Members of the Alpine Club who visited Martin Creek Pass last Sunday report it an ideal picnicing locality. The pass lies about five miles northeast of Coal Creek on the old Doudney trail and the trip is much more easily effected than that to Island Lake or Sand Creek Pass.

Two raging torrents were crossed en route on precarious logs, and several of the ladies narrowly escaped being precipitated into the boiling waters. But the creeks are rapidly subsiding and within a week crossing will be an easy matter.

After crossing the creeks the party experienced no further difficulty. The path was at no point steep and they made rapid progress until near the summit, where a bear was seen to one side of the trail. Near this point the North Fork of Coal Creek leaps down from the pass in a succession of beautiful falls, descending at least 300 feet within a quarter of a mile.

The summit was reached at 10 a.m., and here the party remained until three in the afternoon. It's open park-like aspect and the abundance of water furnished by brooks descending from the adjoining peaks render the pass peculiarly suited to picnicing. The view afforded to the North, with Leach and Martin Creeks in the foreground and the peaks of the Dide on the horizon, was superb.

CATHOLIC CHURCH BAZAAR

Fernie, B.C., June 28 & 29, 1923

MRS. KLAUER—CONVENOR-IN-CHIEF

FANCY WORK BOOTH—Convenors: Mrs. Aiello, Mrs. O'Neill; assisted by Misses Corbett, Nicholson, Tabahak.

APRON BOOTH—Convenor: Miss K. Hughes; assisted by Young Ladies of Sodality.

FLOWER BOOTH—Convenor: Mrs. Harrington; assisted by Misses M. Hughes, L. Enright, K. Smalik, N. Waters.

TABLE OF HOME COOKING—Convenor: Mrs. Eschwig; assisted by Mrs. Culleton, Mrs. McLennan, Mrs. VanSacker, Miss M. Kennedy.

HANDKERCHIEF BOOTH—Convenor: Miss L. Mangan; assisted by Misses Caufield, Rudnicki.

ICE CREAM BOOTH—Convenors: Mrs. Turner, Mrs. Nicoletti, Mrs. Dixon; assisted by Misses M. Podbielancik, E. Sloan, E. Chubra, C. Demour, J. Bizutto.

FRUIT CAKE RAFFLE—Convenor: Mrs. Robichaud; assisted by Miss Susie Ross.

LEMONADE BOOTH—Convenor: Mrs. Herchmer.

FUTURIST BOOTH—Convenor: Mrs. Sloan; assisted by Miss K. Sloan. R. Caufield.

DOLL BOOTH—Convenors: Mrs. Connick, Mrs. J. Caufield; assisted by Misses V. Coughlan, B. Coughlan, A. Culleton, J. Charlebois.

FISH POND—Convenors: Mrs. S. Podbielancik, Mrs. Townsend.

CANDY BOOTH—Convenors: Mrs. Klauer, Mrs. B. Caufield, Mrs. Connell; assisted by Misses Fowler, C. Cody, R. Caufield, A. Corrigan, A. Podbielancik.

TEA ROOM—Convenors: Mrs. Mangan, Mrs. Staff. Wilson, Miss Colton; assisted by Mrs. Pierpont, Mrs. Beaulaurier, Mrs. Lowden, Mrs. Edgar, Misses J. Cody, A. Shuliaka.

TABLE OF USEFUL ARTICLES—Little Girls' Sewing Class.

SOCIAL AND DANCE

Last Night of Bazaar — Convenor: Mrs. Colton
Dancing 11 to 2 — Ingram's 5-Piece Orchestra
ADMISSION TO DANCE 50c
ELLEN DENISON—Secretary.

ADDITIONAL LOCALS

Jos. Longdon has moved into his new building.

Mrs. C. King and granddaughter left on Monday for Vancouver, where they will visit for a few weeks.

Annie Linn, daughter of Mrs. Harriet Jones, of West Fernie, was granted her divorce in Chicago, Ill., from her husband, George Linn, this week.

You have until June 25 to reserve your seats for the Dempsey-Gibbons fight at Shelby. Tickets are on sale at Ingram's Cigar Store.

Remember the dance in the Catholic Hall, Friday, June 29. Dancing 11 to 2. Ingram's 5-Piece Orchestra. Admission to dance 50 cents. Drawing of prizes earlier in evening at close of Bazaar.

The Co-Operative Society delivery rig reversed the usual order of things on Saturday morning last when it ran over an automobile standing in front of the Miner's Hall. The car was only slightly damaged.

Tommy Nelson, who was badly injured in an automobile accident last week, is rapidly recovering. He is still in the hospital and will shortly undergo an operation on a dislocated jaw.

At the I. O. O. F. Grand Lodge held in New Westminster last week, William Barraclough and Thos. Biggs, delegates from Mount Fernie Lodge No. 47, were appointed Grand Guardian and District Deputy Grand Master respectively, for the ensuing year. The 1924 Grand Lodge will be held in Vancouver.

Sandy Watson lowered the record of the Fernie Golf course by three strokes on Tuesday of this week. The previous record, which was also held by Mr. Watson, was 37. The par of the course is 35. His new record, which was made in a match with Sherwood Herchmer, was as follows: 4-4-5-2-3-4-4-5-3—34.

The new Durant Star has arrived in Fernie and is attracting a lot of attention at the Oldsmobile show rooms. This car comes in Touring, Roadster, Coupe, Sedan and Delivery Wagon. This light car has all the good points of the higher priced cars and is noted for its easy riding qualities. Anyone interested in the purchase of a light car should investigate the Star before buying.

Fernie footballers travel to Blairmore on Saturday in a league fixture. The following players are requested to be at Ingram's Gym not later than 2 p.m.: Swedeberg, Booth, Wilson, Robertson, Riley, Morrison, J. Joinson, Sharrock, Thornton, T. Joinson, A. Thomson, A. Dicken, G. Sofko. The game at Blairmore is scheduled to start at 6:15.

Changes in the affairs of the provincial police include the transfer of Inspector Parsons from Prince George to Prince Rupert and Inspector Dunwoody from Fernie to Nelson. Both these officials have had long and meritorious careers in this province. Before long the provincial police will be in uniform. Attorney-General Manson is now deciding upon the uniform to be worn.

NOTICE

To Whom it May Concern:
Take notice that my wife, Rose Ann Sylvester, having left my bed and board, I will not be responsible for any debts contracted by her.
je1|3. Mr. Frank Sylvester.

THE DAILY SHOWER

is conducive to health, as all doctors agree. Let us install a hot and cold water shower bath in your bathroom and you will find pleasure and physical benefit therefrom. A modern all-porcelain bathtub and footbath ought to be in your home also.

Health turns the clock backward

You Can Prevent That Hay Fever Suffering

Health Talk No. 23
By G. J. Parks, D. C.

Why should chiropractic succeed with hay fever when everything else has failed? The question is a natural one and there is an equally sound and natural answer for it. Chiropractic is utterly different from all other methods. There is no substitute for it.

In hay fever there is a lack of resistance to the irritation caused by the flying pollen of summer that infects the weakened linings of the air passages. When this resistance is normal it easily and readily throws off this infection. Only about one person in twenty has hay fever, because about nineteen out of every twenty persons have enough resistance to overcome the infection. Chiropractic spinal adjustments release the full degree of nerve energy to the tissues and linings of the air passages and with normal resistance thus established hay fever is defeated.

Well Now of Rose Cold in June and Hay Fever in August

"From the time I can first remember every summer brought hay fever. My trouble would start with rose cold in June and by August I would be talking like a rubber door mat, feeling perfectly miserable and yet perfectly helpless, for nothing ever did me any good. My nose would swell and my eyes were inflamed. I hated the sight of a mirror for I looked like a funeral. And then I began using chiropractic and got well. I knew what it was to breathe like a human being in August. That was three years ago. Two years ago I had no trouble at all. Last year I had a touch of it and chiropractic promptly squelched it. It will never worry me again."

—Miss Ada Rubush—Chiropractic Research Bureau Statement No. 1362F.

The ideal sport suiting, pure wool, 56 inches wide, in all the plain colors as well as other combinations that are very attractive for sport wear. Regular $2.50—

Special $1.75 Per Yard

WOMEN'S SILK HOSE

Women's pure thread silk hose, Pointex heel, in black, suede, grey and tan, beaver and camel—

Special $1.95 Per Pair

WORLD'S DAIRY CONGRESS

The 17th annual National Dairy Exposition of the United States will be held at Syracuse, N.Y., on October 5 to 13.

The World's Dairy Congress, to which the President of the United States has invited all the leading Nations of the World to send delegates, will convene in Washington, D.C., on October 2 and 3; at Philadelphia on the 4, and then at Syracuse in conjunction with the Exposition on October 4 to 10, inclusive.

The people of the Dairy industry of the World are most cordially invited to attend this Exposition, which affords a comprehensive view of the American Dairy Industry.

Many amateur gardeners who have worked hard to get the soil in their back yards in condition for planting are convinced that it has adopted the German policy of passive resistance.

According to an ordinance in force in an Ohio city, cats are required to wear collars bearing their owner's name. In an alley fracas with dogs the necklet would be a handicap for pussy.

All things do not come to those who wait. A New York waiter, who accumulated $60,000 in tops after 18 years' service, invested his entire savings in stocks and lost his entire fortune in a few weeks.

COMPLETE ALL ARRANGEMENTS

Final arrangements for the Dominion Day Celebration next Monday were made at a meeting of the Celebration Committee held in the Council Chambers last evening.

The competition now running for the honor of Dominion Day Queen will definitely close this evening at 10 p.m., and the winning candidate will be announced as soon as the votes can be counted. The returning officers will be in the City Hall this evening from 8 to 10 p.m. to receive the final returns. The prize list in this competition is as follows:

1st—Dominion Day Queen. A dress presented by Trites-Wood Co.; shoes, silk stockings, gloves and lingerie, presented by the Crow's Nest Trading Co.

2nd—Lady-in-Waiting. Pearl Necklace, valued $25.00, presented by A. C. Liphardt.

3rd—Lady-in-Waiting. One dozen photographs, presented by J. Fred Spalding.

4th—Lady-in-Waiting. Three pairs silk stockings, presented by A. F. Haddad.

5th and 6th—Ladies-in-Waiting.

In the Football Competition for the watches and cups, entries have been made by Fernie, Coal Creek, Michel, Cranbrook, Corbin and Coleman, which will give at least five games of football.

The Senior baseball competition for the $200 prize will be decided in a knock-out game for the one big prize between Fernie and Kimberley.

Junior baseball for the $50 prize will be played by the Michel and Fernie Juniors. Cranbrook being unable to compete.

The Amusement committee reported that they are lining up a large number of cocoanut shies-Aunt Sally games and other amusements on the sports' ground.

It was with great regret that the committee who have been endeavoring to secure the necessary fireworks for the evening display reported that these were unobtainable in Western Canada or Spokane. Seattle was the nearest point but to import fireworks from the United States it was necessary to secure a permit from Ottawa and then only freight shipment would be permitted so lack of time compelled them to cancel this section of the program.

The parade will commence at the Central School grounds promptly at 9:30 a.m., and all intending participants should be at that point at 9:15 at the latest. The route as outlined in last week's Free Press will be followed and the committee again urge that the stores and dwellings along the line of procession help the spectacle by decorating their premises.

The following list of public-spirited business firms and citizens have subscribed to the prize list fund:

The Crow's Nest Trading Co.	$50.00
The Trites-Wood Co.	50.00
Fernie-Ft. Steel Brewing Co.	50.00

Officials in the B. C. department of labor in their annual report show that in 1922 there were only a dozen disputes involving a stoppage in work and that comparatively little time was lost during the year through strikes. The government labor bureaux are endeavoring to supply the needs of employers and a better feeling is now existing.

HON. W. J. BOWSER COMING JULY 5

The Hon. W. J. Bowser and a number of other Conservative leaders, including J. W. Jones, M.P.P., W. K. Esling, M.P.P., J. H. Schofield, M.P.P. and Col. Lister, M.P.P., will address the electors of Fernie in the Grand Theatre on Thursday evening, July 5 and discuss the leading questions of the day.

The party, who are making a tour of the province, will be at Michel and speak at the Opera House on Wednesday evening.

Every elector should make it a point to hear these gentlemen.

COURT OF APPEAL SUSTAINS DESCISION OF JUDGE THOMPSON

Lawe & Fisher, solicitors for a large number of the workmen who were recently employed by the Ross-Saskatoon Lumber Co., Limited, in logging operations at White Sulphur, have just received word that the Court of Appeal has dismissed the appeal of the Royal Bank of Canada from the decision of His Honor Judge Thompson refusing the Bank's application to set aside the Plaintiffs' service of notice of the proceeding upon the Inland Empire Paper Company, of Spokane, Washington.

The case is an interesting and complicated one, owing to so many different parties claiming a share of the money, amounting to approximately thirty thousand dollars still owing by the Paper Company for the logs. As the logs have been shipped out of the province the workmen are claiming payment of their wages direct from the Paper Company under certain provisions of the Woodman's Lien Act, which provides that every person making any contract with any other person for the purpose of obtaining logs, by which it is necessary to employ workmen in obtaining such logs, shall, before making any payment for such, require a receipted payroll and, in the event of the wages being unpaid, shall retain for the use of the workmen the amount due them respectively. The owners of the timber cut, for whom Messrs. Herchmer & Mitchell are acting, are also claiming payment of a large sum to them for royalty, but this claim is being made subject to the prior payment of the wages. On the other hand the Royal Bank of Canada, according to the defence which it has filed, is claiming all the moneys under an assignment of book accounts in writing dated the 22nd day of August, 1917. All claimants to the money have just received notice that the Paper Company intends to apply to the Court next week for an order allowing it to pay the moneys owing by it for the logs into Court, in order that the claimants may then fight the matter out themselves as to the disposition of the money.

The government have appointed Mr. W. A. McAdam, assistant deputy minister of finance, as secretary and assistant to Agent-General F. C. Wade in London. A strong campaign will be carried on to interest Britishers in settling in British Columbia and directing capital to this province. Mr. McAdam will tour the province before leaving for London, in order to familiarize himself with conditions here in every branch of industry.

MYSTERIOUSLY DISAPPEARED

One of the most mysterious affairs that ever happened in this city occurred early Wednesday morning, when Frank Gilbert, a resident here since the big fire in 1908, left his home and has not been seen since.

At four o'clock Tuesday afternoon, Gilbert was united in marriage to Mrs. A. Monks, of West Fernie, and after the ceremony the newly married couple and a large number of guests went to the residence Gilbert purchased some time ago on Riverside Avenue, in West Fernie, where the wedding supper was served. Gilbert partook of a heavy meal, but remarked to one of the guests that it was the biggest meal he had taken for some time and that he would certainly pay for it the following day. He has been troubled for several years with acute indigestion and he was apparently afraid of the consequences from over-eating. The guests were not all out of the house until eleven thirty p.m., Tuesday night. At three a.m., Gilbert got up and pulling his trousers and coat over his pajamas and putting his shoes and hat on, he said he was going out for a few minutes only, but failed to return. Mrs. Gilbert was not seriously alarmed when he did not return during the next hour, thinking that probably some of his bachelor friends had waylaid him for a practical joke. When he failed to put in appearance at dawn, she began making enquiries at the neighboring residences but this failed to bring any light upon the prolongued absence of her husband. Provincial police were notified, but they too believed that a practical joke had been played and made extensive investigations along those lines but after twelve hours had elapsed without locating the missing man, large search parties were organized and the city and surrounding country was carefully combed without success. Late Wednesday night the Provincial Police telegraphed to the Alberta Provincial Police at Lethbridge, requesting that an officer with two bloodhounds be sent to Fernie and were assured, that this would be done meanwhile search parties continued their work and early Thursday morning, J. Puckey and H. Dawes found Gilbert's hat, caught by a bush, in the river about three hundred feet south of the West Fernie bridge on the south bank of the Elk.

The bloodhounds, in charge of A. P. Constable McWilliam, of Coalhurst, arrived on Thursday morning's train and two unsuccessful attempts were made during the day to pick up the trail. This was probably due to the dogs being upset by the train journey and the intensive heat during the afternoon. In the evening, "Queenie," one of the bloodhounds was taken out alone and picked up the scents leading over the fence in the rear of Gilbert's residence, along an alleyway under the G. N. trestle bridge and back on to Riverside Avenue. The trail led through T. Owen's garden over a couple of fences then back across Riverside Avenue into the bush. Here, apparently, the scent was strong, for the dog set off at a brisk pace, leading along a beaten path to the edge of the slough, in the bed of which, footprints were plainly visible, leading across it. On going through the water, the dog quickly regained the scent and led to a point about three hundred yards above the G. N. bridge where a gravelled slope led into the river, abruptly wheeling, the dog followed a beaten path along the bank to the north for about fifty yards and stopped where an opening in the bush led directly to the river. About half-way down the bank two heel marks were plainly visible, indicating that someone had sat on the bank at that point, the bloodhound evidently satisfied that the party doing so was the man she was tracing.

What happened is a matter of conjecture, a branch of a tree hanging in the river at this point was broken, the water is extremely deep, swirling over a fallen tree and digging deep into the bed of the river. If Gilbert fell into the river at this point, it would have been absolutely impossible to regain the bank, and the body would have been carried out to mid-river. The fact that his hat was located on the opposite bank, wet and covered with sand, and that his trail followed by the bloodhound failed to indicate that he had crossed the bridges, seem to leave no doubt but that Gilbert has been drowned.

Search parties are now keeping a continuous watch all along the river but high water makes it impossible to institute dragging operations at present.

The profound sympathy of the entire citizenship goes out to Mrs. Gilbert in the terrible suspense she is now undergoing.

AN ISSUE FOR PLEBISCITE

The Senate has chosen the logical course in dealing with the attempt to put an end to the right of the private importation of liquor into Provinces where Government Control laws are in force. It is a question for the people to decide. The whole issue of Prohibition, in any shape or form, has been thrown into the melting pot of a fluctuating public opinion, and there it seems destined to remain, chopping and changing with the years. Since the principle has been laid down that in Canada each Province shall decide for itself on the issue of Prohibition, that principle, if it is to be observed in its entirety, involves a plebiscite on any such radical course as a departure from a right laid down in the British North America Act. It is true a plebiscite is a costly performance. If there is an overwhelming demand on the part of public opinion to make the Provincial Government's monopoly of the liquor traffic airtight, the expense incidental to a plebiscite will not be objected to by the people.

One of the gravest dangers involved in a Government's airtight monopoly of the liquor business has been drawn attention to by Senator Taylor, of New Westminster. He points out that the legislation designed to put a period to private importation would, if adpoted, "create a number of mushroom distilleries in British Columbia and provide an immense corruption fund." It is idle to deny the possibility of this, no matter what protestations of pure-hearted innocence our legislators might make. In the Senate debate on the Bill to amend the Canada Temperance Act, the same old perennial discussion on what the people of this Province meant by their decision in favor of Moderation was again aired. Senator Barnard, of this city, said they did not mean to deprive themselves of the right of private importation. As to whether they did or did not we are unaware, but what we know is that the people did not intend to put into the hands of the Government any authority, or inclination, or temptation, to use the control of liquor for the purposes of creating a party campaign fund. The possibilities of this are to be deprecated in every possible way.

It is now a matter for the Provincial Legislature to decide if there will be a plebiscite on the right of private importation of liquor. There is no real need for such a plebiscite before a general election is held. In conjunction with a general election the expense involved would be greatly lessened as compared with what would be incurred were a plebiscite held at another time. The fact is that a plebiscite would probably cost the people of British Columbia $100,000 if held at any time other than when a general election was in progress. The Legislature will decide if it believes the people should be involved in such expense at this time. The state of public opinion in the Dominion on this whole question of further prohibitory legislation of any character is distinctly one of unrest. Governments are showing a tendency to exhaust the patience of the people by harassing legislation and sumptuary laws which are proving disturbing factors in the social, economic and political life of the nation.—Victoria Colonist.

PUBLIC SCHOOL PROMOTIONS

The promotion lists for the various grades in the Fernie Public Schools follow. The list of students who have been granted honor promotion to High School, as well as the list of those who have been successful in passing the Department examinations, will be announced later by the Department of Education.

Considering the fact that the double-shift system has been in force in six rooms, the number of pupils who have been promoted is still quite large. The promotion or non-promotion of each pupil has been discussed by a committee consisting of the class teacher, the principal and the vice-principal, and in each case the course has been followed that seemed best for the progress of the individual child.

The names in each class are given in order of merit. The mark (*) after the child's name indicates conditional promotion.

Promoted to Grade 8—A. Mills, J. Stropky, M. Tully, J. Beck, N. Wallace, H. Polak, H. Murry, H. Vines, R. McIntyre, W. Brown, A. Smalek, A. Aiello, A. Large, K. Chubra, H. Large, C. Mangan, H. Naismith, J. Derbyshire, E. Taylor, J. Carlson, H. Hesketh, W. Hilton, A. Mogielka, M. Miscisco, G. Ash, E. Scarpino, L. Herchmer, P. Zuliani, J. Kubenic, S. Mesura, D. Pearce, O. Kennedy, L. Beale, N. Parkinson, A. Fisher, J. Liphardt, H. Pearce, V. Parsons, D. Bean, J. Hilton, E. Peterson, E. Peters, R. Shenfield, W. Turner, D. Harvie, H. Harrison, J. Bushell, E. Allen, E. Dodd, A. NAMES OF PUPILS RECEIVING HIGH SCHOOL PROMOTIONS

In addition to the following names, the Department of Education gives pupils not promoted the opportunity to write on the Provincial Examination of their grade. Names of any pupils successful in these examinations will be published in a later supplementary list:

From Grade IX. to X.

Gladys Bean, Florence Braithwaite, Madeline Chardon Emma Chubra, Dorothy Cheston, Dorothy Corrie, Margaret Crossman, Margaret Davies, William Duncan, Havelock Fleming, Roswell Garner, Margaret Irvin, John Lucas, Florence McDonald, May Maltman, Albert Markland, Jack McPhee, Joseph Parker, Elsie Puckey, Jessie Robertson, Mabel Rogers, John Ross, Jack Smith, Annie Smolak, Jim Strachan, Julia VanSacker, James Venables, Lily Wiltshire, Hilda Woods.

From Grade X. to XI.

Mary Balok, Mabel Barton, Margaret Birkett, Edna Brett, George Cameron, John Corlett, Lillian Dicken, Edna Edgar, Lily Graham, Paul Kasmar, Robert Kerr, Alice Miller, Dan Robertson, Louie Rudnicki, Leon Ruschall, Catherine Tully.

HOLY FAMILY SCHOOL NOTES

On Monday evening, a large and highly interested audience attended the closing exercises at the Holy Family School. After a short address by the chairman, Mr. Bernard Caufield, the following lengthy and varied program of music, recitations and songs, was greatly enjoyed by all those present:

Piano Duet—Misses Millie and Rose Caufield.

Chorus: "Welcome"—Senior Girls.

Recitation: "Stubborn Donkey"—Second Grade Boys.

Vocal Duet—Misses Lena Fuoro and Jean Riley.

Indian Drill—Senior Boys.

Song: "Creep Mouse"—First Grade Girls.

Recitation: "Jack's Letter"—First Grade Boys.

Vocal Solo—Yolande Nicoletti.

"Our Dollies"—Nine Little Girls.

"The Message of The Flowers"—Third and Fourth Grade Girls.

Vocal Duet — Miss Catherine and Master Billie Wilson.

Song: "This Letter is For My Papa" —Second Grade Girls.

Recitation: "Mixed Order"—Joseph Nicoletti.

Address of thanks—George McGill.

"O Canada"—Senior Girls.

The youthful performers gave all evidence of very careful training and the manner in which they acquitted themselves reflects great credit on the untiring efforts of their teachers.

At the conclusion of the program, the prizes were presented by the Chairman, assisted by Mr. Sweeney.

Special Prizes were awarded the following pupils:

Medal for Christian Doctrine, donated by Mr. J. O. Patenaude, Nelson, B.C., won by Mary O'Neill.

Deportment—Nancy Hughes.

6th Grade — 1st in class: Teresa Sangala.

5th Grade—1st in class: Josephine Spaniol; 2nd: Millie Nicoletti; 3rd: George McGill.

4th Grade—1st in class: Catherine Wilson; 2nd: Mary Harwood; 3rd: Stephen Kasmar.

3rd Grade — Christian Doctrine: Frank Hughes. Deportment: Rosey Spaniol. 1st in class: Evelyn Aiello; 2nd: Emma Shulaika; 3rd: Margaret Bella.

Junior 3rd — 1st in class: Stephen Sikora; 2nd: Reno Zuliana; 3rd: Josephine Fucco.

2nd Grade—Christian Doctrine: Robert Cresafio. Deportment: Irene Harrington. 1st in class: Jane Riley; 2nd: Victoria Chubra;. 3rd: Henry Kasmar.

1st Grade—1st in class: Stephen Serek; 2nd: Angelina George; 3rd: Geraldine Denison.

Receiving Class—1st in class: Virgina Bella; 2nd: Aisle Rahal; 3rd: Frank Butalo.

Promotion List

Receiving Class to Grade 1—Virginia Bella, Aisle Rahal, Frank Butalo, Paul Garacht, Victoria Perry, Tony Paulus, John Hughes, Palmira Perry, George Townsend, Christina Heckler, Joe Zaffa, Joseph Nicoletti, Maggie Fucco, Patsy Perry.

Grade 1 to 2—Stephen Serek, An-

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicants makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

CRANBROOK HAS BUILDING BOOM

CRANBROOK, June 21. — Cranbrook is experiencing quite a brisk building boom in business and residential structures. In the section near the C. P. R. station, a large rooming house, three stories in height, has been completed and is occupied practically to capacity. The two upper floors are used as a rooming house, and the ground floor as stores. Another brick veneered rooming house is nearly completed in the same section. This one is similar to the completed one and will be greatly in demand as soon as completed. Another three-storey building is proposed for a site adjoining the Chinese Masonic Temple on Durick Street. The Bowness store on Baker (Main) Street, has been raised, a new concrete basement and full basement made and a new floor laid. This store is about to be taken by local merchants for store purposes. In the fourth block from the station, on Baker Street, a fine three-storey solid brick hotel building is in course of erection at the present time and will be completed in about two months' time. The owner, Mr. Theodore Clauson, who has been in the hotel business for some years in Yahk and other places nearby, will conduct the hotel when completed. The building is being constructed of Redcliffe pressed brick and has a very attractive and substantial appearance. On Norbury Avenue, near the theatres, Joseph Jackson, of this city, has just had a frame, iron-covered store building erected which will be occupied when completed by a shoe merchant. Mr. Joseph Walkley, meat merchant has also doubled his store capacity and is letting a small store to Mrs. W. W. Wolfer and Siter, to be operated as a confectionery and ice cream parlor. Many new and permanent residences have been already constructed and several others are in course of construction with many others under contemplation. Even in face of the building which has been done, housing accomodation is still at a premium.

OPPOSES U. S. COAL MINES

CHEYENNE, Wyo., June 25.—(By Associated Press.)—In a discussion here today of the nation's coal problems in which he mentioned the industry, the consuming public and the government's interests in all phases of coal operations, President Harding recorded himself as being opposed to "nationalizing the mines," and declared that the United States coal commission would bring the country "a new understanding" of the problem and point out a solution " in behalf of a vital public interest."

The chief executive spoke from the observation platform of the car in which he came here from Denver to his first Wyoming audience. He also mentioned the problems of the live stock producers of the state, the wool interests and called attention to relief measures which he said congress and the war finance corporation had given after war's inflation and later deflation.

The biggest need of the world today, the president said, was work, adding that the world has no use for a loafer, big or little, "whether commanding capital or directing labor."

"It may seem a far cry to talk about the coal problem in Wyoming, but it is one of the pressing questions of the country. In New England today there is anxiety about next winter's fuel suply, traceable to the experienced hardships of last winter. That severe trial to New England in particular, followed the coal and railroad strikes, when winter came on with inadequate supply and insufficient transportation facilities.

The governwent is not blind to the situation or deaf to appeals. It is doing everything possible, so far as authorized by law, to dispel public apprehension. Under the authority of an act of congress, the United States coal commission, made up of able and earnest men, has been engaged in a thorough investigation of this vital problem and will report to the Congress next December. It is going thoroughly into the labor controversy, studying living conditions and the community life in the mining regions, ascertaining facts about the inadequacies which prevent prompt distribution, inquiring into engineering problems and the economic errors incident to over-development, looking to the excesses in profits reflected in inordinate charges for coal and preparing an exhaustive report of the entire industry. It will be revealing and we hope remedial. We shall know the facts about a basic industry, which is the source of peril to the nation's industrial life, and a more or less continuous threat to our domestic comfort, sometimes a menace to life and health.

"It is too early to say whether the commission will suggest plans or permanent cure which congress will adopt. I do know that it will bring us to a new understanding of a problem which must be solved. We shall have a publicity which will make greed impossible and point the way to solve a question which must be answered in behalf of a vital public interest.

"Doubtless there will be a recommendation of vast storage during seasons of light consumption, to guard against the heavy needs in winter or in suspended production. Probably there will be recommendations for enhanced distribution, the need for which is already proven. There may be revelations as to cost of production, which will destroy price making abuses through insistant public opinion. I hope for the revelation of the economic blunder in operating mines half and quarter time by which the higher labor costs are made necessary.

"Meanwhile, we shall the better guard against inconvenience and hardship if the consuming public will help as best it can, without expecting the government to assume all the responsibility.

"If the coal consuming world would buy coal during the periods of scant consumption it would guard itself against price panics and dangerous shortages when consumption is at the peak. In the hope of lowered prices buying is postponed and that very postponement is contributive to a decided price increase. There is need for some individual initiative and responsibility in preparing for the wintry days to come. There is a mistaken notion that somehow the government may wield a magic wand, or strike with the iron hand and produce cheap coal. It can do neither. You can no more force the mine worker to produce coal than you can enforce the farmer to grow wheat or corn, or wool. We saw that erroneous belief exploded a year ago.

"Many mine operators, who were as much responsible for the strike as the workmen who struck, insisted that under law enforcement they could produce all the coal that was needed. The law enforcement was provided, but no coal was produced. There can be no coal mining in free America under force of arms, but if we understand the situation fully and offer justly and men accustomed to produce coal will not work to meet the public need, the public will produce their successors.

"The common weal transcends every other interest and puts aside every obstacle. We will find the solution. I hope we shall find it without further hardships or endangered life or menaced industry. But we shall not find it in nationalizing the mines. That would be only another step to the national paralysis which a sane American will everlastingly avoid. Nor shall we solve it by maintaining a basic industry, like that of bituminous coal production, under a plan of operation which affords the mine workers only a hundred and fifty working days a year. The normal man, can not live that way, even though he is paid what is seemingly a generous wage, because his wage days are not ample for a life of honest industry and becoming thrift.

"Such a problem is very insistent. It can not be dodged nor solved in demagogy. It demands our best thought and all our courage. Let us hope that in the search for a way to do full justice in dealing with coal, we may find a suggested plan for dealing with kindred problems which are ever menacing our industrial peace and hindering our full accomplishment."

But the result was a cream in 5 distinct ways better:

It softens the toughest beard in one minute—without rubbing in.

Multiplies itself 250 times in rich lather.

Lather will last 10 minutes on the face.

Strong bubbles hold hairs *erect*—for easier cutting.

Skin is left soft and soothed by lotion-like effect of palm and olive oils.

If PALMOLIVE SHAVING CREAM does all this you will *want* to know it. If it doesn't—well, *we* are the losers. Mail coupon for free tube today.

SCHOOL GIRLS TAKE UP HYGIENE STUDY

On Friday, June 22, in the upper corridor of the Fernie Central School, 35 Certificates were presented by Dr. Garner to the Infant Hygiene Class, which is in co-operation with the Public-Health Nursing Service of British Columbia and of which Miss Thomasina F. Donald, R. N., acted as instructor. Miss Jean Liphardt, with 99%, succeeded in carrying off First Prize, a fountain pen presented by Mr. R. S. Phillips; Miss Huberte Large with 96%, gained Second Prize, a silver Eversharp pencil, presented by Miss C. B. Walker and Miss Mary Tully secured Third Prize, a manicure set presented by Mrs. A. Cummings.

The following includes the names of all those gaining certificates with 75% or over and are in alphabetical order and not in order of merit:

Melba Agnes Allen, Isoline Andrews, Margaret Helen Brown, Evelyn Borelli, Annie Blinston, Jessie Margaret Beck, Mary Currie, Anita Julia Carolla, Daisy Drew, Jeannie Derbyshire, Mary Elizabeth Easton, Elizabeth Galloway, Mabel Harper, Lillian Mary Haigh, Mary Haigh, Jean Liphardt, Huberte Mary Large, Marion Mangan, Anna Katherine Mogielka, Mary Miscisco, Elizabeth Naismith, Emma Peters, Doris Pearce, Mary Phillips, Ellen Johana Peterson, Erma Mary Scarpino, Gladys Shorthouse, Edith Helen Shorthouse, Dorothy Terry, Mary Tully, Rena Mary Taverna, Daphine Elizabeth Todd, Gladys Wilson, Mildred Woodhouse.

Resenting the published statement that he used a well-known beautifying face pack, a Los Angeles movie star asks for $70,000 damages. No, it is not Bull Montana.

Coated Tongue
Nature's Warning of Constipation
When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.
Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.
Nujol
A LUBRICANT—NOT A LAXATIVE

WATER NOTICE

Use and Storage

TAKE NOTICE that F. C. Limbocker, whose address is Jaffray, B. C., will apply for a licence to take and use 100 acre feet and to store 5 acre feet of water out of Little Sand Creek which flows South and drains into Big Sand Creek about 1½ miles South of Jaffray. The storage-dam will be located about 300 feet South of Government Road. The capacity of the reservoir to be created is about 5 acre feet, and it will flood about 1 acre of land. The water will be diverted from the stream at a point about 300 feet South of Government bridge and will be used for irrigation and power purposes upon the land described as portion of sub-Lot 3, South of Government Road and West of Sand Creek. This notice was posted on the ground on the 19 day of June, 1923. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fernie, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is June 22, 1923.

F. C. Limbocker,
Applicant.

ADDITIONAL LOCALS

A. C. Lawrence, of Nelson, is in town today.

The High School and Entrance Examinations were held this week.

Ralph Connor has written a new novel. It is a tale of the Windermere Valley.

Mrs. J. Turner has opened up the Walde Boarding house, opposite the Baptist Church, this week.

Miss Marjory Broley, of Victoria, is home spending the summer holidays with her parents.

Stan Lowden will have his new meat market completed and open for business in the Vets' old stand on July 3rd.

Mrs. Workman accompanied by Masters Allan and Ross, is leaving for Vancouver tomorrow to spend the summer. Ross will accompany his Uncle and Aunt on a motor trip through California and Mexico.

Word was received today of the sudden death of Mrs. Geo. J. Clark, of St. Andrews, N.B. Mrs. Clark was the sister of Mrs. (Dr.) Bonnell and was well known here, having visited her sister frequently.

All entries in the Fernie Beautiful Contest must be handed in by tomorrow, June 30. Entries may be made to any of the committee, N. E. Suddaby, A. Klauer and P. Sheffield, or any school pupil. All ready! Let's go!

A meeting of the ex-members of the 54th Battalion will be held in the office of G. G. Moffatt, Victoria Aenue, on July 5, 1923, at 8 p.m., for the purpose of forming the 54th Battalion Association. All members are requested to attend.

As Saturday, June 30 is the last day for payment of taxes to avoid penalty, the City Clerk's office will remain open on that date until 5:30 p.m. instead of closing at 1 p.m., the regular Saturday closing hour. Any taxes left unpaid at the close of business at 5:30 p.m., Saturday, will be increased by ten per cent.

Through the efforts of Hon. E. D. Barrow, minister of agriculture, surplus British Columbia berries will find a ready market in Great Britain, where jam manufacturers require large quantities of raw fruits between June and October. The fruit will be pulped and shipped in sealed tins. Agent-General F. C. Wade advises provincial growers to make a closer study of British markets.

An Alpine Club party will leave for the peak of Mt. Proctor next Sunday morning. The party will start from the home of the Misses Kirkpatrick, 75 Pellatt Avenue, promptly at 7 a.m. Persons intending to make the trip should prepare two lunches the evening before, as the party will breakfast at the foot of the mountain and lunch again at noon under the summit.

The Dominion Day Queen Competition will positively close at 10 p.m. on Friday, June 29. City Clerk, Mr. A. J. Moffatt, who with Chief Anderson, is acting as Returning officer, will be at his office from 8 p.m. until 10 p.m. on the date set for the closing of the polls, to receive all ballots and cash returns from the sale of same. Positively no votes will be credited to any candidates unless placed in the hands of the Returning officer by 10 pm., Friday, June 29. To be valid, the cash equivalent of all ballots cast must be in the hands of the Returning Officers by that time. Any votes not accompanied by the cash will be declared spoiled.

An ordinance fixing the minimum temperature in apartments and flats at 70 degrees during the winter season has been adpoted in Grand Rapids. It will not be effective until approved by the Janitors' Union.

PENTECOSTAL MISSION

Sunday services—11 a.m. and 7:45 p.m. Evening subject: "The Missing Wedding Garment."

CHRIST CHURCH

1st July, 1923—5th Sunday after Trinity.

11 a. m. — Choral Communion: "Thanksgiving."

7:30 p.m.—Even Song: "Divine Lessons in Nature."

10:15 a.m.—Sunday School.

IN MEMORIAM

In loving memory of Bryan Ward, who died in Fernie, B. C., on June 10, 1922.

Blessed are the dead who die in the Lord.

—Inserted by Mr. and Mrs. E. H. Ward.

STOMACH SUFFERING

disappears as if by magic when Jo-To is used. Gas pains, acid stomach, sour stomach, burning and all after-eating distress relieved in two minutes. All Drug Stores.

SAVED FROM AN OPERATION

Restored to Health By Taking "Fruit-a-tives"

Made of Fruit Juices and Tonics

The most convincing proof of the true worth of "Fruit-a-tives" as a medicine for women is found in the letters written by them to "Fruit-a-tives". For instance:

"I suffered with all the symptoms of female trouble, pains low down in the back and sides, constipation and constant headache. A doctor advised an operation. I started taking "Fruit-a-tives" and this fruit medicine completely relieved me of all my misery".

Mrs. M. J. GORSE,
Vancouver, B.C.

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

MAJOR-GENERAL LECKIE PASSES AWAY IN VANCOUVER

VANCOUVER, June 22. — Major-General R. G. Edwards Leckie, soldier and pioneer mining man of British Columbia, died in St. Paul's Hospital tonight. He had undergone a serious operation. He was in his fifty-fourth year.

Major-General Leckie underwent a serious operation last Thursday in the hospital, and grave fears were entertained from the first as to his recovery. He had previous to that been operating a mine at Chu Chua, north of Kamloops.

He was a native of Halifax, where he was born in 1869. After taking a technical training he was engaged in various engineering and mining works in the East.

He came to British Columbia in 1896, and in 1903 went to Somaliland, East Africa, exploring and hunting big game.

He served in the South African war and during the late war. He commanded the 16th Canadian Scottish for a time, and later served on the staff.

After the war he returned to Vancouver again and engaged in his old calling of mining engineer. He became interested in Stewart properties a few years ago, and later went to the Chu Chua, where he was engaged at the time of his taking ill.

CARMELO'S MUSICAL COMEDY CO. AT GRAND ON SATURDAY

Fred Carmelo's Musical Comedy Co. will return to the Grand on Saturday evening, presenting a new musical show entitled "A Fool's Advice." The Carmelo company appeared at the Grand on Saturday last in "Bubbles," and has announced its intention of returning to Fernie on Saturday of each week with a change of play on each visit.

The Carmelo show is a stock organization which has appeared in the larger eastern cities during the past eight years, its most recent engagement being at Calgary, where the company appeared for twenty-six consecutive weeks. The company returns to Calgary in the fall and during the summer interval is playing a circuit of towns in "rotary stock," returning to each town on the same night of each week with a change of program on each occasion. Judging by the favor which the show elicited by its presentation of "Bubbles" last Saturday, its weekly visit every Saturday night should become a popular feature with local theatre-goers.

The company presents a musical of recognized comedy and vaudeville features lasting two hours. On Saturday night two complete shows will be given, the first from 7 until 9 o'clock and the second from 9:30 until 11:30. The early show will enable visitors from out of town to catch the 10 o'clock train home, while the late show will be appreciated by those who will not be at liberty until the stores close.

HENRY FORD HAS NEW "GAS"

DETROIT, Mich., June 25.—Backed by Henry Ford, a plant for the low temperature distillation of coal, whereby a ton of coal is expected to yield as high as 10 gallons of motor fuel as a by-product is under construction at the Ford foundry at Walkerville, Ontario. This announcement was made today by Wallace Campbell, president of the Ford Motor company, of Canada.

The foundry which will cost, it was said, approximately $500,000, will distill about 400 tons of coal daily.

The motor fuel by-product, which its inventors claim, way be as universally used as gasoline, will be distilled from the coal without affecting the fuel value of the residue. This residue will burn as well, or better, it is claimed, as the "raw" coal.

Mr. Ford recently said in a statement that he would show the world how to burn coal twice.

The voracious catterpillar would be an easy winner in a non-stop foliage-consuming contest.

LOCAL & GENERAL

W. R. Wilson is at the Coast on business.

A marriage license was issued yesterday to Donald Vroster and Jane Mason, of Elko.

C. E. Davis and Fred Adolph, of the Beck Petroleum Co., of Shelby, were in town on Monday and Tuesday.

Rush, Adamson, who has been in the East, arrived back in Fernie on Wednesday.

Miss G. Call, of Vancouver, is visiting in the city, the guest of Mr. and Mrs. H. McLachlan.

J. S. Irvine, of the Coal Co. staff, was in Winnipeg this week on business.

The Misses McKenzie, of Calgary, are the guests of Mrs. James Marshall.

J. W. Robertson returned on Saturday last from a month's holiday with his son at Burton City.

Miss Mary Liphardt, of the Calgary General Hospital staff, is expected home Sunday morning to spend the holidays with her parents.

Miss Edith Bonnell, who is attending school at Vernon, will be home Sunday morning for the summer holidays.

The regular meeting of the Old Timers' Association will be held in the Council Chambers on Wednesday, July 4, at 8:30 p.m.. All Old Timers are requested to attend.

The City Clerk wil be at the City Hall this evening until 10 o'clock to receive returns for the Dominion Day Queen competition. Don't fail to make your returns before that hour.

Remember the dance in the Catholic Hall tonight, June 29. Dancing 11 to 2. Ingram's 5-Piece Orchestra. Admission to dance 50 cents. Drawing of prizes earlier in evening at close of Bazaar.

The Elk Lumber Co. bridge, near their mill, has been partially dismantled and this route to the City Park, which has been much used by pedestrians, is now closed to all traffic.

All orders for tickets for the Dempsey-Gibbons fight, July 4, should now be addressed to Dan Tracey, manager of the Dempsey-Gibbons fight, Fight Headquarters, Shelby, Mont. Tickets are no longer on sale in the city.

Attorney-General A. M. Manson is greatly disappointed in the action of the Canadian Senate in requiring British Columbia to hold a plebiscite on the question of provincial control of liquor importations. He maintains that the people of this province decided in favor of government control and that it is unfair to ask that the province be put to an expense of between $75,000 and $100,000. However, if a plebiscite is necessary, it will not be held until after the next session of the Legislature which will commence in October and end before Christmas.

The committee representing the High School in the Dominion Day Queen cmpaign wish to make it clear that their leaflet produced this week was got out purely in a spirit of friendly competition. Our Queen was brought forward late in the race for royal honors and in addition the High School examinations have made any effective organization in her behalf out of the question. It was thought, however, that a few of the ordinary political campaign methods might add interest to the campaign, and at the same time help to further the common cause—the Swimming Pool. The leaflet referred to was intended as a take off, or skit on such political campaign methods.

Mr. and Mrs. Sheets, touring from San Diego, Cal., to their home in Calgary, had a narrow escape from death when their Ford car Went over the bank at Phillips Canyon on Sunday last. They were approaching the canyon from the American line and the driver of the car did not notice the small warning sign near the top of the hill until the car had gained considerable momentum, he then threw on the brakes, which failed to work, and tried to stop by turning into the bank, but the car capsized and went over the hill, lodging in some trees a couple of hundred feet down the bank. Both ocupants were thrown out on the way down and escaped with some scratches and bruises. The car was a total wreck. A large warning sign at the top of the hill is a pressing need, as the hill is one of the most dangerous in the Fernie district.

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Mr. Fred Braid, of Victoria, is visiting Mr. James Broley.

Wm. Ingram, A. Klauer, M. A. Kastner and Wm. Mills will take in the fight at Shelby on July 4.

Dr. Bonnell attended a big Conservative ralley in Cranbrook on Wednesday evening.

Mr. and Mrs. Geo. Meade, of Creston, are the guests of Mr. and Mrs. Thos. Todd.

Mrs. D. E. Hughes, of Edmonton, and her two children, are here on a visit to her father, Wm. Thornton, Senior.

Miss Flora Macdonald, of the Public School teaching staff, left on Saturday evening for Ohio, where she will spend her holidays.

Dr. Garner was called east on Saturday last owing to the serious illness of his foster mother, who resides at Niagara Falls, Ont.

Stan Lowden will have his new meat market completed and open for business in the Vets' old stand on July 3rd.

Wm. Johnston received another car load of Star cars this week. The Star promises to be a real winner for this district as it has lots of pep on the hills.

A. Walker and R. G. McEwan returned on Monday from Vancouver, where they represented the local Masonic Lodge at the annual meeting of the Grand Lodge.

The regular play in the Wilson Cup Competition of the Ladies Golf Club will take place on Tuesday, July 3, at 4 p.m. Draws will be posted. The regular monthly tea will be held at the Club House on Wednesday, July 4, from 4 to 6 p.m.

The B. C. minister of finance will visit Great Britain shortly, in order to make a study of financial and industrial conditions. He states that British capital is becoming more and more interested in investments in this province and is hopeful of stirring up a wider interest among Old Country investors in industrial enterprises here.

Some despicable creature who is too cowardly to sign his name has written the Attorney-General of B. C., charging the Mayor and Police Commissioners with graft and various other crooked practices. The charges are too silly to enumerate to the people of Fernie, who are thoroughly ecquainted with the integrity of the Mayor and Commissioners, but they, no doubt, sound different to the authorities at Victoria and no effort will be spared to discover the writer and make him prove his statement or answer to a charge of criminal libel.

As a result of requests and advice from all over the province, the government has decided to proceed with the construction of the new University of British Columbia library at Point Grey, the structure to cost approximately $340,000. Already the science building is well on the road to completion and with 52,000 volumes to be accomodated, it is considered advisable to proceed with the work without delay. The minister of public works will call for tenders on the project as soon as the plans are completed by the architects, Messrs. Sharp and Thompson.

There are in our city a great many boys, whose parents have no car, and who have never been away from Fernie for a real swim in a lake. There is a proposal on foot to gather up a number of such boys between the ages of twelve and sixteen years of age, take them in cars to some nearby lake and let them swin for one day to their hearts' content. To accomplish this project during Boys' Week, a great many cars will be needed, and to that end, during the present week, a member of the committee will call on car owners to see whether they will fall in line with the spirit of this idea, and undertake to drive a number of boys to some nearby lake on the day chosen, Wednesday, July fourth.

FOR RENT—Housekeeping rooms, apply Lowden's Meat Market.

INTERIOR ACTIVITIES

Vancouver—Following a luncheon of the advisory committee of the Coast Range Steel Company, at which representatives from various public bodies and municipalities were present to hear a report from Mr. H. J. Landahl, a number of district convenors have been appointed to assist the advisory committee. These include Mayor Busby, of Nanaimo, Reeve Proulx, of Coquitlam, Major W. H. Mills, of Port Moody, L. B. Lusby, of New Westminster, J. A. Cunningham, of Vancouver, and Councillor D. W. Grimmett, of South Vancouver.

Samples of cast iron made from B. C. ores were exhibited at the meeting. Some of the stuff is being made into street manholes for the Seattle street department, while a large cog wheel made from B. C. ore is on view in London, England. Mr. E. K. Parham, steel expert of Seattle stated that one magnitite deposit on the coast from which samples were made, is big enough to supply and keep a plant going for fifty years producing a thousand tons of steel a day.

Victoria—Repair work to a large number of bridges have been ordered by Hon. W. R. Sutherland, minister of public works. These include McLennan River bridge near South Fort George, a new bridge to be called Lamb Bridge at Vanderhoof; reconstruction of the Stewart Creek bridge near Copper City on the Skeena; and repairs to two bridges on Red Mountain road in the Slocan district.

On Vancouver Island the bridge on the Canadian Highway outside Alberni is to be reconstructed, also the bridge nine miles out on the Lake Shore road, at Sproat Lake, and the bridge on the Ucluelet-Tolfino road, two miles from Uclucelet west wharf. Repairs to the extent of $1800 have been ordered for the Morrison and Davis Creek bridges in the Newcastle district.

Victoria—Extensive road work totalling $30,000 for the Fort George district has been authorized by Hon. Dr. W. H. Sutherland for highway and land settlement roads.

Appropriations have been made as follows: Land settlement roads, $5000 McBride-Tete Jaune road, $5000; Fort George—Aleza road, $10,000; Fort George—Hazelton road, $10,000.

All the work is to be carried out by the government engineers, using day labor.

Vancouver—Startling exposure is made in "The Hook," the new weekly paper, this week by J. S. Cowper, of the manner in which Eastern Canada sees the credit of the west to bolster up trades and concentrate power in the East. He cites the names and commercial activities of fifteen leading men who by means of bank directorships and inter-locking directorates, control sixteen great corporations, covering banks, transportation, power, paper, textiles, etc., with a total aggregation of assets valued at over four and a quarter billions of dollars.

The Hook which was recently banned from C. N. R. trains and steamships by news vendors because of its sale interfering with the sale of higher-priced American magazines, has now been placed back on the trains and steamships by direct orders from Ottawa.

Vancouver—Attorney-General Manson estimates the cost of a plebiscite on the export liquor house question, as ordered by the Senate, to be not less than $75,000.

Victoria—Instructions were handed out today to proceed with work in the Cranbrook district at Fairy Creek bridge, Lame Joe's bridge and the Nicholson Creek bridge, the latter of which will help to open up the Good Luck and Radio mining claims.

Fifteen hundred dollars are to be spent on Nine Mile Mountain road near Smithers to aid mineral development. A new approach is to be made for the South Kitsault Suspension bridge. The work to be carried on by District Engineer J. A. Stephen, employing day labor.

Gas, acid, sour, burning stomach all quickly relieved with Jo-To. Drug Stores.

SPORT

BIG FIGHT AT 3 O'CLOCK— SHOW STARTS AT NOON

GREAT FALLS, Mont., June 25.—Three 10-Round bouts will precede the Jack Dempsey-Tom Gibbons heavyweight championship contest at Shelby on July 4, Mike Collins, matchmaker, announced here.

The boxing carnival will get under way promptly at 12 o'clock noon with the first preliminaries, and Gibbons and Dempsey are scheduled to get into the ring promptly at 3 p.m., mountain standard time. Matchmaker Collins expects that he will have a leeway of probably half an hour, provided the preliminaries go to the limit, before Dempsey and the St. Paul challenger crawl through the ropes.

Jimmy Delaney, the St. Paul light-heavyweight working in Gibbons' camp, will meet Jurke, of Pittsburg, one of Dempsey's sparring partners, in one of the 10-rounders, while Tillie "Kid" Herman, of Los Angeles, also of the Gibbons' camp, will meet Joe Simonich, of Butte, in another preliminary. They are welterweights. The third preliminary probably will be between Laky Morrow, of Spokane, and Dandy Dillon, a Minneapolis featherweight.

Two bands have been engaged, Collins said, to entertain the crowd from the time the arena is opened. The Scottish Highlanders, of Lethbridge, will be stationed on one side of the arena, while the Elks state band of 100 pieces will be located in another section.

Collins conferred with representatives of several motion picture concerns in regard to taking movies of the championship contest, but reached no decision. The pictures will be rushed into Canada for development, as no concern within a thousand miles of Shelby has facilities for doing the work.

SHELBY TOWN

By Walt Mason.

"I hear people talk of Shelby Town wherever I may go; the place has gained a great renown," I said to Richard Roe. "Some Edison, we may suppose, has started business there; some man whose genius flames and glows like fireworks in the air. Perchance some Luther Burbank trains the vines of early peas, and with unceasing care and pains grows beets on turnip trees. When some great man his genius gives to an instructive game, the little burg in which he lives will share his lustrous fame. And so I wot that Shelby Town must harbor such a jay; perhaps a bard who's handing down an epoch-making lay. Perhaps a surgeon who has skill to make the ailing well, or a musician who can trill and like a seraph yell. Or peradventure Shelby Town is such a beautious place, in loveliness it seems to drown, a spot of charm and grace. Or it may have a college great where learned professors stand, and teach the adolescent skate a culture truly grand." "Your guess is poor," said Richard Roe; "that town is on the map because two million chumps will go to see two bruisers scrap. A million chumps who make me grieve will watch two swatters swat, and say of Shelby when they leave, "The village God forgot!" "

COLEMAN BEATS MICHEL EASILY

MICHEL, B. C., June 24 — Michel played their initial game in the Crow's Nest Pass league here this afternoon, Coleman being their opponents. The visitors also won, the score being 9 to 2. Coleman has a nifty infield and a fair battery.

Michel used two pitchers, Halko and Krall and both pitched good ball but Michel's fielding was raw and showed lack of practice, errors giving Coleman their runs.

Score by innings—

Coleman	100 111 005—9
Michel	000 000 002—2

Coleman: Mischer and Clark; Michel: Halko, Krall and Sadlick.

The thermometer registered 98 in the shade in Medicine Hat one day last week. Mercury has its ups and down in the gas city.

FERNIE WALK OFF FIELD IN GAME AT BLAIRMORE

BLAIRMORE, June 24.—In a game which should have been water polo instead of football, and in a drenching rain, Blairmore again showed their superiority over rival teams when they defeated Fernie 1 to 0. Fernie experienced considerable trouble in coming to Blairmore through bad roads, and their motors were stalled on several occasions, and but for these facts the game would have been postponed. A written agreement was signed by both teams that they were both satisfied with the grounds and the referee, a neutral man, as the man supposed to referee the game did not arrive.

Fernie, after considerable sliding and slipping and sometimes swimming, managed to beat Whitelaw, but the whistle had blown previous to the kick for an offside, and the goal was disallowed, so the period ended with no score.

In the second half there was no score until about five minutes of time, when McVey put one in on Fernie. Considerable agitation took place regarding this counter, Fernie claiming the player was offside. The goal was allowed, with the result that Fernie walked off the field before the end of the game.

This was rather a poor attitude to take, but no doubt the Fernie boys were rather discouraged with the long trip with autos on bad roads, only to find that conditions for football were not of the best, although as far as the game was concerned the conditions were the same for both teams.

The regular lineup of both teams played, and the game was refereed by Rev. Mr. Hart. of Hillcrest.

FOOTBALL SHYS

by Linesman

It rained so hard in Blairmore last Saturday that the Tax Haters association had to cancel their open air revival meeting. Bill Riley says there wasn't even a dry place where a fellow could spit.

The boys were accorded a place to strip in which reminded some of a deserted dugout. When they reached the field they were confronted by four spectators, two old women, a Chinaman with an apparent eye to business and another old fellow with a wooden leg who carried both life and fire insurance.

Johnny Joinson thinks that someone should match Jock McAndrews in wrestling bout, as he works a wicked leg hold to perfection. Jock's motto seems to be "By their shins shall ye throw them."

Bill Slaine thinks that Boothie is a first class interpretor. Enquire about this one.

A cop stopped the cars at Coleman to search for booze, and someone told him that half the load was Scotch and the other half Lanks. But they all looked like mud larks to us.

After pushing the autos through the miles of mud, the gang are of the opinion that they would rather push a baby buggy any day.

STRONG EVIDENCE IS GIVEN BY SADD

Declares Tanlac Ended Indigestion And Asthma When All Else Failed

"I thought all advertised medicines were about alike until I took Tanlac, and I want to say right here I haven't seen its equal in all my sixty years experience," says William Sadd, 28 Mulberry Street, Hamilton, Ont.

"For six years, before I used Tanlac, I got in a run-down and weakened condition every spring, and was so stuffed up with asthma and hay fever I could hardly breathe. I was so nervous at night I would walk the floor. What I ate nauseated me, I had knife-like pains in my stomach and across my back, and could hardly stoop over to lace my shoes.

"The Tanlac treatment is the only medicine that ever helped me, but it fixed me up so fine I am not bothered any more with my old troubles. A little Tanlac now and then keeps me in fine shape, and I feel as active as I did thirty years ago."

Tanlac is for sale by all good druggists—Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

PILES

No one but the sufferer knows the terrible agony or the itching nature of Piles and how hopeless it seems to try for relief in ointments, injections and dilators.

Genius produces

"PAX"

Internal Pile Remedy

Pax is the prescription of a well known physician and has proved successful in hundreds of cases. Pax is internal distinct from any other treatment. Applications from the outside are futile. No ointments, injections or dilators are necessary. Pax is complete and is a vegetable remedy, contains no drugs or alcohol.

If you have not hitherto found relief do not despair, place your faith in Pax.

Except in unusually stubborn cases one box is usually sufficient.

Get "PAX" from your Druggist or if he cannot supply you send One Dollar and "PAX" will be sent you in a plain package.

'HONOR IN SPORT'

by Emma Wilson—Div. XII.

Once there was a team of boys who liked baseball very much. The boys on this team were so enthusiastic over it that they wanted to win every game. But if their side was losing, they would cheat and quarrel with the umpire. If their side lost they would call names and say mean things about the boys on the other side.

Now at this time their was also another team of boys. This team of boys liked to play baseball very much. They wanted to win every game. As each boy took his place, he said, "I'm going to play as hard as I can and if my side is losing, I'm going to play harder. But I'm going to play fair right to the end of the game."

Now it so happened that these two teams were going to play a game for a prize. The honest team was losing. It was a hard fought battle, but at last the dishonest team won, and won unfairly. The people said scornful things to them and they left the field as cheats, with their heads hung down. The people praised the boys who had lost and said, "these boys are good sports." So the honest team left the field as good sports.

Later these two teams had another game. This game was also a hard-fought battle. Both teams played hard. Again the honest team was losing, but the boys held their heads in the air, set their jaws and gritted their teeth. Finally they won. They gave three cheers for the side that lost.

One of the boys, who played on the honest team, went to fight in the Great War. He was now a young man and felt that he ought to do his share for his country. His regiment was formed into a square and the enemy was on all sides. The foe had broken the lines and was fighting inside. The men were fighting hand to hand. At last the British soldiers thought, "Why should we fight for Canada? It is far away. Honor is only a name." When this boy saw that the men were not fighting, he shouted, "Play up! Play up! And play the game." Then the soldiers began to fight again.

Girls and boys should be good sports because they will have more friends. If they are good sports they can look anyone straight in the eye because they know they are honest. If they are not good sports and cheat when they are playing, people call them names and don't like them.

Be a sport!

What if you lost the game?
Be a sport!
You didn't play for fame,
You played for the fun,
When all's said and done,—
So.
Be a sport!
Be a sport!
Be a sport.

"THE MAN FROM GLENGARRY" CARRIES IMPORTANT MESSAGE TO THE WORLD

Apart from being a picture of real worth and merit, "The Man From Glengarry," which comes to the Orpheum theatre for an engagement of two days, strating next Monday, will broadcast to the world that "Canadian-made" pictures have "arrived."

The picturization is made from the novel of the same name by the well-known author, Ralph Connor. Portraying real life among the lumbermen and the river drivers, their loves and hates, in an envoirnment of rare natural beauty, with a heart interest centering in a courageous and lovely girl and he-man of the "white water;" filled with live, tense moments and dramatic climaxes and thrills, giving a wide berth to problems of sex and any and all salacious angles. "The Man From Glengarry" comes to us as a veritable breath of his own beloved forests, mountains and rivers, so that one can almost sense the pungent, pine-laden aroma of the trees and hear the rush and roar of the rapids and the falls while watching the picture. How different this from the ordinarily accepted version exploited as Canadian pictures? The wolves, half-breed trappers, mounted police and the snow, are absent, and from the flashing of the title on the screen to the final dramatic climax which grips the audience in breathless suspense, not one of these stock characters, popularly supposed to be bound up in the life of all Canadians, is seen. A better, fairer phase of Canadian life is shown, a phase which all who are fortunate enough to see this wonderful picture will readily agree is not only more pleasant to contemplate, but is eminently more just to Canada, her customs and her people.

The "Canadian-made" picture industry is as yet in its infancy, creeping, as it were, who among you will not hold out the strengthening hand of encouragement so that this "baby" will soon learn to walk with a firm step towards that point which must ever be its goal—the top?

NATIONAL WEALTH OF THE DOMINION

"It is estimated that the amount of Canadian securities held in the United States is greater than that held in any other country outside of Canada," says the Wall Street Journal.

"Estimates place total of direct funded issue of the Dominion and Provincial Governments, and of the municipalities of Canada, at $3,866,000,000, of which $661,000,000, or over 17 per cent. is held in the United States, while Great Britain holds $511,000,000, or about 13.2 per cent. and Canadian investors 69½ per cent.

"According to a report submitted by the Dominion statistician to the House of Commons, national wealth of the Dominion in June, 1922, exceeded $17,215,000,000. In 1921, national income from production was $5,244,866,772.

"Among Canada's natural resources her agricultural lands rank first. Estimated arable area exceeds 300,000,000 acres, of which less than 60, 000,000 are now under cultivation. With a population one-thirteenth as large, Canada produces one-fourth as much wheat as the United States, and is one of the world's most important exporters. Her forests cover one-fourth of the land area of the Dominion, or about 600,000,000 acres. Pulpwood resources are estimated at 1,250,000,000 cords, while the total stand of timber of all kinds probably exceeds 1,000,000,000 feet.

"Of total area of 3,729,000 square miles, at least two-thirds is regarded as possessing mineral possibilities. Coal, silver, copper, lead and zinc abound. Canada produces 90 per cent. of the world's cobalt, 85 per cent. of its asbestos, 85 per cent of its nickel and 12 per cent. of its silver. Alberta, perhaps the richest of the provinces in coal, is estimated to possess deposits of over 1072 billion metric tons.

"In addition to the Atlantic and Pacific coasts, Canada has a fresh-water fishery area of 220,000 square miles, or one-half the world's fresh-water area. In 1921, total value of production of the fishery industry was over $35,000,000.

"An estimate of the annual value of Canada's manufactured products is nearly $3,500,000,000. Ontario leads with annual production of factories and mills close to $2,000,000,000, while Quebec follows with close to $1,000,000,000. In 1921 Canada led the world in the value of external trade per capita of population. In the fiscal year ended March 31, 1922, total value of her exports was $740,240,000, or about three and three-quarters times the 1902 figures."

"A Mass of Sores —No Sleep— Unhappy Days"

writes Mrs. Orange Harvey of Danville, Quebec, R. R. 3. "I doctored with doctors until the first of May. Then I got a bottle of D. D. D. AT ONCE MY FACE GOT BETTER. I used half a bottle only and have been entirely well ever since."

Why not see if half a bottle will relieve your case of skin disease, too—on our guarantee that the first bottle will show results or your money back? *Itching stops on the instant.* $1.00 a bottle. Try D. D. D. Soap, too.

Health turns the clock backward

Hope for Sufferers from Disfiguring Goitre

Health Talk No. 24.

By G. J. Parks, D. C.

The most dreaded ailment a woman faces is goitre. It is rare indeed that it is not disfiguring, as well as the cause of much suffering. It is a big thing to say to such women that this suffering is rarely necessary, for in chiropractic there is a method which has been effective in case after case. It works in a perfectly natural way that is different from any other form of treatment. It succeeds where other methods fail because it gets at the cause and removes it. Where there is a competent chiropractor there is always hope for the sufferer from goitre.

By chiropractic spinal adjustments normal transmission of life impulses over nerve lines to the affected region is restored. By pressure on the nerve there is irritation and over-stimulation, by removing that pressure there is normal action absorbing the over growth and reducing the swollen pressure on surrounding areas.

Suffered Two Years

"I wish to state that I have been greatly benefited by chiropractic spinal adjustments. I suffered for more than two years from exophalmic goitre. It was beginning to make swallowing a hardship and to bother my eyes. A friend advised me to take adjustments, and after two weeks I was feeling much better and after four months of adjustments my goitre had entirely disappeared. To chiropractic belongs the credit."

—Stella Ebert — Chiropractic Research Bureau, Statement No. 1360K.

COKATO ANNUAL PICNIC

Nearly all the inhabitants of this burg, including the children were found taking part in this event on Friday last. Barton's old camp was the site selected and the party was conveyed there in buggies, waggons, etc. Quite a home-like appearance was given to the camp by a large table and form that had been erected by some of our industrious workers, to whom our thanks are due.

Dinner was served on time and no time was lost in erecting a swing for the kiddies and then the fun began. Games of various descriptions were indulged in and when tired of them, ice cream was served in liberal quantities and candies distributed. Then a sing song was started. Singers unknown to fame acquitted themselves well and nobly did their share. When revelry was at its highest point, thunder was heard, followed at intervals by flashes of lightning, which was soon followed by a downpour of rain. This however was soon over and all became lively once more; true enough, some of the party had wet clothes, but were not downhearted in the least. The horses were harnessed up and the whole party were soon on their way homeward bound, most of them singing selections that is always used on these occasions. Various comments have been made regarding the picnic and they all sum up "the best we have had."

COSERVATIVE RALLY

Hon. W. J. Bowser, leader of the Conservative Opposition in the British Columbia Parliament, accompanied by six interior members of the Legislature, J. W. Jones, M.P.P., for South Okanagan, J. H. Schofield, M.P.P., for Trail, Col. F. Lister, M.P.P., for Kaslo, N. A. Wallinger, M.P.P., Cranbrook and W. K. Esling, left Fernie this morning for their respective homes. Robert Morrison, of Kelowna, was also in the party.

In reveiwing the trip, Mr. Jones said:

"When we reach Cranbrook, we will have covered 1100 miles as part of the Conservative campaign of education and to acquaint ourselves with the needs of East and West Kootenay constituencies. Leaving Penticton on June 20, we motored through the Olun Setlement where we inspected the development work being carried on by the Provincial Government, and which, when completed, will cost four millions, although the original estimate was one million.

"We then motored through the Greenwood and Grand Forks ridings, stopping at Bridesville, Rock Creek, Midway, Greenwood and Grand Forks, and over the new Rossland-Cascade road to Rossland. At each place we were entertained with luncheons or smokers and at Grand Forks and Trail we had splendid attended public meetings.

"The news of the Ontario election was received during the program of a smoker tendered by Nelson Conservatives, at which nearly 350 people were present, and you may imagine that it was one of the happy numbers on the program. Leaving Nelson, we were met at Kuskanook and driven to the heart of the fruit orchards in and around Creston, and in the afternoon we visited Camp Lister where we were disappointed in seeing so many abandoned homes of returned men, who had left because of the Government's failure to keep its agreement with the settlers.

From Creston we journeyed via Goat River and Kitchener, over one of the worst pieces of road in the province, and which, it is hoped, the Government may be persuaded to improve. At Cranbrook we were guests of the splendid organization of the Conservative men and women, who entertained us with a splendid supper and smoker. The next day we visited Wycliffe and Kimberley and were astounded at the magnitude of the concentrator which will care for the Sullivan ore. From Kimberley we motored to Fort Steele where we were the dinner guests of a number of conservatives.

"On our trip to Golden, we were accompanied by several Cranbrook enthusiasts, including Mayor Cameron, A. C. Bowness and son, Al. Belmont and William Radcliffe. We motored to Windermere and through Sinclair Canyon to Kootenay Crossings and after the ceremonies attending the opening of the Banff-Windermere road we proceeded to Golden where we remained over Sunday and returned for the Dominion Day celebration at Moosemen.

"At Fort Steele we were met by autos and driven to Fernie and Michel and from here, Mr. Bowser, Mr. Morrison and myself will return home via Spokane and Walla Walla so that we may get some first hand knowledge of fruit growing and irrigation problems in the district to the South. Altogether, it has been a wonderful trip, and Mr. Bowser's reception wherever we went indicates that the Conservatives are being joined by Liberals and Labor followers in the demand for a more economical conduct of public affairs."

A rousing reception was tendered the party when they appeared on the platform in the Grand Theatre, Thursday evening. Dr. S. Bonnell, took the chair and with a few brief remarks introduced Col Lister of Camp Lister as the first speaker.

In opening his address, Col. Lister stated that he was making this tour of the Province with his parliamentary leader, in order to educate himself thoroughly with the conditions and requirements of the various constituencies throughout British Columbia, more so in regard to Agricultural and Returned Soldier problems in both of which he, as a returned soldier and farmer, was deeply interested.

Touching upon the agricultural situation, he declared that the Government were greatly neglecting this most important factor in the welfare of the Province, last year over twenty five millions of dollars worth of agricultural products were imported into the Province from outside. With careful consideration the bulk of these commodities now being imported could be grown within the confines of the Province and this vast sum of money kept at home.

He went fully into the many reckless purchases of impossible land for Returned Soldier Land Settlements made by the present Government and then the enormous cost of clearing some of these lands. The Government expected the Returned Soldier to re-imburse them for the entire amount spent on these settlements. This was an utter impossibility, if the soldier was to live. Now the Government were blaming the returned soldier for the loss of the money when really they were never given the slightest chance to make good on the land, many of them personally losing what little money they had saved.

Mr. Bowser, when called upon by Dr. Bonnell, stated that he was by no means a stranger to a Fernie audience, but he usually looked for a very lively reception here, the audience last evening seemed to be very quiet to him, but probably this was due to the fact that no election was impending.

The reason for his tour of the Province at this time, was that he, with his colleagues, had thought the time opportune to visit the various constituencies to obtain first hand information of the prevailing conditions in the different parts of the Province.

(Continued on Page Two)

SUCCESSFUL CELEBRATION

The Dominion Day Celebration held last Monday in aid of the Children's Swimming Pool fund was one of the most sucessful ever held in the city and the fund will be benefited to the extent of well over two thousand dollars.

The program for the day was opened with a magnificent parade through the main thoroughfares of the city. This was headed by the Fernie Pipe Band, followed by a large number of Schol children, the C. G. I. T., the Fernie Boy Scouts, the Junior Baseball team and then a boys float representing the Fernie Swimming tank now in existence. Following the junior section of the parade came the Fernie G. W. V. A. Brass Band and a large number of beautifully decorated cycles, automobiles and floats. The following is the prize list for the parade:

Best decorated automobile — Mrs. N. E. Suddaby.

Best representative float—The Fire Hall.

Best Comic float—King Tut's Jazz Babies.

Best dressed bicycle—1st. O. Kennedy; 2nd. D. Pearce; 3rd. E. Harvie.

Best Comic—The Swiming tank.

Best individual leading decorated animal—Neidig children.

Best National Character—W Thomson, West Fernie.

The parade proceded up Victoria Avenue from the Central School to the Fernie Hotel corner, then to Baker Avenue and along it to the Park Corner and back to Victoria Avenue and along it to the Home Bank corner, then on to the Court House lawn where Miss Dahlia Schagel, who had been elected Dominion Day Queen by popular vote, was crowned Queen of the Day by little Miss Doris Starr. She was ably assited by her Ladies-in-waiting, Misses McPhee, Garner, Coughlan, Branch and Davidson.

Sherwod Herchmer, addressed the large crowd which had gathered around the grounds for the ceremony, pointing out the aims of the Children's Swimming Pool Committee and introducing the Dominion Day Queen.

Following the coronation, a little girl was chosen at random from the crowd of children around the platform, to draw the lucky ticket which was to win the ten per cent. of the gross receipts from the sale of the votes for the Queen competition. George Davey, of Michel, held the winning number and received a cheque for $143.61.

At the park during the intermissions between the game the Misses Walker and their class of pupils gave some splendid exhibitions of the Highland Fling, the Sword Dance, the Sailor's Hornpipe and various other dances. These young ladies are artists of great merit in these dances and the showing made by their pupils speaks highly of them as tutors.

Owing to the fact that most of the prizes won in the children's races were paid in cash, no record was kept of the prize winners so we regret that we are unable to pulish the long list of fleet-footed Fernie kiddies.

(Continued on Page Seven)

CUT RIBBONS—OPEN HIGHWAY

By J. Fred Spalding

Saturday, June 30, was a Red Letter day in the American Motoring Circles, as it witnessed the opening of what is undoubtedly the most spectacular highway in the world, "The Banff-Windermer Road" which now gives Canada direct motoring connections with the principal National Parks of the United States.

The importance of the occasion in the minds of our American cousins is evidenced by the presence of the following well-known leaders of the American press:

Reginald Townsend, editor of 'Life.' Armstrong Roberts, editor of 'Field and Stream.' Ralph Boyer, editor of 'Country Life.' Mr. Palenski, the well-known artist. Chas. Peters, artist of 'Life.' Leroy Miller, of 'Life.' Jack and George Lait, of 'The International Feature Service.' Albert Britt editor of 'Outing.' W. J. Edwards, president of 'Topical Press,' London, Eng. Stacey Jones, of 'The New York Tribune.' Fairfax Downey and W. M. Chrisman, of Boston. H. H. McClure, 'McClure's Magazine' and 'Associated Press.' Max Enos, of New York.

The leading editors of the Canadian Press and several well-known authors were present also.

Mr. Percy Gomery, the author of "A Motor Scamper 'Cross Canada," with his wife, met me at Cranbrook and were my passengers as far as Banff. Mr. Gomery is writing another book about motoring in North America, and at the request of the Dominion Government and the C. P. R. is including a description of this road in it. He has just returned from driving down to Mexico and back, and told me when we arrived at Banff, that he considered there wasn't scenery anywhere else in the world to surpass what he had seen in this trip. In his "Motor Scamper 'Cross Canada" he said that the scenery between Fernie and Elko was the best he had seen in that trip, and when I asked him if he had changed his mind about it, he said: "No, that is the best twenty mile stretch I have ever seen."

Exactly a year ago I had the privelege of driving over what was then completed of this road from both sides of it, to the incomplete section of nine miles in the centre; now after having driven over the entire length, I can only express wonderment at the excellence of the surface and the absence of grades throughout. From Sinclair Canyon at this end, to Banff, at the other end, there is a maximum grade of three per cent. with the exception of one short stretch of less than 400 feet in which it reaches nine per cent. at the steepest point. It is a high-gear road all the way.

There were 343 cars in the procession and many more arrived later, yet after such a critical test, there was only one spot where the surface showed the slightest sign of wear and that was for about thirty feet where it was slightly rutted, not more than four to six inches in the worst place, which extended for about fifty yards.

Owing to the bad road reports, a great number of those who had accepted invitations, sent telegrams of excuse, and those in charge of the ceremonies waited until the last minute on the off chance that some from whom they had not heard, would arrive in time to take part but they did not, and a last minute program had to be adopted, consequently the actual ceremonies fell short of what they were expected to be, however, the preliminary speeches were confined to five minute periods and then the Lieutenant Governors of B.C. and Alberta cut the ribbons and the highway became an accomplished fact.

Mr. Toy, who represented the Governor of California, and is himself the head of the Highway Department of that State, in his speech made a statement which bears out what I have always said: "We in California think that we have some wonderful scenery, and we have! But after what I have seen since I have been with you, I must admit that what we have, is not to be compared in the same class with what you have here in the wonderful Rockies. I have travelled the world very considerably and want to tell you people that 'YOU HAVE MORE SCENERY PER MILE, AND MORE MILES OF IT,' than there is anywhere else in the world."

It is strange that he should have made use of the latter expression, as it is one which I thought I had coined myself, but I was very pleased to know that he agreed with me. I had a long talk with him after the ceremonies were over, and he told me that he was coming up again next

(Continued on Page Three)

CITY COUNCIL HOLD SPECIAL AND REGULAR MEETINGS

A special meeting of the City Council was held Tuesday evening, at which the Mayor and the City Clerk were authorized to purchase from the Canadian National Iron Works, of Toronto, an additional 3780 feet of six-inch and 1032 feet of twelve-inch cast iron pipe at a cost of $8,661.00. This new pipe will replace all wooden pipe now in use in the Fernie Annex, giving the entire city cast iron water pipe line, which should settle the waterworks question for two or three decades.

The regular meeting of the Council was held Thursday evening with all present excepting Alderman Aiello.

The City Clerk reported that the only business he had on hand was the unfinished business laid over from the last Council meeting.

Regarding the request of the Local Council of Women for a monthly tubercular test of the milch cattle in the district, the City Clerk had been in communication with various municipalities on this matter and all had tests were not feasible. The Government's annual test for tuberculosis declared that the proposed monthly was generally considered sufficient.

The May account of the National Iron Works, for pipe delivered, amounting to $11,943.45, was passed for payment.

By-Law No. 255, of Shops Regulation Act, amending By-Law No. 243, to set the hours which Barber and Hairdressers' shops may remain open, requested by them, went through its various readings and was finally passed.

DROWNED IN ISLAND LAKE

Alfred Scarpino, a young Fernie lad of about 18 years of age, was accidentally drowned, through taking cramps, while bathing in Island Lake last Sunday morning.

Coroner Duthie ordered an enquiry last Tuesday evening to investigate the drowning and all persons who were present at the time of the accident were summoned to give evidence.

From the statements made by the various witnesses, it appeared that two parties of young men went to Island Lake to spend the week-end. The first party went up Saturday evening and camped out over night. Scarpino accompanied by Dr. Parks left here early Sunday morning and reached Island Lake about 10 o'clock. At ten thirty the party had lunch, and then donned bathing suits. Scarpino accompanied by two other lads, Haig and Hesketh, got on a raft and poled across the Lake. Sydney Clayton, who was in charge of the second party, refused to permit the lads under his care to enter the water, claiming that it was far too cold for swimming. At the other side of the Lake, Haig and Scarpino were swimming short distances, resting occasionally on floating logs, and Scarpino had got some distance away from the raft, Hesketh remained on the raft as he is unable to swim. At about ten minutes to twelve, Scarpino was heard to call for help, and Sydney Clayton, who well knowing his danger, pluckily jumped into the water and swam approximately 200 yards across the lake to where Scarpino had disappeared and then dived. He went down three times but was unable to locate the ill-fated lad, and was advised by the grown-ups on shore to wait a few minutes until the mud had settled. At ten minutes past twelve Clayton with the aid of his brother and Haig located Scarpino and after a hard struggle managed to get him on to the raft and poled ashore. Aritficial respiration was applied for nearly three quarters of an hour but without success, and Dr. Asselstine who was summoned from Fernie, arriving some time later pronounced life extinct.

Scarpino who was born in Fernie, of Italian parentage. has been for some time past working in the mines, aiding in the support of his widowed mother. He was a member of the Fernie troop of Boy Scouts and through his loyalty and attention to Scout work, had reached the rank of a first class scout and had been promoted to Quartemaster of the troop.

The funeral took place Wednesday morning from the Holy Family Church and he was laid to rest in Hillside Cemetery with full Church and Boy Scout honors.

When the next session of the Ontario Legislature is held Hon. Mr. Ferguson and the Hon. Mr. Raney can exchange verbal vollies from reversed positions.

CONSERVATIVE RALLY

(Continued from Page One)

Charges of neglect and unfilled election promises were being made to him everywhere he went and Fernie was no exception. When visiting Fernie in 1916 he was called upon by a delegation from West Fernie who requested that proper river bank protection be immediately constructed. He was later informed that the new Government had settled this question by promising immediate action, yet annually the waters of the Elk River continue to be a menace to the citizens of that portion of the community. Water supply in West Fernie was also a serious matter, the Government should be compelled to make arrangements with the City of Fernie, whereby the pipe lines could be extended to West Fernie and thus give the residents of that section the benefit of pure water supply.

He emphatically declared that Premier Oliver's Government had failed to fulfill their election promises, and now that he had been through the Province giving the people the facts, Premier Oliver now had the opportunity of following him and answering these charges, then the people would be the jury in the next Provincial election. In 1916, he added, the people of this Province were tired of the Conservative Government and combined to throw them out of power. In 1920 the Liberals had gone around the Province stating that the financial state of the Province when they had taken office was left in such a condition by the Conservative Government that they had been unable to put the Province on a strong financial basis. Now in 1923 they have been in power for seven years and cannot lay the blame on the old Government, they must stand or fall on their own record during the past seven years.

Touching upon the revenue collected by the different Governments, he pointed out that whereas in 1916 the Conservative Government had a revenue of six million dollars, in 1923 the Oliver Government expected to collect in the neighborhood of eighteen million dollars, three times the revenue collected by the old Government and yet extravagance had taken the bulk of this enormous sum of money. In 1916 over half of the gross revenue was spent on public works, yet this year little over one million and a half dollars had been spent on this Department. Large sums of money have been wasted, he declared, upon foolish purchases of impossible land for Land Settlements. Government officials were joy-riding around in Government automobiles, Ministers were making trips to England and travelling around the country in sleeping cars on the railways. He drew a surprising comparison of the amounts of money spent on roads in the different constituencies; those represented by Cabinet Ministers drawing the major portions of the appropriations, instances of this were in the consitiuencies of Delta, with only 39 miles of road, $342,895; Nanaimo, with 57 miles of road, $110,000; Revelstoke, 259 miles of road, $230,000; then Fernie, with 428 miles of road only received $61,000. When the Oliver Government went into power their slogan was supposed to be that they would run the Government without fear or favor. Now they are apparently running the Treasury for their own benefit.

Regarding frieght rates, he had a suggestion for Premier Oliver who had gone over the country vilifying the C. P. R., why did the Premier not go to his good friend Premier Mackenzie King at Ottawa and suggest to him that Sir Henry Thornton reduce the freight rates on the Canadian National Railways, this is a Goverment owned road and is enjoying the same high rates as the C. P. R., these are competing railroads, he added, and the morning after the Canadian National had put the reduction into effect, the C. P. R. would be compelled to do likewise.

Referring to the Game Department, Mr. Bowser stated that the Conservatives had brought in the Gun Licence Act, but with the understanding that the money received from this was to be spent in re-stocking the lakes and rivers with fish and the mountains with game. This they, when in power, had conscientiously carried out, even going into Wyoming to get Elk to keep this game from becoming exterminated in the Province. A game board administrated this Department during his regime, but since the Oliver Government took over the reins of office, they had wiped out this board and placed the handling of the game in the hands of the police who are not fitted to handle this Department, entirely alien to the regular duties of a policeman.

The present Government has so borrowed money, he continued, that their fixed charges which must be met annually are now over five and a half million dollars while in 1916 the fixed charges to be met were only $1,386,000. Civil Service salaries in the same period have been nearly doubled. Premier Oliver claimed that extravagance on the part of the old Government was the cause of his failure to make good up to 1920 and yet when the Conservative Government left office the net public debt of British Columbia was $19,974,000, after it had been in power for fifteen years, since 1916 the Oliver Government had increased this public debt to $66,235,000, over three times the old amount and yet they have only been in power seven years. In the last 6 months they have borrowed $8,000,000, the greater part of this amount being borrowed by order-in-council while the Legislature was prorogued and did not have the chance to question the reasons for borrowing. During their term of office the present Government has collected a revenue of $86,000,000 and borrowed another $51,000,000 and have little but poor investments to show for it, many of which will not return a cent.

Mr. Bowser then passed on to the administration of the Government Liquor Control Act. He stated that while there were only about ten really well-known brands of Scotch whisky previous to the war, the Government Liquor Stores had purchased no less than 64 different brands. Many of these were immature, putrid stock, purchased through a middleman, who bought at 20 shillings a case and then resold to the Government at 40 shillings a case. Many of these brands were unsaleable and finding them to be such, the Government took them from the shelves of the stores and turned them over to a blender in Vancouver who with the aid of a quantity of good liquor and a couple of barrels of "prune juice" doctored them up, re-labeled the bottles and again placed them on the market at $3.00 a bottle. Bonvino Port Wine was another favored stock of the Liquor Administration, this he explained, was bottled in Vancouver by the California Wine Company whose labels were printed in White Letters on Black Paper, resembling the "Convino" Port Wine of Spain and read at the bottom "Bottled by the California Wine Company, Sacramento, California, Vancouver, B.C." This company he stated, never saw California, but was composed of good liberals in Vancouver.

In concluding, Mr. Bowser promised, that if returned to power, his Government would practice rigid economy, make the Government of the Province a sound business proposition, endeavor to restore the credit of the Province to its normal basis, give better administration of the Compensation Act and cancel the reserves on prospecting in the Provinces.

At the close of the meeting the entire assembly arose and sang "God Save the King."

An electrical storm and an election on the same day ought to clear the atmosphere in Ontario.

HIGH TAXES LIMIT HOME BANK EXTENSIONS

The Annual Meeting of the Shareholders of the Home Bank of Canada was held at the Head Office, in Toronto, Tuesday June 26. The statement for the year's operations ending May 31st last shows that the Bank, while experiencing the general narrowing of business activities, has fully maintained its position. The deposits remain practically stationary, at $22,151,770, a contraction of current account deposits being more than offset by the increase in savings account deposits. There is also an increase in the volume of notes of the Bank in the hands of the public, the circulation standing at $1,616,640. Net profits for the year amounted to $232,539.17, approximately 11% on the subscribed capital. After paying four quarterly dividends at the rate of 7% per annum, the sum of $72,761.01 has been carried forward into next year's budget, and $75,000 transferred to contingent account for depreciation of assets. Debts that have passed the maturity of payment are placed at $85,110.03. The reserve account remains at $550,000.

The report of General Manager J. Cooper Mason pointed out that while the statement did not present any notable features of change, it should be accepted with every satisfaction since the Bank had not only maintained its position but had carried out measures of retrenchment that would inspire additional reassurance for the future. He referred in some detail to the disruption of the ordinary channels of trade caused by the world war and its aftermath, and pointed out that as a result many of the foreign markets with which Canada formerly traded, did not yet afford the accustomed facilities of exchange and assured credit. It was manifest, he declared, that until some material advance had been made toward the standardization of international money values and the restoration of confidence as a basis of credit, enterprise in industry, trade and commerce, even among the most progressive communities, would remain largely confined to the narrower domestic sphere.

The General Manager called attention to the increased taxation which all banks are now under, in levies from municipal, provincial and federal authorities. Such a condition was restrictive of the extension of new branch offices. Taxes, he declared, constitute a new and fixed demand upon general profits. "We have provided for these demands," he added, "by closely limiting our program of extension and carrying economic supervision into items of miscellaneous and routine expenses."

President J. H. Dally, in the course of his address, stated that general conditions, while above expectations, had not been altogether satisfactory during the year. The crop had been fair as to quantity, but its value had been such that the spread between costs and receipts was insufficient. He advocated a Government inventory of idle industrial plants in Canada, and urged Government action to bring about a revival of operations. Such a matter, he pointed out, was without the scope of the banks, as a bank was debarred from loaning to other than going concerns.

Bad Breath
Is Usually Due to Constipation

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol
A LUBRICANT—NOT A LAXATIVE

A Whole Year's Shines.

H. J. DALY, President. J. COOPER MASON, General Manager.

AUDITOR'S REPORT TO THE SHAREHOLDERS

In accordance with sub-sections 19 and 20 of section 56 of the Bank Act, 1913, I beg to report as follows: The foregoing balance sheet has been examined with the books and vouchers at the Head Office, and with the certified returns from the Branches, and is in accordance therewith. I have obtained all needed information from the officers of the Bank, and, in my opinion, the transactions coming under my notice have been within the powers of the Bank. The cash has been checked and the securities of the Bank verified, at its chief office, both on the 31st of May, 1923, and also at another time during the year. The cash and securities of one of the Branches have also been checked, and in each case they have agreed with the entries in the books of the Bank with regard thereto. In my opinion, the above balance sheet is properly drawn up so as to show a true and correct view of the state of the Bank's affairs, according to the best of my information and the explanations given to me, and as shown by the books of the Bank.

SYDNEY H. JONES, Auditor.

Add the Wichita, Kansas, bank cashier, who was short $1,500,000, to the list of "Napoleons of finance."

Look at the Head

RED BLUE

Well worth 15¢ a box

The brilliant head—*a band of blue, tipped with red*—is the mark by which you can always distinguish a MAPLE LEAF MATCH.

Also pocket size 2 for 5¢

This distinctive head means to you that the matches are sure and safe—always dependable—non-poisonous, no glow, the kind rats won't gnaw—stronger and longer, different and better.

Look for the head—*a band of blue, tipped with red.* It is the symbol of match excellence.

month with the Governor of California, and that they intended to spend about a month driving around and doing some fishing on this side, so I asked him to come to Fernie and we would have them taken to where they can catch some real trout. He promised that they would likely spend two days here.

I completed the Circle Tour by driving back here from Banff, and had a terror of a time of it. It was not too bad to High River, but from there to Crow's Nest it was wicked. I had to plough through about forty mud holes and got stuck so badly in one that I had to get pulled out. It took me two days to make from Calgary to Fernie, and was the hardest and most tiring drive I have ever had.

With roads in such chronic shape, it is not to be wondered at that tourists are late in coming through, but directly the roads do dry up, they will come through in numbers which will amply make up for the delay.

It will be some time yet before the Alberta side of Crow's Nest is opened up again, but the summit road is not at all bad now. It is somewhat rough in spots, but there are no mud holes and no one need fear getting stuck.

Conservative candidates in "Tory Toronto,, ran true to form. As their majorities ran into four figures no recounts are expected.

Beauty Hint for Women

For clear skin and bright eyes

Take

When food is only imperfectly digested, it gives rise to fermentation, clogs the bowels, and renders the blood impure. This results in dull eyes, muddy skin, blotches, pimples and other disfiguring marks. Beecham's Pills act immediately on the stomach, liver and bowels; regulate them and keep them in a vigorous condition. They are mild, harmless and dependable. They are compounded of remedies of vegetable origin having great medicinal value.

New Gloss *and* Softness Comes from this Shampoo

Try the shampoo which is giving new beauty to thousands of women's hair!

All hair specialists agree that hair cannot be beautiful if it is left dry and brittle by shampooing. They tell you that the olive oil shampoo is the surest way to have clean hair—without leaving it dull and colorless.

Now try the finest of olive oil shampoos at home—economically. In PALMOLIVE SHAMPOO you have olive oil in its most perfect form for the hair. Women by the tens of thousands are attaining new hair beauty by its use.

It is a treatment for which you would pay a specialist high prices. And it is most convenient to use. Cleanses the scalp and hair of all oil and dirt. Removes dandruff most thoroughly.

And it leaves your hair with new richness and life—the softness and gloss of new silk.

Send coupon for free trial bottle—15c size. Or get full-sized bottle at your dealer's. Try it—soon. Amazing improvement from even one shampoo.

THE FRED CARMELLO SHOW AT THE GRAND

Two well- filled shows on last Saturday night attested the growing popularity of Fred Carmello's Musical Comedy company with local theatregoers. The play, "A Fool's Advice," proved an entertaining vehicle in which the various members of the company acquitted themselves admirably. Following the regular advertised play, and afterpiece was presented, this being a musical version of "A Family Affair."

On next Saturday the company will return to Fernie with an entire change of program, the feature play announced being, "All For A Girl."

Two complete two-hour shows will be presented, the first running from 7 until 9 and the second from 9:30 until 11:30 p.m.

BIG FOREST FIRE IN "SCARS OF JEALOUSY"

"Scars of Jealousy," Thomas H. Ince's romantic modern drama of the Southland, which soon comes to the Orpheum theatre, is jammed with red-hot thrills, according to advance reports from critics who have previewed it. The story deals with the little known "Cajans" or descendents of the Acadians who settled in the mountains of Northern Alabama more than a hundred years ago. It also depicts life as it is reallly lived today on the big plantations of the South and has for a prologue quite the most pretentious scenes showing court, peasant and city life in the time of Louis XV of France that the screen has ever seen.

The climax of the picture revolves around a great forest fire, the real thing by the way. These scenes were filmed in Northern California, while a forest ranger was clearing out a timber tract.

The entire Ince company worked for a week at high pressure and at various times were in some danger when a shift in the course of the flames cut them off. In one instance equipment was abandoned and Lambert Hillyer, director, was caught in a burning tree.

Another feature of the photoplay is a novel escape through a swamp staged by Marguerite de la Motte and Lloyd Hughes. When a forest fire traps them in a ring of flames, they make their way out by way of a timber flume.

The prologue to the exciting drama of Northern Alabama mountaineer life is one of the most magnificent ever employed as an introduction. It was enacted by nearly a thousand actors and the sets, showing the France of the time of Louis XV, reflect the luxury of the period. Contrasted with these magnificent scenes are the opening shots of the production in the hills of Alabama. Descendants of the French nobility who were driven from France and later from Nova Scotia by the British are today living under the most primitive conditions in the South. The picture tells the story of a descendant of French aristocracy whose blue blood triumphs over sordid hill generations when he is given an opportunity.

IMPOSSIBLE TO GET RELIEF

Until She Started To Take "Fruit-a-tives"

The Medicine Made From Fruit

R.R. No. 1, Everett, Ont.

"I had been troubled for years with Dyspepsia, Liver and Kidney Trouble, and could not get relief until I started taking "Fruit-a-tives". Thanks to their beneficial action, I am in normal health again".

Mrs. THOMAS EVANS

"Fruit-a-tives" alone can give such happy and successful results because "Fruit-a-tives" is the famous medicine made from fruit juices and tonics.

"Fruit-a-tives" is pleasant to take and will always restore the health when taken regularly as directed.

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

ADDITIONAL LOCALS

Thos. Uphill, M.P.P., was in Chicago this week.

Miss Fairy McDougall, of Edmonton, is the guest of Mrs. A. Black.

Miss Dewar, of Nelson, is the guest of Mrs. Geo. Moses.

A. B. Trites returned yesterday from Shelby where he tok in the big fight.

Phil Sheffield left on Sunday for Toronto to write on the University examinations.

The Ladies' Guild of Christ Church tea will be given by Mrs. A. B. Sanborn on her beautiful lawn, Saturday, the 14th inst., from 3:30 to 7 p.m.

Dr. Garner arrived home yesterday from Niagara Falls, Ont., where he had been called owing to the illness of a relative.

Mr. and Mrs. Ed. Brawley, who have been residents of Fernie for a number of years, are leaving on Sunday for Klamoth, Ore., where they will spend the summer.

The following team will represent Fernie at Michel on Sunday July 8. Notice will be posted giving time when team will leave: Swedeberg; Booth and Wilson; Robertson, Riley and Morrison; J. Davidson, T. Joinson, A. Thomson; reserves: Sofko, G. Davidson, R. Steele.

Arthur Fenwick, of Fort Steele, a Dominion Day visitor to Fernie, met with an accident on Monday evening while returning home. When near Cokato his car was crowded off the road and turned over. Mr. Fenwick escaped injury, but a young man, E. Sowerby, who was travelling with him was pinned under the steering wheel and had his hand badly cut.

So far this year the losses from forest fires have not been heavy, states the Minister of Lands, but he has issued a fresh warning to forest rangers and the general public. The dangerous season has arrived and after the heavy rains of the spring and early summer, it is only natural to expect a dry spell, which in many districts will probably last for months. From now on. every citizen should consider himself a fire warden and join in the fight to protect the magnificent forests of British Columbia.

PRIZE WINNERS IN MINE COMPETITIONS

The following is the prize list in the Mine Rescue and First Aid Competitions held in Blairmore, July 2 and 3 (in order of merit):

Mine Rescue—Michel and Hy-Grade tie for first; Fernie No. 2; Nordegg; Bellevue No. 3; Fernie No. 1; Coal Creek; A.B.C.; Bellevue No. 1; Blairmore No. 1; Blairmore No. 2.

Senior First Aid — Drumheller; Lethbridge No. 1; Bellevue; Lethbrige No. 2.

Ladies First Aid—Michel.

Junior First Aid—Lethbridge Boy Scouts; Bellevue; Blairmore.

Health turns the clock backward

Sufferers from Rheumatism May Expect Health Again.

Health Talk No. 25
By G. J. Parks, D. C.

The question is asked, why are we so confident that chiropractic will get results in rheumatic cases where the experience is that nothing has been of any real benefit. The victim of rheumatism suffers such agony that he is not to be blamed for trying anything and everything that is offered. The reason chiropractors are so confident of results in these cases is because chiropractic is so utterly different. No matter what else you have done, or what variety of methods may have been offered, there was not one of them that would do the work of chiropractic spinal adjustments. For chiropractic there is no substitute.

Rheumatism is due to failure of the organs of elimination. When the normal wastes of the kidneys and bowels are not properly expelled from the body the foundation for rheumatism is laid. Chiropractic spinal adjustments free the spinal nerves to supply 100 per cent life impulses to the organs of elimination. It is only a question of time when proper adjustments are given until the rheumatism disappears.

Well After 15 Years With Rheumatism.

"I have been a sufferer from rheumatism for the last fifteen years, the last three months I had to go on crutches and could not rest either day or night because of the pain, I was advised to take chiropractic spinal adjustments and after one month's course I became free from pain and threw away my crutches and feel as well as I ever did.

"I am offering this statement for the benefit of those who have suffered as I have and want to know how they may be relieved."—John Rivers, Chiropractic Research Bureau, Statement No. 1363NM.

LOCAL & GENERAL

Senator Robt. Green was a Fernie visitor on Wednesday.

Fred Johnson is in Blairmore auditing the city books.

Miss Stot, of Penticton, is the guest of Mrs. H. Brown.

Miss Dorothy Nelson, who has been teaching at Merritt, B.C., is home for the summer holidays.

Stanley Dicken has resigned his position in the Government office and is moving to Lethbridge.

Wm. Barraclough returned on Saturday last from a month's trip to the coast. Mrs. Barraclough and son are still visiting in Victoria.

The regular monthly meeting of the Women's Missionary Society will be held on Tuesday evening at the home of Mrs. Hanna, 32 Victoria Avenue, at 8 o'clock.

Fred Spalding and A. M. Owen took in the celebration held at Kootenay Crossing on Saturday last, when the Banff-Windermere road was opened.

The St. Agatha's Girls of Christ Church will hold a tea on Saturday, July 7, at the home of Mrs. E. H. Wood, McPherson Avenue, from 3:30 to 6 p.m.

Rev. Don Campbell returned yesterday from the coast where he attended the annual Baptist Convention. During his absence he visited the Okanagan Valley.

Miss Dahlia Schagel wishes to thank the citizens of Fernie and District for their liberal support during the recent Dominion Day Queen campaign.

Miss Anna McPhee wishes to take this opportunity to express her sincere thanks to all who so loyal supported her in the recent Dominion Day Queen campaign.

Do not forget the afternoon tea to be given by Mrs. A. B. Sanborn, on her lawn, from 3:30 to 7 p.m., Saturday, the 14th inst. for the Ladies' Guild of Christ Church.

A large party of Alpiners will leave for Island Lake on Saturday at 7 a.m. The party will leave from the residence of Mr. and Mrs. Mott, returning late in the afternoon. All joining the party should provide themselves with at least two meals.

Income tax returns for this year have increased twenty per cent. over last year, announced the minister of finance this week. He claims that business throughout the province is in a flourishing condition, speaking generally.

Mr. and Mrs. A. B. Trites and Mrs. E. K. Stewart have just returned from a thirteen hundred mile trip through Washington and Oregon. The trip was made in a new Lexington car, which Mr. Trites purchased in Vancouver.

The Crow line of the C. P. R. is now handling the main line traffic as a result of the serious washout at Cochrane, west of Calgary. Trains eastbound are being diverted at Golden, and westbound at Calgary, for Crow's Nest line. This great increase in traffic comes on top of a heavy movement of coal, wheat and other tonnage, but everything on the division is moving smoothly. There is a heavy movement of grain east just now, more than a thousand cars being handled in the month of June. Grain in store is rapidly being cleaned out, making room for the big harvest expected.

W. K. Esling, M.P.P., for Rossland, who was in the city this week with Hon. W. J. Bowser, is sure an old timer in the Kootenays, having resided in Rossland for twenty-seven years. For twenty years he owned and edited the Rossland Miner. Speaking of the tourist traffic, Mr. Esling said: "Rossland is ready for the tourist. We consider that the best way to emphasize a welcome, is to provide proper accomodations and we have prepared the most perfectly equipped camp in the interior. The entrance contains shower baths and sanitary conveniences, and there are four shelters of rustic design, each of which contains a range, table and benches. There is plenty of fire fuel, electric lights and city water for each shelter. A writing and reading room is also provided for travellers and for kiddies, there is a minature lake, while a plunger for men, completes the arrangements. The committee, which was designated by the Board of Trade, has planted many trees, shrubs and flowers and nearly an acre of sod was laid to carry out the scheme of improvement."

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Aaron Walde has purchased a Star from Wm. Johnston.

Mrs. Thos. Prentice and Mrs. T. Oakeley are holidaying at the Coast.

Born on Monday, July 2, to Mr. and Mrs. W. Thomas, White Spruce, a daughter.

Mr. and Mrs. J. Turner ,of Regina, are spending a few weeks in the city the guests of Mr. and Mrs. P. A. McLeod.

No further trace of Frank Gilbert, who so mysteriously disappeared on Wednesday of last week, has been discovered.

Walter Harwood left on Sunday last for Victoria. He was accompanied by Lawrence Herchmer, who will spend the holidays at the Coast.

attending High School have been invited.

The regular luncheon of the Fernie Rotary Club will be held on Friday evening at the Napanee. The boys

M. A. Kastner, A. Klauer and Staff. Wilson returned this morning from Shelby, where they took in the big fight. Wm. Ingram and Percy Bean, who motored down, are expected home today.

The regular monthly meeting of the Fernie District Rod & Gun Club will be held in the Council Chamber of the City Hall on Monday evening, July 9, at 8 p.m. All members are requested to be present.

Practically 90 per cent of the City taxes were paid into the treasury up to last Saturday night, amounting to some $72,000. This is exactly $10,000 more than was paid up to the same time last year.

The Catholic Women's League wish to thank Mrs. W. R. Wilson, the G. W. V. A. Band and all friends who so kindly helped in making the League Bazaar a success.

An amendment to the Game Act provides that a bounty of fifteen dollars will be paid on wolf cubs over seven days old, as well as on all older animals. This provision is an incentive to the hunter to snuff out the young of predatory animals wherever they may be found.

The new officers for the local Salvation Army Corps, Ensign Laycock and Captain Haines, arrived on Friday last and held their welcome meeting on July 1st. The retiring officers farwelled last week, Ensign Hanson to Penticton and Lieutenant Marshall to Cranbrook.

Many Fernie friends will be interested to learn of the marriage which took place in Seattle this week of Mr. James M. Linn, son of Mr. and Mrs. George Linn, who resided in Fernie some years ago but now of Vancouver. The bride was Miss Edith Nellis, daughter of Mrs. J. Nellis, of Seattle. The ceremony was performed at the home of the bride's mother. Among the Vancouver guests were the mother of the groom and his two sisters, Misses Bessie and Isobel Linn. The young couple will motor to Butte, Montana, where Mr. Linn has business interests.

Wm. Dunwoody was the guest of honor at a little affair held at the Fernie Club on Tuesday evening, upon the eve of his departure for his future home in Nelson. There were about fifty friends of Mr. Dunwoody present and a delightful evening was spent. E. K. Stewart, who was chairman for the occasion, on behalf of those present presented the departing guest with two beautiful arm chairs, as a slight token of their regard. Among those present who spoke during the evening were Senator Robert Green, Col. Lister, M.P.P., of Creston and Jas. Schofield, M.P.P., for Trail.

INTERIOR ACTIVITIES

Victoria — Contract for the construction of 1.02 miles of road beteween Hyder and Stewart has been awarded to O. M. Watson, of Alice Arm, for $37,167. The highest tender was $47,846. The road will be cut through the rock hillside following the shoreline and take the place of the old trestle approach to Stewart.

Victoria—Three surveys have been ordered by the government for new roads in the Trail district. One is for the four mile diversion between Ymir and Salmo; a cut-off of the Trail-Fruitvale road through Beaver Creek, and a diversion of the Kootenay River road between Garrity Creek and South Slocan. The surveys will cost $3300.

Victoria — The dangerous hill known as Deadman's Point on the Mabel Lake-Lumby road is to be cut down by the government at a cost of $4000 by day labor under assistant district engineer Jones Vernon. Most of the work is in rock. A thousand dollars have been set aside to reconstruct dangerous points on the Enderby-Mabel Lake road; and a contract has been given to D. McPherson, of Grand Forks to repair and resurface ten miles of the Trans-Provincial highway from Rossland to Christina Lake road for $5000, the government gangs, doing the remaining 5 miles.

Calgary—Speaking before the session of the Railway Commission here, William Pearce, statistician for the C. P. R., said, "Vancouver will be established permanently as the outlet for all wheat shipped by the western grain route from points west of Moose Jaw within the next few years." He added further that in 1884 Sir William Van Horne had remarked to him that the time was not very far distant when the whole of Burrard Inlet would be covered with docks and harbor facilities.

Vancouver—Sir George Fuller and Hon. H. S. W. Lawson, premiers of New South Wales and Victoria were the guests of the city last week when a number of side trips were arranged in their honor. At Port Haney the visitors saw Andy Rekdal, a famous high rigger top a "toothpick" in ship shape fashion and witnessed the spectacle of giant cedars being felled and mammoth logs being picked up like playthings, and placed on trucks. "Well done Andy," said Premier Fuller when the famous woodsman came to ground again, "You are a brave man."

Vancouver—Ten thousand war veterans from all parts of Canada are assembled here for their annual convention and an elaborate program of festivities has been drawn up for their entertainment. On July 4, their numbers were swelled by the arrival of 2000 members of the American Legion. The Trade and Labor Council held its society circus during these date. Other attractions were the Rose Show and the International yachting regetta from July 2 to 4, bringing together all the crack racing yachts on the Pacific Coast. Horse races at Brighthouse Park are in full swing and Voncouver is the mecca of thousands from all parts of B. C. and Washington. President Harding will be here July 26 as guest of honor at a civic luncheon and will address a mass meeting in Stanley Park. One of Britain's warships will be in the Inlet to greet the transport on which the President is travelling.

Vancouver — According to "The Hook," the new weekly paper edited by J. S. Cowper, former M.P.P., and acting President of the Anti-Narcotic Drug League of B. C., a powerful Japanese group is at work in Peking endeavoring to get a concession from the Chinese government to found an opium traffic bureau. They have promised a national loan with a first payment of $10,000,000 as an immediate advance. They argue that with 15,000,000 opium addicts in China, legislation will bring in an annual revenue of $400,000,000. Sir Francis Aglen, inspector of customs is said to favor the plan arguing that to get the evil into the open will make control possible, but President Li Huan and the Chinese press is opposing the proposal.

Victoria—the following works have been sanctioned this week by the Public Works Department:

Similkameen district — Repairs to the Osoyoos-Sidley mountain road to cost $1000. New bridge on Lowe's road to be known as Swan bridge.

Fort George—New span for Wilson bridge.

Island — Rock surface of Fulford-Ganges road to cost $10,000; repairs to bridge No. 7-91 in Island Highway near Duncans and new trail to falls on Nanaimo River for use of ranchers and tourists; repairs to bridge 52 at Coombs, Alberni district.

North Vancouver—Repairs to bridges to cost $4118; new road at head of Pender Harbor to cost $600.

North Okanagan — Completion of Butter's bridge and Aumond bridge, $1100.

Columbia — Reflooring Athalmar bridge; repairs to McKay bridge on Columbia road; new bridge over middle fork of Spillamachene River on the Carbonate spruce camp trail.

Cariboo—Repairs to Quesnel River bridge; little Horesfly bridge; Mensinger bridge and Syers bridge; alterations to superstructure at Quesnel ferry; the Dry Gulch bridge is to be replaced by a culvert and fill.

Slocan—Road extensions at Appledale, Arrow Park, Needles, Passmore, West Demars, Slocan City, Wilson Creek and Nakusp; a traverse is ordered of a proposed new road extension between Arrow Park and West Demars.

Revelstoke — Nine miles of trail from Carnes Creek to open up mining properties.

Lillooet — Fiset Cat Creek, Gun Creek, Tyaxon Creek, Whitley, Riley Creek and Mission Shalath bridges, all to be replaced by culverts and fills.

Fernie — New bridge at Michel mouth.

Kaslo—Cutting down hill on road at Canyon hill school house.

Greenwood — Three mile extension of Main Kettle River road.

Orpheum Theatre, Wednesday and Thursday, July 11 and 12

FEDERAL POLITICS AND THE ONTARIO ELECTION

The Government at Ottawa will probably continue to worry along with its present slim majority rather than test public opinion again after the Conservative triumph in the Ontario elections. For some months past there has been a good deal of talk of dissolution of the Federal Parliament. The Government's position is precarious to the extent that it is compelled to mark time instead of making advances in the matter of

There is one aspect of the Ontario legislature. It is in a position where it has to compromise continually, or else lay itself open to the possibility of defeat through a combination of the Conservatives and Progressives. The situation is so uncertain that it requires the most constant vigilance on the part of the Government whips, and it cannot be maintained that such a state of affairs is in the public interest.

elections which may give the Government some comfort. The decisive defeat of the Farmers there may indicate, and very probably will, that in future there will not be the same cohesion and unity among the Progressive at Ottawa. A tendency of this sort might persuade Mr. Mackenzie King that his party has something to gain by going to the country at a time when the fortunes of the Farmers' Party are on the decline. That is the only consolation he can derive from the recent elections in Ontario, but to offset this there is the fact that of all three major parties the Liberals did worst. The Federal Government can carry on but it cannot do what it wants because its majority is too precarious. It regarded the Ontario election as a test of Liberal strength in that Province in its application to Federal affairs. The outcome cannot but prove highly disappointing to Mr. Mackenzie King and his colleagues. It places them in a dilemma which will have a tendency to make their position in Parliament even duller than it has been since the Liberals came into power.—Victoria Colonist.

WATER NOTICE

Use and Storage

TAKE NOTICE that F. C. Limbocker, whose address is Jaffray, B. C., will apply for a licence to take and use 100 acre feet and to store 5 acre feet of water out of Little Sand Creek which flows South and drains into Big Sand Creek about 1½ miles South of Jaffray. The storage-dam will be located about 300 feet South of Government Road. The capacity of the reservoir to be created is about 5 acre feet, and it will flood about 1 acre of land. The water will be diverted from the stream at a point about 300 feet South of Government bridge and will be used for irrigation and power purposes upon the land described as portion of sub-Lot 3, South of Government Road and West of Sand Creek. This notice was posted on the ground on the 19 day of June, 1923. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fernie, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is June 22, 1923.

F. C. Limbocker,
je22|4. Applicant.

WATER ACT, 1914.

Notice of Application for The Approval of Plans.

TAKE NOTICE that East Kootenay Power Company, Limited, will apply to the Comptroller of Water Rights for the approval of the plans of works to be constructed for the diversion of water from Elk River under application for a licence for Power purpose, which application was filed in the offices of the Water Recorders at Fernie and Cranbrook on the 16th day of December, 1922, and under Conditional Water Licence No. 1990. The water is to be diverted from the said stream at Upper Falls above Upper Basin and is to be used upon the lands described as Lot 227 Kootenay Land District (Power House site). The localities within which the business of the Company is to be transacted are the Fernie Water District and the Cranbrook Water District in the County of Kootenay, British Columbia. The plans and specifications of the said works have been filed in the office of the Comptroller, and duplicates of such plans and specifications are now open to inspection in the offices of the Water Recorders at Fernie and Cranbrook. Objections may be filed with the Comptroller at any time prior to the expiration of thirty days after the first publication of this notice. The date of the first publication of this notice is June 8th, 1923.

IT IS YOURS

Five-sixths of the timbered area in B. C. belongs to the People.

Each year, it is increasing in value as the more accessible timber is cut.

In 1922 there was received from the sale of such timber the sum of $620,000.

This helped to keep your taxes down, and to build up the Province.

Green Timber is British Columbia's assurance of Perpetual Prosperity.

WHY BURN IT?

Canada Confident of the Future

CANADA is endeavoring to regain her after-the-war stride in the midst of many difficulties, — debt, deflation and depression being some of them.

Quack remedies and academic theories beset her path on every side. Some suggest that our debt worries can best be eased by going further into debt. Others preach blue ruin, decry their own country and indulge in mischievous propaganda generally, while still others look for a new social order or some miraculous sign to indicate a better coming day—all this in apparent forgetfulness of the fact that just as there was no royal road to win the war, there is now no royal road to pay for it or regain our former buoyancy, vigor and confidence.

Some are leaving Canada hoping to escape taxation, only to find there is no escape anywhere. In seeking for easy remedies too many of us overlook the fact that the greatest remedy is honest, hard work faithfully and intelligently performed, accompanied by old-fashioned thrift.

It takes time, it takes patience, it takes grit. But every Canadian knows in his heart that Canada is coming through all right.

Our Experience Proves It

Look back over the path Canada has trod. The French Colonists, cut off from civilization by 3,000 miles of sea, faced a continent—a wilderness—without the aid of even a blazed trail. They had to fight savages, frosts, scurvy, loneliness and starvation.

The United Empire Loyalists subdued an unbroken forest in one generation, growing their first wheat amid the stumps and snags of the new clearing.

The Selkirk settlers came to Manitoba when the prairie was a buffalo pasture, and grew wheat where none had grown before and where those who knew the country best at that time said wheat would never grow. Today the Canadian prairies grow the finest wheat in the world.

In proportion to population Canada stands to-day among the wealthiest nations in the world, with average savings on deposit per family of $800. Canada's foreign trade per head of population stands amongst the highest of the commercial nations, being $192 per capita in 1922-23, as compared with $135 in 1913-14, the "peak" year before the war.

New Opportunities for Canada

In Canada, although prices in the world markets fell below war level, our farmers reaped last autumn the largest grain crop in Canadian history, and Canada became the world's largest exporter of wheat, thus in large measure making up for lower prices.

Last year, Great Britain, after an agitation extending over thirty years, removed the embargo on Canadian cattle, and a profitable and practically unlimited trade is opening up for Canadian stockers and feeders.

"The 20th Century belongs to Canada"—if Canadians keep faith.

The next article will suggest practical opportunities for profit making on our Canadian farms.

Have Faith in Canada

SUCCESSFUL CELEBRATION

(Continued from Page One)

Junior Baseball Game

The Sports' Program at the Park opened up with the Michel-Fernie Junior Baseball game the latter winning a hard fought game by a score of ten runs to nine.

Fernie got away to a big start in the first when three hits gave them four runs off Winters who started for Michel. Sadlish replaced him and from then on the going was not so easy for the Fernie boys. Sikora pitched good ball for the local tribe but a flock of errors behind him almost cost Fernie the game. The finish was extremely interesting to the large crowd of spectators, with the score standing 10 to 9 in the last half of the ninth and men on second and third, Travis drove a long fly to centre field where Miscisco pulled of a fine catch to retire the side and win the game.

Score by innings—		R	H	E
Fernie	420 011 110	10	11	7

Senior Baseball Game

The feature of the Sports' program was the senior baseball game for the $200 prize, played between Kimberley and Fernie, the two leaders in the East Kootenay Baseball League.

Coming from behind a three run lead gained by Kimberley early in the game, Fernie batted their way to a well earned victory, the final score being Fernie 5 Kimberley 4.

Garrity, on the mound for Kimberley, was new to the Fernie batters, but they seemed to have little difficulty in connecting with his offering but only secured eight clean hits off him. These came, however, when hits meant runs.

Ault was in the finest form he has displayed this season, and again no earned runs were secured off him, errors being responsible for Kimberley's four runs.

Kimberley opend the scoring in the second inning when Crerar walked. Musser then hit to Shand who threw to Bishop at second. Bishop in a hurry to make a double play dropped the ball and both runners were safe. Ault struck out the next two men up then Flaherty singled scoring Crerar and Musser. Flaherty went to second when Bishop dropped the ball when tagging him out. Horne then singled scoring Flaherty but was out stealing second.

Fernie came back strong in the third. Shand, first man up walking to first, Ault drove him home with a long two-bagger, Hovan singled scoring Ault, Bishop singled, Ruschall struck out but Hovan and Bishop advanced a base each when Murray failed to hold the ball. McTeer singled scoring Hovan and Bishop, Barger got safe on first when Musser let the ball go through him but McTeer was tagged out coming home. Dunlap flied out to centre field.

With Fernie leading 4 to 3, a pitchers duel ensued, both securing a shut out until the seventh, when Kimberley tied the score. Murray walked, then an error by Wilson when a double play should have been made, allowed Murray to get to second and Flaherty to first. Horne was thrown out at first while Murray went to third and Flaherty to second. Grant singled scoring Murray. McBride popped out to Ault who doubled Grant at first.

Fernie regained their lead in the eighth when McTeer walked and was driven home, Barger singling and Dunlap following him with a two-bagger. Fernie were blanked in their half of the ninth and Kimberley came to bat in the deciding innings. Ault then demonstrated what real pitching was, throwing the ball only eleven times to strike out the three batters who faced him.

The box score—

Summary—

Sacrifice hits: Coen; Two base hits: Crerar, Ault, Dunlap; Struck out: by Garrity 6, by Ault 12; Base on balls: off Garrity 4, off Ault 2; Missed third strike: Murray; Double play: Ault to Barger; Earned runs: Kimberley 0, Fernie 3; Left on bases: Kimberley 5, Fernie 7; Time of game: 1 hr. 50 min.; Umpires: Adamson and Griffith

Football Competition

In the Football Competition five entries were made, these being from Fernie, Coal Creek, Michel, Cranbrook and Coleman. Fernie and Coleman were drawn to play off to bring the competition to the semi-finals. This game commenced on the North End Grounds and had only been in progress for ten minutes when Coleman disputed a decision, giving Fernie a penalty, made by Referee Sweeney and walked off the field. Fernie were awarded the game.

In the semi-finals, Michel easily defeated Cranbrook on the North End Grounds by a score of seven goals to nil. The game between Fernie and Coal Creek was a much harder tussle. Coal Creek assumed the lead after fifteen minutes of play in the first half when Corlett scored from a penalty kick, and from then on put up a strong defensive game and maintained their lead to the finish.

The final game was played at the Park immediately after the Fernie-Kimberley ball game. Coal Creek won the toss and elected to play with the wind, and for a time kept the Michel defense busy. Towards the end of the half, Atherton got away on the right and centred to Hardy who scored for Coal Creek. After half time, Michel, with the wind at their backs, kept the ball confined to Coal Creek territory, Sawyer being repeatedly called upon to defend his goal. Just a few minutes before time, Travers tried a long shot at goal and the ball travelling high and fast sailed through the goal for the equalizer. Overtime was necessary to decide the division of the prizes. Five minutes each way, corners not to count, was mutually decided upon. In the first five minutes Michel made some determined attacks on the Coal Creek goal, the heavy wind making it hard for the Coal Crek defenders to clear properly, McGovern got the ball and sent in a long shot for goal catching Sawyers unawares and gave Michel what was the winning goal.

SPORT

FERNIE BESTS LUMBERTON

Fernie easily defeated Lumberton in the postponed league game played here last Sunday afternoon, despite Manager Jacobsons's desperate effort to strengthen his team, the final score being sixteen runs to three.

Sofko started for Fernie and looked good for the first inning but in the second, two hits and a couple of errors, giving Lumberton three runs, seemed to rattle him and he walked two men in succession, filling the bases. Ault replaced him and from then on Lumberton were held scoreless the rest of the game. Knudson, a new recruit pitcher from Medicine Hat started for Lumberton, was wild, issuing six passes, and when they did come over the plate the Fernie swatsmen had no difficulty in pounding the ball all over the lot. Debolt replaced him in the seventh but was unable to stem the batting melee of the Fernie team.

Box Score—

Lumberton—	AB	R	H	PO	A	E
Molisky, ss	4	0	0	0	1	2

LEAGUE STANDING

	W	L	Pct.
Kimberley	4	2	.666
Fernie	4	2	.666
Cranbrook	4	3	.571
Wycliffe	2	4	.333
Lumberton	1	4	.200

Fernie journeyed to Lumberton on Wednesday to play the postponed league game with that team and secured a win in a hard fought game by a score of three runs to one.

Knudson displayed much greater control than he did in last Sunday's game and held Fernie to eight hits. Ault, pitching his third game in four days, maintained his recent splendid form and held the game well in hand all the way through.

Fernie started out in a determined manner, Hovan singling. He was sacrificed to third by the next two batters then McTeer drove him home with a two-bagger, Barger singled, scoring McTeer, giving Fernie two runs in the first inning. Barger added another for Fernie in the fourth when he again singled and was driven home by Ault's two-bagger. Lumberton scored their lone tally in their half of the fourth, Knudson scoring after he had singled and was batted home by Cairns and Scott. From the fourth innings to the end of the game, both teams were completely shut out. Ault again pulling his sensational three strike outs in the last inning. He struck out twelve to Knudson's six.

Scre by innings—		R	E
Fernie	200 100 000	3	8 1
Lumberton	000 100 000	1	9 1

Ault and McTeer; Knudson and Scott.

As the schedule reverted to July 1st this game has been declared an exhibition game and will not be entered in the league standing.

FOOTBALL SHYS

By Linesman

We hear of a Coal Creek footballer who is figuring on getting rigged out with a set of bumpers. Wot! Oh she bumps.

Another enthusiast is anxious to know why Caufield persists in demonstrating his new crawl stroke. Must be looking for a grass widow.

Sweeney says just think what that guy Daugherty got for refereeing the Dempsey scrap.

Bobbie says he see'd Tommy dressed oop i them ere kilts parading abhat teawn wi' band a Munday. T'owd lad favvored a proped owd cock duck an a'.

Tommy ventures to opine that kilts are alright for a leg show or tending bar, but no good when it comes to shingling a roof.

Now, Johnny m'lad, watch what you're doing, Bert Saw-yer.

Jimmy Easton wonder why Michel don't play old Jenks. He is the best kicker they have got, remarks the said James.

NEW BASEBALL SCHEDULE

At a meeting of the East Kootenay Baseball League held in Cranbrook on Wednesday evening the question of Cranbrook's withdrawal from the league was brought up. After considerable discussion it was decided that as a new schedule would be necessary, the league standing would revert to the position held on Sunday July 1st and this schedule be considered finished.

A new schedule was drawn up for what will be the second half of the League, the winners in the two sections to play off at the close of the second section to decide the pennant winner.

The Nelson News Cup put up for a post-season play-off will be played after the league is through between the winners of the two sections of the league in a second game. Should the same team win both sections they will meet the team holding second place to decide the winner of this cup.

As the league standing has been reverted to July 1st, this means that Fernie and Kimberley are tied for first place, to decide who are to be declared leaders in the first section, Fernie and Kimberley will play at Fernie on Sunday July 15th. This game will also be considered as the first game of the second section.

The second section schedule will consist of one home and home series with each team. This will give Fernie three more home games to be played before the end of the season.

ISLAND LAKE

The Alpine Club, which visited Island Lake last Saturday found conditions rather backward. The mosquitos were so numerous as to make camping there out of the question for some time. It is not likely that the neighborhood will be free from mosquitos much before August 1st.

During the years that the Alpine Club has been in abeyance the improvements made at the lake have largely disappeared. The club formerly possessed two boats, both of which have vanished; and though the frame of the cabin is still in good condition, the floor has been torn up for fuel by irresponsible parties. Plans are now under way to repair the cabin and place a boat or two on the lake.

It is hoped that the people of Fernie will lend a hand to place the lake once more in suitable shape for week-end parties. Island Lake has many natural advantages. It is the only body of water within twenty miles of Fernie suitable for camping purposes; the scenery, especially looking across the lake toward Sugar Loaves, is unsurpassed; and the trip is an easy one.

No place is more patronized by week-end parties during the summer and fall, and steps should be immediately taken to accomodate such parties.

THE RAILWAY COMMISSION

The Board of Railway Commissioners visited the city last Monday and held an all day session in the City Chambers hearing the eight cases brought before them. Decisions were given in all cases excepting the application of the Lethbridge Board of Trade for restoration of the daylight train service through the Crow.

The complaint of Mr. A. J. Farquharson against the rate and minimum carload weight, charged by the Great Northern Railway Company on logs, in carloads, from Farquharson's spur to Fernie was fully gone into and the Commissioners issued an order for an extension of Farquharson spur on the G. N. and provided for a new private crossing. The Great Northern are to reduce the minmum on carload lots of logs from eight thousand to seven thousand feet on cars of three ton capacity and to make an adjustment in regard to shipments and tariff.

The application of the Fernie Board of Trade that the express rate on fresh fruit and vegetables, which was in effect three years ago, be re-established was second on the list and after hearing the evidence, the Commissioners decided that Fernie be given the same rate as Vancouver and Victoria as a maximum.

An application for a seven day refrigerator service between Edmonton and Fernie was granted, the same to be put in effect in two weeks' time.

On a request for an extension of the C. P. R. depot platform two carlengths, to accomodate full length of passenger trains, it was ordered that the engine on westbound trains stop beyond the platform. The C. P. R. also promised to improve the lighting system on the platform.

The claim of the Fernie Board of Trade that certain commodities from the east carried a higher rate than the Coast combination was denied by Mr. Jefferson, of the Canadian Pacific Railway, who stated that the Coast combination rates are now the maximum, and that if any discrepancy had occurred, the C. P. R. were willing to adjust.

Mr. J. B. Turney, of the Lethbridge Board of Trade, supported by the Fernie Board of Trade and the Associated Boards of Southern Alberta and Southeastern B. C., made application for the restoration of a daily daylight train service Lethbridge to Cranbrook as follows:

"On behalf of the Lethbridge Board of Trade and commercial interests of the district, we again urge the consideration of your board for an early relief of the present unsatisfactory passenger service along the Crow's Nest Branch of the Canadian Pacific Railway. The present service between Lethbridge and Cranbrook of one of the through trains each way every twenty-four hours is a matter of great inconvenience to the residents, and additional expense to the commercial interests of the district. This is more particularly true on account of the one through train each way daily arriving and departing from Lethbridge after mid-night and from which point a great many commercial travellers radiate.

"At the hearing given by your Board held at Lethbridge in September 1922, your Chairman heard some evidence of our Board, at which time he stated that if the present arrangement of the tri-weekly day-light train between Lethbridge and Crow's Nest was found unsatisfactory, that further consideration would be given.

"The district between Lethbridge and Cranbrook is now receiving the same passenger railway service that was given it in 1900, one train each way every twenty-four hours, and an additional stub service three times a week from Lethbridge to Crow's Nest. We submit that the development of the district and the increase in the population and freight earnings warrants more convenience for the travelling public. It is hard to conceive how it can be expected that a population of about forty thousand people in the district affected can be adequately served with only one train each way daily, and more particularly at points where this one train arrives and departs in the middle of the night, as is the case with trains No. 67 and 68.

"We quite appreciate the Chief Commissioner's expressed views that economy must be practiced by the railway companies if the public are to continue demanding lower freight rates, but there is a point where too drastic curtailment of service fails to be economy, especially to the travelling public and commercial interests. At the present time there are between seventy-five and eighty commercial travellers travelling out of Lethbridge along the Crow's Nest route. This does not take into account the great number of travellers who work this district from Calgary, Vancouver, Winnipeg and wholesale houses at other points. The firms employing these travellers are put to an enormous expense in maintaining their representatives on the Crow's Nest line through lack of additional train each way daily. It is impossible to keep a traveller on the road at a less expense than $7.00 per day actual expenses, in addition to his salary. Under the present conditions a traveller can only work one town per day. As the towns are all small, the trade limited, the traveller invariably finishes up his work within a few hours, but is obliged to wait twenty-four hours for the following day's train. With one additional train each way daily as we are asking for, a traveller will be enabled to work at least two and sometimes, by "doubling back," three towns per day. In other words to do business properly it is now costing the wholesale houses represented by perhaps eighty travellers two or three times as much in travelling expenses as would be the case if the service we are asking for were put in operation and a corresponding saving would be effected in the traveller's time or efficiency to his house.

"With the present one train each way every twenty-four hours, the day coaches are inevitably so crowded that it is often impossible to secure a seat which necessitates the extra expense of buying a reservation in the sleeping car. Further, if one can secure a seat in a day coach, the crowded condition and class of passengers make it very disagreeable, unsafe and unsanitary, especially on the night train.

"We acknowledge that automobile traffic materially affects and decreases the passenger earnings, particularly in the summer months, but contend that this argument should not be used against giving this district a reasonable service. The automobile traffic is not a local condition, but is competition that the railway companies have to contend with throughout the whole country.

"Southern Alberta has in prospect the largest crop in its history which will mean added prosperity and activity in all mining and lumbering towns along the Crow's Nest Branch. In prosperous times there is a large floating population between the camps and towns in the mountains and to and from the prairies. We urge you to take this prospective increase in passenger business into consideration.

"If economies must be practiced by the railway companies as stated by your Chief Commissioner, we contend that your Board could best afford to force practice of such economies by curtailing present unnecessary passenger service between points where competitive railways are operating, as for instance, the Canadian Pacific Railway are at present operating three daily passenger trains each way between Calgary and Edmonton—not because of the heavy traffic nor because the trains are earning expenses, but simply on account of the Canadian National Railway competing with them for this trade. It can readily be shown that one of the above trains can be dispensed with and placed on the Crow's Nest sub-division and be a better paying proposition than it is now.

"We ask relief from your board by ordering the restoration of the daily day-light train service between Medicine Hat and Cranbrook as was in effect about 1912, that is, a daily train leaving Medicine Hat and Cranbrook at 7 a.m. daily except Sunday, arriving at their respective destinations about 9 p.m. It is our belief that if such a service is maintained, it will be sufficiently patronized and appreciated to prove a paying train for the railway company. In any event whether the train pays or not we maintain that the district is entitled to the convenience of this additional service considering the population served and the enormous freight earnings produced on the Crow's Nest Branch.

"If this daily day-light train between Medicine Hat and Cranbrook is granted we would ask the cancellation of trains 511 and 512 now operating between Medicine Hat and Lethbridge and also the cancellation of the tri-weekly trains 535 and 536 running between Lethbridge and Crow's Nest.

"All of which is respectfully submitted.

Lethbridge Board of Trade,
by J. B. Turney.
Wholesale Association,
by G. C. Cope.
Retail Merchants' Association,
by Alex Johnston.
United Commercial Travellers,
by H. W. Snell, Chief Com."

Mr. George A. Walker, of Calgary, on behalf of the C. P. R., requested some additional information on this subject. Mr. Turney promised to furnish same to Mr. Walker at Calgary, when the reply of the Railway Company would be formulated and the matter again placed before the Commissioners.

The complaint of the White Spruce Lumber Co. re switching charges between Fernie and their mill was left to a conference between Mr. Thomas of the Lumber Company, Mr. Jefferson of the C. P. R., and Mr. Douglas of the G. N.

LEWIS SAYS NO STRIKE

CALGARY, July 12.—Wm. A. Sherman, president of District 18, U. M. W. A., has received a telegram from John L. Lewis, president of the International body, advising to withdraw his call for the general labor conference in Western Canada in order to settle a policy for sympathetic action with the Nova Scotia strikers. While Mr. Sherman did not make public the contents of the wire, he gave a summary of its contents.

The International president further states that the District 18 miners must carry out the rules and policy of the U. M. W. A., and fulfill their obligations to the operators in this district under the agreement in force. He states that he is advised the Nova Scotia miners are going back to work.

Mr. Sherman said he had not yet withdrawn the call for a conference and had no statement to make. He will probably make a statement after the district board meeting in Calgary on Friday.

Drumheller Miners Strike

EDMONTON, July 12.—A special dispatch to the Journal from Drumheller says:

"At a mass meeting of miners on Tuesday afternoon it was decided to call a strike at once and to stay out until troops have been withdrawn in Nova Scotia."

TO DECIDE 1ST HALF WINNER

Fernie baseball fans will have the opportunity of witnessing one of the most important games of the East Kootenay League on Sunday afternoon when Kimberley visits Fernie in the opening game of the second half of the league schedule. The result of this game will not only mean a big start in the league race but will decide who is the winner of the first half, so a hard fight is anticipated.

Cranbrook dropping out of the race necessitated a division of the league schedule, and the new rules drawn up give the winner of the first half the right to play off with the winner of the second half for the League Pennant. Should the same team win both sections they will be declared pennant winners and will play off with the runners up in a post series for the Nelson News Cup.

Both teams will be at full strength on Sunday having the same line-ups which played here on July 2, so a splendid game of ball is assured.

Following is the revised schedule of the league:

July 15—Kimberley at Fernie.
Wycliffe at Lumberton.
July 22—Lumberton at Kimberley.
Fernie at Wycliffe.
July 29—Fernie at Lumberton.
Wycliffe at Kimberley.
Aug. 5—Wycliffe at Fernie.
Kimberley at Lumberton.
Aug. 12—Fernie at Kimberley.
Lumberton at Wycliffe.
Aug. 19—Lumbeton at Fernie.
Kimberley at Wycliffe.

RUSCHALL LEADS COAL CO. BASEBALL CLUB IN BATTING

The following are the official batting average made by the Coal Company Baseball team in the first half of the East Kootenay baseball league:

	G	AB	H	Pct.
Ruschall	9	39	15	.385
McTeer	9	35	11	.314
Barger	9	35	11	.314
Ault	9	29	9	.310
Dunlap	7	20	6	.300
Shand	9	34	9	.265
Bishop	9	39	10	.256
Hovan	7	24	6	.250
Callahan	5	16	3	.187
Wilson	9	31	5	.161
Colton	6	13	1	.080
TEAM AVE.	9	315	86	.273

SOME DIRTY TACTICS USED

In our issue of June 15, 1923, the following letter appeared as a communication. As it contained what appeared to be a bona fide signature it was printed in good faith by us. Following is the letter as it appeared in that issue:

"To Whom It May Concern—

"I feel that I would like very much to make a few comments upon the beautiful City of Fernie, and also on a subject that interested me, in a recent issue of 'The Fernie Free Press.'

"First of all, the readers of this letter may be interested to know just a little concerning myself. I motored from Vancouver, with my son-in-law to visit the grave of a dear one at rest in the local Cemetery and to renew acquaintances with a few old time friends I knew before the Big Fernie Fire.

"Now, I must give the citizens great praise for the manner in which this dear old town has been rebuilt with such fine brick buildings. Fernie is a beauty spot, that God has set great store upon for his beloved ones to dwell in, in peace and happiness.

"But, am afraid there are a few people in Fernie that do not realize this, otherwise the swearing and drinking which was a common practice every night last week, would cease.

"It was absolutely impossible for me to sleep through the noise and vile language and I wondered if the Night Policeman was busy down at the City Jail killing a few bugs, or afraid to execute his duty, lest he be dismissed.

"In the 'Free Press' I read an article concerning the dismissal of the late Constable. In making some enquiries, to my surprise, I have found nothing but words of praise for the Constable. A friend of mine, popular in Fernie, told me of several occasions where the Constable played the part of a true man, in escorting men home, that had fallen by the wayside through drink.

"The hobby of the average policeman is to gain cases, and some times make cases, and I think those persons that were the cause of the dismissal of the Constable will look back with sorrow and regret.

