhelming justification for such a strong, menacing and dangerous public movement in Ireland as he would be sorry to see.

Mr. Redmond added that he hoped that the spirit of conciliation shown at the Dublin land conference would be reproduced in the house of commons, and if so, all of the political parties might commence the work of appeasement and justice in Ireland. Hitherto the Irish Nationalists had been fighting landlordism and not the landlords, who they wished would remain to take part in the government of the country. Mr. Redmond further said that the demand on the treasury for the carrying out of the voluntary purchase scheme was not unreasonable. The deficit would disappear in ten years by the reduction of the cost of governing Ireland.

Laying aside the questions of what was due to the landlord and of the debt due to Ireland, it would be a profitable investment to settle the land question, which had baffled the best English statesmen, had been a source of poverty, misery and bloodshed, and had caused the immigration of millions of Irishmen, who took into America and cherished there an undying hatred for the Union Jack.

The speaker did not believe that the settlement of the land question would end the home rule question, but he did not hesitate to say that it would be the removal of the last obstacle. In conclusion, Mr. Redmond said if this chance is lost through perverse stupidity, the losers will be the landlords on the one side, and those desiring to maintain the connection between Englanh and Ireland on the other. The Irish people were ready to accept the situation in the event of the acceptance or refusal of the pending proposition.

The fisheries in Northern Norway are at a standstill on account of the tremendous influx of seals along the coasts and fjords. The seals, which are coming from the White Sea, have been fought without avail, and the large fishing population have now asked the government to help them exterminate this plague, which is partly eating and partly hunting all the fish away.

On accepting a challenge to a duel recently a municipal councillor of Roncegno, in the Tyrol, chose cannons as the weapons, and stipulated that he and his opponents should fire at each other from two mountain tops three miles apart.

THE LARGEST LIFE.

By Archibald Lampman.

I.

"I lie upon my bed and hear and see.
The moon is rising through the glistening trees.
And momently a great and sombre breeze,
With a vast voice returning fitfully,
Comes like a deep-toned grief, and stirs in me,
Somehow, by some inexplicable art
A sense of my soul's strangeness, and its part,
In the dark march of human destiny.
What am I, then, and what are they that pass,
Yearning and love and laugh, and mourn and weep?
What shall they know of me, or I, alas!
Of them? Little. At times, as if from sleep,
We waken in this yearning passionate mood,
And tremble at our spiritual solitude.

II.

"Nay, never once to feel we are alone,
While the great human heart around us lies;
To make the smile on other lips our own,
To live upon the light in other's eyes;
To breathe without a doubt the limpid air
Of that most perfect love that knows no pain;
To say—I love you—only, and not care
Whether the love came back to us again,
Divinest self-forgetfulness, at first
A task, and then a tonic, then a need;
To greet with open hands the best and worst,
And only for another's wound to bleed;
This is to see the beauty that God meant,
Wrapped round with life, ineffably content.

III.

"There is a beauty at the goal of life,
A beauty growing since the world began,
Through every age and race, through lapse and strife
Till the great human soul complete her span,
Beneath the waves of storm that lash and burn,
The currents of blind passion that appall,
To listen and keep watch till we discern
The tide of sovereign truth that guides it all;
So to address our spirits to the height,
And so attune them to the valiant whole,
That the great light be clearer for our light,
And the great soul be stronger for our soul;
To have done this is to have lived, though fame
Remember us with no familiar name."

Sketch of Archibald Lampman.

For many years now the poems that formed the body of Archibald Lampman's first volume, "Among the Millet," published in 1888, have determined his place in poetry with readers. This was that of one with a sensuous delight in nature, habitually engaged in a stocktaking of her loveliness. In fact, his art might have been described as pictorial, but with the appearance of "Lyrics 6 of Earth," in 1895, it was seen that, along with the stocktaking, greater care was taken to note the "effects" of the beauty of nature, as all the great poets, from Homer down, have done. Lampman's natural and cultivated artistic feeling led him to depart more and more from his earlier manner, until in "Alcyone," the volume in preparation at the time of his lamented death, in February, 1899, now included in the complete edition of his poems, he had attained the heights where the gaze, having ceased to merely revel in outward beauty, was vouchsafed the "authentic vision"—perceived there "some shadows of sternity"—saw "the light of sense" go out, "but with a flash that has revealed the invisible world."

At the time of the poet's death, referring to him appreciatively in these columns, we quoted from the only works of his then available, admitting that that poetry was not of the highest order. With such poems as "The Largest Life" before one, and "Chione," and "Inter Vias," and "Vivia Perpetua," and "The Vase of Ibn Mokbil," and "We Too Shall Sleep," and such perfect sonnets as those we have quoted, and "Uplifting" and "Earth, the Stoic"— to name but a few of his later and best —that judgment must be materially altered. As it stands, his work is a rich contribution to poetic literature. Had he lived, one can imagine what his matured and lucid spirit would have created.

The complete poems of Lampman have been edited with a memoir by Mr. Duncan Campbell Scott. No more discerning hand could have been selected. From his tender sketch of his friend we learn that our poet was born at Morpeth, in the County of Kent, Ont., in the year 1861, of U. E. Loyalist stock. His father was an Anglican clergyman, and a man of poetic taste. "Alcyone" is dedicated to him by his son as "himself a poet, who first instructed me in the art of verse." The boy was promising, and at Trinity College, Port Hope, carried off every prize going. From there he came up to Trinity University, Toronto, where the social and literary side of his character developed. He graduated in 1882, and soon after was appointed to the post in the Civil Service which he held up to his death. The routine work and assured, if modest, income removed him from the stress of living for which his sensitive temperament unfitted him, and the work had its compensations in the regular periods of leisure it allowed. Mr. Lampman spent his vacations among the forests of the Ottawa, and there one autumn overexerted himself on a canoeing trip and brought on the lesion of the heart, which resulted in his too early death. So essential do I consider his work towards the formation of a standard of taste in Canadian poetry, where domestic and sentimenal rhymes are accustomed to pass for that art, that I strongly advise my readers to continue the acquaintance I have here opened for them.—Pharos in The Globe.

"Devotees of the Truck Garden."

Herbert Spencer is poking fun at the vegetarians of England, and has taken them completely by surprise, inasmuch as vegetarian faddists thought they could claim the philosopher as one of their own. Mr. Spencer does not apparently think highly of the mental state produced by a year of vegetable diet. He said recently: "I went over all that I had written during the year I practiced vegetarianism and consigned it all to the fire." Since then he has been saying some facetious things about the "devotees of the truck garden," as he calls the vegetarians.

THE FERNIE FREE PRESS,
FERNIE BRITISH COLUMBIA

SATURDAY, JAN. 24, 1903.

A CONTINUOUS PERFORMANCE.

The result of the bye election in North Nanaimo has failed, as expected, to visibly impress the Government with an idea of the futility of trying to conduct the business of the province in face of public opinion.

The merry burlesque on representative government still goes on with occasional intermissions for refreshments, this latter function in the case of the canvass of West Yale appearing to be the principal method adopted for the political education of that constituency. Just think, ye people of Fernie! What a rollicking, boisterous time they must have experienced. Drinking and carousing till early morn, the gallant Colonel and "Little Willie," the heart and soul of the joyous gathering, the former always ready with his favorite song, "The Midshipmite," or some other appropriate nautical ballad, the latter a rare one for a story. Dignified ministers both, but jolly good fellows all the same, why were we not invited? may well be asked by those left out. We are postively green with envy, and yet methinks when another day has dawned, and business returned to its former state the sensible-minded will question "Wherefore why is this, what should we do?"

There can be no doubt what course will be pursued to impress upon the minds of these political buffoons the contempt in which they are held for their actions. There is no hope for the government in West Yale and even with West Yale they cannot control the house. It is therefore apparent that an appeal to the country is almost certain to take place this summer, and as generally believed on party lines. Right here in Fernie district we expect a nice little struggle for supremacy and it therefore behooves all parties to shake off the lethargy in which they are immersed and form rank. The liberals in both Fernie and Morrissey are strong, in Michel there is an active Conservative Association, and the Fernie Conseratives will, when called upon to form in battle array, gird their loins and flock to the standard of their party, and present a strenuous front. The Labor party is pluming itself for the fray, so rumor has it, and it is within the the range of possibilities that a candidate will be thrust into political arena to do battle in the cause of the P. P. P.

A review of the condition of the above mentioned parties bring into relief the following apparent facts. The Conservatives may be considered as agreed upon their respected leader, Mr. Chas. Wilson, and any opposition Colonel Prior might be inclined to offer would, we believe, be very soon stifled for lack of support. We have then a party practically united even though such men as D. M. Eberts as Attorney general and Harry Helmcken and Colonel Prior would likely appear as prominent members of the party. The fact that the Ottawa government is Liberal would no doubt be regarded by many as a drawback to Conservative,s government in B. C. Turning to the Liberal party we find a serious bug bear n Joe Martin who makes his appearance with irritating persistency in every political shuffle, but in view of his latest announcement that he will be content to leave the electron of leader to the members elect of the Liberal party, there is little to fear from him. It must be admitted that Joseph is a troublesome individual when stroked the wrong way. However his followers are certain to be as few and far between after the election as they are at the present time. The Liberals of the province will doubtless vote the straight party ticket and trust to Fate that a leader will be selected agreeable to all members of that party. Otherwise a split is certain, and in to what state of chaos this would precipitate the party is easy to conjectnre.

Whatever will be the outcome of an election on party lines, it is incredable that it could be worse than the existing state of affairs. If the best men of all parties could be united into a "Business Government" the dream of a long suffering public would be realized. It is too late now, the die is cast and party government must be trusted to remedy those evils that coalition has produced

As regards the Labor party, all would not seem to happy within its ranks. A section headed by J. Wilks is strongly Martinite and apparently would turn the vote of the party in that direction. Another section are in favor of running as a party. Foleys action in entering the field as an Independent Labor candidate is much to be regretted from a Labor standpoint. It indicates strongly the division in the ranks which we have reason to believe will be more than local as his influence upon the party is considerable. The outcome is problemetical, but we feel confident that while the Labor party will show added strength it will form a very small portion of the personnel of the next legislature. Their platform as laid down at Kamloops is too radical in the present state of the province, and it will not be tolerated by a fully aroused electorate who are decidedly more interested in reforms in the business management of the country, than in experimental legislation.

The constant cry for years has been for honest, bvsiness-like legislation, and so far that cry has brought forth no answer from the political wilderness. We are inclined to think it is as devoid of honest politicians as the desert of Sahara is of vegetation. For the best interests of the district and town we would advocate a business man in preference to any other and when the time comes we hope that a good man from those ranks will be available. To the voters of Fernie and district we can only say get ready for the struggle. "Stand not upon the order of thy going but go at once," and when you elect your man be he Conserative, Liberal or Labor be sure you have him on the winning side so that Fernie may at last come into her own and receive the long-deferred patronage which in her case will constitute the spoils of victory.

THE TARIFF ON COAL.

ON January 15th the United States government passed an act removing the duty of 67 cents per ton of 2,000 lbs. on soft coal. The act is to hold for one year after which if no further action is taken the old duty goes in force.

The Canadian duty on soft coal is 53 cents per ton of 2,000 lbs. There is a provision in the Canadian tariff law that if the United States reduces the duty to 40 cents a ton then the Governor-in-Council may reduce the Canadian duty to 40 cents a ton. There is a strong feeling in Canada that our government at Ottawa should take immediate advantage of this clause, and when the house meets the duty should be removed altogether. This would mean reciprocity in soft coal for nearly one year between Canada and United States.

The Toronto World in a long article opposing the proposed removal of the Canadian duty says :—"The Crow's Nest Pass Coal Co. will of course favor the reduction or the removal of the duty on soft coal. Their whole market is in the United States."

While this latter statement is not true as can be seen from facts in our last issue showing that the only Crow's Nest coal and coke going across the line is the daily shipment of 7 cars to the Northport smelter, still it is not to be denied that reciprocity on soft coal would eventually greatly benefit the C. N. P. Coal Company and the valley in general, as it is only a matter of a few months until our mines will have a large surplus for the American markets. With a permanent reciprocity treaty on this commodity Fernie and vicinity has everything to gain and nothing to lose, for while there is no danger from importations of American fuel it gives our leading industry better markets for its surplus output. We produce a better class of coal and coke than the neighboring states to the south of us, and there are no coal mines south of the 49th parallel which can possibly compete with us on equal terms.

It is true that the Americans regard this measure as an emergency bill and that after the year is out they think that the original duty can be resumed. But it is more than likely that the Canadian soft coal will by that time have gained such a hold upon the American market that it will then be hard to dislodge even if the duty is restored, something we consider improbable.

The following letter reprinted from the Montreal Daily Herald of Jan. 15th, shows clearly the advantages that a permanent reciprocity treaty on coal between the United States and Canada would be to the latter.

Editor Herald:

Sir,—The free importation of coal into the States, especially if made permanent, would be of the greatest value to Canadian mine owners and incidentally to all purchasers of soft coal in Ontario. "Free coal" was the basis of the scheme laid down by Mr. H. M. Whitney and his associates when in 1893 they acquired the coal mines of Cape Breton and established the Dominion Coal Company. In the last days of the Cleveland administration the measure was only defeated by a narrow margin after the most stubborn contest by the American coal operators, and so greatly did this change the aspect of affairs that Dominion common stock fell to 8, and for five years almost went a-begging. This is significant as showing the high importance attached to "free coal" by the eminent business men associated with that concern, and it is only during the last two years of unprecedented commercial prosperity that an adequate market has been found in increased Canadian consumption, and prosperity has come to the mining industry in the Maritime Provinces.

Four years ago coal production in Nova Scotia was about 2,500,000 ; last year it will approximate to 4,500,000 ; but so unlimited is the natural supply that there would be no difficulty in maintaining an annual output of 10,000,000, and the only possible market for such a tonnage (beyond the growth of the local market) is in the New England States, where the annual consumption of soft coal reaches 10,000,000 tons, at least half of which could be supplied more cheaply from Nova Scotia than from any American producing point. This would ensure a steady and permanent development of the most important industry of the Maritime Provinces, and restore the ancient glory of "Canada by the Sea."

It has been suggested that the Montreal market would be lost to Nova Scotia mines. I do not agree with this because coal can always be produced there at least as cheaply as in the States, and the cost of transportation up the St. Lawrence, which does not exceed 60 cents, is much below any possible cost of bringing coal from Pennsylvania or Ohio.

In central Canada, where the whole of the coal is imported, the gain would be all on the side of the consumer, and without any detriment to our own producers, who are too far away to reach this market. As the importation of soft coal into Ontario is about 2,000,000 tons a year, it will readily be seen how great a boon free coal would be to that province ; in fact, Ontarians have always advocated the policy.

In British Columbia we should have everything to gain and nothing to lose. Seventy-five per cent. of our product at the coast now goes into the States in spite of the duty, and the Crow's Nest coal is of such a quality that our American neighbors to the south are obliged to have it, duty or no duty.

It is clear, then, that whatever the benefit of the proposed legislation may be to the United States, it will on the whole be of enormous advantage to Canada if made permanent. There, however, is the crux of the whole question. Free coal for twelve months will not benefit our producers, because they have all the trade they can handle for that period at remunerative prices ; but if our Government and the United States Government should adopt a reciprocal tariff agreement and the United States Government should re-enact the proposed measure, then in the course of a few years our mines could develop their capacity to their full extent of the New England market, and so realize the full mutual benefit of the free coal policy. This would be the wise step for our own Government, and in the end for the United States, but I fear that the advantage of such a course may not be so obvious to the latter at the end of the year's trial, because of the difficulty under existing circumstances of our giving them a sufficient tonnage. In any case the proposed action of the United States Government is a strong argument in favor of the removal of artificial barriers, and the folly of struggling against the advantages of geographical position when the determining factor is cost and facility of transportation. It also demonstrates anew the potency of the natural law of necessity in abrogating artificial devices.

A. C. Liphardt.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater. Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

A. Mutz was in Frank this week.

A Joyce made a business trip to Nelson this week.

Mr. and Mrs. Stillman were in Morrissey over Sunday.

John A. MacLean returned from a four weeks' trip to Ontario last Sunday.

Mr. J. H. Bricker is moving into his large new residence on Hanson street.

The Frank hockey club gave a successfull ball on Thursday evening.

The Frank Miners' Union are giving a ball on the 29th inst.

Experienced nurse wanted for eight months old girl. Wages $20.00. Address Box 44, Cranbrook.

Solicitor Wm. R. Ross went down to Nelson on legal business and returned on Tuesday.

Constable Kummer went to Elko on Wednesday to look up facts connected with the cigar theft case.

Mr. D. V. Mott and family have moved into their large and handsome new residence overlooking the Elk river.

Mr. T. R. Stockett was down to Morrissey Mines on business connected with the company several days this week.

Mr. and Mrs. Blundell returned from a months trip to the east on Sunday. They missed by one train being in the Wanstead wreck.

Mr. and Mrs. W. W. Tuttle returned on Sunday from their trip east. They were the guests of Mr. W. Blakemore, Montreal, for a month.

Auditor MacPherson, of the Crow's Nest Pass Coal Company, spent the early part of the week in Nelson on business connected with the Company.

Stock Taking.

Most of the the merchants of Fernie are busy these days stock taking. This is the quietest season of the year and they select an appropriate time for this tedious work.

Diphtheria, which has been prevalent at the mines for some time, is now stamped out and it is hoped that no further trouble will be given by that virulent disease.

The fight between Davis and Burrows on Wednesday evening, in Princess Hall, was an easy victory for Burrows. Davis was knocked out in the 2nd round. A very small number witnessed the contest.

A rumor has reached us from the west that the C. P. R. contemplate changing the time-table on the Crow's Nest branch. The west-bound wiil arrive in Fernie about two hours later than now, while the east bound will arrive in the evening at about the same time as at present. The change in the morning express will be welcomed by all who have any travelling to do. Mr. Stephens has not received any word of the proposed change.

Rnn Over by Express

A heifer belonging to Mr. J. C. Hutchison was struck by the east bound express on Tuesday evening, breaking its fore leg The butcher from P. Burns & Co. was at once sent for who put the animal out of misery.

Carnival Date Changed

Mr. Digby wishes us to announce that the date of the carnival next week is changed from Wednesday to Friday, Jan. 30th. Dodgers will be issued to publish the prizes offered. A large number of merry makers are preparing costumes for this popular event and no doubt it will be a great success.

Jack Slavin Here.

Jack Slavin who claims the honor of being ex-champion middleweight fighter of America, Africa and Australia, is in town and is stopping at the Northern. Mr. Slavin has been running a boxing school at Nelson. He is anxious to get up an exhibition sparring contest in Fernie between himself and two others, one of which he would secure from among his pupils at Nelson. An exhibition match has since been arranged for Friday evening. The bills will explain the particulars.

Gun Club Formed

As the result of the two turkey shoots at the Coal Creek mines a gun club was recently organized there by the local enthusiasts. The following officers were elected; Hon. Pres., J. H. Tonkin; Hon. Vice Pres., Thos. R. Stockett, jr. and J. Drinnan; Pres., A. Shearer; Sec.-Treas., Thos. Nansen; Committee, Dr. Ker, C. Richards, Wm. Piper and Robt. Duthie. Contests will be held every week and prizes based on the weekly shoots will be given once a month. A suitable range is being prepared for distances from one to five hundred yards.

Telephone On the Northern.

A telephone system has been inaugerated on the Great Northern branch between Morrissey and Jennings, Montana, a distance of about ninety miles. The regular telegraph system has been shut off and it is said that the new method of communication has been put in as a test. In ordinary train despatching business it appears to give general satisfaction tho for private business it does not work as well as the voice of the operator speaking in plain English is more intelligible to those who happen to be within earshot than the mysterious click of the banished telegraph.

Miss Richardson entertained a number of friends at a whist party last evening.

Read A. H. Cree's advt. this week, also the article entitled. "Oil Strike in Alberta."

Mr. Nixon, Methodist evangelist of Winnipeg is holding special meetings at the mines.

Mr. Davidson, of the hardware firm of Dill & Davidson, Kamloops, is in town this week looking up old acquaintances.

Joseph Laderoute, bush-foreman for Mott, Son & Co., and his brother Charles, bar-tender at the Hotel Fernie, returned from a trip to Ontario last Sunday.

Engineer Coutlee who successfully put put through the Loop tunnel and who is well-known in Fernie is now engineering the construction of a large irrigation system near Kamloops.

Dancing Lessons

Mr Heath wishes to announce that he will recommence his dancing classes on Monday evening in Joyces' Hall. Instruction will be given to Ladies from 8 to 9, to gentlemen from 9 to 10. x

Rev. W. W. Baer, of Nanaimo, gives his lecture "Six Months in New York," with lime-light views, in the Methodist church on Wednesday evening. Mr. Baer comes well recommended. Refreshments served. Tickets 50 cents.

The depth of snow is steadily increasing. While in the town and valley very little inconvenience is now experienced by so much of the beautiful, grave apprehensions are felt that the tremendous quantity in the mountains will result in disastrous floods and slides.

The Hungarian Violinist

Prof. Paul Szgety will give a concert in the Presbyterian Church on Monday evening at 8:30. He will be assisted by local talent. The Professor has played to enthusiastic audiences throughout the west. None should miss this rare musical treat. Look out for the bills. x

At Victoria on Jan. 20th an order was made authorizing the consolidation of the 29 damage suits against the Crow's Nest Pass Coal Company, arising out of the explosion in the Coal Creek mine. S. S. Taylor, K. C., of Nelson, applied for the order; E. P. Davis, K. C., and E. V. Bodwell, K. C., contra.

The following subject will be taken up in the Methodist church to-morrow:—Morning, "The acceptable year of the Lord." Evening, "Efforts to reach the submerged masses." Special music at both services. In the morning a solo will be rendered by Mr. A. Colclough. In the evening the male quartette will sing.

Reports from out lying districts through out the Kootenays as to the devastation wrought among deer this winter by wolves indicate that the slaughter is greater than for many seasons. The heavy snow keeps the deer yarded and the wolves attack them at their leisure. Trappers and prospectors state that the destruction of the big game is deplorable.

Sir William Mulock, postmaster-general, has decided upon the issue of new stamps for Canada, and if he approves of the design which has been submitted to him they will bear an exquisitely finished portrait of his Majesty King Edward. The new stamps will not go into use, however, until the present supply has been exhausted. This will probably be about June 1st or July 1st next.

There is nothing in the report that engineers are at work on the Northern with a view to extending the line. A special from Morrissey states that these engineers proved to be a party of surveyors who work between Kalispell and Spokane including this line. They have finished a little work at Gateway and came up to see the country, saying that they would quite likely be sent up here on extensive work during the coming summer.

CARD OF THANKS.

Frank Poblitzka and his friends desire to publicly express their thanks to the Fernie Hospital officials and especially to the matron, Miss Macdonald, for the splendid treatment and care the former received at that institution during the past four weeks.

JOS. BELWAY,
Foreman, Mott's Mill.

NEWS OF THE WORLD'S METROPOLIS.

Resources of the Canadian Northwest Described at the Colonial Institute---Snobbery of Army Officers Toward Colonials.

The Royal Colonial institute was entertained on a cold and blustering night last week by a bracing account of Northwest Canada from the pen of the Dominion government agent, W. Albert Hickman, who read his article. The audience smiled, but also applauded, when he described the region as having "been more constantly, thoroughly and intelligently neglected" by the people of Great Britain than any other portion of the empire, although it contained an area of agricultural land unexcelled in extent and fertility. He presented a bare outline of the romantic history of the Hudson's Bay company, and paid a tribute to the enterprise and genius of Lord Strathcona as the magician who had opened and transformed vast solitudes, and convinced the Americans of the Northwestern States, now swarming across the frontier, that the new lands were as good as their own. The physical conditions, resources and the climate were described in detail, and the evidence of the astonishing increase in population, and the grain-growing area, was received with satisfaction by the audience. Mr. Hickman, after recounting his personal experience in the Saskatchewan country, where United States bankers, he said, were buying land in great tracts, a single company having taken one million acres, expressed his belief that the invasion from the United States did not involve the slightest danger to British interests. He looked upon the investment of millions of American money in Canada as forging one more chain in the informal alliance already existing in the Anglo-American confederation. He remarked that six billion pounds of English money might be invested in the United States, and Yerkes might undermine the whole of London, but there would never another such practical bond between Great Britain and the United States as was found in the great trek into Canada from the Northwestern States. Lord Strathcona, who occupied the chair, said experience had shown that Americans who settled in Canada became excellent British subjects.

* * *

It is understood advices have been received at the office of the Canadian high commissioner, which point to the entrance of Canada as an extremely keen competitor in the British iron trade. The Dominion Iron and Steel company, the advices say, has decided to go in for the manufacture of constructional iron Rork on an immense scale, with a thoroughly up-to-date plant and ample capital at the back for development. The British iron manufacturers are apparently not alarmed by rumors of a Canadian invasion, but the general view in the trade is that severe cutting of prices is imminent.

* * *

South African mine owners grumble over the contribution to the expenses of the war which has been levied against them, but market quotations show that the values of the mining securities have not been reduced by Mr. Chamberlain's negotiations. The terms proposed by Lord Milner have virtually been accepted. These are a war contribution of $150,000,000, covered by a loan, redeemable in ten years. Mine-owners can comfort themselves with the reflection that Sir Michael Hicks-Beach's original estimate of the Transvaal's bill of costs has been cut down two-fifths.

The United Kingdom, after being heavily taxed year after year for the war, will, however, have to pay the interest on an increased indebtedness of $600,000,000.

* * *

The London Daily Express attempts a sensation by a disclosure of the efforts of British army officers to boycott colonials who have been granted commissions. The paper says that Mr. Brodrick and Mr. Robertson have already taken prompt steps to stop this snobbery. Adjt.-General Kelly-Kenny has issued a memorandum commanding officers to stop blackballing colonials, as the unity and good understanding with the colonies is damaged by such unwarrantable conduct toward good and deserving men. Nevertheless, the Express alleges that fresh cases have arisen where colonials have been practically driven from the service by cleverly applied ostracism. As a consequence colonial officers are leaving the British army for such outside forces as the Egyptian army, West Indian regiments, and the King's African Rifles. The Express refrains from publishing names.

* * *

For the first time in many years the Thames is frozen over. At Marlow the ice is nearly an inch thick. Drift ice has formed in solid packs on the river at Windsor and Richmond. Intensely cold weather prevails, which has largely increased the number of the unemployed, as much outdoor work has been suspended.

The official figures show that 4,714 persons lost their lives and that 33,112 houses were destroyed as the result of the recent earthquakes at Andijan, Russian Turkestan.

LIKE A CITY PARK.

Trees Flourish in the Experimental Farm at Brandon—What the Farmers Are Doing in This Direction.

Superintendent Bedford of the Brandon, Manitoba, Experimental Farm, has made his six hundred and fifty acres like a city park, so many and so flourishing are the trees. He has gone into hedges, too, and has accomplished wonders along that line. He has a small plot devoted to fruit trees, and he is quite confident that some day Manitoba apples will grade up alongside Manitoba No. 1 hard. He sees no reason why some of the firm-fleshed apples, crossed with the crab, should not do well in the north country.

The Manitoba Experimental Farm is working hand in hand with the forestry department. In 1902 one million soft maples were distributed. There are orders for twice as many next year. Manitoba is going to have a garment of verdure that will vie with old Ontario. The countryside is to be garnished with soft maple, elm, Russian poplar, ash, and balsam, all of which do well under these skies; the river willow, the white poplar, and the scrub oak, hardy endogens that they are, have approved their right to live on. The quickset hedge will counterfeit old England. The Asiatic maple makes a beautiful leafy barrier, a veritable wall of boscage against which storm and wind chafe in vain.

And yet you must not imagine that Manitoba can ever grow trees like British Columbia, or like Eastern Canada, for that matter. The prairie soil will brook no tree that puts the wheat out of countenance. The wheat must be the dominant note in the landscape, the trees a mere accompaniment. Manitoba trees do not tower. They do not aspire to be lofty or noble. Their duty is to bloom, be sturdy, and look pleasant. They are little trees to the Eastern eye, and a hedge of Asiatic maple can easily outtop the tallest. Still, they are trees, with shade under them and shelter beneath them. The birds will sing in them, and lovers will walk in lanes of them. The experimental farm pays for itself when it accomplishes this tree mission. It is gratifying to know that the rough-and-ready West will spend some of its opulence on appearances.

The Manitoba farmer may well laugh at the Easterner who conceives that a Western landscape is featureless. If the land happens to be flat, look at his illimitable horizons, the burnished sun, the blue dome of the sky, the hoary majesty of the moon, and the brilliancy of the stars. Picture the oceans of grain surging green in the spring, and golden in summer. And when the harvest ripens, what can be more beautiful than the tender yellow of the barley, the gold of the wheat, and the white of the oats, great chequers of color which please the eye with their tints, satisfy the mind with their orderliness, and tickle the heart with their promise of plenty. If his eye is not filled with that, he looks at the black band of summer fallow, or further on to the unbroken prairie sod, spangled with the gentle and the flame-like flowers that the poet sings about. Even the broken sod, with the murdered flowers thrusting their heads above the furrows, carries sentiment with it. Poor flowers, your day is over! Happy, laughing soil, your pleasuring is done! You must work now, and put the glad clothes aside!

And still the half hasn't been told. The Manitoba farmer casts his eye over the landscape again, to see his fat, contented cattle browsing on prairie hay or brown grass. No stalled ox has such juicy fare. Perhaps there is a little sag in the prairie, and at the foot of it, a land-locked pool, fringed with sedge and reeds. It bristles with duck, mallard, teal, widgeon, blue bill, spoon bill, and a dozen others. The prairie chicken makes his covert in the edges of the wheat fields and gorges on the fat, red grain. Be sure the busiest farmer will find time to pot a few of these toothsome little robbers. And if a man is keen on the shoot there is always the busy little gopher to stimulate marksmanship.

The fact is that Manitoba is rich in those sentimental adjuncts which men affect to despise, but secretly long for—H. F. G., in Toronto Star.

Beaver in Manitoba.

One of our exchanges, noting the fact that colonies of beaver are still to be found in Manitoba, a quantity of new dams being in evidence in Boggy Creek, which, we believe, is on the northeast slope of the Riding Mountains, states, says The Boissevain Recorder, that few outsiders are aware of the fact that there are still beaver, in Manitoba. The position which some of these interesting animals occupy on the banks of the Souris, near the town of Hartney, and along the Assiniboine and Souris Rivers those who are interested can find in many places evidences of their presence, although the exigencies of the situation have compelled them to abandon the smaller streams and their habits of building dams and becoming what is known as bank beavers. A halfbreed recently informed us that a beaver had been killed last fall on the Willow Creek, a tributary to the Souris, which is on the Dakota side of the Turtle Mountains, and if the laws could be strictly enforced there is no reasan why they should not increase and again occupy some of the favorable positions which abound throughout the wilder districts of Manitoba.

Canadian Cartoonists.

The first of the famous Canadian cartoonists was, of course, Mr. Bengough. Fun formed a large ingredient, especially in his earlier and much-prized plates. Sam Hunter is a happy successor. Mr. Hunter grows more felicitous the more he draws. Some of his most recent efforts have been particularly well conceived, and when it is remembered that the modern cartoonist is called upon for three or four cartoons for every one that Nast drew it must be admitted that he of to-day must live at higher pressure than the draughtsman of a quarter century ago.—Toronto Globe.

THEY BOTH HUNG.

LABELLE AND FOURNIER PAY DEATH PENALTY.

Story of Their Cold-Blooded Work—How Mounted Policeman Welsh Followed the Trail Into Nevada and Effected Arrest.

Labelle and Fournier were hanged at Dawson on Jan 20. There was a tragic scene in the jail and on the scaffold. Both confessed their crime briefly.

The crimes for which Fournier and Labelle were hanged were committed in June of last year. Leon Bouthilette, Joseph Guy Beaudoin and Alphonse Constantin were slain, it is alleged, by Fournier, by Labelle or by both. Down below Dawson, on the American side, Gilbert Dufors was shot to death by Labelle, according to Fournier.

Immediately after the murders became known the most remarkable police force on the American continent, or perhaps in the world, went to work.

The body of the man first murdered was found near the junction of the Indian and the Yukon rivers. On the afternoon of the same day a body in similar condition was found eight miles above Selkirk, 130 miles above the mouth of Indian river. The nearest posts of mounted police were notified of the finds. A down river steamer picked up one body at Selkirk and took the other aboard a day later at Ogilvie.

The bodies arrived in Dawson together. Under direction of Major Z. T. Wood, chief of the ponce service, investigation at once began to ascertain their identity. In the case of the body found near Ogilvie, the quest appeared hopeless, but after a day or two the body found near Selkirk was identified as that of Alphonse Constantin, a French-Canadian, who had made his home in the Klondike since 1898 and who had become rich in mining ventures.

The identification was the first clue for the police. They learned that the wealthy Frenchman had started south early in the spring. He was going as far as Vancouver, B.C., he had told his friends, and might go on for a visit to his old home in Quebec. The other body was at once frozen and every effort made to preserve it in some semblance of humanity. No one knew who it was.

Then Major Wood issued instructions to William H. Welsh, one of the shrewdest and most experienced of the force at his command. These instructions were brief.

"Run this thing down," said Major Wood.

To the Yukon police this order means, "Stay with it until you know the truth and place the murderers under arrest." The officer knows that every facility, not only of the police service, but of every department of the government, is at his disposal in the task; that no expense need be spared; but most of all he knows that failure must never be reported.

Knowing all this, Welsh started up the river. He carefully searched the localities where the bodies had been found, but as they had been merely thrown ashore from the mighty current of the river, nothing of value to the search could be discovered. Welsh went to White Horse.

At White Horse, the outpost of the Yukon government, the point that marks the change in transportation service from the railroad leading over the mountains from American tersitory to the steamboats plying up and down the Canadian river, the police maintain a system of recording the names and brief descriptions of those who pass in and out of the Yukon.

Welsh went to work on these records. He found that Constantin had arrived from Dawson and gone on accross the mountains about the middle of May. This confirmed the story of his Dawson friends that Constantin was bound for Vancouver, perhaps for Quebec.

Welsh put in another day with the records, and his reward was ample. Here is the substance of what he found:

"June 25—Started down river in small boat bound for Dawson. Victor Fournier, Alphonse Constantin, Joseph Guy Beaudoin, Edouard Labelle, Leon Bouthilette," followed by a brief description of each man.

This bit of information meant everything to Welsh, and it went flashing down the wires to his superior at Dawson. Fournier and Labelle were both well known to the police. They were gambling house boosters both at Dawson and White Horse. Evil associations and unsavory reputations kept both under the eye of the service. The unknown body awaiting identification at Dawson was neither of theirs.

And just here Welsh was favored with a bit of luck He spent another day or two in discreet inquiry about White Horse as to the movements of this quintette which started down the river in June. He discovered the man who had built the small boat and sold it to the French-Canadians. This man had received from one of his party, whose name he did not know, $35 in bills of the Canadian Bank of Commerce. The boat-builder was promptly consigned to the care of an officer and started for Dawson.

It was near the end of July. Everything that Welsh learned was sent down to Dawson. Then Welsh, impressing Rook, the grocer, into his service, crossed the mountains to Skagway, following the trail of Labelle.

On Aug. 1, three miles from Ogilvie, on the banks of the Yukon, another body was found. It, too, was conveyed to Dawson. No one recognized it. It was frozen and placed with that of the other unknown.

With the information already in hand, Major Wood and his men at once and instinctively connected this third body with that party of five men that left White Horse in the small boat. It was not the body of Fournier or Labelle. So here were the bodies of three men murdered and thrown into the Yukon; each had received his death wound from a rifle bullet. Constantin, whose body alone had been identified, had left White Horse with four others. Where were Fournier and Labelle. Labelle was, in all likelihood, still alive, since he had passed through White Horse to the southward; Fournier, unless murdered like the rest, could at least throw light on the crimes.

Not a whisper escaped the service while the chase was on. But while Welsh and Grocer Rook were hurrying to the south after Labelle, Major Wood and his associates were keeping close watch throughout the whole Yukon territory for Fournier.

On August 24 "Pete" Fournier quietly walked into a Dawson gambling house and began to play. He unfolded a small roll of bills and bought his chips. They were bills of the Bank of Quebec. Presently he was tapped on the shoulder. Two men in civilian clothes and two policemen in uniform wanted to see him. Fournier was surprised, but started readily to accompany them. The bills he had given to the dealer One of them, the outer wrapping of the roll, bore a heavy stain of reddish black. It was blood.

Fournier went quietly to the guard house. He was promptly identified by the boat builder. He protested that he did not know what he was wanted for; he had committed no offence, and the inquisition of the police failed to move him to a damaging admission. But "Pete" was held.

Meanwhile Welsh, the detective, and Rook, the grocer, had struck the trail at Skagway, and were hanging to it with the tenacity characteristic of the man and his training. Labelle had not dallied long in Skagway. Welsh followed him to Vancouver, B. C., and thence to Seattle.

In Seattle Labelle was found to have spent several days. He had been in search of employment. Records of a local employment bureau showed that he had been sent to a logging camp in the eastern part of the county. Welsh and Rook went there. Labelle had moved on.

Then the pursuers began a systematic search of the logging camps, first in Western Washington and then across the Cascades to the Eastern part of the state. The trail was followed to Spokane, thence to Nelson, and Rossland, in British Columbia; back across the international boundary to Thompson's Falls, through Missoula and Butte, Mont., to Pocatella, Idaho, and to Ogden, Utah.

The scent was hot; the end was at hand. One jump from Ogden to the little town of Wadsworth, in Nevada and Edouard Labelle, quietly at work in the camp of a railroad contractor, was taken into the hands of the relentless and far-reaching Yukon law. Doubly identified by Welsh and Rook, branded by both as a triple murderer, the captive weakened. He admitted his knowledge of the killing, and made his confession, blaming Fournier. He readily agreed to accompany the detective to Dawson without the formality of extradition. The trio started on the return trip.

While in Seattle on his way back to Dawson, Labelle made what he deemed was a full confession. He told of being at the opposite end of island from where the party was camped and of hearing three shots. He had suspected Fournier's intention to kill the others, and began to fear for himself. He remained away for more than an hour, and at length ventured into camp about midnight.

"I crept up close and looked round for the men," said Labelle. "Fournier stood there alone. I had him covered with my rifle, but was badly ing I was asleep. He threw a piece came toward me acting very nervously and said: "I can pay you that money now. Just forget this. It's all right.' I was so frightened I didn't know what I was doing, but I took the money, $35, which he handed to me. That is where I made my mistake."

September 15 Fournier made a sworn statement. Among other things he said:

"Between us we killed four men. I know I am just as guilty. If Labelle had missed fire I would have tried the best I could. He was the leader. I was the next. I don't want to take the rope from my neck. If I deserve the rope I want it. I am old enough to be a corpse, and have run after the job fifteen years. I am ready for it."

In relating his story of the murder Fournier said:

"When we were in Dawson this spring Labelle came to me and said: 'Pete (he always called me Pete), let's go to White Horse.' We thought there might be some games running there. Then Labelle said we would meet strangers and hustle them down the river. I said: 'It's tough, but I am with you.' We got a small boat and we met the three fellows. We agreed to take them to Dawson for $6 each. We camped at night. Every night Labelle said to me he would kill them.'

"We camped the last night on an island below Stewart. In the morning I was asleep. He threw a piece of wood at me, and I knew what it meant. I heard a shot. I was sure one was done for. He said it was a rabbit. Then he shot again. Then he came back and shot the big man (Bouthilette). He fired twice at him. I saw the three bodies near the water. We searched the bodies and threw them in."

The Winnipeg General hospital is overcrowded with patients.

BLOWN TO PIECES.

EXPLOSION IN A B. C. POWDER WORKS.

Twelve Men, of Whom Ten are Chinese, Meet Instant Death, and Eleven Bodies Will Never Be Recovered---Windows Broken Three Miles From the Scene.

A dispatch from Vancouver, dated Jan. 15, says. Twelve men were killed yesterday by an explosion at the works of the Hamilton Powder company, Departure Bay. It was the worst powder explosion ever known in British Columbia.

The dead are: James Fulford, George Simonetti and ten Chinese. Fulford leaves a widow and three children. Simonetti was recently married. The body of one Chinaman was recovered. The other eleven were absolutely blown into fragments.

The cause of the disaster may never be known. The management of the works is unable to assign a cause and no witnesses survive. There was first an explosion in the gun cotton storage house, the concussion exploding the gelatinite mining house 400 feet away, where the greatest loss of life occurred.

The ground was excavated to a depth of six feet where the building stood and all the structures were blown into kindling, while fragments of human flesh were scattered over several acres. The tramway was torn up and lengths of steel rails turned around trees like whipcords.

The force of the explosion was so great that it broke windows in the town of Nanaimo, three miles from the scene of the disaster. The only surviving employee of the powder works engaged at the plant when the explosion occurred was James Preston, nitro-glycerine maker, who had a miraculous escape and who owes his life to his coolness. He was running his machine in an attached building 500 feet from the scene of the first explosion. He was thrown on the top of the machinery and a window and a portion of the wall blown in, but he kept the machinery running in spite of the concussion which almost stopped it. Preston did not leave his post, preventing a third explosion.

An excavation six feet deep marks the spot where the buildings stood. The railway track nearby was torn up and two rails twisted like corkscrews around the trunks of trees. One large tree was cut off fifteen feet above the ground. In a building 400 feet away George Preston was engaged in the most dangerous process of all, in the mixing room.

Two men inside another building nearby had a very narrow escape. The walls were blown in and timbers fell, but they were uninjured. The cause of the explosion can only be surmised. The company was very busy with a large order of gelignite for Texada and other mines. Fulford, usually employed in the dynamite room, had left his regular work and was temporarily assisting Simonetti. They and ten Chinamen are supposed to have been busy in the gelignite room when one of them went to the guncotton room to weigh out some gun-cotton. Then the accident happened, but of the direct cause nothing is known.

The concussion was felt as far as Ladysmith, forty miles away. In Nanaimo the roar of the explosion was terrifying. All over the city glass in windows facing the north crashed into fragments. Buildings shook and people rushed into the streets, fearing a disaster had occurred in the mines.

George Simonetti had a narrow escape in the last explosion which cost the late James Sloan his life.

CONDENSED DISPATCHES.

News of the World Chronicled in Short Paragraphs.

The Delhi canning company's works at Delhi, Ont., were burned on January 15.