"In religion I am a Roman Catholic and I ask all my fellow believers to make a note of the dismissal of the late Constable, and when the time comes to mark the ballots in the election of your Mayor, use a little judgment in the matter.

"As a mother, I appeal to the men to refrain from using the bad language so common on the street. Never say anything you would be ashamed to have your mother hear.

"A true lover of fair play.
Mrs. Thomas Crossby."

Inasmuch as the letter contains uncalled for and malicious slurs on the Police Department and other City Officials, the Chief of Police was instructed to make strict enquiries as to the author of the letter with the result that it was found that no person could be found who ever resided within the city by the name of Mrs. Thos. Crossby, and there certainly was no one of that name in the city when the letter was sent in for publication. The police authorities had the handwriting of the letter compared with the of a lady who now is and for a long time has been a resident of the city. This examination was made by two experts within the Province and one without the Province. Each of the three said there was conclusive proof that the person in whose handwriting this letter appeared also wrote the pages submitted along with the letter for examination. The animus displayed throughout the letter, we now learn, is owing entirely to the dismissal of a policeman whose services were not satisfactory, and whose dismissal was resented by the husband of the lady in whose handwriting the letter undoubtedly was, and who in all probability simply wrote it as dictated. The attitude of the letter throughout is contemptible in the extreme, especially when one considers that it was inspired by one who has long been a resident of the city. The attempt to bring in religion in order to injure the Chief Magistrate of the city merits the condemnation and contempt of every resident of the community. We regret having given publicity to the letter and wish to express our dispust and contempt for the authors. Fernie has for years been slandered by anonymous letters to the Attorney-General and other Provincial authorities. Many of these probably had a similar origin. It is a dirty bird who fouls its own nest.

THE CARMELO SHOW AT THE GRAND THEATRE

Fred Carmelo's Musical Comedy Company made its regular return to the Grand on last Saturday evening, presenting two lively musical shows, the feature being a musical comedy entitled "All For a Girl." Two well-filled houses witnessed the performances, which were given at 7 and 9 o'clock, and general satisfaction was evident on all sides. The company will play Fernie again on Saturday next, in a new play called "Love, Sweetheart and Money." The Carmelo company is becoming more and more popular with Fernie theatre-goers at each appearance, and its weekly visit every Saturday night is drawing large audiences.

GERMANY'S LATEST OFFER

The size of Germany's latest reparations offer may be conveniently grasped, perhaps, by comparison with what other nations are paying as a result of the war. Germany guarantees the Allies yearly payments, to begin four years from now, of 1,200,000,000 gold marks, or about $300,000,000. As aganist this, according to Friedman's authoritative "International Finance and Its Reorganization," America is paying $871,000,000 annual debt charges more than before the war; Great Britain, $1,302,000,000 more; France, $1,678,000,000 more; and Italy, $474,000,000 more. In all, these and other Allied powers are saddled with annual payments of some $5,000,000,000 more than they paid before the field-grey columns crossed the Belgian frontier. At the end of the war, the same authority reminds us, "the foreign debt of Germany was practically nil;" and her domestic debt is payable in enormously depreciated paper marks. The yearly payment offered is about half the sum spent by Germany on her railroads before the war. It is "not enough," declares the New York Evening Post, which reminds us that the sum "is less than one-third the amount of the German pre-war budget, and other nations are today carrying anywhere from three to six times their pre-war burden of taxation." Three hundred million gold dollars, remarks the Cleveland News, "is less than the cost of a big Army and Navy"—which Germany isn't allowed to have. Another paper estimates that Germany's latest offer is only equivalent to an annual payment of 4 per cent. on the 30,000,000,000 gold marks which was the total of her previous offer.

Nevertheless our papers very generally hail Germany's new offer as a distinct, if short, step in the direction of a reparations settlement. The German note, dated June 7, names no total sum to be paid. The annual payments of 1,200,000,000 gold marks would not begin until 1927. As guaranties for these payments the Reich offers a 10,000,000,000 mark capitalization of the State railways; a 10,000,000,000 mark first mortgage secured by all the real estate used by the entire business and industry of the country; and a pledge of "the customs on imports of consumable articles other than necessities, the ex articles other than necessaries, the excise on tobacco, beer, wine and sugar; and the receipts of the spirits monopoly." The note repeats Germany's offer "to accept the decision of an impartial international body as to the amount and method of payment;" and it argues that "in a matter so vast and complicated real progress can not be made by the exchange of written documents, but can only be achieved by word of mouth at the conference table."

"The ice is shifting under the feet of the European statesman perched on or over the reparations dam," thinks the Newark News. Considered as a whole, "the June proposal from Berlin is the best that has emanated from the German capital," says the Seattle Times, and "although the prospects can not be said to assure an early settlement, they are more encouraging than ever before." "Under the prod of the French in the Ruhr," remarks the Kansas City Star, "Berlin has started on the course that should lead to some settlement in the not far future." "For the first time," continues this paper, "Berlin pledges definite means of taxation and security, based on Germany security, that she will pay." The tone of this latest note, thinks the Philadelphia Inquirer, is "distinctly better" than that of its predecessors; an it "complies with the French demand for productive guaranties." The latter fact is also emphasized by the St. Paul Pioneer Press, Buffalo Express, Milwaukee Journal and Norfolk Virginian-Pilot. As the New York World sees it, "the latest German note is drafted in a spirit to which the least charitable and the most suspicious person will find it hard to take exception." The crux of the offer, adds this paper, lies in the fact that "it puts in most emphatic terms the willingness of Germany to pay the amount fixed by impartial experts in the way they may determine." "Precipitate rejection by France of the latest note from Berlin would confirm the thought many hold that Poincare does not wish Germany to pay," avers the Buffalo News.

But the Philadelphia Public Ledger is no less convinced that "there is little for France to do but reject it." For, argues this paper, if Germany's internal political situation is such that her Government can not make a better, then—

"The Germans have not come even yet to the full realization that they did lose the war, that they have little chance to win the peace, and that they have lost the 'new war' in the Ruhr. The German trouble is plain. Her leaders have preached to the people that they were not beaten in battle. Germans have been led to believe that they would be able to evade the penalties laid upon them. Meanwhile, Germany has wailed to the world her inability to pay. The world has remained cynical and unconvinced despite the tides of propaganda.

"Now, the Germans, unless a miracle comes, are nearing the hour when they must admit they were beaten in the war, have lost the 'new war,' and that they must pay or say farewell to the Ruhr. They are ceasing to mutter about repudiating the Versailles Treaty. Cuno has backed down on his threat to have nothing more to do with 'treaty-breaking Powers.' It remains for Germany's leaders to about-face, admit the realities, and convince the misled German folk that the war was lost and that the losers must pay.

"That heart-breaking task awaits German statesmen. It will be gall and wormwood; it will mean trouble; but it must be done."—Literary Digest.

A total eclipse of the honeymoon was observed in Hamilton the other day when a "just married" bridegroom had his pockets picked while waiting at the station to leave on his wedding tour.

Industrious cabinet-makers are busy preparing lists of the new Ontario ministry. Like commercial invoices they are subject to change without notice when the coming premier makes his own selection.

Police Commissioner Enright of New York has commenced a campaign to suppress useless noises. Roosters may resent any interference with their constitutional rights to announce the break of day.

Chicago, noted for being a "hot town," is establishing a record for heat prostrations. Torridity and humidity is one combination that is proof against the attacks of the "bulls" and "bears" of the stock exchange.

Texas cattle ranchers complain that their herds are losing thousands of pounds of flesh due to fright caused by airplanes flying over their heads. In a way the longhorns are wasting their substance on the desert air.

LABOR IS FREE OF ANY DESIRE FOR REPUBLIC

London—While the majority of Labor party is purely Republican, the resolution that the Royal Family is no longer a necessary part of the British Constitution was overwhelmingly defeated at the annual conference of the Labor party. The real reason for the defeat of the proposal is to be found in the fact that Labor is deeply and fully appreciative of the firm hold which Royalty has on the majority of British people and especially upon the person of the Prince of Wales, whose popularity increases rather than diminishes every day.

"Let the Prince smile once and it means a thousand votes on the side of the Royal Family," said one of the most prominent Republicans in discussing the resolution at the conference. The leaders realize that royalty is sincerely and genuinely interested in the welfare of the nation, and of the British Empire and they know perfectly well that the abolition of royalty would mean the dissolution of both nation and Empire. Under these circumstances a dictatorship of the workers is impossible now in Britain. "The success of the Labor Government in attempt to Govern the country is certain if they do so by constitutional means," said another speaker yesterday. "But the end of Labor is at hand if it abolishes the Monarchy."

In the meanwhile Conservatives are expressing their regret privately at the expulsion of Maxton the other night now that the full facts of the scene are made known. It is now known that Mr. Maxton was laboring under a terrific strain, when he pleaded in such vigorous terms, that he came under the discipline of the House because he had just lost his daughter and he was moved to a pitch of almost frenzy when his plea for health of the young Scottish children was met with the gibes and barely concealed jeers of a small band of young Conservatives. Mr. Maxton lost his temper and yelled the unfortunate soubriquet of "murderers," which led to his expulsion. It is considered likely that under these circumstances he will be re-instated when the House re-assembles.

The threatened breech in the Labor party between the moderates and the extremists seem to be healing, all leaders realizing that the party must have discipline if it is to meet with any success.

Motor Transport Through West Coast Archipelago

1. Gem like islets thrusting up from smiling summer seas. 2. The "Motor Princess" after launching.

THE magnificent chain of fine motor roads which wind through the Selkirks and the Canadian Pacific Rockies to Vancouver and points on the southern British Columbia border, thence through the western states of America, touching as they do the finest of the Canadian and American National Parks, need no introduction to the world of motordom. Every mile of roadway, especially through the Canadian Parks where it has, in many places, been cut out of solid rock and at stupendous cost, has been built with an eye to easy travelling and scenic grandeur, and from early spring until late in the fall a continuous stream of automobiles, bearing licences issued in every town on the continent, pour along the highway. Nowhere else can the motorist obtain such a long run through such ever changing scenes of natural beauty.

During the past few years it has become quite the thing to motor through vacation time, and those who choose this way of holidaying are unanimous in their choice of a "hunting ground." British Columbia and the rockies are not the things to be "done," because having travelled through them once means never to have willingly done with the country.

No less attractive on acount of its good roads, scenic properties and tourist accommodation is Vancouver Island. The city of Victoria at the southern extremity of the island is the hub from which the "round the Island" and shorter roads radiate, and the town itself, with its broom decked hills, its thousand gardens, its avenues of hawthorne, acacia, lyburnum and other fragrant trees is the goal of all who having covered the scenic routes of the mainland would still enjoy the pleasures of the road without travelling the same road again, and those who are attracted to the island by its particular type of beauty, which is after the English style with "just enough of the tropics thrown in."

The passage to the Island is usually made by ferry from Vancouver, or Bellingham in the State of Washington to Victoria or one of the west coast ports nearby. The Canadian Pacific Railway Company has this year put into service a new automobile ferry, the "Motor Princess," a motor driven vessel which operates between Bellingham and Victoria and which, with a capacity for fifty automobiles and well appointed accommodation for 250 passengers, plies twice daily.

The route traversed by the ferry is marked by islands, some of which are miles in extent, others gem like islets thrusting up from smiling seas, making the waterway a succession of pictures to which the most famous of salon hangings cannot compare. The lordly Mount Baker is also seen from the ferry to advantage, standing as it does in a mantle of dazzling snow amid the foothills of the mainland.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

A lot of politicians woudn't object to the world court idea, says Hon. Bowser, if they could have the idea without having the court.

U. S. ANTHRACITE COMMISSION REPORTS

WASHINGTON, July 9.—The federal commission in a report made public here contends the anthracite mining industry should continue in operation under private ownership, but under official scrutiny and open publicity as to costs and prices; wage contracts between operators and mine workers should be enforcible by penalty against infraction from either side and power should be vested in the federal government to take over and operate the mines in any emergency arising from cessation of operations.

Concluding an eight months' investigation of the industry, the commission declared anthracite to be a limited natural monopoly, one-third exhausted and affected by a public interest which makes it a subject for special government treatment.

Without interpreting the facts developed in the enquiry, the commission found that of each dollar paid for anthracite coal by consumers, one-half went to cost of coal at the mines; one-fourth for freight and a quarter to the retailer. Operators and retailers, it was declared, divide 11 or 12 cents out of each dollar in profits, while labor cost per ton, $1.56 in 1913, has advanced to $4.12 per ton. The average worker gets an income for a family of five, the report said, of between $1500 and $2000 a year.

The commission finds that the anthracite output has not kept up with the increasing population, nor unless additional miners' helpers enter the industry, is there hope of increasing the output. Improved practices in the use of anthracite are urged, and recommendations made to reduce the number of market sizes, for better inspection of coal so as to guarantee quality and the larger use of substitutes.

It finds the legal right to exist of a man to work as he pleases. It finds also the right of collective bargaining. It distinguishes between economic and political rights, and holds that under the guise of fixing wages and working conditions a campaign to advance a political theory should not be waged.

It insists that collective bargaining implies collective keeping of the bargain and suggests penalties for the breach thereof in another new agreement entered into. It recommends that the anthracite contract shall not expire at the same time the bituminous one does.

It also recommends that the congress shall give the president authority in the event of the cessation of operations, to declare an emergency, take charge of the mines, fix wages and the compensation to be paid the owner, subject to review by our courts, and to distribute the product as he deems wise and just.

BEECHAM'S
Sweeten the Stomach
PILLS

Follow this simple rule
to have lovely, gleaming hair

Never shampoo your hair without olive oil, hair specialists warn. To do so is to leave hair dry, dull, brittle—all its rich warmth of color and life gone. No hair can be beautiful unless clean, they say. Nor can hair be beautiful without the glossy sheen so much admired.

Therefore—use olive oil shampoo.

You see prettier hair everywhere, today. Women have learned that the most delightful form of olive oil hair wash is PALMOLIVE SHAMPOO.

It is convenient for home use, and most economical—costing but a fraction of what you'd pay to have the same treatment from a specialist.

It cleanses away all dirt and oil—thoroughly removes dandruff. And it leaves hair fluffy, soft, pliant as a baby's; with the gleaming sheen of new silk.

Send coupon today for free 15c-size trial bottle. Or get full-size bottle at your dealer's. Use it. Results will amaze you—after even one shampooing.

REDISTRIBUTION SHOULD HAVE THOROUGH ENQUIRY

Before anything is done about redistribution in British Columbia a committee of the Legislature drawn from all parties should be appointed to make a thorough enquiry into the subject. There is a proposal on foot to reduce the fixed charges of legislature by reducing the number of members in the Legislature. Such a reduction, as from the existing 47 to 35, has been proposed, but while any suggestion to this effect designed to cut down the very heavy fixed charges which now prevail deserves sympathetic examination it is a matter in which every party is interested and nothing should be done merely as an expedient of party politics.

Redistribution with a definite view to a substantial reduction in the membership of the Legislature would also seem to involve an amendment to the Constitution Act so that the size of the British Columbia Cabinet could be reduced in proportion. Any amendment contemplated in this connection is clearly one for grave consideration and for public discussion in order to obtain the trend of public opinion. There are arguments in favor of reductions both in the personnel of the legislature and of the cabinet, and there are also arguments against such. Particularly is this the case where the size of the Legislature is concerned. Victoria and Vancouver might not object, but there will be a very definite complaint from many other sections of the Province and especially in those constituencies of wide area, but which are sparsely peopled. If, as is suggested, the Government has a redistribution bill in view and if that legislation contemplates any sweeping reductions in the personnel of the Legislature it is a matter that should be given the fullest publicity. As we have said, too, nothing should be done without a full enquiry by a committee on which every party in the Legislature is represented.—Victoria Colonist.

Commenting on the recent vote in Vancouver the Edmonton Bulletin says: "The Coast people are evidently getting tired of fads, and want to return to the tried practice of majority rule and non-interference with the honesty of the clock."

In order that all the citizens could understand the park regulations in New York it was proposed to have signs in the different languages spoken in the city erected in the parks. The plan was abandoned when local dealers estimated it would exhaust the visible supply of lumber.

An instance of what can be accomplished in this land of opportunities by thrift and industry occurred the other day. A Doukhobor escaped from a provincial institution with only a shirt on his back. When he came here he did not have a shirt to his back.

K. W. Haney, the Sarnia barrister who redeemed West Lambton for the Conservatives in the recent Ontario election, is probably the youngest member of the House. He is in his twenties and served as an aviator on the eastern front during the World War.

USE MILK LIKE CREAM

Any recipes which demanded cream can be made with Pacific Milk as it comes from the can, without diluting.

In a salad, for instance, where cream is mentioned, use the same quantity of Pacific Milk. You'll find it gives a smoothness and rich creaminess of flavor that is nicer than when fresh cream is used.

Facial Blemishes

Sallow, muddy, roughened or blotched complexions are usually due to constipation.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol
A LUBRICANT—NOT A LAXATIVE

More Hebrideans Canada Bound

Waving farewell to loved ones on the Metagama.

Typical of a happy type.

THE Hebrideans are a home loving race of people not much given to wandering from their native hearths, but the arrival at St. John aboard the Canadian Pacific steamships Marloch and Metagama of over six hundred sturdy men and women of the western isles, forced by stern necessity to seek their fortunes in the land of promise is not without precedent. In the year 1803 a contingent of 111 was brought from the Isle of Mull by Lord Selkirk to develop the sheep industry on St. Clair Flats, Kent County. If times were hard when these people left home, fate was not more kind to them after they had settled here. Forty-five of their number were carried off by fever in the first year and the war of 1812 wiped out the settlement, homes, stock and crops.

In 1812 Lord Selkirk's agent, Colin Robinson, of the Isle of Lewis, persuaded a number of his fellow islanders to whom the abolition of the Clan system had brought high rents and misery, to settle in the Red River district. This party encountered the hostilities of the Indians and, through their industry and progression, the jealousy of the white traders. When the settlement was wiped out on one occasion and many of them wiped out, the remainder were forced to leave. However, they returned in time to harvest the first western wheat crop and many attribute to this fact that Winnipeg stands where it does to-day.

Life will not be a bed of roses for those who have newly arrived and they will have to work, and hard; but this they can do. They are the descendants of the "lords of the isles" who by strength of arms repulsed the invasions of the Scandinavians and Scots. Social and industrial development was retarded to a great extent by the clan system, but those who have adopted Canada are well educated and a simple life of toil in adversity through generations has given them a splendid physique and simple dignity. Although forced by hard times to leave their homes to make new ones, most of them are in sufficient funds and not a few families aboard the Montcalm were possessed of over £1,000. Some have stopped in Ontario but the larger proportion of them have gone to Red Deer, Alberta, where they will form a small colony.

ADDITIONAL LOCALS

Franklin Bonnell returned on Sunday from a trip to England.

Mrs. McQuaid, of Cranbrook, is the guest of Mrs. Herchmer.

We have plenty of skim milk at 15 cents per gallon—Fernie Creamery.

Mrs. Searle, of Minneapolis, is the guest of her daughter, Mrs. Geo. Appleyard.

The Kootenay Encampment I. O. O. F. held their semi-annual installation of officers last Monday evening.

M. A. Kastner and family and Jas. Falconer expect to motor to the Coast next week.

Mrs. Thos. Beck returned on Sunday last after spending a week with friends in Spokane.

Miss Phyllis Steward, of Red Deer, arrived in Fernie Sunday morning to spend her summer holidays with Mrs. John Gillies.

Miss Ethel Halls, of the Calgary telephone office staff, is spending a few days visiting her uncle, Dr. G. J. Parks.

George Townsend, of Fernie, was the holder of the lucky ticket in the Vet's Drawing at the Coast. This gives George a free trip to the battlefields of France and Flanders.

Do not forget the afternoon tea to be given by Mrs. A. B. Sanborn, on her lawn, from 3:30 to 7 p.m., Saturday, the 14th inst., for the Ladies' Guild of Christ Church.

Mrs. A. Johnston, of St. Paul de Metis, Alta., arrived in the city on Thursday morning to visit her parents, Mr. and Mrs. Wm. Mills, for a few weeks.

Mr. Robt. Strachan, accompanied by his son, Jim, and Peter Gordon, motored to Calgary via the Banff-Windermere road this week to take in the Calgary Stampede.

Joe Letcher has leased the building adjoining the Oldsmobile show rooms on Wood Street and will run a first class automobile repair shop. Joe will be open for business at his new stand on Monday July 16.

Mrs. A. Todhunter left on Wednesday morning via the G. N., for Seattle, where she expects to make her home. She was given a surprise farewell party by the Esther Rebekah Lodge at the home of Mr. and Mrs. J. L. Donaldson Monday evening.

The officers of Mount Fernie Lodge I. O. O. F., accompanied by District Deputy Grand Master Thomas Biggs, journey to Michel this evening and will hold a joint installation of officers of both lodges at that point. About thirty members of the local lodge will make the trip.

H. H. Trites, of Moncton, N.B., is in the city this week visiting his brother, A. B. Trites. All the old timers in Fernie were pleased to see Herb. in Fernie again after an absence of 18 years. He first came here in 1897 and was in charge of his brother's store in the Old Town. He left for the east in 1905.

British Columbia deserves great credit for the industrial strides she is making, remarked Hon. J. H. King, minister of public works in the Federal Government, this week. The doctor, who is at present visiting many points in the province inspecting public works, will be in British Columbia until after President Harding's visit on July 26. He is highly optimistic over prospects here in general and gives the Liberal Government a fair share of the credit.

Premier Oliver is leaving no stone **unturned in his fight for cheaper** freight rates in British Columbia, and it is conceded by all shades of political opinion that he is getting somewhere. While the subject, through repetition, has become more or less boresome to those who have not realized the importance of the matter, still the industrial future of the province depends largely upon the equalization of freight rates and the government leader, having taken hold, will not let go his grip. He will leave for Ottawa in a few days to appear before the privy council in this regard.

His Honour Judge Thompson has just handed down Reasons for Judgment dismissing an appeal by the prosecution from the dismissal by Magistrate Henderson of a charge under Section 139 of the Indian Act wherein the respondent, Howard W. Brown, was charged with unlawfully having in his possession a quantity of intoxicating liquor on an Indian Reserve situate on Tobacco Plains in the County of Kootenay. The Judgment recites that the respondent was a common carrier duly licenced and in lawful and legal custody of liquor and that he duly received the liquor at Fernie and proceeded to Roosville, B. C., where he stopped on the road in front of the Customs House, situate within a few yards of the International Boundary Line, in order to have his papers examined and signed by the Canadian Customs officer.

SEVEN YEARS OF TORTURE

Headaches and Indigestion Ended By "Fruit-a-tives"

The Marvellous Fruit Medicine

Like thousands and thousands of other sufferers, Mr. Albert Varner of Buckingham, P.Q., tried many remedies and went to doctors and specialists; but nothing did him any good.

Finally a friend advised him to try "Fruit-a-tives"—now he is well. As he says in a letter:

"For seven years, I suffered terribly from Headaches and Indigestion. I had belching gas, bitter stuff would come up in my mouth, often vomiting, and was terribly constipated. I took Fruit-a-tives and this grand fruit medicine made me well".

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent by Fruit-a-tives Limited, Ottawa, Ont.

Immediately thereafter he was placed under arrest by Constable Tutin of the Royal Canadian Mounted Police, the liquor seized and a charge laid against him under the above-mentioned section of the Indian Act. The reasons for judgment, lengthy but by ne means uninteresting, dealing with the history of the district in question of about 70 years ago, has been held over and will appear next week.

Three members of the graduating class of Vassar College were married commencement week and sixteen more girls confessed to being engaged. A record attendance is expected when the college reopens.

JESS WILLARD KNOCKED OUT BY LUIS ANGEL FIRPO

JERSEY CITY, N.J., July 12. — Luis Angel Firpo, of the Argentine, tonight defeated Jess Willard, former heavyweigth champion of the world, by a knock out in the eighth round of their scheduled twelve-round bout here tonight. The end came after 1 minute 55 seconds of fighting in the eighth round, when Firpo landed a terrific punch on the big Kansan's jaw, sending him down for the count.

CARD OF THANKS

Mr. and Mrs. B. Sloan wish to thank all those who were so kind to them during their recent sad bereavement; also the following for floral tributes: Knights of Columbus, wreath; Mr. and Mrs. B. Caufield and family, wreath; Mr. and Mrs. Nicoletti, spray; Mr. and Mrs. P. J. Hughes and family, wreath; Mr. and Mrs. Harrington, spray; Miss R. Fowler, cross; Misses Betty Podbielancik, Geraldine Sherman, Edna Charnock and Nellie Morrison, wreath; Connie White, wreath; Mr. and Mrs. H. Biggs and family, wreath; M. McGill, spray; L. McCormick, bouquet; Miss I. Boardman, spray; Mrs. Wright, cross; C. Singala, bouquet; Mr. and Mrs. H. Miard, spray; Mr .and Mrs. J. J. Hughes, spray; Mr. and Mrs. W. Dickenson and Evelyn, spray; Mrs. Robertson and L. Enright, spray; Mrs. A. B. Trites and Mrs. Stewart, spray; Miss D. Todd, sheaf; J. W. Robertson, spray; Mr. and Mrs. P. Bean, spray; Mr. and Mrs. S. Wilson, spray; Mrs. W. Marshall and Edith, wreath; Miss E. Harrison and Iris Marshall, star; Mrs. Wm. Mills and Tootsie, spray; Mr. and Mrs. T. Myers, wreath; Mrs. R. Corner and family, spray; A. Nicholson, Irene and Lovaine Todhunter, bouquet; Mr. and Mrs. Wm. Fowler, Michel, wreath; Mr. and Mrs. C. Gillette, bouquet, Miss Althea Schagel, wreath; Mr. and Mrs. H. Braithwaite, bouquet; Lauretta and Clarence Mangan, wreath; Miss May Maltman, bouquet; and all the little girls who brought flowers; also for spiritual bouquets from Mr. and Mrs. J. T. Mangan; Mrs. Steve Podbielancik; and L. Banks; Mr. and Mrs. H. Beaulaurier; Mr. and Mrs. Wm. Turner; Mr. and Mrs. F. Denison; Catholic Women's League and Young Ladies of Sodality.

IN MEMORIAM

In Loving Memory of our dear husband and father, Frederick Roo, who passed away at Elko, B C. July 12, 1920.

In life so near to us,
And in death so far.
Within our hearts,
Your memory green we'll keep,
Tho' in a far off land,
We are not forgetting,
Altho' you are asleep.

—Inserted by his wife, and daughter, May.

LOCAL & GENERAL

Miss Louise Cunliffe, of Nelson, is the guest of the Misses Corsan.

Alban Peter purchased a Star car from Wm. Johnston this week.

Mrs. A. B. Trites left on Wednesday for the east with an aunt, who has been visiting here.

Mrs. Haynes, mother of H. Haynes, government engineer, is spending a few weeks with her son here.

Mrs. Wm. Johnston and daughter, Edna, motored to St. Mary's Lake on Sunday last for a week's holidays.

J. H. McMullen, of Vancouver, Chief of Provincial Police, is expected in the city in a few days.

Blairmore Golf Club are sending a team, sixteen strong, to Fernie on Sunday.

The Ladies' Guild of Christ Church tea will be given by Mrs. A. B. Sanborn on her beautiful lawn, Saturday, the 14th inst. from 3:30 to 7 p.m.

Lethbridge police are trying to clean up their city. One day this week they made a grand raid and fines amounting to $4000 were gathered in.

Fifteen High Schol boys were the guests of the Rotary Club at a dinner given at the Napanee Hotel last Friday evening. A splendid program was enjoyed by all present.

Don't forget the Moose whist drive and dance in Victoria Hall, on Thursday, July 19. Cards at 7:30. Dancing from 10 to 1. Admission 50 cents. Refreshments. Whitehouse Orchestra.

Dominic Nicoletti has purchased the Fernie Hotel from Mrs. Alice Wyatt and will take possession on August 1. The purchase price is said to be $32,000.

Dr. Corsan, Medical Health Officer, wishes to warn the public against using any so-called spring water within the city limits, as all these springs are contaminated.

Constable Tutin, of Newgate detachment R. C. M. P., has been transferred to Fernie, replacing Constable Ellison who goes to Lethbridge. Constable Clarke, of Lethbridge, will relieve Tutin at Newgate.

The adjourned meeting of Fernie District Old Timers Association will be held in the Council Chambers on Wednesday evening, July 18, at 8:30 p.m. Election of officers and arrangements for annual picnic. All members are requested to attend.

The annual Boy Scout Summer Camp will be held at Baynes during the first two weeks of August. The camp this year will be under the auspices of the Cranbrook Troop who attended the Fernie Camp at Morrissey last year and are reciprocating by inviting the Fernie boys to their camp this year. It is expected that the Provincial Commissioner will inspect the two troops during the outing.

Word was received on Friday last of the death of Miss Mary Sloan, aged 16 years, daughter of Mr. and Mrs. Barney Sloan of this city. Deceased had been in a Vancouver hospital, where she was operated on for goitre. The body was brought home for interment and the large funeral which took place on Wednesday morning from the Roman Catholic Church testified to the esteem in which she was held by the community. The family have the sincere sympathy of all in their bereavement.

The Dominion Day Celebration Committee are pleased to announce that through this year's celebration, the Children's Swimming Pool Fund will be benefited to the extent of approximately $2700.00, over half of this amount being raised through the Dominion Day Queen contest, a new competition inaugurated this year. The committee wish to express hearty appreciation of the work done by the various candidates and their supporters for their magnificent efforts in making this innovaton a success. Great praise is especially due to Miss Dahlia Schagel and her supporters, the Crow's Nest Trading Company, who polled over six thousand votes, other candidates and their supporters, nearly half of the total votes cast. The Miss Anna McPhee of Trites-Wood Company; Miss Dorothy Garner of the Rotary Club; Miss Coughlan of the High School; Miss Branch of the K. P's. and Miss Davidson of the C. G. I. T., all made splendid efforts and the Crow's Nest Trading Company will find it no easy task to retain their honors, so well won this year, should these candidates again oppose them in the next competition.

WHITE STAR YEAST CAKES
Are Not The "Just as Good Kind"
THEY ARE THE BEST

Nourish your vines and flowers with Sodium Nitrate—Suddaby's.

Born, in Fernie, on July 4, to Mr. and Mrs. John Perry, a daughter.

The girls of the C.G.I.T. will hold a summer camp at McBains Lake.

Born, in Fernie, on July 13th, to Mr. and Mrs. R. C. Fierheller, a daughter.

It is somewhat a reflection on the American banking system when a prize fight can put two banks out of business.

Mrs. H. F. McLean, who has been visiting for several months in Conrade, Mont., returned home on Tuesday.

The regular meeting of the A. O. F. will be held in the I. O. O. F. Hall on Friday, the 12th, at 7:30 p.m. All members are requested to attend.

Willis Ross, of Vancouver, formerly one of Fernie's young men, is in the city this week renewing old acquaintances.

All those having bills against the Dominion Day Sports' Committee are requested to send them in at once to A. Klauer in order that the business of the day may be closed.

Miss Peggy Strachan entertained on Wednesday afternoon in honor of Miss Hazel Maundrell, of Nelson, who is spending a few days as her guest.

Walter Harwood returned this week from a trip to the coast. Walter has been appointed agent in the interior for a well-known brand of cigars and will devote his time in future to this business.

Rev. Wm. Burns returned home this morning from a trip to his old home in New Brunswick. During his absence, he represented Fernie Rotary at the International Convention in St. Louis.

A car load of joy riders had a narrow escape from death on Sunday morning last, when their car upset in a backwater of the Elk River which lies close to the road near Fairy Creek. Fortunately they were not imprisoned under the car and were able to crawl out safely.

Billy McKay came in from Shelby on Sunday last. Billy and Craley Smith, another old-timer from Fernie, are running one of the leading hotels in the oil town. The Fernie bunch who attended the Dempsey-Gibbons fight made their hotel their headquarters while in that city.

Hon. J. D. McLean, minister of education and railways, and provincial secretary, has returned from a month's visit to Ottawa and other eastern cities. He attended the annual health conference in the capital and claims that health work in this province is on a par with that in any other in the Dominion. The doctor attended the Good Roads Convention at Hamilton and added his voice to those urging the government to continue federal aid for provincial highways.

There has been considerable talk throughout District 18, of a sympathetic strike with the miners of Nova Scotia and only this morning it is reported that the Drumheller men have gone out, but as the mines in that district have been practically idle for some time, a strike in that camp mean very little. In Fernie district things are different. The officials of the Crow's Nest Pass Coal Co. are working hard to secure new business for their mines, made necessary by the loss of a large part of the Great Northern market caused by the substitution of oil for coal. These efforts are meeting with considerable success and the mines here are gradually resuming a steady output, but a strike at this time would prove absolutely fatal to this new business.

LOST — Between Fernie and Morrissey, one car tire. Finder will please notify R. Fowler, Coal Creek.

LOST—On Saturday last, on road in from White Spruce or after coming to town, a bag of laundry. Pieces marked with letter "R." Reward on returning to Rod McLeod.

HORSE SENSE IN UNION

They united to build a stable for their horses, and then the Presbyterians and Methodists of a Saskatchewan district separted to go to their respective churches. Residents of the district, we are told, naturally began to say that if the two sets of churchmen could have a common shed for their horses, they might display horse sense enough to have also a common building for their worship. The point finally struck home in Canada at large. By an overwhelming majority the Presbyterian General Assembly of Canada, in which the strongest opposition to the plan had developed, recently decided to merge with the Methodists and Congregationalists, and the new establishment, to be known as the United Church, awaits now only the necessary ratification by Parliament. The three denominations combined have nearly 800,000 members, the exact figures, as we find them quoted in the press, being: Methodists, 406,933; Presbyterians, 357,211 and Congregational, 32,149. Like the union church recently built in an Illinois village, this consolidation, says the Chicago Journal, "is a sign of the times. There was a time when people thought souls were lost or saved by refusing or accepting small points of doctrine." But "the modern Church is much less concerned about doctrines than about service, and the great service to be rendered by united effort is plain to all."

Naturally a merger of this kind can not be effected without opposition, and the Providence Journal informs us that many Presbyterians resent the action of the General Assembly, and that one speaker in the debate at Port Arthur went so far as to declare that it will disrupt not only the Church but 90 per cent. of the congregation. In fact, steps have already been taken to maintain the old Presbyterian Church organization. An address issued by the irreconcilables after the Assembly had voted for union says: "Eminent counsel are of the opinion that this action of the Assembly is beyond its power, unconstitutional and illegal. In any event, the Presbyterian Church is to continue in Canada. We count on all who value civil and religious freedom to stand fast in this hour of crisis." An opposing group centered in Winnipeg is reported to have announced that it will endeavor to get an injunction to prevent the merging of the property, and one prominent Presbyterian is quoted as saying that the proposed legislation "is of the most extraordinary character and is evidently the work of corporation lawyers adept in the gentle art of freezing out minority shareholders."

On the other hand, the Rev. G. C. Pidgeon, a Presbyterian, is quoted as saying in the final debate, "It is a crime against the interests of the Kingdom of God to waste men and money by perpetuating denominationalism. It is vital that the three negotiating churches should go solidly into union. This the enabling bill is intended to secure, and this is one of the chief criticisms against it." He added that fifty-two out of fity-six Presbyteries had declared in favor of the proposal. However, it appears as if the church union in Canada has not yet gotten through the shoals, observes the Buffalo Express. "The controversy may be considered unfortunate by members of the sects directly concerned, but it is at least proof that there still are people who take their religion seriously."

Of course, the difficulties are not yet ended, observes the Christian Guardian, a Toronto Methodist weekly. The working out of the scheme will call for the heroic exercise of all the Christain qualities of patience and self-forgetfulness. "We many find ourselves many times in the midst of serious embarrassments as the months and years go on. But the day will bring its own strength and wisdom, as it will brings its own problem and difficulty, and a Christian way out may always be found. Divine grace and strength will match themselves with human faith and courage, and we will go forward to the greater tasks and the finer service."

"It is in Jesus that the spirit of youth unites and always will unite, for his was a radiant respect for the personality of every man. And we who want a more generous world must share his chivalry. We must be fair to the other fellow's point of view, recognizing that he will have a vision through spectalces different from our own, not forgetting that before our own special creed is the universal creed of the sportsman who looks the other man in the eye and fearlessly declares, 'May the highest ideal triumph, whether yours or mine, my friend!' "—Literary Digest.

Miss Juanita Miller, daughter of the "Poet of the Sierras" announces that she was married to the Sun in Los Angeles recently. Matrimonial alliances with "stars" in that city have not proved a brilliant success and Old Sol may be due for a total eclipse.

Spring-time Revelry in Garden City

1.—Mrs. Walter Nichol, placing the commemoration wreath.
2.—Parliament buildings at Victoria as seen from veranda of Empress Hotel.
3.—Queen of the Maytime Frolic at Victoria B.C., in her royal coach.
4.—Queen Dora Rolls enthroned at the entrance to the Parliament Buildings.

THIS year the citizens of Victoria B. C., celebrated the eightieth birthday of this garden city and for three days beginning with the twenty-fourth of May the city frolicked. During the previous week the May Queen had been chosen and with her maids of honor had travelled to neighboring cities inviting her sisters and brothers from Nanaimo, Vancouver and New Westminster, and her cousins from Seattle, Bellingham and Portland to join in a three day frolic in her delighful gardens. The neighboring cities responded to her bidding to the extent of sending their Mayors and hundreds of their populace to take part in the springtime revelry.

The initial ceremony of the three day fete was performed when Mrs. Walter C. Nichol, wife of the Lieutenant Governor of the province of British Columbia placed a beautiful floral wreath on the handsome bronze statue of Queen Victoria which stands before the parliament buildings, in the name of the Imperial Order Daughters of the Empire. The landing of the May Queens from H.M.C.S. Patrician followed this ceremony, a tender bearing their Majesties to the broad stone steps leading directly to the parliament buildings. Here they were given the freedom of the city by Mayor Maynard and were crowned by His Honor the Lieutenant Governor of British Columbia.

Then came the Grand Parade, entered into by almost every automobile in the city and participated in by every public spirited firm and individual of Victoria, Bellingham Wash., Nanaimo, and Esquimault sent picturesque floats and the recently inaugurated Canadian Pacific motor ferry plying between Vancouver Island and the former city gave hundreds of Americans an opportunity to enjoy a real twenty fourth of May celebration.

During the three days many sports events were arranged and on the Thursday and Friday evenings elaborate balls were given in the armouries and at the Empress Hotel. Amid the hist[illegible]al surroundings of Beacon Hill, where as the name implies beacon fires were built in the early days for the guidance of sailors off the Island coast, the picturesque Frolic Pageant was staged on Friday. The Passing of the Pessimist was the title given this much heralded event which portrayed the indictment and reformation of many types of civic grouch.

Saturday, as other days, witnessed band concerts given throughout the city streets from early morning until late at night. A home-made circus and regatta provided matinee entertainment at the Gorge and the picturesque night attack by Indians staged in these natural sourroundings recalled very vividly the pioneer days of Vancouver Island and brought to a close civic carnival of brilliant splendour when the Queen of the Pacific Cities paid homage to the memory of royal name sake, Victoria the Good.

BRITISH COLUMBIA CHAMPIONSHIPS

In both Golf and Lawn Tennis the championships of this Province are open to outsiders, and it very frequently happens that outsiders win. We have the spectacle often of those who have no identification with or interest in British Columbia holding the championships in these events ,and it is a wholly wrong principle which permits this state of affairs to continue. The governing bodies of these games should introduce a reform that is long overdue. It is no argument to say that other Provincial, State or Country tournaments are open to all-comers, and that by this method the game is fostered. Wherever this system prevails on the face of it is wrong for a British Columbia or a Washington championship is, strictly speaking, a tournament for the home players, and the entries therein should be confined to the inhabitants of the Province or State, with a residental qualification of six months or a year, as might be thought desirable.

The existing system of throwing open Provincial and State tournaments to all players encourages the practice of pothunting, which is always detrimental to sport. Both in Golf and Lawn Tennis we have by far too many pothunters in this section of the continent, and it appears to be the same everywhere, including England. Speaking strictly from the standpoint of the Pacific Coast section it is very desirable that there should be opportunities for all the best players in either Golf or Lawn Tennis to meet in competition from time to time, but there are opportunities that exist, as in the case of the Pacific Northwest championships in both games. As well as these, other sectional tournaments could be devised, but where the name of a Province or State is given to a championship, we maintain that the entry list for such should be confined to the residents of such Province or State.

Pothunting among amateur sportsmen, and it is engaged in to a great degree by many of the best exponents of both Golf and Lawn Tennis, is a detriment to the games. It discourages those who have the distinction of being the leading players in their respective States or Provinces, but who, year after year, see cups and trophies wrested from them by outsiders who have no other claim whatever to be associated with the State or Province concerned. The practice of governing bodies of these two games in catering to pothunters is to be deplored. Speaking from the standpoint of this Province we maintain that British Columbia championships in all forms of sport should be strictly British Columbian, or in other words that there should be a residental qualification imposed on all those who are permitted to enter into competition for the titles involved.—Colonist.

BURNING STOMACH

Relieved in Two Minutes with

JO-TO

Jo-To relieves gas pains, acid stomach, heartburn, after-eating distress and all forms of indigestion quickly, without harm. All Drug Stores.

James Rennie-Dorothy MacKaill and Anders Randolf in "Mighty Lak a Rose"

Orpheum Theatre, Wednesday and Thursday, July 20 and 21.

In the matter of internal dissension and violent efforts to get things out of its system, Europe bears a striking resemblance to Mount Etna.

Chicago policemen have donned shirtwaists for the summer season. Parasols and King Tut sandals would be an appreciated concession to the prevailing temperature.

The fastest freight train service in the world is to be inauguarted shortly between Chicago and Albany, and Chicago and Denver. The service will be specially devoted to the rapid transport of summer vacationists' automobiles.

There is nothing remarkable about the announcement of the war department at Washington that a flashless and smokeless powder for use in small arms has been developed. The girls have been using it on their faces for years.

Would Have Given $100 For One Night's Sleep

"Before I got Tanlac I often said I would give a hundred dollars to get a good night's sleep, but now I sleep like a child every night and feel so well it doesn't seem like I am the same person," said Mrs. Annie Stillson, highly esteemed resident of 263 Simcoe Street, London, Ont.

"I suffered for years from nervousness and stomach trouble. My appetite had all but left me and what I ate hurt me so bad I actually dreaded to sit down to the table. My nerves were so unstrung I could hardly sleep any at all, and I was so weak and tired many days I couldn't do my housework.

"But it's a pleasure to sit down to a meal now, for I enjoy my food like a child does candy and nothing I eat hurts me a particle. My nerves are perfectly calm and my sleep rests me so I feel refreshed throughout the day. Tanlac has no equal."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

SPAN OF LIFE SHOULD BE 140 SAYS SPECIALIST

London—There is nothing inevitable about illness..... If we get a disease we ought not to be pitied as victims, but condemned as fools.

Dr. Leonard Williams, the Harley Street specialist, made these observations in speaking at the Aldwych Club on th esubject of "Physiological efficiency."

It was the contention that "three score years and ten" as the normal span of life is an erroneous idea, and that man ought to live to 130 or 140 if he paid proper attention to diety and health laws.

Dr. Williams said that if the average age of the lower animals was estimated in relation to the time it took to arrive at maturity, man was seen at a disadvantage. Animals' instincts in regard to food are increasing, whilst the mind of humanity was blurred and fogged.

Mankind were contented with the three score years and ten because they were, in matters psychological, content with a very low level of mediocrity.

They had no ideas for which they were prepared to make pressing sacrifices, and they would not deny themselves soft comforts and needless luxuries.

When a man arrived at maturity it was up to him to maintain that state of maturity as long as he could. Instead of doing so, however, he sat down and impaired his efficiency as quickly as possible by sending out S.O.S. to every microbe to come and take up residence in his body.

Physiological efficiency went back to the question of diet, and they should partake of meagre fare, fresh air and all kinds of raw foods, dairy produce and salads.

PILES

No one but the sufferer knows the terrible agony or the itching nature of Piles and how hopeless it seems to try for relief in ointments, injections and dilators.

Genius produces

"PAX"

Internal Pile Remedy

Pax is the prescription of a well known physician and has proved successful in hundreds of cases. Pax is internal distinct from any other treatment. Applications from the outside are futile. No ointments, injections or dilators are necessary. Pax is complete and is a vegetable remedy, contains no drugs or alcohol.
If you have not hitherto found relief do not despair, place your faith in Pax.
Except in unusually stubborn cases one box is usually sufficient.
Get "PAX" from your Druggist or if he cannot supply you send One Dollar and "PAX" will be sent you in a plain package.

WATER NOTICE

Use and Storage

TAKE NOTICE that F. C. Limbocker, whose address is Jaffray, B. C., will apply for a licence to take and use 100 acre feet and to store 5 acre feet of water out of Little Sand Creek which flows South and drains into Big Sand Creek about 1½ miles South of Jaffray. The storage-dam will be located about 300 feet South of Government Road. The capacity of the reservoir to be created is about 5 acre feet, and it will flood about 1 acre of land. The water will be diverted from the stream at a point about 300 feet South of Government bridge and will be used for irrigation and power purposes upon the land described as portion of sub-Lot 3, South of Government Road and West of Sand Creek. This notice was posted on the ground on the 19 day of June, 1923. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fernie, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is June 22, 1923.

F. C. Limbocker,
je22|4. Applicant.

LAKE LOUISE VIA MISSOULA

In the Rockies of the United States and Canada there is without doubt no travel route more scenic or historic than that connecting Lake Louise in Alberta with Salt Lake City in Utah via Western Montana and Southeastern Idaho. With much less than 1500 miles between the terminals here is a wonderful summer auto trip of which tourists, ever seeking the new and strange, today know little or nothing. This route is destined to become one of the most widely and favorably known travel ways in the mountain territory of both nations.

Plans have been made to organize this route this summer at a meeting called for July 27-28 at Missoula, seat of the University of Montana, which is located half way between Lake Louise and Salt Lake City. Invitations for this meeting have already been issued by the Missoula Chamber of Commerce. It is stated that "an organization is to be effected, a definite route to be determined, a new name selected for the highway if changes make this necessary, and some plans decided upon for further promotional activities."

It is expected that some officials of the Canadian Parks Service will be present at the Missoula meeting. Invitations have been sent to the following cities which are on the route: Lake Louise, Banff, Calgary, Macleod, Fernie, Cranbrook, Windermere, Elko (in Canada), Eureka, Whitefish, Kalispell, Polson, Ronan, Missoula, Stevensville, Pocatello (in Idaho), Logan, Brigham, Ogden and Salt Lake City (in Utah).

"Four Parks International Highway" was the first name proposed for this road, the four parks being, two in the United States—Yellowstone and Glacier; and two in Canada—Waterton Lakes and Banff Canadian Parks. It seems more than probable, however, that this name will be changed somewhat. From Salt Lake City has come the suggestion that the highway connect up with Cedar Breaks, Zion National Park, Bryce Canyon and the North Rim of the Grand Canyon in southern Utah and northern Arizona. In Canada the highway will connect up with four Canadian Parks alone — Waterton Lakes, Banff, Kootenay and Yoho.

The cream of the wonderful scenery of the Canadian Rockies has been saved in these four national parks by the enterprising Canadian Government before it was too late. Recent completion of the Banff-Windermere Highway, opened to travel June 30, makes possible a trip on both sides of the Canadian Rockies between Crow's Nest, the southern crossing of the Continental Divide, and Vermillion Pass, the northern crossing, and the opportunity has been grasped to make this what is known as the "Canadian Rockies Circle Tour."

Coming south into the United States the highway crosses the International Boundary at Gateway and passes through a region of lakes and rivers and mountains and forests that partake of the same rugged scenic character of Glacier Park. Here the traveller may see close at hand much wild life seen only in pictures in many other parts. This continues practically to the western entrance of Glacier Park at Belton.

Travelling north from Salt Lake City the highway follows the "Corrine Trail"—the old immigrant route into Western Montana in the days of the stage coach that preceded the Union Pacific. The "Corrine Trail" extended from Salt Lake City to Alder Gulch near Dillon, where early mining activities made a busy city that passed away with the mines. Between Idaho Falls, now a reclamation and hydro-electric power centre, and Dillon is a stretch of the road that was the scene of many stage-hold-ups by road agents back in '64 and '65.

Magnificent scenery marks the highway from Yellowstone to Glacier through Western Montana. Leaving the western gateway of the Yellowstone the highway enters a beautiful wilderness, where rise the extreme headwaters of the Mississippi River. Deer and elk abound in the hills; fishing is well rewarded.

The road follows the famous Centenial Valley along the Bitter Root Mountains into Monida, where the Oregon Short Line and the principal road to Salt Lake City are met. The line of the railroad is kept to Armstead, where the beautiful memorial to Sacajawea, built by Montana women in honor of the squaw who piloted Lewis and Clark, is situated.

From Armstead the way leads to Dillon, a beautiful little city in the heart of a flat country. Here is the State Normal College. Bannack, the first capital of Montana, the scene of early gold discoveries and of many of the most important events in the state's history, lies beyond. Hangman's Gulch, where the Vigilantes rid the state of bandits, is near Bannack and on the highway.

Here begins the fertile Big Hole Valley, rich in soil and blessed with wonderful natural charms. At Jackson are excellent natural hot baths. Farther on is Wisdom, near which is the Gibbons battle field, where a little army of regular troops and Montana settlers defeated Chief Joseph and his Nez Perce Indians when they took the warpath in 1877.

From Wisdom across the Continental Divide into the beautiful Bitter Root Valley, the local governments and the United States Forest Service built a magnificent scenic road. It follows an easy grade through the wonderful beauties of the mountains, and leads at last into the Bitter Root at Medicine Hot Springs where are a good plunge and a comfortable hotel.

Thence the highway runs straight down the famous valley, rich with grain and wide orchards, through Hamilton and Stevensville and a dozen beautiful small towns, to Missoula.

Missoula is the centre of Western Montana, and the most charming city in the state. It is beautifully situated in a wide valley walled with mountains. The State University is here, also the headquarters of the United States Forest District No. 1.

From Missoula the road runs straight north across the Flathead Indian reservation. It skirts the great bison reserve where buffalo still range and penetrate the land of the Selish, peace-loving Indians who still live in native picturesqueness. The Flathead's wide prairies have been thrown open to settlement and white farmers have made the land blossom beside the tepee villages of the red men.

Flathead Lake, the largest and most beautiful body of fresh water in the United States, excepting the Great Lakes, lies in the northern end of the reservation. Steamboat lines run across it, and a splendid road runs along the west shore, facing the sparkling waters and the stupendous mountains beyond. There is also a good road on the east side of the lake. There is no mountain range in the country to compare with Sinyalemin, whose fantastic, snow-capped peaks wall Flathead Valley and Lake.

Polson, a beautiful lake city, is situated at the southern end of the lake, and just beyond the north shore is Kalispell, another charming mountain city.

From Kalispell the road runs through a beautiful country to the gateway of Glacier Park.

In the Crow's Nest

CROW'S NEST.
ON THE WAY TO CROW'S NEST—THE HIGHEST WOODEN BRIDGE IN THE WORLD.

Rolling up to the Crow's Nest Pass are olive green foothills without a tree upon them—natural cattle runs clothed with succulent short grass. Here are seen occasional outcrops of rock, which in their four or five feet of height show all the characteristics of a mountain range; miniatures of the Rockies, with crag and precipice and col reproduced on the smallest scale. With a bag of salt one could lay on glaciers, touch the peaks with white and have a toy range which any Eastern schoolteacher could set up in her classroom with advantage to herself and her pupils. Canadians east of Medicine Hat know too little about the construction of this Continent and about the glorious engineering of Nature.

Consider the Crow's Nest itself. The name brings before some of us a schedule of railway-rates; to others, a series of coal mines. These are derivative impressions. The original Crow's Nest is a mountain rising to 9,000 feet and more above sea-level and visible for many miles. The rock-peak, as one looks from the foothills is set like a fuzzy, round crow's-nest on the sky-line. Leading up to it are the olive-green billows fading into a soft, blue haze.

In the distance near the peak is a snow-white precipice, which they tell us is two miles wide and a mile high. It is all excellence and loveliness until one travels twenty miles farther. Then it gleams like the fangs of a wolf. It is the rock-face of Turtle Mountain, cleft from top to bottom in 1905 to the destruction of the mining town of Frank.

To-day the whole valley, two miles wide, is a tempestuous chaos of white stone blocks, some of them as big as a house, all with jagged edges and sharp corners. They are piled from fifty to one hundred feet high above the original valley level. The railway line climbs over the debris. Beneath it lies the broken city. On either side of the avalanche stand a few deserted houses, windows out, glaring like skulls upon the newer town. The whole valley spells terror and tragedy. Even yet people talk of Pompeii and Herculaneum, but they are like to forget the more terrible fate of Frank when rock by millions of tons fell a mile out of the sky.

Speaking in Toronto of Australia's capacity for producing tropical fruits the other day, Sir Harry Newman Barwell, Premier of South Australia, mentioned a variety that is comparatively unknown in Canada. The passion fruit, a popular and palatable delicacy, is grown there in abundance. It is a development of the passion flower, is fine in flavor and can stand shipment. Sir Harry predicts that when introduced in America it will be regarded as favorably as the strawberry.

Commenting on the mutual interests of British Columbia and its nearest neighbor, the Calgary Herald says: "The interdependence of Alberta and British Columbia is brought forcibly to one's attention when the numerous and anxious queries from coast province business men concerning crop prospects in this province are noted. In a great and ever-growing sense these two provinces, so unlike in their natural resources, are prosperity partners."

WHERE IS THE SUPER-MAN FOR THE OLYMPIC GAMES?

By Jack Tait

There's an Olympic trip in the offing and the hunt is now on for outstanding material to wear the Maple Leaf in the Olympic lists of 1924. Ways and means are now progressing to finance the Canuck squad to the Paris meeting place, but unless some athletic "phenom" breaks cover in the very near future the Canadian Olympic team of 1924 will not be over burdened with track and field honors on their return.

Canada has never seriously threatened to annex team honors at an Olympic meet, but Canada has furnished keen competition in previous Olympiads and has in every case been favored by at least one super-athlete who could stand out in his class as the best in the world.

The renewal of the Olympic games in 1904, at Athens, found Canada represented by a quartette of athletic pilgrims in "Billy" Sherring, of Hamilton; Elwod Hughes, Don Linden and Ed. Archibold, of Toronto. "Billy" Sherring gave Canucks their first shot at athletic hysteria when he paced home in front in the race of races—the famous Olympic Marathon. Elwod Hughes ran into sickness and failed to reach the starting post. Archibold tok second in the jump and Don Linden talked himself out of a world's title.

Linden was Canada's champion walker.

The heel and toe game did not attract a decent entry at Athens, and to make a race Don endeavored to interest amongst others, the American athletes in the "Ped" game. George Bonhag, America's premier middle distance man, hearkened to Don's pleading and agreed to enter the race if it did not interfere with his running events.

He entered and in his first start in a walking race led Linden home for the world honors.

There was much criticism of Bonhag's style, but great sport, that he was, he agreed to meet Linden in a match race at the Island, where, to the satisfaction of the judges and fans, he repeated his victory.

J. Howard Crocker, the physicial director of Central, headed Canada's first official Olympic team to England in 1908. This was a big jump to a squad of some forty men.

Here again Canada supplied one real outstanding man, and he, too, hailed from Hamilton. Bobbie Kerr, though unexpectedly beaten by Reggie Walker in the "hundred," led a wonderful field home in the "furlong" and gave Canadians their "world's champion."

Another large team, this time under Walter Knox, the present coach, took in the 1912 meet at Stockholm, Sweden, Here Golding delivered, and heel and toed his way to the world's title.

In 1920 Earl Thompson, an Americanized Canuck, put one over "the run" in the hurdles. He is now a professional coach and beyond the pale.

Where, on track and field work, will Canada uncover the outstanding man in at least some one event to bring home a world title in the wake of those who have gone before?

GOLF NOTES

On Wednesday afternoon a most delightful two ball mixed foursome competition took place over the Fernie Golf links.

The first prize, consisting of two golf clubs, presented by Major Davis, was won by Miss Hogan and J. L. Gates with a net score of seventy-five. The second prize, consisting of four golf balls, kindly donated by Mrs. Martin, was won by Mrs. B. Wilson and E. K. Stewart, with a net score of seventy-six.

From the apparent manner in which every one seemed to enjoy this competition, it would seem that these games should be held more frequently and it is hoped that the Ladies' and Men's Tournament Committees will get together for the purpose of arranging more of these competitions.

The following is the list of the scores:

Miss Hogan and J. L. Gates; 118–43—75.

Mrs. B. Wilson and E. K. Stewart; 112–36—76.

Mrs. Liphardt and H. Hayne; 104–27—77.

Mrs. Herchmer and A. Watson; 106–26—80.

Mrs. Lawes and N. E. Suddaby; 106–24—82.

Mrs. Watson and S. Herchmer; 104–19—85.

Mrs. Gates and W. Watmough; 136–51—85.

Mrs. Martin and N. D. Sanford; 136–50—86.

Miss Brown and G. F. Johnson; 119–32—87.

Mrs. E. H. Wood and K. Stewart; 138–50—88.

Mrs. Hayne and J. Irvine; 120–32—88.

Mrs. Robertson and H. Douglas; 138–49—89.

Mrs. Kastner and A. C. Liphardt; 130–41—89.

Mrs. Harwood and J. Corbett; 129–36—91.

Mrs. Fisher and A. M. Owen; 140–44—96.

Mrs. Kirkpatrick and M. A. Kastner; 134–37—97.

Mrs. Wallace and J. Shand; 150–41—109.

Mrs. H. Brown and Dr. Pickering; 162–50—112.

Ladies Golf Club

The regular play for the Wilson Cup will take place on Tuesday, July 17. Draws will be posted.

The play for the Wilson Cup on July 3, was won by Miss Edith Biggs; score 70–32—38.

There will be an Approach and Putting contest on Saturday, July 21, at 4 p.m., for two balls presented by Mrs. Huntington.

The semi-monthly tea will be served at the club house on Saturday, July 21, from 4 to 6 p.m.

ESTHER REBEKAH INSTALL OFFICERS

The Esther Rebekah Lodge No. 20 held their semi-annual installation of officers last Thursday evening, District Deputy President, Mrs. D. G. Harvie, officiating, assisted by a full staff of Past Grands. The following are the officers now installed for the ensuing term:

N. G.— Sis. N. Reid.
V. G.—Sis. M. Rasmussen.
Rec. Sec.—Sis. A. Stevens.
Fin. Sec.—Sis. M. Woodhouse.
Treas.—Sis. M. Strachan.
Warden—Sis. A. Hughes.
Con. Sis. Whalley.
I. G.—Sis Young.
O. G.—Sis. Taylor.
R. S. N. G.—Sis. Puckey.
L. S. N. G.—Sis. Clarkston.
R. S. V. G.—Sis. Hutchison.
L. S. V. G.—Sis. Worthington.
R. S. S.—Sis. Green.
L. S. S.—Sis. Biggs.
Chaplain—Sis. Fleming.

BLAIRMORE WINS AFTER 12 INNINGS IN CROW FIXTURE

MICHEL, B. C., July 9. — It took Blairmore twelve innings to defeat Michel here yesterday by the score of 6 to 4 in a Crow's Nest League game. Michel played their junior team,except the outfield, and the boys deserve great credit for the game they put up.

Sadlick. pitching for Michel, was good all the way and received fair support, but Michel fell down on baserunning. Hillings pitched for Blairmore, but was relieved in the 10th by Prudden.

Batteries—Michel: Sadlick and Kojler; Blairmore: Hillings, Prudden and Conlin.

Football Victory

Michel defeated Fernie here yesterday, 3 to 1. Michel in the first half played the visitors off their feet and scored three goals. After half-time Michel pressed again, but J. McFarlane was injured, and afterwards the boys played a listless game, with Fernie doing the forcing, but they only succeeded in beating Dawe once.

FOOTBALL SHYS

By Linesman

A few of the boys were out on a fishing expedition last week end, and we've been listening to some awful BIG FISH stories. After pondering over some of these yarns through the week, we have decided just what end of the pole these fish were on.

Michel football team will be here on Sunday at the North End Grounds. Exciting moments—Listening to old man Jenks. We anticipate a heavy run on peanuts.

The game will be called at 6:15 which will allow the usual bevy of leather lung artists from the Creek to be on hand to boost for the other fellows.

Jimmy Easton tok a bunch of enthusiasts in a Ford car to Michel last Sunday, to witness the football game. We understand Jimmy is being tooted for President of the Mudhole Club.

The team that will represent Fernie against Michel on Sunday is as follows: Goal, Swedeberg; Backs, Booth Wilson; Half-backs, Robertson, Riley and Morrison; Forwards, J. Robson, Sharroch, T. Joinson, Thornton and A. Thomson. Kick-off at 6:15. Players are requested to be at Ingram's Gym not later than 5:30 p.m.

FINE CAST IN NEW EDWIN CAREWE PICTURE "MIGHTY LAK' A ROSE"

A fine cast appears in the new Edwin Carewe production, "Mighty Lak' a Rose," released by First National and to be shown next Wednesday and Thursday at the Orpheum Theatre.

In this cast are Dorothy Mackaill, a pretty young English girl, who has been appearing lately in the Zeigfeld Follies; James Rennie, leading man in "Shore Leave;" Sam Hardy, who is supporting Lenore Ulric in "Kiki;" Andres Randolf, Helene Montrose, Paul Panzer and Harry Short. Another fine actor who has a prominent part in the picture is "Jean Bronte," a Scotch collie, an exceptionally intelligent dog.

"Mighty Lak' a Rose" is a crook play. It shows the power of music not only in "swell' society but in the underworld where desperate crooks plan desperate work. The story is a battle of a violin, in the hands of a beautiful and innocent girl, against wayward souls. Mr. Carewe is said to have made a picture that is gripping in delineation of men and women who are gradually drawn from the wide and crooked path to the straight and narrow one. He has built up a smashing climax wherein some of these old, hardened crooks take on a social covering that allows them to enter the society homes.

It is said also that picture-goers will have another idol in Miss Mackaill.

The former Kaiser's portrait which occupied the place of honor on the SS. Vaterland, now Leviathan, was not turned to the wall but consigned to a junk shop. Its place is now occupied by Howard Chandler Christy's portrait of President Harding.

Health turns the clock backward

Paralysis Need Not Be Wholly Terrifying.

Health Talk No. 26.

By G. J. Parks, D. C.

There are various forms of paralysis and neither the old nor the young are immune. If your paralysis follows an accident, a strain, or the bad habit of wrong posture, you need have no fear of it; but don't postpone seeing a chiropractor. In cases of paralysis there is no method that will substitute for chiropractic spinal adjustments. To dally with any other method is to waste time and money.

A paralysis may affect any organ or part of the body. In one of our cities, a small boy playing with another child of larger size, tried to carry the big boy on his back. The little fellow's spine was twisted out of alignment, paralyzing the stomach. The child was dying of starvation seven weeks later when a chiropractor began making the adjustments which brought back the natural life and vigor of the stomach.

LOST POWER TO EAT OR DRINK

"I woke up Sunday morning, October 8th, and looking at myself in the mirror, I certainly was frightened. My face was all on one side. I tried to whistle and couldn't. I tried to expectorate and couldn't. I tried to eat a piece of bread and bit my cheek. A drink of water ran partly down my throat and partly out one side of my mouth. My physician said it was facial paralysis and nothing could be done for me. A friend advised chiropractic. Today I am utterly unable to put in words the gratitude I feel. I have entirely recovered and the weight I lost has all come back. Chiropractic is wonderful."

—William Long — Chiropractic Research Bureau, Statement No. 1356S.

Phone 204 for an appointment.

Come and we will talk it over. This places you under no responsibility.

GILBERT'S BODY IS RECOVERED

The body of Frank Gilbert, who disappeared from his home in West Fernie at about three a.m., Wednesday, June 27, just ten hours after he had been married, was located in a back water of the Elk River just opposite the Elk Lumber Company mill, by Albert Dudys, a local man who was about to start on a fishing trip early Tuesday morning. Dudys at once notified the police and the body was taken out of the water and brought to the Fernie Undertaking Parlors.

Coroner Robert Duthie ordered an inquest, and with his jury, viewed the body, which was positively identified as that of the missing man. At seven o'clock Tuesday evening, in company with Chief Spiller, the Coroner and jury went over the trail traversed by the bloodhounds when tracking Gilbert's movements on the fateful morning.

The inquest was held in the Court House Tuesday evening. Doctor Garner was the first witness called and he stated that he had treated Gilbert for ulcers of the stomach at different times, the last call had been made about six months ago. At that time Gilbert showed every indication of great improvement. Questioned by Foreman D. G. Harvie, Dr. Garner stated that any person would be subject to attacks of indigestion from over-eating.

Jack McGladrey was the next witness called and he stated that he had worked with Gilbert for a considerable time at the local Brewery. He recalled that during his employment there, Gilbert had been seized by a severe attack of indigestion and cramps of the stomach and that Gilbert had to be taken to the hospital.

Albert Dudys then took the stand and stated that he had gone out Tuesday morning on a fishing trip and on reaching the backwater opposite the Elk Lumber mill he had seen a man's hand show up above the water, he got a long stick and secured a hold on the body and pulled it towards the bank, making it secure, he then notified the police. He had identified the body at the Undertaking Parlors as being the same body as he had seen in the water.

Chief Constable Wm. Spiller, of the Provincial Police, was called and he stated that he had been with Gilbert on Tuesday, June 26, and had been present at the wedding. He was one of the guests at the wedding dinner, leaving Gilbert's residence about six thirty in the evening and returning with some friends from the Northern Hotel about ten o'clock and had remained with Gilbert in his home until twenty minutes before midnight. During that time Gilbert had appeared to be extremely happy, but had stated that he had eaten too heavily and that he would certainly suffer for it. Continuing Mr. Spiller stated that at eight o'clock the following morning he was notified that Gilbert had been missing from his home since three o'clock in the morning. He had immediately sent out large search parties but had failed to locate the missing man, bloodhounds were brought from Lethbridge the following day and after two unsuccessful attempts to track Gilbert's movements, the bloodhound "Queenie" succeeded in picking up the scent and followed the trail leading to the river, after having gone in the opposite direction and then through several gardens on Riverside Avenue. At the point where the trail ended, he stated that there was clear impressions of two heel prints in the soil half way down the bank. These he minutely described, stating that while the left heel mark was deeply embedded in the soil, the right heel showed plainly that someone had slipped, a branch of a tree beside the spot, had been broken and was lying in the water. The water was extremely deep at this point and it would be impossible for anyone who fell into the river there, to regain the bank without assistance, he added.

Questioned by Foreman Harvie as to whether, in his opinion, the heel marks would indicate accident or intent, Mr. Spiller stated, that in his opinion, the heel marks would indicate accident, adding that if a person intended suicide he would not sit down on the bank but would step right into the water. He had investigated the suicide theory thoroughly but could find absolutely no reason for such an action.

To a further question, Mr. Spiller stated emphatically that there was no liquor consumed during the wedding banquet or during the evening. There wasn't a drop of liquor in Gilbert's home.

Mrs. Gilbert took the stand and briefly outlined the activities of the party during the afternoon and evening of her wedding day. She stated that after all guests had departed, Gilbert and herself had straightened up the house and did not retire until between one and two o'clock in the morning. Her husband had got out of bed several times and paced the floor, remarking that he wished he could go to sleep but his stomach was troubling him so that he could not do so. At fifteen minutes to three Gilbert again got out of bed, smoked a cigarette and then pulled his trousers over his pajamas and put on his coat, vest, hat and shoes. She asked him where he was going and he replied "I have got to go to the toilet but will be back in a few minutes." At about three o'clock, somewhat alarmed, she got up and went outside to see what was delaying her husband but could find no trace of him. She then became alarmed and awoke her neighbors to assist her in the search.

Mrs. Gilbert was the last witness called and following her evidence the jury retired and after being absent for forty-five minutes returned and gave the following verdict:

"Your jury find that the deceased, Frank Gilbert, came to his death on the morning of the 27th day of June, 1923, in West Fernie, County of East Kootenay, by drowning in the Elk River and that the evidence shows accidental drowning."

(Signed) D. G. Harvie, Foreman.
John Shand.
Aaron Walde.
Edward Paterson.
Fred Denison.
Roy Kirkpatrick.

Gilbert was born in Southampton, England, August 24, 1880, came to Canada in 1906, resided in Toronto for two years, came to Fernie in 1908 where he has resided until his untimely death. The funeral took place Wednesday afternoon from the Anglican Church, under the auspices of Mount Fernie Lodge; Kootenay Encampment and Esther Rebekah Lodge I. O. O. F.

BLAIRMORE GOLFERS WIN

On Sunday last a team of fourteen golfers from Blairmore, captained by Mr. D. Mackenzie, visited Fernie and succeeded in defeating the Fernie team by 3¾ points.

The Blairmore team comprised a well balanced team and they put up a fine exhibition of the game. The weather was ideal and the links were in perfect shape and it should be pleasing to the Fernie people to note that the Blairmore players unhesitatingly expressed themselves as being of the opinion that Fernie has undoubtedly the finest golf course in this part of the country. Great credit is due to the green committee for the present excellent condition of the course, which has never been in better shape than at present.

The following is the result of the games played:

Morning Round—18 Holes, Singles

Fernie		Blairmore	
Watson	1¼	Mackenzie	0
Hayne	1¼	Wilson	0
Herchmer	1	Sturrock	¾

When Premier Drury abandoned his "broadening out" policy he was flattened out.

CITY COUNCIL MEETING

The regular meeting of the City Council was held in the Council Chambers Thursday evening, Mayor Henderson was in the chair, Alderman Douglas was the only absentee.

Mr. Austin, C. P. R. agent, waited on the Council and requested that the C. P. R. be given the freight of a portion of the shipments of pipe from Vancouver.

A letter was received from C. Carlson, of Kimberley, stating that he was unable to contribute anything towards the support of his mother. A motion was passed instructing the City Clerk to take legal action to compell Carlson to contribute to his mother's support to the extent of the value of the property left him by his father.

The tender of Tony George, of $60, for the hay in the City Park was accepted.

The application of Mr. J. A. Schumacher, for a licence for the Grand Central Hotel, which had been recommended by the Chief of Police, was granted.

The amendment to the shops regulation by-law, passed at the last meeting, was ratified.

After considerable discussion, the Council decided that owing to the fact that the C. P. R. had received the entire freight shipment on the pipe from Toronto, that they would not divert any of the pipe coming from Vancouver by G. N .R., to the Canadian Pacific.

The meeting adjourned and the Council, in a body, went to the Fernie Annex, to inspect the work of laying the new iron pipe north of the Great Northern Railway.

HOLD JOINT INSTALLATION OF OFFICERS AT NATAL

Mount Fernie Lodge No. 47 and Michel Lodge No. 54 I. O. O. F., held a joint installation of officers at the I. O. O. F. Hall, Natal, last Friday evening.

District Deputy Grand Master Thomas Biggs assisted by Grand Marshall Wm. Barraclough, and a full staff of Past Grands, performed the ceremonies and installed the following officers for the ensuing term:

Michel Lodge No. 54—
N. G.—A. Lyne.
V. G.——. Beswick.
Rec. Sec.—H. Jaques.
Fin. Sec.—L. Deluca.
Treas.—M. Gaskill.
Warden—W. Sharrocks.
Conductor—E. Cosgrove.
Chaplain—M. Deluca.
R. S. S.—T. Crutchley.
L. S. S.—L. Krall.
R. S. N. G.—F. Moses.
L. S. N. G.—W. Dixon.
R. S. V. G.—J. Cometz.
L. S. V. G.—W. Springer.
I. G.—H. Hughes.

Mount Fernie Lodge No. 47—
N. G.—Wm. Hardy.
V. G.—A. Sherwood.
Rec. Sec.—T. Biggs.
Fin. Sec.—J. Puckey.
Treas.—D. Harvie.
Warden—J. Rewers.
Conductor—J. Donaldson.
Chaplain—C. Haigh.
R. S. S.—J. Lamb.
L. S. S. F. Tully.
R. S. N. G.—F. Alexander.
L. S. N. G.—E. Lyne.
R. S. V. G.—J. Shand.
L. S. V. G.—D. Townsend.
I. G.—A. Crompton.
O. G.—F. Woodhouse.

After the ceremonies, Michel Lodge entertained the visiting Fernie brothers to a sumptuous banquet during which many splendid speeches on the aims and objects of Oddfellowship were made. Over thirty Fernie Oddfellows made the trip to Natal for the installation.

N. S. MINERS GOING TO WORK AT LEWIS' REQUEST

SPRINGHILL, N. S., July 19.—Miners at Westville returned to work this morning and other mines in the Pictou field will follow suit, according to a message received here this morning.

It is expected that the majority of the mines in the mainland will side with John L. Lewis, president of the International union of the mine workers, against the MacLachlan-Livingstone faction. John Foster, an International organizer from Indianapolis, and a brother of Kent Foster, the well-known Springhill miner, has gone to Cape Breton where he will aid Silby Barrett, provisional president of district 26, in the effort to settle the existing trouble. MacLachlan, it is expected, will conduct a fight against the Lewis edict.

PICARRELLO WILL LEAVES ESTATE OF 80 THOUSAND

MACLEOD, July 19.—Emillo Picarrello, who died on the scaffold at Fort Saskatchewan in early May this year, left an estate of $80,000, consisting of mortgages, notes, real estate and cash, according to the will filed in the Court house here this morning by J. W. McDonald, K. C., solicitor for the widow.

The estate is left to Maria Marucgi Picarrello, the widow, and the seven children, and is divided among them share and share alike. No other bequests are made.

The value of the estate is not nearly so large as expected, as it was generally conceded it would run between $250,000 and $500,000. Big expenses in the trial and later appeals were supposed to have taken $100,000.

The Picarrello will was drawn in May, 1921.

Picarrello was 46 years of age, according to the document.

Rev. Wm. Burns entertained the Rotarians, at their luncheon yesterday, with a report of his trip and the proceedings of the big International Rotary convention at St. Louis.

A hard fought game of football was played at Coal Creek on Sunday last between Hillcrest and the home team, resulting in a tie score of 2 to 2. A large crowd witnessed the game.

Dr. and Mrs. Gee are leaving tomorrow night for Calgary, where the Doctor will attend the convention of the Alberta Dental Association next week.

N. S. MINERS LOSE CHARTER

ATLANTIC CITY, July 17.—The charter of District No. 26, United Mine Workers of America, at Glace Bay, was revoked today by International President John L. Lewis, for refusal of the officers to call off the strike, after being so ordered. All officers of the district are automatically suspended, and a provisional district under the International is created. Selby Barrett, Glace Bay, is named provisional president.

In communicating his action to Daniel Livingstone, the deposed district president, Mr. Lewis bitterly denounced the office of the district for inciting, encouraging and conducting the sympathetic strike.

He referred to the action of Livingstone as of a "mad adventurer," and said that it ruthlessly tramples upon every rule of conduct of the union.

"Your deliberate breach of the existing contract between the operators and miners of Nova Scotia is indefensible," Mr. Lewis declared.

The communication is as follows:

"Since early in June some 8000 or more of the members of the United Mine Workers in district No. 26 have been on a sympathetic strike. Not only did this strike interfere with the production of coal in the mines, working under agreement with the U. M. W. A., but it resulted in the withdrawal of engineers, pumpmen and other maintenance men, with resulting jeopardy to property interests.

"This strike was admittedly incited, encouraged and conducted by you and your official associates, who are members of the board of district No. 26.

"On July 6, after the situation had been officially drawn to my attention by the formal protest of the British Empire Steel Corporation, who are parties to the agreement with the U. M. W. A., in that section, I wired you, asking for a statement in connection therewith.

"On July 6, you wired a reply admitting the 9000 men were on strike, attempting to justify the unwarranted abrogation of contract provisions, by specious argument. On the same date I telegraphed you in behalf of the International Union a request that the men on strike be immediately directed to return to work, and provision be made at once for the full protection of mining property.

"On July 8, you replied, saying that my instructions would be considered at the executive board of district No. 26, on July 10. On July 11, Alex McIntyre, vice-president of the district, telegraphed me that the executive board had declined to acceede to my request, and that the illegal strike would be continued until its objects were attained. Notwithstanding the lapse of time, I am informed today that there is still no indication of intention on your part, as president of district No. 26, nor on the part of

(Continued on Page Two)

POSITIVE DOCTRINE

By Dr. Frank Crane.

Hillaire Belloc, the historian, in a recent lecture on what ails the modern world expressed his opinion that our great trouble is uncertainty in belief. He declared that where there is unrest it is caused by "absence of positive doctrine."

This statement coming from an intellectual man is so near piffle that all that prevents it from being alarming is that it is amusing.

We had thought that the idea that the ills of the world could be cured by reaction and by giving up the business of thinking was confined to pensioners of moss-grown institutions, to timid old ladies, and to gentlemen whose ideal of security was the graveyard.

The fact is that nothing in the world would be so dangerous as a general acceptance unquestioningly of positive doctrine.

It is positive doctrine that has been the first cause of the downfall of states and the decay of institutions.

It is well enough to be positive if one is positive about the truth, but the security of living in what Zangwill called "a cosmos without facts" is entirely fictitious.

The fallacy that underlines Mr. Bello's position is that truth is something fixed, something that some one can discover and will remain the same for all time.

In John Dewey's "Reconstruction in Philosophy" the error in this idea is admirably exposed.

Truth is something which is alive. It is a matter of adjustment. It is the compass of the free spirit. It is not a rock that never changes.

The world never breathed the spirit of progress and human welfare and democracy until the age of science had led men's minds to the value of truth rather than to the importance of authority.

Authority is as fatal to minds as an ultimate ruler, as it is fatal to nations as absolute monarchy.

The only safety lies in progress, in thought, in investigation and free experiment, just as the safety and health of a human life depend upon its exercise and liberty and can not be secured by locking a human being up in a cell.

Faith is good. But it is only good when it is faith in something that is true. Faith in something that is poppycock is not good.

Faith in the medicine the doctor gives you has great medicinal value, but you might have all the faith in the world and if you swallowed a drink of carbolic acid you'd be killed just the same.

The first duty of man is not to have faith but to find out what is true.

The faith that cannibals had in their totems and head hunters had in their tribal gods and the officers in the torture chambers had in their creeds and that the Chinese have in their paper screen to keep off witches, is far less valuable than a sound and healthy disbelief in these things.

Faith can move mountains, but only when it is the kind of faith that uses dynamite. Faith can heal disease, but only when it is the kind of faith that isolates the germ, studies the laws of health and kills off the mosquitoes with kerosene.

Positive doctrine is good but only in so far as one knows that his doctrine conforms to the actual truth.

German industrial leaders are beginning to realize that passive resistance does not work.

By holding a split-second watch on Old Sol for the next day or two the exact decrease in the length of the days may be determined.

A Detroit lawyer recently entertained a number of his clients at a garden party. The guests enjoyed the rare privelege of conversing with the host without paying a consultation fee.

Piles

are usually due to straining when constipated.

Nujol being a lubricant keeps the food waste soft and therefore prevents straining. Doctors prescribe Nujol because it not only soothes the suffering of piles but relieves the irritation, brings comfort and helps to remove them.

Nujol is a **lubricant—not a** medicine or laxative — so cannot gripe. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

N. S. MINERS LOSE CHARTER

(Continued from Page One)

your associates in office, to terminate the strike and discharge your honorable obligations under the agreement, or to heed the instructions of the International Union in pursuance of its laws and policies.

"I am not unmindful that it is probably a fruitless task to attempt to reason with you in the midst of your mad adventure; yet in your sane moments you must recognize that the course you have taken and are now pursuing violates every tenet of your organization. It ruthlessly tramples upon every rule of conduct of our union, and constitutes a departure from its every tradition. This deliberate breach of the existing contract between the operators and miners of Nova Scotia is indefensible and morally reprehensible.

"Your assault upon these laws, and the institutions of your provincial and Dominion governments, cannot be countenanced by the United Mine Workers of America. The official statement of the district executive board, that the strike was for political purposes, is illuminating, and gives additional proof, if such were needed, of your true intent.

"I have in mind that you are a self-proclaimed revolutionist. I am familiar with the constant intrigue between yourself and your evil genius, MacLachlan, and your revolutionary masters in Moscow. I can recall the sentiment which you enunciated at a comparatively small meeting if the international executive board at Indianapolis, when, with the cold ferocity of a five-year-old defying his mother, you announced you were a believer in revolution by force.

"No doubt the present strike in Nova Scotia corresponds with your idea of a revolution against the British government, and is in pursuance thereof.

"In consideration of these strong facts, the International feels warranted in intervening for the protection of the membership, and to permit the discharge of its properly assumed obligations. You may as well know now as anytime in the future, that the United Mine Workers is not a political fanatic who seeks to strike down the established institutions of the government. Neither can it be used to sustain officers of perverted business morals, or individuals suffering from mental aberration such as yourself and the aggregation of papier mache revolutionists who are associated with you.

"By virtue of the authority invested in me by the constitution of the U. M, W. A., of which I am president, and in consideration of the further authority granted in the premises by the International executive board, I herewith advise that the charter of district No. 26, United Mine Workers of America stands revoked, effective this date. Under this action, district 26 ceases to be an entity, and you are automatically deprived of your office as president thereof. Alexander McIntyre, vice-president, and J. B. MacLachlan, as secretary-treasurer, likewise have their offices vacated through this same precise action.

"All members of the executive board of district 26, including any and all other officers of said district, are in like manner automatically removed from offices, and can no longer undertake to represent in any capacity the U. M. W. A. This applies with equal force to Alexander Stewart, member of the executive board.

"By separate order, I am today creating a provision that this district is to function within the jurisdicton of former district 26, under direct authority and control of the International union.

"International representative, Silby Barrett, of Glace Bay, has been designated as provisional president thereof, with sweeping authority of the function in every capacity. In compliance with the laws of the International union governing retired officers, turn over to Mr. Barrett, all monies, official records and documents, together with the district office and furniture, and other property and things of value belonging to former district 26. President Barrett will hold such property in trust for the future use of the members of our members in that district. Instructions will be issued to all local unions whose officers are now on strike in Nova Scotia to immediately return to work under the existing agreement.

"Local unions continuing in defiance of such orders will be summarrily dealt with, in conformity with the laws of the United Mine Workers of America.

"This office is today notifying R. M. Wolvin, president of the British Empire Steel Corporaton, that the International union, through its provisional district No. 26, is assuming the equity and obligations of the existing wage agreement in that territory, as represented by the subsidiary coal companies of the British Empire Steel Corporation."

WHEN USING WILSON'S FLY PADS READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—*Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.*

Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

GOOD MONEY IN GOOD FARMING

"Let's Get to Work and Pay Off the Mortgage"

NINE years ago Canada's national debt was about one-third of a billion. It is more than two and one-third billions today.

Our debts have greatly increased—our revenues must also go up. The farmer has to bear his share of the increased burden. That means he must increase his revenue.

Complaint has been heard that farmers under present conditions in Canada cannot make farming pay. And yet many thousands of Canadian farmers do make it pay.

How Is It Done?

Patient and industrious "carry on" will do wonders, but something more is needed. Too often "patient industry" is coupled with "dull persistance" in poorly thought out methods.

Farmers today more than ever, must plan ahead, as well as "plug along"; indeed they have no option, if they wish to succeed.

Co-ordination of head and hand will mean real success. Farming in Canada has paid and pays now on many farms. It can be made to pay on almost every farm. Canadian agriculture has passed through low profit-making eras successfully in the past and can do so again.

Crop Returns Should be Increased

On the Central Experimental Farm at Ottawa some crop costs and crop profits in 1922 as contrasted with all-Ontario average crop costs and crop profits are given below. The all-Ontario figures are in brackets:

	Cost per acre	*Profit per acre*
Hay	$21.13 ($13.50)	$11.21 ($5.09)
Corn for Forage	$47.50 ($33.75)	$10.38 ($2.86)
Oats	$26.47 ($19.32)	$ 7.33 (.04)

Similar results can be shown from the Dominion Experimental Farms in every province.

Experimental Farm crops are sometimes claimed to be produced at too great cost. Thousands of experiments, however, show that increased cropping costs wisely applied up to a reasonable point always increase crop profits. This is true on the Experimental Farm—and on any and every farm.

With the increased cost of production, the higher standards of living now prevailing cannot be maintained by poor farm management, "boarder" milkers, scrub beeves, poor quality hogs or non-profitable hens.

That even under present conditions profits may be made is testified by many skilful, observant and non-plunging farmers, who believe more in the policy of "slow but sure" and "pay as you go" rather than speed, with excessive borrowing and the often consequent disaster.

The results on our Experimental Farms also bear testimony to the value of thorough, skilful work.

The Farmer Must Manufacture

But crops alone are not enough. The farmer must change his crops into less bulky and more high-priced products—milk, pork, beef, mutton, poultry, etc.

With fair yielding cows dairying shows good profits in Canada. The average cow has increased her yield 25% in the last ten years. She can quite readily go up another 25% and more, and there's where the profit lies. Better feeding, better selection and better breeding will do the job—feed, weed, breed.

To do better feeding means better pastures and more generous supplies of palatable roughage. Short rotations including clover and ensilage crops (corn, sunflower, pea and oat, etc.) will provide feed in abundance for both summer and winter. The experiments and investigations which the Dominion Department of Agriculture have carried on prove that farming scientifically and systematically undertaken will pay profits. The records and particulars of such work in every province are available to the Canadian farmer.

Are you growing grain, or producing seed or interested in fruit? We can give you information that will help you. Do you breed live stock? Are you keeping dairy cattle? Are you interested in poultry or bees? Ask us for information. We have some that will help you.

We have published and have for free distribution 390 different reports, bulletins and circulars dealing with matters of interest to you. Ask for what you want, or for a list of our publications.

We shall have something more to say later. Meantime write the Department of Agriculture, Ottawa, about your problems.

Have Faith in Canada

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

RED ELEMENT IN NOVA SCOTIA

As this is being written there is a strike on among the employees of the British Empire Steel Corporation in Nova Scotia that is one hundred per cent. effective. There is silence in the huge steel works and the coal mines are deserted. There are a thousand or two troops and police protecting the plants and more are on their way. The employees of the steel company struck for additional wages and the check off, which means that if the company agreed to this provision they would be obliged to collect the union dues, and this naturally would have the effect of making the plant a closed shop, a thing that does not exist among steel plants on this continent. As for the miners they broke their agreement with the company and went out in sympathy. But what is a contract where the Red element rules, as it does in Sydney?

That the Reds are in command among the miners and steel workers of Nova Scotia the labor leaders do not even take the trouble to deny. As one newspaper writer who was on the spot said: "If Nova Scotia miners are not Red, they have at least done their best." They have not only violated their agreement with the company which had months to run, but they have violated the Industrial Disputes Act, and they have also struck against the orders of the International Union to which they belong. In other words at the command of their local leaders they have gone as far as they can, and will go much farther if the police and the troops will allow it.

Jim McLachlan, who is secretary of the mine workers of District 26, is the brains of this movement and a dangerous man withal. Months ago he endeavored to affiliate his district organization with the International Red Labor Union of Moscow, whatever that may be, but John L. Lewis, head of the United Mine Workers of America, and a man of some sense, put a sprague in his wheel, as they say in the mining country, by forbidding any such affiliation under penalty of a discharge of No. 26 from the Union which of course would have precluded the Nova Scotia miners from any benefits that might be derived from the International body. However, McLachlan has not given up hope of formally joining the Reds, and he coolly admits it.

Before the arrival in Sydney of a strong mixed force of police and military, there was much disorder. Heads were broken, men loyal to the company assaulted, and a magistrate stoned in an attempt to read the riot act. Armed forces curbed some of this rioting but not all, and the end is not yet.

The steel works of the British Empire Steel Company can be closed down without any great physical loss, particularly in view of the fact that there is said to be no business booked that calls for urgent delivery, but such is not the case with the mines. Already the company's steamers are seeking coal in the United States to fill their contracts, and the mine machinery, particularly the pumps and fans, must be kept in order and going or irreparable damage will result. At this writing the strikers, under the orders of McLachlan and other Reds, are doing their best to interfere with this part of the work which has been undertaken by the office staffs and others who remain loyal to the company. These labor leaders believe in violence, and they believe in the destruction of property, a charge easily proven by McLachlan's own words.

So far as the miners are concerned the question of wages or conditions does not even enter into the walkout. As before stated there was a contract between them and the company which does not terminate for months to come. It is a Bolshevist movement from start to finish and should be treated as such.

There seems nothing to do but to clean up this whole nest of Reds, close down all activities for the time being and start fresh later on. If there is not a law whereby McLachlan and his Red pals can be put in jail and kept there one should be passed in the interest of peace and industry. In the interval Nova Scotia and all Canada suffer. — Toronto Saturday Night.

Here and There

48,000,000 bushels of grain awaited the opening of navigation at Fort William and Port Arthur this spring.

Flood conditions in New Brunswick and Maine this spring were the worst since 1887.

Damage to Canadian Pacific property in Western Canada by floods this spring amounted to approximately $200,000.

Calgary is the leading telephone city on the continent with one instrument to every 4.10 persons. The phones in this city are automatic.

The per capita debt of Canada is approximately $165, as compared with $230 for the United States, $750 for Great Britain, $850 for France and $250 for Australia.

Canadian Pacific steamers "Marloch" and "Metagama" docked at St. John with over 600 Hebridean immigrants to Red Deer, Alberta, and various parts of Ontario.

The 1923 camp of the Alpine Club of Canada will be pitched in Larch Valley, near Moraine Lake, nine miles from Lake Louise in the Canadian Pacific Rockies.

Travelling 572 knots in twenty-four hours, an average of from 23 to 24 knots per hour, the Canadian Pacific liner "Empress of Canada" recently established a record for commercial vessels on the Pacific.

The last link in the great 6,500 mile scenic tour through Western Canada and the United States will be thrown open to traffic on June 30th when the Banff-Windermere Motor Highway will be officially opened.

A car of timothy and grass seed arrived in Vancouver via Canada Pacific Railway from Toronto ten days after an order had been wired to the Ontario Capital. This constitutes a record in service.

In architectural style the new Basilica at St. Anne de Beaupre will be a combination of the Roman and the Gothic. The steeples in front will be 225 feet high and including those in the chapels the new Basilica will contain twenty-six altars.

The honor of running the first ship into Montreal harbor from the ocean fell this year to Captain Edmund Aikman, commander of the Canadian Pacific steamer "Bolingbroke," a freighter. The "Montrose" of the same line was the first vessel to carry trans-Atlantic passengers into the port in 1923.

The number of strikes and lockouts in Canada during 1922 was 85. The number of working men involved in the strikes was 41,050 and the number of working days lost 1,975,276. Approximately fifty per cent of the time lost was in connection with the strikes of the coal miners in Alberta and British Columbia which lasted from April till the end of August.

Topping the grain shipments from St. John of the 1921-22 winter season by almost four million bushels and establishing a record for the port for volume in a single shipment for one vessel, the 1922-23 grain business through the Canadian Pacific elevators up to May 1st totalled 15,249,261 bushels. The single shipments' record was made on an all-wheat cargo of 359,793 bushels.

Shampoo This Way with Olive Oil

and you will have hair with gleam and softness of silk

Olive oil for the shampoo, say leading hair specalists. Olive oil for the shampoo, agree women who have learned the secret—who are admired for their lovely hair

And this, specialists tell you, is why:

Olive oil cleanses thoroughly but gently. It never leaves hair dry and brittle—robbed of the delicate gloss and sheen that means beauty.

It washes away all dirt and oil. Dissolves and removes clogging dandruff. It leaves hair fluffy and soft. But never dry, never dull.

Pliant and shimmering as new silk, instead. And this means beautiful, attractive hair—without which no beauty of face or dress is quite sufficient.

Olive oil treatment in its finest, most convenient form, is PALMOLIVE SHAMPOO. Thousands and thousands of women use it today. They find it most economical—for a treatment that costs a great deal when given by specialists.

You may have a 15c trial bottle free, by sending the coupon. Or you can get full-sized bottles at your dealer's. A single shampoo will amaze you.

BRITAIN'S AERIAL DEFENCE

Details are now available of the increases proposed in the Royal Air Force. The policy is designed purely for home defence and the force for this purpose is to consist of 52 squadrons to be brought into existence as soon as possible. This means that 34 squardons are to be added to the existing force. The additional expenditure involved this year will not exceed £500,000, and the average expenditure, including capital and maintenance, will not be more than £5,500,000. The low cost of the scheme of greatly increasing the aerial defences of Britain is due to the fact that the organization of the Air Force is at present able to absorb a larger number of squadrons than are already in existence, and therefore, for the new squadrons the overhead charges will not be a serious item. The new organization will come under three headings—the increase in the number of R.A.F. squadrons, the creation of an auxiliary force, and the establishment of squadrons on the militia basis in which the cadres can be brought up to full strength in time of emergency.

A squadron consists of 10 or 12 machines, and Britain has now 30 squadrons, not counting six which are stationed in India. Of the 34 new squadrons to be created, ten will be ready by the end of the present year. In all what Britain proposes is to have 82 squadrons, of which 52 will be allocated to home defence, the remainder being scattered throughout the British possessions. Eight and a half squadrons are now allocated to the navy. This number cannot very well be increased, as, by the Naval Limitations Treaty, the total tonnage of naval aircraft carriers is restricted to 135,000 tons. This announcement of the new British plans for aerial defence have been received with satisfaction. It is felt that this feature of home defence is now being taken up on broad and sound lines.—Victoria Colonist.

Unlce Sam and Johnny Canuck are so neighborly that they celebrate their national holidays the same week.

Two miles of carpet were required to provide a soft pedal for promenaders on the steamer Leviathan. A few turns around the big liner would be almost equivalent to a stroll on "Marine drive."

THE FIRST CAN WAS CAMPING

Mrs. Diege says she made a blanc mange with a can of Pacific Milk she found in her son's camping kit. It was so rich and smooth she bought a can "to prove to myself it wasn't the milk," she says. However, it was. Then she had three tins sent in. One of these was partly used for a cake, which was "very nice."

Mrs. D. writes that she feels she owes the company this acknowledgment because she had always spoken against canned milk.

We owe her our thanks.

ECONOMICS OF GRAIN VS. ECONOMICS OF POLITICS

Wheat at Chicago has fallen under a dollar in price and American farmers may lose a total of $600,000,000 on their 1923 crop. This means that the purchasing power of American farmers will be reduced to practically nil and that production in subsequent years will be seriously affected.

Farmers in Western Canada can have no guarantee that a similar economic tragedy will not befall them until co-operative marketing is adopted generally in the West and they are able to market their wheat by co-operation at point of consumption rather than market it individually at point of production.

Until the Western farmer prospers, Canada cannot prosper. The only protection Canada can offer to the incalculably valuable farming industry is co-operative marketing. It is the first duty of government to see that every Western farmer produces his grain by scientific methods as cheaply as possible and is then enabled to sell it for a little more than it cost him.

Western Canada should have the benefit of the best brains money can provide to work out a workable co-operative marketing plan for Western wheat.

Aaron Sapiro, of San Francisco, is the recognized genius of co-operative marketing on this Continent. He has formed co-operative groups in California so successful that growers who hitherto were only receiving 7 cents of the consumer's dollar are now receiving 55 cents of it. By introducing proper systems of marketing he has raised the standard of living in whole districts in the United States.

He could do the same for Western wheat—and he should be invited to do it.

In seeking relief the West has organized for the economics of politics, which has help no one. It is time now to organize for the economics of grain.

Only by applying the soundest principles of the economics of grain through some co-operative system can the Canadian West guarantee itself against the disaster which has overtaken American farmers and look ahead for the first time along the road to permanent prosperity.—Vancouver Sun.

TAXES VERSUS IMPROVEMENT

In almost any city or village throughout the country there are those who claim that the present rate of taxation is too high. A discussion of the subject usually leads to comparisons between the past and present rates, on which basis is, of course, plain that taxes are higher, and in most communities are going to be still higher.

Further thought on the subject soon leads to the conclusion that we should not judge by the old standards and that we must expect advanced rates or diminishing service at the old rate, when the purchasing power of the dollar grows less. None of us, however, is satisfied to accept diminishing services from the state, country and municipal administrations; in fact, quite the reverse is true, for, as our plane of living advances, governmental operations must adjust themselves and advance accordingly.

The foregoing remarks have a bearing on the subject of this article because present advocates of more and better street lighting constantly encounter objectors who insist that nothing should be done, that their tax rate is already too high, that an increase is preposterous, and that a decrease in some manner must be brought about.

Business men embarking on new ventures will look first of all for a progressive city. It is true that they may enquire as to the tax rate, and, if it is low and the other qualifications are present in fair measures, so much the better. But when it comes to choosing between a city of low tax rate and subnormal public improvements as against a progressive and thoroughly modernized city with a higher tax rate, they invariably choose the latter, for taxes, after all, are a small item in operating costs, and the characteristics of the community are of the untmost importance.

Let no merchant whose shop faces on a poorly lighted street persuade himself that this is a small matter, even if he does close his doors at nightfall. People learn to avoid his street at night, and they unconsiously obey the same instinct at night.

Let no citizen whose community still does without modern street lighting believe that such a denial is in the interest of true civic economy, for the well-lighted towns are the well-linked towns, and the real gains in values and business that follow the installation of modern street lighting equipment offset its cost many times over.

And what about the benefits that modern street lighting brings to all the people in the community? It means safety for women and children who must traverse the streets alone after nightfall; the prevention of many painful and costly accidents; the enchancement of living conditions.

Does the highwayman select a well-lighted street for his operations? There is more for the overworked policeman to do in one poorly lighted block than in four that are properly illuminated.

Ornamental street lighting does more towards modernizing and enchancing the appearance of a community than any other improvement of equal cost. An ornamental street lighting installation works 24 hours per day, for, if properly selected, it improves the appearance of the street by day as well as by night. It beautifies the city, develops civic pride and makes knockers boosters. The feeling of safety and cheerfulness alone are worth the cost, and, after all, the best thing we do on this earth is to build good homes for our families. In our home and home towns we derive our greatest satisfaction, and no town having once experienced the benefits of good street lighting is ever satisfied with less.

LIST OF PRIZE WINNERS IN CATHOLIC BAZAAR DRAWING

The following is a list of prizes and winners of same, in the Grand Drawing held in connection with the Catholic Bazaar, June 28 and 29.

For particulars in regard to these prizes, see Mr. J. J. Harrington, Fernie, B.C.:

1st—H. Johnson, c/o King Edward Hotel, $50 suit case.

2nd—H. Coleman, Kitchener, $25.00 clock.

3rd—John Brown, Coal Creek, Pair Dr. Reed's shoes.

4th—Joe Brown, Coal Creek, year old sheep.

5th—E, Cimoline, Michel, young pig.

6th—J. Boucher, Weyburn, Sask., $10.00 gold.

7th—Jos. Steliga, Fernie, 2 ornamental vases.

8th—S. Podbielancik, Fernie, $5.00 gold.

9th—Billy Klauer, Fernie, $5 gold.

10th—C. R. Podbielancik, Fernie, 2 tons coal.

Premier Drury once said that he could think better when following the plough. He will now have ample time for contemplation while turning a lonely furrow on his Crown Hill farm.

MARY MILES MINTER
in
"DRUMS OF FATE"
A Paramount Picture
A story of woman's passions, woman's sacrifice. Starting in a gilded society ballroom, sweeping with intense dramatic force into the jungles of Africa to a breathless climax.
—Two Reel Western— —Two Reel Comedy—

MONDAY & TUESDAY, JULY 23 & 24
"AN OLD SWEETHEART OF MINE"
James Whitcomb Riley's poem, "An Old Sweetheart of Mine," is probably the best loved story in verse this famous American ever wrote. In it, the wistful pathos, the delightful, homely charm that has characterized all the best known works of the Hoosier poet, find their most complete expression.
Elliott Dexter and Helen Jerome Eddy in the cast
Reginald Denny in "The Leather Pushers"
Comedy

WEDNESDAY & THURSDAY, JULY 25 & 26
"SLIPPY McGEE"
With Colleen Moore and Wheeler Oakman
PRESENTED BY OLIVER MOROSCO
Pitched from a fast freight train into a sleepy little town of the old South "Slippy" brings with him two prized possessions. One his burglar kit of finest steel, and the other, his fame as the county's best cracksman. How his burglar kit was pawned for faith, and redeemed by love—how the boy cried "I'm hungry for Hell" and then found Heaven in the arms of a little country Miss, brings many a smile and many a tear.

LOCAL & GENERAL

Mrs. Irvine and family left Wednesday morning for Vancouver.

Mrs. Robertson left on Thursday morning for a short visit to Nelson.

Mrs. James Broley is ill in the Fernie hospital.

Jos. Letcher has opened a garage in the old Calgary Cattle Co. stand, next door to Wm. Johnston's garage.

Born—At Fernie, July 18, to Mr. and Mrs. G. Davidson Meade, a daughter.

Mrs. Arthur Muirhead, of Kamloops, is visiting her parents, Mr. and Mrs. J. Duncan, in Fernie.

Miss Ada Harper, having returned from Calgary, is prepared to take pupils for piano..

Mr. and Mrs. F. C. Lawe gave a party last evening. The guests of honor were the Hon. Dr. King and Mrs. King.

Mr. Wilfred Ashley, formerly of the High School staff, now of Vancouver High School, has been spending a few days in town renewing old acquaintances.

The Junior Baseball Club are holding a dance in Ingram's Gym, which has been donated gratis by Mr. W. A. Ingram in their interest, tomorrow night, Saturday, from 9 to 12 p.m. Admission will be 10 cents per dance. Come and go when you wish.

There will be an Approach and Putting Contest for the Ladies' Golf Club on Saturday afternoon, the 21, at 4 o'clock. Prize: two balls put up by Mrs. Huntington. Tea will be served in the Club House from 4 to 6 during the afternoon.

E. Tutin and A. E. Grimes, of the Mounted Police, arrested three bums on C. P. R. trains on Monday. They came up before Magistrate Henderson who fined two $10 each or 7 days in jail and the other $20 or 14 days. The latter paid his fine.

Stewart McPhee, who for the past eighteen months has been messenger with the Canadian Pacific Telegraph Co. here, was transferred to the main office at Calgary as temporary operator during the grain rush.

Mr. Hartley Wilson, of the engineering staff of the Crow's Nest Pass Coal Company of Fernie, accompanied by a Mr. Cartwright, also of Fernie, motored into Cranbrook on Thursday. They were en route to Perry Creek. It is believed that the party will examine some mining property up that district.—Cranbrook Courier.

On Friday evening last, Miss Lillian Cameron was the guest of honor at a shower, given her by a number of her friends, at the home of Mrs. W. A. Ingram. Music and cards were the order of the evening, after which, on behalf of those present, Miss Dorothy Bean, in a few well chosen words, presented her with a beautiful decorated basket, to which Miss Cameron made a suitable reply of thanks. A dainty lunch was then served, drawing a very pleasant evening to a close.

The Knights of Pythias lodge are holding a picnic on Sunday, July 29. All members who are going to attend are requested to register with the committee not later than Thursday night, July 26. Ex-members and visitors are cordially invited.

A quiet wedding took place in Fernie on Wednesday of this week, when Mr. John Reginald Stone, of Oliver, B. C., was united in marriage to Miss Lillian Mae Cameron, daughter of Mr. and Mrs. Alex Cameron, of this city. The ceremony was performed by Rev. Wm. Burns. The young couple will reside in Oliver.

Nelson Smith is packing around a broken arm, the result of a joy ride in which he and his companion endeavored to beat a C. P. R. train to the Chevrolet Park crossing. They were successful in the race, but lost control of the car just as it got over the crossing and landed wrong side up in the bushes.

We understand that one of our local automobile mechanic-ball players will be obliged to settle a bet tomorrow night, somewhere around nine o'clock, whereby he is to traverse the main thoroughfare from the Northern Hotel to the Fernie and back, attired in a silk hat and pajamas. This is the outcome of an argument with the McLaughlin agent as to whether his car could hit it up at a mile-a-minute clip, the loser to perform. We expect a lot will depend on the size of the nerve pill administered.

WHITE STAR YEAST CAKES

Are Not The
"Just as Good Kind"

THEY ARE THE BEST

Your best garden and plant food is Sodium Nitrate—Suddaby's.

Died—July 18, the infant daughter of Mr. and Mrs. G. Davidson Meade.

Miss Betty Crawford, of Victoria, is the guest of Miss Constance Bonnell.

Fred Young purchased a Star car from Wm. Johnston this week.

Mrs. H. E. Barnes, of Vancouver, with Bertie and Kathleen, is the guest of Mr. and Mrs. F. E. Alexander.

One of the local clubs was fined $50 this week for selling beer to a minor.

Mr. and Mrs. Arthur Owen will spend a few weeks holidaying at Kaslo.

Mrs. Wm. Burland, of Vancouver, is the guest of her mother, Mrs. J. D. Quail.

A. I. Fisher and Fred Perry have been in Creston all week on some legal business.

Mrs. A. I. Fisher entertained on Thursday afternoon in honor of Mrs. (Dr.) King.

Nearly all the waterworks pipe in the city proper has been laid and now work will be rushed in the Annex.

Miss Ada Harper, having returned from Calgary, is prepared to take pupils for piano..

E. H. Wood, manager of the local branch of the Canadian Bank of Commerce, returned on Sunday from a holiday trip to the Coast.

Mr. and Mrs. M. A. Kastner, Jas. Falconer and Miss O. Brown left on Wednesday morning on a motor trip to the coast.

The Hon. Dr. King, Minister of Public Works for the Dominion and Mrs. King were the guests of Mr. and Mrs. A. I. Fisher yesterday.

The Customs returns for the month of June for Fernie amounted to $42,-935. For the corresponding month last year the amount collected was $46,648.

Come up to Ingram's Gym tomorrow night, Saturday. The Junior Baseball Club are putting on a dance. Admission is 10 cents per each dance. Ingram's two-piece orchestra. Dancing from 9 to 12 p.m. The hall will be tastefully decorated.

A new blacksmith shop has been started by Nicholson & Son in the old Ledger Building. Mr. Nicholson has had a wide experience in all kinds of blacksmith work in Calgary and Saskatoon.

Miss Dorothy Corrie arrived home on Wednesday evening from Fort Steele where she attended the wedding of Miss Doris Kershaw and Mr. Fred Rychman, which took place on Tuesday July 17.

WANTED—Lady or girl to do general housework for a couple of months —apply W. Thomas, White Spruce Lumber Co.

REASONS FOR JUDGMENT

His Honour Judge Thompson has just handed down Reasons for Judgment, dismissing an appeal by the prosecution from the dismissal by Magistrate Henderson of a charge under Section 139, of the Indian Act, wherein the respondent, Howard W. Brown, was charged with unlawfully having in his possession a quantity of intoxicating liquor on an Indian Reserve situate on Tobacco Plains in the County of Kootenay. The judgment recites that the Respondent was a common carrier duly licenced and in lawful and legal custody of liquor and that he duly received the liquor at Fernie and proceeded to Roosville, B. C., where he stopped on the road in front of the Customs House, situate within a few yards of the International Boundary Line, in order to have his papers examined and signed by the Canadian Customs Officer. Immediately thereafter he was placed under arrest by Constable Tutin, of the R. C. M. P., the liquor seized and a charge laid against him under the above-mentioned section of the Indian Act. After dealing with the facts as established before him and the law as applicable thereto, His Honour concludes his Judgment as follows:

"This is an appeal by the complainant from the dismissal by G. G. Henderson, Esquire, Stipendiary Magistrate in and for the County of Kootenay, of a charge under Section 135, subsection 'C', Chap. 81 of the Revised Statutes of Canada, being the 'Indian Act,' wherein the respondent, Howard W. Brown, was charged that he was found in possession of intoxicants on an Indian Reserve, situate on Tobacco Plains, in the County of Kootenay, in the Province of British Columbia.

"The facts are practically admitted. The respondent is a common carrier, duly licenced and was in lawful custody of liquor consigned from the Consolidated Exporters Corporation, Limited, Fernie, B.C., to one J. B. Burke at Butte, Montana, consisting of 24 cases of bourbon whisky rendered at $1344.00.

"The respondent, Howard W. Brown duly received the liquor at Fernie and proceeded to Roosville, B. C., where he stopped at the Customs House, situate within a few yards of the International Boundary Line, in order to have his papers examined and signed by the Canadian Customs Officer. His export entry was stamped and signed by the Customs Officer at Roosville, B. C., on the 20th of April, 1923." Immediately thereafter he was placed under arrest by Constable Tutin of the Royal Canadian Mounted Police, his care and the liquor seized, and a charge was laid against him under the above-mentioned section.

"The sole question for me to determine is whether the liquor was or was not, at the time of the arrest and seizure, on an Indian Reserve.

"The history of this immediate neighborhood is remarkably interesting. The evidence consists mainly of that of Mrs. Ruby Phillips, the widow of the late Michael Phillips. She is an Indian, 83 years of age, who can neither read, write nor speak English. Evidence was also given by other residents of the neighborhood, and there is, of course, a large amount of documentary evidence consisting of official records.

"While the evidence of Mrs. Phillips is undoubtedly inaccurate in respect to some dates, (and naturally so considering her age), nevertheless, she showed a remarkable memory and knowledge concerning the events and happenings of nearly seventy years ago. She gave her evidence clearly, and without hesitation, and it is in no-wise contradicted.

"In 1854 or 1856, the late Michael Phillips, then a young man of about 18, was sent to take over the factorship of a Hudson's Bay post, known as '69 Ranch.' This was situate in what is now the State of Montana, some miles south of the International Boundary. Shortly after his arrival he married the daughter of Chief Paul, who was chief of the Kootenay Indians living in the neighborhood of '69 Ranch.' Following his marriage he moved to Tobacco Plains, British Columbia, and settled on lands immediately across the present International Boundary. For some time he lived in a tent within two or three hundred yards of what is now the International Boundary. He then built for himself a small shack, which still stands, and which was pointed out to me by Mrs. Phillips when I took a view. Afterwards he moved further north into another house on his land.

"In 1873 he pre-empted the lands upon which he had settled, and recorded his claim on the 16th, September, 1873.

"In the meantime, Mr. Phillips had been appointed Indian Agent, and on the establishing of the International Boundary, told the Indians that those who wished to be Americans must go to the Flathead in the United States, and those who wished to become Canadians must go to Tobacco Plains in Canada. Some of the tribe came to Canada and an Indian village was located for them some six miles north of the International Boundary.

"At some period between 1856 and 1873 his father-in-law, Chief Paul, lost his wife and was practically alone. Mr. Phillips therefore, invited him to live on the pre-emption in order that Chief Paul might be a companion to his daughter during Mr. Phillips' frequent absences. Chief Paul came over to Canada and was allowed to live in the old shack which Mr. Phillips had originally built. He himself, and his wife, lived in the larger house to which I have referred.

"Shortly after settling on his pre-emption, he fenced in both sides of the road, as the people travelling to and fro were injuring his crops. These fences have been maintained ever since, and the road is still fenced on either side. This road is described in some of the maps which were produced as the 'Eureka-Roosville Road,' but was described by the witness, Howard McGuire, (a son-in-law of Michael Phillips), as the old Kalispel Trail.

"In 1884 Commissioner O'Rielly allotted lands on Tobacco Plains in the Kootenay Agency as Reserve No. 2, containing 10,557.03 acres. This Reserve was surveyed in 1886, and approved by the Department of Indian Affairs in 1887. This survey shows that part of the Reserve contains that part of Michael Phillips' pre-emption which may be roughly described as the southerly quarter of a mile, and to which I will hereafter refer, as the south quarter mile. The road in question runs from north to south through this south quarter mile. Why this south quarter mile was taken from Mr. Phillips' pre-emption I do not know. Mrs. Phillips, Seymour Phillips, her son, and Mrs. McGuire, her daughter, believe that this south quarter mile still belongs to the estate. I can not understand how this particular tract of land became part of the Indian Reserve. There is no evidence of any agreement between Phillips and the Commissioner. It is possible that the Commissioner, finding Chief Paul a resident upon this south quarter mile, assumed that it was property upon which Indians lived or resided. Mrs. Phillips and her children are very insistent upon the fact that while Chief Paul lived in the shack, it was only as the guest of Mr. Phillips, and that Mr. Phillips had full supervision over this south quarter mile as being part of his pre-emption. However, the fact remains that it was incorporated as part of the Indian Reserve.

"In 1892, Mr. Phillips applied for, and obtained a Crown Grant of the Pre-Emption as Lot No. 289, containing 320 acres. The map or plan of this Pre-Emption shows the south quarter mile of the original pre-emption to be part of Indian Reserve No. 2.

"A great deal of argument was entered into before me, and a great deal of evidence produced to show that this south quarter mile is still part of the old Phillips' pre-emption. The fact remains, however, that in the survey of the Indian Reserve, and in the survey of Lot 289, this south quarter mile was undoubtedly looked upon as part of the Indian Reserve. I do not see, however, that I am called upon to decide this question.

"By a report dated 12 January, 1915, from the Superintendent General of Indian Affairs, it appears that the Department of Customs had applied to the Department of Indian Affairs for 2.97 acres of the Tobacco Plains Indian Reserve No. 2, of the Kootenay Band of Indians in the Province of British Columbia. This property being required by the Customs Department as a Customs House site, and being shown on a plan No. 1455 of record in the Department of Indian Affairs.

The matter came before the Privy Council on the 16th January, 1915, and by order-in-council No. 114 of that year, permission was granted to the Department of Customs of Canada to enter upon the Reserve and acquire the 2.97 acres, 'to the east boundary of the Government wagon road, and along the said east boundary of the wagon road.'

"This road, therefore, is the road mentioned in the description as 'the Government wagon road' and is the road in question in these proceedings. On this property is situate the Canadian Customs office known as the Canadian Customs, Roosville, B. C. The only means of ingress or egress to the Customs office is over this road. Every person either leaving or entering Canada, and having business to transact at the Customs House, must travel over this road. It does not matter what a carrier may be carrying; whether it be a load of hay or a load of liquor, he must report at the Customs office and have his papers stamped and signed by the Customs officer. If he does not do so, he is evading the law.

"The road in question in these proceedings has been recognized as a public highway from time immemorial. It may or may not be pertinent to the question, but the Department of Customs has recognized that this is a public road when they placed their Customs office adjacent thereto, with the only means of ingress and egress over the road in question.

"To summarize: This road was dedicated by the Crown and Mr. Phillips, the only parties interested, as a public highway in or about 1856. It has been used by the public as a public highway since, and undoubtedly prior, to that date. It has been recognized by the Department of Indian Affairs and the Department of Customs as a Government public road. The fair assumption, therefore, must be that when Commissioner O'Rielly allotted these lands as Indian Reserve No. 2, it must have been subject to the existence of this road as a Government highway.

The respondent, Howard W. Brown, was engaged in a lawful business. He was not only entitled but was forced by law, to travel along this road. He was, in my opinion, on a public highway which is not part of an Indian Reserve.

"I therefore affirm the judgment of the Court below, disallow the appeal, directed the acquittal of the accused, and the return of the seized car and liquor. Costs will follow the event."

Mr. A. Fisher appeared for the respondent while Mr. G. J. Spruell appeared for the appellant.

Mountain-Climbing on Vancouver Island

Cameron Lake showing Mount Arrowsmith in the distance.

Just before the ends.

Vancouver Island is becoming famous for many things. Among the chief of these is its climate, among the more utilitarian its strawberries; and among the tourist attractions its marvellous scenery, and magnificent drives, its many fascinating trips both by boat and by rail. But, while tens of thousands of visitors holiday in the Island every summer, very few of them are aware of the fact that within less than a day's journey of Victoria there are mountain peaks covered with perpetual snow, and massive glaciers, which defy the warmest of the summer sunshine, where those who enjoy that most exhilarating sport, mountain-climbing, may put all of their skill to the test.

The most popular mountain from an Alpinist's point of view is Arrowsmith. It is about six thousand feet high, and to reach it one travels by one of the most magnificent scenic railways on the continent. There is a diversity of country all along the hundred miles from Victoria to Parkesville. Parkesville is on the east coast of the Island, and Victoria, situated at the extreme south of the Island is the starting point for the journey. One of the first summits to be crossed is that of the splendid Malahat, about fifteen hundred feet above the sea. Here, from the "Lookout," one looks down on a wonderful panorama of green-embowered hills, narrow winding waterways, the wide stretch of the sea itself and the Olymptic mountains on the Mainland in their dazzling dress of ice and snow. After crossing the Malahat there are miles along the shores of the salt water, quick passages through picturesque villages and towns, journeyings among sweet-scented woods which are always gay with flowers.

At Parkesville the road divides one branch swinging toward the west. And there begins the first trek in the journey which leads to the everlasting hills. As one nears Cameron Lake, whether one travels by rail or highway, one sees the beginning of the vast forest of Douglas fir, than which there is no finer stretch of timber in America.

Just across the lake from the Chalet one begins the ascent of Mount Arrowsmith.

The particular day when we made the journey was in early June. It was sweet and cool near the water, the bracken thrusting up branchy and tall, maiden-hair ferns just unfolding, all of the trees and shrubs wearing their new dresses of fresh, young green.

We started at noon, and from the very outset, found the trail fairly steep. With only occasional stops for breath, we pushed on for five hours before we made the Hut, a distance of about 3000 feet up. It was rather early in the year for mountaineering and the trail had not been cleared since the winter storms, which made our going rather more difficult than it would otherwise have been. But every step of the way displayed some magnificence of scene that called forth exclamations of delight.

The Hut was practically buried, for the snow lay deep on the upper reaches. It took us an hour or more to tunnel into it, for although our packer had gone ahead with the blankets, he could not accomplish much alone. But we finally dug our way in, cleared the snow from the windows, made a fire, and before very long the aroma of boiling coffee and fried ham filled the little cabin, and we sat down to eat with ravenous appetites.

The sleep that comes to one on these high, snowy altitudes, far above the slightest sound of life, is deep, dreamless and infinitely refreshing. We awoke at eight the next morning, full of eagerness to continue the climb which from there on is a real test of strength and endurance.

The final five hundred feet were very steep, and not without danger for the unwary. We had a few tumbles and slides, which only added to the enjoyment, and when we had pursued our journey to the end our satisfaction was very great. For it was an objective worth striving for.

The view was grand beyond conception, snow-peaks all about is, dazzlingly splendid in the sunshine, clouds of mist lifting from the valleys, and rolling away to give a glimpse of lakes blue as periwinkle, of bare cliff-sides coloured with the tints of the rainbow, and bright, green valleys, and forests of sturdy little jack-pine, while now and then when the clouds would roll up and melt into the blue of the sky, we could glimpse a farther view, and we said it was the sea and the mountains beyond the sea, but the distance made it almost as vague as a half-forgotten dream.

It is a journey that one can easily make within the day, providing there is no miscalculation, and it is a most joyfully exhilarating climb, while the picture which the summit discloses must always stand out conspicuously in the gallery of one's memories.

WATER NOTICE

Use and Storage

TAKE NOTICE that F. C. Limbocker, whose address is Jaffray, B. C., will apply for a licence to take and use 100 acre feet and to store 5 acre feet of water out of Little Sand Creek which flows South and drains into Big Sand Creek about 1½ miles South of Jaffray. The storage-dam will be located about 300 feet South of Government Road. The capacity of the reservoir to be created is about 5 acre feet, and it will flood about 1 acre of land. The water will be diverted from the stream at a point about 300 feet South of Government bridge and will be used for irrigation and power purposes upon the land described as portion of sub-Lot 3, South of Government Road and West of Sand Creek. This notice was posted on the ground on the 19 day of June, 1923. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fernie, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is June 22, 1923.

Here and There

Each acre of corn grown in Ohio costs on an average 46.26 hours of labor.

Canada is now second on the list as an exporting land, the per capita being $100.63 per annum.

A new station is being built by the Canadian Pacific Railway at Fredericton at a cost of $50,000.

Half a million Canadians look to the forests each day for their meals and lodging, and more than 100,000 Canadian workmen are engaged in converting forest products into one form or another.

The large party of Hebrideans who were brought to Canada on the Canadian Pacific Steamships "Metagama" and "Marloch" have gone to Red Deer, Alta., where they will form an agricultural colony.

Seven hundred farmers and farm laborers arrived in Canada recently on the Canadian Pacific steamer "Montcalm." These colonists are proceeding to Ontario and western points where they will take up farm work.

The project of a ship canal across Scotland from the Clyde to the Firth of Forth was brought to the fore again at a recent meeting of the Mid-Scotland Ship Canal Association, and there is a possibility of something being started in this connection in the near future.

A single pair of potato bugs would, without check, increase to 60,000,000 in one season; the hop aphis, developing thirteen generations in a single year would, if unchecked to the end of the twelfth generation, have multiplied to ten sextillions.

Canadian air pilots flew 294,449 miles carrying 9,153 passengers and 77,850 pounds of freight in 1922, according to a report of the Canadian Air Board. Saskatchewan pilots led in the Dominion, carrying 3,622 passengers. Manitoba pilots carried 1,622 people, and British Columbia pilots 1,122.

A company has been formed in London to exploit sunken treasure in Navarino Bay, off the west coast of Greece. The promoters state that there is a matter of $45,000,000 in bullion and other forms still at the bottom of the Bay, where it was sunk with the united fleets of Egypt and Turkey by the united British, French and Russian fleets in 1827.

Last summer 4,000 forest fires cleared away at least ten times as many trees as were cut down for lumber, pulp and paper, and all other industrial purposes. A very large percentage of the fires were caused by careless campers and sportsmen who "thought it would die out" or cast away a lighted match or cigarette end.

Improvement of camping facilities at Banff for automobile tourists is now being made. The Mount Rundle camp site is being improved and enlarged, and will be equipped with all modern appliances. It is expected that as a result of the opening of the Banff-Windermere road this year, the tourist traffic through Banff will be the heaviest ever recorded.

At the annual meeting of the Canadian Pacific Railway, President E. W. Beatty pointed out that prospects for the immigration into Canada of the class of colonist urgently needed to develop the country's natural resources were much brighter than they had been in the past two or three years, and an increased traffic from Great Britain and Northern Europe was indicated by the largely increased western movement on the company's ships during the past four months of this year.

HOW TO SLEEP 3-IN-A-BED

YES, it CAN be done—but not like this.

The trouble is, most people go to bed with "something" on the mind—or ON THE STOMACH!

The answer is, no matter what the day has brought forth to upset your mind and digestive organs, take Beecham's Pills when you retire.

Though in no sense a "sleeping potion," this 80-years-famous household medicine so harmonizes the system that you can sleep in quiet and perfect rest, even in two feet of bed space.

Beecham's Pills are as efficient and harmless for children as for adults—sweetening the stomach, invigorating digestion and stirring liver and bowels to natural activity.

At All Druggists—

FERNIE TAKES LEAD IN RACE

Fernie assured themselves of participation in the post-season play-offs for the East Kootenay League Championship Pennant and the Nelson News Cup by defeating Kimberley here on Sunday afternoon by a score of seven runs to three.

Kimberley and Fernie were tied for leadership in the first half of the league race and as these two teams were scheduled to meet here on Sunday in the first game of the second half, the League Executive decided that this game would also decide the first half leadership, so Fernie, by winning, not only secured this honor, but obtained a good start in the new schedule.

Ault was in rampant form and as usual errors spoiled his chances for a shut out, no earned runs being made off him. He allowed eight scattered hits and struck out eleven Kimberley batters.

Garrity was not as effective as in his last appearance in Fernie, the local batters getting to him for eleven hits, six of which were for extra bases.

Fernie opened the scoring in the first inning when with two men down Barger singled, the ball taking a bad hop past Musser, and stole second. McTeer drove him home with a two-bagger. They added another run in the second when Garrity hit Shand, sending him to first. Shand stole second and scored on Wilson's two-base hit.

In the third Fernie opened up with a batting spree. Bishop, first man up making a triple, Barger struck out and then McTeer drove the ball out of the regular playing field into the long grass for a home run, scoring Bishop ahead of him. Dunlap popped out to Musser and then with two out Ruschall singled and came home when Shand connected for three bases. Shand scored when Wilson hit to Coen who made a wild throw to first, allowing Wilson to get safe. Ault hit to Garrity who threw him out at first for the third out.

Fernie added another run in the fourth, when Barger scored through a bad error of Crerar's, who dropped the ball when the third out should have been effected.

Kimberley secured their frist run in the fifth inning when Garrity got to first, Wilson fumbling his grounder, and then scored on Cosgriffe's two-bagger. In the seventh with two men down Garrity singled, Cosgriffe hit to Wilson who fell with the ball and allowed both Garrity and Cosgriffe to reach the bases safely. Grant connected for a two-bagger scoring Garrity and Cosgriffe. Coen hit to Shand who threw him out at first for the third out. Ault extracted himself from a tight corner in the eighth when Hovan dropped Crerars fly allowing the runner to reach first. McTeer took Musser's foul fly close to the back stop, Flaherty singled sending Crerar to second but Ault finished the inning by striking the next two men up.

The box score—

Fernie—	AB	R	H	PO	A	E
Hovan, lf	5	0	2	0	0	2
Bishop, 2b	5	1	1	3	3	0
Barger, 1b	4	2	1	8	0	0
McTeer, c	3	1	2	12	0	0
Dunlap, rf	4	0	0	0	0	0
Ruschall, cf	4	1	1	2	0	0
Shand, 3b	3	2	2	0	3	0
Wilson, ss.	4	0	1	1	1	2
Ault, p.	4	0	1	1	0	0
	37	7	11	27	7	4

Kimberley—	AB	R	H	PO	A	E
Cosgriffe, cf	4	1	1	1	0	0
Grant, 2b	5	0	1	5	3	0
Coen, 3b	5	0	1	0	1	1
Crerar, 1b	4	0	1	10	0	1

Score by innings—

Fernie	114 100 00x	—7
Kimberley	000 010 200	—3

Summary—

Stolen bases: Barger 2, Shand, Wilson; Two base hits: McTeer, Wilson, Shand, Cosgriffe, Grant; Three base hits: Bishop, Shand; Home run: McTeer; Struck out: by Ault 11, by Garrity 3; Base on balls: off Ault 1, off Garrity 1; Hit by pitcher: by Garrity (Barger, Shand); Dropped 3rd strike: McTeer; Earned runs: Fernie 4, Kimberley 0; Left on bases: Fernie 8, Kimberley 8; Time of game: 2 hours; Umpires: Kastner and Griffiths.

Lumberton defeated Wycliffe at Lumberton last Sunday by a score of three runs to one. The standing of the new league is as follows:

	W.	L.	Pct.
Fernie	1	0	1000
Lumberton	1	0	1000
Kimberley	0	1	.000
Wycliffe	0	1	.000

FERNIE AND MICHEL DRAW

Fernie and Michel battled ninety minutes to a goalless draw in their scheduled Crow's Nest Pass League Football League match here Sunday evening.

Fernie won the toss and elected to play with the wind and sun behind them. Notwithstanding this advantage to the locals, Michel were early in on Fernie goal area but Litler shot past. Michel continued the pressure and Swedeberg was called upon to save a long shot from McKenzie. A few minutes later Yates narrowly missed scoring when he skimmed the bar with a fast travelling shot. Fernie finally asserted themselves and gave the Michel defence their first real spell of work, Joinson sent a nice cross to Sharrocks but the later shot over. A spell of mid-field play followed and then Michel again attacked, Swedeberg brought of a splendid save, stopping a shot from Travis at close range but only partially cleared, Travis fell in the goalmouth and Yates, who had secured the rebound, drove hard for goal but the ball hit Travis and Booth cleared. Michel kept the ball well into Fernie territory but finally they were driven back and Jenkins blocked the ball just as Joinson was about to shoot, and injured his foot. Fernie continued the pressure right up until the whistle went for half time.

On resuming, both goals were visited in quick succession but without effect, mid-field play followed and then Michel broke away. Littler looked dangerous, but Robertson intercepted and gave away a corner, which proved fruitless. Continuing the pressure, Michel got close in on Swedeberg, Travis passed the ball to Yates who sent it into the net but from an off-side position and the goal was disallowed. Fernie finally assumed the aggressive and getting away on the right, Robson carried the ball well in and sent in a rocket shot for goal, but Dawe effected a great save and cleared. At the other end Michel had a golden opportunity but B. Travis shot wild. With only a few seconds to go Michel forced a corner and just as the ball was kicked off the whistle went for full time without either side having scored.

The lineup:

Fernie—Goal: Swedeberg; Backs: Booth and Wilson; Half backs: Morrison, Riley and Robertson; Forwards Robson, Sharrocks, Joinson, Thornton and Thomson.

Michel—Goal: Dawe; Backs: Jenkins and Holmes; Half backs: McFarlane, McGovern and White; Forwards Littler, H. Travis, B. Travis, Yates and McKenzie.

Referee—J. Sweeney.

The longest days are all too short when a promissory note is about due.

A recent arrival from the East says he purposes writing an article "From the Frying Pan to the Refrigerator," descriptive of the temperature he experienced during the trip.

This is the season of the year when potential vacationists engage in the periodical pastime of attempting to master condensed railway timetables.

The question of how many tugs it would take to stretch the three-mile limit to twelve is now engaging the attention of marine experts.

One way for overseas passengers to escape the humiliation and discomfort of Ellis Island regulations is to book their passage to a Canadian port.

The American nation's annual bill for peanuts consumed is estimated at $150,000,000. The "goobers" are said to rank next to gum as a developer of jaw energy.

Here and There

An addition to the Canadian Pacific Montreal-Toronto train service is a nightly train each way, making six trains every night between the two cities. The increase was found necessary on account of the heavy tourist traffic to Montreal from the West.

The opinion of Hon. T. D. Pattulo, Minister of Lands of British Columbia, is that "Canada can absorb at least 300,000 people annually, and this number can come on indefinitely. There is no limit to the requirements of the country. As many as we can get are wanted.

Nova Scotia is endeavoring to arrange an "old home" month during July or August of 1923, and it is expected that many from distant parts of Canada and the United States will visit the towns of their origin during the festival period set apart.

Incomparable Lake Louise has achieved new fame. The makers of the Gray-Dort car have put out a model in a new color which they term "Lake Louise Blue." It is of a lovely green-blue, and if it has caught anything of the glorious gleam of Canada's most beautiful mountain lake it should be a popular color for other than motor cars.

Big Bill, the last surviving buffalo at the Pinafore Park Zoo, St. Thomas, was recently shot. The animal had been suffering for some time from the same malady which carried off his mate a few months ago. Big Bill was said to have been the finest specimen of Buffalo east of the Government Park at Wainwright, Saskatchewan.

Albert Steedwell, Canadian Pacific Railway engineer at Fort William, has an airedale dog that is a wolf killer. Mr. Steedwell has a farm at Upsala, and while visiting the farm the dog routed out a brush wolf and chased it. During the subsequent battle one could hardly tell which was dog and which was wolf. Mr. Steedwell went to the assistance of his pet and together they finished the wolf.

T. W. McKenzie, Canadian Pacific Railway agent at Rosemary, Alberta, has received letters patent on a device for the purpose of locking automobiles. It is so constructed that when the switch is thrown off the car is automatically locked, thereby eliminating the possible chance of an owner leaving his car unprotected. The device cannot be operated nor the car started by an unauthorized person without causing an alarm.

The number of persons killed or injured while trespassing on railroad tracks were 50 per cent. less in 1922 than the average of the preceding fifteen years. The figures are 5,300 for nine months of 1922 compared with 10,736, the average for the previous year, according to an announcement made by the Safety Section of the American Railroad Association. This reduction in casualties is claimed to be due to the improved policing by the roads and to success of the Safety First movement.

From September 1 to March 31 inclusive, the Canadian Pacific Railway has transported to Vancouver 7,884 cars of grain, representing 11,668,328 bushels. Last year during the same period the movement amounted to 2,802 cars or 3,967,632 bushels. From the beginning of the crop season 13,571,320 bushels had been exported from Vancouver, of which 11,128,620 went to the United Kingdom, 2,242,300 to the Orient and 200,400 to South America. Last year during the same period export amounted to 5,000,000 bushels.

PILES

No one but the sufferer knows the terrible agony or the itching nature of Piles and how hopeless it seems to try for relief in ointments, injections and dilators.

Genius produces

"PAX"

Internal Pile Remedy

Pax is the prescription of a well known physician and has proved successful in hundreds of cases. Pax is internal distinct from any other treatment. Applications from the outside are futile. No ointments, injections or dilators are necessary. Pax is complete and is a vegetable remedy, contains no drugs or alcohol.

If you have not hitherto found relief do not despair, place your faith in Pax.

Except in unusually stubborn cases one box is usually sufficient.

Get "PAX" from your Druggist or if he cannot supply you send One Dollar and "PAX" will be sent you in a plain package.

RICH SCENES ON SCREEN IN "SLIPPY McGEE."

What enrichment Oliver Morosco has brought to pictures from his years of success as one of the foremost stage producers, will be seen at the Orpheum Theatre, Wednesday and Thursday, when "Slippy McGee," the latest Morosco First National attraction will be shown. "Slippy McGee" embodies the Morosco idea of attacking precedent and striving for strength, simplicity and originality.

In "Slippy McGee" the producer struck out boldly to avoid familiar types, situations and settings. His desire for wholesomeness first, in the selection of the widely read Oemler book and later, in its handling, has won hearty commendation. But in attaining his aim he avoided flabby sentiment and mawkish preachments, building instead a story of stirring emotions.

Morosco with his way of obtaining effects, did not attempt to transplant a section of the South to his studio. Instead, his star cast was sent to Natchez, Miss., to pass eight weeks in typical environments that never before have been shown on the screen. The players invaded the exclusive old Southern mansions, magnificent gardens framed by moss-draped trees, and caught the Southern customs as they traditionally have remained for more than half a century. Furthermore, when the cast had finished the Southern scenes, the interior of the historic old San Gabriel mission near Los Angeles was photographed for the first time in its hundred and fifty years for a motion picture.

The cast of "Slippy McGee" gives a new significance to the Morosco slogan, "a typical Morosco star cast." Headed by Wheeler Oakman in the title role, the cast includes Colleen Moore, Sam de Grasse, Pat O'Mally, Edwin Stevens, Edith Yorke, Lloyd Whitlock, Alfred Allen, Robert E. Dunbar, Evelyn Selbie, Charles E. Evans, Nellie Peck Saunders and little Wanda Phelps.

The Australian bandit who confused pursuers who were trailing him through the bush by padding his feet, believed in using the soft pedal.

$6.50 TON COAL RATE— WHAT ALBERTA NEEDS

EDMONTON, July 16.—If the Canadian Pacific and Canadian National Railways can set a freight rate on Alberta coal to Toronto which shall not exceed $6.50 per ton at the most, then Alberta coal can compete with United States anthracite in the Ontario market.

This appears to be the crux of the question, as reached this morning at a conference held here, attended by Sir Henry Thornton, president of the C.N.R., D. C. Coleman, vice-president of the C.P.R. western lines; J. Dalrymple, W. G. Sanders, A. E. Warren, J. Stephens and other prominent railway heads, called together by Premier Greenfield and presided over by C. A. Magrath, chairman of the federal advisory fuel committee and official representative of Ontario at the conference.