The Winnipeg Field Battery took the highest marks for general efficiency in all Canada.

Henry Bath, of Brockville, Ont., has been sentenced to four years in the penitentiary for trying to burn a church.

An agreement has been reached for the establishment of a three hundred barrel flour mill at Moosomin.

A London cable says that emigration of Englishmen to Canada will soon assume national proportions.

The Ontario government is reported to be negotiating for the sale of its Temiskaming railway to the Grand Trunk.

The Ontario prohibitionists waited on Premier Ross and asked the abolition of the public bar and of the treating system.

Halter Herbert, the self-confessed murderer of John Sifton, of London, Ont., has been acquitted by Chief Justice Meredith.

The imperial government has decided to grant pensions to the widows and children of Canadian soldiers killed in the South African war.

Vivian Timms, who has just returned to Vancouver from South Africa, said that only biscuit boxes marked the graves of Canadians at Paardeberg.

The National Board of Trade of the United States has passed a resolution declaring for reciprocity with Canada.

Cardinal Lucido Parocchi, who was looked upon as the pope's successor, died in Rome on Jan. 15.

An outbreak of hog cholera is reported from Sparta, Ont. Several farms are affected and 51 hogs have been slaughtered by order of the inspector on the farm of E. A. Smith, and all of the affected hogs were ordered to be killed and burned. The disease was brought to the neighborhood by imported thoroughbred hogs

M. Goubet, inventor of the submarine torpedo boat which bears his name, who was recently confined in an asylum for the insane, died on Jan. 15.

Stanley Cooper, the notorious burglar, who, after a series of burglaries committed in Montreal, was arrested in Portland, has been sentenced to ten years in the penitentiary by Judge Desnoyers at the Montreal police court.

What is believed to have been the largest crowd of euchre players ever assembled at one sitting gathered in the Fourteenth Regiment armory in Brooklyn recently, where 7,500 persons played the game. There were 1878 tables; these were arranged in sections, so that there were 40 players in each section. A band of music was assigned to every twenty sections. The dozen bands played in unison under direction of one leader.

An accident occurred on Jan. 14 at Wellman's Corners, Ont., by which Alva Hogie, of that place, was killed and John Robinson, of Rawdon, seriously injured. The two men were engaged with others sawing wood on Mr. Hogie's farm, when the circular saw broke, the pieces flying and striking Hogie, killing him instantly. Robinson's arm and side are badly torn and slight hopes are held for his recovery.

A fire, attended with fatal results took place in Kaslo, B. C., on Jan. 15, when the residence of Mike Murphy was burned to the ground, and his year old child perished in the flames. The boy, it is supposed, pulled a lighted lamp over himself from off the table, and the lamp exploded. Mrs. Murphy had just gone to the next house for her other children, and the whole house was on fire be-it was noticed. The child was burned to a cinder.

The treasury department at Washington has information which leads to the conclusion that to a limited extent at least, alien girls and women are being decoyed to the United States for immoral purposes. With a view to ascertaining the exact facts the department has decided to appoint a number of women inspectors for employment at the port of New York, whose duty it will be to board all incoming steamers and make investigation into suspicious cases in the first and second cabins, and to give needful information and advice to those who may be ignorant of the real character of the houses in which they may have been promised employment.

May Seize Coal Mines.

Washington—The chairman of the judiciary committee of the House has introduced the following resolution:

"Resolved, that the committee of the judiciary be and is hereby directed to investigate and report to this house with all convenient speed the opinion of that committee as to the power of congress to declare that a necessity has arisen for taking possession of all coal beds and coal mines in the United States and all hn?s of transportation, agencies, instruments and vehicles of commerce necessary for the transportation of coal, and that in the opinion of that committee the power exists and a necessity for the exercise of such power has arisen, that the committee forthwith report to this house, declaring the necessity, providing fully and in detail, the occasions, modes, conditions and agencies for said appropriation that will fully and completely exhaust the power of congress in that regard."

Beware of Ointments for Catarrh That Contain Mercury.

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, O., by F. J. Cheney & Co. Testimonials free.

Sold by druggists. Price, 75c per bottle.

Hall's Family Pills are the best.

Nature is supposed to be infallible, yet it gives the rooster a comb, but no hair.

One trial of Mother Graves' Worm Exterminator will convince you that it has no equal as a worm medicine. Buy a bottle, and see if it does not please you.

If a man ever convinces his wife that he is a genius he must do it during the courtship.

Minard's Liniment for Rheumatism.

You can't tip a waiter enough to make him lose his balance.

About the only satisfactory substitute for wisdom is silence.

Hard and soft corns cannot withstand Holloway's Corn Cure: it is effectual every time. Get a bottle at once and be happy.

Among the prizes given to the boys attending a voluntary school in a Mid-Glamorgan village recently was one consisting of a box of soap, a piece of flannel and a towel.

AT THE OTHER END.

A certain naval officer was very pompous and conceited when on duty. One day when he was officer of the watch, and he could not as usual, find anything of consequence to grumble about, he attempted to vent his spite on one of the stokers of the vessel, who was in the engine room on duty.

Going to the speaking tube, the officer yelled, "Is there a blithering idiot at the end of this tube?"

The reply came quick and startling, "Not at this end, sir!"

TRIALS OF AN OLD LADY

Could Scarcely Walk, and Sleep and She Were Strangers.

Kidney Complaint Was the Trouble—Dodd's Kidney Pills Cured it and now She Can Both Sleep and Walk.

Bear River, Digby Co., N.S., Jan. 19.—(Special)—Of peculiar interest to aged people is the statement made by Mrs. Elizabeth Berry, of this place. Mrs. Berry is sixty-five years of age, and for over eight years she was troubled with Chronic Kidney Complaint. She was so bad that she could scarcely walk from one room to another, she could not sleep and she required assistance even to dress herself. Dodd's Kidney Pills cured her. Here's what she says herself:

"A friend advised me to take Dodd's Kidney Pills. I took one box, but that not helping me I left off taking any more for three years. I at last got so that I could not dress or undress myself and could scarcely sleep more than five minutes at a time. Then I resolved to give Dodd's Kidney Pills a thorough trial. I took five boxes and they proved such a success I took seven more boxes. Now I can sleep much better and am completely cured of Kidney trouble.

"When I started taking Dodd's Kidney Pills I could only walk from one room to another. Now I can walk a mile."

Dodd's Kidney Pills make the old feel young again.

Experience teaches a man how dishonest other men are.

Contracting a disease in reality expands it.

FREE BOOK on CATARRH

I will send my fine book on Catarrh to all sufferers from the disease. It explains the origin, dangers and cure for this treacherous trouble. It is fully illustrated by the best artists. Address, Specialist Sproule, 3 Doane St., Boston.

An Ohio girl recently sold a lot of old love letters to a rag man for 6 cents. She says she got the best of the bargain at that.

THE BEST PILLS.—Mr. Wm. Vandervoort, Sydney Crossing, Ont., writes: "We have been using Parmelee's Pills and find them by far the best pills we ever used." For delicate and debilitated constitutions these pills act like a charm. Taken in small doses the effect is both a tonic and a stimulant, mildly exciting the secretions of the body, giving tone and vigor.

INFLAMMATORY RHEUMATISM—Mr. S. Ackerman, commercial traveller, Belleville, writes: "Some years ago I used Dr. Thomas' Eclectric Oil for Inflammatory rheumatism, and three bottles effected a complete cure. I was the whole of one summer unable to move without crutches, and every movement caused excrutiating pains. I am now out on the road and exposed to all kinds of weather but have never been troubled with rheumatis since. I, however, keep a bottle of Dr. Thomas' Eclectric Oil on hand, and I always recommend it to others, as it did so much for me."

Cheap lodgings for the poor will be provided in several buildings to be erected in Vienna on the model of the Rowton houses in London.

The Flow of Milk will be increased.

Why go to all the trouble of keeping cows and get only about half the milk they should produce.

Dick's Blood Purifier

strengthens the digestion and invigorates the whole system so that the nutriment is all drawn from the food. It takes just the same trouble to care for a cow when she gives three quarts as when she gives a pail. Dick's Blood Purifier will pay back its cost with good interest in a few weeks.

50 cents a package.

Leeming, Miles & Co., Agents, MONTREAL.

FEEDING THE ANIMALS.

How Some Wild Captives Act When Mealtime Arrives.

An animal is almost as demonstrative when he is hungry as when he is in a rage. They are both natural feelings, and he sees no reason for disguising them. Human beings who are affected in the same way as animals by hunger pay tribute to civilization by not letting this appear. At an animal show in this city the wild occupants of the cages get very wild when the hour comes for them to be fed. A truck laden with meat and vegetables is wheeled around. Long before it gets to their cages the lions act as if beside themselves over the maddening prospect of food. The cages are very small, and yet a lion and lioness will often be in one. They tear from one side to the other, the lion jumping over the body of the lioness rather than make a "longer trip around." Though they ought to have learned that each will get a share, they both plunge for the great chunk of meat. Once they get it they eat it with a certain intensity, but deliberation.

The hyenas, "bounders" of the animal realm, are horribly greedy and will steal from each other every chance they get. The apes, the "snobs" of animal kind, are rather fastidious, if greedy. The ostrich, large, robust bird that it is, awaits its food with much stolidity and when it gets its head of cabbage pecks at it in a most contained, ladylike fashion. The stoical elephant is a placid eater also.

Speed of Racing Camels.

The racing camel is very carefully bred and valuable prizes are offered by a racing society at Biskra for the fleetest racer, says Pearson's Magazine. I have seen the start of a race and it reminded me, in a faroff sort of way, of a horse race. The camels were all arranged in line and they sniffed the air in their anxiety to be off. A flag was waved and they set off at a terrible pace, as if they were only racing for a short distance. They kept together until they were almost out of sight. Then they seemed to settle down to their habitual pace and the race proceeded with long intervals between the competitors. I have also seen the finish of a camel race, and it reminded me of the first motor car promenade between London and Brighton. The camels were certainly not so broken down and bedraggled, but they came in at intervals of several hours and great patience was necessary to watch them arrive.

A Mystic Volume.

A good story is told of the Russian police, who are very careful lest any literature of an atheistic character shall fall into the hands of the peasants.

A peasant in the province of Minsk went to a publisher's shop and asked for a Bible. Unwittingly the shopman gave him an algebra primer.

On opening the book when he reached home, the peasant was surprised to find it full of mystic signs and hieroglyphics. The peasant showed it to a policeman, who felt convinced that the signs were of an "extremely freethinking character," and so arrested the owner.

At the trial the peasant was discharged, and the policeman, instead of being rewarded for his religious zeal, was reprimanded.

Oil of Rattlesnakes.

In Pennsylvania the oil of rattlesnakes is preserved most carefully as a liniment especially good for sore joints and for rheumatism. In procuring the oil the dead snake is nailed head and tail to a board and cut open. The fat is taken out and laid upon a cloth in the hot sun, from which the filtered oil drips into a jar. From fear that the reptile may have bitten itself the clear oil is tested by dropping a portion of it into milk. If it floats in one globule, it is regarded as unaffected; if, on the other hand, it breaks into beads and curdles the milk, it is judged to be poisonous and thrown away.

He Knew Some Costly Ones.

In order to discourage the use of objectionable words, says the Chicago Post, the father had evolved a system of fines, somewhat after this fashion:

Hang it, 1 cent.
Darn it, 2 cents.
Gosh, 3 cents.
Gosh darn it, 5 cents.

The boy who was to be reformed by this method studied the tariff with considerable interest, but it was some time before he spoke.

"Well," he said at last, "I guess I know some words that would cost a quarter!"

To Clean Nickel Clocks.

Cheap nickel clocks that have proved their convenience through much popular use play tricks with their timekeeping occasionally for want of cleaning. This fault may be quickly remedied with naphtha. The backs should be unscrewed and the works taken out and immersed in the fluid, a treatment that will speedily restore their service unless some more radical defect than dust is the trouble.

Meanness of Brown.

Green—Brown told an acquaintance of mine that he could have beat my time and married you himself if he had wanted to.

Mrs. Green—The idea! I wonder why he didn't do it, then?

Green—Oh, I can readily understand why he didn't. He had a grudge against me.

Her Idea of It.

"Do you believe in short engagements?"

"Yes, indeed, and lots of them!"—Detroit Free Press.

CAUSE FOR ALARM.

WHEN YOU GROW WEAK AND YOUR CHEEKS LOSE THEIR COLOR.

This Means Anaemia, and if Neglected Consumption May Follow—Dr. Williams' Pink Pills the Only Certain Cure.

Anaemia, or poor or watery blood, is a trouble from which most growing girls, and many young boys suffer. It comes at a critical period of the young person's life, and unless prompt steps are taken to enrich the blood and thus strengthen the system, decline, and most likely consumption will follow. Dr. Williams' Pink Pills is the only medicine that acts directly upon the blood and the nerves, promptly restoring the ailing one to complete health and strength. The following statement from Mrs. Lena M. Ryan, of Welland, whose daughter was a victim of anaemia, gives the strongest proof of the value of these pills. Mrs. Ryan says: "About three years ago the health of my daughter, Birdie, became so bad that I was seriously alarmed. She was pale and almost bloodless; had no appetite, lost flesh and suffered from severe headaches. I took her to a doctor, and although his treatment was followed for some time, it did not benefit her. I then tried some other remedies, but these also failed, and she had wasted away to a mere shadow of her former self. At this stage I was advised to give her Dr. Williams' Pink Pills, and she began this treatment. Almost from the outset these pills helped her, and as she continued their use, the color came back to her cheeks, her appetite improved, the headaches ceased to trouble her, and by the time she had taken eight boxes she felt stronger and better than she had ever done before in her life. I think Dr Williams' Pink Pills are unsurpassed for all ailments of this kind, and strongly recommend them to other mothers."

Dr. Williams' Pink Pills not only cure all cases like the above, but also cure all other troubles arising from poor blood or weak nerves, such as rheumatism, partial paralysis, St. Vitus' dance, indigestion, kidney and liver troubles, scrofula, and eruptions of the skin, etc. These pills are also a direct cure for the ailments from which so many women suffer in silence. Give the pills a fair trial and they will not disappoint you. The genuine are sold only in boxes that have the full name "Dr. Williams' Pink Pills for Pale People," on the wrapper around every box. If your dealer does not have them, send direct to the Dr. Williams Medicine Co., Brockville, Ont., and the pills will be sent post paid at 50 cents a box, or six boxes for $2.50.

There is nothing like leather—not even the paper imitations.

Minard's Liniment is best Hair Restorer.

No man is great enough, wise enough or good enough to be trusted with unlimited power.

Fever and Ague and Bilious Derangements are positively cured by the use of Parmelee's Pills. They not only cleanse the stomach and bowels from all bilious matter, but they open the excretory vessels, causing them to pour copious effusions from the blood into the bowels, after which the corrupted mass is thrown out by the natural passage of the body. They are used as a general family medicine with the best results.

The quickest way to do things is to do only one thing at a time.

Don't Monkey with a Cough.

Just a little tickling cough may not suggest any trouble but it is often the fore-runner of very serious lung disease. Gray's Syrup of Red Spruce Gum soothes and heals the irritated membrane and the cough passes away. Gray's Syrup of Red Spruce Gum is a carefully compounded preparation and is a specific remedy for all throat and lung affections. 25 cents a bottle.

One bottle will demonstrate its virtue.

Gray's Syrup of Red Spruce Gum

At Gothenberg, Sweden, there is an artificial system of underground water infiltration by which impure surface water is made suitable for domestic use. Gothenburg has heretofore been famous for its liquor system, but now it has double honors.

CARNEFAC STOCK FOOD.

A Veterinary Conditioner.

PROF. SHAW'S OPINION.

Read what Professor Shaw, formerly of the Ontario Agricultural College, Guelph, Ont., and now Editor of the St. Paul Farmer, says of Carnefac Stock Food:

St. Paul, Minn., Dec. 10, 1902.

This is to certify that the ingredients used by Mr. W. G. Douglas, Winnipeg, in the manufacture of his Carnefac Stock Food has been submitted to me for my opinion regarding their value. I may say with reference to them that I am satisfied they are all healthful. If properly blended they should make a splendid tonic for live stock, more especially when the digestion is not in the proper order. They will act as an appetizer and will also tend to stimulate the digestion so that when feh to animals not in good condition of thrift the result would be to quickly improve their condition. I would suppose that this food would be especially helpful in feeding horses in preparing them for spring work, and in putting in tone the stomach of cattle, sheep and swine that have been pushed too hard in feeding. It should also render good service when fed to calves that are not prospering because of indigestion. THOMAS SHAW.

You can obtain it from your dealer.

OIL STRIKE IN ALBERTA.

Calgary Men Have Struck It Rich—The Oil Superior to Petrolea.

John Lineham came in yesterday from the Rocky Mountain Development company's oil property west of the Blood reserve. Mr. Lineham brought back with him a barrel of the oil which has been tapped at a depth of 1,020 feet. The oil is at Van Wart & company's lumber office, and yesterday a Herald representative had an opportunity of proving that it was the real thing. The oil has a strong petroleum smell; it is dark in color, but not thick or heavy. A stick dipped into the barrel can be lit immediately like a lamp wick, and the oil burns with a bright, clear flame, emitting however, a black smoke like refined coal oil when the wick is turned up too high.

Some time ago a sample was sent to a gentleman in the east, who is an expert on petroleum. He wrote back saying that he had tried it in an ordinary coal oil lamp, and it burned almost as well as refined Canadian oil.

A analysis made by a private party shows that the oil is 15 per cent stronger than the best oil in Petrolea, Ont. As to the flow of oil the company has affidavits from its men, one of whom is an expert weller from Petrolea, to the effect that the flow of oil when the well was struck was from 100 to 300 barrels per day.

All the facts seem to indicate that the gentlemen composing the Rocky Mountain Development company have, in mining parlance, "struck it rich." The company is composed of John Lineham, George K. Leeson, I. S. G. Van Wart, Wm. Gillies, (of Carleton Place, Ont.) and A. P. Patrick. These gentlemen have the hearty congratulations of The Herald upon their good fortune, which is certainly deserved, for they have displayed good staying powers in connection with this oil proposition. Where other companies have spent many thousands of dollars and failed, these gentleman have struck oil and made a success of it, and we are glad to say that they are in a fair way to make big fortunes out of their enterprise. It is a good thing to see our citizens making money and The Herald for one will always hail with delight the news that local men have been able to become wealthy, especially when at the same time they are developing our natural resources.

From the point of view of the country the announcement that oil has been struck in paying quantities in Southern Alberta will draw additional attention to the district from all parts of the world. There will in all probability in the near future be a flourishing town on Oil Creek; railways will make their way to the spot and capital will flow in in such a way that nothing can keep it back.

The company has so far completed but one well. It is four and five-eights inches in diameter, and 1020 feet deep. The oil at this depth is much finer than that found on the surface, this latter being more of a lubricating oil. The amount of land owned by the company is 640 acres, extending two and a half miles along the creek, and half a mile wide. The elevation is about 4,900 feet, or nearly 2,000 feet higher than Macleod. The land is the choice of the valley, and contains an excellent town site also good water power. The company is sending in another boring plant, and will continue sinking wells. The capital stock has been placed at $500,000.00 in shares of $1 each. It is proposed to put 100,000 shares on the market, to be sold at not less than $1.00 a share.—Calgary Herald.

MORRISSEY

From Our Own Correspondent.

While quarrying for rock some of Foss and MacDonald's men struck a rich vein of coal several feet thick. This strike is close to the company tipple and no doubt will be opened up.

Mrs. Gorman, the genial boarding house mistress, paid Nelson a visit Thursday. She will return next week with her daughter who is leaving school.

More miners from all parts of the country are arriving every day. It will certainly be a boom here as soon as the new town site open up.

The funeral of Herbert Marriott, the victim of the Pioneer Hotel fire, took place on Tuesday, the 20th. This being the first interment in the new town, quite a large gathering followed the remains to the grave. Appropriate services was held by the Rev. A. Stoney in the Australian Hotel before the remains were conveyed to the grave after which he finished the services at the grave side.

J. H. Tonkin and T. R. Stockett paid the mines an official visit on Tuesday.

Miss A. Nearing left here for Fernie on Monday evening, her departure is to be regretted as young ladies are at a premium here at present.

Milt Kastner, Fernie, paid a visit to the mines on Monday.

A very enjoyable evening was spent at the batch cottage Friday evening. The boys certainly know how to put up a good time. Card games, music, etc., were the chief features, ending up with a select dance in the wee sma' hours.

Dr. W. H. Willson, health officer for this district is having all boarding houses fumigated and cleaned up at the mine town. Each individual is to take baths. This will be a hardship to some no doubt, but prevention is better than cure.

A new pay sheet or statement is being now used by the coal company in paying off men. It is a great improvement on the old ones, as a man can keep his own statement and yet the company hold a receipt.

The new fan was started up on Monday and is a great success. Talk about drawing air out, it nearly draws the loose coal out too.

Cranbrook

From the Herald.

A very heavy fall of snow visited Cranbrook on Tuesday.

The Entre Nous club dance held on Friday evening last was a success. Everyone seemed to enjoy themselves.

R. Rudley, of Fernie, was in town on Sunday last on a visit to his son Leonard who has been in the hospital here for the past eight months.

The lumbermen are now complaining of too much snow in the bush. The depth interferes with teaming and soon wears a horse down.

Dr. Green arrived in town on Tuesday from the coast, where he has been visiting his old home. Dr. reports times very brisk at the coast, and also that the political standing is O. K.

Dr. Barber returned last Tuesday from Fernie, and will remain in Cranbrook until the end of the month, when he will remove to Fernie with Mrs. Barber to remain permanently. The doctor desires the Herald to thank the people of Cranbrook for their patronage accorded him in the past, and to say that there are a few unfinished jobs of dentistry in the town that he wishes to attend to before his departure. The people of Cranbrook will regret to hear of the departure of Dr. Barber and wife. The doctor has been a resident of Cranbrook for several years, and has made many friends by his professional efficiency and pleasing manner. Mrs. Barber will be sadly missed in social and church circles, where she was always a great favorite. The Herald wishes them happiness and prosperity in their new home at Fernie, and trusts that they will have the host of strong friends that they had in Cranbrook.

Lestock Forbes has been appointed Government Agent at Fernie, and will have charge of the Fernie district. Chief constable McMullen will probably be appointed chief of that district, and one will be appointed for the Cranbrook district. This will without a doubt go to F. E. Morris, the present constable in this town. He deserves it and what is more he is an efficient officer who would be a credit to the position.

The Cranbrook Masons will have the largest and best hall in this part of the province when the plans now prepared are carried out. It is the intention of John Leask, the owner of the building, to build forty feet more onto the rear, and fit up the second story in a manner to suit the local lodge. When completed it will be furnished in a neat sumptuous manner, an order having already been sent to England for their rugs and carpets.

GENERAL NEWS

Labelle and Fournier were hanged in Dawson on Jan. 20th. Both men faced death without the least signs of fear. These men were convicted of murdering three men in the Yukon last June.

The Burrard bye-electiod for the Dominion House takes place on Feb. 4. The nominations on Tuesday were; Chris. Foley, Independent Labor; Ex-Lieut. Governor Dr. McInnes, Independent Conservative, and R. G. McPherson, Liberal. The campaign is waxing hot.

Last Friday was pay-day in Frank and at one of the hotels two men got into a drunken brawl which ended by one of them leaving to procure a revolver, which upon returning and not finding his man, he turned upon inanimate objects. He was arrested and is now doing 30 days at Macleod.

The highest priced land in the world in that bounded by Wall and Broad streets and Broadway, in lower New York city. A sqare foot of ground on a corner of Broadway and Wall street is now valued at $450. The most expensive land in London sells for $300 a square foot. The average price of land in New York city's financial district is about $175.

Nine men were killed and as many seriously injured in a rear-end collision on the Great Northern Railway at a place known as Happy Hollow near Seattle. A bridge gang train ran into a rotary snow plow, and a car containing 50 men belonging to the bridge crew was thrown from the track. The dead and injured were all members of the work gang.

A MOTHER'S GRATITUDE.

15 Red Street, Near Chesterton,
Staffordshire, England, November 10th, 1902.

C. S. V. BRANCH, Esq,
Manager Sun Life Assurance Company of Canada,
Vancouver, B.C.

Dear Sir,

I am to-day in receipt of your favor of the 21st of October, 1902, enclosing cheque from your Company amounting to $2000.00, in settlement of claim under Policy No. 201203 on the life of my late son, Samuel Hand, who met his death in the Fernie Mines by an explosion, on the 22nd of May, 1902. Your general agent for the Kootenay, Mr. A. B. Docksteader, in the spring of the year induced my son to take out this insurance for my benefit. He paid but one premium of $71.20 on same, and, as above stated, I am to-day in receipt of the Company's cheque in settlement of this claim in full, without any deduction whatever for expenses in settlement of the claim or otherwise. This is particularly worthy of note, owing to the great distance of my residence from British Columbia, and the fact that Mr. Docksteader, to obtain the policy and have the necessary claim papers filled out, was obliged to take a special trip of some two hundred miles to Fernie to secure the necessary particulars, etc., which I understand was entirely disbursed by himself, and certainly has not been charged to me. Therefore I feel it my duty to express my gratitude to Mr. Docksteader for his kindness in sacrificing so much for me in settlement of this claim. Your kindness to me is also praiseworthy and I feel under an obligation in gratitude to you for the courteous and kindly manner you have conversed with me (by letter) to thank you for so promptly settling this claim. I shall therefore speak very highly of you and your Company whenever I can do so.

I have pleasure in attesting to these facts for the benefit of my son's fellow-workers, and I trust it may be of some advantage to the Company and their representatives.

I am, yours sincerely,
(Signed) THOMAS HAND,
On behalf of Hannah Hand.

M. A. KASTNER, Agent. Fernie, B. C.

MUSKOKA HOTEL.

(Opposite Coal Company's Office).

Newly opened. Newly furnished with every accommodation for the travelling public. First-class Cousine in connection.

Bar stocked with the best liquors and cigars that can be obtained.

Reasonable Rates.

JOHN BALKO, Prop.

NOTICE is hereby given that 30 days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase 320 acres of land situated in the District of East Kootenay in the Province of British Columbia on the west side of Elk River commencing at a post marked Mr. Whistle, north east corner post, thence 80 chains west, thence 40 chains north, thence 80 chains east to the bank of Elk River, thence 40 chains south along the sand bank o Elk River to the point of commencement.

J. H. Simister

Dated this 11th day of January 1903 210-4

Notice is hereby given that 30 days after date, I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase one hundred and sixty acres of land, situate in the District of East Kootenay in the Province of British Columbia and on the east side of the Kootenay River and north of lot 123 and commencing at initial post marked Dan Hayes north west corder post, planted on the east bank of the Kootenay River and near John Brown's north east corner post (application for purchase) thence forty chains east following the bank of the Elk river up stream; thence forty chains south; thence forty chains west; thence forty chains north to the place of commencement, containing one hundred and sixty acres more or less.

DAN HAYES.

Dated this 28th day of November, 1902. 207

NOTICE.

The Crows Nest Pass Electric Light and Power Co., Limited, after this date will not make wire connections to any premises which have been wired by any party or parties not its accredited representative, and any consumer adding additional lights without the consent of the company, will not only be liable for damages but will have the entire service discontinued.

Any person or persons making connections to, or tampering with, the Company's water mains will be prosecuted, and their water service discontinued.

MINING ASSOCIATION.

NEW PROVINCIAL ORGANIZATION FORMED.

A Grand Rally Called Throughout B.C. to Send Delegates to Next Meeting, Feb. 25th.

The Provincial Mining Association of British Columbia is a new organization, provisionally formed at Victoria on Jan. 14th. Its object is to encourage and build up all mining industries throughout the Province. J. B. Hobson has been appointed chairman and H. Mortimer Lamb secretary, and the circular printed below putting forward the aims of the Association has been scattered broadcast throughout the Province. The C. P. R. has generously offered to those who are sent as delegates to the meeting on Feb. 25th a rate of single fare for the round trip for delegates (which includes their wives.)

Dear Sir: The conditions surrounding the mining industry of British Columbia, the principal industry of the province, have become so burdensome that mining operations have ceased to yield a profit to investors, and capital has ceased to flow into the country. Efforts have been made by certain classes in the community, sometimes on behalf of practical miners, sometimes on behalf of the mineowners, and sometimes by delegations from municipalities to secure relief from the parliament of Canada and from the Legislature of this Province. All such efforts have heretofore failed, partly owing to the imperfect knowledge of our difficulties possessed by our legislators, and partly owing to lack of united organization fairly representative of all persons interested in the mining industry. With a view to overcoming such obstacles and securing for the mining industry the support which it deserves, it is proposed to form a large and representative Association of miners, mineowners, merchants, bankers, farmers and professional men, and all other persons who may be directly or indirectly interested in the industry.

By this means, and apparently only by this means, can we secure relief for the industry and such favorable legislation as will restore confidence in foreign capitalists.

If we can make our mining industry prosperous, every other industry in the Province will naturally and necessarily share in such prosperity. The present depression of nearly all such other industries is the natural and necessary result of the depression in mining.

The proposed Association is not an untried experiment. Some years ago the miners and mineowners of California found themselves hampered as we are now with a lot of unjust legislative conditions. A few individuals met together to discuss the situation and devise a remedy, and they started the California Miners' Association for the purpose. The idea was grasped immediately by the working miners, the mineowner, merchants, farmers and others, and the result was that within a very short time the Association succeeded in obtainihg all the remedial legislation they required, and the mining industry of the State increased by leaps and bounds, and brought prosperity to all other industries also. Fortunately, we have in our midst a gentleman, Mr. J. B. Hobson, Manager of the Consolidated Cariboo Hydraulic Mining Co., who was one of the originators of the California Miners' Association, and he will lend all the assistance he can to make a similar success of The Provincial Mining Association of British Columbia.

A preliminary meeting was held in Victoria on Jan. 15th, when a committee was appointed to draw up a report to be presented to a public meeting on the following day. On Jan. 15th a large and representative public meeting was held at the Board of Trade building in Victoria, attended by numbers of working miners, mine managers, merchants, members of the legislature, professional men and others who realized that the welfare of the mining industry means the welfare of the province. The chairman, Mr. Hobson explained fully the objects and aims of the new Association. The greatest enthusiasm prevailed, and it was realized that at length a means had been found which would ensure an uplifting of the mining industry from its present depression to a position of prosperous expansion.

The meeting recognized that owing to the spontaneous nature of the new scheme no opportunity had been afforded to secure the co-operation of the people throughout the province, and it was decided to call a convention to be held in Victoria on February 25th, when delegates from all districts would be able to attend and formulate a permanent organization.

Copies of the minutes of the meeting and of the Committee's report, and the minutes of the meeting on January 16th, are enclosed which will explain exactly what has been effected up to date.

All that remains to be done is to secure representative delegates from the various cities and districts of the Province for the purpose of attending the convention at Victoria on Februrary 25th.

The successful organization of the Provincial Association of British Columbia will ensure better conditions for the mining industry, and thereby restore confidence in the magnificent mineral resources of the Province.

The first thing to be done in each city and district is to call a meeting as promptly as possible of all persons interested in mining and especially of the practical working miners, mineowners, merchants, farmers and others whose business prosperity is effected directly or indirectly by the prosperity of the mining industry and let each man sign the membership roll. Each community is entitled to send one delegate for every twenty members, or one delegate in the case of a community of less than twenty members. The chairman of each meeting will promptly send in the names of all members to the undersigned.

The delegates' credentials will consist merely of a letter signed by the chairman and secretary of each local branch, certifying the numbers of members enrolled in the city or district, and the names of the delegates appointed.

The Constitution and by-laws of the new Association will be settled at the convention on February 25th.

H. Mortimer Lamb,
Provisional Secretary.

N. B.—Please regard this new Association as one which concerns you personally and do all in your power to make it a success, for its success means your own prosperity.

FERNIE'S JUST DUES.

THE NEW LICENCE COMMISSIONERS APPOINTED.

W. H. Whimster and F. W. Burn honored. —The latter may Refuse to Act— Chief Forbes still Inspector.

A supplement of the B. C. Gazette this week contains the following announcement of the Licence Commission appointed for this year.

FORT STEELE LICENCE DISTRICT.

James Duncan McBride, of Cranbrook.
William Henry Whimster, of Fernie.
F. Burn, of Fernie).
(Chief Licence Inspector, Chief Constable L. R. Forbes, Fernie.

A wire came up from Government Agent Renwick of Nelson on Thursday telling Fred's friends of the honor conferred upon him but he, when interviewed stated that he would refuse the position.

The other three gentlemen served on the commission last year and gave general satisfaction.

BIG FIRE IN CRANBROOK.

G. H. Galpin's Large Ware-house and Stock Destroyed—A Narrow Escape for the Town.

Last week a fire broke out in the early morning hours in the rear of Gilpin's two storey warehouse, located on Armstrong Ave, just south of his store. Despite the best efforts of the volunteer fire brigade the building and almost its entire contents were destroyed, involving a loss of some $15,000. The property is covered by a blanket insurance policy which will leave Mr. Gilpin a losser by about $3,500.

A large crowd of men gathered about the conflagration and as the idea gained ground that not only would the warehouse be destroyed but adjoining buildings much work was done towards removing their contents. Fortunately with the aid of a stream of water and ready hands the fire was confined to the ware house, though a space of only 25 feet each seperated the burning building from those on the north and south.

FERNIE VICTORIOUS.

THE LOCALS DEFEAT FRANK AT HOCKEY ON TUESDAY SCORE 3--0.

The Visitors Were an Easy Mark. All The Goals Were Scored From Cover Point.

On Tuesday afternoon a large Fernie crowd witnessed a somewhat one-sided game of hockey between Frank and our team. The game had been advertised for the preceding day but owing to the soft ice it was postponed and the large number that gathered on a few hours' notice is strong evidence of the popularity of this sport in Fernie. The merchants loyally closed their places of business and for an hour and a half the rink was the centre of attraction for everybody. The visitors in white and the "F's" in black lined up as follows.

Frank.		Fernie.
Sharp	goal	McKellar
Ashdown	point	Ziegler
Collins	cover point	Kastner
Hamilton	rover	Kenny
Buchanan	forwards	Sturdy
Robertson		Lafortune
McMurphy		Fair
Bentley	umpires	E. Wriglesworth

Referee, J. Miller.

The game started off brisk enough but it soon became evident to even a novice of the sport that the locals had an easy proposition ahead and not for a moment was the result in doubt. The visitors were inferior in skating and their stick handling with one or two exceptions was not brilliant. Our own team was off color too, and had they played even as hard a game as when the Hat was here the score would have been much greater.

The first goal was scored in 11 minutes from the start. Milt Kastner did the trick from cover point by one of his unerring raised shots. No more goals were scored before half time, though the Fernie forwards had the puck around their opponents' net most of the time.

One minute after play was resumed on the second half Milt's long shot from cover again worked effectively. Two minutes later the boys in white again showed that they were not onto Kastner's shooting by letting him do the same trick from the same point. The score now stood three to nil for Fernie and the Frank boys seeing no chance of winning fell back on the defence and stubbornly guarded their net. Towards the end a few frantic rushes were made by the visitors' forwards, especially Buchanan who played a swift, clean game throughout, but nothing serious happened.

The Frank team lack combination and the majority of their players lack speed and stick-handling ability. The Fernie forwards were seriously handicapped by the visitors' bunching tactics before their goal, and they found it too cramped for combination, or a much larger score would have been piled up. Kastner played the star game, his shooting and checking were features admired by all.

Mr. Miller refereed the game to the satisfaction of all the players. "Offsides" were frequently called and once when Kenny and McMurphy forgot they were playing hockey they were sent to adorn the fence. The visitors played a gentlemanly game and their reputation as good sports has not suffered any by their defeat.

GALLIHER COMING HOME.

Victoria, Jan. 24.—W. A. Galliher, M. P., left for home last Saturday. In addition to looking after the lead delegation, he attended to a large number of matters affecting his constituency.

He made arrangements with the postmaster-general for opening the following postoffices: North Star, near Kimberley; Annis, near Sicamous; Silver Creek, Moberley, near Donald; Boundary Falls near Greenwood; Gold Fields, in the Lardeau, and Morrissey Mines, making seven new postoffices.

Mr. Galliher has also arranged for a mail route between Princton and Hedley. This will be a boon to that ranching and mining region. Another mail route to be established is between Wilmer and Cranbrook.

A light house will be built at Pilot Bay.

POLICE COURT.

E. J. Camies, a police officer from Macleod, came up on Thurday with a warrant for the arrest of Charles G. Lange on the charge of passing a cheque for $284 which he knew was forged. He was arrested by Constable Walker and he accompanied the officer back to Macleod on the evening express.

H. Sheppard, who was fined a couple of weeks ago for scrapping, got into the toils again this week on the same charge and this time he got the limit, two months with hard labor. Sheppard attacked his companion Wm. Burke who was drunk, in his room at his boarding house and used him without gloves until forced to desist by those attracted by the noise. Sheppard was afterwards up before Stipendiary Magistrate Armstrong charged with refusing to conform to goal regulations and he is now serving three days in the dark cell.

H. A. Gentle was arrested on the charge of being loose, drunk and disorderly; he acknowledged he was a gambler He will earn his board for the next two months by working for the Government.

The case against Demaurez for keeping a gambling house came up again on Thursday evening. Chief Forbes for the prosecution asked for another adjournment. He had received a wire from the Attorney General stating that he was writing in full on the point in question as to whether the search warrant in this case was legal and the letter was not to hand. The Majistrate granted an adjournment of another week.

KILLED AT THE MINES

THE FIRST FATALITY IN FIVE MONTHS TOOK PLACE THIS MORNING

Frank Missanelli Crushed Between Tipple and Slack Car Dies One Hour Later

An accident which resulted fatally occurred at Coal Creek mines shortly after 7 o'clock this morning. Frank Missanelli, an Italian who was employed at dropping cars to be loaded with slack at the tipple, in some unaccountable manner got caught between a moving car and the planking on the upright supports of the tipple.

The distance between the planking and the ridge board of the car is only a few inches. The man was caught by the approaching car and rolled in this narrow space for a distance of about ten feet before the car could be stopped and he was lodged in so tight that it was necessary to smash the planking to rescue him. He was at once attended by Dr. Ker and removed to the Fernie Hospital, where he died after an hour of terrible suffering. His death was the result of internal injuries and shock. One arm was broken. An inquest will be held as soon as Coroner Trites, who is ill, can undertake it.

Deceased was a young man of fine physique. He had occupied the position of car dropper for two years and it is difficult to understand how he forgot the danger of his position. He had loaded one car and was dropping the second car to be filled when the catastrophe occurred.

The Coal Creek colliery has been particularly free from accidents of late, this being the only serious one since A. Ferguson was killed last summer.

JANUARY SCHOOL REPORT

Total daily attendence.....3515
Average " " 175.75

DIVISION 1

High School :—Amelia Turner, Jessie Dunlop.
Entrance :—Gordon Johnson, Ethel Dunlop.
Fourth :—Tom Corson, Lillie Sunburg.

DIVISION 2

Class 3 :—Esther Lamb, Roderick McLeod, Chas. Kanouse.

Class 3 :— Senior :—John Macdonald, Mabel Graham, Percy Clark.
Junior :—Chas. Clapp, Jim Nicoll, Maggie McKane.

DIVISION 4

Class 1 :—Charlotte Rennie, Wm. Ross.
Second Primer :—Arthur Turner, Minnie Halpin.

DIVISION 5

First Primer :—Mary Miscisco, Lawrence Wildman.
Class B :—Marion Corson, Tom Quigg.
Class A :—Mary McDonald, Rosie Mills.

An accident occurred on Wednesday at Crow's Nest Lake by which Engineer Norman Chaput was badly injured. The water dripping from the tank froze and formed a solid piece of ice over the rail, which threw over the engine on the side that the engineer was on. The wrecking train was sent down. It is not thought that Chaput was badly injured.

LARGEST ON RECORD.

OUTPUT FOR JANUARY LARGEST IN THE HISTORY OF THE COAL COMPANY.

55,000 Tons Taken out at the Three Points—Michel Forging to the Front.

The output of coal from the three collieries of the Crow's Nest Pass Coal Co. for the month of January is the largest monthly output in the history of the Company.

The following figures give the correct returns up to last night and to-day's returns are estimated by averaging for the past week. The figures are if, anything, underestimated as the last days of the month always reach above the average:

Coal Creek..... 20,000
Michel..... 20,000
Morrissey 15,000

Michel's production is steadily increasing, the result of the extensive development work done there last summer and now it is a neck and neck race between that colliery and Coal Creek.

The largest previous record was in March, 1902, when 53,000 tons were mined. The outlook is promising and no fears are entertained by the manage- of the Company that they will not be able to supply the ever increasing demands of the B.C. market.

THE I. O. O. F.

The election of officers in the I.O.O.F. for the next term took place on Thursday January 29th. The following officers were installed:

J. R. McEwing	N. G.
Thos. Beck	V. G.
C. P. Higgins	Rec. Sec.
O. N. Ross	Fin. Sec.
Geo. Reynolds	Treas.
Geo. Clapp	W.
T. Bell	O. G.
J. C. Hutchison	R.S.N.G.
F. J. Watson	L.S.N.G.
S. Slinn	R. S. S.
H. Williams	L. S. S.

Col. Lynch who was tried in England for high treason in serving with the Boers was found guilty and received the death sentence which has since been commuted for life imprisonment.

Barrister D, G. Macdonald on behalf of R. J. Macpherson, the liberal candidate in Burrard constituency and R. Kelly, chairman of the party executive, has entered joint action for libel against C. W. Murray, a prominent Foley worker, and the Vancouver News Advertiser. The paper published, and fiercely commented upon, a statement made by Murray that Macpherson had signed a note in Kelly's favor for $5,000, representing half the amount of the campaign fund provided by Kelly, as a guarantee that he would consult Kelly's interests if elected.

There is a rumor about town that a balance of about $500 of the $3,000 donated by the Western Federation of Miners to be expended on behalf of the relatives of members killed in the late explosion is still in the treasury of the local union and that a motion has been made in the union to turn the money into the general fund of the union. We hope there is nothing in the report as such an action would be a gross injustice to the memory of the deceased members as well as to the Western Federation of Miners.