Jesse Gouge, speaking for the Alberta operators, said that furnace run coal could be sold at the mines at $4.50 on car, leaving a balance of $6 to $6.50 per ton for transportation, as against the present $9 rate, if Alberta coal was to reach Ontario at a laid down price of between $10.50 and $11.

To this would have to be added $2.50 per ton for dealers' profits, sacking and handling, making the retail price of $14 to $13.50, against a present retail price for anthracite of $15.50.

Following an all-round discussion participated in freely by railway men, operators, Dominion and Provincial officials, it was agreed that the conference between the executives of the two railroads was necessary, before the meeting could get any further.

Sir Henry Thornton moved that the railway men get together and that the conference reassemble in the afternoon, when the views of both railways on the question of transportation cost, would be laid before the conference.

No Cheap Rate Possible

EDMONTON, July 17.—The officers of the C.N.R. and the C.P.R. say they cannot possibly give a rate of $6.00 or $6.50 per ton on coal from Alberta, and the coal producers say that without such a rate shipment to Ontario will be impossible. That was the outcome of the conference here yesterday.

Alberta Coal $12.80 at Ottawa

OTTAWA, July 17.—Alberta coal can be delivered in the freight yards at Ottawa for $12.80 a ton, according to a news story in the Journal this afternoon. This is almost $4.00 lower than the present retail price of Pennsylvania anthracite, Brig.-Gen. Hughes, superintendent of the penitentiaries here, said. He received a wire today from an Edmonton coal company quoting the $12.80 price for Ottawa and Kingston, the paper says.

U. S. People Own 25%, Canada 85% of Nation's Timber Lands

An indication of the situation that will be faced by Canada in a very short time, if the destruction of forests by fire continues in such widespread fashion as during the past few years, is seen in a report by Dr. Richard T. Ely, professor of the University of Wisconsin, on the "Forest Crisis" in the United States. Dr. Ely has made a recommendation for Government ownership of all forest lands in the States and the creation of a block system in timber areas so that administration and fire protection would be economically conducted. In this connection, it is pointed out that, whereas the American people own just 25% of their forest estate, 85% of all timber lands in Canada belong to the people of the Dominion, which means that every time there is a forest fire in the Dominion the whole Nation suffers—not "just the lumber companies." Industrial, economic and employment conditions are also directly affected by a timber conflagration.

Dr. Ely, in his statement, refers to the fact that there are 80,000,000 acres of burnt-over forest country in the United States which are lying absolutely idle. He also stresses the economic value of maintaining and protecting natural forest beauty for recreational purposes.

"The Great Lakes' Section will lose 75% of it's charm when the forests are gone," he said. "Recreation means an actual money income to the State. It is estimated that Michigan profits to the extent of $75,000,000 a year from people who visit that State for recreational purposes."

THE CARMELO SHOW AT THE GRAND

The Carmelo Players made their regular visit to Fernie last Saturday evening, presenting on this occasion a rather hilarious comedy entitled "Love, Sweetheart and Money." This was followed by a musical skit called "The Beauty Shop." Both plays called forth an abundance of laughter from the two large audiences that witnessed the performances, and the musical numbers and specialities were generously applauded. The company will return again on next Saturday, the feature play announced being the well-known comedy "Henpecked Henry." Two performances will be given at seven and nine thirty.

Health turns the clock backward

IF HAY FEVER SNEEZERS LINED UP FOR BATTLE

Health Talk No. 27

By G. J. Parks, D. C.

If all the hay fever sufferers were lined up for battle against nineteen to one. They would also loose because they are miserable ninet eetno one. They would also loose because they are miserable and feel as if they wouldn't mind so very much if they were shot.

But the fact that only one in twenty succumbs to this seasonal infection indicates very definitely that some are immune, that the defensive powers of the system are sufficient to throw off that invading disease. There is only one known method of increasing the natural resistance of the air passages and that is by chiropractic adjustments. When the full tide of life and power flows over the nerve lines the natural resistance that means health is present. Nothing will substitue for chiropractic spinal adjustments in the battle against hay fever.

Well Three Years And No Return

"Being afflicted with hay fever very badly for many years, and after trying several different medical treatments with no benefit—in fact the trouble appeared to be worse each year—I was persuaded to see a chiropractor. This was three years ago last July. I take oath that I am completely relieved."

—G. J. White before E. B. Jones, oath commissioner, Chiropractic Research Bureau sworn statement No. 1364H.

THE FRED CARMELO SHOW

Another breezy musical show was presented by Fred Carmelo and his company of musical comedy entertainers at the Grand on Saturday last. "Henpecked Henry" is a comedy of well-known merit, and may always be depended upon to furnish excellent entertainment with its humorous story and laughable situations. The Carmelo company gave an amusing version of the play, in which novelty songs and comedy specialities were introduced. "Poppyland," with tuneful melodies and an unusual line of comedy features, was also presented by the company in conjunction with the feature play.

For next Saturday the company announces "The Girl from Laramie," a musical play with a western atmosphere, the action of the story, however, taking place in England. As usual there wil be two complete performances, one at seven and the other at nine thirty.

THE B-W. ROAD DRAW TOURISTS

By Fred Spalding.

"Better late than never," is a good old saw, which is particularly applicable here at the present time. We may not be getting as many tourists as we had looked for this year, but this is something we can't control. The bad roads reports have gone all over the country and up to the last week, the greater number who have come in have come through Kingsgate and gone north from Cranbrook to Banff and then backtracked again.

Better weather and a corresponding betterment in the roads east of Fernie are now improving touring conditions, and by far the largest proportion of tourists with whom I have spoken during the last week are simply making the Circle Trip and all have spoken very highly of it, especially of the section through the Fernie district. They all have said they would boost it when they got back home.

Last week Douglas Shealor, the manager of the Auto Club of Washington, called up to see me and get full particulars about this section. He is mapping out all the country between Seattle and the Circle Tour and their club will be supplied with sectional strip maps. He said that he was more favorably impressed with the roads and scenery through here than in any other part he had seen on his long trip and assured me that when he got back to Seattle he would let all their members (76,000 of 'em) know about it and that we could look for a very big influx of Washington cars during August and September. He asked me for an article on the Crow's Nest Pass and the loan of some of our cuts. I supplied him with them and they will appear in the July 29th issue of their magazine.

Being personally acquainted with Mr. George Grant, the manager of the Touring Bureau of the California State Auto Assn., at San Francisco, I wrote him some time ago in respect to the reports made by several Californians, concerning the floods and state of Alberta roads and told him how unusual the condition was, and that by the time my letter reached him the roads would all be in passable condition again. I also asked him to instruct the managers of their twenty branch offices to recommend to their people to be sure to take in the country between Cranbrook and the Frank slide. His reply follows:

San Francisco, July 18, 1923.

Dear Mr. Spalding:

Please accept my thanks for your good letter of recent date, and I might say that I not only have individuals come in complaining bitterly of road conditions in your section, but have received many letters also. Having been in this game for 8 or 9 years and having to meet the same conditions in our own State, especially in our mountain section, and in Nevada, these reports did not make much impression on me, as no one can forsee what nature has in store for us.

I take pleasure in advising that yesterday I wrote all of our branch offices, advising them of the conditions now existing in your section and that the weather is now settled, therefore, they should have no hesitancy in routing motorists your way.

May I ask that you kindly send me one thousand of your official hotel and garage lists and we will be glad to distribute them to our branches with instructions to get them into the motorists' hands making that trip.

Assuring you that we are one thousand per cent. for you,

Very truly yours,

(Sgd) Geo. S. Grant.

Mgr. Touring Bureau,

California State Auto Assn.

SYDNEY MINERS' STRIKE IS OVER

SYDNEY, N.S., July 23.—Miners in this field voted at week-end meetings to return to work. It is expected the mines will open Tuesday.

HALIFAX, July 23.—R. M. Wolvin, president of the British Empire Steel corporation, was in Halifax yesterday en route to Cape Breton. He refused to make any statement on the strike situation.

Mr. Wolvin was accompanied by Sir Newton Moore, of London, and G. L. Stone, of Boston, both directors af the corporation. They are making on investigation tour of the company's property.

SYDNEY, N.S., July 23.—"Moscow Jack" MacDonald, emissary of the Workers Party of Canada, has been released on $2000 bail on a charge of uttering sedition at a recent strike at Sydney Mines.

35 SPECIFIC DEMANDS BY HARD COAL MINERS IN U.S.

ATLANTIC CITY, July 23.—With only five weeks remaining in which to agree upon a wage contract perpetuating peace in the anthracite coal industry, four union leaders and as many mine operators gathered here today to renew negotiations interrupted ten days ago to permit the miners to attend a district convention at Wilkesbarrie.

While there are 11 paragraphs in the miners' demands, the operators assert they embody 35 specific demands.

The operators have agreed to abolish the 12-hour day where practicable and have agreed in principle to the elimination of what the miners contend is unjust dockage.

Of the demands contested, those considered the most important are:

First, calling for an increase of 20 per cent. in wages for miners paid by the ton, and $2 a day more for straight time workers; second, the union's insistence upon a two-year wage system—a prime factor in the soft coal strike last year.

SWEET GRASS WELL COMES IN

A large number of Fernie people interested in the McDonald well in the Kevin-Sunburst Field will be pleased to learn that oil has been struck. The Great Falls Leader contains the following report from Shelby, Mont.:

Shelby, July 24.—One of the biggest wells in the Kevin-Sunburst field was brought in late Monday afternoon by D. A. McDonald in the Sweet Grass-McDonald well No. 2 in SW¼-NE¼ SE¼ 4-32-2 west. With the drill barely penetrating the sand the oil rose in the casing 800 feet in 20 minutes. Drilling was stopped at once and nothing further was done until today. This morning the well broke out as a gusher and was going over the top in heads, clearing the crown block eight times in 20 minutes, and being estimated at 1000 barrels or better by J. E. Loreman, geologist of the company.

L. C. Stevenson, president of the Sunburst Oil and Gas saw the well this morning and pronounced it one of the big wells of the field, rating it anywhere from 500 barrels up. The well is an offset to the Shoshone Oil company well, and is six miles south of the Ohio group. The coming in has caused much excitement here and oil promoters are much interested because of the showing.

The sand, in the Ellis formation, was struck with an 8-inch hole, the casing being 290 feet above the bit. A string of 6-in casing will be run at once and a packer set to rest the smaller string on. The well will then be drilled into the sand as far as advisable, and placed on the pump. The well was located by J. E. Loreman, field manager and geologist for the company, who will have charge of its completion. The drilling was done under contract by S. C. Ferdig, who has drilled in the Wyoming fields for some years.

Mr. Loreman says the sand is a true oil sand and one of the best he has ever seen. He estimates the production of this well at 1000 barrels or better when completed and believes the sand will prove to be thicker than in the north end of the field. The oil is greenish and its gravity is estimated at 36 to 40 Baume. D. A. McDonald, who organized the Sweet Grass Oil Company, and is the leading spirit in the company, is an experienced oil man. Under his direction the Highland Oil company, at Roundup, was formed to drill in the Devil's Basin, and while the company, because of internal complications, did not complete the well, it is now being drilled by other parties. He was also interested in several oil properties in the Cat Creek field and has held considerable acreage in this field.

His company owns 80 acres surrounding the well and will proceed to drill another well within 10 days, the location selected being one offset to the north of the present producer. Three 250-barrel tanks are already on the ground in readiness for the pumping test and several more are to be erected. The pipe line is but a mile from the property and it is to be connected at once and the oil marketed. Mr. McDonald is being congratulted on his perserverance in drilling the Montana fields until he had produced a well which may equal the best in the Shelby field and certainly one which will rate among the biggest producers in Montana.

This company will erect a refinery to handle its own oil.

FERNIE 5, WYCLIFFE 2

Coming from behind a two run lead gained by Wycliffe in the second inning of their game at Wycliffe, Sunday afternoon last, Fernie forged ahead and won out by a score of five runs to two, thus maintaining their lead in the second half of the league race.

Pennington started out in rampant form and in the first two innings Fernie batters did not reach first base but they got to him strong in the remainder of the game, garnering in thirteen hits off him, three of them being for extra bases.

Ault pitched a splendid game and it was only in the second inning that Wycliffe were able to tally. He only allowed seven, well-scattered hits and was rarely compelled to exert himself.

Wycliffe opened the scoring in the second inning when Rogers led off with a single and was sacrificed to second by Whitehead, then scored on Clarke's single. Clarke scored when a couple of errors allowed runners to reach their bases safely. Fernie opened their scoring column in the third frame, when with two men out, Ault made a three base drive and came home on Hovan's single. McTeer scored Fernie's tying run in the next frame when he was given a walk and came home on Ruschall's single and Trimble's wild heave to the plate. In the fifth Fernie took the lead, Ault and Hovan scoring when both singled, and an error by Trimble paving the way for Barger to drive them home with a single. Leading off in the sixth, Ruschall scored the fifth run for Fernie when he connected for a three base hit and came home when Trimble let the throw-in go through him. From then on, only three men on both sides reached first in safety, both pitchers holding the game well in hand.

Box Score—

Fernie—	AB	R	H	PO	A	E
Hovan, lf	5	1	4	0	0	1
Bishop, 2b	5	0	1	3	1	0
Barger, 1b	4	0	2	9	0	1
McTeer, c	3	1	1	8	0	0
Shand, 3b	4	0	0	0	2	0
Ruschall, cf	4	1	2	5	0	0
Wilson, ss	4	0	1	1	5	2
Colton, rf	4	0	0	1	0	0
Ault, p	4	2	2	0	2	0
	37	5	13	27	10	4

Wycliffe—	AB	R	H	PO	A	E
Crowe, 2b	5	0	1	0	1	0
Bamford, lf	5	0	1	3	0	0
Trimble, 3b	5	0	0	3	2	2
Piper, cf	4	0	1	0	0	0
Rogers, c	4	1	1	7	0	0
Clarke, 1b	4	1	2	12	1	1
Pennington, p	3	0	0	4	0	0
Staples, rf	3	0	1	1	1	0
	37	2	7	27	12	3

Score by innings—

Fernie	001	121	000	—5
Wycliffe	020	000	000	—2

Summary—

Sacrifice hits: Whitehead; Two base hits: Hovan; Three base hits: Ault, Ruschall; Struck out: by Ault, 6; by Pennington, 6; Base on balls: off Ault, 1; off Pennington, 1; Passed ball: McTeer; Wild throw: Trimble; Left on Bases: Fernie 6; Wycliffe 8; Earned runs: Fernie 2, Wycliffe 1; Time of game: 1 hour 40 minutes; Umpires: Crough and Fairwell.

Lumberton maintained their tie position in the new league race on Sunday afternoon, by defeating Kimberley at Kimberley in a hard fought game which went eleven innings, the final score being 3 runs to 2 in favor of the Lumberton club.

The league standing to date:

	W.	L.	Pct.
Fernie	2	0	1000
Lumberton	2	0	1000
Kimberley	0	2	.000
Wycliffe	0	2	.000

The league will assume a definite standing after Sunday next, the two leaders, Fernie and Lumberton meeting at Lumberton, while the two tailenders, Kimberley and Wycliffe, play at Kimberley. The Lumberton team has been strengthened considerably by the capture of "Scotty" Mitchell, from the defunct Cranbrook club, and Fernie will have to exert themselves to their utmost if they are to continue in the lead.

OLIVET BAPTIST CHURCH

Lord's Day—

7:30 p.m.—"A Troubled Heart and its Cure." Rev. Campbell will speak at both services.

GRIM BATTLE IN "BURNING SANDS"

One of the best catch-as-catch-can fights to be seen on the screen in some time is a feature of George Melford's new Paramount production of "Burning Sands." There were no rehersals of the scene in which Milton Sills and Robert Cain "go to the mat," but it had to be taken several times, as usual. Both men were in prime training, and hardened habitues of the Legion Stadium, after seeing the film battle, remarked that the fight was one of the most realistic ever seen on the screen.

Wanda Hawley and Mr. Sills are featured in "Burning Sands," which will be shown at the Orpheum Theatre Friday and Saturday. In the story, Miss Hawley is an English girl who falls in love with Daniel Lane, a hermit who lives alone on an oasis in the desert. This is the part portrayed by Mr. Sills. In the course of the action, Barthampton, a renegade Englishman, plans to abduct the girl and is prevented by Lane from executing his design after a terrible battle in which Barthampton is killed.

The picture is filled with thrills and there is a capable supporting cast including Jacqueline Logan, Louise Dresser, Winter Hall and others.

THE LATEST DESPATCHES

Montreal — Greetings to President Harding on behalf of the Government and people of Canada were conveyed by a telegram despatched by Premier Mackenzie King tonight, on the occasion of the official dinner held in Vancouver in honor of President Harding.

London—Bishop David of Ipswich has been appointed to succeed Dr. Chavasse as Bishop of Liverpool.

Ottawa—Canadian import and export trade for the six months ending June, compiled by the Dominion Bureau of Statistics, shows very important advances over 1922 although still far below the figures for 1921.

Toronto—With the recovery today of 28 fur coats, valued at $6000, and the arrest of five men, three of whom are charged with shop-breaking and two with vagrancy, the police believe they have rounded up the gang responsible for a number of the recent fur store robberies in this city.

New York — Two policemen were shot and killed tonight by the occupants of a taxi cab at Sixty-Fourth Street and Second Avenue, a short distance from the new society colony estblished by leaders of New York's "Four Hundred."

New York—Johnn Dundee won the world's featherweight championship here tonight from Eugen Criqui, decision given on points in 15th round.

London—English critics of Foreign Affairs disappointed in French attitude and emphasize dangerous developments in Germany through Communist disorders and rumors that the Crown Prince is organizing coup d'etate. British trade last month suffered slump through uncertainty of situation.

New York—Marks sold today for ninety cents a million.

Garden City, N. J.—Two aviators put up record when they fly from Chicago during night.

El Paso, Tex. — Rene Newman, rancher, shot by Mexican bandits after ransom demanded was refused.

Stockholm—Toronto chosen as next meeting place of Baptist World Alliance.

Wellington, N. Z.—Government will call for tenders in Canada, United States and Great Britain for construction of railway linking up Tauranga and Auckland.

Ottawa — Canadian Fruit Trade Commission in Europe reports crop prospects there are poor and Canadian apples will be much in demand.

Quebec—Heavy and welcome rains put out forest fires. Total damage from two great outbreaks this year placed at $10,000,000.

Atlantic City, N.J.—Coal operators and miners fail to reach agreement in conference here and strike talk becoming general.

Montreal—Sawed off shot gun left behind by Toronto bandits sold by local firm Monday. Police obtain valuable clue.

Paris—France will not change its attitude re reparations but will reply to Premier Baldwin's note in friendliest spirit.

Ol' Joe Jeffries sez: "Sum folks visit the fortune teller more often than the receiving teller."

PUBLIC WORKS ACTIVITIES

Victoria — The following public works have been authorized in the past week by Hon. Dr. W. R. Sutherland for the various electoral districts:

Cariboo—Construction of uncompleted section of Cariboo road, northwards from Quesnel, by day labor to extent of $15,000; repairs to Slough Creek, Antler Creek and Kibble Creek bridges.

Cowichan—Repairs to Cherry Point Garnett road bridge.

Columbia—Mining roads at Bugaboo Creek and head of south fork of Horse-thief Creek to Tatler group.

Cranbrook—Repairs to Kingsgate, Goatfell, Curzon and Aldridge bridges to cost about $3285.

Esquimalt—Renewal of Thetis Lake road bridge built in 1910.

Fort George—Bridge at Deep Gulch.

Fernie—Repairs to bridge on Interprovincial bridge damages by floods in the Crow's Nest district.

Kaslo—South Fork of Kaslo Creek road to cost $1000.

Kamloops—Reconstruction of Fadear, Goose and Lindquist Creek bridges; raising of Spring Creek bridge at cost of $1050 and two new bridges at Dodds Creek.

Newcastle—Work on old Rhinehart mineral trail.

Omineca—Hudson's Bay Mountain road to cost $10,000 to open up producing mines, half cost of $1500 road from Telkwa Collieries to Hunter Basin road.

Revelstoke—Road work at Solsqua, Erickson road, Mihulk road and Clough settlers road to cost $1750.

Similkameen—New floors and repairs to eight bridges at Shingle Creek; $500 for surfacing highway on Osoyoos Hill.

Slocan — Work on Denver-Three Forks road, renewal of Red Mountain road and Columbia River bridge No. 45 and re-decking of No. 3 bridge on New Denver and Silverton road.

Trail—$5000 for work on Nelson-Ymir road, $1600 for work on Castlegar-Trail road at Blueberry and Kinnaird, diversion of Kootenay River road between Taghorn and Slocan Junction, repairs to three bridges at Pass Creek, road to Molly Gibson mine to wharf on Kootenay Lake, $900 for work on Trail-Sayward road.

Yale—Gravelling the Kamloops-Merritt road at Quilchena by day labor to cost $3000; new bridge at Hunt Creek; repairs to ten bridges at Jones and Hunts Creek to cost $3300; repairs to Lindley Creek, Ten Mile Creek and Thyme bridges.

All of the above works are to be carried out by day labor under the supervision of the district engineers.

Vancouver—Claiming that official returns show that 34 per cent. of all business failures in Canada are due to "lack of capital," The Hook, the new weekly, edited by J. S. Cowper, ex M. P. P., is this week attacking the Canadian banks who are engaged in the fight with American banks to lend millions to Turkey for development.

The writer claims that the whole of the West is suffering from a lack of banking accomodation and cites several instances, at the same time reminding the banks that the Bank of Montreal lost millions in Mexico, the Royal Bank lost millions in sugar speculation in Cuba and that the Union Bank recently lost millions in gambling in Belgium francs.

Victoria—War on the Senate and on the export liquor houses has been declared by Attorney-General Manson, who promises lots of action in the coming fight.

Vancouver — Belief that John C. Jones, the B. C. Electric employee, who was murdered by a Chinaman on Main Steet last Wednesday, was mistaken for a man whom the "drug ring" wished to have done away with is expressed in police circles. Jones was a well-behaved and inoffensive, young maried man, but is almost the 'double' for a man well known in the underworld as being connected with the dope traffic. Frank Lyons, lawyer, for whom the Chinese, Chong Sam Bow, had worked as a cook at one time, has been retained for his defence.

New Westminster—Hon. Dr. J. D. McLean, provincial secretary, laid the cornerstone of a new addition to the Mental Hospital buildings at Essondale, last week. The new building is to cost $600,000 and will be used for the housing and treatment of acute cases. It is expected that the building will be completed by next March.

Victoria — Because she had 8000 cases of liquor on board for the Liquor Control Board and over 30,000 cases for the export houses in Vancouver, the Blue Funnel liner, Knight Companion, would not risk calling at San Francisco, on her way north this trip. She kept outside the three-mile limit all the way.

Vancouver—The whole of the tenth floor of the Hotel Vancouver, used by the Prince of Wales when here, was reserved for President Harding and his suite.

Orpheum Theatre, Wednesday and Thursday, August 1st and 2nd.

Vancouver—Revenue on the P. G. E. is increasing and expenses are declining month by month, and a bright and encouraging report will be given by the time the Legislature meets, stated Hon. Dr. McLean, minister of railways, who states positively that the line will be abondoned.

1922 BUSY YEAR IN OIL PROSPECTING

During the year 1922 boring operations for the discovery of oil and gas were conducted in different districts in the Province of Alberta, in the North West Territories, the Railway Belt of British Columbia and some boring was done in the provinces of Saskatchewan and Manitoba.

Up to the end of the last calendar year, there had been about 230,000 feet of drilling done in Alberta alone. The results have been the discovery and development of one of the greatest gas fields of the world, the output of which amounts to 180,000,000 cubic feet per day, and is used for domestic and industrial purposes in many of the towns and cities of southern Alberta, particularly in the cities of Medicine Hat and Calgary.

In addition to the gas wells there are six wells producing oil in Alberta, all situated in the southern Alberta foot-hills area, and one well in the North West Territories. The output from the wells in southern Alberta is not large, but it has been found to be profitable to operate them.

1923 is also a busy year. Successful drilling in Northern Montana has caused the formation of a number of companies who are drilling on the Canadian side of the boundary.—Saturday Night.

One reason that Shakespeare is making such a hit on Broadway is that he doesn't charge any royalties.

Amazing Facts Given By Mrs. Ruth Thornton

"Since taking Tanlac I've regained the thirty-five pounds I lost while sick and five pounds besides,' declared Mrs. Ruth Thornton, 717 Asumption Street, Windsor, Ont.

"At the time I got Tanlac a case of the 'flu' had brought me down to where I was only a shadow of my former self, and so weak I could hardly walk across the floor. My stomach caused me more misery than words can tell. My nerves were so completely unstrung I just dreaded to go to bed, for I couldn't sleep. Even to sweep the floor was a burden to me.

"But Tanlac has made me so well and strong my housework is like play to me. My appetite is enormous, my food digests perfectly, and I sleep the whole night through and never hear a sound. My friends tell me I am the picture of good health. I never can praise Tanlac enough for the good it has done me."

Tanlac is for sale by all good druggists. Accept no substiute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

AN ELECTRIC LAUNDRY ABOARD SHIP

(1) A first-class smoking room on the "Empress of France."—(2) A group of the laundry staff of the same liner.—(3) Corner of the finishing department.

IT has been said that the modern ocean liner is a floating hotel, and this is probably the best description that can be given. A modern hotel is a city in itself, and a modern ocean liner of the type of the Canadian Pacific "Empresses" is certainly no less. When a couple of thousand or so of passengers are cut off from land to spend a week or more on the ocean, they must have every convenience and comfort that land can provide. The ship must be self sustaining in every particular. In this respect Canadian Pacific ships are as complete as modern invention can make them, and whether their trips extend for one week, or six weeks as does the cruise of the Mediterranean which the "Empress of France" made this winter, or even for three months as in the case of the cruise around the world to be made by the "Empress of Australia" this year, nothing is lacking to ensure the complete happiness of all on board.

As an instance of the way in which modern liners are equipped, the newly installed laundry of the "Empress of France" is well worth comment. It cost $25,000 and its complete plant and large staff of workers make it probably the finest of its kind afloat. In addition to the large amount of work undertaken for passengers at shore prices, it deals with 100,000 pieces of ship's linen per week. This new department is under the management of G. Dawe, junior, who controls its staff of six men and thirty women. Three washing machines form part of the equipment, and one of these, the largest ever fitted to a liner, is capable of dealing with 3,000 pieces of linen at a time, each piece being subjected to the entire washing process without removal. There is also a huge ironing machine which will iron and dry sheets at the rate of 400 per hour after they have been passed through a power wringer. This machine is operated by a team of nine girls. The higher class of laundry work is done by skilled ironers with press machines and electric irons, while shirts and collars, etc., are starched and finished by machines specially fitted for the purpose. All the machinery is electrically driven, and there are elaborate electrical controls for starting, stopping and regulating the machines. In the case of the washing machines, electric motors are fitted to the top of them, controlled by an electric timing device which regulates the revolving and reversing of the inside cylinders.

The oil-burning "Empress of France" has a length of 571 feet, beam 72 feet, depth 42 feet, and gross tonnage of 18,481. The speed which made her such an asset to the navy during the war is still maintained, and Captain John Gillies, her commander, is the hero of many an exciting race to port. Once aboard the "Empress" one has nothing to do but enjoy life while awaiting the end of the journey which usually arrives all too soon. She is a beautifully appointed ship with seven first class public rooms, including a lounge, smoking room, card room, and library. Provision is made in the second-class quarters for three public rooms, and spacious deck space affords all passengers more than sufficient room for open air games and exercise. Her steerage accommodation is in many ways about equal to the cabin accommodation of Atlantic liners of a few years ago, and her first and second-class provides every comfort that has been devised.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

Here and There

Galt, Ontario. — It is announced by the Canadian Pacific Railway that among the improvements planned for 1923 to company property is the building of a steel water tank to hold from 60,000 to 100,000 gallons at Guelph Jct.

Ottawa. — A constantly growing appreciation on the part of Canadians of their national parks, evidenced by the continued increase in the number of visitors in the last year, is emphasized in the report of National Parks Commissioner J. B. Harkin. Visitors to all Canadian national parks during the year in question were estimated at 166,000, of whom more than 71,000 went to Banff. Foreign travelers to the larger parks were about 65,000. From an economic point of view, on a basis of $300 spent by each foreign visitor while in Canada, the national parks accounted for an indirect revenue of some $19,500,000, which amounts to about $2.22 per capita of Canada's present population. Other revenues from the parks, in the way of timber sales and concessions, accounted for $72,000. Total appropriations for the parks last year were $966,000.

Owen Sound. — Superintendent William Bethune, of the C. P. R. lake steamships has announced the officers for the steamers for the coming season. All last year's officers will be in their place without any change. The officers are as follows: S. S. Assiniboine—James McCannel, master; A. A. Cameron, chief engineer; George Bethune, purser; D. A. Sutherland, chief steward. S. S. Keewatin—M. M. McPhee, master; C. Butterworth, chief engineer; C. S. Miers, purser; E. R. McCallum, chief steward. S. S. Manitoba—F. J. Davis, master; George D. Adams, chief engineer; George H. Fisk, chief steward; John E. Laine, purser. S. S. Athabaska—Murdock McKay, master; George S. Rae, chief engineer. S. S. Alberta—John McIntyre, master; William S. Struthers, chief engineer.

Winnipeg. — In connection with movement of grain to Vancouver from September 1, 1922, up to and including February 21st, the Canadian Pacific Railway has delivered at Vancouver a total of 6,768 cars of grain representing 9,894,816 bushels.

During the same period there has been exported from Vancouver to the Orient 1,284,550 bushels and to the United Kingdom 10,093,620 bushels, or a total of 11,378,170 bushels.

During the same period last year, the Canadian Pacific Railway delivered at Vancouver a total of 3,461,952 bushels of grain, and there was exported from Vancouver during the same period last year 3,200,000 bushels, 1,220,000 of which were exported to the Orient and 2,080,000 to the United Kingdom.

In addition to this grain, which has already been exported from Vancouver so far this season, there is in store in elevator at that point 942,823 bushels, according to a statement of E. D. Cotterell, Supt. Transportation, Western Lines.

* * *

A married man may fancy the radical bathing suits in a way, but did you ever notice he always picks out the old fashioned kind for his wife?

* * *

Practical

Soon after the first baby was born, a certain Fernie man's wife went upstairs one evening and found him standing by the side of the crib and gazing earnestly at the child. She was touched by the sight, and tears filled her eyes. Her arms stole softly around his neck and she rubbed her cheek caressingly against his shoulder. He started lightly at the touch. "Darling," he murmured dreamily, "it is incomprehensible to me how they can get up such a crib as that for 99 cents."

* * *

Get Out The Field Glasses

She reached below her dimpled knee
Into her rolled down stocking,
And there she found a roll of bills;
Ah, me; 'twas sweetly shocking!
"Why don't you keep it in a bank?"
Enquired a nosey prier.
"The principal is the same," she said,
"But the interest here is higher."

Admired Hair Is Shampooed This Way

Hair that gleams with life and color

Women admired and envied for their richly beautiful hair know this secret. Hair specialists agree that it beautifies hair.

Olive oil for the shampoo!

It has been used since history began For its gentle cleansing action removes all dirt and oil from scalp and hair. Dandruff is dissolved and washed away. And the bright sheen of life and color is greatly increased.

It leaves hair fluffy—never dry or brittle. It leaves hair silky and pliant as a baby's—with the inimitable gloss so much desired.

Thousands of women now regularly treat their hair this beneficial way. They use PALMOLIVE SHAMPOO—olive oil in its most perfect form for the shampoo. Easy to use. And very economical.

You can get full-sized bottles at your dealer's. Or, by mailing coupon, you may have a 15c trial bottle free. Get some at once. Use it. See the results that follow even one shampoo.

J. Jerue returned on Sunday from a short busines trip to Spokane.

Miss Dorothy Graham is visiting Mr. and Mrs. Baldrey at Mud Lake.

Fernie Beauty Parlour, for care of your hair, face and nails. Combings made up. 70 Dalton Ave, Phone 313.

Harold White purchased a Durant Star car from Wm. Johnston this week.

Mr. A. F. Anderson, who has been spending a couple of weeks in the city, returned to Spokane today.

Keith Colton, of Calgary, is spending the holidays with his mother in Fernie.

The City and Provincial Police should keep an eye on car drivers who are in the habit of getting under the influence of liquor.

Dave Black visited Jack Volume at Tanglefoot on Sunday last. He says Jack is looking fine and is accumulating a bank roll that would choke a dog.

A cow disputed the road with a local car driver, near Cokato, on Sunday last. Both the cow and the machine are temporarily in the hospital.

Mr. and Mrs. W. Baldrey and Mr. and Mrs. J. J. Harrington camped for several days this week at Mud Lake, near Elko.

Mr. and Mrs. Searle, parents of Mrs. Appleyard, left this morning for their home in Minneapolis and will visit Banff and Lake Louise on the way. Mr. and Mrs. Appleyard accompanied them as far as Nelson.

The Junior Baseball Team will give another dance in Ingram's Hall on Saturday night, July 28. Three piece orchestra. Ladies free; gentlemen 25c; 10c per dance.

A dance will be given in Ingram's Hall on Saturday night by the Junior Baseball team. Three piece orchestra. Ladies free; gentlemen 25c; 10c per dance.

There will be a special meeting of the Ancient Order of Foresters in the Oddfellows Hall on Monday night, July 30th, at 7 o'clock. Business important.

Mud Lake is apparently the ideal spot for camping and swimming, Fernie being practically deserted every Sunday and Wednesday, in favor of this spot.

Mrs. George Murray returning from an extended visit to the Old Country, stopped off here for a couple of days this week. She left Thursday morning for Spokane.

A motor bus line will be started shortly between Cranbrook and Fernie, taking in Elko, Bull River and Ft. Steel on the way. Cars will leave Fernie at 3 p.m. and Cranbrook at 8 a.m. The new line will be known as the Arrow Line.

The timber industry in British Columbia has been placed on a sound basis. For the first six months of this year the timber sales amounted to 1,206,936,927 board feet, as compared with 878,026,789 feet for the first six months of 1922.

Thirty young ladies belonging to the Church of England are camped at Morrissey Mines, near the old school building and are having a delightful time. The camp is under the supervision of Mrs. E. H. Wood and Miss M. Corsan. It will last one week.

British Columbia is caring well for her mentally incapacitated. Last week Hon. Dr. MacLean, provincial secretary, laid the corner stone of the new mental hospital at Essondale, a structure which will cost upwards of $600,000 and be one of the finest institutions of its kind on the continent.

British Columbia will have splendid advertising through the Empire Exhibition, to be held next year in London, the Capital of Empire. Exhibits from the departments of mines, lands and forests, agriculture and fisheries will acquaint all who view them with the wonderful opportunities of the Pacific Province.

All cars taking part in the Knights of Pythias picnic to Morissey on Sundy, July 29, are requested to be at the Oddfellow's Hall by 9 o'clock in the morning. Members and visiting brethern to be at the Hall by 8:45. A nominal charge of 50c will be made for adults, children under 16 free. All members donating refreshments are requested to bring their donations to the Hall in bulk by 7 o'clock the Saturday night previous.

Tourist traffic to the east has been practically cut off by the rotten condition of the Alberta roads between Cowley and Crow's Nest and it is openly stated that the Minister of Public Works, Alex Ross, is being influenced by Calgary business men to leave it in that condition so that tourist traffic will be diverted from the Crow route via Calgary and Banff. Whether this is true or not, little if any work is being done to put the roads in shape. A boycott of Calgary by busines men along the Crow would bring quick results. That is the only way to talk to the hog town interest in that city.

The Rotary Club luncheon, held at the Park yesterday, was a very pleasant affair. Those present made a particular survey of the wooded parts with a view to making suggestions for the location of the swimming pool. Mayor Henderson was present and the matter is being taken up with the Council urging them to establish a temporary pool at once. There are many spots where a temporary pool of large dimensions could be made with the spending of a couple of hundred dollars and as the Rotary Club have the Mayor's promise to do something along this line the kiddies may look forward to a real swim within a few days.

FIVE YEARS' AGONY ENDED

When He Took "Fruit-a-tives" For Rheumatism

The Medicine Made From Fruit

There can be no doubt that "Fruit-a-tives" is the long sought remedy for Rheumatism and Lumbago. From all over Canada come letters testifying to this fact.

Mr. John E. Guilderson of Parrsboro, N.S. writes: "I suffered badly with Rheumatism for five years—tried different medicines—was treated by doctors in Amherst—and here at home—but the Rheumatism came back.

In 1916, I saw an advertisement for "Fruit-a-tives" and took a box and got relief, so I took them for about six months and the Rheumatism was all gone and I have never felt it since".

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

PROVINCIAL BOARD OF HEALTH

REGULATIONS GOVERNING CAMP-GROUND SANITATION

The following regulations shall apply to any city, municipality, rural municipality, institution, person, firm or corporation, operating, maintaining, or offering for public use within the Province of British Columbia any tract of land on which persons may camp or picnic either free of charge or by payment of a fee:—

Section 1. A water supply of sanitary quality shall be provded in ample quantity to meet all requirements of the maximum number of persons using such tract at any time. Said water supply shall be easily obtainable from its source or from faucets on a pipe distributing system within a distance of not more than 300 feet of any camp or picnic spot within such tract.

Section 2. Any water considered unsafe for human consumption in the vicinity of such tract of land, to which campers or picnickers on said tract may have access, shall be either eliminated or purified, or shall be kept posted with placards definitely warning persons against its use.

Section 3. Fly-tight privies or water-flushed toilets shall be provided and shall be maintained in a clean and sanitary condition. Separate toilets for men and women shall be provided, one for each 50 men, and one for each 50 women, or fraction thereof, of the maximum number or persons occupying such tract at any time. No camp or picnic spot within such tract shall be at a greater distance than 400 feet from both a men's and a women's toilet. The location of all toilets shall be plainly indicated by signs.

Section 4. Supervision and equipment sufficient to prevent littering of the ground with rubbish, garbage, or other refuse shall be provided and maintained. Fly-tight depositories for such materials shall be provided and conspicuously located. Each and every camp or picnic spot on said tract shall be within a distance of not over 200 feet of such a depository. These depositories shall not be permitted to become foul-smelling or unsightly or breeding places for flies.

Section 5. The method of final sewage or refuse disposal utilized in connection with the operation of any camp or picnic ground shall be such as to create a nuisance.

Section 6. At least one caretaker shall be employed by the management to visit said tract every day that campers or picnickers shall occupy said tract. Such caretaker shall do whatever may be necessary to keep said tract and its equipment in a clean and sanitary condition.

Section 7. The management of every public camp or picnic ground shall assume responsibility for maintaining in good repair all sanitary appliances on said ground, and shall promptly bring such action as is necessary to prosecute or eject from such ground any person that wilfully or maliciously damages such appliances or any person that in any other way fails to comply with these regulations.

Section 8. Each and every owner and lessee of any public camp or picnic ground shall be held responsible for full and literal compliances with these regulations.

Section 9. Failure on the part of the owner or management of any camping ground to comply with the foregoing regulations shall be deemed sufficient cause for declaring the premises a public nuisance under the provisions of the "Health Act," R. S. B. C. 1911, Chap. 98.

Section 10. These regulations shall be printed and kept posted in conspicuous places on every public camp or picnic ground by the management of such ground.

Issued by the Provincial Board of Health, British Columbia. j27|1

FRIDAY & SATURDAY, JULY 27 & 28
"BURNING SANDS"
With Wanda Hawley, Milton Sills, Robert Cain, Jacqueline Logan
A flaming desert romance, made on the same lavish scale by the producer of "The Shiek."
Lloyd Hamilton in "The Steeplechaser" Pathe News

MONDAY & TUESDAY, JULY 30 & 31
Katherine MacDonald, Mitchell Lewis and Bryant Washburn in
"THE WOMAN CONQUERS"
When fate lifts a woman out of luxury and hands her a new deal in the raw of the Hudson Bay country—and she makes good—that's "The Woman Conquers."
Buster Keaton in "The Paleface" 2-Reel Western

WEDNESDAY & THURSDAY, AUG. 1 & 2
JACKIE COOGAN in "DADDY"
EXTRA SPECIAL EXTRA SPECIAL
Jackie Coogan's moving performance in "Daddy" puts to shame some of his more mature and far less able confreres of the silent drama. Taking into consideration the extreme youthfulness of this tried and proven little player, his understanding of human nature and his ability to express a wide range of emotions are all the more remarkable. In every scene of "Daddy" he plays the part he is called upon to play, making one forget the actor and become absorbed in the character he is depicting. This, of course, is or should be the aim of all acting that is worthy of the name of art, and when this aim is accomplished so effectively by one of such tender years as Jackie Coogan it gives added significance to the saying that actors, like poets, are born, and not made.

LOCAL & GENERAL

Dr. Garner motored to Cardston early in the week.

W. R. Wilson has been at the Coast this week on business.

Mr. and Mrs. V. Hillington, of Blairmore, were the guests of Mr. and Mrs. John Biggs over the week end.

Miss Ada Harper, having returned from Calgary, is prepared to take pupils for piano..

H. R. Huntington, who has been ill for a couple of weeks, is back on the job again.

Miss C. B. Walker, matron of the local hospital, is spending her summer vacation at Aberdeen, Washington.

Cy Glover and Roy Kirkpatrick will make the Banff-Windermere trip next week.

Engineer Hayne has a gang of men at work on the road into McBain's Lake and it is now quite passable.

The Sunday School of the United Church expect to hold their annual picnic on Wednesday, August 8. See further announcement next week.

Many Fernie people are making daily trips to the berry patches near Hosmer. The crop this year is a good one.

Mr. and Mrs. Wm. Bird, of Blairmore, motored through Fernie yesterday enroute to Portland where they will spend the holidays.

Miss Mabel Cox, who is at present in training at the Calgary General Hospital, after spending a few days with her sister, Mrs. J. G. Hanna, returned to Calgary Thursday evening.

Mr. and Mrs. A. Baker, accompanied by their son, Tom, and Miss Anna McPhee, returned to the city Tuesday afternoon from a two weeks camping trip through the Banff-Windermere Road.

In compliance with a recent ruling of the Treasury Department of the United States, shippers should, in future, note upon their Consular Invoices whether or not the Canadian 6% Sales Tax is included in the declared value.

Playing in a Crow's Nest Pass League football match at Coal Creek last Sunday afternoon, Coal Creek obtained full points by defeating Blairmore two goals to nil. The game was played under a sweltering sun and was consequently somewhat listless. Corlett, Coal Creek's young outside left, scored both goals.

According to telegraphic advice received by the Secretary of the Fernie football club yesterday, Coleman have been ordered to play the Peacock Cup tie game between Coleman and Fernie, at Fernie on Sunday, July 29th. A neutral referee is being sent to handle this game. This date was previously offered by the Fernie team to Coleman for this match, but they stated that they could not play in Fernie on the date mentioned. The action of the donors of the Cup in ordering the game played, however, may bring Coleman here on Sunday, but definite information cannot be obtained until too late for publication, therefore, dodgers will be posted throughout the city, immediately upon receipt of Coleman's decision, to notify the fans, whether to except this game or not. A general meeting of the Fernie Football Club is to be held in the Fernie Literary and Athletic rooms at eight o'clock this evening.

Magistrate Stenson had a most distressing case before him at Waldo, yesterday, when Mrs. A. B. Anderson, charged with the wilful neglect of her family of five small children, was sentenced to one year hard labor. The case, which has been under Provincial Police notice for some time, was one of the worst that has come up in this district. The nurse and Constable Brown, who made the investigation swore to the absolute filthy condition of the house and the small children. They were fairly alive with vermin. The father, who has been working at Corbin, was exonerated from blame as he had been sending home over one hundred dollars a month and there was no reason why the home could not have been kept properly. Magistrate Stenson, in passing sentence, gave the woman another chance and it was supended, the Police to make a daily inspection of the home and if there is the slightest evidence of neglect the mother will be taken to Nelson for one year.

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Glaxo Baby Food—$3.00 and $1.60 —Suddaby's Drug and Book Store.

Mrs. Finch, of Spokane, is visiting her brother, Hugh McLachlan.

Arthur Muirhead, of Kamloops, arrived on Tuesday evening to join Mrs. Muirhead, who is visiting here.

Mrs. Jas. Osborne left on the Great Northern Thursday morning to spend a vacation in Seattle.

Lieutenants Evangeline Parker and Gladys Jennings, of the S. A. Grace Hospital staff, Winnipeg, are home on a furlough visiting relatives.

Game Wardens I. J. Brown and G. Thomas left Thursday to map out and mark the boundaries of the Elk Game Reserve.

The thermometer has been hovering around ninety several days this week, but the evenings are delightfully cool.

Mr. and Mrs. Geo. Moses and Miss Hogan motored to Cardston this week to view the new Mormon Temple, which will be closed to visitors after the 15th of August.

Mrs. H. Vanbuskirk arrived the other day to join her husband, who has ben working for some time past with P. Burns and Company here. They will take up residence over the store.

A number of men from Fernie will spend the harvest season on the Prairies helping the farmers. It is expected that 13,000 additional men will be needed in Alberta to harvest the heavy crop.

H. J. (Yonge) Rayner, who came to Fernie from Toronto last fall, is again to make an attempt to capture the middleweight wrestling championship of Canada, now held by Ernie Arthur of Lethbridge, in a title bout to be staged at Coleman next Monday evening. Rayner met Arthur in Fernie last December and was only defeated by the champion after a strenuous match. Since that time Raynor has been undergoing continuous training and will be in the finest shape of his career when he steps on the mat at Coleman on Monday night.

Mrs. J. G. Hanna was the hostess at a farewell party given in honor of her sister, Miss Norma Cox, who has been staying with her for the past school term. A most enjoyable evening was spent by the young people and the time was passed pleasantly in music, dancing and games. The party did not break up until the "Wee Sma' Hours," the guests wishing their friend, Miss Norma, a speedy return. Norma left for her home at Pincher Creek on Thursday evening. The guests included Misses Lillian Dicken, Edith Bonnell, Georgie MacKenzie, Isabel Duncan, Margaret Crossman, Florence Cox, Mabel Cox and Edith Laxton; Messrs. Pete Gordon, Jim Strachan, Nick Smith, Owney Corrigan, Jack Storan and Billy Ash.

PRESS COMMENT

IDEAS AND IDEALS

There is today an insistent demand for leadership. The greatest leadership, as Ingersoll once said, is that of ideas—and ideas are usually ideals. The American people, can never be without them if they will but think, and continue to think of their country in the light of its origin and history. By both it is consecrated to ideals and their service, ideals of the loftiest character. They are of the essence of the nation's life.—**Indianapolis News.**

CAN DO IT NOW

"Premier King," says the Grain Growers' Guide, "did rather well for him in endeavoring to demonstrate that the Fielding budget is really in keeping with the traditional policy of the Liberal party. With one or two more trials Mr. King should be able to demonstrate that black is white, or that blue is yellow, to his own complete satisfaction."—**Farmers' Sun.**

RETALIATION

Up to the present we have given American commerce the most extraordinary freedom in our markets. The Americans have replied by continually raising their customs on British goods, to say nothing of irritating incidentals like this crusade against British ships, and the recent interference with the time-honored customs of our cotton trade. We believe America might respect us a little better, if we acted strictly on the principle of behaving to her as she behaves to us.—**London Morning Post**

INSECTS AND COLOR

The experiments which are being conducted by entomologists here and in Trinidad, having resulted in a theory that certain insects don't like certain colors, are expected to lead to more experiments. In Trinidad stables are often painted blue to ward off mosquitos. House flies don't like blue either, but prefer white or green. In this connection Professor Folsom, of Illinois, made exhaustive experiments with many insects. He discovered that ants, for instance, hate sunlight and violet light, but don't seem able to distinguish between orange and red. Bees, gathering honey, love blue flowers. White butterflies like white flowers and yellow ones seek for yellow blossoms. But no one knows just why these insects do these things; whether from habit or for other reasons.—**London Telegraph.**

BRITAIN IN EGYPT

What we cannot understand is how negotiations should be carried on between the cabinet and the British government on the Indemnity act, of which the nation knows nothing, and why is it not left for parliament to decide. The country cannot, in any case whatever, give the British government rights over the people and their lands. Why does the cabinet give the English a law which they insist upon having before parliament meets? A few days ago the under secretary of foreign affairs said, in reply to Mr. Spoor, that he hoped the Egyptian government would approve the Indemnity act very soon. This means that the negotiations which have been going on for some time are on the point of conclusion, and that the British government hopes the Egyptian government will sign the act. If such is the case, has Egyptian public opinion got no right to know what its government is going to sign? Will the matter remain secret till one morning the law is published and thus we find ourselves faced by an accomplished fact?—**Egyptian Mail.**

THE PASSING OF THE TWELVE HOUR DAY

At a recent conference between the officials of the United Mine Workers of America and the Pennsylvania anthracite coal operators many references have been made to the "twelve hour day." Many no doubt have been led to believe that miners do work twelve hours a day, when as a matter of fact the greater number work less than half this period. The only men around anthracite mines who work twelve hours per day are those in charge of the pumps and fans and perhaps one or two other surface jobs that require supervision rather than manual labor. However, the operators have agreed to work out a plan whereby the twelve hour men, of whom there are three thousand distributed among some two hundred and fifty other employees, shall have their hours cut to eight per day. This merely means that three shifts be employed every twenty-four hours in place of two as at present. If all grievances between master and man could be so easily adjusted as is this one this would indeed be a happy world.—Saturday Night.

AFTER-EATING DISTRESS

and all forms of stomach trouble, such as gas, pains, acid, sour, burning stomach are all relieved in two minutes by taking Jo-To. Jo-To is sold by all Druggists.

Just a Comparison.

The First Locomotive in America and the Latest.

THIS picture might almost be entitled "Ancient and Modern." It shows the "Sampson," first locomotive in America which was first used at Albion mines in 1839, and one of the new Pacific type locomotives which have been placed in commission by the Canadian Pacific Railway on all main lines, and which are chiefly responsible for this company's "on time" feature of service. The Canadian Pacific Railway have now definitely adopted this design for their heavy main line service, as representing the most desirable and efficient locomotive for economy and reliability of service, as this particular design reduces to a minimum, consistent with capacity, the number of moving parts which is essential for reliability of service under the most exacting and severe conditions.

The capacity and weight of these locomotives rank them among the biggest of their type in the world, and the largest of this design in operation in Canada. The haulage capacity of the 2300 series is 42,600 lbs., which is obtained with 200 pounds boiler pressure, cylinders 25 inches in diameter, 30 inch stroke and with driving wheels 75 inches in diameter. The weight on the three pairs of drivers of engine is 180,000 pounds and th total weight of the engine and tender in working condition is 495,000 pounds, the tender having a capacity of 8,000 gallons of water and 14 tons of coal.

The design of these locomotives was given very careful study, a trial order of engines constructed in 1919 having been made, with tests under all Canadian conditions, which fully justified all expectations for reliability and economy of operation. The boiler has been carefully proportioned and the inter-relation of grate area, fire box volume, heat absorption capacity of different lengths of tube and gas areas more carefully thought out than is usual in most designs, which, coupled together with an extremely accurate distribution of steam by an improved type of Walschaert valve gear, has given exceptional economy for a locomotive of this size.

THE HOGGISH MR. DEMPSEY

The attempt of the little town of Shelby, Montana, to place itself permanently on the map via the pugilistic route was not what could be called a howling success. In fact it is very doubtful if the presence of Mr. Dempsey was worth a tenth of the money which the citizens of that town were obliged to extract from their own pockets in order to see Messrs. Dempsey and Gibbons perform. Dempsey, it will be remembered, was the gentleman who found it inconvenient to fight in the trenches for $1 per day, but who now demands something like $300,000 for performing a few minutes in the ring. Dempsey and his manager Kearns are trusting mortals. They showed it when they insisted upon being paid down to the last cent before staging their fight. Then followed a sense of sordid haggling, Dempsey finally agreeing to take a mortgage on the town or some such thing for the unpaid balance. Perhaps Shelby needed the advertising badly enough to justify the waste of money, but we doubt it. Mister Dempsey is headed for an eclipse, and the sooner it reaches him the better. He may be a good fighter, but he is a poor sport.—Saturday Night.

The "human omelette" lives in Anacortes. Charles Jensen of that city is crackling over having recently devoured thirty-eight raw eggs in 12 minutes. His friends are watching to see if he will develop pin feathers.

Summer resort keepers on the American side of the St. Lawrence complain that pleasure boat parties show a marked preference for the Quebec side of the river. The scenery is much the same and another attraction is suspected .

Not a Laxative

Nujol is a lubricant—not a medicine or laxative — so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method — lubrication. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

Fill your pipe with — Ogden's CUT PLUG

"It Satisfies"

15¢ per packet

80¢ a ½ lb. tin

If you roll your own ask for OGDEN'S FINE CUT (green label)

Governor Al Smith of New York is assembling a menagerie on the executive mansion grounds at Albany. An interesting feature would be a full-grown Tammany tiger in action.

The shortest air distance across the continent is said to be between Jacksonville, Florida, and San Diego, Cal. At this season of the year the trip would be a jump from the frying pan into the fire.

By adopting a scientific system of dieting it may be possible for dairymen to supply their customers with milk of as many flavors as soda water. A Florida farmer feeds his cows on water hyacinths.

Canada Faces the Future With Confidence

CANADIANS have always been noted for courage, optimism and faith in their country.

Canada was not built up by pessimists, nor will Canada continue to develop if her people allow themselves to become croakers and grouchers. Canada is fundamentally an agricultural country. We have a soil and climate which can grow the world's finest agricultural products.

Canadian farmers who have earned the capital invested in their farms out of profits in farming are numbered in thousands. These successful farmers have paid off their mortgages, stocked their barns and stables, bought their machinery, made a good living and brought up their families. It meant hard work, but today they are independent.

We Must Cut Production Costs

Canada is meeting with the keenest competition in the marketing of her products. To hold her own and regain her place on the world's market, she must reduce cost of production.

The only way to do this is to increase production per acre, per cow or per other unit.

But improved quality, also, is essential to meet market demands.

The quantity and the quality of the products and the cost of production in competitive countries is beyond our control.

Prices of agricultural products are regulated by world supply and demand

Hence, decreasing production will not help the Canadian farmer.

Money in Mixed Farming

In recent years, at different points on the prairies, oats fed to steers have brought from 70c to $1.07 as against the Fort William price of 42c per bushel, while barley used for the same purpose has brought as high as 99c as against the Fort William price of 57c per bushel. Farmers marketing their coarse grains in this way lower marketing cost, have a sure market and make money on their grain, while at the same time they market their roughage, otherwise often wasted.

The cattle embargo is now off. Steers are worth more money and certain to make good money for the Canadian farmer from now on.

Money in Pigs

The Dominion Experimental Farms have proved by actual test that there is a profit in feeding pigs. Last year at the Central Farm, Ottawa, after paying for feed, labor, interest and depreciation, the net profit per pig was still $4.63.

Profits from Sheep

As money-makers, sheep are hard to beat. In every Province from Prince Edward Island to British Columbia are found many flocks returning generous profits to their owners.

Poultry Pays

Poultry makes money for those who adopt modern methods, whether East or West. Little Prince Edward Island markets co-operatively in carlots, shipping annually upwards of one million dozen eggs. The British Columbia Co-operative Poultry Men's Exchange markets in the same way, thus saving ruinous glut in their local market.

There is a market for good Canadian horses, whether light or draught.

Grow Seed

Canada's Northern grown seed possesses extra vitality. There is a large market for it to the south. Canada exports seed potatoes, but imports other seeds. She has the opportunity to grow seeds for herself and for export.

The Future

Ten years from now the pessimists of today will have been forgotten. Britain has removed the embargo against our cattle. She wants our beef and bacon, our cheese, butter, eggs and apples, our wheat and flour. As the population of the United States increases, she will compete less and less against us on the British market. Eventually, she will herself be an importer of many other food stuffs besides wheat from this country.

Canada has the men, the climate, the land, the stock and the potential markets necessary for agricultural success. Let us farm with all the industry and science we can muster. Let's get to work and pay our debts. Canada is moving forward with confidence in its future. Let us keep going ahead.

Have Faith in Canada

Authorized for publication by the
Dominion Department of Agriculture
W. R. MOTHERWELL, Minister. Dr. J. H. GRISDALE, Deputy Minister.

Commencing at a post planted at the South West corner of North ½ of Lot 4135, thence North 20 chains, thence West 20 chains, thence South point of commencement. Comprising 20 chains, thence East 20 chains to 40 acres, more or less.

Alexander Condell Murray.
Dated at Natal, B. C., April 21st, 1923. je15|7

WATER NOTICE

Use and Storage

TAKE NOTICE that F. C. Limbocker, whose address is Jaffray, B. C., will apply for a licence to take and use 100 acre feet and to store 5 acre feet of water out of Little Sand Creek which flows South and drains into Big Sand Creek about 1½ miles South of Jaffray. The storage-dam will be located about 300 feet South of Government Road. The capacity of the reservoir to be created is about 5 acre feet, and it will flood about 1 acre of land. The water will be diverted from the stream at a point about 300 feet South of Government bridge and will be used for irrigation and power purposes upon the land described as portion of sub-Lot 3, South of Government Road and West of Sand Creek. This notice was posted on the ground on the 19 day of June, 1923. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fernie, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is June 22, 1923.

F. C. Limbocker,
je22|4. Applicant.

THE CASE OF TWO RICH MEN

Recently John D. Rockefeller had a birthday. He was eighty-four on July eighth. The eighth fell on a Sunday, and no doubt many thousands who motored that day stopped somewhere along the route took aboard a cargo of gasoline or oil, one or both, and in paying for the same remarked: "There goes another quarter for John D." This is probably as far as the average mortal went towards congratulating Mr. Rockefeller upon his natal day.

Wherein lies the difference between two very rich men, John D. Rockefeller on the one hand and Henry Ford on the other. One popular enough to be thought of seriously as a presidental candidate; the other so unpopular that he probably could not be elected to the position of pound keeper of his old home town.

What has Henry Ford done for humanity? He established a great industry. He employs thousands of hands at good pay, and he has accumulated millions for himself.

What has John D. Rockefeller done? He established a great industry, employing thousands of hands at good pay, and he accumulated millions. But it is just here that the parallel ceases.

So far as known Henry Ford has kept his riches for himself. At least he has never given largely to any great philanthropic movement. Aside from aiding men to earn good wages Henry Ford has done nothing for humanity.

On the other hand John D. Rockefeller, through the Rockerfeller Foundation, and by other means has expended millions upon millions to aid his fellow man in the most practical and enduring ways. It is said that he has spent half a billion dollars in this manner, more money than has ever been expended by one man in one life time in good works. He has advanced the cause of education by endowing colleges. He has given scholarships galore. It was his purse that aided in the fight to eradicate the hook worm and do away with yellow fever, and so on through a large field of endeavor.

By all the rules of the game John D. Rockefeller should be a popular citizen of the United States, and again by all the rules of the game Henry Ford should be most unpopular, but the reverse is the case. It may be alleged that Henry Ford has thousands of agents boosting for him, but the organization founded by Mr. Rockefeller is far larger and many times more powerful than the Ford contingent. So the case cannot rest here on secure ground.

As before stated when a man buys a gallon of gasoline for his car his mind wanders instinctively to the question as to how much of the sum paid is going to John D. Do the same thoughts occur to the many buyers of the Ford car? I doubt it. And still there is greater reason, for while the Ford Company is a one man concern, the Standard Oil corporations are largely owned by the public, by the stock holders, big and small, with John D. Rockefeller a side show so to speak.

Admittedly the whole question of human likes and dislikes is a perplexing puzzle, an enigma in psychology and the most interesting case extant is that of Rockefeller vs. Ford. —Toronto Saturday Night.

Captain Eddie Rickenbacker, the American ace, predicts that in three years a combination airplane-boat-automobile—a "flivver" of the air, costing about $600, will be in use. The fuselage will serve as boat, he says. The wheels will project only about half their diameter below the fuselage, but far enough so that they will carry it smoothly over the ground. On the sides will be collapsible wings. It will be a monoplane type. The driver will be able to throw out the propeller and shift gears as in any automobile.

Montreal Honors First Skipper in Port

1. C.P.S.S Montrose bringing first passengers to Montreal, 1923 Season. 2. Captain Edmund Aikman, Commander of the Bolingbroke.

TWENTY years ago Montreal was but a "mere calling place for ships." It had practically no modern cargo-handling devices or equipment, its wharf sheds were just wooden shacks which were actually taken down in winter to prevent them being blown away, and much of the merchandise was stored in the open air at the mercy of the wind and weather. Now Montreal is the greatest port of Canada and it is the best located. From a mere riverside stopping place for ships, it has stepped into the front rank of ocean ports, and has become equipped with facilities for the accommodation of ships and for the handling and storing of freight that are unrivalled on the continent. Despite the fact that Canada has less than 10,000,000 population and that the United States has more than 110,000,000, Montreal now handles a greater volume of business than any port on the American continent with the solitary exception of New York.

The principal reasons for Montreal's supremacy are the facts that it is nearly one thousand miles inland from the ocean, at the head of deep water navigation with direct access to the Atlantic, and that behind it is a through route right up to the head of the Lakes at the Twin Cities, a thousand miles further inland. Were it an all year port, Montreal would be the chief one of the continent, but for some months winter closes the beautiful St. Lawrence route, and the vessels fretting at the mouth of the great river must wait until the ice goes out in the spring before they can make their way westward.

About fifty years ago, the Harbor Master originated the idea of presenting a tall silk hat to the captain of the first vessel to arrive in the spring with a transatlantic ship. This custom was observed for about thirty-five years, then, as the top hats lost their popularity, a gold headed cane was presented instead by the Harbor Commission.

This year the cane was presented to Captain Edmund Aikman, of the Canadian Pacific S.S. Bolingbroke who had just completed his first voyage in command. The Bolingbroke left London for Montreal on April 9th, calling at Antwerp en-route, arriving three hours ahead of her nearest competitor on May 3rd. The liner "Montrose" of the same line, the first passenger vessel to reach the port in 1923, arrived two days after.

Here and There

Nova Scotia has adopted the "drive to the right" rule of the road, the bill providing the change having received the assent of the administrator of the province.

The year 1922 was a banner year for Montreal in the number and tonnage of ships which came to the port, a total of 6,983 ships of 13,089,699 tons arriving, as compared with 5,541 ships of 9,735,450 tons in 1921.

Canada led the world in 1922 in the export of raw furs to the United States. The total fur catch for that year was over 4,000,000 pelts, valued at $16,000,000. While the general price of furs shows a downward trend, the total catch shows a remarkable increase.

Four of the Canadian Pacific "Empress" liners, the Britain, the France, the Scotland and the India, are to load grain at Quebec during the 1923 season, and new berths have been provided for these vessels near the grain conveyors, at a cost of $300,000.

When she was alighting from a street car in Vancouver, Mrs. Rose McLaren received injuries which prevented her from concentrating and temporarily did away with her earning power as a spiritualist or psychic reader. She was awarded $1,250 against the railway company.

The addition of the 17,000-ton "Montlaurier" to the Canadian Pacific "Mono Class" fleet marks an important development. Not only is she the largest one-class-cabin ship sailing to and from Canadian ports, but she is the largest in her class on the Atlantic. Her length is 613 feet and breadth 68 feet. Because of her size she will sail to and from Quebec.

Approximately 8,000 tons of silver ore are waiting shipment from the Keno Hill, Yukon, mines. This quantity represents the winter haul. Another 2,000 tons may be moved this summer, making the total silver shipments ten thousand tons for 1923. Such an output is worth about $2,000,000, high grade ore running from $200 to $300 per ton.

"The greatest feat of steam transportation to my knowledge," said C. E. Stockdill, of the Canadian Pacific Railway, recently, "was the movement of the grain crop of 1922." From Sept. 1 to Nov. 31, a period of 91 days, the Canadian Pacific Railway loaded and shipped an average of 1,265 cars per day. This requiring the dispatching of a train every 45 minutes during that entire period, carrying more than 1,000,000 bushels daily. This movement exceeded even that of the bumper crop year of 1915.

One of the many instances of the splendid work carried out at the Liverpool docks is afforded by the Canadian Pacific liner "Metagama." On a recent arrival at that port she started the discharge of her cargo and coaling at 6 o'clock in the morning. Allowing for the usual dinner hour, she took on board in her side bunkers 1,000 tons of coal, which was completed by 2.45 the same afternoon. At the same time she discharged 1,700 tons of cargo, the greater part of which consisted of package freight, completing this operation by 7.15 the same evening.

Members of the Drury cabinet have joined the "back to the land" movement.

If the water shortage becomes serious the sprinkling can may go up the spout.

The league with the largest membership at present is the league of vacations.

Venice is willing to be a sister to Los Angeles, but refuses to be amalgamated with her big neighbor.

Now comes a health specialist who says that bathing suits are unhealthy. Life and bathing suits are too brief to waste time worrying.

Declaring that two is company and three a crowd, a bill introduced in the Czecha-Slovakian Assembly making bigamy compulsory is reported defeated.

Denmark proposes to abolish capital punishment. As there has not been an execution in that country for 30 years the statute of limitations may apply.

When President Harding plants a tree on the occasion of his visit to Los Angeles, Senator Johnson may convert it into planks for his own presidental platform.

It is estimated that the United States uses more lead pencils than all Europe. Writing on picture postcards and keeping baseball scores accounts for many thousands.

The ownership of Wrangell Island may cause an international wrangle with Russia. Rather than go to war over an isolated iceberg the walruses and seals that frequent its shore might be given the right of self-determination.

The insecticid board of a Virginia experimental station offers a cent apiece, f. o. b., for choice specimens of bedbugs. Corralling the elusive insects for shipment calls for the patience and agility of a patron of a ten-cent lodging house.

PILES

No one but the sufferer knows the terrible agony or the itching nature of Piles and how hopeless it seems to try for relief in ointments, injections and dilators.

Genius produces

"PAX"

Internal Pile Remedy

Pax is the prescription of a well known physician and has proved successful in hundreds of cases. Pax is internal distinct from any other treatment. Applications from the outside are futile. No ointments, injections or dilators are necessary. Pax is complete and is a vegetable remedy, contains no drugs or alcohol.

If you have not hitherto found relief do not despair, place your faith in Pax.

Except in unusually stubborn cases one box is usually sufficient.

Get "PAX" from your Druggist or if he cannot supply you send One Dollar and "PAX" will be sent you in a plain package.

The STAR CAR

THE creation of the Star Car is the most important and brilliant accomplishment of any individual identified with the automobile industry since its inception.

Smartness in looks, and thoroughness and modern design in a low priced car was unheard of until the Star was created by W. C. Durant, the pioneer builder of automobiles and identified with the introduction and success of the Cadillac, Buick, Oakland, Oldsmobile, Chevrolet and Durant Cars.

The Star Car marks the most advanced step since introduction of the automobile, for it provides for the first time a quality automobile, standardized in construction and operations for a modest sum of money.

CORBIN I. O. O. F. LODGES INSTALL OFFICERS

Edith Cavel Rebekah Lodge No 38, Corbin, B. C., held their installation of officers last Thursday evening, District Deputy President Mrs. (Dr.) Elliot officiating, assisted by a full staff of Past Grands. The following are the officers for next term:

Sis. E. Knight, N. G.
Sis. G. Knight, V. G.
Sis. B. Littley, Rec. Sec.
Sis. E. D. Williams, Fin. Sec.
Sis. B. Morgan, Treasurer.
Sis. H. Cady, Chaplain.
Sis. A. McDonald, Warden.
Sis. M. Reger, Conductor.
Sis. R. Elliot, R. S. N. G.
Sis. J. Wood, L. S. N. G.
Sis. M. Frey, R. S. V. G.
Sis. B. Clarke, L. S. V. G.
Sis. B. Clarke, O. G.
Sis. W. Sykes, I. G.

Installation of officers for Corbin Lodge I. O. O. F. No. 64 was well attended, Bro. W. S. Murphy, District Deputy Grand Master performed the ceremonies and was both efficient and exact in the performance of his duties. The following are the officers for ensuing term:

A. Cady, J. P. G.
R. S. Elliot, N. G.
E. L. Warburton, V. G.
B. Littley, Rec. Sec.
B. Clarke, Fin. Sec.
W. Almonde, Treasurer.
J. Virgo, Chaplain.
W. S. Murphy, R. S. N. G.
J. Glover, L. S. N. G.
S. Knight, R. S. V. G.
W. Montalbetti, L. S. V. G.
D. Grieves, I. G.
J. A. Wood, O. G.
J. Williams, Con.

The Oriental problem involves a new menace. Action has been taken by the attorney-general to curb the brewing and sale of "Sake," the favorite Japanese whisky. Protests have been sent to Ottawa against the trafficking carried on by Japanese among Indian fishermen, sake being the persuasion used in many instances to induce the Indians to part with their fish. In future it will be very difficult for Japanese to secure permits to manufacture the strong stuff, which is a distillation of rice and other ingredients. The practice of Ottawa has been to issue no permits unless approved by the province affected, and Attorney-General Manson states he will not give consent to any such ventures in future.

Health turns the clock backward

WHAT DO YOU MEAN "SWEAT ISN'T CLEAN"?

Health Talk No. 28.
By G. J. Parks, D. C.

Sweat itself is not clean, but sweating is. Sweating is a process of cleansing the body of impurities. It is possible for a man who works hard and is only able to bathe infrequently to be cleaner internally than a society favorite who can and does bathe daily. The cleansing process is from within. Bathing simply removes the effects of it.

An active skin is possible only when the kidneys are receiving one hundred per cent. life impulses over the spinal nerve lines. When there is any form of interference due to spinal bone displacement at the point affecting the kidneys the only way to remove the cause of it is by chiropractic spinal adjustments.

HEALTH FOLLOWS
CHIROPRACTIC CORRECTS PRESSURE ON SPINAL NERVES IN DISEASES OF THE FOLLOWING ORGANS:

THE LOWER NERVE UNDER THE MAGNIFYING GLASS IS PINCHED BY A MISALIGNED JOINT. PINCHED NERVES CANNOT TRANSMIT HEALTHFUL IMPULSES. CHIROPRACTIC ADJUSTING REMOVES THE PRESSURE. THE UPPER NERVE IS FREE AS NATURE INTENDS.

In Failing Health Four Years, Is Now Well.

"My wife has been in failing health for about four years in spite of excellent medical care. Her blood pressure was high and heart and kidneys were bad. We turned to chiropractic and it is hard to believe so great an improvement could be brought about. There is new life and joy in our home and church work."

—Rev. A. J. Steelman, Baptist Church — Chiropractic Research Bureau Statement No. 1365R.

Ladies' silk and wool pullover sweaters in a big range of colors, regular $4.50—
Special $3.50 Each

NO CHANGE YET AS TO STAMPS UPON CHECKS

Contrary to despatches from Ottawa yesterday, the new regulations regarding the tax on checks does not go into force until October 1. The confusion undoubtedly arises from the fact that the new regulations regarding the receipt tax went into effect on August 1.

The change in the check stamp regulation is that after October 1, postage stamps—the ordinary kind—will not be accepted on checks by the banks. Instead, each check must bear the required amount in revenue stamps.

Enquiry reveals the fact that there is always a supply of these revnue stamps on hand for sale in the office of the collector of customs. In addition, the most of the banks also keep a supply.

The likelihood is that the new regulations will result in a greatly increased sale of stamped checks by the banks.

But until October 1 the ordinary postage stamps may be placed on checks, after that none but the special revenue stamps, obtainable at the office of the collector of customs or at the banks will be necessary.

P. H. SHEFFIELD IS PRESIDENT

A large and very enthusiastic gathering of summer school students filled Convocation Hall on Thursday evening to its capacity. The very fact that these seekers after knowledge left their games of tennis to attend their regular Alma Mater meeting shows very clearly the intense interest these students take in this important phase of college life. As one looked over the faces of those assembled he was impressed by the sincerity depicted by the students, who were ambitious enough to sacrifice their summer holidays to enrich their minds by coming to Queen's summer school.

C. A. Lapp, president of the school association, opened the meeting with a few well chosen words, and then called upon A. C. Stewart, secretary, to read the minutes of the last meeting and the communications. A very interesting letter was read from a Queen's man, A. W. Drysdale, in the heart of Africa, where he was doing some invaluable work in teaching the ignorant blacks.

The nominating committee through L. D. McCamus, made its report. Mr. McCamus impressed upon his hearers the difficulty of selecting for their executive students who would be present again next year; and further the committee was influenced solely by personality and not locality. He was certain that those selected were the best to be obtained, and he hoped that they would receive hearty co-operation and support. The proposed slate of officers for 1923-1924 was read and unanimously accepted, the following being selected:

Honorary president, W. J. Brown; past president, C. A. Lapp, Ottawa; president, P. H. Sheffield, Fernie, B. C.; secretary-treasurer, Miss Christine MacLeod, Dunvegan; associate secretary-treasurer, George Cromie, Calgary, Alta.; first vice president, O. E. Ault, Brinston; second vice president, Miss Gene Everett, Lakefield; social convenor, W. R. McVittie, Fort William; Miss M. Roberts, Haliburton; Miss G. McRae, Alexandria; Miss M. Craig, Toronto; music convenor, J. L. Calinor, Chatham; music committee, M. B. Woolridge, Southampton; T. Miller, Dunvegan; Miss M. Moffatt, Ottawa; athletic convenor, C. F. Cannon, Newcastle; publicity manager, A. H. Carr, Kingston.

The all important third term question was very thoroughly explained by J. Partridge and W. J. Brown. Mr. Partridge said that it was in the minds of several Queen's students that the summer school should branch out into something better. He outlined the remarkable progress made since the beginning of the school in 1910, till 1923, both in numbers and in increased advantages in courses. The only impediment in the present system was that the student was required to spend at least one year intra-murally, or four summer school sessions. Efforts to persuade the department differently have met with very little success. What was to be done? The only alternative seemed to lengthen the session to twelve weeks instead of the present six weeks, opening about the ninth of June. Mr. Partridge realized that many difficulties were involved but he believed that these would be overcome by a process of evolution. He hoped that the students would keep the welfare of the school and the university combined and not look to personal advancement alone.

W. J. Brown followed up the remarks of Mr. Partridge by showing that nothing could be done unless the students gave the movement their hearty support. He knew that there were difficulties, such as being unable to obtain permission from school boards to leave early in the summer, questions of finance and so on, but he felt that these difficulties could be overcome.

In answering for the university, Dr. McNeill congratulated Messrs. Partridge and Brown on their very clear explanation of the proposed change, and stated that department would only recognize a full attendance. Many of the staff were against the proposal and there was the additional financing necessary. However, he outlined a plan whereby the number of classes would be increased to twenty-five, the number of hours being sixty, fifteen less than the winter of seventy-five hours. The department would then allow three twelve-week sessions. Some debate was heard from the students and the question was left to be considered at the next meeting.

In closing the meeting the chairman announced that the faculty players would give a play on the 9th of August. He also urged the students to "forget themselves" at the sing-song and dance this evening and be more friendly.—Kingston British Whig.

ORDER OF FORESTERS WILL INSTALL OFFICERS

The regular meeting of the Ancient Order of Foresters will be held in the Odd Fellows Hall on Friday, August 10, at 8 p.m. Installation of Officers will take place as follows:

Chief Ranger—Bro. Townsend.
Sub Chief Ranger—Bro. Murray.
Sec. Treas.—Bro. Edgar.
Sr. Woodward—Bro. J. Wallwork.
Jr. Woodward—Bro. A. Wallwork.
Sr. Beadle—Bro. Owen.
Jr. Beadle—Bro. Sherwin.

CITY COUNCIL MEETING

The regular meeting of the City Council was held in the Council Chambers last evening, Mayor Henderson occupied the chair, Aldermen Aiello and Graham were the only absentees.

Messrs. Markland and Shearer, on behalf of the G. W. V. A., requested permission to use the City Park and buildings on Labor Day, September 3. A motion was passed granting this.

A telegram from the Royal Financial Corporation, Vancouver, offering for sale, a number of British Columbia bonds, was filed.

A request for tax exemption, from Mrs. E. J. Ross, for her property on Dalton Ave., on the grounds that she was using her home exclusively for a Maternity Hospital, was laid over until next meeting.

Evans, Coleman and Evans, of Vancouver, reported by telegram that all cast iron pipe for the completion of the waterworks system was now en route from Vancouver.

A letter from the Medical Health Officer requesting that the City employ a Sanitary Inspector to make an inspection of the City sewer system and submit a report, was laid over for investigation.

Three tenders were submitted to the Council for the laying of the Annex water pipe line but after consideration, the Council unanimously decided that all were much too high, and that should no reasonable tender be forthcoming, the City would undertake to lay this pipe by day labor.

The Fort Steele Trading Company submitted an offer of $500 for six thousand feet of old wooden water pipe. The Council accepted this offer, providing the purchaser paid the cost of loading the pipe and freight charges to destination.

DROWNING FATALITY

Peter Zuliani, 13 year old son of Mr. and Mrs. Joseph Zuliani of this city, was accidentally drowned in the Elk River at the foot of McEvoy St. Wednesday afternoon.

The lad with two or three companions was paddling around in the water near the river bank protection breakwater, when in some unknown manner, he was swept out of his depth and dragged down into deep water by a treacherous undercurrent. One of his compaions made heroic efforts to save him, but was compelled to return to the bank for aid. Constable Gunn, of the R.C.M.P., H. Burrows, F. Clarkstone and City Constable Cameron, who were in the neighborhood at the time, immediately went to his assistance, but it was an hour before the body was recovered. In the meantime, W. Barraclough had made a hurried trip to the Mine Rescue Station by car and had returned with the pulmotor. Mr. Puckey applied this apparatus to the lad for nearly an hour in an unsuccessful attempt to restore life.

Coroner Duthie viewed the body and the scene of the accident shortly afterwards and gave a verdict of accidental death.

The funeral, which was largely attended, was held this morning from the Roman Catholic Church.

CHRIST CHURCH

5th Aug., 1923. 10th Sunday after Trinity.

11 a.m.—Choral Communion: "The Transfiguration."

7:30 p.m.—Even Song: "Christian Perfection."

10:15 a.m.—Sunday School.

1:45 p.m.—Divine Service at Coal Creek.

U. S. PRESIDENT DIES SUDDENLY

SAN FRANCISCO, Aug. 2.—President Harding died this evening at 7:20 p.m., whilst talking to mmebers of his family. Physicians' bulletins issued at 11:30 p.m., eastern time, reported earlier in the day that the patient was progressing favorably but that his recovery would be slow. The body will leave San Francisco on Friday evening and will be conveyed direct to Washington.

Calvin Cooldige, Vice President, will assume office as the United States' thirtieth President.

Consul N. F. Brand, of Fernie, received the following telegram pertaining to President Harding's death this morning:

"Washington, D. C. 3:11 a.m. August 3, 1923.

American Consul, Fernie, B.C.

Urgent circular the President died very suddenly of Cerebral Apopley in San Francisco at seven twenty p.m. August second notify agents.

Hughes."

SHUTS OUT LUMBERTON

Fernie secured the lead in the race for the second half of the East Kootenay League Championship last Sunday, when they defeated Lumberton, who up until Sunday were tied with them, by a score of four runs to nil, in one of the finest games of baseball witnessed in the East Kootenay this season.

Ault was in fine fettle, striking out fifteen batters and coming within a hair's breadth of entering the no hit no run hall of fame. Two hits, one by Van Norman in the eighth and one by pitcher Mitchell in the ninth spoiled a perfect record. In the second, third and fifth innings he struck out three consecutive batters.

Mitchell, secured by Lumberton from the defunct Cranbrook club, turned in a fine game for Jacobson's tribe. He struck out eleven batters but was not as effective in pinches as his opponent, and the Fernie swatsmen got to him for hits when hits meant runs.

Fernie opened up the scoring in the first frame when with one man down, Shand landed on one of Mitchell's offerings for a three base hit, Barger was given a pass and then McTeer singled, sending Shand across the plate.

Both sides were retired in short order in the second and third frames, but in the fourth Wilson scored for Fernie when he connected for a two base hit, went to second on a passed ball and was sacrificed home by Colton. In the fifth frame, with no one on bases, Shand again connected hard, lifting the ball out of the lot and circling the bases before the ball was returned to the diamond.

Fernie's fourth run came in the seventh frame, Bishop singling and advancing to second when Shand walked, scored on a wild heave. In the eighth frame, Lumberton looked like getting a run when Vaughan got around to third, but with two men out on fielder's choices, Ault struck out Sang for the third out. This was the only inning Lumberton had a runner get past second base.

The box score—

Fernie—	AB	R	H	PO	A	E
Bishop, 2b	5	1	2	4	3	0
Shand, 3b	4	2	2	0	2	2
Barger, 1b	4	0	1	5	0	0
McTeer, c	5	0	1	15	1	0
Ruschall, cf	4	0	0	1	0	0
Hovan, lf	4	0	1	1	0	0
Wilson, ss	4	1	1	0	0	0
Colton, rf	3	0	1	1	0	0
Ault, p	4	0	0	0	1	0
	37	4	9	27	7	2

Lumberton—	AB	R	H	PO	A	E
Molisky, ss	3	0	0	2	1	2
Vaughan, 3b	4	0	0	1	3	1
Van Norman, 2b	3	0	1	3	1	1
Sang, 1b	4	0	0	9	0	0
Mitchell, p	4	0	1	0	3	0
Henderson, c	4	0	0	9	2	0
Cairns, rf	4	0	0	2	0	0
Walker, cf	3	0	0	1	0	0
Mason, lf	2	0	0	0	0	0
	33	0	2	27	10	4

Score by innings—

Fernie	100	110	100	4
Lumberton	000	000	000	0

Summary—

Stolen base: Hovan; Sacrifice hit: Colton; Two base hit: Wilson; Three base hit: Shand; Home run: Shand; Struck out: by Ault 15, by Mitchell 11; Wild pitch: Mitchell; Base on balls: off Ault 2, off Mitchell 1; Hit by pitcher: by Ault (Van Norman), by Mitchell (Barger); Dropped third strike: Henderson (2); Passed ball: Henderson; Double play: Vaughan to Van Norman to Sang; Earned runs: Fernie 2; Left on bases: Fernie 9, Lumberton 7; Time of game: 1 hour 50 minutes; Umpires: Morrison and Kay.

—:—

The race for the cellar position in the league is still undecided, Kimberley and Wycliffe playing to a two run tie Sunday evening in a game which was called on account of darkness after the nine innings had been played. The league standing now is:

	W	L	Pct.
Fernie	3	0	1000
Lumberton	2	1	.666
Wycliffe	0	2	.000
Kimberley	0	2	.000

ROMA HOTEL LOSES $450

The city police were notified last Sunday, that during the early hours of Sunday morning, some person or persons had entered the Roma Hotel and had stolen some $450.00 in cash from the office safe.

The facts as related to the police are that when the office was closed about midnight, Saturday, and the safe locked, it contained $450.00 in cash and over $200.00 in cheques. In order to effect an entrance to the office, it was necessary for the burglar or burglars to travel from the ground floor up the main stairway, along an upper corridor and down the back stairway to the dining room, thence through the pool room and into the office, the combination of the safe had then to be negotiated. The cash had been separated from the cheques and these replaced in the safe then the safe was again locked.

WHITNEY BOYS' CHOIR CONCERT

The appearance of the Whitney Boys' Chorus in the Fernie Skating Rink on August 13 is one of the most important events in the musical history of this city. What the Metropolitan and Chicago Grand Opera Companies are to the Opera field, the Whitney Boys' Chorus is to the concert field. Other Boy Choirs are good but the Whitney Boys have a combination of all that is pleasing in the other Choirs, and some very fascinating features which are wholly original.

This Choir is the largest in the world, having 2000 members from which to draw for this trip. The Chorus sings four part music, and in one selection seven distinctly different parts are taken.

The soprano voices are rare in their bird-like clearness, and phenominal in their range, reaching as a unit high "C" above the staff and some of them go above this note which is considered the goal of many a lady primadonna's ambition.

The alto section is beyond the imagination of even expert critics. There is a melodious power which astonishes all listeners. Every audience has marvelled at the combination of rich quality and tremendous volume. On man said at the close of a concert that these boys would produce more alto to the square inch than any choir in existance.

Besides the marvellous Choruses, there is a most pleasing variety individual and group talent. A Glee Club of boys with unchanged voices is one of the special attractions. Singing first and second soprano and first and second alto, with voices selected for their rich blending and extraordinary range, they come up to the highest expectations of any audience.

There are vocal, instrumental and humorous soloists, readers, dancers, and other individual artists of extraordinary ability.

While the boys do enough classical work to satisfy the most accomplished music lovers, yet all their selections are of that melodious and soulful quality which appeals to both the trained and untrained ear.

The encores are of the most humorous nature. Probably one of the things which makes this Choir sing with so much feeling is because they are allowed to sing a reasonable number of pieces which appeal to the predominating part of a boys makeup, namely, fun. Give a boy a reasonable chance to blow off his "Humorous Steam" and he will generate enough power to put across almost anything one wants done. It is quite the most unique program ever offered to the public.

CROW ROUTE ADVISED BEST

(By J. F. Spalding)

I am just in receipt of a letter from a tourist who recently drove through here, which on account of the opinion voiced by some of our people that most of the Californian tourists will miss this section of the Pass, will make interesting reading. It is from Mr. James F. Mason, of Los Gatos, California. It reads:

"My dear Mr. Spalding—I am making a tour of the American Parks. In arranging my route the California Automobile Association; The Washington and Utah Automobile Associations, all strongly urged my going from Glacier Park to Lake Louise via Fernie on account of the very beautiful scenery in the Crow's Nest section. I am exceedingly glad that I accepted their advice for the roads have proved to be good and the scenery unusually interesting. Very truly yours."

When this gentleman was here he told me that on his return he intended writing a story about his trip which will appear in several leading California papers and magazines, and as he had enjoyed the scenery along the Crow's Nest Pass more than any other part of his trip, he intended to have more to say about that part of it. Respecting our roads from Glacier Park to Waterton Lakes and from there through here, he said that while he did find some parts of them bad, they were not so bad as he had been informed they were, and he though that any road over which an average of over twenty miles an hour could be maintained (he averaged that from Pincher Creek to here) did not have very much the matter with it. He also said that in his own State, in parts frequented extensively by tourists, there were many worse stretches than any he had experienced in this country. I quite agree with him because when I visited the Yosemite, which is the greatest tourist centre in California, I drove over roads and grades very much worse than the worst we have in B. C. and Alberta. I mentioned this to Mr. Mason and he said that those roads are worse now than they were then (he was over them less than a month previously) but added that the money had been appropriated at last with which to pave them.

As will be seen from the above, the Crow's Nest Pass route is being advertised in parts where it will do the most good and it is only a matter of short time before we shall benefit from the results of it, in the meantime it will be best to keep bad road reports from appearing in our press. These reports are copied by outside papers and are used by ETAOIN E visitors. It is only natural for them to believe that our own papers would not exaggerate the situation, and the result is that they make other arrangements.

Last week there appeared in this paper a rather nasty paragraph accusing the City of Calgary of influencing the Alberta Department of Public Works to give attention to the roads leading to there from Glacier Park at the expense of those through the Crow. This is an entirely wrong conception. The Hon. Alec Ross, minister of public works, is the last man that any body of men can influence. Calgary for years has been trying to get three miles of road leading to Bowness Park, which is the city's principal recreation ground, put into passable condition, they got the Premier and Mr. Ross there a short while ago, and Mr .Ross practically told them to go to the hot spot. I know this for a fact, and only a few days after that, I was one of a delegation who met Mr. Ross in Lethbridge and urged him to have the road from Crow's Nest to Pincher put into better condition, he promised us that he would go over it personally the following day and that whatever they possibly could do, would be done. He kept his promise so far as driving to the lake at any rate. That should have convinced him of the necessity for improvement.

I cannot see any reason why Calgary should knock the Crow's Nest route, it is one of the principal feeders to their city. Like all the other towns they are anxious to get as much of the tourist travel as they can draw there. Perhaps they may be a little selfish about that, but all the towns are trying to do the same, and it is to their interest to boost for road improvements, wherever they are required, and avoid sectionalism.

A Scene from "THE FAMOUS MRS. FAIR"
Orpheum, Monday and Tuesday, August 6th and 7th

Many Vancouverites will sympathize with Babe Ruth, who was forced to retire from a ball game in Philadelphia the other day owing to a sprained neck. Several local cases of the same trouble were reported after the presidental visit.

The Louisville Courier-Journal undertakes to prove that the Bible sanctions cigarette smoking by women, giving as its authority Genesis 24: 64, "And Rebekah lifted up her eyes, and when she saw Isaac, she lighted off the Camel."

GARBED IN BARE LIMBS, TATTOOED

CONY ISLAND, N. Y., July 29.—Girls took their stockings off at Cony Island today—girl bathers, that is—which might to some extent account for a crowd of 75,000 flocking to the beach despite dubious weather. In all, more than a half million persons visited the island during the day.

It was the first time bare-legged female bathers have been premitted at Coney. Late yesterday, Police Captain Gillen declared there was no ordinance to prevent girls and women from swimming without stockings. The word spread quickly and today stockingless mermaids were vastly in the majority.

While the members of the presidental party did not meet any crowned heads in Vancouver they were welcomed by a King.

A Boston minister says that what the country wants is more babies. The gentleman from Boston is invited to take a stroll down Powell street, Vancouver.

MR. LEWIS PRICKS THE MOSCOW BUBBLE

When the other day John L. Lewis, International President of the United Mine Workers of America, expelled from his organization the Reds of Cape Breton and revoked their charter, he did not mince matters. He reminded Livingstone, McLachlan and others of their Moscow affiliations, and made it clear that people of this revolutionary stripe had no place in the U. M. W. Livingstone, and his evil genius McLachlan, as President Lewis called him, may kick and squirm for a time, but the power of the U. M. W. wrested from them, they and their Red followers will eventually subside. It is quite possible that the flare-up may result in another miners' union being formed by the Reds, but this, getting little or no public support would eventually die in its tracks.

Shrewd leader that he is, Mr. Lewis realizes, as does Mr. Gompers, that labor unions on this continent must be kept clear of Moscow influences, else their death knell is sounded; and moreover they must, to be successful, obtain and retain the respect of the large mass of people who are in no wise affiliated with unionized trades. As Mr. Lewis pointed out in his official communication, a union must, like any other concern, live up to its contracts, a thing which leaders like McLachlan take no account of.

In this country "papier-mache revolutionists" such as McLachlan, can in the end get nowhere, and while the situation in Cape Breton is serious, it is, thanks to the presence of armed forces, in no way dangerous. Law and order in this country are going to be maintained, and Mr. Lewis' declaration denouncing this "mad adventure," as he calls it, is going to be a great help in restoring the reason of many who were taking too much stock in such gas bags as these Red leaders have proved themselves to be.

In the meantime the steel-workers are going back to work in large numbers, and the miners, with no funds upon which to draw, and no union status, are bound to follow.—Saturday Night.

GIRLS! WHITEN YOUR SKIN WITH LEMON JUICE
Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $200 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

FERNIE ROAD GRANT $6300

(B.C. Weekly Press Service)

Vancouver—Beauty treatments for men are now in vogue in this city according to "The Hook," which states that a well known business man, who is reported to be away at Shawnigan Lake on a fishing trip, is instead, undergoing a "face-lifting" treatment in a local beauty hospital. The same authority also states that pneumatic rubber calves, to be worn under dark stockings, have made their appearance at English Bay, following their introduction on the beaches at California.

Victoria—The largest number of requisitions for road and bridge work throughout the Province, during the year, have been made this week by Hon. W. R. Sutherland, minister of public Works, following his return from a Province-wide tour of inspection.

Requisitions are said to total over $110,000 and are as follows:

Atlin—New bridge over south fork of Stikine River to cost $1500; new bridge over Stikine at Tahlton to cost $2500; eight bridges on Telegraph-Dease road to cost $1850.

Alberni—Repairs to Englishman's River bridge; improvements to Kaye road.

Cariboo—New bridge at Highdon Creek diversion of Quesnel Forks road across the old Bullion dam and $500 towards the construction of a trail from Cedar Creek to Spanish Mountain to aid mineral development.

Comox—Extension of Hubands road to cost $1000; repairs to Garks road and McQuillans bridge.

Columbia—Two level crossings west of Field on the C. P. R. to cost $1064; new road from Columbia River road through lot 449 and new bridge over ravine on Red Rock road, to cost $608.

Cranbrook—Half cost of new $4700 road to Stemwinder Mine; repairs to Corbetts bridge and Perry Creek road.

Cowichan—Fisher road diversion at Cobble Hill to cost $800 to eliminate dangerous curves.

Chilliwack—Repairs to bridge 423 at interception ditch.

Dewdney—Clearing Ioco-Sunnyside road to cost $800 prior to erection of high potential electrical line.

Esquimalt—Half cost of $1500 road between Sections 1 and 6 way to Dan Campbell's Mine.

Fernie—Day labor work on Transcontinental highway near White Spruce and Coal Creek road to cost $6300; new bridge on Lower Sand Creek, to cost $2000.

Fort George—Day labor on Vanderhoof-Sturat road, to cost $1000; grading Salmon River Hill road to assist freight shipments into the Peace River country, to cost $1000.

Greenwood—Improvements to truck road from Sally Mine to Beaverdale station; construction of three miles diversion of West Fork Kettle River road to cost $11,500.

Kaslo—Renewal of Burden bridge under General Foreman Moore to cost $2100; new bridge at O'Kell Creek to cost $800; appropriation of $3500 towards road up Duck Creek to be built by Mr. Winlow; repairs to Hall Creek trail, Hamill Creek bridges, Kidd Creek bridge and Poplar Creek trail.

Kamloops—Improvements to Shuswap bridge to cost $1200; $1500 for bridge across Myrtle River and repairs to Badger Creek bridge.

Lillooet—Patrol work on Lillooet and Seton Lake bridge during high water.

Nanaimo—Protection of river bank of Nanaimo river.

North Okanagan—taking off rock points of Vernon road; widening and reducing the more dangerous curves by day labor to cost $12,000.

Omineca—New bridge near Evelyn station to cost $600; mining trails at Fort St. James and Manson Creek to cost $500; cable and assistance to settlers at Walcott on Bulkley River who are erecting towers and building a ferry boat.

Prince Rupert—Road improvements under Highway Loan Act in Lakelse road to cost $5000; Kitsumkalin road to cost $5000; road approach to Terrace bridge to cost $12,000 and Port Clements—Tel El road to cost $20,000 All works to be carried out by day labor.

Revelstoke — Repairs to bridge across St. Leon Creek to cost $80.

Similkameen—$600 towards mining road to be built by Andrew Jansen of Tulameen, an old prospector.

South Okanagan—New bridge at Mill Creek to cost $650.

Trail—$3000 assistance to S. Ross of Parks Siding towards $12,000 worth of timber roads up Beaver Creek trail.

Yale—Extension of Summer's Creek trail to aid numerous settlers to cost $3000; bridges at Haigh Slough to cost $470; cattle pass on Quilchena road and elimination of danger turns near Nicola Lake to cost $750; culvert and fill at Seven Mile bridge to cost $950.

Vancouver—Premier John Oliver distinguished himself in the parade and celebration in honor of President Harding, by appearing in a dollar Panama hat. This was in fulfilment of his statement that he would ignore the regulations as to wearing swallowtail coat, grey spats, striped trousers and silk hat in the morning and would come in "what was comfortable." He appeared in a dress suit at the state banquet at night. Hon. Wm. Sloan, minister of mines, who bears a striking resemblance to President Harding, was repeatedly cheered by persons who thought he was the President of the United States. "The Hook," the new Vancouver weekly paper, in its Presidental visit number calls attention to the insult to Canada given by the Daily Province in printing a series of pictures showing the depths of shame felt by a man caught in the act of trying to pass a Canadian "quarter." The Hook asks if the Province is printed for Canadian or foreigners.

Vancouver—Following the defeat of the Provincial Government in the Supreme Court, Court of Appeal Supreme Court of Canada and Privy Council in its efforts to exclude the Japanese from the forests, Crown lands, and Government contracts of the Province, a movement has been started to demand the repeal of the Japanese Treaty Act. This Act, passed in 1912 at Ottawa, is the stumbling block of the Province as it confers on all Japanese full rights to enter, move about and engage in business here on the same basis as Canadian subjects. The demand will be made for inclusion of a clause such as was stipulated for by Australia and South Africa limiting the right of Japanese to enter here.

In Putting Away Winter Woolens Save By Washing This Way

Put away your winter woolens, this spring, clean and soft — without harmed colors or fabrics in washing. It will save a lot of money, you'll find, by giving longer wear.

In thousands of homes this is being done. Careful housekeepers now use PALMOLIVE PRINCESS SOAP FLAKES for laundering all valuable fabrics.

Woolens, silks, satins, crepes, and expensive cottons; all come from washing with beauty renewed — and fabric uninjured.

Purest, unadulterated soap, these white, crinkly flakes save money two ways: By giving longer fabric wear; and by cutting down soap cost—because they last longer.

They give richest, stiffest suds — in washing machine, tub, or bowl. It dissolves all dirt speedily but gently. Splendid for *all* household use.

PALMOLIVE PRINCESS SOAP FLAKES

SHIP 4000 TONS ALBERTA COAL TO ONTARIO, $7 RATE

EDMONTON, July 23.—Within a short time Alberta coal will be rolling eastward as a result of the agreement between the Alberta Government and the Canadian National Railways, to ship 4000 tons of coal to Ontario by way of experiment at a price to compete with American anthracite in that market.

Premier Greenfield announced Monday that Commissioner Stutchbury of the Mines Branch had completed arrangements with Canadian National officials and mine operators in various Alberta fields for shipping without delay, the railway rate to be $7 a ton for the experimental shipments. Mr. Stutchbury states that he plans to distribute the test shipments as widely as possible in important central Ontario points for the purpose of establishing the value of Alberta coal practically all over that province. While the railway officials have definitely announced that a permanent freight rate of $7.00 a ton is impossible, it is likely that the Canadian National will not object to transporting experimental shipments not in excess of 4000 tons if the government deems it advisable.

Premier Greenfield has not yet been advised by the Canadian Pacific whether that company will co-operate in these experimental shipments at the $7 freight rate to Ontario. He expects to hear from vice-president D. C. Coleman on the matter within the next day or so.

The provinces of the Dominion appear to be returning to the Conservative fold in the same order the animals entered the ark.

One thing leads to another. The campaign urging the public to eat more bread in order to increase the price of wheat was hardly under way until another is suggested. Oatgrowers advocate eating more porridge to advance the price of their product. The next age may be the glutton age.

C. N. R. PREPARES FOR INFLUX OF HARVEST HANDS

WINNIPEG, July 31.—With their fields of wheat developing splendidly, and every prospect of a record crop, should nothing untowards develop within the next month, the farmers of Western Canada are casting anxious eyes toward the labor markets of the East, the Pacific Coast, and the United States points in search of laborers who will help garner in what now gives every promise of being a record wheat crop of the Prairie Provinces. After careful investigation by Provincial and Federal employment services, aided by agricultural experts, it is estimated that the three Western Provinces will require to import over 50,000 harvesters if labor needs are to be met.

The transportation, distribution and engaging of these harvest laborers has been given special care by all parties concerned and strenuous efforts have been made to arrange that no man coming into Western Canada in search of harvest work will experience either delay or difficulty in finding it. On their arrival at Winnipeg the harvesters will be advised what sections are seeking laborers, and a careful check will be maintained to see that as soon as the needs of any one district have been met, no further laborers will be sent there. Farmers will be advised in advance of the arrival of harvesters' specials so that they may meet the trains and make their arrangements for laborers.

At a conference held in Winnipeg, when the whole of the harvest labor situation was discussed, the needs of the three Western Provinces were stated to be as follows:

Manitoba: A total of 15,000 men required, to commence arriving by August 7.

Saskatchewan: 33,000 men required who should begin reaching the province by August 15.

Alberta: 13,000 men required, to commence arriving by August 15.

Of this total of 61,000 men required for the harvest fields, it is estimated that the Western Provinces themselves can supply some 3000 each or a total of 9000, leaving the requirements 52,000 from outside sources. The dates by which the men will be required are, of course, dependent upon weather conditions between now and the time harvesting operations commence. The various employment service organizations will keep closely in touch with the situation, however, and any changes in dates will be made known.

Indications to date are that the territory served by the Canadian National Railways in Western Canada will harvest the greatest crop in their history and consequently the demand for harvest laborers will be greater than ever before. The Pacific Coast is again expected to provide a certain percentage of the needed help, but in the main it is to Eastern Canada and the United States that the farmers of the west are looking for their harvest labor. In anticipation of the heavy traffic over their lines the executive and officials of the Canadian National Railways are turning all their efforts toward seeing that facilities are provided for the efficient handling of this movement.

It may have been only a coincidence that the first carload of rye arrived on the Winnipeg market the same day the Legislature passed the Liquor Control Bill.

CARRYING MILK TO THE COUNTRY!

Mrs. L. M. R. and her two children with her father and mother, have a cottage down near the border. Fresh milk is brought to their door every day by a farmer boy, yet Mrs. R. says she has a case of Pacific Milk to use for cooking and for her husband's cocoa at night. She says it seems impossible for her to get a real good cake with anything but Pacific.

We are glad to hear such experiences. It is encouraging.

ENTRANCE EXAM. RESULTS

VANCOUVER, July 27. — Maud G. Thorpe, of Nelson, is winner of the bronze medal presented by the governor-general to the candidate making highest mark in high school entrance examinations. The province is divided into ten districts, in each of which a medal is presented. Miss Thorpe won district No. 9 medal, with 428 marks. Catherine M. Urquart, of Rossland, won in district No. 8, with 408 marks.

Of 4939 candidates examined for entrance to high school, 2713 or 55 per cent. were successful. Besides these, 1791 pupils who have been attending graded schools of seven or more divisions were promoted on recommendation of principals. In all 4504 pupils will be issued certificates entitling them to admission to high school in September next.

Following is the results in the Fernie and Cranbrook centres:

Fernie Centre

Fernie—Anthony Kobus, 385; Robert J. Hubberstey, 368; John L. Shulaika, 348; Norman C. Bricker, 317; Annie M. Costa, 317; William Kennedy, 310; William D. Wallace, 304; Edna E. Charnock, 303; Norma A. Cox, 302; Frank D. Bricker, 300; Martin Costanzo, 300; George Fitzko, 300; Elizabeth Ihas, 300; Annie Janos, 300 and Cyril Steele, 300. (Promoted on recommendation) — Andrew Wallace, Alice Haigh, Elizabeth A. Podbielancik, Clarice Woodhouse, Geraldine Sherman, Vera F. Kuske, Mary E. Easton, Lena M. Taverna, Annie J. Baran, K. E. Alexander, Edith E. Shorthouse, Sherman Edgar, Steve Salanski, Pasquale Sam Audia, Muriel Ethel Littley, Alvera Stockwell, Matthew Flood, Emma Sofko, Tony Servello, Leslie T. Buchanan, Evelyn Hutson, Agnes S. Maltman, Tom Malsbury, Josephine M. Kennedy, Elizabeth Galloway, Clifford N. Uphill, Francis G. Walters, Verdant M. Snow and Cyril Steele.

Coal Creek—Edward L. Coughlan, 326; and Jane Parker, 300.

Corbin—Harry A. Cary, 328.

Crow's Nest—Constance M. Leonard, 312.

Hosmer — Mary K. Sorkie, 356; Alexander Schram, 324; and Nancy Downes, 300.

Cranbrook Centre

Cranbrook—J. M. Cummings, 398; James S. Harris, 362; Evelyn Ward, 334; Ejnar R. Erickson, 326; Madolina Harris, 319; Ivy H. Sanderson, 311; David Frame, 309; A. B. Haldener, 309; John R. Swan, 309; Mary E. Daniels, 308; Murray E. Garden, 306; Harold Helmsing, 305; and John L. Genest, 302. (Promoted on recommendation)—Ivy C. Dezall, Jessie E. McInnis, Winnifred A. Beale, Sophie Mader, Ena Davey, Reymond J. Bech, Peter J. Brennan, Mabel L. Stender, Ethel M. Sheers, Alleyn M. Wallinger, Margaret W. MacDonald, Loran K. Jordan, W. G. Taylor, Graham J. Dale, Cleland Parkin, Ronald L. Haynes, Pearl C. Pitchard, Thomas C. Marshall, James R. Johnson, Margaret A. Caven, Leonard J. Parkin, Wilhelmine E. Woodman, John F. Helmsing, Harland W. Clark and Edith M. Johnson.

Bull River Bridge — Brunel N. Murphy, 356; Harry Cassidy, 336 and Charles E. Langridge, 322.

Fort Steele — Allan H. Moore, 363; Robert W. F. Werden, 338 and Helen F. Wirth, 313.

Kimberley — Helen M. Bonner, 371 Donald A. Morrison, 333.

Mayook—Robert C. Creelman, 320.

Moyie—Edgar B. Montpellier, 335; Ernest W. Danielson, 330 and Mariet Conrad, 300.

Sullivan Hill—Ragner E. Johnson, 320.

Wardner—Murray V. Sinclair, 317; E. Eng. Young, 313 and Victor A. Holmes, 306.

Watsburg—James J. Robson, 370; Hazel M. Crowell, 300 and Ruby M. Waterson, 300.

Wycliffe — Edith A. Johnson, 326 and Frank T. Johnson, 317.

Yahk—Kenneth F. Horne, 325.

HIGH SCHOOL EXAM. RESULTS

Of the 2523 candidates who presented themselves at the high school and University matriculation examinations in the province in June, 1505 passed in all subjects and 498 were granted supplemental examinations.

The interesting fact in connection with the Greater Vancouver district schools in that the three students who obtained the highest marks in the province come from the South Vancouver High School, Mr. J. T. E. Palmer, principal. The names of these students are David Cunningham Warden, with 937 marks; Elizabeth Laurie Scott, with 924 and Grace M. Campbell, with 919 marks. Warden wins the $150 scholarship for securing the highest number of marks in the province and one of the five Governor-General's silver medals; Miss Scott wins one of the six district scholarships of $100 for being highest in her district, Warden's marks not being considered for this scholarship as he headed the entire province.

Although Miss Campbell secured the third highest marks in the province she does not win a Governor-General's medal, as the department stipulates that only the students with the highest standing in each district can secure this medal. It is interesting to note that other students with fewer marks win these medals.

The Governor - General's silver medals are all awarded in the Greater Vancouver district. The proviso attached to these awards is that no two medals are to be given to any one school. The medals have been awarded as follows:

David Cunningham Warden, South Vancouver High School, 937.

Margaret G. Keillor, King George High School, Vancouver, 899.

Clarke Arthur Simpkins, Kitsilano High School, Vancouver, 885.

Frederick B. Johnston, King Edward High School, Vancouver, 860.

Helena Margaretta Underhill, Burnaby South High School, 855.

The winner of the Royal Institution scholarships awarded by the University of British Columbia on the results of the matriculation examinations are:

Senior—Scholarship of $75 awarded to the student obtaining the highest standing in the province:

Barbara Grote Stirling, St. Michael's School, Vernon, 822.

Junior—Scholarship of $150 awarded to the student obtaining the highest standing in the province:

David Cunningham Warden, South Vancouver High School, 937.

—Scholarships of $100 each, awarded to the students obtaining the highest standing in their respective districts:

District 1.—Mary Evelyn Wheeler, Victoria High School, 827.

District 2.—Mary Thompson, North Vancouver High School, 852.

District 3.—Margaret Graene Keillor, King George High School Vancouver, 899.

District 4.—Elizabeth Laurie Scott, South Vancouver High School, 924.

District 5.—Winnifred Daisy Adams, Kamloops High School, 848.

District 6.—Nora Marion Brander, Cranbrook High School, 839.

Following are the results of the Fernie High School pupils:

Preliminary Course, Junior Grade — Maximum mark 1000 — Janet A. Lees, 647; Yvonne J. Redoules, 639; Mike Dragon, 615; Fred D. McVannell, 612; Mary E. Austin, 568; Edward Pennington, 562; Mary P. Hughes, 561; Arthur T. Littley, 561; Norman G. Uphill, 553; Wm. Woodhouse, 454; Christina Davidson, 537; Gladys Corner, 522; Howard A. Corrie, 513; John R. Dragon, 503; Victoria Rahal, 488.

Advanced Course, Junior Grade—Maximum mark 800 — Susie Polak, 491; Wm. Ross Workman, 469; Edna Martha Harvie, 464; Irvin Commons, 436; Edwin J. Bailey, 432; Albert Davies, 427.

Junior matriculation — Maximum mark 1000—Albin C. Vansacker, 760; Merle D. Wallace, 740; Agnes J. Culleton, 624; Rose Frey, 611.

Granted supplemental examination —Anne H. Podbielancik.

Senior matriculation — Maximum mark 1100—Jennie Harper, 806; Jack Hughes 686; Wm. H. Dicken, 565.

Granted supplemental examination —James Campbell, Edythe E. Kershaw.

The results in the Cranbrook High School were as follows:

Junior matriculation — Maximum mark 1000—Nora M. Brander, 839; Annie M. Chalmers, 745; Hazel M. Limbocker, 741; Olive G. Simpson, 692; Harriette I. Parker, 685; Gertrude P. Hopkins, 661; Neil D. C. Kummer, 638; Dorothy Hodgson, 592; Jean K. Wilson, 539.

Granted supplemental examination —Marguerite Clark, Richard L. Davis Arthur V. G. Lewis, Donald E. Morrison, Chas. Douglas Musser, Angus Wm. Macdonald, Raymond H. St. Eloi, Emily B. Tegart, Keith C. Wasson, Norman S. Wasson.

Completed matriculation — Bessie N. Woodman.

CRIPPLED BY RHEUMATISM

Began to Improve After Taking "Fruit-a-tives"

The Medicine Made From Fruit

You can get rid of Rheumatism. You can be free of pain—of swollen hands and feet—of aching arms, legs and back.

"Fruit-a-tives" will drive the cause of Rheumatism out of the system and give you permanent relief.

"For over three years, I was confined to bed with Rheumatism. Finally I decided to try "Fruit-a-tives". Before using half a box, I noticed improvement. I continued taking "Fruit-a-tives" improving all the time. I can now walk about two miles and do chores around the place".

ALEX. MUNRO, Lorne, Ont.

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

ADDITIONAL LOCALS

Fred Beale, of the Home Bank staff is holidaying at Vancouver.

Fred Johnson, who has been in the city for the last two months, is leaving today for his home in Vancouver.

Miss Katherine Hein, of Davenport, Wash., is the guest of Miss Jennie Strachan.

Rush Adamson, who has been in the city for the past month, leaves today for Detroit, where he has purchased a business.

Don't miss the whist drive and dance, Wednesday, August 8th. Catholic Hall, Refreshments, Cards 9 to 10:30. Dancing 11 to 1.

Mr. and Mrs. Thos. Hargrave, of Medicine Hat, motored through Fernie on Saturday last on their way to Penticton.

Tourists arriving in town the last day or two report road crews at work between Pincher Creek and Crow's Nest. Better late than never.

The Junior Baseball Club will give another dance in Ingram's Hall on Saturday night, August 4. Three piece orchestra. Ladies free; gentlemen 25c; 10c per dance.

The Whitney Boy's Chorus, which will appear 150 strong in Fernie on August 13, have secured the Skating Rink for their performance, it being the only place in town large enough to accomodate the attraction.

Mt. Fernie Lodge and Esther Rebekah Lodge I. O. O. F. are holding their annual Memorial Service and Decoration Day on Sunday August 5. All members of these orders are requested to meet at the Oddfellows' Hall at 2:30 p.m. Visiting members cordially invited.

Beginning Aug. 1 it is now necessary that all form letters, post cards and other letters acknowledging the receipt of sums over $10 carry stamps from 2 cents to $1, according to the amount of money received. The maximum tax, however, is $1, formerly it was $2.

Although warnings against the forest fire menace have been sent out repeatedly, Hon. T. D. Pattullo, minister of lands, has another appeal to make to the citizens of British Columbia. The hazardous season has arrived and care during the next two months will mean a saving of millions of dollars.

The Rotary Club will get behind the Whitney Boys' Chorus, which will appear in the Fernie Skating Rink, on August 13 and are asking all other Lodges, Churches and Clubs to do likewise. This is one of the greatest attractions in America and Fernie has only secured their engagement by reason of its location. They are only appearing in nine cities in Western Canada and in view of this fact it is up to the citizens and children of Fernie to make their visit a real success.

OLIVET BAPTIST CHURCH

Lord's Day—
11 a.m.—"A Study in Colossians."
2:30 p.m.—Sunday School.
7:30 p.m.—"In Touch With God."
Rev. Campbell will speak at both services.

SYDNEY STEEL STRIKE IS OVER

SYDNEY, N.S., Aug. 2.—The Sydney steel strike is over. At a mass meeting of steel workers at union headquarters last night about sixty-five per cent. of those present voted to end the strike and return to work. The union executive will notify the British Empire Steel corporation accordingly.

In their resolution which formally ends the strike, the steel workers complain that every man's hand is against them, and they censure the people, courts, police, newspapers and the federal and provincial governments.

NEWGATE NOTES

Rev. Mr. Garlick and Mrs. Garlick, of Michel, spent the week-end with Mr. and Mrs. E. Lynn. Mr. Garlick conducted English Church service on Sunday morning which was much appreciated by the residents.

Mr. and Mrs. J. A. Macdonald and family left by motor this week for Banff and Edmonton.

Mr. Robichaud, of Fernie, is relieving Mr. Macdonald at the Customs office and Mr. Robertson, of Winnipeg, is relieving Mr. Lynn of the Immigration office.

Mr. and Mrs. Lynn are leaving on Sunday on a motor trip to Banff.

Miss Jean Mingay, R. N., of Houston, Texas, has returned home after spending a month with her sister, Mrs. W. M. Young. Miss S. B. Mingay, of Fort William, Ont., is spending the summer with Mrs. Young.

Mrs. Art Fleming and family are in camp at Sophie Lake for a couple of weeks.

Mrs. Hart and Miss Laura Hart leave next week for Grand Forks, N. Dakota, where they will remain until next June, While Miss Laura is attending High School there and Mr. (Bud) Hart has accepted a position there also.

Mr. S. Minnick has been under treatment in a Seattle Hospital for some weeks and is very greatly improved.

Mrs. Young entertained at tea on Thursday afternoon in honr of Mrs. Hart and her sister, Miss Mingay.

IN MEMORIAM

In loving memory of Isabella, the beloved Wife of Mark Branch, who died in Michel on the 2nd day of August, 1921, age 45 years.

Ever remembered by her Husband and family, Coal Creek.

LOCAL & GENERAL

Miss Appleyard, of Minneapolis, is the guest of her sister, Mrs. Sanborne.

Miss M. Hogan left on Wednesday for a month's holiday at the Coast.

Miss Mary Liphardt returned to Calgary on Wednesday after spending a month with her parents.

Work on the new addition to the Public School is proceeding very satisfactorily.

Paddy Hughes is rebuilding a residence opposite his old home on Victoria Avenue.

The G. W. V. A. Band will hold a Concert on Victoria Avenue on Sunday evening at 7:30, weather permitting.

A meeting of the Ladies' Guild of the United Church will be held at the close of the evening service on Sunday, August 5.

Don't forget the social and dance in the Catholic Hall on Wednesday, August 8. Cards from 9 to 10. Dancing from 11 to 1. Admission 50c.

High School students: get your copy of the "Zephyr" now from Rose Frey, Agnes Culleton, Dorothy Corrie, Violet Coughlan or Louis Rudnicki.

The regular vaudeville show which has been playing at the Grand every Saturday night will be discontinued until further notice.

Since the road has been improved into McBain's Lake, quite a number from Fernie have been paying visits to that popular spot.

Sandy Macdonald, of Winnipeg, was in town on Wednesday. He was returning from a trip to Vancouver and dropped off to look over his Fernie interests.

A meeting of the executive of the Old Timers, Association will be held in the Council Chambers at 8:30 p.m. on Tuesday to make arrangements for the picnic of August 15.

Owing to the fact that the town is practically deserted on Wednesday afternoon, the Ladies' Guild Tea will be held on Tuesday afternoon, August 7, from 3:30 to 6:00, at the home of Mrs. H. F. McLean.

A supply of "history books of the 54th Kootenay battalion" has been received and all members of the 54th who have not yet received a copy are requested to make application for same to J. W. Shorthouse, Secy, 54th Battalion Association.

Thirty St. Agatha Girls of Christ Church returned home last evening after ten days camping at Morrissey. They were favored with fine weather which afforded plenty opportunity for hiking, swimming, games and campfire sing song and wish to thank all who kindly assited with tents, eats, etc, which helped so much to make the 1923 holiday a huge success.

The annual Sunday School picnic of the United Church will be held on the island in the City Park on Wednesday, August 8. Cars will leave the church at 2 p.m. Food to be sent to the church not later than 1 o'clock. Each child attending is asked to bring a drinking cup. Usual athletic sports will be held. Parents and friends are asked to co-operate and make this picnic a success.

Fernie has now a good temporary swimming pool in the Park. It is about one hundred yards long and ranges in depth of from one to five feet. Mayor Henderson has had a gang of men at work all week on the proposition. This pool is absolutely safe for children and parents would do well to recommend it to their children. In view of the recent drowning accident in the Elk River the new pool will be a God send.

Great excitement reigned at Mud Lake for a few minutes last Sunday afternoon, when the raft which has been built out there for diving, capsized and tipped its occupants into about seven feet of water. At the time of the accident, Mrs. L. Ashton, A. Pierpont, Sr., Amy and Chrissie Davidson were on the raft which had been paddled about seventy-five feet from the shore. The two Davidson are good swimmers, and easily reached shore. Mr. Pierpont went to the bottom but managed to fight his way out of the water, but it was only with great difficulty that Mrs. Ashton was rescued by several other bathers. She was brought ashore and was revived after being unconscious for nearly five minutes and is now none the worse from her experience.

WHITE STAR YEAST CAKES
Are Not The "Just as Good Kind"
THEY ARE THE BEST

Mayor Henderson has purchased a Studebaker car from Jack Wilson.

Mrs. Fisher, of Vancouver, B. C., is the guest of her son, A. I. Fisher.

The Junior Baseball team are playing Michel in Michel next Sunday afternoon at 2 p.m.

James Grundy, of Michel, purchased a Star car from Wm. Johnson this week.

The regular play for the Wilson Cup will take place on Tuesday, August 7th, at 4 p.m.. Draws will be posted.

The annual ice cream social of the Ladies' Guild of Christ Church will be held in Victoria Hall on August 14, from 3:30 to 8:00 p.m.

Fernie Beauty Parlour, for care of you hair, face and nails. Combings made up. 70 Dalton Avenue, Phone 313. j27|6.

Don't forget the Moose dance in Victoria Hall, on August 7th. Dancing 10 p.m. to 2 a.m. Whitehouse orchestra. Admission 50c.

Miss McQuaig, demonstrator for Perisian Art Needle Work will be at The Trites-Wod Co. Store August 3, 4, and 6, showing a full line of stamped linens and threads.

The Knights of Pythias Memorial Service will be held on Sunday, August 5. Members will meet at 2 p.m. in the I.O.O.F. Hall. Visiting brothers cordially invited.

Mr. and Mrs. Geo. Moses returned from their holidays in Alberta on Saturday last. Mr. and Mrs. Arthurs, of Brockett, Man., returned with them.

D. Nicoletti, who has purchased the Fernie Hotel, took over the business on the first of the month. Wm. Kerr who has had many years experience in the hotel business, will have charge of the office.

Education in British Columbia is well cared for and a marked evidence of the efficiency of the system was shown in the entrance and matriculation examination results just issued. The examiners were loud in their praise of the papers handled and the percentage of successful pupils speaks well for the teaching staffs throughout the province.

Matthew Whitelaw returned on Sunday from a holiday trip to Winnipeg. During his stay in Winnipeg, Matt took in the big football games between Nanaimo and Ft. Rouge. Geo. Linn, formerly of Fernie, and Alex Fowler, of Michel, were both on the Nanaimo lineup. The score was 2-1 in favor of Nanaimo the first game and 0-0 the second game.

The Executive Committee of the Local Branch G. W. V. A. invite the co-operation and support of the residents of Fernie and district in the formation of Sports and Carnival to be held on Labor Day, September 3. All persons interested in the project are requested to attend a meeting in the Council Chambers tonight (Friday) at 7:30. A special invitation is extended to the members of the July 1st Sports Committee.

FINANCIAL AND MARKET NEWS

Gathered over the private wires of Burdick, Logan & Company, Ltd.

Copper sales have been in fair volume with prices a little firmer. While domestic sales have been in small lots, one sale of 2,000,000 was made at 14 3|4 cents. Some 14 5|8 cent copper is obtainable, but not enough to make a market.

Export sales aggregate about 2,500,000 pounds. Despite slight decline in price of both electrolyptic and standard copper on London exchange, both the Copper Export Corporation and the independents have advanced their price abroad about one-tenth of a cent.

France has been the best European buyer during the last few days. England has been buying small quantities. Export Copper Association has done a fair business with the Orient during the last week and enquiries from China and Japan are rather active. Several good offers are out for substantial amounts for the Orient, with good prospects for sales. While the market appears weak on the surface, it is not really so and may change to activity soon. Producers seem satisfied to await the time when buyers are ready to come back into their market. There is little copper in hands outside of market, and this is a factor in keeping prices firm.

Most domestic and foreign buying continues from hand to mouth, but the situation is sound as inventories are low and consumers have been out of market for a long time.

Electrolyptic copper for domestic shipment is 14 3|4 cents, delivered, to end of October. Lake copper delivered is 14 7|8 to 15 cents. Aside ship New York price is 14 5|8 to 14 3|4 cents, and price c. i. f. London and Hamburg is 15 to 15.10 cents.

Boston—Exports of copper during June were 66, 942, 000 pounds, largest in over a year except January. Exports first half year were 375,079,680 pounds. Estimating July at 65,000,000 pounds, exports for seven months are 440,079,680 lbs against 442,346,340 a year before. Shipments of French ports last week were over 10,000,000 pounds. During 1922 total shipments to France were 135,387,840 pounds against 98,731,640 in 1921. During first three weeks of July exports of copper from New York were 32,020,800 pounds.

Boston—Granby Consolidated Mining Smelting & Power Co., in the first six months of this year, produced 16,000,000 pounds, running somewhat ahead of the scheduled rate of 30,000,000 pounds a year. Production costs and earnings are comparable with those of last year, considering two increases in wages since October 1, 1922.

Work is progressing rapidly on the company's new concentrator at Anyox, scheduled for completion about the first of the year. This mill will add materially to the flexibility of operations, and improve furnace metallurgy through production of concentrates from ore not entirely suitable for direct smelting.

Advantage will also be derived from the cheap hydro-electric power now assured through completion of storage dam to impound water supply for winter operation.

San Francisco—Standard Oil Co., of California, confirms report that it will erect at El Sengundo, the largest oil storage tank in the world. It will cover 20 acres, be completely roofed over, 28 feet deep, concrete lined, and hold 3,000,000 barrels of oil. Standard Oil of California is now completing another tank of 2,300,000 barrels capacity. Its largest tank now in use has 1,750,000 barrels capacity.

Los Angeles—Amalgamated Oil Co., subsidiary of Associated Oil, increased its Santa Fe Springs production by 25,000 barrels this week when Green No. 2 was completed at 4371 feet with 15,000 barrels initial flow, largest well ever brought in under control of Santa Fee Springs. A second producer is making 10,000 barrels of 35 gravity oil.

London—Prospects of a big new Canadian Government loan interests London, which remembers that the Dominion enjoys outstanding loans at rates as low as 2 1|2%. She has other loans which were obtained at 3%, 3 1|2%, 4% and 4 1|2%.

Her lowest rate, 2 1|2%, was on a loan of $5,000,000 obtained in London in 1897, which has still 24 years to run. The 3% was also obtained in London, at intervals from 1888 to 1894 totalling $36,000,000, with 14 years still to run.

While 3 1|2% loan was raised partly in Canada, bulk of it came from this market. It totals $177,000,000 and matures from five years hence to 1950, at which date $137,000,000 falls due. The 4% money came from England and aggregates $94,000,000, maturing in 1960.

Commodities — Marked improvement was noted in the demand for steel products. Consumers of pipe, wire, tin plate and bars were particularly active, and railroads continued to place orders for rails and other materials. Some roads are in the market for additional tonnages. Steel mills have started to put the eight-hour day into effect, among them Republic Iron & Steel, whose blooming mill employees have been placed on the shorter day basis. Expected increased costs to follow shorter working hours and reduction of output, due partly to weather, have helped producers in maintaining prices and may be responsible to some extent for the increased interest shown by consumers.

Wheat market was nervous and irregular last week, alternating between sudden rallies and declines, hovering close to or below the dollar mark. Record low prices for season were made in early dealings, July sagging to 196 3|8 cents on increased hedging pressure against new crop receipts. A rally of more than 5 cents a bushel followed on evidence of a fair export trade and technical reasons, but liquidation broke out afresh, and the bulge was not fully maintained.

Corn was relatively steady throughout, finishing week with net gains of 1 1|2 cents a bushel with July at 84, due to dry weather in southwest and light country offerings.

Victory Loan prices:

1923	101.05	1925	101.35
1924	101.25	1931	101.95
1927	102.35	1937	103.40
1927	703.75		
1932	103.05		
1933	105.95		
1934	103.60		
1937	108.35		

As the harvest season approaches the annual discussion as to whether "shocking' 'or "stooking" is the proper term to describe the exercise of standing sheaves of grain on their beam ends in orderly groups is revived. Providing the sheaves are made to stand up and retain their formation both terms are permissable as far as the farmers are concerned.

AMERICAN ALPINISTS MAKE FIRST ASCENTS OF PEAKS IN THE CANADIAN ROCKIES

Two of the highest peaks in Jasper National Park, Mount Unwin and Mount Brazeau, have just been climbed for the first time. The honor of making these first ascents has fallen to Mr. Howard Palmer, of New London, Conn., and Mr. Allen Carpe, of New York, men who have won international reputations in Alpine work. It was Mr. Palmer who first ascended Mount Sir Sandford, the giant of the northern Selkirks. He is the vice-president of the American Alpine Club and a member of the Alpine Club of London. Mr. Carpe is a member of the American, Canadian and Swiss Alpine Clubs. Both are Fellows of the Royal Geographical Society.

The climbers left the Canadian National Railways at Jasper and proceeded to Maligne Lake, a distance of thirty-five miles, and in seventeen days explored and mapped a territory of remarkable scenic beauty. Interviewed on their return to Jasper Park Lodge, they described the trip as one of the most interesting made in several years of mountaineering.

"The object of the expedition," said Mr. Carpe, "was to explore the mountains between Maligne Lake and Brazeau Lake, particularly to locate and climb Mount Brazeau and to map the extensive Brazeau ice field. Mount Brazeau and Brazeau ice field were discovered and named by Prof. A. P. Coleman, of Toronto, who visited them in 1894 from the Brazeau Lake side and made an unsuccessful attempt to climb Mount Brazeau, which he estimated to be 11,000 feet high. The mountain had not been approached since then and the country had not been mapped, so that the location of Mount Brazeau and Brazeau ice field were uncertain. We made the first ascent of Mount Brazeau and three other nameless peaks in the vicinity, also of the prominent mountain on the south shore of Maligne Lake, known as Mount Unwin. From our observations, we were able to identify the Mount Brazeau Range, with the mountains visible directly at the head of Maligne Lake, about seven miles east of the position shown on the current maps. We obtained other topographical data which has not yet been worked out

"For the ascent of Mount Brazeau we rowed across Maligne Lake to near its head and carried packs up the stream, entering from the south. From a camp at the head of this valley, we first climbed a peak on the south, about 9,300 feet high, for purposes of observation. Then, we left camp at six a.m., ascended the glacier at the head of the valley and climbed up an icy gully to the summit of the fine dome-shaped snow peak visible from the lake. This peak is about 10,600 feet high and is situated on the edge of the large Brazeau ice field, of which it commands a good view. This summit was reached at one p.m. Proceeding along the crest of the range towards the north we reached a second summit of nearly the same height at about 3.30 p.m., and at last attained the main summit of Mount Brazeau at 6.10 p.m., over very steep snow slopes. The altitude of Mount Brazeau appears to be at least 11,000 feet. Leaving the summit at 6.30 p.m., we retraced the same route and reached camp at 1.50 a.m., the descent of the glacier being made in total darkness.

"Mount Unwin was climbed from the southwest from a camp in the Maligne Valley about twelve miles above the foot of Maligne Lake. This is a double-topped mountain, both summits being well over ten thousand feet. The south and west faces are made up of an intricate series of cliffs and ridges through which we climbed to the final snow-covered summit. In several places impassable cliffs were circumvented by traverses on icy ledges and in steep couloirs, requiring step cutting. We left camp at 5.45 a.m.; the summit was reached at 4.15 p.m., and camp regained at 10.50 p.m.

"The view from Mount Unwin was among the most expansive which we have ever seen, extending from Mount Forbes in the south through the Columbia group, with Mount Alberta and the great Columbia ice field, the Wood River and Hooker groups, Mounts Fryatt and Cavell, the Fraser and Geikie groups to Mount Robson and Resolution in the north and the Brazeau Range in the east. In the distance, Mount Sir Sandford and the Adamant Range, in the northern Selkirks, were clearly visible, and nameless peaks on the Gold and Cariboo Ranges."

NEW HIGHWAY WILL AID CROW

(By J. F. Spalding)

The Scenic International Parks Highway was put on the map at a convention held in Missoula on July 27 and 28, which was attended by representatives from the principal towns through which it will pass between Salt Lake and Banff. The delegates representing the Canadian end of the highway were J. H. Hanna, secretary of the Calgary Board of Trade; J. W. McDonald, mayor and president of the Macleod Board of Trade and myself, representing the Tourist Association.

The highway passes through Salt Lake City, Ogden and Logan, in Utah; Preston, Pocatello, Blackfoot, Idaho Falls, St. Anthony and Moninde, in Idaho; Dillon, Wisdom, Hamilton, Missoula, Ravalli, Polson, Kalispell, Whitefish and Eureka, in Montana; enters Canada at either Gateway or Roosville—the latter place if the United States Customs Department will put an officer there. It then comes up to Elko, Fernie, Blairmore, Macleod and Lethbridge with a branch down to Cardston and Waterton Lakes Parks, then up to Calgary, Banff, Lake Louise, over the Banff-Windermere road to Cranbrook and back to Gateway (or Roosville) and over the same route to points back to Salt Lake City. Connections to Yellowstone and Glacier Parks will be included.

The Canadian delegates were driven from Kalispel to Missoula by Mr. A. V. Gibson and back from Missoula to Fernie, by Mr. Gibson as far as Kalispel and from there to Eureka by Mayor Boorman, of Kalispell, and from Eureka to Fernie by Mr. J. G. Masek, of Eureka.

The name given to the highway is very appropriate, while the Canadian delegates have only seen this end of it as far south as Missoula, a distance of 260 miles, the whole of which is wonderful, they were assured by many who knew what the balance down to Salt Lake is like, that it is even more scenic. The road surface, with two short stretches excepted, is excellent throughout, these stretches being 16 miles close to Lima which is undergoing repairs now, and 14 miles between Eureka and Whitefish which the State Highway Commission have given assurance would have work commenced on it at once.

Everybody is very enthusiastic about this highway. Whilst there is a north and south road in eastern Montana, there was no named road over the Rockies in western Montana until this route was adopted by this convention. That there will be very considerable travel over it which will commence almost at once, there is very little doubt. We heard many people express their intention of driving up into Canada during the next month or two just to see for themselves what the road conditions are. Though not good by any means, the stretch between Eureka and Whitefish is not half so bad as it has been painted, and as it is the only poor piece, those who come up before it is fixed up will not kick about it, and are certain to return with very good reports.

This highway directly connects with Belton on the west side of Glacier Park. There is a road under construction through this Park from the eastern side to Belton which it is expected will be finished next year, and there is not much doubt that much of that travel will be diverted from Belton over the new highway.

At the present time a large proportion of the travel into Canada comes up by way of Yellowstone Park through Montana on the eastern side of the Rockies to Glacier Park. A considerable mileage of that route is through prairies country, dry and parched during the warm weather, and offers little of scenic interest. The new highway on the other hand runs through a well-timbered valley having beautiful mountains on both sides of it and splendid farms and ranches all through. This is especially noticeable all the way between Kalispel and Missoula, where there are some of the finest farms I have ever seen.

All around the west shore of Flathead Lake are large cherry orchards whose entire products go to the New York markets.

Flathead Lake, which is the largest body of inland water in America outside of the Great Lakes, is perhaps the most beautiful part of the whole highway. Going down we followed the road on the west side of the lake, and coming back we took the road on the east side which makes a drive of over 100 miles high on the hillside and overlooking the lake for almost tthe entire distance.

When the beauties of this highway becomes known, it is certain to bring a great influx of tourists to the Crow and Canadian Rockies by way of Roosville or Gateway, and also entice a great deal of travel from northern points, all of which must of a necessity benefit all the towns through the Crow.

Arrangements are being made to have the entire route marked as quickly as possible, and the markings decided upon will be white as a base and black bars and block R and L letters.

The President of the Association is Mr. S. Coffey, of Missoula, Vice President, Jas. W. Davidson, of Calgary; Secretary, Chas. Roberts, of Missoula. On the Board of Directors are: Mr. J. W. McDonald, of Macleod; L. S. Crossbie, of Banff and J. F. Spalding, representing Canadian interests.

The people of Missoula entertained the delegates royally.

TIMBER SALE X2769

Sealed tenders will be received by the Minister of Lands, at Victoria, not later than noon on the 2nd day of August, 1923, for the purchase of Licence X2769, to cut 200,000 feet of Tamarac, Pine, Fir and Spruce on an area situated near Jaffray, Kootenay District.

Two years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B.C., or District Forester, Cranbrook, B.C.

NOTICE TO CREDITORS

TAKE NOTICE that all persons having claims against the Estate of Warriet Thomas, deceased, late of Coal Creek, B.C., who died on the 16th day of May, 1923 are requested to file their claims duly verified with the undersigned on or before the 16th day of August, 1923, after which date the executor under the will of the said deceased will proceed to distribute and deal with the estate having regard only to such claims as he shall then have received notice.

Dated at Fernie, B.C., this 4th day of July, 1923.

Herchmer & Mitchell,
Solicitors for James Robert Johnstone Executor.

West Coast Motor Tour

1. The C. P. S. S. Motor Princess. 2. Chuckaunt Drive, a link in the Pacific Highway. 3. Dance floor on the ferry.

NOT only have Bellingham, Wash., and Victoria, B.C., been brought into closer connection and more friendly relations by the recent inauguration of a ferry motor transport service by the new Canadian Pacific "Motor Princess", but western tourists as a whole have been provided with a new route to the Capital City of British Columbia, and one that has the alluring charm and refreshing diversion of a three and a half hours' water trip. The new water route for touring motorists from the mainland to Vancouver Island forms the base of a triangle which provides a circuit tour from Victoria through Nanaimo and Vancouver and via the beautiful Pacific Highway through New Westminster and Bellingham to Oregon and Washington destinations. This tour takes one through some of the most beautiful scenery on the continent. Exhilarating sea breezes are enjoyed along the whole route, which is through country the climate of which is so delightfully equable, that the semi-tropical foliage is pleasing to the eye and fragrant the year round.