Dr. Barber Coming

Dr. Barber returned last Tuesday from Fernie, and will remain in Cranbrook until the end of the month, when he will remove to Fernie with Mrs. Barber to remain permanently. The doctor desires the Herald to thank the people of Cranbrook for their patronage accorded him in the past, and to say that there are a few unfinished jobs of dentistry in the town that he wishes to attend to before his departure. The people of Cranbrook will regret to hear of the departure of Dr. Barber and wife. The doctor has been a resident of Cranbrook for several years, and has made many friends by his professional efficiency and pleasing manner. Mrs. Barber will be sadly missed in social and church circles, where she was always a great favorite. The Herald wishes them happiness and prosperity in their new home at Fernie, and trusts that they will have the host of strong friends that they had in Cranbrook.—Cranbrook Herald x

HEADLONG FALL.

A TEAMSTER HAS A NARROW ESCAPE.

Benjamin Hart, While Unloading Garbage at the Winnipeg Crematory Falls Headlong Into the Fiery Furnace, but Escapes With His Life.

Benjamin Hart, a teamster, while at work unloading garbage at the Winnipeg crematory, Jan. 27, slipped and fell headforemost into the furnace when it was at white heat, and miraculously escaped a most horrible death. Hart was unloading garbage at the mouth of the crematory furnace from his wagon. The matter was frozen and he took his pickaxe to tear it asunder. He was endeavoring to tear a large piece which contained a quantity of old carpet. The carpet was rotten, and when he put forth an extra effort it tore, and the teamster tipped and fell head first into the furnace, taking his pickaxe with him.

Fortunately he had already unloaded a good portion of his load, and there were at the time the carcases of two horses in the furnace, or Hart would have been instantly consumed.

The ordinary person can only look into the crematory furnace with a shudder. It has a floor of grating made from railroad rails and these are heated to the fullest extent.

Hart at once shrieked for assistance, and M. P. Peterson, the caretaker of the building being close at hand, quickly took in the situation. The distance Hart had dropped was seven feet, and there was no way out but to climb the almost red hot walls.

Peterson told Hart to grasp the end of his pickaxe and give him the handle, and the former, who is a powerful man in his way, managed to drag the unfortunate man out of the furnace. He was painfully burned about the face and head. Dr. Halpenny was summoned and he dressed Hart's wounds and ordered him to be taken to the Winnipeg General hospital, where he now lies. The doctor says the wounds while painful are not of a very serious character.

A PERILOUS VOYAGE.

A Steamer Takes Over Three Months to Sail From Nome to Port Townsend.

A special dispatch from Port Towosend, says: After having been so long on the journey that recent advices of safety were received with undisguised incredulity, the little steamer Dawson City, one of the first of the new fleet to leave and the last to arrive, came sailing into port at noon on Jan. 25 like a spectre. Few here had ever seen the vessel, and it was not until former Nomeites confirmed the supposition that it could be believed that the little vessel was really the long overdue packet. The steamer gives few outward signs of the terrible voyage, but a casual inspection aboard shows the differences. The boiler is leaking to the point of being absolutely useless, while the machinery, through continuous buffetings and lack of facilities for repairs, tells a plain story. Felix Brown, owner of the vessel, shows the effects of the troubles to which he has been subjected in his efforts to get his property back to civilization.

From October 8 last year, when the Dawson City started from Nome for Seattle, her voyage has been one of perpetual misfortune and disappointment. When but a few days out the boilers commenced leaking, and the steamer headed for Nunevack island, where temporary repairs were made. She left there November 10, during very bad weather. To add to the discomforts several boiler tubes blew out, disabling the steaming facilities. Several days later the vessel was forced into Port Moller by the fact that both the water and fuel began to run low. The chart showed that coal was available at this port, but the statement was omitted that the deposit was located five miles inland, with no road available to tide water. Nothing daunted, the crew, from master to boy, went at the task and succeeded in filling the bunkers again, each man carrying a gunnysack with 50 pounds of coal on each journey, covering ten miles going and returning.

While taking water casks ashore the crew lost one of their available boats, which was dashed on the rocks and smashed. After two weeks of spent in this tiresome work at Moller, the vessel started out again. The severe winds commenced. The Dawson City was caught in terrific gales, but weathered them surprisingly well. Soon the coal was exhausted again. The vessel was forced to head for Dutch Harbor, using such canvas as was found aboard for a makeshift sail. Two weeks were spent at Dutch Harbor, a new canvas secured, and on January 3 the packet resumed her trip. Off Cape Flattery, Friday night, the vessel met a strong gale, but was fortunate in having a shift of wind, which brought her to anchorage here.

It is not generally known that the German empress is a sculptor and painter of more than usual ability. In her husband's study at Potsdam there is a most life-like bust of the emperor in bronze, while several of the young princes have also been reproduced in marble. Many sketches and paintings by the empress adorn the walls of the palaces.

THE WIDE WORLD.

Telegraphic News of Two Hemispheres Briefly Chronicled.

The Scottish curlers defeated the Hamilton district rinks.

The Anglo-German alliance is very unpopular in England.

The silk cargo in the C. P. R. steamer Athenian was damaged $50,000 by fire.

John G. Moore, a veteran of the railway mail service in the west, died in Winnipeg on Jan. 26.

Peterboro and Oshawa rinks may attend the Winnipeg bonspiel. The Scottish curlers and Mr. J. W. Flavelle's rink leave Toronto for the west on Feb. 2.

The Winnipeg city council's special committee has recommended that a bylaw be submitted to the ratepayers for the purpose of securing a civic gas plant. The council also favors a civic telephone system.

English soldiers who have returned from South Africa are arriving in Winnipeg with the object of settling in the Northwest.

Canada has withdrawn the preferential tariff on imports from New South Wales.

The Hon. Thomas Bain is spoken of as successor to the late Senator Wood, of Hamilton.

James Coppell, of South Canonto, Ont., was frozen to death on the road near his home.

The charred bones of Fireman Thomas Matthews, killed in the G. T. R. wreck, near Port Hope, Ont., were found under the debris.

Representatives of the pulp and paper makers of Canada have asked Premier Parent, of Quebec, to assist them in securing a Dominion export duty on spruce logs and pulp wood.

Former President Steyn, of the Orange River Colony, will have an important position in South Africa under the British government.

It is now generally conceded in London that the sentence passed upon Col. Arthur Lynch, who was found guilty of high treason on Friday last, will be commuted to penal servitude for life, subject to further consideration after a term of years.

A London cable says: Archbishop Machray, of Winnipeg, proposes to return to Canada in May, accompanied by his nephew, probably Robert Machray, the writer. The growth at the base of his spine has completely withered up under the X-ray treatment. Sir Thomas Barlow, the eminent physician, describes it as one of the most remarkable recoveries known.

A report has been received at the department of trade and commerce at Ottawa, from Mr. Jardine, South Africa. Mr. Jardine incloses a letter from Sir Percy Girouard, stating that the time cannot be extended for receiving tenders for material for South African railways. Sir Percy, however, says that he will deal with agents of Canadian firms so that those who have agents can tender on the spot.

A cable from Durban, S.A., says: Pubonic plague is spreading so seriously that the natives are panic-stricken. Servants and laborers are leaving the town in large numbers. It is anticipated that the Zululand drifts will be closed so as to prevent the spread of the plague to that territory.

The steamer Miowera, which has arrived at Victoria from Sydney, brings news of the murder of several white men by the natives of New Guinea. A drought has been experienced for some time on the island, and it is thought that as a result of the shortage of food in consequence, the natives have reverted to cannibalism. Murders are reported from several places. One report tells of the killing of two European prospectors, who were eaten by the blacks, and a Dutch constable is reported to have been kidnapped and eaten. Several blacks were also murdered. Many of the natives have no food and are subsisting on roots and herbs.

A dispatch from New Orleans, La., says: John Thomas shot and killed Sheriff Ben Ory in St. Charles parish on the morning of Jan. 26, and was lynched in the afternoon. Although wounded in the arm, he escaped and hid in the drain of Ashton plantation a mile away. He was discovered by his pursuers, riddled with bullets, placed in his cabin home, and cremated with all his effects. Thomas was the bully of the section, and had assaulted a negro with a pistol. Sheriff Ory went to serve the warrant and Thomas killed him with a shotgun. The sheriff succeeded in reaching him with one bullet as he fell.

DEATH SENTENCE

COL. LYNCH FOUND GUILTY OF HIGH TREASON.

The Member of Parliament For Galway Sentenced to Hang For Fighting on the Boer Side in the South African War.

London, Jan. 24.—When the trial of Colonel Arthur Lynch, member of parliament for Galway, on the charge of high treason, was resumed yesterday, counsel for the defence began summing up.

There was no attempt to deny that Colonel Lynch supported the Boers, but counsel contended that his naturalization was in no way prompted by treasonable intent, and was solely for the advantage he would thus secure for journalistic purposes. Subsequently the defendant actively supported the Boer cause in the belief that he was a legally naturalized burgher.

Replying for the prosecution, the solicitor-general, Sir Edward Carson maintained that Col. Lynch joined the Boer army as a discontented Irishman, "thereby committing a most cowardly and most serious act of treason." His naturalization, continued the solicitor-general, was only a flimsy pretext. Counsel then proceeded to detail the prisoner's alleged acts of adherence to his country's enemies.

The lord chief justice summed up very briefly. He said that if in war time a British subject joined the king's enemies, whatever his purpose, he was guilty of an unlawful act. Naturalization during war time afforded no excuse whatever for subsequent acts. There was abundant evidence, he said, of overt acts in aiding the king's enemies.

The jury, after having been out half an hour, returned a verdict of guilty.

When asked if he had anything to say as to why he should not be sentenced, Colonel Lynch replied:

"Thank you, I will say nothing."

The sentence of death was passed on each of the four counts in the indictment. The prisoner then bowed to the court and was removed in custody.

In delivering sentence Justice Wills said: "The crime of high treason, of which the prisoner has been found guilty, happily is so rare that it seems to be almost an anachronism. No civilized community has yet failed to punish severely defection from loyalty, whether in the way of open warfare or secret intrigue. In the darkest hours of his country's fortune, when engaged in a deadly struggle, Lynch joined the ranks of its foes and shed the blood of his fellow subjects, who were fighting for their country, and sought to dethrone Great Britain from her place among the nations. The only palliation which could be offered was that it had been the fashion for some years to treat lightly matters of this kind, and men had been encouraged to play with sedition, and for this reason the nation had been treated with contemptuous indifference, speeches and acts of sedition; but it was one thing to talk sedition and quite a different thing to bear arms in the ranks of the country's enemies."

Although normally sentenced to be hanged, Lynch's sentence will no doubt be commuted. Lynch throughout bore himself with unfaltering composure. He walked out steadily between the jailors and past the bench where his wife and other relatives were seated.

Mrs. Lynch has been given permission to see her husband.

Col. Arthur Lynch, journalist and author, was born at Smytnesdale, near Ballarat, Australia, in 1861. His father was a civil engineer and land surveyor. He married Annie, daughter of Rev. John D. Powell, in 1895. He was educated at Ballarat Melbourne university, Berlin university, and at Paris. He graduated M. A., and C. E. from Melbourne university. He practised for a short time as an engineer, subsequently taught mathematics, and lectured on engineering and scientific subjects in Melbourne, after which he went to pursue his scientific studies. He returned to Paris, where he published books and began journalism. After a trip to America he resumed journalism in London, where he published more books. He was a war correspondent to Ashanti, and up to the beginning of the Boer war he lived between London and Paris, and again visited America. He became colonel of the Irish Brigade No. II. on the Boer side during the South African war. He owns a small estate in County Clare, Ireland. He was elected member of parliament for Galway, but never took his seat.

The trial of Col. Lynch for high treason is the first case of the kind, it is said, that has been before the British courts for sixty-two years. While he was in active service against the British his Irish admirers in County Galway, Ireland, elected him a member of the House of Commons.

Canadian cotton prices have advanced.

Ontario desires 10,000 British farm laboroers brought over this year.

Sir Thomas Shaughnessy has declared in favor of permanent reciprocity in coal.

Indians on Dominion City reserve have refused to give up their land at the request of Inspector Marlatt.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

E. Burgoyne, a farm laborer, was killed near Souris by a team of horses.

One thousand more Chinamen entered Canada during the last fiscal year than in the previous year.

Julian Ralph, the author and war correspondent, died at his New York residence on Jan. 19.

The Manitoba legislature will be called for the dispatch of business on Feb. 12.

The Scottish curlers were welcomed to and defeated at Peterboro.

A game of chess has been played on two Atlantic liners by means of wireless telegraphy.

The Rowing club hockey team defeated the Winnipeg Victorias in the third match of the senior series by 5 goals to 4.

Archbishop Bruchesi states that the Pope of Rome does not consider the Manitoba school question as settled.

Colonel Lynch's trial for treason has opened in London.

Mr. William Bathgate, a pioneer of Winnipeg, died on Jan. 20.

Big electrical works are planned on the Winnipeg river, to cost a million dollars.

It is reported the C. P. R. will build branch lines into the state of Washington.

The C. P. R. is negotiating for the purchase of twelve Elder-Dempster line freighters.

Three Neepawa residents have been arrested for being implicated in the death of Henry Spence.

A large shipment of Canadian wheat and flour will leave Vancouver for South Africa next month.

De Ami, of the Canadian geological survey, has been awarded the Bigsby medal for his researches.

The C. P. R. will build a half-million bushel elevator at Port Arthur.

The newly organized Rainy River Pulp and Paper company will construct a plant worth $150,000.

The House of Commons may be called for the last week in February.

The government steamer Stanley is fast in the ice in Northumberland straits.

It is said in Montreal that the Grand Trunk Pacific will be built whether the Dominion government aids or not.

A man named Gilbert Genereau was found dead in the woods near Actinolite, Ont. He had been skidding logs, and from the marks on his forehead it is evident that one of his horses kicked him.

The Canadian Pacific railway company has received an offer from a colonization syndicate of $42,000,000 for fourteen million acres of the company's lands, on a basis of $3 an acre. The offer has been rejected, as the management considers it a better course to sell its land direct to settlers.

A head-on collision between two Grand Trunk freight trains occurred three miles west of Port Hope on Jan. 21, and resulted in the death of two men, Fireman Matthews and Brakeman Everst, both of York. About twenty cars were demolished and the wreck caught fire.

Two heavily laden milk waggons collided in Jersey City last week. All the milk was upset, and formed a lake of considerable size in the middle of the road. In a few minutes it was frozen solid, and many small boys indulged in skating on milk ice.

The Rev. W. W. Baer, of Nanaimo, has been arraigned before the British Columbia Methodist conference on a charge of smoking. The law of the Methodist church in the Dominion is that no minister who smokes can preach. Mr. Baer, who acknowledged that de disposed of two cigars and a pipe of tobacco every day, pleaded that he was acting on his doctor's orders. The committee dismissed the charge.

About 600 male and female prisoners made an organized attempt to break out of the local jail at Odessa, Russia, the other day, and it was only frustrated by hastily summoning troops, who fired on the rioting male and female convicts. The volley killed a woman and a man and wounded a number of others. The action of the troops quickly ended the revolt.

The Chicago city council has passed a bill appropriating $25,000 with which to purchase coal for the destitute. Action was also taken which will probably result in the establishment of municipal fuel yards.

A New York dispatch says: By the arrest of a man who the police say is William Furlong, an alleged scheme to fleece the public has been brought to light. The police say that Furlong has been advertising in New York and Philadelphia for a "gentleman who would be willing to marry a lady he had never met and from whom he would be expected to secure a divorce as soon as possible after the marriage. The advertisements said it was necessary, in order to settle an estate for the lady to marry, and the man accepted would receive $20,000. As soon as an answer was received a circular would be sent, in which the applicant was asked to send $1 for the picture of the lady. The police say that 600 answers were received and that Furlong also secured money by advertising for applicants for a position. Furlong had handsomely furnished offices on Wall street. When arraigned the prisoner gave his name as J. N. S. Scudder.

A treaty has been signed at Washington providing for the settlement by a commission of the Alaskan boundary dispute.

Prof. Tizzoni, of the Bologna university, has announced to the Royal academy of Sciences at Rome the discovery of a serum to combat pneumonia.

Dispatches from Edinburgh announce that in furtherance of his educational scheme for Scotland, Andrew Carnegie has decided to endow a trust for scientific research. The sum of $5,000,000 will be expended on the scheme.

A great fire broke out in Armagh Ireland, on Jan. 25, and spread so rapidly that the local fire brigade being unable to cope with it, Belfast, 35 miles distant, was appealed to for aid. The fire burned ten of the largest warehouses and shops in the centre of the town, the damage being estimated at $380,000. The trade of the town is paralyzed by this destructive fire. The timely removal of a quantity of dynamite from one of the stores averted a worse disaster.

Two young, well-dressed women, Edith Squires, aged 17, and May Matchett, aged 18 years, were arrested on Saturday for shop-lifting at Eaton's in Toronto. They are experienced hands, as they carried wrapping paper with them and wrapped up the stuff they stole, which was selected with judgment, only costly goods being taken. Later in the evening Isaac Matchett, husband of May, was arrested as the receiver.

Ed. Clark, while in a Toronto hospital recently, was given $20 to allow the doctors to take the skin from his body to graft on a young woman who was badly burned. Ed. got out with the twenty Saturday night, blew in five for whisky and ran against a policeman's baton, and the doctor got four of the pile for repairing Ed's injuries, and the police magistrate will probably take his toll out of the $11 remaining.

Cashel, who escaped from the police while being taken from Ponoka to Calgary some time ago, was arrested at Anthracite on Saturday by Constable Blythe, of the Northwest Mounted police. He was wanted on several charges of forgery and stealing.

Samuel Watson, who shot and killed his brother, Westley, Dec. 23, near Middleport, mistaking him for a burglar, was tried before Judge Hardy at Brantford on Jan. 24 on a charge of manslaughter and was discharged. The crown attorney, although he considered Watson technically guilty of manslaughter, said it was a question if there was any felonious intent.

An unfortunate accident, attended with fatal results, happened at Eholt station, Boundary district, B. C., on Thursday afternoon. The train for Phoenix had been made up and was ready to start. When the locomotive backed down to couple up, the train brakeman, W. L. Grier, stepped in to make the connection, and it is supposed that he slipped and got caught between the couplings. He was jammed when discovered by the trainmen, the couplings having caught him just above the centre of the body, and literally squeezed the life out of him. The unfortunate man lived about thirty minutes after the accident, but did not regain consciousness, so exactly what happened can only be surmised. Grier was a married man with a family.

A cable from Berlin says: Prof. Ferdinand Braun, of Strasburg university, whose application of Leyden jars in propagating electric waves is said to have enabled Signor Marconi to telegraph without wires across the Atlantic, has announced before the Strasburg Scientific society that he had discovered a method of producing electric energy of electric waves to any desired distance. Prof. Braun's new method secures greater accuracy of transmission through a more perfect attunement of the transmitting and receiving instruments. He thinks he has substantially reached a method of transmitting exclusively to one point of the compass, thus avoiding interference by other waves. The method, it is claimed, will work economically and simply.

A MOTHER'S HEROISM

North Dakota Woman Saves Her Children After a Desperate Fight With Blizzard

A dispatch from Grand Forks, N. D., of Jan. 24 says: Mrs. John S. Tatea, widow; her son, 7 years of age, and two daughters, 8 and 10 years of age, experienced the most thrilling escape from death in a North Dakota blizzard that has been recorded for many years.

After spending the day on their farm, four miles from Hannah, they started for town at 7 o'clock in the evening. They had proceeded but a short distance when a whiffle-tree broke and the horses escaped from the driver. The storm broke with terrible fury, and in attempting to follow the team the sleigh and blankets were lost, though the fur robe was retained.

Blinded by the snow there was but one method of escape from perishing and that was adopted. The boy scooped out a deep hole in a snowdrift, and into this the four crawled and covered themselves with the robe. The snow drifted over them there.

Nearly frozen to death, the mother for eight seemingly interminable hours, fairly fought to keep her children awake.

At 3 o'clock in the morning the storm abated somewhat and the mother dragged her children from the snowbank, and by persuasion and threats, urged them forward toward Hannah, where, two hours afterwards they staggered into a hotel completely exhausted, the boy with his feet frozen, one of the girls with her face badly frozen, and all with their fingers frost bitten.

The remarkable nerve of the mother is considered one of the most remarkable exhibitions under trying circumstances ever recorded in the history of North Dakota blizzards.

CHAMBERLAIN IN AFRICA.

Trekking From Potchestroom to Mafeking by Mule Train.

According to a cable Colonial Secretary Chamberlain started on Saturday on an interesting wagon trek from Potchestroom to Mafeking, accompanied by Mrs. Chamberlain, Sir Arthur Lawley, Major-General Baden Powell and others. Relays of mules had been arranged to enable the party to travel at about ten miles an hour.

There was a picturesque scene outside Ventersdorp, thirty-one miles north of Potchestrrom. A commando of Boers met the party and escorted it into town. A banquet of flowers was presented to Mr. Chamberlain. The colonial secretary was conducted to the house of the landrost and the commando of Boers drew up in a half circle outside. Soon after General Delarey arrived, and was cordially received by Mr. Chamberlain, who introduced him to Mrs. Chamberlain.

After the presentation of an address of welcome the secretary made a speech to the commando, in which he congratulated the Boers on being the comrades of so great and gallant a man as General Delarey. He also said: "I hope he is my friend and I hope you all are my friends. We fought a good fight, and there is nothing to be ashamed of on either side."

On the conclusion of Mr. Chamberlain's speech, which was throughout in this vein, General Delarey unexpectedly stepped forward and addressed the Boers in Dutch, declaring his belief that the colonial secretary was "the man to set things right in South Africa."

These speeches made an excellent impression. On proceeding on their journey General Delarey accompanied them.

Archbishop Causes a Stir.

Archbishop Bruchesi, in speaking for the first time since his return from Rome at the cathedral in Montreal, on Sunday, delivered a rather notable discourse, in the course of which he touched upon the public library question, the press and the theatres.

Speaking of the Carnegie library scheme the archbishop advised caution, as too much haste in such a matter, he said, might cause grave consequences. "I will say," said the archbishop, "in my capacity of archbishop and of citizen, that when the community's requirements demand a great public library, the city will be too rich and too proud to ask an American millionaire to furnish one."

The archbishop then proceeded to denounce certain French newspapers of Montreal, which he declared continued to carry on a deplorable campaign, although they had been asked to desist. They were insulting the episcopacy and clergy and outraging sacred things.

Low theatres also continued to exist in Montreal, and were doing terrible harm. His grace announced that if these papers and theatres did not cease their wretched work he would interdict them to the faithful, and no threats of lawsuits would prevent him from doing his duty. The archbishop's remarks created quite a stir.

The Austrian steamer Zvir, bound from Java for Port Adelaide, Australia, with a cargo of sugar, has been lost on a reef in Torrens Strait. Her crew reached Perth after being picked up by a coasting vessel. One of the boat's crews were four days at sea.

Pope Leo has ordered the excommunication of all persons who aid in the movement to set up a National Catholic church in the Philippines independent of Rome.

It is the element of risk that makes young life worth living.

Man is the highest product of his own history. The discoverer finds nothing so grand or tall as himself, nothing so valuable to him. The greatest star is at the small end of the telescope, the star that is looking, not looked after nor looked at. —Theodore Parker.

Minard's Liniment is the best.

He that has a home, and a family has given hostages to the community for good citizenship, but he that has no such connecting interests, is exposed to temptation, to idleness, and in danger of becoming useless, if not a burden and a nuisance in society.—Johnson.

Beware of Ointments for Catarrh That Contain Mercury.

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, O., by F. J. Cheney & Co. Testimonials free.

Sold by druggists. Price, 75c per bottle.

Hall's Family Pills are the best.

I will govern my life and thoughts as if the whole world were to see the one and to read the other, for what does it signify to make anything a secret to my neighbor, when to God, who is the searcher of our hearts, all our privacies are open? Seneca.

Minard's Liniment for Rheumatism.

The superior man is he who develops in harmonious proportions, his moral, intellectual and physical nature. This should be the end at which men of all classes should aim, and it is this only which constitutes real greatness.—Douglas Jerrold.

Indigestion, congested liver, impure blood, constipation, these are what afflict thousands of people who do not know what is the matter with them. They drag along a miserable existence; they apply to the local doctors occasionally, and sometimes obtain a little temporary relief, but the old, tired, worn-out, all-gone, distressed feeling always comes back again worse than ever, until in time they become tired of living, wonder why they were ever born and why they are alive unless to endure constant suffering. To such sufferers there is a haven of refuge in Dr. August Koenig's Hamburg Drops, which was discovered more than 60 years ago, and which is a wonderful medicine. One trial will convince the most sceptical that any or all of these difficulties may be removed, and a perfect cure effected, by taking Dr. August Koenig's Hamburg Drops. Get a bottle at once before it is too late.

Men are not to be judged by their looks, habits and appearances; but by the character of their lives and conversations, and by their works. 'Tis better that a man's own works than that another man's words should praise him.—L'Estrange.

There never was and never will be a universal panacea, in one remedy, for all ills to which flesh is heir—the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient—what would relieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in sound, unadulterated state, a remedy for many and grevious ills. By its gradual and judicious use the frailest systems are led into convalescence and strength by the influence which Quinine exerts on nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease and by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses through the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame and giving life to the digestive organs, which naturally demand increased substance—result, improved appetite. Northrup & Lyman, of Toronto, have given to the public their Superior Quinine Wine at the usual rate, and, guaged by the opinions of scientists, this wine approaches nearest perfection of any on the market. All druggists sell it.

Love is blind during courtship—and should remain so after marriage.

Some persons have periodical attacks of Canadian cholera, dysentery or diarrhoea, and have to use great precautions to avoid the disease. Change of water, cooking, and green fruit is sure to bring on the attacks. To such persons we would recommend Dr. J. D. Kellogg's Dysentery Cordial as being the best medicine in the market for all summer complaints. If a few drops are taken in water when the symptoms are noticed no further trouble will be experienced.

Next to having wisdom yourself is the ability to profit by the wisdom of others.

SENSATION IN NEWFOUNDLAND

Joseph Boone, Seven Years a Hopeless Invalid, Cured By Dodd's Kidney Pills.

Discharged from Hospital as Incurable, Given up by Doctors—He is Now Back at His Work Again.

Cottel's Cove, Nfld., Jan. 26.—(Special)—Among the lobster fishermen here the wonderful cure of Joseph Boone, one of their number, has created a sensation. They look on it as approaching the miraculous.

For eight years Joseph Boone was a hopeless invalid. For seven years he was unable to work. He was discharged from the hospital after seven months' treatment as incurable. Several doctors tried in vain to give him relief for those terrible pains and aches arising from Kidney Complaint.

The cure of a friend by Dodd's Kidney Pills tempted him to try them. He used three dozen boxes and today he is working at lobster fishing and doing as big a day's work as any of his mates

This in brief is the story of Joseph Boone. He has to tell it often to people who never expected to see him do a day's work again and he always adds:

"I am still using Dodd's Kidney Pills and I find a great benefit in every box I use. I can scarcely believe it is myself is in it at all after seven years of such suffering from complicated complaint of the Back and Kidneys."

Do today's duty, fight today's temptation, and do not weaken and distract yourself by looking forward to things which you cannot see, and could not understand if you saw them.—Charles Kingsley.

FREE BOOK on CATARRH

I will send my fine book on Catarrh to all sufferers from the disease. It explains the origin, dangers and cure for this treacherous trouble. It is fully illustrated by the best artists. Address, Specialist, Sproule, 3 Doane St., Boston.

A broken heart with a patch on it is ready for another break.

A physician contributes a paper to a magazine on "Why Women are Short of Breath." Of course, he is a bachelor, otherwise he would know they are not.

For a Cold that hangs on

For obstinate coughs and colds there is nothing equal to that old reliable remedy Gray's Syrup of Red Spruce Gum. Prepared from Red Spruce Gum it is soothing and healing to the Lungs and Throat. It stops that tickling in the throat, and after a few doses that tight feeling in the chest is relieved and the cold and cough pass away.

Try a 25 cent bottle.

Gray's Syrup of Red Spruce Gum

For Sick Headaches try these famous Pills. They remove the cause and act quickly. You will feel like a new person after taking

MARKETS.

(Compiled from The Commercial)

WHEAT—The past week has been one of exceeding interest in the wheat trade, as it has seen the development of Armour's operations on the Chicago board of trade, in buying up a big line of contract wheat for May delivery, and at the end of the week the Armour company was credited with owning something like 22,000,000 bushels of May wheat in that market, while at present the stock of contract wheat in public elevators in Chicago is less than 4,000,000. Hence there has been an advance in Chicago May wheat of 3c on the week, and this has had a sympathetic influence on all markets. There is seen an advance in other markets of ⅝ to 1¼c. Want of rain on the Pacific coast has been detrimental to the advance of the California crop. Severe weather in Europe has caused depreciatory reports of the winter wheat crops over there. More rain is needed for the Indian crop, the grain deteriorating owing to unfavorable weather for harvesting and threshing in that country. Some reports have come from France as to the necessity of replowing and sowing fields that have been killed by severe weather. Along with this there is a falling off in the world's shipments, and a comparatively heavy decrease in visible stocks, and at the same time a good demand for cash wheat at firm prices, showing a consumptive demand, which is very encouraging to holders of wheat. After the recent good advance it will be reasonable to expect some reaction in prices, but it is evident that wheat is good property at the present time, and should any serious widespread damage occur to growing crops the situation would be favorable to higher prices later on.

The Manitoba wheat market has been for the most part quiet for the week. Exporters cannot follow the United States markets closely on the present rise, and on the week prices only show ¾ to 1c advance. There has, however, been a good business done, especially in wheat for May delivery in store terminal elevators. At the close of business Friday prices were: No. 1 hard, 74⅜c; 1 northern, 72⅞c; 2 northern, 71½c; 3 northern, 69¼c, spot or January delivery; and for May delivery: 1 hard, 78c; 1 northern, 76c; 2 northern, 74½c; 3 northern 72¼c, all in store Fort William Port Arthur or Duluth. There is some business being done for shipment to West St. John at same price as basis in store Fort William.

FLOUR—All Brands of flour are now higher. Best Hungarian Patent, $2.10 per sack of 98 pounds delivered to the trade; Glenora Patent, $1.95; strong bakers, $1.65; and XXXX, $1,35.

MILLFEED—Bran is quoted at $15 per ton in sacks, and shorts at $17 per ton.

OATS—There is considerable spread between buyers' and sellers' prices, and trading is consequently limited to hand-to-mouth proportions. Country shippers ask from 2 to 3c per bushel more for their stocks than dealers say they can pay. The recent orders for oats for export via Vancouver have excited the market, and holders seem to see all sorts of fancy prices looming up for oats. Their hopes may not be realized, however. No. 2 white oats are worth 28½c per bushel at Fort William. On track here this grade is worth 26½ to 27c per bushel, and about 24½c is the price for feed white. At country points farmers are getting 19 to 20c per bushel at central points.

BARLEY—The market is quiet and the best prices brewers will pay is 28c for No. 3 extra in carlots on track. Feed barley is worth 25 to 26c.

FLAXSEED—Market nominal.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $5.50 to $6.50 per ton for carlots on track.

POTATOES—35c per bushel.

BUTTER — Creamery— Creameries are asking 26c per pound from city customers for choice makes.

BUTTER—Dairy—There is a surprising amount of dairy butter in the country, most of it bad. One country merchant was offering a lot containing 9,000 pounds in Winnipeg last week and asking 18c for it. One dealer offered 14c for the lot and felt that he was taking long chances at that. There is a fair stock of dairy held in Winnipeg, and if much more comes in from outside sources there should be a drop in prices. Dealers are paying 21c net for dairy separator in bricks delivered in Winnipeg, and 14 to 17c net for tub butter.

CHEESE— There is nothing doing beyond a little jobbing trade at 13½ to 14c per pound for choice stock delivered to retail dealers.

EGGS—Eggs are scarce at 22c per dozen, net, delivered in Winnipeg, subject to candling.

DRESSED POULTRY—Dealers are offering in a wholesale way 10c per pound for chickens, dressed; 9½c to 10c for ducks and geese, and 15c for turkeys.

DRESSED MEATS — Beef, city dressed, 6 to 7½c per pound; country stock, ½c under these figures; mutton 8 to 9c; lamb, 11½c; hogs, 7c

HIDES—Country frozen hides are bringing from 5½ to 6c per pound, delivered at Winnipeg, less 5 pounds tare; sheep pelts, 30 to 50c.

WOOL—Market nominal.

TALLOW—No. 1 tallow is worth 5½c per pound delivered here, and No. 2, 4½c.

HORSES—Trade is now confined to a limited demand for general purpose horses, for which prices still rule high. Good teams of work horses are worth $300 to $400, according to weight and quality

LUNG WEAKNESS

IS DUE TO WEAK AND WATERY BLOOD.

That is Why Some People Cannot Get Rid of a Cough, and Why it Develops Into Consumption.

The lungs are just like any other portion of the body—they need a constant supply of pure, rich blood to keep them sound and strong. If the lungs are not strong they are unable to resist disease, and that is the reason why an apparently simple cold clings until the patient grows weaker and weaker, and finally fills a consumptive's grave. Dr. Williams' Pink Pills never fail to strengthen the lungs, because they make the new, rich, red blood, which alone can do this work. The most emphatic proof that Dr. Williams' Pink Pills rebuild the lungs and cure consumption in its earlier stages is given in the case of Miss Blanche Dyrand, of St. Edmond, Que. Miss Durand says: "In the month of September, 1901, I was visiting at the home of an uncle at L'Assomption. One day we were out boating; I got my feet wet and caught cold. The cold seemed to cling to me and when I returned home about the end of September, I was quite ill. I was quite feverish, had no appetite, and the cough seemed to exhaust me. I began doctoring, but did not get any better, and in January, 1902, the doctor told me that my lungs were affected, and that I was in consumption. At this time a friend who had come to see me advised me to try Dr. Williams' Pink Pills, and I sent for six boxes. The pills soon began to help me, as little by little the cough grew less severe, my appetite became better, my strength returned and I began to have a healthy color. I used eight boxes of the pills, and was then fully recovered. I am sure Dr. Williams' Pink Pills saved my life, and I shall always speak gratefully of them."

Such cases as these tell better than mere words the power of Dr. Williams' Pink Pills. They cure all constitutional weaknesses because they go right to the root of the trouble and build up the blood. This is why they never fail to cure rheumatism, lumbago, kidney and liver troubles, headaches, backaches, indigestion, biliousness and all other blood diseases. Sold by all dealers or sent post paid at 50 cents a box or six boxes for $2.50 by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont. Substitutes are sometimes offered, but you can always protect yourself by seeing that the full name "Dr. Williams' Pink Pills for Pale People" is printed on the wrapper around every box.

It's a cold day for the plumber when the mercury refuses to take the thirty-second degree.

As Parmelee's Vegetable Pills contain Mandrake and Dandelion, they cure Liver and Kidney Complaints with unerring certainty. They also contain roots and herbs which have specific virtues truly wonderful in their action on the stomach and bowels. Mr. E. A. Cairncross, Shakespeare, writes: "I consider Parmelee's Pills an excellent remedy for Biliousness and Derangement of the Liver, having used them myself for some time."

Pays the Current Price.

My young friend Jimmy Banks was married a little over a year ago. He had previously spent twelve months in the most furious courtship. The girl had not at first cottoned to Jimmy very much, but he moved heaven and earth so vigorously that she at last consented, says the Cosmopolitan. Now, the other day who appears before me but Jimmy, with a long face, and makes a complaint that the baby keeps him awake nights. "Good gracious, Jimmy!" I said. "Didn't you know that babies always do that? A baby has to have some relaxation. Go home and be thankful that it isn't twins." There is the reverse side to every joy. You can't have the advantages of bachelorhood and married life at the same time. You buy everything with a price—leisure, family, office, learning, wealth, fame, position. Nothing is free. Be sure you want the article, pay the current price and enjoy your possession.

Ham Baked In Cider.

A ham baked in cider is delicious. Choose a good lean ham of about eight pounds. Wash thoroughly and over the fleshy side sprinkle a little chopped onion, a little clove and allspice, a teaspoonful of cinnamon and a half teaspoonful of ground ginger. Make flour and water into a paste as thick as dough and cover the ham. Put skin side down in a roasting pan, fill up with cider, cook slowly for three hours, basting every ten minutes. When done, take off the paste and the rind. An hour before it is wanted for the table return to the baking pan, flesh side down, brush the fat portion with beaten egg, sprinkle generously with chopped parsley and breadcrumbs and let it heat through in the oven. A gravy can be made by boiling down the cider in which the ham was first roasted.

Age's Retrospect.

"When I was a boy," young men begin
In speaking of youthful joys,
But old men, spinning their yarns, start in,
"When I was one of the boys."

Clothing is worn more in the wash that in use where common soap is used.

Nature gives to every time and season some beauties of its own, and from morning to night, as from the cradle to the grave, is but a succession of changes, so gentle and easy, that we can scarcely mark their progress.—Dickens.

A MOTHER'S CARE.

Every mother knows the constant care a little child requires, and to the young and inexperienced mother who is caring for her first baby there is no other period in her life more trying. In the little ills that are certain to come to all infants and young children, the mother—especially the young and inexperienced mother—scarcely knows what to do. It is to meet emergencies of this kind that Baby's Own Tablets are offered to all mothers. These tablets are an absolute cure for all the minor ailments of little ones, and should constantly be kept in every home where there are young children. Sickness comes quickly—with Baby's Own Tablets at hand the emergency is promptly met. Mrs R. H. LaRue, Mountain, Ont., says: "I can recommend Baby's Own Tablets to all mothers who have cross or delicate children. I do not know how I could get along without them." The Tablets are guaranteed free from opiates or harmful drugs, and crushed to a powder may be administered with absolute safety to a new born babe. Sold by all druggists or sent by mail at 25 cents a box by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont.

The man who is willing to give you pointers is never encountered at a bench show.

Minard's Liniment Cures LaGrippe.

Life is a school, and Nature always a fresh study, and the man who keeps his eyes and his mind open will always find fitting, though it may be hard, schoolmasters, to speed him on in his lifelong education.—Hugh Miller.

Chronic Derangements of the Stomach, Liver and Blood are speedily removed by the active principle of the ingredients entering into the composition of Parmelee's Vegetable Pills. These pills act specifically on the deranged organs, stimulating to action the dormant energies of the system, thereby removing disease and renewing life and vitality to the afflicted. In this lies the great secret of the popularity of Parmelee's Vegetable Pills.

A man seldom realizes how much he can't do until he tries.

Too many second-hand politicians are drawing first-class salaries.

THERE IS NOT a more dangerous class of disorders than those which affect the breathing organs. Nullify this danger with Dr. Thomas' Eclectric Oil—a pulmonic of acknowledged efficacy. It cures tameness and soreness when applied externally, as well as swelled neck and crick in the back; and, as an inward specific, possesses most substantial claims to public confidence.

Everything a millionaire says goes—if he doesn't say "automobile."

Barring pawnbrokers, few men have too much interest in their business.

It costs more to support one vice than ten virtues.

Crank notions are all right if they can be turned to good advantage.

One enemy may do more damage than a hundred friends can repair.

THE HALCYON HOT SPRINGS

THE FERNIE FREE PRESS,
FERNIE BRITISH COLUMB

SATURDAY, JAN. 31, 1903.

SUNDAY MAIL SERVICE.

We have received the letter printed below from our representative who is in Ottawa on the silver lead deputation. It is gratifying to learn that he is doing all in his power to secure Sunday mail service on the Crow's Nest branch and it is devoutly hoped by all along this line that his efforts will be crowned with success.

The condition of the outgoing west service is even more outrageous than was shown of the eastern outgoing mail. For instance mail for the west posted in the Fernie office after six o'clock on Friday evening does not leave town until Monday morning's express. The FREE PRESS feels this point keenly, as its papers for the west must lie in the Fernie office over Sunday.

Ottawa, Jan. 17, 1903.

The Editor Free Press,
Fernie, B.C.

Dear Sir :—I have the copy of your paper containing a reference to the Sunday mail service on the Crows Nest, of which I approve. I might state that since coming down here I have placed this matter before the Department urging that we receive the relief suggested in your article, but as yet have received no official announcement.

Yours truly,
W. A. GALLIHER.

OUR FIRE PROTECTION.

While the Cranbrook people are taking to heart some lessons from the recent fire in that town it might be well for us to glance at that page in its life history to see if there is anything for us to learn. The many points of similiarity of the two towns and their fire-fighting facilities make it a particularly interesting study. The construction of the two towns is very similar, and the brigade appliances in each place are of the rudest nrture.

The doomed building had no other structure nearer than 25 feet distant, the ground and roofs were covered with snow, no wind was blowing and yet nothing short of the most heroic efforts of strong and willing volunteers saved the whole business centre of the town from destruction. Fernie contains few business blocks that are separated from adjoining buildings by a space so great as 25 feet and we shudder when we think of the consequences of a fire that once gets headway in the centre of the town. We have so miraculously escaped any serious fire in Fernie, that we are apt to forget the hidden monster that is lying in wait ready to spring on us when we least expect it. An upturned lamp, an innocent cigar stump, a defective stove or pipe, a hundred and one means the fiend has at its command.

It is not the object of this article to suggest any radical improvements in our system. Indeed, to be candid, we cannot. Without the aid of municipal government it is useless to expect any sweepiug reforms but "lest we forget" it is wise to create a little wholesome fear by reminding the citizens of our constant danger. Let us use the ounce of prevention, that is given us, with such careful effect that we will not need the pound of cure that is not within our grasp. A big fire on our main street would doubtless cause hundreds of thousands of dollars worth of damage. Let every one feel the individual responsibility of his position, and used every means within his power to lessen and guard against the many possibilities of the fire fiend, as well as to conduct himself honorably and with presence of mind should our common enemy break through our defence and take an aggressive stand.

A CALL TO ARMS.

Without necessarily agreeing with all the statements made by the promoters of the recently organized Provincial Mining Association of British Columbia in their initial prospectus, the movement, which has for its main object the betterment of the conditions surrounding the mining industry in the province, is one which should appeal to, and secure, the unqualified sympathy and approval of all its residents.

While we are not inclined to the view that the mining industry is moriband, it cannot be denied that many defects and disadvantages exist in the present legislation affecting it, which retard its progress and incidentally that of the whole province. They are so self-evident and apparently easy to rectify, that the necessary remedies should be secured by the concerted action of representative men. A glance at the names of the members who compose the provisional excutive committee, should at the outset, favorably influence the confidence of the public and show how widely spread is the recognition of the necessity for such an institution. The mining industry is, and will continue to be, the principal one of British Columbia. On its prosperity others must necessary depend and it follows as an evitable result that the general state of prosperity, which is so much desired, cannot be attained without the removal of adverse conditions.

Involving our main industry and affecting every other commercial pursuit now being carried on, the present movement should be supported with energy and enthusiasm. The many phases of the silver lead question, which has been spasmodically dealt with and imperfectly disposed of, come within the purview of of the new Association. We cannot suppress the idea that the organization and concentration of efforts, which will necessarily be involved in the prosecution of its object by the Association, would have materially assisted the efforts which are now being put forth in a more or less disjointed manner by other public bodies. Another matter to be taken up will be the securing for investors as well as prospectors of permanent titles to placer claims and also the question regarding taxation on the output of our metalliferous and placer mines. These, along with needed amendments to the Water Acts, are some of the most pressing matters to be disposed of, and it is to be hoped that the new organization may achieve the success which its objects deserve. The Associated Boards of Trade serve certain purposes very well in what is part of the upper country but their sphere is comparatively limited. The two institutions working harmoniously together are bound to accomplish much that will be beneficial to the Kootenays. Let us hope that this new institution, which is receiving general support in other parts of the province and of which much may be expected in full operations will succeed in keeping itself aloof from the baneful influence of politics, of which there is always a danger.

The formation of such a body may not at the first thought evoke much interest or strike us as having any bearing on local conditions in a community where coal and coke are the principal products. Mature considerations however will develop the fact that prosperity in the mining industry means more ore mined and smelted, requiring a greater output of coal and coke to meet the necessities of the case. This in its turn means more labor employed, a larger pay roll, more supplies, more money in circulation and a greater population. The securing of its objects by the new Association will be of great benefit to this valley. The Fernie Board of Trade and citizens generally should that the necessary representatives are sent to the Victoria convention, which assembles February 25th next.

IN discussing the probable candidates for this district in the provincial elections The Morrissey Miner says : "It is well known that Mr. Blakemore who virtually has editorial control of the FREE PRESS will be the candidate or dictate the candidate against the Coal Company. Mr. Blakemore was manager of the company at one time and he has never forgotten the circumstances that brought about the changed conditions."

A few weeks ago in those columns the FREE PRESS was soundly berated for casting a slur upon that town and a very broad hint was thrown out that the Coal Company was controlling this paper. Judging from these two contradictory statements emanating from the same source, we fear The Miner is slightly mixed and hardly knows where it is at. It seems incredulous to The Miner that a paper can be run strictly on independent principles, free from "boosting" and other influential agencies, but we again assure The Miner that such is the course pursued by the FREE PRESS. Neither Mr. Blakemore nor any other outside party or Corporation has any strings on this publication and we hold and use the right to publish unreservedly our own opinions. If our views at times agree with those of another it does not necessarily follow that the latter is "running" this paper, as our fair-minded readers will observe.

A BIG NIGHT ON THE ICE.

Hockey Match next Thursday—Also Races and Music—In aid of Hospital.

The benedicts and single men have arranged to play a game of hockey next Thursday evening which ought to draw a big house. McMordie as champion of "single blessedness" has gathered the following supporters ; S. Herchmer, D, Walmsley, N. Suddaby, Turney, Lake nd E. Wyldeman while Capt. Ganong has under his flag, Wm. Ross, Dr. Higgins, Dr. Bonnell, J. Bricker, J. McIntyre and J. McEvoy. Milt Kastner will boss the game while A. H. Cree and H. Bentley will count the goals for the respective sides.

Admission 50 cents and 25 cents for ladies and children. Proceeds in aid of the Fernie Hospital.

RULES.

Only two skates allowed to each man.

No player shall be permitted to jump on an opponent after tripping him up or knocking him down.

During the progress of the game all drinking must be between friends.

Any interchange of flasks by membors of the opposing teams strictly prohibited.

Scarlet neck gear, patent leather pumps and tall silk hats absolutely tabooed.

No player need wait for an invitation to sit down. The ice is free to all

The goal-keepers may arrest the puck on suspicion of trespass without a warrant from the Chief of Police.

The referee's expenses at the Hospital will be defrayed from the gate receipts

Wives and sweethearts of the players admitted free, provided they occupy the front seat in the gallery.

In addition to the hockey game several other interesting features are being arranged. An obstacle race for boys will take place also a men's race in which Messrs. McKellar, Hagley, Zeigler and Wallace will likely enter. Great interest is centred in the latter event as much speculation is indulged in as to who is the fastest skater in town. Music, songs, etc. on the ice will enliven the dull moments and a big time is looked for next Thursday evening. All desirious of taking part in arranging the program, etc., are requested to meet at the Royal Hotel on Monday evening at 8 o'clock.

More Strike Talk.

Notwithstanding reports to the contrary we have good reasons for believing that among a certain element of union men there is still a good deal of idle strike talk. This, we believe, will result in nothing more than talk, as we understand they are agitating to force the Coal Company to employ none but union men, and we believe that the large body of the union are too sensible of the present advantages they possess, as well as the injustice to their employers that such a measure would involve, to lend any aid to bring about such an arbitrary law. Our observation goes to prove that the miner who mines coal and does not lose time worrying over imaginary troubles is the miner who is making a good living and saving money besides.

Encouragement.

When they take the beautiful woman from the wreck, she begs to be left to die.

"I have nothing to live for!" she cries.

"You are mistaken as to that," they argue gently, "for see what a swell shape the collision has battered your hat into!"

Now she opens her eyes, and it is plain that new courage has entered her heart.

And They Never Do It.

"He would be all right," said the man who is always criticising others, "if it weren't for his fearful habit of mendacity."

"I have always regarded him as possessing the highest ideas of honor."

"Yes, but he is one of those people who are always announcing that they are going to tell you the funniest story you ever heard."

Help! Help!

"You are surely not going home without police protection!" said one Pittsburger to another, who had been marketing.

"Why not?" demanded the other, surprised.

"What! With that fine tenderloin steak you have just bought?"

Heard In the Rain.

"I wonder how many more hours we'll have to wait for a car!" cried the lady impatiently. "This is awful!"

"And yet," added her cunning husband, who saw his opportunity, "you find fault with me for not coming home sooner from the office of nights."

Comparisons.

He—My love for you, darling, is as deep and as pure as the lake at our feet.

She—Yes, and you are just as fresh.

Should Get One.

Blobbs—I am all run down.

Slobbs—Why don't you get an automobile yourself?—Philadelphia Record.

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

Some of the Bachelors of Fernie are getting up a ball for Wednesday evening Feb. 4th.

New and Second Hand Household goods bought, sold and exchanged ; cash paid at B. C. Furniture Co. x

Jack Slavin's show last night is reported to have been good. The attendance was so small as to scarcely pay expenses.

The Junior Hockey Club, of Macleod, are coming up to try conclusions with our boys on Monday. The juniors ought to put up an interesting game.

The Victoria Hockey Club, of Winnipeg were defeated by the Montreal Club in the first game of the series for the Stanley Cup on Thursday evening by a score of 8-1.

The Chinese New Year's was celebrated on Jan. 28th in the regular way. The hearts of the boys were made glad by liberal donations of firecrackers which was not conducive to the general quietness of the town.

The delegates sent to Ottawa to represent the requirements of the lead industry to the government passed through Fernie on their way home. They appear to be hopeful of concessions from the government.

It is reported on good authority that Mr. Marpole is to be assistant general manager, and the C. P. R. Pacific division is to be extended to Dunmore, with a new superintendent. The Kootenay division will be separated with Downie as general superintendent.

Rev. Father Thos. J. Hagerty, ex-priest, lecturer, writer and travelling representative of the American Labor Union will lecture in Princess hall tonight at 7.30 and to-morrow at 3.30. These lectures were first advertised for Thursday and Friday evenings but the dates were since changed as above. No admission fee is charged and ladies are especially invited. Doubtless these instructive lectures will be well attended.

To Purchase Morrissey Townsite

Thos. Crahan and Jas. Macdonell were in town this week negotiating with General Manager Tonkin for the sale of their townsite of Morrissey at the junction of the two roads. The matter was postponed owing to Mr Tonkin's call to Northport but will be resumed upon his return.

Stabbing Affray

A Slav women was stabbed at Morrissey mines last week by one of her country men. The women was bribed by her assailant for the sum of $25.00 not to disclose his name and in consequence no arrest was made. The woman was badly cut.

Snow Shoe Club

The Fernie snow shoe club after their weekly tramp last Monday evening were entertained at "The Bach," to refreshments, Mrs. J. H. Bricker and Mrs. W. B. Ganong filling the position of hostesses. The organization has a large membership as the sport is very popular in town. The club meets every Monday evening.

Let us Know

An American exchange says: "If you are not ashamed of your friends who are visiting you, call around and tell the editor who they are." Our experience goes to prove that the people who grumble most about the lack of news in the local weekly are those who when asked for news during the week close up like a steel trap. Another exchange says: "If the editor of this sheet wss a mind reader. we could probably get into some more lucrative business than news paper work." Give us the news and we will print it.

Musical Concert.

Prof. Paul Szgety the Hungarian Violinist ably assisted by H. Leslie Staebler, pianist and other local talent, gave two delightful concerts in the Presbyterian Church on Monday and Tuesday evenings. The Professor is a master hand with the violin and his perfect execution gained for him the good opinions of all who heard him. The attendance was so small on Monday evening that it was deemed advisable to repeat on the following evening, when a somewhat larger audience took advantage of this musical treat. It is a regrettable fact that first-class entertainments do not get better support in Fernie.

Six Months In New York.

The lecture given in the Methodist church by Rev. W. W. Baer, of Nanaimo, was a great success from a financial point of view as the church was well filled. The lecturer spoke of personal experiences in that city about the time that war was declared with Cuba. He compared the social, home, civic and religous relations of the modern New Yorker with our own, and the comparison generally resulted in our favor. The lime light views were a dismal failure. The pictures were apparently good but the light was insufficient to bring them out clearly. The lecture lacked continuity at times but the views served to bring the speaker back to his subject again. Many attempts were made to introduce humor into the lecture but the stories told were generally far fetched and the points not too evident. However as Mr. Baer appeared ouly as an entertainer he reasonably claimed that any information gathered by his listeners was clear gain to them. After the lecture the Ladies Aid served a splendid repast of coffee, sandwiches and cake which was heartily enjoyed by all.

Your Credit is good at B. C. Furniture Company. x

J. McEvoy went down to Morrissey on Wednesday.

Mr. J. A. Rennie, was down to Lethbridge this week.

J. A. Arnold, of Cranbrook is in town this week.

Mrs. Hutchison entertained a number of friends on Thursday evening.

Mr. Berridge was up from Morrissey to the dance on Thursday evening.

Black worsted suits at Mitchell's during February for $30.

Morrissey has a jewelery store. O. Strathearn, of Kaslo, is the new arrival.

F. C. Pink, late of the FREE PRESS staff went west on Sunday with the coast as his destination.

Miss Edith Macdonald, of Lindsay, Ont., is the guest of her sister, Mrs. H. Herchmer.

Rev. F. W. Anvauche, of Cranbrook, will preach in the Baptist church, on Sunday, Feb. 8th at 7:30 p.m.

J. Alridge, manager of the Trail Smelter was in town this week on business connected with his company.

Rev. Connor was around for subscriptions for a new church at the mines, about $450 collected.

The Coal Company are going to build a large hall for a miners' recreation room in the near future.

Mrs. H. Bentley accompanied her husband from Lethbridge on Monday and is staying at the Royal this week.

Miss Field, niece of Mrs. John Turner, left on Thursday for San Francisco where she will reside in future.

A. G. Campbell, Inspector Colonial Investment & Loan Company, Toronto, was in Fernie this week.

Mitchell the tailor is putting on a $5 reduction sale on all suits for the month of February. x

Mr. G. G. S. Lindsay, solicitor for the Crow's Nest Pass Coal Co., was in town during the early part of the week and left for Toronto on Tuesday.

R. W. Woods, manager of the Company store at Morrissey, was married in Toronto last week and is expected to return shortly.

Mr. McPherson, auditor for the Coal Co., left for Toronto this week, and will call off at St. Paul and other American points en route.

W. Bleasdell is up from Frank visiting his parents. D. McBeath is looking after the drug business there during his absence.

It is rumoured that T. R. Morton, late overman at the mines here, is going to Cowley to open up a coal vein for an English Company.

Mr. and Mrs. John Brown returned from the east this week. Mrs. Brown has been visiting for the past six months at her former home in Angus, Ont.

Mr. A. B. Trites left for New Brunswick last Saturday. Mr. Trites is away on a business trip and purposes returning in as short a time as possible.

Blake Wilson, manager for P. Burns & Co., was in town this week. Mr. P. Burns is travelling through the Kootenays and will arrive in Fernie on the 12th.

Mr. Harry Thompson who left here last summer for medical treatment at the Coast, has returned to Fernie looking as well as ever.

Mrs. N. A. McKenzie and baby Emily, of Moyie, spent several days this week with Mrs. C. A. Klingensmith, of the Fernie Hotel.

H. H. Jeffrey is back from Calgary. He likes that town and has decided to make his home there. He has disposed of his house and lot in town to Mr. A. H. Cree and accompanied by Mrs. Jeffrey and family, will leave for his new home on Monday evening.

The new C. P. R. Station at Morrissey is nearing completion. The outside woodwork is finished and the inside is ready for plastering. The waiting room and office will be finished first to accomodate the service, and the entire building should be completed in a month.

Mr. Walter Harwood sprained his ankle badly at the rink on Wednesday evening. He was playing hockey when a sudden wrench caused the unfortunate accident. Mr. Harwood was assisted to his home where he will likely be confined for some time.

Mr. C. S. Simmons, secretary to General Manager Tonkin, left for his home in Pennsylvania on Tuesday to recuperate his health, which is suffering from overwork and office confinement. He expects to return in a couple of months.

G. O. Foss left last week for Minneapolis in answer to a wire from a syndicate that controls a large mining proposition in Arizona. The company are paying Mr. Foss all expenses and a good salary to report on some narrow guage railway construction between their mine and a prospective stamp mill twenty miles distant. He will be absent about six weeks.

F. J. Mitchell's tweed suits run from $23 to $28 x

Pianos for Sale,—cash or instalment plan ; at Watson,s. x

Mrs. Rogers, of Morrissey is visiting Mrs. Stillman.

Miss Maggie Howard returned this week from a visit to her home in Frank.

Mr. F. B. Smith, of Calgary was in town on Sunday.

C. R. Palmer, of Cranbrook, is in town this week.

C. J. Eckstorm, of Morrissey was in town this week.

J. F. Armstrong, of Fort Steele, came in on Thurday evening and went west again next morning.

Boarding House for Sale —A snap, very little cash needed. Apply to F. J. Watson. x

Mr. and Mrs. Tuttle left this morning on a visit to Mr. Tuttle's old home in Grandsdale, Montana.

Methodist Church ; Subject : Morning; Fellowship. Evening: The Sacrament. Special music for both services.

Mrs. Graves and Mr. Harry Wilkes were married at Medicine Hat on Wednesday at the home of the bride's sister, Mrs. Bell. The happy couple came to Fernie on Thursday to take up house keeping and they are receiving the good wishes of their many friends.

General Manager J. H. Tonkin went to Nelson on Thursday morning and from there he went to Northport. Owing to the bad condition of the roads he was unable to get back last evening as he had planned. Mrs Tonkin and daughter are meeting him at Nelson and will return with him.

THE MERRY CARNIVAL.

THE MOST SUCCESSFUL IN THE HISTORY OF FERNIE.

Those Who Dressed in Costume—Good Ice —Band Music—A Large Crowd

The carnival last night was a huge success in every sense. Probably never before has been seen such a magnificent display of costumes on our ice while the throng which crowded on for a skate afterwards well filled the rink. The ice was in first class condition and the band liberally supplied plenty of good skating music.

The costumes worn by many were pretty and brilliant and showed evidence of much time and expense having been expended on them, and the task of the judges in deciding upon the prize winners was no easy one.

Among those in costume were the following:

H. Jarman, Fisherman.
J. Hagley, Roman Knight.
Gordon Johnson, Jockey.
Mrs. A. Davidson, Flower Girl.
Miss Ross, Spanish Maiden.
H. W. Gendreau, General Wolfe.
Ethel Digby, Morning Star.
Miss Todhunter, Mary quite contrary.
Miss M. Todhunter Mother Hubbard.
Frank Bean, A Young Prince.
Will Liphardt, a Chef.
Sam Walters, Alphonse.
E. Wriglesworth, Gaston.
Clarence Eschwig, small Clown.
Lillie Eschwig, Pierette.
Duncan Cody, Devil.
W. W. Tuttle, Cowboy.
Miss Hall, Toboggan girl.
J. B. Turney. Flower Girl.
Miss Church, Night.
T. Bell, clown.
Neil McKellar, clown.
W. Forsythe, cook.
A. Dunlap, indian
Dorothy Proctor, milkmaid.
Muriel Whimster, Flora Macdonald.
A. Klauer, sailor,
Wilson Quail, little grandmother.
Mabel Graham, pop-corn girl.
Willie Eschwig, Pickwick Joe.
Jim Farquharson, Black Jack.
Miss Farquharson, Johnnie Cannuck.
I. Covert, paper man.
Chas. Ziegler, Desperado.
Miss B. Elliott, Flower Girl.
C. Whalen, Convict.
Miss Digby and Miss Lawrence, Ping Pong Twins.
Mrs. Rogers, Red Riding Hood.
Jessie Dunlop, cards.
Miss Macdonald, Miss Canada.
Noble Beaver, Colored gentleman.
John Dufor, colored lady.
Miss F. Lawrence, Flower girl.
Mrs. Brown, Gipsy girl.
Miss Laura Crawford, Morning Star.
Miss May McPhail, Queen of Hearts.
Miss M. Schofield, Starlight.
H. Jasman and O. Herman, Hayseeds.

The judges were Messrs. R. McMordie, A. Thomson and J. R. Wallace and the following received prizes :

Best dressed lady—Mrs. A. Davidson.
Best dressed gentleman—Frank Bean.
Best represented character—M. Kastner.
Best dressed school girl—Ethel Digby.
Best dressed school boy.—Gordon Johnson.

The race for gentlemen in costume proved interesting at the start but gradually Neil McKellar forged ahead of C. Ziegler who was leading and won easily.

Our business steadily increasing. Have YOU tried Elliott's home-made 10 cent loaf.

MY HEART'S DARLING

BY W. HEIMBURG.

Lucie went readily into the house, and procured at last what she wanted from Minna. The cook had gone into town, and mademoiselle lamented extremely that she had no sugar. But she detained the young girl several minutes with excited accounts of the night before. "She was parfaitement crazy," she asserted.

As Lucie went back with her little plate, her lover's deep voice sounded from the stable. Involuntarly she stopped. Would she distrust them? He came as a physician.

"What shall the child read to you, gnadige frau?" she heard him say. " 'Manfred'? Pho! Spare her and yourself the acquaintance of that gloomy hero. Let her read you something cheerful; for example Reuter; she reads those cheerful, healthy poems charmingly."

"Cheerful," she heard Hortense answer. "But life is so gloomy!"

"But she would have no comprehension of what you want her to read."

"That is very flattering; I thank you in the name of your fiancee. But with due respect to your wish, we do not need to read at all."

Lucie entered during the last words; she looked at her future husband questioningly, and her face was pale.

He held out his hand, regretting that he must be going further. "Come with me to the gate," he begged.

She walked across the courtyard with him while Hortense was feeding her horse.

"Poor little thing!" he said, sympathetically, "you do not feel comfortable here."

"Why?" she asked.

He stood still and looked at her.

"Yes, I like it very much. I find Hortense lovable and bright. I enjoy renewing our intimacy."

He was silent, as if she had repulsed him; there was something contradictory in her whole bearing.

"Farewell!" he said, at the gate. "I think Frau von Lowen will soon be quite herself again.

"Adieu!" she said, bowing her head gravely.

Hortense was waiting for her. They then went into the garden and had the groom fasten the hammocks under the chestnut trees. They talked of many things, then of books. Lucie led the conversation to this; she had read a good deal of various kinds. She delighted in Sturm, and her eyes sparkled as she talked of his novels so full of poetry. Hortense listened silently, and watched the swaying of the leaves through which the beams of the setting sun threw golden sparks.

When it became twilight, they went up again to the young baroness's apartments. A dainty little repast was set out for them. They sat opposite each other, qnd enjoyed it. Hortense turned to her companion and said:

"Would you like some champagne? A glass of it sometimes refreshes me very much."

She rang, and soon after appeared the silvery top of a half bottle peeping out from its ice-filled casket.

"Do you like this kind?"

"I can not make any comparison, for this is the first time I have ever tasted it."

The young baroness sunk back in her chair.

She forgot for a moment all her troubles, and laughed till the tears were in her eyes; then she became grave and looked at Lucie as if she were some wonder of nature.

"Take your glass, and let us drink to our good fellowship." With this she came over and put her arm round the young girl's neck. "I have a favor, a great favor, to beg," she whispered.

"What is it?" asked Lucie, with burning cheeks.

"You have saved my life, help me to bear it!"

"I, Hortense?"

"Let us see something of each other—be a little good to me. Ach, you little know how lonely I am!"

"But I am so insignificant beside you!" stammered Lucie.

"You have heard me!" threatened the young baroness, laughingly. "Dear child, men think all women far inferior to them mentally; but that does not prevent their pleasing them."

Lucie blushed and looked in her glass, in which fine pearls kept dancing up and down.

"He thinks no worse of you for it," continued Hortense; "he is just like all the rest. You must not take it amiss. Ah, child! if you have no worse trouble! Now let us touch glasses; we will be friends — good friends?"

Lucie kissed cordially the offered lips.

"Yes," she returned.

"Always frank with each other, if we do not like anything, and always stand by each other. I feel sure you will. God protect you; but if sorrow should come to you, and human sympathy can avail, I will help you to bear it."

A deep blush still dyed the girl's cheeks as she soon after stepped out on the street. There was Alfred walking up and down waiting for her.

"I thought you were going to stay all night," he said, jestingly.

She shook her head silently. When they reached the dimly lighted upper hall, he drew her to him.

[CONTINUED.]

Hampton Institute.

In the Hampton institute palm leaf hats and new styles of baskets are made by the students, also rugs, and the girls use pure vegetable dyes of their own manufacture instead of the aniline colors to be found in the market.

Luminous Plants.

Several species of moss—a lily, a poppy and a nasturtium—are luminous at night.

FIRST OF ALL EVICTIONS.

Magyar Version of the Expulsion From the Garden of Eden.

Among the folklore of the peasantry of Roumania and some of the adjoining Magyar states of eastern Europe is found the story of the expulsion of our first parents from the garden of Eden. It runs thus:

When Adam and Eve fell, God sent Gabriel, the Magyar angel, to turn them out of Eden as a punishment for their sin. Gabriel was received most courteously, food and drink of the best being set before him. Now, Gabriel had a kind heart and took pity upon the poor folk and would not accept their hospitality, remembering his errand. So he returned and begged that some one else be sent to evict the sinners, as he really could not do it. The Raphael, the Roumanian angel, was sent and was received as Gabriel had been. He, however, was very fond of a good dinner, and so he sat down and thoroughly enjoyed himself. The feast over, he told the erring pair his errand. They at once began to weep most piteously and beg for mercy. Their bitter sorrow so touched his after dinner heart that he, too, returned and asked that some one else be sent, as he could not possibly turn out the poor folk after accepting their hospitality. Then it was that Michael, the German angel, was sent. He was received as the others by the trembling pair and treated even more sumptuously. He sat down and enjoyed himself till the last morsel of food had vanished and there wasn't a drop of liquor left. Then he arose, and, turning to his host and hostess, said, "Now, then, out you go, and be quick about it." Most piteously did Adam and Eve beg at least for time, even reminding him that he had partaken of their bread. All in vain. Thus it was that our first parents were driven out of Eden.

BULLETS AS EVIDENCE.

Odd Facts Developed by Their Prominence In Murder Trials.

The important part played in many murder trials by a flattened and misshapen bit of lead or steel, once in the form of a bullet, often leads to the development of some curious facts, says the Baltimore American. A leaden bullet will lose appreciably in weight by being fired, and the form of the barrel may tend to reduce its size. In a rifle some of the lead is taken off by the grooves. The friction also heats and tends to partially melt the outside of the ball, and because of this it changes its shape in the air.

One peculiar fact about a bullet is that it will very often make a wound of entry smaller than the projectile itself even in so brittle a substance as glass. Another strange fact about a bullet is that it will often pass through intervening clothing, making a hole that can hardly be noticed, and yet carry on its point a circular piece of cloth. The carrying of bits of clothing, hair or dirt into wounds in such a manner greatly enhances the dangers of peritonitis. Were it not for this latter contact the bullet would not be nearly so dangerous, as its rapid flight and heating make it practically sterile.

Blackened edges of wounds are more likely to have been caused by a lead bullet, although the ball with a lead tip could also produce this result. Regarding powder stains, smokeless or otherwise, nothing of great value is to be gained when the shooting occurs at a distance greater than twelve or fifteen feet. At a recent trial a doctor stated that from powder marks on the face he judged that the shot had been fired at a distance of not more than three feet, which conclusion was later backed up by the assertion made on the stand by the prisoner himself.

His Mother Took No Chances.

She was a portly dame, with florid complexion and voluminous skirts. She was walking majestically down Twenty-third street, looking the picture of content. In the hand that held up her skirt was clasped a thin chain, much like a dog chain, but instead of the regulation poodle, pug or St. Charles spaniel trotting along at the other end was a small boy of perhaps five years, and whenever fascinated by the alluring attractions along his route the maternal hand gave the chain a gentle tug, and the small boy obediently answered the mute injunction.

Moon Influences.

Many superstitious beliefs as to the "influence" of the moon still remain. In some localities it is believed to be unlucky to be empty handed when one first beholds the new moon, and among the same people having silver in the hands or gold in the pockets is a "good sign." If one is about entering upon an important undertaking, he had best defer proceedings until the moon is "fulling"—that is, until some time between "new" and "full" moon.

Failure.

"I thought Spoonamore was going to marry Miss Garlinghorn, but I see she has let him get away."

"Yes; her father didn't appear to be at all anxious for the match, and her mother was a little too anxious. She lost him on account of bad team work."

Their Friendly Way.

One of the worst things about falling into a hole is the number of people who gather on the bank to point out the routes you could have taken to avoid falling in.

Knowledge humbleth the great man, astonishes the common man and puffs up the little man.

Health brings wealth more often than wealth brings health.—Saturday Evening Post.

TEMPTED, HE ATE.

A Story of Heinrich Heine and a Toothsome Lyons Sausage.

Returning from a journey to the south of France Heinrich Heine met a friend, a German violinist, in Lyons, who gave him a large sausage that had been made in Lyons, with the request to deliver it to a mutual acquaintance, a homeopathic physician, in Paris. Heine promised to attend to the commission and intrusted the delicacy to the care of his wife, who was traveling with him. But as the post chaise was very slow and he soon became very hungry, on the advice of his wife both tasted of the sausage, which dwindled with every mile.

Arriving at Paris, Heine did not dare to send the remainder to the physician, and yet he wished to keep his promise. So he cut off the thinnest possible slice with his razor, wrapped it in a sheet of vellum paper and inclosed it in an envelope, with the following note:

Dear Doctor—From your scientific investigations we learn that the millionth part of a certain substance brings about the greatest results. I beg, therefore, your kind acceptance of the accompanying millionth part of a Lyons sausage, which our friend gave me to deliver to you. If homeopathy is a truth, then this little piece will have the same effect on you as the whole sausage. Your

HEINRICH HEINE.

—Ughetti's "With Physicians and Clients."

The Vulgar Voice.

What constitutes the vulgar voice? In an article in the London Spectator a writer concludes that this evidence of vulgarity, "springs, like almost all vulgarity, however displayed, chiefly from two causes—an undue love of conspicuousness and an undue fear of the same." The person whose chief aim is to keep himself or herself in the eye of the world rarely makes a remark without desiring that it shall reach the ears of others besides the one directly addressed, and here the peculiarly false sound of the voice is attributed to the absence of singleness of motive. On the other hand, the wavering tone and affected accent of the timid vulgar are ascribed to another form of insincerity—namely, the wish to imitate others with whom one happens to be when they are of a supposedly higher social standing. The attempt is sure to fail and the result only in the suppression of all evidence of the speaker's own personality—in the voice as well as in the manner. Thus sincerity, paramount in all art, is basic in breeding as well, which is the art of life.

Lead Pencil Experiments.

An English statistician was asked how many words could be written with an English lead pencil, and, being determined to answer it, he bought a lead pencil and Scott's "Ivanhoe" and proceeded to copy the latter word by word. He wrote 95,608 words and then was obliged to stop, for the pencil had become so short that he could not use it.

A German statistician who heard of this experiment was dissatisfied with it because all the lead in the pencil was not used on the work, and therefore he bought a pencil and started to copy a long German novel. When the pencil was so short that he could not handle it with his fingers, he attached a holder to it, and it is said that he wrote with this one pencil 400,000 words. Possibly, however, his pencil was longer or the lead in it was of a more durable quality.

Disliked Egotism.

"What's the matter with you?" asked his wife.

"I'm feeling lonely," was the reply.

"Don't you like this town?"

"I don't like this earth."

"What's the objection to it?"

"People are too egotistical. If there's anything I hate it's egotism. And when I see kings going about confidently and doing things wrong, and diplomats trying all sorts of insincere tricks with complete effrontery, and lawyers seeking applause for arguing on the wrong side of a case, and everybody displaying utter selfishness without a blush, I am forced to the conviction that I am the only consistently high toned and moral gentleman on this globe. And it makes me feel lonely."

A Quaint Epitaph.

Here is an epitaph which may be read in an English churchyard attached to Leamington church:

"Here lies the body of Lady O'Looney, great-niece of Burke, commonly called the sublime. She was Bland, Passionate and Deeply Religious; also she painted in water colours and sent several pictures to the exhibition. She was the intimate friend of Lady Jones. And of such is the kingdom of Heaven."

He Knew.

A truthful man who has just returned from abroad says he overheard the following dialogue between two fellow passengers. Said one:

"I wonder who that awfully homely woman is?"

"Oh, that's my wife," replied the other.

"How do you know? You're not looking at her?"

"I don't have to."

Two Ways of Putting It.

Oculist (after examination of the eye)—Yes, it is, as I supposed, a case of choroiditis exsudativa, accompanied by partial micropsia, metamorphopsia and chromatopsic scotomata of singularly regular forms.

Young Lady—There! And ma said it was only a sty coming!

Sticky Hair Oil.

Tommy (inquiringly)—Mamma, is this hair oil in this bottle?

Mamma—Mercy, no! That's liquid glue.

Tommy (nonchalantly)—I suppose that's why I can't get my hat off.

ART AND NATURE.

The Changes Wrought by Force of Methodical Development.

There are really very few things in use in the world today which have not been materially changed by the forces of methodical development. Civilized men and women themselves are the best examples of this all pervading influence. The beasts of burden and the creatures which supply the world with animal food are remotely different from what they were in the beginning. The work of breeding and training has added beauty and usefulness to the birds of the air and the beasts of the field, and the same upward tendency is noted in these latter days in the flowers which gladden life with their loveliness and which admonish man perpetually of his frailty. Pleasant it is to know that what may be called the sophistication of flowers has robbed them of not a whit of their native charm. There is in the sensuous odor of the American Beauty the magic to revive in any mind attuned to the heart of nature sweet memories of tangled vines and wild roses, creeping and blooming along country roads. The scent of the rich and full carnation will call up in a moment tender recollections of borders of spicy little pinks tended by loving hands that have been folded for years in dreamless repose. In the regal chrysanthemum is seen the amazing product of brave little asters which came to embellish the dooryard with the first chill of autumn and after all of the summer blooms had perished.

Economical Man.

The native pointed out to the stranger an old man who was passing.

"That man," said the native, "beats the world on close figuring."

"Makes a little money go a long ways, does he?"

"Well, rather. In the winter he put revolving doors into a big building that he owns, and he never took them out again all summer."

"Pure matter of economy?"

"Exactly."

"Rather small and mean, I should think. The cost of taking out and putting back the revolving doors ought not to be great, and he's giving his tenants and their patrons a lot of unnecessary labor."

"That's just it," explained the native. "He's making them work for him for nothing. Why, he stores up the power generated by those doors and uses it to run the elevators. Why, the man is so close that he doesn't get mad in summer because he thinks his anger would cause him to give out heat that he'll need in the winter."

Mucilage Betrayed Him.

Some time ago a registered package sent from the New York postoffice, containing a large sum of money, was received at its destination apparently intact, but on being opened was found to contain nothing but waste paper. Suspicion could not be directed to any one clerk of the many who had handled it. The inspector had often noticed that the glue used at each postoffice had an odor distinguishable from that of any other. He investigated along this line and was finally rewarded when in an office near the destination of the package he discovered an identity of smell between the registered package and a gluepot on the counter. He caused a watch to be set upon the clerks in the office in the usual way and finally caught his man spending a portion of his ill gotten gain.

Lighthouse Without a Light.

The most extraordinary of all British lighthouses is to be found on Arnish rock, Stornoway bay—a rock which is separated from the island of Lewis by a channel over 500 feet wide. On this rock a conical beacon is erected, and on its summit a lantern is fixed, from which, night after night, shines a light which is seen by the fishermen far and wide. The way in which this lighthouse is illuminated is this: On the island of Lewis is a lighthouse, and from a window in the tower a stream of light is projected on to a mirror in the lantern on the summit of Arnish rock. The consequence is that, to all intents and purposes, a lighthouse exists which has neither lantern nor lighthouse keeper.

One of Mrs. Stanton's Retorts.

Once a fashionable woman of Newport expressed to Elizabeth Cady Stanton a fear that it was not entirely modest for a woman to speak in public. The dignified president of the suffragists looked at her with mild surprise. "Why," she said, "there are not so many people at our convention as there were at the ball last night, and surely it is more modest to make a sensible speech in quiet costume than to exhibit one's bare arms and shoulders at a public dance in the embrace of a strange gentleman."

Wheat and the Boy.

Willie—Pa, what does "good as wheat" mean?

Pa—Don't bother me.

Willie—Pa, would you say I was as "good as wheat?"

Pa—I might after you were properly thrashed, and that's what will happen to you if you don't stop asking questions.

The Lucky Man In the Case.

"Do you remember Miss May, the girl who had such a bad disposition? Well, she is married."

"Indeed! Who is the lucky man?"

"Fred."

"Why, he is the one she discarded."

"Just so. That is why I say he is lucky."

Remember that four out of five bluffs are called and that a full hand seldom loses.—Atchison Globe.

From His Back And Hips

"Pinto Shell" Cordovan for H.B.K. mitts and gloves is made from the "shell" or back and hips of the Western Bronco, the toughest hide weight for weight worn by any animal.

Tanned by a pure vegetable process without oil or minerals to conduct cold.

The toughest most pliable leather used in mitts or gloves.

Scorch and boil proof—will not stiffen in cold weather nor crack when dried out quickly.

H.B.K. BRAND

Makers of Warm Clothing, Mitts, Gloves, Underwear, Sox, Moccasins, etc. 102

A country which has no national literature, or a literature too insignificant to force its way abroad, must always be, to its neighbors at least in every important spiritual respect, an unknown and unestimated country.—Carlyle.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is better than other soap powders, as it also acts as a disinfectant.

Always look on the bright side of things—and if you are going to invest your coin therein look on both sides.

Duty performed gives clearness and firmness to faith, and faith thus strengthened through duty becomes the more assured and satisfying to the soul.—Tyron Edwards.

DYSPEPSIA BOOK FREE

A public-spirited association, anxious to relieve sickness, will be glad to send Dyspepsia sufferers an illustrated book explaining the cause of dyspepsia and pointing out a cure. It has brought joy and health to thousands. It is absolutely free. Write to-day. Do not pass by this generous offer. Address American Health Improvement Association, P. O. Box 5316, Boston.

Luxury as a Handicap.

The history of our country is a record of the successes of poor boys who seemed to be hopelessly shut off from books, culture and education, except that of the most meager kind—from almost every opportunity for mental development. The youthful Franklins, Lincolns, Hamiltons, Garfields, Grants and Claytons—those who become presidents, lawyers, statesmen, soldiers, orators, merchants, educators, journalists, inventors, giants in every department of life—how they stand out from the pages of history, those poor boys, an inspiration for all time to those who are born to fight their way up to their own loaf!

The youth who is reared in a luxurious home, who from the moment of his birth is waited on by an army of servants, pampered and indulged by overfond parents and deprived of every incentive to develop himself mentally or physically, although commonly regarded as one to be envied, is more to be pitied than the poorest, most humbly born boy or girl in the land. Unless he is gifted with an unusual mind he is in danger of becoming a degenerate, a parasite, a creature who lives on the labor of others, whose powers ultimately atrophy from disuse.—Success.

His Classification.

Ingomar Buskin—There's a dispute about my acting. Some critics put it in the first rank, others in the second. Now, how would you designate it?

Horatio Jones—I? Oh I'd simply designate it as rank.

The Appreciation.

The Author (after the first performance)—Well, what do you think of my play?

Feminine Friend—It was just lovely! Who designed the heavenly dresses?

When you go to collect a bill, the man at the counter is less apt to inquire about the health of your family than when you go to pay one.

French Chestnuts.

The French grow chestnuts that are from two to three times as large as the American varieties.

Avoid singularity. There may often be less vanity in following the new modes, than in adhering to the old ones. It is true that the foolish invent them, but the wise may conform to, instead of contradicting them.—Joubert.

Minard's Liniment is best Hair Restorer.

No one is able to discover that a rich man is a fool until after he loses his money.

Bay rum is a liquid that goes to the head but doesn't intoxicate.

We should be as careful of the books we read as of the company we keep. The dead often have more power than the living.—Tyron Edwards.

Hard to Believe.

"Well, I never!" exclaimed Mrs. Bliggins.

"What's the matter?" asked her husband in a startled tone as he turned around from his shaving glass.

"The idea of a grown man like you standing there for five minutes at a time admiring yourself!"

"I'm not admiring myself. My feelings are those of astonishment, not admiration. I can't realize that I'm the same person who years ago was called 'precious pet' and held on people's knees and kissed by the neighbors. It's an awful thought."

Only In the Pail.

An Irish soldier was crossing a barrack square with a pail in which he was going to get some water.

A sergeant, passing at the time, noticed that Pat had a very disreputable looking pair of trousers on and, wishing to make a report, stopped the man and asked:

"Where are you going?"

"To get some water."

"What! In those trousers?"

"No, sergeant; in the pail!"

A Temperance Champion.

Mrs. Teacup—Oh, Mr. Tubbs, I was so delighted when I heard that you were such a stanch champion of the temperance cause!

Tubbs—Why—er—I'm not exactly—

"Now, don't try to hide your light under a bushel, Mr. Tubbs. I know, because I heard George say that you have been a booze fighter all your life. He said you punished more of it than any ten men in the state."

Supreme Test.

"He's the very soul of generosity, isn't he?"

"Yes. Why, they say he even gives money to his wife."

Grumblers Don't Advertise.

You will find that the storekeeper who is always complaining that business is not what it used to be is the man who doesn't believe in advertising. He is dead and doesn't know it.

Encouraging.

He—Darling, would you rather select the stone?

She—Not the first time, dear. I am afraid I might select one that was too small.

At Quito, the only city in the world on the line of the equator, the sun sets and rises at 6 o'clock the year round.

For Goodness Sake

Granby Rubbers

The Rubber that has the largest sale in Canada, simply on account of its goodness. Made from (This is important) *new* rubber.

"Granby Rubbers wear like iron"

STOLE HIS LAND.

A FARMER SUES CANADIAN NORTHERN.

A Minnesotan Claims That the Railway Company Stole Fifteen Acres of His Homestead and Cart d it to Canada—U. S. Government Also Sues

A dispatch from Crookston, Minn., says: Herbert Sanbourn, a farmer living west of Beaudette, on the Canadian Northern railroad, has begun a novel suit in the district court. He is a homesteader, and his attorneys, Ftéenerson & Loring, of this city, had papers served on the Canadian Northern railway, the preliminary step to recover damages in the sum of $17,000 for stealing fifteen acres of his homestead. In addition to this the United States government will probably bring suit against the same railroad for stealing the same portion of the same homestead. The story is as follows:

The Canadian Northern located a gravel pit on this piece of land some time last year and removed some 100,000 cubic yards of gravel. Gravel is very valuable in that part of the state, and the amount named was carried across the border into Canada and used in making yards at Rainy River and other points. While this excavation was going on Sanbourn filed on the homestead and attempted to stop the work in the gravel pit. This he was not able to do, and as a result he has brought action to recover the value of the gravel.

In addition to this, M. D. McEnirry, special agent for the department of the interior, was last December ordered to proceed to Beaudette and investigate the matter for the United States government. He proceeded to the scene of the alleged land-grabbing and upon investigation found that they had removed the gravel from some fifteen acres, amounting to about 100,000 cubic yards. He estimated that one-half of this was removed before the homestead entry papers were filed, but it becomes a question whether or not Sanbourn had any right to the damage, as the title to the land is yet vested in the United States government, and he only holds it by contract. It is probable that the United States will bring suit to recover the entire amount of the damages, which will aggregate $30,000.

Senator A. T. Wood died at Hamilton Ont., on Jan. 20. Hon. Mr. Wood was 77 years old, and one of Hamilton's oldest and best known business men.

Mr. Smart's Immigration Scheme.

In regard to immigration, Mr. Smart, deputy minister of the interior, has prepared an agreement, which he suggests should be made with the North Atlantic Trading company, for continental immigration, instead of working through the local steamship companies. He suggests giving to the company a bonus of one pound per head for each man, woman and child only of the agricultural class, or to girls who are domestic servants and over 18 years.

The countries to which this would apply would be Belgium, Holland, Denmark, Russia, Germany, Austria, Hungary, Northern Italy, Luxemburg, Roumania, Bulgaria, Servia, Switzerland, Norway, Sweden and Finland. In return for this the company must agree to expend about $15,000 for advertising Canada. Precautions have been taken in the proposed agreement against accepting persons who have not a certain amount of money.

London's Vice Problem.