In addition, the ferry links the wonderful roads on Vancouver Island with the California Bee Line, the western arc of the great 6,000 mile circle tour which embraces twelve national parks in the United States and three in Canada, and of which the Banff-Windermere Highway through the Canadian Rockies, to be officially opened on June 30th, forms one of the most delightful parts.

The ship which has made this Mainland-Island-Circle tour possible was specially designed for the service and possesses many distinctive features. She has parking space for 50 automobiles on two decks and accommodation for 250 passengers. A saloon, smoking room, restaurant, dance floor and deck spaces for promenading have been fitted up for the convenience of the travelling public, and the vessel is equipped with twin diesel engines which ensure a speed of 14 knots in all weathers.

WORLD'S PRESS

A Cunning Move

Natal Advertiser: It would seem as if Turkey has been engaged in playing-off the United States against the European Powers, with oil as the bait, and America's entanglement in European affairs as the final result.

A Wretched Disguise

Daily News: If anyone is opposed to the idea and the work of the League, let him say so openly in the ears of ex-soldiers and all who know what war really means. But Jingoism disguised as meanness is the ass in the jackal's skin.

Wolf! Wolf!

Kansas City Star: Premier Baldwin says haste must be made toward reparations settlement, because Germany is so rapidly approaching economic chaos. But Germany has been approaching economic chaos at breakneck speed so many years that many are beginning to doubt whether there is such a condition applicable to Germany.

An Unsatisfactory Expedient

Daily Chronicle: It is true, no substitute has yet been found, at schools or at Universities, for the examination method of testing knowledge; and yet all teachers who take education seriously are well aware that the students, who have made the best use of their time from the point of view of mind development, are by no means always those who have the knack of displaying all their goods in the shop-window of an examination paper.

Education's Purpose

Daily Herald: It does not matter how we sharpen a razor—whether on an expensive strop or on an old leather belt, or on the side of one's shoe. The great thing is to get a good edge on the razor. So it is equally immaterial what method of education are used: the important matter is to put a keen edge on the mind. Every kind of study is permissable, excepting only the kind that dulls the pupil's intellect and deadens his imagination.

A Civic Duty

La Presse: Picnickers who daily invade our public parks, especially that of the mountain, should remember that it is their duty not to leave remains of their meal lying about. Let us hope that it will not be necessary for the police to take action and that everyone will bear in mind the assistance which he should give those who are entrusted with the task of keeping clean the roads and lawns of our public parks. This is a civic pride which all should practice. In it is bound up the health of the people and the good name of the city.

A Simple Solution

Baltimore Sun: The problem of forged currency notes, it appears, has been solved in Germany. So successfully, indeed, that the Reich has been able to abandon the complicated process of copper-plate printing in favor of printing from type, which permits a tenfold increase in the volume issued. But this victory over the ingenuity of the counterfeiter cannot be attributed to Teutonic ingenuity. It is due solely to the fact that, as most German bank notes are no longer worth the paper on which they are printed, forgery has become unprofitable.

High Finance

Manchester Guardian: The Bank of England is evidently afraid of the pound slipping too far away from the dollar, and hopes to check the fall by raising its rate of discount. But if it succeeds in doing this it will apparently succeed in accentuating the fall in prices, which is exactly what the Prime Minister wishes to avoid. The relations between the Bank of England and the Government are necessarily close, and, although the Bank is by no means a Government bank, as the words are commonly understood, it seldom happens that they pursue divergent policies.

Grit

Morning Post: Most certainly, no country is more entitled than ours to praise in Carlyean pæans its great men. Our Empire was made not by the edicts of a bureaucracy or the working of a Government machine, but by the high resolves and infinite daring of great adventurers. And in the same way, we have held our own in the hard competition of the world by sheer grit and native tenacity, and that queer, grim, but healthy humor which comes to men who look bravely on life and refuse to call themselves slaves. The Briton is not and we hope, never will be, a Robot.

The Problem in India

Times of India: The only school of thinkers that has been justified by the course of events which believes in the reform and that through them lies the future of India. Nothing has shown more clearly the correctness of this view than haste of the Dasites to associate themselves as stern voices of the people with the Reformed Government. The Liberals must lose no time in getting over their trivial differences and uniting in support of the only practical progressive program which will lie before the electorate and in opposition to Mr. Das and the friends with whom he has not agreed to differ.

Relations With Britain

Washington Post: The contributions to the London press protesting against the erection of statues to Washington and other American heroes are to be regarded as exceptions that prove the rule in the matter of British sentiment toward this country. The protesting ones are conspicuous by their fewness. Doubtless there are some anti-British individuals in this country who would protest against the erection of statues to British heroes here. But they also are exceptions that prove the rule of the opposite. On every hand and from every quarter of America as well as from every section of Great Britain have come and are coming proof of the increasing friendship between the two nations.

Indians Celebrate Opening Banff-Windermere Road

1. Indians, gaily caparisoned, await the judges' pleasure. 2. Lieutenant Governor Nichol smokes the pipe of peace—to the delight of the oldest members of the tribe (3). 4. Car-No-Sic-Klmeet and the Indian chief.

THE Indian, though reticent and undemonstrative, is ever ready to show his appreciation of the fact that the pale face is a friend, a brother to him. More often than not, he takes advantage of his fetedays to show this appreciation and good-will in simple ceremonies which honor the white man by bestowing upon him the name of one of their own, and a seat in their family and council circles.

The opening of the Banff-Windermere Motor Highway on June 30th occasioned the gathering of a large number of Kootenay Indians from various reserves, at Invermere, B.C. Here they entertained and were entertained by a host of visitors to the district who, having attended the opening ceremonies were easily induced by the glories of the country to stay for a few days. On this occasion the Kootenays honored Lieutenant Governor W. C. Nichol of B.C., who had officiated, with Lieutenant Governor Brett of Alberta, at the opening, by making him an honorary chief of their tribe. Robert Randolph Bruce, a leader in Windermere and Kootenay development was also asked to enter the circle, and after the smoking of the ceremonial pipe and listening to the liturgy in the Kootenay language, was dressed in all the panoply of power, head-dress and beaded clothes, and accepted into the tribe as full chieftain, being given the name of Car-No-Sic-Klmeet, which signifies "Red Sky", after a famous council chief of the tribe who has long since passed away. Mr. Bruce expressed his pleasure in a largesse of tobacco and a gift of a one-hundred dollar bank note for the celebration.

This being over the sports were resumed and prizes were awarded to the best-costumed Indian on foot, the best costumed squaw, the best caparisoned Indian on horseback, and to others for neatness of tepees and the best travois and papoose in baby trap, and for their demonstrated skill in athletic sports.

LIVE IN CAVE BY BIG CITY

TOPEKA, Kans., July 29. — A "Swiss Family Robinson" was discovered yesterday on a little island in the Kaw river. Three persons made up the "family"—a man and his two children, one a girl, 15, and the other a boy, 17.

The discovery was made by T. D. Williams and Miss Eva Corning, welfare officers. And the little island—only about three blocks in size—is only a few minutes' drive from the capital of Kansas.

But from the discovery of this little family living so near civilization, and yet so apart from it, there unfolded a tale of a modern Alice and her adventures in Wonderland.

True, there was no march hare or mad hatter, no Tweedle-dee and Tweedle-dum, but the things the girl —Emma Adams is her name—found beyond the magic mirror were as startling to her as were the discoveries Alice made.

For one thing there were girls' frocks—and she had known only boys' overalls. There was a red ribbon for her hair—hair that had only known tangles. And shoes—her first.

She saw a city. She had seen a city once before—eight years ago—on a visit she barely remembered. But now she is of the twentieth century and may see the inside of church and schools for the first time.

It was not easy for the officers to persuade Emma to step up to the mirror. She was timid and a littel awed. And her father and brother showed resentment at the intrusion upon their primitive life. The men even cast significant glances at a long-barrelled old rifle leaning against the wall of the cave-home.

The county detention home, to which she was taken, is a fair cry from her cave-home—a gloomy place ten feet square where ducks and geese and chickens had as much freedom of access as the human tenants.

Violating the commandment, "Thou shalt not steal," thieves who recently looted an Oklahoma hotel, carried off the Bibles placed in the rooms by the Gideons.

Sir Wilfred Laurier once said that he was "a democrat to the hilt." Although a Republican politically, President Harding is thoroughly democratic in his intercourse with the people.

A Dayton engineer has invented a "bantam" airplane that is driven by foot power. Any boy who can ride a bicycle or girl who can run a sewing machine can operate the aerial flivver.

A CASE OF DRESS UP OR GET OUT

Down in New York State there is a very brave man by the name of Stevens. He is president of the Westchester Title and Trust Company, and as such is the employer of a large number of bright young women. One day recently, he sat looking them over. Stevens took stock, so to speak, and came to the conclusion that his eighty beauties didn't have enough on. So it was that he picked out what looked the worst case, or was it the best. In any event he told the girl to go right home to her mother, garner some clothes, and put them on. This was the beginning of dress reform in the office of the Title and Trust Company at White Plains, N. Y.

Little girls and big ones, blondes and brunettes, tried to explain to the boss that nearly all the frocks and sweaters are sleeveless this year, but it did no good. Mr. Stevens, hard hearted man that he is, said that such attire, no sleeves and low necks, might be all right for ball rooms, bue he was not, as it happened, running a ball, but rather a business office. It was intimated to each and every one of the eighty that if they expected to continue their emplоment with the Title and Trust Company, they must "dress in a manner becoming a business office." And up to date they have obeyed the mandate.—Saturday Night.

Prairie farmers who are looking to British Columbia for harvest help advocate a "hands across the mountains" movement.

The STAR CAR

THE creation of the Star Car is the most important and brilliant accomplishment of any individual identified with the automobile industry since its inception.

Smartness in looks, and thoroughness and modern design in a low priced car was unheard of until the Star was created by W. C. Durant, the pioneer builder of automobiles and identified with the introduction and success of the Cadillac, Buick, Oakland, Oldsmobile, Chevrolet and Durant Cars.

The Star Car marks the most advanced step since introduction of the automobile, for it provides for the first time a quality automobile, standardized in construction and operations for a modest sum of money.

The STAR FEATURES

$820.00 FERNIE

Continental Red Seal Motor.
Timken Rear Axle.
Timken Bearings, front and rear.
Spicer Universal Joints.
Selective Sliding Gear Transmission, three speed forward and reverse.
Single Plate Disc Clutch.
Half-elliptic Springs, underslung.
Stewart Vacuum Gasoline Feed with Supply tank at rear.
Electric Lighting by Standard Generator with Storage Battery.
Streamline Body.
One-man Top, with Gypsy Curtains and Side Curtains that open with Doors.

FERNIE LOSE IN PEACOCK

Fernie went down to an overwhelming defeat last Sunday afternoon when they played Coleman in the third round of the United Mine Workers' Union Cup Football Competition, the Alberta champions winning by a score of nine goals to one.

Swedeberg, Fernie's regular goaltender, failed to put in appearance and under the rules of the competition it was impossible to play Sofko their reserve goaltender, as only miners are allowed to participate in this series. Alex Adamson was called from the side lines to tend goal for Fernie, but was sadly out of practice.

Coleman won the toss and elected to play with the wind and sun behind them. The game had hardly started when Coleman broke away on the left and Redfern snatched up a perfect cross and scored. Coleman continued to attack and from a scrimmage in front of the Fernie goal the ball was sent back to Jackson who scored an easy goal. A foul outside the penalty area gave Coleman another chance, Booth went in goal with Adamson and just as the ball was sailing into the net he headed clear. Before half time came Redfern and Muir had scored Coleman's third and fourth goals.

From the kick-off following a nice combination run Coleman went right down the field and Redfern scored. A few minutes later Coleman again broke through but Adamson stopped Redfern's shot, Gould got the rebound right in the goalmouth but lifted the ball over the bar. Fernie broke away at last and getting dangerous in front of goal, looked like scoring, but Gould handled and Fernie were awarded a penalty. Thornton took the kick but shot past. Fernie continued their attacks but Coleman defense kept shooting the ball out to touch whenever they got the ball. Coleman gradually assumed the upper hand again and Muir got through and scored the sixth goal. The ball had hardly been in motion again two minutes when Yates added the seventh goal on a pass from Muir. From the centre, the ball went out to Alex Thomson on the left and getting away, he cleverly outwitted the Coleman defense and got right through, scoring Fernie's only goal of the match. A penalty was awarded Coleman when Robertson saved a sure goal by stopping the ball with his hands, Sharp took the kick and scored. Just before full time the same player scored the ninth goal for Coleman.

The lineup:

Fernie—Adamson; Booth and Wilson; Robertson, Riley and T. Joinson; Morrison, J. Joinson, Sharrocks Thornton and Thomson.

Coleman—Keddie; Fish and Dunlop; Yates, Jackson and Pate; Penman, Gould, Redfern, Sharp and Muir.

Referee—J. Turnbull, Blairmore.

DOROTHY PHILLIPS ENACTS HIGHLY EMOTIONAL ROLE

How far should the law take cognizance of circumstantial evidence? This is a question that has caused endless discussion for years and will continue to cause discussion. The opposition to it in some states is so great, that the courts will not hang a man for murder when he is convicted on circumstantial evidence. His crime should be proved beyond a peradventure of a doubt. Why, then, should any person be convicted of any crime on circumstantial evidence?

One of the finest examples of what circumstances can do to degrade the fair name of a woman is portrayed in "Slander the Woman," Allen Holubar's new First National production starring Dorothy Phillips, which will be shown at the Orpheum Theatre for two days, beginning next Wednesday.

In this super-production of modern life, Mlle. Yvonne Desmarest, portrayed by Miss Phillips, is caught in a circumstantial position which puts her in the light of a home wrecker. A jealous wife shoots a husband just as he forcibly embraces Mlle. Desmarest, much against her will, and within the full view of witnesses. Added to this, at the trial is a judge with an eye to publicity and votes at the forthcoming election, who brands her as morally responsible for the murder. Defenceless in the face of the evidence against her, the woman can do nothing.

But she fights. She even carries her fight to the fastness of the Canadian woods. The story of how she is again restored to her former place in society makes one of the finest soul-stirring dramas of modern-day life that has ever been produced. It is real and convincing, and carries the moral that wagging tongues bring only evil.

A portrait of Doctor Cook, done in oils, might be added to the Kansas City art gallery, where a picture of Jack Dempsey is on exhibition.

TOURISTS TURNING BACK AT THE B. C. BORDER

About the most unpopular man in the Crow's Nest Pass today is the Alberta minister of public works, according to tourists arriving in the city from making the circle tour via Banff and the Banff-Windermere road, thence through the Pass back to Lethbridge.

"The trail from here to the Summit is an abomination," said one Lethbridge tourist to the Herald on Tuesday. He had just returned from the trip.

"Alberta is losing thousands of dollars as a result of the continued bad condition of that part of the Red Trail from Lundbreck to the Summit at Crow's Nest," he said. "When I came through I passed four big cars stalled between Blairmore and Crow's Nest. I also heard these people telephone back to friends in British Columbia telling them not to attempt the Alberta roads but to turn back."

"That is going to be a black eye for the Red Trail portion of the Circle Tour, and it is unfair because, when the roads are in shape, this part is about as good as can be found. But now boulders are sticking up in the road so high that cars are damaged trying to come through, and one can hardly blame a tourist for turning back. That means through that Alberta is losing many times over the amount of money which it would take to put the trail in good shape all the way through. The road policy of the department of public works is very short-sighted and the people in the south should protest until something is done."

The Herald's informant declared that the Banff-Windermere road is a wonderful piece of construction, and that it truly runs through Nature's Wonderland. Thousands are making the tour this year and it is getting some great advertising, but unfortunately every booster has a knock for the Crow's Nest trail as it is at the present on the Alberta side.—Lethbridge Herald.

RAYNER AND ARTHURS WRESTLE TO A DRAW

H. J. (Yonge) Rayner, of Fernie, came within an ace of lifting the Canadian middleweigth wrestling championship in the match against Ernie Arthur, of Lethbridge, present title holder, at Coleman last Mandoy evening. The match ending in a draw, Rayner and Arthur each securing one fall before the final gong.

In the first round Rayner rushed over into Arthur's corner and Arthur hit the mat from a double wrist lock. Rayner then secured a body scissor, Arthur broke away securing a toe hold and followed up with a head lock. From then on until the fourth round, the honors were about even with Rayner doing the bulk of the attack.

In the fourth round Rayner came at Arthur almost before he had left his corner and threw him to the mat with a double wrist lock. Arthur broke this hold with a head spin, Arthur got above Rayner who raised up and secured a crotch toe hold on Arthur's left foot, then dropped back upon his solar plexus, and held the champion helpless until he conceded the fall.

The fifth round was about even but in the sixth after about six minutes even wrestling, Arthur secured a Japanese arm scissors hold and compelled Rayner to take the count.

From then on until the final gong, both men worked hard to secure the winning fall, but the eighth round finished without this being accomplished.

Health turns the clock backward

Crab Apple Cramps And Allied Disturbers

Health Talk No. 29
By G. J. Parks, D. C.

Now is the time of year when children and older persons find over- or under-ripe fruit a disturbance to orderly living. Ordinarily such acute ailments are never considered as coming under the province of the chiropractor, but it is in such cases he gets his quickest and most remarkable results.

To the disturbed stomach and bowels nothing has such a tranquilizing effect as the natural flow of life impulses over the spinal nerve lines to the struggling tissues. Frequently diarrhoea can be checked by adjustments when every other attempt has failed.

GETS RELIEF

"I had an acute bowel complaint with severe cramps and headache. Nothing seemed to check it. We called a chiropractor out of confidence in him, not believing that he could handle such a case. In an hour's time he had brought relief."—Thomas Dobbins, Chiropractic Research Bureau, Statement No. 1366H.

"BROKEN CHAINS" AT THE ORPHEUM AUGUST 15 - 16

Can a born coward change his nature and become a hero, if not unafraid at least unfaltering?

Winifred Kimball believes he can. She embodied her belief in the form of a motion picture scenario and entered it in the Chicago Daily News $30,000 scenario contest. She told her story so well that the famous judges gave her entry the first prize of $10,000, picking it out of the 32,000 manuscripts submitted. The prize carried with it a production on an elaborate scale by Goldwyn Pictures Corporation, with a star cast.

Goldwyn has now made the picture, under the direction and personal supervision of Allen Holubar, and "Broken Chains" is coming to the Orpheum theatre on Wednesday and Thursday of next week. Everyone will want to see why this scenario captured the $10,000 prize. It is a great emotional photoplay with big dramatic moments and as thrilling and realistic a hand-to-hand fight as the silvershee has ever depicted.

In the cast of "Broken Chains" are Colleen Moore, Claire Windsor, Beryl Mercer, Malcolm McGregor, Ernest Torrence, William Orlamond, James Marcus, Gerald Pring, Edward Peil and Leo Willis. Reports from cities where this prize-winning picture has already been shown indicate that it is the biggest kind of popular success.

NANAIMO WINS SOCCER TITLE

WINNIPEG, Aug. 8. — The Cannaught Cup stays in Western Canada for another year. Nanaimo, champions of British Columbia, defeated the Canadian Pacific Railway eleven of Montreal, by 1 to 0, in the game played here tonight during a heavy rain, Fowler converting a pass from Dickenson in the second half, and gave his team victory.

It took three games to decide this year's Canadian soccer championship, the previous two games being divided by the same score as this evening. Nanaimo therefore won the series by 2 goals to 1.

Nanaimo deserved the verdict. They were all over their opponents tonight, but found a stone wall defence for most of the way, with Nicol in goal playing a wonderful game.

Nicol gave one of the finest displays under the most trying conditions ever seen on any football field. He was tested repeatedly from nearly every angle. He would come to the rescue of his team when the ball seemed to have him beaten. He was given a tremendous ovation after the game, and the crowd made him come out of his dressing room to make a speech.

Playing through the first half in a heavy downpour of rain, and the second period in mud, and with a greasy ball, which made it dificult to handle, the players put up a marvelous exhibition of football under the conditions. Despite the uncertain footing and the water-soaked ball, there was some real fast football, some clever combination work, and superb defensive tactics. Both teams excelled in their defensive tactics. They checked like fiends and left few openings.

The first half saw Nanaimo very much in the picture, and they were unfortunate in not scoring at least one goal.

The second period was a repetition of the first, with the western boys pressing most of the way, their combination work carrying the ball in close, where Nicol was called upon to save from close range on many occasions. Minto, Dickenson and Hines did useful work on the attacking line for the winners, and kept the Montreal defence worried all the way with their fast work.

President Easton of the Dominion Football association presented the Connaught Cup to the Nanaimo team after the game. They left tonight for home. The C.P.R. team leaves in the morning for Montreal.

Commencing in a drizzling rain on a slippery and heavy patch Nanaimo attacked at the opening, and Dickenson shot over.' Nicol saved Hines headed attempt from a fine cross by Fowler. After a delap of four minutes, owing to injuries to McKay, Montreal back, Montreal yielded a corner, which was badly taken. Routledge saved his first shot from Beake. A second later Angel dodged through with nobody but Routledge to beat, but the slippery ball fooled him and he shot pot. Nanaimo returned fast, and Dickenson hit the cross bar with the goalie beaten.

Appleby shot a scorcher over the top, and then hit the bottom of the post with his shot from the side. It was strenuous football and under bad conditiions. Dickenson dodged nicely, and shot a hot one at Nicol, resultin a corner, which went behind. McKay broke up a pretty combination attack. Angel gave Beake a grand opening, but he sliped and shot past.

Nanaimo attacked, and Minto hit the cross bar with a lovely wing shot, which Nicol didn't attempt to save. It nearly fooled him.

Montreal forwards then gave Routledge two easy ones, play returning to the other end. Bell gave away a corner, and Routledge pulled off a spectacular save of Woosman's terrific drive. Hines worked hard for a few minutes, shooting past, then losing a hot race for the ball with McKay, and later shooting into Nicol's hands. Goudy centered beautifully, and the Nanaimo defence did well to save. The Montreal defence cleared a warm scrimmage in front of the Montreal goal.

Half time came with rain coming down in torrents. Nanaimo was much the superior team this half, but could not fathom the strong Montreal defence.

The second half opened under better overhead conditions, the rain having stopped, but the ground was muddy and slippery. Right from the kick-off, Minto, the sensational right winger of the Nanaimo team, brought the 1500 fans to their feet with a lightning play when he shot a scorcher from his wing, but the sensational Nicol dove for the ball and made a wonderful save. But the ball rolled right out to Hines, who only had to tip it in, but his kick went wide. Montreal returned and gave the western defence a warm argument, and there were some interesting exchanges. But the Nanaimo team forced the play and uncorcked some pretty foot work under the trying conditions, and only marvelous defensive tactics stopped them from scoring.

Montreal had a couple of corners, which worried the Nanaimo defence, but Bell cleared nicely and, at the other end, Nicol pulled off another thriller from a drive from Minto.

Dickenson, who was playing a splendid game, crossed over to Fowler, who, from an awkward angle, drove in a fast one from the side which caught the corner of the net after 14 minutes of play, and the Nanaimo team was very jubliant over their success. They were well worth the goal play.

Montreal fought back hard, and Angel was through on a couple of occasions, but was checked up before he got set for the kick.

There were some anxious moments for each team in the last 15 minutes, but the final whistle found the ball in the Montreal territory, where it had been for the greater part of the game.

The line up:

Nanaimo — Routledge; Linn and Bell; McMillan, McDougal and Stobbart; Minto, Dickenson, Hines, Appleby and Fowler.

Montreal—Nicol; McKay and McColl; Pyvis, Johnson and McCrindle; Goudy, Woosman, Angel, Beake and Langley.

THE 150 ALL SPORTS' GYM

The 150 All Sports' Gymnasium put on an evening's entertainment last evening in the Gym before a capacity house.

The first event was a three two-minute round boxing exhibition between two local boys, weighing beween seventy and eighty pounds. These lads mixed things freely and the spectators gave them a rousing cheer at the close of the bout.

Following this the two Carpenter Kids, of Medicine Hat, who have been giving boxing exhibitions all over the United States and Canada, entered the ring and displayed their wares in four two-minute rounds. These boys are masters of ringcraft and are undoubtedly the best at their age ever seen in Fernie.

Frank Ingram then boxed two two-minute rounds with Georges Carpenter, the younger of the boys, and put up a good display against his more experienced opponent.

The program for the evening closed with one ten-minute round of wrestling between Young Rayner and Dan MacDonald, who has been studying wrestling under Rayner's tutilage for the past two years. Rayner, in last nights bout showed that he is one of the most powerful contenders for championship honors in the Dominion. MacDonald made a splendid showing against him and shows great promise of advancing in this line of sport.

Mr. Ingram deserves great credit for establishing a gymnasium for all classes of sport, filling a long felt need in Fernie. By securing the services of Young Rayner as physical director, he has provided an experienced instructor and is now in a position to handle classes in any known sport. The Gym is being run solely for the sport loving public and will shortly be thrown open to membership for all those wishing to take part. Special classes will be arranged for juniors.

BANFF-WINDERMERE TRAFFIC IS HEAVY

OTTAWA, Aug. 8.—Tourist traffic on the Banff-Windermere Highway during the month that it has now been opened has exceeded all expectations, it was stated today at the Dominion parks branch. Furthermore, no accident of any moment has yet been recorded.

While figures have yet to be complied by the parks branch, it was announced that visitors from the United States, as well as from Canadian points, have already shown keen appreciation of the new facilities for traversing the mountain scenery by automobile. The highway, with a clay base surfaced by hard packed gravel, is regarded as particularly safe, in some cases having a stretch of from five to six miles of straight road. Chalets at convenient distances supply gasoline as well as food and, if required, sleeping accomodation.

FERNIE 7, WYCLIFFE 3

Fernie practically cinched the East Kootenay pennant on Sunday afternoon last, by defeating Wycliffe by a score of seven runs to three in one of the fastest games ever witnessed on the local diamond, only one hour and forty minutes being required to complete the game. This gives Fernie four consecutive wins in the second half of the league and Kimberley, by defeating Lumberton at Lumberton by a score of 4 to 2 on the same day, made it impossible for Fernie to be knocked out of the leadership while one more win in the two remaining games will secure the pennant.

Pennington, pitching for Wycliffe, pitched a strong game and with a little better support in the pinches, he would have made a much better showing. He only allowed six hits but these coupled with errors at critical moments gave Fernie the victory.

Ault continues to display invincible form and is bringing the Fernie team into prominence throughout the west. His control on Sunday was perfect and although he allowed two more hits than his opponent, he kept the game well in hand throughout.

Wycliffe jumped ahead in the second inning when Rogers connected for a triple and scored on an error. Fernie came back with a vengeance in their half of this frame, when McTeer drew a pass, went to third on Ruschall's double and scored when Trimble booted Wilson's hit. Trimble retrieved the ball but missed Ruschall going to third. Colton laid down a sacrifice bunt and was safe when Pennington picked up the ball and threw wild to the plate trying to catch Ruschall coming home. Wilson and Colton added two more runs, scoring on Callahan's two base drive. The latter scored on a fielder's choice, giving Fernie five runs.

There was no further scoring until the fifth when Pennington singled and was batted home, Whitehead and Trimble singling.

Fernie came back in their half of the fifth, Bishop leading off with a single and scoring on McTeer's double. Ruschall sacrificed McTeer to third, then Pennington heaved over a wild one and McTeer ambled home. Wycliffe got their third run by a freak home run from the bat of Steve Clark. The hit was labelled for two bases but the ball lit in right field and bounded under a haystack and Clark circled the bases before pitchforks were procurable. For the balance of the game only one man, a Wycliffe batter, reached first base.

The box score—

Wycliffe—	AB	R	H	PO	A	E
Staples, cf	5	0	0	2	0	0
Whitehead, ss	5	0	0	2	3	0
Trimble, 3b	3	0	1	0	2	1
Piper, 2b	4	0	1	0	2	0
Rogers, c	4	1	1	7	0	0
Clark, 1b	4	1	1	12	0	0
Hunter, lf	4	0	0	0	0	0
Dewey, rf	4	0	0	0	0	0
Pennington, p	4	1	2	1	4	1
	37	3	8	24	11	2

Fernie—	AB	R	H	PO	A	E
Hovan, 3b	3	0	0	2	0	2
Bishop, 2b	4	1	1	4	2	0
Barger, 1b	4	0	0	11	1	0
McTeer, c	3	2	1	8	0	0
Ruschall, cf	4	1	2	0	0	0
Wilson, ss	4	1	0	1	3	0
Colton, lf	2	1	0	0	0	0
Callahan, rf	3	1	2	0	0	0
Ault, p	3	0	0	1	5	0
	30	7	6	27	11	2

Score by innings—

Wycliffe	010	011	000—3
Fernie	050	020	00x—7

Summary—

Sacrifice hits: Trimble, Hovan, Colton; Two base hits: Ruschall (2), Callahan, McTeer; Three base hits: Rogers; Home run: Clark; Struck out: by Pennington 6, by Ault 9; Base on balls: off Pennington 1; Wild pitch: Pennington; Dropped third strike: McTeer; Earned runs: Wycliffe 2, Fernie 2; Left on bases: Fernie 2, Wycliffe 7; Time of game 1 hour 40 minuttes; Umpires: McLeod and McLaren.

AMERICAN CONSULAR SERVICE—FERNIE, B. C.

Confirmation of telegram received at this Consulate, August 6th:

"Vancouver, B. C. Aug. 5, 1923.

American Consul, Fernie, B. C.

Circular, August fourth. President Coolidge took oath of office Friday morning August three. Remains of late President will arrive Washington Tuesday, August seventh. Funeral services in Rotunda of Capitol, Wednesday, August eighth. Final obsequies Marion, August tenth, and latter date is appointed by Presidental proclamation, signed today, as a day of special mourning and prayer throughout the United States; all executive departments will be closed from August seventh, one p.m., to Friday, August tenth, inclusive. Flags will remain at half staff until the close of Monday, September third. There will be no official entertainment until December one, nineteen twenty three. Usual symbols of mourning should be displayed until Monday, September third, inclusive.—Hughes."

The American Consulate at Fernie was closed today between the hours of 2:30 and 3:30 p.m., in tribute to Warren Harding, late President of the United States.

P. H. SHEFFIELD HAS RESIGNED

Mr. P. H. Sheffield, who for the past three years has been Supervising Principal of the Fernie Public Schools, telegraphed his resignation to the Fernie School Board, from Kingston, Ontario, yesterday morning, stating that he had accepted the position of Inspector of schools, with headquarters at Nelson.

The loss of Mr. Sheffield will be felt greatly by the entire community. Since his advent to Fernie, he has been a most enthusiastic worker and his name is connected in some manner with nearly every community working organization in the city. His work in the schools has been of the highest calibre and the School Board is now in the difficult position of securing a successor who will be able to carry on the work of supervising the education of the Fernie children, so ably handled by Mr. Sheffield, during the last three terms.

ACCIDENTAL DEATH

Evidence brought out at the Coroner's inquest into the death of William Stanwick, who was killed at the White Spruce Lumber Company's Camp 4 last Friday afternoon, resulted in a verdict of accidental death being brought in by the jury.

It appears that Stanwick was employed on the logging train and as the train moved over the trestle bridge near Camp 4, he was riding on the first of the two cars on the train and, as per his custom, he stepped off the car on to the ties, but in doing so, in some manner his foot slipped and he fell in front of the second car. Some part of this car hit Stanwick on the back of the neck killing him instantly.

After hearing the evidence the jury retired and after being absent only a few minutes returned and gave the following verdict:

"We the Jury empannelled to enquire into the cause of the death of William Stanwick are unanimously agreed that the said William Stanwick came to his death while following the occupation of brakeman at Camp 4, of the White Spruce Lumber Co., on or about 2 p.m., on the afternoon of Friday, the 3rd day of August, 1923, by accidentally losing his balance and falling under car, breaking his neck, causing instant death."

(Signed) S. F. Wallace, Foreman, Hugh McLachlan, Joseph Longden, Jack Wood, Edward Hooper.

COM. STIRRETT VISITS BOY SCOUTS OF FERNIE

Deputy Provincial Commissioner Stirrett of the Boy Scout Association of British Columbia visited the city over last week-end, and inspected the local troop Monday evening and addressed a meeting of the Fernie Boy Scout Association later in the evening.

He was highly pleased with the progress of the Fernie troop and in speaking to the boys urged them to continue in their efforts to live up to their Scout laws and promise. He then invested Scoutmaster Donaldson as Scoutmaster of the Fernie troop.

Talking to the association he gave many valuable suggestions as to the methods of running the troop and outlined various programs of Scout Camps, and recommended that if at all possible all persons interested in Scout work should take the Gilwell training course which is held annually. Next year's training camp will probably be held at Nelson and this will give Scouters in the Kootenay an excellent opportunity of gaining a thorough knowledge of Scout work.

THE TEMPLE AT CARDSTON

CARDSTON, Alta., Aug. 4.—Sunday, August 26, is a day which all Mormons in Canada and the United States will observe with special interest. On that date the beautiful temple at Cardston of the Church of Jesus Christ, Latter Day Saints, will be formerly dedicated. Thereafter only Mormons in good standing in their church will be allowed the privilege of entering its portals.

For seven years the temple has been under construction, and more than $1,000,000 has been spent. From the forests of Africa precious woods have been brought, to be used in the construction and decoration of the rooms of the temple. Famous painters have expended their skilful efforts in producing paintings to depict the history of the world from the dawn of creation down to the present day, picturing also the glorious hereafter in which all Mormons believe. The finest granite in the Rocky Mountains has been procured for the outer walls of the building; pure gold worth thousands of dollars has been used in its interior decoration, and the finest of draperies and carpets.

The temple rises high in the air like the turreted peak of one of the distant Rockies, commanding a view from its roof garden for many miles in every direction.

For the last few years, particularly this summer, the temple has been the centre of attraction to tourists passing through Southern Alberta. It is believed that approximately 20,000 tourists have visited it since construction commenced. It will be closed to visitors August 15, and following August 19 will be open only to those in good standing in the church for marriage, baptism and other ceremonials.

One of the most surprising things about the interior of the temple is that it has no large auditorium as would be expected by non-members of the church. This is explained in the fact that it will be used only on week days, and there will probably be not more than fifty persons in it at one time.

On entering the edifice, the first room which is shown to the visitor is one where prayer services are held, a room large enough to accomodate nearly 100 persons. The visitor is next taken to the dressing room, where all members of the church wishing to observe various sacraments must change to temple robes. Next is the baptismal room, where the huge font of marble is supported on the shoulders of twelve carved oxen, life size. This font alone cost $70,000. Decorations of this room, when illuminated, are specially beautiful, various carved woods, with pure gold, lending an effect well in keeping with the purpose of the apartment.

There is a series of rooms depicting various stages in the world's history from the Creation downward to the present age. The Creation room is decorated with oak inlaid by twenty-seven kinds of other wood. Oil paintings on the walls give a conception of conditions before the world was created. The six days spent in the creation of the universe are described in paintings on which Prof. L. C. Stewart, of New York, spent almost three years.

The Garden of Eden room comes next, in which pictures on the wall give as nearly as possible the perfection of vegetable and animal life that was attained in that stage of man's history. L. G. Richards painted the pictures, spending nearly two years on his efforts. The room is handsomely decorated in bird's eye maple.

Depicting a conception of conditions in the world after the fall of man, the next room shows how the animals turned against each other, of how the world became selfish and of how the ideal conditions found in the first state of man disappeared. Walnut is the basic wood in the decoration of the room, the pictures for which were painted by Prof. Edwin James.

As each room is visited the visitor is impressed with the fact that the decorations become richer. The tapestries and the woods used are more beautiful and more expensive until there is reached the large room describing the terrestrial kingdom of the life after death.

There are three sealing rooms, where ceremonies for the dead and the living may be observed. Marriages take place in the centre room, which is finished in mahogany and cherry from South Africa. The other rooms are for praying for the souls of the dead, and are finished in sombre walnut.

Years ago, back in 1887, when the Mormons first came to Canada and made their homes on the wild, empty plains of Southwestern Alberta, such a building in which the sacraments of the church could be observed fittingly was dreamed of as a possibility of the future years, but those Mormons knew that it would take many years of hardship and toil before such a dream could find fulfillment. The history of the Mormons in Alberta is that of pioneers the world over. Coming to this strange land, they settled on a few sections in the neighborhood of what is now the thriving town of Cardston, and there tilled the soil for a living.

As the years passed they have branched out, until several Mormon settlements from Cardston are situated as far north as Stirling.

The Mormon church in Alberta is divided up into a number of districts, called stakes. The principal one is the Cardston stake, over which President J. E. Wood presides. The Mormons have no regular ministers or priests. President Wood receives no remuneration for holding his office, neither do any of the other officers of the church Their positions are gratuitous and they are elected by the members of the church. Missionaries sent out by the church to other parts of Canada, the United States, and the whole world, go at their own expense, and when they can no longer keep themselves at their missions, they are recalled and resume their regular occupations in life. In spite of the fact that they have to make their own way, many young Mormons volunteer each year to go out into the world and teach the doctrines of the Mormon church. At present the church has 2200 missionaries.

Members of the Mormon church adhere strictly to the principal of tithing. No collection is taken up among members of the church at services, but every month a Mormon must give one-tenth of his income to the church, and in this way the enormous sum to build the temple was obtained.

What Next?

Those who thought the limit was reached when a Toronto man seriously proposed that men should wear corsets will have to rub their eyes again. The suggestion comes from New York that men should take up hair-dressing.

Traditional conservation of men with regard to dress may well be due to the extreme radicalism of the suggestions made for reform. Corsets and hair-dressing may be the limit, but one never can tell; the perfume devotees have still to be heard from.

Sand flies are reported to be driving the bathers off Chicago beaches. It is reported to turn off the electric lights until the pest seek other quarters.

Hollywood producers will be interested in the announcement of a Pittsburg astronomer that he has discovered a new star. If it screens well they may add it to their well-fixed constellation.

P. O. SOLVES A LABOR PROBLEM

Among the many problems confronting the present Government on taking office was the re-establishment of returned soldiers, particularly those who, through disabilities sustained on Active Service, were unable to follow their previous occupation.

Especially was this a vital question as regards those Departments which require large numbers of employees to carry on the work both at Ottawa and throughout the country.

Since the conclusion of the Great War returned soldiers have been given preference in the matter of employment in the Civil Service. One of the most extensive and wide-spread channels of employment has been the Post Office Department.

A great number of returned men were taken on in the several City Post Offices and other branches of the Postal Service to replace permanent employees who left the Service for various reasons. In addition, a large number have been afforded temporary employment from year to year during the holiday period—April to October—to relieve members of the regular staffs on annual leave.

Heretofore, temporary men taken on for holiday relief purposes were, with very few exceptions, totally untrained for Post Office work. Moreover, there services were dispensed with at the end of October—a very unfavorable time of the year owing to the difficulty of securing other work to tide them over the winter months. From a labor standpoint this was most unsatisfactory.

Representations were annually received from numerous organizations of all classes asking the Government to retain these temporary men for the winter months. This was done by recalling those whose service had been dispensed with and retaining those still on duty with the result that the offices were overmanned for a part of the year; unnecessary expenditure in the way of salaries was incurred; and the efficiency of the staff thereby impaired.

With a view to obivating the necessity of releasing the annual leave help at the end of the holiday period and to increase the efficiency of the Service the Postmaster General directed the officrs of the Department to go into the whole matter thoroughly. A proposition has now been approved by Postmaster General Murphy whereby the annual leave will be spread over a period of ten months—February to November—instead of six months as formerly and by the establishment of what is known as a Postal Pool.

The Postal Pool will constitute a permanent relief staff, to take care of annual leave, sick leave, Christmas rush work and other emergencies. This will mean that a full staff of trained employees will be available at all times. Also the taking on of green hands at the beginning of each holiday season will be eliminated and the temporary help required at Christmas will be materially reduced.

The Postal Pool will virtually provide a training ground for Post Office employees from which they will be drafted to the regular staff as vacancies occur. All new employees entering the Service will be first attached to the Postal Pool and will be assigned work suitable to their capabilities. While undergoing the training they will enjoy all the privileges of Civil Servants.

Employees in the Postal Pool giving a satisfactory service will be advanced to the regular staff as vacancies occur. In this way continuous employment will be given instead of annual temporary employment as in previous years.

The officers of the Department are unanimously of the opinion that the morale of the staffs of the City Post Offices will be improved, and that a more efficient as well as a more economical service will obtain.

C.N.R. CARRIED RECORD SIZED STEER TO 'PEG STOCK YARDS

The largest steer ever received at the Union Stock Yards, Winnipeg, was brought in on August 1st from Wainwright, Alberta, by the Canadian National Railways. The animal weighs 3,170 pounds, stands six feet at the withers, and is still under five years of age, and brought the record price of $250 to its owners, Messrs. Stuart and Church, of Wainwright. This is the highest sum paid for any steer in Winnipeg since the war, eight cents per pound on the hoof. Messrs. Braden and Tarn, the buyers, are placing same on exhibition at the Winnipeg Citizens' Sports Carnival, to be held within the next few days. J. H. Parsons, of Duhamel, Alberta, was the breeder.

Neptune Holds Court on a Famous Canadian Ship

A REMARKABLE photograph of the ceremonies that took place when the Canadian Pacific steamer "Empress of France" crossed the line on her recent "round-the-world" tour. Neptune accompanied by his royal barber, and other officials came aboard in the early morning and duly initiated those who were crossing the line for the first time. His Majesty's stay on board was short, but the same cannot be said of the little god Cupid. He came on board early and stayed until the end of the trip, as may be gathered from the fact that out of a total of 800 passengers on that famous 30,000 mile cruise, no less than forty came to the end of the trip as engaged couples. This fine photograph of Neptune's court was made by Miss Margaret Miller of Waterbury, Conn., who was one of the ship's passengers

"A Mass of Sores —No Sleep— Unhappy Days"

writes Mrs. Orange Harvey of Danville, Quebec, R. R. 3. "I doctored with doctors until the first of May. Then I got a bottle of D. D. D. AT ONCE MY FACE GOT BETTER. I used half a bottle only and have been entirely well ever since."

Why not see if half a bottle will relieve your case of skin disease, too—on our guarantee that the first bottle will show results or your money back? *Itching stops on the instant.* $1.00 a bottle. Try D. D. D. Soap, too.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head.

COAL CREEK BESTS FERNIE

Playing in a Crow's Nest Pass League football game last Sunday evening, Coal Creek defeated Fernie on the North End grounds by a score of two goals to nothing.

Fernie won the toss and took advantage of the slight wind that was blowing from the west. Fernie had much the better of the exchanges in the first half but lack of finish in front of goal spoiled many golden opportunities. During an attack by Coal Creek on the Fernie goal, Smith handled within the penalty area and Coal Creek was awarded a penalty. Corlett took the kick but shot too high, the ball went over the bar. Towards the close of the first half, Coal Creek assumed the aggressive and Sofko was called on twice in quick succession to save from Worthington and Corlett.

From the kick off in the second half, Fernie raided and Sawyer was forced to leave his goal to clear a dangerous cross from Robson. This was about the only occasion Sawyer was called upon during the last forty-five minutes, the Corrigan boys on defense staving off all the Fernie attacks. Coal Creek asserted themselves and kept up a continuous pressure on the Fernie goal, Sofko having to effect some splendid saves to keep the ball out of the net. Towards the end of the game Corlett finished a nice run up the right wing by sending over a lovely cross to Atherton who scored the opening goal of the game with a shot which gave Sofko no chance. A few minutes later, Hudock made a solo run up the centre and sent the ball out to Corlett who again sent the sphere across the goalmouth and Caufield running in got his head to the ball and diverted it into the net. Fernie livened up somewhat after these reverses but Coal Creek adopted a defensive game and held them to the end of the game.

The line up:

Fernie—Sofko; Smith and Wilson; Robertson, Davidson and T. Joinson; Robson, Conry, J. Joinson, Dicken and Thomson.

Coal Creek—Sawyer; P. Corrigan and H. Corrigan; O. Corrigan, Hudock and Walls; Corlett, Smith, Worthington, Caufield and Atherton.

Referee— R. Hurd, Michel.

Here and There

QUEBEC, Que.—The request made by Mayor Curley of Boston for the return of the small gun said to have been captured by the British on June 17, 1775, at the battle of Bunker Hill, and which now stands on the square of the Quebec Citadel, has been referred to the Minister of Militia at Ottawa.

PORT ARTHUR.—An official announcement by the C. P. R. at Winnipeg says :—"At Port Arthur additional trackage will be provided to accommodate grain consigned to the terminal elevators at Current River."

KOBE. — Sixty tons of Canadian commodities of various kinds have arrived at Shanghai to be placed in the newly-established Canadian sample salesrooms originated by Dr. J. W. Ross, Canadian Government trade commissioner at Shanghai. The show rooms will be in charge of D. B. Sparks, who has spent several years in China as a representative of Canadian manufacturers. Dr. Ross states that Canada is more interested than ever in the upbuilding of trade with the Orient, and the opening of the sales rooms at Shanghai is a tangible indication of the efforts being made to accomplish that purpose.

ST. JOHN, N.B. — At the present rate of shipment of grain, the 20,000,000 mark may be attained this season. For the present season to the end of January the total export of cereal through the C. P. R. elevators was officially given at 8,904,335 bushels, compared with 4,576,233 bushels for the previous winter season. The increase for this winter to the end of January is 4,328,102. Grain shipments on February 1st of this year had equalled the total to March 10th last year.

Paris authorities complains of the offensive attitude of certain American tourists towards the colored residents of the French metropolis. The color line is barely visible in Europe but it would take a battalion of Battling Sikis to persuade visitors from Texas or Mississippi that it does not exist.

"NUGGET" White Dressing

A substitute will disappoint you.

Is the best for canvas boots and shoes, belts, etc. Just try it!

* * *

THE TWO MIDDLE LETTERS MAKE LIFE UNCERTAIN.

* * *

Knowing what the traffic laws are won't help you much unless you know what the other fellow is going to do.

* * *

The easiest way to turn a screen star into an emotional actress is to cut her salary.

* * *

We know of a man who is so thin that he makes his living by diving in bottles and pulling out corks.

* * *

A man who complains that his wife can not take a joke forgets that she took him for better or worse.

* * *

Girls used to attend school with cotton stockings, but you can't find any of that class these days. The dresses are too short to wear the old-fashioned kind.

* * *

Women who lecture their husbands might make it more entertaining by throwing in a motion picture now and then, thinks Paddy Hughes.

* * *

If a woman admits that she trimmed her own hat, comments A. C. Liphardt, there usually are those present who will remark later that it looked it.

* * *

What man doesn't feel weak when some lovely little girl tells him how big and strong she thinks he is?

* * *

If a man tells his wife everything, it may be that he loves her. And then it may be that he merely loves a fight.

* * *

The world isn't such a bad place after all, soothes Geo. Moses. White shoes never are as large as they look.

* * *

Apparently, snaps Bill Eschwig, very few ice men know the difference between tomatoes on ice and ice on tomatoes.

* * *

There is always something to do for the people who are interested in Fernie's welfare.

* * *

Well, Well!

Bill gets paid for what he knows
And that's the reason, we suppose,
That so often we hear him say,
That he cannot live on such small pay.

* * *

"I've got that down Pat," said Mrs. Murphy, as she laid down the bottle of castor oil.

* * *

Getting old is just a slow business of reaching the point where a girl gives you a pain.

* * *

"Salty" Ault says he'd just as soon see a girl dress in public as powder her face. So would I.

* * *

Tony Kuske has discovered a young woman of 24 who didn't know that a hen does not lay four eggs in one day, and another of 35 who has never eaten a piece of pie a la mode.

* * *

When the people refuse to be uplifted the uplifters start another drive for funds to continue the work.

* * *

Man spends half his life cussing the old fogies and the other half worrying about the rising generation.

* * *

Movie Ad. — Gorgeous Pageant. 5000 People, 4000 Costumes.

* * *

When asking a man how he feels, says Jim Corbett, always remember that there is a chance that he will go into the harrowing details in telling you.

* * *

Scientists say we are what we eat. What a lot of people there are that eat nuts.

* * *

Dave Harvie says a Fernie woman who has lived on party refreshments all her life is beginning to look like a lettuce sandwich.

* * *

You Tell 'Em

The robin is dearer than all the rest; the peacock can boast of the finest frill; the yellow canary can sing the best, but the stork is the bird with the longest bill!

* * *

The Lone Wolfe girl who never has been tardy or absent from school in twelve years, probably will draw a husband who never gets home on time for his meals.

* * *

Automobile owners are getting so lazy that they will not even walk in their sleep any more. They call a taxi.

New Beauty for Dainty Fabrics

and much longer wear

The two worries you have in washing fine fabrics, dainty garments, are removed. You can launder them now with full confidence that fabric will not be harmed, or delicate colorings dulled.

Silks, satins, crepes, and dainty, expensive cottons come from the wash with new brilliance and beauty. In thousands of homes women are using PALMOLIVE PRINCESS SOAP FLAKES.

These pure white, crinkly flakes give a wonderful, "whipped cream" lather that dissolves dirt magically.

And save money in two ways: By giving longer wear from fine fabrics; and, being nothing but pure soap, they last longer—cutting soap cost.

You can't find anything better for use in the washing machine—nor, in fact, for all laundry or household use.

In handy one-pound packages or bags. Order some today and begin *saving* next time you wash.

PALMOLIVE PRINCESS SOAP FLAKES

Made in Canada

Cheer Up.

This world is full of sunshine,
This world is full of cheer;
If we but tried to find it
Throughout each day and year.

* * *

There seems to be too many people interpreting the liquor laws, says Geo. Ramsay, and not enough observing them.

* * *

After reading all about beautiful brides, muses Ed. Stewart, we can't help but wonder where all the homely married women came from.

* * *

How long does a dream last? wonders Bob Duthie. It took us twenty years to find out we couldn't sing.

* * *

Ki. Bryant fears that if we don't get into another war pretty soon people will forget what to do when the colors pass by.

* * *

Correct this sentence: "Don't distress yourself about it at all," said the banker, "we'll be glad to renew it."

* * *

Say, cull, don't git gay wid me. I'm so hard I scratches the bathtub.

Dat's nothin'. I'm so hard I shaves wid a blow torch.

* * *

"You don't know your eggs," said the rooster to the old hen as she sat down on a glass one.

* * *

Still, the knights of old who stood for women didn't go so far as to do it in street cars.

Why Worry?

Every little while, some more or less prominent speaker gets up to deplore the commercialism of our times. He urges people to think less of making money and to turn their minds to higher things.

Commercialism has always been deplored. Some people believe that a prejudice against commercialism has even turned the ordinary school into an impracticable institution, failing to prepare the young for the duty of getting something to eat. To deplore commercialism is a safe and easy way to win applause, even at a business men's convention. People like to hear beautiful thoughts, even when they know such thoughts are idle.

So long as high taxes require the people to make money, there will be commercialism. Worry over commercialism might well give away to consideration of how to reduce high taxes.

The train time between Seattle and Chicago has been reduced two hours, but who is in any hurry to reach Chicago?

Canadian authorities have taken exception to the Governor of Ohio, who is spending his vacation at a Northern Ontario fishing resort, being accompanied by two life convicts as attendants. Canada does not want visitors of that stripe.

Astronomers from all parts of the world are assembling in San Diego to observe the eclipse of the sun which will be total in that city on September 10. "Native sons" hesitate to admit that the sun is ever totally obscured in California.

BEECHAM'S PILLS Sweeten the Stomach

Passing Of The Balloon

While the airplane has made the balloon practically obsolete as a weapon of war or a vehicle in peace, the balloon race still holds its following as a spectacle. The balloon was here first and, in the form of simple toys, it has a universal sway.

In time, the airplane may be come popular in Toyland and the balloon will loose its present hold upon the imagination. It is neither ornamental nor useful.

When Greek Meets Greek

A duel between two politicians is reported from Poland. Angry words led to challenge and acceptance, and the party repaired to a lonely spot for the fight.

Just what the two desperate combatants fought with is not made clear, but since the only man injured was one of the seconds, who fell over a rock, it is quite possible that they made speeches at each other.

Sitting On The Lid

Complaint is made by a learned observer that there are not enough cranks in Canada. Writing in The Atlantic Monthly, this college professor attributes what he diagnoses as a colorless situation in this Dominion to a lack of cranks.

It is to be noted that no complaint about a lack of cranks ever is made by people who live in Canada. The truth appears to be that there are lots of cranks in the country, but the common sense of the majority of Canadians keeps the cranks where they belong.

Lemonade was served after the members of the new Ontario cabinet were sworn in. A lemon was handed Mr. Drury and colleagues on election night.

IF YOUR PIANO IS WORTH ANYTHING IT IS WORTH

Expert Tuning

Any Other Kind Will Ruin It.

Alvin E. Perkins

a strictly independent tuner, and the best recommended man in Canada, with 30 years of valuable factory and other experience, stands for positively the best in the profession of tuning and repairing of pianos. Honesty of purpose and conscientious workmanship, and strongly endorsed by the best authority in Canada—piano manufacturers who are positively particular where they put their signature, as follows:

Morris & Karn Co.
Heintzman & Co.
Gourlay Piano Co.
Dominion Piano Co.
Newcombe Piano Co.
Fletcher Bros.
Gerhard Heintzman House, Vancouver.
Prof. J. D. A. Tripp, Vancouver.
Mason & Risch Co.
And others.

Mr. Perkins will be in Fernie in a few weeks and will make his regular calls

ADDITIONAL LOCALS

Peter Piola purchased a Star car from Wm. Johnston this week.

Tim Lawes, employed as engineer at Coal Creek, is on the sick list.

Mr. and Mrs. John Whitelaw, of Calgary, are visiting in Fernie with Mr. and Mrs. Matthew Whitelaw.

Mrs. Mabel Armstrong and her son, James, of Bellingham, Wash., is visiting her father, Mr. Sam Graham.

The Nelson-Spokane Highway will be officially opened on August 29 at the International Boundary Line.

Wm. Polansky, of Hosmer, was fined $50 this week for having liquor in his possession, contrary to the Act.

In the Ladies' golf competition of last Tuesday for the Wilson Cup, Mrs. J. L. Gates was the winner.. Her score was 63-36—27.

Arthur Owen and family left on Thursday morning for Windermer by motor. Miss Jean Liphardt accompanied them.

Mr. F. H. Callahan, who for the past three months has been employed at the Fernie Garage, left last evening for Claresholm, Alta.

The King's Hotel has opened up a first-class lunch counter in the part of the building formerly occupied by the bar. Open day and night and first-class service.

The local Rotary Club will send a large delegation to Cranbrook on August 21, upon the occasion of the visit of Governor Mills to that city.

Don't forget the Old Timers' picnic on Aug 15. At 2 p.m., all old timers are requested to meet at the 41 Meat Market, where cars will be provided to take them to the grounds.

Jack Gates and Dr. Best, of Minneapolis, are spending a week fishing on the Wigwam. S. F. Wallace has charge of the King Edward in the absence of Mr. Gates.

Thos. Fitzgerald has purchased the cigar store and barber business of Benny Smith, in the Grand Theatre building. Ben figures on going to the coast.

The regular monthly meeting of the Women's Missionary Society of United Church will be held at the home of Mrs. William Dicken on Tuesday evening at 8 o'clock.

Mrs. D. Walker and son, of Claresholm, Alta., spent a few days this week with her husband in Fernie. Mr. Walker is employed at the Fernie Garage. Mrs. Walker returned to Claresholm Thursday evening.

Cranbrook district will receive a government grant of half the cost of an estimated $4700 road to the Stemwinder Mine near Kimberley. Repairs will also be made to Corbett's bridge on the Wycliffe road and the Perry Creek road.

Ed. Clay, a well known commercial traveller, of Vancouver, who has visited Fernie for many years, died very suddenly at Kamloops on Monday of last week. Deceased had a host of personal friends throughout British Columbia who deeply sympathize with his sorrowing family.

BASEBALL DELUXE

The Fernie baseball fans are warned that if they miss the initial game appearance on the local diamond of the Cylinder Swabbers and the Moonlight Serenaders on Wednesday evening at six-thirty they will miss the finest baseball game of the season. Here's the line up:

LIFE BURDENED BY DYSPEPSIA

Health and Happiness Came With "Fruit-a-tives"

Made From Fruit Juices and Tonics

"Fruit-a-tives", the wonderful medicine made from the juices of apples, oranges, figs and prunes, is one of the greatest means of doing good that this country of ours has ever known.

"Fruit-a-tives" is bringing health to hundreds and hundreds of people who suffer with chronic Constipation, Biliousness and Dyspepsia.

Mr. Frank Hall of Wyevale, Ont., says, "I purchased a box of "Fruit-a-tives" and began the treatment. My condition improved immediately. The dyspepsia ceased to be the burden of my life as it had been, and I was freed of Constipation".

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent by Fruit-a-tives Limited, Ottawa, Ont.

NOTICE

If the party who took the Motor Meter off the Essex Car in front of Victoria Hall on Tuesday, August 7, will return same to James Wilson, 30 Dalton Avenue, or the Fernie Motor Car Co., they will save further proceedings.

IN MEMORIAM

In Loving Memory of our Dear Daughter, Mary Hyslop Slaine, who died August 12, 1922, aged 1 year and 11 months.

We have a dear sweet girl in Heaven,
A dear sweet angel bright.
Jesus to her, a crown has given,
With garments pure and white.

—Inserted by her loving father and mother.

IN MEMORIAM

In Loving Memory of dear Mary Hyslop Slaine, who died August 12, 1922, age 1 year and 11 months.

Two little hands forever clasped,
upon a little breast;
Two little eyes forever closed,
sweetly taking rest.
In our hearts she is ever remembered,
sweet memories cling around;
She was too fair to bloom on earth,
God called her back to Heaven.

—Ever remembered and inserted by Alex and Margaret Adamson.

LOCAL & GENERAL

Chief Spiller attended court in Cranbrook yesterday.

Mr. and Mrs. Owen returned this week from a trip to Kaslo.

Born—In Fernie, on August 4, to Mr. and Mrs. P. Hughes, a daughter.

Mrs. C. King and niece returned last week from a six weeks' visit in Vancouver.

The G. W. V. A. Band gave a very creditable concert on Victoria Avenue last Sunday evening.

Mr. and Mrs. A. C. Liphardt and Mr. and Mrs. A. Watson motored to Blairmore on Wednesday.

Mrs. Corning, of Victoria, is the guest of her sister-in-law, Mrs. G. G. Moffatt.

Remember: Next Wednesday afternoon is the Old Timers' picnic in the park.

George Tymchuk purchased a Gray touring car from Wm. Johnson this week.

The regular meeting of the W. A., G. W. V. A. will be held at G. W. V. A. rooms on Thursday, August 16, at 7:30 p.m. All members please attend.

Don't forget the social and dance in the Catholic Hall, Friday, August 17. Cards from 9 to 10:30. Dancing from 11 to 1. Admission 50c. a10|2

Sandy Watson pulled off a thirty-four score on the Blairmore golf course on Wednesday in a match with the famous McKenzie, the latter's score was 36.

The Department of Education evidently like our brand of Public School Principals, they having selected the last three we have had as Inspectors for the Province.

The annual ice cream social of the Ladies' Guild of Christ Church will be held in Victoria Hall, Tuesday, August 14, from 3:30 to 8 p.m. There will be tables of home cooking, candy and flowers and afternoon tea will be served.

The 150 All Sports' Gym are putting on a dance in the gymnasium tomorow night, Saturday, August 11, from 9 to 12. Ingram's three-piece orchestra. Admission: Ladies, free; Gents 25c, 10c each dance.

The Women of Mooseheart Legion will hold their annual sale of work and home cooking in Victoria Hall, on Thursday, September 20. There will be a fish pond and other attractions for the children. Dance in the evening. a10|6

Mrs. B. M. Leppenwell and daughter, Freda, also Miss Margaret Roberts, left Wednesday for their home in Lethbridge after a two weeks' visit with Mr. and Mrs. M. E. Whitaker. During their stay in Fernie they were the guests of honor at several social functions. On the 3rd, they were the guests of Mrs. McLenan and on the 7th, Mrs. LeRoy Taylor gave a tea in their honor.

The British Columbia section of the Pacific Highway has been completed as a paved road and on Labor Day, September 3, the event will be celebrated by a grand opening at Cloverdale. This now means a paved road from Vancouver to Seattle. Despite the criticism directed against Hon. W. R. Sutherland, minister of public work, for undertaking the work this year, now that the job is finished he is the subject of congratulations. It is conceded by good roads enthusiasts all over the province that the paving of the Pacific Highway will benefit every section of British Columbia, through the increased tourist traffic.

Of late years few picnics have been held on the Island in the park. This used to be the favorite spot for outings of all kinds, but in recent years the water in the creek has made crossing difficult. This year the water in the creek is much lower than usual owing to the jam formed at the intake in the spring freshet. Those who visited the United Church picnic on Wednesday were reminded once again of the beauties of this part of the park. Here we have within ten minutes walk of the city, a wonderful natural park. Many a city would pay millions of dollars to have it in such close proximity. We leave it undeveloped and unused. A few hours and dollars spent in roads, bridges and clearing away of brush would make this the most attractive spot in the City of Fernie. Why can not something be done to utilize what nature has so kindly provided?

WHITE STAR YEAST CAKES
Are Not The "Just as Good Kind"
THEY ARE THE BEST

Blairmore will hold a big golf tournament on Labor Day.

Sherwood Herchmer is in Victoria this week on business.

Miss Cora Wilkes is home from Nelson where she was the guest of Mrs. Taylor.

Born—In Fernie, on August 9, to Mr. and Mrs. Hartley Wilson, a daughter.

Chas. Hogan, of Stoughton, Sask., is the guest of his aunt, Mrs. Crossman.

Mrs. Frank Dunlap underwent a serious operation at the Fernie Hospital this week. She is doing well.

Fred Adolph, president of the Beck Petroleum Co., Shelby, is in the city today.

D. Nicoletti will take over the Fernie Cigar Store and Barber Shop on Feb. 15.

The engagement of the Whitney Boys' Chorus which was booked to play in Fernie at the Skating Rink on August 13 has been cancelled.

E. G. Daniels, School Inspector, of Nelson and formerly of Fernie, has been transferred to the New Westminster district.

Fernie Beauty Parlour, for care of you hair, face and nails. Combings made up. 70 Dalton Avenue, Phone 313. j27|6.

The Fernie Junior baseball team travelled to Michel last Sunday to play a return game with the Michel Juniors. The game had to be called at the end of the fifth inning on account of rain. Fernie boys were leading by a score of five runs to nil.

Mesdames Wilmot and Connell gave a luncheon at the Fernie Hotel on Thursday evening in honor of Mrs. Finch, of Spokane. The following were present: Mrs. Finch, Mrs. Ingram, Mrs. McLachlan, Mrs. Ault, Mrs. Whitehouse, Mrs. Turner, of Regina, and Miss Biggs.

Premier Oliver is at present in Ottawa attending meetings of the Privy Council on the freight rates question. The special hearing opened on Thursday, August 9, and before leaving for the East the government leader said he was very optimistic over the outcome.

James Davidson, employed in No. 2 mine, Coal Creek, as a digger, was seriously injured on Tuesday afternoon by a fall of roof coal. Just a few minutes before the morning shift was due to leave off work, the fall occurred in Davidson's working place and he was caught under the coal, sustaining severe injuries. He was brought to the local hospital and upon examination it was found that his right arm and ankle had been broken and that he was badly bruised about the body.

The annual picnic of United Church was held on the Island in the park on Wednesday of this week. A large number of people attended and all enjoyed a pleasant afternoon. The usual program of athletic sports was carried out. D. Harvie and D. McVannell showed that they have lost none of their old time speed for in the hundred yard dash they were only the smallest fraction of a second behind the winner of this event. The committee in charge of the picnic wish to thank all those who helped to make this picnic a success, special thanks is due to those who loaned their cars to drive the people back and forth.

Coal Creek children's picnic travelled to Morrissey via the C. P. R. on August 1st. The weather was ideal and everyone was out to make the affair a success. A good program of sports for the children was provided which was much enjoyed by all, the event of the day was the egg and spoon race for the Ladies and the judges were tasked to decide the winner. The children were provided with lots of good things to eat and all voted it the best picnic they ever had. The picnic was a splendid success in every way and the committee in charge wish to thank the residents of Coal Creek for their hearty support, helping to make the day so enjoyable. They are also pleased to report a balance of $33 which is put in safe keeping for another time.

BIRDS TRUE PROPHETS

(By Hamilton M. Laing)

One of the keenest interests of nature lovers and outdoors folk consist of reading and interpreting the signs of the times among the wild things. Of these signs there are none more dependable than the birds and even now in the dog days the observant eye is reading the thing that bespeak the coming autumn. For though weather conditions may vary greatly from year to year, the birds change their seasonable habits but little. The belated Spring may retard the greenery; the premature bite of Jack Frost in autumn may bring down the yellow leaves unduly early; but the birds have appointments with the calendar to keep and for the most part they keep them regardless of the weatherman. The feathered wanderers are the truest prophets of the year.

August and September are the two liveliest bird months of the return migration when the wanderers are headed southward toward winter homes. But the backward swing of the bird pendulum begins as early as July 1 and in Southern Canada from coast to coast we may then see the first return movements beginning. New gulls appear upon the lakes and coastal waters where a month previously there were few or none; representatives of the waders: snipe, sandpipers or plover, come back to the shallows; the smaller insectivorous folk of the woods appear with families where they did not nest. These early signs may be rather obscure, but they are evident enough to every one who keeps a sharp eye or ear open out of doors.

All bird migration is mysterious and more or less a fascinating puzzle. It is not the puzzle it once was. Since the days when the European scientist buried the swallows in the mud and proved conclusively that these birds did not winter there—the common belief—we have really learned a good deal. Large numbers of observers scattered across the land and the recent bird-banding activities of individuals and societies have turned the light upon many dark places. Yet there is much mystery about it yet and one of the hardest things to explain is the cause of such early southward migration in the summer.

We can easily understand the spring rush northward when every bird is moved strongly by the desire to find a mate and nesting ground in the spacious wilds of the north, but why they should wish to turn back again so soon is not easily seen. It has been found, too, that the first migrants to turn back usually are those unencumbered by families. This is very noticeable in the case of the waders. It would seem that the bachelors and spinsters in the north, upon finding their spring objects and aims defeated, at once face about, leaving northern fields to their more successful, if harder worked, fellows.

The first of the returning waders noted by the writer was a greater yellowlegs on July 2. As his last spring appearance was May 21, this would leave an absence of just six weeks. On the same date (July 2) two flocks af small sandpipers were noted by another observer heading southward along the shore and it was evident that from this thime the return wader migration was established. Yet we have merely to think of the warm weather of July and the bright sunshine to realize that our feathered dabblers of the shallows were not driven southward by stress of weather. They were working back into the southland while yet the songs of the springtime were ringing in our ears. For in the coastal region where there is not the excessive heat of inland parts to discourage the singers, the song season does not close till about mid-July.

The first of the gulls to tell the season's story was the little Bonaparte. These small, black-headed fellows went sweeping away in late April and after a near absence thro numbers about July 1. Through the May and June they came back in autumn they will be common friends seen about all the coastal bays. But few will wear black cape after August. The young do not wear them till they are two years of age and the adults shed their "hoods" in the moult that follows breeding.

Somehow we associate flocking birds with the autumn and few seem to hurry the season more than the blackbirds. Red-wing and Brewer blackbirds, the common species breeding about our marshes and fields, immediately after nesting associate with their kind and form noisy companies that seem to tell us that summer is fleeing and autumn at the door. Often Red-wings and the Brewer cousins mix indiscriminately in large flocks and their chief interest during July and August seems to be in the oat fields. They love the near-ripe oats, soft and doughy in the kernel—rich food to "build them up" and help to grow new coats after the strenuous days of nesting and moulting. For a week about July 20, a flock of fifty Brewer blackbirds furnish some material for observation. Through these days they seemed to have no other aim than to fly back and forth between a nearby oat field and the creek. They ate and drank and bathed tremendously and their noisy chatter had in it the liveliness of a picnic. Then they vanished. Doubtless they found a better oat field and drinking place or possibly the south called them away.

August is the month when the bird student must be on the qui vive always, for then the wood warblers pass. They go by day and night, and on account of the small size of these travellers their story is hard to read. Like many others they begin to move during early July. On the evening of July 23, in the early moonlight, about 9:30 p.m., some lisping voices were heard from the sky overhead. These were warbler call-notes, and the birds were passing on their southward journey, heading out across the bay. Almost veery calm night during this month and the next, the sharp ear will pick up these lispings. They may be heard everywhere: In the woods, on the plain, even overhead in the quietest parts of the cities, and they tell of the migration of the wood warblers. But mystery hangs deep upon these movements. All warblers—they are a numerous tribe and number millions—lisp much alike, and we can get no direct inkling of who is passing. Yet on the morning of July 24 a little pileolated warbler, a sprite of gold wearing a jet black cap, came into camp, paid his respects and hurried away—doubtless one of the lispers of the night.

In mid-July the voice of the red-breasted nuthatch became a common sound in the woods nearby. These topsy-turvy chaps of the tree trunks had been absent previously all summer. Though in the coastal region these birds are resident, and do not bring the same significant message that they do in the East, yet the petulant "yanking" of these fellows seemed to add force to the argument of the other birds—to bring a message, like the alder leaves now falling in the creek, victims of the dog-days, that the summer has grown old.

No bird is too small to take his part in this play of the passing of summer. On the evening of July 28, after one of the hottest days of the season, some time after sunset, when the woods were growing dusky, and the moon was peeping over the eastern rim of the bay, a tiny buzzing projectile on wings darted out from the firs, and rising in a curve, shot off to the southeastward across the bay. This was a rufous hummingbird, and though the nesting was of the shortest it told that even this midget may, on occasion, be a mariner of the night.

Ice cream parlors are reported to be doing a flourishing business in London. Instead of the Indian custom of smoking the pipe of peace John Bull and Uncle Sam may sip their sundaes through the same straw.

Here and There

Saskatchewan's crop cost $187,000,000 to produce last year. The proceeds amounted to $287,000,000.

During the month of April and the first two weeks of May 300 claims were registered in the counties of Temiskaming and Abitibi, the gold field of the province of Quebec.

"Twenty marriage engagements are among the results of a round-the-world voyage of a C.P.R. liner," Mr. Beatty has a lot to answer for. —Ottawa Journal.

With a population which is over 70 per cent. rural Saskatchewan has a larger automobile registration than any other province. One in every 15 people owns a car.

One of the largest fish caught in the history of Lake Timagimi was recently caught by E. B. Hamlin who, with a small bass hook and light steel rod landed a salmon trout weighing 24 pounds and measuring three feet in length.

In 1920 there were cut in Canada 4,024,826 cords of pulpwood. This would, if piled four feet high and four feet wide, reach in a continuous line over 6,000 miles, or the distance from Vancouver to Halifax, and out over the Atlantic to Queenstown, Ireland.

Trees to the number of 10,000 were distributed among Saskatoon school children by the Parks Officials and Dominion Forestry Branch on the occasion of Arbor Day. Each child received one maple and one ash. Last year only 5,000 trees were distributed.

The Empress of France, of the Canadian Pacific fleet, now on the trans-Atlantic service between Hamburg, Southampton and Cherbourg to Quebec, holds the record for the fastest journey between Quebec and Liverpool, having crossed in 5 days, 22 hours and 38 minutes, just two hours less than the Empress of Britain.

General Sir Arthur Currie will unveil a memorial cairn at Sault Ste. Marie to Etienne Brule and his companion Grenoell, the coureurs de bois, who found the Sault and discovered Lake Superior in 1622. The unveiling will take place August 7th during Discovery Week, when the Ojibways will produce "Hiawatha" on two afternoons.

Notwithstanding that there will be an increase this year in Canadian Pacific steamship traffic on the St. Lawrence, with 17 more sailings than in 1922, Canadian Pacific officials report that ships are being well booked and that according to present indications the 1923 season will show improvement in ocean trade from both Montreal and Quebec.

Whales are reported early and plentiful this season and despatches from Victoria state that conditions surrounding the inauguration of the deep-sea hunt this year are the most promising in more than a decade. The demand for canned whale meat has become so pronounced that the prospective pack of the Victorian whalers is already disposed of. England will be the distributing market for canned whale meat this year.

INTERESTING B. C. ITEMS

(B. C. Weekly Press Service)

Vancouver—"The Hook," the new weekly paper edited by J. S. Cowper in its recent issue this week expressing regret at the tragic death of President Harding, takes occasion to repel the libel of the Hearst press that Harding's illness was caused by eating "B. C. canned food." The real cause of the ptomaine poisoning which preceded the pneumonia attack was Alaskan crabmeat packed at the U. S. government cannery. "The Hook" says that the Hearst press, angered at the friendly feeling which the President's visit has aroused on both sides of the border, has distorted the facts in an effort to foster international ill-will.

Public Works are Announced

Victoria—An appropriation of $46,000 on public works in the rapidly growing district of Omineca for settlers' roads and bridges is announced this week among a list of authorizations made by Hon. W. R. Sutherland, minister of public works. The list by constituencies is as follows and is supplemental to the $110,000 list announced last week:

Cariboo: Survey of site for new Firland bridge to cost $200; work on Baezaeko bridge to cost $420.

Chilliwack: New bridge at Elk Creek to cost $600 to be built by day labor under Engineer Stowe.

Columbia: Renewal of Katsuk bridge on Horse Thief road.

Dewdney: Filling in culvert east of Pitt River.

Fort George: Coal mine bridge on St. George - Hazelton road to be replaced with culvert and fill.

Fernie: Diversion of Wardner-Gateway road; new bridge to replace Ben Crow bridge.

Kaslo: Switch back trail from tunnel of Charleston mine to aid mining development; trail to Martin group to be built by Foreman Moore of Kaslo with day labor.

Kamloops: Repairs to Kinghorn bridge.

North Okanagan: Renewals of bridges at Johnson Creek, Sullivan Creek, Maple Street and repairs to Grindrod and Finalson bridges to cost $2300; reconstructoin of Deep Creek road to cost $1000.

Omineca: Government Ranch at Telkwa, $5000; Feefe's Landing to Ootsa Lake road, $1000; McDonald's Landing road, $3500; from Live Creek at Wistaria to Nadina bridge, $7000; Oosta Lake post office to Wistaria, $5000; Burns Lake-Endako, $15,000; Uncha Lake road, $4500; Colleymount $5000.

Revelstoke: Mining trail to Lanark and Crystal groups.

Slocan: New bridge at Passmore for new settlers to cost $5000; mining road to Galena Farm mine to cost $150.

Similkameen: New road to pumping station at Oliver to cost $750.

Trail: Repairs to bridge on Pend d'Orielle River road; clearing of West Fork Summit Creek minnig trail.

Yale: Bridge at Chapman Creek; four miles of new mining trail to Hills Bar Creek.

B. C. Japanese Mourn Harding's Death

Vancouver—Associated Societies of Japanese Empire passed the following resolutions relative to President Harding's death: "We, representing the Japanese people of Western Canada and Alaska, wish to express our profound regret at the death of Pres. Harding. In the war days, America was the friend of the Allies. Japan was the friend of the Allies. The United States has ever been the friend of Japan. With the death of that splendid man, Harding, we, who represent Japan on this part of the Pacific Continent, want to know that Japan grieves with the entire world in this great international loss—the death of Mr. Harding.

Aged Recluse Has Wealth

Vancouver—Amos Black, aged 82, was found beneath the Georgia Street viaduct this week in a condition of ebject poverty. In rags he was supposed to be a subject for the poor house. But, when Private Detective John O'Grady investigated, he found the old man had bonds, money in the bank and several sons who had tried to succor the old man. The old man, it is found, is worth more than $21,000. His relatives will care for him.

Mail Order Marriages Are Exposed by Vancouver Paper

Vancouver—In a withering article this week, "The Hook" goes on record in denouncing "Yankee Mail Order Matrimonial Bureaus." Proofs are adduced where one Fraser Valley farmer sent money to get a blooming bride, and was met at the C. P. R. boat by a withered, rouged hag who called him "dearie," and who insisted upon marriage. It cost the man half a year's crop, says "The Hook," to get rid of her, and she was arrested in a city police raid two weeks later. The same article states that loggers and others have been duped by distant American matrimonial agencies, and sensational disclosures are made by this paper. One "mail order bride," says "The Hook," came all the way from Michigan, and, instead of being blooming and young, was faded and painted. She explained that the original photo was taken some years ago, but "that was his affair."

Here and There

Buffalo in Wainwright reserve increase at the rate of about 2,000 each year.

The output of coal from Canadian mines during January, 1923, amounted to 1,743,800 tons.

The total wheat production of Canada in 1922 was 399,786,400 bushels of which Saskatchewan produced 250,167,000 bushels.

The Eskimos give the doctor his fee as soon as he calls. If the patient recovers he keeps it and if not it is returned.

Heads of large implement and machinery firms in Edmonton and Calgary state that for every acre of corn that was sown in Alberta last year ten will be sown this year.

1923 will be the greatest prospecting year known so far in Northern Ontario. The largest rush of prospectors is in the district extending from Swastika for a hundred miles east into the Province of Quebec.

Grain men and others in Calgary already forecast the probable yield of wheat in Alberta this year at something in the neighborhood of 100,000,000 bushels. This estimate is based on the 65,000,000 bushel crop of last year.

The total wheat production in Canada has grown from 16,723,000 bushels in 1871 to over 399,000,000 in 1922. The number of elevators in 1905 was 525 with capacity for 18,320,352 bushels. To-day the capacity of 3,924 elevators in Canada is 231,633,420 bushels.

The Canadian Pacific Railway have further reduced the freight rate on horses from prairie stations to all eastern Canada points. The old rate on horses from Moose Jaw to Montreal or Toronto was $1.39½ per hundred pounds. The new rate will be $1.20½ or a saving to the farmer of $38 per car.

"Will Summers," owned by His Majesty the King, was recently brought to Canada on the Canadian Pacific Steamer "Marburn" and will be kept at the Prince of Wales' ranch near Calgary for breeding purposes. This famous five-year-old has a pedigree back to Orme and Galopin, the former sire of Flying Fox and the latter a Derby winner.

It is reported that the head of the textile department of Leeds University, England, has invented a process for the making of artificial wool from cotton waste. The basis of the process is cellulose acetet. The product wears well as wool, it is said, will take the dye of any desired color and is considered a better insulator than natural wool.

Editors of Canada's Weekly Newspapers Photographed at Halifax.

No annual convention trip which the Canadian Weekly Newspaper Association has ever taken has been more memorable than that which has just been completed. Newspaper men from all parts of Canada—from as far west as Vancouver Island, B. C., and as far north as The Pas, Manitoba met together at Toronto to board the special Canadian Pacific train that was to take them by a series of easy stages to Halifax, Nova Scotia. The editors and their wives and some children numbered altogether about 180, and it took a train of twelve cars to accommodate them. The train was made up of eight standard sleepers, two diners, a baggage car, and a compartment observation car which added greatly to the comfort of the trip. The train was manned by a picked crew of operators and stewards and was accompanied by W. B. Howard, Assistant General Passenger Agent, and Mr. J. Harry Smith, Canadian Press Representative of the Canadian Pacific Railway. The success of the trip was to a large extent due to the organizing ability of E. Roy Sayles, Manager of the Association.

Pulled by one of Canada's finest locomotives the train made a special run to Montreal arriving there ahead of time schedule, and the party was joined by many Quebec members. The next stop was at Fredericton, N. B. where the citizens joined in a splendid welcome to the travellers. The Lieutenant Governor, and Premier Veniot of New Brunswick gave a reception and dance in the Legislative Chamber, and the party moved on to St. John where similar hospitality was enjoyed. On the Canadian Pacific steamer "Princess" the party enjoyed a delightful sail to Digby, N. S., from where the trip through the Annapolis Valley to Halifax was made over the Dominion Atlantic Railway. The wonderful orchards and dike-lands of the Evangeline country were looking their best and a stop was made to visit old Fort Anne at Annapolis Royal where much of the early history of Eastern Canada was made. Kentville's fine band turned out with the population to greet the newspaper people, and here as in most other places touched, citizens came with autos to give the visitors a glimpse of the surrounding country.

The ancient city of Halifax outdid herself in hospitality, and here the annual convention was held. At one of the meetings it was decided that the annual trip would next year be to England and France. The members will thus have a chance to visit the great Empire Exhibition at Wembly. The return trip was made via Canadian National to Quebec where the party was entertained by the Canadian Pacific at the famous Chateau Frontenac. The newly elected president of the Association is J. E. Fortin, of "L'Eclaireur," Beauceville, Que.

CLEAN UP AS YOU GO

A recent article in Motor bears constructively on the Ontario Motor League's drive against those who through thoughtlessness or selfishness leave glass, bottles, tins, wire, nails or other litter on the streets and roads. To "clean up as you go" is not only required by law, but is obviously the only, decent, proper, clean thing to do. The article alluded to states that on the morning of July 5th three men who thad been spending the week-end holidays at a camp in the Adirondacks, started out to drive to Utica, a distance of some 75 miles.

It would have been possible for their host to have taken them to a nearer railroad station, but as they were strangers to that country, and be an enthusiast about it, the drive had been suggested that they might have opportunity to see the beauty of it all.

He had told them of the road that they would take; a smooth, winding asphalt road that leads up over great hills and then down into deep valleys. He had told them of mountain peaks to be seen from the hilltops; of refreshing spots in the valleys where soft carpets of pine needles invited the wayfarer to rest and forget. He had told them of a path that leads from the winding road into the forest where, in a clearing of graceful tamaracs, he knew of a spring the waters of which gathered in a natural bowl formed by the years in a great rock.

He had told them of these things, the beauties of the open countryside that meant so much to him—and to them, and all had agreed that such a trip would be far preferable to making the journey by train.

And so they started out on that Wednesday morning. But the countryside was not as they had expected to see it. There had been four holidays. Thousands of motorists had taken advantage of those days to get out of the cities. Many had gone prepared to make themselves independent of hotel accomodations by camping wherever night might find them. Others had planned to compromise with hotels by preparing at least two meals of the day's meals along the roadside.

And they had left in the wake debris and litter. The road was strewn with soiled and dirty lunch boxes, paper napkins, empty bottles, empty cans, newspapers. The spring in the tamarac clearing was contaminated by vegetable matter that had been thrown into the basin.

"Somthing ought to be done about it," is a familiar expression. We, as citizens of this community or that, review the shortcomings of the community, forgetting for the time that we ourselves are part of it, and decide "that something ought to be done about it." We let the matter rest there, however, forgetting that if anything is to be done about it, the duty is ours as well as our neighbor's

These men, viewing the countryside as it was on that Wednesday morning, decided that "something ought to be done about it." They did not, however, let the matter drop there. Five days later in New York there was called a meeting that the matter might be discussed and some definite action taken. And that afternoon there was born the Motorists' League for Countryside Protection; its purpose, to instil in the motoring public a sense of stewardship and responsibility; its slogan: to "Clean Up As You Go."

A national committee has been formed and among the prominent men who realized the necessity for this work and who have accepted service on this committee are: Henry C. Wallace, Secretary of Agriculture; Luther Burbank, naturalist; James Newton Gunn, president of the United States Rubber Co.; Nelson Doubleday, of Doubleday, Page and Co. and George C. Diehl, president of the American Automobile Association. The late President Harding also took an active part on this committee.

The League has taken off its coat, rolled up its sleeves and has gone to work. Through the formation of local chapters it is going to impress upon every motorist the necessity, or rather, the duty, of cleaning up as he goes.

Every reader should co-operate heartily in this movement. None of us want to see this wonder country despoiled through the thoughtlessness of a few. Neither do we want the day to come when we will have to pick our way across the country along trails of tins cans interspersed with luncheon remnants, bottles, paper napkins and other discarded accessories of picnickers and tourists. Nature has lavished upon us many riches which, thanks to the motor car, we are now able to enjoy to the fullest. We want to keep them and enjoy them. And we can if we will all help.

It's easy enough to say: "Why, this country is so large that a few odds and ends tossed away after breaking camp or leaving a beautiful picnic spot can never be noticed." But did you ever consider that there are today something like 12,500,000 passenger cars in use on this continent? The majority of these go touring to some extent during the summer season. You can easily appreciate the wide path of disorder and damage such a vast army can leave behind. Visualized in these proportions, it is easier to see the imperative need of the slogan: "Clean Up As You Go" and the faithful observance of it by all.

It's a fair question to ask the man who leaves litter and rubbish behind: "Were you born in a pig pen? If you scatter the garbage on your front lawn at home, do it here; we want you to feel at home."

PACIFIC HIGHWAY NOW COMPLETED

Yesterday the last blocks of paving were laid on the Pacific Highway providing a clear, smooth, paved road all the way from Vancouver to Seattle.

This solves one of our biggest tourist problems. There is no bar anywhere, now, to a constantly increasing influx of tourists to Vancouver, year after year.

The next and equally inmportant problem is to let tourists know about it.

Just as in merchandising, there are two essentials to success; first, to have the goods; second, to let the public know you have them.

Vancouver has the goods. We have natural attractions equal to those of any other country in the world. And now we have a perfect road right into the city.

The next thing is to tell the world all about it in language so attractive and inviting that they can't help visiting us. Powerful, consistent advertising is the next step in our tourist campaign.—Vancouver Sun.

PALACE IN VIENNA ALL UNDERGROUND

Hardly any foreigner and few Austrians know that beneath the Imperial Palace in Vienna there are huge subterranean galleries leading as far as Klosterneuburg, a little town west of Vienna. They were built in the Middle Ages as a refuge for the court in times of danger. Most of them are closed now, but a part, still accessible, is interesting enough to justify a visit under the guidance of one of the old attendants of the former imperial court.

If one enters these catacombs from the Josephsplatz, near the National Library, one first comes to a huge cavern with long side galleries, the book cellars of the library, which contains 3,500,000 volumes, many of them in precious pigskin covers. All classic and modern languages are represented, and two chests are filled with an invaluable collection of old Chinese and Japanese books. Not only the shelves are full, but there are piles of books on the ground.

From the first cellar one goes into a second lying beneath it, and from there into a third beneath the second. In this lowest gallery the air is sticky and damp, and the books are covered with a greenish mold, which threatens to destroy them altogether if they are not soon removed to a better ventilated place. It is hardly possible to get an exact estimate of the treasures that are hopelessly rotting away here if they are not saved soon. Lack of money for covering the costs of removal is responsible for this situation.

A side gallery of the book cellars leads into the imperial wine cellars, whose condition is less hopeless. Although the old stocks are no longer being replenished, the cellars still hold about 1000 hectoliters of precious old wines, mostly bottled. The old butler who is in charge of this section, is not in a jolly mood. He believes that his stocks will be sold up in about two years, despite the high price in Austrian kronen, which, is converted into dollars, shrink to about $2.20 for a bottle of the very best wine.

While these parts of underground Vienna are never visited by foreign tourists, the imperial tombs in the "Kapuzingergruft" have become a very popular place of pilgrimage with Americans, who never miss the opportunity of a short visit.

A young American woman recently had a very unpleasant experience in these tombs. When she was about to leave she found the door locked, and only after a half hour's hammering was she heard and released.

When The Turk Is Human

Turkey is young at the democratic game, but evidently she is learning fast. From Anatolia, where a general election has been in progress, comes this pledge from the platform of the party led by Mustapha Kemal: "The problem of the officials without jobs will be solved and all the affairs of the people will be expedied."

Kemal gives promise of developing into a fairly shrewd politician, at this rate. Apparently the Turk can be human as well as inhuman.

A Story Still Untold

Another war secret has been disclosed by a British admiral. It throws another ray of light on the methods used in dealing with German submarines.

The war was fought in a great silence and the world has yet a lot to learn as to what actually happened.

The world must wait a while yet before books can be written presenting an adequate summing up of the tremendous event.

AFTER-EATING DISTRESS

and all forms of stomach trouble, such as gas, pains, acid, sour, burning stomach are all relieved in two minutes by taking Jo-To. Jo-To is sold by all Druggists.

Taking the Roof of Canada.

The glacial rockies as a movie location.

"AND just then," said Otto Paul Schwarz, of Switzerland, in describing a trip in the Canadian Pacific Rockies, "we saw a huge Bergschrund."

"And did it bark at you?" he was asked. "Or do they bleat?"

"Ach, no. A bergschrund is not a bird. It is a nuge crevasse where the ice has slipped down the rock wall and cracked. The next stumbling block we came to was a chimney. This is a hard business. It means bracing your back against one wall and your feet against the other and doing what you call on this side 'the shimmy' till you get to the top. Icicles fifteen feet long hung above us."

It is a great life, this one of mountain climbing, especially higher up where the glaciers are. Imagine a river of ice with a depth of something like 1,000 feet. Great crevasses reach down. it seems, to the bowels of the earth, peaks and minarets rise from its uneven surface and glisten in the sun which can never warm them; a giant green-white force, irresistible, stupendous, with an alluring fascination which the lovers of the outdoors cannot deny.

The picture above was taken on the "roof of Canada" near Banff, and the huge glacier which the party is traversing will, in years, perhaps, help to make fertile the prairie plains. Travelling at the rate of about four inches each day, nothing can withhold it, but another generation of sightseers will have come and gone before the ice on which the climbers stand will have found its way down to the warmer valleys where it will melt; and in the meantime, snow from the even higher peaks will press and pack and so, so far as the present day world is concerned, the life of this wonderful natural force is without end.

Laxatives Replaced By the Use of Nujol

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

The STAR CAR

THE creation of the Star Car is the most important and brilliant accomplishment of any individual identified with the automobile industry since its inception.

Smartness in looks, and thoroughness and modern design in a low priced car was unheard of until the Star was created by W. C. Durant, the pioneer builder of automobiles and identified with the introduction and success of the Cadillac, Buick, Oakland, Oldsmobile, Chevrolet and Durant Cars.

The Star Car marks the most advanced step since introduction of the automobile, for it provides for the first time a quality automobile, standardized in construction and operations for a modest sum of money.

The STAR FEATURES

$820.00 FERNIE

Continental Red Seal Motor.
Timken Rear Axle.
Timken Bearings, front and rear.
Spicer Universal Joints.
Selective Sliding Gear Transmission, three speed forward and reverse.
Single Plate Disc Clutch.
Half-elliptic Springs, underslung.
Stewart Vacuum Gasoline Feed with Supply tank at rear.
Electric Lighting by Standard Generator with Storage Battery.
Streamline Body.
One-man Top, with Gypsy Curtains and Side Curtains that open with Doors.

1923 GAME REGULATIONS

Following is a synopsis of the 1923 Game Regulations. It would be well to consult the official poster issued by the Game Conservation Board as space will not permit only details to be published here:

Eastern District—Includes all the Province East of the summit of the Cascade Mountains South of the G.T. Pacific Railway.

Open season to kill game as follows (Both dates are inclusive):

Moose—Bulls only, over one year old, in the electoral districts of Atlin, Fort George and Omineca north of the main line of the G. T. P. R.—Sept. 1 to Dec. 15.

—In the electoral district of Cariboo and those portions of Omineca and Fort George electoral districts south of the main line of the G. T. P. R.—Sept. 15 to Dec. 15.

Caribou—Bulls only, over one year old, throughout the districts (except on Queen Charlotte Island and except south and east of the main line of the C. N. R.)—Sept. 1 to Dec. 15.

Mountain-Sheep—Rams only, over one year old, north of the main line of the G. T. P. R.—Sept. 1 to Nev. 15.

—In the electoral districts of Columbia, Cranbrook and Fernie—Oct. 1 to Nov. 15.

—In the electoral district of Lillooet south of the Hanceville-Clinton wagon-road and west of the Fraser River—Sept. 1 to Nov. 15.

Wapti (Elk)—Bulls only, over one year old, in the electoral districts of Fernie, Cranbrook and Columbia — Oct. 1 to Oct 20.

Mountain-Goat — Throughout the districts (except south of the main line of the C. P. R.)—Sept. 1 to Dec. 15.

—In that portion of the Eastern District south of the main line of the C. P. R.—Sept 15 to Dec. 15.

Bear—Throughout the Northern district—Sept. 1 to June 30, 1924.

—Throughout the Eastern district —Sept. 15 to June 30, 1924.

Deer—Bucks only, over one year old, throughout the districts (except white-tail deer in North and South Okanagan, Similkameen and Greenwood electoral districts)—Sept. 15 to Dec. 15.

Bag Limit—Goat 2; deer 3 (bucks only); moose 1; caribou 2; wapiti (elk) 1; sheep 2; of any one species or 3 altogether north of the main line of the Grand Trunk Pacific Railway, and 1 sheep within the boundaries of the Columbia, Cranbrook, Fernie, Lillooet and Cariboo electoral districts; bear 3 of any species other than grizzly; north of the Grand Trunk Pacific Railway, 2 grizzly bear; south of the Grand Trunk Pacific Railway, 1 grizzly bear.

No game may be sold, except — Moose and caribou in the Atlin and Omineca electoral districts from October 1st, 1923 to December 15, 1923; bear in the Northern district from September 1, 1923 to June 30, 1924, and in the Eastern district from September 15, 1923 to June 30, 1924.

Fur-Bearing Animals

All fur-bearing animals may be trapped as follows:

All fur-bearing animals (except beaver) north of the main line of the C.P.R.—Dec. 1 to April 30, 1924.

Musk-Rats (only)—In the Columbia electoral district, situate and lying in the Eastern district—Dec. 1 to April 30, 1924.

Beaver—In the Northern district and in the electoral district of Prince Rupert, Cariboo, Omineca and Fort George, situate and lying in the Eastern district—Dec. 1 to April 30, 1924.

Game Birds

Grouse and Ptarmigan — (Except prairie - chicken and sharp - tailed grouse) in the Northern district and in those portions of the Omineca, Fort George and Cariboo electoral districts situate and lying in the Eastern district—Sept. 1 to Nov 15.

—In the ramainder of the Eastern district—Sept 15. to Oct. 15.

Prairie-Chicken and sharp-Tailed Grouse—In the electoral district of Fort George situate and lying to the north and east of the Rocky Mountains—Sept. 7 to Oct. 15.

Pheasants—Cocks only, in the electoral districts of South Okanagan, Similkameen and the Municipality and district Municipality of Salmon Arm —Oct. 20 to Nov 17.

Quail—In the electoral districts of Similkameen and South Okanagan — Oct. 20 to Nov. 17.

Bag Limit—Grouse and ptarmigan, 6 of one species or 12 of all species in one day, 50 in the aggregate for the season; pheasants, 4 in one day, 12 for season; quail, 10 in one day, 50 for season.

Game may be kept for two weeks after any open season is ended.

Migratory Birds Convention Act

Ducks, Geese, Brant, Coots, Wilson Snipe, Black-breasted and Golden Plover, Greater and Lesser Yellowlegs—Thorughout the Northern and Eastern districts—Sept. 15 to Dec 30.

Bag Limits—Ducks, 20 in one day, 150 for season; geese and brant, 10 each in one day, 50 for season; Wilson snipe, 25 in one day, 150 for season; coots, 25 in one day, 150 for season; black-breasted and golden ployer, greater and lesser yellowlegs, 15 in one day in the aggregate of all kinds, 150 for the season in the aggregate in the season.

CHRIST CHURCH

August 12th, 1923. 11th Sunday after Trinity.

ASTHMA TORTURE NEED NOT BE HOPELESSLY ENDURED.

Health Talk No. 30.
By G. J. Parks, D. C.

The history of case after case that is conquered chiropractically. is that of trying everything else first, only to find that chiropractic when it is finally given the chance was easily master of the trouble. It only goes to prove that there is no substitute for chiropractic. Used first instead of last, time and money will be saved.

Asthma sufferers have what is called asthmatic stoop, a forward curve in the spine between the shoulders. It takes adjustments to correct this condition and restore normal spinal nerve action to the bronchial region effected in asthma. When this condition exists neither climate, medicine, sanitarium, nor nursing will substitute for chiropractic spinal adjustments.

ASTHMA
Of 20 Years Standing
Is Overcome

"I suffered from asthma for twenty years. A change of climate was advised and we moved from New Brunswick, Canada, to Eureka, San Francisco, Santa Rosa, San Diego, and finally to Tujunda, California, in attempts to get relief. An operation on my nose was advised. A sanitarium was advised. Only opiates gave any relief. Shortly after going to Tujunda I began taking chiropractic spinal adjustments. I am now proud to say that my case has been discharged as cured, and though I had a severe cold last winter, there was no return of the asthma. It is wonderful to be healed without medicine."

—Mrs. Mary Desjardin, Chiropractic Research Bureau, Statement No. 1367E.

FOOTBALL BENEFIT REALIZES $125.25 FOR DANNY NEE

The Executive of the Fernie Football Club desire to thank all tag sellers in connection with the benefit game for D. Nee, on the north end grounds on Sunday last, when the sum of $125.25 was realized for injured player. Also all players who turned out and helped to make this benefit game a success.

Following is the list of the tag sellers:

R. Steele	$ 12.50
P. J. Hughes	10.75
T. Muirhead (Resold)	8.00
F. L. & A. A.	39.00
J. Rigg	12.50
Jack Sweeney	37.50
Donation	5.00
Total	$125.25

Cheque for the above amount handed to D. Nee—J. W. Skilling, Sec. F. Football Club.

KIMBERLEY 9, COAL CO., 5

The Coal Company, of Fernie, lost their first game in the second half of the East Kootenay Baseball League last Sunday afternoon, when Kimberley defeated them at Kimberley by a score of nine runs to five in a free hitting contest.

Ault was not up to his usual standard and Kimberley got to him for thirteen hits, five of them for extra bases. Five errors behind him contributed greatly to Fernie's downfall.

Garrity was hit freely but airtight support kept the Fernie team from scoring on many occasions. Ten hits were secured by the Fernie boys.

In the first innings Fernie started out strong, Hovan, first man up connecting for a two base hit, Bishop then followed with a single. Hovan endeavored to score on the hit but Garrity relayed the ball to McMahon, who tagged the runner out. Fernie were retired without any further hits being made. In the third inning, Kimberley opened the score column when C. Musser was safe on Bishop's error, McMahon singled, then Hughes connected for a two bagger, scoring Musser and McMahon. Hughes scored on Coen's single giving Kimberley three runs. In the sixth inning, two singles and a double gave them two more runs. The next inning, Kimberley went on a batting spree and batted all the way around; five hits, an error and a sacrifice giving them four runs.

The Coal Co. did not open out untill the seventh, Garrity hitting Barger, first man up. Shand connected for a single, Barger going to third. Shand stole second and both scored on Coen's fumble of Colton's drive. Colton scored on Sikora's single. In the eighth, Fernie scored two runs, Hovan leading off with a single, Bishop sent the ball down the first base line and in running to first he stepped on the ball and was called out. Hovan scored when Barger connected for a two bagger, then the latter scored on Shand's single.

The box score—

Fernie—	AB	R	H	PO	A	E
Hovan, ss	5	1	2	3	2	1
Bishop, 2b	5	0	1	1	2	1
Barger, 1b	3	2	1	8	1	1
McTeer c	4	0	0	7	0	0
Shand, 3b	4	1	2	1	1	2
Ruschall, cf	4	0	1	2	0	0

Score by innings—

Fernie	000 000 320—5
Kimberley	003 024 00x—9

Summary—

Stolen base: Shand; Sacrifice hit: Coen; Two base hits: Hovan, Barger, Hughes, Garrity, McMahon, Musser, Flaherty; Struck out: by Ault 7, by Garrity 5; Hit by pitcher: by Garrity (Barger); Earned runs: Fernie 2, Kimberley 6; Left on bases: Fernie 6, Kimberley 9; Passed ball: McMahon; Time of game: 2 hrs 10 min.; Umpire Scott.

The same afternoon Wycliffe defeated Lumberton at Wycliffe by a score of six runs to two, giving them their first victory in the second half of the league race.

The Fernie Baseball team were officially notified Wednesday afternoon that, as their team had been broken up, Lumberton have decided to default their scheduled game against Fernie, due to be played here Sunday next. This means that Fernie are winners of both the first and second halves of the league as the game to be played between Wycliffe and Kimberley and Wycliffe on Sunday cannot effect the league standing. Fernie therefore retain possession of the East Kootenay League Pennant for 1923 and will play off with Kimberley, runners-up in both sections, for the Nelson News Cup.

Following is the standing of the clubs for the second half of the league including the defaulted game (*).

	W	L	Pct.
Fernie	5*	1	.833
Kimberley	3	2	.600
Lumberton	2	4*	.333
Wycliffe	1	4	.200

LABOR DAY CELEBRATION

The committee in charge of the G. W. V. A. sports are leaving no stone unturned to make Labor Day a record in the annals of sportdom in Fernie. A large program of events are being arranged, for which substantial prizes are offered. The Popular Girl Contest being the means of creating great enthusiasm among the supporters of the various candidates. The following being in the field up to the present:

Miss Jessie Richardson; Miss Ivy Drew; Miss Wilson, Roma Hotel; Miss Gwennie Larmont, Coal Creek, and Miss Lena Stephenson, Michel.

The contest positively closes at 8 p.m., Thursday August 30. All stubs, monies, etc., to be handed in to the Chief of Police on or before that date. See dodgers for particulars as to the prizes in this contest.

The day proceedings will commence with a monster parade leaving the School Grounds at 10:45 a.m. An invitation being extended to all Fraternal Societies and other public bodies to be represented. Prizes will be given for the best decorated float or car; best representative float or car; best comic character; best decorated bicycle; clowns, etc. All intending taking part are requested to notify R. Billsborough, chairman of Parade Committee.

Immediately after the parade, a bicycle race will take place on Baker Avenue owing to the unsatisfactory condition of the track in the Park.

The following events will take place at the Park:

Football competition — 5 a side; baseball; children's races, boys and girls, 4 events; men's race, 120 yards open; men's race, handicap; Veterans' race; married ladies' race; single ladies' race; obstacle race; horse racing; swimming events in the pool for children; caledonian sports; and dancing competition, open; while the comedy portion of the day will consist of: tilting the bucket; climbing the greasy pole; treacle bun contest and catching the greasy pig.

Also the usual side issues. Aunt Sally; chocolate wheel; shooting gallery; cocoanuts, etc.

The proceeding will close with a big dance in Victoria Hall. Admission $1.50 a couple, extra lady, 50c. A novelty dance will take place, for which prizes are given to successful terpsichoreans.

There will be a Torch Light procession in the evening at 8:30, staged by the Dramatic Order Knights of Khorassan (Dokeys) headed by the G. W. V. A. Band under Bandmaster Ramsey.

The G. W. V. A. Band and the Fernie Pipe Band will take part in the morning parade.

Admission to grounds, by tag: Gents, 50 cents; Ladies, 25 cents; Children under 14 years free. Dodgers and programs will be issued later.

GOLF TOURNAMENT AT BLAIRMORE

The annual tournament of the Crow's Nest Pass Golf Association takes place at Blairmore on September 1, 2 and 3. A large number of players from all the clubs in the district have signified their intention of taking part in the tournament and handsome prizes are being awarded.

The Blairmore course is being put into first class shape and a big dance has been arranged for the golfers on Saturday, September 1.

Fernie has always been well represented at these tournaments and it is hoped that a large number of members will take part this year.

The prizes on this occasion are more numerous and better than ever and players with a good handicap have splendid chances of entering the jewelry class.

McBAIN'S LAKE GOOD SUMMER CAMP

(Cranbrook Courier)

Mr. Ed Paterson, on returning from McBain's Lake, Jaffray, where he and his family joined to that of Mr. A. K. Leitch, have recently spent an enjoyable holiday, goes on record as saying that, as a camp site, the lake near Jaffray is ideal. Whilst the lake itself does no afford particularly good fishing, excellent sport can be obtained in Lesser Sand Creek, a branch of which stream flows out of the lake. Mr. Paterson reports nice catches—quite sufficient trout being caught to keep the camp well supplied with fresh fish. He also speaks of the splendid beach from which to bathe and the warmth of the water which makes a dip a delight.

FERNIE CAMP SITE IS BUSY

By Fred Spalding

If any Fernie business man has any doubts as to the advantage of the town having a good camp site, he should go up there occasionally and hear what the tourists all have to say about it.

Last season we noticed that there were quite a number of parties who stayed here several days, but the numbers doing so this year is considerably increased, in fact I do not think it is an exaggeration to say that fully one half of our visitors at the grounds have stayed at least one entire day, many have been here several days and one party, still there, has been there just two weeks, while several parties have stayed there twice.

It is the universal opinion that Fernie has the nicest camp grounds. A glance through the register in which tourist after tourist, no matter where from, has stated that it is the nicest camp ground they have stayed in during their trip, will convince Fernieites of this, and also of the genera opinion that we have a beautiful town.

Recently there have been several municipal officers from Alberta towns up there and they have told me that they have heard so much about Fernie camp site that they had come to steal some of our ideasw ith the intention of embodying them in their own grounds.

Apparently there are some of our visitors who have a great appreciation of our British liberty of thought. Three times last week I found parts of the grounds littered with beer and whisky bottles, in one place, which had evidently been shared by two parties, I picked up no less than three empty Scotch bottles, two pint flasks and nine beer bottles. That must have been SOME party.

Does the tourist business pay? Is it worth while to cater to it? These are questions which are worrying the communities which are gradually being brought within the limits of present day motoring. To these questions there is only one answer. It does.

Canada's principal authority on business conditions throughout the country, "The Financial Post," in its last issue has an article under the double heading "British Columbia Tourist Traffic Worth Thirty Million Dollars" — "Direct and Satisfactory Results are Traced to Publicity Campaigns." It says in part: "British Columbia has reached the peak of the biggest tourist season in her history, and it is estimated that as a result of the enormous travel, the expenditure of transients while in the province this summer will be worth at least thirty million dollars. With the tourist season just nicely under way, representatives of Vancouver commercial organizations estimated that ten million dollars had been brought into that city alone as a result of the tourist business this year. Victoria is sharing bounteously in this development and as an indication of the growing volume of business, three new large ferry steamships have been added to the fleets plying between Vancouver Island and the Washington State mainland.

The tourist business in British Columbia has been referred to as a gold mine, but no gold mine ever yielded as heavy as the tourist crop is doing this year. Last year the total mineral production of the entire province was approximately thirty-five million dollars. If the thirty million dollar estimate of the money brought into the province and left there during this season is an accurate one, the tourist business may be rated as among the three largest industries in British Columbia.

Persistent advertising in the territory where most of this travel originated—in eastern centres of population, on the prairies, and largely in California—is regarded as responsible for the rapidly swelling tourist tide into British Columbia.

The final paragraph of this authoritative article reads:

"British Columbia's experience is that the majority of the tourists return year after year and that a large proportion of them form the intention while touring the province of eventually settling down in it."

It will be noticed that the "Financial Post" credits persistent advertising in the centres from which the majority of these tourist come as being responsible for this great influx. Now which are the towns benefitting mostly from it? They are Vancouver and Victoria in British Columbia, and Banff and Calgary in Alberta and the other towns are only getting the crumbs. Why is this? Because both Vancouver and Victoria spend large amounts of money each year on publicity and are also helped by the railroads and shipping companies, the same applies to Banff and Calgary.

The Banff-Windermere road has been advertised far and wide by the Canadian Pacific Railway and Dominion Government, but in all the advertising the only places which have come in for special mention have been Banff, Lake Louise and Calgary, and they have been well described. It is true that the road maps have all shown the complete Cirlce Tour, but the other towns are only shown as towns which have to be passed through to reach those three. Not one of the moving picture films which are being shown all over the country contain anything else but that section of the tour between Invermere and Banff, therefore, so far as their advertising value to the rest of the Circle Tour is concerned, it is not worth anything.

The Crow's Nest Pass contains scenery the equal of any between Windermere and Banff, and the twenty miles between Elko and Fernie is better than anything elsewhere. This is not my personal opinion, but nearly all the visitors to the camp site and my office have said the same about it. Why are not the California tourists coming through here this year in the numbers they did last year? Simply because the most recent advertising they saw before deciding on their trips mentioned nothing else but Banff, Lake Louise and Calgary, and their itineraries were made out in accordance. Cranbrook—being the point at which they had to turn north—is the only town in the Crow's Nest Pass which has benefited.

It has been suggested that each town through here should get out its own booklet descriptive of its local attractions and give these to the tourists when they get here and induce them to stay over. Even if the towns east of Cranbrook were getting a

(Continued on Page Three)

OLD TIMERS' ANNUAL PICNIC

The Fernie and District Old Timers held their second annual picnic in the City Park Wednesday afternoon, with an attendance of nearly two hundred people, comprised of Old Timers from all over the district and their families.

The gathering left Fernie by cars about three o'clock in the afternoon and on reaching the Park they immediately launched a large program of races and games. The Fernie Pipe Band was in attendance all afternoon and kept things lively with their skirling.

The sports opened with children's races, ranging between the ages of six and fourteen. These were followed by Old Timers' races, M. Kasmar winning the men's race, 40 to 50 years; A. C. Liphardt, the 50 to 60 years and Geo. Cody, the over 60 years. The race for ladies under 30 was won by Miss Schagel, while Miss Brown won the senior race.

The gathering then adjourned to the swimming hole when two ecquatic events were pulled off and provided the greatest excitement of the day in the race line. Geo. Ross winning the junior race and E. Waters the senior swimming race.

Following the swimming events, the lunch baskets were brought out and supper was served. During this pleasant occupation, some classical dancing exhibitions were pulled off to bagpipe music. Louis Foisey rendering the clog dance and Bob Duthie showed how the Sword dance should be done. Jimmy McLean gave the Scotch interpretation of the Highland Fling while Philip Carosella obliged with the Italian version.

After the supper had been disposed of, two teams, the Giants and the Cubs, were picked for a baseball game. This game uncorked some dark horses in the baseball line, McIntyre, pitching for the Cubs, had the Giant batters guessing all the way, and by the box score, had thirteen strike-outs to his credit. (Somebody page the manager of the Ball Club.)

Dufour did the flinging for the Giants but was touched up freely by the Cub batters. He had his revenge on McIntyre's benders, however, swatting out two three-baggers.

Five innings were played, the Cubs winning by a score of seven runs to four.

CHEMISTRY IN THE NEXT WAR

The last war was emphatically a war of science and mechanics. The next one, when it comes, may be even more so, and Major Victor Lefebure, of the French Army, believes that it will be particularly a war of chemistry. In his recent book, "The Riddle of the Rhine" (Dutton), whose title refers to the author's speculations about the present plans and abilities of the Germans toward undertaking a war of revenge, he develops this idea at some length, pointing out how at any moment a skilled chemist may devise some slight modification of an existing poison-gas that would place certain victory in the hands of those who could monopolize it. That our own Chemical Warfare Service had made, or at least had in sight, such a gas, was definitely stated in our own press just after the war; and altho Major Lefebure does not mention this rumor, he gives unstinted praise to the American service, and to its foresightedness in preparing chemical weapons on a huge scale. Finally he warns us that no prohibition or agreement is going to stop the use of such weapons when national existence is believed to be at stake. He writes thus of the possibility of new war chemicals:

"The first main group of substances with which we were faced during the war contained such types as chlorin and phosgene, whose chief line of attack was directed toward the respitory system. Specific protection rapidly developed and, once obtained, led to violent attempts to penetrate it or 'break it down.' The introduction of mustard gas confirmed, what the use of lachrymators had suggested, that the most fruitful line would be found by attacking human functions hitherto immune. First the lungs, then the eyes, then the skin of the human being came under fire, so to speak. What further developments appear possible on these lines? Assuming that means are found to protect satisfactorily the respiratory system, and the eyes, what other vulnerable points can the war chemical find in the human organism?

"It is by no means visionary to picture the loss of the sense of taste and smell by the use of some chemical. Partially successful efforts were made by both sides during the war to mask the odor of the harmful constituent of a shell filling by introducing an appropriate 'camouflage' compound. Colonel R. F. Bacon of the American Chemical Warfare Service says: "The gas-camouflage is of particular interest. Malodorous compounds are useful to mask the presence of other "gases" or to force the enemy to wear respirators when no other "gases" are present. Camouflage gases are also useful in that they save "mustard gas" and the highly lethal gases.'

"In this field of chemical attack upon hitherto immune human functions, it must be borne in mind that any nation in a position to effect such a surprise would be in a commanding position. It is believed, for example, that the human being maintains his equilibrium through the proper functioning of the semi-circular canals behind the inner ear. It does not appear possible to attack them chemically directly, but they might be reached by the absorption of some suitable chemical into the system in the very small concentrations now possible on the field of battle. It has been advanced that the control of equilibrium occurs through the movement of certain hairs through a liquid within these canals. If this be so, then one would simply require to solidify or change the viscosity of this liquid. Would this be difficult? Probably not, for most of the body fluids are of that colloidal nature in which coagulation occurs in the presence of small quantities of special agents. Such a result might cause the individual to lose his equilibrium. This would prohibit all organized movement. An army thus attained would be less than a colony of cripples.

"Every one is acquainted with the peculiar effects produced by various anesthetics. Think for a moment of the possibilities which they unfold. They may produce temporary unconsciousness or absolute immobility without loss of consciousness. The second type, of which stovaine is a good example, produces its effects in very small concentration. A few drops injected into the spinal column are sufficient to prevent all movement for a number of hours. We can not expect to obtain the conditions of the operating table on the battlefield, but the chemicals which are effective in very small quantities or concentrations may find another channel into the human system. For this reason the development of the mask is of great importance."

The use of a chemical which attacks some unexpected human function introduces many disturbing and disorganizing factors. Thus the introduction of mustard gas, Major Lefebure tells us, has left us with a number of unsolved problems. By employing this substance he says Germany departed from her usual caution and violated one of the first principles of chemical warfare. It is unsound for any nation to introduce a new weapon, unless that nation is, itself, furnished with a means of protection against its eventual employment by the enemy. The Germans were convinced that their enemies could not retaliate with mustard gas, because they could not produce it. It was a miscalculation. He continues:

"Protection of the skin of the individual soldier against mustard gas was theoretically possible in three ways. In the first place a number of chemical solutions were devised which, applied to the affected skin, would destroy the poisonous chemical. This was a bad method, and was never efficiently employed. German army orders after the French introduction of mustard gas were bristling with references to chlorid of lime or bleaching powder. A wire from the Third German Army to the War Ministry, Berlin, dated 17th July, 1918, stated: 'Chlorid of lime has all been issued in boxes to the troops. Reserves exhausted.' One had the impression of a drowning man catching at a staw. Supply on a sufficient scale to cover most cases was practically impossible.

"The second method which was attempted on a large scale was the protection of each soldier by special mustard-gas-proof clothing, but a man fighting for his life on the battlefield will not tolerate such a handicap to movement. The third solution, which was tried experimentally on a large scale, was to cover soldiers going into action with a cream or paste of protective chemical. This could not be regarded as a permanent form of protection.

"Mustard gas infected whole areas for many days, owing to its great persistency. It was often necessary to cross such zones for attack or counter-attack. How was this to be effected without huge losses? It was found possible, literally, by creating roads of bleach, that is, by sprinkling bleaching powder on chosen lanes through the infected area, to pass columns of troops through such areas, but this cannot be viewed as a practical solution.

"Chemical warfare has introduced a new type of strategic and tactical obstacle. It has introduced a method of blocking out chosen areas of the battlefield in such a way as to prevent their effective use for military defense, communications, or other purposes. It is now possible, by chemical means, to give a normal piece of country the same value as a natural obstacle, or one organized for defense by formidable engineering construction, and manned by rifles and machine guns. Even in the quantities which have already appeared on the battlefield, gas has rendered whole zones practically unusable for huge masses of men, owing to the certainty of a very high percentage of casualties.

"At any time, a substance of the same strategic value as mustard gas, but with much more violent casualty effects, may be discovered. According to the statement of an apparently reliable prisoner in 1918, the Germans were going to employ a 'White Cross' gas shell, stronger than any of the gases at present in use; it possessed a persistence up to eight days, and could, therefore, not be used on the front for an assault. We can forecast the use of a chemical which will not only permit the formation of defensive flanks, or pockets, in the enemy front, or in our own defensive positions, but, by replacing the relatively mild casualty effect of mustard gas by a highly and rapidly lethal effect, will render these areas not only strategically, but physically, impassable.

"The discovery and mass production of a persistent lethal substance is likely to convert No-Man's-Land into a permanently infected gas zone, manned by special outposts of permanently protected troops. This may render unnecessary the highly organized trench-assembly systems of the recent war. A recent writer has shown us the future tank carrying war into the enemy's country and destroying his nerve centres. Such operations will have to occur through a wide zone of the new gas and will necessitate the anti-gas tank. Indeed, one of the most important functions of the tank will be to carry the advance guard of an army beyond the infected No-Man's-Land.

"The combination of gas and aircraft presents the possibility of attaining strategic effects by chemical means. Many rumors were afloat, toward the end of the war, regarding the use of gas by enemy aircraft, and there was apprehension among the civil populations, which has been reflected in numerous public utterances. Evidence on the matter is very scanty. In July, 1917, the use of gas in airplane bombs by the Germans was reported, but not confirmed. In July, 1918, there were again rumors that Blue Cross bombs had been dropped on the British near Ficheux. But the war gave us no direct evidence of the successful use of gas and war chemicals from aircraft. This, however, is no criterion as to its eventual importance. The Allies definitely refrained from employing the combination until Germany should give them the start in what was regarded as a new atrocity."

In conclusion, Major Lefebure reminds us that although the physical sciences have left their mark on every weapon and mechanical appliance, the most revolutionary upheaval in warfare, with permanent results, came from chemistry. The flexible nature of organic chemistry, he insists, must not be lost sight of. He says:

"In the physical sciences, electricity, for example, years of coordinated world progress are required to produce an epoch-making discovery which might have critical direct war significance. Radioactivity has shown us what undreamed of energy is bound up in the atom, and many are the prophecies regarding the harnessing of these forces for constructive activities. But in organic chemistry a single worker, following up some rare family of compounds, may stumble upon a substance not far removed chemically from related compounds yet infinitely more potent for war. The persistent lethal compound which will vastly change the nature of warfare will probably be but a slight chemical modification of some harmless substance. This is not the only reason, however, for the unique war importance of organic chemicals. It so happens that many of them are essential to our daily life as dyes, drugs, photographic and other synthetic products. Industries, therefore, have arisen for their manufacture."

And this is not all:

"Organic chemical factories have proved to be not only arsenals in disguise, but endowed with the flexibility of their parent, the science itself. The factories and plants ignore the war significance of the problems put to them. They can develop the production of practically any chemical which research can produce. The will of man can thus silently and swiftly convert the dye factory into an arsenal."

Buenos Aires purposes installing open-air libraries in the city parks. Park frequenters will be provided with books to be returned before leaving.

There may be some hesitancy among the Chinese leaders, about attending the proposed conference to consider plans to restore peace in that disturbed country. There is a possibility of bandits kidnapping the delegates and holding them for ransom.

Barbers are required to pass a State examination in Oregon. Amateurs are lucky who pass the tests with a close shave.

Rust, hail and sand flies are three enemies that keep the prairie grain-growers in suspense until the crop is safely harvested. Fortunately their ravages have so far been confined to limited areas.

A Saskatchewan firm has established a plant for handling cracked eggs. The contents of the wrecked hen fruit are put into forty-pound pails and frozen. In that state they have been shipped even as far as London, England. They may be all right for custards, but hard-boiled restaurant patrons would not scramble for them.

TEA

Do you like real, good tea? That's the kind an SMP Enameled Ware Tea Pot makes. Try it. There is no discoloration or tainting with SMP Enameled Ware. No loss of flavor. And it is so simple to clean. Ask for

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

PROVINCIAL PARAGRAPHS

Vancouver, Aug. 16. — Fraudulent advertising in the classified columns from concerns offering "employment with investment" has received a sweping exposure by "The Hook," edited by J. S. Cowper, former M. P. P. Startling revelations of heartless, wholesale swindling have been made. Following this expose there has followed an exodus of "easy money" specialists, and a clearing up of various unscrupulous schemes that have thrived for a long time in these parts.

New Westminster, Aug. 16. — Two Japanese cannery firms have started up operations in the Fraser Valley fields. They are capitalizing at $100,000, subscribed by local Japanese.

North Vancouver, Aug. 16. — Women of this place are circulating a petition for the establishemnt of a Housewives' Protective Association similar to the organization that was started in Vancouver a few months ago. The latter association proved a failure because the members could not agree, and broke up with discord. The aims of the women are to establish lower prices for foodstuffs, better conditions for women workers and other improvements.

Vancouver, Aug. 16.—British Columbia has lost over $80,000,000 within the past few years by its neglect in omitting to have a steel and iron plant, according to latest carefully compiled statistics. One contracting firm, the Northern Construction Co., has carried out contracts amounting to over $70,000,000 within the past eight years, and of this amount alone, at least $26,000,000 would have been expended with a local steel plant, if one were operating in this province. J. A. Cunningham, president of the great Vulcan Iron Works, president of the B.C. Merchants and Manufacturers' Association, has adduced some amazing statistics, showing the loss sustained by this province in the absence of a coast blast furnace. Data in his report include these facts: Iron ore imported into the U. S. for the week ending July 14 amounted to 47,175 tons. Other iron ore importations are given as follows: Cuba 12,400 tons; Newfoundland 8,400 tons, Sweden 26,375 tons, Africa 2,000 tons; Calcutta 1100 tons; Turkey 4550. Also 750 tons of pig iron from Germany. Mr. Cunningham, who is regarded as the biggest iron master of western Canada, is seeking to arouse widespread public interest in the establishment of a steel and iron industry under support from the home, Dominion and Provincial governments as embosied in the plans of the Coast Range Steel.

Vancouver, Aug. 16.—"Lord" Temple, an impressive personage who cut a wide swath among social climbers, and who succeded in winning entrance to the most exclusive circles later, has been jailed in San Francisco under an alias, on worthless cheque charges. "Lord" Temple gave out that he was a scion of British nobility, and borrowed money right and left during his brief sojourn in Vancouver and Victoria. According to the San Francisco press, he was a former butler, and later sold sewing machines. His engagement to a society bud of Vancouver was whispered before his exit.

Vancouver, Aug. 16.—Completion of the hard-surface highway to the boundary has now been completed by A. B. Palmer & Co., and the nine miles of new road will be opened to traffic on August 24. The official opening is to take place on Sept. 3. A record for rapid workmanship has been made, a speed of 780 feet of concrete 18 feet wide and eight and a half inches thick having been sustained.

Vancouver, Aug. 15.—For the first time in its history the Pacific Great Eastern north shore branch has shown a profit on operation this year. The profit amounts to nearly $10,000. It is also announced that under the new management of Thos. Kilpatrick, the main line operation has shown a striking decrease. Sleeping cars are now being operated; trains run on time and a new schedule of rates for produce brought into force to enable settlers on the P.G.E. to ship into Vancouver at the same price as local ranchers at Chilliwack in the Fraser Valley can ship to Vancouver. The new policy of augmented service and lower rates has so far reduced operating losses by over $100,000.

Vancouver, Aug. 15.—Strong denunciation of the Daily Province newspaper for urging its readers to purchase foreign apricots for canning before foreign market was exhausted and the Okanagan crop was ready, made by the Hook, the lively young weekly edited by J. S. Cowper, former M.P.P. for Vancouver and erstwhile member of the Province editorial staff. The Hook calls upon its readers to disregard the representations of the Province and to support those who are working to develop the province and lighten its burden of taxation.

The dainty, economical soap for dainty fabrics

IN every home, in every laundering, there are delicate fabrics, dainty garments to be washed.

Now they can be beautifully cleaned without injury to material or harm to lovely coloring.

Thousands of careful women manage it easily, simply, by using the pure white, curly PRINCESS SOAP FLAKES—made by PALMOLIVE.

Crepes, satins, silks — sheer voiles, fine batistes and ginghams — expensive cretonnes; they come from washing with renewed brilliance and beauty.

PRINCESS FLAKES are economical in two ways: They give longer life to fabrics; and, being pure, unadulterated *soap*, they save on soap cost.

They give quick, creamy suds that dissolves dirt quickly and thoroughly. Splendid for the washing machine; splendid, in fact, for every laundry and household use.

In handy one-pound packages or bags. Order some today. Save by using them.

THE PALMOLIVE COMPANY OF CANADA, Limited

PALMOLIVE PRINCESS SOAP FLAKES

Made in Canada 1905

SPEED RIVALRY ON ATLANTIC

Since 1907, when the Lusitania made her advent, the speed record of the North Atlantic has been held by British vessels, writes a London Shipping Expert. Prior to that date the fastest ocean-going steamers were under the German flag. These were the Kaiser Wilhelm II, Deutschland, Kronprinz Wilhelm and Kaiser Wilhelm der Grosse. The speed of these ships ranged between 23 and 23½ knots, the Germans having held the "Blue Riband" of the Atlantic for the ten years preceding the coming of the Lusitania and Mauretania. The two Curnarders were a very bold experiment, as they were propelled by Parsons aurbines instead of quadruple expansion engines which was the type of machinery with which the previous record-breakers were equipped. When it was decided, after agreement with the government, to build the Lusitania and Mauretania the Cunard Line laid down two 18,000-ton vessels, the Caronia and Carmania, the former of which had reciprocating engines, while the latter was turbine driven. The practical experience thus obtained was of the greatest value in the construction of the hull and machinery of the new 30,000-ton and 68,000-ton i.h.p. liners.

There was little difference in the speed of these magnificent ships, and what they were capable of in the way of high speeds is seen by the performances of the Mauretania. She has crossed the Atlantic at an average speed of 26.06 knots and has made twenty-seven consecutive trips at an average speed of 25½ knots, while when she has been aided by an abnormal tide she has on more than one occasion exceeded 30 knots.

Whether the Leviathan has sufficient power to beat these wonderful achievements remains to be seen. So far she has only made one Atlantic crossing, on which she averaged 23.65 knots. Naturally she would not be forced on a first voyage, and it is a safe presumption that she can do considerably better than this. In this connection it is interesting to note that the Majestic of the White Star Line, steamed at about the same rate when she went into commission last year. Her best passage, however, up to date was at the rate of 24.5 knots.

There can be no question that the speed record of the Atlantic lies between these three. There are others engaged in the express srvice between Southampton and New York, but they were not built with any idea of challenging the performances of the Mauretania. The Aquitania, for example, has crossed at 23½ knots, and so has the Berengaria, which is to all intents and purposes a sister of the Leviathan though she sails under the Cunard flag. The Olympic has made a best passage of 22.6 knots, so that she too is out of the running so far as the Blue Riband is concerned.

The present season may be expected to produce some notable quick passages between continent and continent when the vessels revert to the northern, or shorter, route, which they abandon until such time as the North Atlantic is ice-free. It may be of interest to point out that of the six largest and fastest vessels in the world, all engaged in linking Europe and America, three are British built, and three are German, and all burn oil in their furnaces instead of coal. Of course, since the Majestic, Leviathan and Berengaria changed their ownership, there has been some revision of their engine room departments, but still the fact remains that the contest on the Atlantic is practically one between German and British naval architects and engineers.

INDIGESTION

Relieved in Two Minutes with

JO-TO

Gas, acid, sour, burning stomach all quickly relieved with Jo-To. Drug Stores.

It requires a mental effort to recall who and why were King Tut, Dr. Coue and W. Hohenzollern.

The Paris divorce mill is said to grind just as fine and much cheaper than the Reno separator.

It is estimated that 15,000,000 bananas are consumed daily in the United States. Something to sing about.

Oleomargarine is unknown in the home of the United States senator-elect from Minnesota. Mrs. Johnson is an expert milker and makes her own butter.

If an agreement is reached the new Turco-American treaty will be drafted in three languages—French, English and Turkish—with French as the official text. The Turks are likely to interpret it in their own language and in their own peculiar way.

Oshkosh, Wis., has one industry that is going forward by leaps and bounds. Frog farmers in this district are kept hopping supplying thousands of frogs' legs for the Chicago market.

One of the most expensive pieces of furniture is a seat in the New York Stock Exchange. One was sold the other day for $92,000.

The Turks can afford to be generous in including other countries in their "most favored nations" treaties. They are about the luckiest and most favored nation that evere played the game of diplomacy.

At a wedding in California last week the contracting parties, the minister, the attendants and the guests all sat astride favorite saddle horses while the ceremony was being performed. The bride's steed is reported to have neighed when the "obey" clause was mentioned.

The act to abolish slavery throughout the British colonies, providing £20,000,000 for compensation of the owners, was dated August 28, 1833, and its effect was to free 770,280 slaves on August 1, 1834, the number thus emancipated in the Island of Jamaica was 309,000.

Constipation

Relieved Without The Use of Laxatives

Nujol is a lubricant—not a medicine or laxative — so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving.

Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

WHEN USING WILSON'S FLY PADS READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—*Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.*

Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

OLIVET BAPTIST CHURCH

Lord's day—
11 a.m.—" A Study in Colossians."
2:30 p.m.—Sunday School.
7:30 p.m.—"A Royal Blunder."
Rev. Campbell will preach at both services.

IF YOUR PIANO IS WORTH ANYTHING IT IS WORTH

Expert Tuning

Any Other Kind Will Ruin It.

Alvin E. Perkins

a strictly independent tuner, and the best recommended man in Canada, with 30 years of valuable factory and other experience, stands for positively the best in the profession of tuning and repairing of pianos. Honesty of purpose and conscientious workmanship, and strongly endorsed by the best authority in Canada—piano manufacturers who are positively particular where they put their signature, as follows:

Morris & Karn Co.
Heintzman & Co.
Gourlay Piano Co.
Dominion Piano Co.
Newcombe Piano Co.
Fletcher Bros.
Gerhard Heintzman House, Vancouver.
Prof. J. D. A. Tripp, Vancouver.
Mason & Risch Co.
And others.

Mr. Perkins will be in Fernie in a few weeks and will make his regular calls

WHO HAS HOT BREAD?

Mrs. J. O. Martin is a young English bride who recently came out to marry a Texan who went overseas with the Canadian forces. The husband likes "hot bread" which "isn't bread at all" she says. The newest idea she has is scones, and he calls them biscuits. Mrs. M. says her biscuits are "cakes or cookies." This bride of a few short weeks is living far from any neighbors and earnestly request some recipes for "hot breads." Will some kindly American cook help her out through us?

PACIFIC MILK CO., LTD.

LADNER, B.C.—ABBOTSFORD B.C.

FERNIE CAMP SITE IS BUSY

(Continued from Page One)

small share of the Californian and Oregon tourists, practically every one of them would have his plans all made and it would be useless to spend money on a booklet of that kind, because few, if any, would alter their plans. The only possible way for us to induce them to stay in the Crow is to get them to include it in their plans, and this cannot be done unless they have our literature before them when planning thier tours in their homes.

Alberta and Sackatchewan are sending a lot of tourists through here this year, in fact practically all our visitors have been from there, but I could not help noticing on my recent visit to Cranbrook the great difference between the tourist from California and any others. There was an air of affluence about them which was particularly noticeable. There were more putting up at hotels than camping, and those that were camping had splendid outfits and seemed to be doing themselves extremely well. The streets were lined with big expensive cars and their passengers were patronizing the stores liberally. They seemed to ooze money, but very few were staying longer than overnight. Between nine and twelve o'clock there was a regular stream of them on their way north or west, but very few coming this way. I spoke to quite a number of them and tried to get them to come on through here but most of them had their arrangements made and could not alter them, but wished they had known about it in time to include it. Five parties did come in as far as the Frank slide and doubled back again, and I met two of them here on their way back. They said that they would not have missed it for anything and would have stayed longer if they had known in time.

The Californian tourist will leave more money behind than any other class and we can get them through here in increasing numbers if we keep up our advertising.

The political situation in Newfoundland at present appears to be as foggy as the mists that hover around the Grand Banks.

Perhaps no exercise calls for loftier ideals than mountain climbing. There is always something to look forward to and every move impresses the importance of watching your step.

ST. JOSEPH'S ACADEMY
NELSON, B.C.
RESIDENTIAL AND DAY SCHOOL

ADDITIONAL LOCALS

Mr. and Mrs. Wm. Johnston visited Waterton Lakes and Banff this week.

H. R. Huntington left on Monday for a holiday trip to the coast.

Jos. Goupil has opened a lunch counter in the Kings Hotel.

Mrs. J. S. Irvine and children returned on Monday from a month's stay at the coast.

The G. W. V. A. Band will give a concert on Sunday afternoon at 4 o'clock, on Victoria Avenue.

Constable McNalley of Coal Creek, is relieving Constable Salt who left a few days ago for Victoria.

Jack Volume, of Tanglefoot, was in town Monday. He was on his way to the coast.

J. Monison, manager of the Home Bank at Cobri, Sask., spent a few days in the city this week.

Mr. Arthur J. Moffatt leaves tomorrow morning for Vancouver where he will spend a two weeks' vacation.

Mrs. H. Harrison, of Hillcrest, Alberta, is spending a two weeks' holiday in the city as the guest of Mr. and Mrs. J. W. Shorthouse.

Jack Lamb has charge of the tonsorial parlor which Thos. Fitzgerald recently purchased from Ben Smith in the Grand Theatre building.

Twenty-two girls belonging to the United Church are camped at Morrissey. Mr. and Mrs. D. McVannell are in charge.

Miss Clara Rawson, daughter of Percy Rawson of Fernie, is in the Cranbrook hospital badly injured, the result of a car accident near Wardner.

The Fernie Hotel Barber Shop and Cigar Store will be closed for a few days. The proprietors are making extensive changes and improvements and will have a real up-to-date establishment when it is reopened.

Mrs. J. F. Rudnicki returned last Saturday from New York where she spent a three month's visit with her son and family. Mrs. Rudnicki said she was glad to get back to Fernie to get a breath of air.

A number of friends and relatives gave Lieutenant Evangeline Parker, who is about to terminate her furlough here, a surprise party at the home of her parents, Mr. and Mrs. J H. Parker. During the pleasant evening spent Lieutenant Parker was the recipent of numerous gifts including a purse.

Lumberton having defaulted their league game scheduled for Sunday, Fernie will play a team of All-Stars from the Crow's Nest Pass League, comprised of the pick of Bellevue, Coleman and Blairmore. This will be the first opportunity for the Fernie fans to see the class of ball being played on the Alberta side of the Boundary. The local team have all been issued with Alberta Amateur Baseball cards and are now in a position to challenge for the Calgary Brewery Cup. Sunday's game should provide them with perspective as to how they would make out against the Alberta teams should they wish to attempt to lift the cup.

DOUGLAS MACLEAN FORCED TO SHOW NERVE IN PICTURE

Douglas MacLean had to prove his nerve as well as his skill as a comedian during the filming of "Bell Boy 13," Thomas H. Ince's latest comedy farce, which will be shown at the Orpheum theatre on Wednesday and Thursday next.

In the role of a young bond broker who turns bell hop when his uncle disinherits him, MacLean pulled several novel stunts that lend thrills as well as laughs to this original farce.

When the young chap in the story is locked up by his uncle to prevent him from eloping, he calls out the fire department, borrows the chief's car, and drives at break-neck speed through the city, trying to catch the train on which his sweetheart is leaving. A fire run actually was staged, with the co-operation of the fire department of Los Angeles, which is said to have broken all speed records. MacLean needed all his skill as a driver and plenty of nerve besides to make his way through the traffic of the crowded streets of Los Angeles without killing some one or wrecking the car of the fire chief, which he was driving.

In another scene he had to climb out on a window ledge of one of San Francisco's hotels, where a number of the scenes were made. With tram cars clanging and autos honking on the street twelve stories below, "Bell Boy 13" makes his way along the ledge to his sweetheart's room, trying to locate suspicious sounds of endearment that have emerged from the keyhole.

MacLean's courage was tried to the limit before the scene was finished and he afterwards admitted that only the sight of the two photographers, who were standing on a painter's scaffolding and grinding away as unconcernedly as if they were on the ground, kept him from backing out and demanding a double for the scene.

"Bell Boy 13," with its original story of modern hotel life told from the perspective of a bell hop, and its thrills interspersed with romance, is said to be one of the funniest farces yet produced.

ONE 50c BOX BROUGHT HEALTH

Years of Constipation Ended By "Fruit-a-tives"

The Wonderful Fruit Medicine

Anyone who suffers with miserable health; who is tortured with Headaches; and who is unable to get any real pleasure out of life; will be interested in this letter of Mrs. Martha de Wolfe of East Ship Harbor, N.S.

Mrs. de Wolfe says, "For years I was a dreadful sufferer from Constipation and Headaches and I was miserable in every way. Nothing in the way of medicine seemed to help me. Then I tried "Fruit-a-tives" and the effect was splendid; and after taking only one box, I was completely relieved and now feel like a new person".

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

RETURNED SOLDIERS' INSURANCE ACT EXPIRES FIRST OF SEPTEMBER

The attention of all returned men is drawn to the fact that September first of this year is the last date upon which applications for insurance under the Returned Sodliers' Insurance Act can be accepted. The Act definitely provides for expiration of the privilege of insuring on September first and the period cannot now be extended.

The attention of returned men is invited particularly to the fact that this insurance is available entirely without medical examination, except in cases where the applicant is seriously ill. An impression is known to be prevalent to the effect that recent amendments to the Act debar all persons not physically fit. This impression is most incorrect. Insurance is being granted daily under the Act on the lives of individuals who could not under any circumstances be accepted for insurance by ordinary companies. The recent amendments to the Act eliminate only those who are in a very serious state of health.

Insurance is granted under the Act in amounts from $500 to $5000. Policies are available on standard plans, including, whole life, 20 payment life, payable to age 65, etc., and the premiums are lower than those charged elsewhere for similar policies.

LOCAL & GENERAL

A. Klauer is down on the prairie, buying horses for the Coal Company.

Mr. and Mrs. A. C. Liphardt spent a few days this week at Rock Lake.

Mrs. E. K. Stewart and son Kenny are camping at McBain's Lake.

Wm. Eschwig is consulting Mayo Brothers at Rochester, N. Y.

Mrs. Jas. Broley left this week for a short visit to the coast.

Miss Cora Linn, of Vancouver, B.C., is visiting friends in the city.

Sherwood Herchmer and his son Lawrence returned on Monday from the coast.

W. R. Wilson attended a meeting of the Coal Operators in Calgary on Monday.

Mrs. T. Elder, of Hillcrest, Alta., is in the city visiting Mr. and Mrs. F. Woodhouse.

The regular meeting of the City Council, which should have been held last evening, had to be postponed on account of failure to effect a quorum.

Don't forget the social and dance in the Catholic Hall, Friday, August 17. Cards from 9 to 10:30. Dancing from 11 to 1. Admission 50c. a10|2

Miss Mary Donaldson, of Medicine Hat, is spending a two week's vacation with Mr. and Mrs. J. L. Donaldson.

Mr. and Mrs. M. A. Kastner and Jas. Falconer returned on Wednesday from a month's holidays at Vancouver.

A special meeting of the Fernie Boy Scout troop will be held in the Scout Hall at 7:30 p.m., Monday. All boys wishing to go to the camp at McBain's Lake must attend this meeting.

The 150 All Sports are staging their usual Saturday night dance in their Gymnasium tomorow night. Come out and boost the boys.

Constable Ira Brown and Gregory Thomas, who are riding herd on the game in the Provincial Reserve up the Elk River, were in town early in the week for supplies, bears having raided their camp and entirely cleaned out their stock of food. They report an abundance of game this year.

For the first time since is was constructed the North Vancouver section of the Pacific Great Eastern Railway returned a profit for a month's operation. In June $709 was chalked up on the credit side of the ledger and in addition the Squamish division increased its revenue by $10,000.

Four boys, John Dragon, Mike Sofko, Andy Wasnock and George Fetzko, were up before Magistrate Stenson early in the week, charged with leaving a camp fire burning in the bush. They were severely reprimanded and let off on suspended sentence. The next time they come before the Magistrate, they will be sent to the Industrial School.

The small saw mill of the Nolan Lumber Company, which had just been built and commenced operations two weeks ago was completely destroyed by fire of unknown origin about midnight last Saturday. The lumber company have a large supply of logs, cut ready for milling and had erected the mill at the Indian Village near Flagstone with the intention of cutting for the balance of the season. The logs are still intact and it is expected a new mill well be procured at well over ten thousand dollars. and erected. The loss is estimated partially covered by insurance.

Roddy McLeod, of Coleman, was in town a couple of days this week looking up old friends and enjoying himself generally. On Monday night he met with an adventure which nearly ended disasterously for several people. While visiting the camp grounds he was asked by some folks in a car, the lights of which had gone out of commission, if he would send help from one of the garages. But why send for help with Roddy on the job? He generously offered to pilot the car to town. At the corner near the Mine Rescue Station he neglected to make the turn and started a steeple chase across sidewalks, railroad track and hills. The car remained upright but the passengers sustained all kinds of broken heads crushed noses, black eyes, etc. One lady passenger was taken to the hospital. The driver took to the timber.

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Mr. and Mrs. A. Watson spent Wednesday in Blairmore.

Fred Beale returned yesterday from a trip to the coast.

Miss M. R. Moran, of Minneapolis, is the guest of Mrs. Harvey Brown.

Stanley Norton, of Elko, is in town today.

Born—On Monday, July 30, to Mr. and Mrs. Jos. Scarpino, a daughter.

Mrs. James Corbett is holidaying at Nelson, B.C.

Mr. and Mrs. M. Vanderberg and children are visiting friends and relations in the Pincher Creek district.

Mr. and Mrs. A. B. Trites returned on Sunday from the Banff-Windermere trip.

Mr. and Mrs. Dr. Asselstine and family are making the Banff-Windermere trip..

Mrs. E. L. Wrigglesworth, of Vancouver, is the guest of Mr. and Mrs. A. C. Liphardt.

Born on August 15, to Mr. and Mrs. T. H. Ninson, of Bellevue, a son. Both doing well.

Norman Reid, of the Fernie-Ft. Steele Brewing Co. staff, is seriously ill.

Mrs. W. B. Harris and children, of Vancouver, B.C., are the guests of Mrs. A. I. Fisher.

Fernie Beauty Parlour, for care of you hair, face and nails. Combings made up. 70 Dalton Avenue, Phone 313. j27|6.

Died—At the Scottish Nursing Home, Calgary, on Sunday, August 12, Colin Douglas, aged 9 weeks, the infant son of Mr. and Mrs. Colin Commons.

Tea will be served at the Golf Club on Saturday afternoon, August 18, from 4 to 6. The regular play for the Wilson Cup will take place on Tuesday, August 21. Draws will be posted as usual.

Lieutenants Gladys Jennings and Evangeline Parker leave tomorrow evening for Winnipeg, to resume their duties in the S. A. Grace Hospital, after spending a pleasant month's furlough with relatives here.

The English Church Sunday School picnic will be held in the City Park on Wednesday, August 22. Cars will leave the Church at 1 o'clock. All members be sure and come and bring a well-filled basket for the children

A championship golf tourney for the Alberta and B.C. Golf Association will be held on the Blairmore course on Saturday, Sunday and Monday (Labor Day), Sept. 1, 2 and 3. A handicap event will also be staged. This is the big annual outing of southern Alberta and Southeastern B.C. golfers. The Blairmore course has all been remodelled and all crossholes abandoned. Seven or eight players from Lethbridge will be on hand for the tourney.

Determined to cut the ravages of tuberculosis to a minimum, the government has appointed Dr. A. S. Lamb travelling health officer for the province. His time will be devoted almost entirely to educational work on the prevention and treatment of tuberculosis. Dr. Lamb will travel all over British Columbia, visiting the smaller centres first in this regard and his services will be available to any physician as a consultant.

Cranbrook troop of Boy Scouts is off on the longest hike it has as yet undertaken. For a long time past, Scoutmaster Morris Clarke and physical instructor, Mr. Salter, have been making preparations for the annual summer event to which the boys look forward to throughout the year. Twenty-eight scouts left the "Y" on Thursday morning on their way to their objective, Radium Springs. They will travel by easy stages—their itinerary being carefully mapped out in advance, especial care being taken to avoid overtaxing the strength of the junior lads or, as they are known in Boy Scout parlance, cubs. — Cranbrook Courier.

THE CANCER MYSTERY

The foregathering in Britain this summer of many of the great medical scientists of the world including our own Dr. Banting, has evoked a revival of interest in all great problems of disease, that is echoed in the press throughout the land. The paths to conquest over tuberculosis and diabetes have been opened, but the great pathological mystery of cancer still remains unsolved. A writer in the London Observer draws attention to a seeming paradox in connection with cancer as compared with tuberculosis for instance. In populations with a low standard of civilization, where large masses of the population are dirty and unsanitary, the death rate from tuberculosis typhoid, cholera and other diseases is high. The death rate from cancer, however, seems to increase with the quality of civilization and the rise in the standards of living.

The writer says that Britishers and Europeans generally are totally unaware of the extraordinary spectacle the United States offers in the matter of sanitation. The country is prosperous, wealthy, generous, well-educated, clean in a high degree. No one, he says, who has not travelled there can have any real idea of the standard of civilization which has there been achieved. Many forms of disease, too familiar in Europe, have almost vanished or are rapidly declining. His tribute might easily be extended to the whole of North America, for Canada is easily on a parity with the United States in the progress he alludes to, and even the towns of disordered Mexico are very particular about such matters as water supply. American influence in sanitation has also been a great boon in Cuba and Latin America generally.

Yet despite the exalted and unparalleled position the United States holds in matters of public health its cancer death-rate is not only very high but rising very fast, and thus furnishes a contrast with all other diseases whatsoever. That cancer is a disease of prosperity and high material civilization seems to be proven by the fact that it is very rare among primitive peoples. Although on this continent the laws of life are, in the main, observed in a high and increasing degree, the medical correspondent of the "Observer" notes one very prevalent physiological sin, which he holds, must under the circumstances be considered in connection with cancer. It is the sin of over-eating. "Whether there is anything to be learned in this regard," he says, "I will not presume to say, but we can only marvel that mankind has not yet begun to study such questions."

This writer fails to touch on a related habit which goes with over-eating in America. It is physical laziness. The people who abuse the prevailing plenty by eating too much almost invariably double the evils of over-indulgence by taking no exercise. They never walk when they can ride. Proof of the disordered internal chemistry of a large part of the population is plain in the fact that the advertising columns of nearly all the daily papers bristle with announcements of remedies to overcome the first consequence of luxurious feeding and lack of exercise. At present there is no known remedy for cancer but the surgeon's knife, but it is fairly obvious that the good old precepts of temperance in all things, exercise, fresh air, are preventatives. —Saturday Night.

NEW ALL-STEEL CARS BEING INSTALLED ON NATIONAL SYSTEM

Typical all steel first-class coach, of which forty-one have been ordered this year by the Canadian National Railways. They are made in Canada. These cars have been assigned to the main run of the System, an all steel equipment being the standard adopted by the Canadian National Railways.

MAN'S INHUMANITY TO WOMAN

Part of the "Declaration of Sentiments" adopted at the first American equal rights meeting, which was held at Seneca Falls, New York, in 1848, and was lately commemorated by suffrage leaders in the same village:

"The history of mankind is a history of repeated injuries and usurpations on the part of man toward woman, having in direct object the establishment of an absolute tyranny over her.

"He has never permitted her to exercise her inalienable right to the elective franchise.

"He has made her, if married, in the eyes of the law, civilly dead.

"He has taken from her all right in property, even to the wages she earns.

"He has made her morally an irresponsible being, as she can commit many crimes with impunity, provided they be done in the presence of her husband.

"In the covenant of marriage she is compelled to promise obedience to her husband, he becoming to all intents and purposes her master, the law giving him power to deprive her of her liberty and to administer chastisement.

"He has monopolized nearly all the profitable employments, and from those she is permitted to follow she receives but a scanty remuneration. He closes against her all the avenues to wealth and distinction which he considers most honorable to himself.

"He has created a false public sentiment by giving the world a different code for men and women, by which moral delinquencies, which exclude women from society, are not only tolerated but deemed of little account in man.

"He has usurped the prerogative of Jehovah Himself, claiming it as his right to assign for her a sphere of action, when that belongs to her conscience and to her God.

"He has endeavored in every way that he could to destroy her confidance in her own powers, to lessen her self-respect and to take her willing to lead a dependent and abject life."

STOMACH SUFFERING

disappears as if by magic when Jo-To is used. Gas pains, acid stomach, sour stomach, burning and all after-eating distress relieved in two minutes. All Drug Stores.

REDISTRIBUTION

Victoria, Aug. 8.—Redistribution of seats in the British Columbia Legislature will be provided for at the coming autumn session of the House, but present indications are that there will be no reduction or increase in the present number of representatives of forty-seven.

There will be some radical changes in the boundaries of electorate districts. Under-officials are spending a great deal of time tabulating the votes cast in the various ridings, but little attention has been given the matter by the cabinet.

Vancouver will continue with six members despite the rumors that the Terminal City would be reduced to five, all she has had since the resignation of M. A. Macdonald two years ago. The postponement of the by-election in Vancouver has had nothing to do with the coming redistribution plans.

If the House will permit it, Victoria may find her representation cut from four to three members. The lower portion of Vancouver Island is over-represented there being a number of members of the Legislature resident in this city. Eight of these, including the Premier, are members of the cabinet. In addition to Premier Oliver and Hon. John Hart, minister of finance, there is another Liberal, Mr. Joseph Clearihue, and a Conservative, Canon Hinchcliffe, Saanich's member resides in Victoria, as does the representative for Esquimalt, the member for the Islands and the member for Comox.

Economy advocates favor a material reduction of the total membership, but it is felt that the government is too firmly entrenched at present to permit of this. However, there will be boundary changes on Vancouver Island. Oak Bay municipality, a part of Victoria in reality, probably will be taken out of Saanich and included in the city boundaries. The Islands may become part of Saanich, thus eliminating one member. That will leave twelve members for Vancouver Island, instead of thirteen as at present.

The seat will probably be given to the Peace River section of the Fort George riding. The latter district comprises one-quarter of the entire area of British Columbia and has the greatest railway mileage of any riding in the province.

Greenwood and Grand Forks electoral districts will be combined, their combined vote being far short of that of many single ridings. At present a cabinet minister, Hon. Dr. MacLean, represents Greenwood, and another Liberal, the seat for Grand Forks, but the latter riding is anything but secure for the reigning party.

Rossland will be included in the Trail riding, both now being represented by Conservatives. Trail is conceded to the Conservatives and by this change a Tory would be eliminated.

Little change will be made in the northern ridings; their boundaries have been fixed through their geographical conditions.

Voters in the Southern Okanagan and Similkameen ridings wish to have Penticton included in South Okanagan, and this change is being considered. Both these ridings have Conservative representatives. Extra representation will probably be given the lower mainland.

The new redistribution bill will be submitted fairly early in the session of the Legislature so as to permit of a full consideration of the proposed changes.

Palatial Canadian Pacific Liner To Go On Big Cruise

In the upper left-hand corner is shown the Canadian Pacific palatial liner Empress of Canada, which will make the cruise of the world this winter and early spring. Other scenes depicted are some of the features that will be shown the travellers as they sail the seven seas.

The Sphinx is the majesty of the Pyramids of Ghizeh.

Then comes Mount Fujiyama, sacred mountain of Japan.

Nestling under the spreading branch of the tree is a Geisha girl, and on her left is a willow tea house near Shanghai.

Junks and sampans are shown on the Canton river, while palms throw the coast of Ceylon into shadow.

Immediately over the Canadian Pacific locomotive is shown the Daibutsu of Kamakura, better known here as Buddha.

The gates of Benares, with countless minarets in the distance, will offer age-old lore for visitors, and the lower right-hand picture is of Monte Carlo, with the greatest casino in the world.

THE famous cruise of the Canadian Pacific steamer Empress of Canada, posted for this coming winter, is attracting much attention not only in Canada but in the United States and Mexico. The big 21,500 ton liner is especially adapted to world cruising and having won the speed record of the Pacific, the company has chosen this boat to be the flagship of cruisers for the winter months.

The circumnavigators on the Empress of Canada will return laden with the rich experience and mental treasures gathered from vision of eighteen different countries and contact with the costumes, crafts and civilizations of fifty different races. It will be a tour to ports of a thousand romances, unfolding the pageant of the world from the cultured west to the barbaric splendor of the east. Shrines, mosques, temples, cathedrals, palaces, and the sacred treasures of the fabled Orient will be revealed to the gaze of these fortunate voyageurs

Leaving New York at a time when the inclement weather drives those who can afford to escape to more equable climes, the Empress of Canada is due to reach nine days later the balmy shores of Madeira, an island of mountains thrown up as high as six thousand feet above the sea by volcanic action from the still unfathomed ocean bed.

TO VISIT WEST.

Gibraltar, reached on the morning of the twelfth day out, stands on guard like a rock-mounted policeman on an ocean trail. This famous fortress of the British Empire was originally named after a Moorish invader of the eighth century, whose castle still remains. Known to the ancients as one of the pillars of Hercules, it was formerly considered as the western extremity of the world.

Already from the Straits of Gibraltar the ragged purple and green and orange and blue of the Atlas mountains has cast the spell of Africa upon the voyager, and now at early morning of the fourteenth day the ship casts anchor in the harbor of Algiers, facing the ivory terraces and minarets of a still half-Arabian city.

Across the Mediterranean the ship now turns to Monaco, the high-stepping principality on the south-eastern coast of France, at which all the Puritan world shakes its finger. Within its tiny area more fortunes have been lost and won than lives have been squandered on the battlefields of Europe. The tables at the Monte Carlo casino are forbidden to the twenty thousand local inhabitants who, however, have the sonsolation of being exempt from taxes.

Naples is the next port of call, the largest, busiest and most populous port in Italy. Here opportunity is given to see the chief points of interest in the city and to visit Pompeii.

Port Said and then Cairo and while the boat proceeds to Suez the passengers will be given four days in the land of the Pharaohs.

BRITISH OUTPOSTS.

From there, the visitors move on down the Red Sea, past Aden, another British outpost and on across the Indian ocean to one of the greatest ports in the world, Bombay. A stay of a week has been allowed for this port, and many trips inland have been arranged.

After leaving Bombay the passengers will know where they are going as several hundred miles out from the shores of Ceylon, the heavily scented and spicy breezes indicate the longitude and latitude of the big liner. Three days are booked for this port.

The trip to Rangoon, the greatest rice port in the world, and also one of the great lumber districts of the south of Asia, is also one of interest.

Singapore, the busy capital of the Malay states, is the next port of call and Britishers on the trip will be shown the foundation of the new naval base which is to be built there soon.

OVER EQUATOR.

Crossing the equator the Empress of Canada will then go to Batavia, the capital of the Dutch East Indies.

With her nose turned north the liner will steam for Manila, the capital of the Philippine Islands, and one of the greatest educational centres in the world. Money bylaws for schools are always passed in this insular settlement.

From Manila the travellers will be taken to Hong Kong, Canton, Macao and then to Shanghai, and special arrangements have been made to see China as China is.

The next port of call will be in Japan, where all the leading ports will be visited and the Japanese Government is making preparations to demonstrate to the visitors that Japan is a friendly little nation.

From Japan the liner will go to Honolulu and on May 24 will terminate her cruise at Vancouver, the passengers going overland from here to their various destinations.

Scenic International Parks Highway Meeting

The Scenic International Parks Highway was organized at an internationally represented meeting in Missoula, Montana, July 27, 1923. One of the few North-and-South designated roads on the Continent, this highway, almost entirely on the Pacific Slope, will connect up approximately 1300 miles of what is classed with the most scenic mountain regions of the world, extending from beautiful Lake Louise in the heart of the Canadian Rockies, south through the American Rockies, via Flathead Lake, through western Montana, southeastern Idaho and Utah, to Salt Lake City.

As was said during the organization session: "No where else could more that is beautiful and impressive be found than that which is already strung like a lot of jewels along this trail." There is a road over the entire route that has been in existence for years. But until this time during all the years of promotion for East-and-West roads, both in Canada and the United States, the Scenic International Parks Highway remained unthought of. Now it promises to gain distinction, aside from its natural advantages, by the number of continental East-and-West highways it will intersect.

"I was delighted and a little bit startled," said Governor Joseph M. Dixon, of Montana, in welcoming the Canadian and American delegates at the Missoula meeting, "when I first saw the map of the proposed North-and-South highway. The Rocky Mountain region is becoming more and more the playground of the Continent.

"With the exception of one piece of road directly south of the border this new highway is practically open from Salt Lake City to Lake Louise now. When the highway is generally known I believe it will pick up most of the tourist travel between Zion Park and Lake Louise. It is coming surely, and the communities that take advantage of the situation and open up the rough spots are the ones that are going to reap the financial benefits in the end."

Organization was effected by the selection of the following officers:

President—Sid J. Coffee, of Missoula, Montana.

Vice Presidents—

Canadian—James W. Davidson, of Calgary, Alta.

American—(Yet to be named).

Secretary - Treasurer—Charles H. Roberts, Missoula Montana.

Board of Directors—H. W. Wilson, Cranbrook, B.C.; J. Fred Spalding, Fernie, B.C.; F. H. Smith, Blairmore, Alta.; H, Randolph Brue, Windermere and District, B.C.; J. W. McDonald, Macleod, Alta.; J. W. Davidson, Calgary, Alta.; L. S. Crosbie, Banff, Alta; James Garey, Eureka, Mont.; James Harbert, Polson, Mont.; C. H. Polk, Lima, Mont.; P. N. Bernard, Kalispell, Mont.; H. O. Bell, Missoula, Mont.; Ted Reinbold, Hamilton, Mont.

Directors will be named also from the following places: Whitefish, Wisdom and Dillon, in Montana; Idaho Falls, Blackfoot and Pocatello, in Idaho; Logan, Brigham, Ogden and Salt Lake City, in Utah.

The convention was called to order by Sid J. Coffee of the Missoula Chamber of Commerce Highway Committee, acting as temporary chairman, with Manager Charles H. Roberts of the Missoula Chamber of Commerce as temporary secretary. All business meetings were held at the Missoula Chamber of Commerce Building. All action was by adoption of committe reports as follows:

Resolutions—Chairman, J. H. Hanna, of Calgary; E. A. Boorman, of Kalispell; J. H. C. Fitch, of Kalispell; George K. Brobeck, of Hamilton and A. L. Stone, of Missoula.

"Your committee has deemed it inadvisable to make specific mention of sections of the highway which are in need of immediate attention or to designate established trails which afford possible connections with the Four Parks trail, deeming these rather to be administrative matters. For this reason the question of trail improvement and of connections have been considered in a general way.

"Be it resolved by the delegates of the Four Parks International Highway Conference:

"1. This conference endorses as emphatically as possible the general plan for a North-and-South highway, along the western slope of the Rocky Mountains between Salt Lake City and Lake Louise. Every endeavor should be made to develop this route. The East-andWest trails have been developed to a point where their advantages are recognized. The idea of cutting these trails at right angles is important to the tourist as a matter of convenience and, in this case, to his enjoyment. The scenic and historic attractions of this route are unparalleled.

"2. Inasmuch as the sucess of this trail must depend to a great extent upon its road bed, we believe the initial policy of this organization should be to interest every local community along its route in the immediate improvement of its highways, that its local unit in this trail be made a standard road. It is recommended that a copy of this resolution be sent to every city, county, state and federal officer within whose jurisdiction may come the betterment of any portion of the proposed trail.

"3. We believe this international trail can be made one of the most popular highways of the Continent. To this end, we ask that the communities along its route forget local rivalries and co-operate whole-heartedly in making known to the world the advantages and attractions which are offered to the tourist who follows the trail blazed here.

"4. Upon the local communities along this highway rests the responsibility of making known, as widely as possible, the advantages which it offers. There are many side tours, many connections which may easily be made to add to the interest and advantages of the journey along this route; the advertising of these highways and the direction of tourists will naturally become a part of the administrative work of this organization as it develops. At the beginning, however, the local community must become the salesman of the international highway.

"5. To the Missoula Chamber of Commerce, we extend our congratulations for the discovery of the idea which has led to the establishment of this trail. To the members of the Missoula Chamber of Commerce, to the officers of the Federal Forestry District No. One, to the Missoula officers of the United States Bureau of Public Works, and to all Missoula people who have been hospitable and kind upon the occasion of this conference, we extend our thanks."

Organization — Chairman, W. N. Dixon, of Missoula; Hon. J. W. McDonald, of Macleod, Alta.; H. O. Ball, of Missoula; A. V. Gibson, of Kalispell and J. M. Keith, of Missoula.

"The purpose of the Scenic International Parks Highway is to promote an all-weather highway of standard construction from Lake Louise to Salt Lake City, via Western Montana and Southeastern Idaho.

"The officers shall be president, Canadian Vice President, American Vice President, and Secretary-Treasurer.

"One director shall be elected from each community embraced in the region affected by this organization.

"The officers shall constitute the Executive Committee, which shall determine its own organization and rules of procedure, and adopt such general regulations as it may deem necessary for the government of the association.

"The Executive Committee shall have power to fill vacancies occurring in the Executive Committee, in the Directorate or any of the offices and likewise have power to designate additional directorate as other communities may become affiliated with the organization.

"Missoula is designated as the principal office of the organization and meetings may be called and held at such time and place and upon such notice as may be prescribed by the President or the Executive Committee.

"Until otherwise provided, an annual meeting shall be held between July 15 and August 15 of each year."

Route and Name of Highway Committee—Chairman, James Harbert, of Polson, Montana; J. Fred Spalding, of Fernie, B.C.; C. H. McLeod, Missoula; H. C. Keith, Kalispell; J. C. Beebe, Eureka and R. W. Angevine, Missoula, Montana.

"The name of the proposed highway shall be 'Scenic International Parks Highway.'

"The route as shown on the blue print is adopted and no unfinished roads will be included in the same.

"Road signs will be white with black letters."

Program of Work Committee — Chairman, Frank Thomas, of Missoula; J. Q. Adams, of Hamilton; J. G. Masek, of Eureka; P. N. Bernard, of Kalispell; C. H. Polk, of Lima and H. Beckwith, of St. Ignatius.

"First—See that full reports of this meeting is given to the press and to all points along the highway; and that all places along the highway having Chambers of Commerce or other organizations of like character be accorded membership in this organization.

"Second—That the Secretary keep closely in touch with the representative from each city or district, and furnish him with the necessary information to impress on his people and particularly those in charge of road work the importance of this highway; and to that end particular attention be given to the gathering of statistics from both the North and the South, setting forth the enormous amount of travel which will be routed over this highway when completed, and the great financial and social benefits to be derived.

"Third—That a committee composed of members of the Forest Service, Bureau of Public Roads, State Highway Commission, and similar organization in Canada, together with members of this organization, be formed for the purpose of securing necessary legislation and appropriations for developing this highway; and to keep each other informed on all matters of common interest.

"Fourth—That the entire highway be marked."

President W. N. Dixon, of the Missoula Chamber of Commerce, welcomed the visitors on behalf of that organization, saying among other things, "It is with your help that we hope to put across an organization that will ultimately lead to the establishment of this highway."

James Harbert, of Polson, responding, said that in all his travels he had never seen a more beautiful region than that through which the proposed highway would pass. "I am here to say in behalf of the visiting delegations that we are ready to cooperate in bringing about the purpose of this organization."

Theodore Shoemaker, of the United States Forest Service, pointed out that the Montana section of the highway would be located in a country of national forests.

Letters expressing sentiments of co-operation were read from J. C. Campbell, of the Canadian National Parks Service at Ottawa, Superintendent J. R. Eakin of the Glacier National Park and Superintendent Horace M. Albright of the Yellowstone National Park.

C. H. Polk, of Lima, brought greetings from the County Commissioners of Beaverhead County in southwestern Montana through which the highway passes for many miles. He stated the County Commissioners would give every possible aid in improving the road conditions.

P. N. Bernard, of Kalispell, gave an account of the Montana movement for good roads at the last legislative session during which he was chairman of the House Committee on Highways. He declared now was the time to continue the effort for good roads and to make the new highway really internationally known.

"Whatever we can do to help in this new road, we are perfectly willing to do as far as appropriations are consistent," said H. J. Taylor, of the United States Bureau of Public Roads.

District Engineer Fred Thieme of the U. S. Forestry Service announced that a great percentage of the highway route would be classified as Forest Highway and be entitled to Federal aid in construction. He expressed belief that the new road would make it easier for all communities to show tourists the mountain country to advantge in many beautiful trips off the main highway.

Editor W. C. Kelley, of the "Western Tourist" declared the new road would open up a new country for thousands of tourists who today travel only as far as Yellowstone Park and then at once retrace their travels south.

"It is very important," said Geo. H. Beckwith, of St. Ignatius, "that we get to work whole-heartedly as soon as posible, mark the route and fix all bad links in the next twelve months so we can be ready for travel in 1924."

A promise of co-operation from the British Columbia Government in road improvement was made by J. Fred Spalding, of Fernie. "If the American section between Whitefish and Eureka is fixed up,' he said, "I feel absolutely certain that the British Columbia Government will listen to any suggestion we may make in regard to the short distance between the American line at Gateway and Elko which needs fixing."

Telegrams promising co-operation in the movement for the Scenic International Parks Highway were read from the Chambers of Commerce at Ogden, Utah and Pocatello, Idaho.

A very happy dinner was enjoyed by the delegates and Missoula people in the evening at the Hotel Florence. Dean A. L. Stone, of the University of Montana, was toastmaster. Those who spoke were: J. F. Spalding, Fernie, B.C.; C. H. McLeod, Missoula; J. H. Hanna, Calgary; J. G. Masek, Eureka, President of the Roosevelt Highway; Mayor J. W. McDonald, Macleod, Alta.; Frank Thomas, Missoula and C. H. Polk, Lima, Montana.

"I am glad to have something to do with the forming of this Scenic International Parks Highway for I think we are making history today," said Manager Hanna, of the Calgary Board of Trade. "I am glad that someone conceived the idea of a North-and-South line for tourist travel, not so much for the development of the country but because of the development of traffic. I am sure that tourist traffic over this route will grow. This North-and-South line takes in the scenic beauties of both countries. On our end of the line our Government has expended the Kootenay Pass to Lake Windermere. That's how much we think of its beauties. In coming over the highway to Missoula, I would say you have some beauties not parralleled in the world, but you have been very quiet about it, especially so for an American crowd.

"I am glad to help in this project. It is a mutual proposition. You can't help yourselves without helping us. The dollar spent in the United States for good roads is a doller that Canada profits by, and vice versa. I think we can unite our efforts to bring about on this new road every possible bit of travel we can get there."

President Masek, of the Roosevelt Highway, said, "I believe the highway we have started today is one of the most important I can think of. On behalf of the Roosevelt Highway I can say there will be perfect co-operation between that organization and this."

Mayor McDonald for himself and Canadian colleagues expressed hearty appreciation of a cordial reception by the American delegates. Pointing to the American and Canadian flags which were hung side by side, he quotes: "I see before me the flags of two nations. United as they are I would have them draped still more closely together, fold within fold, and let their varying tints unite and form in Heaven's light one arch of peace."

On Saturday the visitors through the courtesy of President C. H. Clapp of the University of Montana were shown through the new buildings on the campus erected during the last year. Light refreshments were served during the tour. At noon the delegates were the guests of Col. P. H. Mullay at luncheon at Fort Missoula, U. S. A.

Irrigation in Southern Alberta

(1) Bassano Dam, built in the earlier days by the Canadian Pacific Railway for irrigation purposes. (2) An irrigation flume. (3) This farmer does not depend on rains for his moisture. (4) Public Gardens, Lethbridge, Alta.

I HAD been told to expect a transformation; that a new order of things was being born in Southern Alberta; that a new system of farming was taking the place of the old. I was told that the days of "scratching in" and of "soil mining" were gone days. Nevertheless, I was not prepared for what I saw.

Fifteen years before, I had travelled through this country and had seen only a few scattered farmsteads set out on the "bald-headed" prairie, four square to all the winds that blew. There were no trees, only a stretching expanse of prairie that merged into white-topped mountains on the west and meeting the sky on the east in an unbroken horizon. A few homesteaders were straggling in. Old cattlemen, trying to save their great range, were spreading stories that farming could never be a success in Southern Alberta.

But the homesteaders came. Then later the big farmers arrived with their tractors and ushered in the era of the thousand acre wheat ranch. A series of "wet years" made Southern Alberta famous. Nowhere had such crops ever previously been heard of. The Noble Foundation, one of the largest farming corporations in the world, brought in a crop of wheat from one thonsand acres that threshed 54,000 bushels! The country was thick with elevators. In 1915 and 1916, Southern Alberta reached the peak of prosperity. A series of unproductive years followed when rainfall was scant. Some farms were abandoned, but, mostly, men held on, buoyed up by the wonder harvests of other years.

The problem was purely one of moisture, and the Governments of the Dominion and the Province set about to study it. The soil was of the greatest fertility, the climate was right. Something to supplement the natural rainfall was wanted. The Canadian Pacific Railway and other corporations had already developed tracts of land by irrigation. It was no experiment, and so a constructive policy of irrigation was commenced, backed by both Governments.

It is in the train of irrigation that the new order of things is coming in Southern Alberta. Today as you drive over the prairie, through the irrigated tracts of Strathmore and Brooks, south through the Bow River Project and on into Taber and Lethbridge, the flatness is broken on all sides by farmsteads that nestle among trees—young trees growing taller and taller every year. Hedges are growing where once was barbed wire. Shrubbery is luxuriant. In the background are fields of Alfalfa, Indian Corn and Wheat. Dairy cows are seen on green pastures. The farms are small, but they are real farms, and the homes are smiling homes of contented people. There is no "scratching in" or "soil mining." These are permanent homes on the threshold of a future bright with promise.

In the City of Lethbridge, around which most of the new irrigation development is proceeding, are found tree-lined streets, beautiful homes set in hedge enclosed lawns, and one of the finest little parks that Canada can boast. The city has been thoughtfully planned and symbolizes in its setting the spirit of a people pledged to permanency.

For those who knew Southern Alberta in its infancy, there is a pleasant surprise waiting. Wherever irrigation has touched, it is truly a country transformed.

The STAR CAR

THE creation of the Star Car is the most important and brilliant accomplishment of any individual identified with the automobile industry since its inception.

Smartness in looks, and thoroughness and modern design in a low priced car was unheard of until the Star was created by W. C. Durant, the pioneer builder of automobiles and identified with the introduction and success of the Cadillac, Buick, Oakland, Oldsmobile, Chevrolet and Durant Cars.

The Star Car marks the most advanced step since introduction of the automobile, for it provides for the first time a quality automobile, standardized in construction and operations for a modest sum of money.

The STAR FEATURES

$820.00
FERNIE

- Continental Red Seal Motor.
- Timken Rear Axle.
- Timken Bearings, front and rear.
- Spicer Universal Joints.
- Selective Sliding Gear Transmission, three speed forward and reverse.
- Single Plate Disc Clutch.
- Half-elliptic Springs, underslung.
- Stewart Vacuum Gasoline Feed with Supply tank at rear.
- Electric Lighting by Standard Generator with Storage Battery.
- Streamline Body.
- One-man Top, with Gypsy Curtains and Side Curtains that open with Doors.

FERNIE WINS BENEFIT GAME

Playing in a benefit match for Danny Nee, who was recently injured in a football match, Fernie, last Sunday, reversed the score of the previous Sunday's game by defeating Coal Creek by a score of two goals to nil.

Winning the toss, Coal Creek took advantage of the wind, but Fernie kept the visitors well confined to their own territory in the opening stages of the game. End to end play followed but it was not until well on towards the end of the first half that the first goal was scored. Fernie attacked Coal Creek goal strongly and during the pressure, H. Corrigan handled the ball in the penalty area. Fernie were given a penalty, Wilson taking the kick and scored, giving Ferguson no chance.

From the kick-off in the second half, Coal Creek raided and Sofko was called upon to save from Atherton. A spell of mid-field play followed then Fernie broke away and Ferguson had to save twice in quick succession. Fernie continued the pressure and P. Corrigan skyed the ball, it was dropping right in the goalmouth when Ferguson punched clear before Thomson could get his head to the ball. Coal Creek broke away and Corlett sent over a nice cross, and Booth cleared. Fernie again took up the offensive and A. Thomson had a nice run down the left and sent in a hard shot for goal, Ferguson stopped the ball but failed to effect a clearance, Thomson got the ball again and drove for goal but the ball hit the post, the ball rebounded and Dicken scored. Coal Creek tried hard to reduce Fernie's lead but the strong defense put up by the local lads kept them at bay until the final whistle.

The line up:

Coal Creek—Ferguson; H. Corrigan and P. Corrigan; O. Corrigan, Hudock and Walls; T. Corlett, Smith, Worthington, Caufield and Atherton.

Fernie—Sofko; Booth and Wilson; Robertson, Davidson and Dicken; Monks, Walker, J. Thomson, Sweeney and A. Thomson.

FOOTBALL NOTES

A football match will be played on the North End Grounds on Sunday, August 19, between the K. P. Football team and Fernie. These bold knights claim to have a strong aggregation of dark horses and we believe this should be an interesting game. Kick-off at 6:15 p.m.

The Commerce Football Team, who are recognized as being the king pins of Southern Alberta, would like to play an exhibition game here. They have been playing exhibition games with several of the other teams along the Crow and it is just possible that the Executive of the Fernie Football Club may get them to come here in the near future.

Fernie team will travel to Hillcrest on Saturday, August 25, in a league fixture.

The Miners from Drumhellar won the Peacock Cup in Calgary on Thursday the 16th, by defeating Coleman stars by the narrow margin of 1 goal to nil.

MOURN NINETY-SEVEN DEAD IN MINE BLOWUP

KEMMERER, Wyo., Aug 15. — Kemmerer tonight was in mourning for 97 miners known to have lost their lives in the explosion yesterday at Kemmerer Coal company mine No. 1 at Frontier, near here.

Throughout the day and tonight hundreds of relatives and friends thronged the I. O. O. F. Hall, which has been turned into a temporary morgue, and an undertaking establishment where about half of the bodies are being kept. Tonight, however, thre were few at th portal of th mine where last evening thousands crowded for new of relatives or friends trapped while working in the bowels of the earth.

The latest official report of the coal company shows that one man is missing and that 37 were rescued alive and unhurt. Search for the body of the one missing miner is being continued with all possible speed by picked crews of mine workers.

The mine in which the disaster occurred is considered one of the deepest in this part of the country, if not in the entire United States. The main shaft goes down at an angle of 16 degrees to adepth of about 6000 feet and it was on the lower levels or about one mile underground that most of the bodies were found.

What caused the erplosion in the mine has not yet been determined. Officials of the company announced that the pumps for water and air are not damaged and that an investigation will be made as soon as possible.

Forest fire conditions all over British Columbia at present are reported by the forest branch as being very hazardous, and the watchfulness of both officials and the general public can result in the saving of many millions of dollars of valuable timber during August and September, state Hon. Mr. Pattullo. To date there have been less than half as many fires this year as last and the cost of fire-fighting has been small. Unrelenting care is the only thing required.

CARD OF THANKS

Mr. and Mrs. Colin Commons wish to thank all friends who were so kind during their recent sad bereavement.

Is Hay Fever Needless Suffering?

Health Talk No. 31
By G. J. Parks, D. C.

If hay fever is needless suffering as many of its victims have learned after using chiropractic, then the world has been robbed of another form of disease torture, for hay fever is misery.

Most of us are immune to hay fever, but some of us are easily infected at the time of year when the pollen begins to fly. Chiropractic spinal adjustments restore the natural vigor of the nerve cells and tissues of the air passages, and after this new vigor is released, the hay fever is quickly conquered.

TRIPLE RECOVERY IS REPORTED

"I suffered from liver trouble, headaches and hay fever. These troubles were chronic with me for many years. I was persuaded to go to a chiropractor and I am glad, for since taking adjustments I am well of all my troubles. My health is better in every way."—
W. T. Terry, Chiropractic Research Bureau, Statement No. 1329H.

Action probably will be taken by counsel for British Columbia, as well as for other provinces, before the Supreme Court of Canada regarding "blue sky" legislation in the near future. Recently five judges of the Saskatchewan appellate court agreed that the Saskatchewan blue sky law, known as the Sale of Shares Act was ultra vires of the province. This, states Attorney-General Manson, who has given a great deal of attention to the matter, makes it appear th the hands of the provinces are tied. But it is likely, he holds, that the provinces will ask permission to intervene at Ottawa in the hope of having the matter adjusted satisfactorily.

The East Kootenay Mine Safety Association are holding Mine Rescue and First Aid Competitions at Michel tomorrow, Saturday, August 25. Valuable prizes will be awarded for 1st, 2nd and 3rd in Mine Rescue; 1st, 2nd and 3rd in Senior First Aid; 1st and 2nd in Junior First Aid and 1st and 2nd in Ladies' First Aid Competitions. Teams in all competitions to consist of five members while members of the Junior teams are not to be over eighteen years of age.

HOME BANK SUSPENSION

The news of the suspension of payment by the Home Bank of Canada, which arrived in Fernie on Friday evening last, gave the citizens of this town another jolt whcih momentarily knocked them off their feet. Nearly every other man or woman in the city is tied up in some business relation with the Home Bank, which had the the complete confidence of the local public.

Mr. "Sandy" Watson, the local manager and his staff, by strict attention to business have built up one of the strongest branches of that institution in the west, having deposits totalling more than $800,000 in addition to a large loan business, every dollar of which is absolutely good and if other branches of the bank had been conducted in the same efficient manner, failure would have been out of the question.

While great inconvenience has been caused in a business way here by the suspension, things are gradually adjusting themselves and everyone just "keeps on smiling." One cannot live through the experiences of the past twenty-three years in the city of Fernie without becoming more or less of a philosopher and the citizens have learned to take trouble with a smile.

The latest reports from Toronto are to the effect that there will be little, if any, loss to depositors, although the stock holders will doubtless be hard hit. About $10,000 worth of stock is held by Fernie people.

It is estimated that it will be at leats two or three weeks before the investigations of the Curator will be far enough advanced to make a definite statement as to the standing of the bank.

In the meantime, several chartered banks have sent in representatives to Fernie, to look over the field with a view to opening a branch here and it will not be long before Fernie will again have a third bank.

—

TORONTO, Aug. 18.—The following statement was issued by the Home Bank of Canada this afternoon, over the signature of the Curator, A. B. Barker:

"The curator is investigating the conditions of the Home Bank of Canada, but it is unlikely that any definite statement of the position of the bank will be available for a few weeks. The returns from the branches showing the state of affairs must be received and embodied with the head office figures before any announcement can be made. Deposits may not be withdrawn, but notes of the bank will be negotiable at par at any other bank in Canada."

Depositors in the Home Bank of Canada will lose very little, if anything, through the winding-up proceedings of the bank, was the hopeful information gathered, according to the Toronto Star's opinion from financial circles.

It is pointed out that with the shareholders' double liabilities considered, there is approximately four millions to meet losses before depositors' money is touched. It appears inevitable, however, that the shareholders will not only lose the value of their stock but will be called upon for at least a portion of their double liability.

BOY SCOUTS IN CAMP

Between thirty and forty members of the Fernie Boy Scout Troop left the city Thursday morning by automobile for the Annual Summer Camp which is being held this year at McBains Lake.

The troop is in charge of Scoutmaster Donaldson and Instructor McDonald, both of whom have considerable experience in scout work and camping, so the boys are in competent hands.

The Camp this year is being run entirely according to plans set out in the Gillwell Scoutmaster Training course which was outlined by Commissioner Stirrett in his visit to Fernie a short time ago. The boys will be divided up into six patrols, each with its own patrol leader and second. These patrol officers will be in charge of their own boys and are responsible for the carrying out of the various duties set by the Scoutmaster. They will do their own cooking by camp fire, stoves and centralized cooking being strictly against the Scout code.

An extensive program of activities has already been drawn up to cover the ten days the boys will be in Camp. The Crow's Nest Trading Co. Shooting Trophy, now on exhibition in the C.P.R. Telegraph Office window, will again be competed for. The Scout making the highest consitent score will be awarded the Trophy for one year, a minature cup will also be presented, the latter to become the property of the winner.

While there is no mail delivery at McBains Lake, a detail will be sent probably every other day to the Jaffray Post Office with mail from the Camp and will pick up any letters for the boys. Address mail to the boys care of General Delivery, Jaffray, B. C.

LABOR DAY PROGRAMME

Following is a list of the committees appointed for the Labor Day Celebration. The first named person is the Convenor of each committee and has power to add to their respective committees:

Finance—D. Black, A. C. Liphardt and Wm. Johnston.

Publicity—R. Billsborough, H. E. Douglas, J. Donaldson and A. J. Carter.

Purchasing—D. F. Markland, E. K. Stewart and T. Prentice.

Grounds—G. Townsend, Mayor G. G. Henderson and R. Bushel, Coal Creek.

Refreshments—Chas. Hesketh, Ladies Auxiliary, A. L. Walker and Guy Johnstone.

Parade — R. Billsborough, Sergt. Hanna, Chief Anderson and E. K. Stewart.

Baseball—W. Commons, S. Wilson and M. A. Kastner.

Football—J. F. Mitchell, P. Hughes, B. Smith and H. Brown.

Horse Racing—G. Bowen, W. Phillips, J. Rigg, S. Graham and G. Gould.

Bicycle Race—G. Sofko, W. Shorthouse and G. Quail.

Music—George Ramsay.

Starter—Constable McNalley.

Announcer—Tom Uphill, M.P.P.

Tug o' War—J. Worthington, H. Wheeler and H. Parsons.

Dance—H. Wheeler, F. Yearby and Jas. Johnstone.

Popular Girl Contest—Chief Anderson, A. J. Moffatt and H. F. McLean.

Don't forget that the Popular Girl Contest closes at 8 p.m., Thursday, August 30. All stubs, monies, etc., are to be handed in to Chief Anderson on or before that date.

Following is the program for the day:

Parade will assemble on the School Grounds at 10 a.m. and leave at 10:45 sharp. Prizes—Best dressed automobile, $10; best representative float, $20; best comic float, $20 best dressed bicycle, $5, $3 and $2; best individual clown, $5; best clown with decorated animal, $5 and $3; best national character, $5.

Bicycle Race — On Baker Avenue immediately after parade. First and second in each heat to compete in final. Prizes—1st $20, second $10.

Park Events:

Horse Racing—$200 in Prizes.

Men's race; obstacle race, Veterans' race; single ladies' race; married ladies' race and children's races (boys' and girls', 4 events each, handicap)—$200 in prizes.

Tug o' War—Prize $50.

Treacle Bun Contest—1st $5., 2nd $3 and 3rd $2.

Greasy Pole—Prize on top.

Greasy Pig—Pig as prize.

Acquatic sports in swimming pool for children—$25 in prizes.

Dancing Competition — Amateur step dancing for children under 14 years in costume. Dances to consist of: 1, Highland; 2, Sword Dance; 3, Shaun Truss; 4, Sailor's Hornpipe. Prizes: 1st, 4 gold medals; 2nd, 4 bangles.

Exhibition dancing by Misses Walker.

Baseball—Troy versus Fernie.

Football — 5 a side competition. Prizes: 1st, club bags; 2nd, $10 gold piece watch fobs.

Added attraction—Torchlight procession staged by the Dramatic Order Knights of Korrassan headed by the G. W. V. A. Band at 8:30 p.m.

The G. W. V. A. Band and Fernie Pipe Band will take part. Amusement games and refreshments on the field.

CHRIST CHURCH

11 a.m. — Morning Prayer: "No Other Name."
7:30 p.m.—Even Song: "Patience."
10:15 a.m.—Sunday School.

Free love is usually the most expensive.

POETS AT CAMP SITE

By Fred Spalding

The following poetical effusions have been copied out of the register at the camping grounds:

—

On our little auto tour, we came to Fernie's shade,
And on your cheerful little stove our fragrant coffee made.
We sure did need some coffee because your high hills,
With their steep and dizzy curves, had give us nervous chills.
And in the blistering sun, where pauses should be short
Our favorite tire blew out, with quick and loud report.
So after all the weary miles, we came to Fernie town
Hungry, hot and weary, with dust covered brown.
With the water from the camp we clean the dust away,
We cook and eat and rest. Oh that we here could stay.
But we must go on, for all must do their part,
But we'll remember Fernie with kindness in our heart.

—H. K. H.

In memoriam of the visit to this camp of Jas. W. Humphries, Hazel K. Humphries, Wm. and Eileen Humphries, and Wesley S. Gregg, Selma and Katheryn Gregg, all of Whitefish, Montana.

—

Mr. H. E. Munroe and party, of Saskatoon, says:

Roads fine, weather jake,
Fernie's Camp takes the cake.

—

Mr. and Mrs. MacCallum, of Bassano, says:

Fernie in the mountains,
Camp among the trees,
People of the city
Do everything to please.

We found your camp excellent in every way, thanks for a pleasant stay.

—

D. M. and Lilla Grant, of Sarnia, Ont., says:

We came from the town where the gasoline
That brought us here is made.
This camp of yours is the best we've struck;
It puts the rest in the shade.
Your stove is fine and your wood is dry,
Your washer is quite up to date,
Your tub and your sink just hit the spot,
Here's to you and your B.C. state.

—

From Sunday the 12th to Saturday the 18th, inclusive, there were ninety-five parties overnight in the grounds, less than one third of whom took the trouble to register their visit. A check on them has been kept by one of the parties who has been staying there for an extended visit.

The number of United States cars are increasing daily, but Alberta and Saskatchewan cars still lead by a big margin.

The secretary of the Cranbrook Board of Trade told me on Tuesday that they have anywhere from fifteen to forty cars a night in that camp, and the hotels are full every night.

Although we all think that the condition of the roads of Alberta has kept a great number of tourists away from the Crow's Nest Pass this year, and undoubtedly they have, it is not the general opinion anyway that they are worse than the prairie roads across the line, as the following letter I have received will show. It is the third letter along the same lines I have had in the last month:

Dear Mr. Spalding—Some time ago, at the suggestion of the Automobile Club of Southern California, I wrote to you for some information regarding touring in Western Canada, which you supplied me with. I was very much impressed with the booklet you sent and decided to come up to Canada and see as much of it as I could.

We have been over the wonderful Banff-Windermere Highway and are now on our way to New York through the Crow's Nest Pass. My impressions of the Crow's Nest Pass are that there is no better scenery anywhere, and that the beauties of Canada are not solely confined to it's Parks.

I want to say something about the roads we have found in our trip in Canada. They have been a great surprise to me as I had heard reports that they were not good. I figured however, that if others could get through, I could do the same. What has impressed me more than anything else, is the great amount of new road construction which is being done and the sequence of new bridges all the way through.

I have found all the roads to be splendid, with the exception of one detour between Wasa and Canal Flats, and even this is good when one takes into consideration the thousands of cars which have driven over it during the last two months. The worst roads we have encountered in all our trip, HAVE NOT BEEN IN CANADA and even in those regions new work is being constructed, and there is every promise of even better touring conditions in the near future.

In conversation with other Californians I have met in the different camping grounds, the opinion expressed by all is that the roads in Western Canada are an agreeable surprise, even to Californians.

All you need to do, is to advertise your wonderful roads and scenery in California and you will be innundated with tourists from there. — Yours fiathfully, signed, J. C. Marshall, home address, 434 West 20th Street, Los Angeles.

One of the Los Angeles papers and certain other elements in Southern California are knocking Western Canada scenery and roads all they can. This is typical of Los Angeles. Everything there is so much better than anything elsewhere—even the salt in the ocean there is purer—but they reason for this knocking is that they are afraid our attractions will draw a large number of tourists away from there and this is what they want to prevent, and they will succeed if we discontinue our advertising and let them get away with it. We have got it all over them in roads and scenery and many of them admit this now. I have been told by a number of them this year that the worst roads they have been over have been the roads in California which are not paved, and the roads leading to most of their principal resorts such as The Yosemite are not paved ones. I was all over that State four years ago and found myself right out of luck nearly every time I got off the pavement. Since then some of those stretches have been paved, but many have not, and those, according to recent reports, are simply vile, and we have no roads anywhere, not even in Alberta, which are so bad.

TO CORRECT AN IMPRESSION

James W. Davidson, President of the Calgary Good Roads Association, wishes us to correct the impression conveyed in a recent article in the "Free Press" that Calgary business men were working against the route through the Crow's Nest Pass in favor of the Banff-Windermere Road. Mr. Davidson in his letter says in part:

"It would seem to me that all parties concerned would naturally appreciate that we want all the tourist trade we can get and naturally need the Crow's Nest as we need the other highways to bring it to us. I can easily understand tourists being advised in Calgary in regard to the road being out of repair and the suggestion being made that they avoid it if possible. Road conditions change very quickly and unfortunately bad reports continue on for some time after the road may be in shape. We notice that on the road between here and Banff people will come over the road following a rain storm and will break out into print about the road being almost impassable. By the time the newspaper gets out and on the street a day or two of sunshine has passed and the road is again in good shape. I have tried to get the newspapers to refuse to accept such reports but some reporter gets news and slips it in regardless."

Figures just issued by Hon. William Sloan, minister of mines, show that the coal output for July was 26,649 tons greater than for June. The total output of all coal mines in British Columbia last month was 21,000 tons. The strictest supervision and encouragement are being furnished by the department. Marketing facilities are better and working conditions in the mines have occupied a great deal of the minister's attention this summer.

Attorney-General Manson has written Premier Mackenzie King asking for information regarding the possibility for the transportation of liquor from British Columbia points through Alaska territory to Atlin. Unless American regulations are changed the supply of liquor in Atlin will not carry the government liquor store over the winter, but Hon. Mr. Manson is determined to break down the barrier if that is consistently possible.

PROVINCIAL PARAGRAPHS

Vancouver, Aug. 15.—At the age of 57, and partially disabled as the result of war injuries, Walter A. D. Carr is enrolling for two special courses at the night classes of the Canadian Extension University here. He is taking up Expert Accountancy and Applied Publicity and declares he will attain proficiency in both subjects. In the same institution two of his sons will take the commercial course. Mr. Carr contemplates a successful career and declares that "one is never too old to learn, if he has the will." He has been without educational advantages, but is a remarkably well read man and has acquired a broad self-education.

Vancouver — A number of prominent professional and business men are exchanging grim notes following the departure of two sprightly young women who thrived here for several weeks selling subscriptions for an obscure American magazine. They yielded up a touching story of their endeavoring to "work their way through college," despite the fact that both were palpably sophisticated and passe. The young women made a number of visits and raised "loans" on a pathetic hard luck story. Reports from Victoria state they paid a similar visitation to that city.

New Westminster — Japanese cannery men have organized another company with a capitalization of $100,000. This makes the third company of this kind that has been founded within five weeks. The company will seek to supply the American and British Columbia markets, and announce cut rates.

Vancouver — Grant Mahood, president of American Mining & Smelting Co., which acquired the Fish Creek and other large mineral properties, has just secured the Georgia River Mines, sixteen miles south of Stewart on the Portland Canal. The property which is said to be highly valuable, passes from the control of C. H. Dickie, M.P. for Nanaimo, who owned the mines since 1910. This is regarded as one of the richest properties in that district and will undergo considerable development with a great outlay. Mr. Mahood has a large crew of men stripping the vein for 300 feet and cut open in seven places. Official essays run up to 35 ounces of gold. Mr. Mahood has left for the east to confer with capitalists who seek investment in these mines, and who are also interested in other mines that are about to pass into his control. He has realized a fortune in recent sales but is putting it all back into mining developments in this province. It is said that a sum considerably in excess of half a million dollars will be devoted to the development of Mahood mines before long.

South Vancouver—Paris offered a reward for the best idea of moving sidewalks, and the municipality of South Vancouver is offering a similar reward, with difference. In the latter case; the wooden sidewalks are moving so rapidly, by night time, that whole blocks are being stripped bare. It is believed the denizens of certain sections are using the boards for fuel. The district is tenanted by poor, working people, and there are many unemployed in that part. The city fathers are at their wits' end wondering where it will stop, and there is no spare money to replace the stripped sidewalks.

Victoria — Appropriations of $10,000 for further work on the Chase-Squilax-Sorrento road near Kamloops and $5000 for the extension of the wing dam at Alice Arm as part of the project to span the Kitsault River, are announced by Hon. W. R. Sutherland, minister of public works, among the authorizations made during the week. Details of the work by districts are as follows:

Atlin: Extension of wing dam at Alice Arm by day labor under district engineer R. M. Taylor, to cost $5000; reconstruction of Bear River road, revise Muddy Gulch Hill and approach to Bitter Creek bridge, to cost $7000; new bridge at Tooya Creek.

Cariboo: New bridges at Red Creek on No. 1 road 3½ miles and 9½ miles north of Nazco bridge; repairs to bridges at Four Mile Creek, Sheridan West Fork, Little Cottonwood, 36 and 133 bridges and No. 1 and 2 bridges on Sisters Creek; new bridge at Lockyear.

Esquimalt: Repairs to Happy Valley bridge No. 11-36.

Fort George: New bridge at Kerkhoff; repairs to Nos 1 and 2 bridges on Ormonds Lake road.

Kamloops: Additional $10,000 work on Chase-Squilax-Sorrento road.

Prince Rupert: Reconstruction of Indian Village bridge.

Richmond: Repairs to Marine Drive half cost ($3020) to be borne by the provincial government.

Revelstoke: Repairs to bridges 30 and 32 at Fish River Canyon and bridge 166 at Eagle River.

Similkameen: Repairs to Princeton-Otter Lake bridge and Tulameen-Summit City bridge.

South Vancouver: Portion of government's cost of upkeep to primary and secondary roads at Kingsway and Riversway, to cost $3400.

Trail: Repairs to bridge 11 on Nelson-Balfour road.

Yale: Surveys for new bridge at Nine Mile slide on Merritt-Spences Bridge road and for concrete retaining walls at 91 Bluffs on same road.

Vancouver — The Hook, the lively Vancouver weekly, edited by J. S. Cowper, which is being sued for $150,000 damages by Morton Gregory, following its exposure of the alleged frauds in the promotion of the Gregory Tire and Rubber Company, wants to know why the policy of patronizing B. C. products does not apply to the Vancouver Exhibition which has imported a lady singer from Portland and a chorus leader from Tacoma, while better local talent is available.

In the second of a series of articles on "What's Wrong With B. C.," the editor condemns the campaign to put more immigrants on the land, on the ground that the cities do not yet provide sufficient market to make farming profitable in B. C. He says that we need industrial development to provide payrolls in the cities, and this can only be achieved by opposing the present policy dictated by the interlocking directorate of the manufacturers, the C. P. R. and the banks to hold back industrial development in British Columbia.

HERE AND THERE

Smoking compartments are to be provided in the new wooden winged monoplanes for use on the London-Amsterdam-Berlin air route.

301,980,268 feet of lumber were produced from mills in the Ottawa Valley last season as against 238,116,764 feet in the 1921-1922 season.

Last season's grain shipments through the port of Montreal exceeded 153,000,000 bushels. Revenues reached $3,460,810 providing a surplus of $266,362.

Forest rangers of the Quebec and New Brunswick forestry departments will co-operate to the extent of covering fires on either side of the provincial border.

Two thousand maples and one thousand green ash trees, natives of Saskatchewan, were shipped to the Canadian War Memorial Park at Poperinghe, Belgium, recently.

Vancouver is to have direct consular trade relations with Spain. A vice-consulate has been established there which embraces the prairie provinces and is the only one west of Montreal.

During the year 1922 boring operations for the discovery of oil and gas in Alberta were continued to the extent of 230,000 feet, resulting in the discovery and development of a field with an output of 180,000,000 feet per day.

Despite reports of adverse conditions in the prairie provinces, Saskatchewan officials estimate that after paying all expenses the farmers of that province last year had $100,000,000 in net proceeds to apply on debts.

In 1906, in Iowa, a single head of oats was selected as being a desirable variety. In thirteen years this single head had multiplied to the extent that 1,500,000 acres were sown to it and showed an increased production of 6,500,000 bushels.

One of the largest timber sales that the Canadian Pacific Railway has made in several months has just been made on Vancouver Island. A group of Seattle lumbermen have acquired 12,000 acres of timber land at Horne Hill. The timber on this stand exceeds 200,000,000 feet.

Part of the plans for keeping the St. Lawrence open all winter submitted by Dimitry Jonavici, Roumanian engineer, to the Federal and Provincial Governments would call for the erection of a nine mile dam at the east end of Belle Isle strait, which would prevent the cold currents from the north entering the river.

The Bungalow Camps to be opened this year by the Canadian Pacific Railway in the French River, Nipigon and Lake of the Woods districts of Ontario will consist of a community house, containing a dining room with stone fireplace, surrounded by several double and single bungalows comfortably furnished for the accommodation of from one to four persons. A number of canvas houses will also be used.

The official opening of the Banff-Windermere Highway will take place on June 30th at Kootenay crossing, B.C. Motorists from all over Alberta, British Columbia and the Western States will be present in large numbers. A lunch will be provided for several thousand people at Kootenay Crossing. Prominent representatives will be present from the Canadian and United States Governments and from provincial and state governments on both sides of the line. The official opening will be marked by the cutting of red white and blue ribbons stretched across the roadway.

INDIGESTION

Relieved in Two Minutes with

JO-TO

Gas, acid, sour, burning stomach all quickly relieved with Jo-To. Drug Stores.

Here and There

Shipments over the T. and N. O. Railway during the month of May amounted to 329.15 tons of silver ore.

The movements of the mackerel schools will, when observed, be broadcasted from radio apparatus erected for the purpose by the Canadian Marine Department.

Mrs. Dan Otto, of Stratford, Ont., set 33 eggs and hatched 34 ducklings from them. One egg was apparently of the double yolk variety and both yolks were hatched.

A new direct passage service between Canada and northern Ireland has been inaugurated by the Canadian Pacific Steamships, Ltd. Three steamers have been assigned to the route.

James Edwards, of Port Robinson, declares he has a chicken out of this year's hatch which out-freaks most chicken freaks. This one has four legs, four wings, two backs, two necks but only one head. It has been preserved in alcohol.

One hundred and fifty families are to be brought into British Columbia and settled under private enterprise in the valleys east and south-east of Fort George, W. A. Lewthwaite announced, following his return from England recently.

A Swedish scientist claims to have perfected a process for the manufacture of "artificial wood from 50 per cent. sawdust and the balance chalk and chemicals. The product is as hard as oak, and can be planed, sawed, bored, nailed, painted, stained or polished. It will not deteriorate in water.

A start on the actual work of electrifying sections of the Canadian Pacific Railway's main line through the Rockies may be made next year. D. C. Coleman, vice-president of western lines, says that traffic demands and financial conditions would determine when a start would be made.

The decision of the Government of the province of Quebec to grant a bonus of $4 per acre for land cleared will result in an approximate outlay of $250,000. Clearance in the past few years has amounted to approximately 40,000 annually, but the total this year is expected to be 60,000 or more.

Speaking to the Canadian Club in London, Eng., recently, E. W. Beatty, President of the Canadian Pacific Railway, contrasted the "irritating tortoise-like slowness" of Canada's population policy with Australia's progressiveness. "We Canadians would be wise to keep our gates open for brains as well as brawn," he said.

One hundred and fifty delegates of the Canadian Weekly Newspaper Association will tour the British Isles next summer, and hold their annual convention in London, according to decisions reached at the final meeting of the convention here. The party will leave about the first of June, and will attend the British Empire Exhibition. The tour will last about six weeks.

Up to the end of 1922 dividends paid by the gold and silver mines of northern Ontario amounted to over $123,135,000. Cobalt camp was discovered late in 1903 and hardly began producing until 1905. Dividends paid out of Cobalt mines amount to $93,863,820, which represents practically 50 per cent. of the gross value of production. Porcupine mines have paid $28,472,988.

CROP REPORT NOT SO BRIGHT

In its fifth crop report of the season, "The Manitoba Free Press," says that "the exceedingly favorable prospects that have been maintained throughout the summer have to a considerable extent vanished during the past three weeks.

"While conditions in Alberta," continues the report, "are still very favorable and the best crops since 1915 is anticipated, the crops in Saskatchewan have suffered deterioration from rust, heat and too much moisture, until now conditions would point that not much more than a fair average crop on the whole will be harvested."

In Manitoba the loss caused by rust, heat and saw-fly has been very heavy, practically every district being more or less affected, and in the central and southern areas reports would indicate that the good yields promised three weeks ago have been cut fully in half.

Wheat cutting will not be general in Manitoba for another week or ten days. The damage from black rust in the Province has been undoubtedly serious, says the report, the loss being estimated from slight to 60 per cent. The great majority of Manitoba correspondents report that the heads are not filling to the top. The saw-fly has taken its toll, and apparently is worse in the western part of the Province. Labor is scarce in some districts, with wages from $3.50 to $5 a day.

In Saskatchewan wheat cutting will be general about August 20. The crop varies greatly, but the majority of the crop correspondents were "fairly optimistic." Good weather had assisted in holding rust in check and allowing the heads to fill, but warmth is now required. Saw-fly damage is not serious. A few points report slight frost. Labor is scarce, wages running from $3.50 to $5 per day.

"In Alberta the outlook is very encouraging," states the report. The Province is practically free from rust and the heads are, on the whole, being well filled. There has been very little damage from grasshoppers an hail. Cutting should be general by August 20 or 25. Most districts report a labor shortage wages being from $4 to $4.50 per day.

Harvest prospects in northern Saskatchewan are particularly promising for one of the heaviest yields in its history, states the annual crop report issued by "The Prince Albert Herald" today. There has been remarkable immunity from damage, and a conservative estimate places the wheat yield at between 25 and 30 bushels to the acre. Harvest will be general about the middle of this month, the report states.

Under the impression that it was a new brand of breakfast food, a weary Willie is said to have applied for a sample at a Toronto hospital where "free insulin" was announced.

According to report, Los Angeles is opposed to having any truck with the tourist trek to British Columbia. King Canute is credited with having attempted to sweep the ocean back with a broom.

Oh! Harold!

"OH! HAROLD" bubbling with life and rhythm is the *very* newest dance favorite—and as played by Zez Confrey and his orchestra—it's really an *irresistible* fox-trot. Its companion selection (on the reverse side) "ROSETIME AND YOU" is an added reason for the *great* popularity of this record. *Ask for—*

GIRLS! WHITEN YOUR SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes, areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

A PLAN TO AID SETTLEMENT

An excellent suggestion, having in mind the future of Canadian land settlement, was recently made to the British Parliament by Sir Martin Canwoy, M.P., member for the English universities, introducing a deputation from a conference of British authorities on the subject of Empire settlement and unemployment. Briefly the plan submitted by him involved the advancement of money by the government in an equal amount to that subscribed by the public in order to give a rudimentary training to agriculture so as to fit unemployed persons in Great Britain to be useful immigrants in the Dominions. It was stated that the plan had the support of influential persons in Canada and that the government was willing to send to England men who were able to train these would-be colonists.

Such a plan has everything to commend it at the present time when there is so many men in the British Isles anxious to move to Canada and the sentiment in the Dominion is strongly in favor of encouraging such a movement as far as is economically possible. If equably worked out the plan would work to the mutual advantage of both the immigrant and the Dominion removing a great handicap under which the newcomer from the British Isles to the lands of the Canadian West has in the past labored.

When a Britisher comes to Canada, either substantially capitalized or lacking material means, he inevitably suffers to a certain extent from unfamiliarity with conditions and lack of experience. His condition is in marked contrast to that of the American, for instance, who is usually an experienced agriculturalist and finds conditions not drastically different from those to which he has been accustomed. This lack of knowledge is not only a handicap but detracts from his immediate value to the country, and it is usually some time before he develops into the asset the man is who arrives with a greater equipment of knowledge.

Western Canadian history proves that the inexperienced Englishman learns well and ultimately comes out at the top. With only one exception, for instance, the men who have brought the greatest honor to Canada by securing the wheat championships of the world would have been farmers who came originally from England and obtained their entire agricultural experience in Canada. Such history, however, does not relate the hardship with which such experience was acquired, the mistakes made which might have been avoided with a little previous training and a commencement made with the equipment of preliminary knowledge.

Whilst the Dominion would like to see such a plan worked out which Canada in a more complete state for entering upon agricultural activities, it involves only an expenditure which only the Motherland could sustain. There is no doubt, as has been stated, that Canada would willingly supply experts to train aspiring farmers for the conditions awaiting them. The primary benefit is to the Motherland with its unemployment problem and and its anxiety to satisfactorily settle within the Empire the numbers of young men it cannot find work for in its own domain. Such a plan is peculiarly appropriate at the present time in view of the tide of British immigration which is finding its way to the United States, in that such preliminary training as adapting immigrants to the peculiar conditions of the Dominions, and committing them to such settlement, would practically ensure their retention within the confines of the British Empire.

o

The American naval training ship that rammed the Welland Canal might be rated as a destroyer.

Taxes are so high in Jerusalem that the ratepayers feel like telling the collectors to "go to Jericho."

BEECHAM'S PILLS
The Safest and Best Family Medicine

Reggie was making his first flight and all went well till a nose dive was being executed, when he suddenly began tugging at the pilot's sleeve. "Let's get away from here, quick," he shrieked, "the earth's swelling up like a balloon and it'll bust any moment."

o

Here and There

Gold production in Canada in 1922 passed the million ounce mark for the first time since 1902.

Public works to be undertaken in Vancouver this year will cost in the neighborhood of $10,000,000, of which $3,000,000 will be spent by the Canadian Pacific Railway on pier construction.

The Canadian Pacific steamship Montcalm carried 900 emigrants for Canada on her last voyage from Liverpool, the largest number of emigrants to leave that port this year.

Work was commenced last week on the new elevator at the Ballantyne pier, Vancouver, which will cost approximately $2,000,000 to complete. The new elevator will have a storage capacity of 1,500,000 bushels.

Three thousand seven hundred licensed grain elevators in Manitoba, Saskatchewan, and Alberta have a total storage capacity of over 100,000,000 bushels. Ontario, Quebec and Maritime provinces have storage elevators with capacity up to 33,180,000 bushels.

The first lodge of Free and Accepted Masons in the history of the Merchant Marine World, was recently organized on the Canadian Pacific liner Empress of France, when cruising the Mediterranean Sea with a party of 800 Canadian and United States tourists.

Four thousand seven hundred and eighty-four cars of last season's fruit crop have been shipped out of the Okanagan district of British Columbia up to February 14th, according to a statement made to the Vancouver Board of Trade recently by F. W. Peters, general superintendent of the Canadian Pacific Railway, B.C. division.

Sault Ste. Marie.—The new downtown ticket and telegraph office of the Canadian Pacific Railway and the Dominion Express Company at the corner of Queen and McDougall street, in the building formerly occupied by the Public Utilities Commission, is one of the finest in the province. There are some larger offices in the larger cities, but none that are better equipped.

Herald Rindal, divisional engineer for the Canadian Pacific Railway, who has been located at Vancouver for the past thirteen years, and F. W. Alexander, divisional engineer for Alberta at Calgary, have exchanged posts, it being the company's policy to develop its engineers by giving them experience with the varying conditions in different parts of the Dominion.

A number of western interests have combined and chartered the Canadian Pacific steamship Pretorian, and the vessel will sail from Montreal on August 1st for Fort Churchill, for the purpose of proving to the satisfaction of the interested parties whether or not conditions of navigation to and from Hudson's Bay can be made a commercial success. Between three and four hundred passengers from the west will make the trip.

J. S. Brown, president of the Brown Fruit Company of Edmonton, Alta., returned on the Metagama last week from a three months' visit to Europe. He was present in Germany when the French invaded the Ruhr, and he said that the feeling was very bitter between the two races. On the other hand, a Canadian, American or Britisher was given a cordial welcome; this being largely due to a speech in which Lloyd George advocated a compromise. Travel in Germany, he said, was surprisingly cheap, he having made one trip of nearly 190 miles for the sum of fifty cents in Canadian currency.

When the Canadian Pacific steamship Metagama, which left St. John's on March first for Glasgow, reaches her destination, Captain G. B. Evans, O.B.E., her commander, will have completed his last voyage in command of the vessel. Captain Evans, who is the oldest and one of the most highly esteemed commanders in the service of the Canadian Pacific Steamships, Limited, is retiring after a career at sea of 48 years, during which time he crossed the Atlantic in command 578 times, and conveyed 247,923 passengers, of whom 71,000 were Canadian and American troops. He was in command of the Missanabie when this ship was sunk by the Germans in 1918, and he will be remembered by many passengers as the captain of the Minnedosa, the Montcalm or the Empress of Scotland.

Safe for Washing Dainty Fabrics—Economical for *All* Laundering

Wear and use your daintiest things—now. Wash them often as need be, without injuring the fine, sheer fabrics or dulling the delicate colorings. Crepes and chiffons, satins and silks, laces, expensive cottons — they come from laundering with new beauty.

Because Palmolive Princess Soap Flakes were perfected to cleanse these daintiest fabrics without harming them.

They are the purest of soap, these curly, snow-white flakes. No harmful ingredients rot threads or fade colors. The stiff, creamy suds dissolve dirt gently.

And because they are *all* soap, all *pure* soap, Palmolive Princess Soap Flakes actually last longer than ordinary laundry soaps. Ideal for use in the washing machine. *So* economical that thousands of housewives use them for all household and general laundering purposes.

Get some today from your dealer. In handy 1-pound packages, or in bulk.

Beautiful Thought For Tuesday

It must be tough for cannibals and heathens who have nothing to do but wait until they are discovered.

* * *

News item says there is a large demand for $1 and $2 bills. But we don't call that news.

o

Home and Love.

Just Home and Love, the words are small,
Four little letters unto each;
And yet you will not find in all
The wide and gracious range of speech
Two more so tenderly complete:
When angels talk in Heaven above,
I'm sure they have no words more sweet
Than Home and Love.

Just Home and Love, it's hard to guess
Which of the two were best to gain;
Home without Love is bitterness,
Love without Home is often pain;
No! Each alone will seldom do;
Somehow they travel hand and glove,
If you win one you must have two,
Both Home and Love.

—S—White Spruce, Camp 4

HALF CREAM

A short time ago a woman was asking a baker why everything was too short. She said everything was the same but she couldn't get a cake "fit to eat." Being a good friend of ours he asked if she knew that Pacific Milk is almost half pure cream. She hadn't heard of it, of course. He asked her to use less butter or lard, not much more than half what her recipes called for. We haven't heard how she came out.

SAVED FROM AN OPERATION

Restored to Health By Taking "Fruit-a-tives"

Made of Fruit Juices and Tonics

The most convincing proof of the true worth of "Fruit-a-tives" as a medicine for women is found in the letters written by them to "Fruit-a-tives". For instance:

"I suffered with all the symptoms of female trouble, pains low down in the back and sides, constipation and constant headache. A doctor advised an operation. I started taking "Fruit-a-tives" and this fruit medicine completely relieved me of all my misery".

Mrs. M. J. GORSE,
Vancouver, B.C.

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

At a special meeting of the City Council held last evening, arrangements were made with the Imperial Bank of Canada for accomodation to take care of the City overdraft for the balance of the year. The City has about $120,000 tied up temporarily in the Home Bank.

The Cranbrook Courier is advocating Joe Jackson for Railroad Commissioner. If Joe is appointed, he will have a fine time dealing out misery to the C. P. R. for all the grief they have been giving him in the last 20 years. But while they are offering Joe, why not take in Bill Cameron and Tom Cavan.

The Fernie Hotel Barber Shop and Cigar Store, which has been closed for the past week undergoing repairs, will be open for business tomorrow, having been entirely renovated and put in first-class order. Slim will still be in charge and there will be two barbers to look after your wants. L. Ashton has been secured to look after the tobacco and pool end of the establishment.

The citizens of Fernie and district express every sympathy for "Sandy" Watson, manager of the local branch of the Home Bank, who by his sterling worth, built up such a fine business for that institution, only to have it wrecked by the carelessness of other branches. It is to be sincerely hoped that "Sandy" and his amiable wife will not be compelled to leave Fernie, where they have a thousand friends.

Among the many blessings which a beneficient Providence has showered upon British Columbia, not the least important, is her wealth of game animals and birds. No other part of the civilized world has such a variety of big game, birds and furbearers. The approaching open season promises to result in the killing, legitimate and otherwise, of a larger total of game than any former season, and this year the government has determined to enforce fully the game regulations, which are felt to be a once liberal and yet strict enough to ensure conservation. Attorney-General Manson has sent Col. McMullen, chief of the provincial police, on a tour of organization in connection with the enforcement of the game laws. And the minister and members of the Game Conservation Board, through their statements, are appealing to the spirit of fairplay in sportsmen to protect the game of British Columbia.

A Gramaphone Dance will be held at the Golf Club House on Wednesday, August 29, at 9 p.m. Admission 50c each. All members and friends are invited.

The strange illness, which attacked Norman Reid last week, has been diagnosed as Cerebral Menegitis. He is putting up a good fight against it and will recover.

Mrs. S. Bonnell and her son, Gordon and Miss Betty Crawford, who has been the guest of Miss Constance Bonnell for several weeks, left on Monday for Vancouver .

The Coal Co. Baseball Team are playing Lethbridge here on Sunday. Posters are out calling for a double header, but it has been deemed advisable to play only one game, starting at 2:30. Fans please note this.

City Clerk Moffatt, who left on Friday last for Vancouver for a few weeks holidays, was recalled on Monday by Mayor Henderson, owing to the complications arising through the failure of the Home Bank.

Mrs. Grant, wife of Rev. H. R. Grant, formerly of Fernie, and Miss Lauraine Grant, are spending a few days in Fernie with Mrs. A. C. Liphardt. Mrs. Grant has been visiting points east and is now returning to her home in Prince Rupert.

Abuot twenty Rotarians, with their wives, motored to Cranbrook on Tuesday, where they were entertained at a banquet given by the Cranbrook Club in honor of the visit of Miles Higley, of Spokane, President of District No. 1. A fine program was carried out followed by a delightful dance and the visitors came home greatly pleased with the trip.

A large bush fire in some old slashings in Cedar Valley is causing considerable worry. Fire Warden George Schupe had a force of some fifty men hard at work all last night and this morning and they think that the blaze is pretty well under control. Millions of feet of virgin timber are standing, in close proximity to the blaze and no effort will be spared to stamp out the fire. It is thought the blaze originated from berry pickers leaving camp fires burning.

A Fernie picnic took place in Stanley Park, Vancouver, on July 30, at which Mr. and Mrs. Jos. Bricker were host and hostess. The party was entirely made up of visiting Fernie people and old timers from this city, now resident in Vancouver. Among the guests were: Mr. and Mrs. M. A. Kastner; Miss Olive Brown; Mr. and Mrs. Archie Prentice and Miss Betty and Margaret Prentice; Jas. Falconer; Mr. and Mrs. Harvey Watson and children; Miss Pearson; Mrs. T. Oakley and Miss Ethel; Mrs. Loggie; Mr. and Mrs. L. M. Proctor; Miss Bosworth; Mr. and Mrs. (Dr.) Barber; Mr. and Mrs. Winkler and Misses Molly and Laura; Herb. Liphardt; Wm. Burland; Mrs. Allan Smith and Allan Jr.; Mrs. Thos. Prentice and Miss Betty; Bert Pearson; Mrs. Fred Johnson and Miss Betty; Mrs. Irvine, Miss Margaret and Master Jack. During the happy time spent Archie Prentice entertained the company with a number of his Scotch songs.

"Just as Good Kind"

THEY ARE THE BEST

Barney Barrett, of San Francisco, was in town several days this week.

J. J. Harrington and Wm. Gates are back from a trip to Banff.

Miss Dorothy and Roswell Garner visited in Edmonton this week.

Mrs. G. G. Henderson and Misses Dorothy and Mollie returned the other day from a trip to Banff.

Mrs. D. V. Mott and Miss Alice Daniels, of Nelson, are the guests of Mrs. A. J. Mott.

Miss Aline Stewart Williams, of Victoria, who is en route to England, is spending a few days with Miss Jean Corsan.

Dr. J. R. Ponton, of Victoria, the Provincial Inspector of Hospitals, was in the city this week on official business.

Phil Sheffield, late principal of the Public School, arrived home from Toronto on Tuesday. He brought his brother back with him.

Martin Robichaud left this morning by motor car for Nelson. He has been transferred to a new customs office which opens on the Ymir road.

Don't forget the Moose dance in Victoria Hall on Tuesday, August 28. Dancing from 10 p.m. to 2 a.m. Whitehouse Orchestra. Refreshments. $1.00 per couple, extra lady 50 cents.

L. B. De Veber, manager of the Bank of Montreal at Nelson, was in the city on Wednesday looking over the field with a view to opening a branch of that bank in the city.

Mrs. (Dr.) Workman and children returned from Vancouver and White Rock last week. Ross had an extensive trip of over 4000 miles, from Vancouver through California and Mexico.

The Women of Mooseheart Legion will hold their annual sale of work and home cooking in Victoria Hall, on Thursday, September 20. There will be a fish pond and other attractions for the children. Dance in the evening. a17|5

The Boy Scouts, over thirty strong, opened camp at McBain's Lake yesterday, with John Donaldson in charge. The camp has a beautiful location on the lake just four miles from Jaffray. The boys were able to secure several large tents from Archie Leitch that were already up and thus saved them a lot of trouble.

Three thousand miners in district No. 18 are out of work at present, and in other parts of the district the mines are running only half time, according to district union officials at Calgary. Much of the unemployment is in the mining fields that customarily supply the Canadian National railways with steam coal, while the slackening in the demand for domestic coal has laid off approximately 1500 men in the Drumheller valley, including the towns of Drumheller, Wayne and Rosedale, it was stated.

The girls of the United Church, who have been camping at Morrissey for the past week, returned home on Thursday. This has been a very successful camp, conducted by Mr. and Mrs. D. McVannell and Miss Elsie Frey. Such a camp where girls are under careful supervision is most beneficial to those who are privileged to attend. Great credit is due to those who are willing to sacrifice their own vacation to help others to enjoy a real holiday. We are glad that the churches of the city are taking such a real interest in girls' work. We understand that the church which conducted this camp has over forty, teenage girls organized in group meeting on Sunday and one night a week. In the past boys organizations, such as the scouts, have come to the front but it has always seemed to us that the girls' work is equally important.

FOR SALE—Seven room house on ¼ acre lot, situated on McLeod Ave., West Fernie. Modern conveniences. Terms: Cash or time. Apply Louis Proudlock, P. O. Box 775. a24|3

WORKING WITH THEIR MOUTHS

There is one class of community which apparently never takes a holiday:—and that is the coterie of itinerant blatherskites who call themselves "Reds". They are husky and well fed and apparently have ample funds to spend on railway fares. To travel a thousand or fifteen hundred miles to make a speech in some centre where it may do mischief, apparently causes them no financial worry. No sooner was there a prospect of a strike with accompanying violence in far away Cape Breton than a group of Toronto "Reds" was on the train hastening to the scene to help the cause of revolution and breathe vengeance against capitalistic "oppressors". It must strike ordinary persons that gentry free to travel so much and talk so much, are hardly the helpless victims of the capitalistic system that they claim to be.

There is for instance, one William Z. Foster, who was once described as the "Most dangerous Red in America," and is very proud of the title since he invariably sees to it that reporters get it down in their notes. Foster has been floating around Canadian cities urging a revolt against Samuel Gompers, President of the American Federation of Labor, and against trades unions generally. So far as one can gather from Foster's ravings his chief complaint against trades unions is that they have not abolished work. But Foster's coming to Canada was quite unnecessary, even from the standpoint of the "Reds"; there were plenty of agitators already to spread his doctrines. This fact was proven on a recent Sunday when Foster was detained in Hamilton and did not turn out at a street meeting he was to have addressed. Three "Comrades" of Canadian vintage, Joseph Knight, William Moriarty and Malcolm Bruce were only too willing to take his place. Bruce is one of the benevolent outsiders who went to Cape Breton to encourage sabotage, and became practically violent in his protest against other outsiders in uniform being brought in to maintain law and order. Incidentally, as a deputy for Foster, he threw light on what his own idea of work is. He was particularly satirical at the expense of Judge Gary, of the U. S. Steel Corporation, because the latter's voice gave out at a recent meeting,—a calamity which never happens to a "Red". "This man," he said, "who wanted the last ounce of the worker's strength couldn't himself work for one hour with his mouth." If working with the mouth is the highest of accomplishments, it is quite plain that Bruce and his "Comrades" have Judge Gary and most other leaders of industrial production beaten forty ways. They surely are human broadcasting machines and can well afford to jeer at those who can merely work with their brains or with their hands.

The gentry who work with their mouths are never short of persons to assail. They have just now a typical mark to strafe in the person of Hon. Calvin Coolidge, the new President of the United States; and they started work within twenty-four hours of his accession, not only in Canada but also in the United States. President Coolidge is in bad odor with every known variety of "Reds", Socialists, Communists, Bolshevists, Anarchists, and the like. Under the broad canopy of their hatred for Coolidge they can all temporarily unite. While Foster's Communistic friends at Toronto were denouncing the new President as a "mediocrity" under the impression that they were uttering a terrible invective, the Socialists of Greater New York were giving him three groans. Their invective was also particularly savage. "He is not merely a conservative but a reactionary," said Comrade Julius Gerber in tones calculated to freeze the blood of his hearers.

The conclusion of the "Reds" generally is that it is impossible under the capitalistic system for men of ability to be at the head of government:—meaning thereby men who work only with their mouths. The strafing of Coolidge, the mediocrity, the conservative and the reactionary, is due to his having enforced order with a strong arm while Governor of Massachusetts, and his counsels of frugality and work as solutions for the economic problems of the day. It is to be noted also that Premier Mussolini, of Italy, whose record is that of a moderate socialist, is also being strafed because he is enforcing the policy that Italians must work or starve. Mussolini was right so long as he worked only with his mouth, but since he became a convert to the view that other kinds of work are necessary, he too has become a mediocrity.—Saturday Night.

o

It is understood that the Toronto girl who has been selected to play the role of Cleopatra in an Egyptian pageant to be staged at the big fair will wear a costume of Nile green.

Here and There

Seeding in Alberta was two weeks later this year than last.

A second party of Swiss immigrants recently arrived at St. John aboard the Melita and are en route for the West, where they will engage in agriculture.

Twenty-two thousand immigrants to Canada from the United States were inspected on trains and highway crossings at the 33 points from Port Arthur to Kingsgate, B.C., during March of this year.

To date the port of Vancouver has shipped or booked 17,000,000 bushels of wheat to the Orient and South America. The railroads expect at least 2,500,000 additional bushels to be shipped this way in the near future.

The memory of the early missionaries of the Oblate Order will be perpetuated by the Canadian Pacific Railway, and several stations on the extensions of their lines between Kipawa and Quinze will bear names of early members of that organization which did so much for the colonization of the country.

There are thirteen new paper making machines being installed in Canadian paper mills this year. When erected and running full these machines will consume more than 350,000 additional cords of wood a year. Canada is already annually consuming and exporting more than 5,000,000 cords of pulpwood, representing the growth of a century or more on 1,250,000 acres of land.

A new service for motor tourists desiring to pass between the mainland and Vancouver Island has been inaugurated between Bellingham and Victoria. The Motor Princess, with a capacity for fifty automobiles and 250 passengers, plies twice daily between the ports. This boat is motor driven and the first of its kind to be operated on the Pacific side of the continent.

In 1922 Canada produced 2,418 tons of salt cake, valued at $54,804, and 1,329 tons of Glauber salts valued at $42,719, according to government figures. There are a number of immense deposits of Glauber salts in the province of Saskatchewan, which are at the present time only in the initial stages of development, but it is anticipated that the next few years will see a considerable increase in production.

The Canadian exhibit at the British Empire Exhibition, to be held in London from April 20th to October 31st, 1924, is to be financed, controlled and directed by the Federal Government. The estimated cost is $1,000,000. The two Canadian railroads are planning exhibits on adjoining sites, each with a floor space of 10,000 feet. The cost of the Canadian Pacific exhibit is estimated at $300,000.

The Canadian Pacific steamship "Empress of Russia," upon her last sailing, carried a shipment of Canadian frogs for Japan. Cool space was reserved in the hold of the liner and the travellers were well packed in ice. On being taken ashore at Yokohama these frogs will be gradually warmed until they are ready to be let loose, when they will be liberated on the lawns of Japanese importers, with the idea of giving the Japanese a new industry in the production of frogs legs.

The Canadian Pacific Telegraphs have announced the following reduced rates per word for cable messages to the following countries effective to-day:—Austria, 30 cents, Belgium 23 cents, France 22 cents, Germany 25 cents, Great Britain and Ireland 20 cents, Greece 35 cents, Hungary 33 cents, Italy 26 cents, Spain 33 cents, Switzerland 27 cents. The 25 cent per word rate to Great Britain and Ireland is still in effect for special rush cables. Corresponding reductions have been made in the rates to other countries in Europe and beyond via Atlantic cables, and the new deferred rates will be one-half of the full rates quoted above except to Great Britain and Ireland, where the existing deferred rate of 9 cents per word is unaltered.

ARDOUS CLIMB TO SUMMIT OF MT. MARY VAUX

JASPER, Alta., Aug. 15. — Two men from Chicago and two women from Ohio have just reached Jasper and report that after a six weeks' journey through almost trackless wilds they have been successful in reaching the peak of Mount Mary Vaux, hitherto considered envincible. The four who made the ascent were Douglas Sutherland, secretary of the Civic Federation of Chicago; Ben Herzberg, Chicago attorney; Dr. Emily J. Widdercomb, of Kent, Ohio, and Miss Mary Blakeslee, of Medina, O.

When the party set out from Jasper early in July, accompanied by Bruce Otto, a well known guide here, they were told that they could never make it. "The summit of Mary Vaux is unreachable," old timers told them. "The country for miles around is too rough." But all of the party had ridden on the elevated during the rush hours, besides being experienced in mountain climbing, so they were used to hardship.

They reached the top after six and a half hours of ardous climbing. The summit is 10,000 feet above sea level and affords a superb view of the Canadian National Rockies for miles around.

o

OLD IDEAS

By Walt Mason

Your grandma knew the virtue of barks and roots and buds; if any ailment hurt you, she gave you boneset suds; when grandpa's corns were sorest, or when he had the gout, she roamed the fields and forests to knock them out. And in the gloomy attic dried weeds in bunches hung, to stifle pains rheumatic, or heal the rusty lung. And now we smile at granny, and josh her ancient ways: the cures were almost uncanny they used in olden days. Strange talk of microbes vicious, strange bunk concerning germs, the learned physicians dish us, in phosphorescent terms. All vain are mullein bitters, and useless tansy tea; we have to kill the critters that are too small to see. Of course old dames were silly to brew things in a crock, and climb the pastures hilly in search of yellow dock, in vain was their endeavor, in vain the cures they sprung; yet people lived forever when you and I were young. Filled up with yarbs and pine tea, the graybeards went their way, and when their years were ninety, they still were pitching hay. The old receipts we're burning, we know old ways were wrong, and yet, with all our learning, we do not live so long.

o

Within a period of sixty days the members of the Ontario cabinet have enjoyed the experience of being elected by the popular vote and by acclamation.

Here and There

The total elevator capacity of Port Arthur and Fort William will reach 65,000,000 bushels by September of this year. By the end of 1924 the elevator capacity is expected to reach seventy millions.

Immigration returns of the Canadian Government for the first five months of the present year show a one hundred per cent increase in immigration from the British Isles over the figures for the same period of last year.

The 1923 apple crop of the Okanagan Valley will amount to 4,620 cars according to the estimate of W. T. Hunter, district horticulturist. This is an increase of 20 per cent over last year and a record for the district. The apple crop for Kootenay and boundary districts will approximate 380,000 boxes.

A new high record of production was established by Canadian newsprint mills during May with 110,252 tons, an increase of nearly 10,000 tons over the month of April and 15,750 over May of last year. The daily production in May was 4,084 tons, the highest in the history of the Canadian industry.

Following the opening of the Banff-Windermere Motor Highway, Lieutenant Governor Nichol of British Columbia and Randolph Bruce were honored by the Kootenay Indians who made them an honorary chief and full chieftain of their tribe respectively. The Indian celebrations were held at Invermere in the beautiful Windermere Valley.

Several new air stations are to be opened in Ontario and Quebec in the near future for the purpose of extending the forest area to be patrolled by airplanes. A base is to be established at Ramsay Lake near Sudbury, and from this point all Ontario work will radiate; operations being carried on at Orient Bay, Remi Lake and at least two other substations not yet announced.

If the Canadian pre-war exports of flour are considered as 100, the Dominion's average export total between 1921 and 1923 can be considered as 207. Comparatively, pre-war exports of the United States being rated at 100, its present export is at the rate of 147. This indicates that Canada has more than doubled her export trade in flour while the United States has increased its trade by 47 per cent. Before the war Canada exported 3,832,000 barrels, while at present her exports average 7,885,000 barrels a year.—"Journal of Commerce."

Mr. Georges Delrue, one of the most important personages of France arrived in Montreal by the S.S. "Minnedosa" to take up residence at St. Johns, Que. Georges is two and a half years old and has spent most of his life with his grand parents in Tourcoin, a small town on the border line of Belgium and France. The journey from the old homestead, via Antwerp, Georges made alone but never out of sight of the watchful eyes of the officials and servants of the company.

Major General Lord Lovett, a passenger on the Canadian Pacific liner "Montcalm," and delegate to the British Empire Forestry Conference, Ottawa, said in connection with his investigations into Canadian forestry methods and applied science, "England has but a small forest area in comparison to Canada, nevertheless, her forests were depleted two-thirds to meet the emergencies of the War, and now we are determined to recover this loss by practical reforestation. We have been working at this for the last three years and expect to make a completion of our work in another year."

Here and There

In 1922 Canada produced minerals estimated to be worth $180,622,000, an increase of practically $6,000,000 over the previous year.

A British silk manufacturing firm has decided to establish a large plant near Quebec city for the manufacture of artificial silk yarn.

A train nearly a mile long and drawn by a single locomotive recently carried 165,000 bushels of grain over the Canadian Pacific western lines.

Almost sixteen and a half million bushels of wheat were exported from the port of Vancouver during the period September 1, 1922, to May 31 of the present year, according to figures issued by the Merchants Exchange.

Among the large number of unaccompanied women on the last westward voyages of the Canadian Pacific liners "Montclare" and "Melita" were twenty-three who were coming to Canada to be married in various parts of the Dominion.

An official in charge of the cattle shipments from the Port of Montreal recently stated that nearly 40,000 head of store cattle would be shipped from the port this year. He declared the rush seasons would be the months of August, September and October.

On her last eastward voyage the Canadian Pacific liner "Empress of Canada" established a new trans-Pacific record of 8 days, 10 hours and 55 minutes from Yokohama to Vancouver. The previous record, 8 days, 18 hours and 31 minutes, had been held since 1914 by the "Empress of Russia" of the same line.

In the corn belt the places where refreshments are served are distinguished by the name the leading staple is given on the menu cards. In high-class cafes it is served as "corn on the cob," while patrons of the revolving stool feedery call for "boilin 'ears."

As the result of many years of close observation a San Francisco genius has discovered that footprints provide a reliable index to character. According to the professor, young couples contemplating matrimony can by comparing their footprints, ascertain if their dispositions are likely to blend and the union prove happy. In time bureaux may be established where "soul mates" may be selected by the simple process of mating sole prints.

Sealed in its Purity Package

Double-Ender and Driver.

In the passing of Charles Clarke at his Toronto home, the Canadian Pacific lost one of its oldest locomotive engineers. In the pioneer days of Canadian railroads, the late Mr. Clarke used to drive an old wood-burning engine known as a double-ender, and the engine on which he made his first run as engineer on the Canadian Pacific is shown above. He was born in England 76 years ago and started railroading at the age of eighteen with the old Midland line, joining the company from whose service he was retired about twelve years after.

PREVENT FOREST FIRES

IT PAYS

Alone From Uscilug to Milwaukee Via Canada

Eleven-year-old Polish Boy Makes Long Voyage Alone.

TRAVELLING does not tire or trouble this little fellow. Though he does not speak any English other than two or three words which he picked up en-route, he travelled alone from his home at Uscilug on the Russia-Austrian boundary to Milwaukee, burdened only with a small valise and a sheaf of tickets and immigration documents. Keeth Herz is his name. Orphaned by his mother's death three years ago, he was going to his father in Milwaukee, who had made arrangements for his transportation.

When Keeth arrived at Warsaw he was conducted by an agent of the Canadian Pacific Railway to Antwerp. There he was given a ticket almost as long as himself which would carry him through to his destination. Crossing to England he sailed on the "Metagama," being, from the time he left Warsaw, under the care of the Canadian Pacific. The direct mileage from Milwaukee to Uscilug is not by any means the full mileage of his travels. The ship's officers estimate that he ran at least twenty miles a day over the vessel, and the port officials had an anxious time when he made surreptitious peregrinations in search of someone who spoke his own tongue. He was glad, of course, to meet his father, but what an adventure it is to travel far and alone!

Here and There

A jersey cow owned by a Montreal man has broken all Canadian records by producing 1,200 pounds of butter in a year.

The average annual per capita cost from fires in United States is $2.26, while Canada loses $2.73 per capita by fire; Spain, $1.86; France, 97 cents; England, 64 cents; Germany, 28 cents, and the Netherlands, only 11 cents.

Bungalow Camps in the wilds of Ontario have been opened by the Canadian Pacific Railway Company at French River, Nipigon, and near Kenora, Lake of the Woods.

Traffic through the Lachine Canal during the month of June showed an increase of two million bushels of grain and one hundred thousand tons of coal with increases in pulpwood, produce and passengers over the same month of the previous year

The wheat crop of Alberta and Manitoba has progressed so well on account of the abundant moisture of the early season that farmers, business men and railroad companies are preparing for a harvest in excess of the record one of 1915.

Prince Rupert, B.C., claims the world's best record for a one trip fish catch. A fishing schooner arrived at this port recently after being at sea 14½ days, with 38,000 pounds of halibut, which sold for a sum that netted each man of the crew of five $727.80.

In the Province of Ontario, it is estimated, the lumber cut in 1922 amounted to 309,000,000 board feet, and in addition 289,113 cords of pulpwood. The Province of Nova Scotia cut 125,000,000 feet, New Brunswick 210,000,000 feet, and British Columbia 273,146,000 board feet.

The Dominion Express has just effected a shipment from Hamburg to Kobe, Japan, in 32 days. The average time consumed between the same two points via the Suez Canal is 49 days, and the saving thus made by the Canadian route will be of great importance in helping make this country the road between Europe and the Orient.

THE CURSE OF THE RUSSIAN JEWELS

Followed by a fate almost as sinister and inevitable as that which stalks in the trail of the Hope diamond or the great gem known as the "Moon of the Mountains," the pearls which at last found their way into the possession of the Grand Duchess Xenia Alexandrovna of Russia, sister of the late Czar, have had a history which is as unique as it is mysterious. Known as "The Necklace of Tears," this magnificent collection of 389 almost priceless pearls first adorned the throne room of the Great Mogul at Delhi. Tradition has it that a curse was upon the necklace even then, for a Persian army swept down upon the palace and a Persian chieftain forced his way into the throne room, slaughtered the Mogul and the ladies of his harem who had worn the pearls and rode off with the jewels wound about his turban.

That same night, as the Persian leader slept in his tent, a French soldier of fortune, who was stationed as a sentinel outside, slipped under the canopy, thrust a dagger through the heart of the sleeping man and escaped with the jewels hidden under his cloak. After many dangerous adventures, the Frenchman sold the stolen necklace to Alexis Orloff, a favorite of Catherine the Great, to whom the latter brought the pearls as a gift. But the man who had stolen the jewels had but little time to enjoy the money paid him. Less than a week later his body was found on a lonely road not far from the Russian capital, with the handle of a Persian dagger protruding from between his shoulder blades.

The next victim of the matchless necklace was Princess Tarakhanoff, daughter of Empress Elizabeth and proper claimant to the Russian throne. At Catherine's insistence, Orloff made love to her and, after presenting her with the necklace of Tears, induced her to return to Moscow from Florence, where she had taken refuge. But, as soon as she crossed the Russian frontier, the Princess was arrested and hurried to the Fortress of Saints Peter and Paul where she was confined in a dungeon below the level of the water. The next day her body, drowned by the rising tide, was found on the floor of the cell.

Russian history during practically all the years which follow is filled with the sudden and violent deaths of those who wore the priceless necklace—among them Empress Alexandra, wife of Nicholas I., the wife of Alexander III., who was plunged to death in a railroad wreck; Rasputin, who was reported to have received several of the pearls in return for his services, and the late Czarina herself.

The latest victim of the supposed curse was Horace E. Dodge, the Detroit automobile manufacturer, who purchased a number of the gems at a price of more than $750,000 and had them presented to Mrs. Dodge on August 10, 1919. Not long after the first American wearer of the royal pearls received the gift, Mr. Dodge attended a banquet at an automobile show in New York, where both he and his brother, John F. Dodge, were taken ill at the same time and finally died. His wife, who had worn the pearls only twice, could not bear to keep them, so she handed them on to her daughter, Delphine, who recently became Mrs. Cromwell—but with a warning as to the strange fate which has followed nearly everyone whom they have adorned.

o

Hit a staggering blow below the money belt, the only Shelby bank that survived the disastrous visit of Mr. Dempsey and his hard-boiled financial agent, has been forced to take the count.

AFTER-EATING DISTRESS

and all forms of stomach trouble, such as gas, pains, acid, sour, burning stomach are all relieved in two minutes by taking Jo-To. Jo-To is sold by all Druggists.

Here and There

Over a thousand million fish eggs of various species were collected by the hatcheries branch of the Department of Marine and Fisheries during 1921.

Inbound ships from the United Kingdom are averaging 4,500 tons of freight for discharge at Vancouver. Outbound they take about 4,000 tons per vessel. Last year the average outward tonnage was practically the same while the inbound was only about one tenth of what it now is.

Announcement has been made that a Government wireless station is to be erected on St. Paul's Island, which stands in the entrance to the Gulf of St. Lawrence, off the most north-easterly point of Nova Scotia. Two Government wireless engineers have arrived there and are making arrangements for the erection of the station.

One hundred and forty thousand Canadian school boys have been banded into an army of guards to watch for and prevent forest fires in the Dominion this year, according to an announcement made by the Canadian Forestry Association. The new organization, which is known as the Young Canadians' Forest League, will, it is expected, save several million dollars' worth of timber from fire ravages.

That "prospects for increased immigration into Canada are excellent" was one of the most important statements made by E. W. Beatty, K.C., upon his return from an extended tour of England and European capitals. The president of the Canadian Pacific Railway believes Canada is progressing in the matter of immigration, but intensified efforts are essential, he considers, to offset erroneous impressions abroad that Canada does not require new settlers.

A record run between Winnipeg and Quebec was recently made by a special Canadian Pacific train when passengers from the Orient were, through delay caused by landslide, in danger of missing their connection with the C.P.S.S. "Empress of Scotland" at the eastern port. The train covered the 1,579 miles in a little over 36 hours, whereas the schedule time for trains between these two cities is 53 hours. The passengers had crossed the Pacific on the C.P.S.S. "Empress of Russia" and were taking advantage of the 21 day Orient-to-Europe service of the Company.

The United States has invested in Canada $2,500,000,000, according to the Bankers' Trust Company of New York, which has just completed a survey of Canadian industry and the amount of United States capital invested. Of the total sum invested, $1,200,000,000 is in bonds, and the remainder in farms, mortgages, small businesses, industrial enterprises, banking and private loans. It is computed that more than 200 branch factories were opened in Canada by United States concerns in 1919, and a great number in 1920 and 1921, and that late in 1922 the number of these came to 700.

A collie dog is reported to have saved the life of a London West girl, while accompanying the child to a nearby store. On the way she stopped on the C. P. R. railroad tracks in the path of a westbound flier. Realizing the child's peril, the dog threw himself against her with sufficient impact to knock her clear of danger, and was cut to pieces by the train before he could regain safety.

The girl's mother tried to discourage the dog from going when the daughter started for the store, but he went, and was the means of saving the child's life, and died heroically as a result.

Ford

Enduring Values

THE trade-in price of a 1921 Ford is equal to the trade-in price of other 1921 cars which cost 30 to 50% more than the Ford when new.

This is proof of the Ford quality and the guarantee that the purchase of a Ford is an investment as distinquished from an expenditure.

The **STAR CAR**

THE creation of the Star Car is the most important and brilliant accomplishment of any individual identified with the automobile industry since its inception.

Smartness in looks, and thoroughness and modern design in a low priced car was unheard of until the Star was created by W. C. Durant, the pioneer builder of automobiles and identified with the introduction and success of the Cadillac, Buick, Oakland, Oldsmobile, Chevrolet and Durant Cars.

The Star Car marks the most advanced step since introduction of the automobile, for it provides for the first time a quality automobile, standardized in construction and operations for a modest sum of money.

The **STAR FEATURES**

$820.00 FERNIE

Continental Red Seal Motor.
Timken Rear Axle.
Timken Bearings, front and rear.

See Us For Sleeping Bags—
We carry in stock the celebrated Arctic Sleeping Bag in various sizes. These are highly recommendd by hunters and explorers the world over, very light in weight, frost and water proof. Inspect them if you are interested.

COAL CO. WIN TWO GAMES

To fill in the vacant date caused by the Lumberton team defaulting the final game of the league series, the Coal Company team played an exhibition game last Sunday afternoon against a team picked from Bellevue, Blairmore and Coleman teams, of the Crow's Nest Pass League, the local team winning easily by a score of 12 runs to 0.

Ault had the visitors guessing the entire game and but for one scratch hit, secured by catcher Clark in the sixth inning, would have turned in a no hit, no run game. On the other hand the Fernie batters revelled in the offerings of Mesher and Pruden, hammering out eighteen safeties for a total of thirty-two bases in the eight innings.

Hovan cracked the first ball pitched in the Fernie half of the first inning for a three bagger and scored the opening run when Bishop sacrificed. A couple of two baggers by Ruschall and Shand and a single by Wilson gave Fernie two more runs in the second. Hovan scored again in the third, leading off with a single and was batted home by Bishop and McTeer. With a call of two strike on him, Shand, first man up for Fernie in the fourth, landed on one of Mesher's fat curves and drove the ball far over the centre fielder, circling the bases easily before the ball was returned. Barger added another for Fernie in the fifth, then in the seventh Fernie batted all the way around, driving Mesher from the box, after a single and three doubles in a row had given Fernie three more runs. Pruden relieved him and struck out the first man up, then issued a pass, Ault connected for a two bagger and scored the fourth run. Pruden hit Barger with a pitched ball in the eighth and then McTeer drove the ball clear over the race track for a home run, scoring Barger ahead of him.

—

Playing a return game with the same team, only considerably strengthened, at Blairmore on Wednesday evening, the Coal Co. again demonstrated their superiority by romping home with the big end of a 6 to 2 score.

Owing to darkness the game only went six innings and was called after two men were out in the sixth. Both teams were playing air-tight ball, the Crow's Nest Pass All Stars making only one error while the Coal Co. came through with a clean sheet—maybe they ought to play all their games after dark.

Bishop was on the mound for the Coal Co., striking out 7 and allowing 5 hits, 3 of which went to Dewar and all of the two base variety. Pruden, hurling for the All Stars, struck out 5 while the Fernie batters garnered eleven hits off him. Both pitchers issued 3 passes to first.

Fernie secured one run in each of the first three innings, the All Stars cut this lead down, by scoring twice in their half of the third and in the sixth, Fernie made three more runs and as darkness was approaching, these proved enough to put the game on ice.

POPULAR STARS IN CONTRASTING ROLES

A splendid contrast is afforded by Wanda Hawley and Rodolph Valentino, leading woman and star of "The Young Rajah," a Paramount picture coming to the Orpheum Theatre next Wednesday and Thursday. Miss Hawley is a blonde of the Dresdon shepherdess variety; Valentino is, of course, dark and Latin in appearance. They make a very pleasing picture as lovers in this strange screen tale.

A moment of brilliancy, a mad tumult, a riot of color, of naked blade, of falling figures, of victors triumphant upon the throne they have usurped —that's your tiny revolution in the small Indian state.

A night of storm and fury in New England—and an old couple ready for bed; a knocking at the door; two dark men with a child standing dripping upon the threshold; jewels poured from a bag; stacks of bank-notes—a farewell and a small and miserable Hindu lad who strives to hide his tears at parting from the only friends he has known—that's the story of the adoption.

The gift of prevision—he sees his own death—his own meeting with the girl he learns to love; but he is rescued by faithful retainers in the nick of time. Then he sees in a vision the marriage of himself and his beloved in Hindu fashion—with all the wealth of gorgeous colors and ceremony.

The vision of the battle in the clouds in the years of ancient Hindu history, when Arjuna, commanded by Krishna, slays father and brother for the good of the race, is one of the most striking things ever portrayed on the screen; the same for the heavenly meeting between Arjuna and Vishnu. And by clever double exposures, Valentino plays both roles.

It is a picture that will repay a visit to the theatre if only to study the possibilities of the screen. But there is also good acting on the part of Valentino, of Wanda Hawley, Charles Ogle, Fanny Midgley, Pat Moore, Robert Ober, Edward Jobson, Joseph Swickward and others.

That Copper Brown Is Unhealthy

Health Talk No. 32
By G. J. Parks, D. C.

That healthy looking tan that follows exposure to the sun and wind is distinctly different from the copper brown complexion which is often noted in victims of liver and kidney trouble. As in every other diseased condition, the cause lies within, and chiropractic spinal adjustments to restore normal elimination is the most direct and effective way to reach the trouble.

The under activity of the liver and kidneys which brings the trouble to the fore is corrected when by chiropractic spinal adjustments these organs are freed to get 100 per cent. life impulses over spinal nerve lines. It is obvious when the cause of disease is known that there is no substitute, as nothing will correct the condition but the adjustment of spinal bones to correct alignment.

—

After Years of Suffering He Finds Relief

"For years I was troubled with pain in the back and liver trouble. My complexion was brown as copper. Nearly every day I had severe headaches. I had a number of treatments from various doctors without benefit. An operation cost me one kidney and my appendix, then I consulted a chiropractor and was gradually restored to health. I am writing this letter because I feel it is my duty to let others know my experience with chiropractic."—Anton Gajewski — Chiropractic Research Bureau Statement No. 1370S.

—

TRIP TO TRINITY GLACIER BY ALPINE CLUB ON SEPT 8

The Alpine Club will make a trip to the glacier on the north flank of Trinity Mountain on Saturday, September 8. The party will leave town early in the afternoon and proceed by car to the White Spruce Mill, whence they will proceed on foot past Hartley Lake and Camps 3 and 4 to the base of Trinity, where they will pitch camp for the night. The following day they will ascend to the glacier, returning to Fernie in the evening.

All wishing to join the party should give in their names to the American Consulate (Phone 124) by Thursday next.

MIDWAY TO PLAY IN WEST FERNIE ALL NEXT WEEK

The Great West Amusement Co., presenting their all-Canadian Shows, will be here for one week, commencing Labor Day, September 3, in West Fernie.

It's management boasts of a good, clean carnival, consisting of animals, rare birds, freaks, illusion shows and magicians.

They have two up-to-date rides, a Merry Go Round and Ferris Wheel; also fifteen bright concessions completing a snappy midway. They are open afternoon and evenings.

VETS' LABOR DAY SPORTS

Final arrangements for the above sports were made at a meeting held in the Vets' Rooms on Tuesday evening.

The competition for "Popular Girl" came to a close on Thursday evening. Chief Anderson and Mr. Fred Perry being in charge of the ballots. The result was as follows:

1st, Miss Ella Wilson, Fernie; 2nd, Miss Lena Stephenson, Michel; 3rd, Miss Gwendoline Larmont, Coal Creek 4th, Miss Violet Drew, Fernie; 5th Miss Jessie Richardson, Fernie. There was a sixth candidate who withdrew from the contest in the early stages and whose name is withheld. The winner will receive 25 per cent of the proceeds of sale of tickets. The prizes in connection with this contest will be drawn for at the Park during Monday.

A full program, of events andprizes, will be on sale from Saturday evening —price 10 cents. In connection with the program, a cash prize will be given to the boy or girl selling the most programs. Programs will be available from A. J. Carter, who will be at the Free Press office from 8 p.m. to 9 p.m.

Mrs Peasoup's pram race will be a feature of the parade.

All owners of autos and other conveyances are asked to take part in the parade. Make it the best ever.

Tags for admission to grounds will be on sale during the week-end. Gents 50 cents; Ladies 25 cents. Admission tags cover entrance fees to all events.

Don't forget the big dance in the evening in Victoria Hall. Dancing 10 p.m. to 2 a.m.. Admission $1.50 per couple, extra lady 50 cents. Refreshments provided. There will be a novelty event with special lighting effects take place during the dance, for which prizes will be given to the successful lady and gentleman.

Entries for the Bicycle Race must be in by 10 a.m., other events by 12 o'clock noon. Refreshments at reasonable prices on the grounds.

The following public spirited business firms and citizens have subscribed to the Prize Fund:

THE INSULIN TREATMENT

Frank Hicks, nine years old, of Vermillion, Alberta, was admitted to the Fernie Hospital the early part of the week, suffering from "diabetes mellitus."

The disease had developed and advanced within a period of two weeks so that the patient was in a state of diabetic coma.

The insulin treatment was at once administered by Doctors Garner and Asselstine, commenicng with minute doses and increasing quantities. This method was necessary as amounts to be administered can only be determined by testing the blood to ascertain the quantity of sugar it contains, but which in this instance was impossible as the patient was so low that he might be appropriately described as pulseless.

Within twelve hours after the first application of this wonderful discovery of Dr. Banting, insulin, an amazing improvement was noticeable in the patient's condition and before 24 hours had elapsed, it was possible to give him nourishment. Since then the recovery has been more gradual until the lad has now fully recovered consciousness and readily receives nourishment. Everything now appears favorable for full recovery and it is considered by local physicians as another marvelous victory for this gift to medical science for the benefit of humanity and conveniently available in standard hospital institutions where even aggravated cases can be treated successfully.

o

NELSON NEWS CUP PLAY-OFF

The play-off for the possession of the Nelson Daily News Cup, between the two leading teams of the East Kootenay Baseball League, has been arranged. This play-off is to be a home and home series with a game on neutral ground if necessary, the winner of two games to hold the cup for this season.

The Coal Co. team by winning both sections of the league race are being opposed by Wycliffe for this trophy owing to the fact that both Kimberley, virtually the runners up in the league race, and Lumberton clubs having disbanded for the season, leaving Fernie and Wycliffe the only two clubs intact for this post-season series of game.

Wycliffe are appearing considerably strengthened for these games and are leaving no stone unturned to wrest this trophy from the strong Coal Co. aggregation. They have secured Scotty Mitchell to do the pitching for them while they will be materially aided by several of Kimberley's star players. Mitchell is the only man in the league to secure a win over the Coal Co. on the local diamond this season, who while with the Cranbrook club won his game by a score of three to one.

o

Among the harvesters who arrived in the West the other day was a former general in the Russian army. Instead of giving the command to "stack arms" he may now be ordered to stack sheaves.

o

Saskatchewan ministers have been asked to devote their sermons on Sunday next to the subject of the wheat pool. The time and season is appropriate for separating the wheat from the chaff.

MINE SAFETY COMPETITIONS

The East Kootenay Mine Safety Association held its Annual Mine Rescue and First Aid Competitions at Michel on Saturday last, the date having been advanced from that previously arranged in order to meet the visit of the Hon. William Sloan, Minister of Mines, who desired to see the best team from the East Kootenay take part in the competitions being held at Ladysmith on Lador Day, Monday September 3.

Seven Mine Rescue and ten First Aid teams took part in the competitions, two of the former and three of the latter coming in from Alberta. Fernie was represented by three teams—two Mine Rescue teams, one of which took part in the Senior First Aid Competition, and by the Fernie Boy Scouts. The latter gave a very creditable display and are deserving of much praise for the interest they manifest in this branch of their training.

The peparation of the grounds was under the direction of Mr. T. Herney, Mine Safety Inspector at Michel, and the Michel Local of the E. K. M. S. A. Many favorable comments were passed with reference to the laying out and construction of the experimental mine used by the Mine Rescue teams.

The judges in the Mine Rescue Competitions were:

Mine Judges—Mr. J. Dickson, Secretary of the Board of Examiners for Coal Mine Officials, Province of B.C., Mr. J. MacDonald, Inspector of Mines for the East Kootenay District, and Mr. M. Johnson, Manager of the Chinook Colleries, Commerce, Alberta.

Bench Judges—Mr. H. Miard, of Fernie, member of the Board of Examiners for Coal Mine Officials; Mr. Duncan McDonald, District Inspector of Mines, Drumheller, Alta. and Mr. N. Howells, District Inspector of Mines, Lethbridge, Alta.

Smoke Chamber Judge — Mr. J. Worthington, Coal Creek.

Examiner at Mouth of Mine—Mr. M. D. McLean, Michel.

The judges in the First Aid Competitions were:

Doctors Corsan and Garner, Fernie; Doctors Weldon and Graham, Michel and Dr. Workman, Coal Creek.

Among the interested visitors and operators were: Mr. W. R. Wilson, President and General Manager of the Crow's Nest Pass Coal Co., Ltd; Mr. G. Wilkinson, Chief Inspector of Mines, B.C.; Mr. R. Strachan, Senior Inspector of Mines and Mr. James Crowder, Dnstrict Inspector of Mines at Blairmore(Alta.

These competitions are creating an ever widening interest in the humanitarian work they represent, and are producing constantly improving standards of training among competing teams. The association would, however, like to see a greater interest being taken in First Aid training and intend to carry out a program with this end in view.

The work of the association and the competitions are made possible by the interest and generosity of Mr. W. R. Wilson ,of the C. N. P. Coal Co. and the Hon. Wm. Sloan, Minister of Mines and it is also due to these gentlemen that the East Kootenay is being represented in the Vancouver Island Competitions by the winning team from this district.

The results of the competitions were:

Mine Rescue—1st. Coal Creek, Capt. J. Caufield; 2nd. Michel No. 2, Capt. M. Littler; 3rd. Fernie No. 1, Capt. E. Hesketh; 4th. Michel No. 1, Capt. A. Howden; 5th. Fernie No. 2, Capt. W. Hynds; 6th. Bellevue, Capt. J. J. McIntyre; 7th. Lethbridge, Capt. W. S. Crawford.

Senior First Aid — 1st. Fernie, Capt. J. Hamer; 2nd. Michel No. 1, Capt. W. Fowler; 3rd. Bellevue, Capt. J. Milnes and Lethbridge, Capt. W. W. Short tie; 5th. Michel No. 2, Capt. D. Izatt; 6th. Coal Creek, Capt. J. Eccleston.

Ladies' First Aid—1st. Coal Creek, Capt. Mrs. Miller; 2nd. Michel, Capt. Mrs. Mossby.

Junior First Aid—1st. Fernie Boy Scouts, Capt. J. Larmont; 2nd. Hillcrest, Capt C. Smith.

The results of the competitions were announced in the Michel Hall at 7:30 p.m. and Mr. W. R. Wilson presented the prizes to the winning teams.

The Coal Creek Mine Rescue team, in addition to receiving a club bag each as First Prize, was presented with the "King Trophy," a handsome trophy donated by the Hon. Dr. J. H. King, Minister of Public Works in the Federal House, for efficiency in Mine Rescue Training. This team has now gone to Ladysmith to take part in the Vancouver Island Mine Safety Assaciation's Competitions, and it is expected that they will be able to give a good account of themselves while there.

The Fernie First Aid team, in addition to the First Prize, was presented with the British Columbia Mine Department Cup for Efficiency in First Aid.

o

Hon. T. D. Pattullo, Minister of Lands, is thanking the general public for it's co-operation in keeping down the loss from forest fires this season. Only two-fifths as many fires have been reported this year as there were last year up to the same date and whereas the cost of fighting fires in 1922 was $343,000 up to August 17, the cost this year was cut to $20,000. The minister points out, however, that this is the most dangerous season of the year and the same care, or even greater vigilance must be exercised for another month if the splendid 1923 record is to be maintained.

o

MEETING OF DEPOSITORS

A meeting of the depositors of the Home Bank of Canada, called by Mayor G. G. Henderson, was held in the Grand Theatre last evening at which there were nearly three hundred present.

Mayor Henderson opened the meeting and was appointed chairman. He said he regretted very much the failure of the Home Bank in which the people of this town had evey confidence and thought that strong resolutions should be put up to the Dominion Government, calling upon them to give more protection to the depositors. He had drafted several resolutions which he proposed to submit to the meeting. He was not sure that anything could be done in the matter but it would make the Government realize that the people were becoming more and more disgusted with the small protection provided by the Canadian Banking Act for the innocent depositors.

The first resolution submitted was one passed at a recent meeting in Toronto which requested the courts to deny liquidation of the bank until the Curator had made a full report upon the assets and liabilities of the concern.

The second called upon the Dominion Government to appoint an independent representative to act with the Curator in his investigations of the Home Bank.

The third called upon the public to withdraw their deposits from all the chartered banks of Canada if the depositors of the Home Bank did not receive one hundred cents on the dollar.

The fourth demanded that the Government take over all the Canadian banks and operate them.

The resolutions were discussed at considerable length, and were "nuts" for the old-time socialists like Dick Phillips, Robert Draper and Tom Uphill, who did most of the talking.

A committee consisting of Mayor Henderson, Robt. Draper, Tom Uphill, G. G. Moffatt, D. F. Markland, Wm. Hunter and A. Klauer was appointed to consider the resolutions which were passed by the meeting and send them to the Premier, the Minister of Finance, the Bankers' Association and the Curator.

The meeting was orderly throughout and adjourned to meet at the call of the chairman.

Following are the resolutions:

"Resolved that this representative meeting of the depositors of the Home Bank of Canada, Fernie, Branch, assembled this 30th day of August, 1923, is unanimously opposed to any winding-up proceedings being taken through the Courts of Canada until the curator has made his report.

"Resolved that the depositors of the Home Bank of Canada, Fernie Branch, in regular meeting assembled this 30th day of August, 1923, demand the immediate appointment of a man thoroughly qualified ,and independent of the Canadian Bankers' Association, to investigate the affairs of the said Home Bank of Canada in collaboration with the Curator.

"Resolved if the depositors do not get one hundred cents on the dollar straight through, we recommend that the different organizations and individuals be advised to withdraw savings from all the chartered banks in Canada.

"Resolved this meeting go on record favoring that a resolution be drafted and sent to the Minister of Finance recommending the institution of Government Banks."

OUTCOME OF BANK HOPEFUL

Toronto World

Although the announcement of the suspension of the Home Bank of Canada has come as a severe blow to the thousands of depositors in Toronto as elsewhere, strong hope is felt that when the assets are realized upon to the fullest extent, though probably at the cost of a levy in part at least upon shareholders under the double liability provision, persons whose money has been deposited with the bank will be indemnified largely against loss.

So far as the depositors are concerned they are likely to obtain a percentage of their money within ninety days, the period for which operations of the Home Bank have been suspended, while other payments will be forthcoming as the process of liquidation progresses.

The savings deposits total $17,387,-032, and the assets are placed at $27,-918,095, of which about $11,000,000 or about 64 cents on the dollar are believed to be certain of realization. In addition to this are real estate, mortgages and bank premises exceeding $600,000. Then there is the large sum of $15,757,320 under the heading of "Other curent loans and discounts in Canada," and in this it is expected that the large loss sustained will be found.

It appears inevitable that the shareholders will not only lose the value of the stock, but will be called upon for at least a portion of their double liability, a phase of the Canadian banking system which has always been regarded as tending so largely to the security of the depositors. Much, it is said, now depends upon whether the assets and holding of the bank are thrown on the market, or whether they can be conserved and sold at a more opportune time.

It was stated to The Sunday World on Saturday by a gentleman of wide banking experience ,in close touch with the affairs of the Home Bank of Canada ,that the outlook for the depositors getting 100 per cent. of their deposits depended to a very great extent on the amount of withdrawals that had been made during the past six weeks.

The general financial condition of the bank's affairs had not altered very considerably, he said, since the last financial statement was issued on June 30 last with the exception of the withdrawals that had been made since that time. Recently, however, quite a number of withdrawals, some of considerable proportions, had been made. Just to what extent these withdrawals had depleted the bank's funds was not yet known. In fact not until the reports from various branches throughout the Dominion had been accumulated and checked over could anyone be in a position to figure with any degree of accuracy as to the proportion of their deposits which the depositors might hope to receive. The checking over of the branch bank statement would, of course, entail a considerable length of time.

While the depositors were protected to a certain extent by the double liability of the shareholders, the actual value of this protection and the enforcement of it presented a problem. In fact it depended to a large extent upon the condition of estates of the shareholders, subject to the double liability clause. A court judgment was valuable only in proportion to the ability of the person against whom it was issued being able to meet it. In the same manner the ability of the shareholders to meet the double liability was a question upon which its value as a protection to the depositors hinged. To what extent the estates of the shareholders were involved and in what condition they were in to meet such an obligation had yet to be ascertained.

The holders of bonds on the bank's real estate were in an entirely different position to the depositors. The real estate itself should be ample security as far as they were concerned.

o

Burke's Invention

The office of Whip, which Commander Eyres-Monsell is taking over from Colonel Leslie Wilson, derived it name from Edmund Burke. In 1769 there was a big debate in the House on the petitoin against the return of Colonel Luttrell to Westminster in place of Alderman Wilkes, and the Government had used every endeavor to bring their followers together from all quarters to take part in the division. Burke scornfully referred to these efforts, and described how ministers had sent their friends to the North and to Paris, "whipping them in," than which, said he, there could be no more appropriate phrase. The hunting field phrase caught the public fancy, and became a recognized Parliamentary term.—From the Westminster Gazette.

o

Eastern weather prophets are predicting an early winter. The melancholy days are coming when the empty coal bin must be replenished.

THREATENED COAL STRIKE IN THE UNITED STATES

It is not too much to say that the eyes of the continent are watching the outcome of the anthracite controversy in the United States. The outcome is not one of interest merely to operators and miners but to the general public, for in a great coal strike such as would happen if negotiations were broken off and no settlement arrived at, the third party, the public, left unconsidered in the strife between the employers and employed, are the innocent sufferers. It thus becomes a large question why those who have no part in an economic fight should be allowed to be the sufferers. This at present is one of those unsolvel problems which while it remains as it is must constitute an injury and injustice to the very large majority.

It is possible that a settlement of the controversy between the operators and the men in the United States may take place at any time. But the forecasts are distinctly pessimistic. Whether Governor Pinshot will be the man of the hour in saving what is bound to be impending disaster economically to the States, at least temporarily, or whether President Coolidge, with his reputation of being the settler of the police strike in Boston, will prove to be the "god out of the machine," are matters of considerable interest not only in but outside the States. To Canada, in the dependence in the eastern part of the Dominion on fuel from the States, there is more than a detached interest in developments that may take place across the border in what seems at present to be an impending coal strike of gigantic nature.

So far as regards the attitude of the operators and the miners in the controversy in the anthracite coal field in the States, it is one of neither giving way. A despatch from Atlantic City, N.J., has stated that both sides had made it clear that nothing was likely to come by their initiations which would allow the mines to operate after September 1st. On that date the present contract fixing the wages and conditions of employment for all the unionized mine workers in the anthracite region expires. Repeated attempts to get an agreement as to the terms of a contract to continue the employment relations after that date have failed, even with the Coal Commission intervening.—Lethbridge Herald.

GOVERNMENT EXPENDITURES

The gathering interest in political affairs of the province is illustrated again by the nature of the audience at Duncan which listened to speeches on Tuesday night from Mr. W. Bowser, Dr. S. F. Tolmie and Mrs. C. H. Dickie. Not only was the audience large, but it was keenly enthusiastic and displayed attention which indicates the new political awakening that is sweeping through British Columbia. Mr. Bowser, in his address, was on the strongest of all possible grounds in attacking the present-day expenditure of administration. It is upon that count that the Government is most vulnerable. It is especially so on the basis of the growth of outlay in Civil Service expenditure, and the heavy sums being utilized on the travelling expenses of department officials and members of the Government. Mr. Bowser says, and we assume his figures are correct, that the monthly travelling expenses of Government officials have reached a total of $30,000. In view of conditions, this outlay is by far too heavy, and an inquiry into the whole subject of expenditure in this direction should be made by the Public Accounts Committee of the Legislature, or else by some special committe of that body.

The strong appeal made by Dr. S. F. Tolmie at the Duncan meeting that united support should be given to Mr. Bowser in his task as Provincial leader of the Conservatives is timely and generous. The opponents of Mr. Bowser have been endeavoring to insinuate that Dr. Tolmie is aiming at the Provincial leadership. They have ignored his repeated denials of any such intention. His latest appeal on behalf of the present leader should put a quietus to the propaganda attempting to show that there is any dissension in the ranks of the Conservatives of British Columbia. The fact is that they stand more closely united and more determined than ever in the past, and there are the brightest indications that the province is ready at the first opportunity to revert to its old political faith and to a type of government under the aegis of which it enjoyed its greatest years of prosperity. Such meetings as that held at Duncan constitute a happy augury for Provincial Conservatism. They are indicative of its growing force in British Columbia.—Victoria Colonist.

PRICE OF GASOLINE

The Manitoba Free Press has taken up the question of the price of gasoline in that Province, pointing to what is happening in the way of reductions in price in many parts of the United States

There is undoubtedly reason for higher charges for the commodity in Canada than in the United States. There is the import duty, there are freight rates, and then the gallon measure used in the United States is smaller than the imperial gallon on this side of the line. The Free Press points out, however, that gasoline in tank cars has recently been laid down in Winnipeg at a cost of 20 cents per gallon, which covered duty, freight and everything. The gasoline is retailed at 34 cents, which includes a Provincial tax of one cent. Excluding the tax there is a difference of 13 cents a gallon in covering the handling of the gasoline between the railway freight yards and the filling stations, together with dealers' profits. "In other words," says the Free Press, "the consumer pays 65 per cent. more for the gasoline than it cost to bring it in to the city."

The question of the price of gasoline in British Columbia is one in which our people are showing an awakening interest in view of the proposal which came before the Union of B. C. Municipalities that a Provincial tax should be imposed. That tax will prove exceedingly unpopular unless the price of gasoline is reduced, as it doubtless can be reduced if what is happening in the United States is any criterion.—Colonist.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abollshed but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head.

For settlers, campers or travellers, up

for September

HISTORY OF HOME BANK

Toronto Saturday Night

The Home Bank of Canada had its origin in the Toronto Savings Bank established in 1854. In the early fifties there was a heavy emigration from Ireland, and the habit developed among the newcomers of entrusting their savings, and the conduct of their financial affairs, to Bishop Charbonelle, the Roman Catholic head of the diocese. As the care of these funds became a burden to the Bishop, he conceived the idea of establishing a bank, and entursting its organization to a Mr. Macdonell, who became the first President. The first General Manager was Mr. Feehan. The first office was located on Colborne Street and later, probably about 1856, was moved to the building at 78 Church Street which is still the Church Street branch of the Home Bank of Canada.

When the first General Bank Act came into effect in 1872, all banking institutions organized under trustees, as was the Toronto Savings Bank, were required either to amalgamate with some of the institutions then operating as chartered banks or to take out new charters in conformity with the first General Bank Act. The Toronto Savings Bank, therefore, reorganized as a savings and loan company under the title of the Home Savings and Loan. The first President was the late James Austin, and the Vice-President the late Senator Frank Smith. Mr. Eugene O'Keefe was also on the board, as well as the late Mr. John Foy.

The Home Savings and Loan did a prosperous and growing business throughout its career, and in 1903 application was made for incoporation under the title of the Home Bank of Canada. The late Hon. Senator James Mason, who had entered the services of the Toronto Savings Banks as a junior clerk, was General Manager of the Home Savings and Loan company from the time of its organization. He became General Manager of the Home Bank of Canada, and the Directors of the Home Savings and Loan became Directors of the Home Bank of Canada.

The stock of the original shareholders of the Home Savings and Loan was converted into Home Bank stock on the basis of two shares of bank stock for one of Loan Company stock. A final dividend of 30 per cent. was distributed also to the original shareholders.

The first general meeting of the shareholders of the Home Bank of Canada was held in Toronto June 10, 1904. Messrs. Eugene O'Keefe, Thomas Flynn, Edward Stoob, T. R. Wood, E. G. Gooderham, M. J. Haney and Lieut.-Col. James Mason were elected directors. Mr. O'Keefe was chosen President and Col. Mason, General Manager. The bank started business with $3,500,000 worth of deposits from the Home Saving and Loan Company, which it has superseded, and with half a million of its capital stock subscribed.

—

The Board of Directors of the Home Bank is composed of the following: President, H. J. Daly; Vice-President, R. P. Gough; Directors—C. A. Barnard, K.C.; P. A. Mitchell; F. J. B. Russill; Lieut.-Col. Clarence F. Smith; J. F. M. Stewart; S. Casey Wood, K.C.

The Bank's branches are as follows: Toronto (14 offices, including head office, 4 King Street W.); Allison, Angus, Arnprior, Belle River, Cannington, Coboconk, Cresswell, Deleware, Eganville, Galetta, Hamilton, Horning's Mills, Ilderton, Iona Station, Kamoka, Lorne Station, Lindsay, London, London East, London Market Branch, Manilla, Melbourne, Middlemiss, Ottawa, St. Thomas, Sandwich, Shelbourne, Tecumseh, Thorndale, Walkers, Walkerville, Windsor, all in Ontario; Montreal, Hochelaga, Mount Royal, Verdun, in Quebec; Amulet, Batrum, Khedive, Moose Jaw, Shackleton, Sintaluta, Tantallon, Welwyn, Weyburn, all in Saskatchewan; Crystal City, Franklin, Goodlands, Grandview, Lyleton,, Marquette, Rosser, St. James, Winnipeg, all in Manitoba; Blairmore, Calgary, both in Alberta and Vancouver and Fernie in British Columbia.

In its last statement to the Finance Department, that of June 30, 1923, the Home Bank reported its current loans in Canada at $15,677,286, and its call loans in Canada at $802,913. There were no call loans outside of Canada, and the current loans outside of Canada mounted to $22,748. Savings bank deposits totalled $12,087,454, and in circulation were $1,805,250, and its demand deposits $7,208,281. Its notes reserve fund $550,000. The aggregate amount of loans to directors and the firms in which they are partners was reported as $225,812.