The London correspondent of the New York Herald cables: Several London newspapers, notably the Daily Mail and Daily Express, continue their agitation against the growth of the vicious foreign element in London's population. The large percentage of law breakers of this class has been for a long time noticeable in the Police circles. Besides, certain streets in London, are at the present time more than ever invested with foreign women who ply their trade by day as well as by night.

Mrs. Hugh Price Hughes, widow of the famous preacher, who is at the head of an admirable mission for dealing with vicious women who come here, says. "Our experience of fifteen years in the West London mission has been that this incursion of foreign women is a very grave and a growing evil. English women who take up that life are decreasing and there is some hope of reclaiming them. As for the foreign women, it seems almost useless to try to reclaim them, for they apparently have no moral sense to which to appeal."

A lady familiar with several continental languages recently stopped the first twelve of these women she met in a central London street and learned their stories. Four were French, four Germans, two Polish, and only two English.

It is thought that Mrs. Sarah Archer, aged 60, living at the corner of King and Queen streets, Kingston, Ont., died from exposure to the cold on Jan. 18th. Her neighbors found her lying on the floor in her own house with the atmosphere below zero. The woman had been ill for a week. She had probably got up to call help, opened the back door and fell in a faint, which led to death from cold. She was an hotel cook. A son is said to reside in the Northwest.

FROM BOTH HEMISPHERES

Important News Condensed Into Brief Paragraphs.

A report submitted to the council of the Winnipeg Board of Trade shows that sugar beets grow well in Manitoba.

The Montreal Chamber of Commerce has suggested to the Winnipeg Board of Trade that Lord Strathcona be the next governor-general.

The Winnipeg city council will make a special grant of $300 to the local curlers to assist them in meeting their expenses for the bonspiel which will be exceptional this year.

The prohibitionists of Ontario have asked for a royal commission to inquire into referendum frauds.

Premier Prior, of British Columbia, says the disallowed Oriental exclusion measures will be re-enacted by the legislature at Victoria.

The treaty between the United States and Colombia, for the construction of the Panama canal, has been signed.

The Dominion civil servants at Ottawa will ask the government for higher salaries.

The men engaged in boring on E. F. Hutchings' property at Lorne Hill have discovered a twenty-seven foot vein of salt, the supply from which it is believed will be inexhaustible.

A party of 2,000 British immigrants will sail from Liverpool for Canada on March 21.

Experimental electric trains, consisting of seven cars, will commence to run in England next week.

King Oscar of Sweden has decided to temporarily entrust the government of the country to Crown Prince Gustav, who will take over the regency next week. This action of his majesty is taken as the result of medical advice. The king has abandoned his projected visit to Norway.

News has been received at Halifax of the appointment by the colonial office, of Admiral Sir Frederick George Denham Bedford, G.C.B., as governor of the state of western Australia. Admiral Bedford is now on the flagship Ariadne, at Bermuda.

W. C. Dallas, of Franklin, Pa., died at St. Luke's hospital in St. Paul, Minn., from hemorrhage caused by the extraction of teeth. Monday Dallas had two teeth, that caused him pain, extracted. Blood continued to flow from the wounds caused by the teeth being pulled. All known methods were used by the doctors to stop the hemorrhage, but in vain, and Dallas was taken to the hospital. The flow of blood could not be stopped, and Dallas grew weaker and died.

Word reached Clarkleigh on Wednesday morning of a peculiar poisoning affair which took place at the residence of Mr. and Mrs. Frank Disjarlars, Oak Point, Lake Manitoba, last Monday. Last Monday, Mr. Disjarlars had left home on business for a short time. He returned again about dinner time and found dinner ready. On sitting down to the table he took a mouthful of beefsteak, but finding that it had a very peculiar taste, he decided to throw the balance to his dog, and did not eat any more. The dog swallowed the steak with great relish and died fifteen minutes later.

Railroad officials say that there will be between 22,000 and 23,000 carloads of oranges shipped from Southern California this year and that the fruit is the best ever grown there. Unless some unforeseen disaster comes it is safe to calculate that at least fifteen million dollars will be put into circulation in Southern California.

The scheme suggested years ago for the government ownership of canals as a solution of the canal question in New York state, has been revived by the introduction in the senate of a resolution relative to the future policy of the Empire State in relation to canals, and requesting congress to consider the possibilities of a canal thirty feet deep for military and commercial purposes, as well as to make provisions for the completion of the surveys of waterways between the Atlantic and the Great Lakes.

The London Free Press says: Unusual complaint has been made of late of the poor quality of flour this season. Bakers blame their bad batches upon it, and housekeepers find they do not experience the same good fortune with bread and biscuits. The sprouted wheat of last season is said to be at the bottom of the difficulty. Similar complaints are current here. The remedy appears to be to use Manitoba wheat flour or a large portion of it mixed with the Ontario article.

The three young men, Govenlock, Murphy and Jacobs, accused of causing the death of Henry Spence at Neepawa, by giving him an overdose of whisky, which is supposed to have been drugged, have been committed to stand their trial at the assizes at Portage la Prairie in March.

"I have noticed," said the cheerful idiot, "that a man takes much more satisfaction in the knowledge that he has made an ass of himself than he does in knowing that others have made a monkey of him."

Before the tomb of the late Mr. Cecil Rhodes, in the Matoppo Hills, Rhodesia, was sealed up, several pieces of granite were taken as relics from the walls of the chamber. One of these has just arrived in London.

He—When poverty comes in at the door, what is it love does?

She—Why it flies out of the dining-room window, of course.

HER FIRST $100.

What the Delightful Creature Did With It After Much Advice.

How she acquired it it does not really matter—possibly by teaching school, painting fire screens or washing. Any way when she found herself in possession of the sum she set about to see what she could do with it.

Certain amiable friends told her it would be very nice to buy some new dresses, hats, gloves, shoes and such. But she had a full assortment and didn't require anything of the sort. An aunt told her to invest it in a certain telegraph stock that would bring in good interest.

"But I want my hundred dollars all to myself, you know."

"Poor, foolish dear, it will all be yours, just the same. You can use the interest just the same. I know where you can draw—why, 6 per cent."

"Wh-at? That is only $6 a year! Six dollars is awfully small by the side of this. I'm going to count it again. Maybe some of it is gone." The very thought of such a thing made the little creature chatter. For the tenth time that day she sat down and counted the talismanic roll of bills—four twenties, one ten and two fives. It was all right, and her pulse resumed its normal beat. Suddenly she gave a little shriek of delight and jumped up and cried:

"I know just what I shall do! I'll get it—busted. I think that's what they call"—

"Child, what are you talking about?"

"Talking about finance, auntie. I'm going to make this stingy little roll into a big one. It doesn't show off at all."

"You are queer, dear."

"I'm going to get it all in five dollar bills. I think the pictures on the fives are ever so much prettier." Life seemed more rosy after the delightful creature possessed twenty nice, crisp fivers. She counted and recounted them when another fancy came.

"I'm tired looking at these common bills. They don't jingle and ring. I'm going to get five nice, clean, new twenty dollar goldpieces." No sooner was it said than done. The table rang for two days as she tossed the bright yellow pieces about like jack stones. Even then she wasn't quite happy. The little pile of twenty dollar yellow boys looked so small. Then she scouted about and got together 100 silver dollars. She polished every one daily and played with them. Next she got 200 fifty cent pieces. But life was still an aching void. She at last owned $100 in twenty-five cent coins. Surely she must be satisfied now. But, no; she broke into one of the quarters, felt discouraged after that and was quite unlike her old self until she found one little nickel left, the very last coin of the hundred dollars that had caused her so much trouble.

Snakes.

There exists among many persons a belief that snakes are creatures of more or less defective organization. Deprived of legs and reduced to effect their movements by sinuous windings of their elongated bodies and tails, they have an appearance of helplessness which may by itself excite compassion. Yet no mistake of the kind could well be greater. The principles of evolution suffice to make it evident that the structure of serpents must be tolerably good or else they could never have survived nature's many destructive agencies. But, in fact, their structure is a marvel of admirable contrivances and accurate adjustments, so that we must affirm them to be as perfectly adapted to their requirements and peculiar modes of life as any other animals.

Iconoclasm.

"Well," said the man who had come in from the remote wilds, "I suppose you've took your seat in congress ag'in."

"No. You remember, I had the misfortune to be defeated."

"You don't say! And after me travelin' forty mile to vote fer you! The folks out our way will shore be surprised. So you ain't goin' to sit in congress no more?"

"I'm afraid not."

"Well, well! Things are certainly goin' queer these days. I reckon they'll be movin' the Washington monument next."

A Thoughtless Sister.

Mrs. Getthere—Such impudence! Here's Sister Matilda proposing to come here with both her children and make us a long visit.

Mr. G.—But you spent half last season at her home in the country, and you had four children and a nurse.

Mrs. G.—A different thing altogether. She has no servants, but she knows perfectly well that we have several and that every one of them will get mad and leave if the family is increased.

Pedagogy.

"But," objected the visitor, "quite a number of your pupils have broken down and become imbeciles."

"True," replied the eminent educator, "but we confidently expect better things in the future. The bacillus of overstudy having now been identified and a serum for its destruction devised, we look for no further trouble of the kind you mention."

Champion Diagnostician.

Naggsby—I noticed that Fetherhed used vinegar instead of maple drip on his cakes at breakfast and didn't seem to notice the difference at all.

Waggsby—I wonder who the poor girl can be.

Whether or not a man succeeds in life sometimes depends on whether he spurs himself or spares himself.—Pittsburg Dispatch.

TERRIBLE WRECK

OVER 100 PERSONS KILLED OR INJURED.

Express on Central Railway of New Jersey Plunges into the Rear End of a Local and the Passengers Are Buried in the Debris.

One of the most appalling railway wrecks that has occurred in the vicinity of New York for many years took place on Jan. 27 at Graceland, on the Central railroad of New Jersey, near Westfield, N. J., when the Royal Blue line ploughed at full speed into the rear end coach of a local train. Immediately after the crash three of the shattered cars of the local train took fire rendering impossible the rescue of many of the wounded who were pinned fast in the wreck.

Many bodies are believed to have been consumed. On board the flyer all the passengers, although badly shaken up escaped uninjured, save for trifling bruises.

The local train leaves New York at 5.45 and runs express to Boundbrook, making stops at Elizabeth, Westfield, and Plainfield. Beyond Boundbrook it runs as a local. The Royal Blue train ran 15 minutes late, but travels at a higher rate of speed, and makes no stop except at Elizabeth, and is scheduled to overtake the slower train just beyond Graceland, where the latter switches from track three onto track four to permit the Royal Blue to pass.

This evening a freight train was blocked upon its track and the local received orders to proceed on the express track to Dunn Ellen, and there take the outside or No. 4 track. Shortly after receiving orders the train had to stop for a hot box, which delayed it, so that when it got under way again it was due at Dunn Ellen. The train had just started and was moving slowly when the Royal Blue, travelling apparently at full speed, which at that point usually approaches 65 miles an hour crashed into the rear end.

The heavy engine of the Royal Blue tore its way into the rear car and at the same time drove the forward end of that car into the rear end of the car ahead, which in turn was driven into the third car, and this in turn was driven into the fourth car from the rear. The fourth car was only partly wrecked, but the last three were torn to pieces.

The engine of the Royal Blue left the rails, and turned over on its side, the engineer and fireman sticking to their posts, and going down into the wreck.

Passengers on the flyer say the engineer applied the brakes just a minute or so before the wreck. The train ahead had sent a flagman back, but it seems he was recalled when the train got under way, and although he left the torpedoes, the Royal Blue did not heed them, or else was going too fast to stop in the short distance remaining. The man who went back to flag the train had just swung onto the rear end of his train and is among the dead.

The engine and the three worst wrecked cars were piled into a heap containing at least one nundred dead and injured. From the mass came fearful screams for aid. A minute later the wreck caught fire from the firebox of the locomotive. The screams of the injured in the heap were intense, as they found themselves hemmed in by the flames.

The firemen from Westfield were summoned by telephone, and after a time mastered the flames; and the work of recovering the bodies began. Out of the first car eight bodies were taken. The sight while the wreck was burning was horrifying. Men could be seen in the wreckage pinned fast amid the timbers of cars and struggling to be free, while the flames roared around them. The rescuers were helpless to aid them, as they had already been burned and scorched in the fire before desisting from the work of rescue.

Those in the car ahead which was lifted on to the rear car were those who suffered the most. Fourteen minutes before the flames reached them from the car below them and behind them, they were enveloped in smoke and steam, and it was here that the worst sights were witnessed. The imprisoned ones begged for death to end their agonies and implored those who were laboring to get them free to crush their heads with axes they were using to chop away the wreckage. Some begged for water, some raved, some prayed, and some cursed and prayed alternately.

Mr. Andrew Carnegie has offered Toronto $350,000 for a library.

The bee-keepers of Manitoba will organize a provincial association.

Colonel Lynch has had his sentence of death commuted to life imprisonment.

The allowances to Canadian Methodist missionaries have been cut down owing to a shortage in funds.

Daniel Briggs, a Massey-Harris traveller, risked his life to save Frank Rainsford from being burned to death in a fire which destroyed J. J. Maher's store, at Grand View, Man.

The Minnesota state senate has passed a resolution asking the representative of the state at Washington to endeavor to have the duty on lumber removed.

FIRE AT COLNEY HATCH

Horrible End of Over Fifty Patients—Distressing Scenes.

A London cable says: A score of insane patients were burned to death by a fire at the Colony Hatch asylum on Jan. 27th. The outbreak occurred in the Jewish wing of the institution.

The flames spread with great rapidity and before they could be got under control, five wooden buildings, including dormitories and doctors' apartments, were gutted. All the efforts of the officials were directed to removing the insane inmates, but the latter became wild with excitement and so panic stricken that not only were they unable to help themselves, but greatly impeded the operations of those trying to help them. There were nearly 600 women in the burned annex at the time the fire was discovered, and most of them were safely transferred to the main building, which was uninjured. Some, however, escaped and are still at large rendering it difficult to ascertain the exact number of those burned to death

It has since been ascertained that about fifty insane persons were burned to death. The work of searching the ruins continues. The officials admit that about fifty bodies have been recovered, but it is feared that the full extent of the disaster is not yet known. All the victims were lunatics. Their charred remains presented a horrifying spectacle. The asylum was beseiged by anxious relatives or friends of the patients, who arrived from all quarters. Pitiable scenes were witnessed as weeping men and women left the premises after ascertaining that relatives or friends had perished in the flames.

The nurses had a terrible experience in trying to assist the insane people who were so panic stricken that they had literally to be driven to a place of safety. The inflammable premises almost immediately became a furnace. Nothing was left standing. The corrugated iron roofs of the dormitories and the bedsteads of the patients were melted by the intense heat. Some of the lunatics were burned while in bed, and the charred remains of the others were found huddled together in corners, while groups of partially consumed bodies showed that many persons lost their lives and sacrificed those of others in their frantic efforts to force a passage through the flames to the main building.

The latest estimate of the superintendent of the asylum places the number of dead at fifty-two All the victims were women.

Sultan's "Black List."

A dispatch from Constantinople contains the information that the Sultan has issued an irade forbidding all Mussulmen to partake of alcoholic drinks, and has further charged the police to arrest any person found disobeying his order. The person convicted of drinking alcohol will for the first offence be fined, and for the second bastinadoed. In the event of this being not sufficient, he will receive a long term of imprisonment on again being convicted.

In order to cope with the drunken habits of the French troops in Indo-China, which have become a disgraceful scandal, General Coronat has issued an order that when a soldier has been convicted of drunkenness three times he will wear a distinctive badge, and have to do the menial work of the regiment.

Harry McGarry, of Chatham, aged 15 years, shot himself dead on Jan. 27 while putting a cartridge into a pistol.

Bogus two-dollar Dominion bills are again being circulated in Ottawa, and a number of Italian fruit vendors have been victimized.

During 1903 Russia will expend $83,057,801 on railway construction, and of this amount $10,460,781 will go to the Siberian railway.

In celebration of the coronation of King Edward, 60,000 poor people were banqueted at Calcutta on Jan. 27. A display of fireworks which followed was witnessed by about 250,000 persons.

At Chicago a mob of nearly 500 men, women and boys held up a Northwestern coal train and carried away the contents of five cars before they were dispersed by the police. Women led the attacks. Three women and two men were arrested, but the menacing attitude of the crowd caused the women to be quickly released.

Mrs. McKinley, of the Church of England mission at Fort Resolution, Great Slave Lake, was seriously burned in a fire in her home in December last.

A dispatch from Berlin says that the Russian war office is intensely pleased with the results of the trials made with traveling kitchens, which will now form part of the military equipment in case Russia comes into conflict with Japan and China. The traveling kitchens have been designed with the object of supplying the troops with warm food and tea during the long journey over the Siberian railway. They are constructed with a view to being attached to the transport trains, are 52 feet 6 inches long, and 9 feet 10 inches wide. Each one contains a separate kitchen with three cooking ranges, in which food can be prepared for 700 men, a cold storing compartment for fresh meat, a compartment for general stores, and a compartment for the cooks.

GERMAN POLITICS

DEBATE ON ARMAMENT EXPENDITURE.

German Chancellor's Stirring Speech in Reply to Herr Bebel, the Socialist Leader's, Criticism—He Defends the Emperor.

A cable from Berlin says: During the budget debate in the reichstag on Jan. 21 Herr Bebel, socialist, ascribed the empire's deficits to the enormous expenditures for the army and navy and to the futile efforts to play the first role in the world, which Germany was unable to do. The government, he continued, is afflicted with the "malady of suddenness," which defeated its own aims. The speaker instanced the re-armament of the army with artillery, which already had been relegated to the second rank. The United States, Herr Bebel added, had entered into the competition for armaments and owing to her great resources and energy will soon outstrip Europe.

Herr Bebel further said the empire's expenses for the army and navy are likely to grow even greater under the present conception of the foreign policy. Germany wanted to be first everywhere. Its attitude towards weaker states never would be tolerated towards itself. Its action towards Hayti was brusque and how, the speaker asked, can the Panther's bombardment of Fort San Carlos be justified? Continuing Herr Bebel remarked: "President Castro is struggling for life and the maintenance of the presidency. We cannot think ill of a man under such circumstances if he resists excessive demands. The coercion of Venezuela is in the interests of the great capitalists and the Krupp firm has a share in it. Such violence should be resorted to only in the most extreme cases."

The chancellor in reply to Herr Bebel's criticism, said: "Herr Bebel has defended the singular behavior of the Venezuelan government against us with a degree of animation such as I have seen in no European newspaper. President Castro doubtless will read Herr Bebel's speech with the greatest delight at his morning coffee. Let me remark further that the question at issue between Venezuela and the powers is not merely one of claims, but of the defense by the powers of their prestige, which has been impaired through President Castro's action and through the manner in which he repudiated impolitely, to express it, mildly, our just claims. We were, therefore, perfectly justified in proceeding jointly with Great Britain and Italy for the preservation of our prestige."

The chancellor then turned his attention to Herr Bebel's attack on the naval expenditures. He said: "When Herr Bebel says that naval officers retired, and on waiting orders, have written articles claiming that our fleet must be strong enough to annihilate the British navy, I answer him that this, of course, is a fancy picture which is found in the literature of all people. I point only to the imaginary battle of Dorking, which no responsible statesman dreams of, and which no responsible man in Germany regards as possible. You can see that these articles are mere fancy pictures by consulting our fleet plan, after the completion of which our navy will occupy only fourth or fifth place among the navies of the world. We follow no aggressive plans, but purpose merely the defence of our coasts, and the protection of German interests and citizens abroad. That we should not remain defenceless at sea is the wish of the majority; I may say without exaggeration, of the great majority of the German people. If Herr Bebel contradicts this then he is out of harmony with the sentiments of the nation.

"Herr Bebel said that the expression that 'our future lies upon the waters' contains an aggressive aim toward other powers. Herr Bebel appears to me to have proceeded here according to the principle of imputing false motives when other means of attack were exhausted. We intend nothing of the kind. The expression quoted does not mean that we want to drive any power from the sea, but we have just as good a right to sail around on the seas as other nations have, and the new German empire has this right, too."

Earlier in his speech Count Von Bucow, referring to criticisms Herr Bebel had made of Emperor William's attacks upon social democracy, said: "Are you not trying by all the means of agitation to injure the monarchy? You wonder that the monarch, filled with a sense of his responsibility and rights defends himself? So long as social democracy aims to overturn the existing constitutional system, you cannot wonder that the highest bearer of the monarchic principle takes the defensive with all energy and even severity, when this energy and severity express his character."

London now receives mails from Pekin in twenty days by the overland route and this time will speedily be shortened to fifteen days. Passengers are now booked daily from London to Pekin, via the Siberian railway, in comfortable trains.

Lieut.-Col. Sam Hughes has bought sixty-four sections of land in the Swan River district.

A rich mineral water, which is said to compare with Lithia water and Apolinaris, has been discovered at Lorne Hill, Man.

The United States Congress has decided on the adoption of American coinage for the Philippines.

A SUNSET IN FERNIE.

The memoloose sun sinks in the West,
The night is drawing on,
The storm King rules with tyrant hand
O'er an iron-bound earth with verdure gone.

As Charity cold sit the Sisters Three,
Their ermine cloaks wrapped round,
Their pearly white 'gainst the blue untrod,
Thru the still air, not a sound.

On Fernie's Mount, the pineclad slopes,
Rise upward tier on tier,
The crimson glance of the dying god,
Tips with fire its crown so sere.

Southward in serried ranks arise,
Like sentinels on guard,
Ten snowy peaks, from whose craggy brows,
The genii keeps watch and ward,

O'er the silver sea that lies beneath,
And the valley they woo with their breath,
With its riches untold, of gems, not gold,
As dark as the brow of Death.

Cranbrook

From the Herald.

There are several cases of diptheria in town.

The I. O. O. F. are completing arrangements to hold their annual ball on Feb. 9th.

P. Finnar, the well known rancher, was married yesterday morning at the St. Eugene hospital, to Miss Ladd, of New York.

Mrs. McLeod and Mrs. R. R. Jamieson gave an entertainment last Saturday evening at Michel under the auspices of the Methodist church. The concert was a great success and the ladies have been importuned to return again.

The McKenzie's gave a very successful concert for the Ladies Aid of the Presbyterian church on Monday evening. Never before has there been such a large audience, and the McKenzie's by their efforts that evening have established themselves in high favor with the Cranbrook audiences.

Dr. J. H. King will leave the first of the week for his former home in the east. After a brief visit he will go to New York to take a two months course of work in the leading hospitals of that city. Drs. Harvie and Green will have charge of Dr. King's practice during his absence.

Mrs. J. F. Armstrong came in on Thursday's afternoon train from Golden via Revelstoke to meet Mr. Armstrong here. She has been visiting in the east for the past two months and says the weather has been very severe. At Revelstoke, when she was there there was over five feet of snow fell in one day and night.

MICHEL

From Our Own Correspondent.

Mr. and Mrs. McNeil left for the coast this week.

Mr. D. Evans and family have moved to Cranbrook.

Mr. F. R. Delziel visited Fernie this week.

Messrs. J. McLean and F. Burn, of Fernie, visited Michel this week.

The tipple is working full time and the output from the mines is increasing daily.

Miss Muriel Roblin, who has been the guest of Mrs. R. L. Henderson, left for her home in Cranbrook on Wednesday.

Mrs. McLeod and Mrs. Jamieson, of Cranbrook, were visitors of Michel this week.

A carload of cows arrived from the prairie this week for Ed. Simister's ranch on Elk river. Mr. Simister will supply the town with milk, starting the first of the month.

Mr. and Mrs. Johns, Misses Agnes Dudley, Gray, Agnes Simister, Mabel Dudley and Messrs. W. Rogers, G. Burdette. C. Scaller, W. Nicholson and J. McDonald took in the Miners' Union ball at Frank on Thursday evening.

It is rumored that the question of an hotel for Michel has been settled at last and that the building which was erected for a recreation hall will be remodelled for this purpose at once. This will be the best possible site for an hotel. The town now has a population of over a thousand and an hotel has been a long felt want, and will raise rather than lower the standard of morality among many of our citizens provided that consumption of liquor is stopped in other quarters.

The concert on Saturday evening for the benefit of the Methodist church was a decided success financially, some forty dollars being the net proceeds. The solos rendered by Mrs. McLeod, of Cranbrook, were the favorites of the evening, though the violin solos by Master Almond were most heartly received. The Lancashire Glee club gave some vocal entertainment very acceptably and the duet by Miss Rhoda Simister and Mr. W. Almond was received with hearty applause. The work of the Michel orchestra, consisting of Messrs. Almond, voilin, W. Almond, organ, and Master Almond, violin was of a high order.

Mr. C. J. Lewis, the well-known hunter and guide, met with an unfortunate accident on Saturday last while in the hills looking after his traps. When going down an incline he slipped, and in falling threw his rifle, a Savage, in front of him. The rifle struck a log, and in some manner the safety device became displaced, with the result that the jar discharged the weapon, the ball, a soft point, striking Mr. Lewis in the fleshy part of the left hand and the outside of the hip. The bullet made very bad wounds, which bled profusely, and he had to walk some miles over the mountain before he could get assistance, when he was brought by sleigh to Michel and is now under the care of Dr. McSorley. Mr. Lewis is an experienced man in the handling of firearms, and says he cannot account for the discharge of the rifle, as the safety device is supposed to keep the mechanism locked in just such occurrences as this. If no complications arise Jack will be as well as ever in a few weeks.

MORRISSEY

From Our Own Correspondent.

John Krall, a miner working at Morrissey in No. 3 incline, met with a terrible accident on Monday, which resulted in almost instant death. He went to work on the three o'clock shift and about 7 o'clock while employed at the incline holding the lamp for his mate to lower the car, the latter got beyond control, struck a post and rebounding, struck Krall, standing near it, killing him instantly.

The incline car system works on the gravity principle, the empty car being pulled up by the weight of the loaded car going down. It appears that the regular operator was away getting a lamp and his assistant, Pat Garvy, undertook to lower the full car. In some inaccountable manner the car got beyond control of the brake and the empty car rushed up with tremendous speed and at the top jumped the track and struck the "McGinty" post with great force and rebounding struck Krall on the head breaking in his skull. Coroner H. H. Trites went up on Tuesday to hold an inquest and a jury was impanelled by Constable Tranter consisting of Foreman Huchinson, Moffat, Moore, Mackenzie, Higbie and one other. After due deliberation a verdict of accidental death was brought in, with a rider that the Coal Company should put a competent man to run the McGinty.

The body was brought to Fernie on Tuesday evening by John Baiko, and the Union men were ordered to attend the funeral of their comrade on Wednesday. The funeral was an impressive sight. Father Milleux officiated.

A horrible wreck occurred on the New York Central near Westfield, New Jersey on Tuesday evening. The Royal Blue flyer at the rate of 65 miles an hour ploughed into the rear end of a local passenger train which had been delayed by a hot box. None of the passengers on the flyer were seriously injured but the loss of life among the other passengers was terrific. The three rear cars and the express engine were piled in a heap which buried 100 people in the debris. The horror of the situation was increased by the fire demon which attacked the wreck and burned to death some of the injured. Engineer Davis who was terribly injued stated that he saw the danger signal but expected it to turn white and did not heed it.

A MOTHER'S GRATITUDE.

15 RED STREET, NEAR CHESTERTON,
STAFFORDSHIRE, ENGLAND, November 10th, 1902.

C. S. V. BRANCH, Esq,
Manager Sun Life Assurance Company of Canada,
Vancouver, B.C.

DEAR SIR,

I am to-day in receipt of your favor of the 21st of October, 1902, enclosing cheque from your Company amounting to $2000.00, in settlement of claim under Policy No. 201203 on the life of my late son, Samuel Hand, who met his death in the Fernie Mines by an explosion, on the 22nd of May, 1902. Your general agent for the Kootenay, Mr. A. B. Docksteader, in the spring of the year induced my son to take out this insurance for my benefit. He paid but one premium of $71.20 on same, and, as above stated, I am to-day in receipt of the Company's cheque in settlement of this claim in full, without any deduction whatever for expenses in settlement of the claim or otherwise. This is particularly worthy of note, owing to the great distance of my residence from British Columbia, and the fact that Mr. Docksteader, to obtain the policy and have the necessary claim papers filled out, was obliged to take a special trip of some two hundred miles to Fernie to secure the necessary particulars, etc., which I understand was entirely disbursed by himself, and certainly has not been charged to me. Therefore I feel it my duty to express my gratitude to Mr. Docksteader for his kindness in sacrificing so much for me in settlement of this claim. Your kindness to me is also praiseworthy and I feel under an obligation in gratitude to you for the courteous and kindly manner you have conversed with me (by letter) to thank you for so promptly settling this claim. I shall therefore speak very highly of you and your Company whenever I can do so.

I have pleasure in attesting to these facts for the benefit of my son's fellow-workers, and I trust it may be of some advantage to the Company and their representatives.

I am, yours sincerely,
(Signed) THOMAS HAND,
On behalf of Hannah Hand.

M. A. KASTNER, Agent. Fernie, B. C.

NEW APPOINTMENTS.

L. R. FORBES GAZETTED. J. H. MCMULLEN IS NOW CHIEF OF POLICE.

Fernie Gets Many new Offices, Stipendiary Magistrate, Collector, Deputy Mining Recorder, Coroner, etc.

Last week's B. C. Gazette contains the official appointment of L. R. Forbes as the Government agent of the electoral district of Fernie, it reads as follows:—

"Lestock R. Forbes, of Fernie, Esquire, to be:—

Stipendiary Magistrate for the county of Kootenay, Collector of Provincial Revenue and Revenue tax, and Registrar under the "Marriage Act" for the Fernie Electoral District;

Deputy for the Fernie Electoral District, of the district Registrar of Births, Deaths and Marriages for the southern division of East Kootenay.

Deputy Mining Recorder for that portion of the Fort Steele mining division known as the Fernie district, comprising the drainage area of the Elk river, north of the south fork thereof, with sub-recording office at Fernie, and

Coroner for the Province of British Columbia."

Mr Forbes will assume his new duties as soon as certain papers and instructions are forwarded to him.

Mr. J. H. McMullen, Provincial police, has received an official notification from the Provincial Secretary of his appointment as Chief of Police for this district. This appointment will doubtless give general satisfaction as Mr. McMullen has shown himself to be a capable and painstaking officer.

A NEW SYSTEM OF COKE OVENS.

J. J. Fleutot Introducing New Ideas From Europe.

In conversation with a reporter of The Daily News yesterday J. J. Fleutot, superintendent of the Frank coal mines, stated that he had signed the contract for the installation of the 50 coke ovens which it is proposed to put in at Frank this spring. These ovens are not of the beehive pattern as are used at Michel and Fernie, but are on a more modern plan, by which the coal in the course of its transformation into coke is carried through a number of chambers. By this method, Mr. Fleutot states, the process only takes 25 hours, instead of 72 as with the beehive oven. On the continent of Europe the beehive ovens have been discarded for many years past, as being too wasteful, and the new compound ovens have taken their place. The contract for the construction of the Frank ovens has been given to a firm of Belgian builders, who are familiar with the new method. These ovens will each produce three tons of coke per day, making a total of 150 tons. An engine for hauling the trains of coal from the mines to Frank has been ordered from Chicago, and is expected to arrive within the course of the next two weeks.—Nelson News.

SMELTING MEN SATISFIED.

A. C. Flumerfelt, assistant to the president of the Granby Mining and Smelting Company, of Grand Forks, in Nelson on Thursday stated, "the supply of coke is adequate, we use 180 tons and have a standing order for 200 tons a day, and while we have not been able to accumulate a coke reserve we have managed to get along with the supply sent us. I am satisfied that the Crow's Nest people are doing their very utmost to supply our needs. I do not think we have any kick coming at the present time."

Albert E. Goodell, supt. of the Montrea and Boston Copper Company's smelter also says that he was aware of the difficulties encountered by both the railway and the coke company at the present time and he believed both were doing everything in their power to keep the smelter going. He looked for an improvement in the coke situation from this on and expected to start up the second furnace at the smelter very shortly.

LUMBERMEN MEET.

The Mountain Lumber Manufacturers Association held its annual meeting in Cranbrook last Saturday. A. Mott, of the Mott Son & Co.; H. A. Kanouse, of the Cedar Valley Improvement Co.; and A. McDougall, of the Fernie Lumber Co. were present. Geo. Rogers, of Lethbridge, and E. J. Waddle, of Regina, representing the Western Retail Lumber Dealers Association were present to confer with the association regarding the anticipated heavy demand for lumber on the prairie next season. The situation was discussed and everything possible will be done by the lumber manufacturers of the district to meet the demand from this quarter. In the election of officers Mr. H. Bentley was put on the executive committee as a representative of this district.

ANOTHER YEAR IN MONTREAL.

Winnipeg "Vics" Fail to Raise the Stanley Cup.

The contest between the Victorias of Winnipeg and the Montreal Hockey club for the Stanley cup is over and the eastern team has again won. The first game resulted in an easy victory for Montreal by a score of 8-1. The second game was a draw, each team scoring twice. The third game was a victory for Winnipeg by a score of 4-2. This left the series a draw which was played off Wednesday evening, and was won by the fast Montreal team 4 goals to one.

The easterners have evidently won on their merits. They are lighter than their opponents, they received more injuries, and they won on both hard and soft ice.

A DELIGHTFUL BALL.

SOCIAL EVENT ON WEDNESDAY EVENING WAS A GREAT SUCCESS.

List of Persons Present. Refreshments Music and Dancing all Pronounced Excellent.

The ball gotten up by a number of the bachelors of the town which took place in Princess Hall on Wednesday evening was a marked success. The large hall was appropriately decorated, the music supplied by the celebrated Fernie orchestra was of its usual excellent quality and all present thoroughly enjoyed the evening and appreciated the efforts of their hosts to entertain them. The refreshments were served in the Royal hotel dining room and great praise is due Mr. W. B. Ganong for the excellent manner in which he catered for the repast. After supper the dancing was resumed and continued far on towards morning.

The dresses worn by many of the ladies were very pretty and a general view of the hall presented a charming picture of beauty and enjoyment.

Those present were:—

FOUR HOCKEY GAMES

FERNIE PLAYS IN HARD LUCK AT FRANK AND PINCHER CREEK.

Juniors Defeated by Macleod—Married Men Defeat Singles in a Game on Thursday Evening.

The Fernie Hockey club went down to Pincher Creek on Sunday evening and played a schedule game on Monday afternoon. Sturdy, one of our best forwards, was unable to go and Frank Label was taken in his place.

The teams lined up as follows:—

PINCHER CREEK.		FERNIE.
Ross	goal	McKellar
Knowles	point	Ziegler
Gunn	cover point	Kastner
Moore	rover	Lafortune
Boyes	forwards	Label
Grant		Kenny
Schurman		Fair

Mr. Buchanan, of Frank, refereed the game and his decisions gave general satisfaction.

The ice was good and keen, the day being cold, and conditions were favorable for a fast game of hockey, but contrary to expectations the game was not a particularly brilliant one, the play at times being slow and uninteresting. Moore scored the first goal after fifteen minutes of even playing. Ten minutes later Label sent the puck into the home net and a few moments later Schurman scored another for Pincher, leaving the score 2-1 at half time.

The second half was marked by strong defence work by McKellar and Ziegler, who effectually repulsed many fine rushes on their net. After 24 minutes hard play the Fernie centre forward was put on the fence for 1 minute for loafing offside and during that time Moore and Grant made a good run and scored. Within two minutes of the finish Moore again scored from a side shot which made the final count 4 goals to 1 in favor of "The Milk Maids."

The game was rough, both sides checking heavily. The Coal Town boys however were more fortunate than their opponents in escaping without injury, several of the home team being severely cut and bruised.

In the evening the visiting team were entertained at a dance given in their honor and a very pleasant time was spent in social enjoyment. The boys were well pleased with the treatment they received at Pincher Creek.

THE GAME AT FRANK.

But they have another story to tell of Frank. The team stopped off by arrangement on their way home and played the game scheduled for Feb. 9th, on Tuesday afternoon.

Of this game probably the least said the better. The referee says the score was 8-6 in favor of Frank so it doesn't make any difference what the Fernie players say. However here are a few things that they do say. The Frank goals had no nets which is distinctly contrary to the rules of this Association and is sufficient grounds for a protest. The Frank umpire most unjustly claimed several goals that went wide of the post. The referee, Gunn, of Pincher Creek, gave several unfair decisions, the most noticeable being that which put Kastner on the fence for five minutes for no apparent offence. But the most outrageous feature was the time-keeping. Fernie had only one extra man, E. Wyldman, who was employed as umpire, and the time-keeping was left entirely in the hands of Frank men. The game commenced at 3:45 and ended at six o'clock and the time-keeper admitted that only 26 minutes were deducted for stops which leaves 1 hour and 49 minutes for actual play.

The ice was A. 1. and fast clean hockey was played. The Frank aggregation played a much better game than when here and they also had a new man The Fernie team were in fine fettle and played much better than on the previous day. During the first half the visitors forwards worked an elegant combination. Dan Lafortune and Fair six times in rapid succession ran the puck down the ice between them and scored six goals in about 10 minutes.

The score stood 6-2 in favor of the visitors at half time and from then on to the finish it appears that every advantage of the above mentioned means were taken to prove that they were not "easy marks" for the visitors, and it took 49 minutes of extra time even then to pile up a winning score. Towards the last some of our boys became disgusted with the treatment they were getting and insisted upon leaving the ice but as the game was of no vital importance the others persuaded them to stay on.

In the evening the boys forgot their experiences of the day in a smoker given on their behalf, and a very pleasant entertainment it proved to be. The team arrived home on Wednesday morning all feeling well, but just a little "touchy" on one or two points.

MACLEOD VS. FERNIE.

The game between the Junior Hockey Clubs of Macleod and Fernie was played on Fernie ice on Monday evening. The large crowd who attended were not disappointed in the exhibition put up by the boys. The teams lined up as follows:—

Macleod		Fernie
N. Grier	goal	Perkins
Grady	point	Todhunter
G. Sheer	cover pt.	Kirkpatrick
McCrea	rover	Lawrence
Murphy	forwards	Kanouse
A. Sheer	"	Ross
R. Grier	"	Sunburg

James Miller refereed the game to the satisfaction of every one.

The game was well contested throughout and not until the final call of time was the result safe for the visitors. The first goal was scored for Macleod by a fluke after 2 minutes play, the puck being accidentally put through by one of our defence. Fernie evened the score just before half time was up, Sunburg landing the puck in the net.

During the second half the prairie lads scored twice, the first being after six minutes of hard playing and the other just as the closing whistle sounded, leaving the visitors the victors by a score of 3-1.

The Fernie team showed much better combination work than their opponents but their shooting and checking were somewhat inferior. Grady and B. Sheer are heavy defence men, much too heavy for a Junior team and they effectively stopped many rushes of our lighter forwards.

Kanouse on the forward line played a swift game and Kirkpatrick at cover point kept his head and passed the puck well. Little Murphy on the visiting team always seemed to be in the right place and his playing was the subject of much comment on the part of the spectators.

The Juniors put up a plucky game and with practice they will play good hockey, and furnish material for next year's senior team.

The visitors came in on Monday morning and remained over until Tuesday evening. They were the guests of the Alberta Hotel.

BENEDICTS vs. BACHELORS

One of the most interesting and amusing hockey matches ever witnessed in Fernie was played in the rink on Thursday evening between the Benedicts and Bachelors. The fantastic costumes worn by the noble fourteen was a fair index to the rare sport that was to follow. The single men looked hideous in yellow "bag suits" with black trimmings, while the brilliancy of their rivals' red garb made in the same "health brand" fashion made it easy to distinguish the players except when they were piled more than three deep.

BENEDICTS		BACHELORS
W. R. Ross	goal	J. B. Turney
J. McEvoy	point	R.A.McMordie
J. H. Bricker	cover	D. Walmsley
Dr. Bonnell	forwards	—Lake
Dr. Higgins	"	N. E. Suddaby
J. McIntyre	"	S. Herchmer
L. R. Forbes	"	F. Wyldman
H. Bentley	umpire	A. H. Cree

Kastner as referee showed that he thoroughly understood the danger of his position by carefully maintaining a safe distance from any line of attack upon the puck.

Those of the large gathering who went with the expectation of seeing a farce must have been seriously disappointed. Those men played hockey as they had never played it before, at least most of them did. Oh, no! it was no farce, but often—not less than five times per second—it dangerously approached tragedy. The rules were strictly enforced, none of the players waiting for an invitation to sit down, and when the ice did not offer a bare spot at hand they utilized the most convenient object in sight, and no warrants were issued for the arrest of the puck as the Chief kept his eye upon it by converting himself into an impromptu merry-go-round. Time was called every 15 minutes for refreshments and general repairs.

The Bachelors, with the easy confidence of budding manhood, proceeded (at the start) to show their rivals the evolution of hockey from shinty, the latter being the only game of the kind the married men were supposed to have ever played. The surprise was as sudden as it was pronounced. The married men, with their wives and families in their places on the front rows, played all around and over and under their opponents. The men on the forward line worked like Trojans, and the stalwart defence ably supported them. Time after time the puck was relentlessly forced into the net guarded by Turney, and Harry's hand always responded to the effort in ample time. Six times did the mighty red men show their power of conquest, while only once was McMordie's aggregation able to get past "Little Willie."

REFLECTIONS ON THE GAME.

The long and the short of it was the goal-keepers.

McIntyre is a whirlwind. He scored five of the goals.

"Doc" Higgins was off-side four times, once each quarter.

Little Willie filled the goal to perfection.

Did the seniors catch on to the star point player in red?

Captain Ganong was unable to play and his suit and place were picturesquely filled by L. R. Forbes.

A rumor of a general exodus from the ranks of the single men is reported as a result of the game.

Ed. was heard humming softly to himself the next morning,

"Who checked against me when I fell
And repeated what I dare not tell,
And bruised the spot before 'twas well,
The Other."

R. A. M. did some clever execution in the corner while trying to keep warm during a scrimmage at the other end. A post mortem examination of the boards next morning revealed several fractures.

KNOX CHURCH ANNUAL MEETING

The fourth annual meeting of Knox church, Fernie, was held on Monday evening last. The attendance compared favorably with that of similiar occasions in the past, and the interest manifested was all that could be desired. The reports presented by the various officers of the church were, when we consider the difficulties of the past year, most encouraging. Mr. Rennie, clerk of session, reported that during the year the session had lost three members viz: J. A. Hill, who had removed from Fernie, the late Malcolm McLeod, who lost his life in the awful disaster of May 22nd, and one who had voluntarily withdrawn; but that the church membership, despite the loss by death and removals, was now larger than at any previous time in the history of the congregation. The most discouraging item of the report was that referring to the offerings for Home Missions and other schemes of the church. A decided falling off was here noticable from last year. It is to be hoped that the deficit will be met before the close of the church year. Feb. 28th.

Mr. F. Watson, presented the financial statement of the congregation. While the explosion at the mines in May, and the subsequent strike somewhat reduced the weekly offerings, still without any special effort the regular collections during the year had provided for all running expenses. The loan from the Church and Manse Building Committee, on church and manse still amounts to $745. A payment of $140 on church and $85 on manse is now due. This will be met by subscription.

Mrs. Senkbeil presented an interesting report on behalf of the Ladies Aid Society. During the year the Ladies seated the church at a cost of $425. They also handed over to the managers $65 towards meeting the debt on the church property. They propose during the present year to make a "Knox Church Calendar" to contain the names of all the members and adherents of the congregation. If they succeed, as we are sure they will, they will not only realize a goodly sum of money, but will have made a most interesting souvenir of the congregation.

These reports having been received and adopted the meeting proceeded to the election of managers. Three members of the old Board retired and there was one vacancy to be filled, caused by the removal of L. McLean from Fernie. A number of nominations were received of which the following were elected. Messrs. J. F. Elliott, L. McLean, A. Taylor and A. Joyce. These with Messrs. J. Bricker, F. J. Watson, F. Stork, J. Dunlop and W. W. Thompson constitute the present Board of Managers. With such a strong aggregation the financial interests of the congregation will undoubtly flourish.

At the close of the business meeting refreshments were served by the ladies and a pleasant and enjoyable social hour was spent by the congregation.—Co[illegible]

MY HEART'S DARLING

BY W. HEIMBURG.

"Your cheeks burn like roses," said he, tenderly. "Was it not close and warm out there in the old garden, Lucie? And I sent you there myself. Now confess, little one, she attracts you, she pleases you?"

"Yes; she is bewitching!"

It came from the bottom of her heart.

"Now, now!" he remonstrated, uncomfortably impressed; "only no vows of eternal friendship, and such things, Lucie; it is not in your way generally."

"The great thing is, I may see Hortense occasionally, and I thank you heartily for that, Alfred," she said, aloud.

He hesitated a moment. "I grant you permission with my whole heart, if it will be a pleasure to you, Lucie. And if you find yourself disappointed some day—"

She shook her head, as if that would be impossible.

"Well, judge by your own experience," he said, gently. "I know I may trust you. You love me, Lucie?"

She laid both arms round his neck. "And you me, too?" she asked, and looked searchingly into his eyes.

"My sweetheart, as much as a man loves the woman who is to be his wife!"

She leaned against him, and a thrill of happiness went through her.

"If you do not want me to go there, say the word, and my feet will never again cross the threshold," cried her heart; but the words did not pass her lips, they remained silent.

"Good-night," he said, lovingly, and she returned, softly, "Good-night," Then they parted.

CHAPTER VII.

It was a regular rainy Sunday. Those who ventured to church were wet through and through. The street gutters were like swollen streams, and the branches of the trees hung down heavily beneath their load of rain-drops. The young girls in Hohenberg had to let their Sunday clothes hang mournfully in the wardrobes, and they themselves gazed as dejectedly at the weather as the hosts of the Coffee Garden and the livery-stable keeper. There was but one man in the whole town who ventured to order a carriage, and that was Dr. Adler, who had to visit a patient in the country; and there was but one pair of girlish eyes which regarded the falling rain with secret satisfaction, and those were Lucie's. Luckily the weather made the dreaded excursion to the town forest with thirty or forty people whom she did not know quite impossible; and she could go to Hortense! Hortense and been the Alpha and Omega of her thoughts since that day; she counted the hours until she could again enter the young baroness's salon; she felt a day was lost if she had not seen Hortense, and the latter's notes, if she had to give up a visit because it was impossible for her to be at leisure, sounded quite inconsolable. The Frau Counselor called all this clear "madness." She could not exactly command her future daughter-in-law and say "You must stay here." The son had taken the matter in his own hands and had quietly informed her that he allowed Lucie to visit Frau von Lowen whenever she felt inclined. But still she was ready in finding a thousand little hindrances, and clever in utilizing them. There was an unexpected visit to be paid, and Lucie must put on her hat; she knew very well that it was unnecessary, but that did not help matters. Next there was a piece of work that could not be postponed; then a necessary letter must be written, or the house-book must be added up.

The girl's whole soul revolted against the old lady as she began to feel more and more at home with the lovely, cultivated woman, in whose society everything seemed beautiful and refined, making such a strong contrast with the naked prosiness of all at home. Ah, yes, she loved beauty and refinement enthusiastically.

Hortense's music—Lucie learned to understand Chopin and Wagner, and to love Schumann and Schubert. Hortense's book-case—she listened, her eyes growing larger and larger, to the reading of the young baroness. What had she hitherto known of art and its history—of all the glorious things in the world? She had been going about as if blind and deaf.

And yet she struggled against this feeling. She was almost humble toward her lover; tried by a thousand little attentions to make amends to him for having forgotten him so many hours through the day. With the early dawn she was busy about the house. She did not spare herself any kind of work; but often she did not know what she was doing. He remained kind as ever, talked to her cheerfully at noon, and in the evening he would strum on the old piano "Boccaccio's March" or the soldier's song from "La Donne Blanche." He struck a thousand wrong notes, laughed at himself, then would try some old student songs from memory.

(CONTINUED.)

Which?

He told his tale of love to her;
Another tale that burned
With love he sent the editor;
One only was returned.

She Was Not Vain.

"They tell me that you're vain," he said;
His voice was soft and low.
"I should be sorry, dear, to learn
That this was really so."

She tossed her head. "'Tis not my fault,"
She cried, "That is quite clear
You know, I only see myself
As others see me, dear."

LITTLE WILLIE'S HEARING.

SOMETIMES w'en I am playin' with some fellers 'at I knows
My ma she comes to call me, 'cause she wants me, I surpose,
An' then she calls in this way: "Willie! Willie, dear! Willee-e-ee!"
An' you'd be supprised to notice how dretful deef I be,
An' the fellers 'at are playin' they keeps mos' orful still
W'ile they tell me, jus' in whispers, "Your ma is callin', Bill,"
But my hearin' don't git better, so fur as I can see,
W'ile my ma stan's there a-callin'; "Willie! Willie, dear! Willee-e-ee!"

An' soon my ma she gives it up an' says, "Well, I allow
It's mighty cur'us w'ere that boy has got to anyhow,"
An' then I keep on playin' jus' the way I did before;
I know if she was wantin' much she'd call to me some more,
An' purty soon she comes ag'in an' says: "Willie! Willee-e-ee!"
But then my hearin's jus' as hard as w'at it useter be.
If a feller has good judgment an' uses it that way,
He can almos' allers manage to git consid'ble play.

But jus' w'ile I am playin', an' prob'ly I am "it,"
They's somethin' diff'rent happens, an' I have to up an' git,
Fer my pa comes to the doorway, an' he interrup's our glee;
He jus' says, "William Henry!" But that's enough fer me.
You'd be supprised to notice how quickly I can hear
W'en my pa says, "William Henry!" but never, "Willie, dear!"
Fer, though my hearin's middlin' bad to hear the voice of ma,
It's apt to show improvement w'en the callin' comes from pa.

Soft Soap.

Uncle—Here's a penny for you, Bobby. Now, what do you say?

Bobby—I say you're a wonder, old man.—New York Evening Journal.

A Grand, Sweet Song.

A good old German lady who keeps native wine and some chickens in a suburb was waiting on a guest when one or two hens set up a cackling of such vehemence that it suggested to the stranger dire disaster—either already happened or impending—in the chicken park. Immediately the big rooster took up the refrain and in his hoarse bass and inexcusable falsetto—"malady and not melody"—made more rumpus than all of the other fowls put together.

"What in the world is the matter with those chickens, frau?" asked the visitor.

"Ach! De schicken, she haf de eggk laid, an' venn she an eggk haf laid de rooster he bin so glat he help her sing."—Philadelphia Times.

Ad Interim.

"Johnny."

"What, dad?"

"I've been thinkin' 'bout how you can put in your time to best advantage."

"Yes, dad."

"Is the corn all in an' the potatoes dug?"

"Yep."

"The winter wheat sowed an' the apples barr'led?"

"Yep."

"Then I don't see why you shouldn't go to town for a couple o' months 'tween now an' Christmas an' git you a college degree. There ain't much else to do."—Newark News.

Very Likely the Case.

"As I recall it, when men were making a fierce crusade against women wearing their hats in theaters the women refused to take them off."

"They did."

"And then, after awhile, they took them off."

"They did."

"I wonder why?"

"Just because there was no satisfaction in wearing them after the men stopped protesting."—Chicago Post.

Careful.

"There's one thing I admire about you," said the frank friend. "You carved out your own fortunes and yet you never brag about being a self made man."

"No," answered Mr. Meekton, "I shouldn't think of suggesting that Henrietta wasn't entitled to all the credit!"—Washington Star.

Just the Other Way.

"He looks as prosperous as a trust promoter. Is that his line?"

"Oh, no. Quite the contrary."

"What do you mean by that?"

"He doesn't promote trust, he limits it. He's the credit man of a big wholesale house."—Brooklyn Eagle.

Daisy Is Complimented.

"These string beans," said she, "are heavenly."

"Ah, mam'selle," said the restaurateur, "that is indeed praise, for who but an angel would know heavenly beans?"—What to Eat.

Brutal.

She—He's very much in love with his wife. He says if she should die he doesn't know what he'd do.

He—What's the matter? Hasn't he got money enough to bury her?—Ohio State Journal.

MEDICINE IN THE ANDES.

Peculiar Properties of the Herbs the Indian Doctors Use.

An interesting character, frequently met with in the Andes, is the callaguayas, or Indian doctor. He is everywhere and is trader, tinker, peddler, fortune teller, conjurer and magician. His knowledge of botany is as mysterious as it is comprehensive, and the most astonishing stories are told of his cures.

A man in Lima was lying at the point of death with a disease which baffled physicians who brought diplomas from the medical schools of Paris and Vienna. One evening two of the physicians stood talking of the case at the sick man's door, without noticing a humble, barefooted Indian who leaned against the wall. As they departed the Indian entered the patio and asked to see the sick man. The family referred him to the attending doctor, who, amazed at his audacity, exclaimed:

"What do you know about a disease that puzzles the best physicians in Lima?"

"I have herbs that will cure everything," said the callaguayas.

The doctor smiled in scorn and turned away. The Indian opened his pack, took from a paper a single leaf and handed it to the physician, asking him to smell it. He did so, and instantly his nose began to bleed, and he was unable to stop it.

The Indian stood stolidly by for a time, then handed him another leaf, saying, "Smell that and the bleeding will stop."

The result was what he promised, and the physician was interested. In the end the callaguayas saw the sick man. He selected herbs from his stock, brewed a tea and gave it to the patient, and the sick man recovered.—"Between the Andes and the Ocean."

A Marvel of Science.

During a visit to the south with an eclipse expedition some years ago an eminent American professor met an old negro servant whose duty it was to look after the chickens of the establishment where he was staying. The day before the eclipse took place the professor in an idle moment called the old man to him and said, "Sam, if tomorrow morning at 11 o'clock you watch your chickens you will find they will all go to roost."

Sam was skeptical, of course, but when at the appointed time next day the sun in the heavens was darkened and the chickens retired to roost the negro's astonishment knew no bounds. He approached the professor in awed wonder. "Massa," he asked, "how long ago did you know dat dem chickens would go to roost?"

"Oh, a long time," said the professor airily.

"Did you know a year ago, massa?"

"Yes."

"Then dat beats de debil!" exclaimed the astonished old man. "Dem chickens weren't hatched a year ago!"

No Laundries In China.

"It's the funniest thing to me," said an old sea captain who for many years was in the China trade, "that nine out of every ten Chinamen who come to this country open laundries and engage in a business which does not exist in their native land.

"As every one knows, the Chinese at home wear soft cotton and woolen garments, according to the season, and there is not a pound of starch in all China. Stiffly starched clothes are unknown, and the Chinese men do not do the washing as they do in this country. Neither is there any regular laundry in the Flowery Kingdom. Therefore it is more than passing strange that Chinamen should all come to America and engage in a trade so foreign to their home industries."

Disguised Hands Always Bad.

"Here is a truth," says a handwriting expert in the Philadelphia Record, "that is as widespread as the ether: A disguised hand always tries to be poorer than the real hand. That axiom is a great help to us experts. For instance, when a letter done in a disguised hand is brought to us we always know that the writer of the letter is in a higher station than the hand would lead us to infer; hence in our detective work we are able to save much valuable time by eliminating all persons socially below the appearance of the letter and concentrating our attention on those only who are above it."

Astounding Memories.

Horace Vernet is the best example of visual memory. He could paint a striking portrait of a man, life size, after having once looked at his model. Mozart had a great musical memory. Having heard twice the "Miserere" in the Sistine chapel, he wrote down the full score of it. There are soloists who during twenty-four hours can play the composition of other masters without ever skipping a note.

A Difference.

"Actors are not much like ships," remarked Hamlett Egg thoughtfully.

"Why this observation?" inquired Brutus De Trick.

"Well," answered Egg, "ships are sometimes stranded on the rocks. Actors are stranded because of a lack of rocks."

Parental Discipline.

Nervous Parent—Stop that! Haven't I told you the last fifty times I had to correct you for that I wouldn't speak to you again about it?—Los Angeles Herald.

By a series of elaborate experiments a scientist has come to the conclusion that bees are not so intelligent as house flies.

CHANGE.

HE used to hold her in his arms,
Her head upon his shoulder,
And ne'er get weary in the least
Nor care how much his coat was creased,
Or so he fondly told her.

Now when he has to hold their child
He nearly falls to pieces,
And many are the sighs he draws,
And much he frets around because
His coat is filled with creases.

—Chicago Record-Herald.

Color Line In Culture.

A certain officer brought home with him from South Africa an intelligent but illiterate Kaffir as servant.

One day recently as he was reading a book the colonel caught Pete peeping over his shoulders and asked him what he wanted.

"I wants ter ask yer a quesham, sir."

"Well, what is it?"

"I has seen folks reading books and de like, an' I jess wants ter know which is it yer reads—de white or de black?"—London Answers.

Acid Love.

Miss Uppanote—Yes, I am going abroad to complete my musical education.

Mrs. Synnex—Oh, that will be so nice, dear!

Miss Uppanote—And when I come back—

Mrs. Synnex—But is it positively necessary that you come back, you poor, foolish darling?—Boston Evening Transcript.

None to Spare.

"Tacoma speaks up and says she is not suffering for sweet girls for brides."

"Well, there is one thing sure, and that is that none of the other cities is suffering from an overplus."—Cleveland Plain Dealer.

FIRST VIEW OF WHITE MEN

The Rifle and Burning Glass Frightened the Indians.

It is small wonder that the first view of a white man created terror among the superstitious Indians. A striking instance of this occurred when the Wallawalla Indians first saw Captain Clark of the Lewis and Clark expedition. Thinking to propitiate the savages and allay their fears of the white men, he planned to visit a village of the Wallawallas before the arrival of the rest of his party.

With this end in view, he set out to cross the Columbia river in a canoe, taking three men with him. On the way he shot a crane and a duck, both of which fell near him. He landed before five wigwams placed close to each other, but not a person was visible, and the doors, which were of mat, were closed. Holding his pipe in hand, as an indication of good will, he pushed aside one of the doors and entered the lodge.

Inside were thirty men, women and children huddled together in terror. He went to them, shook each by the hand and said some friendly words expressing by word and manner his kindly feeling. Their apprehensions were allayed until he took out his burning glass and lighted his pipe by the rays of the sun. Consternation again prevailed, and what might have occurred but for the timely arrival of two chiefs who knew the white men cannot be told.

It seems that the Indians had not seen Captain Clark, but they had seen the white crane which he had shot fall just before his appearance. They had also seen the duck fall at his shot. They connected the fall of the birds with his advent and thought he had fallen from the clouds.

The sound of the rifle, which they had never before heard, they believed was a signal to announce the white man's coming. Small wonder, then, that their hardly allayed fears were again aroused when he brought down fire from heaven by means of his burning glass.—Youth's Companion.

Odd Way of Saying "How D' Do?"

The people of Cairo salute you with an odd question. It means, "Do you perspire?" It is explained by the fact that they regard a dry skin as the symptom of a mortal malady.

Luxury.

Alice—Uncle Gabe, what would you do if you had a million dollars?

Uncle Gabe—Well, I doan' rightly know, li'l' missy; but ef I had a milyun dollahs I believe I'd git my ole shoes half soled.

NEW FARMER'S PAPER

A new monthly devoted to the farm and home, entitled The Canadian Thresherman, made its appearance in January, and promises to take a place immediately as one of the institutions of Canada. It is printed and published in Winnipeg, the offices being located in the Merchants Bank building. The January number contained several interesting and valuable articles, one dealing with the work of the Experimental Farm at Brandon, being of especial merit and highly instructive. The Manitoba Crop Report, Canada's Advantages, The Need for the Agricultural Paper, and other matters formed the subject of very valuable articles. There was a page for women, a page entitled "Glimpses of the World," and other equally readable subjects. The printing is clear, on good stock, the front and back pages are beautifully lithographed and the illustrations are away above the average.

The February number is equally good. It contains a four-page write up of the City of Winnipeg, which comes opportunely before the public during Bonspiel week, and is illustrated with some fine half-tone pictures. There is an illustrated story, articles on the "Food Products of Canada," and "Tree Planting on the Prairie," descriptive notes and illustrations of several new manufacturing plants established in Canada, a complete story of absorbing interest, a very well written page for the women of the house, articles of interest on stock, poultry and hogs, and a lot of miscellaneous matter which will afford entertaining reading for the winter evenings. The February issue of The Canadian Thresherman is several pages larger than the January issue, and the quality of the matter is fully maintained. It is a home magazine of great merit which has come to stay, and the price is only 50 cents a year.

A crank who unceremoniously entered the royal palace at Athens and demanded to be conducted into the throne room was throne out.

DYSPEPSIA BOOK FREE

A public-spirited association, anxious to relieve sickness, will be glad to send Dyspepsia sufferers an illustrated book explaining the cause of dyspepsia and pointing out a cure. It has brought joy and health to thousands. It is absolutely free. Write to-day. Do not pass by this generous offer. Address American Health Improvement Association, P. O. Box 5316, Boston.

More than eight hundred persons were killed on American railways during the three months ending September 30; but the dividends were highly satisfactory.—Detroit News.

Wear! That's "the greatest thing in the world,"—in anything that's worn. You get style, fit and finish too, in

Granby Rubbers

—But the one thing we emphasize is their *Wearing Qualities.*

"Granby Rubbers wear like iron."

FROM THE ORIENT

ANOTHER REVOLUTION IS THREATENED.

Yung Lu, the Real Ruler of China, to Centralize the Command of the Military Forces in Order to Exterminate All Foreigners.

According to advices received from North China, fears are being entertained that China is planning another outburst similar to that of 1901.

The North China Daily News says: It has been learned on good authority that Yung Lu, the real ruler of China, and the man who is reported to be responsible for the murder of Professor Huberty James of the Pekin university will centralize the command of the military forces of the empire, or at least the provinces north of the Yang Tse, under himself and his henchmen, Yuan Shih Kai and Tung Fuhsiang. The plot for the simultaneous murder of foreigners in 1900 failed owing to the unwillingness of so many viceroys and governors to carry out the order telegraphing them. On the next occasion the order is to be sent to the military officials, whose implicit obedience may be relied on. The maxim impressed on military officials is, "superiors can do no wrong, subordinates have no concern with the morality of an order, nor with the consequences following odedience to it."

A correspondent of the Shanghai paper says: "A census of Christian converts has been carried out, and neighbors are to be held responsible for an exact declaration as to all friends of foreigners in each group of ten families."

From other sources the paper learns that threats are being made in several provinces against foreigners, such as, "next time not one will escape," which is current in Shensi; 'we will not leave one ocean demon alive in Shensi and Kangsu," the boast of Tung Fuhsiang's regiments; and "the friends of foreigners will hereafter suffer for it," a Taoist threat in Honan.

The North China News, in the course of a long article headed "A note of warning," says: "It is an anxious time for the diplomatic body at Pekin. The strenuous efforts of Yung Lu to concentrate all power in his own hands and those of his henchmen, the dispositions that Yuan Shih Kai is making of his own well drilled and well armed troops round the capital and at Shan Hai Kuan, the energy with which arming and drilling, especially of the Manchu troops at the capital are being pressed on; the activity evident in the arsenals and powder factories of the empire; these movements are all compatible with the truth of the alarming rumors that reach us from the Northwest. Are we walking over treacherous ashes under which the fires are still burning?"

The disturbance in West Chekiang continue. The insurgents who were defeated by the troops sent against them, rallied and cut up the regulars so badly that they retired to Yenchon to wait for reinforcements. A thousand imperial troops were sent, and the insurgents took to the hills. The inhabitants of Yenchoufu prefecture and districts near by were pillaged, churches, chapels and houses of converts burned. The flames could be seen for miles, and the roads leading to Sangchow were dotted with thousands of men, women and children of the better classes fleeing for refuge. The insurgents number 2,000, and many were joining their movement.

Great Britain, Germany and Italy have sent a joint reply to Minister Bowen, refusing to accept the proposal that all the countries having claims against Venezuela should be placed on an equality with the three co-operating powers. This leaves out France and other countries.

Two deaths occurred in the Galician settlement north of Strathclair recently. One man was lost during a blizzard and was not found for three days, when he was discovered frozen to death. The other fell through an air hole in one of the lakes and was drowned before help reached him.

A cable says: In the first chamber at The Hague, on Jan. 29, it transpired that Andrew Carnegie had offered $25,000 to found a library for the international tribunal Senator Rahusen eulogizing Mr. Carnegie for the offer, demanded an explanation of the rumors that the offhad been refused.

The Cedric, the latest addition to the White Star fleet, and the largest steamer in the world, is completed, and left Belfast on Jan. 30 for Liverpool, to prepare for her maiden voyage to New York early next month. This huge vessel is 700 feet long, and is the second steamer to exceed 20,000 tons, her sister ship, the Celtic, being the first. The Cedric will have accommodation for 3,000 passengers, but as she has not been built for speed, will not attempt to lower the Atlantic record.

An unknown man was killed in the most horrible manner by the A. T. R express near Lennoxville, Ont., on Jan. 29. The victim's hand was found near Lennoxville and at Waterville, four miles further on, his body was found. He had been dragged till his body was torn to pieces.

Thomas Porter was killed while coupling cars at Neepawa on Jan 27

STOPPED THE STORM.

The Snow Was a Little Too Heavy to Suit the Actor.

"Mechanical devices are now made wonderfully real on the stage," said the old stock actor. "It hasn't been so many years ago since even the simple device of depicting a snowstorm was regarded an achievement. I remember on one occasion I was out with a company playing repertoire and in one melodrama—I don't even now recall the name—I took the part of an old man whose daughter, the heroine, had been abducted. I was supposed to be blind, and my strong scene was in the third act, when I went out into a snowstorm in search of my daughter. She was lying in a drift, and as I hobbled across the stage I kept crying: 'Me che-ild! Where is me che-ild?'

"Well, it was early in the season and the play was the first attraction at that theater. The scene painters had been at work and had dropped several paint brushes, hammers and other articles into the sheet that held the snowstorm. As the stage hands in the flies shook the sheets to make the snow come out a couple of hammers came down and just missed me by an inch. I was blind and didn't dare to look up, but when a monkey wrench just grazed my temple I had presence of mind enough to yell: 'See yonder moon! The storm is over!' The stage hands took their cue and let up on me, and the audience never stopped to question how a blind man could see yonder moon."

About Volcanoes.

Few persons have any idea of the prodigious quantity of lava and hot ashes which a volcano in a state of eruption can vomit in a few hours.

The matter which was discharged in 1669 from Mount Etna and which threatened to overwhelm Catania forms a mass the extent of which has been estimated as being not less than 1,000,000,000 cubic yards.

From the immense crater of Kilauea, in Hawaii, there was vomited in 1840 during a single eruption a mass of lava equivalent to fifty times the volume of earth which it was necessary to remove in order to form the Suez canal.

In 1873 the Skaptar-Jokull, one of the most redoubtable volcanoes in Iceland, sent forth two rivers of fire, one of which ran along a valley for eighty miles, its depth along the entire distance being thirty yards. Finally, it is estimated that from the mass of stones and ashes which were discharged in 1883 from Krakatoa could be formed a mountain higher and wider than Mont Blanc.

An Old Time Remedy.

In the ice chest of a Germantown residence there are always lying four or five big keys. This is because the nose of the little son of the house bleeds every few days, and nothing stops the hemorrhage like the dropping a large, cold key down the child's back, says the Philadelphia Record. He squirms and cries out before the shock, and then in a moment he is well, his nose stops bleeding. A physician said that the cold key remedy for the hemorrhage of the nose was as old, he supposed, as keys themselves are. "It is a very good remedy," he went on, "and its curative power is due to the shock it gives. But isn't it an odd thing to use—a cold key? Almost as odd, to my mind, as the candle with which some persons tallow their noses when they have a cold. But the candle remedy does no good, so far as I can see, whereas the key remedy is one of the best in the business."

He Didn't Take the Hint.

Chicago once had as its superintendent of city schools a bachelor named Howland, whose gruffness of manner and love of neatness were proverbial. Going into the room of a young and attractive teacher one day, Mr. Howland took notice of an untidy desk and a carelessly arranged bookshelf, and, pointing his finger at them, queried brusquely:

"What kind of a housekeeper do you think you'd make?"

"Why, Mr. Howland, are you looking for one?" was the humorously quizzical reply.

His Grace.

Bishop Wilberforce used to tell a story of a greedy clergyman who when asked to say grace looked anxiously to see if there were champagne glasses on the table. If there were, he began, "Bountiful Jehovah!" But if he saw only claret glasses he said, "We are not worthy of the least of thy mercies."

Have Some Municipal Ways.

"Your town is getting to be quite a city, isn't it?"

"Well, I don't know. Sometimes I think we're a city and sometimes I don't. We wear swallowtail coats at evening parties, but we haven't had a street car strike yet."

A Problem of the Present.

Hortense—Papa is so pensive today! Perhaps he is wondering how he will get along without us after we are married.

Helen—More likely he is wondering how he will get along with us until we are.—Brooklyn Life.

No Ear For Music.

"How do you like the music, Mr. Judkins?" said Miss Parsons.

"I'm sorry, but I have no ear for music," he answered.

"No," put in Mr. Jasper. "He uses his for a pen rack."

Capacity.

Nothing will give permanent success in any enterprise of life except native capacity cultivated by honest and persevering effort. Genius is often but the capacity for receiving and improving by discipline.—George Eliot.

WIRELESS SYSTEM

RIVAL INVENTOR SAYS IT IS NOT FEASIBLE.

Count Arco, of Berlin, States That Coast Stations Will Interfere With Sound Waves, and Doubts Whether Trans-Atlantic System Will be a Success.

A cablegram from Berlin says:—Count Arco, well known as a partner in the Slaby-Arco wireless telegraph system, has given a highly interesting interview to the correspondent of the Berliner Tablet. He expressed great doubt as to trans-Atlantic communication being satisfactorily established. Owing to the difficulties of keeping the pace up a continuous and perfectly distinct series of waves would be necessary. He stated in view of the number of stations along the coast this would be impossible on account of their interfering with one another.

Asked about Marconi's claim of a universal monopoly, Count Arco replied: "In this Mr. Marconi has not yet succeeded. At present there are 100 land and floating stations of the Marconi system, while there are 110 of ours. If we add to these, the Siemens Braun, and a few of the French methods in use, we find the Marconi stations out-numbered.

Count Arco denied that the Marconi system prevailed even upon British warships, it having been found too expensive, and having been condemned by Captain Jackson. As for the system adopted by Mr. Marconi with commercial ships, his company supplied the apparatus and a telegrapher, but charged five pence for each word sent and received. Count Arco said that the attitude of the United States was neutral. At the coming conference on wireless telegraphy, it should be insisted upon, he added, that any station called should reply. This is imperative in the name of humanity; for instance, in cases of ships in distress at sea. There should be an agreement upon the matter of the installation of international stations at the most important points on the globe.

WHEAT RAISING COMPANY.

Over Twenty Thousand Acres to be Secured in Assiniboia.

London, Feb. 4.—The prospectus is widely advertised of the British Canadian Wheat Raising company, with a capital of $1,000,000, divided into 200,800 shares of $5 each. There are 90,000 shares held in reserve. The vendor, J. Richard Browne, of Montreal, takes 60,000, and the remaining 50,00 are now offered to the public. The object is to acquire 20,026 acres in Assiniboia, held under a government grant in perpetuity. The company estimate at least 30 bushels per acre, allowing for the cost of cultivation and threshing. It is anticipated that the net profit will be $130,000 per annum at a selling selling price of 60 cents per bushel. The directors are J. Richard Browne, of Montreal; C. H. McHenry, chief engineer of the Canadian Pacific railway; T. Mayne Daly, of Winnipeg; J. U. Gregory, of Quebec; William Johnston, of Winnipeg; Hugh R. Cameron, of Winnipeg; Mr. Casgrain, of Montreal. Two others will be elected by the English sharehalders after the alotment. The presence of Mr. McHenry on the board is taken to indicate that the company will work in conjunction with the new Canadian Pacific freight service. The company will start planting in April. The Pall Mall Gazette notes that the company is registered in Ontario and not in England, thus escaping the inconvenient provisions of the companies act of 1900, with its stringent regulations as to public disclosures.

MURDER IN NOVA SCOTIA

Body of a Young Man Found Near the Vill ge of Advocate.

A dispatch from Halifax, N.S., says: The third murder in this province within a few months has now occurred in Cumberland County. The Advocate beach extends a mile or more in front of the village of Advocate. The community was shocked on the morning of Feb. 3 by the discovery of the nude body of a young man. Wesley Millbury, of that village, who has been missing several days, was found lying on the beach near the cliff, which is of great height all along the cape.

On Wednesday night last near the Cape D'or copper works, during a drinking bout, several men got into a quarrel, and one of the party made threats that he would kill Millbury. The young man became alarmed and ran away. A little later Millbury, accompanied by George Baxter, of Canning, seems to have gone along the road near the edge of the cliff, and that was the last seen of the young man alive.

The body when found was swollen and otherwise disfigured. One leg was broken at the ankle, the back of the head crushed, and there was a hole in his side an inch in circumference.

In six hours after leaving Yarmouth the fishing boat Tantallon returned recently with 105,000 herrings, caught after the nets had been only forty minutes in the water.

A lock of the Duke of Wellington's hair brought $20 at a London auction the other day.

Toronto's public library contains 127,000 volumes.

NEWS NOTES

Short Items Culled From Telegraphic Dispatches.

A civil war has broken out in Honduras.

The British parliament has been called for February 17.

King Edward is suffering from an attack of influenza.

The contractors for the new palace hotel in Toronto are in difficulties.

The Bamfield Creek, B. C., cable station is said to have proved a failure.

Britain is wearying of the Venezuelan blockade and the alliance with Germany.

The First National Bank of Cambridge, Illinois, was robbed of $10,000; the citizens captured the robbers.

An organization has been formed in Ottawa to prevent any changes in the simplicity of Methodist church worship.

Armed burglars committed a bold robbery in the village of Shakespere, Ont.

Richard Vergauwen, a Belgian, has proposed to establish a colony of his countrymen in the Northwest.

The Dominion government is expected to subsidize the Marconi company for the building of stations on the Lower St. Lawrence and Gulf.

Three children have mysteriously died in one family at Laurier. Whether death was caused by accidental poisoning or diphtheria has not as yet been ascertained, but an investigation is being asked for by the citizens of the town.

Smallpox has made its appearance in Binbrook township, Wentworth county, Ont. Three or four members of Mr. James Stewart's family have the disease, and the school has been closed, the teacher being a boarder at Stewart's abode.

Mary Ann Mills, the oldest woman in Canada, died at her home in Woodham, Ont., on Feb. 3. She was in her 115th year, having been born in the county of Armagh, Ireland, on October 18, 1288. With her husband she came to Canada in 1857. Up to within a few months ago she was very bright and active.

A dispatch from Washington, D.C., says the senate has passed without objection or discussion the Elkins bill to further regulate railroad transportation. Briefly the bill imposes a fine not exceeding $20,000 for the giving of rebates on published freight rates by a railroad and the receiving of a rebate by any person, firm or corporation, is also subject to the same fine.

Amelia Sach and Annie Walters, "baby farmers," were hanged at Holloway jail, London, on Feb. 3. The women were recommended to mercy on account of their sex, but the home secretary was unable to grant the reprieve usually accorded. The women walked to the scaffold unaided and displayed remarkable fortitude. No woman had previously been hanged in England since March, 1900.

At St. Thomas, Ont., on Feb. 3, Robert Foster, found guilty of impersonation at the Liquor Act referendum, Dec. 4 last, was sentenced to one year's imprisonment in the common jail without hard labor, and to pay a fine of $400. Secretary Banton and William Walsh were each sentenced to a year's imprisonment for attempted ballot stuffing. None of them were in the city.

An accident which resulted fatally occurred at Coal Creek mines. Frank Missanelli, an Italian, who was employed at dropping cars to be loaded at the tipple, in some unaccountable way got caught between a moving car and the planking on the upright supports of the tipple, and was crushed to death.

It is announced that a new international news agency, with headquarters at Brussels, and sending British and continental news to Canada, will shortly be established. Some time ago Neils Girow, a Dane, took up the matter, and has succeeded in interesting capitalists. The capital of the new venture will be $1,000,000, of which $40,000 will be subscribed in Canada. The Dominion will be represented at headquarters by a Canadian, who will act as censor of Canadian news. The service will be inaugurated on the last night of the present year.

A shocking accident occurred at the Grand Trunk freight yards at Brantford on Feb. 3, when Alma Smith, the ten year old daughter of Mrs. Lucy Smith, George street, was run over and killed by a freight car. The little girl, in company with her little brother was engaged in picking up coal on the G. T. R. track when she attempted to run under one of the cars, and at the same instant an engine shunted the entire train. The girl, who was in a crouching position, was knocked down by the wheels which passed over her face completely crushing the head.

A dispatch from Grand Forks, N. D., of Feb. 4, says: J. N. Salisbury and Ellen J. Nichols were married here last evening. The bride was the defendant in a $6,000 damage suit for the alienation of a husband's affections, brought by Mrs. Salisbury No. 1 during the January term of the United States court here three weeks ago. Mrs. Salisbury No. 1 applied for a divorce some time ago, and the decree was filed here yesterday morning. The suit was settled by the payment of the full amount of the claim by Mrs. Nichols. The marriage has caused a sensation here, as the interested parties were prominent. They left the state at once for Washington, where they will reside.

CABLE GOSSIP.

NEWS OF THE WORLD'S METROPOLIS.

Lord Balfour of Burleigh Says the Anglo-German Agreement is Only a Temporary Affair For a Specific Purpose—Other Interesting Items.

London—Lord Balfour, of Burleigh, secretary for Scotland, in a speech at Edinburgh, was the first cabinet minister to discuss Anglo-German co-operation in Venezuela since the crisis became acute. He said it was not an alliance for defensive purposes; extending for a great length of time and for all the interests of the two countries, but was a mere casual co-operation for a specific purpose and for a limited time. He had not the slightest doubt that the compensation will be satisfactory to Great Britain, will be satisfactory to Germany, and the speaker was confident that this compensation will prevent any breach of the existing good feeling between Europe and the United States. It was best for the peace of the world that Great Britain and Germany should have acted together.

* * *

Lord Strathcona publishes in the papers a long detailed analysis, showing the effects of the preferential tariff and explaining the disparity between Canadian imports from the States and Britain's claims, by figures, showing that the preference has resulted not only in arresting the continuous decline of Anglo-Canadian trade, but is stimulating the same. If the British manufacturer has not fully availed himself of the undoubted advantages, it is not the fault of the Canadian government or the preferential policy.

* * *

The colonial representatives in London are urging the war office to revise the methods of army contracts representing that as forms for meat contracts in South Africa are not obtainable in Canada or Australia it is impossible to send colonial tenders. It is urged that in order to secure real competition the war office must issue conditions of contract, and the tender forms should give sufficient time to enable Canadian and Australian contractors to tender direct.

* * *

Regarding the new imperial food supplies the company has announced that a subsidiary company has been successfully floated at Cape Town, the capital being $450,000, which will commence operations immediately in frozen meats and other produce.

* * *

Lord Aberdeen continues to take the keenest interest in Canada. He reads a paper at the Society of Arts on February 10, on "Women in Canada," Lord Courtney presiding.

* * *

The chancellor of the exchequer, Mr. Ritchie, addressing his constituents at Croydon, gave a promise of some reduction of taxation in the next budget, but he said much must not be expected. South Africa still entailed an enormous expenditure in interest on the war loans, the maintenance of the garrison and the payment of the compensations, which he feared would amount to much more than had been supposed. "But whatever may be the cost," he said, "our undertaking must be fulfilled with generosity under this head, as it will greatly tend to the reconciliation of our former enemies."

* * *

It is announced that on February 1 the whole of the British forces in South Africa, from the Zambesi to the Cape, will be under a single and supreme command, to which General Lyttleton will be appointed, with his headquarters at Pretoria. This step is regarded as an important innovation, and as significant of the intention of the imperial government to treat South Africa as a whole, and as giving a strong probability of a similar political arrangement at some future date. It is also held to point to the future transfer of the centre of power from Cape Colony to the new colonies.

* * *

Reinforcements of troops have been ordered to sail from India for Aden, Arabia, with the object of strengthening the British garrison there, in consequence of the increase in the Turkish forces in the disputed Hinterland. No conflict, however, is anticipated.

* * *

Though there is no immediate intention to extend to the metropolis the movement for the abolition of barmaids initiated in the north, the leading temperance societies with headquarters in London confess that they would be glad to see an end of the custom of employing females in bars. Their work toward that end, however, is in the way of evolution rather than revolution. They work among the girls themselves seeking to make them abstainers, and where possible, to induce them to adopt some other pursuit. "We believe," said the secretary of the British Women's Temperance association, "that we shall show that the length of time a girl can work as a barmaid does not exceed five years, and that after she has ceased to be young and attractive she is not wanted. We hope that that knowledge will induce sensible girls to look for other means of livelihood."

A dispatch from Chatham, Ont., says a gusher rivalling the Gurd well, was struck on Jan. 28 by the Chatham Oil company on Edwards' farm, Raleigh. The strike was made while experimenting at a greater depth. Oil spouted fifteen feet higher than the derrick and much was lost. The well was eventually capped.

THE NEWS IN BRIEF.

Telegrams and Cablegrams Condensed for Busy Readers.

A branch of the British Navy league has been organized in Winnipeg.

Dominion public works expenditure for the year amounted to over $6,700,000.

Ohio delegates, representing seventy-five families, have arrived in Winnipeg.

The Quebec and Hawkesbury railway may be purchased by the Canadian Northern.

Latest estimates indicate that 20 persons were killed and 50 injured in the Graceland, N. J., collision.

Prince Wolfigang, of Prussia, committed suicide in a forest while on the way to the death bed of his father.

General Superintendent Marpole, of the C. P. R., speaks of a milion dollar improvements to be carried out on the Pacific division.

Dr. Isaac Adams says he will have no difficulty in bringing out 25,000 Nestorians to this country. He has selected what he considers will be a favorable location for them in Alberta.

Premier Roblin said in Montreal that Manitoba would make a demand on the Dominion parliament, over and above that contained in the joint memorial.

Britain will levy an income tax on Canadian firms doing business in the Old Country.

Robert Planquette, composer of "The Chimes of Normandy," is dead.

Serious factional fighting between Kaffirs has occurred in the Umzito district, 37 miles from Durban, Natal. It is reported that forty of the natives were killed.

Presiding at a meeting of the shareholders of the Great Eastern in London, Lord Claud Hamilton, the chairman, declared that the road had tried an American locomotive for a year and a half, but found it to be a complete failure.

In a rear-end collision near Cairo, Ill., on Jan. 28, between passenger trains on the Illinois Cemtral a private car in which was the body of the late Judge Fentress, chief counsel of the road, and members of the deceased's family, was partly wrecked. The coffin broke open and the passengers were severely shaken. Three trainmen were seriously hurt.

The steamer Victoria, which arrived at Victoria, B. C., on Jan. 28, from Yokohama, brought news of a serious accident at Nanking as a result of which 200 persons were killed. Dispatches from Nanking to Japanese papers report that on January 12 a portion of the Shakuan embankment in Nanking collapsed, and 200 Chinamen were buried alive.

The auditor's report on the county treasurer, A. L. Shambleau, of Kent, Ont., shows a shortage of $14,000 or $16,000 Shambleau was suspended last fall, and has since left the country.

Mr. Chamberlain was not singular in his visit to Spion Kop, for it has already become almost a place of kilgrimage. The Natal papers tell us that coach drives to its vicinity take place regularly from Ladysmith. In a word, Spion Kop, like Majuba, promises to be one of the "lions" of South Africa. The battlefields of South Africa give a sad new topographical interest to that country. It is touching to find a reference to the dead of one of those battlefields in an advertisement of a sale of land. This advertisement refers to the Spion Kop district, and lays down the condition that the purchasers of the ground must respect the graves which dot it over.

The severest sentence passed in Germany during recent years for lese majeste was inflicted on a clerk in a brewery in Breslau, who has been sentenced to one year's solitary confinement.

A case which came before the Odessa court a short time ago shows the corruption among the Russian police A man had a usurer arrested for fraudulently obtaining a large amount from him. The police inspector in charge of the case accepted about $100 for releasing the usurer on bail. The next day he intimated that for some more money he would annul the charge against him, and when the money was paid the inspector wanted $50 more. The whole affair was reported to the governor by the intermediary, and the inspector was sentenced to degradation from the service, five years' imprisonment and loss of all civil rights.

The richly decorated west front of the cathedral at Exeter, England, with its statues in niches, is to be remodelled in the interests of safety, the seven centuries old wall having shown signs of collapse. Protests from English churchmen and architects have resulted in a modification of the first plan, which contemplated the placing of new figures in the niches. The images that are not crumbling will be retained in the remodeled wall, and others will be carefully copied and restored. The famous cathedral was begun in 1230 and completed in 1371, the west front being finished last. It stands on the highest ground in Exeter and is the first structure distinguished on approaching the town.