Total assets were given as $27,434,-709, and the total liabilities at $24,-889,049.

H. J. Dally, President, is owner of 2114 shares in his own name, and 494 shares are held in trust for himself and J. Mason. The value of his stock is said to be $211,400 and $49,-400.

Twenty thousand shares of Home Bank stock have been sold, the majority being held in the West and in the vicinity of Toronto.

Shareholders with two hundred or more shares of Home Bank stock are: Bertha Charlebois, Montreal, 25 shares 25,000; H. J. Daly, President Home Bank, 2114 shares; Estate of Senator Rodolphe Forget, Montreal, 500 shares; Geo. Keogh and E. L. Middleton, in trust for H. J. Daly and J. Mason, Toronto, 495 shares; Percival A. Mitchell A. Mitchell, London, Eng., 1485 shares; A. J. Pattison, Jr., Toronto, 974 shares.

Other well-known Toronto shareholders are: S. H. Bradford, K. C.; Thos. Flynn; Edmund Harley; Father Minehan; Monsignor J. L. Hand; Mr. Justice Kelly; A. Claude Macdonell; J. B. O'Higgins; T. P. Phelan; T. J. Medland; S. Casey Wood, K. C.; Henry Swan; Frank J. B. Russill; F. H. Gooch; R. P. Gough, Vice-President of Home Bank; ex-Ald. John Dunn; Jesse W. Dunn; Daniel Fitzgerald; L. H. Baldwin; George Duthie; William Crocker; James McCarron; Dr. R. B. Nevitt; W. T. J. Lee and L. J. West. Moneys of 35 estates had been invested in Home Bank stock. The University of Toronto and the Catholic Church Extension Society also held shares.

The returns which have been made to the Finance Department by the Home Bank up to the present have been under the Bank Act as it existed before the recent revision. The sections of the new act which affect returns to the Government do not come into force until October 1.

o

Women's Ceremony

Men are the chief mongers of platitudes. That is because they have only tongues wherewith to converse. Women have a much vaster armory. They have their eyes and their eyebrows as well as their mouths. And in their range of platitude they have a greater scope for latitude. Who shall say which is the more devastating?—Daily Mirror.

o

Filling stations have been established on the campus of the University of Chicago, where students can have their fountain pens refilled. By simply dropping a penny in the slot students are provided with enough ink to write home for money for months.

Cleopatra's Beauty Secret

Cleopatra knew that to have a fresh fine skin, thorough cleansing was necessary. She knew that the gentlest means must be employed. She used Palm and Olive oils.

The crude combination of these oils which was the best even royalty could command, is today brought to perfection in Palmolive.

Every girl can have the radiant healthy skin which is the foundation of all beauty. Intelligent care is the secret — thorough cleansing the basis.

Unless thoroughly cleansed with soap and water, the skin becomes sluggish and inactive. The tiny pores clog with dirt, oil secretions, perspiration, rouge and powder, and blackheads and other blemishes result.

A pure mild soap causes no irritation.

Women who fear it have been using the wrong soap.

Palmolive, with its creamy mild lather is lotion-like in its action. It soothes while it cleanses; it freshens, revives and stimulates and leaves the skin delightfully fresh and rosy.

You can buy Palmolive Soap at all first-class dealers.

Made in Canada

Palm and olive oils —nothing else—give nature's green color to Palmolive Soap

BIG O.B.U. RAILWAY STRIKE DISCOUNTED BY OFFICIALS

WINNIPEG, Aug. 25.—Possibilities of a general strike on the western railways during the height of the grain rush threatened by the One Big Union were discounted by railway and International labor officials today.

Characterizing it as more or less propaganda on the part of the O. B. U., Charles Murphy, general manager of the Canadian Pacific western lines, said he did not believe the threatened tie-up would materialize or ever would prove serious. "While we have no agreement with the One Big Union,' 'he said, "and do not therefore know the actual strength of the organization, reports that it is on the wane are probably correct. This action was only part of the work of agitators to keep the men in a turmoil."

"It is a huge joke," declared Harry Kempster, district secretary of the International Railway Machinists, one of the largest railway bodies which would be affected by such a strike. He claimed it was an utter impossibility for the O. B. U. to call such a strike. "They have only a small handful of railway workers actually members outside of Winnipeg in western Canada, and very few more inside the Winnipeg and Transcona shops."

On the other hand, said Mr. Kempster, the railway machinists now are practically 100 per cent. organized in the International, in all the western centres outside of the city, and will be the same very shortly in Winnipeg shops. Numbers of former O. B. U. men have joined the machinists' local during the last few meetings.

Numbers of noon meetings have been held outside the railway shops at Fort Rouge, Weston and Transcona during the past several days by the One Big Union during which addresses have been given by R. B. Russell, Tom Cassidy and Thomas Mace, urging the men to action in the threatened strike.

DEPOSITORS ASK FOR WINDING UP

TORONTO, Aug. 23.—Two actions of importance to Home Bank depositors were taken today—one an application of a creditor to have the Home Bank wound up; the second a meeting of depositors of the bank to devise plans of protecting the depositor creditors.

In refusing to act today in the direction of declaring the Home Bank liable to be wound up under the Winding-Up Act, Mr. Justice Fisher, at Osgoode Hall, adjourned for two weeks the application of a Toronto creditor, Arthur Hawke, for such an order.

Several similar applications are pending, and the decision of the Judge will mean that they will all come before him two weeks hence, when the curator, A. Barker, will be present.

R. A. Reid, acting for a number of Toronto shareholders and depositors, opposed any action under the Winding-up Act, and sought to convince the judge that the Bank Act should govern. Under it, there could be no insolvency proved until after ninety days' suspension of payments.

Alfred Bicknell has another petition for a winding-up order to put in. It is from James B. Lasker, a depositor, who has $100 in the bank.

C. M. Gregory, Toronto depositor to the amount of $4600, is also applying for an application under the Winding- up Act.

—

TORONTO, Aug 23.—"The time is arriving in Canada when people are losing confidence in many institutions. The 'whisper of death' has come out of Montreal and the people are thinking," declared Dr. R. J. Williams, in the midst of a heated discussion at the meeting of Home Bank depositors which was held this afternoon in Toronto.

The remark was made in support of a motion which was being debated in connection with the appointment of a depositors' representative to work with the curator. The resolution, which was moved by the doctor himself, and which ultimately carried, ran as follows:

"That the depositors of the Home Bank demand the immediate appointment of a man thoroughly qualified, and independent of the Canadian Bankers' Association, to investigate the affairs of the bank in collaboration with the curator."

Solicitor J. F. Edward, who said he represented large depositors, opposed this resolution. He said he felt that the very obvious prejudice against bankers, while perhaps understandable, was not reasonable. He pointed out that it was greatly in the interests of all banks and bankers that the entire matter should be cleared up in the most satisfactory manner.

Replying, Dr. Williams declared that all concerned were eminently respectable people, "not communists, nor the scum of the earth."

A resolution was also passed opposing any winding-up proceedings being taken until Curator Barker has made his report.

Wm. Bird, of Blairmore, was in town on Wednesday.

Thomas Letcher brought in a fine truck load of fruit from the Roosville Valley on Tuesday of this week.

Misses Maysie and Agatha Berigan, of Ottawa, are on a visit to their uncle, M. A. Berigan, of Fernie.

The baseball boys who visited Lethbridge on Wednesday say that the lid in on tight in that town. It seem to be bone dry.

Fernie Beauty Parlour, for care of you hair, face and nails. Combings made up. 70 Dalton Avenue, Phone 313. j27|6.

The Sisters of the Holy Trinity Convent returned home on Thursday for the opening of school on Tuseday September 4.

The policing of Lethbridge has been taken over by the Province of Alberta. The local grafters were getting too strong for local police.

A big bush fire is raging at Camp 4 of the White Spruce Lumber Co. Everything possible is being done to get the blaze under control.

Principal P. H. Sheffield will be at the Public School tomorrow (Saturday) afternoon from 1 to 5 to enroll all new pupils and any scholars that have come to town recently.

D. H. Proudfoot, of Nelson, Grand Master of the I. O. O. F. of British Columbia, will pay an official visit to Mount Fernie Lodge on Wednesday, September 5. All Rebekahs are invited to be present at 9:30 p.m.

A. McLean is operating a sawmill at Flagstone and has opened up a lumber yard in Fernie across the avenue, from the Baptist Church. He is prepared to sell at a reasonable price.

Jack Gates, Tom Prentice and Guy Johnson made a 45 lb catch of trout in Sand Creek one afternoon this week. In his efforts to land a big one, Tom Prentice fell in the Creek and had a narrow escape from drowning.

o

"WANDERING DAUGHTERS" AT ORPHEUM NEXT WEEK

The screen success of Marjorie Daw, one of the principals in James Young's First National production of "Wandering Daughters" to be seen at the Orpheum Theatre next Wednesday and Thursday, can truly be said to be the result of keen intelligence and sheer histrionic ability for she does not possess any "cute tricks," according to casting directors and producers.

Marjorie Daw is very much a serious minded girl whose poignant tenderness bespeaks hidden depths and her simplicity and unaffectedness make her one of the most popular of our younger screen set. Though she could not be imagined as an elaborately dressed and frilled society bud or the girl who would ruin her young screen lover's career or drive him to the depths of despair by her extravagance, Marjorie possesses, as James Young expresses it, that sweet bashfulness and confidence that would endear her to the most critical audience.

Attracting the attention and admiration of Geraldine Farrar, Marjorie Daw obtained small parts in "Joan the Woman" and a number of other screen productions at the Lasky studios while the opera star was appearing in productions there and later, so marked was her talent even in unimportant roles that various producers vied for her services. She played with Violet Heming in "Everywoman" and with Richard Barthelmess in "Experience." Also she played opposite Wesley Barry in "Dinty." In Marshall Neilan's "Don't Ever Marry," "The River's End," with Mary Pickford in "Rebecca of Sunnybrook Farm," and with Douglas Fairbanks in "Knickerbocker Buckaroo," "Arizona," "He Comes Up Smiling" and "His Majesty the American."

Miss Daw was born in Colorado Springs in 1902.

IMPOSSIBLE TO GET RELIEF

Until She Started To Take "Fruit-a-tives"

The Medicine Made From Fruit

R.R. No. 1, Everett, Ont.

"I had been troubled for years with Dyspepsia, Liver and Kidney Trouble, and could not get relief until I started taking "Fruit-a-tives". Thanks to their beneficial action, I am in normal health again".

Mrs. THOMAS EVANS

"Fruit-a-tives" alone can give such happy and successful results because "Fruit-a-tives" is the famous medicine made from fruit juices and tonics.

"Fruit-a-tives" is pleasant to take and will always restore the health when taken regularly as directed.

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

COMMUNICATION

Dear Editor—

I notice in the Free Press of 25th inst where Mr. Suddaby had caught a trout three and a half pounds and you stated that this was the largest that there was any record of having been caught on the fly in this district.

This is not correct, you have made a mistake here, Mr. Editor. I am perfectly sure Mr. Suddaby did not tell you this as he knows better and you not being a fisherman, don't know a great deal about it. The above fish was a Bull Trout and I may say for your information that there has been Cut-throat Trout caught in this district over three and a half pounds, on the fly, which is quite a different thing from accidentally picking up a medium-sized Bull Trout.

—Local Fisherman.

NEED MORE CAMP SITES ALONG CROW'S NEST ROUTE

CRESTON, B. C., Aug. 27.—More auto tourist camping sites along the Crow's Nest route are strongly urged by J. H. Kirkham of Lethbridge, who with his wife and family were visitors here a few days last week, after coming in by way of the Banff-Windermere route. With the completion next month of the transprovincial road link at Kitchener the road through B. C. will equal anything in the west, according to Mr. Kirkham, and with the added and enjoyable feature provided by the passenger boat transport from Kuskanook to Nelson all the auto traffic through to Spokane should come via Creston, and no time should be lost in getting to work on camp sites to accomodate the sure to be increased traffic.

o

MUSICAL SHOW RETURNS TO FERNIE SATURDAY

When Fred Carmelo's Musical Comedy company played its last performance at the Grand Theatre five weeks ago, Mr. Carmelo announced that the company would return after completing a short summer run in Edmonton.

The Carmelo Show will be at the Grand Theatre again, starting Saturday, September 1, with practically the same clever company as before. Some changes have been made however. Miss Jeanne Dixon is again with the show. She was absent from the cast during the last two weeks of the company's former engagement at Fernie. In addition the company includes Roy and Ruth Earl, two clever performers popular in vaudeville and musical comedy. Favorites who were with the show previously and will now be welcomed back are: Babeline Reader, Evelyn Bruno, Gladys Pritchard, Cecil Wallace, Margaret Allen, Harry Reader and Lillian Clifford.

The company will play a new musical comedy entitled "Up In The Air" at its feature offering of a two-hour program on Saturday. Two complete shows will be given, one at seven and the other at nine thirty.

The company will also remain over to play Labor Day, presenting a complete change of program, the feature for Monday being a hilarious musical farce entitled "Orange Blossoms."

LOCAL & GENERAL

John Podbielancik visited the Sunburst oil fields this week.

Rev. Wm. Burns is in Nelson this week on church business.

Mrs. Harris and children, who have been the guests of Mr. and Mrs. A. I. Fisher, left for Vancouver on Monday.

Mrs. T. Prentice and family returned from a month's holidays at the Coast.

Wm. Eschwig and Mrs. Lake have taken over a hotel business at Brant, Alberta.

Mrs. Hugh Grant and daughter, Miss Loraine, who have been the guests of Mrs. A. C. Liphardt, left on Wednesday for Prince Rupert.

Mrs. E. L. Wrigglesworth, of Vancouver, who has been visiting friends in town for the past couple of weeks, left for home on Wednesday.

Miss Annie Podbielancik, Miss Rose Frey and Miss Agnes Culleton left this week for the Coast to attend Normal School.

M. A. Kastner was the recipent this week of a beautiful solid gold watch from the Sun Life Assurance Company as a testimonial to his hustling ability for that company.

Mrs. Marchbank's Kindergarten School will open at the BAPTIST MANSE on Wednesday, September 5, at 9 a.m. Phone 10 or call 73 Pellatt Ave. a31|3

There will not be a service held in Olivet Baptist Church Sunday morning, but Sunday School at 2:30 and Evening Service at 7:30 will take place as usual.

Don't forget the All Sports' Gym, regular Saturday night dance tomorrow night. Dancing from 9 to 12. Admission: Gents, 25c; 10c a dance. These dances are becoming quite popular.

The big hush fire up Cedar Valley is pretty well out. It was a hard fight on Saturday and Sunday for nearly one hundred men and looked as though nothing could prevent the blaze reaching the big timber. The Government Fire Wardens deserve great credit for the magnificent fight they put up.

A. C. Bowness and family, of Cranbrook, passed through Fernie today on their way home from Banff. Arthur says to look out for the Cranbrook curlers next winter, as Alan Graham brought home five pairs of new rocks from Scotland and they are guaranteed to get the money.

The cup presented by Mrs. A. B. Trites to the Ladies' Golf Club, will be played for on Wednesday afternoon next, Sept. 5, at 2:30. Match play. All those not entering please advise Mrs. S. Herchmer or otherwise their names will be drawn.

Don't forget the opening game for the possession of the Nelson Daily News cup on Sunday between Wycliffe, strengthened by players from all the clubs in the western end of the league, with Scotty Mitchell doing the hurling from them, and the Coal Co. team, fresh from their victories over Lethbridge. On Monday the meet Troy, Montant, in connecition with the Labor Day Sports. Fans sure have a couple of treats in store for them in baseball cirles.

Public and High School work will resume on Tuesday. The following teachers have resigned during the holidays: L. D. Shaw, Ada Baxter, Dorothy Auld, Geo. H. Stocks, Wm. Jones, Helen Reid, Eliean Rolston and M. McMurray. Their places will be taken by: W. R. Pepper, Dorothy Nelson, Helen De Cew, Geo. Foster, Grace Logie, Jos. Chill, Bessie Gibson and Marjorie McGregory. Principal Sheffield will retain the Principalship of the Public School until a man can be secured to take his place.

The duck season on the prairie does not open this year until September 15. The shooting dates this year in Alberta for other wild fowl show that prairie chicken will be lawful game on October 15 for the balance of that month, while Hungarian partridges will be your menu for one month from October 1. The writer had understood last winter while the game laws were undergoing their annual revision that the legislators made Hungarian partridge and prairie chicken dates the same—the whole month of October—but according to the printed notices, the dates for each are the same as last year.

WHITE STAR YEAST CAKES

Are Not The
"Just as Good Kind"

THEY ARE THE BEST

The boy scouts will return from camp at McBain's Lake on Saturday.

Mrs. Walter Harwood's piano class will be resumed on Sept. 6. a17|2

Mr. and Mrs. Leslie Mills and children returned this week from a month's visit at Portland, Oregon.

Dr. and Mrs. Parker, who were visiting friends in the city, left on Tuesday for their home in Guelph.

Bellevue is going to build a covered rink for the coming season. They expect to organize a curling club.

The C. N. P. Coal Company have a crew of men making improvements on St. Margaret's Cemetery.

Tony Sevello was fined $50 by Magistrate Henderson for having liquor on his premises.

City Clerk A. J. Moffatt left on Monday for the Coast. He will be gone about ten days.

"The Canadian Banking Act" was the subject of a short talk given by Sherwood Herchmer at the Rotary Luncheon yesterday.

The City sidewalk gang have been busy this week laying cement walks in front of the City Hall Block and in front of the Orpheum Block.

Mrs. Wm. Burland, who has been spending the summer with her mother, Mrs. J. D. Quail, left this morning for her home in Vancouver.

All members of Esther Rebekah Lodge are invited to a social evening to be given by the Oddfellows in the I. O. O. F. Hall on Wednesday, September 5, in honor of Grand Master Proudfoot.

The Women of Mooseheart Legion will hold their annual sale of work and home cooking in Victoria Hall, on Thursday, September 20. There will be a fish pond and other attractions for the children. Dance in the evening. a17|5

Walter Foster and Alex Bell were each fined $25 and costs for refusing to respond to the call of fire wardens on Sunday last when the Cedar Valley limits were in danger. Fire Warden Schupe says he will prosecute others just as soon as he gets time to lay the information.

The Knights of Pythias football team will play Coal Creek on Sunday evening. Kick-off at 6:15. The following players are requested to be on hand at the 150 All Sports Gym: J. Robson; J. Gibson, J. Hamer, Jr., H. Cartmell, G. and T. Kennedy, G. Barrett, B. Smith, A., J. and T. Fleming, A. Williams, F. Beal, A. Atkinson. The team will be chosen from above.

Dr. Garner at the Rotary Luncheon yesterday, gave a most interesting talk on Dr. Banting's recent discovery of the cure for diabetes. He said that "Insulin" was used for the first time in Fernie this week at the local hospital. The patient was a lad who was practically dying from the dreaded disease. The first treatment was given on Sunday and at the present time the lad was showing marked improvement..

NOTE & COMMENT

Governments rise and fall in this country, but when one Government falls and another Government is set up in its place, the new Government is sure to be bigger than the old Government. That is one of the curious phenomena in connection with Governments in this democratic country. If Canada were growing in population in a measure proportionate to the increase in the cost of government it would soon be a very populous country.

The United States has a population of one hundred and ten millions; Canada has a population of a hundred millions or so less than that, and yet there are more Cabinet Ministers in our Government than there are in the Government of the United States. Canada is not a difficult country to govern. It should be, and is, a less difficuty country to govern than the United States.

Why is it necessary to employ so many men to administer the affairs of Canada? The question is an easy one to answer. It is simply a matter of politics. The politicians want jobs, and unless a Government is a very strong one, directed by a Premier of great determination of character, the politicians will have their way.

When the late Conservative Government of British Columbia was defeated and a Government headed by the late Mr. Brewster succeeded it, almost everyone who took an interest in politics knows what happened. The Liberals when in office had declaimed against the cost of government and the size of the Government that was considered necessary to guide the destiny of a Province with a comparatively small number of people. The new administration was pledged to reduce expenditures. Yet Mr. Brewster, against his better judgment and his will, was compelled to take at least one more member into his Cabinet than he considered necessary. In consequence of this and of other things, the cost of Government in this Province has increased amazingly, indeed disconcertingly.

The chances are that a similar thing has occurred at Ottawa. There is a strong demand there for public offices. Hon. E.M. Macdonald is known to be a man of great determination, and how a man of a different character like Hon. William Lyon Mackenzie King kept him out of office so long is one of the mysteries of politics. There has been a Cabinet shuffle, and Mr. Macdonald comes out of the deal a full-fledged Cabinet Minister.

A good deal of criticism has lately been flung in the face of the King Government because of its lack of an immigration policy, Canada has gained an unfortunate reputation in almost every country in the world, and particularly in Great Britain, because of her official attitude towards intending settlers. That impression is that we do not want immigrants and have been raising insurmountable obstacles against them. Whether this unfortunate impression was created by officials on instructions from the Government or the officials were simply acting upon their own responsibility does not matter. The unfortunate impression was created, and its effect was extremely bad.

Now a separate department of Immigration and Colonization has been created. There is little doubt that the men who sought public office took advantage of the agitation that had arrived against the Government's immigration policy to make places for themselves. It will be interesting to watch and make notes of the result. There is room in Canada for millions of people of the right class. Hundreds of thousands of such people are leaving Great Britain just now for other countries. How many of them will the new Canadian Department of Immigration and Colonization succeed in diverting to Canada?

The present Queen of Great Britain is a model for the people of her realm. She is a model mother and has raised a model family. In her own unassuming and dignified way she has set an example for the world in almost everything, but in the particular domain of fashions for women she has exercised a most wholesome influence. The bobbed skirt dare not flounce itself too conspicuously in the Royal Household, and bobbed hair was accorded no honors there. Dignity is a very becoming thing in a woman and dignity cannot be attained in clothes of the type usually associated with the variety stage.

This is how The Singapore Free Press defends expenditures on the British naval base at that port: "It is quite true that the British taxpayer is called on to provide funds, just as he was for the building of houses at home, and for saving the nation and civilization from the Hun; just as he will always have to do, so long as the Empire continues, and it is a fruitless task to try and decide whether it would be better to spend the money on roads in England, or a repairing shop for the enormous machinery of the Navy, which even the little Englander has had to admit has been the bulwark of our safety."

Mr. R. D. Waugh, the Chairman of the Manitoba Liquor Board, is to receive a salary of $12,000 and the other two commissioners will receive $5000 each. For a man of Mr. Waugh's ability the salary is not too large. His appointment has been welcomed in all quarters as showing the Government's determination for efficient enforcement of the new liquor law.

The Montreal Gazette says: "McGill is making cricket history locally, and never before were there so many local enthusiasts for the knights of the wollow. Bat and ball should have a large vogue in Montreal if only they were better known. Cricket is a rattling good pastime."

MONDAY SEPT. 3

Two Shows at 7 and 9

TO MAP AND BLAZE ROUTE OF THE SCENIC INTERNAIONAL PARKS HIGHWAY

The following letter, containing a map of the new Scenic International Parks Highway, was sent out from headquarters, at Missoula, Montana, on August 25, 1923, and signed by both Sid J. Coffee, president and Chas. H. Roberts, secretary:

"This letter is given to announce that the Edw. W. Pluver Map Company, of Seattle, Washington, represented by Mr. E. C. Young, will log, map and blaze the route of the Scenic International Parks Highway as shown on the attached map.

"It is agreed that the Pulver Map Company will issue the Scenic International Parks Highway map in sufficient quantity to take care of the 1924 needs of all member organizations on the route.

"For this service the Scenic International Parks Highway will provide free distribution of the map, when produced, throughout the length of the highway, and will provide the materials to an amount not exceeding $150, and secure permission, if possible, from State and Federal authorities and Provincial and Dominion officials to blaze the route.

"It is understood that the proposed map must be submitted for approval to the head officials of the Scenic Internationl Parks Highway before it is produced by the Pulver Map Company.

"This work is being done by the Pulver Map Company with the cooperation of the business men along the route catering to the needs and requirements of the tourists by means of classified advertisements and personal distribution of the map.

"For all maps contracted for by advertisers like quantities will be supplied the Scenic International Parks Highway Association, gratis, by the Pulver Company for distribution along the route and through touring and information bureaus in Canada and the United States.

"We have good reason to believe that the representations of the Pulver Map Company's field men will be carried out. The map is to be issued by April 1, 1924. The road is to be marked within the next two months."

INDUSTRIAIL OUTLOOK IN WESTERN CANADA

Under the heading "Industrial Outlook in Western Canada," John Sweeting, industrial agent of the C. P. R., western lines, has an encouraging message in the August number of the C. P. R. official publication "Agricultural and Industrial Progress in Canada."

What he says should encourage you. Read it:

Conditions in the West have remained steady throughout the months of June and July, showing an improvement, but necessarily watching the growing crop before undertaking any extensive development. The situation is one warranting an optimistic attitude and should justify the idea of a good fall business. The tendency again of increasing cost of production of many staple articles is holding expenditure back, but there is obviously little room for doubt of a continuance of improvement in so far as the prairie provisions are concerned.

Construction operations are not of the magnitude expected, but are averaging up well with previous years. Many propositions are still being held up, but must undoubtedly materialize at no very distant date. Efforts to create a feeling of greater confidence are extending to all classes of industrials and the situation in this respect is certainly bettering itself. Lumber activities at the Coast are steady, some slight falling off in export to one or two overseas points, but with good prospects of prairie trade picking up. Mining operations appear to be increasing, and should now continue in greater capital investments in the years following.

Immigrants have been finding their way westward in increasing numbers, of good type and ready to settle down to agricultural life. Many have elected to work for other farmers in preference to acquiring their own land. It is a promising feature for future of the West, meaning a large addition of experienced men capable of operating their land in a proper manner.

General business conditions are progressing along normal lines, volume improving, collections fair, with better prospects in both these branches. There is less agitation and better feeling of dependency and safety in present conditions with a brighter outlook. There does not appear any reason why the existing situation should not be characterized as satisfactory, taking all factors into consideration.

A prominent clearing house authority, discussing the provision of funds to handle the big harvest and increased demand for money that will be general in the West within a few weeks, said: "Financial affairs on the prairies are better than at this period last year. Loan companies report few delinquencies in payment of principal or interest for the first six months of the year. Deposits are increasing, because all interests are disinclined to try speculative investment. Public confidence in urban and rural prairie sections has stiffened to a marked degree. Ample facilities will be offered by financial institutions for handling all the grain produced, in record time, even though the amount equals or exceeds the new quantity indicated.

MORMON TEMPLE AT CARDSTON IS DEDICATED

CARDSTON, Alta., Aug. 28.—Begun ten years ago, after the site had been designated and consecrated by the late President, Joseph F. Smith, the Mormon Temple, officially designated the Alberta Temple, was dedicated at a solemn assembly of high authorities of the church of the United States and Canada here Sunday morning. It was a monumental occasion in the annals of the church, marking as it did the completion and opening for ordinance work of the first temple to be erected on British soil, and the eighth to be built since its organization in the state of New York, April 6, 1830. President Herber J. Grant, mouthpiece of the Lord to the half million of Latter Day Saints scattered over the face of the earth, offered the dedicatory prayer, kneeling in humility before the plush altar of the Celestial room. Around the president were grouped the general and local authorities of the church and their wives. The assemblage numbered over 500, completely filling the terrestrial and celestial rooms of the sacred edifice.

"Face Disfigured From Eczema"

Writes the Nurse who finally tried D.D.D.

"The disease had eaten her eyebrows away. Her nose and lips had become disfigured. Since the use of D. D. D. her eyebrows are growing. Her nose and face have assumed their natural expression."

Cases can be sent you from your own vicinity. Write for testimonals, or secure a bottle of D. D. D. today. *Why suffer itching torment another moment?* If you don't get relief on the first bottle we will refund without hesitation. $1.00 a bottle. Try D. D. D. Soap, too.

D.D.D. The Lotion for Skin Disease

N. E. SUDDABY—DRUGGIST

Prince of Wales a Canadian Rancher

This photograph of the Prince was taken on his first visit to the Dominion. To the left is seen a picture of his ranch, and above it is an interior view of one of the suites aboard the Empress of France, bottom right.

HIS Royal Highness the Prince of Wales will for a month or so become a simple Canadian rancher. That he will travel incognito on his coming to Canada does not mean that he will travel in disguise but that he will not take part in official functions or make official visits, and when approached with regard to his stay in the Canadian Dominion he has always stated that his time will be fully taken up by the affairs of the E. P. ranch.

The Prince of Wales exhibits a deep and marked interest in the ranch he purchased near Calgary on his memorable tour of the Dominion, and his desire to visit it is but a fresh indication of the importance he attaches to it and the work it is doing. Immediately after purchasing the ranch, and before returning to England, the Prince made arrangements for the shipment of some of the best stock in the British Isles to the Canadian West. Thoroughbred horses came from the Royal stud, shorthorns from the King's farm, shropshire sheep from the Duke of Westminster's estate, and hardy Dartmoor ponies from the Devon moors. The latest importation consisted of a thoroughbred stallion and four mares the finest obtainable in the British Isles. "Will Somers", which heads the stud at the E. P. ranch is a handsome five year old which at three years was the winner of several English classics.

Thus the Prince has demonstrated that his purchase of the ranch was not a matter of sentiment or commercial profit, but a genuine desire to foster the breeding of better livestock in the West. His efforts have been eminently successful. At all provincial exhibitions the animals from the High river ranch are attractive features, and last Fall, shorthorn cattle, constituting the first commercial sales the ranch has effected, commanded top prices.

Cattle from the E. P. exhibited at the stock show at the Calgary Stampede were heavy prize winners, and sheep and horses from the same ranch created an unparalled standard.

The Royal rancher has planned to arrive at Quebec on September 12th on the Canadian Pacific steamship "Empress of France". The palatial liner, 18,000 tons, which was the flag ship of the 10th Cruiser Squadron on Northern patrol duty during the War is the most up-to-date vessel of its type and is most suited to the accommodation of its distinguished passenger. Reconditioned after the war, this ship is one of the most magnificent yet comfortable vessels in trans-Atlantic service. It holds the record for oil. Its large and comfortable suites and cabins, spacious promenade decks, numerous and excellently appointed public rooms and service facilities make the Empress one of the most popular ships in the Canadian Pacific fleet.

DR. TOLMIE IS SURE OF B. C. SITUATION

Dr. S. F. Tolmie, M.P., for Victoria, and chairman of the new organization committee of the National Liberal-Conservative Association, is now on his way east, having started for the Prairies immediately after visiting the Vancouver livestock exhibition on last Wednesday night.

He will stop at Kamloops, Calgary, Edmonton, Saskatoon and Winnipeg on his way East and is due to reach Ottawa on August 24. He will confer with the national committee during the first week in September to give an account of the organization work he was able to accomplish in the West and in other parts of Canada.

When Dr. Tolmie arrived in Victoria he told The Colonist that a wave of Conservatism was sweeping Eastern Canada and that it was also penetrating the Prairie provinces. He pointed to the victory of the Conservative forces in Ontario and Prince Edward Island and the weakness of the Bracken government in Manitoba. "From what I am told, the Conservative party is getting stronger every day in British Columbia," he said.

That was his first impression. Since then he has had exceptional opportunity to analyze the political situation in British Columbia and he is convinced that whenever the Oliver administration goes to the country the Conservatives will be able to register just as strongly in this Province as they did in other parts of Canada where elections were held. His report to the national committee will be one not only of hope, but of confidence in the power of the Conservatives to extend their victory to the Pacific Coast

Dr. Tolmie is accompanied on his way East by Mr. C. H. Dickie, M. P. for Nanaimo.

The Germans have not lost the art of making substitutes acquired during the war. A Canadian guest at a Bavarian hotel reports that the tablecloths and napkins were made of paper, the butter oleomargarine, the coffee oats and the rice breadcrumbs.

Old Sol probably never had a heavier camera barrage than the one to be focused on his illuminated dial on September 10. Scientists, astronomers and photographers of all degrees are assembling in San Diego to observe and record every move he makes in his annual disappearing act. The orb of the day will be shown "before" and "after" emerging, revealing the minutest freckle or sun spot.

CHINESE SLAYERS TO DIE IN GAS CHAMBER

CARSON CITY, Nev., Aug. 25.—Six faces pressed against the outside of a big plate-glass window will watch Hughie Sing and Gee Jon, Chinese tong murderers, die when the state of Nevada carries out its first execution by lethal gas, the state Supreme court having ruled this week that this method of putting criminals to death is not cruel or inhuman.

Plans for building the death chamber, a tiny concrete hut, resembling somewhat an eskimo igloo, are going forward at the state prison here, it was learned today, although the date of the execution has not been set pending a decision of the Supreme court on an appeal from the ruling of the State court.

There will be nothing striking about the hut except the wide glass window which will frame the final picture of the six witnesses the law specifies, which the Orientals will carry with them into the beyond.

The two Chinese will be bound tightly to two chairs, the only furniture in the airtight chamber, to prevent their bodies from falling to the floor when consciousness leaves them. The prison warden, or his deputy, will lift his hand as a signal for the opening of a valve, Cyanogen, the poison gas, will rush into the chamber from a pipe entering the room at one corner.

Death will be almost instantaneous, according to the authorities. Standing before the window, the six witnesses will watch every movement, every grimace of the faces of the two victims, as they expiate their crime in the newest and the strangest manner of execution yet devised. Upon their testimony probably will depend whether death by lethal gas will be continued in Nevada, possibly to be taken up by other state, or whether it will be discarded as cruel and inhuman as claimed by the attorneys for the condemned tong men.

A few minutes after life has left the two bodies, to all appearances, a physician will enter the death chamber. After a swift but careful examination of the two bodies he will either call for more gas or he will declare that the law of the state has been fully satisfied.

One of the condemned realizes fully the fate that is in store for him if the last appeal fails even though the other may not. He is Hughie Sing, an American educated Chinese boy barely 20 years old.

"One way is about as bad as another," was Hughie's laconic comment when asked what he thought of it.

Gee Jon has nothing to say on the subject. He is 30 years old and has a reputation as a killer in San Francisco's Chinatown.

Cotton and Crime

Two centuries ago the cornering of the Lancashire cotton trade—now being attempted, it is said, by a powerful syndicate—would scarcely have been worth the trouble involved, for, in those days the wearing of cotton fabrics was a crime. In order to foster the old-fashioned manufactures of linen and wool, the production and sale of cotton goods was forbidden under penalty, and not until 1735 was their use legally permitted in England. The raising of the ban, according to Sir Walter Besant, was "the first step in the elevation of the lower classes, for cotton fabrics could be easily washed. Then cleanliness of the body became possible, and with its sweetness and comfort came cleanliness of other kinds.—From the Westminster Gazette.

The report that fox furs will be fashionable this winter may cause an uneasy feeling in cat and rabbit circles.

WIN TWO AT LETHBRIDGE

Lethbridge Herald

Lethbridge ball teams have contracted the losing habit. This, plus Ault, resulted in Fernie taking a brace of contests from them at Adams Park on Wednesday afternoon and evening. The afternoon affair was a 6-4 win for Fernie in nine innings, while the evening encounter was a 1-0 hurling duel between Geoghegan and Ault, the latter having a shade the best of the argument.

The Lethbridge team were composed mostly of Miners and a few of the Millers to fill up holes. Lethbridge could have fielded a stronger team but in neither were the boys disgraced.

Fernie has a smooth baseball machine, and in Ault they have a mound artist who is good enough for the best in amateur ball. Ault pitched both games on Wednesday, yielding 6 hits in 9 innings in the first game and 3 hits in 5 innings in the second. He was seldom called upon to extend himself to the limit.

The feature of the afternoon was a home run by Shand over the left field fence. This was the longest hit ever made on the Adams diamond, clearing the fence with plenty to spare. The hit was made of Steve Seaman who pitched a nice game during the afternoon session, keeping the nine hits gathered by Fernie well scattered except in the ninth. In the ninth the score was tied but Fernie shoved three across while the locals could only manage to get one of them back.

The evening game was called at the end of the fifth on account of darkness, but was a pretty game until Fernie started batting in the sixth when darkness descended, making it impossible to continue. The score therefore reverted to the end of the fifth.

The Afternoon Game

In the opening game Steve Seaman was sent to the mound to oppose Ault. In spite of the fact that six errors were chalked up against each team the fans received an hour and forty minutes of interesting ball. Ault was in good form, fanning nine of the homsters and allowing only six hits. Seaman turned in one of the best games he has pitched this season. He was nicked for nine hits by the heavy Pass sluggers, but kept them well scattered except in the ninth when he was touched for three safeties.

It was a great game to watch. Both teams counted in the second. Fernie pushed ahead in the fourth on Shand's homer, but the locals tied up again in the eighth only to allow the visitors three runs in the ninth while they themselves counted but one.

A walk and two singles gave Fernie the lead in the second. The Miners in their half came back and taking advantage of a couple of breaks and Greenway's double, tied up the score.

In the fourth Fernie forged ahead when John Shand, a former Lethbridge boy, drove one of Seaman's slants over the left field fence for a home run, and the longest drive on the new Adams Park diamond. Greenway's single and Ridpath's sacrifice put the teams on equal footing in the eighth.

Fernie rallied in the ninth when they combined three hits with a flock of errors and hustled over three runs. The Miners' rally after two men were out fell short of a win by three runs and Fernie chalked up another win 6 to 4.

The Evening Game

It was Iron Man Ault vs. Big Six Geoghegan in the evening session with Ault being a little steadier and having a slight edge. The score was 1-0 in 5 innings, darkness setting in in the sixth when Fernie was at bat. Geoghegan was trying to keep them up in this frame so Yorko would be able to see them, with the result that he passed a couple; a couple of errors behind him were contributed to the melee, and Fernie had run in three with one man down before the game was called.

Ault yielded just three hits and struck out seven in the evening. Gordie Morrison got two of the hits and Ralph Greenway got one. Two of them came together in the third but didn't contribute a run, though had Greenway set sail for home from second on Morrison's hit through short he might have made it. These hits gave the only three Lethbridge men left on bases.

Fernie touched Geoghegan for four hits in the five innings. They were well scattered, and up to the end of the fourth the game was scoreless. However, in the fifth Geoghegan walked Hovan. He went to second when Gillis dropped Geoghegan's throw to hold him on first. The next two were easy outs, but McTeer connected one over second and Hovan scored. Had Nich Zubach been playing his position McTeer's hit might have been cut off, but the Miners' keystone sacker hugged second all night and let several go by that might have been cut down.

The Miners were wobbly all evening, and contributed four errors behind Geoghegan, causing considerable of his unsteadiness. Fernie, however, deserved their win. They played errorless ball.

o

BABE RUTH HOLDS BATTING RECORDS, AMERICAN LEAGUE

CHICAGO, August 25.—Babe Ruth continues to make both the National and American League batting averages look somewhat like a one-man leader proposition. He leads all the batters in hitting with an average of .404, a gain of nine points during the week. He failed to add to his home run total during the week, his mark remaining at 32, but was fairly successful in extra base hits for less than the circuit during the week, now leading all major league players by a wide margin. He leads in total bases with 300, a gain of 22 during the week, and in runs scored with 114, a gain of seven. The nearest in hitting to him is Heilman, of Detroit, with .388, and Speaker, of Cleveland, with .368.

Eddie Collins, Chicago, is the only leader in the league besides Ruth. Eddie is out ahead of all the base-stealers with 36 to his credit, and he also tops the list of sacrifice hitters with 35.

Ruth's record of total bases include, with his 32 home runs, nine triples and 31 doubles. Ruth's record cover 113 games, 384 times at bat, 114 runs, 155 hits, 3 sacrifice hits and 10 stolen bases.

Other leading batters are:

Sewell, Cleveland, .364; Jamieson, Cleveland, .363; Williams, St. Louis, .348; J. Harris, Boston, .347; Eddie Collins, Chicago, 345; Manush, Detroit, .337; Witt, New York, .334; Burns, Boston, .334; Cobb, Detroit, .333.

Cy. Williams, the Philadelphia National slugger, scored three homers during the last week and is again tied with Ruth with 32. Hornsby, St. Louis, continues in his leadership with .397, a drop of 8 points from last week, but still is ahead of Zack Wheat, of Brooklyn, who has .378, and Bottomley, St. Louis, who has .370.

Young, New York, leads as run getter with 101, while Frisch, also of the Giants leads the extra base hitters with 249, which includes 11 home runs, 9 triples and 26 doubles.

Other leading batters are:

Fournier, Brooklyn, .367 Young, New York, .353; Traynor, Pittsburg, .350; Roush, Cincinnati, .350; Hargrave, Cincinnati, .350; Frisch, New York, 348; Barnhart, Pittsburg, .340.

o

BRIGHTEST REGION IN WORLD OF SIN

NEW YORK, Aug. 28. — The New York Times says: For nearly a month the Province of Ontario has been the purest and brightest region in this world of sin. A new statute prohibits the publication, importation or distribution of any newspaper containing betting information. The moralty squad has been sternly vigilant in seizing copies of the American papers publishing, as a matter of news, the odds and pari-utuel results of races of the day before. These can cause no bets, they are no more a spur to, or opportunity for, gambling than the score of a game with hucklebones in Pompeii or Balac in 23 B. C. British newspapers, stuffed with betting lore, are allowed, under the Ontario statute, to be distributed, and newspapers containing the abhorred stuff are permitted to go in the mails.

What is the cause of the zeal of the authorities to enforce the Ontario statute forbidding the importation, publication or distribution of racing papers? Something to touch the heart of Mr. Fordney and of Mr. McCumber—protection to home industry. The government derives a revenue from race-track gambling. At the tracks betting is a virtue to be encouraged by every good citizen, for it fattens the provincial treasury. The bookmaker is a privileged and protected character at the tracks. There betting is morally noble, legal, economically sound; but the mere record of past betting elsewhere is a contamination from which Ontario must be preserved and a crime from which the vendor of that record is punished. A bookmaker is a prop of the state, its partner or beneficiary. A poor devil outside the track, who ventures to trespass on the government monopoly, must pay $180 and costs or go to jail for three months for keeping betting slips in his store.

We understand that the Institute of France will award the next montyou prize for "the work most useful to morals" in the year 1923 to the Ontario Legislature.

o

Ernie Arthurs, of Lethbridge, who will meet Geo. Cyclone Thompson, of Chicago, for the Middleweight Championship of Canada and the United States and $500 a side, during the coming week in the 150 All Sports Gym. H. J. Rayner is promoting this match. Watch for particulars.

LETHBRIDGE IS SHUT OUT

The Coal Co. Baseball Team continued their string of victories on Sunday afternon last when they defeated the Lethbridge Miners in one of the fastest games ever seen on the local diamond, one hour and twenty minutes being required to finish the game, Fernie winning by the score of two runs to nil.

Ault hurled his usual stellar game, allowing three well scattered hits and striking out twelve. He did not allow a Lethbridge man to reach first base until the fourth inning and not one as far as third nor granted a base on balls during the entire game. Wade Ridpath, on the mound for the Miners, pitched a creditable game. He was touched for six hits and while he only had two strike outs to his credit and walked three, two of whom scored the runs, he was given excellent suport by his team-mates in the pinches.

Ault had only three Lethbridge men face him in the first three innings and it was not until the fourth, when Greenway singled after two were out, did Lethbridge have a man on bases, only to die there when J. Zubach struck out. Lethbridge looked dangerous in the fifth. After Ault struck out Gillies, Yorko reached first when the wind carried Shand's throw to Barger in the runner's path and Ridpath singled, advancing Yorko to second, but Ault tightened up and fanned the next two men up. In the seventh, Lethbridge was again in a position to score. Ault struck the first man out, Gillies then singled but was thrown out at second on Yorko's infield grounder on an attempted double play. B. Wilson missed W. Ridpath's grounder allowing both runners to reach first and second safely but N. Zubach hit to Bishop who threw him out at first. For the next two innings the Miners went out in rapid order being unable to connect safely.

Fernie batters went out one, two, three in the first inning, Gillies taking Hovan's grounder and touching first; Barger was thrown out by A. Ridpath while W. Ridpath threw out S. Wilson. In the second Fernie looked like breaking into the scoring column, Bishop singled, after one man was out, and went to second on Gillies' error when pitcher Ridpath tried to nip him off first, he stole third only to stop there, Ridpath striking out Shand and Yorko taking Ruschall's high fly in front of the plate. In the third inning, B. Wilson fanned, Ault flied out to centre field then Hovan singled and Barger followed with a two-bagger but again Fernie's hopes of scoring were shattered when S. Wilson lifted a high fly to Gillies for the third out.

Fernie secured their two runs in the fourth. McTeer was given a walk and promptly stole second. Bishop was thrown out at first. Shand then connected for a single, scoring McTeer but went out trying to steal second. Ruschall drew a base on balls and scored Fernie's second run when Huff let B. Wilson's texas leaguer go through his hands and far behind him in right field, Wilson reached second but Ault was thrown out at first by W. Ridpath.

In the sixth, Lethbridge uncorked a snappy double play. McTeer singled then Bishop hit to Greenway, who threw to N. Zubach nipping McTeer at second, Zubach then relayed to Gillies catching Bishop easily two yards off first. Shand followed with his second single of the game but Ruschall lifted a high fly to N. Zubach behind second base. Fernie persisted to attack in the eighth. S. Wilson walked. McTeer flied out to pitcher Ridpath. Bishop then almost hit into another double, reaching first on a fielder's choice, S. Wilson being retired at second. Shand went to first and Bishop to second when A. Ridpath fumbled Shand's hot drive. Short stop Greenway then featured, making a spectacular catch by going back into short left field and taking Ruschall's fly, which would have dropped in front of the fielder and allowed another run, for the third out.

Box score—

Among the harvesters who arrived in the West the other day was a former general in the Russian army. Instead of giving the command to "stack arms" he may now be ordered to stack sheaves.

A flood of replies has been received in answer to an advertisement in a Toronto paper for "Young men to pick peaches in the Niagara district." Many of the applicants offer their services free.

There is always room on the top for choice fruit. A Toronto pedlar was recently fined $25 for selling a barrel of apples with the top layer showing good quality while the rest was inferior.

AFTER-EATING DISTRESS

and all forms of stomach trouble, such as gas, pains, acid, sour, burning stomach are all relieved in two minutes by taking Jo-To. Jo-To is sold by all Druggists.

100,000 Star Cars

BUILT AND SOLD IN TWELVE MONTHS—

SEARCH THE RECORDS of the automobile industry, from the year of the first crude motor car to date, and you cannot find a record to parallel or even approach the first year's record of the Star Car.

More than 100,000 Star Cars have been built and sold in one year!

The building of this great number of standard-designed, dependable, low-priced cars in twelve months is a colossal achievement. Great plan facilities were necessary to bring such a result. The nearest approach to the Star Car's first year record the automobile industry affords, is the success of the Durant line in its first twelve months.

This is the secret of the great achievement recorded in the first year of the Star Car sales—the vision and leadership of W. C. Durant and his ability to read the public mind and build the kind of an automobile the public will buy in great numbers.

It is safe to say the Star Car has merely approached the threshold of its success. The coming months will see a repetition on an even greater scale of popular clamor for this Durant product. Great though its first year has been, the years to come promise success for the Star Car that will eclipse any other achievement by any other motor car or organization.

School Opens This is your big opportunity to outfit the Children and save money **Tuesday, Sept. 4**

READY TO WEAR DEPARTMENT

Serge Bloomers—
Well made from a good quality, all wool serge, all sizes — Special $1.75

Girl's Sweaters—
Pull-over style, fancy stitch, shown in saxe, jade, camel, white, card, rose and jockey—Special $1.75

Boy's Pull-Over Sweaters—
Fine quality, all wool, button on shoulder, comes in brown, card, green and navy, all sizes—Special $1.75

Boy's Blouses—
Shown in good quality, fast washing materials, also black sateen—Special $1.00

Girl's Middies—
Made from good quality jean and drill, contrasting collar and cuffs in red, navy and green—Special $1.00

Gingham Dresses—
Shown in good quality gingham, nicely trimmed, sizes 6 to 12 years—Special $1.25

Gingham Dresses—
Pretty little models made from fine imported gingham in a range of checks and plaids—Special $1.75

Girl's Gingham Dresses—
In smart styles, shown in pretty checks and plaids, sizes to 14 years—Special $2.50

DRY GOODS DEPARTMENT

Children's Stockings—
1|1 Rib, good quality and hard-wearing, spliced heel and toe, shown in white, brown and black, all sizes from 5 to 10 — Special, 3 Pair for $1.00

Boy's School Hose—
Extra heavy quality, will stand lots of rough wear, spliced heel and toe, fast black, sizes 6 to 10—Special, per Pair 50c

All Wool Stockings—
Fine quality, all-wool cashmere, double knee and spliced feet, made in England, sizes 6½ to 8½—Special, per Pair $1.00

Hair Ribbons—
All silk ribbon, 3½ inches wide, shown in 12 shades—Special, per Yard 25c

Children's Handkerchiefs—
Fine white cambric, nicely hemstitched—Special 4 for 25c

Knitted Bloomers—
Fine elastic knit, finished with strong elastic at top and knees, shown in pink, white and black, all sizes—Special, per Pair 50c

All Wool Serge—
A good hard-wearing quality, comes in brown, card, green, black, burgundy and navy—Special, per Yard $1.00

MEN'S DEPARTMENT

GOOD CLOTHES

There are a great many lines of cheap clothes advertised, but there are many men who want good clothes and are willing to pay a price consistent with quality. Skimping the quality of the workmanship, the material or the trimmings will lower the price—but it also lowers the quality and the character of the garment. The four essentials of good clothes—good material, good design, good fit and (best of all) good tailoring—are embodied in every 20th Century Suit we sell. Buy your next suit from us and see the difference. We give you guaranteed value. See our display of—

BRANCHES AT FERNIE, MICHEL, NATAL AND COAL CREEK

COAL CREEK BEAT COLEMAN

The Coleman football team travelled to Coal Creek last Sunday in a league fixture, Coal Creek winning the game by the score of two goals to one. Coleman were not however up to their full strength, being minus three of their regular forward line. The Coal Creek team turned out at full strength. Quite a large number of fans witnessd this game, there being a large contingent from Fernie.

Coleman won the toss and decided to kick up hill with a slight breeze blowing behind them. They started off in quite a business-like fashion, and it seemed but only a matter of time before they would be successful in bringing the downfall of the Coal Creek goal. Their forward line was being ably supported by the half backs but several very pretty movements were held up by the referee giving off-side decisions. However, several well timed shots were peppered at the Coal Creek goal but Bert Sawyer was right on the job and brought off some fine saves which would do credit to any first leaguer. At this stage of the game the Coal Creek defense seemed to be kind of awed by the occasion and were very unsteady. The only man on the Coal Creek team who was showing any football was Caufield, the rest of the team were playing a very disjointed game. Quite a little mid-field play took place for several minutes when the Creek forwards broke away on the left and from a nice cross a goal was realized. This seemed to put more confidence into the Creek youngsters and they seemed to redouble their energy and up to the whistle sounding half time the play was very much of the give and take nature with Coleman always showing the master mind in the game, although they were not able to do very much against the lusty kicking of the Creekites.

On resuming in the second half the Coleman forwards immediately raided the Coal Creek goal and had very hard luck in not scoring. Several corners were forced and from one of these Redfern almost scored. In saving the shot, Sawyer was knocked out. However, after a littel attention he was able to resume playing. Shortly afterwards from another corner, Tommy Jackson was unlucky to just tip the ball over the bar. A few moments later this same player rattled the cross bar with another which sure had Sawyer beat all the way. Coleman were at this stage playing a parlor room game with the Creek defense, but lusty kicking with no sense of direction at times completely put Colemanites off their combination game, which to say the least was pretty to watch. From one of these lusty kicks the Coal Creek forwards broke away again on the left, and as Coleman backs were hovering around the centre line they were unable to recover in time to catch the fleet-footed Creekites and a goal resulted.

About twenty minutes of the second half had gone when the Coleman right wing broke away and sent a dandy cross to Redfern who made tracks for goal, but was tackled by Corrigan, and in the melee that followed, Corrigan fell on top of the ball, and McFarlane running in from the wing had no difficulty in slipping a counter past Sawyer. From then on until the whistle sounded time up the Coleman team played hide and seek with the Creekites, but were unable to increase their lone tally, which the Creek have to thank Sawyer for.

In summing up the game, we might say, it is a long time since we saw any team have so much of the play as Coleman did and yet get beat, as they surely played a pretty game.

o

CANADIAN PACIFIC AND PACIFIC GREAT EASTERN

Provincial ministers and Canadian Pacific Railway officials agree n contradicting the report that negotiations are in progress for the lease or sale of the Pacific Great Eastern to the C. P. R. We may accept all these statements and still hope that events are moving in the direction of a merger of the provincial railway into one of the Canadian transcontinental systems. It was never intended to be operated as an isolated and local railway or to come to an end short of the Peace River district. The Grand Trunk Pacific, which expected to reach Vancouver by this route, has access to the port by way of the Canadian Northern, and is less concerned with the extension than it would have been as an independent line.

Meanwhile the Canadian Pacific has obtained control of the railway penetrating the Peace River prairies and the company has been surveying routes from that field southward. Such an examination would naturally include consideration of extension to the seaboard. For the Peace River district can never send its heavy farm products to market by way of Edmonton. The only way for the Canadian Pacific to extend and consolidate its position in traffic control of that splendid country, belonging to both provinces, is to find access to Pacific tidewater.

The management of the government railways has also been conducting surveys from the main lines into the Peace River district. That field is too valuable and promising to remain much longer shut out from its natural traffic route. For the development of the natural resources of the district, as well as for traffic purposes, the government railway management keeps its eyes on this tempting field.

The Canadian Pacific, already in possession would be even more disposed to retain and strengthen its controlling position. But it has to consider the question of reaching the Pacific. This can be accomplished by the Pacific Great Eastern, either by following it to Howe Sound and ultimately to North Vancouver, or by a connecting line from Lilooet to the main line of the C. P. R. There are good prospects of the development of traffic along the line of the provincial railway, by an organization so effective as the Canadian Pacific Company has proved itself to be. We might also suppose that the line now in operation along the waterfront into North Vancouver, with all that it suggests in the way of local opportunity, would interest a company which does so much business on land and sea.

Of course these matters have all been considered and discussed. It is well known to the management of the government railways that the province is willing to have the Pacific Great Eastern associated with either transcontinental system. We need not speak of the discussions as negotiations but they are of the kind that lead to negotiations.—Vancouver Province.

Health turns the clock backward

BORDERING ON NEURITIS.

Health Talk No. 33.
By G. J. Parks, D. C.

True neuritis is a form of gradual and very painful destruction of nerve cells. If it progresses to the point where nerve cells are destroyed, then we have a weakness resembling paralysis. If the arm is affected, it can be moved about but it is wholly without strength.

It is marked by dull pain and heat in the affected part and in this respect resembles rheumatism. Quite often rheumatism is taken for neuritis, but the common method of getting rid of rheumatism, by flushing the bowels and kidneys and by a course of baths, is entirely ineffective with neuritis.

Rheumatism is due to faulty elimination, and neuritis to local pressure on spinal nerves interfering with normal action of the heat function. Both are reached through adjustments more quickly than in any other way. For neuritis there is really no possible substitute for chiropractic spinal adjustments.

HEALTH FOLLOWS
CHIROPRACTIC CORRECTS PRESSURE ON SPINAL NERVES IN DISEASES OF THE FOLLOWING ORGANS:

THE LOWER NERVE UNDER THE MAGNIFYING GLASS IS PINCHED BY A MISALIGNED JOINT. PINCHED NERVES CANNOT TRANSMIT HEALTHFUL IMPULSES. CHIROPRACTIC ADJUSTING REMOVES THE PRESSURE. THE UPPER NERVE IS FREE AS NATURE INTENDS.

Crutch and Cane Victim Is Now Well

"I had an attack of neuritis and was unable to walk without the assistance of a crutch and cane. I was advised that I would have to be put in a plaster cast and kept under observation for some months. I turned to chiropractic and in a few weeks was able to discard crutch and cane and am entirely well and free of all pain." — Kate Harvey Howard, Chiropractic Research Bureau Statement No. 1371-B.

Limited

Librarian, Leg. Assembly.

AUSTRALENE WOOL

This is reckoned to be one of the finest knitting wools made. Suitable for ladies sweaters and children's wear. It comes in colors of corn, geranium, white, pink, helio, beauty, rust, deep rose, caramel, pumpkin, jade, brown, poppy, black, champagne, golf green and dove—

1 Oz. Balls—20c Each

SYLVER FLOSS

Another beautiful silk and wool mixture in shades of azure, white, camel, lilac, platinum, almond, oak, capri, mushroom, primrose, briar, pink, black, canna, rose, matrix—

1 Oz. Balls—30c per Ball

CROW'S NEST SPECIAL
BOOTS FOR BOYS

One of the most popular numbers for boys who are severe on their school footwear, good heavy soles, all solid leather and standard screwed—

Sizes 11 to 13—Price $2.95 per Pair
Sizes 1 to 5—Price $3.95 per Pair

BOY'S SCHOOL SUITS

A special sale of Boy's School Suits, made from a good hard wearing tweed in a nice variety of styles and patterns. Special sizes 24 to 35 for Saturday and Monday—

HALF PRICE

MUSICAL COMEDY AT THE GRAND

Fred Carmelo's company of musical comedy players returns to the Grand on Saturday, playing "Orange Blossoms" and "Down on the Farm." These musical shows are full of pep, and afford a two-hour entertainment of the lighter sort, with songs and dances well put over, and comedy scenes that are good for an abundance of laughter. The company will also appear on Monday next in a new program, the feature play being a farce comedy entitled "The Bell Boy." All members of the company contribute to a long program of songs, dances and comedy, and Mr. Carmelo assures patrons that "The Bell Boy" is one of the very funniest of late comedies. As usual, the company will give two shows on Saturday evening, the first at 7.00 and the second at 9.30.

CHRIST CHURCH

Sept. 9—15th Sunday after Trinity.

11 a.m.—Morning Prayer, "Life's Ideals."

7.30 p.m.—Evensong. "The Science of Life."

2.30 p.m.—Sunday School.

LABOR DAY CELEBRATION

The Labor Day celebration held under the auspices of the Fernie Branch of the Great War Veterans Association, was one of the most successful celebrations ever held in the city. Glorious weather brought out a tremendous crowd of people from all over the district.

The program for the day opened with a grand parade in the morning, which proceeded along Victoria Avenue to the Park corner and returned along Baker avenue to the C. P. R. depot, where the parade disbanded. The parade was featured by a decorated automobile bearing Miss Ella Wilson, winner of the Popular Girl contest. Immediately after the parade a cycle race was held on Baker avenue, resulting as follows: H. Brown 1st; J. Davidson 2nd. This completed the up town part of the program and everybody proceeded en masse to the Park.

The opening event at the park was the five-a-side football contest. Seven entries were made—three teams from Fernie, two from Coal Creek and two from Michel. The results were as follows:

First Round—
K. of P. 0 vs. Michel Blues 1.
Coal Creek B 1 vs. Bluebirds 0.
Woodbines 0 vs. Coal Creek A 1.
Michel Stripes—bye.
2nd Round—
Michel Stripes 1 vs. Coal Creek B 2.
Michel Blues 0 vs. Coal Creek A 1.
Final—
Coal Creek A 1 vs. Coal Creek B 0.

Following the football competition Troy, Montana, and Fernie baseball teams took the diamond and after one of the finest games of the season, Fernie emerged winners by a score of seven runs to two.

During the afternoon a large program of boys', girls and men's races were run off. A program of aquatic events was one of the new features in a Fernie celebration and provided considerable excitement for the large crowd.

Another new feature was the amateur step dancing competition, which drew a large gathering of artists in full costume. This competition made a decided hit with the large gathering, the platform being continually surrounded by spectators. The results were as follows:

Highland Fling—1 Miss Thompson, 2 Miss Walker.

Sword Dance—1 Miss Walker, 2 Miss Fleming.

Shaun Truss — 1 Miss Brown, 2 Miss Thompson.

Sailor's Hornpipe—1 Miss Starr, 2 Miss Walker.

In the evening two horse races and one pony race were run off, resulting as follows:

1st Race—1 Bossio; 2 Long Chuck.
Pony Race—1 Jimmy George.
3rd Race—1 John Long Chuck.

The celebration was wound up in the evening by a torchlight procession staged by the D.O.K.K.'s, dragging along a large number of candidates for their order through the main streets of the city "Looking for their husbands across the burning sands." This was followed by a novelty dance in Victoria Hall.

The Great War Veterans Brass Band and the Fernie Pipe Band were in attendance during the entire day.

NOTES

The amusement portion under the command of F. Shears, proved attractive and drew the loose change of the crowd.

The greasy pig was captured jointly by Jimmy Thompson of West Fernie and T. Monks of Coal Creek. Nothing having been settled as yet the final disposition of the "porker" hangs in the balance.

The popular girl contest netted the sum of $867.30 by sale of tickets. Miss Ella Wilson, the winner, received a cheque for $217, being her 25 per cent portion.

The drawing for prizes in connection with the popular girl tickets took place in the park and resulted as follows: 1st No. 2123, L. E. Bennett, $86.70; 2nd No. 5103 John ——— $70.40; 3rd No. 5263 John Dixon, Natal $26.00 Prize winners are requested to communicate with D. J. Black, chairman of the finance commitee, for settlement of their claims.

Thanks are due the G.W.V.A. band, Fernie Pipe Band, the police department, Ladies Auxiliary and all who assisted to make the day successful, not forgetting those who donated chickens, etc.

Owing to unforseen circumstances the shooting gallery erected on the park could not be used. Chickens donated for that purpose could not be disposed of by that means, but arrangements are under way to dispose of them otherwise.

The day wound up with a grand dance in Victoria Hall. The novelty dances seemed to catch on. The committee in charge claim a record over $275 being taken at the door.

DOKKIES IN FERNIE

About thirty representatives of the Nelson Doknies and a similar number from Cranbrook, Michel, Coleman and Kimberley visited Fernie Lodge of the Knights of Pythias on Monday and initiated a large number of tyros into the mysteries of the Dramatic Order of the Knights of Khorassan.

The evening's program started off with a grand banquet, which was followed by a monster torch light procession that startled the city with its wierd figures.

The visitors all expressed themselves as having had a grand time and they are looking forward to another roundup of tyros at no distant date in this city. The Nelson News of the 6th contained the following reference to the visit of the Dokkies:

Highly elated over the excellent time shown them while in Fernie about 30 members of the Nelson Dokkies returned to the city on Tuesday night from the Crow's Nest city, where one of the biggest and most successful of Dokkie ceremonies was held. The local contingent was under the care of W. E. McCandlish and D. Laughton.

Leaving the city on Sunday morning last, the local Dokkies were the guests of the Fernie Knights of Pythias at a huge banquet. Dokkies were present also from Cranbrook, Michel, Coleman and Kimberley. The banquet, which was favorably commented upon by those in attendance, was given and arranged by the Fernie Pythian Sisters. That evening at 8.30 o'clock the Nelson Dokkies, headed by the Fernie band, staged a huge parade through the principal streets, large numbers of the Fernie citizens taking part in the parade. Following the parade a ceremonial was staged in the Knights of Pythias Hall, a large number of tyros being initiated into the Nelson Temple, which now boasts a membership of over 500 Dokkies. Following the ceremonial light refreshments were served.

Monday being Labor Day, an excellent program had been prepared by the G. W. V. A. members, at which the visiting Dokkies were present through invitation. A parade, headed by the Fernie band and the Highland band, took the crowd to the Athletic park, where the various sports were held. Fernie and Troy, Montana, played baseball, the Fernie boys winning to the tune of 7 to 2. On Sunday afternoon the Dokkies witnessed the final game between Fernie and Wycliffe for the possession of the Daily News cup, which was retained by the Wycliffe team for the second successive year.

Yesterday the Nelson Dokkies spoke highly of the kindness extended to them by the mayor and citizens of Fernie, and by the members of the Great War Veterans there. Much regret is expressed at the losses sustained through the failure of the Home Bank, which had affected many business houses and practically all the fraternal societies of Fernie. In order to assist the Pythian Sisters of Fernie the Nelson Dokkies took up a collection, which amounted to $60.35. This was donated to the Fernie ladies' organization. On leaving Fernie the local organization was given a rousing sendoff.

VETS FINANCE COMMITTEE EXPRESS THANKS

The Finance Committee of the Vets Sports Day again wish to thank all who so generously subscribed to the subscription list which was published last week and wish to include in it the following names that were, through error, left off:

Kennedy & Mangan $5.00
N. E. Suddaby $5.00
Jos. Podbielancik $10.00
White Spruce Lumber Co. (Lumber) $36.05

The day was a great success from every standpoint and the Commitee would ask that all outstanding accounts against the Sports Day be immediately sent in to the convenor of the committee, D. J. Black, for settlement, and facilitate a speedy accounting of the day's finances, so that they can arrive at the actual amount cleared on the day's proceedings.

NO REPORT RE HOME BANK

No statement has yet been issued by the Curator regarding the standing of the suspended Home Bank. It was expected that this statement would be issued from Toronto today but the only news reaching the city on the situation up to the present is that the court action of several depositors in Eastern Canada to have the affairs of the bank wound up, has been postponed for two more weeks.

Telegrams embodying the resolutions passed at the mass meeting of the Fernie depositors held Thursday, Aug. 30, were duly dispatched by Mayor Henderson to Hon. J. H. King and Sir Frederick Williams-Taylor, Bart., President of the Canadian Bankers Association and receipt of these messages has been acknowledged.

CITY COUNCIL HOLD SESSION

The city council held the first regular September meeting in the council chamber on Thursday evening. Mayor Henderson occupied the chair. Aldermen Graham and Barraclough were absent.

Prior to opening the meeting the council motored to the Annex to examine the new pipe line now being laid. Several failures of the contractor to carry out the work acording to specifications were noted. On returning to the council chambers this matter was discussed and Mayor Henderson was instructed to insist upon the contractor doing the work as outlined in the contract.

A letter was read from the provincial health department acknowledging receipt of the city's application for tubercular tests upon Fernie cattle and stating that these tests would be made as early as possible.

The city clerk read a telegram from the Royal Financial Corporation offering for sale $10,000 worth of Fernie bonds. This was referred to the finance comittee.

Quotations on hay from Lumby, B.C., were ordered filed.

Several acounts left over from last meeting were passed for payment.

The Mayor reported that the old wooden pipe purchased by the Fort Steele company had been shipped.

THE FIRE SITUATION

The government fire wardens have had their hands full in this neighborhood during the past week. The fire in the White Spruce limits is now practically out. Considerable damage was done to standing timber and some loss to cut timber, which is partly covered by insurance. A small fire near the Coal Creek powder house caused some uneasiness on Tuesday, but is now out. A small fire is also burning near Morrissey. The big fire excitement at the present time is just this side of Corbin, where a big blaze is burning in the Crow's Nest Pass Coal Co. limits. The Michel mines have been idle for several days while the men are out fighting. One bad accident occurred on Wednesday when Frank Komar, of Natal, was severely injured by a falling tree. Latest reports from Michel are to the effect that the fire is gradually being subdued, but several hundred men are still fighting it. Some fine timber has been destroyed.

Evidence of Wealth

At present the Canadian people have $1,837,000,000 invested in Dominion of Canada bonds. Their demand depositors in the chartered banks of Canada total $537,340,000. Their notice deposits total $1,227,253,431. Canada's international trade is the greatest it has ever reached, and the national revenue is the highest in the country's history.

B.C. Forest Fires

Cost of fighting B.C. forest fires so far this year has amounted to $20,000 as against $343,000 this time last year, it was learned at the lands department. So far this year 954 forest fires have occurred in British Columbia. Last year at this time 2021 fires had broken out.

MAKE ANTHRACITE FROM WORTHLESS LIGNITE

Washington, Sept. 4.—Completion of apparatus which makes it possible to manufacture anthracite coal from comparatively worthless lignite was announced today by the bureau of mines.

Efforts will be made at once by officials of the interior department, it was said, to interest some commercial concern in the invention in order that its benefits be made available to the public.

BIG GOLF TOURNAMENT

All the Fernie visitors to Blairmoremore for the Annual District Golf Tournament spoke highly of the grand time they had at that town. Sandy Watson was again in the limelight in the big event, losing the cup to McKenzie in the finals after a hard match. Mrs. E. K. Stewart also played off in the finals of the ladies' event, losing to Mrs. McKenzie by a narrow margin.

At the annual meeting of the association held in the clubhouse of the Blairmore Golf club on Monday 3rd September, it was decided that the annual tournament for 1924 be held at Fernie.

The following were elected to the executive:

President — Sherwood Herchmer, Fernie.

Vice-president — D. G. Mackenzie, Blairmore.

Secretary-treasurer — A. J. Kelly, Blairmore.

Stanley Kirkham, of Lethbridge, the big curler, was a prominent visitor and had the following to say of the tournament:

"The Blairmore Golf Club have by a splendid effort assured the life of the Crow's Nest Golf Association. Its tournament is now certain to be a yearly fixture and be looked forward to by all golfers, ladies and gentlemen who reside along the Crow line in Alberta and British Columbia.

The Association is just in its second year. The Cranbrook Club were the hosts in 1922 and got the meet away to a good start.

"As if realizing that superior effort was needed to settle the question of whether a yearly gathering of golfers was warranted in this section of Canada, the Blairmore Club buckled down to work and put over in finished style the most enjoyable and keenly fought tournament ever held in the history of golf in this part of the last great west. It was good.

"Some doubts were felt as to whether the Blairmore course would be fit for play, but by a re-arrangement of the holes and by tireless effort of the members aided by a wet summer, a rough and rusty course was changed into inviting green and pleasant fairways, with smooth and fast greens. One year had worked wonders and Blairmore having one of the most ideal locations has now a sporty nine holes that are second to none in Canada.

Ideal weather conditions favored the three days of sport and crowned the work of the energetic and ideal hosts, not to mention hostesses.

"From Saturday morning at 8 a.m. until Monday at dusk, the Blairmore golf course and club house was crowded with fair ladies and brave men. Every town in the district sent their quota and the Blairmore club welcomed all in such a hearty and comfortable manner that everywhere expressions of pleasure were heard as the visitors gathered to talk things over.

"The tea tables played no small part in the enjoyment and the ladies of the club, after all, if we may be permitted to say, were the ones who left the lasting impression that "Blairmore' spells "Welcome." Their efforts will be appreciated and find pleasant memory, long after that long drive, excellent mashie shot or distant putt, is forgotten."

TRYING OUT ALBERTA COAL IN ONTARIO

Reports from Ontario are to the effect that the trial shipments of Alberta coal being made to that province under the special rate of $7.00 a ton granted by the C. N. R., are in great demand in many centres, and there is a movement to appeal to the federal government to take up the matter of getting an extension of time on the special rate. Howard Stutchbury, Trade Commisioner of Alberta, is now in Ontario supervising the distribution of the special shipment of 6000 tons.

BOON FOR BLIND

A blind man may now read a newspaper just as it comes from the press. It need not be translated into raised type. The optophone, a new electrical device, which transforms each printed letter into a certain definite musical sound, makes this possible.

The optophone, invented by E. Fourrier d'Albe, M.R.L.A., former lecturer on physics at the University of Birmingham, England, and manufactured at Glasgow, Scotland, by a firm of scientific instrument makers, is now being used by blind people in the United States with very satisfactory results. Miss Margaret R. Hogan, a blind graduate of Barnard College, Columbia University, and an instructor for the New Jersey Commission for the Blind, has mastered the use of optophone. As a demonstration before newspaper reporters she read with a marked degree of facility the front page of the day's New York World.

The scientific principle on which the operation of the optophone is based, first told by Dr. d'Albe at the London Optical Convention in 1912, depends on translation of light and sound through the medium of a selenium cell in a telephone circuit. Stated untechnically, it is briefly this —a beam of light, projected through a tiny lense, streaming through five rows of oblong perforations in a revolving disk, is reflected back and transformed into sound by means of selenium cells and is heard by the use of a very sensitive telephone headpiece.

These rays of light, which automatically travel across the printed page a line at a time from left to right, are somewhat akin to the five musical notes — sol, do, re, me and sol again, and produce as they pass over a printed letter a combination of sounds, each letter having a distinct combination of its own. That is, the letter "a" has its own distinguishable high-keyed motif or little purr or whine, always the same and never like the sound of any of the other twenty-five letters in the alphabet. Plain white paper makes no sound at all.

To read by this machine the blind person has first to learn his sound alphabet, starting as the child does and gradually acquiring the ability to identify the letters by their different sound characteristics. This must be done, of course, under the direction of an instructor. Then, like the child again, the blind man learns to read cat, rat and other simple words. It takes some time to learn these light-wave, sound-wave a b c's and simple one-syllable words. Then, gradual practice will enable the student to read his newspaper until he is able to go along at the speed of twenty or thirty words a minute.

The newspaper being read through the medium of the optophone is strapped face down upon a slightly curved glass plate at the top of the instrument, and thus the light ray travels across the print, one line at a time, as does the eye of a normal man.

In the use of the optophone the blind have one advantage over other people. Their sense of hearing is keener and this enables them to distinguish the slight variations in the sound of different letters with greater ease.

The optophone works with any common size of book type, printed on white paper, and while it will produce sound-waves from ordinary typewriting, these are not as easily distinguishable. However, a typewritten page of large boldface type done with a dense black ribbon will be as easily read as print. The optophone is not as yet, nor is it expected to be by those who have charge of the instrument in this country, a cheap instrument because of the delicacy of its mechanism. However, those people who are conversant with its uses feel that eventually this instrument may serve a distinct purpose if it is installed in libraries and other places of public reading. An optophone put in such a place and available to the use of a number of blind people would enable them to expand the field of their reading greatly. At present the sightless are limited for reading matter to works that have been published in raised type.

"The Only Remedy" Says This Doctor

"The treatment of skin diseases (eczema) and diseases of the scalp is known to be difficult," writes Dr. W. L. Randolph. "However, there is one remedy that is known to be entirely dependable in this distressing and troublesome disease. I refer to D. D. D. Prescription."

If you have never tried D. D. D. for skin diseases, whether a small spot, or whether one of the dreaded forms—the torment of eczema or the hard scales of psoriasis—get a bottle at once on our guarantee that if it doesn't relieve you your money will be refunded. $1.00 a bottle. Try D. D. D. Soap, too.

D.D.D. THE Lotion for Skin Disease

Iron Horses Ready For Grain Rush

HERE are some of the engines and box cars, Canadian made for Canadian traffic, which arrived in Winnipeg recently to augment the rolling stock of the Canadian Pacific railway. This equipment is now in readiness for the transporting of western Canada's crop, which bids fair to be one of the largest ever recorded. These additional engines and cars were constructed at the company's shops at Angus, near Montreal, and have been assembled at the Weston shops, Winnipeg, awaiting the call to the harvest fields of the west.

The upper picture shows four trains leaving Weston with a string of approximately 100 box cars per engine. Each car has a capacity of 60 tons. (2) and (3) some of the new freight engines which will be used to haul the grain throughout the three prairie provinces. (4) One of the 55 new P-2 class engines. These engines have a total weight of 252 tons, exerting a traction effort of 55,000 pounds. Their driving wheels are 5 feet 3 inches in diameter; cylinders 25½ in. diameter by 32 in. stroke; the total length being 81 feet, 4½ inches. The tender has a water capacity of 8,000 gallons and 14 tons of coal, which is equal to the average citizen's winter supply of fuel. These engines are known as the P-2 class, numbered in 5,300 series. They have vestibule cabs for the comfort of the engine crew and are electrically equipped throughout. The complete weight of one train hauled by one of these engines, including the engine, is 4,476 tons, of which 3,020 tons would be the carrying capacity for wheat, or 100,660 bushels in each train. The carrying capacity of the 45 engines of this standard is 4,529,700 bushels per trip. Each engine makes one trip a day. Picture No. 5 shows another group of the new Canadian Pacific locomotives. Their capacity and weight rank them among the biggest of their type in the world.

Here and There

Canada's export trade grew $174,000,000 in the first eleven months of the fiscal year ending March 31st.

A recent and popular Canadian Pacific appointment is that of Mr. Walter Maughan to Steamship Passenger Manager. The appointment includes management of the company's passenger business on both the Atlantic and Pacific oceans.

Fire insurance companies found 1922 the most disastrous year for more than 20. The ratio of losses to premiums was 68.64 per cent, British companies suffered most severely, their losses to premiums being 71.48 per cent, mainly due to the Northern Ontario fire.

A gold rush is in full swing and it is expected to bring about the development of more mining camps in the counties of Temiskaming and Abitibi. Gold was discovered in these two counties early in 1922, and a rush of prospectors began in March of that year. In October, 250 claims were staked, comprising 50,000 acres of land, and to date about 90,000 acres have been staked.

In the last fiscal year, Canada imported 1,363,000 pounds of butter from the United States, 297,000 pounds from Australia and 2,254,000 pounds from New Zealand. The total exports of Canadian butter were 8,430,000 pounds.

It is announced that the running schedule of the Trans-Canada Limited, which will operate between Montreal, Toronto and Vancouver, commencing May 20th, has been cut down one hour. Considering the all steel equipment and luxurious appointments and its regular daily on time performance, this is the finest long distance train in the world.

Bungalow camps, such as are operated in the Canadian Rockies, are to be built in the French River, Nipigon Bay and Lake of the Woods districts of Ontario by the Canadian Pacific Railway. Low cost of construction and maintenance will enable the company to offer lower rates than standard hotels. The first three will be ready for occupation by July 1st.

According to a recent rearrangement of ports of call in the Orient, the Canadian Pacific Steamships Limited, by omitting Manila as a port of call between Shanghai and Hong Kong, will bring the latter port four days nearer to Canada, the United States and Europe. This makes possible a through service from London, England, via Canadian Pacific Atlantic Empresses to Quebec and rail to Vancouver and via Canadian Pacific Empresses to Hong Kong under 28 days.

During the year 1922 the Canadian Pacific Railway handled a total of 8,435,825 pieces of baggage as compared with 8,732,674 for the previous year. Of this amount 5,175,203 pieces were passengers' baggage which compared with 5,486,455 for the previous twelve months. 9,697 bicycles were handled, 13,336 dogs travelled as baggage and 23,988 baby carriages were moved. There was also a considerable increase in the movement of milk. In 1922, the Company moved 1,623,707 cans as against 1,614,791 in 1921; and it is remarkable that most of this increase was in the three provinces, Manitoba, Saskatchewan and Alberta, which is an apparent indication of the further development of mixed farming in those provinces.

One of the best examples of a town "growing up over night" is that of Climax, the end of steel on the Consul-Assiniboia branch of the Canadian Pacific Railway. All that there was on the quarter section on February 19th, the day on which the site of the new town was finally settled, was a homesteader's shack and a small barn. When the steel was laid in Climax on March 15th there was a restaurant, one rooming house, over a score of dwellings, two blacksmith's shops, a drug store, gents' furnishing store, a big general store, pool room and barber shop. The new town is situated in four large flat warehouses in which nearly 100,000 bushels of grain were stored, and a butcher shop. The new town is situated in Lone Tree R.M. number 18, about 30 miles south of Shaunavon.

Only once in the history of Canada was the gold production record set in 1922 exceeded, and that was in 1900, when the Yukon placers reached the peak of their yield. During 1922, 1,263,364 ounces of gold were mined in the Dominion. The value is set at $26,116,050, an increase of 36% over the previous year's figures. In 1900, 1,350,057 ounces of gold were mined and the value was $27,908,153.

An article ought to be inserted in international law prohibiting any nation from engaging in war without the consent of its creditors.

It is estimated that $17,000,000 worth of whale oil has been taken out of Antarctic waters this season. This may explain why locating the South Pole is such a slippery proposition.

A test of the comparative pulling power of horses and mules is to be made at the Iowa state fair. No device has yet been invented that can register the energy contained in a mule's kick.

NOTICE OF CANCELLATION OF RESERVE

NOTICE IS HEREBY GIVEN that the reserve covering Lot 12747, Kootenay District, is cancelled.

G. R. Naden,
Deputy Minister of Lands.

Department of Lands,
Victoria, B.C.,
August 30th, 1923. S7-60d

TIMBER SALE X1933

Sealed Tenders will be received by the Minister of Lands at Victoria, not later than noon on the 28th day of September, 1923, for the purchase of Licence X1933, to cut 1,869,969 feet of Fir, Larch and Spruce, and 26,115 Railroad Ties, on an area situated 2¾ miles East of Bull River, Kootenay Land District.

Two (2) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B.C., or District Forester, Cranbrook, B.C. S7-4t

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, up

VICTORIA NEWS

Victoria, Sept. 5.—There was a decided improvement in industry throughout British Columbia last year, according to the fourth annual report of the department of industries, just published by the government. There was also a marked renewal of interest in the vast wealth of raw materials of the province.

Included in the report is an elaborate directory of products manufactured in British Columbia, a work which required a great deal of research and time on the part of the department. There are 482 different articles manufactured, with 2718 establishments operating in the province. During the year the department of industries distributed 15,000 copies of the directory.

The report points out that the average B.C. products is equal to, if not better than, the article imported or brought here from Eastern Canada, a point often unappreciated by local consumers, who would save money and encourage home industry by selecting B.C. products where possible.

The minister of industries points out that British Columbia exports too many products in the raw state; copper, zinc, lumber, lead, silver, fish and particularly agricultural products. At the same time canned soups, vegetables and fruits are imported in large quantities.

Reorganization of the government printing office here has been completed by Hon. Dr. MacLean, provincial secretary. Under the new system it will be possible to tell to a cent the cost of every piece of printing undertaken. The government printing office is the largest in the province and is considered one of the most modern on the continent. The service costs approximately $250,000 a year. Among other work handled is the printing of the B.C. Gazette, the largest publication in the province outside of daily papers.

The largest collection of illicit liquor ever in the possession of the attorney-general's department is doomed to destruction, an order in council having been passed authorizing the step. It is bootleg whisky of doubtful origin and none of the stuff is considered fit to sell in the government stores.

As an evidence of his activity in curbing the illicit operations of clubs in British Columbia, Attorney General Manson announces that during the past two years the licences of 96 clubs have been cancelled. Three Oriental clubs are included, the balance being "white" clubs. Of this total 68 licences were cut off because of liquor activities of the clubs.

Hon. T. D. Pattullo, minister of lands, takes objection to the wording of a report of statements made at the Empire Forestry Conference that logging was a wasteful operation in British Columbia. He said that the leaving of a large amount of timber in the woods was due to the fact that a certain percentage of timber was not suitable for the markets open to B.C. lumber, but on the whole lumbering in this province was being carried on most economically.

o

In the event of a war between Italy and Greece what will become of the shoe shines, fruit stands and restaurants in this country?

Fixing a minimum tonnage for bootlegging craft places the small boats in the mosquito fleet class. The owners admit that they have been stung.

Mr. Lloyd George's proposed visit to Canada appears to be a moveable festival. One day he is reported to be packing his suitcase and the next that he has cancelled his steamer reservation.

PAYING ON TIME

(By Walt Mason)

I send my check to Hiram Heck, to pay my monthly bill; he deals in rice and shredded ice, and labors with a will. We often meet upon the street and Hiram says, "Hurroo! You always pay upon the day when monthly bills are due. Oh, other skates forget the dates when they should dig the dough, and I must sigh, as days go by, for sesterces they owe. Some thoughtless gents owe fifty cents and some owe seven bones; they all will pay, upon a day, meanwhile my spirit groans. The wholesale guys who sell me pies and things in which I deal, in thirty days a rumpus raise, for plunk and buck and wheel. If all would pay upon the day when monthly bills are ripe, my life would seem a joyous dream, but now my name is Tripe. Some heedless lads owe many scads, and others owe a few; if all would write their checks tonight, I'd dodge my Waterloo." The man who pays gets such bouquets wherever he may go; he plays the game and wins a fame that has abiding glow. And men who fail to dig the kale when kale is due, by rights, obtain renown throughout the town as being tinhorn wights.

BEECHAM'S PILLS

The Importance of Being Pretty

Many a girl's fortune is determined by her face. A skin which is fresh, smooth and alluring with the radiance of health, predicts a happy future, because this is the greatest of all womanly charms.

Every girl can have a beautiful, attractive skin if she will only learn to give it proper care.

The constant application of cold creams, lotions, powder, and rouge tend to make the skin sluggish and inactive. Dirt accumulates and blackheads and other blemishes appear.

Thorough cleansing once a day prevents such a condition and keeps the complexion fresh and smooth. Cold Cream is beneficial when applied to a clean skin and rouge and powder are harmless beautifiers—but—start fresh every day on a clean foundation. Keep your skin active and it will be clear, fresh, youthful and attractive.

Soap to be thorough, need not be harsh. The mildest toilet soap made is the most thorough of all cleansers, as you will know after you have once tried Palmolive.

You can buy Palmolive Soap at all first-class dealers.

Here and There

Panama canal tolls for April amounted to $1,878,987.

About $2,300,000 is to be spent on the construction of roads and bridges in the province of British Columbia this year.

The Customs and Excise revenue for April amounted to $20,500,000, an increase of $5,000,000 over the receipts of April of last year.

Emigrants numbering 15,000 left Scotland for Canada during the first four months of the year, according to consular estimates in Glasgow.

Canadian flour has at last been placed on the Panama market. One boat has just loaded the first consignment of any size, 1,000 barrels being taken.

Seventy-five per cent. of the copper produced in Canada in 1922 was the output of British Columbia mines. The Canadian production for the year was 43,321,402 pounds, of which British Columbia accounted for 32,432,521 pounds.

The famous Chateau Frontenac husky dog team, remembered by visitors during last winter's sports season, is being perpetuated. One of the dogs has just given birth to three pups, and if the youngsters turn out to be like their parents the Chateau Frontenac team is likely to continue winning dog derbys.

Fishing licenses in the Maritime Provinces have been reduced. The special fishery regulations for Nova Scotia, New Brunswick and Prince Edward Island have been amended to provide that in many instances where the license has been more than a dollar it will now be one dollar.

No limit will be set to the help to be offered to new settlers in the agricultural sections of the province of Quebec, according to Premier Taschereau. The latest government provision is to pay colonists at the rate of $4.00 per acre for land cleared on their colonization lots since 1920. $7,000,000 have been voted for provincial colonization.

The decision of the Canadian Pacific Railway Company to scrap agreements of sale with 30,000 Canadian farmers in the west and enter into new contracts with them, extending over 34 years on an amortization basis, will affect agreements of a value of approximately $100,000,000, and relieve many farmers of heavy, pressing debts.

The new motor ferry operated between Victoria, B.C., and Bellingham, Wash., develops a speed of 14 knots in adverse weather. This motor driven vessel, recently launched, is the first of its class to be used in this service and the first to be added to the Canadian Pacific fleet. It has a capacity for 50 automobiles.

Abraham Martin, first Scotch settler in Canada, first King's Pilot on the St. Lawrence and first farmer on the Plains of Abraham, which were named after him, has been honored by the Canadian Pacific Steamships, Ltd., at Quebec by the erection of a granite shaft. Hon. Athanase David, Provincial Treasurer of Quebec, officiated at the unveiling ceremony recently.

Two thousand Canadian Red Men are expected to participate in the Calgary stampede and to move on to Banff for their celebrations and pow-wow on the Indian Days, July 16th and 17th, during which the citizens of Banff will act as hosts. Pony racing, wrestling on horseback, shooting with the bow and arrow, tent-pitching and camp making contests are among the features.

The regular monthly meeting of the Mount Fernie Chapter I.O.D.E. will be held in the council chamber at 3.30 o'clock on Saturday, Sept. 8. A full attendance is requested.

The regular monthly tea of the Ladies Guild of Christ Church will be held at the home of Mrs. F. C. Lawe, on Wednesday, Sept. 12, from 3.30 to 6.00.

All Rebekahs and Odd Fellows are invited to a corn boil at the home of Mr. and Mrs. John Minto, Cokato, on Monday evening next. They are requested to meet a 7 p.m. at the home of Mr. and Mrs. Puckey, Baker avenue and from there proceed to the Minton ranch.

SCOUTS HAD GOOD CAMP

The Fernie Troops of Boy Scouts returned to the city last Saturday evening after having spent ten days under canvas at McBain's Lake and all report they had the time of their lives.

The camp this year was a novel one for the local boys, each patrol having to do its own cooking, which allowed every one of the boys to pass one of the most important of their tests—cooking over a camp fire. Thirty boys took part in the outing under the care of Scoutmaster Donaldson, and the report of work done along scouting lines shows that the camp was one of the most successful ever held in the district.

In the shooting competition for the Crow's Nest Trading Co. Cup, Patrol Leader Jack Larmont of Coal Creek came first with a score of 224; Scout L. Rudnicki came second with 175; Scout T. Wilson third with 165; and Patrol Leader R. Garner fourth with 164. These four boys will each be awarded a shooting medal to be held for one year.

The following is a complete list of the boys taking part in the camp and the tests they passed:

Stage Patrol—
R. Garner, P.L.—Marksman, Rescuer.
D. Wallace, 2nd—Swimmer, Rescuer.
G. Williams—Cooking, Pace, Fire, Swimmer, Rescuer.
J. Irvine—Cooking, Pace, Swimmer, Fire.
T. Wilson—Cooking, Pace, Fire, Swimmer, Marksman.
A. Fisher—Cooking, Pace, Fire, Swimmer, Rescuer.

Beaver Patrol—
A. Littley, P.L.—Swimmer.
A. Stockwell, 2nd—Rescuer.
S. Edgar—Cooking, Pace.
C. Mangan—Cooking, Pace, Swimming.
H. Naismith—Cooking, Pace, Fire, Swimmer, Rescuer.

Wolf Patrol—
H. Fleming, P.L.—Swimming.
L. Rudnicki—Marksman.
D. Corrie—Cooking, Pace, Swimming.
G. Alexander — Cooking, Pace, Swimming.
K. Alexander — Cooking, Pace, Swimmer.

Eagle Patrol—
R. Workman, P.L.—Swimmer Rescuer.
T. Puckey—Swimmer, Rescuer.
J. Larmont—Marksman, Swimmer, Rescuer.
G. Snow—Swimming.
G. Corrie—Swimming.
H. Corrie—Swimmer, Rescuer.

Bull Dog Patrol—
A. Markland, P.L.—Swimming.
J. Carlson—Swimmer.
J. Hilson—Cooking, Pace.
T. Kobus—Cooking, Pace.
F. McVannell—Cooking.
J. McPhee—Cooking, Swimming.
E. Kuske—Cooking, Fire.

The boys wish to express their appreciation of those Scout enthusiasts who came forward to transport them to and from the camp and to the Rotary Club, the Rev. Mr. Burns, Dr. Garner, Mr. and Mrs. Corrie and Mr. Hartley Wilson for the treats they brought out to camp for them.

SEVEN YEARS OF TORTURE

Headaches and Indigestion Ended By "Fruit-a-tives"

The Marvellous Fruit Medicine

Like thousands and thousands of other sufferers, Mr. Albert Varner of Buckingham, P.Q., tried many remedies and went to doctors and specialists; but nothing did him any good.

Finally a friend advised him to try "Fruit-a-tives"—now he is well. As he says in a letter:

"For seven years, I suffered terribly from Headaches and Indigestion. I had belching gas, bitter stuff would come up in my mouth, often vomiting, and was terribly constipated. I took Fruit-a-tives and this grand fruit medicine made me well".

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent by Fruit-a-tives Limited, Ottawa, Ont.

A CORRECTION

Our reporter inadvertently made an erroneous statement in saying that the 3½ lb. trout caught by N. E. Suddaby was the largest caught in the district on a fly. Mr. Suddaby only stated that it was the largest bull-trout he had caught on a fly.

ALBERTA AND THE TOURISTS

It is estimated that tourists in British Columbia left thirty-five million dollars in that province in the period of twelve months. These figures should be put in the largest type possible and made to decorate the office of the Alberta Minister of Public Works. The Hon. Mr. Ross seems to have been asleep on his job all year. He fails to value the tourist business because he has neglected to maintain the main traffic highways in the Southern part of the province at any rate. Tourists do not need to be told that they are in Alberta. They know it as soon as they strike the roads. Take the highway from the B.C. boundary east to Macleod. It was a black eye all summer to tourists coming out of B.C. They get the worst possible impression about Alberta and its roads, and we are told that conditions are not much better in other sections of the South. Now what does it mean? If tourists can spend thirty-five million dollars in British Columbia there is reason for Alberta to look forward to a tourist business that will mean the expenditure of a few million dollars at any rate in this province. We have as attractive mountain resorts as B. C., and they are more accessible by motor. The tourist who travels in B. C. and finds the roads well kept and then comes over to Alberta and runs into poorly maintained highways is not likely to go away boosting this province. Rather there is a danger that he will warn people to keep away from Albera. If the Alberta government is alive to the value of the tourist business it will get busy and do something to better our highway system. With our mountains and lakes and streams we have real magnets to pull tourists, but as long as our roads are neglected as they have been this year it will be discouraging rather than encouraging tourists to come to us.

Alberta is far behind B. C. in its road policies. It may not be known that B.C. is constructing a fine highway just over the boundary from Waterton Lakes. Were the road to Oil City in better repair and a little money spent upon the road already constructed from Oil City to the B.C. boundary it would be possible now to motor with comfort a considerable distance into the interior of B. C., and it will not be long until the B.C. road is linked up with the main highway around Fernie. Later it is expected that Montana will build a highway to the boundary from Kalispell, and B.C. will tap it from the North. This means much to Alberta, as by putting the main roads to the Waterton Lakes in the very best condition this province can bring to it a great motor traffic from the States over the new road from Kalispell into B.C. and then east into the Waterton Lakes Park and Alberta.

Does Mr. Ross know what B. C. is doing? Is he attempting to tap this new tourist road? Has he travelled to the B. C. boundary along the roads mentioned to find out the wonderful attractions of the mountain scenery in that section? It will be the business of the Dominion government to keep the highway in the Park section in proper shape for traffic, but it is Mr. Ross' business to maintain the provincial highways leading to it.—Lethbridge Herald.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

LOCAL & GENERAL

W. R. Wilson is at the coast on business.

Geo. Meade has taken a position in the provincial police office.

Mrs. (Dr.) Bonnell returned yesterday from a trip to the coast.

Mrs. R. G. McEwan and Miss Mary Dragon left yesterday for a ten days visit in Vancouver.

H. R. Huntington returned on Friday from a three weeks' trip to the coast.

Fernie is expecting another visit from the Blairmore Golf Club in the course of the next few days.

In the Wilson Cup competition on Sept. 4, Mrs. J. L. Gates was the winner. Score 57-26—31.

The customs receipts for the month of August at the local office were $48,921.44. For the same month last year the amount was $41,189.78.

A change in the Game Act was made last week making the open season for bear from the 1st of September instead of Sept. 15.

The hotels in the city were taxed to their uttermost for accommodation during the past week end, the many attractions of the G. W. V. A. sports drawing large crowds.

Mr. and Mrs. Ernest Neidig returned on Monday after a pleasant time spent around Creston. Ernie says the roads are O.K. and the fruit, oh boy!

The regular monthly meeting of the Women's Missionary Society will be held on Tuesday evening at 8 o'clock at the home of Mrs. Adlard, No. 150 McPherson Ave.

There will be a meeting of the Fernie District Rod and Gun Club in the council chamber of the city hall, on Monday evening, Sept. 10, at 8 p.m. All members are requested to be present.

The members of the Dramatic Order Knights of Khorassan sure created a furore during their visit to town. The torchlight procession held on Monday evening was a fiting climax to a good day's sport.

The long dry spell of weather is beginning to cause trouble at Coal Creek, where the stream is practically dry. The mines have been idle several days this week owing to lack of water for operations.

Wm. Sherman is up in the Drumheller field this week trying to induce the men in that field who are out on strike to return to work. Bill seems to have his hands full with the constant turmoil up north. It is reported that Rosedale and Wayne have voted to go back to work.

The schools opened on Tuesday morning with a full attendance. The new addition to the public school is almost completed and is being used. The High School will use one of the rooms in the new addition. There will be no fourth year division in the High School this year.

Ingram's 150 Gym has been the headquarters all week for Fernie's sporting element, where Cyclone Thompson, of Chicago and Ernie Arthur are in daily training for the big wrestling match which comes off on Saturday night. Both men are in the pink of condition and seem to be well matched and as the contest is for a $1000 purse a big crowd will no doubt be present. Several snappy preliminaries have also been arranged for the evening. Ringside seats $2.00. General admission $1.50. A new raised platform has been put in and the seating is first class.

The Western Amusement Co., a big collection of small attractions, have been running in WestFernie all week and doing a good business. Some of the games are of the sure thing variety and a small sized riot was started on Tuesday evening when a group of suckers who had been playing against one of the shell attractions got suspicious of a local man whom they became convinced was working with the man who was running the game. The man, who is a well known foreigner named "Pete" was seized by the enraged crowd and severely beaten, afterwards being thrown into the river. He was finally rescued by the police and taken to the hospital for repairs. Several of the assailants were arrested and fined $25 and costs the next day.

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Bishop Wilson has purchased a new model McLaughlin car.

Born—In Fernie, on Aug. 23, to Mr. and Mrs. H. McLaughlin, a son.

Jas. Corbett is holidaying over in West Fernie.

Suggestions are being made around town that the G.W.V.A. ought to run a night carnival before the winter.

Mrs. A. I. Fisher and Mrs. J. R. Wallace returned on Sunday from a week's camping at McBain's Lake.

Mrs. Geo. Bell, of Regina, is the guest of her sister, Mrs. H. A. Wilkes.

Supt. of Provincial Police McMullen was expected in town this week, but he only came as far as Nelson.

Mrs. Corning, of Victoria, who has been the guest of her sister-in-law, Mrs. G. G. Moffatt, left for the coast on Sunday.

The regular monthly meeting of the Ancient Order of Foresters will be held in the Odd Fellows hall on Friday, Sept. 14, at 8 p.m.

The regular monthly meeting of the Ladies Aid of the United Church will be held in the church on Monday, Sept. 10, at 3.30 p.m.

Isaac Moseley, of Burton City, with his family, motored through Fernie on their way home from a week's visit with friends at Michel. Ike is one of the Fernie people who has made good in the fruit district.

The Pythian Sisters wish to sincerely thank all who contributed to the success of the D.O.K.K. banquet, especially those who so generously donated flowers and lent table necessities.

A. C. Lawrence, of Nelson, District Agent for the North American Life, who makes periodical trips to Fernie, was in the city this week on his last visit, as he is being transferred to the Toronto office.

The Women of Mooseheart Legion will hold their annual sale of work and home cooking in Victoria Hall, on Thursday, September 20. There will be a fish pond and other attractions for the children. Dance in the evening. a17|5

Among the Fernie visitors to Blairmore for the golf tournament were Mr. and Mrs. A. Watson, Mr. and Mrs. S. Herchmer, Mr. and Mrs. H. Hayne, Mr. and Mrs. E. K. Stewart, Mrs. A. C. Liphardt and D. Mitchell.

Considerable fun was caused on Monday when a couple of Dokkies stole a Chinaman's horse and cart and started for a wild ride up Victoria avenue. The poor Chink thought he was ruined and quickly summoned the police in an effort to capture the thieves. The Dokkies continued their sport for some time until the trail became too hot for them, when they disappeared, leaving the cart at the south end of the city.

WANTED—Competent lady would like housework by the day. Mrs. A. Zuffa, 156 Dalton Avenue.

WANTED—Girl for general housework. Apply Mrs. G. S. Appleyard, Riverbank Avenue.

WANTED — Girl for housework. Apply 132 Howland Avenue.

WANTED—Girl for general housework. Apply Mrs. T. McGladrey, 120 Thompson St.

FOR SALE—One practically new Victrola Cabinet Gramaphone and records. Apply to P.O. Box 528, City.

WANTED—A good maid for private small family out of town. Must be able to assist in cooking. Wages $25. Good home for steady girl. Apply at Free Press Office.

Mrs. Marchbank's Kindergarten School will open at the BAPTIST MANSE on Wednesday, September 5, at 9 a.m. Phone 10 or call 73 Pellatt Ave. a31|3

DRESSMAKING—Ladies Dresses and Sport Suits a Specialty; also Children's wear and plain sewing. Work called for and delivered. Apply Mrs. W. Abey, Chipman Avenue. P.O. Box 725. S7-3

FOR SALE—Chevrolet Car in good condition. Apply, C. Gillette, Beaver St., West Fernie. a31|2

FOR SALE OR TRADE—One American Abbel 46 h.p. Steam Engine, suitable for small saw mill, apply T. C. Milnes, attorney for Executor F. Downs' Estate, Claresholm, Alta. a31|6

FOR SALE—Seven room house on ¼ acre lot, situated on McLeod Ave., West Fernie. Modern conveniences. Terms: Cash or time. Apply Louis Proudlock, P. O. Box 775. a24|3

FOR SALE—Willis piano, practically new. Cheap for cash. Apply, A. Derby, Waldo, B.C. a24|3

PAUL ALBO—Ladies' and Gent's Tailor; also cleaning, pressing and alterations a specialty. Goods called for and delivered. Cox St., opposite the Post Office. a10|tf

CATS AND DOGS

London Times

With permission, I would like to call attention to the momentous subject of cats—cats and dogs, but more especially cats.

Doubtless, we are the people—we humans—as Mr. Kipling has told us. It is around us that the universe revolves. For our exploring the world was fashioned and for us the spheres make their music. We are rightly proud of our progress and civilization. "A century ago," asked Sydney Smith a century ago, "who would have believed that country gentlemen could be brought to read and spell with the ease and accuracy which we now so frequently remark?" And since then how have culture and enlightenment spread and how infinitely more gracious, more sober, more civil-spoken has society become! And so engrossed we are in our own improvement that we have had no eyes for the much greater revolution that has been going on around us.

It was but yesterday that cats were notoriously the associates of witches and in league with the evil one. Poets classed them among the obscene beasts, lumping them with night-ravens, bats, death-boding owls and such gruesome and unholy things. When the witches disappeared, cats ought to have disappeared too; and all that saved them was their utility as killers of mice. Topsell has told us all about it. The cat, he explains, is a most dangerous beast, so poisonous that mere contact with a single hair might raise wens on a human being or produce the King's Evil; but "as, for necessity, we are constrained to nourish them for the suppressing of small vermin, so, with a wary and discreet eye, we must avoid their harms, making more account of their use than of their persons." So the cat was tolerated for its use; but it lived a hunted thing, nocturnal, saving its life only if it ventured abroad in daylight by a nunrivalled ability to vanish suddenly through area railings and to climb trees. Grimalkin had need of all its nine lives. To be good at killing cats was high recommendation for a dog; and, in the boyhood of all men over middle age today, to go hunting cats with terriers was, for boys, hardly less legitimate sport than hunting foxes for their elders.

But observe the cat—the common London cat—today! See with what easy confidence, what leisurely insouciance. it strolls along the pavement of a busy street, careless of passers-by, or sits to lick itself upon the kerb, disdainfully indifferent to the hands that reach to stroke it. Go seek the quiet squares of Begravia or Kensington and see puss sit to perform elaborately its toilet in mid-roadway, hardly stopping to throw a casual glance at the terrier that passes snifting along the pavement. Observe it sleeping soundly on the doormat at the top of a flight of four or five steps where any passing dog could rush it in its stride! Is this the animal which, but a human generation ago, eked out a shameful, hurrying, twilight life, the legitimate prey of any dog, the common quarry of every errand boy?

Chiefly, doubtless, the revolution in cat-nature is only a reflection of the change in the human attitude towards the cat. In the course of the last generation the cat has become a fashionable cult, and these silken beauties of the show-benches—snow-white with eyes of turquoise, night-black or blue-grey with eyes of golden amber, "smoke" or tortoiseshell with the gloom of thunderclouds in their faces—and the kitten (delightful balls of fluff to whom the whole world from birth is but a plaything and whose every gesture is loveliness itself), what man or boy or all that is at enmity with joy could find it in its heart to harry or kill these things? Dieu a fait le chat pour donner a l'homme le plaisir de caresser le tigre.

How long is it since the reader saw a dog kill a cat? How long, for that matter, is it since he saw a dog fight—a serious fight an outrance—in the street? Towards dogs as towards cats is in less degree, the human attitude has changed, and, in their degree, the animals have responded. Since dog fighting, bear baiting, bull baiting ceased to be legitimate sports, we have ceased to train dogs for their mere savagery; and the kennel clubs, as the cat fanciers, have developed classes and breeds of dogs of gentler natures; creatures to be petted and much too precious to be allowed to hazard themselves in promiscuous brawls. To lead a dog's life now might well be no great hardship.

Just as, in twenty years, we have seen a generation of horses arise indifferent to motor cars, so, almost as quickly, cats have learned to shed their fear of dogs and boys, and dogs—not all dogs yet—have learned that cats are not wild game. In the course of half a century or so, under the benign influence of human kindness and human patronage, they have done almost what it took mankind itself many thousands of years to do; emerged from savagery to civilization; abandoned the lives of human hunter and hunted for the ordered ways of a society bound by the restraints of law and self-respect. It is a wonderful thing; more wonderful than any revolution that has taken place in human mortals; and if the progress continues for another generation, to what pitch of insolence cats will attain it is impossible to guess.

But, at least, we can reflect that it is human influence that has wrought this miracle. After all, we are still the people.

Here and There

Nearly four thousand men were recruited by the Canadian Pacific Railway agents in England for work in the harvest fields of the Canadian West.

A sudden demand for wheat in Scandinavian markets has caused increased activity in the movement of grain through Vancouver. Four boats left with bulk wheat for ports of Norway and Sweden, marking the first direct grain shipments from the Canadian Pacific coast to Scandinavia.

The rapid increase in the export butter trade of Saskatchewan during the past year or two has been the outstanding feature of the provincial dairy industry. Recently the Saskatchewan Co-operative Creameries made a shipment of 25,000 lbs. of butter to China.

The export of gold bullion, gold coin, and fine gold bars from Canada, except as deemed advisable by the Minister of Finance, and as licensed by him, is prohibited until July 1, 1924, by proclamation issued in the current issue of the Canada Gazette.

Breaking all 1923 passenger traffic records, the Canadian Pacific S.S. "Metagama," westbound from Glasgow via Belfast, docked recently at Quebec, and Montreal the same evening, with a record number of 382 cabin and 1,078 third-class passengers.

"There are hundreds of first class farm workers in Scotland anxious to come to Canada, and the finest material Canada could wish for, but their wages are sufficient to barely support them and they are unable to accumulate funds for the passage." This is the opinion of Thomas Scotland, of the Canadian Pacific Railway Colonization and Development office in Glasgow, who recently arrived in Canada with a party of Scotch immigrants bound for the western provinces.

To J. K. L. Ross, director of the Canadian Pacific Railway, goes the honor of catching the world's record fish with rod and reel. At St. Ann's Bay, N.S., he landed a tuna weighing 712 pounds; length, 9 feet 2 inches; girth, 6 feet. Commander Ross used a Vom Hofe tuna rod and reel, No. 39 thread line, with mackerel for bait. His catch took three and a quarter hours to land.

The world's wheat crop this year is estimated at 3,318,000,000 bushels, as compared with 3,104,000,000 bushels last year, an increase of 214,000,000 bushels, according to figures carefully compiled by the International Institute of Agriculture at Rome. The estimated shipments from supply countries of the world for this year is 690,000,000 bushels, of which Canada is expected to supply 290,000,000 bushels, or about one-third.

Canadian trade with Australia is on the increase, according to returns made public by the Bureau of Statistics. Canadian exports to Australia for the twelve months ending with June were $19,824,239 as compared with $12,200,468 for the corresponding [illegible] ending June, 1922. Canada's imports from the Commonwealth have also increased. The imports from Australia for the last twelve months were $1,545,829, as compared with $1,275,871 for the year previous.

The total value of the pelts of fur-bearing animals taken in the Dominion during the season of 1921-22 was $17,438,800, an increase over the previous year of $7,287,273, or 72 per cent., and the number of pelts of all kinds was 4,366,790, an increase over the previous season of 48 per cent. These figures comprise pelts of animals taken by trappers and pelts of ranch-bred animals.

Tests of ceramic clay resources in British Columbia are being planned this summer by the British Columbia Government. The tests will be made under the auspices of the Department of Education and the Department of Industries. There are many varieties of clays in British Columbia and some are reported to be particularly suited to the manufacture of high class pottery ware.

A reduction of express rates on westward moving business between Europe and Canada was announced by the Foreign Department of the Dominion Express Company recently. This reduction on westbound shipments follows a similar cut on shipments from Europe to Canada made a little while ago, and amounts to a reduction of approximately twenty per cent. on the trans-ocean trip. The rates came into effect on July 9 between all points in Canada and Europe.

The Banff-Windermere highway, the last link in the 6,000-mile chain of good roads which extend from the heart of the Canadian Rockies to California and return is now open to motor traffic, having been officially opened on June 30th by the cutting of a riband at Kootenay crossing in the presence of a number of Federal and Provincial Government officials, and a host of automobile tourists. The completion of this road has rendered accessible the most beautiful scenic country on the continent.

During the last fiscal year Canadian exports of tobacco amounted to 471,991 pounds with a value of $175,826. Of this value the United Kingdom accounted for $135,784, the United States $5,216 and other countries $34,826. There are 125 tobacco factories in Canada, Quebec and Ontario being the principal producers.

HUGE LOCOMOTIVES OF THE MIKADO TYPE ARRIVE FOR FALL GRAIN RUSH ON C.N.R.

New locomotives of the Mikado type for the movement of the 1923 grain crop over the Canadian National Railways have begun to reach the West. The new locomotives, which were built at Montreal, are of the latest type with all new improvements. They are 73 feet in length and weigh approximately 450,000 pounds with a drawbar pull equal to 5,500 tons. The engines, which are for freight use, are equipped with automatic stokers, Westinghouse air brakes and air reverse and have the new type of Worthington feeder, water heater and pump. One of the changes in the new engine is the cab design, all mountings being installed in a box outside of the cab instead of inside the cab as in former types.

Twenty-three of the new engines are coming West for the Manitoba division in time for the beginning of the grain movement and 22 are coming for the Saskatchewan division. An idea of the size of the new engines may be gathered from the fact that before starting out on a run they require 12 tons of coal and 8,300 gallons of water to complete their tender supplies. The new engines are all equipped with the Booster truck and ten of those to be delivered later will have Booster engines installed. These provide practically additional motive power on the tender and are of great value in starting heavy trains. The engines are being placed in service as quickly as they reach the Western divisions.

CHEAP "GAS" —BUT COSTLY

"Fill her up!" was the motorist's glad cry in South Dakota, where recently the State began selling gasoline at sixteen cents. But it soon appeared that Governor McMaster had "started something he could not stop," for down came the Standard's gasoline to the same figure, and the price wave spread through several Middle-Western States. Loud, therefore, is the protest from the independents, who "see only bankruptcy ahead," while, so they assert, Standard Oil is in a fair way to supplant them altogether. However, when Governor McMaster described the former price of 26.6 cents a gallon as "no less than highway robbery," the oil business was suffering, not from a shortage of oil, but from a sudden and most embarrassing oversupply. In California there has been an unexampled production of crude oil. It comes East, flooding the market until, as the press informs us, the mid-continent oil producers have sought relief in a thirty-day shutdown. Explaining this "orgy or oil" The Petroleum World (Los Angeles) tells us:

"The chief cause of this rapid increase in production in California is the unparralleled development wtihin the past year of three great new fields —Huntington, Santa Fe and Long Beach. Not only are these fields especially rich in high-grade oil, but they are situated within sight and virtually in the limits of large cities. There is, then, no transportation problem to speak of. Produced on the seaboard, it is comparatively easy to load the oil on tankers to be delivered to refineries on the Atlantic Seaboard in competition with mid-continent oil. There is another factor worth mentioning in this connection. While the big established California companies hold substantial leases in these fields, a large percentage of the oil is in the hands of wild-catters and small independent producers. Their business outlooks are diametrically opposed. The 'fly-by-night' is there to get all the oil and money as quick as possible. "Do it now' is his motto. There are dividends to be paid to stockholders years hence. Reserves must be accumulated over a period of years to take care of future needs."

Hence this type of concern is reluctant to "Plunge in a frenzied manner into the argy of oil." And yet—

"In order to protect its leases it must indulge to some extent. This is the answer to the California production figure which mounts steadily week by week.

What is the result? Needless to say, it is great overproduction and vast sums of money wasted in the unnecessary drilling of wells. The price of oil has fallen rapidly. Cut after cut in price has gone into effect since the first of the year in both the California and mid-continent fields, in many instances amounting to fifty per cent. The price of oil, as of most other commodities, does not depend upon the rate of consumption or production taken by themselves alone. It is the result rather of the relation between the two. If consumption is increasing more rapidly than production, prices will tend to rise. If consumption increases less rapidly than production, prices will tend to fall. The latter is the case at present. Supply is greater than demand.

"With California oil a drug on the market, and consequently very cheap, oil prices in other centres have been adversely affected. For the first time in history, California crude oil is moving to the East. As has been pointed out, the new California fields are close to cheap transportation. A tankers was available because of the decline in Mexican production. By an all-water route through the Panama Canal great quantities of the California product—1,350,000 barrels in one week—have been shipped to Eastern refineries. Prices have been cut elsewhere to meet the competition price of California oil laid down in the East.

"The West Coast dominates the situation today. Production there was hailed as the Mexican supply began to fall off. Now the Mexican question dwarfed into significance. California has eclipsed even the wildest dreams of her own boosters. When will it cease? Certainly it must soon. If not, oil conditions will become chaotic. At the present rate of increase, daily producton will soon pass the 1,000,000 barrel mark."

As the Petroleum World goes on to say:

"A report from California states that the new wells in process of drilling, and which are due to be completed by November 1, in the three new fields have a total production capacity estimated at 746,000 barrels daily. This in addition to the present output makes a total of 1, 576, 000 barrels daily. In other words, California would then be producing what would now be 70 per cent of the total oil production of the United States. What would happen to prices, and therefore earnings, under such circumstances is hard to estimate."

From this it will be seen how apprehensive was the mood prevailing throughout the oil business even before Governor McMaster opened fire on gasoline prices and "started something he was unable to stop." Subsequent developments have not tended to reassure the independents. As an Associated Press dispatch from Chicago declared on August 13:

"Many of the small refineries are threatened with failure unless they are protected and obtain a price that will equal the cost of production.

"In South Dakota, where Governor McMaster obtained a large quantity of gasoline to be sold by the State at sixteen cents a gallon, gasoline sold yesterday for 15.5 cents a gallon—the lowest price in ten years.

"Independent dealers in South Dakota say they see only bankruptcy ahead, and at Milwaukee, Wisconsin, where a three-cent production is predicted, George F. O'Neil, president of the O'Neil Oil and Paint Company, declared that unless the Oklahoma producers can be protected they will be forced out of business. It is elaborate equipment for serving the public that gasoline companies must maintain in order to compete, that is responsible for the apparent high cost of gasoline. Statistics show that over the entire country service stations average 300 gallons a day the year round in sales. Estimating expenses of maintenance of each of these stations at $25 a day, there is an expense of eight cents a gallon which must be paid by the consumer.

"In Texas, yesterday, gasoline sold from eleven cents in Dallas to nineteen cents in Houston. Nebraska got into the fight when Governor C. W. Bryan sent telegrams to all principal oil companies requesting a reduction in price.

"As a result of the agitation in the Central West, Governor Len Small of Illinois announced he was investigating the situation with a view to taking action.

"Officials of the Standard Oil Company in Kentucky intimated a reduction soon would be made in Kentucky. Governor E. P. Morrow of that State said he had no public funds available for the purchase and sale of gasoline.

"Reports from St. Paul, Minnesota, state that the two refining companies there have announced they will sell gasoline from trucks at 19½ cents a gallon. Some Minneapolis independent oil companies said last night they obtain gasoline laid down there for eleven cents a gallon."

Various organs of the oil industry unite in expressing disapproval. The Oil and Gas Journal (Tulsa, Okla.) remarks:

"The action of the Governor of S. Dakota in cutting the price of gasoline is a striking example of political interferance with business. Instead of investigating the cost of production and distribution, the Governor arbitrarily fixed his own price, using the State's credit to buy gasoline at 15 cents, as he said, and selling it at 16. The protest that at once went up from the independent jobbers is sufficient proof that the Governor's reduction was recklessly low. Any one in the distributing business will agree that a one-cent margin for wholesaling and retailing gasoline is impossibly below actual costs."— Literary Digest.

o

THE GASOLINE TAX

The proposal to tax gasoline in this province at three cents a gallon was the subject of debate at the Good Roads League convention held in Vancouver on August 20, and of the Union of B. C. Municipalities convention.

In view of this it is interesting to note the popularity of the gasoline tax for road purposes in the United States. All but nine states of the union impose this tax, according to a bulletin issued by the Vermont chamber of commerce, the amount being from one to three cents.

Washington state has a one cent tax in 1923, and a two cent tax will be levied in 1924.

The following states will levy an nicreased gasoline tax in 1924, as a result of 1923 legislation, namely: Arkansas, 3 cents; Colorado, 2 cents; Florida, 3 cents; Maryland, 2 cents; Montana, 2 cents; North Carolina, 3 cents; Oregon, 3 cents; Pennsylvania, 2 cents; South Dakota, 2 cents and Washington 2 cents.

States which have passed gasoline legislation for the first time this year, and the amounts, are as follows: Alabama, 2 cents; California, 2 cents; Delaware, 2 cents; Idaho, 2 cents; Indiana, 2 cents; Maine, 1 cent; Massachusetts, 2 cents; Nevada, 2 cents; New Hampshire, 2 cents; Oklahoma, 1 cent; Tennessee, 2 cents; Texas, 1 cent; Vermont, 1 cents; Utah, 2½ cents; Virginia, 3 cents; West Virginia, 2 cents and Wyoming, 1 cent.

All the proceeds of the tax in all the seventeen new gasoline tax states are dedicated to roads save in Texas and Alabama, the bulletin states in its appeal for the gasoline tax slogan this year to be "All for roads."— British Columbian.

and all forms of stomach trouble, such as gas, pains, acid, sour, burning stomach are all relieved in two minutes by taking Jo-To. Jo-To is sold by all Druggists.

Ford

Do you desire a Ford Car or Truck?

If you have not the full cash price, would you like to have the use of the car while you are paying for it?

To those who desire to purchase a Ford Car or Truck and cannot completely pay for it at once, we are able to quote the following terms:

Down Payment consists of:—

For a Runabout (Non-Starter)	$ 193.21	Balance of	$ 386.41	in 12	equal payments
For a Runabout (Starter Equipped)	$ 224.28	"	$ 398.56	"	" "
For a Touring Car (Non-Starter)	$ 208.19	"	$ 413.36	"	" "
For a Touring Car (Starter Equipped)	$ 241.92	"	$ 483.84	"	" "
For a Truck (Non-Starter)	$ 219.72	"	$ 439.43	"	" "
For a Truck (Starter Equipped)	$ 249.03	"	$ 498.07	"	" "
For a Coupe	$ 304.28	"	$ 608.56	"	" "
For a Sedan	$ 336.47	"	$ 672.95	"	" "

This deferred payment price, the amount of the down payment and all the terms of the transaction have the approval of the Ford Motor Company of Canada, Limited, so that those who buy Ford products on deferred payments may have the protection of a standard deferred payment price throughout all of Canada in the same manner as those who buy Ford Products for full cash.

The low price is possible because the Traders Finance Corporation, Limited, who finance the transactions extend this financing opportunity only to Ford Dealers and only on Ford Cars.

100,000 Star Cars

BUILT AND SOLD IN TWELVE MONTHS—

SEARCH THE RECORDS of the automobile industry, from the year of the first crude motor car to date, and you cannot find a record to parallel or even approach the first year's record of the Star Car.

More than 100,000 Star Cars have been built and sold in one year!

The building of this great number of standard-designed, dependable, low-priced cars in twelve months is a colossal achievement. Great plan facilities were necessary to bring such a result. The nearest approach to the Star Car's first year record the automobile industry affords, is the success of the Durant line in its first twelve months.

This is the secret of the great achievement recorded in the first year of the Star Car sales—the vision and leadership of W. C. Durant and his ability to read the public mind and build the kind of an automobile the public will buy in great numbers.

It is safe to say the Star Car has merely approached the threshold of its success. The coming months will see a repetition on an even greater scale of popular clamor for this Durant product. Great though its first year has been, the years to come promise success for the Star Car that will eclipse any other achievement by any other motor car or organization.

MEN'S WORK SHIRTS

Heavy Black Twill and strong Khaki Work Shirts in all sizes. Regular value $2.25 and $2.50. Special $1.75.

LOCAL BALL FOR THE WEEK

Fernie baseball club were busy during the first three days of the week, losing the first game to Wycliffe on Sunday by a score of 5 to 4, and then defeating Troy, Montana, on Monday by a score of 7 to 2, and again on Tuesday by 4 runs to 1.

Harrman pitched his first game for the local team against Wycliffe, in the first of the Nelson News Cup series, but was slightly off form and Wycliffe swatsmen got him for 13 safeties, while Pennington displayed the best form he has shown on the local diamond this season for the cliffers and well merited the win.

Fernie jumped into the lead right from the start, scoring one run in the first and another in the second innings. Wycliffe scored one in the fifth but Fernie collected another in the sixth. Wycliffe scored one in the seventh and then forged ahead in the eighth, when they got to Harrman for four hits, collecting three runs. Fernie came back with a single run in their half of the eighth but Wycliffe held them in the ninth.

Summary—Sacrifice hits, Crowe Leveque. Stolen base, Crowe. Two base hits, Clark, Pennington, Hovan, Bishop, Rushcall. Three base hits, Whitehead, McTeer. Struck out, by Pennington 8; by Harrman 5. Base on balls, off Pennington 1, off Harrman 1. Passed ball, Rogers, McTeer. Left on bases, Wycliffe 10, Fernie 6. Earned runs, Wycliffe 5, Fernie 4. Time of game 1 hour 50 mins. Umpires, Kastner and Ferko.

Harrman again took the mound for Fernie on Monday afternoon during the Labor Day sports, against Troy, Montana, and showed a remarkable recovery. His quick change of pace had the Troy batters guessing and but for a misjudged fly, with two men on bases, he would have scored a shut out. McLain, pitching for Troy, was a new experience for the Fernieites, but although only securing eight hits off his delivery, they bunched them when good hitting meant runs. The scoring all came in the third and fourth innings, Troy taking a two run lead in their half of the third, then Fernie started on a batting spree and drove four runs across the plate in the same frame, and put the game on ice in the fourth by adding three more.

Summary — Stolen base, Hovan. Sacrifice hits, Shand, Leqeque. Two base hits, Harrman, Barger, Ault. Three base hit, McTeer. Struck out, by McLain 6; by Harrman 13. Base on balls, off McLain 2. Hit by pitcher, by Harrman, Mataga. Wild pitch, McLain. Earned runs, Fernie 5. Left on bases, Troy 3, Fernie 5. Time of game, 2 hours. Umpires, Kastner and Clark.

On Tuesday evening Troy and Fernie again locked horns, the latter gaining the issue on a game which was called after Troy had batted in the eighth innings, on account of darkness, the score standing four runs to one.

Ault went in for Fernie and pitched a wonderful game, holding the visitors to three well scattered hits, while his team played errorless ball behind him. McLain did duty for the Americans and pitched a much stronger game than the previous day, but errors at critical moments gave Fernie the victory.

Fernie scored one run in the first, third, fifth and seventh innings. Troy's lone tally came across the plate when Myers connected for a triple and came home on the hit and run play.

Summary—Stolen bases, McTeer 2. Sacrifice hit, Mataga. Two base hit, Shand. Three base hit, Myers, Rushcall. Hit by pitcher, by McLain, Hovan. Passed ball, Grathman. Wild pitch, McLain. Earned runs, Troy 1, Fernie 1. Struck out, by McLain 7, by Ault 7. Base on balls, off McLain 1, off Ault 1. Left on bases, Troy 3, Fernie 6. Umpire, Kastner. Time of game, 1 hour 35 mins.

o

HOW LLOYD'S THRILL COMEDY WAS FILMED

For every foot of film that was used in Harold Lloyd's new feature thrill comedy, "Safety Last," virtually nine feet were thrown into the cutting basket. And that just goes to show further the tireless efforts of the popular young comedian in turning out a comedy—a comedy that must satisfy him in every way before he will permit it to leave the studio.

To give a few interesting statistics: "Safety Last," which is unusual in that it is the first seven reel comedy ever made, was almost six months in the making. During the production, the cameraman used a total of 126,060 feet, or roughly 25 miles of raw film stock. Of this amount 118,073 feet, or approximately 23 miles was developed, and nearly half was printed. All this means that the seven reels of film seen on the screen was culled from about ten miles of film that had been O.K.'d by Harold Lloyd and printed.

But there is one thing of the utmost importance. Before Harold will ever permit one of his pictures to be shipped east, he has it pre-viewed in about seven different theatres, catering to different types of audiences. He watches the effect. He listens to the criticism of everyone from the lowest truck drivers to the multi-millionaire and the shrewd theatre owner.

While critics have analyzed the success of Harold Lloyd and praised his versatility, his personality and his vision, many of them have missed a big point. There is one dominating factor back of the young comedian's success—he never has been afraid of work. And now, at the top of his career, he works harder than ever before to maintain the standard he has set in the past.

When "Safety Last" comes to the Orpheum Theatre Monday and Tuesday no one will doubt the fact that Harold Lloyd is a glutton for work. Two reels of the offering show Harold climbing the side of a twelve story building and the thrills brought about by the many obstacles he encounters in his dizzy climb surpass anything that has ever been filmed, or anything that ever will be, for that matter. The picture also has a charming love story with Mildred Davis, of course, being the Girl in the case.

Health turns the clock backward

Easily Recognized as Nerve Pressure.

Health Talk No. 34
By G. J. Parks, D. C.

Some ailments are quickly recognized and easily distinguished as being caused by nerve pressure, and the victim of such an ailment will save time, money and suffering by going at once to a chiropractor.

Sit on the edge of a chair and the sciatica nerve is under pressure and if the pressure is long enough continued, will become painful. Pains of the same character running down the arm may be traced to the same cause. In fact many more ailments than are easily recognized are due to the same cause: viz, nerve pressure, and the fact is often quickly established by feeling along the spine until the nerve is found. This is determined by the finding of a sore or tender spot at the place where the nerve leaves the spinal column.

Chiropractic invariably gets quick results in such cases.

HEALTH FOLLOWS
CHIROPRACTIC CORRECTS PRESSURE ON SPINAL NERVES IN DISEASES OF THE FOLLOWING ORGANS:

THE LOWER NERVE UNDER THE MAGNIFYING GLASS IS PINCHED BY A MISALIGNED JOINT. PINCHED NERVES CANNOT TRANSMIT HEALTHFUL IMPULSES. CHIROPRACTIC ADJUSTING REMOVES THE PRESSURE. THE UPPER NERVE IS FREE AS NATURE INTENDS.

Months of Pain And Then It Goes

"For several months I have suffered with sharp lightning pains in my hip and leg. I was unable to walk or lie without pain. I consulted several doctors, applied medicine externally and took it internally, and took different kinds of baths, but nothing helped me until I went to a chiropractor. He relieved me with the first adjustment and in a few weeks it cleared up completely. It has been many months now since I had the adjustments and no return of the pain."—Ad Sezlwe, Chiropractic Research Bureau Statement No. 1327-S.

ALPINE CLUB VISITS GLACIER

Eight members of the Alpine Club left for Trinity Glacier last Saturday afternoon. They travelled to the White Spruce mill by auto, and then hoofed it to the summit above Hartley Lake, where they were met by the genial George Heaford, the Company's agent at Camp Four. George led them to "Frenchy's" establishment at Camp Three, where they sampled French's coffee and cakes. They then accompanied George to Camp Four, whence they proceeded a half mile up the valley and camped for the night.

It was a beastly hot night, but all survived it, and at eight the next morning they were off for the glacier. George Heaford, who had come up from Camp Four expressly for that purpose, escorted them a mile further on to the foot of the mountain. A stiff climb of about two miles brought them to the foot of the glacier.

Trinity Glacier lies north of the main peak of Trinity Mountain (9870 ft.), between the main peak and the north peak. Its head lies well up under the pass between the two peaks, being seperated from the skyline by a rock wall of some 20 or 30 feet only. From this point the glacier extends in a northwesterly dihection for a distance of about one and one half miles. At the head the glacier is quite narrow, being confined closely between rock walls, but in its central and lower course it widens out until it is from 60 to 80 rods across.

Its foot is estimated to be about 6000 feet above sea level but the ascent is very sharp, particularly in the upper half of the course, where it slopes so steeply as to render ascent impossible without the aid of life lines and ice picks. Nor is ascent possible along the sides of the glacier, which is so walled with rock as to render travel in that manner out of the question.

Several crevasses were encountered along its middle course, varying in depth from twenty to fifty feet. These were all near the sides of the ice river, and in the centre the ice must be much thicker. As stated, this is the only glacier in this vicinity, its existence being due to the vast quantities of snow blown from the central peak during the winter, augmented by extensive snowslides during June and July. The immense mountain masses to the south and east prevent rapid melting in the spring and early summer, and preserve the glacier.

This glacier has never been visited in the early summer, at which time its lower course must be buried hundreds of feet deep in snow. This is evident from its appearance in September. The upper course is free of rock, while the lower course is covered several feet deep with rock brought down by avalanches and snowslides. A peculiar feature of this glacier is its immense terminal moraine, a great semi-circular ridge of debris some 50 feet in height, which walls in the foot of the glacier, being only at the nout where the icy waters find exit. From surface indications it would appear that in May the entire lower course is buried under snows level with the top of the terminal moraine.

The glacier lies in an amphitheatre of unsurpassed grandeur. To the south towers the main peak of Trinity, from whose north west flank arises three pinnacles to heights of from one to two hundred feet, sharp as church spires and absolutely unscalable. Away up, in the very centre of the mountain wall and above and behind the pinnacles lies a little glacier in a pocket of the mountain. It is perhaps 500 feet above the big glacier, upon which it discharges its waters by a brook which flows down a groove in the almost perpendicular side of old Trinity.

Directly east of the glacier towers the north peak of Trinity. This, as seen from Fernie, is a single peak of no great beauty, but seen from the glacier is perceived to consist of three well defined peaks rising like cumulus clouds to dizzy heights.

Down the ice river the scene is even grander. Straight west the inaccessible ramparts of Mt. Dunn, apparently a higher mountain than Trinity itself, and to the northwest the eye roams over 50 miles of forest-clad ranges.

As stated, the glacier ascends quite steeply, being in fact more in the nature of a frozen rapids than a frozen river. But nothing could restrain the more adventurous members of the party, and soon four of them, including Miss Minnie Elliott, were soon crawling up the steep ascent on all fours. They reached the other side in safety and then started back. Ernest Frey led the way and from the way he stuck his heels into the snow he evidently imagined himself once more back in the Black Forest. A wild goat which was grazing on the rocks far above must have thought so too, for at this juncture the bearded creature laughed loudly, and, losing his balance, fell kerplunk on the solid stream. The height from which he fell was so great that nothing but one of his shin bones remained to mark the spot of the tragedy.

At 12.15 the party began the return and by 1.30 were back at Camp Four. After they had feasted to repletion on ham, hard-boiled eggs, sardines and Bologna sausage—the American Consul complained bitterly because there was neither pie nor cake on the menu—the party left for Fernie, George Heaford accompanying them as far as Camp Three. Indeed, much of the success of the trip was due to the courteous assistance of Mr. Heaford all along the line.

OLD TIMER PASSES AWAY

Fernie lost one of her oldest citizens early last Sunday morning, when Daniel Harrison, aged 78 years, crossed the great divide after having suffered from a lingering illness during the past six months.

Mr. Harrison, known to practically every citizen of Fernie as "Dad," was one of Fernie's old timers, having come to Fernie in 1906. He was born in Atherstone, Warwickshire, England and was 78 years of age. He worked at the coal mines for a number of years after coming here but later took a position with the city and continued in that position until recently. He is survived by two brothers and one sister residing in England, and by one daughter and four sons, George, of Londan, Eng., Samuel, of St. Augustine, Florida; Mrs. Florence Marshall, Arthur and Harry of Fernie.

The funeral was held on Wednesday afternoon from Christ Church, Rev. H. U. Oswald officiating.

LONG DRIVE WINNERS

A large number of golfers took part in the driving competitions on Wednesday afternoon for the prizes donated by Mr. W. R. Wilson. The following were the prize winners:

Men's Competition—

1st — Mr. Ault, total distance 3414½ feet, all six balls inside of playway..

2nd—Mr. Watson, total distance 3201 feet, five balls inside of playway.

3rd—Mr. Kastner, total distance 3078 feet, five balls inside of playway.

The following were the longest single drives of each competitor:

Mr. B. Wilson 696, Mr. Suddaby 693, Mr. Herchmer 690, Mr. E. K. Stewart 686, Mr. K. Stewart, Jr., 682, Mr. Watmough 679, Mr. Wood 675, Mr. Ault 675, Mr. Kastner 670, Mr. Watson 667, Mr. Gates 650, Mr. Burns 627, Mr. Liphardt 550, Mr. Prentice 545, Mr. Douglas 502, Mr. Sanborn 475, Mr. Murray 491, Mr. Wallace 459.

Ladies' Competition—

1st—Mrs. Watson, 1918 feet, with four balls in course.

2nd—Mrs. McDonald, 1722 feet,

3rd—Mrs. B. Wilson, 1551 feet, with four balls in course.

The longest single drive of each of the ladies was as follows:

Mrs. Watson 520 feet, Mrs. McDonald 479, Mrs. Irvine 480, Mrs. Herchmer 470, Mrs. B. Wilson 450, Mrs. T. Lawes 375, Mrs. Kirkpatrick 375, Mrs. Harwood 350, Mrs. Fisher 350, Mrs. Hayne 348, Mrs. Wallace 270.

LADIES GOLF CLUB

In the final match for the Trites Cup, Mrs. Harwood was successful in winning from Mrs. Watson.

The play for the Wood Cup will take place on Thursday, Friday and Saturday of next week. All members wishing to enter for this cup kindly send in their names to Mrs. J. R. Wallace or Mrs. Liphardt at once, so that draws can be made and posted.

The regular play for the Wilson Cup will be held on Tuesday, the 18th, at 2.30 p.m. Draw will be posted.

WRESTLING MATCH GOOD

George (Cyclone) Thompson, of Chicago, middleweight wrestling champion of the world, successfully defended his title in a championship match staged in the 150 All Sports Gym last Saturday evening, when he defeated Ernie Arthur, of Lethbridge, middleweight champion of Canada by securing the only fall of the match with a reverse double wrist lock after one hour and thirty four minutes of continuous wrestling.

The match was wrestled under Police Gazette rules and went the entire time set out by them, i.e., two hours and five minutes. At the ringside Arthur weighed 155 lbs. and Thompson 165 lbs., Referee Raynor announced.