A fatality occurred on Jan. 28 at the Ptarmigan mine, near Wilmar, in the Windermere district, B.C. Edward Wills and William Wilton, miners, drilled into a hole which had misfired at a blasting, when the dynamite remaining in the hole exploded, killing Wills outright and seriously injuring Wilton.

THE FERNIE FREE PRESS,
FERNIE BRITISH COLUMB

SATURDAY, FEB. 7, 1903.

EMANCIPATION.

It is true that we do not learn to fully appreciate the value of our ordinary every-day advantages until we are deprived of them, and the converse of that axiom should prove equally true that we do not appreciate the extent of the loss sustained by the lack of those advantages until that lack has been supplied. The recent appointment of L. R. Forbes, as the government representative for this district as published in another column clearly proves the latter principle. As the advantages that this new office will add to the town of Fernie are brought home to us we realize as we have never done before the monstrous inconveniences we have heretofore been putting up with,

It seems incredulous that the thriving town of Fernie, situated in the centre of the leading industry of the district has during all these years been controlled through a Government office located in a little village several miles from a railway. It seems incredulous that any sane Government could dare so long to cater to the wire-pulling agencies in that village and in the face of public opinion withhold from Fernie her just rights. It seems incredulous that the capabilities and political exigencies of this town should in the past have always been viewed by the Government through Fort Steele spectacles. Truly we are thankful that we have been freed in a measure from this unreasonable and unrighteous bondage, but alas, we have no one to thank, for the strong, vigorous youth grew into a mammoth giant and the leading strings held by the weakening hands of his foster parent suddenly snapped and left him free.

Let us review some of the advantages acruing from the newly created office. We have our own Stipendiary Magistrate Mr. Armstrong who has filled this position in a most creditable manner will feel more relief over this appointment than any other individual as it has caused him many trips often under most inconvenient circumstances. To the people of Fernie it means that no case need wait for trial, as our Stipendiary Magistrate will be available not only once a week but at all times. Should a case be adjourned on some trivial point it can be resumed on any day to suit the parties involved and a whole week need not pass as was necessary under the old regime.

As provincial Revenue Collector Mr. Forbes reports direct to Victoria. All the monies contributed by the Fernie electoral district towards the revenue of British Columbia will be shown under its proper heading and not, as previously, under the heading of the Fort Steele District. This advantage will certainly lead to others as it will bring convincing argument in the form of figures to prove to our legislators at Victoria the ever-increasing importance of the district.

At last a marriage license can be issued in Fernie. Think of it, heretofore these important and necessary documents could not be obtained this side of Fort Steele! We have in our mind concrete examples where much inconvenience and expense were involved in delays caused by the want of an issuer of marriage licences in Fernie. Mr. Forbes has also the power to perform the legal marriage ceremony.

By the appointment of a deputy registrar office for births, deaths and marriages, a long felt nuisance is obliterated. We no longer require to send to Fort Steele for a form and upon its receipt fill it out and send it back again. A call at the office now and the requirements of the law in this respect can be fulfilled in a moment.

The appointment of a deputy mining recorder for the Elk River valley cannot fail to meet with the approval of all interested in prospecting for mineral claims. The jurisdiction of this office is wisely contailed by other deputies on the south and north, making it comparatively easy to reach a recorder's office.

The addition of another coroner will relieve the others who are often overworked.

We are told by some contemporaries that we must not call the new appointee a Government agent. Well, we will not quarrel about that. The only practical difference is that in two respects the office is a deputy, and the gold commissionship is withheld. The latter while being an important office has seldom much practical bearing on this town. Therefore call it what they may we gratefully accept all that is coming and expectantly look for more.

THE UNION LABEL.

Some time ago the FREE PRESS was in receipt of communications from the Federal Labor Union, the Gladstone Miners' Union, and the Bar-tenders' Union requesting that we secure the union label for the FREE PRESS.

Being in sympathy with commonsensed unionism we at once made application to join the Typographical Union at Nelson, and received in answer a letter stating that Fernie was outside the jurisdiction of Nelson or any other such union and that a local organization would require a membership of seven.

The Fernie labor unions were therefore instructed that all possible efforts had been made by this paper to secure the union label and without success and it is only reasonable to suppose that this explanation would be sufficient to justify our position in the eyes of the different labor organizations of the town. While the unions as a whole have doubtless accepted our explanation as satisfactory we know of some individuals who are still harping on the same string and in case the matter has never been made clear to them we publish the letter received from the Nelson Typographical Union.

Nelson, B.C., Dec. 18th, 1902.

J. R. Wallace,
Fernie, B.C.

Dear Sir :—Referring to yours of the 14th inst., re the union label. I beg to state that the only way in which you can secure the union label is to have the men organize in your locality, as you are too far from any local union and out of their jurisdiction.

It takes seven journeymen to secure and hold a charter from the International Typographical Union, and if there are that number of journeymen in Fernie, I would suggest that they organize at once and secure the label for the office in your city.

Yours truly,
L. W. ACKLEY.
Secy. Nelson Typographical Union, No. 340.

RAILWAY WAR ENDED.

Mutual Concessions Made By the C. P. R. and Great Northern.

The ending of the fight between the Canadian Pacific and the Great Northern which is now announced, assures many miles of railway construction, both in this province and the state of Washington, and will remove an obstacle to the building of the line from Midway to Vancouver. This is the main object of the Great Northern, and it will push its line westward from Midway, passing to the south of Okanagan lake, and crossing the Fraser river on the new bridge which is now being constructed, and thus give Vancouver the competitive line long wished for.

By the terms of an agreement announced in Seattle, these railways waive their rights to individual territory heretofore respected, so far as it was impossible for one to invade that of the other, and in the settlement the Canadian Pacific is to enter the wheat fields of Washington, to secure a share of the increasing tunnage, and the Great Northern is to webtrack the Canadian Pacific's territory in British Columbia from whatever point it may wish and to where it can secure a franchise without the latter's interference.

The fight which has been going on between these two lines for the past two years has been as fierce as has ever been known in the Northwest. It has resulted in the construction of many miles of of track by both companies which will, now that the matter is settled be rendered useless. However, other lines are to be built by both roads, the Great Northern in British Columbia and the Canadian Pacific in Washington.

Some three weeks ago Sir Thomas Shaughnessy, president of the Canadian Pacific, visited Eastern Washington and on his return to Montreal gave out the statement that the trouble between the two roads had been settled, and said, in effect, that his visit to the state of Washington was for the purpose of arranging for the building of branch lines which will give his road a portion of the grain trade of that section.

Under the terms of the agreement the Canadian Pacific is admitted into the territory of the Great Northern over the latter's branch from Bonner's Ferry Idaho, to Kuskonook, which latter town is on the Crow's Nest branch of the Canadian Pacific, thence over the main line of the Great Northern to Spokane. From Spokane the Canadian Pacific is privileged to build to whatever point in the state of Washington or to the eastern Washington wheat fields that it may see fit, but as yet there has been no statement made officially as to where it will go.

The agreement renders useless the Bonner's Ferry-Kuskonook branch of the Great Northern, which was built at a time when the flight was on, and to insure the Great Northern an entrance to the Crow's Nest Pass coal fields and into the mining territory of the Canadian Pacific in the Kootenay district. It is not improbable that this line will now pass into the Canadian Pacific and become part of the entrance into Washington until such time as a more direct line from the main system can be constructed.

In return for this the Great Northern gets the privilege of constructing any lines it may see fit in the Crow's Nest Pass fields to connect with the line from Jennings, Montana, to Gateway, the subport on the Canadian line. This will permit the Great Northern to continue its policy of developing the Crow's Nest fields to almost any capacity it may desire by opening up mines at different points, to where it will construct branches.

A. J. McGuire & Co. who had charge of the sawmill last summer up Gold Creek, are now operating a coal property some four and one half miles from Cowley. They have been mining and shipping domestic coal to Macleod and Rossland points, several carloads having been sent out this winter. If the C. P. R. makes the proposed change in its line near that place their tracks will pass directly over this coal property, thus greatly enhancing its value.—Frank Sentinel.

A SENSE OF RELIEF

is experienced as soon as properly fitted

Eyeglasses or Spectacles

are worn. Eye strain removed, headaches will disappear and things before seen dimly will stand out clear and distinct.

An eye test will cost nothing. Made free here by a graduate

OPTICIAN

who uses modern scientific instruments. Glasses will cost very little as our prices are moderate.

Dated at Fernie, B.C. this 28th day of Jan. 1903

Infringement of a Trade Mark

In an action in the High Court of Justice for Ontario, recently tried before Chancellor Boyd, at Toronto, the Slater Shoe Co., and Chas. E. Slater, president of Montreal, makers of the famous Slater Shoe, obtained a judgment forever restraining F. C. Wilkinson, a boot and shoe dealer, of Owen Sound, from advertising, exposing, or offering for sale or selling boots or shoes not made by the Slater Shoe Co., as "Slater Shoes," "Slater Goods" or the Slater Shoe." The Chancellor, also ordered Wilkinson to pay the heavy costs of the action. The Chancellor, after hearing the evidence, decided that no one except the Slater Shoe Co., had a right to use the name "Slater Shoes," "Slater Goods," "The Slater Shoe," or any similar names in connection with boots and shoes, and that Wilkinson had no right to use any name or names in connection with boots and shoes which might enable him to pass of a shoe not of the company's make, as being of their make, nor in any way to reap the benefit of the reputation which the Slater Shoe has acquired throughout the Dominion of Canada.

The Genuine Slater

Is positively the best shoe value offered for sale in Canada. You may include the United States and that will pretty near cover the world for fine shoe making. There are shoes sold elsewhere at $4 50 and $6 a pair that carry no more style, are no better fitting and will not wear as well as the genuine Slater Shoe at $4. "Why is it?" you ask. "Just because they are branded with an American stamp."

LOCAL AND GENERAL.

F. J. Mitchell's tweed suits run from $23 to $28 x

Mr. and Mrs. S. W. Gebo, of Frank were in town this week.

Fred Cuthbert is down to Lethbridge and Great Falls this week on business.

Mr. R. Coulthard is spending several days at Michel this week.

The snow shoe club had a pleasant tramp to Coal Creek on Monday evening.

H. H. Trites who has for more than a week been laid up at the hospital with pneumonia is now recovering.

Mr. E. Wrigglesworth left on Thursday morning for the coast where he will visit friends for a couple of months.

Grand Hospital ball on 17th. The object is a worthy one and the affair will be a great success. Don't forget the date.

Mrs. E. Todd has bought the Douglas block. This property will be remodelled and put in better shape for running a large fancy store.

The Junior Hockey Club leave for Macleod and Pincher Creek to-morrow night. They play Macleod on Monday and Pincher on Tuesday.

Frank Dunn, bar-tender at the Royal returned from a trip to Ontario on Wednesday morning. Frank is looking well after his holiday.

A. Hood who went to Frank some time ago to work in the mines there, received severe burns by touching off a pocket of gas while driving narrow work.

Mr. John Watson, first assistant of the Cranbrook school, is visiting in town this week. The school is closed in that town owing to the prevalence of diphtheria.

The Ladies Hospital Auxiliary are giving a grand ball on Tuesday evening, Feb. 17th. The proceeds are in aid of the Fernie Hospital. Everybody will be there. Tickets $2.

Mrs. Tonkin and daugeter arrived home last Saturday night from Pennsylvania where they were visiting friends. They were accompanied by Miss Fry, Mrs. Tonkin's sister, who will visit here for a time.

The 17 month old child of Mr. and Mrs. McKinnon, which recently was severely scalded by falling into a pail of hot water is recovering nicely and the injuries are not so serious as at first thought.

J. Baker, representative of the Western Federation of Miners, was in town this week attending a meeting of the District Miners' Union. Representatives from the three camps were present and matters of importance were discussed.

The "Angels" have got the hockey fever. They hereby challenge the winners of Thursday evening's game or any other aggregation of married men outside the senior team to a match. Proceeds in aid of Relief Fund.

Mr. Wm. Hawthorne while employed at decorating the Princess Hall for the dance on Wednesday received a fall from a considerable height caused by a defective ladder. He luckily escaped with a sprained foot and wrist which kept him in for a day or two.

E. H. Bird, Treasurer of the Fernie Relief Fund, acknowledges receipt of the undermentioned subscriptions. People of London, England, through the Lord Mayor, $267.66, St. James church, Vancouver, forwarded through Rev. C. W. Houghton, $60, making a total of $327.66.

Mr. and Mrs. Stork and Douglas arrived from the east yesterday and their many friends are welcoming them back to our midst. Mrs. Stork has been visiting friends in Ontario since last August while Mr. Stork did the east in about five weeks.

Comrade E. Neale, of Fernie, is a visitor in the city, and may remain here. He says the socialist movement is making great strides in the coal mines capital. But there, as other places, an organizer is needed to get the boys in line and start them working along systematic lines.—Western Socialist, Vancouver.

J. L. Gates, the genial proprietor of the Victoria Hotel, returned from a five weeks' visit to Ontario on Tuesday evening. Mr. Gates found many changes about the home of his youth in Harriston and he reports having had a very pleasant visit. He was accompanied back by his sister who will visit her brother at the Victoria for some time.

On the evenings of the big games between the Victorias and Montreal a large number of enthusiasts gathered at the Royal Hotel to hear the results. Several despatches were brought over by the messenger boy during each game giving the play in detail. On Wednesday evening about nine o'clock when it became definitely known that Winnipeg would have to come west without the cup general disappointment was expressed by all.

List your properties for sale with F. J. Watson. x

Elliott's edge tool repair shop, east half Turner block, lance tooth saws gummed, all kinds of saws filed and sett, razors, scissors, tailor's shears, knives and surgical instruments put in first class order. Satisfaction guaranteed, charges moderate. x

Your credit is good at B. C. Furniture Co. "Nuff Sed." x

Constable Dow has been transferred from Elko to Wardner.

M. P. Van Hulle is erecting a new barber shop between the shooting gallery and the Northern Hotel.

Elliott's home made bread delivered 5 loaves or more daily for the straight price 10 cents a loaf. Try it. x

Piano Tuner—A practical piano tuner, Mr. James R. Muir, will attend to all orders left at F. J. Watson's.

Medicine Hat hockey club goes to Rossland next week to take part in the carnival. Milt. Kastner our crack player will have a place on the team as will also W. Barber, of Calgary, and formerly of this town.

The Weather

Fernie has during this week experienced the coldest and most prolonged snap this winter. The mercury hovered around zero and occasionally fell several degrees below. The weather is now moderating.

Presentation

On Tuesday ovening the Ladies' Aid of the Methodist Church presented Mrs. H. Wilkes with a beautiful lamp, and the Sunday School, of which Mr. Wilkes is Superintendent, presented him with a handsome arm chair.

Another Petition

A petition has been circulated about town asking for an hotel license in the name of Phillip Carosella. His building on Victoria Ave. north will bear the sign "The Rome" should the commissioners see it in the same light as their petitioners.

Relief Fund Still Growing

Rev. C. W. Houghton handed over to the Relief Committee this week a cheque of $60 recently contributed towards the Relief Fund by the congregation of the St, James church, Vancouver. We are glad to learn that this worthy cause is not yet dead.

A Logger Hurt

A man named J. Scott was injured while engaged in logging in the woods near McDougall's mill on Monday afternoon. A heavy log rolled on him causing severe bruises to his thigh. He was brought to the hospital where he was attended by Dr. Higgins. His leg is in a serious condition, the main artery having been injured. It is feared that the limb may have to be amputated.

Struck by Snow Plow

Wm. Batt was injured by the snow plow while walking on the track last Saturday. Mr. Batt saw the plow approaching him from the rear and he made an effort to reach a siding a short distance ahead to allow the engine to pass. Just as he had about gained the object he stepped on the rail and slipped. The plow caught him in the back breaking a couple of ribs and inflicting a lacerating wound. He was taken to the hospital where he is rapidly recovering.

C. P. R. into Spokane

According to the Cranbrook Herald that town will soon have direct communication with Spokane. Senator Turner and D. C. Corbin, of Spokane, and other capitalists who are projecting the new road are evidently backed by the C.P.R. The road will be built from Spokane to a point on the international boundary in Idaho about ten miles from Tochty and the C. P. R. will build from that point to connect with the Spokane line, thus giving a direct route from Cranbrook to Spokane. This road will be built this year.

A Correction

We have been assured by different officers of the Miners' Union that the report published last week to the effect that a motion had been made in the union that some $500 remaining of the amount subscribed by the Western Federation of Miners towards the relief fund be turned into the general fund is incorrect. It appears that this money was until recently mixed up with the general funds and the motion in question was made to separate it so that it could be better devoted to its original purposes.

Pincher and Fernie on Monday

The Pincher Creek hockey club had agreed to play their postponed game with Fernie yesterday but on Thursday our secretary received a wire to the effect that three of their players were laid up and requested a later date. This was agreed to and the big match will be pulled off on Monday. The locals believe they can defeat the big fellows from the prairie on our own ice and with a full team. At any rate they intend to make a strong effort and the best game of the season is anticipated for Monday afternoon.

New and second hand household goods bought, sold and exchanged, highest cash price paid at B. C. Furniture Co. x

Show Coming

Wilson's Big Company is coming to Fernie next Friday and Saturday evening. Of the performances the Brandon Daily Sun says:—

The opera house was packed to the doors last night to hear Wilson & McPhee's "Uncle Tom's Cabin company. Uncle Tom and Little Eva created as much interest as ever, while Marks, the lawyer, and George Harris came in for plenty of sympathy from the little folk, who are always charmed with their old time favorite. Simon Legree, St Clair and Miss Ophelia were very good in their respective roles. To-night the company puts on "Ten Nights in a Bar Room," another old favorite, with new scenery.

Wanted—Several dwellings to rent at F. J. Watson's. x

The Fernie Orchestra has decided to discontinue its fortnightly quadrilles, as they are no longer sufficiently patronized to justify their continuance.

Commencing Feb. 9 Miss Gobbett will hold the kindergarten class on Howland Ave., opposite the public school. Hours 9:30 to 12 o'clock. Terms: $2.00 per month in advance. x

Handsome bills placed conspicuously around town announce the big carnival at Rossland from Feb. 11th to 14th. About $1200 has been contributed by the enthusiastic citizens towards the fund and the affair promises to be a great success.

We must call attention to an error in F. J. Watson's ad last issue. The death losses and cash interest income for 1902 of the Mutual Life of Canada were given as the same. The correct figures are:—The death losses, $210,696, and cash Interest income, $275,415.

Methodist Church

Rev. F. Brown, of Michel, will preach here next Sabbath morning and evening. Special music will be rendered by a double male quartette. The Choir is preparing for a social service of song in the near future, and invite any members of the congregation to assist in the practices every Wednesday evening.

DISASTROUS FIRE

WOMEN AND CHILDREN ARE BURNED TO DEATH.

Fire Visits the Newly Established Colony of Finns on Malcolm Island, B. C.—Eleven People Perish—Fire was Caused by an Overturned Lamp.

While a meeting was being held in the third storey of the public hall of the Malcolm Island Finnish colong on Thursday evening, Jan. 29, fire broke out in the second storey, which like the floor below, was devoted to living apartments, of which there were 24, to accommodate families awaiting the arrival of lumber to build individual homes. The majority attending the meeting escaped through the skill of Director Murika in averting a panic, but the tinder-like structure burned so quickly that eleven lives were sacrificed.

The dead are:

Mrs. H. Hermanson and four children.

Mrs. Lefbacka and two children.

Mrs. Sortel.

Two daughters of August Oberg.

Many are seriously injured, chiefly by jumping from windows and the breaking through of the doors; fatal injuries being reported in the cases of Mr. and Mrs. Auber, Austin McKela, M. Nygren, Mrs. Hackeman and Mrs. Hiltonnen. The latter was preparing to lower her sick husband from the window by a rope, when it was seized by the one-legged occupant of an adjoining room, who, pushing her roughly aside, descended first.

The heroic wife drew up the rope, lowered her husband and was afterwards herself escaping when the rope burned through. She fell and her skine was broken. Dramatic and pathetic incidents are without number. The colonists have been the victims of a long series of misfortunes, of which the last is the worst. They are an educated people, fleeing from Russian oppression. None carried insurance, and the situation at the island is pitiable, there being neither clothing nor medical attendance for the sufferers,

RICH STRIKES IN YUKON.

Valuable Discovery Made on Duncan Creek—Eldorado Wealth.

A dispatch from Dawson City says: Yukon is in a fair way to again startle the world with new fields of enormous wealth. During the past two months two new districts have been developed. Duncan creek, on the Stewart river, about 200 miles from Dawson, and about 100 miles from the road to White Horse, is being rapidly developed, miles of creek bottom have been proved, and every hole has shown splendid pay. A number of men who have worked on the Klondike say the Duncan will be a richer field than this. Charles Barwell, Dominion land surveyor, who has been here for some years, says the Duncan will prove a wonderful camp. Claims are worth large sums already. Evidence is growing that this field will prove to be wonderfully rich as work proceeds. It is expected there will be a big rush there when the spring opens, and supplies can be replenished. Supplies are now being taken from Dawson over the trail at heavy expenses.

In the meantime the biggest stampede since that to Nome has begun to Tanana, about 300 miles from Dawson in a straight line, but just across the American boundary. Wonderful reports have come in regarding the returns prospectors have secured who went in last summer. Alderman Adair has an agent there, Capt. Barnett, with supplies sent in last season via the Yukon and Tanana river, who writes that the strike is the best he ever saw.

The development of two large and exceedingly rich districts in one season shows the wonderful extent of the gold deposits, and proves the statement that the Yukon has yet been barely scratched. Everything thing points to enormous operations in the course of the next two years

STILL ANOTHER.

The shaft sunk in the Eldorado struck a second bedrock 65 feet below the first bedrock, with six feet of pay gravel running as high as $25 per bucket. The strike is not far from the famous gusher, which is now under control.

The new strike knocks out all theories, opening up remarkable possibilities. Other shafts are being sunk. If a lower bedrock actually exists, the Klondike district repeats itself, judging from the pay found. It is claimed that there are still other strata below these found.

The gusher, when struck, ran a stream three feet wide and seven inches deep at the rate of 34 miles an hour.

Silver-rimmed glasses have been substituted for the old communion cups in one of the Glasgow churches.

Gold crosses and diplomas were presented by the German empress last year to 176 women servants who had been forty years with the same family.

"Do you know what this railroad cost per mile?"

"No! But I know what it cost per alderman."

All the members of the crew, numbering 24 men, of the Norwegian steamer Avona, from New Orleans, which went ashore on Jan. 31 at Lemvig, Denmark, were drowned.

If money talks the change that is coming to you must be back talk.

THE WIDE WORLD.

Telegraphic News of Two Hemispheres Briefly Chronicled.

The Quebec Southern railway is tied up by a strike.

A Berlin doctor has discovered a serum for scarlet fever.

The Winnipeg city council has selected plans for the Carnegie library.

During the year 1902 84,000 settlers came to Canada, according to revised figures.

The Victorias, of Winnipeg, won the third Stanley cup game by a score of 4 goals to two.

The Hudson Bay stores at Fort Frances were destroyed by an explosion on Feb. 2. Two employees were injured.

Lord Strathcona and other Canadians in Britain are endeavoring to secure a greater share of the South African meat contract for the Dominion.

Semi-official announcement of the new C. P. R. hotel, depot, shops and train sheds for Winnipeg have been made. The expenditure is estimated at $2,500,000.

The Northern Pacific passenger train jumped the track near Grand Forks, N. D., and passengers were badly shaken up.

A Toronto dispatch says: Crown Attorney Dewart, after hearing the evidence submitted by Mills, of personation at the referendum, has decided to lay before Chancellor Boyd at Osgoode Hall, charges of personation and other illegal acts against nine persons. This is done so that the chancellor, upon whom the authority rests, may designate a judge to try the charges. It is understood that evidence for a number of other cases is being prepared, and will from time to time be laid before the chancellor. In this way, the alleged personation conspiracy will be fully ventilated.

A fireman of a night engine from Lindsay to Midland, Ont., while cleaning his engine at the latter town, discovered in the ash pan the leg of a man and other pieces of flesh. It was learned that a man named Haddon, had left Fesserton for Victoria Harbor. The man was not seen on the track, and how the accident occurred Driver Peacock is unable to explain. The crew of a Midland way freight picked up the remains, which were taken to Fesserton, where the victim was employed in a sawmill.

The London Morning Advertiser learns that Lord Milner has asked to be relieved of his posts of governor of the Transvaal and Orange River colony and high commissioner of South Africa, but at the desire expressed by the government, he has consented to remain in South Africa until the end of July, when he will be offered a high position in connection with the government of India. Numerous rumors have been current previously in South Africa that Lord Milner would, or had, resigned, but hitherto these reports have always been denied.

Chicago Fog Leads to Crime.

A dense fog which settled down over Chicago on the night of Feb. 1 was the cause of probably the fatal shooting of one man, the wounding of another and a number of accidents in different parts of the city.

Collision of pedestrians, which the victims say, was due to the fog, led to the shooting of Patrick Walsh, probably fatally, and the wounding of his companion, Patrick Nolan, by two Italians, with whom they collided at Fulton and North Halstead streets. The assailants escaped in the mist without pursuit.

The fog seriously impeded alf traffic. Even in the downtown district the atmosphere was so misty that motormen and cab drivers experienced difficulty in avoiding accidents. Farther out, extraordinary caution was necessary to avoid collisions. Street cars moved slower than usual and elevated trains were also delayed by the fog.

An Unpopular Premier.

A cablegram from Kimberley, Cape Colony, says: Since his arrival here with Colonial Secretary Chamberlain and Mrs. Chamberlain, a series of demonstrations against Sir John Gordon Sprigg, the premier of Cape Colony, have occurred. He was publicly hissed on several occasions, and during Mr. Chamberlain's remarks on the situation in Cape Colony at the banquet given in his honor here, cries were raised of 'Away with Sprigg,' while the members of a deputation which waited on Mr. Chamberlain informed him in the premier's presence that they had no faith in the Sprigg ministry, which "pampered the Afrikander bund and was dependent on it for its existence." Sir John heatedly characterized these remarks as a personal sult.

Died From Whisky Poisoning.

A dispatch from St. Paul says: Wesley O'Brien, of Minneapolis, died at 4 o'clock on the morning of Feb. 2 because he tried to win a whiskey drinking wager.

The coroner of Hennepin county is looking for the saloon keeper who sold O'Brien the whiskey, claiming that the liquor dealer is an accessory to O'Brien's death.

O'Brien and a stranger met in a Minneapolis saloon on Sunday evening and made a wager as to who could drink the greatest quantity of whiskey.

O'Brien drank nearly a quart of the liquor. Shortly after he reached home he was taken ill and died before a doctor who was summoned could aid him.

An autopsy disclosed the whiskey in O'Brien's stomach. The saloon where O'Brien drank the liquor has not been located.

CONDENSED NEWS

A BUDGET OF IMPORTANT INFORMATION.

Items of Interest Gathered From All Parts of the Two Hemispheres Presented in Condensed Form For Busy Readers.

The House of Commons has been called for March 12.

Canadian customs receipts in January showed an increase of $237,063.

There are serious freight blockades at Minneapolis, Detroit and east of Chicago.

A new coal mine property near Deloraine, Man., will be developed this summer.

A British torpedo boat was run down during naval manoeuvres at Corfu, and thirteen sailors were drowned.

Lord Strathcona has donated $580 toward defraying the expenses of the Winnipeg bonspiel.

Over one hundred and seventy entries have been received for the Winnipeg bonspiel.

Robert McQuarrie, a workman at St. Andrew's rapids, was crushed to death in a sand pit.

The Northern Elevator company will erect forty-one elevators in Manitoba and the Territoties this year.

Glasgow engine manufacturers have accepted an additional order for engines for the C. P. R.

Brigands are terrorizing towns in the Caucausas mountains.

Sousa's band played before King Edward on Saturday evening at Windsor Castle.

William Winters, of Butte, Mont., committed suicide because his fiancee went back on him.

Brazilian and Bolivian troops are marching towards each other to settle the Acre difficulty.

The second game of hockey for the Stanley took place in Montreal on Saturday, and resulted in a tie—2 goals each. The game continued until midnight, and was one of the most stubbornly fought contests in the history of hockey in Canada.

The following special cable from London is published in Toronto. "John Tizard, a Manitoba farmer, has been sued for breach of promise by a music hall artiste whom he met at a Covent Garden fancy dress ball. Tizard admitted paying the girl some attention, but denied making her any promise of marriage, adding "I made a fool of myself." Judgement was given for Tizard, Mr. Justice Darling saying that the woman was lucky to escape without a prosecution for perjury."

A dispatch from Tangier says the sultan's troops have utterly routed the forces of the Moorish pretender, and captured Bu Hamara himself. A special courier brought the news. He reports that at daybreak last Thursday the army of the Sultan, commanded by the war minister El Menebbi, attacked the pretender's position and inflicted a complete defeat on his followers, at the same time capturing Bu Hamara.

A cablegram from Berlin says the reichstag on Jan. 31 passed the second reading of the bill prohibiting child labor in factories and shops, and prohibiting the employment of children under twelve years of age in some branches of industry, and 13 in others. The socialists attempted to extend the prohibitions to agriculture and household work.

One man in hospital and several badly cut and bruised is the result of an accident on the C. N. R. three miles west of Marchand, on Saturday afternoon. The express from Port Arthur, in charge of Conductor Glenwright, had just pulled out from Marchand about 3 o'clock Saturday afternoon when the rear coach left the metals. The car bumped along about 300 yards on the ties, and then upset, throwing the two coaches ahead of it also off. Marien Keenan, foreman of the C. N. R. bridge-building gang, was so severely injured in the smash that he was taken to the Winnipeg General hospital for treatment. A number of other passengers, of whom there were about seventy on board, were badly cut by flying glass.

A dispatch from St. Catharines, Ont., says: The inquest touching the death of Charles Warning, killed in a collision on the Grand Trunk railway between Merritton station and the tunnel under the Welland canal on January 3, was continued Saturday by Coroner Dr. Goodman. Train Despatcher Auld was not present, as he left the locality a few days after the accident, after having first called for his pay, and his whereabouts are unknown. The verdict was that Charles Warning came to his death through the negligence of Train Despatcher John Auld. It was further found that the Grand Trunk should have electric signals at the tunnel to give warning to approaching trains at least until the line is double-tracked between Merritton and Niagara Falls.

A wealthy farmer, named Martin, residing in the village of Etoy, in the Canton of Vaud, Switzerland, recently died, leaving a legacy of £25 per annum to the village authorities to be distributed among the first two boys who on leaving school wrote a faultless dictation. Another clause adds that the notice concerning the prize must be read on the last Sunday in March every year from the pulpit of the village church. The authorities have accepted the conditions of this eccentric will, and the village boys are delighted. The curious part of the affair is that the deceased, a shrewd business man, was neither able to read nor write.

WILL STAY IN JAIL.

American Ambassador fails to Secure Release of Mrs. Maybrick.

A London cable says: Both United States Ambassador Choate and Mrs. Florence Maybrick herself, recently received further rebuffs in the attempts to gain the latter's freedom. Home Secretary Akers-Douglas replied to the embassy's representations and to the imprisoned woman's appeal, that he saw no grounds for her release.

The appeals were made especially in connection with the necessity for Mrs. Maybrick's presence in the United States to testify in the Virginia lands suits in which she and her mother, Baroness de Roques, are interested. The baroness has exhausted all her means in her endeavor to gain her daughter's freedom, and is now almost penniless.

If the remission of sentence, which is generally applied in the case of life sentences, is granted in Mrs. Maybrick's case, she should be released in March. Whether this will be done seems dobtful, notwithstanding the alleged existence of a letter from Lord Salisbury to the late United States ambassador Bayard, promising that the prisoner's sentence would be remitted.

HOBSON RESIGNS.

Naval Captain of Merrimac Fame to be Relieved of Duty.

Captain Richard P. Hobson, of Merrimac fame, has tendered his resignation as a constructor in the U. S. navy. For some time Capt. Hobson has sought to retire, but the board which examined him pronounced him fit for duty, and he was ordered to duty in charge of the construction work at the Bremerton, Wash., naval station.

It is well known that for some time Captain Hobson has suffered from an affection of the eyes, which he and his friends claimed incapacitated him for active duty. A bill to retire him has passed the house of representatives, and recently when it was called up in the senate by Mr. Morgan, it was passed over an objection by Mr. Cochrill, who insisted that an examining board having pronounced him fit for duty he should not be retired.

In a letter to the secretary of the navy Captain Hobson set out the reasons for his resignation, the principal one being the bad condition of his eyes.

Too Much Kissing.

There is too much promiscuous kissing going on in Minnesota. So evidently believes Senator Siler Horton, of St. Paul, who has introduced a bill in the state senate for an act to prohibit miscellaneous kissing. The bill recites in the preamble that "whereas kissing has been decided by the medical profession to be a medium by which infectuous diseases are transmitted from one person to another and whereas the prohibition of such an offence will be great preventive to the spreading of such diseases as pulmonary tuberculosis, diphtheria, and other troubles, therefore be it enacted by the lagislature of the state of Minnesota:"

"Sec. 1—That it shall be unlawful for any person to kiss another, unless he can prove by his family physician that he has not any infectious or contagious diseases.

"Sec. 2—If a physician testifies that a person has weak lungs and such person kisses another he shall be found guilty of a misdemeanor, and the same penalty shall be imposed as if he had some contagious or infectious disease.

"Sec. 3—Any person violating this act shall be deemed guilty of a misdemeanor and fined not less than $1 and not more than $5 for each offence."

Women Voters in Australia.

"Where," asks the Sydney Bulletin of November 29, 1902, "where is that alleged female who refused to be put on the rolls?" It might well ask the question. For several weeks rumors were in circulation that Australian women, having been given the franchise, would never use the privilege, and the Bulletin itself had an amusing cartoon showing policemen "coaxing" the gentle voters to give their names for enrollment. But the actual compiling of the electoral roll has put another face on the matter, proving the women to be most eager to enjoy their political rights. In the Sydney district alone the females enrolled outnumbered the males by 20,305, the number of males out of a total of 225,153 qualified voters being only 102,424.

Dispatches from Sweden say it is reported that American mine speculators have bought large iron and copper regions in North Sweden and North Norway. It is expected that the great Swedish and Norwegian companies will be incorporated with the American copper trust.

Mr. Sutton Timmis, of Liverpool, has invested £10,000, the interest on which is to be employed in researches regarding the origin of cancer. These are to be carried out at the Royal Infirmary and University college, Liverpool.

Shipbuilders declare that the outlook for the shipping industry along the Clyde was never so depressing as at present. No matter what action the men may take, a reduction in wages is inevitable. If they strike 30,000 men will be affected in the shipyards and in cognate industries.

An Easter party of English mayors will make a tour of inspection of the chief municipal undertakings in Switzerland.

BOLD VENTURE.

AGED COUNTESS TRIES TO GET AN ESTATE.

Police Charge Her With Pretending to Give Birth to a Son and Heir—Secures Child of Low Birth and Announces It as Her Son.

A cable from Berlin, dated Jan. 31 says: The Countess Isabella Weserska Kwilecki has again been arrested, and is charged with pretending to have borne a son six years ago, and presenting him as the heir to an estate at Wroblewo, Province of Posen. The countess was 51 when the child was born, and had three daughters.

It is alleged that she had two ladies of high rank as accomplices. These, whose names have not been disclosed, are said to have produced the illegitimate son of the daughter of a railroad watchman in Austria, and in the proper moment to have brought the baby to the countess' apartments here. They went, it is asserted, from the railroad station in a cab, gave the driver a gold piece as a gratuity, and entered the house, one of them carrying the baby done up in a shawl strap, with breathing space cut in the bottom of the bundle. The gold piece so impressed the cabman that he stopped work for the day and went home. Thus it was that he remembered the circumstances. His testimony now contributes to completing the chain of evidence against the countess.

The child, it is further claimed, possibly came drugged, and apparently was kept two days in the house before its birth was announced. The servants of the countess, it seems, did not even know of the presence of the child. Those nearest to the countess took the birth in good faith. The old Count Wesierska, who was in delicate health, and who was in Italy at the time, telegraphed to the family doctor at Posen to go to Berlin and assist in taking care of the mother and child. The doctor came to this city, but the countess would not see him, and sent the doctor word that she had the necessary attention. When the legitimacy of the child was first contested the countess averred she had the services of a midwife from Warsaw, who has since died.

OUR FLOUR IN AUSTRALIA.

Cheaper Freights Offering via New York Than Vancouver.

A report received from Trade Commissioner Larke, of Australia, says that three weeks of rain has resulted in a decrease in the price of foodstuffs and increased the price of flour. The price of the local article, he says, is now equal to the price of Manitoba flour. The low price of freight still offered from New York has also kept the price of the Canadian article to its relatively low figure. The difference between the shipping rate for grain from Winnipeg via New York and via Vancouver, favoring the former port, still continues so great that it is hopeless to expect the large trade from Vancouver that was looked for. Quotations from Vancouver have been steadily underbidden in Australia. The market at present is pretty well stocked with both wheat and flour. The Manitoba flour is getting into the markets of all the states, a quantity having been shipped to Perth, Western Australia.

Potatoes are selling at a high figure, warranting large shipments from British Columbia, if space could be found in the steamers. At one time they were selling at from $40 to $50 a ton. Mr. Larke says he has hopes of getting Manitoba flour into the Pacific Islands.

A Funny Bill.

A dispatch from St. Paul, Minn., says: Mr. Hugo introduced in the house on Jan. 30 a resolution referring to Mr. Dowling's bill giving a bounty of $2,000 to the mother of triplets who had been deserted by her husband. Mr. Hugo's resolution, which got the house in a decided mix-up, declared that the Dowling bill involved in a maze of doubt the parentage of triplets, by reciting that the woman had been deserted by her husband, the mother of triplets, and continued: "Should it prove upon investigation that the father is the mother of the triplets, it would be a circumstance of a most unparalleled nature, calculated to draw widespread attention to our great and growing state from the confines of the Orient to the uttermost vastnesses of the Occident."

A committee of nine, one from each congressional district was provided to determine exactly the parentage of the triplets, and in the event that the allegation of the bill should be sustained, to take measures for a proper celebration of such a phenomenal happening.

After a general laugh, the resolution was laid over on notice of debate.

A cable from Liverpool, of Jan. 30 says: Four seamen of the British bark Veronica, brought here yesterday by the steamer Brunswick, were remanded at a police court in this city to-day, on a charge of murdering Captain Shaw, two of his officers and four seamen of the Veronica. Two of the prisoners have made a statement implicating themselves and the others. Another of the accused men William Smith, an American, who shipped at a Mississippi port, declares their statements to be untrue

A serious railway strike has been started in Amsterdam.

Mackenzie and Mann have purchased the Nova Scotia Central.

Three of the powers may take action to enforce reforms in Macedonia.

A damaging wreck occurred in the M. C. R. yards at Tilsonburg, Ont.

Ottawa will hold ice races, Feb. 19-21. Some 180 horses have entered, including Cresceus.

The C. P. R. claims there is at present room for 5,000,000 bushels in interior elevators.

Judge McDougall died suddenly at St. Catharines, Ont., on Jan. 29.

The Doukhobor colonists desire to purchase four carloads of horses.

Premier Roblin has announced himself as opposed to the Grand Trunk Pacific.

A bolt of lightning struck the Niagara Falls power house, seriously affecting big industries in towns in the vicinity.

The Lord's Day alliance has commenced prosecution against employes of beet sugar factories for working on Sunday.

The Victorias of Winnipeg lost the first game in the Stanley cup series at Montreal by a score of 8 goals to 1. The game was played on soft ice.

The Shamrocks, of Winnipeg, were defeated by the Portage la Prairie hockey team in Winnipeg on Jan. 30, by 5 goals to three.

Mr. C. M. Winslow, of Brandon has been selected as secretary of the Ayrshire Breeders' association, meeting in New York.

Marconi has announced important reductions in the price of trans-Atlantic messages.

Sir John Wolf Barry has declared that the wireless system can never be a serious rival to the cable.

Colonial Secretary Chamberlain and Mrs. Chamberlain arrived at Kimberley on Jan 30 and were accorded a remarkable reception. Mrs. Chamberlain was presented with a casket of diamonds.

Maurice Couture, a Belgian, was killed at Carlton, N.W.T., by the accidental discharge of a gun while mounting a horse. He leaves a widow and child.

A young man named Barney Pardon met with a very serious accident on Jan. 29 while working in the woods near Black Sturgeon Lake. A tree fell on the unfortunate young man, hitting him clean on the top of the head, and glancing off broke the left arm just below the shoulder, also breaking a rib.

Russell Power, only son of Chester Power, of Bowmanville, Ont., aged about 14 years, was shot in the side by Howard Foley, another school boy. Foley was on his way home from school and young Power was practising at a target with a new double-barrelled gun he had recently bought. Then both boys ran toward the target to see how many shots Foley had lodged within the circle. Young Power was a few feet ahead, when, by some unexplained means, the other barrel was discharged. The charge entered his hip and penetrated his bowels.

Mount Vesuvius is again in eruption. Detonations are heard and a stream of incandescent lava is issuing from the volcano, which is surrounded with thick smoke.

White Calfe, chief of the Blackfeet, who played a part in the Indian wars of the west in the sixties, and who won General Miles' regard for military abilities, died at Providence hospital, Washington, D.C., on Jan. 30, of pneumonia, aged 80 years. He had been in Washington for a week on business for his tribe. White Calfe was one of the chiefs who participated in the historic and bloody battle of Wounded Knee.

The One-Eyed Steer.

A dispatch from Ottawa says: The famous one-eyed steer, which is now a prominent member of the cattle guards commission, met a double defeat yesterday, and that single optic shed copious tears. J. R. and John Smith, of Ottawa, had a guard consisting of two sets of tilting rollers made of 1¼ inch pipe, and a tilting platform of sheet iron. The rollers and platform dropped on the near side as the animal placed its feet on them. The one-eyed steer made one attempt and then retreated. J. J. Gartshorn, of Toronto, submitted a wicked looking device known as "Ross Impassable," It consists of a series of triangles, the apex of each being 9½ inches high with spikes at the base and apex. The steer looked sorrowfully at the guard and turned tail on it. The animal got his revenge, however, at the third trial, that of a staircase guard, invented by Mr. Walter Hunt, yard-master. The steer took a good glance at it and then proceeded to climb the stair the other animals docilely following.