In the opening stages both men were feinting for an opportunity of throwing the other to the mat, Thompson finally bringing Arthur down with a tricky pull and back heel movement. Thompson immediately assumed the aggressive and kept Arthur busy for some time breaking up different holds. Arthur secured a strong toe hold on the American and punished him severely but the latter doggedly refused to give up and finally broke away with a counter toe hold. Thompson and Arthur then alternated with arm and head scissors. For a short time Thompson was forced on the defensive but although Arthur secured some dangerous holds he failed to hold them, Thompson breaking everything the Lethbridge man could put on him. Thompson punished Arthur severely in quick succession with an arm scissor, a leg scissor and a crotch toe hold. Towards the end of the first hour's wrestling Arthur secured a terrible crotch toe-hold and looked like forcing his opponent to the mat, but Thompson finally broke away by getting his hand under Arthur's chin and forcing his head back. From then on until the fall the honors were about even. After ninety four minutes of wrestling Thompson secured a reverse double wrist lock and held Arthur helpless until the latter was compelled to lower his shoulders to the mat.

On resuming after a ten minute rest, both men strove desperately to secure another fall and neither seemed to be able to keep the holds they would secure against the other's counters. In the last five minutes of the encounter Thompson opened up with a tremendous burst of speed and although he looked like gaining the second fall on several occasions, Arthur was able to stave off all his attacks until the call of time.

Before the main bout three preliminaries were pulled off. The first was a three two-minute round bout between Young Eastwood and Young Riss, ending in a draw. In the second preliminary Young Harvey won easily from Young Price. The final between Danny Mungo and Nick Smith also ended in a draw.

The evening's program was one of the finest ever staged in Fernie and the spectators were well satisfied with the exhibition. The attendance was rather disappointing as the class of wrestling put up was of real championship calibre. The 150 All Sports Club are to be complimented on securing such talent to perform in Fernie.

THE FISHING CONTEST

The prize fishing contest put on by N. E. Suddaby is creating a great deal of interest in the city as the beautiful big specimens appear from time to time in the window. The latest attraction was a monster bull trout caught by Wm. Brohman, which weighed 7¾ lbs. Among the entries in the different classes to date are the following:

Cut Throat Trout—
Steven Bernot—1 lb. 9½ oz.
Louis Hoffman—1lb. 14 oz.
Hugo Petel—2 lb. 4½ oz.
Pete Marchenick—2 lb. 9 oz.
Eastern Brook Trout—
Robt. Crowe—7½ oz.
Wm. Peters—9½ oz.
Jack Yates—9¾ oz.
Wm. Walwork—12 oz.
Tom Gilkin—2 lbs. 13 oz.
Robt. Glover—6 lbs.
Wm. Brohman—7¾ lbs.
Grayling—
Tom Gilkin—1 lb. 10 oz.
Kasmar Wodega—2 lbs. 10¾ oz.

The landlord of an apartment-house in Philadelphia gives a $10 gold piece to every baby born in the building. The tenants expect to have enough money in a few years to start a kindergarten.

HOME BANK DEPOSITORS PLAN BIG ORGANIZATION

Toronto, Sept. 13.—There having been no official confirmation of the report that a leading banker had offered to pay the Home Bank depositors 25 cents on the dollar on their deposits as an interim payment, pending the report of the curator, depositors and shareholders are again discussing further measures to secure their rights when the assets and liabilities of the bank are definitely determined.

Mr. I. E. Weldon, of Lindsay, Ontario, secretary of a committee of the depositors, says that the committee's object is to secure a representative organization of the bank's depositors from coast to coast, in order to protect interests. It is proposed, if arrangements can be made, to hold a meeting of the depositors in Toronto about Sept. 18, at which delegates from other cities would be present.

Mr. Weldon has hopes that the curator may find the affairs of the bank such that the depositors may not lose anything. "Should the curator report sufficient assets to pay the depositors in full," he said, "my clients are not so much interested."

REVOKE CHARTERS

Calgary, Sept. 13.—William Ryan, vice-president of District 18 of the United Mine Workers of America, according to word received from Drumheller on Thursday, has been instructed to revoke the charters of the Atlas and Midlandvale locals. He is to proceed to Drumheller immediately to carry this into effect.

He has been further instructed to declare the position of the district officers to be that the men are on strike in violation of the agreement and that they are instructed to return to work under the protection of the U.M.W.A.

It is stated that authority for that action has been received from international headquarters at Indianapolis.

In the meantime the charters mentioned have been cancelled and a board meeting will be held on Saturday to ratify that measure.

WINNERS IN THE CONTEST

The following is a list of the winners in the "Fernie Beautiful" Contest:

1. For the home and grounds of
1st—Fred Kennedy, $25.00.
2nd—Alfred Baker, $10.00.
3rd—H. R. Huntington, $5.00.
Honorable Mention — Wm. Reynolds.

2. For the home and grounds in the City of Fernie showing the greatest improvement during the season:
1st—David J. Black, $25.00.
2nd—Barney Sloan, $10.00.
3rd—D. F. Markland, $5.00.
Honorable Mention — Alick Sherwood, W. G. Arnold.

3. For the house and grounds of best appearance in West Fernie:
1st—J. Kongelava, $25.00.
2nd—Joe Hughes, $10.00.
3rd—William Green, $5.00.
Honorable Mention—W. W. Stevens.

4. For the best vegetable garden in the City of Fernie, Fernie Annex and West Fernie: Arrangement, cultivation and crop returns to be taken into consideration.
1st—Jaseph Littley, $20.00.
2nd—John Charnock, $10.00.
3rd—Elijah Ross, $5.00.
Honorable Mention—Fred Hutson, Julius Peters, Walter Woodhouse.

These prizes are donated by A. B. Trites and the competition is conducted by the Rotary Club.

DRUMHELLER MINERS ORDERED TO WORK

Calgary, Sept. 10.—One thousand Drumheller miners have been ordered to return to work by the board fo district No. 18, United Mine Workers of America and have refused, and drastic action will be taken by the board if the men are not back this week end, W. A. Sherman, president of district 18, said tonight.

The miners are on strike in violation of contract, Mr. Sherman said, and the situation is becoming serious, necessitating prompt action.

Cuba is reported to be threatened with a domestic conflict. It is not known whether it is promoted by the sugar or tobacco price manipulators.

HASTENING DOWNFALL OF KING COAL

A single act of tyranny may be the last straw to break, not the back, but the patience of a long-suffering people, and to terminate a long-established despotism in revolution or change of dynasty. In these pages two weeks ago we read that it was planned "To Soften Hard Coal's Heart with Soft Coal," and newspaper editors were quoted in approval of the preparations to meet the threatened shortage of anthracite by the use of bituminous coal. Now the press discussion goes a step further, and we read of possible permanent abandonment of anthracite by consumers; the immediate utilization of bituminous coal, coke, oil — and the speeding up of plans to supercede coal in industry with huge water-power electric projects and even solar or atomatic energy. As the Chicago Tribue puts it, "the age of coal for heat and power is ending."

Strike or no strike, observes the New York World, "the hard-coal industry of Pennsylvania is on trial for its life." In the state that produces anthracite, the Philadelphia Evening Bulletin notes that "substitutes are already threatening a serious permanent reduction of the anthracite markets." If the anthracite mines can not satisfy the market "as to quantity, and keep the price within the limits of purchasing power, they will surely sink into oblivion." For, it explains, if the anthracite-burning public finds out that it can get along just as well with bituminous coal after becoming accustomed to it, a large proportion of it will never go back to anthracite. Or, as the Pittsburgh Gazette Times puts it, "once the market is 'made' for the substitute fuels, it will be very difficult to recover it for anthracite." And the Philadelphia Public Ledger sums up the situation this way:

"What the hard coal industry is doing is to wipe out its own markets. Its perennial wars already have wiped out a great part of its sales areas. The Middle West and Northwest are turning more and more to soft coal. The old-time 'base-murners' have been junked. Soft-coal heaters are going in. Oil-burners are being installed. In New England, industrialists are boycotting anthracite. Contracts are being made for Welsh coal. An avalanche of oil, roke and other substitutes is ready to sweep into and over the anthracite markets."

In New England, a leading market for anthracite, the Springfield Union observes that "under the lash of necessity the use of substitutes for anthracite may be developed to the point of working havoc with the anthracite mining industry." In the same Massachusetts city, The Republican calls upon the people to put an end to their "dependence on economic tyranny of corporations and unions," by turning to soft coal, oil, and, eventually, electricity generated by water-power. In the last week of August the Chicago Tribune remarked that whatever might be the outcome of the anthracite strike threat, one point is certain:

"It provides ideal 'selling talk' for purveyors of substitute fuels and the appliances with which to make use of these substitutes.

"The American public has become very weary of these annual threats against its comfort and prosperity, and of the steadily increasing cost of the essential of fuel. That weariness is reflected in factories and salesrooms which are producing and distributing oil-burners, in the slogan, 'You Can Do It Better With Gas', and in the steadily increasing popular interest in development of hydro-electric power and other substitutes for coal as fuel.

"It has advanced so far that nowadays when a man plans to build a new home, the possibility of installing a heating plant which will make him independent of coal is one of the first things he studies. Any offer of a substitute commands his interest. Oil and oil-burners are among the leaders in this advancing process of substitution. Gas is frequently used for water heating, and, where practicable, is considered for more general use. Electricity has not yet reached a point of development and cost where it can be generally used for heating, but electric ranges and electric heaters for single rooms are growing in use and popularity. When all our water power is developed and transmission facilities are sufficiently improved, its use will become more general. Alcohol is a fuel of great potential importance. It can be made from almost anything — garbage, sawdust, weeds, etc.— and as processes of manufacture improve and restrictions are reduced it will come into more general use."

And so it occure to the Minneapolis Journal that "high prices and strikes serious as they are, will not be without their compensations if they prompt to the use of substitute fuels and better heating systems." "The consternation that follows a coal strike," remarks the Minneapolis daily, "cries out against halting inventive genius that has been so slow to conquer this basic problem of industry and domestic life."

First in the list of substitutes for anthracite is, of course, bituminous coal, the supply of which, as the Nashville Tennessean notes, "is practically inexhaustible." An authority quoted in the New York Times estimates that the coal-fields of the United States and Alaska contain 2,155,000,000,000 tons of bituminous and only 16,155,000,000 tons of anthracite. As the New York World tells its readers:

"Other countries get along without hard coal. Many States of the Union with colder winters than New York burn bituminous coal almost entirely, and manage to keep warm. It would entail some initial expense especially in highly organized centres like the metropolis, to equip heating plants with soft coal grates, yet in the end it would be a saving. Soft coal costs less."

A Philadelphian who writes to the Public Ledger points out that:

"In Central Pennsylvania, Maryland and parts of West Virginia there are hundreds of large mines producing millions of tons of high-grade low-volatile semi-bituminous coals which are suitable for domestic use and are being used by millions of people for that purpose, both for cooking and heating, and when fired in the proper manner produce almost no smoke or soot.

"The heating value of the good, low-volatile coals is about ten per cent greater than the heating value of the better grades of hard coal; and today the delivered cost to the domestic consumer will average about five dollars a ton less."

It seems to the editor of The Coal Trade Journal, New York, that with the use of proper smoke eliminating devices and careful firing "there is no reason why New York could not use more bituminous if it were of the right grade." It is pointed out in the Coal Trade Journal that there are available to replace anthracite: briquets, coke, semi-bituminous coal, bituminous coal, and imported coal. Briquets, we are told, are made out of a fine coal or dust, mixed with a binder and subjected to pressure. They burn to a powdery ash without slag or clinker. The best binder is fuel oil; and culm, hard or soft coal, lignite and fuel oil residue are used for the base. On the subject of coke this coal trade paper says:

"Coke, particularly that made in by-product ovens, has been recommended by the Bureau of Mines as an ideal substitute for anthracite. Those ovens that have made a drive for domestic trade size their products the same as anthracite. Coke, like briquets, can be burned successfully in the same equipment normally used for anthracite. Gashouse and beehive oven cokes are also available. Draft control is the vital point in coke consumption in a domestic heating plant."

A good business opportunity is seen by the Birmingham News "for the producers of coke to push their output an destablish it more firmly for domestic use."

Another substitute fuel is peat. A Bostonian writes to the Springfield Republican to call attention to the fact that "there are millions of tons of peat, highly suitable for fuel, within the boundaries of Massachusetts." Moreover, says this writer:

"It may be produced in commercial quantities to retail at a cost of approximately two-thirds that of anthracite. It will provide a superior heat to anthracite and with less concern and inconvenience to the householder. Incidentally, the ashes, which are pulverized and free from clinkers, are an excellent fertilizer, due to its high potash content and have a substantial commercial market value."

Besides extensive peat beds in Alaska, the reference books tell us that in the continental United States there are beds capable of yielding 12,888,500,000 tons of peat.

Some day, observes the Chicago Tribune, householders are going to wonder why they ever broke their backs shovelling coal. "The furnace is back in a period of the oil-lamp." Continues the Chicago paper:

"The oil-burner offers an intelligent step forward, and when people are convinced that a burner free from all objections is ready, anthracite will not be able to disturb any one's summer speculations. No doubt perfection has yet to be reached in the burner but it will. The oil-burnish ship is superior to the coal-burner. Many householders who use oil could not be driven back to the drudgery of coal. Others are hesitating in what they consider reasonable doubt until the burner takes a better form. Some types make a noise. Others depend on electricity for ignition, and people fear a failure of current when the furnace is most needed. These are only incidents to the development and perfection of a model."

Quebec, the Old World Province

1. The Calèche, a means of conveyance much favoured by visitors to Quebec.
2. An old brick oven, the like of which was used in France four centuries ago.
3. Chateau Frontenac, Quebec, the most modern hostelry on the continent, from a glorious height looks down on old Quebec and on the early battle fields.
4. Ancient and modern. The little cannon captured by the British at Bunker Hill, rests near the Quebec Citadel by the side of a howitzer which fell to the Canadians in the Great War.
5. Though their farms are modern, some farmers still use the ox as beast of burden in the back country.

THESE are just a few pictures taken in Quebec. It is not without reason that this province is becoming the tourist resort of the continent, for here is a country of utmost fascination and intrigue. Quebec has an atmosphere all its own and, if it can be said, more of an old-world atmosphere than has the old-world of today. Quebec is the eighteenth century keeping pace with the twentieth, yet retaining its identity.

One stops at little wayside shrines. The wooden cross, the patron saint in effigy, the nurtured flowers, the woman at her distaff, the white-walled houses close at hand transport you to the distant land from whence the original settlers came. Yet, over there, beyond that little hedge or cedar fence the farmer gathers in his crop with up-to-date machinery, and stores it in a modern barn. Behind, the hum of the telegraph wire reminds you that you are not living in a by-gone day and, if that is not enough, through the not too distant fields, a huge train thunders.

Near the white walls the lady of the house draws water from the old-fashioned well, and bakes her bread in an old brick oven, the like of which was used by her ancestors in France four centuries ago. She spins her own wool and shares with her husband a faith, which though not old-fashioned, is almost as old as the Christian era. A kindly hospitable soul is she, nor is she always backward in learning, for she probably attended the convent of the Ursulines at Quebec, or la petite école at Louiseville. And her husband—He may be content to wear the homespun, to sit around the fire, or on the threshold at night, to smoke his "Rouge Quesnel" and to drive five miles to church early on all holidays in his buggy or in the straw lined cart that is used about the farm, but he "knows his letters" and, better still, he knows how to farm.

The Quebec farm is usually up-to-date. Your "habitant" gets all that can be got from the soil, and if you sit with him and talk you will see that he gets the fullness of life too. Give him the simple pleasures. He is happy if he can re-tell the story of the big moose he shot by "Lac Saint Pierre" and the bear. He is some trapper too, "for sure I catch him lots of skin, me!"

The "old man," the "old woman" and that large, very large family, are content as seldom people are, and rightly so, for theirs is a rich heritage, and beautiful. The mighty St. Lawrence and its thousand tributaries, the glorious Laurentians, with their wooded slopes, the forests, lakes and myriad streams give them a country almost unexcelled for beauty. Game and fish abound as has been discovered by sportsmen from outside. Moose, trout. maskinonge, the big black bass, bear, deer and caribou.

From a historians point of view Quebec is the hunting ground of the continent. Quebec city is one huge souvenir of the early days of Canadian settlement. Lost and re-captured several times her old Walls still bear the marks of storm, and the old cannons still guard the city and the approaches to the citadel.

The history of Quebec is the history of Canada, priest, soldier and pioneer settler each having played a glorious part in the making of it. With the fair Dominion as a lasting memorial to their valor and courage, Quebec links them with the present day; their faith, piety, and the work they commenced are being preserved and carried on by the present generation. The relics of their day scattered here and there, and on almost every street, look down or out upon the most modern improvements of the age, the railways, and the huge Canadian Pacific and other steamships at the docks, but lose not their identity, and in the case of buildings and public places, their charm and interest.

All through Quebec province, and in the most unexpected places one comes across historic links with the past. Like her people Quebec is quiet, peaceful, and does not crave the limelight, but Quebec is not and cannot be overlooked. It is an old world, full of charm, within the new

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes, areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, ur

CONTROL LABOR IS RED AIM

New York, Sept. 9.—The United Mine Workers of America today made public the first of a series of six articles charging that the "red forces, under the direct supervision of Moscow, are attempting to seize control of the organized labor movement of America and use it as the base from which to carry on the communist effort for the overthrow of American governments."

"Imported revolution is knocking at the door of the United Mine Workers of America and of the people of the United States and Canada," says the introductory article, which adds that its disclosures are "the result of an independent searching investigation which led directly to original sources."

Through a revolutionary movement on this continent the communist internationale at Moscow has undertaken, according to the miners, to carry out the following program:

1. Overthrow and destruction of the federal, state and provincial governments, with the elimination of existing constitutional forms and foundations.

2. Establishment of a soviet dictatorship, absolute in its exercise of power, owing allegiance to and conceding the authority only of the communist or third internationale at Moscow as a governmental substitute.

3. Destruction of all social, economic and political institutions as they exist at this time.

4. Seizure of all labor unions through a process of boring from within them and utilizing them as a strategic instrument in fulfillment of their revolutionary designs upon organized and constitutional government.

5. Invasion of the United Mine Workers of America with the ouster of its present officials and leaders and the submission of a leadership of communists, that it may be used as an instrumentality for seizing the other labor unions of America and for eventually taking possession of the country.

6. A well organized movement is being promoted within the Big Four railroad brotherhoods and 16 railroad trade unions to amalgamate all rail workers into one departmental union, controlled by a single labor leader of communist principle and affailiation and owing allegiance to the communist organization.

7. Seizure of the American Federation of Labor, with the ouster of its officials and through such seizure, gain control of its affiliated units and trade unions.

8. Conversion of all trade crafts unions into single units of workers within an industry, known as 'industrial unions' with coordination under a super-soviet union owing allegiance to and accepting the mandates of the communist internationale and its subsidiary, the red trade union internationale at Moscow.

8. Through conquest and subjugation of the labor unions and conversion and mobilization of farmers and other related groups, the overthrow of existing institutions and the creation of a condition similar to that which now prevails in Russia.

The article charges that a vast network of agencies for the dissemination of communist propaganda exists in the United States. This system, it is alleged, is a veritable octopus of interlocking directorates with 200 locol organizations, 45 national ones and a membership that runs the social scale of the continent.

American subsidiaries of the Moscow government are charged with having fomented the steel strike of 1919; the switchmen's strike of 1920, and with having aided in lining up railroad shopcraft and soft coal miners for the prolonged struggle of last year, in an attempt to obtain possession of the unions during the strike.

The American Civil Liberties union, it was charged, provided legal talent and money to obtain the release of persons arrested for and prevented from delivering seditious speeches. The league was challenged to show where it ever espoused the cause of a person who was not directly active in communist circles.

All these activities, in which it is alleged upward of 6000 leaders and 1000 adherents and sympathizers in the United States and Canada were engaged, were aimed at the one big purpose—revolution and communism—said the miners' heads.

"The seizure of this union is being attempted as the first step in the realization of a thoroughly organized program of the agencies and forces behind the communist internationale at Moscow for the conquest of the American continent," continues the article.

The Prince of Wales may not know until he arrives in Canada how many brides the gossips have selected for him during the voyage.

SIR GEORGE FOSTER VISITS WINDERMERE

Invermere, Sept. 9.—Sir Geo. Foster, leader of the Conservative party in the senate, together with Lady Foster, came in this week from Banff over the Banff-Windermere highway, on a short visit to Mrs. A. M. Chisholm of Windermere and R. Randolph Bruce of Pynelogs hall.

While here Sir George celebrated the 75th anniversary of his birth. Both he and Lady Foster left on Friday's train for the coast, where Sir George will officially open the provincial fair at New Westminster. From there they proceed to visit old friends in California.

o

GEORGE ARLISS IN NEW COMEDY FILM

George Arliss in a new role; in a characterization different from anything this famous star ever has portrayed, either on the stage or on the screen.

George Arliss as the star in a comedy drama with all the superb artistry, the speaking gestures, the deft touches and clear cut pantomime for which Mr. Arliss is famed everywhere. This is the promise of the management of the Orpheum theatre which announces the engagement of the new Arliss photoplay, "The Ruling Passion," a United Artists release, which will be seen here next Monday and Tuesday.

Mr. Arliss' latest screen feature has been elaborated by Forrest Halsey from the short story, "Idle Hands," by Earl Derr Biggers in The Saturday Evening Post." The picture is the second of the series to be produced by Distinctive Productions, Inc., for United Artists Corporation.

In "The Ruling Passion," Mr. Arliss has the role of a philanthropist, a wealthy retired manufacturer of automobiles who refuses to remain idle in his retirement. Adventures multiply as James Alden assumes the name of "John Grant" by day and mends automobiles in a garage in which he is a half owner with a young man who unwittingly falls in love with Alden's daughter. There is nothing of the cynic or the satirist the mercenary or the dissolute roue in the story—and George Arliss became famous for his masterly depicting of roles that call for cunning and skilled acting.

It will be of interest to the large following of Mr. Arliss to know that he has temporarily deserted the type of parts that has brought him to the forefront among English-speaking actors. How well he has succeeded; with what fine shading he has drawn his new character; with what paternal love he has endowed "James Alden" until it stands out in memory—these are points enthusiastically praised by all who have seen the picture.

In his newest photoplay, "The Ruling Passion," Mr. Arliss presents two characters, one wearing overalls by day, and the other the rich garb of the millionaire by night in his magnificent country home.

The general idea back of the transition of Mr. Arliss from the Mephistopholian past to the comedy of manners of a kindly gentleman bids fair to arouse greater interest than ever in the art of one of the best actors on stage or screen.

JO-TO

Jo-To relieves gas pains, acid stomach, heartburn, after-eating distress and all forms of indigestion quickly, without harm. All Drug Stores.

The Real Reason *for* A Pretty Skin

Why is it that one girl has a fresh smooth complexion and another a skin which is lifeless, dull and sallow? Is it a gift of nature or some guarded beauty secret?

It is a secret, but an open one in which every woman may share. It consists in knowledge of the care which keeps the skin free from clogging, poisonous accumulations. In the removal every day of all dirt, oil secretions, excess cold cream, powder and rouge.

To do this, use mild soap, massage it thoroughly into your skin and remove with many rinsings. The mildest soap you can choose for this purpose is Palmolive. It contains Palm and Olive oils. These rare oils are the mildest cleansers nature ever produced. They are the oils used by Cleopatra thousands of years ago.

Their combination in Palmolive produces a profuse, creamy lather which penetrates every tiny pore, removes every trace of dirt, oil, rouge and powder and leaves the skin smooth and fresh as a rose.

You can buy Palmolive Soap at all first-class dealers.

Palm and olive oils —nothing else—give nature's green color to Palmolive Soap.

HOW A DEPOSITOR STANDS

A depositor in a bank is a creditor of the bank. He lends his money to the bank, and the bank must repay him according to agreement, that is "on demand" in the case of an ordinary account, and, usually, on thirty days notice in the case of a savings account. In the latter instance the depositor gets interest to compensate him for not being able to withdraw his money at a moment's notice. There is no direct security covering the loan by a depositor of a bank. One who holds a bank's note (or "bill" as it is called in every day language) is secured by a deposit of gold with the Dominion government in such proportions as the Bank Act calls for. So the bill holder is also a creditor of the bank but a "secured" one, while the depositor must look to the general solvency of the bank in estimating the bank's ability to repay him. There may be other "secured" creditors, such bond or debenture holders, who probably have some form of mortgage on the bank's real estate, and count on realizing their claims out of that. Debts to the government if any, including taxes, have preference over ordinary debts, and wages and salaries are preference claims within statutory limits. If bank premises should be rented the landlord has a preference claim for his rent. Thus on the failure of a bank a depositor may lose part or all of his money unless the assets, when realized, will pay 100 cents on the dollar. The assets out of which he may realize are (a) the reserve fund, if any; (b) the notes and securities of people to whom the bank has loaned money in the course of its business; (c) the value of the real estate over all possible mortgages upon it; (d) the shareholders' money—what is left of it—plus that to be realized from the "double liability" that exists in connection with all Canadian bank stock. Finally, it must be remembered that the costs of winding up a bankrupt estate, whether of a corporation or individual, come out of the assets first of all.—Saturday Evening Post.

In the Big Woods With Borden's

WHEREVER men work — and work hard — wherever nourishing food is needed — there

Borden's

ST. CHARLES BRAND

EVAPORATED MILK

with the cream left in

is a real necessity.

But of equal importance you will find Borden's Evaporated Milk right in your home. If you keep a liberal supply on hand —buying it by the dozen or by the case— your problem of a constant supply of fresh, pure, rich, country milk is solved.

Borden's gives you plenty of milk when you want it.

Don't ask for milk— say "BORDEN'S"

THE BORDEN COMPANY, LIMITED
MONTREAL, P. Q.

EDITORIAL

Reports that speculators in Montreal are offering as high as 70c on the dollar to Home Bank depositors for their interests is rather cheering. If these men can pay that amount it looks as if the security was worth close to one hundred cents:

The Toronto Saturday Night is now demanding an investigation by a Royal Commission. It says:

Under existing circumstances the affairs of the Home Bank of Canada should be investigated, possibly by a Royal Commission. The latter is suggested as the experience in the case of the Merchants' Bank shows that under the usual court procedure the investigators are bound hand and foot by court precedents and narrow judicial findings that tend to trammel proceedings on all sides. That "something is rotten in Denmark," in respect to the Home Bank is self evident. The financial statement of this institution to the Dominion Government for the month of June (the last available) shows it to be in a solvent condition with a reserve fund of about $550,000. While as recent as June 26th last the general manager's statement to the shareholders was to the effect that the bank had fully maintained its position and that full provision had been made for all bad and doubtful debts. Worse yet in view of what has happened, a quarterly dividend was declared in June.

Possibly the most damning feature of the entire episode was the unloading of a large block of stock by President H. J. Daly at a time when it must have been apparent to those conversant with its business that this bank was in a bad way. Three months before the Home Bank of Canada closed its doors, President Daly completed, through the late Col. Mason, then general manager, a deal with a brokerage house for the sale of one thousand shares of Home Bank stock. The agreement for the sale of this stock was made in January last, and by its terms the stock was to be sold to net Mr. Daly $90 per share. The stock was fed out over the months as buyers could be found and the brokerage house paid to Mr. Daly the sum of $90,000 as the result of these sales. The brokerage house at the time of the deal was assured that the bank was in first class condition, and that the sale of the stock was made necessary owing to Mr. Daly's unfortunate ventures in other than the banking field.

There is no intention here of trying the case of the Home Bank of Canada out of court. We merely wish to point out a few of the salient features of the case.

There is scarce need to intimate that what happened the Home Bank was not the work of a day, a month or a year. If the Home Bank officials knew their business, and it is presumed they did, its true condition must have been known to them long before the issuing of the June statement to the government and long before the general manager's statement was given to the shareholders on June 26th. We have had many proofs that the monthly statements issued the government by the banks are not necessarily worth the paper they are written on. The Merchants' Bank was one recent case in point and the Home Bank is another. It is self evident that heavy losses have been covered up, for whom and by whom the public have a right to know, and more particularly the portion of the public that invested its money in Home Bank stock and entrusted its funds to the safe keeping of the institution.

Public confidence in our banking institutions must not be shaken in this manner. The air must be cleared, and all doubts removed. If need be let the Canadian Bankers' Association as a body undertake the work of clearing up what is at present a very unpleasant, not to say dangerous situation.

ADDITIONAL LOCALS

Miss Elsie Davis leaves tomorrow for a two week vacation at Creston.

Mr. and Mrs. James Marshall returned on Saturday from a trip to Spokane.

Jack Wood left on Wednesday for Toronto to resume his studies at Upper Canada College.

The United Church Ladies Aid will hold their annual bazaar on Saturday, Dec. 1. Watch for further announcements.

Michel football team will play Commerce in the first round of the Bennett competition at Lethbridge tomorrow afternoon.

Mrs. T. Dewsbury returned to the city Wednesday morning from the Old Country after having spent several months overseas.

The big bush fire behind Michel is still burning furiously and Michel men are out in the hills working hard to retard the progress of the flames.

Esther Rebekah Lodge will hold a whist drive and dance in the I.O.O.F. Hall on Friday, Sept. 21. Cards 8.30 to 10.00. Dancing 11.00 to 2.00. Refreshments. Admission 50c. Ingram's orchestra.

The postponed meeting of the Women's Missionary Society will be held on Tuesday next at 8 p.m. at the home of Mrs. Adlard, 150 McPherson Avenue.

U. S. Consult Brand gave an interesting talk on Japan at the Rotary luncheon yesterday. Mr. Brand, who has visited almost every country in the world, is a keen observer and an able speaker.

On Monday afternoon at the Presbyterian Church Manse the marriage took place of John Herman Renstrom, of Wardner, and Clara Rawson, of Fernie. The couple were attended by Mr. and Mrs. T. C. Coffay, of Wardner.

Chief Anderson wishes to warn the business men of the city against canvasers who are soliciting advertising for a souvenir program of the Chief Constables Association convention. No one has been authorized to solicit this advertising.

Frank Warwick, customs officer at Natal, was in town on Tuesday looking as though he had just returned from the war. On Monday evening he accidentally stepped backward off the Natal depot platform and fell among a bunch of broken bottles with disastrous results.

The finest catch of cut-throat trout that we have seen in many a day was on display in N. E. Suddaby's window on Monday. They were beauties, each weighing about a pound and three-quarters and were caught in the Upper Elk by Matthew Tully, of Fernie. Mat, as a fisherman, bats around 600 all the time.

Road repairmen, both in the city and the district, seem to think it necessary when fixing a culvert, to leave a bump of anywhere from six to twelve inches for motorists to wear down. The application of the steam roller to these places would do the work much more promptly and save a lot of broken springs and axles, not to speak of much bad language.

On Tuesday T. Fitzgerald and Geo. Vincent ran on to three fine cinnamon bear on the road just this side of Elko. George made a brave attempt to lasso one of them with a rope, but fortunately for him he did not succeed. Tommy travelled in the opposite direction and broke all car records to Fernie, making the time in 30 minutes flat.

Phil. Sheffield, Public School Principal, is leaving tomorrow to take up his duties as Public School Inspector with headquarters at Nelson. Phil. has been one of our most useful citizens, at all times taking an active part in everything that pertained to the public good, and it will be hard to fill his place in the community. He is secretary of the local Rotary Club and his middle name is Service.

The fourth session of the 15th legislature of British Columbia will open on Monday, Oct. 29, and while no legislation of a contentious nature is anticipated, it is expected that many matters of provincial importance will be disposed of. Among these will be the redistribution of seats in the House and Premier Oliver states that a redistribution bill will be introduced early in the session, so as to permit of the fullest consideration of this important matter. The Pacific Great Eastern Railway question, liquor amendments, road policy, taxation and revision of statutes are on the agenda.

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

CHALLENGE ACCEPTED

On behalf of Gus Williams, I accept a challenge published in the Free Press, and wish to fight Dan McDonald to a 10 round decisiin match, to be staged at Fernie at any suitable time in the near future.

Arthur Chivers.

o

FERNIE LADY GOLFERS WIN

The Fernie Ladies Golf Club played an inter-club match with the ladies of the Blairmore Club, about twenty players from Blairmore being present.

After a twosome in the morning, luncheon was served at 1.30. In the afternoon a two ball foursome was played, afterwhich tea and ice cream were served.

The ladies then took part in an interesting approach and putting contest, divided into A and B classes. Mrs. F. Smith, of Blairmore, won in A class two golf balls presented by Mrs. E. Kirkpatrick. Miss Biggs won a similar prize in class B.

In the morning round the players kept the number of putts taken on each green. Mrs. Rhynas, Mrs. Liphardt and Miss Jean Corsan each took 15. In playing off Mrs. Liphardt dropped out. After Mrs. Rynas and Miss Corsan tied several times they were each given a ball.

The following is the result of the morning round.

Blairmore		Fernie	
Mrs. Mackenzie	0	Mrs. Irvine	1
Mrs. Bird	1	Mrs. Watson	¼
Mrs. Dubuc	0	Mrs. Harwood	0
Mrs. Smith	0	Mrs. Herchmer	1
Mrs. Farmer	¼	Mrs. Hayne	1
Mrs. Smith	1¼	Mrs. Liphardt	0
Miss Pearson	0	Miss Brown	1¼
Mrs. Rhynas	0	Miss Corsan	0
Mrs. Turner	¼	Mrs. B. Wilson	1
Mrs. Gillis	0	Mrs. Wallace	1
Mrs. Thompson	1	Mrs. Gates	0
Mrs. Whiteside	0	Miss Biggs	0
Mrs. Whiteside	0	Mrs. Kirk	1¼
Mrs. Pickney	0	Mrs. Johnson	1¼
Mrs. Harper	1¼	Mrs. Kastner	0
Mrs. Smith	0	Miss Bonnell	1¼
	5		11¼

Fernie winning by 6¼ points.

In the foursomes Blairmore won by one point.

o

SUGGESTS HOME DEPOSITORS BE GIVEN AN ADVANCE

Toronto, Sept. 11.—A suggestion has been forwarded to the president of the Canadian Bankers' Association by an eminent Canadian banker, that in the event of the Home Bank curator's report, expected shortly, showing a margin of assets sufficient to warrant such action, the various banks will arrange to advance immediately to Home Bank depositors 20 to 30 cents on the dollar.

The chartered banks will have as security the assets of the bank, and such an arrangement would have this advantage, that it would not only release a substantial sum of money to depositors almost immediately, but it would permit of the balance of assets being conserved, and the affairs of the bank worked out to better advantage than if immediate realization were necessary.

o

THE FRED CARMELO SHOW SATURDAY AND MONDAY

Fred Carmelo's Musical Comedy Company will play its regular Saturday performance at the Grand this week, the play advertised being "The Bell Boy." This is another of Fred Carmelo's bright comedies, and it is safe to predict an enjoyable entertainment. The company will remain over and play the Grand on Monday also, the feature offering on Monday being a rural comedy entitled "Summer Boarders." The story concerns a Chicago business man and his wife, who spent their vacation in a country village where the hotel of the town is kept oy a simple rube character named Lem Boggs, impersonated by Fred Carmelo. A traveling salesman helps the business man's wife out of a difficulty and is accused of carrying on a flirtation with her. This leads to some excellent comedy situations and the story is good for almost continuous laughter from beginning to end. There are some nifty specialties and the chorus girls are frequently seen in peppy numbers and bright costumes.

LOCAL & GENERAL.

Dr. Corsan returned the other day from a trip to the coast.

A Fernie golf team will visit Blairmore on Sunday.

Born—In Calgary, on Aug. 30, to Mr. and Mrs. Wm. Ilott (Lizzie Whitelaw) a daughter. Both well.

Mr. and Mrs. Joseph Foster returned last Sunday evening from a week's visit to Spokane.

Nellie Walker, of Fernie won several prizes at a big celebration held at Trail on Sept. 11th.

The hunting season for grouse, duck and other game birds opens in this district tomorrow (Saturday). The deer season also opens on that day.

Don't forget the social and dance in the Catholic Hall, Friday, Sept. 14. Cards from 9 to 10.30. Dancing from 11 to 1. Admission 50c.

The regular monthly tea of the United Church Ladies Aid will be held at the home of Mrs. M. Nicholson, 164 McPherson avenue, on Tuesday, Sept. 18, from 3.30 to 6.

J. Maxwell, of Summerview, Alta., was in town for the week end, the guest of Mrs. Harrad and family. Mrs. Harrad will visit her friends in Alberta in the near future.

Mrs. Alice Jones and daughter Reta, of Cardinal, Ont., have arrived in Fernie to take up their residence with the former's brother, James Mitchell.

At the United Church manse on the 25th day of August, 1923, Mr. Magnus Edian Storm and Miss Vera Wick were united in marriage, Rev. W. F. Burns officiating.

Wm. Reynolds left for Renfrew on Sunday night to attend the Old Boys Reunion. It is now 23 years since Bill has been in the old town and he will no doubt see considerable change.

Dr. Keith, of Kelowna, was a Fernie visitor on Wednesday. Dr. Keith is well known in Fernie, having practiced at Coal Creek for about four years in the early days.

All Sisters and lady friends who are donating anything to the Women of Mooseheart Legion's sale of work are kindly requested to send same to Victoria Hall on Wednesday evening at 7.30 p.m.

His Honor Judge Thompson visited Fernie this week and presided at the sitting of the county court. The only cases brought before the court were applications by the following for naturalization, all of which were recommended: Mrs. Teresa Likuk, Paul Bednarz, William Henry Baldrey, Joseph Warren Barnes, Alexander Kubinec, William Erickson, John Smolik, Frederick Mattersdorfer, Guiseppe Trevisare, Dominico Rossi Nicola Lozinski, Guiseppe Zuliani, Carlos Nosella, Innocente Rioso, Angelo Gasparotti.

More tourist camping sites along the Crow's Nest route are strongly urged by J. H. Kirkham, of Lethbridge, who with his wife and family were visitors recently, after coming in by way of the Banff-Windermere route. With the completion next month of the transprovincial road link at Kitchener, the road through B.C. will equal anything in the west, according to Mr. Kirkham, and with the added and enjoyable feature provided by the passenger boat transport from Kuskanook to Nelson all the auto traffic through to Spokane should come this way, and no time should be lost in getting to work on camp sites to accommodate the sure to be increased traffic.—Cranbrook Herald.

Miss Jean Black Patterson, of Blairmore, was married on Saturday evening to Frank Townsend Campbell, of Kimberley. Miss Patterson was one of the graduates of the St. Eugene Hospital who received her diploma on Thursday evening. Miss Patterson was a popular and efficient nurse while the groom is employed as master carpenter. Mrs. Campbell will return to Blairmore for a short stay before making her home in Kimberley. Mr. and Mrs. Peter Patterson and son, of Blairmore, were in attendance for both the graduation and the wedding. The wedding took place at the manse, followed by a supper at the New Victoria Cafe. The bridesmaid was Miss Elizabeth Loyns, of Fernie, while Wm. Cameron, of Kimberley, supported the groom. Mr. Campbell was a patient at the St. Eugene about six months ago, when he met his bride to be.

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Dom. Baldino for speeding on Baker avenue was fined $20 and costs.

Born—On Sunday, Sept. 9, to Mr. and Mrs. McNally, a son.

D. Tognotti and W. Depasquale, of Trail, are spending a couple of weeks in the city.

Jos. Pollone was fined $50 and costs by Magistrate Henderson for having booze on the premises.

On Monday Hugh Malcolm, of the Western Ameusement Co., was fined $25 and costs on a charge of vagrancy.

Miss Edith Bonnell, who has been spending her summer vacation with her parents here, has returned to Vernon to resume her studies.

Mr. and Mrs. James Corbett returned this week from a visit to West Kootenay, where they spent their holidays.

Mr. and Mrs. C. H. Macklin, of Morrissey Mines, returned last week from a motor tour of the Banff-Windermere highway, after completing the circle via Calgary and Crow's Nest.

Don't forget the All Sports' Gym. regular Saturday night dance tomorrow night. Dancing from 9 to 12. Admission: Gents, 25c; 10c a dance. These dances are becoming quite popular.

There are a few sneak thieves around this city that certainly take the cake. One of them stole an overcoat from a blind man in one of our local hotels the other day.

Slim McLaren has again made his appearance on the streets. Slim has been keeping under cover ever since he was initiated into the Dokkies. It seems they gave Slim everything they had in the initiation.

Returns from the Dempsey-Firpo fight in New York this evening will be received over a special leased wire in Ingram's pool room. It is expected that the preliminaries will commence at about 6 p.m., Fernie time.

A serious accident took place at Waldo on Wednesday of last week, when Dick Ross, son of Mr. Ross, of McNab, who was working in the planing mill at the Baker Lumber Co. plant, got caught in the machinery, and was badly hurt. His arm was broken in two places and badly torn. The young fellow is 17 years old.

No matter what the opinions of the government and the people may be on the general Oriental question, it is conceded that the government has but one thing to do at present in dealing with the Japanese people. That is to rush all possible relief to the stricken nation. Feeling this to the wish of the electorate, the government has announced that a cargo of lumber, probably 5,000,000 feet, will be shipped as a gift as soon as possible. The announcement of this aid was the first to come from Canada.

The Women of Mooseheart Legion will hold their annual sale of work and home cooking in Victoria Hall, on Thursday, September 20. There will be a fish pond and other attractions for the children. Dance in the evening. a17|5

The Ladies Guild of Christ Church will hold a sale of home cooking in the basement of the church on Saturday, Sept. 22nd, at 3.30. Afternoon tea will be served. In the evening there will be a whist drive. It is to be hoped that all church members and those interested will make a special effort to attend these two functions, as the proceeds will be used for much needed repairs to the front of the church. RADICALISM A BUGABOO

Fear of Radicalism and panic about the spread of "red propaganda" are symptoms of American nervousness which threaten contagion to Canada, according to some Canadian newspapers that would prefer to have their readers emulate the traditional phlegmatic mind of their British forbears. It is recalled that after Philip Snowden introduced a measure in Parliament to make Britain over into a Socialist Commonwealth, he was not seized by the police and immured, but on the contrary was invited to sit at the table with the King and Queen. Lest any Canadian member of Parliament might perhaps think of emulating the Snowden example, it is humorously suggested that in Canada the next meal he took might be in prison rather than in a palace. One of the most admirable characteristics of the British, we are told, is their temperamental disinclination to be stampeded by false alarms, and that is why various Canadian editors think it would be better for Canada to be a little more British in this particular. To the Ottawa Evening Citizen it seems noteworthy that many who are most active in manifesting exaggerated alarm "at the spread of radicalism" are men of public position or leaders of countrywide organizations, and it goes on to say:

"For instance," the American Bar Association recently printed a document in which it was set forth that there were a million and a half or so extreme radicals in the United States.

"As evidence, the lawyers summoned the well-known but unnamed 'good authority.' An internationally noted newspaper in the United States took up the challenge of the Bar Association and showed that, by applying a little common sense to the statements made, the legal fraternity was trying to show that one adult male of every four in the Republic was a dangerous character, bent on overthrowing the Constitution by force; and that the evidence on which this interesting news was based would be absolutely useless in a court of law. Not long ago an eminent American and head of an international fraternal organization, brought terror to the heart of the timid by declaring that 'radicalism' was more widespread in Canada than in the United States. So, on the basis of the American Bar Association's computation, about one, say, in every three men you meet in this fair Dominion of ours has a bomb concealed about his person and is in direct communication with Moscow."

The Ottawa Evening Citizen ralls attention then to the statement of a contributor to a New York periodical to the effect that England is a hundred years ahead of America on the road which he had always assumed to be the most direct line to revolution, yet he finds England "efficient and imperturbable" and—

"He hears a member of Parliament introduce a measure to make Britain over as a Socialist commonwealth—and the next day he reads that the member has been invited to break bread with the King and Queen! He is a guest at dinners where 'mine-owners sit down familiarly with agitators bent on the nationalization of mines,' and his fellow guests argue State Socialism calmly, point by point as a thing really to be reasoned about. He sees a score of other signs which on this continent would be considered heralds of the downfall of a nation and which would make every Ku Kluxer turn purple with indignation.

"To not a few observers, the curious thing about it all is that Britain is actually admired for it, and particularly by the fearful ones. Remembering the outbursts which arose on the occasions that Mr. Woodsworth and one or two others suggested some comparatively mild 'radical' reforms during the recent session, it is rather difficult to imagine what horror and alarm would be manifested if Philip Snowden by some odd chance found his way into the Canadian Parliament and introduced his recent Socialist motion. He would not be invited to break bread next day. And if he wandered into the Senate, he would probably be jailed, tried for treason, and invited to break stones.

"This equable poise of the Briton is one of the things that have made his nation great. He believes in the stability of his institutions, and in their soundness, and it will take more than a flurry of Bolshevik propaganda to make him think that there is cause for alarm or that the things he stands for, deep-rooted for a thousand years, are in danger of overthrow. And this attitude is worthy of genuine admiration and sane emulation."

o

With gasoline selling for six cents a gallon in Hollywood there is no excuse for displaying so much dirty linen.

MORE APPROPRIATIONS FOR ROADS AND BRIDGES

Victoria, Sept. 10.—Appropriations totalling $21,500 for settlers roads in the Cariboo district, $3000 additional for the completion of the Telegraph-Dease road in Atlin and numerous lesser amounts for road and bridge construction in other districts, were authorized by Hon. W. H. Sutherland, Minister of Public Works, before his recent departure for a tour of public works and needs in the Peace River district.

The department has already expended $8000 on the Telegraph-Dease road, the money being provided by the Mines department owing to the valuable mining properties it will open up for shipments of ore. As the road is a trunk road the public works department is providing the balance to complete the road to Dease Lake. The work is being done by Foreman Vance, who at his last report on August 9, was within 26 miles of Dease Lake.

Other appropriations for immediate attention are as follows:

South Atlin: Bridge at Cascade Creek to cost $4600; wagon road to Indian Mines.

Cowichan: Repairs to bridges 44 and 66 on Cowichan Lake road.

Esquimalt: Road to Section 113, Metchosin.

Fernie: Reconstruction of Elkmouth small bridge which was recently washed away.

Grand Forks: Repairs to bridges.

Islands District: Renewal of bridges at estimated cost of $24.00.

Kaslo: Bridge to be built at Wadds. Canyon, near Crawford Bay, at an estimated cost of $3300.

Trail: Completion of trail to Cliff and Dominion Cliff claims from the second Relief Mine wagon road.

o

14 MILLIONS LOST IN YEAR'S FOREST FIRES

Canda's bill for damages sustained by reason of forest fires during the past five years averages $14,500,000 annually. The number of forest fires averaged 5779 a year and the causes of this shocking display of vandalism were nine times in ten human recklessness. Campers accounted for 24 per cent of all these fires; settlers burning slash started 22 per cent; lightning 10 per cent; and railways 26 per cent. The figure charged to railways is, however, an unfair index of responsibility. In the first place, practically all fires started, or said to be started, from railway lines are instantly reported. This is not true of campers and settlers and lightning fires. Again, the majority of railway fires, being quickly detected, are quickly put out so that as timber destroyers the railways have fallen to a minor position.

The problem of land clearing fires started by settlers and running into the green timber is one of the most aggravated and complex. Settlers in newly developed districts must use fire to clean up the debris and naturally wish to choose hot and dangerous weather when burning conditions are best. This inevitably means that for the clearing of farms Canada has paid a tremendous forfeit in destroyed timber. Much has been done, however, to make the process of land clearing safe by issuing permits for burning and supervising the operation through officers of the Forest Services.

The Canadian Forestry Association has repeatedly pointed out that the wood-using industry of Canada accounts for a national income of 500 million dollars a year and cannot continue indefinitely unless every safeguard is thrown about the limited possessions of the Dominion.

o

Visitors from the Pacific Coast felt quite at home in Denver last month. The Colorado capital had the novel experience of 23 consecutive rainy days in August.

Owing to an outbreak of a contagious disease in an Ontario prison, prisoners are not permitted to leave or enter the premises. Those on the outside looking in are quite reconciled to their lot.

A special criminal court has been convened in a remote Arctic district to try four Eskimos charged with murder. The accused are assured of cold justice.

Turkey does not observe any Christian festival but in consideration of the many favors she has received may this year designate a special day for thanksgiving.

Berlin beer garden proprietors complain that tourists are carrying away the steins as souvenirs of their visit. In "dry" countries are ornamental mugs are regarded with the same interest as relics from King Tut's tomb.

Two convicted murderers in a French court sentenced to life imprisonment, demanded the death penalty. The judge promptly complied with their request. They are sorry now that they did not let bad enough alone.

155

Here and There

A discovery of excellent ochre (raw sienna) was recently made near Ellershouse Station on the Dominion Atlantic Railway. The color is uniform throughout, with very little gritty matter in the main body. The material can be burnt to produce a variety of colors from reddish brown to black. Prospecting is still going on.

Canadian Pacific S.S. "Metagama" westbound from Glasgow via Belfast, recently docked at Montreal and Quebec with the record number of 382 cabin and 1,078 third class passengers. This constituted a record only for ships of the size and type of the "Metagama," the Canadian Pacific Empress liners often having a far larger list.

Canadian Pacific Railway officials estimated that 61,000 men would be required to harvest the western crops this year. They expected to supply only 9,000 from the prairie provinces and British Columbia and made arrangements to carry over 50,000 from Ontario, Quebec and the east.

United States factories turn out chewing gum to the value of $41,000,000 annually. The extent to which this product is used in this country can be appreciated when it is known that at the Canadian Pacific Windsor station, Montreal, a man is continually employed in removing gum stains from the marble floor.

Despite the fact that the new Basilica at Ste. Anne de Beaupre is still in course of construction, many thousands more have visited the shrine this year than in former years, and at frequent intervals the Canadian Pacific Railway has been called upon to add special equipment to its regular trains to accommodate the pilgrims. The Redemptorist Fathers are investigating a large number of cures claimed to be miraculous.

E. L. Richardson, manager of the Calgary Stampede of 1923, held under the patronage of the Prince of Wales and Governor-General Byng, announces that, owing to the enormous success of the great rodeo July 9-14 it will be staged annually instead of at intervals of several years, as heretofore. The recent Stampede was attended by 137,800 people.

STOMACH SUFFERING

disappears as if by magic when Jo-To is used. Gas pains, acid stomach, sour stomach, burning and all after-eating distress relieved in two minutes. All Drug Stores.

ROMANCE

The rich bootlegger's daughter, Matilda Beryl Mae, eloped with Slocum Slaughter, who drives the village dray. And folks who marked this antic, exclaimed, "Love conquers pride! How lovely! How romantic! Three cheers for groom and bride! She was a pampered maiden, all luxuries were hers, and she was always laden with costly silks and furs. All this she has forsaken to wed a democrat who earns his eggs and bacon, and little more than that." Amidst the gladsome riot of plaudit and acclaim, I'm sitting sad and quiet, and forecasts dire I frame. I'm sitting grim and sober, I'm saying, through my beard, 'The seventh of October will see this marriage queered. For one who's basked in riches through all her giddy days will soon discover hitches in coinless, frugal ways. The stern bootlegger father is angry in his soul, and says he'll never bother to help him with his roll. 'She picked the village drayman,' he says with pallid gills; 'well, let her one-hoss-shay man make good and pay her bills.' Her haughty heart will quiver, and grief her form will rack, when she is eating liver instead of canvasback. She's used to silken railment and care will gnaw her mind when she is making payment for gingham, cheapest kind. I wish her joy in batches, I'd see my fears entombed; but ah, these misfit matches are nearly always doomed."

WRIGLEY'S

1312

JAPAN LAND OF EARTHQUAKES

Earthquakes have from time to time caused great cataclysms in Japan, where the earthquake shock is more frequent than the thunderstorm; in fact, Japan has oft been described as an earthquake-shaken land, and geologists assert that much of Japan would never have existed but for the seismic and volcanic agency which elevated whole districts above the ocean by means of repeated eruptions. To the untutored of Japan the harrar is ascribed to a slumbering subterranean fish who wriggles when he awakens.

From its earliest history Japan has periodically suffered. The Jesuit missionary Freez, writing from Japan in 1596, told of the destruction by earthquake and fire of Hiego and many other cities with loss of thousands of lives.

Amongst the earliest earthquakes recorded is that of 599 A.D., which is repirted to have destroyed all the buildings of Yamato, or Central Japan, and the rulers ordered that prayers be made to the God of Earthquakes. In 697 a great earthquake occurred at Tsukushi—now Chikuzen and Chikuge—and caused many fissures and chasms, one said to have been four miles long. Six years later the topographical features were again changed by earthquake, and some two thousand acres in Tosa province were sunk below the sea.

In 865 the head of the famous statue of Daibutsu at Nara was thrown down by a shock. In 869 the Province of Mutsu was devastated. The sky was illuminated and the movement of the ground was so violent that people could not remain on their feet and records say that many hundreds were killed by falling houses, while others were swallowed up in fissures. Soon afterwards the sea rolled in upon the coast with a tremendous noise and washed away thousands of people.

In 976, when Kyoto was the capital, that city was the scene of a great shock and many buildings, including the Imperial Palace and three temples, were shaken down, with much loss of life.

One of the most disastrous catastrophies involving loss of life was that at Kamakura in 1293, in which over 21,000 lost their lives. In 1331 the beauty of Fuyi-yama was impaired, the summit falling in and the mountain lost about a hundred feet of its height.

If space permitted, a long list could be given of earthquakes disasters in Japan. The Japanese records contain many accounts of them, of mountains being rent asunder, rivers choked, towns destroyed and whole provinces devastated. Thus such catastrophies are not new to the country. Many have caused great loss of life. In Echigo in 107 the loss of life in one earthquake was 16,300. In this catacylsm a town called Kami Nadachi and a mountain behind it were engulfed in the sea and one woman alone survived.

In 1847 a destructive outbreak occurred in Shinano. A great many towns suffered and masses from the hills were thrown down, choking rivers and forming lakes. In 1854-5 no less than 817 shocks were felt in fourteen months in Tosa, one of which destroyed Shimeda, which had been opened as a foreign port, and the Russian cruiser Diana, lying there, was wrecked. The centre of that disturbance was at Tokio—then Yodo — and the loss of life was enormous. The accounts, generally considered by later authorities to have been exaggerated, placed the loss of life then at 200,000. Then there was a period of comparative immunity from more serious earthquakes until 1891, when a disastrous earthquake occurred and destroyed Gifu and Ogaki, with much loss of life.. This shock was felt over 720 square miles and caused great destruction and tremendous loss of life. the next serious shock occurred in 1909, a repetition on a smaller scale of that which devastated Central Japan in 1891—and now, according to the telegraph reports — which probably exaggerate the casualties — comes what seems to have been the greatest of all the many earthquake disasters of Japan.

Prof. Omori, the well known Japanese expert, speaking after the shock of 1908, said that the records of the past 1500 years did not indicate that the era of destructive earthquakes had passed. Their occurrence was shown to have been fairly uniform, severe shocks occurring about once in every ten years In the thirteen years ending 1897 no fewer than 17,750 shocks were registered, including those only perceptible by seismographic instruments — an average of three and a half per day.

Orpheum, Friday and Saturday, September 14 and 15.

NOTE TO CHINA

Sixteen countries, including Great Britain, the United States, France, Japan and Italy, have presented a note to China on the Lincheng railway outrage of last May. In this outrage a British subject was killed and 24 foreign travellers were kidnapped by bandits and only released after prolonged negotiations. The not has not been accompanied by any increase of foreign garrisons in China. It alludes to the notorious inadequacy of the suppressive measures employed in brigand-ridden provinces, and invites the Chinese government to take immediate steps to organize vigorous operations with the best troops. In effect, it is a call to China to protect foreigners in that country, and the sum of £2850 is demanded as reparation for the killing of a British subject.

Commenting on the note, the Peking correspondent of the London Times says that unfortunately there is only the headless and tailless skeleton of a government in Peking and there is little hope that so amorphous a body will be able to impress on the real rulers of the country—namely, the militarists—the seriousness of the warning conveyed by it. It is difficult, he says, to see how the acting Foreign Minister, behind whom there is no President, no Cabinet, no Prmie Minister, and not even a Parliament in session, can commit himself to any answer of a satisfactory character, nor can any thunder from the diplomatic body alter the situation. In his opinion it will take "positive action" to create any real effect in the country.

In times of dire distress the contribution of the prompt and cheerful giver is twice blessed.

Dominion entomologists have classified twelve varieties of mosquitoes in the Ottawa district. All are said to be equipped with standardized probes.

A "hog calling contest" was a feature of the Kentucky state fair. As a rule a hungry porker is prompt to respond to any announcement that dinner is now being served in the meal trough, but certain musical notes well known in porcine circles cause the swine to drop everything and respond to the siren call.

The Italian notes to Greece may be condensed to three words: "Remit or fight."

Here and There

Protection of migratory birds has been added to the duties of the Canadian Pacific Railway's constabulary.

Airplanes attached to the Ontario Forestry Department are now equipped with radio sending apparatus so that they can keep in constant touch with the chief and other rangers.

There was an increase of sixty-three per cent in the number of immigrants to Canada during the last three months as compared with the corresponding period of last year.

Canadian Pacific agents in Britain recruited nearly five thousand men for work in the harvest fields of Western Canada and, through lack of steamship accommodation closed their doors on as many more who, attracted by the special harvest rate, sought to enter Canada.

The branch lines program of the Canadian Pacific Railway carried out this year will bring into operation on the prairies a larger mileage than any one year since 1914. Of the 431 miles of line under construction. 281 miles will be ready for handling grain in the Fall, and of the balance, 115 miles will be ready for steel by the winter freeze-up.

A building has been acquired by the University of Toronto to be entirely devoted to the manufacture of insulin. This will be the only factory in Canada to manufacture the curative fluid in commercial quantities and, although it is manufactured in the United States, Great Britain and Denmark. the Canadian product will be sold throughout the world.

Dawson City recently celebrated the twenty-seventh anniversary of the discovery of the Klondyke. In an exhibition of Yukon products cabbages 16 inches in diameter and weighing thirty pounds, potatoes as big as a man's head, pumpkins as big as watermelons, wheat, oats and barley bore witness to the fertility of the Yukon soil. Side by side with these ranged gold nuggets, gold dust and silver bars.

Dr. James Inches, Commissioner of Police, Detroit, and a guest at the Canadian Pacific Bungalow Camp at Nipigon, holds the record for the biggest speckled trout caught in the Nipigon River this season, having captured a fish weighing 7½ pounds. This catch was above the average, but a large number of six pounders have been taken from the Nipigon this season. Several years ago, and from practically the same place, Dr. J. W. Cook, of Fort William, caught the world's record speckled trout, which weighed fourteen and one-half pounds, and was more than two and a half feet long.

FERNIE GARAGE

FERNIE, B.C.

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO

A record was established recently when one of the latest type of Canadian Pacific locomotives drew a train of 42 cars of newsprint, weighing more than 1,100 tons, from the plant of the Abitibi Pulp and Paper Company, North Bay, to Toronto, without mishap. Ordinarily, it would have taken two passenger engines to haul such a load for the 320 miles. After proving its worth by this feat the huge engine, together with an all steel train consisting of the latest model tourist, dining and sleeping cars, and a baggage and compartment car, formed part of the Canadian Pacific exhibit at the National Exhibition at Toronto.

Over eight hundred children lost their way on one day in the Canadian National Erhibition grounds. The place where the wanderers were assembled was christened "Squall Harbor" by the harrassed officials.

"Be of good health" has been adopted as a form of greeting in Bulgaria. Cabinet ministers who have been used as targets for pot shots will appreciate a milder expression of concern for their physical welcome.

NOTICE OF CANCELLATION OF RESERVE

NOTICE IS HEREBY GIVEN that the reserve covering Lot 12747, Kootenay District, is cancelled.

G. R. Naden,
Deputy Minister of Lands.

Department of Lands,
Victoria, B.C.,
August 30th, 1923. S7-60d

TIMBER SALE X1933

Sealed Tenders will be received by the Minister of Lands at Victoria, not later than noon on the 28th day of September, 1923, for the purchase of Licence X1933, to cut 1,869,969 feet of Fir, Larch and Spruce, and 26,115 Railroad Ties, on an area situated 2¾ miles East of Bull River, Kootenay Land District.

Two (2) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B.C., or District Forester, Cranbrook, B.C. S7-4t

GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" can't harm tender little Stomach, Liver and Bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad; has sore throat, diarrhœa, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

CHAMBERLAIN'S TABLETS

Act directly on the liver and regulate the bowels. Price 25c. A month's treatment in a package.

WHO FIRST FELT "LIKE A FIGHTING COCK"?

COCK-FIGHTING was born with the cocks.

But it is only 80 years ago that the first man felt "like a fighting cock!"

Now he has brothers, sisters, nephews, nieces, all over the world —all feeling "like a fighting cock!"

It happens this way: A person half sick with bad stomach, dull and heavy headache, takes Beecham's Pills just before going to bed. Immediately the Pills begin to harmonize the digestive and eliminative organs.

Consequently, this person has a good night's sleep and arises in the morning with clear brain, bright eye, keen appetite, and full of energy for work and play.

It is now just 80 years since Beecham's Pills first began correcting disordered stomachs and stirring sluggish livers and bowels to natural activity — and feeling "like a fighting cock" is associated as inseparably with Beecham's Pills, as the pills are with good health.

At All Druggists—

COAL CO. LOST TO WYCLIFFE

The Coal Company baseball team lost their remaining chance of winning the Nelson News Cup last Sunday afternoon at Wycliffe when the Otis Staples Club captured the second game of the series by the identical score of the previous Sunday's game, five runs to four. This gave the west end two straight wins and as the series was to be the best two out of three games, they will hold the trophy for the ensuing year.

The game could not be called a good exhibition of baseball, ten errors being chalked up against the two teams and marring the work of the opposing pitchers. Ault was working under a bad handicap, having injured his knee in a previous game, but outside of the first innings pitched real good ball. Pennington was going strong for the Cliffers, keeping the ten hits off him fairly well scattered.

Fernie opened the scoring column in the first innings, Barger singling and being batted around by McTeer and Bishop. Wycliffe came back strong in their half of the same innings, Bamford getting safe on an error, then Rogers singled, Piper sent two runs across with a three bagger and scored himself on Mitchell's single. There was no further scoring until the seventh inning. A couple of errors and a single gave Wycliffe two more runs. Fernie staged a batting rally in the eighth. Colton drew a pass with two men down, Ault singled, making his fourth hit in four trips to bat, an error on Hovan's hit and then a two bagger by Barger sent three runs across the plate for Fernie. They failed to keep up the melee in the ninth, however, and Wycliffe captured the cup by the narrow margin of two runs in two games.

Box score—

Wycliffe—	AB	R	H	PO.	A.	E
Bamford, lf	4	2	0	2	0	1
Crowe, 2b	4	0	0	1	0	3
Rogers, c	4	1	2	11	1	0
Piper, cf	4	2	4	1	0	0
Mitchell, rf	4	0	1	0	0	0
Trimble, 3b	4	0	0	2	0	1
Whitehead, 1b	4	0	1	8	0	0
Musser, ss	4	0	2	1	4	0
Pennington, p	4	0	0	1	3	0
	36	5	10	27	8	5

Coal Co.—	AB	R	H	PO	A	E
Hovan, lf	5	1	0	2	1	0
Barger, 1b	5	1	3	6	0	0
Shand, 3b	4	0	0	1	1	0
McTeer, c	4	0	1	11	0	0
Bishop, 2b	5	0	1	1	1	0
Rushcall, cf	5	0	1	2	0	0
Wilson, ss	4	0	0	0	1	5
Colton, rf	3	1	0	1	0	0
Ault, p	4	1	4	0	3	0
	39	4	10	24	7	5

Score by innings—

Fernie	100 000 030—4
Wycliffe	300 000 20x—5

Summary: Stolen base, Shand; sacrifice hit, Crowe; two base hits, Whitehead, Barger (2), Musser; three base hits, Piper, Ault; passed ball, McTeer; struck out, by Pennington 9, by Ault 8; base on balls, off Pennington 3, off Ault 1; earned runs, Wycliffe 2, Fernie 2; left on bases, Wycliffe 9, Fernie 11. Time of game 1 hr. 55 mins.

BETTING ON THE FIGHT

New York, Sept. 14.—Betting in New York on the Dempsey-Firpo fight, which was comparatively light, until thousands of visitors commenced to arrive, favors the title-holder to the extent of three to one.

Promoter Rickard announces that a crowd of 90,000 will pay approximately $1,340,000 to see the fight.

EASTERN INTEREST IN PREMIER MINE

Vancouver, Sept. 12.—Indicative of the intense interest now being aroused in eastern financial circles is the visit of Minor C. Keith, multi-millionaire of New York and a director of the Premier Mine, accompanied by his engineer, H. C. Price. Mr. Keith has returned from the Premier with a glowing report which will be taken back to Wall Street. He states the new tunnel of the Premier has passed 600 feet; this will be double-tracked; it will be the main working tunnel of the mine at the portal of which the new 1000 ton mill will be erected. The present capacity of the Premier mill is 100 tons per day. On the new Georgia River prpoerty recent exploration work has uncovered some exceptionally rich free-milling gold ore. Specimens exhibited from this region at the B.C. Chamber of Mines are arousing much interest.

Dominion entomologists have classified twelve varieties of mosquitoes in the Ottawa district. All are said to be equipped with standardized probes.

GREAT IMPROVEMENTS AT TRANQUILLE

Victoria, Sept. 12.—Great improvements have been made in the matter of caring for tuberculosis patients at Tranquille Sanitorium, according to the annual report of that institution just released by Hon. J. D. McLean, provincial secretary. Increased accommodation has been provided and the sanitorium can now care for 243 patients.

The minister points out that there has been a marked increase in the number of advanced cases and a corresponding decrease in incipient cases. This is in opposition to the aim of the government, he states, and advises that an earlier diagnosis of the disease be made, so that tuberculosis may be checked in the earlier stages. The sanitorium is operating on a highly standardized basis, entirely under the control of the provincial government.

PLAYING THE GAME

It is just as good for the moral fibre of Great Britain that its champions for the time being should be beaten by America and France on the lawn tennis court as that they should triumph over oher nations on river and golf links, or set up new records on the running track, so long as they do or say or even think nothing in any kind of sporting competition that is not "cricket." If only the young are taught that in all games it is not the winning but the manner of playing them that matters, no one can complain if once a year their friends and relations put on their highest hats and smartest frocks to see how they shape in their week of public examination.—Times.

CARD OF THANKS

The undersigned wish to thank the following who so kindly sent flowers and for expressions of sympathy at the death of their father, the late Daniel Harrison: Mr. and Mrs. W. R. Wilson, Mr. and Mrs. G. G. Moffatt, Mr. and Mrs. B. Sloan, Mrs. Puillandre, Mrs. Henderson, Mr. and Mrs. N. McCallum, Mrs. Meadows; also for flowers not marked.

—Mrs. Florence Marshall, Harry Harrison, Arthur Harrison.

IN MEMORIAM

In Loving Memory of Kathleen Rose Moses, only daughter of James and Hannah Lyne, who died in Fernie Hospital, Sept. 13, 1920.

—Inserted by her brothers Alf, Ern and Joe.

IN MEMORIAM

In ever Loving Memory of my dearly beloved husband (Stephen) (Steve) Oldacers Lawson, died at Coleman, Sept. 21st, 1922.

Today brings back sad memories
Of a loved one laid at rest,
And those who think of him today
Are those who loved him best.

—Fondly remembered by his ever loving wife and children, 2520 Triumph St., Vancouver, B.C.

Health turns the clock backward

Removing the Cause of Bronchitis.

Health Talk No. 34

By G. J. Parks, D. C.

The man who has never suffered from bronchitis does not know the pain and distress of being unable to breathe easily and deeply. A cold settles in the bronchial tubes. There is a shortening of the breath and the lungs are filled with difficulty, oftentimes with severe pain. Unless the cause is removed the bronchial trouble becomes more and more permanent, weakening the entire body and inviting serious, and often fatal, diseases.

The cause is in the spine and the chiropractor is able to find the disturbed spinal conditions and restore normal nerve flow. The cause is reached and Nature is given a fair chance to restore a healthy condition. Not only does the bronchitis disappear, but the danger of more serious lung ailments such as pneumonia, influenza and tuberculosis is at the same time averted.

Rid of Bronchitis and Persistent Coughing

"For years I have been troubled with a bronchial cough. As a rule it was not troublesome in the summer, but as soon as the leaves began to fall my suffering began. I coughed frequently and occasionally would spit blood. Chiropractic spinal adjustments broke up the persistence of this trouble the first season. It is now three years since my first series of adjustments and there have been no symptoms of a return of this chronic trouble."—Thomas Carr, Chiropractic Research Bureau Statement No. 1291-F.

FERNIE BOOZE IS SEIZED

Lethbridge, Sept. 19.—A big seizure of whiskey was made at 3 a.m. today at Kipp station by the A. P. police of headquarters here, who went out in cars and effected it. The whiskey contained brands of Haig & Haig Scotch and some long cases of Green River Kentucky brand. The bulk was Scotch. There were over 50 sacks with seven kegs, and altogether it made a rich haul, with some $3000 worth of whiskey captured.

The whiskey was sidetracked in a box car at Kipp and the men connected.with it were picked up at Kipp by the police. To deal with them Magistrate Barker was aroused from his bed and held court at 5 o'clock this morning as the magistrate was due to leave early for Manyberries and other points and would not be back in the city until Saturday. F. Nadin of Fernie was fined $500 with costs for being in possession of liquor for sale, first offense; J. G. Freeman of Crow's Nest, who pleaded guilty to a second offense, was on the same charge fined $500 with costs. Connected with the seizure and charged with trespassing on C. P. R. property without being able to give a good account of themselves, W. F. Green of Avoca, Iowa, Wm. Anderson of Avoca, Wm. Jones of Calgary and A. C. Redfern of Calgary were each fined $50 with costs. The liquor was confiscated.

THE ANNUAL MEETING OF THE TOURIST ASSOCIATION

The annual meeting of the Tourist Association will take place in the City Hall on Wednesday afternoon, the 26th inst., at 1 o'clock, when representatives from Boards of Trade and City Councils now members of the Association will be present. These are Cranbrook, Windermere, Fernie, Blairmore, Pincher Creek, Cardston, Lethbridge, Macleod, Calgary and Banff.

New members will be Coleman and Medicine Hat, which are certain of, and it is expected that several other of the Southern Alberta towns will also be represented with the intention of joining up.

CRANBROOK MAN DISCOVERS OIL

Is East Kootenay soon to witness an influx of oil prospectors? Certainly, if the gallon of evil-smelling oil recently brought into Cranbrook by the veteran prospector, Ben Rondeau betokens the presence of oil in East Kootenay, it is not too far fetched to say that oil may be produced locally, says the Cranbrook Courier.

The finding of the oil seepages by Mr. Rondeau is nothing short of being a romance. As far back as 1913, the prospector had his attention drawn to an oil-saturated stump, which, at the time, he thought might have been the result of someone having spilt some oil. Thinking the incidant over lately he repaired to the place about three weeks ago to make further investigation. For some days he was unsuccessful in his quest for, as he himself says, he knows little or nothing of oil-bearing formation. It happened, however, that he did find one small seepage in a marsh. Oil lay on the water but not in quantity, so Mr. Rondeau looked farther afield. On the bank of Findlay creek, not far from his discovery of the oil-saturated stump of 1913, he came upon a bit of swampy ground that fairly reeked with oil. And just a little distance beyond were other seepages with oil in equal quantities.

Mr. Rondeau at once set about the staking of this find. As evidence of his discovery he has brought into Cranbrook a gallon of clear white oil, much like distillate in appearance and odor. That the oil is lying in a heavy coat upon the water may be better understood when it is known that the prospector skimmed it up with an ordinary camp cup.

If an oil pool does exist in the vicinity of Mr. Rondeau's claim, the clearness and fineness of the samples forced up by the gases from below would indicate the oil's lying at considerable depth.

Christ Church

Sept. 23, 1923—17th Sunday after Trinity.

11 a.m., Morning Prayer. "The Religion of Christ."

7.30 p.m., Evensong. "The Christian Life a Challenge."

2.30 p.m., Sunday School.

PICKPOCKETS ARRESTED

William A. Spencer, a passenger on the C.P.R. eastbound train last Friday evening, while the train stopped at Fernie, approached Constable Davis, who was on the platform, and lodged information that he had been robbed of eight ten dollar travellers cheques issued to him by the Hanover National Bank of New York, and stated that two men whom he suspected of the theft had got off the train at Fernie.

Constable Davis reported the matter to Chief Anderson and that officer, with his usual insight into such cases, started investigations which led to the capture of the two suspects within fifteen minutes of being advised of the robbery. These two men, giving their names as Farrell and Smith, were located in a room in a local hotel and when searched were found to have in their possession the described travellers cheques, together with a large sum of money.

Farrell and Smith were released on bail of $100 each Saturday afternoon, but when the case was called in the police court on Wednesday afternoon, neither man put in an appearance, therefore bail was forfeited. A strict lookout for the pickpockets will be maintained by the C.P.R. police.

BAD FIRE UNDER CONTROL

The big bush fire which has been raging for the past two weeks between Crow's Nest and Michel is now well under control, the heavy rain last night doing a world of good.

This fire, the worst in many years, has swept a heavily timbered area of about 35 square miles owned by the Crow's Nest Pass Coal Co., and hundreds of thousands of dollars worth of valuable timber has been completely destroyed.

The large logging plant of A. Rizzuto, near Crow's Nest, was burned early in the week, leaving only his stables intact. A large quantity of cut timber, which was partially covered by insurance, was also destoyed.

The East Kootenay Power lines, which run up the valley, have been in danger a number of times, but have so far escaped.

ROBT. DUDLEY PASSES AWAY

After a lingering illness of almost five years' duration, Robert Dudley, one of Fernie's most highly respected citizens, passed away at his home at 10.45 o'clock Thursday morning, at the age of 64 years.

Mr. Dudley, who has resided in Fernie for over twenty years, came west from Pembroke, Ont., to Macleod, Alta., in 1897, where in company with D. C. Coleman, now Vice President of the C.P.R., he worked as railway agent for this company. The following year he was transferred as agent to the C.P.R. at Kimberley, B.C., and then in 1903 he was sent to Fernie to take charge of the Coal Creek branch, then operated by the C.P.R. When this line was leased by the Crow's Nest Pass Coal Co. and subsequently operated as the Morrissey, Fernie & Michel railway, Mr. Dudley remained with the new company as their agent, which position he held continuously until he suffered a stroke in 1919. He never fully recovered from the effects of this illness and for the past five years has been unable to follow his employment.

Mr. Dudley was extremely active in the work of the Odd Fellows, having been elected Grand Master for British Columbia for the term of 1914-15. He was also keenly interested in civic affairs.

He is survived by his wife and youngest son, Russell, residing in Fernie; three daughters, Mrs. Smith, of Glacier, B.C., Mrs. Taylor, of Nelson, B.C., and Mrs. Tuthill, of Victoria, B.C.; and three elder sons, Leonard and Edgar, at Vancouver, Leonard and Garnet, at Vancouver, and Edgar at San Francisco, Cal.

The body will be taken to Victoria, B.C., for interment, leaving Fernie by the C.P.R. on Sunday morning next.

Business is like an aeroplane—to stop is to drop.

FERNIE WINS AT BLAIRMORE

A team of sixteen golfers from Fernie visited Blairmore on Sunday and played two matches with a team from that city. It was a beautiful day and the course was in fine condition. The competitions were very keen and Fernie was tickled to death when they got away with a narrow margin of ¼ point. The players lined up as follows:

Twosome—

Fernie		Blairmore	
Watson	0	McKenzie	0
Herchmer	0	Wilson	1
Hayne	1	Stevens	0
Irvine	1¼	Kelly	0
Suddaby	0	Roberts	1¼
Kastner	0	Rhynas	1¼
Wallace	0	Scott	1
Mitchell	0	Farmer	0
B. Wilson	1	Bird	0
Wood	0	Crowder	1
Sales	1¼	Mrs. Bird	0
Watmough	1	F. J. Smith	0
Sanborn	1	J. R. Smith	0
Ault	0	Goddard	1
Shand	1¼	Hoar	0
Appleyard	0	Laney	1¼

Foursome—

Wilson and Herchmer	0	McKenzie and Wilson	1¼
Hayne and Irvine	1¼	Stevens and Kelly	0
Suddaby and Kastner	0	Scott and Rhynas	0
Wallace and Mitchell	0	Roberts and Farmer	1¼
Wilson and Wood	¼	Crowder and Bird	1
Gates and Watmough	1¼	Laney and Whitesides	0
Sanborn and Ault	0	F. J. Smith and J. R. Smith	0
Shand and Appleyard	0	Goddard and Hoar	0
Total	10½		10¼

The Blairmore Club provided splendid refreshments throughout the day and did everything possible to give the visitors a good time. Five ladies who accompanied the Fernie team were royally entertained by the Blairmore ladies.

CITY COUNCIL HOLD SESSION

The second September meeting of the city council was held in the council chamber last evening. Mayor Henderson occupied the chair. Aldermen Graham and Douglas were absent.

A report from the city electrician was submitted regarding the burning out of 28 street lights during the resent electrical storm. The chart from the power house showed that the voltage received from the Power Company that date had fluctuated greatly and the electrician stated that this probably caused the damage.

The report of the B.C. Underwriters Association on the fire and water situation in the city was submitted with the notation that immediately upon completion of the new water works system in Fernie a new report would be made out and distributed to the insurance companies.

The claim of P. Carosella for $18 damage caused to his democrat some time ago was ordered to be investigated and if the city was liable, the amount to be paid.

ADDITIONAL LOCALS

R. L. T. Galbraith, of Fort Steele, was in town yesterday.

The electric power in the city will be shut off at 10 a.m. on Sunday for about two hours.

There was a meeting of the directors of the Fernie-Fort Steele Brewing Co. yesterday.

W. J. Dunwoody, of Nelson, Inspector of Provincial Police, was in the city yesterday.

J. Dufour, L. Ashton, J. Garbutt, H. Barger and J. Hovan are holidaying on the Wigwam.

Mrs. R. G. McEwan, Miss Corrigan and Miss Dragon returned on Thursday from a two weeks' visit at the coast.

Don't forget the usual Saturday night dance at the 150 All Sports Gym. Four piece orchestra. Admission 25c; 10c per dance. Ladies free. These dances are becoming very popular.

The common objection to prize fighters appears to be that there is too much prize and not enough fight.

BALL SEASON IS FINISHED

The baseball season in Fernie came to a definite close last week and the local club have packed their equipment for the winter.

Arrangements had been made for the Fernie team to travel to Rockyford where they were to play games on Saturday, Monday and Tuesday for the Calgary Brewing Company Trophy but at the last minute the manager of the Rockyford Club telephoned secretary Hovan requesting the Fernie team to withdraw their challenge for this season as the Rockyford Club was practically disbanded during the harvesting. He stated that if Fernie would consent to this sugiestion, Rockyford would give Fernie preference in challenging for the cup in the 1924 season and would play the necessary games in Calgary instead of Rockyford.

Fernie would have been quite within ther rights in holding Rockyford to play-off this season as their challenge had been okayed by the trustees of the Brewery Trophy, but their sportsmanship would not allow them to take advantage of a weakened team, so they have fallen in line with the suggestion made by the Rockyford manager and will challenge for the trophy early next season.

During the 1923 season the local club have taken part in 26 games, winning 20 and losing only 6, a record that makes their supporters proud of them.

SUICIDE NEAR GALLOWAY

Andrew Mader, a rancher near Galloway, 27 miles west of Fernie, made a gruesome discovery a few days ago when he found the body of his wife hanging suspended by a rope in his barn. Coroner Duthie, of Fernie, was notified and held an inquiry into the matter. Evidence was heard from members of the family, from which it was shown that the deceased had been suffering from poor health for some time. At times according to the testimony of one of her daughters, Mrs. Mader appeared to be temporarily affected mentally, owing to her ailment, and while she had occasionally expressed the desire to die none of the members of the family had ever suspected she contemplated taking her own life. The finding of the coroner's jury was that death was caused by hanging while temporarily insane.

WILL FIGHT FOR RATE ON COAL

Edmonton, Sept. 18.—The Alberta government, Alberta coal operators and the fuel consumers of Ontario will refuse to accept as final the dictum which came out of Montreal that the $7 experimental rate having expired, and the rate having reverted to the original $12.70 figure, this had sounded the "death knell" to Alberta's hopes of developing a market for Alberta fuel in competition with Pennsylvania anthracite, under normal conditions.

Ontario demands Alberta coal and Ontario won't quit till she gets it, says R. L. McIntyre, chairman of the special fuel committee of the Canadian Manufacturers' association of Toronto, who happens to be a visitor to the city today on private business, and also to do what he can to assist the Alberta government and Alberta operators in strengthening their hold on the Ontario market. "It is all bunk about sounding the death knell for Alberta coal in Ontario. My experience as a fuel user as chairman of the special fuel committee of the C.M.A. and among Ontario fuel users in general, impels me to say that such a statement is absolutely rot."

DRUMHELLER MINERS RETURN TO WORK

Calgary, Sept. 18.—Word was received by both the officials of District 18, U. M .W. A., and R. M. Young, of the Western Canada Coal Operators, on Tuesday morning to the effect that striking Drumheller miners were all back at work. The miners decided to go back on Monday, in accordance with their contract and submit their differences with the operators to arbitration.

AN AGE OF INTERFERING

The Cincinnati Times Star has hit upon one of the great weaknesses in humanity in pointing out the difficulty otherwise sensible beings experience in minding their own business. We quote: "It seems the hardest thing in the world for some of our fellow citizens to mind their own business. They must always mind the other man's. If they devoted to self improvement a tithe of the energies which they expend in forcibly improving someone else, the republic would be very near the Golden Age. As this beneficient shift of effort is not in their thought, it behooves the law to effect it by constraint, and by penalties that shall make them regret their abominable acts more than a little." It would be hard to expect the law to step in to put a period on man's activity in minding other people's business, unless that interference became a menace to society. There is no way, indeed, in which people can be stopped from persisting in making other people think as they do except by a broadening of education and a reduction in the fanatical viewpoint.

Men, because of their penchant for talk fests, are becoming more and more gregarious. We are suffering from a plethora of organizations and associations, and surfeited by resolutions and demands. We are losing the power of independent thought based on a silent and prolonged study of the experiences of the past. The newspapers are, perhaps, to blame because they permit almost any individual, no matter what may be his paucity of intelligence, to rush into print on so many occasions when he is accomplishing no good and serving no end save to uncover his own weaknesses and to use up a little white paper and printer's ink. The world is one great forum, with a babel of tongues. There are too many talking and writing without thinking and too few thinking without talking or writing. One thing that the spread of democracy has done is to loosen the floodgates of verbosity.

What a splendid world this would be if everyone minded his or her own business. It would be a world of great hearts and concentrated self effort, and in the aggregate a hundred times more would be accomplished in such a world than is being done today. Men desert their businesses and professions to hold meetings and reunions so that they may discuss purposes and policies, the discussion of which properly belongs to the elected representatives of the people. There is a conflicting duality of effort in too many of the purposes of life. Organizations are created too often for the sole desire of bringing individuals into public prominence so that thereby they may be helped in a business way, or else be kept in the limelight for the object of satisfying political ambition. What an aggregation of hypocrites we are. We make the minding of other people's busness a fetish and grumble because our own business does not flourish to our liking, and in ninety-nine cases out of a hundred it does not flourish simply because we do not give it enough attention. Much that is wrong with the world today, and many of the causes that contribute to whatever lack of progress we deplore, may be summed up in the phrase that we do not mind our own business enough and interfere too much with the other fellow's. We can never have anything like a Golden Age on earth until we concentrate on self-improvement. With the vast majority of individuals, both in a material and moral sense, it is a case of "physician heal thyself."

o

THE CONGRESS.

During the interesting and important meeting of the Trades and Labor Congress there were several tests of strength between the moderate and constructive element and the radical and destructive group. The contest for the presidency between representatives of each school enables the public outside to estimate their relative place in organized labor as in all society. But the delegates of the organized workers have decided by a majority of three or four to one that the place of the former promoter of the One Big Union is not at the head of their Canadian organization. Some of the conclusions reached by the congress may not be approved by other classes and interests in the population but it may be said that the general tendency was to deal with practical problems in a practical way, and not to allow academic and political questions to monopolize the time and attention of the congress. It is evident that the congress is interested in but not wholly absorbed by politics. In the vast and varied field of industrial relations and activities many matters arise which require more attention that a short annual session can give them. This congress is kept busy on such affairs.—The Province.

WILL SMALL BANK SURVIVE?

There is a feeling in some quarters that the day of the small bank is passing and it is inevitable that sooner or later they will be swallowed up by the larger organizations. Small in relation to our banks is a comparative term. As a matter of fact we have no small banks when we compare our financial institutions with those of the United States. With a paid-up capital of two, three or four millions, with ample reserves and total assets ranging from twenty to seventy millions, our "small banks" are really not small at all. No "small" banks in Canada ever went to the wall by reason of its size. The size of the Home Bank had nothing to do with the fact that its doors are now closed, and the same may be said of the Farmer's Bank, which was wrecked mainly through the Keeley Mine, which today, under other management and further development, is one of the world's great silver producers. The Ontario Bank went to the wall by reason of reckless Wall Street gambling, while in the case of the Ville Marie Bank a thief of a manager and an old man in his dotage acting as president, were the contributing causes of its failure. In the case of the Merchants' Bank, which was by no means small, it appears to have been an instance where the till was open to a pack of gamblers on the one hand and unstable business on the other.

In regard to the suspension of the Home Bank it appears from what is now known that this institution assumed top-heavy obligations in lines of business that were to say the least speculative. Loans of a size that were all out of accord with its comparatively small capital stock and smaller reserve were made, and these have gone bad on its hands. Had the Home Bank continued business on a conservative basis, showing proper judgment as to the extent and spread of its loans there is no reason to believe that it would have met with serious reverses. Its size had little or nothing to do with its fate.

The small bank unquestionably has its uses. and deserves to survive. Banks with a million or two paid-up capital and proper reserves might well confine their business to a given locality, as do the banks in the United States and as does tthe City and District Savings Bank, which for generations has served its Montreal clientele in its own field. In banking as in other activities the human equation is too often lost sight of. Men make or break banks as they do other business institutions, and too often may it be said they handle the funds of the bank as if it were their own, in place of it being the property of the depositors, placed with them in trust.—Saturday Night.

o

SUGGESTION REGARDING ARMISTICE DAY

The suggestion has gone out that on the celebration of Armistice Day one common sentiment should be expressed in the same words throughout the Empire. There is no necessity that any special piece of prose or poetry should be written for the occasion, since there are sentiments expressed in words long preserved that cannot be equalled by modern pens. The idea is to have some thought impressed on the minds of all who commemorate the anniversary which now possesses such fateful significance for the people of our race, and a Toronto gentleman, Mr. Alexander Fraser, has suggested that the following striking quotation form Pericles' oration should be read everywhere in the Empire on Armistice Day:

But each one, man by man, has won imperishable praise, each has gained a glorious grave—not that sepulchre of earth weherein they lie, but the living tomb of everlasting remembrance wherein their glory is enshrined, remembrance that will live on the lips, that will blossom in the deeds of their countrymen the world over. For the whole earth is the sepulchre of heroes; monuments may rise and tablets be set up to them in their own land but on far-off shores there is an abiding memorial that no pen or chisel has traced; it is graven, not on stone or brass but on the living heart of humanity. Take these men, then, for your example. Like them, remember that prosperity can be only for the free, that freedom is the sure possession of those alone who have courage to defend it.

o

Moscow declares that the recent earthquake has jarred the balance of power in Europe. Europe has been off its balance so long that another little jar would hardly be noticed.

PASSING OF LAW PASSER

There is nothing that Canada needs and wants less than more laws for the purpose of delineating and curbing the social relationship of man to man. Mechanically our somewhat incoherent civilization has hardly begun to develop. Living seems complicated now, to go no further, but two hundred years from now, to go no further, there will be a thousand times the physical contacts in the business of existence there are today, and we will need a thousand times more exact divisions of our rights, responsibilities and our properties. The advent of the motor car made necessary more laws than Abraham ever knew, but we can stand them, for they are based on laws of order as fixed as the power that holds the stars in their course. But we do need but very few more laws designed to make us good, and as far as Canada is concerned we can thank Heaven that we do not seem to be getting them. The flood of bughouse statutes continues in the United States but there are signs that the revolt is at hand and that instead of gleefully passing laws covering everything from eating oysters out of season to the manner of looking at the sky the American people will begin to really enforce a few old fashioned and well grounded laws regarding murder, arson and thievery. In Canada we have already reached the state of mind where we greet with hoarse laughter the ernest lady or gentleman who wants a law passed stopping us from doing things we like to do and have been doing for a long time. We have a good many of these laws, but we consider them quaint reminders of a silly season of regeneration by court proceedings and we are fast forgetting them.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, ur

JAZZ LOSING POPULARITY

Los Angeles, Sept. 19.—Wriggling, squirming, jazzy dancing is losing its popularity in nearly every part of the United States, and modesty, propriety and reserve are coming back in dance halls, according to Fenton Bott, national director of dance reform, who attended the summer session of the normal school of American National Association of Dancing Masters here.

The touching of faces, semi-embraces and excess of muscular response to overdone syncopation are now taboo in virtually every dance hall in America, said Mr. Bott. Men and women have swung back to the human normal of propriety and good taste, he said.

"The most undesirable jazz dancing was the result of adding a dreamy oriental atmosphere to highly syncopated music," continued Mr. Bott. "It is almost impossible properly to supervise dancing when the time of the selection is broken up by a great number of beats. When the jazziest of music is played, it is hardly possible for the dancer not to respond.

"Improper deportment on the floor of dancing schools and public halls has become a rarity in the last three years. The campaign conducted by the National Association of Dancing Masters for clean dancing is partly responsible for the change. It also is to be credited to the people themselves.

"Private clubs and cafes have been beyond the influence of the association, and in these privileged places jazz dancing in the extreme may still prevail, but the bulk of the nation's dancers, those who attend schools and halls, are dancing with as much modesty, propriety and reserve as ever was seen in the days of the waltz, polka, schottische and their running mates.

"The waltz will never be dropped and the two-step is with us still in the fox-trot, but I believe what is known as the new school of dancing has come with us to stay.

"The west has adopted the reform more quickly and perhaps more thoroughly than the east."

After the world's series comes Thanksgiving, followed by Christmas shopping and the end of a more or less perfect year.

How to make your skin fresh and clear

Every woman passes as pretty if only her skin is fresh, smooth and young. It is within the power of every woman to possess this attraction to make her complexion as beautiful as she longs for it to be.

The secret? Cleopatra knew and practiced it in the days of ancient Egypt. She observed a daily ceremonious cleansing. The cleansers she used were the same you may have today, Palm and Olive oils.

These beautifying oils are scientifically blended in famous Palmolive Soap. They give it mildness, wonderful soothing qualities, profuse, creamy and refreshing lather.

Cleansing with Palmolive is a beauty treatment in itself. No woman should say her skin is too sensitive to use soap until she has tried Palmolive.

The attractive green cake, the natural color of the oils, is within the reach of every one who appreciates that cleanliness is the greatest beautifier.

You can buy Palmolive Soap at all first class dealers.

Palm and olive oils —nothing else—give nature's green color to Palmolive Soap

LOOKS LIKE A MARKED INDUSTRIAL DEVELOPMENT

Even discounting the natural optimism of British Columbians over their future, the statement is made by high officials of the government department of industries, that this province is directly in line for marked industrial development and there exist at the present time unusual opportunities which should be grasped by local capital. Grain-milling and the manufacture of electrical equipment are said to offer exceptional opportunities. The immense natural resources of British Columbia are being investigated by British capital and information regarding any line of industry may be secured from the department of industries at Victoria.

DEPOSITORS IN MONTREAL ACT

Montreal, Sept. 17. — Depositors in the Montreal branches of the Home Bank of Canada gathered here today, in reply to a request made by I. A. Weldon, advocate, of Lindsay, Ont., who has been named general secretary of the depositors of the bank in Canada. Mr. Waldon said a meeting of representatives of different localities would be held in Toronto, probably this week.

The meeting heartily approved of statements that it was for the other banks to come to the aid of the depositors and a threat was added by Bernard Rose, K.C., representing the Verdun Great War Veterans' association and a New York financial institution, that unless this was done, a movement would soon commence throughout Canada for the formation of provincial savings banks.

A resolution was passed that the depositors present constitute themselves into a "Province of Quebec Home Bank depositors' committee," and that this organization continue in existence until such time as the depositors get 100 cents on the dollar.

Another resolution opposed any winding up order until the curator has made his report and until such time thereafter as the depositors have had time to consider the report; and that the government of Canada should at once appoint a royal commission to investigate the causes of the failure of the Home Bank, and also investigate, in the most complete manner, the present condition of all Canadian banks, so that depositors may be in a position to judge as between banks.

Another resolution protested against a preference being given to deposits of the federal and provincial governments. Mr. Weldon explained that it was desired to have the governments waive their rights under the Bank act of preference over private depositors. He added that in the case of the Home Bank, it was found that the depositors' money had been taken to New Orleans and put into a railway. While the shareholders had put money into the Home Bank for the purpose of making profits, the depositors had done so for the purpose of getting security.

He added that he expected both the government and the Canadian Bankers' association to take an interest in the Home Bank, and he declared that had it not been for the association urging the government not to have outside inspection, this failure would not have occurred.

Bernard Rose, K.C., insisted on depositors getting 100 per cent of their claims, claiming that their funds were in the same position as trust funds. He declared that the information that the Home Bank affairs were not sound was known at Ottawa months before the crash.

He suggested that a committee wait on Premier Taschereau to ask him to use his influence with the federal government and the association to get the money for the depositors. He also wanted a huge delegation to go to Ottawa.

o

WELCOME THE PRINCE

CALGARY, Sept. 16.—Cowboys, ranchers and townspeople of the High River district accorded Edward, prince of Wales, a royal welcome when he arrived in the southern town last night on his way to the ranch in the Pekisko district. Far the first time since his arrival in Canada the prince walked from the depot platform to the main street of the town, unaccompanied by either secret service men or policemen.

"They are my neighbors; why should they not greet me?" said the prince to his secretary, and the police officers watched the welcome of their private car.

The prince later proceeded to his ranch, 35 miles away, by motor car.

Fort Steele Getting Ready

CRANBROOK, Sept. 16.—It is stated on what is looked on as quite reliable authority that the Prince of Wales is to visit this district in the course of his present holiday in western Canada. Big game hunting in the mountains back of Fort Steele is the object of the prince's intended visit, among other denizens of the wild available for the hunter's gun in that section, the elk being quite numerous.

It is stated that the prince, while at Fort Steele, will be a guest of Commander Pilchard, R.N., and alterations are now being made in a building at Fort Steele to house the prince and his party during their stay.

Local Fort Steele guides would be employed to take the prince to the hunting grounds, and the well-defined rumor that so distinguished a visitor is to be welcomed to the district has created a ripple of unusual interest.

It was known about a year ago that an invitation had been extended to his royal highness to hunt by Commander Pilchard.

FIVE YEARS' AGONY ENDED

When He Took "Fruit-a-tives" For Rheumatism

The Medicine Made From Fruit

There can be no doubt that "Fruit-a-tives" is the long sought remedy for Rheumatism and Lumbago. From all over Canada come letters testifying to this fact.

Mr. John E. Guilderson of Parrsboro, N.S. writes: "I suffered badly with Rheumatism for five years—tried different medicines—was treated by doctors in Amherst—and here at home—but the Rheumatism came back.

In 1916, I saw an advertisement for "Fruit-a-tives" and took a box and got relief, so I took them for about six months and the Rheumatism was all gone and I have never felt it since".

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

EXCEPTIONAL CAST IN NEW BEACH FILM

The list of characters in "Fair Lady," second of the Rex Beach photoplay productions for United Artists' Corporation, discloses an aggregation of exceptionally strong and popular players. "Fair Lady" has been booked for the Orpheum theatre Friday and Saturday.

Miss Betty Blythe plays the leading feminine role, that of a Sicilian countess, a characterization in which she has ample opportunity for the display of her exquisite grace and splendid artistry.

Thurston Hall, who was the "heavy" in Mr. Beach's preceding picture, "The Iron Trail," is again cast as the foil for the hero.

Arthur Tracy, well known on the speaking stage and on the screen, has been cast for the quaint comedy role.

Robert Elliott plays the straight lead opposite Miss Blythe, while Gladys Hulette is in the ingenue role.

The story of the new Beach feature opens in Sicily, where the action takes place in interior settings, and then shifts to New Orleans where the Italian quarter figures prominently in the scene embellishment.

"There is an indefinable something about making scenes in the real atmosphere of a story that adds greatly to a production," says Mr. Bennett, "and while almost any scene can be 'faked' under the broad rules of dramatic license, I find that a picture gains a great measure when real 'atmosphere' is put into it."

NOTICE TO CREDITORS OF FIRST MEETING WHERE ASSIGNMENT IS MADE

In the Matter of the Bankruptcy Act, and in the Matter of the Ross-Saskatoon Lumber Company Limited of Waldo, in the Province of British Columbia—Bankrupt.

Notice Is Hereby Given pursuant to the provisions of the Bankruptcy Act that the Ross-Saskatoon Lumber Company Limited of Waldo, in the Province of British Columbia, did on the 14th day of September, A. D. 1923, execute an authorized assignment to the undersigned.

Notice Is Further Given that the first meeting of creditors in the above Estate will be held at the offices of the undersigned, 201 Lancaster Building, Calgary, Alberta, on Monday, the 1st day of October, A.D. 1923, at three-thirty o'clock in the afternoon; and that to entitle you to vote thereat proof of your claim must be lodged with us before the meeting is held. Proxies to be used at the meeting must be lodged with us prior thereto.

And Further Take Notice that if you have any claim against the debtor for which you are entitled to rank, proof of such claim must be filed with us before the 17th day of October, A.D. 1923, for from and after the expiration of the time fixed by sub-section 8 of Section 37 of the said Act we shall distribute the proceeds of the debtor's estate among the parties entitled thereto, having regard only to the claims of which we then have notice.

Dated at Vancouver, B.C., this 17th day of September, A.D. 1923.

The Canadian Credit Men's Trust Association, Limited.

THE PICK OF THE PICTURES

FRIDAY and SATURDAY, SEPT. 21 and 22
BETTY BLYTHE in
Rex Beach's Romance
"FAIR LADY"

A thrilling romance that shows a woman's hatred, born of a fancied grievance, turn to deepest love; her vow of vengeance forgotten, she braves death to save the man once scorned. A gripping melodrama based on actual happenings in a great American city.

Ruth Roland in "The Timber Queen," Chapter No. 7

Comedy

MONDAY and TUESDAY, SEPT. 24 and 25
"THE SON OF WALLINGFORD"
By Lillian and George Randolph Chester

An intensely human story of a youth who tried to make a fortune honestly and at the same time prevent his father from carrying out a crooked scheme. A photoplay that does not depend entirely upon the magnificent spectacular scenes for which it has become known. Its success is due as much to the simplicity of its domestic scenes and human love story as to the big pageant requiring a menagerie and 8000 actors, and the lake of burning oil, which is regarded as the greatest conflagration scene ever filmed.

Comedy Scenic

WEDNESDAY & THURSDAY, SEPT. 26 & 27
"RICH MEN'S WIVES"
Are they to be pitied, scorned or envied?

A society drama with an original treatment, and must not, in any manner, be set down as "a problem play." It tells of a beautiful young woman with a true mother instinct forced by circumstances to live the life of a butterfly in gilded garb; of a sincere man whose happiness, with that of his wife and child, is sacrificed on the altar of Gossip.

The Cast—House Peters, Claire Windsor, Rosemary Theby, Gaston Glass, Myrtle Steadman, Baby Richard Headrick, Mildred June, Charles Clary, Carol Halloway, Martha Mattox and William Austin.

Fox News. Comedy

WEDNESDAY NIGHT TWO SHOWS AT 7 AND 9
THURSDAY NIGHT ONE SHOW ONLY AT 7.30

Admission—Adults 50c. Children 25c

ISIS THEATRE

Saturday, Sept. 22nd

HOOT GIBSON in
"DEAD GAME"

It's the most thrilling, dare-devil picture in which Hoot has ever appeared. See him with his bare hands capture a wild horse in the desert, and give his enemies the surprise of their lives when he comes dashing down the main street of the old home town, and just in time for a battle royal.

"Perils of the Yukon," Final Chapter.

LOCAL & GENERAL

Mr. and Mrs. W. R. Wilson are spending a few days at the coast.

Mr. and Mrs. A. Walde are visiting in Creston.

Kenny Stewart left for New Westminster the other day, where he is attending High Schpol.

Arthur Gee, of Queen's University, Kingston, is the guest of hs brother, Dr. Gee, of Fernie.

C. D. McRae, of Pitt Meadows fame, was in the city from Vancouver this week.

Mrs. M. Hatten and children, of Cranbrook, are the guests of Mrs. M. A. Kastner.

Miss Mollie Henderson left this morning for Chicago, where she will visit her brother Jack.

Don't forget the social and dance in the Catholic Hall on Friday, Sept. 28. Cards from 9 to 10.30. Dancing from 11 to 1. Admission 50c. S21-28

A. J. Dunnett and W. J. Walker, of the Board of Underwriters Association, are in the city making a rerating of the town.

The annual Tax Sale of property for unpaid taxes in the city of Fernie will be held in the council chamber on Monday, October 1, at 11 a.m.

Manager H. Cox of the Fernie-Fort-Steele Brewing Co., will leave tomorrow for the coast on a business trip.

There is considerable talk about oil in the Flathead Valley these days. A well has recently been put down about 2300 feet and is showing a strong flow of heavy oil.

A large crowd heard the returns from the Dempsey-Firpo fight at Ingram's on Saturday. There was very little money changed hands in Fernie on the result.

Dr. C. H. Huestis, representing the Lord's Day Alliance of Canada, will deliver a lecture in the United church on Thursday evening at 8 p.m. Subject, "World Reconstruction." A collection will be taken.

The 150 All Sports Gym is giving a Hard Times dance on Tuesday, Sept. 25, entirely under hard times rules. Come and enjoy a good time. Admission $1 per couple. Extra lady free.

Albert Mutz, of Vulcan, was in the city yesterday. Mr. Mutz recently returned from a trip to his old home in Germany after an absence of 40 years. He says that a Canadian dollar is a small fortune in that country and a man has hard work counting his exchange.

The young ladies of the Sodality will hold a Thanksgiving sale of work on Saturday, Nov. 10, from 3 to 7.30. Small, large and useful articles, all moderately priced, may be obtained at this sale. It will be a good time to buy your Christmas presents and save the rush later on. Don't forget the date, Saturday, Nov. 10.

A Montana Dodge car containing two men and a woman, met with a bad accident in Phillipps canyon on Sunday last. The car was going up the far side and when about half way up ran over the bank. The two men were only slightly injured but the woman, who was rushed to a Eureka hospital, is not expected to live. The car was a complete wreck.

Billy Ross, who recently returned from California, tells a good story on our old townsman, C. H. Skinner, late of the Western Canada Wholesale. C. H., who is down in Long Branch, Cal., has done well and is one of the prominent business men in that city. Billy attended a big banquet at which C. H. was one of the prominent guests. In the midst of the festivities an usher appeared and asked if C. H. Skinner was in the house. C. H. adjusted his glasses and stood up, whereupon the usher said that he was wanted in the cloak room as his overcoat was leaking.

The Ladies Guild of Christ Church will hold a sale of home cooking in the basement of the church on Saturday, Sept. 22nd, at 3.30. Afternoon tea will be served. In the evening there will be a whist drive. It is to be hoped that all church members and those interested will make a special effort to attend these two functions, as the proceeds will be used for much needed repairs to the front of the church. S14-2

WHITE STAR YEAST CAKES

Are Not The "Just as Good Kind"

THEY ARE THE BEST

Mr. and Mrs. Jos. Hughes have returned from a trip to the coast.

Mrs. Emma Kirkpatrick left this morning for Los Angeles, where she will visit her sister.

Franklin Bonnell leaves today for Toronto, where he will resume his studies at Toronto University.

After Oct. 1, Dr. Corsan will occupy the offices with Dr. Bonnell in the Henderson Block.

Born—In Ferne, on Saturday, Sept. 15, to Mr. and Mrs. A. L. Walker, a son.

Born—In Fernie, on Sept. 16, to Mr. and Mrs. J. S. Crosscombe, a daughter.

John McDonald, of Coleman, has opened a merchant tailoring establishment in the store next to Lowden's Meat Market.

Esther Rebekah Lodge have postponed their whist drive and dance until Monday, Sept. 24, on account of the death of Brother Dudley.

The I.O.D.E. will hold a rummage sale in the I.O.O.F. Hall on Saturday, Oct. 6. There will also be a table of home cooking. Watch for further particulars.

Flour is coming down. In sympathy with the lowering wheat prices flour prices are dropping. At Lethbridge wheat is now bringing 75c a bushel, wagon load lots.

Louis Proudlock has sold his residence in West Fernie to Jas. Clark, and will leave in a few days for Lethbridge. Mr. Proudlock has an interest in a mine near that town.

The funeral of the late Robt. Dudley will take place on Sunday morning from the I.O.O.F. Hall to the C.P.R. depot. Service will start at 10 a.m. Friends and acquaintances will please accept this intimation.

In the ladies golf play last Tuesday in the Wilson Cup, Miss Edith Biggs was the winner. The score was 56-26—30.

A representative of the Trudel Fur Manufacturing Co., Ltd., of Edmonton and Lethbridge, will have a big display of furs at the Golden Lion Trading Co., on Saturday, Sept. 22.

W. R. Ross, of Vancouver, spent several days in the city this week renewing old acquaintances. He has just returned from a two months vacation in California. Mr. Ross is heavily interested in coal up the Elk and his visit here was in connection with these interests.

Rev. Father Kennedy and W. R. Ross of Vancouver, were the speakers at the Rotary luncheon yesterday. Father Kennedy took for his subject "The Education of the Youth" in the home and school. Mr. Ross gave a short talk on his recent trip to California.

Last Monday night Constables Tutin and Doree of the R.C.M.P. arrested two men, O'Connor and Boring, who were stealing a ride on a G. N. freight train. Before Magistrate Henderson, on Tuesday, they received sentences of one month and one week respectively.

The women of Mooseheart Legion wish to thank all the Sisters, Brothers and friends who kindly donated to the success of their sale of work and dance. The following were the prize winners in the drawings: Cushion, No. 44, Peter Piola. Shawl, No. 101, Mrs. McRitche, Coal Creek; and the cake number was 39. These prizes can be had by the winners at Mrs. James Wilson's, 30 Dalton Ave., by producing the tickets.

Mrs. Marchbank's Kindergarten School will open at the BAPTIST MANSE on Wednesday, September 5, at 9 a.m. Phone 10 or call 73 Pellatt Ave. a31|3

Victoria, Sept. 17. The capital is now becoming the Mecca of nuerous interests with the announcement that the Legislature will open on Oct. 29. The question as to whether beer will be sold by the glass in standard hotels in order to overcome the presert beer club evasion practiced by the City Councils of Vancouver and Victoria is worrying the mind of Attorney-general Manson. The barbers of the province have followed the lead of the doctors and dentists and engineers and are asking for a special act, making them a profession with an examination for admission to the tonsorial art.

Hon. Dr. Sutherland is taking advantage of the fine weather to make a personal tour into the Peace River country, in company with his engineer Mr. Philip, and Capt. Ian Mackenzie, M.P.P. to see by actual travel what the road needs of the great district are.

Vancouver, Sept.— An astounding case has been brought to light by The Hook, the Vancouver weekly paper edited by J. S. Cowper, ex-M.P.P. in its campaign against usurers and unconscionable bailiffs.

An aged veteran of the Crimean and Abyssinian campaigns, his son and daughter-in-law and his little grandchild were all found sleeping on the bare boards of a house at 1214 Powell St., by The Hook investigator. They were without money, furniture, stove, food or bedding.

The younger man, partially crippled has been sick and out of work for three months. Six weeks ago they had gone to a Kitsilano money-lender to borrow $75 to tide them over till the man was fit to go to work again. They had to agree to pay two hundred per cent. interest for a two months loan, repay $55 at the end of the first month, pay ten dollars "expenses" and give a chattel mortgage on all their furniture valued at $400. They repaid $25 last Friday week, and the balance of $30 was to be paid on the following Thursday, when the man started work again but on the Monday the money-lender put in a bailiff and stripped the entire house of furniture, including a new stove that cost $125, a new sewing machine that cost $106 and other items including the child's cot and the family's bedding.

The Hook has taken the matter up and threatens to have the matter laid before the Attorney-general unless the furniture is restored. Names and addresses of all the parties are given and further exposures of the ways of bailiffs and money-lenders are promised in the next issue.

Vancouver, Sept.—App. half a ton of gold ore samples have been received from the Portland Canal district, and some have been exhibited a t the Chamber of Mines where their unusual richness has aroused keen interest. Assays of the composite pyrrhotite ore show up to $270 a ton, while other assays give over 58 oz., or about $1160 per ton, the latter being principally taken from the Georgia River mines. The specimens were gathered without particular selection for investigation purposes, from the Georgia River, Fish Creek, Betty Group and other claims in the American Mining and Milling properties, which lie in the Premier region. Grant Mahood, who heads the group of owners, is now in the feld with engineers, making further investigation, and his return is watched with expectancy by the shareholders and others interested in the development of the Portland Canal mines. Old timers say these assays are unusual, when it is remembered that the specimens are not free gold.

The B.C. Chamber of Mines is receiving inquiries from distant parts of the world keen interest centering around B.C. gold and silver deposits. Some of the inquiries come from London, New York and South Africa.

Nanaimo, Sept.—Supported by influences in Vancouver and Victoria, an effort is being made to re-open Departure Bay for the fishing of herring which, it is pointed out, have no value in the domestic market, being good only for bait or fertilizing. A market for the entire season's output is offered in the Orient, including devastated Japan, and a revenue of upward of $60,000 is accessible. At present, the Bay remains closed, following an order-in-council, but strong efforts are now being taken to set this aside, and a petition to this end is being started. It is understood that no official objection exists and it is unofficially learned, that the Dominion authorities do not recognize Departure Bays closing as possessing any practical value to the fisheries industry.

British Iron Masters Willing to Co-operate In B.C. Steel Plant.

Vancouver, Sept.— Indicating the keen interest evinced by the great iron masters of London in the steel and iron project for B.C., the following cable report has been received:

London, Sept. 13.—The big project which envisages the establishment of a great steel and iron plant in British Columbia, and which has engaged the attention of the B.C. Government and Anglo-Canadian capitalists for several years, has taken a decided step forward by a deputation which waited upon Hon. John Hart, minister of finance, and Hon. F. C. Wade, agent general in London. The deputation was composed of some of the Empire's outstanding figures in this industry. Their number in cluded Col. Sir Wm. Ellis, president, John Brown Co. Ltd. and chairman of Davey Bros.; Gen. Sir Wm. Sefton Brancker—chief civil aviation; Sir John Nobel, vice-chairman of Armstrong, Whitworth, Ltd. Thomas Newton Miles, of Newton, Chambers Co.; George R. Dodson of Partington Steel Co.; W. Colquhon, of Semet, Solreay & Piette Coke and Oven Co.; William Walber of Freyn Brass Co.; and C. P. Williams, managing director of the Coast Range Steel Co. and a number of others.

The spirit of the conference was that, if the people and the government of B.C. showed the local support which was fully anticipated, there would be nodifficulty in securing the necessary finances in Great Britain.

Vancouver, Sept.—A little woodpecker, will play an important part in municipal politics at the coming election. On the Woodpecker Ticket is L. D. Taylor, several times mayor of Vancouver. He made a close run last election, but was defeated by the present incumbent, Mayor Charles Tisdall, Ex-Mayor Taylor, vows the pecker will place him back on the mayor's chair. It happened this way: Taylor was running well in the race, but depended upon the working man's vote to win. When the evening cars came in, however, with their passengers returning from work, there was a breakdown and, it was said, thousands of working men could not go to the polls to vote after their supper. The street car cmpany declared that a woodpecker got on the line, was electrocuted and tied up the whole system for several hours. When the cars were running again the polls were closed. Mr. Taylor vows it was a "put up" job to lose him the deciding votes from the workers. He will make it an issue at the election.

o

NEW ZEALAND REFORESTATION

From New Zealand comes the first practical scheme for the planting at a profit, of forest areas. Few men will plant trees if they have to wait from 50 to 100 years to secure a return upon the investment. Idealists have advanced splendid theories for the propagation of new forests, but it has remained for New Zealand to perfect a plan of reforestation under private ownership, which actually places the whole business on a sound commercial basis.

W. McArthur, lumberman, of Auckland, New Zealand, told the "Western Lumberman" of the plan which has been introduced in his home Dominion. The New Zealanders have formed joint stock companies, shares in which may be obtained at a par value of $1000, to carry out the work of planting new forests. It is figured that redwoods will reach a merchantable size in 50 years, and the Douglas fir in 45 years.

"Supposing an area is planted to Douglas fir," said Mr. McArthur, "and one purchases a share or shares at $100. By the time the trees will be ready to cut, the original investment will have increased in value perhaps 10 or 20 times, and the investment of $100 may return at the end of say 40 years, from $1000 to $2000.

"Now the trees will mature if the forest is protected, and protection against fire is not likely to cost a great deal. It is possible to secure an insurance on the growing timber as a protection to the owners against fire, thus it is possible to place the business of reforestation on an actuarial basis at the end say of 10 years, so that stock in a reforestation society might be realized upon at any time by the investor. Of course this sort of an investment would be made for the benefit of one's sons or daughters, and those investing would not expect to reap a return within a short time.

"In our country the trees mature very rapidly and I have seen specimens of redwoods at 30 years of age, two feet six inches in diameter.

"Meantime," said Mr. McArthur, "we are making large imports of timber from the Province of British Columbia, and in return we are sending you the products of our dairies and of our grazing lands. We bought last year over $5,000,000 worth of timber from British Columbia, and I regret to say that you did not buy that much butter from New Zealand, your imports from our country being but 2,533,408 pounds."

Concerning timber resources of New Zealand, Mr. McArthur said: "Timber there is very expensive, as we have less of it than you have in America, and it grows more quickly in our climate than in most places—and for these three reasons the policy of planting a forest is a national need of the Dominion and one which we are not neglecting there."

Mr. McArthur, who is accompanied by his charming wife, while in Vancouver, will join the Imperial Forestry Conference. During his stay here he was the guest of the Vancouver Lumber Co., the Canadian Western Lumber Co., and of others prominently identified with the lumbering industry.

He was particularly anxious to make arrangements with Vancouver concerns looking to the importation of lumber, on his own account, and before leaving the city will likely enter into definite arrangements with one of the British Columbia mills to supply his needs.—Western Lumberman.

o

ARRANGING TO SEND LUMBER TO JAPAN

Washington, Sept. 18.—The National Lumber Manufacturers' Association estimates that the export of lumber to rehabilitate the cities of Japan, partly destroyed by the recent disaster, will amount to about three and three-quarter billion feet. This is about one-tenth the annual lumber output of the United States. The West Coast Lumber Association, which supplies annually vast quantities of lumber to Japan, is getting in readiness to meet any unusual orders that may be received.

So far, no information has been received from the Japanese government as to the amount it may require. Lumber interests on the west coast are holding a meeting in Tacoma, Wash., in order to form a working organization for forwarding to Japan lumber donated by the lumber interests of the Pacific coast. Such donations, it is believed, will be large.

o

Spanish prisoners captured by the Moors may be said to be "bound in Morocco."

Beecham's Pills
Keep you fit

For Mothers—"FRY'S"

For true nourishment in delicious form FRY'S COCOA is supreme. Make it this way and you will find it most appetising and digestible. To 3 good teaspoonfuls of Fry's Cocoa add three spoonfuls of sugar, mix well. Then add one half cup of boiling water and mix thoroughly. Add two cups of boiling water and boil very slowly for 5 minutes, stirring occasionally. Then add milk or cream to taste. This will give you Cocoa at its best.

REMEMBER, NOTHING WILL DO BUT FRY'S 119

CANCER SCOURGE

A memorandum issued by the British Ministry of Health deals with the cancer scourge. It points out that in the space of two generations the recorded mortality from cancer has trebled. This increase, it says, cannot wholly be accounted for by longer life or better diagnosis. It appears that the death rate from cancer is not increasing for males up to 45 and for females up to 60. The most rapid increase is occurring in extreme old age. The memorandum is well worth wide publicity, and is indicative of the strenuous attempts now being made to awaken the British people to the danger of the disease. It is especially emphasized that there should be early recognition of cancer and also of pre-cancerous states. The public should realize that cancer in its early stages is almost unvariably unaccompanied by pain and is sometimes painless throughout. Since this is the case, the value of periodical overhaulings by a doctor becomes accentuated. There is a wide but unsupported belief that cancer is due to diet, but the medical fraternity is still undecided on this aspect. The whole question of the disease has not yet been studied sufficiently long in the light of the great increase in its incidence. The increase, however, is so pronounced that it has become a greater menace to humanity than is tuberculosis, which means that there is a grave duty imposed on local authorities to tell the people about every preventive measure that can be taken.

o

Yakima is observing an interesting function this week when the new city jail wll be opened with due ceremony. The building will be open for inspection and prospective guests have the option of making reservations. First come, first served.

A plant is reported to have been developed n Sudbury which produces potatoes and tomatoes on the same vine. In time some plant wizard may organize a "one big union" of garden products and merge the "fifty-seven varieties" into one homogeneous dill pickle.

PAINTING THE LILY

The language of the Bible is still the well of English undefiled. Fundamentally it is the best English of today. Setting aside archaic words and grammatical forms, it is yet the supreme model of vigorous, forceful, eloquent and poetical English. Every attempt at revision has shown a lamentable deterioration in literary qualities. Every attempt to make it more understandable has made it less so through failure to maintain its simplicity. One has only to compare the King James version of the 13th chapter of Corinthians, with that just published from the work of Prof. Goodspeed to see how much is lost by the change in diction. — St. Louis Globe-Democrat.

o

The voice of the hunter is heard in the land asking where is the game of yesteryear.

Although bred and owned in England, Papyrus belongs to Irish.

Secretary Hoover, who has had practical experience dealing with world economic problems, predicts that Japan will rapidly recover from the effects of the recent catastrophe.

Lord Renfrew is reported to be personally engaged in filling the ranch silo with corn stalks. The exercise may not be as exciting as deer stalking but it keeps the pores open.

GREAT DISASTER OF HISTORY

The most impressive feature of the Japanese disaster is its unparalleled magnitude, remarks the New York Evening Post. While awaiting official estimates of the loss to life and property in Japan, editors feel assured that all previous records have been surpassed. There is no such thing as "terra firma," remarks the Boston Herald, quoting a British scientist's assertion that "it would be more correct to compare the earth to a badly set blanc mange being brought into a dining-hall by a nervous waiter. Within three hundred years, the Syracuse Post-Standard notes, "there have been 27 earthquakes and volcanic eruptions taking 10,000 lives or more."

Two facts, says a New York paper, "emerge from a study of a history of earthquakes and volcanic eruptions."

"The first is that these disasters, when causing severe losses, have invariably occured in tropical or semi-tropical climates. Going back as far as the year 577 A.D., when a quake in Constantinople caused the death of 10,000, one notes in the record Italy, Persia and Japan appearing time and again in the list.

"The second significant fact is that earth disturbances are not far apart in years, but are almost continuous occurences, the scene slowly shifting about the earth. Fortunately for the human race, however, the majority af these tremors are felt only by the seismograph, while those of more serious potentialities frequently occur at the ocean-bottom or in sparsely populated regions.

A list given below records all earthquakes and eruptions from the year 557 up to the present in which 10,000 persons or more lost their lives. The thirty-one disasters listed show a loss of 1,408,000 human lives.

Place	Killed	Year
Constantinople	10,000	577
Catania	15,000	1137
Syria	60,000	1258
Naples	40,000	1456
Lisbon	30,000	1531
Naples	70,000	1626

And in a world subject to earthquakes, Japan shares with Italy the doubtful distinction, as the Dayton Journal reminds us, of being their favorite haunt. During the last fifty years there have been nearly 28,000 recorded earthquakes in each country. "The islands of Japan are always a quiver," to use the Boston Herald's phrase. The following brief account of earthquakes in Japan appears in the New York World:

"Japan has about 1,500 earthquakes a year, or an average of four shocks a day, most of which are not violent. In Tokyo a shock is felt on an average of once a week. More or less destruction quakes occur in Japan on an average of once in every two years and a half."

The astronomer T. J. J. See accounts as follows for the great number of Japan's earthquakes:

"East of Japan there is what is known as the 'Tuscarora Deep,' a great area where the ocean is 4,600 fathoms or about five miles in depth, the greatest abyss in the world and the source of the greatest disturbances heretofore known.

"I have shown that earthquakes are caused by the leakage of the sea through the earth's crust. The leakage is proportionate to the depth.

"The earthquakes in Japan are dated back many centuries, as far as history goes. This deep sea is the cause of them. This earthquake is reported to have occupied six minutes of time, which shows that the lava under the earth's crust was adjusting itself from the sea toward the land.

"The great tidal wave that followed the earthquake shows also that the sea-bottom was disturbed and the cables thereby broken.

"In geological times the whole main island of Japan has been raised by this process.

"There is no relief for Japan except to build good houses and make them secure against fire.

CHILDREN LOSE A FRIEND

Vancouver has suffered a very real loss in the death of C. J. South. To the city at large he was probably best known as deputy police magistrate. But his best work was that which he did quietly and unostentatiously, through more than twenty years, in the interests of homeless and unfortunate children. In his make up, qualities of heart were dominant. He could not bear to see any living thing suffer and cruelty to or neglect of children roused him as nothing else could. His sacrifices in the interests of the little folk were many. He was the first superintendent of the Children's Home and his work in connection with that institution was a constant drain on his time and his resources. But his interest never flagged, and through long years he gave the details of the home his personal attention. Public recognition of his work he never sought. His reward he received in the affection of the boys and girls who came under his care. It was only necessary to hear these mention their superintendent's name to know that they regarded him as first among the human race. To have accomplished that is to have accomplished much.

P.G.E. AND COLONIZATION

After studing the question of colonizing lands along the P. G. E. railway all summer, Hon. J. D. McLean, minister of railways, has announced a definite policy. Detailed information regarding each quarter section of land has been secured and made available for intending settlers. Advertising will be carried on in local papers and throughout Canada, largely through the Eastern Canada Colonization Association. Settlers will be met by government officials and shown the lands available. Special rates will be given on the government railway and effort made to get genuine settlers upon these lands.

Peanuts have been grown in Winnipeg but not in sufficient quantity to be listed on the produce exchange.

A considerable number of well-equipped sportsmen are now engaged in the seasonable exercise of "following the birds."

Prize ring nomenclature is a trifle confusing to the lay reader. The event is staged in a square ring. The contestants circle around each other until one gets dizzy and the survivor walks off with a big gate.

The absence of a brass rail and the sound of popping corks cast a pall over the soda fountain recently installed on an Atlantic liner. Only two ice cream sodas were sold on the trip The fountain has been scrapped.

The present week has been notable in scientific and pugilistic circles. On Monday all eyes were focused on the solar eclipse. On Friday thousands assemble in New York to witness the obscuration of a prize-ring luminary.

ORPHEUM THEATRE, WEDNESDAY & THURSDAY, SEPT. 26-27

EDUCATION IS THE VITAL PROBLEM

Writing on the subject of education, the Florida Times-Union says:

"The most vital problem before humanity today is a true system of education. It is only as we train individuals and peoples to think, to use their minds and all their powers to highest efficiency, that we shall find any adequate solution of the moral, economic, mental, social, political and industrial problems that confront us. If the educators of the past had not failed in their great task, the world would not be in the condition it is in today, for with the parents and educators rests the formation of character. Our ideals in education are wrong, our aims and purposes in teaching are wrong."

HEALTHIER WOMANHOOD

It is noted in different parts of the world that there is a gradual disappearance of chlorotic anaemia among young women. In some places it is attributed to improved conditions of employment and to more athleticism and fresh air. There is another cause also, and that is that young women of the present day do not go in for the tight lacing of the past. Dr. E. Halford Ross, who was health officer in Egypt from 1905 to 1910, says that during that time he noticed that young Mohammedan women who did not wear corsets did not suffer from anaemia, while young Christian Syrian women who adopted European fashions did. Relaxation of tight-lacing, he believes, has had much to do with the reduction of anaemia during the present century in those countries where the change to the natural waist line has gradually taken place. The compressed and marked livers of a past generation must have had an ill effect on blood formation and circulation, in the opinion of Dr. Ross.

The British figures of chlorosis show that the percentage of cases in 1898 was 6.6, whereas in 1914 it had dropped to 3.1, and in 1917 to 1.5. A similar fall has been observed in Sweden, in France, in Austria and in America. Chlorosis is an exaggeration of a normal condition rather than a disease. Its disappearance indicates an improvement in the general health of womanhood throughout the world. It is the outcome of the insistent demand for an outdoor life and regular exercise. Golf and other games have been a potent factor in health improvement. Few games can be played by those who engage in tight lacing. Chlorosis, or what was known as the "green sickness," is yielding to more rational methods of life.

FOR CRIPPLED CHILDREN

Central Park Women's Institute
Vancouver, B.C., Sept. 1.

Dear friends:

The case of a crippled child, brought to the notice of the Central Park Women's Institute, and the discovery that there are some eighty similiar cases in the City of Vancouver alone—many of whom are receiving little or no attention at the hands of the medical profession—led to founing of the above fund.

While much has been done by the women's organizations of the Province for the necessitous child, the crippled child has been practically overlooked, with the result that there are many permanent cripples in our midst who might have been transformed with proper care and treatment into useful and contented citizens.

This form of disease, above all others, requires skilful treatment when the patient is quite young as, with the hardening of the bones, comes permanent disablement.

An appeal was sent out to the Women's Institutes and the response was so encouraging that a Board of Directors has been formed to administer the fund, and otherwise carry on the good work.

We have already five cases in the General Hospital and the weariness and pain of these little sufferers have been much alleviated by the loving attention of the ladies of the various institutes.

Knowing from experience that the Women's Organizations of British Columbia are ever ready to healp forward all work of an altruistic nature and, knowing also that they esteem it a privilege to be connected with this movement, we confidently make our appeal to you, not only for the necessary funds to carry on the work but also for your loving sympathy, advice and personal aid in this great and necessary movement, and invite you to place your organization in the position to elect a member to the Board of Directors.

You will agree with us that all necessitous crippled children should have the chance given to them of being transformed, as near as scientific aid can do so, to a normal condition of life and, by wise and careful training receive such accomplishments as will prevent them from becoming burdens on their families or upon the state.

We are
Yours very sincerely,
Chairman, Mrs. F. H. Barber
Sec. Treas., Mrs. H. L. Bayley

The crow is reputed to be a wise old bird and should be diplomatic enough to avoid entangling alliances. The unlucky bird that tangled with the trolley wires and tied up street car traffic in New Westminster Thursday morning was another victim of misplaced confidence.

WORLD TRADE INCREASING

Figures dealing with the Suez Canal show a steady increase of trade through that waterway. The tonnage of vessels passing through last year was 20,743,245 tons as compared with 18,118,909 in 1921 and 17,574,657 in 1920. The figures for 1922 constitute a record, being an increase of 468,125 tons as compared with 1912, the best year hitherto. These figures constitute a striking reply to those who are endeavoring to show that world trade is decreasing.

1922 GEOLOGICAL REPORT FOR BRITISH COLUMBIA

The Summary Report of the Geological Survey for 1922, Part A, has just been published. It contains the results of field work carried on in British Columbia and Yukon Territory. It presents reports on southern British Columbia between Douglas Channel and the Alaskan boundary, an area between Kitsault river and Skeena river, the Alberni area, the Yale and Similkameen mining divisions, placers of the Cedar Creek area, and the bedrock geology and quartz veins of the Barkerville area. Copies of the report may be had by applying to the Director, Geological Survey, Ottawa, or 510 Pacific Building, Vancouver.

NOTICE OF CANCELLATION OF RESERVE

NOTICE IS HEREBY GIVEN that the reserve covering Lot 12747, Kootenay District, is cancelled.

G. R. Naden,

"SELF-RESCUER" FOR MINERS

This new life-saving device, we are told by The Coal Trade Bulletin (Pittsburgh, Pa.), is the latest up-to-the minute idea for the use of miners and others against the deadly after-damp or carbon monoxid present in mines after explosions and fires.

"It is a canister of chemicals about the size of the proverbial 'pint.' It can be carried in the coat pocket of each man in the mines, or fastened on his belt, and weighs about 20 ounces. It is immediately available for service. Altho the U. S. Bureau of Mines data show about 44 per cent. of the deaths after explosions and fires due to monoxid poisoning, and 56 per cent. to violence of explosion, practical mining men, men first on the scene, think this computation rather faulty. They are of the opinion that more men meet death by poisoning than by violence. This perhaps is accounted for by methods of obtaining information as to causes in the early days of the Bureau's history, not being nearly as accurately and scientifically obtained and compiled as is now done. This canister is built to take care of six-tenths of 1 per cent. of carbon monoxid for a period of 70 minutes, or 1 per cent. for a half a hour. After an explosion the bodies of dead workmen have been found at various places throughout the mine—places where the men were known not to work, but had reached in their effort to escape from the mine. The distances computed in numerous cases would give evidence that numerous workmen are able to travel about 1,500 feet before succumbing to the deadly after-damp constituents. The Self-Rescuer is intended to assist the miner to travel a greater distance. It permits him to travel, unhampered by a heavy weight for from 30 to 70 minutes longer. This device, coupled with the use of the electric lamp, is a very important step forward in the safety feature of mine-working. It presents great possibilities and will be welcomed universally by men who work in the coal-mines throughout the world.

THE CARMELO SHOW AT THE GRAND THEATRE

"The best yet!" was the general comment of patrons of the Grand who witnessed the performance of Fred Carmelo's musical comedy company on Monday last. The opening play was a one-act version of the popular comedy "It Pays to Advertise," and this was presented with a snap that put it over admirably. The second half of the program was the advertised feature "Bong Bong." This was a musical comedy of Orientol atmosphere in which the comedy roles were played by Fred Carmelo and Miss Jeanne Dixon, both in blackface. "Bong Bong" was filled with bright novelties and comedy scenes that brought roars of laughter. On Saturday "Bong Bong" will be repeated, but in conjunction with it there will be presented a musical farce entirely new to Fernie patrons, entitled "Out in a Fog." Two shows will be given on Saturday, one at 7 and the other at 9.30. The company will also play at the Grand on Monday next, with an entire change of program.

DAUGHTERS OF EMPIRE GIVE OUT BURSARIES

Toronto, Sept. 15.—The Imperial Order of the Daughters of the Empire have made awards of bursaries in Canadian universities for 1922..

British Columbia — Harry Nelson Wells, Vancouver, son of Corporal Wells, 1st Canadian Pioneer Battallion, who died on active service in 1917. Mr. Wells has attended the King Edward high school, Vancouver, where he has an excellent record. He will attend the University of British Columbia.

As there were no candidates in Quebec and Prince Edward Island, a bursary has been awarded to May Walker, North Vancouver, daughter of Pte. A. Walker, killed at Paschendaele in 1917. Miss Walker has attended the North Vancouver high school, where her standing is excellent. She will enter the University of British Columbia.

The bursaries are valued at $1200, and are provided annually by the Imperial Order of the Daughters of the Empire.

WILL PULL OF FIGHT OCT. 9

Through the columns of the Free Press of Sept. 14, Gus Williams answered the challenge which appeared some time ago on behalf of Danny McDonald. Since the appearance of the acceptance of the challenge the 150 All Sports Gym has been busy and will promote this bout. Both parties have now signed articles and posted their forfeit money to appear in the ring at the 150 All Sports Gym for a ten 3-minute round bout on Tuesday, Oct. 9.

If arrangements can be completed another wrestling match will be staged in the 150 All Sports Gym on Tuesday, Sept. 25. George Nelson, of Bentley, Alta., has issued a challenge to young Raynor of Fernie to wrestle in a time limit bout here on that date and if negotiations now under way are completed a good wrestling bout is assured. Watch for advertising.

MANSON SENDS PRINCE A SHOOTING PERMIT FOR A GAME RESERVE

VICTORIA, Sept. 16. — Attorney-General Manson has sent to Baron Renfrew a complimentary game permit, allowing him and the members of his party to carry firearms and to hunt big game and game birds during the period of two weeks, the license extending to and permitting hunting anywhere in British Columbia, includ-the Elk river game reserve.

EARL OF STAFFORD VISITS WINDERMERE

Invermere, B.C., Sept. 19. — The Earl and Countess of Strafford, who together with their two daughters, the Ladies Byng, have been visiting R. Randolph Bruce at his home Pinelogs Hall, left yesterday en route to California. From there they will return to Ottawa on a prolonged visit to their Excellencies at Government House.

MAY WE TAKE YOUR ORDER for a complete up-to-date sanitary bathroom equipment in your home? Our wash baisins, bathtubs, foottubs, toilets, etc., are the latest design and are very easy to keep clean and white-looking.

TOURIST ASSN. HOLD MEETING

The third Annual Meeting of the Tourist Association of South Eastern B. C. and Southern Alberta was held in Fernie, on the 26th of September. Those present were: Donald A. Duff, Lethbridge; Dr. O. F. Fanset, Macleod C. B. Brown, Medicine Hat; Mayor H. Bossenberry, Pincher Creek; Mayor W. J. Barnes and A. Morrison, Coleman and E. K. Stewart and J. Fred Spalding, Fernie.

Regrets of their inability to be represented were received from Cardston, Blairmore, Banff, Cranbrook and Windermere.

The financial report for the past year caused a considerable amount of satisfaction as it carries over towards the coming year's campaign the sum of $751 with another $100 still outstanding which will be collected.

The report of Commissioner Spalding was received and approved.

The bad road conditions existing in Alberta and which has caused a great loss in tourist travel to both Alberta and British Columbia this summer was one of the main topics of discussion and various suggestions as to the means to be taken to impress the importance of good roads on the Governments of both provinces were made. Nine resolutions were drafted and a copy of each of them will be sent to the Premier and Minister of Public Works of both B.C. and Alberta, and also to each member of the legislature representing districts which are effected, with an urgent request that he will do whatever he can to support the resolutions. In addition a recommendation was made that each town also send a delegate for the same purpose. The association will guarantee the expenses of four of these delegates. They will be selected from the towns which might not be able to send one on account of the expense.

Prior to the election of officers for the ensuing year, Mr. Duff, as retiring President, made a brief address in which he said that he had taken a very great interest in the work of the association, and was very gratified to know that he had taken part in making the association the success it has turned out to be. He had endeavored by personal visits to induce other communities to join and had been successful in the case of Medicine Hat and hoped would be with several others shortly. He felt that co-operation with an association of this kind was not a matter solely of selfish interest in tourist travel and what was to be derived therefrom. The greater the number of towns represented in it's membership, would increase to a corresponding extent the strength of the influence that could be brought to bear on the Governments of both provinces, and compel their serious consideration for resolutions and suggestions regarding road improvements primarily, and any other matters which might come within the scope of the association. In expressing his satisfaction with the financial statement and the Commissioner's report, which he was sure was shared by all present, he would like to suggest that an effective way to keep up the enthusiasm amongst our own members and influence more members, would be for the Commissioner to make periodical trips to all the towns around and address the Boards of Trade and City Councils on the importance of the tourist business. He considered this to be necessary, and knew of no one better able to do that than Commissioner Spalding.

The election of officers concluded with the following elected:

Hon. President—Col. J. S. Dennis, C. P. R., Montreal.

Hon. Vice Presidents—The Hon. Alex. Ross, Minister of Public Works, Edmonton and The Hon. Dr. J. H. Sutherland, Minister of Public Works, Victoria.

President—Donald Duff, Lethbridge

Vice Pres.—W. H. Wilson, Cranbrook.

Treasurer—E. K. Stewart, Fernie.

Commissioner — J. Fred Spalding, Fernie. (all re-elected).

It was decided that the old Board of Directors would be retained, subject to the approval of the bodies they represent.

All present pledged the towns they represented to remaining affiliated with the association, and in the discussion regarding the amount of the assessment of each, which followed, it was thought that as Cranbrook had been one of the prime movers in the organization of the association, and most certainly had derived more benefits from it's advertising than any of the other member towns, it was extremely unfortunate that they had not been able to arrange in time to have a representative sent.

Commissioner Spalding was authorized to visit all the towns affiliated with the association and those expected to join and obtain their written agreement of affiliation. The matter of assessment was left to his discretion.

The Commissioner's plans for the ensuing year were approved and they consist of: A new illustrated booklet to contain 24 pages of illustrations and not more than one page of descriptive matter, and a new map which will be similar to the large one used this year, brought up to date. The affiliated towns will all be shown in prominent type, and no farther west than Kuskanook will be included, at that point will be an arrow signifying the route to Vancouver, and at Medicine Hat will be another signifying the route to Winnipeg. 15,000 of these booklets will be sent out.

In the discussion respecting the Commissioner's salary, it was recognized that he had not received any increase since the commencement though his work was increasing all the time, but as there was no assurance at present that an increase could be paid, even if promised, he was asked if he would carry on at the same remuneration, and if certain expected improvements in the financial conditions materialized, let the directors settle the matter at the end of the year. This being satisfactory to him, he was re-appointed.

o

Members of the Irish Free State Dail confined in jail can plead that they are unavoidably detained when notified to attend the opening of the House.

o

ROYAL BANK TO OPEN HERE

G. F. Marsh, Manager of the Royal Bank of Canada, at Cranbrook, arrived in the city Wednesday evening for the purpose of securing temporary quarters and opening a branch of the Royal Bank in Fernie. The only suitable location available was in the Fernie Hotel Building and workmen were immediately instructed to make the necessary alterations and signs were displayed Thursday morning announcing the advent of the Royal Bank of Canada to Fernie.

No announcement as to the opening date or the personnel of the staff has yet been made but it is currently rumored that the position of Manager in the new bank will be offered to Mr. Alex Watson, manager of the suspended Home Bank. Mr. Watson is a very popular member of our community and the suspension of the Home Bank has not lessened the esteem and confidence of the citizens in his ability to successfully manage a branch of any bank. The success of the Fernie Branch of the Home Bank under his management cannot be overlooked and his services would be very valuable to any financial institution.

The Royal Bank of Canada is one of the strongest financial institutions, ranking second or third in the Dominion.

o

LADIES' GOLF CLUB NOTES

In the Wood Cup Competition, Mrs. Kirkpatrick was the winner; score for the three days' play being 178, handicap 78, net 100, or an average of 33 1-3.

On Wednesday, October 3, the last tea of the season will be held at the Club House when the cups and prizes will be presented.

There will be a two-ball foursome at 2.30 and an approach and putting competition. An entrance fee of 25c will be charged.

o

THE FRED CARMELO SHOW

Fred Carmelo's Musical Comedy Players made their regular Saturday night appearance in Fernie last week, remaining over until Monday when a complete change of program was given. The performances were well attended, and both "Bong Bong" and "Out In a Fog" were undoubtedly rits with the local musical comedy fans who were generous in both their patronage and their applause.

On Saturday of this week the company returns with a change of program, presenting "Bubbles" in conjunction with "Out In a Fog." The Monday program will be an entire change of plays. The company is meeting with success in its rotary stock enterprises, and its plays are much appreciated all along the line. On Saturday two performances are given, one at 7 and the other at 9.30.

NEW DOMINION REFUNDING LOAN

The new Dominion Government refunding loan which is now being offered to the public gives evidence of very marked popularity. Although the preliminary announcement was only made on Thursday morning by the Minister of Finance, advance subscriptions aggregating well over $72,000,000 (or over forty per cent. of the entire objective of $172,000,000) had been received by the selling syndicate at the close of business on Saturday. This leaves, in round figures, one hundred million dollars still available for subscription.

This heavy preliminary subscription is the more remarkable, as only two of the big special subscriptions which bulked so large in the Victory loans have been received and are included in this total. Others are pending confirmation at directors' meetings.

Cash subscription to date present a striking contrast to the situation which existed when the Government offered its renewal loan last year to holders of 1922 Victory bonds. That offer lasted for well over two months, during which period the total of conversions was only $110,000,000. In the two days preceding the present offering cash subscriptions, in excess of $72,800,000 have been received, which is two-thirds of the entire amount taken up during last year's conversion loan. Practically every dollar of the subscriptions taken into account to date represent entirely new money.

Buyers of the new bonds are beng given their choice of a long or a short maturity. The former is of twenty years' duration offered at 98.25 and interest ot which price it will yield the investor 5.14 per cent. Those who prefer securities with approximately the same lfaoaaoooooooooca imately the same life as the average first mortgage can buy a five-year bond at 99, which will return 5.23 per cent. on the investment. Present indications are that the twenty-year bond will be the more popular, as it was referred to by the head of of one of the biggest financial institutions as the "soundest and sweetest bond ever offered the Canadian people."

The new issue is being offered at prices which give a materially higher interest return than similar obligations of the United States and Great Britain. Among the United States issues, the average interests return on eight of the nation's bonds is only 4½ per cent. The United States' third Liberty 4½ per cent. issue, which matures within two months of the new Canadian five-year bond, yields only 4.52 per cent. against 5.23 per cent. for the Canadian bond. In Great Britain the average yield on four War Loan issues is only 4½ per cent.

In view of the materially higher yields of the new Dominion bonds and their absolute security, outside interest has been aroused already in the issue. Particular emphasis is laid in financial crcles on the Metropolitan Life Insurance Company's subscription. This company is already one of the world's largest individual holders of Canadian securities. Although it is a New York concern, its heavy investment in the new issue, after the closest scrutiny, presages a further demand from across the border.

Up to the moment Hon. Mr. Fielding made his announcement, United States bond houses were of the opinion that he would have to enter the New York market at that market's terms. Now that the offering is being made in Canada to Canadians, several of these houses are ready to purchase the new Canadian payment bonds on the same basis as is offered to the Canadian purchaser.

By selling these bonds in the home market, the Minister of Finance, in addition to giving Canadians the first chance to buy a bond of unexcelled security and unusually high interest rate, also effects a very substantial saving for Canada. At the prevailing rate of exchange, this saving on interest payments alone will be approximately $200,000 each year. Furthermore, subscribers have the satisfaction of knowing that their money is staying at home and working in Canada for the benefit of the Canadian people.

September being the first of the "R" months, a government booklet has been issued containing 100 recipes for cooking oysters. Many lovers of the bivalves prefer having them served on their own shells.

FRANK DESROSIER, JAFFRAY, ACCIDENTALLY SHOOTS SELF

Frank Desrosier, aged 68 years, a well known rancher and old timer, of Jaffray, B.C., was found by a little girl early last Monday morning, lying by a fence close to his home, with the top of his head almost completely blown off.

Provincial Police headquarters here were notified of the tragedy and Chief Spiller with Coroner Duthie immediately left the City for Jaffray. As a result of their investigations, Coroner Duthie decided that an inquest was unnecessary and gave a verdict of accidental death.

It appears that coyotes had been raiding Desrosier's barnyard and about six o'clock Monday morning he got up and told Mrs. Desrosier he was going out to try and shoot the raiders. When he was going through the fence close to his home, in some unknown manner the trigger of his rifle got caught in the fencing, discharging the firearm, and he received the full charge in the head with fatal result.

o

NO MORE THAN 10,000 TONS AT $7.00 RATE

TORONTO, Sept. 25.—Efforts of Attorney-General Nickle to have the Canadian National Railway increase the limit of ten thousand tons of coal shipments from Alberta at the temporary $7 freight rate have failed. In a telegraphic exchange between Attorney-General Nickle and Sir Henry Thornton yesterday the later definitely declared ten thousand tons is all that would be carried at the $7 rate.

o

TO SAFEGUARD DEPOSITORS

MONTREAL, Sept. 27.—The belief in well advised financial circles in Montreal is that depositors in the Home Bank of Canada will receive one hundred cents on the dollar when the Home Bank is wound up, or when other disposition is made of its business.

If this is not promised when the Curator's report is brought down, with the double liability of the shareholders called into action, the dividend to depositors will be very close to that sum.

With Banking institutions somewhat under the cloud following developments in the Merchants, Bank of Hamilton and the Home Bank, and with at least one more merger still under discussion and a writing down of surplus talked of for another bank, the Bankers' Association is taking a lively interest in Home Bank affairs, and in the interests of fabric of Canadian Banking as a whole, the feeling is that depositors, at this of all times, must be safeguarded.

o

MACDONALD AND WILLIAMS TO BOX ON OCTOBER 10

Articles have been signed and everything is in readiness for the boxing match between Danny MacDonald, of Michel, and Gus Williams, of Fernie, at the 150 All Sports' Gymnasium on Wednesday, October 10.

This match is the result of a challenge thrown out by MacDonald to boxers of British Columbia and Alberta at catch weights and will bring together two of the best boxers in the district. Both men are now in rigorous training and will be in the finest form of their careers when they step in the ring for the bout. Williams' training headquarters are at the Fernie Literary and Athletic Association Club rooms while MacDonald is training at the 150 All Sports' Gym.

o

HOME BANK DEPOSITORS WILL MEET ON OCT. 5

TORONTO, Sept. 26.—Delegates representing the depositors of the Home Bank of Canada at the sixty-odd branches of the suspended institution in various parts of Canada are expected to be present at a meeting here on October 5. The suspension of the bank and the position to be taken in that regard by the depositors will be under review. The curator is expected to have his report ready by that date.

SETTLEMENT INCREASES COST

The subdued tone of the public's rejoicing over the settlement of the anthracite strike recalls the case of the hold-up victim who congratulated himself on the fact that the bandits, while taking his wallett, left him his watch. "Now watch the price of coal" recurs like a cynical refrain in the editorial comment. "The dear old public has graciously been allowed the privilege of keeping warm this winter at the expense of paying both miners and operators a nice little raise in income," remarks the Rochester Herald, published in a State which leads all others in its consumption of anthracite. In Brooklyn, The Eagle sums up the situation as follows: "The miners are to get a substantial increase in wages and a shorter day; the operators are to continue piling up profits; Governor Pinchot is being hailed as the hero of the hour for his services in ending the strike; the White House is jubilant—in fact, everybody is happy except the consumers, who will pay for the victory!" The 10 per cent. wage increase granted to the miners, it is estimated, will add about $32,500,000 to the cost of mining the anthracite. As the Philadelphia Public Ledger remarks, "this added expense must come from somewhere, and in the annals of strikes there is nothing justifying the hope that operators, railways and distributors will absorb it." This paper, in a State which has a virtual monopoly of anthracite production and which is out-ranked only by New York as an anthracite consumer, predicts that "by all the laws of probability and averages, hard coal will advance a dollar a ton, possibly more." "Operators, as a matter of fact, have never lost a strike, not even when the miners won, and it becomes apparent they have not the slightest intention of permitting the recent disagreement to cost them a dime," says the Marion Star. Moreover, as the Newark News points out, the increase in prices "will be borne by the householder, because the steam sizes of hard coal must be sold in competition with soft coal."

Yet even this wage increase, the Buffalo Express reminds us, the cost of anthacite was 100 per cent more than before the war, while food is only 45 per cent. more expensive than it was in January, 1914. "With these facts in mind," it remarks, "it is reasonable for the public to demand a decrease, instead of countenancing an increase, in the cost of coal." Another editor, noting the Coal Commission's estimate of $3.97 as the labor cost of mining a ton of anthacite, asks why a 10 per cent. wage increase is going to add a dollar a ton to the price, instead of only 39 cents.

The four points on which Governor Pinchot persuaded the operators and miners to agree, after the strike of 155,000 anthracite miners had been in effect about a week, are thus summarized in a dispatch to the New York Herald:

"1. Recognition of the basic eight-hour day for all employees. If longer hours are necessary at certain times or in certain occupations, the overtime to be paid at the eight-hour rate.

"2. A uniform increase of 10 per cent. for all employees. This increase to take effect September 1.

"3. Full recognition of the union by the operators, without the check-off, but with the right to have a union representative present when the men are paid.

"4. Complete recognition of the principles of collective bargaining."

One of the most attractive features of this settlement would seem to be the fact that it will run for two years, or well beyond the next Presidential election, remarks the New York Times. Moreover, this paper says:

"There are already comments to the effect that a great bituminous strike is staged for next year after the existing agreement expires in April, and that it would not fall in with the planse of the United Mine Workers to have a hard-coal strike at the same time. While the hard-coal miners are idle, the workers in the bituminous field must be depended upon to pile up the needed funds for strike benefits."

Equally pessimistic is the New York World, (Dem.), which remarks that "in effect the public has bought of the parties to the quarrel." To quote further:

"The operators are dissatisfied. The miners are dissatisfied. The operators intend to force the arbitration issue and obtain a revision of wage downward before the expiration of the contract which has just been accepted. The miners believe they could have got the 20-per cent. wage increase originally demanded if they had held out. Next time they intend to hold out. The two-year wage-scale contract is a maximum and not a minimum affair. At most it will run two years. When it expires more trouble is inevitable. If the pressure gets too high, there will be trouble before then.

"When the next break comes it will be settled, unless the outlook changes materially, exactly as a majority of strikes in the mines have been settled in the past, by a compromise which raises wages and prices together. So far no cure has been found for a coal strike except a general assessment of consumers to meet new demands."

But the bright side of the situation compels attention also, as many commentators remind us. To begin with, the Pinchot settlement makes the country secure against a coal famine this winter. President Coolidge has sent a message to the Pennsylvania Governor congratulating him on the breaking of the deadlock; and Mr. Pinchot confesses himself "pleased clean down to my toes" with the outcome. As one correspondent puts it: "If Pinchot had not forced the settlement the $32,000,000 estimated cost of his award would have been only a fraction of the cost the public would have paid for premiumized hard coal, for soft coal diverted to household use by people whose experience and furnace equipment were not such as to enable them to use it efficiently, and by soft-coal users who would have found their market forced up by the new demand from the hard-coal using territory." "One dollar more a ton for coal is better than no coal at all," remarks the Jersey City Journal, which reminds us that during last year's strike "shivering families paid as high as $20 a ton for warmth."

WELSH MINERS ON THEIR WAY WEST

PORT ARTHUR, Sept. 25.—"We intend, first, to try to adapt ourselves to the country to which we have come and, second, to try to become valuable citizens as did our forefathers who came before us," was the declaration of one of a party of brawny looking Scots who passed through this city this afternoon on a C. N. R. special train en route to Winnipeg, Regina, Edmonton, Calgary and Vancouver. While the train contained only five coaches, there were men and women representing England, Ireland, Scotland and Wales as well as Rumania, Russian and Polish. The party from Wales is composed of miners who are going to Regina and thence to the coal fields. Some of them, however, will forsake the pick and torch for the plow.

DEVISING PLAN OF HEALTH INSURANCE

"The medical profession is anxious to discover some way of providing an efficient medical service to the public at a cost which will be within the reach of all, and will be fair to both patient and physician. This is the whole purpose of our enquiry which is now being carried on."

This is the effect of a statement issued by Dr. J. H. MacDermot, secretary of the B. C. Medical Association, in reply to recent articles appearing in the press dealing with the activities of the association along the lines of health insurance.

After stating that the medical men recognize that there is a large section of the community earning incomes below a certain figure, to whom the cost of sickness is a very great burden, Dr. MacDermot, referring to the investigation to devise a better method than the present to meet the cost, says in part:

"No definite conclusion has yet been reached as to the form which this service will take, but the objects of the association are:

" '1. That patient shall have free choice of physician. 2. That a comprehensive serviee shall be given so that patients of moderate means shall have every medical, laboratory and hospital facility that the most wealhy member of he community could obtain. 3. That medical men shall be paid for what they do, as is done under the Workmen's Compensation Act.'

"It is a matter for discussion whether we should attempt to administer such a scheme ourselves, or should ask the state to extend the operation of the Workmen's Compensation Act, to cover sickness as well as accident. If the medical profession could feel sure that such control by the government would always be placed in the hands of men of the calibre of the present Workmen's Compensation Board, we should, no doubt, welcome the latter. But the whole matter is beset with many problems and difficulties.

"We believe that the medical profession should study this problem and be ready to offer its service and help to the state, not only for its own sake, but for the sake of the community it serves. The medical profession in Great Britain failed to do this, and as a result the state was forced to take steps, and the result was the panel system, which in many ways is most unsatisfactory, and would be particularly so in this country."

(A fascinating fox-trot on "HIS MASTER'S VOICE" VICTOR RECORD No. 19106

IMPORTANT! Red Seal Records are now double-sided. Two selections for practically the price of one. Ask for new catalogue! It's Free!

Why "HIS MASTER'S VOICE" VICTROLA dominates!

Victrola sound-boxes are of simple effective construction. No complicated parts to keep adjusted; just simplified and perfected to the finest degree by years of specialization. This is why this vital part of the instrument delivers every variation of tone in a pleasing, exact and perfect manner all the time — also one of the reasons why the worlds greatest artists have chosen "HIS MASTER'S VOICE" Victrola as the only instrument capable of fully interpreting their great genius.

"HIS MASTER'S VOICE" is the voice of an endless programme of living entertainment, known as "The theatre of the Home"—and how appropriate! For whatever your mood—whatever the climatic conditions—the price of an orchestra chair is a mere pittance—and it is yours to say what entertainment shall unfold.

The imaginary curtain rises—a momentary hush—and then—it is the immortal voice of CARUSO singing "FOR YOU ALONE"—and true to the title of the song he is singing for YOU alone—You and YOURS comprise his audience.

An intermission—someone calls for modern melody—the "Great White Way" orchestra has entered your home—unseen—to play "CAROLINA MAMMY".—Your eyes have closed and you have difficulty in believing that these musicians are not indeed on a stage and that you have an orchestra seat in a REAL theatre.—It is just as though these living entertainers had been invited to YOUR home for YOUR special hour of happiness.

Such is the spell of "HIS MASTER'S VOICE" Victrola and ("HIS MASTER'S VOICE"-VICTOR RECORDS) — they alone — are capable of giving you this sense of COMPLETE FULFILLMENT and perfect reproduction.

And this very perfection of performance—this very superiority—has influenced many to refer to all instruments as Victrolas.—It is a compliment which we look upon with disfavor for it not only defeats your best interests but ours as well.

For your protection every genuine Victrola bears our famous trademark "HIS MASTER'S VOICE"—make sure it is on the instrument you buy.

Genuine "His Master's Voice" Victrolas from $37.50 to $615.00

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head.

For settlers, campers or travellers, up

THE HIGH COST OF GOVERMENT

From time to time we have taken occasion to refer to the frenzied finance indulged in by our various Provinces. For a long period most of them have been living beyond their means, spending more money than is good for them, and a great deal more than their resources justify. I have before me an interesting document bearing upon this situation, the dangers of which we must sooner or later realize. The Citizens' Research Institute of Canada, an organization by the way, which in a quiet, unobtrusive manner is doing much to make us see the follies of finance as applied to taxation and expenditure, has gone to much pains to make the situation clear. These figures show that only two provinces out of nine are paying their way, Quebec and Prince Edward Island; the remainder leaning upon credit, in order to meet their financial obligations.

For instance, in 1921 British Columbia gathered in from various sources of taxation $31.61 per capita and expended 38.64. Alberta's revenue was $14.41 per capita and the expenditure was 17.93. Saskatchewan spent $16.10 per person and took in over the counter $13.22. Manitoba's expenditure was $15.03 per capita and the revenue $14.06. Ontario, aside from all hydro-electric undertakings which are not included as presumably expenditures in this line are counterbalanced by revenues received, spent $8.99 per capita and received through various taxable sources $8.38. Quebec, where the balance is on the right side, the expenditure was $6.22 per capita and receipts $6.74. The revenue from the sale of liquor is not included in these figures, else the showing would have been even better. New Brunswick expended $9.23 per capita and received $7.92. Nova Scotia did a little better as the expenditure is shown to be $8.68 per capita and the revenue $7.65. Prince Edward Island, where they also balance their budget, took in $8.64 per capita and expended $8.31.

It is obvious that seven out of the nine Provinces have got to mend their ways. They must either load their people with greater taxation, which is not to be desired, or cut down expenses. The increased cost of government over a period of years has been such that one must view it with more or less alarm. For instance, the per capita increase in Ontario, comparing 1918 with 1921, was 56 per cent., while the biggest sinner was Manitoba with an increase of 74 per cent. over the same period. On the other hand Quebec's expenditure in 1921 was only 13 per cent. greater than in 1918. The provincial debt charges, that is to say interest and sinking funds, are growing out of all proportion to the increase in population, and this is particularly noticeable in the younger provinces west of the Great Lakes and in New Brunswick. For instance, in British Columbia debt charges amount to $8.57 per capita, in Alberta $3.30, Saskatchewan $2.78, Manitoba $3.01, New Brunswick $3.29, Nova Scotia $2.16, Ontario $1.46, Quebec $1.03 and Prince Edward Island $0.79.

Our governments, provincial and federal must stop wasting and retrench. We are suffering from the cost of high living, and it is time that we stopped "stepping on the gas."—Saturday Night.

MARRIED WOMEN WHO GET THE WORST OF IT

If the modern young man is not scared out of the matrimonial market it is no fault of those who prepare budgets which indicate, or are supposed to indicate, what the average young woman should annually hang on her back and the cost thereof. We note that a young business woman, who will in all probability some day be a young matron, is to spend $450 per annum for clothes and the like out of an income of $2000 per annum. Looking closely into the details of dress of this modern Queen of Sheba we find a sum of $42.78 for shoes, slippers and other foot wear; $66.36 for underwear; $31 for hats and $250 for outer garments. This looks ample to say the least. But what is this young woman going to do when possibly she marries a man with an income say double what her own had been? The budget tells us that she is to cut her expenditure in two. That is to say when she marries and ceases to be a business woman she is to content herself with half the clothes she wore during her business career. Will she? Will she be content under such circumstances? Of course much depends upon the individual. Finery does not necessarily make a happy home any more than the lack of it necessarily makes an unhappy one.

Of course such things are possibly no particular business of a mere man, but it does seem as if the married woman was getting decidedly the worst of it, while on the other hand $42.78, representing the annual expenditure for footwear for the business woman, looks like a good advertisement for the shoe shop; to say nothing of the rest of the annual outfit.—Saturday Night.

SECRETS TOLD TO THE DOCTOR

The Doctor's Parliament — that is the British Medical Association—has decided to give its support under certain conditions to a doctor who is courageous enough to refuse to obey the order of a court to disclose a secret of the consulting room.

That is a vital step. Some doctor will be committed for contempt of court and will go to prison.

The issue between the law and the age-long tradition of the profession is raised, and it is an issue that concerns every family in the country.

The popular belief that the secrecy of the consulting-room has the support of the law has been rudely shattered of late.

When a patient reveals to a doctor in the consulting room, no matter how intimate it may be, is not regarded by the law as "privileged."

Now there is a good deal to be said for this attitude of the law.

A doctor is a citizen, and in the interests of justice it may sometimes be desirable that he should disclose a secret that is told to him, or more particularly some secret that he learns or stumbles across.

The possible is this:

Once let it be known that professional secrets must be revealed in court and all confidence in the sacredness of a consultion will be gone.

Patients—particularly women—will hesitate to tell the whole truth to their doctors and will conceal a part of it, often to their own grave injury.

The revelation of a secret will not affect doctors much, but it will be a serious matter for the public.

The "fiery cross" threatens to start a conflagration in Oklahoma.

VICTORIA NEWS

Marked progress along colonization lines is in evidence as a result of the government's announcement that Swiss settlers will probably take up holding in this province shortly. Following Hon. Dr. McLean's activities this year as minister of railways, a definite plan has been developed. The Swiss will likely establish a central farm of 640 acres somewhere along the Canadian National of P. G. E. Railways. Others of the same nationality will settle close by, but no community settlements will be established. Every facility will be provided by the government to enable the prospective citizens to get located, and the minister predicts that within a year there will be a substantial influx of genuine farmer-settlers, who will settle chiefly on the vacant lands along the government railway.

For the purpose of discussing taxation matters with Hon. Mr. Fielding, Federal Minister of Finance, Hon. John Hart, who holds the Provincial Finance Portfolio, called at Ottawa on his way home from Great Britain, where he has placed many matters of provincial importance before the Imperial authorities. Hon. Mr. Hart wants to see a combined agency for the collection of taxes, so that expenses may be cut to a minimum. At present both governments collect taxes to the embarassment of the tax-payers and officials alike. The move has been under consideration for several years and will probably be made effective as a result of Hon. Mr. Hart's visit.

A shipload of lumber for stricken Japan, as a gift from British Columbia through its government, has been purchased and will leave for the Orient immediately. No matter what the views of the ministers may be on the general Oriental question, they were the first to propose substantial assistance for the Japanese, and it is considered that the gift will do much towards assuring the Japanese of the kindly regards of their British Columbia neighbors.

Premier Oliver has completed a rough draught of his redistribution plans, which will be submitted as soon as the Legislature convenes.

Cleopatra Washed Her Face This Way

She used Palm and Olive oils, the same rare oils which are blended in Palmolive. She knew that to have a fresh fine skin, thorough cleansing was necessary. The crude combination of Palm and Olive oils which was the best that even royalty could then obtain is now brought to perfection in Palmolive.

The girl of today, if she would be beautiful, follows Cleopatra's practice. Every day she cleanses the skin thoroughly with mild Palmolive Soap. Never does she permit cold cream, rouge and powder to accumulate and clog the pores of the skin. She knows that this starts irritation and blackheads, pimples and other blemishes result.

Palmolive with its mild creamy lather is lotion-like in its action. It freshens, revives and stimulates and leaves the skin delightfully fresh and rosy.

Thus a great luxury may be enjoyed at the price of ordinary soap. You can pay more, but you can't get a finer, milder cleanser.

You can buy Palmolive Soap at all first-class dealers.

Palm and olive oils —nothing else—give nature's green color to Palmolive Soap.

TO FIND HOMES FOR MANY SURPLUS BABIES

MONTREAL, Sept. 24. — "If you have any homes for babies in Canada, let us know and we will send them. We have an enormous number of babies in England, and we only send sound and healthy babies of good stock, who will become efficient members of society."

This is the message of Miss Clara Andrews of London, Eng., founder and honorary director of the National Children's Adoption Association, who arrived in Montreal over the week-end. She left on Saturday for Vancouver, where she will open her campaign. She will tour Canada eastward from that city.

Seating Them

Dominion representatives and members of dominion parliaments visiting this country will in future have special seats allotted to them in the house of commons. The committee which has considered the question recommends that a portion of the members' gallery over the opposition benches should be used for this purpose. This means in practice that the distinguished strangers' gallery will be extended beyond the corner at which it now ends. The dominion seats will be above what were known in former days as the Irish Nationalist ministerial bench. A short time ago dominion press representatives were admitted to the press gallery of the house of commons for the first time. The house of commons is slowly recognizing the claims of the sister states of the empire to favorable treatment from the mother of parliaments.—London Times.

Dr. Thorek, an American scientist announces that he hopes shortly to successfully transplant eyes from apes to humans, thus restoring sight to the blind. He has already succeeded in his experiments with lower animals.

100 per cent Cows' Milk

Carnation gives complete milk and cream service — the only milk supply needed for your household.

CARNATION MILK is just pure milk—100 per cent cows' milk. It contains all of the food elements in the fresh whole milk.

Nothing is added to Carnation, not even sugar. Only part of the natural water is removed to reduce the bulk and give you doubly rich milk in convenient-sized containers. Carnation is then sterilized (heated) to keep it pure and absolutely safe.

Removal of part of the water leaves twice the proportion of cream in Carnation as in whole milk. Thus Carnation is twice as rich as ordinary milk. For cream purposes, use it as it comes from the tin; for whole milk, put back the water we removed (equal parts); for cooking uses add from 3 to 4 parts of water.

The high quality of Carnation is due to the excellence of the fresh whole milk and to our extreme care and long experience in preparing Carnation by the most modern sanitary methods.

Thousands of Canadian housewives are using Carnation because they have found it the economical and dependable Pure Milk Service.

You, too, will find that Carnation Milk is just "100 per cent cows' milk," rich, safe, convenient, economical. Order a supply from your grocer today and learn the food value of Carnation for all of your daily milk and cream needs.

My Favorite

Recipes

By Mary Blake

Cream of Spinach Soup

2 tablespoons flour, 2 tablespoons butter, 3 cups boiling water, 2 quarts spinach or ½ pound, pepper, 2 teaspoons salt, 3 cups water, 1 cup Carnation Milk.

Wash spinach thoroughly and cook 30 minutes in boiling water. Drain and rub through sieve. Melt butter, add flour, then milk, and cook 5 minutes; add the spinach and season with salt and pepper. This recipe serves six people.

Scalloped Potatoes

1 tablespoon salt, 4 medium sized potatoes, 1⅓ cups water, ⅔ cup Carnation Milk, ½ tablespoon butter. Wash, pare and cut potatoes in thin slices. Put a layer in buttered baking dish, sprinkle with salt and dredge with a small amount of flour. Add milk and butter and bake until potatoes are soft. This recipe serves six people.

Cream White Sauce

2 tablespoons flour, ⅓ cup Carnation Milk, 2 tablespoons butter or substitute, ½ teaspoon salt, ⅔ cup water.

Melt butter or butter substitute, add flour and stir until thoroughly mixed. Add the milk and cook about five minutes or until the mixture thickens, then add seasonings. This recipe makes one cup of white sauce.

Creamed Cauliflower

1 head cauliflower, 2 cups cream white sauce.

Remove outer leaves, soak thirty minutes in cold water with the head down and cook with the head up, twenty minutes or until soft, in boiling salted water. Drain and heat in the cream white sauce. This recipe serves six people.

Fish Souffle

2 cups fish, 1½ cups white sauce, parsley, 2 eggs beaten separately.

Flake the cooked fish and season. Cool the white sauce, add the fish, then the well beaten yolks and mix. Fold in the whites of eggs beaten stiff. Bake in buttered individual baking dishes or in a pudding dish set in a pan of hot water. Bake twenty minutes or until puffed and brown. Serve immediately. This recipe serves six people.

If you desire a recipe for any special dish, I will try to send it to you. Address me care Carnation Milk Products Co., Ltd., 134 Abbott St., Vancouver, B. C.

Misses Margaret and Rene Duncan returned home this week from a vacation spent in Spokane and Cranbrook.

On Thursday evening at the home of Mr. Brunton, Dalton Avenue, Mr. Thomas John Sadler and Miss Agnes Hamilton were united in marriage, Rev. W. F. Burns officiating.

G. J. Parks, chiropractor, has decided to give up his practice in Fernie and go to the coast. He expects to leave in a couple of weeks. During his stay here Mr. Parks has made many friends, who will regret his departure.

Sherwood Herchmer received a wire yesterday from the Coast stating that Drs. Bonnell, Garner & Asselstine had been awarded a verdict for $2800 in their action against the City of Fernie for monies granted by the Government for hospital purposes and withheld by the city.

The increased traffic over the road to the south country would warrant the Provincial Government in putting a section man on the road through Phillip's Canyon. The constant changing of the mountain surface keeps the road in poor condition. Several bad accidents have occurred on this dangerous road during the past summer and it is time something was done in the matter.

An effort should be made to get the government to make a good road into McBain's Lake for next summer. This spot has become very popular and is by far the most beautiful place in the district for a summer resort. Three hundred dollars were spent in improving the old bush road this season, but it is barely passable and it would take at least $5000 to put it in good shape. Quite a number of Fernie people are talking of securing land near the lake for the erection of summer cottages and if the road was improved it would not be long before this lake would have a big summer colony.

Coleman Journal: "A rumor which is being discussed and quite favorably commented on in local circles says that the provincial government will, next spring, make the road around the bluff, at West Coleman, 15 or 20 feet wider by blasting away a portion of the high hill which forms the bluff and using the stones building roads in the vicinity. The rumor also states that the government will make extensive improvements to this main highway all the way from the B. C. boundary east to Lundbreck and Cowley. Of course, these improvements are badly needed, but if The Journal can find that the rumor is correct, this newspaper will be glad to admit the thoughtfulness of Hon. Alex Ross, and the Department of Public Works, which will also win the good will of practically all the residents in the southern portion of the Rocky Mountain constituency."

Mrs. John Minton is visiting at Nelson and Trail.

R. Costanzo has bought the Lalonde property at Cokato.

Mr. and Mrs. N. E. Suddaby motored to Calgary on Monday. They returned on Wednesday.

Miss Constance Bonnell leaves this evening for Vancouver, where she will spend several weeks.

M. D. McLean, of Michel, purchased a Sport Model Oldsmobile four from Wm. Johnston this week.

Mrs. I. Bishop, who has been visiting her son, returned last week to her home in Missoula.

Mrs. J. A. Broley returned the other day from Vancouver, where she has been visiting for some weeks.

Rod. McLeod, of the Free Press staff, returned on Monday from a three weeks trip to Spokane.

Dresses, ladies' suits, men's suits, children's clothing and many useful articles to be sold at the Rummage Sale on Saturday, October 6.

The Ladies' Auxilliary of the G. W. V. A. will hold their regular meeting in the G. W .V. A. rooms at 7:30 on Tuesday evening.

Mr. and Mrs. N. D. Sanford have returned from a holiday at the Coast where they visited Portland, Seattle, Vancouver and Victoria.

Kye Bryant left this morning for Cranbrook, where he will be united in marriage to Miss Helen Jones, of that city.

Miss Dorothy Garner and her brother, Roswell, left on Tuesday evening for Niagara Falls where they will visit relatvies.

W. R. Ross left on Saturday for Vancouver after spending a week in the city. It is stated that W. R. may re-open a law office in Fernie at no distant date.

Will all members of the I. O. D. E. kindly notify the secretary if they can send in any clothing for the Rummage Sale. Special appeal is made for children's clothing and winter coats. Same will be called for.

John Reuter's Briscoe car, containing a party of joy riders, took a nose dive into a hole about four miles down the Morrissey road on Sunday last. The passengers were thrown violently out of the car, but all miraculously escaped injury.

A little eight-year-old girl fell from the passenger train which left here on Wednesday night of last week and was found by a search party, which went out from Macleod, about seven miles west of that town, sitting about six feet from the railroad alone in the darkness of the midnight.

The Golf Club Executive, at a recent meeting, decided to allow High School pupils to play golf free of charge on Saturday mornings, the only condition being that those availing themselves of this privilege shall observe the general rules and etiquette of the game. Others may play for a fee of $3.00 for the balance of the season.

The Crow's Nest Pass Coal Co. have recently installed at Michel a plant for the manufacture of domestic coke. The product will be turned out in four different sizes to suit all demands and the first shipment will be ready for the market on Tuesday next. It is expected that there will be a big demand for this coke in Alberta and Saskatchewan. The price will be about $11 a ton at Michel. It was originally intended that the plant would be ready for operation about August 1, but the work has been delayed two months.

COAST ITEMS

Vancouver, Sept. 26.—Short pants for men appears to be the coming fashion, according to information from the convention of garment makers in Chicago, wherein it is predicted that knickers for men will become the inevitable vogue before long. Young women whose nether limbs did not show up well in the short dress craze, will now have the blissful satisfaction of having a quiet snicker at their gentlemen friends whose limbs do not happen to be 100% perfect.

North Vancouver—Alleging that he has paid more than $400 interest on an original loan of $100, Amos Duke, father of a large family and earning only $21 per week, has filed a statement that throws further light upon the usury scandal that is now being aired in Vancouver. The Hook recently bared a case wherein a veteran of the Crimean war, with his son, daughter and grandchild, were stripped of every stick of furniture in their home in payment of a claim of $30 on a money-lender's note. Another instance shows where a deserted wife and her four small children were turned into the street by a landlord who claimed two weeks' rent, and who had added extortionate interest to his original claim. It is stated that flagrant instances of usury also prevail in other places.

Vancouver — The movement to reopen Department Bay in Nanaimo is reaching province-wide interest, and the petition that has been started in the colliery city is now reaching the mainland. The measure aims at reopening the Bay for fishing of herring which are said to be worthless for any other purpose than bait and fertilizing. An immediate market exists for the entire ouput of the season in Japan and China, and Nanaimo merchants realize the town is losing thousands of dollars a year by the closing of this industry. The matter is being handled by the Board of Trade and other civic boosters.

Victoria—One billion dollars of new taxable property will be created within one year from the rate of breaking of ground by Coast Steel Range, Limited. This startling statement has been made by prominent mining men, and further facts surrounding this statement have been received in Victoria, where belated interest is being aroused in the establishment of a steel plant for B.C. Authentic figures have been adduced to show that this province is losing $20,000,000 a year by the absence of this industry. At a recent meeting in London, some of the empire's greatest iron masters went on record in offering to aid this movement, and the home government has evinced willingness to support the industry with one-third guarantee, provided the Dominion and Provincial Governments assume equal obligations. The Ottawa solons, in their turn, have shown similar interest, and efforts are now being made to settle the details by securing the final support from this province. The London Times has just appeared with a special article urging the estblishment of the industry, and other journals of the Old Country are coming here with comment and indorsement. A feature article has been forwarded to the Manchester Guardian.

Vancouver—Beer by the glass as a public measure, bobbed up again, and is receiving strong support, even from circles that were originally opposed to it. It is expected that petitions will shortly reach Victoria. The Hook has come out with editorial indorsement and communications are beginning to appear in the press from people who consider the existence of several hundred "clubs" with other condition would be abated by a return of draught beer regulations under government control.

Vancouver—With his whole family killed in the Japanese catastrophe, the recent death of his young wife, and injuries that will lay him up for months following a mill accident two days ago, Isago Nakimura goes on record as the saddest man in town today. The young Nipponese had seven brothers, his parents and other kinsfolk among the dead in Yokohama. He was joined by his picture bride from Japan several months ago, but she sickened and died early this month. Fate followed him this week with an accident that may cripple him for life. He is 26 years old and attended the university of Yokohama. His bride was 17.

Vancouver—A loud report, followed by a shriek hastened Constable Tom McBain to the shack of Joe Spaddicini, dock laborer. Instead of a fatality, however, investigation proved that Joe's home brew had too much of a "kick" and exploded. Part of the flying glass inflicted wounds upon several of the guests. Mr. Spaddicini's woes were increased by his arrest on a charge of illitity possession of intoxicating liquor.

TRAIN BOYS IN SCOTLAND FOR CANADIAN FARMS

The farm of Craigielinn, near Paisley, Scotland, was formally opened today as a training centre for city boys who desire to go on the land in the overseas dominions. Since last autumn, ninety boys have gone from the farm to Canada.

Dr. Cassar, who has taken a special interest in the enterprise, said at the opening that the idea was that the boys from Craigielinn farm would go to Canada where he had purchased another farm with a view to their continuing their training and gaining all the experience necessary to equip the boys for farm work in the Dominion.

Many boys who could not "make good" in Great Britain were successful overseas, he said.

It was marvellous how boys taken from unhappy conditions in cities in this country prospered in Canada. One boy paid three thousand dollars for a farm and was taking to his home, his mother, a brother and a sister.

SEVENTY SCOTCH MINERS LOST IN FLOODED PIT

GLASGOW, Sept. 25. — Seventy lives are believed to have been lost today in one of the worst colliery disasters in the history of the Scotch mines when a deep pit at James Nimmo company's colliery near Falkirk was flooded.

The water which flooded the pit broke through the walls of an adjoining mine which had not been used for many years. The working pit was flooded so quickly that there was no opportunity to warn the miners. Only one man escaped after the onrush of water began. Frantic relatives of the victims rushed to the pit head at which rescuers hastily began work but little if any hope was entertained of saving any of the unfortunates.

LIBELLING CANADA ON THE SCREEN

"Movies of the ice and snow type are the curse of Alaska," says A. J. McConnell, manager of the Alaska Public Utilities company, who is now in Seattle. He points out that the public is continually fed with conceptions which are utterly at variance with true living conditions in Alaska.

When M. McConnell speaks for Alaska in this regard, he speaks for all of Canada as well.

If Alaska is misrepresented in the movies, Canada is triply misrepresented. Hardly a film is shown, purporting to be laid in Canada, but that the country is pictured as a land of ice and snow, rocks, savages and drunken vagabonds. An American who relies on the screen for his conceptions of lands abroad (and there are millions of them) gains a few clear notions of Canada about like this:

That apart from the few mounted policemen, who are heroes, Canada is populated by bewhiskered gents who are drunk all the time and would as soon kill you as look at you.

That the highest ambition of Canadian girls, dressed in cute doeskin frocks and speaking a dialect of French and Indian, is to fall into the arms of some fair haired young American youth in puttees who has left the big city of his birth because he doesn't like his bootlegger.

That a trip from Calgary to Saskatoon, for instance, must be made by dog sled with a 90 per cent. chance of being shot and scalped on the way.

That Canada has a winter lasting 12 months every year, during which time 45 per cent. of the population is stabbed in saloons or frozen to death on the trail.

All this may sound colossally absurd to the native Canadian but it is the real picture of what 50,000,000 Americans think of us. It is just as natural for these people to gain such impressions from the movies as it was for the whole world, a few hundred years ago, to dream of countries inhabited by men whose heads were below their necks.

How is it possible to reach any satisfactory understanding in trade, politics or tourist traffic when such notions prevail?

The movie producers of California should be made the objective of just as much forceful publicity as any other factor in American public opinion.—Vancouver Sun.

A local golf bug insists his game is similar to a motor boat. Its putt-putt-putt.

A million marriages have been recorded in Chicago since the vital statistics bureau was established. The number of couples parted by death and the divorce courts is said to be about equal.

There was a novel patriotic touch to the parade of the girl students of an Ohio college the other day. The marchers were formed according to the color of the shoes they wore—red, white and blue.

AN appetizing cup of FRY'S brings to the business man the "punch" he needs for a big day's work. Its nourishment is concentrated, its flavour is distinctive, and its quality is always supreme.

"Of course, remember—nothing will do but FRY'S"

181

Danny MacDonald, of Michel, formerly of Glace Bay, N. S.

Gus Williams, of Fernie, B. C.

MacDONALD AND WILLIAMS MEET IN 150 ALL SPORTS GYM OCTOBER 12

Articles have been signed and everything is in readiness for the boxing match between Danny MacDonald, of Michel, and Gus Williams, of Fernie, at the 150 All Sports' Gymnasium on Wednesday, October 10.

This match is the result of a challenge thrown out by MacDonald to boxers of British Columbia and Alberta at catch weights and will bring together two of the best boxers in the district. Both men are now in rigorous training and will be in the finest form of their careers when they step in the ring for the bout. Williams' training headquarters are at the Fernie Literary and Athletic Association Club rooms while MacDonald is training at the 150 All Sports' Gym.

For Acidity or Bile

When your stomach is upset

Take

Beecham's Pills act as a splendid tonic to the digestive organs. They remove acidity and fermentation and excess of bile from the stomach and bowels and promote the secretion of the gastric juices. In thus correcting morbid conditions and stimulating the digestive processes Beecham's Pills naturally have an excellent effect upon the general health. If you have lost your appetite or are suffering from nausea, sick headache, constipation, or giddiness

Beecham's Pills

MISTRESS OF THE AIR

The kingdom of the air is France's to-day, says a contributor to The Aerial age (New York). Her military air force is now quadruple England's. In commercial flying she leads the world. And where does the great United States stand—the richest and most powerful land on earth, whose citizens themselves admit modestly that they have more brains than "mere foreigners"? These citizens are complacently buying tickets on the old-fashioned limited trains, the writer says; while the puny nations of the earth are flying to work. We are wonders at doing "stunts" and breaking records, but we make no use of the air. How may it profit a man to read of "dawn to dark" flights across the continent when it takes him 20 hours to go from New York to Chicago? Our critic exclaims at the end of his article, "Shades of Robert Fulton"—and he has chosen the right name to invoke. Robert started right in to carry passengers. Who will establish the first transcontinental air line—not in the newspapers? We read:

"France leads the world in air transportation. This commercial application of the airplane keeps alive her factories, among which orders are widely distributed in order to nourish as large as an industry as possible. The technical progress essential for the improvement of commercial air transport is just as essential for the development of aeronautics as a means of national security—defense if you prefer. Her military air force is now four times larger than that of England. This, added to her commercial possibilities, gives her world command of the air.

"France has reason to be interested in air defense. Her late enemy, by whom she has been invaded every fifty years since before Christ, is but three hours from the capital. The Versailles Treaty has not disarmed Germany in the air. It is estimated that Germany to-day could equip an air force of 5,000 airplanes during a 'period of diplomatic tension' lasting eight or nine months. It is figured that at least seven months are needed by any nation to inaugurate an intensive manufacture of aircraft and their engines.

"Pierre Flandin, a member of the Chamber of Deputies of France and head of the Aero Club de France, draws attention 'to the fact that hereafter it will be possible to load on a single airplane a complete section of machines guns, including personnel, material and supplies. Imagine a moment what three or four hundred sections of machine guns could do in the three hours following the opening of hostilities by landing suddenly near the most delicate points in the general organization of a nation. During several hours, at least, each one of these sections will be the complete master of a small portion of the territory which it occupies—stations, railroad bridges, dams, harbors, large factories, etc. While the machine gun is on guard, the destruction section will operate, and one must remember the formidable possible development of chemical warfare."

"How much of the resistence of a nation could be broken in a few hours by an aerial force supplemented by another air force working on the morale of the population by the systematic bombardment of great cities, will be measured in the next war, wherever it occurs. Here is the first line of defense. Two can play at this same game. The country with air supremacy is doped out to win—at least, it's certain she'll be first away at the barrier.

"The 200-pound bombs of the World War now give place to those of 2,000 pounds. This weight of gas out-effects the same weight of high explosives. True, the late conference on the limitation of armaments signed something about not using gas within the conference family, but the members are free to use it against the heathen non-members or inside the family if some one renegs. And the gas-carrying airplane has the long-range gun outranged by a hundred miles. Then there is the enemy's navy which may be reached by the suddenly drafted commercial airplanes—all providing the enemy doesn't do the same thing.

"However, each country appreciates the airplane and airship and the one with the quickest, heaviest and longest punch is the one which will land first.

"This means a race for aerial supremacy.

"Facing the risk of Germany's quick change from commercial planes to those of war, France feels her only guarantee of safety is in the air."

M. Flandin, at the same time, wants it clear that it would be unjust to accuse France, because she is making such a great effort in the establishment and maintenance of her network of air transport routes, of embarking upon a course of aerial imperialism. He compares the respective budgets of England, the United States and of France to show that the two Anglo-Saxon nations devote more money to aeronautics than does France. We read again:

"Reducing all these credits to dollars and adding to them, it being well understood, all other expenses chargeable to military, naval or civilian aeronautics, we arrive at the following figures for 1922:

For Great Britain	$72,000,000
For the United States	40,000,000
For France	32,000,000

"'We are not then building an aerial fleet with the money which, altho certain opinion suspects it, we should, it is said, devote to the payment of our debts. We are simply assuring our national security, working above all for the peaceful progress in the development of commercial air locomotion.

"We are proud to have been the originators of this movement and we are convinced that the day when the system of air transport extends over the entire world, facilitating understanding between peoples, and above all personal relations with the elite of all nations, we will have have worked in the most efficacious manner to establish world peace, for nothing is so valuable as a direct contact of individuals in dissipating the misunderstandings and the ingnorance which often separate nations, particularly when they are widely separated from each other.'

"Admitting that the main reason for the establishment of French air routes is political; that because of short distances, necessity for frequent landings for customs, the operation of lines to points which produce little or no revenue, where a strictly non-subsidized commercial line would not fly, the lines are unprofitable from a money standpoint; that the Government pays 60 per cent. of the expenses; the actual commercial possibilities are obviously being realized when we consider that over 582 tons of small express were carried last year by French air lines, and more than two million letters were sent at a triple postage rate and 14,397 persons were carried.

"And the carriage of merchandise is increasing faster than the carriage of people. The passengers flown in 1922 were only 1½ times those carried in 1921, but the goods transported increased over three times.

"Ameriea, the land of the Great! Great distances, great cities, big business, the chosen land for air transport, splendid in its aerial isolation. An industry depending on military aircraft only for its existance with a greater field left untilled. And once they praised American genius and progress. Turkey is doing business by air. America look complacent and buys a ticket on the Broadway Limited, while the puny nations of the earth are flying to work. Shades of Robert Fulton!

o

Over half the girl students in the Ohio State University do not eat breakfast. A bedtime "snack" consisting of a box of chocolates, angel cake and dill pickles many contain enough calories to sustain life until lunch time.

BURNING STOMACH

Two (2) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B.C., or District Forester, Cranbrook, B.C. S7-4t

Public Subscription is invited for

$50,000,000

Dominion of Canada

Refunding Loan 1923

5% Bonds

Dated and bearing interest from 15th October, 1923, and offered in two maturities as follows:

20 year Bonds due 15th October, 1943
5 year Bonds due 15th October, 1928

Principal payable at the office of the Receiver-General at Ottawa or that of the Assistant Receiver-General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary or Victoria. Semi-annual interest (15th April and 15th October) payable at any branch in Canada of any chartered bank.

Denominations: $100, $500, $1000

All bonds may be registered as to principal only, and bonds in denomination of $500 and authorized multiples thereof may be fully registered.

These bonds are authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund.

To Cash Subscribers

Offering Terms

This issue presents a most attractive investment. The security is incomparable and the income return high. The bonds will occupy an investment position equal to that of Canada's Victory Bonds.

The bonds are offered for cash at the following prices:

20 YEAR BONDS
98.25 and interest yielding 5.14%

5 YEAR BONDS
99 and interest yielding 5.23%

This offer is made subject to prior sale and to advance in price.

To Holders of 1923 Victory Bonds

In addition to the bonds offered for cash it has been arranged that all owners of Victory Bonds due November 1st, 1923, may exchange their holdings for the same amount of the new issue. They will receive in cash the difference between the face value of their maturing bonds and the purchase price of the new security, namely: at the rate of $1.75 per $100 for 20 year bonds and $1.00 for 5 year bonds.

Special Privilege

Interest coupons on bonds exchanged are to be retained by the owner and cashed on November 1st. As the new bonds will be dated October 15th, holders who exchange will thus receive an extra half month's interest thereby reducing the cost of 20 year bonds from 98.25, and 5 year bonds from 99, to the following:

20 YEAR BONDS
98.02 and interest yielding 5.16%

5 YEAR BONDS
98.77 and interest yielding 5.28%

Holders are urged to act promptly as this privilege is subject to withdrawal.

Dominion of Canada bonds are the most attractive investment obtainable in Canada.

Orders may be telegraphed or telephoned (collect) and exchanges made through any of the undersigned or through your usual dealer or bank.

The right is reserved to allot a less amount of bonds than applied for, and to sell for cash more than $50,000,000.

These bonds are offered for delivery in interim form on or about October 15th, 1923, when, as, and if issued and delivered to us.

MYSTERY AND THRILLS RIOT IN "RED LIGHTS"

That mystery and suspense may be just as effective in the silent drama as on the speaking stage is evidenced by the film version of Edward E Rose's mystery play "The Rear Car," which Clarence Badger directed for Goldwyn under the title of "Red Lights." The play had a successful stage career with Richard Bennet in the leading role in the West and Taylor Holmes in the East. Many critics pronounced it the best mystery play since "The Bat." "Red Lights," the screen version, keeps the action more suspensive than did the play because the director took full advantage of the opportunity of depicting many scenes and episodes which could not be shown in the stage version. The picture is coming to the Orpheum Theatre on Friday and Saturday of this week, and is one that every picture-goer who is fond of melodrama, should not miss.

It has often been said that American audiences prefer mystery drama to any other form of entertainment, with the possible exception of good clean comedy. The mystery complications in "Red Lights" are guaranteed to keep the interest tense throughout and to keep the thrills chasing up and down the spinal column until the very last scene. The greater part of the action takes place on the rear car of a Continental Limited, although all the early stages of the action takes place in Los Angeles, at the famous Ambassador Hotel and other places.

Goldwyn has selected a big cast of prominent players for this picture, headed by Marie Prevost, as Ruth Carson, Raymond Griffith, as the "crime deflector" and Johnny Walker, as the lover. Others in the cast include Alice Lake,, Jean Hersholt, Dagmar Godowsky, Lionel Belmore, Frank Elliott, William Worthington, George Reed, Charles B. Murphy and Charles West.

WHITNEY BOYS' CHORUS IN I.O.O.F. HALL SATURDAY 29

Whitney Boys' Chorus will sing in the I.O.O.F. Hall, tomorrow night, Saturday, September 29. Admision 75c. They will also take part in the Sunday morning service at the United Church and may, if secured, also sing there in the evening.

The have solos, duets, quartettes and humorous readings, chorus numbers, duets in costume, Scotch dancing and a humorous encore for each chorus number and many things very enjoyable while one artist is worth the price of admission alone, holding two world's records for singing five octaves. Concert commences at 8 p.m.

This Chorus has been personally honored by two Presidents, many Senators ,Representatives, Governors, Mayors and several people of international prominence, including Woodrow Wilson, Billy Sunday and Evangeline Booth. They have been praised by the Ladies' Home Journal, New York Times, and many other noted publication. 10,000 people have been unable to gain admission to a single concert. They have been rated second to the Chicago Grand Opera, and are touring Canada and the United States this season under the slogan, "Portland, Oregon, to Portland, Maine."

o

The jury selected to award the Bok Peace Prize may agree but their verdict is likely to be questioned by all the unsuccessful candidates.

GASOLINE PRICE REDUCED THREE CENTS ON COAST

TORONTO, Sept. 24.—The Imperial Oil Company yesterday announced a cut of one cent a gallon, effective throughout Canada. Other companies will follow suit, it is stated. The wholesale price of gasoline in Toronto was 25 cents and the retail price 29 cents. Today gasoline will retail in Toronto at 28 cents.

VANCOUVER, Sept. 24.—Effective today, gasoline goes on sale in Vancouver at 27 cents a gallon at retail —a drop of three cents, officials of the principal oil companies announced Sunday night.

NEW LAMP BURNS 94 PER CENT AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise —no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. B. Johnson, 579 McDermot Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make $250 to $500 per month.

ORPHEUM THEATRE
WEDNESDAY & THURSDAY, OCTOBER 3 & 4

Ford

A Saving Of
$300 and $160
On the Sedan On the Coupe
NOW

On or about January 1st, 1924, the Ford Motor Co. of Canada, Ltd. will be in production on a new Four-door Sedan and a new Coupe identical with those now being produced in the United States. The prices on these new models will be:

4-door Sedan - - $985.00
Coupe - - - - 755.00

We have on hand a limited number of the present Coupe and Two-door Sedans which can be obtained at the following prices:

2-door Sedan - - $685.00
Coupe - - - - 595.00

This frank statement of merchandising and production policies is made to settle all the rumors that have been circulated regarding Ford cars and prices in Canada. The considerable saving in price on present models gives you the opportunity of driving your Ford closed car this winter.

Prices of New Models		Prices of Present Models	
4-door Sedan	**$985.00**	**2-door Sedan**	**$685.00**
Coupe	**755.00**	**Coupe**	**595.00**

All prices quoted are F. O. B. Ford, Ontario and do not include government taxes.

With winter close at hand this differential in price should be all the more attractive. You can obtain the advantages of closed car comfort and distinction by availing yourself now of these prices.

HOME BANK COLLAPSE

TORONTO, Oct. 3. — H. J. Daly, president; R. P. Gough, vice president; F. J. B. Russill and C. Woods, directors, and O. G. Smith, chief accountant of the suspended Home Bank of Canada, have this afternoon been arrested on charges preferred by federal and provincial authorities in connection with the collapse of the bank on August 17.

Daly was placed under detention at his summer home at Lake Simcoe. Gough, who is also a director of the Canadian National Railways, surrendered in Toronto this afternoon and was taken to the police station. The bail in each of these cases is $100,000. Bail in the instances of Russill, Woods and Smith is $50,000 and the bonds have been secured

It is understood that other arrests are contemplated.

J. F. M. Stewart, another director, was taken into custody late this afternoon. Bail is being arranged in his case.

The liabilities of the Home Bank as shown in the summary issued in the report of the Curator, A. B. Barker, this morning, amount to $18,486,978 while the assets amount in the aggregate to $15,848,400, the liabilities of the bank to the public exceeding the assets by $2,638,578.

Such deficit will be increased by any losses met with in realization and it must be expected that the "special assets" will not realize the amount at which they are carried in the books of the bank as set forth.

To the deficit of $2,638,578 must be added the following: Capital paid up, $1.960,592; general reserve $550,000.

In an interview today after the Curator's statement had been handed out, Mr. Barker said he would not hazard an opinion as to what dividend would eventually be paid to the depositors. Neither could he say whether the shareholders would be called upon for payment of their double liabilities. These matters would be for disposition of the liquidators.

The matter of an interim dividend of 25 cents to be paid by other banks was under consideration but the machinery for the payment had not been definitely arranged for.

"How was the bank wrecked?" Mr. Barker was asked.

"Because it did not have sufficient assets to meet its liabilities."

Mr. Barker declined to say whether he thought the conduct of the bank before the suspension made way for criminal proceedings.

"That is a matter for the government authorities,' said the curator.

Mr. Barker declared that he found that the books of the bank—as books—were well kept. It was a matter for the federal authorities whether the reports made to the minister of finance were in accord with the act. It was a matter of opinion, he said, whether there was really a deficiency between the books and the returns made to the government. It depends largely on the possibility of realizing on sundry assets of nine million dollars which had to be further investigated and determined possibly by the lapse of time.

Mr. Barker was asked about the connection between the Home Bank and the British Dominion Holding and Investment Company at Montreal which was reported to have owned ships in the rum-running business.

"There is nothing in the books of the Home Bank to indicate there were ships in the rum-running business," said the curator. "I am unable to say anything about that."

Mr. Barker said that Grant Morden of Montreal, Edward Bristol, M.P. and the late C. D. Warren, president of the one-time Traders' Bank, were interested in the negotiations for the advances of $1,143,334 to the South New Orleans Railway company. The curator thought that this would eventually realize more than the bank's investment in this concern. It was Sir Henry Pellatt who obtained advances of $1,700,000 from the bank in connection with various real estate enterprises in Toronto said the curator. He thought these advances were well secured.

Mr. Barker said he was unable to say just how far the directors knew of these advances. This transaction originated with smaller transactions many years ago, between the Home Savings and Loan company, which preceeded the Home Bank. It depended upon the working out of these properties whether they would produce this amount. Sir Henry Pellatt held the opinion that there would be a surplus of $1,000,000 over this liability on the properties in question.

The question of the reported heavy sales of shares by H. J. Daly, the president, and "others close to the president" was then taken up.

"I have not investigated that. That is a matter for the liquidator. There is no evidence," said the curator, "that the bank was advancing money against these shares."

Mr. Barker added later:

"It is a matter that should be gone into as a subject of careful enquiry."

Mr. Barker admitted that a deposit of one million dollars made by the Canadian National Railways was taken out a few days later on the instructions, he understood, of Sir Henry Thornton. He could not say why the Canadian National did not know during the long time that R. P. Gough was trying to get a deposit for the bank, that he, Mr. Gough, was a director in both concerns.

"Did any politicians get loans from the Home Bank?"

"Not that I know of," said the curator, who, later admitted with a laugh that he was not sure what was meant by a "politician."

On request, Mr. Barker obtained the minute book of the bank in regard to declaration of dividends. The last declaration was July 17, when, with four directors, Messrs. Daly, Russill, Gough and Stewart present, a quaterly dividend at the rate of seven per cent. was declared for payment to sharholders of record August 17. This was the day the bank was suspended. It was not paid.

The curator estimates the losses on loans for which adequate provision had not been made at $3,794,915. These include estimated losses on loans of a general character amounting to $1,336,409, sustained in the Toronto office, estimated losses of $190,000 were recorded at Montreal branches, $391,000 at the Winnipeg branch, $529,543 at branches in Manitoba, Alberta and Saskatchewan outside of the Winnipeg branch and $122,820 at branches in British Columbia. Specific losses, according to the report include :

Advances to the King Shoe company and to the Canadian Shoes, Limited, $517,558; Arnprior Cabinet company $120,410; advances re veterans' script and western real estate, $250,347; False Creek Lumber company, Vancouver, $126,394, and to the estate of the late Brig.-General Mason and loans to the late Col. J. C. Mason aggregating $97,000.

Including at their book value in the statement of assets and liabilities are certain assets which have a substantial value, but the definite worth of which can only be determined with their realization and, to a large extent, over a considerable period of time if sacrifice of such assets is to be avoided. With respect to such assets, the curator reports:

Eight per cent. preferred capital stock of James Ogilvie, Limited, Montreal, cost to the bank $225,000.

Advances to the Elgin Development Land and Security Company, Limited, $21,435.

Advances to the Toronto City Estates, Limited, $775.036.

Advances to the County Investment company, $767,885.

Advances to A. C. Frost and Co., Chicago, $1,856,301.

Investments in the Port McNeill Lumber Company, Limited, (Vancouver Island), $1,004,804.

Howe Sound Pulp and Paper company, Limited, British Columbia), $975,076.

Advances and loans made in connection with the South New Orleans Railway, Light and Power Company, $1,143,334.

Due by the British Dominion Holding and Investment Corporation, Limited, Montreal, $1,409,845.

As security for advances to A. C. Frost and company, Chicago, the bank holds certain crown grant timber limits in British Columbia.

The investment in the Port McNeill Timber company is secured by $1,000,000 in bonds and $995,000 capital stock of the company, while the investment and advances in the Howe Sound Pulp and Paper company are secured by first mortgage bonds and capital stock in the company, which owns 1200 acres of timber on Howe Sound, 25 miles from Vancouver. The advances and loans to the South New Orleans Railway, Light and Power company is protected by a $1,000,000 first mortgage and an interest in the capital stock of the company. The obligation of the British Dominion Holding and Investment Company, Limited, Montreal, had its origin in advances made to C. A. Bernard, Montreal, which advances were assumed by the corporation.

The company owns two steam vessels, shares in certain industrial companies, etc. The debt is guaranteed by C. A. Bernard.

Among the estimates of losses or loans of general character as submitted in the curator's report is an item $214,435 advances in the Elgin Development Land Security company, with land in Toronto, Hamilton and Winnipeg.

There are also advances, under this head to the Canadian Debntures Corporation, Limited, Toronto; Dominion Industries, Limited, Toronto; London and Canadian Corporation,

(Continued on Page Three)

MEETING OF THE COUNCIL

The first regular October meeting of the City Council was held in hte Council Chambers last evening with all present excepting Alderman Graham.

A communication from the Secretary of the Board of Railway Commissioners, regarding the complaint of the City against the Great Northern Railway re water course, was read and ordered filed.

The reasons for judgment by His Honor Judge D. A. MacDonald in the case of Drs. Bonnell, Garner & Asselstine vs the City of Fernie were submitted in a communication from A. H. McNeill, K.C., of Vancouver. After hearing the finding of the Supreme Court, the Council decided that no appeal would be made.

A letter from the Secretary of the Publicity Committee of the Union of British Columbia Municipalities regarding the convention of that body at Prince Rupert, was ordered filed.

An application from Mr. John Perry for a license for the Central Hotel, approved by the Chief of Police, was submitted to the Council. A motion was passed authorizing the City Clerk to issue this license.

The report of the B.C. Underwriters Association upon the fire and water situation in the City of Fernie was filed.

It was brought to the attention of the Council that several citizens have made connections to the City Sewerage system without having secured a permit to do so. The City Clerk was instructed to prosecute anyone doing this in future.

Mayor Henderson reported that the new waterworks system throughout the City and the Annex had now been completed. All that remains to be done in this work is the laying of the pipe line across the Elk River at Fairy Creek Bridge.

ROYAL BANK OPENS HERE

The Royal Bank opened its doors in Fernie on Monday last in its temporary quarters in the Hotel Fernie. Mr. A. Watson has been appointed manager and will assume his duties just as soon as he can sever his connections with the Home Bank, which will probably be the first of next week. In the meantime Mr. Frank Marsh, of Cranbrook, is in charge.

The Royal Bank is one of Canada's strongest financial institutions, having an authorized capital of $25,000,000, $20,400,000 of which is paid up. their total deposits amount to $372,000,000, distributed over 572 branches in Canada and Newfoundland. The bank has also 110 branches scattered over the West Indies, Central and South America and Europe.

BOXING MATCH ON OCTOBER 10

All arrangements have now been completed for the ten, three-minute round boxing match between Danny MacDonald and Gus Williams, both of Fernie.

Both men have large experience in the fistic art and are now meeting for the first time to decide which is the better man. Both have been undergoing rigid training for the past month and are in the finest form of their careers and should put up one of the finest exhibitions ever staged in the City.

The 150 All Sports' Gymnasium directors are out to give the sport loving public the best available exhibitions in all classes of sport and by securing these two men for their opening boxing exhibition are making a good move in that direction. Owing to an error, the advertising displayed throughout the city states that the exhibition will commence at nine o'clock. The preliminaries will commence promptly at 8.30 p.m., on Wednesday, October 10, and the main bout will follow immediately the fourth preliminary is finished.

HOME BANK DIRECTORS APPEARING IN COURT

TORONTO, Oct. 4.—C. A. Barnard, K.C., and Lieut.-Col. C. F. Smith, directors of the Home Bank of Canada, arrived here this morning from Montreal and are appearing at the police court today with other defendant directors and bank officials on charges in connection with the collapse of the bank. A. E. Calvert, who was acting general manager when the bank suspended, came in from Osaka today and was placed under arrest. Nine defendants are appearing in the police court today. The president, H.J. Daly, is not attending court owing to illness. P. A. Mitchell, the London, England, director, is now the only member of the board not under arrest.

PUBLIC SCHOOL CLASS LEADERS

The pupils whose names appear below led their classes in the various divisions in the Fernie Public School during the month of September:

Div. 7.—Emma Wilson, 86.6; Lillian Haigh, 80.8; Meta Peters, 80.3; Tony Taverna, 80.2; Mary Pero, 79.

Div. 8.—Sallie Kosiec, 91.4; Lily Beale, 89.1; Lilian Smalek, 87.4; Mary Telep, 86.1.

Div. 9.—Mary Montalbetti, Florence Cole, Christina Vanbuskirk.

Div. 10.—Herman Hark, Mary Marasco, Thomas Aitken.

Div. 11. — Phyllis Worth, Stanley Pickering, Sadie Gurr.

Div. 12. — Fred Meadows, Eileen Smolik, Pearl Tully, Kathleen Gallamore, Clarice Schupe.

Div. 13. — Tony Megali, Gordon Cummings, Emily Morris.

Div. 14. — James Stark, Charles Austin, Alice Wilson.

Div. 15.—James Shaw, Louisa Stebber, William Prentice, Ethel Ookeley.

Div. 16.—Annie Slemko and Mike Guzzi, John Timchuk, Gordon Ross.

Div. 17.—Thalia Perry, Lillian Robertson and Gordon Biddulph.

Div. 19. Grade 5—Norman Green, Ethel Hesketh, Nellie Rogers. Grade 4—Janet Brown, Lillian Johnston, Lizzie Mogielka. Grade 3—James Walker, Arthur Kengelava, Odile Falip.

BIGGS-HUNNABLE

A quiet house wedding was solemnized at the home of Mr. and Mrs. John Biggs last Saturday morning, when Miss Connie Hunnable, youngest daughter of Mr. and Mrs. C. Hunnable of Penticton, B.C., was united in marriage to Mr. Wilfred Biggs, of this city, the Rev. W. F. Burns performing the ceremony.

The young couple are both popular members of the younger set and despite their efforts to get away unnoticed they were given a rousing send-off at the Great Northern Depot when they left on a short honeymoon trip to Spokane.

BRYANT-JONES

A wedding which created some lively interest locally, was quietly solemnized last Saturday afternoon, at the home of the bride's parents, in Cranbrook, B.C., when Miss Helen Jones, only daughter of Mr. and Mrs. E. W. Jones, of that city, was united in marriage to Mr. H. A. Bryant, of Fernie, B. C., the Rev. Mr. McKay officiating.

Following the ceremony the gathering partook of a buffet luncheon, after which the young couple left for Fernie where they will make their home.

On arriving here the bride and groom were given a great welcome by their local friends and members of the Great War Veterans' Association, of which Mr. Bryant is a past President. On stepping from the train Mr. Bryant was promptly "Shanghaied" by his former comrades, who after seeing Mrs. Bryant safely in a waiting automobile, escorted the bridegroom to Joe Longden's 'Rolls-Royce' and gave him a ride through the business section of the City, loudly announcing that he had been newly married, before taking him to the home of Mr. and Mrs. Thomas Biggs, where the bride and groom were guests of honor at a reception dinner.

Later in the evening a large party of returned men, headed by the brass and pipe bands, formed a torchlight procession and marched to McPherson Avenue where they serenaded the newlyweds until nearly midnight.

The excitement eaters wouldn't want anything better than half a dozen automobile accidents a day in which two or three people are killed and as many injured.

RED EFFORTS TO WIN UNION

(Literary Digest)

Once more the curtain rises on a Russian plot to seize the reins of government on this continent. The biggest union in the United States, the United Mine Workers of America, after an "independent, searching investigation," announces that "the seizure of this union is being attempted as the first step in the realization of a thoroughly organized program of the agencies and forces dehind the Communist International at Moscow for the conquest of the American continent." Already, we are told, the Communist organization in North America "is composed of more than six thousand active leaders and lieutenants, and approximately one million members, adherents and sympathizers, scattered in every State and Province of the United States and Canada." If successful, the plan to make a "red" henchman of every holder of a union card would swell this army to more than four millions. The ultimate object of this movement, according to the lengthy report given to the press by the United Mine Workers of America, is "the overthrow and destruction of this Government, with the establishment of an absolute and arbitrary dictatorship, and the elimination of all forms of popular voice in the governmental affairs." This is "now being attempted on a gigantic scale." The steps contemplated include "the seizure of the American Federation of Labor," the supplanting of craft unions by "industrial" unions or a "one big union," and "the conversion and mobilization of farmers and other related groups." "Millions of dollars are being spent in this conquest.' In this country the organization instigating and guiding this movement, we are told, are "the Communist Party of America, the Workers' Party of America, the Trade Union Educational League, and the Friends of Soviet Russia." They get their instructions, it seems, from the president of the Communist International at Moscow.

The miners' investigators assert that this communist movement to capture control of the unions and the American Federation of Labor has been under way for five years, and that "three times in three years the Bolshevik leaders at Moscow have attempted armed insurrection and revolution in the United States"—in the steel strike of 1919, in the "outlaw" switchmen's strike of 1920, and in the railroad and coal strikes of 1922. The report sounds the following warning:

"The Communist movement in the next twelve months will be conducted along more intensive lines than it has at any time in the past. The labor organizations will meet their greatest assaults and attacks, and the Communists will make greater efforts than they have at any time in the past to get possession of them. The movement is aimed not only at the labor unions, but at the entire industrial, social and political structure of the country, and with the single aim of eventually establishing a Soviet dictatorship in the United States, and converting the country into a vassal colony of the Communist International at Moscow. It is a situation that challenges not only organized labor, but every employer as well. This is one occasion when labor and the employer might very well join hands and fight together instead of fighting each other."

Another striking feature of this report is the warning against the effects of revolution of the Soviet Government by the United States.

"No greater victory short of the overthrow of the Federal Government itself could be won by the Communist organization in this country than to bring about recognition of the Soviet regime in Russia by this Government. Experience has demonstrated that wherever the Soviet Government goes it goes for propaganda. If diplomatic relations were established with this country, the Soviet regime would be the sole beneficiary.

"A recognized government is entitled to a consulate in every city, and a consular staff may be as large as desired and may do about what it wants to do. In the light of their past activities, the first thing that the Soviets might be expected to do in the United States, if accorded recognition, would be to establish 'consulates,' with large propaganda staffs, in all the leading cities. The present 'underground' revolutionary organization now centered around the Communist Party of America, would then be able to come to the surface and start its work with renewed impetus in the open."

The United Mine Workers' union, which covers both the anthracite and bituminous fields, has a membership of nearly half a million. Ever since its beginning this organization "has had to cope with extreme radicalism within its ranks," remarks the New York Evening Mail, which goes on to say:

"Students of labor policies always look to the miners to range themselves with whatever new idea is being spread abroad. And the majority of the miners always make a great show of doing so. They indorsed government ownership of railroads and coal mines not so long ago, for instance. In the end, the majority of the miners do not worry themselves greatly over those abstract possibilities, but settle down to strike for a better wage and better working conditions. When they get these, they give short shift to the 'Reds' in their ranks."

In making public this report of "Red" activities, says the Washington post, "those on guard in the camp of organized labor prove their sound Americanism." "Whatever blame may attach to these labor leaders for events of the past," remarks the Buffalo Express, "They are doing good service in pointing out the danger of Bolshevism." "While it is regrettable that the United Mine Workers of America should not have sooner appreciated the danger threatened by the anarchistic foreign element in its membership," remarks the Tacoma Ledger, "still it is a matter for congratulation that even at this late day the great organization of coal-miners has arrayed itself upon the side of Americanism in opposition to radicalism." The charges set forth by the miners' union, while "not all of them new," convinces the Boston News Bureau that "the Red menace is to be taken at least seriously enough for us to be on guard." The charges of the Mine Workers should not be lightly brushed aside, many papers agree. For, we are reminded by the Chicago Evening Post:

"Other labor organizations in this country have made the same charge. Presumably the labor officials know what they are talking about. It is certain that officials of the United States Government, like Secretary of War Weeks and Secretary of the Navy Denby, know what they are talking about, when they say that there is proof on hand of communisitc designs on the United States."

The Mine Workers' warning convinces the Chicago News of a desire on the part of this powerful union "to repudiate violence and clean house." "The arm of Moscow is long and its influence is vast," remarks the Canton News, "but thank goodness, President Gompers of the American Federation of Labor and President Lewis of the United Mine Workers of America have seen through its activities among American workers." "That organized labor in this country is militantly patriotic and whole-heartedly opposed to Red supremacy is unquestioned," declares the Atlanta Constitution. In making this exposure of Red activities, the United Mine Workers have performed a patriotic service, says the Minneapolis Tribune; and the St. Louis Globe-Democrat commmends this union, and union labor in America generally, for its "persistent opposition to Bolshevism." A labor daily, the Minneapolis Minnesota Star, corroborates the charge that Communist agencies are at this time "attempting to mislead farmers and labor in Minnesota and neighboring states." It goes on to say:

"The Star has no sympathy with either the methods or the principles of such radicals. They are at least as serious a menace as the 'Reds' of extreme reaction and conservatism.

"It is to the intelligence and progressive spirit of the great 'twilight zone' in between these two extremes, that The Star appeals.

"But the Communists should be allowed to advocate their doctrines openly. The worst thing that could have happened was to drive them under cover, as Attorney-General Palmer and Dougherty have done. A Communist thrives on martrydom. Under cover he is dangerous. In the open he is harmless.

"Let them be allowed to preach their false doctrines freely, and then by meeting them with sound logic and reason they can be easily 'scotched.' "

o

U. S. Farmers and Europe

The chief support of those American statesmen who have advocated a complete policy of isolation for the United States has come from the wheat-growing states of the central and western plains. These farmers may discover as a result of the situation they now face that their own salvation is in a restored Europe, and may take a broader out-look of the present crisis. Today no nation can live to itself, and least of all, the United States. If the United States would only see its way clear to cooperate with Great Britain, between them they might be able to find some form of concerted action which might enable them to enforce peace and financial and commercial order on the continent.—London Free Press.

o

Bonar Law's ambition was to establish tranquillity. President Coolidge advocates a policy of stability. Combining the two would be utility.

For Bladder Trouble

All such disorders as scanty or too frequent urination, brick dust deposits in the urine, or a burning sensation when voiding urine, are entirely due to disordered kidneys. To right such symptoms you must first restore your kidneys to their normal condition. Gin Pills go right to the kidneys relieving them of congestion and so quickly rid you of all bladder trouble. Before a more serious condition arises get the one specific remedy—Gin Pills—50c a box everywhere.

NATIONAL DRUG & CHEMICAL COMPANY of CANADA, LIMITED
Toronto, Ontario

Gino Pills in U.S.A. are the same as Gin Pills in Canada. 26

His Hearing Restored

The invisible ear drum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one can tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 436, 70 Fifth Ave., New York city, will be given a prompt reply. Advt.

GENERAL CHANGE IN TRAIN SERVICE

Effective Sunday September 30, 1923

TIMES FOR TRAINS AT FERNIE will be

WESTBOUND	EASTBOUND
No. 67—9.46 a.m.	No. 68—7.00 p.m.

Daily

TRANS-CANADA LIMITED Nos. 7 and 8—Between Montreal, Toronto and Vancouver, will be withdrawn. Last trains leaves each of these points on September 29th, 1923.

THE MOUNTAINEER, Trains Nos. 13 and 14—Between Chicago and Vancouver have been withdrawn West of Moose Jaw. Connections at Moose Jaw from and to St. Paul with trains Nos. 1 and 2.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residental and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, ur

OLD FRIENDS ARE GOOD

Some time ago we asked for letters from folks who have been friends of Pacific Milk for many years.

It brought a splendid lot of letters, and to know that there are among us people who have stayed loyal to a British Columbia product straight through the years is indeed a reason for gratitude. We should like to know more of the old friends—and to the one of longest standing we shall send a case of Pacific Milk FREE.

Please state when and where you first started using it.

HOME BANK COLLAPSE

(Continued from Page One)

Limited; to T. S. O'Connor and H. J. Daly to a total of $177,013.

Mr. Barker says in relation to these:

"The sesurities held against these advances include shares of the Daly Company, Limited, Ottawa, stocks and bonds having a value of $26,778; life insurance policies and the obligation of H. J. Daly to the amount of $84,-759. Advances included therein of $31,231 to T. S. O'Connor are said to have been in connection with the purchase of Home Bank stock.

OTTAWA, Oct. 3.—Announcement that President Daly of the Home Bank was to be arrested was contained in an official statement issued here today at noon by Rt. Hon. W. S. Fielding, minister of finance, which states that as a result of the curator's report and returns to the minister of finance containing false and deceptive statements of the bank's affairs.

The returns in which these false and deceptive statements were contained were signed by Herbert J. Daly, president of the bank, and J. Cooper Mason, general manager.

Mr. Mason, it is recalled, in the official announcement, died soon after the return was made.

An officer of the finance department left here yesterday for Toronto, and upon his application a warrant was issued for the arrest of President Daly.

Mr. Fielding said that the question whether action would be taken against other parties would be considered in due course.

Mr. Fielding's statement follows:

"The report of the curator of the Home Bank has been received by the minister of finance and by the President of the Canadian Bankers' Association. The report is herewith released for publication in the Canadian Press.

"Section 153 of the Bank Act reads as follows:

"'(1)—(A)—The making of any wilfully false or deceptive statement in any account, statement, return, report or other document respecting the affairs of the bank, or (B)—the using of any false or deceptive statement in any account, statement, return, report or other document respecting the affairs of the bank with intent to deceive or mislead any person, is an indictable offense, punishable, unless a greater punishment is in any case by law prescribed therefor, by imprisonment for a term not exceeding five years.

"'(2)—Every president, vice-president, director, auditor, general manager or other officer of the bank or trustee who negligently prepares, signs, approves or concurs in any account, statement, return, report or document, respecting the affairs of the bank containing any false or deceptive statement shall be guilty of an indictable offense, punishable, unless a greater punishment is in any case by law prescribed therefor, by imprisonment for a term not exceeding three years.'

"From the curator's report and from other information obtained by a special investigation, conducted by a representative of the department of finance, the department believes that the chief officials of the bank, in the period shortly before the bank's suspension, made returns to the minister of finance containing false and deceptive statements of the bank's affairs contrary to the provisions of section 153. The returns in question were signed by H. J. Daly, president of the bank, and J. Cooper Mason, general manager, of the bank. Mr. Mason died soon after the return was made.

"Acting under the advice of the department of justice, an officer of the finance department, who proceeded to Toronto for this purpose, has this day laid information before a magistrate and a warrant has been issued for the arrest of President Daly.
ing thre yar'

"These proceedings are taken under ment will call for action against other parties is a question to be considered in due course. As a matter of course, any lagal proceedings will be taken under the advice of the department of justice."

Condensed, But Clear

A message from the railroad section foreman to the road master said: No. 6 did not whistle, send me new hand car."

Stimulate Your Skin

The skin with its network of tiny pores and glands should never be allowed to become sluggish and inactive. Dirt, cold cream, rouge and powder will clog the pores, enlarge them and produce blackheads and blemishes unless the skin is cleansed thoroughly with soap and water at least once every day.

This simple method of beautifying was Cleopatra's secret. She knew that to have a fresh fine skin thorough cleansing was necessary. She used Palm and Olive oils, the same rare oils which are blended in Palmolive.

If you use a fine mild soap, there is no danger of irritation. Palmolive with its creamy lather, is lotion-like in its action. It freshens, revives and stimulates and leaves the skin delightfully fresh and rosy.

You can buy Palmolive Soap at all first-class dealers.

Palm and Olive Oils —nothing else—give nature's green color to Palmolive Soap.

HIGH-PRICED SKILL

By Walt Mason

The surgeon charged five hundred bones for delving in my anguished frame; "Great Scot," I cried, in wrathful tones, "why do you play such sinful games? It only took a little while to amputate that priceless wen, to ply your bucksaw and your file, and sew my system up again." "The time it took me cuts no ice," the sawbones said; "that is my bill; I did the work desired, my price is based upon my hard won skill. For years I studied day and night when other youths were out a play, that I might wield the scalpel right, and slice my patrons' wens away." "I never viewed the matter thus," I said, with something of remorse; "I'll pay you with no further fuss — here is my cheque, which you'll endorse." "This cheque is for a hundred bucks," exclaimed the surgeon in a trice; "Now by Sts. Calomel and Nux, I said five hundred is my price." "The signature upon many sleepless nights; I practiced it that cheque," I said, "has caused me for years, by heck, before I got it dead to rights. When others trotted with the fox or bunnyhugged the night away, I toiled with pencils, pens and chalk, to make my signature O. K. I do not charge you for the ink, although it's of a costly blue, but for my wizard skill, I think, I ought to have a rake-off too."

It's Just Perfect with fruits and cereals

BECAUSE of its creamy flavor and richness (double that of whole milk), Carnation Milk is, as users write, "just perfect with fruits and cereals."

Carnation is just 100 per cent cows' milk with part of its natural water removed by evaporation to reduce the bulk and give you doubly-rich milk in convenient-sized containers. Nothing is added, not even sugar. Thus it creams coffee, cocoa, fruits, vegetables, cereals, gravies, etc., perfectly.

Order a supply of Carnation with your groceries today. Prove for yourself that Carnation is your safest, most dependable, economical Pure Milk Service.

MADE IN CANADA

Carnation Milk

100 per cent milk —"from Contented Cows"

THE FRIENDLY SMILE AND CHEERFUL GREETING WELL WORTH CULTIVATING.

In town boosting cheerfulness and cordiality have an important part. Too often people permit business cares and worries to cause them to forget the stranger within the gates and the friend who passes by. Many a man has gained a reputation for grouchiness who merely has not thought to be cordial. A smile carries one much farther than a frown. The visitor is favorably impressed if the people he sees on the streets are cheerful and smiling. He at once gains the impression that it must be a good town which has cheerful people.

The visitor naturally thinks that a city which offers welcome in so conspicuous a way means it. If the people he meets smile and are cheerful he at once realies that they are a people worth while and the town one worth looking over. The cordial greeting with an accompanying smile of welcome, helps more than anything else to give people a good impression of a place. The smile attracts and the frown repels. Grouchiness gains nothing for a person. Most people would prefer even the "Cheerful Idiot" to the "Chronic Grouch."

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

FROM COAST TO COAST

When and army flier made the distance from Atlantic to Pacific in one hop, taking only a little more than an entire day, and when another beginning as the sun arose over Long Island failed of landing beside the Pacific before sundown of the same day only because of a minor accident a few hundred miles from his goal, when the sun was still high in the heavens, the question of bringing San Francisco and New York into substantially twenty-four hours of each other was definitely and finally settled.

A daily mail between New York and San Francisco, arriving only about a day later, will be worth all it costs to the business interests of the country. It will be worth the vast outlay for 500,000,000 candle-power beacons, and the lesser lights installed to guide the fliers at night. It is the natural, the logical and the splendid refinement of that wonder of twenty-five years ago, the rural free delivery.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

DAZZLING AUTO HEADLIGHTS

Driving into the dazzling lights of an oncoming car is dangerous business—dangerous alike to the dazzler and the dazzled. And it is so unnecessary. To dim the lights of a car is so simple, and easy a task, that it seems that the danger involved by not doing so would compel the motorist approaching another car at night to take this simple precaution against the possibility of accident to his own car as well as the cars of others. It should not take a law to bring about the dimming of headlights. Common decency demands that a motorist practice this simple rule of night driving etiquette, for it is etiquette, and good manners are just as essential on the road as in the ballroom.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

MUST WORK TOGETHER

No town can grow up as it should unless its people work together in its upbuilding. The history of every town that has had rapid substantial growth will show that united and enthusiastic work of its people had the greatest part in making it grow. In towns where a few live men boost and work the town's upbuilding and many are indifferent and do nothing, the work of city building is exceedingly difficult and the results slow in coming. If all boost and help to build up the town it is an easy matter to make the town push forward.

John Billings, of Vancouver, was in the city several days last week.

You will save money if you buy your lumber at the new lumber yard opposite the Baptist Church. Phone 71.

Paul Albo has gone into partnership with Ross Colgur and has moved his stock into the Colgur store.

The British Columbia Court of Appeal has decided in the test case of the B. C. Veterans Weekly that football guessing contests are illegal.

Rummage Sale in I. O. O. F. Hall, Saturday, October 6, consisting of coats, dresses, suits, men's suits, children's clothing.

Those who wish to take up golf may play for the remainder of this season for $3.00. This applies to new members only and not to those who were members last year.

Two Fernie dancers were successful in entering the prize winning lists in the dancing competitions held, in connection with the Trail Caledonian Games last week. Nellie Walker won the medals for the Shean Trews, the Sword Dance, the Sailors' Hornpipe and a special. Tina Thomson won a medal for the Shean Trews.

o

OSWALD-CLOWES

On Thursday, September 27, the Rev. H. U. Oswald, of Christ Church, Fernie, B.C., and Alice Ethel Clowes, of Fredericton, New Brunswick, were married at Christ Church, Macleod, Alta., by the Rev. W. J. Merrich. The Rev. A. Garlick and Mrs. Garlick, of Michel, and Misses Ruth and Joan Peake, of Fredericton, were present at the ceremony.

Shortly after the wedding the Rev. H. U. Oswald and Mrs. Oswald departed for Banff where they hope to parted for Banff wher they spent a week, arriving in Fernie yesterday.

The Misses Ruth and Joan Peake have arrived in Fernie and intend to make their home at Christ Church Rectory.

o

BRIGADIER COOMBS VISITS FERNIE S. A. CORPS TUESDAY

The Harvest Festival at the Salvation Army was held on Monday last with a grand sale of fruit and produce and was a very successful affair. The officers wish to thank all who helped to make it such a success.

On Tuesday evening, Brigadier and Mrs. Coombs, Divisional Officers, of Vancouver; also the Officers from Cranbrook paid the Fernie Corps a visit.

Following a beautiful lesson on the Cross all present sat down to a light repast, a welcome for the first visit of Mrs. Coombs to Fernie; also a farewell to our two comrades, Candidate Littley, of the K. T. L. staff, who will be leaving in the near future for Training College, at Winnipeg, and Lieut. Grainger, who is taking another appointment in the Army field shortly. During the evening, Brigadier Coombs made a presentation of a Portfolio to Candidate Littley and a Lose Leaf Note Book to Lieut. Grainger. On Sunday, October 7th, Lieut. Grainger and Candidate Littley will conduct their farewell services. Everybody is cordially invited to these services.

LOCAL & GENERAL

Wm. Eschwig ,of Brant, Alta., was in city yesterday.

Come to the Afternoon Tea in the I. O. O. F. Hall, Saturday, Oct. 6.

Mrs. Mowatt and Mrs. Morris, of Coal Creek, left for Vancouver on Saturday.

A large number of people from Fernie attended a dance at Coal Creek on Friday evening.

Mrs. (Dr.) Corsan and Miss Jean, left on Wednesday evening for a holiday trip to Montreal.

For expert developing and finishing bring your films to Barton's Music Store.

The regular meeting of the Ancient Order of Foresters will be held in the I. O. O. F. Hall, on Friday, Oct. 12, at 8 o'clock.

Don't forget the social and dance in the Catholic Hall on Friday, Oct. 5. Cards from 9 to 10:30. Dancing from 11 to 1. Admission 50c.

David Gash, of Burton City, is in town today. Dave is looking fine and seems to have prospered in the farming business.

The Ladies' Golf Club will pull off a novelty competition and tea on Wednesday afternoon at 2.30. Draws will be posted.

Rev. Father Welch, of St. Eugene Mission, occupied the pulpit of the R. C. Church on Sunday. He was a Fernie visitor all week.

The W.A. G.W.V.A. will hold a cake and apron sale in the Vets quarters, Baker Ave., Saturday, Oct. 20. There will be various side line offered. Do not forget the date.

Don't forget the Moose dance in Victoria Hall on Tuesday, October 9. Dancing 10 p.m. to 3 a.m. Whitehouse couple, extra lady 50c.

Iron Chamberlain, who claims to be the champion welter weight wrestler of Idaho and whose present address is Worley, Idaho, wishes to challenge Rayner, of Fernie, for a match. He is willing to deposit a forfeit at anytime.

Philip Carosella was unfortunate enough on Sunday last to have his car wrecked and his collar bone broken in an accident which took place at Cokato. The driver of the car had dropped the ignition key on the floor and was groping around for it when the boat ran into the ditch.

Phil. Sheffield, representing the B. C. University, is making an investigation into the life of the late Michael Phillips, the first white pioneer of the Tobacco Plains country. On Monday Mr. Sheffield visited the home of Mrs. W. Parnell, daughter of the late Mr. Phillips, and unearthed several valuable documents and writings which will greatly assist the University authorities in compiling a history of Mr. Phillips and his pioneer work in Southern British Columbia.

Engineer Bratten, who is in charge of the operations at Elko for the East Kootenay Power Co., was the leading speaker at the Rotary Luncheon yesterday. He told of the work in detail and the difficulties encountered which had caused a delay of several weeks in the completion of the undertaking. The tunnel, which is 2200 feet long is within 450 feet of completion and this will probably be finished in November. The present power plant at Bull River is taxed to capacity to carry the present load and the demand for further power is increasing every day. When the Elko project is completed it will add 6000 horsepower to the output. A complete duplicate line is being built all over the system to be used in case of emergency.

Fernie lost another of its old and respected citizens early last Monday morning, when Mrs. Mary Cavanaugh, wife of W. C. (Dad) Cavanaugh, passed away after being confined to bed for a week. Mrs. Cavanaugh, who came to Fernie with her husband twenty-one years ago, has been in poor health for a considerable time, suffering from a lingering illness. The body was escorted to the Great Northern station from the Roman Northern depot from the R.C. Church by the K. of C. and a large number of Fernie citizens paying their final tribute to their departed sister, before the remains were entrained for St. Paul, Minn., where the funeral will be held. Her husband and adopted daughter, Mrs. Good, accompanied the body.

Sale of Home Cooking in the I. O. O. F. Hall, Saturday, Oct. 6.

The pupils of the Coal Creek Public School contributed $26.75 towards the Japanese Relief Fund.

Born, at Fernie, B.C., on Oct. 5, to Mr. and Mrs. W. E. Turner, of Crows Nest, B.C., a daughter.

Miss Blanche Labelle, of Kalispell, Mont., was in the city during the week.

J. F. Spalding is away visiting the different cities represented in the Tourist Association.

Carl Dahl, of the Vancouver Province staff, who was in the city for about a week, left on Wednesday for home.

Rummage Sale of ladies suits, coats, dresses, children's clothing men's suits; also sale of home cooking. Afternoon Tea served.

Dr. Parks and Harry Fuller climbed up to the cave in Mt. Hosmer on Sunday last. They report that the trip, alhtough somewhat hazardous, was worth the trouble.

Don't forget the popular Saturday night dances given by the 150 All Sports Gym. Ingram's orchestra. Admission: Ladies, free; Gents, 25c; 10c per dance. Come up tomorrow night and have a good time.

Commencing Monday, Oct. 8, the water will be shut off from the whole city for the whole day and for each day during the week. It is expected that water will be turned on each evening.

A committee is around canvassing the Pastors of the various Churches in the city, with a view of dispensing with the morning services on November 11 and to join the G. W. V. A. in joint service.

The sidewalks on Howland Avenue north are in a very dangerous condition and the residents in that section are complaining bitterly that nothing is being done to relieve the situation.

The Right Rev. the Bishop of Kootenay will hold Confirmation in Christ Church, Fernie, on Thursday, Oct. 11, at 8 p.m. On Friday, Oct. 12, at 8 p.m., the Bishops of Montreal and Kootenay will hold a visitation of the of the parish.

In accordance with the keeping up of Armistice Day, the local G. W. V. A. will hold their annual parade and service on Sunday, November 11, at 11 a.m. Immediately following the service the parade will reform and proceed to the Cemetery for the unveiling of the Cenotaph erected in the Soldiers' Plot.

Denial of rumors that she contemplated suing the estate of Emilo Picarillo for $50,000 for the death of her husband has been given by Mrs. Margaret Lawson, widow of the Alberta provincial constable, for whose death Picarillo and Mrs. Florence Lassandra were hanged some months ago. Mrs. Lawson, who, with her two children, have gone to reside in Vancouver, said she "would not touch Picarillo's money."

The Whiteney Boys Chorus, of Portland, Ore., which gave two fine concerts in the city on Saturday and Monday evenings, was a rare treat for the people of Fernie. The example of what can be done in the way of training boys' voices is having a good effect here as a movement has already been started to secure some kind of musical instruction in the Public Schools.

W. R. Ross and James Falconer returned from a trip into the Flathead country where they looked over the recent oil developments in the valley. Mr. Falconer is very enthusiastic over his observations. He says that if oil seepage is any indication of an oil field, the Flathead valley must certainly be that field. Oil and gas can be plainly seen bubbling up in a dozen different places. The present well is down some 2300 feet and they have struck oil, but the drillers say that if they go down another three hundred feet they will have a real gusher.

The annual shower for the Sisters of Holy Family Convent under the auspices of the Catholic Women's League was held in the Parish Hall on Thursday evening. Rev. Father Kennedy acted as chairman and in a brief address in the first place assured the Sisters of the whole-hearted support of the women of the parish at all times and also congratulated the Catholic Women's League as representing the elite of Catholic women throughout Canada from the standpoint of ability, education and goodwill. Mrs. Beard and Mrs. Turner favored with vocal solos. Miss Charlebois presided at the piano.

DIFFER AS TO ISLAND COAL

"It seems to be the custom in this country to believe in inconceivable wealth in minerals, regardless of evidence to the contrary," says Mr. C. M. Campbell, manager at Cassidys of the Granby Consolidated Mining Company, in a communication to The Colonist, in which he draws attention to an article, written by him, on "The Mackenzie Report on Southern Vancouver Island Coal Reserves," published in the September 7 issue of the Canadian Mining Journal.

The article, which is in agreement with and defence of the views of the late Mr. J. D. Mackenzie, reaches the conclusion that the coal reserves of Vancouver Island have been overestimated. Mr. Campbell quotes from Mr. Mackenzie: "It is necessary, in the interests of national economy, that the amount of coal available for present and future use be ascertained with some precision."

The article is as follows:

The Geological Survey, on June 1 last, published the report of the late J. D. Mackenzie dealing with the coal resources in the southern part of Vancouver Island. Mr. Mackenzie announced his conclusions last Fall; his report has now been published for some time; it deals with an extremely important matter, yet it has been ignored not only by the public but also by the technical press.

The industrial supremacy of the countries about the North Atlantic is in a large measure due to their possession, at or near tide-water, of large deposits of coal. There are no deposits of coal of real importance along the American North Pacific. Coal is found in Washington State, but it is limited in tonnage and costly to prepare. Coals from the interior are subject to a $4 to $6 per ton freight handicap. In Canada the same is the case in regard to Alberta coal. It would therefore appear that the coal on Vancouver Island, where it outcrops along the protected side of the Island, where climatic conditions are very favorable and where there is a large tributary population, should give the Island a great advantage in industrial matters. Vancouver Island coal has undoubtedly been of great importance to British Columbia in the past and will continue to be of great importance for some time longer. Why it is not likely to be of the supreme importance that previous official articles would indicate, is dealt with in the Mackenzie report.

It appears that coal was known to the Indians in the early days and that Dr. W. F. Tolmie, in 1835, was the first to make its existence known publicly. Coal was located at Nanaimo in 1850 and mining was started in 1852. Until 1861 operations were in the hands of the Hudson's Bay Company and the market was in San Francisco, where coal sold for $28 a ton. Since then mining has been carried on by different companies continuously and the present output from Island mines amounts to 1,700,000 tons per year.

The Geological Survey did some of its first work in British Columbia on the Island. James Richardson began in 1871 an investigation of the coal measures that lasted, with interruptions for five years. He examined the coast line from the head of Comox harbor to Victoria. In this area he found that a series of rocks, 100 miles in length and extending from Brown River to the Saanich Peninsula, contained coal seams of various thicknesses at different points. The conclusion was then made that these seams were continuous throughout the greater part of the area and this area was therefore represented on his map as "Productive Coal Measures." Under the circumstances it was easy to believe nearly anything in regard to the unlimited nature of the coal reserves of Vancouver Island. Richardson is praised for the patience and persistency with which he carried on his work. Exception, however, is taken, to his conclusions.

Richardson's area has, for convenience, been subdivided into the Comox, Nanaimo, Gulf Islands and Cowichan areas, and his report was followed in 1913 by a detailed and interesting report by Clapp dealing particularly with the Nanaimo area. Clapp also did some work in the Cowichan area. Mr. Mackenzie's report also mentions the Alberni area, but as its possibilities are very slight it will not be further referred to.

According to Mr. Mackenzie's narative, "Clapp includes coal seams of the thickness of 1 foot or over to a depth of 4000 feet, and arrives at a conservative estimate of 1,340,000,000 long tons." This means, according to a popular method of interpreting these figures to the public, roughly 1,000 times the present total annual production. Mr. Mackenzies's comment is that "Clapp's estimate of a very large tonnage for a relatively small part of this area has further strengthened the belief in the enormous coal reserves of the Island."

Both Richardson and Clapp arrived at their conclusions mainly by induction. This is the method employed in Canada by our Men of Vision in arriving at their facts. These are the men who possess that quality known as "Unconquerable Canadian Optimism." Anybody not blindly following this method is branded as a pessimist, a sort of an outcast, and is about as welcome in Canadian mining life as was Mr. Blotton in the enlightened circle of the Pickwick Club.

Mr. Mackenzie, unfortunately for his reputation, chose to follow the methods adopted by that "ill-conditioned and presumptuous" Blotton. He was not satisfied with the beautiful sets of figrues used by the Orthodox, and, as the different areas have been well opened up for years, he insisted on going below, investigating records of drill holes and interviewing mine officials. In particular he acknowledges the influence of Mr. Thomas Graham, ex-Chief Inspector of Mines for British Columbia, and now general superintendent of the Canadian Collieries (Dunsmuir) Ltd.

He found that it is not at present practicable to mine seams of less than 3 feet in thickness. In this connection a recent investigation by the writer may be worth recording. It is to the effect that seams 1 ft. thick do not appear to be limited anywhere. In England seams as thin as about 15 inches have been mined and seams 1 ft. thick might be mined, providing the coal is of first-class lump grade, breaks away easily and has a fire-clay floor which can be used as a by-product and in which an undercut can be made cheaply. None of these conditions exist on the island and, incidentally, they exist in very few other places.

It was also found that 2000 ft. was about the greatest depth in this area to which mining can now be prosecuted economically. Many other handicaps were also noticed and to quote from the report we find that "the coal in the ground and the coal that a mine may be reasonably expected to produce are not the same. There are always losses, sometimes considerable losses, incidental to mining. A certain amount of coal is left in pillars that are too thick to remove, or that have been crushed by later movements of the strata after the surrounding coal was extracted. Every coal miner on Vancouver Island is only too familiar with the "rolls" and "pinches" that make the extraction of coal from certain areas of the mines impracticable, if indeed the movements of the overlying rocks have left any coal in these thin places. Some areas are so broken by faults that economical extraction is impossible. In one district knobs of the underlying, barren, pre-Cretaceous rocks project through certain parts of the seam. These knobs not only form areas of no value in themselves but by their effect on the seam as it approaches these old shore-lines interfere with the placing of haulage roads and ventilation. Considerable areas of coal may be lost by mine fires, by excessive gas, water, or by other causes. It is no exaggeration to state that, over considerable areas of some Vancouver Island mines, barely 50 per cent. of the coal actually in the ground has been extracted, because of conditions quite beyond the control of the operators."

Further on in the report he also says: "Of the coal mined no insignificant percentage is lost in preparation for the market and in marketing. This extraction factor varies in the different areas, and event between different mines in the same area, so that it cannot be applied readily in a general estimate such as the present one. It is of most vital importance to the coal operator, however, and should be kept in mind by those interested in our future available coal reserves."

We are now in a position to consider what tonnage Mr. Mackenzie found as a result of his investigations. He claims that in the Nanaimo area the amount of "actual" coal, 3 ft. or more thick, and less than 2000 ft. deep, is limited to only 34,070,000 tons. After an extraction factor is applied it will be seen that the assured life to the mines is extremely limited. The corresponding figure for "probable" coal he places at 67,220,000 tons. In order to make a comparison with Clapp's figures he also includes thin and deep coal and every other possiblity and yet all this only makes a total of 286,934,000 tons or 21 per cent. of the total given by Clapp.

His findings for the other districts are even more sensational. The big total given in "The Coal Resources of the World" for the Comix district, which is mainly "possible" coal, he finds to be 600 per cent. too large. This district has only 18,900,000 tons of "probable" coal. Its "possible" coal above 2000 feet depth and over 3 feet thick amounts to 245,230,000 tons.

The possibilities of coal in the Gulf Islands and Cowichan areas have also been studied in detail. For the former he considers it so improbable that no estimate for their content is made. For the latter he concludes that it "is not considered a possible source of commercial coal." In regard to the Cowichan area it does not seem clear why it ever was included in the "productive" class. Richardson himself says that 'the' evidence does not favor the probability of the existence of workable seams of coal in this area." This conclusion was later agreed to by Clapp.

There has been a great deal of what Mr. Blotton would call "humbug" written in regard to our coal reserves. Not only do our eminent authorities add up "actual," "probable" and "possible" estimates as prepared by the Survey and announce to the public that the total represents our coal reserves, but, if Mr. Mackenzie's figures are correct, it is evident that some of our own geologists have, at times, announced conclusions that were very wide of the mark. The publication of the Mackenzie report is evidence of a laudable desire to correct errors as soon as they are apparent.

The quotation at the head of this article outlines a new procedure inasmuch as it calls for the recognition of the factors of availablity and precision in any coal estimate. What is the object of telling the public that we have certain huge tonnages and suppressing the fact that only a very limited percentage of these tonnages can be recovered? There is also no occasion for haste in regard to the estimation of our ultimate coal reserves. Until we are sure that an area is going to be productive it should not be designated. It is not going to hurt us to leave some resources for the coming generations to find. We are leaving them enough debts; let us refrain from including a false statement of our assets.

This heavy reduction in the estimates of our coal resources at a point where they would be of great advantage is a big disappointment. The difference between the figures is so great that one naturally asks if it is possible that similar correction will have to be applied to the published reserves of other fields. The advisability of checking up other figures has, however, doubtless occurred to the officials of the Geological Society.

o

TO ENCOURAGE THE TOURISTS

The merchants of Victoria have found such a decided benefit this year accruing from the tourist traffic that special efforts are being put forth through the Victoria Chamber of Commerce to increase this business. A communication has been sent to the different boards of Trade as follows:

"The merchants of this city have found such a decided benefit this year, accruing from the tourist business that they feel additional efforts should be put forth to secure and increase this business. Believing that all portions of the province will benefit, a suggested plan is outlined in the enclosed petition, which we would ask you to carefully peruse.

"The petition is being circulated amongst the Boards of Trade only, as it is wished to have a direct expression of the views of the business men of the province. It the petition meets with the approval of your board we would be glad if you would have it signed and returned to this Chamber, when it will be presented in due course."

The petition, which was enclosed with the letter set forth the following facts:

"To the Honorable Premier Oliver, and Members of the Executive Council of B. C.:

"Whereas it is generally recognized and appreciated that British Columbia is in need of additional settlement and the investment of further capital in our varied industries.

"And whereas it has been established that the tourist business is not only profitable in itself but is a most important factor in procuring settlement and capital, it being the experience of the Pacific Coast states that a large portion of those visiting there eventually settle or invest.

"And whereas those states, having the most experience of the advantages of tourist travel, are now increasing their expenditure for advertising, good roads, and the general accommodation of the tourist.

"And whereas the undersigned believes that the scenic, climatic and business advantages of British Columbia are unsurpassed.

"And whereas there is no central clearing house for the dissemination of advertising matter, nor for communicating to the incoming tourist the many beauty spots throughout the whole of the province.

"And whereas sound policy would direct that in addition to having the tourist here that steps be taken to have him see as much of the province as possible.

"And whereas there is now established in this province an information bureau, capable of expansion.

"And whereas it is advisable to coordinate throughout and secure the co-operation of people throughout the whole province.

"Now your petitioners do respectfully represent that it would be of advantage to establish with and as a part of the expanded information bureau, which would be composed of men representative of the different portions of the province, acting in an honorary capacity, and whose functions would be:

(a) To receive information from various portions of the province as to the offerings and requirements in each district.

(b) The distribution and publication of such material as they think advisable to make known the advantages of the different parts of the province.

(d) To act in an advisary capacity in connection with steps to be taken to make known the possibilities of the different parts of the province.

(e) To map out tourist routes and affording in this connection such information as to attractions, accommodations and conditions as will be of assistance to tourists.

(f) To secure the co-operation of the different parts of the province in a provincial line of tourist accommodation.

(g) To advertise in connection with the tourist business the industrial and other opportunities available in the province."

o

UNSOLVED MYSTERIES— THE GOLD OF THE SPANISH

Between the western highlands of Scotland and the Hebrides Islands lies the large island of Mull, in which the Bay of Tobermory makes a deep indentation. It was into this bay that there sailed on September 12, 1588, several galleons which formed a part of the ill-fated Spanish armada. Many of the other ships had been blown ashore on the Irish Coast, while the surviving remnant of the flotilla made a vain attempt to escape homeward.

But the galleon Florencia, with several others, dropped anchor in Tobermory Bay and went down in the deep waters, carrying with them a huge treasure of gold and plate which has defied location for more than three and a half centuries.

The Florencia was said to have carried the paymaster's chests for the armada and to have taken with her when she sank 30,000,000 ducats in money and much church plate of fabulous value. Even if these reports are exaggerated, it is certain that she was one of the largest galleons in the fleet and that she never returned to Spain.

The first real attempt to recover any of the treasure was made in 1641, and in 1666 divers located the hull of the vessel and succeeded in making a chart showing its exact bearings with respect to two landmarks on either side of the bay. This ancient chart of the "Spanish wreck" as it is termed, is still in possession of the present Duke of Argyle, and has been used by many modern treasure-seekers. But even with the aid of this document, those who attempt to recover a portion of the lost treasure have been baffled by the fact that the Florencia appear to have sunk so deep into the soft silt at the bottom of the bay that all traces of her timbers have been lost.

The most successful attempt to locate the vast amount of money which the Florencia took down with her was made in 1740, when John, the second Duke of Argyle, employed a diving-bell and succeeded in bringing a magnificent bronze cannon to the surface. At the same time a number of gold and silver coins were found by the divers and the treasure-seekers were greatly encouraged by this. But in spite of the great advances in diving apparatus and the fact that an expert search was conducted for more than five years during the early part of the present century, practically every ducat and every piece of plate that went down with the Florencia remains still hidden somewhere along the floor of Tobermory Bay.

FOR sister's party be sure you have a chocolate cake. Even if the cake itself is simple, the dainty coating of FRY'S Baking Chocolate Icing will make it quite distinguished, and irresistibly delicious to everyone.

FRY'S Baking Chocolate is very simply and easily prepared because it is in fine powder form, ready for immediate use. Its purity is absolute and its flavour exclusive and delicious—because it is a FRY product. Of course, remember

"Nothing will do but FRY'S"

COAST ITEMS

Victoria, Oct. 3.—Beer is again in the spotlight of public attention. From the mainland there has come widely signed petitions asking that beer by the glass be put within the reach of workingmen who, while legally able to purchase beer, have to go to clubs or take home a huge parcel from the government liquor stores. As it is now, the beer clubs are doing a roaring business but at an excessive price, twenty-five cents a bottle. This it is contended increases the consumption of hard liquor and also works to the detriment of the British Columbia brewing industry. As the announcement was made at the week-end that further legislation for the control of beer clubs is contemplated, it is thought possible that the claims of the standard hotels for beer by the glass may be considered.

Vancouver — British Columbia is regarded as the El Dorado or land of Gold and dreams in Uncle Samland. The Chamber of Mines has received letters from nineteen States within the past week. President F. E. Woodside has just received a letter from a society woman in Washington, D. C.—a Mrs. Ella Spencer Gates —who says she needs the open air life and would dig gold in Vancouver. Other letters include application from two young teachers of Scranton, Pa., who also wish to engage in mining because it "is so different from the effete schoolroom." Two sisters from Hancock, N.Y., ask for jobs in the Grant Mahood mines on the Portland Canal, while from Penrith, Cumberland, comes the application of a family that writes: "Father used to mine but is old, although has money. Our two girls are willing to work in the B. C. gold mines, and our three young sons also wish to become miners and share your great riches in British Columbia." The Chamber of Mines receives an average of 200 enquiries every month. Secretary Browning answers them all.

Vancouver — Nothing but the steel interests of the U. S. is halting the establishment of a great steel industry in B. C. This fact was demonstrated at a recent conference in Victoria. At this gathering, Henry J. Landhal, managing director of the corporation, who has devoted years and a fortune to the work, addressed the meeting with facts for over four hours. His proofs were gripping and admitted of no contradiction. Apparently, the main opposition came from one man present—a representative of the U. S. Steel interests. While this has been known for a long time past, this was apparently the first gathering wherein a representative of eastern steel has openly come forward, to frustrate the work of founding the industry in this province. Landahl said: "The Spectacle of Eastern Canadian Manufacturers' Association, of Eastern Canadian Mining Institutes now attacking Coast Steel Range is not pleasant to behold, and all know behind these bodies are U. S. Steel and manufacturing niterests, so it merely simmers down to a fight between foreign dominance of B. C.'s natural resources and manufacturing establishments. When these foreign interests send their representatives to sit on Boards of Trade all over Canada, and there learn all that is going on, what can we do about it—nothing. But these representatives lie about our situation. Then we can protest.

Supporters of this industry point out the necessity for Government association, rather than its control and operation by a private corporation. In the hands of a private company, the "Pittsburg Plus" interests would balk it to the limit, by underselling every other subterfuge within the means of that octopus corporation, and the products would remain unsold, so long as they were made in B. C. Hence the need of Government association and support. The plan is for B. C. to assume one third of the debentures of $4,000,000, the remainder being obligated by the Dominion and Home Governments which have expressed willingness to do their share. It has been also pointed out that it would be the best kind of good business for B. C. to guarantee these debentures and have $15,000,000 brought in for the founding of the greatest steel and iron plant in the British Empire.

Despite the desperate fight put up by Eastern interests that fear the loss of Western Canada's steel and iron trade, the Coast Range project is stepping over every obstacle that is hurled in its path by open and hidden foes.

The biggest iron masters of Great Britain have evinced their willingness to support the blast furnace project for B. C., and important meetings have been held in London in recent days.

Vancouver — Instead of being a distinguished patrician of ancient Spanish lineage, the spouse of Mrs. Therese Grant Urquhart proved to be of negro blood, after investigation was made into his antecedents. It was proven that his grandfather was a full-blooded negro of New Orleans, and was a slave. The husband, a musician, learned Spanish as a soldier in the Phillipines under Uncle Sam. The couple were married in a runaway match in Seattle four months ago. The bride is pretty and young. Now she wants a divorce. The case will go by default, unless the marriage is annulled. Young Urquhart cut quite a swath in local social circles. He has the appearance of a Latin.

Vancouver — Vancouver will have no welcome for the jobless who annually drift into town for the Winter. This year they will be shooed away, with the choice of working on the public highways for their board and tobacco, or getting run out of town. The other alternative is the rockpile with convictions of vagrancy. Notices to this effect are being sent to the prairies and to the coast cities of the States.

Vancouver — With rare beauty and an expression of ineffable tenderness and wistful patience, Miss Alecia Watterson, only child of Mr. and Mrs. Samuel Watterson of the Fraser Valley, has aroused the interest of visiting motion picture people who declare she is a perfect type. The girl is 19 and is a gifted violiniste. She has been blind from birth, but her eyes show no indication beyond their fixity of expression. Her parents are in comfortable circumstances and will not permit the girl to enter the film profession.

Take BEECHAM'S PILLS for Constipation

TO ENCOURAGE IMMIGRATION

Chicago, Sept 29.—That the real motive behind the American visit of the Prince of Wales is to encourage immigration from England to Canada, thus relieving the Old Country of her surplus population while increasing the stock of Anglo-Saxon blood on the American continent, is the surmise advanced by Bert E. Collyer, publisher and gentleman sportsman, recently returned from a protracted visit in the Dominion.

Writing editorially in his own newspapers, Collyer's Eye and The Referee, Mr. Collyer says:

"Behind the sojourn on a ranch in Alberta, Canada, of the future King of Great Britain, is doubtless a political motive of the greatest importance to the English-speaking peoples on both sides of the big water. At the root is England's teeming population, always even in normal times excessive in comparison wit hacerage and power of self-support without outside supplies, but at the present time, with England's foreign trade seriously disarranged by unsatisfactory credits chaotic conditions on the continent, actually distressing. Confronted with the problem of obtaining relief from surplus population, England has turned hopefully to her territory in North America. During the August harvesting in Canada herculean efforts were made to induce workers to ship from England with the hope that many, finding the gardens of their dreams in the New World, would remain as permanent settlers. Successful in part at least, this movement did not go sufficiently far to effect the complete remedy that is necessary. Now comes the Princes of Wales — as "Lord Renfrew," travelling incognito, as did his beloved grand-dad, the late King Edward, years ago—and settles down at Edward Prince Range at High River, Alberta, for a long stay. The Englishmen, at home, reading of the keen enjoyment that the Prince finds in the healthy climate and wholesome envoirnment of Canada is quite likely to reason that what is good for the future King of England must certainly be good enough for the commoner. Thus the movement from crowded England to the broad spaces of the Dominion may set in with a vim and vigor impossible to have been achieved by any less pretentious means. In aiding and abetting this policy—if our surmise be correct and this is the real motive for the present visit—"Lord Renfrew" is indeed rendering a genuine service not only to Great Britain but to the cause of civilization itself. Certainly the transplanting in goodly quantities of the Anglo-Saxon blood of old England on the American continent will bring in calculable benefits to this side of the Atlantic while, by relieving the other side of its surplus population, will make for a more wholesome development of the lives of those that remain. But, whatever the motive, we are sincerely glad that "Lord Renfrew" is with us. No member of royalty has so captured the heart of America since the days of his grandfather's youth."

o

The dignified member of the Imperial House of Commons received a shock the other day when the Scottish Communist member appeared without a collar, tie, collar button or vest, and his shirt unbuttoned and open at the neck. The demonstration of shirt-sleeve diplomacy and "open covenants openly arrived at" caused a mild sensation.

Anthracite coal from Hudson's Hope first reached the markets when a shipment of forty-six tons was delivered by scow to the C. P .R. for fuel in the company's locomotives on the E. D. & B. C.

To the Untold Legion of 1923 Victory Bond holders

What are you going to do—?

Canada wants you to renew your investment for another 20 years.

You know you've had a good investment.

You know your security is right.

You know your interest has been paid with unfailing regularity.

Remember you get two weeks' interest as a bonus, and to repeat—your security ranks equally with Victory Bonds.

Will you renew your investment?—Will you exchange your Bonds?

If so—do it quickly—please. Don't wait till the last minute. The privilege may be withdrawn.

Dominion of Canada
Refunding Loan 1923
5% Bonds
20 Year Bonds due 15th October, 1943

Price: 20 Year Bonds 98.25 and interest, yielding 5.14%.

Orders may be telegraphed or telephoned (collect) and exchanges made through your usual Bond Dealer or Bank.

Fourfold Protection for a Family Man

THE Mutual Life of Canada has acquired an experience of over half a century of life insurance. It has studied the results of thousands and thousands of policies. Our experience convinces us that for the average family man the most useful and economical form of insurance is the profit-participating, long-term, endowment policy. This policy matures at a specified advanced age, but is of course payable at prior death if that age be not attained.

Annual dividends are paid to holders of these policies and results will surprise those who have not realized what Mutual profit-participation can accomplish towards lessening the cost of life insurance. On some of these long-term endowment policies, taken out in youth, policyholders at maturity have actually received in cash 100% more than they have deposited with the Company as premiums!

This form of insurance provides against both premature death and helpless old age.

Accident and Disability Clauses

For a small additional premium, the Company will add the provision that should the assured at any time be overtaken by total permanent disability no further premiums shall be payable, and furthermore, the Company will pay the assured a monthly income during the continuance of total disability. And if desired a still further privilege may be secured—namely, a double indemnity in the event of death by accident—that is, the Company will pay double the face value of the policy.

Mutual Long-Term Endowment thus furnishes fourfold insurance protection—first against death, second against old age, third against disability, and fourth against accident. At the same time profits so reduce the cost of insurance as to make this policy an investment yielding not only all that it costs, but all the way from 25 to 100% more according to age and length of the endowment term.

Fill in and mail the coupon below and we will send you particulars about this policy.

Heaters—
Be prepared for winter's cold—get a McClary Hot Blast Heater, fitted with brick linings—or a cheaper heater fitted with a cast-iron firepot—all at best prices.

MICHEL LOST TO CALGARY CALLIES IN BENNETT SHIELD

MICHEL, Sept. 30.—Saturday afternoon the Calgary Callies played Michel here for the Bennett Shield, and after a hard-fought game with half an hour overtime, defeated Michel three totwo.

The Callies were much the heavier team and took advantage of every opportunity, especially on the breakaway, as they scored their first goal eight minutes after the start of the game, Michel equalizing before halftime, Yates doing the trick. Halftime score, 1-1.

Three minutes after half-time the Callies scored again, and near the end H. Travis, of Michel, evened it up, making it two-all.

In the overtime play, after seven minutes of strenuous work, a Callie forward secured the ball from the wing and carried it into the net on his chest, giving Dawe no chance to save. Michel tried hard but could not equalize, the result being 3-2 in favor of the Callies.

The game was one of the best, cleanest and hard fought seen on the local ground, but the greater weight and experience of the Callies in seizing the slightest opportunity gained them the victory, although the Michel boys for the greater part of the game had the better of the play. We understand a protest is entered by both teams, and in the event of a re-play being ordered, fans from all parts of the Pass will surely be present, as the game was a ding-dong affair form start to finish and worth going a long way to see. The Michel band was in attendance.

Michel's lineup — Dawe; Jenkins and Holmes; McFarlane, McGovern and White; McKenzie, H. Travis, Yates, McCrome and Lettler.

Referee—Wilson, Fernie.

o

FAREWELL OF THE CARMELLO SHOW

The present stock engagement of the Fred Carmello Musical Comedy company will conclude on Monday next. Thereafter the company will be away for another interval, returning here at a later date after a stock run at Moose Jaw, where the comwill open on Monday, Oct. 15.

The concluding performances will be "The Dingbats" on Saturday and "My Aunt Lucy" on Monday. The company made a hit with its presentation of "The Dingbats" on last Monday, and in conjunction with this clever farce comedy, will offer an entirely new play called "Champagne" as part of its Saturday night program. "My Aunt Lucy" was one of the funniest shows played by the company at the beginning of its first engagement in Fernie, and is sure to please the many friends of the Carmello players on the occasion of their farewell appearance at the Grand on Monday.

o

"VANITY FAIR" ONE OF WORLD'S GREAT NOVELS

Probably the most widely read novel ever written in English is William Makepeace Thackeray's "Vanity Fair" which was published in 1848. This novel has ben translated into evry modern language and has been regarded in every country as one of the world's masterpieces of fiction.

Many plays have ben made from "Vanity Fair," notably, in America, Langdon Mitchell's adaptation under the title of "Becky Sharp," which served Mrs. Fiske as a starring vehicle for several seasons. Marie Tempest gave another version at the New Theatre.

This novel has also been depicted on the screen both here and abroad. Mrs. Fiske used a film version of Langdon Mitchell's play about ten years ago. A new version has just been made at the Goldwyn studios by Hugo Ballin, in which Mabel Ballin is starred as Becky Sharp. This picture is being distributed by Goldwyn and will be the attraction at the Orpheum Theatre for two days, beginning Monday next.

The Ballin production of "Vanity Fair," stars Mabel Ballin in the role of Becky Sharp and in the cast are such well known names as Hobart Bosworth, Harrison Ford, George Walsh, Earle Foxe, Willard Louis, Eleanor Boardman, Robert Mack and numerous others.

o

IN MEMORIAM

In Loving Memory of our dear Mother, Mrs. Simon Dragon, who died Oct. 24, 1914; and our dear Brother, Johnny, who was killed in an accident at Albion, N.Y., Oct. 5, 1920.

Slowly the rays of daylight fade,
So fade within our hearts.
The hopes in earthly love and joy
That one by one depart.
Slowly the bright stars, one by one,
Within the heavens shine:
There the dear ones who have left us,
We shall some day meet again.
There will be no bitter partings,
No more sorrow death or pain.
—Inserted by the Family.

CARD OF THANKS

Mr. W. C. Cavanaugh and Mrs. R. B. Good desire to acknowledge with thanks the kindness and help of the following during Mrs. Cavanaugh's illness: Mr. and Mrs. Mangan, Mr. and Mrs. Klauer, Mr. and Mrs. Wm. Robson, Mr. and Mrs. S. Podbielancik, Mr. and Mrs. S. Wilson, Mr. and Mrs. J. Puckey, Mr. and Mrs. J. Gillies, Miss L. Banks, Miss Colton, Catholic Women's League, Fernie Council K. of C.; also Dr. Garner for prompt attention.

o

IN MEMORIAM

In Loving Memory of our dear Son, Thomas G. Martin, who was killed in action, Sept. 21, 1916.

Time passes on from year to year,
And friends from day to day;
But the memory of one we loved
Will never pass away.
Dearer to memory than words can tell
Are the thoughts of him we loved so well,
From memory's page, time cannot blot,
Three little words, "Forget Me Not."
Nothing but memories as we journey on,
Longing for a face that is dead and gone.
None knew the depth of our regret,
But we remember when others forget.
—Always remembered by his loving Father and Mother, Brothers and Sisters.

NEW LAMP BURNS 94 PER CENT AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise —no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. B. Johnson, 579 McDermot Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make $250 to $500 per month.

The Royal Bank of Canada

ANNOUNCES the opening of a Branch in Fernie and have secured the service of Mr. A. Watson to take the management.

Capital Authorized $25.000.000
Capital Paid Up $20.400.000
Total Deposits $372.000.000

SLIPPER SLEEPER FOR CHILDREN

The new (Slipper Sleeper) for Children has found a big demand in the places where first introduced. It is trade marked "Slipper Sleeper' because the feet are made to button back, when the child is out of its crib. An equally important feature is the material, which is a heavy wool merino of soft serviceable quality. 1 to 9 years.—

PRICES FROM $1.15 to $1.95

"CHILPRUFE" COMBINATION FOR CHILDREN

These come in a pure wool and are guaranteed absolutely unshrinkable. Sizes 4 to 10 years.—

FROM $2.75 to $4.00 PER SUIT

LADIES WOOL BLOOMERS

An excellent winter weight in a fine all wool rib. Comes in full cut style with gussett and flat seams. Colors are grey, saxe, rose and mauve. All sizes—

AT $2.75 PER PAIR

LADIES FLEECE LINED BLOOMERS

Ladies heavy fleece lined bloomers, finished with elastic at waist and knees, come in grey and white.—

SPECIAL 11.00 PER PAIR

GIRLS BLOOMERS

Girls all wool navy serge bloomers. 6 to 14 years.

PRICE $2.25 to $2.95 PAIR

Librarian, Leg. Assembly.

UNITED CHURCH OF FERNIE — VICTORIA AVENUE

Calendar For Week Beginning Sunday, October 14, 1923.

Sunday — Combined Service at 11 a.m. Evening Service at 7:30 p.m.

Monday — Committee of Stewards will meet in the church basement at 8 p.m.

Tuesday—Regular monthly tea of the Ladies' Aid will be given by Mrs. Cecil Anderson and Mrs. Gurr and held at the home of Mrs. Anderson, 155 Pellatt Ave., from 3:30 to 6. The Get-to-Gether Society will meet in the church basement at 8 p.m. The weekly sewing meeting of the Ladies Aid will be held at the home of Mrs. H. Wilkes, at 7:30 p.m.

Wednesday—Junior Aid, 7:30 p.m.

Thursday— Tuxis Boys in church basement at 7:30 p.m.

Friday—The District Sunday School Convention held under the auspices of the Religious Educational Council of B.C., will open its session at 2 p.m. Afternoon and evening sessions will be held.

Saturday—Rally of boys over 13 years of age in church basement at 2 p.m. Rev. Mr. Galloway, of Calgary, and Rev. Mr. Myers, of Toronto, will be in attendance at Convention and Boys Rally.

HOME BANK TO PAY ADVANCE

TORONTO, Oct. 8.—G. T. Clarkson, Toronto, interim liquidator of the suspended Home Bank of Canada, and creditors, were authorized by Mr. Justice Fisher, in the bankruptcy court at Osgoode hall today, to form a trust to conserve the assets of the bank, and to borrow money to pay the depositors 25 per cent. of their deposits, if necessary. Proof of claims must be filed by November 28.

Mr. Justice Fisher formally declared the Home Bank insolvent, appointed Mr. Clarkson interim liquidator, and appointed I. E. Weldon, general solicitor of the depositors and creditors' committee of the bank, to act with Mr. Clarkson.

It was arranged to hold meetings of the shareholders and creditors on December 5, the shareholders' meeting to be held in the morning, and the creditors' meeting in the afternoon. A permanent liquidator will be appointed by the court after the meetings have been held. In all probability Mr. Clarkson will continue at the task.

J. Edgar, appearing for Western Canadian depositors, said that they were anxious that those who owed the bank money should not escape payment. For that reason they favored the quick appoinment of an interim liquidator.

J. F. McLaughlin, K.C., for British Columbia depositors, objected to poor people who had lost their savings being put to the trouble and expense of proving their claims.

In answer to some points raised, the judge paid tribute to Mr. Clarkson as a man not easily swayed.

"From what I know of him, he will not be unduly influenced by directors, officers, shareholders, or anybody else. He is a man of independence, and I have confidence in him that he will handle these affairs carefully and well." said the judge.

Shareholders Must Come Through

TORONTO, Oct. 10.—The liquidator of the Home Bank, G. T. Clarkson, is at work upon the list of shareholders, and as soon as this is prepared, some action will be taken to collect the unpaid balances on shares.

There are about 175 shareholders who have not paid up, and about 160 of these are in the western provinces. The aggregate is about $50,000.

The unpaid balances will be collected, and legal process employed to facilitate it if necessary. Not only will these shareholders have to pay the balance owing on their stock, but another payment of the value of the stock on the double liability as well.

The 101 estates which are shareholders will also have to put up the double liability. Those who hold shares in trust for infants will be in the same class.

The shareholders not paid up run from one to five shares each mostly, seven having 10 shares.

I. O. O. F. HOLD ENJOYABLE SOCIAL EVENING

The members of Mt. Fernie Lodge No. 47 I. O. O. F. held a very successful social on Monday evening for the benefit of all its members in all branches of the Order.

The program consisting of songs, speeches, and a very interesting paper was given by Bro. D. G. Harvie, P.G., entitled "Success." This paper was listened to by a very attentive audience and was both given and received in a very creditable manner. It showed that success can be achieved by anyone setting a mark as a goal, and working or performing till they reach it.

After the paper was read, questions or criticism on the same were invited. Several questions were asked and were answered in a most masterly yet amusing way.

Bro. McNicholas then reported that he had some coffee ready, which was a great success, but if not used immediately, he was afraid it would be a failure. Refreshments were then served by the Good of the Order Committee, to which all and sundry did justice. The floor was then cleared and old and young danced to the melody of many of the latest dance hits rendered in a most capable manner by Mr. T. Evans at the piano, this being kept up till midnight when the Home Sweet Home waltz brought a very enjoyable evening to a close.

These socials are to be held, once every month. The committee in charge have arranged for some very interesting and instructive papers to be read, one at each social.

The committee wish to thank Bro. Barraclough, P.G.; who made a real good chairman; Sis. Adlard, P.N.G.; Bro. T. Biggs, P.G.; Bro. McNicholas, P.G.; and all who contributed to the success of the evening.

NEW POLICE DISTRICT IN EAST KOOTENAY

Announcement has just been made of the forming of a new provincial police district in East Kootenay. with headquarters at Cranbrook, with Constable Mortimer in charge. The new district will comprise the stations at Creston, Yahk, Moyie, Cranbrook and Kimberley, all of which previously, with the exception of Creston, were attached to the chief constable at Fernie, and Creston reporting to Nelson.

The big development at Kimberley, particularly, as well as Yahk, is responsible for the change, these points being unhandily located to Fernie for efficiency. At the first of the month, too, another change was effected in the service by transferring Inspector Dunwoody to Nelson from Fernie, giving him a more central location for supervising the constables in both West and East Kootenay.

FALL ASSIZE COURT LIGHT

The Supreme Court Fall Assize concluded here Wednesday after two day's sittings hearing a civil action, Frye vs McGladrey and Marsham, wherein the plaintiff seeks damages for injuries sustained from being struck by a motor truck, on June 30 last, while being driven by the defendant Marsham, said vehicle being owned by defendant McGladrey. His Lordship, Mr. Justice J.A. Macdonald, after hearing the testimony submitted by both sides, reserved judgment.

When Court convened, His Lordship took occasion to remark as follows: "Before the proceedings of the Court commences, might I, as I did at Nelson, remark upon the fact that there are no criminal cases to be tried in East Kootenay. In that respect you follow in line with that prevailing in West Kootenay—East and West Kootenay being the same. I think I should remark on that to show the conduct of the people of the country is worthy of commendation."

Mr. Sherwood Herchmer, with Mr. D. M. Mitchell, were counsel for the plaintiff, Frye; Mr. A. I. Fisher, K.C., with Mr. F. C. Lawe, appeared for the defendant, McGladrey, and Mr. G. J. Spreull, for the defendant, Marsham.

BOXING BOUT POSTPONED

The 10-round boxing bout between Danny MacDonald and Gus Williams, which was billed for October 10, has been postponed owing to MacDonald having an injured knee and blood poisoned hand, but the match will be re-promoted and it is expected to take place on October 25. The following certificate was issued by Dr. Garner:

"Fernie, B.C., Oct. 6, 1923.

"This certifies that I am in professional attendance upon Dan MacDonald and that he is suffering from a sprained knee with excess of fluid in the joint and that I have ordered him to give the knee rest for two or three weeks.

(Sgd) E. L. Garner."

LABOR FEDERATION REFUSES TO CLASP HAND OF SOVIET

PORTLAND, Ore., Oct. 9.—After a debate in which the soviet government of Russia was attacked and defended, the convention of the American Federation of Labor in session this evening has rejected a resolution proposing that the federation urge the government to take steps leading to resumption of trade relations with Russia and eventual recognition of the government.

The debate on soviet Russia, which followed action by the convention in refusing to sanction a labor party, occupied all afternoon, extending beyond the usual hour for adjournment.

CHRIST CHURCH

Oct. 14th, 1923. 20th Sunday after Trinity. Harvest Thanksgiving Services.

11 a.m.—Choral Communion: "The Temporal and The Eternal."

7:30 p.m.—Even Song: "Lessons From The Harvest."

2:30 p.m.—Sunday School.

3 p.m.—Harvest Festival at Coal Creek.

CROW'S NEST DOMESTIC COKE

The new product of the Crow's Nest Pass Coal Co., which is now on the market, is a fuel made from the highest grade Michel and Coal Creek bituminous coals, carefully selected for their coking qualities and low ash content. The process of producing coke removes the volatile matter, or smoke and soot making element, but retains all of the carbon, which is the principal heat making element.

It requires about one and one-half tons of coking coal to make a ton of coke, but the ton of coke contains all of the fixed carbon from the ton and one-half of coal, which gives the coke a higher percentage of carbon, of heating value, than any known coal.

While there are innumerable laboratory tests showing the high heating value of coke, the following are of particular interest:

The University of Illinois Experiment Station bulletin, giving the results of tests of different house heating fuels, shows By-Product Coke having an actual heating value 11½ per cent. higher than anthracite.

The U. S. Government Bureau of Mines, in their technical paper 242, states that 7¾ tons of coke will deliver as much heat as 10 tons of the best soft coal, besides being clean.

Sheffield Scientific School of Yale University, reporting some fuel tests made in 1920, after giving much higher results for By-Product Coke than for either hard or soft coal, added that the efficiencies obtained with coke were probably the highest ever reported.

While the ash content of Crow's Nest Domestic Coke is exceptionally low there is another very important point that should not be overlooked. In most coals the incombustible is in the form of large flat pieces of slate, so that an examination of the ash pile will show a very considerable amount of unburned coal adhered to the slate, while in coke all the incombustible has been ground into very small pieces, and with proper handling absolutely al the fuel is consumed. A comparison of ashes from coke and coal will show this very plainly.

A bin that will hold five tons of hard coal will hold about three tons of Crow's