In the preservation, development and economical management of forests the Germans, perhaps, excel any other nation. The government, as well as the people, recognize that forests have not only a commercial worth, but a national economic value of utmost importance. The German forests, as a rule, are free from weeds, undergrowth, washouts and dead and decayed woods. High stumps are a rarity; the trees are sawed about six to twelve inches from the ground, thereby adding to every log (of the first cut) one to three feet in length, compared with what the same tree would yield if cut on the American style.

FERNIE FREE PRESS.

FERNIE, B. C.

DON'T PRONOUNCE IT.

Llanfairkwllgwyngyllgogerchwyrndrobweesandysiliogogoch, is the euphonious name of a small village in the north of Wales. It is supposed that the place was given that name as a resentment for the objectionable appointment of a magistrate who could not speak the language of the people. The magistrate after two attempts at writing the name, sent in his resignation. The authorities, with characteristic stubbornness, appointed a non-Welsh speaking successor. This gentleman made an honest attempt to pronounce the name and was seized with lockjaw. The next appointee could speak Welsh fluently, and he shortened the name to Llanfair, the name by which the place is now generally known, although the registered name is the jaw-breaker given above.

HIS OWN FREE WILL.

Dear Sirs,—I cannot speak too strongly of the excellence of MINARD'S LINIMENT. It is THE remedy in my household for burns, sprains, etc., and we would not be without it.

It is truly a wonderful medicine.

JOHN A. MACDONALD,
Publisher Arnprior Chronicle.

An honest man would rather be underrated than overrated.

Free and easy expectoration immediately relieves and frees the throat and lungs from viscid phlegm, and a medicine that promotes this is the best medicine to use for coughs, colds, inflammation of the lungs and all affections of the throat and chest. This is precisely what Bickle's Anti-Consumptive Syrup is a specific for, and wherever used it has given unbounded satisfaction. Children like it because it is pleasant, adults like it because it relieves and cures the disease.

If the average man would quit looking for soft snaps and stick to his regular job he would be better off financially.

Minard's Liniment Cures Diphtheria.

"Why don't you give us a little Greek and Latin occasionally?" asked a parishioner of the new minister.

"Why, do you understand those languages?"

"No; but we pay for the best, and we ought to have it."

For ten months I suffered with Rheumatism; I could move neither hands nor feet, and left excruciating pains in my whole body. A German friend recommended St. Jacobs Oil; the result astonished me, all pain vanished and I was cured.—J. B. Hyland, Troy, New York.

Men with small heads and pins without any are apt to venture beyond their depth.

A DINNER PILL—Many persons suffer excruciating agony after partaking of a heart dinner. The food partaken of is like a ball of lead upon the stomach, and instead of being a healthy nutriment it becomes a poison to the system. Dr. Parmelee's Vegetable Pills are wonderful correctives of such troubles. They correct acidity, open secretion and convert the food partaken of into healthy nutriment. They are just the medicine to take if troubled with Indigestion or Dyspepsia.

Short-sighted people are naturally close observers.

Minard's Liniment Cures Colds, etc.

The Struggle For Office.

If this free people, if this government itself, is ever utterly demoralized, it will come from this human wriggle and struggle for office—that is, a way to live without work.

A trick is like a cheap firecracker—when it seems to have done its work and lost its vitality it is apt to explode and hurt the man who set it off.—Saturday Evening Post.

An Equal Safety.

An Irish clergyman during his first curacy found the ladies of the parish too helpful. He soon left the place. One day thereafter he met his successor.

"How are you getting on with the ladies?" asked the escaped curate.

"Oh, very well," was the answer. "There's safety in numbers."

"I found it in Exodus," was the quick reply.

20 MILLION BOTTLES
SOLD EVERY YEAR.

Happiness is the absence of pain, and millions have been made happy through being cured by ST JACOBS OIL of RHEUMATISM, NEURALGIA, TOOTHACHE, HEADACHE, LAMENESS, SCALDS, BURNS, SPRAINS, BRUISES and all pains for which an external remedy can be applied. It never fails to cure. Thousands who have been declared incurable at baths and in hospitals have thrown away their crutches, being cured after using ST. JACOBS OIL. Directions in eleven languages accompany every bottle.

CONQUERS PAIN

A WINTER SCOURGE.

La Grippe or Influenza Responsible for Hundreds of Untimely Deaths.

La Grippe starts with a sneeze—and ends with a complication. It lays a strong man on his back; it tortures him with fevers and chills, headaches and backaches. It leaves him a prey to pneumonia, bronchitis, consumption and other deadly diseases. You can avoid la grippe by fortifying your system with Dr. Williams' Pink Pills. They protect you; they cure you; they up-build you; they banish all evil after-effects. Dr. Williams' Pink Pills ward off all winter ailments. They cure all blood and nerve disorders. They are the greatest blood-builder and nerve tonic that science has yet discovered. We know this to be the solemn truth, but we do not ask you to take our word alone. Ask your neighbors, no matter where you live, and you will learn of someone who has been cured by Dr. Williams' Pink Pills after other medicines had failed. It is upon the evidence of your neighbors that we ask you to give these pills a fair trial if you are sick or ailing. Mrs. Emma Doucet, St. Eulalie, Que., says: "Words can harly tell how pleased I am with Dr. Williams' Pink Pills. I had an attack of la grippe which left me a sufferer from headaches and pains in the stomach. I used several medicines, but nothing helped me until I began the use of Dr. Williams' Pink Pills. When I began them I was weak and very much run down. The pills have completely cured me and I not only am as strong as ever, but have gained in flesh." The genuine pills always bear the full name, "Dr. Williams' Pink Pills for Pale People," on the label around every box. Substitutes can't cure and to take them is a waste of money and endangers life.

Hope vanishes with youth. As a man grows older he quits hoping and begins to gather unto himself everything in sight that isn't nailed down.

Mrs. Celeste Coon, Syracuse, N.Y., writes: "For years I could not eat many kinds of food without producing a burning, excruciating pain in the stomach. I took Parmelee's Pills according to directions under the head of "Dyspepsia of Indigestion." One box entirely cured me. I can now eat anything I choose without distressing me in the least." These Pills do not cause pain or griping, and should be used when a cathartic is required.

Invalids often think they need more rest, when all they need is less medicine.

FREE BOOK on CATARRH

I will send my fine book on Catarrh to all sufferers from the disease. It explains the origin, dangers and cure for this treacherous trouble. It is fully illustrated by the best artists. Address, Specialist, Sproule, 3 Doane St., Boston.

"If I could only get a bite to eat," he whined.

"Why don't you work?" she asked.

"Nothin' doin' in my line," he answered. "I'm a dime museum glass eater, an' they are gettin' too numerous."

"Poor man," she said sympathetically. "Come right in, and you can have the two goblets and the glass dish the girl broke this morning."

Gray's Syrup soothes and heals the sore throat and weak lungs. After a few doses the cough is relieved, and the soreness passes away.

Gray's Syrup cures to stay cured.

At all Druggists 25cts.

Gray's Syrup of Red Spruce Gum

A Common Bred Cow

When toned up by Dick's Blood Purifier will give as much and as rich milk as a highly bred aristocratic Jersey cow gives upon ordinary feed, and a Jersey cow when given.

DICK'S BLOOD PURIFIER

will wonderfully increase her yield of milk. It saves feed too, because a smaller amount of well digested food satisfies the demands of the system and every particle of nourishment sticks.

50 cents a package.

Leeming, Miles & Co., Agents, MONTREAL.

MARKETS.

(Compiled from The Commercial)

WHEAT—Manitoba wheat declined in sympathy with the drop in other markets, but not to anything like the same extent. The highest price for No. 1 hard was reached on Monday, when 1 hard spot in store, Fort William, sold at 75½c, and May delivery, 78½c.

FLOUR—All Brands of flour are now higher. Best Hungarian Patent, $2.10 per sack of 98 pounds delivered to the trade; Glenora Patent, $1.95; strong bakers, $1.65; and XXXX, $1,35.

MILLFEED—Bran is quoted at $14.50 per ton in sacks, and shorts at $16.50 per ton.

OATS—The market for oats is firm and feed grades in carlots are ½c per bushel higher. This advance has been made in the face of the fact that there is a very large stock of oats in the country. The only explanation possible is that the large export demand for oats is keeping up the price. The United States is not exporting oats this season to any extent and Canada is getting the business. No. 2 oats are worth 28½ per bushel at Fort William. On track at Winnipeg this grade is worth 26½ to 27c per bushel and about 25c is the price for feed white. In the country farmers are getting 19 to 20c per bushel at central points.

BARLEY—Brewers quote 34c for malting in carlots on track. Feed barley is worth 25 to 26c.

FLAXSEED—Market nominal.

SPELTZ—The market holds steady at 30c per bushel of 50 pounds, delivered in Winnipeg.

HAY—Dealers are paying $5.50 to $6.50 per ton for carlots on track.

POTATOES—35c per bushel.

BUTTER — Creamery— Creameries are asking 26c per pound from city customers for choice makes.

BUTTER-Dairy—Receipts are moderate and mostly of inferior quality. Dealers are paying 21c net for dairy separator in bricks delivered in Winnipeg, and 14 to 17c net for tub butter.

CHEESE— There is nothing doing beyond a little jobbing trade at 13½ to 14c per pound for choice stock delivered to retail dealers.

EGGS—Eggs are scarce at 22c per dozen, net, delivered in Winnipeg, subject to candling.

DRESSED POULTRY—Dealers are offering in a wholesale way 10c per pound for chickens, dressed; 9½c to 10c for ducks and geese, and 15c for turkeys.

DRESSED MEATS — Beef, city dressed, 6 to 7½c per pound; country stock, ½c under these figures; mutton, 8 to 9c; lamb, 11½c; hogs, 7c.

HIDES—Country frozen hides are bringing from 5½ to 6c per pound, delivered at Winnipeg, less 5 pounds tare; sheep pelts, 30 to 50c.

WOOL—Market nominal.

TALLOW—No. 1 tallow is worth 5½c per pound delivered here, and No. 2, 4½c.

SENECA ROOT—Market nominal.

LIVE STOCK.

CATTLE—There is very little doing in cattle. Fat butchers' stock is scarce and will be more so, in consequence of which higher prices are looked for. Buyers now out for stockers, and are taking all they can get at good prices. Finest steers are worth 4c; butchers' ordinary 3½c, and from that figure down to 2½c, according to quality. Stockers, yearlings, $14 to $17; two year olds, $18 to $22 each.

SHEEP—Worth 3½c per pound off cars here. Lambs, 4¼ to 4½c.

HOGS—Packers are still paying 6c per pound for best weights of hogs delivered. Heavy and light weights are ½c lower than choice.

MILCH COWS—Prices are firm at $30 to $45 each, according to quality.

HORSES—Trade is now confined to a limited demand for general purpose horses, for which prices still rule high. Good teams of work horses are worth $300 to $400, according to weight and quality.

Cromwell's Mother.

The sympathy existing between this mother and son is one of the most beautiful traits in Oliver's personal history. They loved each other with a passionate affection that no time or change lessened, and when he arrived at the summit of his power, though she was then upward of 90 years of age, he appointed her royal apartments in Whitehall and visited her every day.

Noble quaintly says, "She occasionally yet offered the Protector advice, which he always heard with great attention, but acted as he judged proper." It is pleasant to think that this fine old lady died happily before her son's power began to wane. It is pleasant to think of the great Protector kneeling to receive her dying blessing and of her last smiling words to him and his children, "A good night, dears!"

There is yet a portrait of her at Hinchinbrooke, which shows us a handsome woman, with a face full of character and a rather melancholy expression. Her dress is that of a gentlewoman of the time—a white satin hood, a pearl necklace and a neckerchief edged with rich lace. The mantle is of green satin edged with gold lace and fastened with a jeweled clasp.—Amelia Barr in Harper's Magazine For April.

Two Kinds of Curiosity.

Philanthropic Visitor (to jailbird)—My friend, may I ask what brought you here?

Jailbird—The same thing that brought you here—the desire to poke my nose into other people's business. Only I used generally to go in by way of the basement window.

A STORY WITH A SEQUEL.

Mrs. Barnett's Sufferings Happily Ended by the aid of Dodd's Kidney Pills.

That Was Four Years ago and now She is able to say, "The Cure was Permanent."

Plattsville, Ont., Feb. 1.—(Special)—"The cure was permanent." In this one short sentence Mrs. J. Barnett, of this place, gives the sequel to a long tale of suffering and misery. It is about four years since Mrs. Barnett gave to the public the story of her sufferings and their happy ending. In view of the sequel given above it is well worth repeating:

"I had been ailing for years," said Mrs. Barnett. "My symptoms were Nervousness, Rheumatism in the left arm, pains in the small of the back, up the spinal column and back of the head, through the eyes, left side of the body and occasionally the right side. I grew weak, for I had no appetite and could not sleep. I was a physical wreck.

"I was treated by the doctors, but their medicines afforded me no relief. Then I started taking Dodd's Kidney Pills. Before I had finished one box there was an improvement in my condition. My appetite returned, the pain was lessened, and I was able to sleep. I took twelve boxes and was completely cured. I ascribe my recovery to Dodd's Kidney Pills."

"Say," exclaimed the haggard-looking man as he dashed into the drug store, "got any soothing syrup?"

"Sure," answered the druggist. "What size bottle, please?"

"Bottle be hanged!" rejoined he of the haggard look. "Gimme a two-gallon jug full of the stuff. It's twins."

A LIFE SAVED.—Mr. James Bryson Cameron, states: "I was confined to my bed with Inflammation of the Lungs, and was given up by the physicians. A neighbor advised me to try Dr. Thomas' Eclectric Oil, stating that his wife had used it for a throat trouble with the best results. Acting on his advice I procured the medicine, and less than a half bottle cured me; I certainly believe it saved my life. It was with reluctance that I consented to a trial as I was reduced to such a state that I doubted the power of any remedy to do me any good."

Lovers, like armies, get along well enough till the engagement begins.

Monkey Brand Soap removes all stains, rust, dirt or tarnish—but won't wash clothes.

Concessions have just been granted to construct and run twenty-seven branch lines of the Swedish railways. The new lines will cover a distance of 250 miles in all, and it means that Sweden will again have occasion to purchase a large quantity of rolling stock.

Minard's Liniment Cures Garget in Cows.

Noggs—And a cure for insomnia is——?

Physician (facetiously)—An old-fashioned remedy is to count five hundred—

Noggs—Very good, but our baby can't count.

A MOTHER'S DELIGHT.

Is to See Her Little Ones Healthy, Rosy and Happy.

All mothers delight in seeing their little ones bright, rosy and happy, but unfortunately all mothers do not use the best methods to gain this result. When baby is cross and fretful they give him "soothing stuffs," believing they are aiding him—but the result is just the opposite, as these soothing stuffs are poisonous and dangerous. Baby's Own Tablets should always be used and they will be found a prompt relief and speedy cure for all the minor ailments from which little ones suffer. All experienced mothers use these tablets and all mothers who use them praise them. Mrs. S. M. Black, St. Peter's N. S., says: "I have used Baby's Own Tablets for most of the ailments from which little ones suffer and I find them the best medicine I have ever tried. No mother should be without them in the house."

These tablets are good for children of all ages, and can be given with absolute safety to a new born babe. Sold by druggists or sent by mail at 25 cents a box by writing direct to The Dr. Williams Medicine Co., Brockville, Ont. Send us your name on a post card and we will mail you a valuable little book on the care of infants and young children.

A good story is told in connection with the recent explosion at Departure Bay, Near Nanaimo, B.C. After the news reached Nanaimo a well known Chinaman was seen walking up the street in a depressed state. He was asked if he had any relatives killed in the explosion, and he replied: "Yes; heap bad. Four fellows killed, and one man he owe me $20. One man he owe me $20. One man he owe me $15. One man he owe me $10. Too bad powder kill all fellows owe me money.

Eve Tempted Adam.

And Adam has been tempting Eve ever since. Imagine a man selling a woman rancid butter while keeping her attention fixed on a "prize" given with the rancid butter! A woman may be tempted by "prizes" to buy common soaps, that she may not know will soon ruin her clothes and hands. But she soon finds out the difference between common soaps and Sunlight Soap. She finds Sunlight Soap—Octagon Bar—a prize in itself. Her clothes last longer, and her hands are saved from eczema. 220

GOLD STANDARD TEA.
They will owe you a debt of gratitude ever after.

The workmen employed at Clifford's Tower, York, found in the bottom of the ancient well some pieces of gold lace. The Yorkshire Post states that they are believed to be the remnants of the property, which included a great deal of jewelry, thrown into the well when some five hundred Jews were besieged in York Castle by a mob in the reign of Richard I. (A. D. 1190), and and when they cut each other's throats to avoid the fury of their besiegers.

Minard's Liniment Cures Distemper.

Musical Egotism.

A musician died, and his sleeping soul waited at the gate.

Then said the angel, "Has this man sinned?"

"Yes," answered the voices of the neighbors. "He has played his own works all day."

"What shall be his punishment?" asked the angel.

"Let him hear those works forever!" cried the voices.

So the soul was awakened in hell by the chanting of its own music.

"This must be heaven!" it said.—London Academy.

You can obtain it from your dealer.

MARRIED VS. SINGLE HOCKEYISTS

In Fernie it was at the skating rink
Seven benedicts, bold, set forth one night
With scarlet bags for their glad rags
And a light in their eyes so bright.

But of all costumes from the fig-leaf time,
The best to my taste is what they wore,
For "Invincible Red" is what is said
You ne'er can hit at a yard or more.

A convict's garb the other seven wore
Suggesting fate and a deep-dyed plot,
As the jaundiced eyes looked out forlorn
O'er the blackened hopes of a bachelor's lot.

Fair faces smiled from the gallery seats,
At the shapely forms of the crack fourteen.
"They're out for blood, bruises and fame,"
A rooter yelled, in a pause between.

They clawed the air to atoms small,
The ice into holes where'er they struck,
The cover-point man gazed wildly round,
And shouted, "Mordy, where's the puck?"

Like knights of old, in battle shock,
They met and splintered many a stick,
When better halves, smiled from the gall'ry seats
And said, "Go show those kids the trick."

The lesson is plain: play hockey while YOUNG,
Get Cupid, you know to tie the bow.
They'll ask you for a game to play,
Make good the bluff, keep mum, lie low.

MICHEL

From Our Own Correspondent.

Mr. M. A. Kastner, of Fernie, visited Michel on Saturday last.

Mrs. B. Gordon and Miss. Gordon arrived from the east on Sunday morning.

Mr. Harry Marchant, of Cowley, visited Michel friends this week.

The work of roofing the new tipple is nearing completion.

Mrs. Anthony Beltner and family left for Carbonado, Wash., on Sunday morning.

Mr. Ross, of the firm of Ross & Arnold, Cranbrook, was in town this week on business.

"Uncle Tom's Cabin" is billed for next Wednesday and Thursday evenings in Michel Hall.

A large new stable is being erected by the Coal Co. south of No. 5 mines, over the old bed of Michel river.

The debate on Monday evening last, under the auspices of the Michel Literary Society, was well attended. The question, "Is Foreign Immigration a benefit to Canada," was the drawing card, and the audience was evenly divided on the merits of the debate. The debate for next Tuesday will be, "Should the Franchise be extended to Women."

At the regular meeting of the Michel Literary Society on Tuesday evening, the following officers were elected for the ensuing term:

President, G. Kurnock; Vice President, J. Connolly; Rec. Sec., R. L. Henderson; Fin. Sec., F. Brown; Treas., G. Dunn; Librarian, B. Dryden; Sugeant-at-Arms, J. Thomas; Executive Committee, Messrs. Thomas and Farrow and Miss. A. K. W. Evans; Program Committee, Messrs. Henderson, Farrow, and Connolly; Library Committee, Messrs. Dunn, Brown and Henderson.

FATHER HAGERTY'S LECTURES.

Father Thos. J. Hagerty lectured to fairly large audiences on Saturday evening and Sunday afternoon. The lecturer is a strong socialist and his arguments all tended towards the building up of that movement. As an orator he is a disappointment. He does not possess the power to enthuse, for while his lectures are forcible and logical they are also cold and they bring home to the listener the fact that they are the cut-and-dried product of a well-paid lecturer.

On Sunday afternoon he showed the interdependence of all labor unions and the futility of one union strikng without the support of all others. He logically reviewed the evils of our present social organization and showed in marked contrast the many oft repeated advantages of socialism. He did not tell anything new, but perhaps put it in a clearer light than many had seen it before. He did not tell how the new order of things was to be instituted and thereby like all other advocates of this doctrine, he lacked practicability.

Small furnished room wanted. Apply at this office.

The Dominion house will meet on March 12th. The session promises to be a long and busy one and may involve all summer. The most important measures will be the redistribution bill,and one appointing a railway commission for settling railway strikes by arbitration. The Alaskan boundary, and the Grand Trunk Pacific, and a large number of private applications will complete the list.

S. W. Gebo, general manager of the Canadian-American Coal and Coke Co. of this place, returned on Wednesday from a two months' trip to France where he went on business connected with the company. Mr. Gebo made a very successful trip, and plans are now being prepared for many improvements to be added to both the mine and town.—Frank Sentinel.

Cranbrook

From the Herald.

The lumber industry has been the salvation of this district this winter.

Not for years has there been so much snow at this time of the year.

Norman Chaput, the engineer who was injured at Crows Nest last week, is able to get around and is about recovered.

One of the most delightful events of the season was the ball given in the Wentworth hall Monday evening by the engineers and firemen for the railway employees of the Crow.

The East Kootenay Lumber company held its annual meeting last Monday. Only routine business was transacted, and plans for the coming year discussed. The same officers were elected.

The double mill that is being put in at Meadow Creek by the East Kootenay Lumber company, will be ready for sawing lumber between the 15th and 20th of this month. The tie mill machinery is expected early next month and will be installed without delay, as the company is anxious to get at its contract for 750,000 ties for the C. P. R.

G. Pawnell, who formerly returned from England with Mrs. Pawnell, has brought the Norbury ranch through Beale, Hutchison & Elwell, for a sum reaching close to $10,000. This is one of the best ranches in the country and with the one Mr. Pawnell already owns in that vicinity gives him a valuable tract of land that will greatly increase in price as the country is developing.

Cranbrook has had a sad and sudden visitation of death last week, four little ones being claimed by the dread diseases, scarlet fever and diphtheria. The scarlet fever cases came from Strathcona in the Territories, being the children of Grant Boulange, who has been living with the sister of Mr. Boulange since the mother's death. One of the children was dead when brought to Cranbrook, and the other died a few days later. On Saturday the little daughter of A. Grinier and the oldest son of J. Brault, died of diphtheria. Both of the children had been isolated at the Grinier home and everything done to save them, but without avail. Another son of Mr. Brault is sick, and also a young son of Mr. Grinier, but both cases are improving. Dr. King says that he is of the opinion that there is no further danger as the disease of diphtheria is well in hand. The school trustees very wisely concluded it best not to take any chances, and closed the school for the week, but it will be reopened next Monday. Every measure that would contribute to the safety of the community was enforced, and perhaps it is to this fact that Cranbrook has escaped a deadly epidemic.

The result of the bye election in Burrard gives R. G. MacPherson a small majority over Foley the labor candidate, while Dr. McInnes loses his deposit. Foley's heavy vote is largely due to the intensity of feeling in the constituency for the prohibition of Asiatic immigration which was his one and only plank.

C. S. V. BRANCH, Esq,
Manager Sun Life Assurance Company of Canada,
Vancouver, B.C.

Dear Sir,

I am to-day in receipt of your favor of the 21st of October, 1902, enclosing cheque from your Company amounting to $2000.00, in settlement of claim under Policy No. 201203 on the life of my late son, Samuel Hand, who met his death in the Fernie Mines by an explosion, on the 22nd of May, 1902. Your general agent for the Kootenay, Mr. A. B. Docksteader, in the spring of the year induced my son to take out this insurance for my benefit. He paid but one premium of $71.20 on same, and, as above stated, I am to-day in receipt of the Company's cheque in settlement of this claim in full, without any deduction whatever for expenses in settlement of the claim or otherwise. This is particularly worthy of note, owing to the great distance of my residence from British Columbia, and the fact that Mr. Docksteader, to obtain the policy and have the necessary claim papers filled out, was obliged to take a special trip of some two hundred miles to Fernie to secure the necessary particulars, etc., which I understand was entirely disbursed by himself, and certainly has not been charged to me. Therefore I feel it my duty to express my gratitude to Mr. Docksteader for his kindness in sacrificing so much for me in settlement of this claim. Your kindness to me is also praiseworthy and I feel under an obligation in gratitude to you for the courteous and kindly manner you have conversed with me (by letter) to thank you for so promptly settling this claim. I shall therefore speak very highly of you and your Company whenever I can do so.

I have pleasure in attesting to these facts for the benefit of my son's fellow-workers, and I trust it may be of some advantage to the Company and their representatives.

I am, yours sincerely,
(Signed) THOMAS HAND,
On behalf of Hannah Hand.

MINERS GO OUT ON STRIKE

Collieries at Coal Creek, Michel and Morrissey are Closed and 1,500 Men are Now Idle.

MINERS STATE THEIR GRIEVANCES.

They Demand Places to Meet in at Michel and Morrissey, or a Chance to Buy Land on Which to Erect Them; a Uniform Rate of Wages Similar to That Which Existed Before Last Strike and a Full and Complete Recognition of the Unions of the District.

The Miners at Michel, Morrissey and Fernie went out on strike at 7 o'clock on Wednesday morning, Feb. 11th. The district union consisting of representatives from the different local unions was in session several times last week and J. A. Baker, B. C. representative of the Western Federation of Miners was here to meet them and to look into their grievances. These representatives reported to their respective unions and a vote was taken in each of the three places with the result that a strike was decided upon.

The report of the strike spread rapidly late Tuesday evening and the next morning the people of the three coal towns awoke to the fact that another disastrous strike was upon them. During the day the streets were marked here and there with ever-changing groups of interested miners who discussed the situation; the business men also appeared to realize the gravity of the situation which was increased by their inability to even learn the cause of the trouble. Representatives of the different unions were seen who refused to give anything for publication, as to their specific grievances, stating that in due time statements of their case would be sent to all the papers. Different union men stated that the Western Federation of Miners were supporting them but nothing authoritative on this point was learned, as other reports were abroad to the effect that Mr. Baker when here had advised against a strike at the present time. We also understand that the constitution of the Western Federation requires a local vote of over 60 per cent. of the total in favor of striking before a strike can be declared, and the figures given elsewhere clearly are under these proportions.

In the afternoon of Wednesday a public mass-meeting was held in their lodge room which was not largely attended by those outside the union. The speakers mostly officers of the union, owing to the care they exhibited in keeping back the details of their troubles, were not able to more than touch on certain principles and little knowledge of a practical nature was learned. However later in the week the press committee of the district union prepared a statement for publication and this may be seen in other columns.

On Wednesday morning General Manager Tonkin gave the following for publication:—

"The employees at all places failed to report for work this morning without giving any notice to the company. I understand the union have declared a strike. The union represents 18 per cent of the employees.

"The vote for the strike was as follows: Coal Creek, 49 for a strike, out of a total of 438 employees; Morrissey, 90 for a strike, total employees 405; Michel 80 for strike total employees 372. This does not include coke oven employees, who were not interested, but were driven from work this morning, as well as the engineers, firemen and fan runners.

The reasons for the strike are not known as yet, no demands having been made on the company. The men were earning excellent wages."

This is the fourth day of the strike, A few cars of coke have been loaded and now the mines and ovens are tied up tight. At Morrissey the steam connections with the engines have been broken and the company stores at the three camps have been closed. There are about 12 cars of coal at Coal Creek mines, which will be reserved for the electric power house. A report about the streets to the effect that the lights would be shut off was denied by Mr. Tonkin who stated that so long as the coal lasted and the cart driver was not interfered with the power house would be run as usual. One driver had been threatened by union men while delivering coal to the power house.

General Manager Tonkin when interviewed about the strike stated that he did not know the nature of the men's grievances, as they had never been presented to him. He said that he was always willing to listen to any complaints made individually or through a committee appointed by his employees of any one mine. In answer to a question re the wages paid at Morrissey Mr. Tonkin handed the FREE PRESS representative a printed wage scale governing the work done in that mine from which the following figures have been copied;—

No. 1 mine, mining rate, 40 cents per gross ton. No. 3 mine, mining rate, 60 cents per gross ton; 10 cents per gross on extra for all coal under 4 feet 6 inches in thickness, Nos. 4 and 5 mines, mining rate 55 cents per gross ton.

Tracks to frog of double track to be laid by Company, after which track will be laid by miners: for which a price of 30 cents per lineal yard of double track laid will be paid, and which price shall include moving, setting and operating of McGintys or Gig Wheels.

Daymen: In this schedule the rate named is to be understood as representing a working day of eight hours.

Drivers	$2.50
Driver Boss	3.00
Pushers	2.50
Track Layers	3.00
Track Layer Helper	2.50
Rope Rider	2.50
Couplers	2.50
Brattice Men	2.75
Timber Men	3.00
Timber Helpers	2.75
Door Boys	1.00
Switch Boys	$1.25 to 1.50
Shift Men	2.50
Miners Day Work	3.00
Hoist Men	2.50
Fire Boss	3.00

This scale had been fixed by himself and a committee appointed by the men.

The General Manager in reply to a question as to his opinion of the wages earned by his employees stated that the men of no other coal mining Company in America receive such large wages as do the employees of the C. N.P. Coal Co. In proof of this he would have prepared for publication a list showing the actual average earnings of the miners in his employ. These figures will show that the men are well paid. If the men were demanding an increase in their wages it was quite useless as he was prepared to shut the mines for an indefinite term rather than submit to any increase.

FROM THE MINERS STANDPOINT.

Owing to the labor troubles which culminated in the strike by which all the employees of the Crows Nest Pass Coal Co. laid down their tools on Wednesday morning at 7 a.m. we must ask you to kindly give us space in your valuable paper so that we may lay a fair and unbiassed version of the difficulties before the public.

Now sir, that these grievances have been accumulating ever since the last strike is well known to most Fernieites, but perhaps it would be just as well to state it again. After the great and awful explosion of May 22nd in which over 130 men and boys met their doom, a new management for the C. N. P. Coal Co. began to operate the mines, whose policy seems to us western people to be totally at variance with the best interests of the people of the Crows Nest Pass and to the metalliferous smelters to the west of us; for since his first taking the camps have been in a state of permanent discontent owing to his autocratic attitude and the acts of petty tyranny he has allowed and would not redress. It has been conceded that no more dangerous mines are in operation that the properties of the C. N. P. Coal Company, the late disaster clearly proving the case.

The first move was to lengthen the hours of the underground workers half an hour, making them work 8½ hours, despite the fact that all through British Columbia the custom of all coal miners has been eight hours from bank to bank. The men, not liking to forsake the old custom and give up the short hours that they had struggled and worked so hard to have incorporated in their laws, came out on a strike which terminated at the end of six weeks with an agreement signed by the executive committee of the miners' union and the management of the C. N. P. Coal Co. The substance was to try the new scheme for two months and if at the end of that period, the men showed by a ballot that they wished to return he would be perfectly willing for them to do so, providing notice of the same was given to him as representative of the company.

The result of the ballot was 129 in favor of eight hours and 33 in favor of 8½. The parties who watched the ballot were two of the miners' committee on behalf of the men and the mine superintendant and the general manager on behalf of the company. Their presence had an intimidating effect or there would have been a greater majority in favor of the 8 hours than there was. Now in direct contradiction to the agreement already signed Mr. Tonkin claimed that all miners who did not vote were to be counted in favor of the question—an absurd and unusual thing according to the procedure of voting in any civilised country. Rather than have further trouble the men allowed him to violate his agreement and resumed work under protest.

Again the day after the strike the men had resumed work, Mr. Tonkin submitted a price list which made a general reduction of from 15 to 20 per cent under which the men have also been working under protest. Next comes the timber question. The law states that for the safety of the mines a sufficient quantity of timber shall be taken to the working face or the nearest practicable place possible. Now the men in No. 1 mine have to carry the timber or help to bring it from the landing whice is often a considerable distance causing a great loss of time and in many cases the working places were positively dangerous for the want of timbering. Several men, in fact four, were discharged for trying to get the company to fulfil the law and place the timber near the working face. It is a murderous policy that places men's lives and limbs in needless danger to save the wages of a timber man. All efforts to reinstate the men discharged were in vain.

Since then the relations between the management and employees have become more and more strained. It has been practically impossible for the paid representative of the men to gain an audience. Several times we have requested an audience both by letter and viva voce and our messenger has been received with abuse and curses. It has been stated that the manager claims to be entirely ignorant of the reasons of the strike; well, if he refuses an audience to the committee time after time it looks as if he wished to remain in ignorance and as there is reason in all things so there is an end to even a miner's patience. Now all that we can says is that whenever he is willing to know all particulars he has only to notify the district board No. 7 of the W. F. of M. and they will enlighten his ignorance.

Now glance at Morrissey. There we find even a worse condition than here. The men are mining coal at 40 cents per ton and have to shovel this coal several times, sometimes three times, sometimes four to get it into the car—all for the munificent price of 40 cents—the lowest price for any coal dug in Canada. More than this the men are obliged to move an apparatus for moving cars, known as the McGinty. Not until the car is 38 feet from the working face is the McGinty moved at all. Then it takes two men a whole day to move this for which the company wish to pay what a person can see with his eyes shut—nothing.

Speaking of McGinty reminds us that when a brother was killed at his post of duty at Morrissey and was buried at Fernie by his brother unionists Mr. Tonkin threatened to have the leaders arrested for shutting down the mines. Think of it! We must not be allowed to interfere with the profit scheming long enough to bury the dead that are killed by this same industry. Now if the Coal Co. pay a manager to look after their interests we on our part pay a man to represent us and if the manager has any business ability he will find that it is conducive to the welfare of the camp to deal with this representative and some nine committee men rather than have each and every man lay off work and present his grievance individually.

Returning to Morrissey, they are cursed with a company store, none other being allowed. Any miner, who has lived under these conditions knows that his store bill mostly equals his wages and so he has little or nothing to draw. The Truck Act of B. C. declares this procedure illegal. Again the men have no place to meet in. The company refuse to rent them a building at a reasonable price or sell them a lot on which to erect a building at a reasonable figure, instead the place of meeting is an old logging camp three miles out in the bush where the men meet like a gang of outlaws.

Then we come to Michel. The troubles as regards a meeting place and company store are identical with Morrissey. They also have worked four or five months under a protested wage scale of 55 cents per ton. There is also a system of "buttying" or to explain it more fully, a system under which a favorite can take an indefinite number of places and employ other men called backhands or helpers and take a rake off each man's earnings.

The demands of the men are: Places to meet in Morrissey and Michel or a chance to buy land on which to build one, a uniform rate of wages almost identical with the rate paid before the last Fernie strike, and a full and complete recognition of the unions of the district.

PRESS COMMITTEE.

A Monster parade of Union men and their sympathizers was held this afternoon, which included some four hundred men led by Wilson's Show Band. After marching up Victoria Avenue and down Baker St. the large crowd gathered around the President of the local union, John Galvin, who, mounted on a platform, told the citizens the object of the parade in a short speech. The statement given by the General Manager to the Nelson News to the effect that the union represents only 18 per cent. of the Company's employees was false and the union had taken this means to prove it. All who were intimidated into striking were asked by the President to acknowledge the fact by shouting "Yes." Nothing but "No" was heard on all sides. The crowd then dispersed.

A meeting was called to immediately follow in Joyce's Hall where the executive of the district union have promised to meet the merchants and discuss the labor trouble with them. This meeting is on as we go to press.

Mr. Christopher, president of the District Union, as we go to press, furnishes the following figures showing the strength of each union, Morrissey on Feb 7, 298 members; Michel, Jan. 1, 79, and Coal Creek, Feb. 14, 226. He also stated definitely that the Western Federation had promised through their representative, Mr. Baker, to give the strikers here its financial support. The local vote required was not 60 per cent. of the entire strength of the union but 75 p.c. of voters

SNOW SLIDES ALREADY.

Snow Blocked the Spur Line and Derailed an Engine.

Snow slides have already begun their work of obstruction, the spur line to the Coal Creek mines this week being blocked on Monday and Tuesday.

On Monday the regular morning train carrying the miners to their work was unable to get through the snow near the rock cut and was forced to back down to the town. Later in the day the snow plow which was employed on the main-line towards Crow's Nest came in and cleared the road.

On Monday night engine 344 without any footboard ran into a small snow slide near the old spur to the rock quarry. A terrible storm was raging and it was impossible for the driver to see any distance ahead. The snow was deeper on one rail than the other and the engine being raised on this side slipped off the rails. Much time was spent in trying to put it on with the simple contrivances at hand, and at last the rails had to be cut and the engine moved while on them, which was not accomplished until Wednesday morning.

The snow plow on Tuesday got into an ugly predicament. While clearing the road a slide came down behind it near the rock cut shutting the snow plow in between the pile of snow behind and the derailed engine ahead. A large force of men were employed for some time shovelling the track clear.

Owing to the trains failing to run on these days the miners did not get to work and the output from the mines was small.

HOCKEY AT CRANBROOK.

Crack League Team defeat the Locals 11-1 in a Fast Game.

The picked team from Fernie, Pincher Creek, Frank and Medicine Hat arranged to play Cranbrook on Tuesday evening and the boys got in a good practice as well as demonstrated their fitness to represent this end of the line at Rossland. The rink is small and only 6 men played, Kastner, probably the best all-round man in the aggregation being laid off.

The Cranbrook team though a little late in getting organized, put up a good game and no doubt would nave made a creditable showing in the league this season.

During the first half the Leaguers made six straight goals to nil and in the second half they piled up five more while Mothwell and Mallinson towards the end of the game managed to land the the puck into the visitors net. Motherwell, an old Fernie boy played a good game for the locals. Fair, C. Turnbull and Moore did the star work for the visitors the defence having a comparatively easy time.

MANAGER OF THE LE ROI IN TOWN

S. F. Parrish, manager of the Le Roi mine, was in town yesterday on business connected with the fuel situation. Mr. Parrish is also manager of the B. C. mine and the Northport smelter but has been connected with the Le Roi only a few days. He expresses great regret that this strike should now occur when the metalliferous districts were just getting into their best condition. He said he believed the Coal Company had done their best to give the smelters sufficient fuel. The present strike, if long would have a most disastrous effect upon his district. Probably 1200 men would be directly affected and many others indirectly.

While not professing to know anything of the differences between the contending parties he thought the strikers had not given sufficient forethought to the far-reaching effects of the strike upon the other parts of the province that were dependent upon the Crow's Nest fuel. Mr. Parrish said that their smelter at Northport had sufficient fuel for about three days. He had enough coal on hand to push development work in the mine for a couple of weeks after which everything would be shut down.

Greenwood, Feb. 11.—Telegrams received here this afternoon intimate that at the Crow's Nest Pass Co's mines all the men have left work and consequently everything is idle there. Both Greenwood and Boundary Falls smelters have sufficient coke and coal on hand and en route from the collieries to each run a single furnace two to three weeks. No particulars of the trouble at the coal mines have yet been received here.

MY HEART'S DARLING

BY W. HEIMBURG.

Lucie felt, though she said nothing, that she could not listen to it. However, that was but seldom; generally he retired to his room at nine o'clock, and then the light would shine out of the window by his writing-table into the quiet garden until late at night. He wrote scientific articles for a review; and then she sat by his mother and received every word of hers as if it had been a prick of a needle.

The physician has no Sunday. Lucie stood by the window and saw him get into his carriage. He looked up and bowed to her, then the vehicle went slowly up the lonely street, and she turned back into the room.

Of all the faces in the town that day none was certainly more dejected than that of Frau Counselor; from beneath her Sunday cap it looked sourer than ever. She had placed the coffee and cakes on the window-shelf, and was knitting with nervous haste, her expression growing more and more discontented as she looked out at the empty streets. Tante Dettchen sat in her accustomed place, her head resting on the back of the arm-chair, peacefully napping, her knitting still in the hand which had dropped at her side. Tick-tack! tick-tack! said the clock; but nothing else moved.

Lucie stood awhile before the glass closet, in which were delicately painted cups, little figures, napkin rings, and cake baskets, as also the silver wreath which the Frau Counselor had worn at her silver wedding. She now turned round and said:

"Adieu, dear mamma. I am going out."

The old lady flusheh up.

"Where?" she asked, although she knew perfectly well.

"To my friend—"

"Friend! Don't talk such nonsense, my child. I do not understand Alfred," she cried at last, giving utterance to her annoyance. "Day after day this running over there!"

"You know, mamma, she is not at all well, and has no one to go and see her. Alfred has allowed me—in fact he wishes it," she said, emphasizing the last words.

"I would like to know what is to be the end of all this! Why in the world do you need a friend? I should suppose you would have other things to think of. You ought to be busy sewing for your wedding; it is not the fashion with us to buy things ready made in the stores."

Lucie was silent.

"When I was engaged I only thought of my future husband. I gave up my girl friends; but you—"

Lucie stood a little while longer at the door; but the needles clicked without any more words, and she went out of the room. As she stepped out into the street a window opened and a shrill voice cried after her

"If the postmistress comes with her daughter, or any other visitors, I will send for you."

"Please do," said the girl, gently; but the window was already shut with a bang.

She went as fast as if she were being pursued, and entered the well-known door. In the archway she looked at the upper windows, and her face brightened up as if a ray of sunshine were passing over it as a dark-haired head leaned out. She rushed upstairs, and in the dim corridor she threw her arms round Hortense's neck.

"Thank Heaven, I am here at last!"

Frau von Lowen took off Lucie's dripping water-proof and drew her into the room. On the table by the sofa the spirit-lamp was burning under the silver tea-kettle, the teapot also of silver, and Meissen china cups stood on the embroidered cover; a sweet perfume seemed to pervade the room, and the soft, thick carpet made all steps noiseless.

"Ach! how beautiful everything is here by you! how restful!" said Lucie. "It strikes me anew, every time I come."

"Yes, it is cozy here, when the rain patters against the window-panes and the wind rustles in the trees. And then the high wall and the gate—thank Heaven, the cold, disagreeable world is shut out. But it is always home-like and cozy when we are with those we love. Formerly it often seemed to me like a hell here; do you know that?"

"Yes, I know it. But we will not speak of that to-day, Hortense."
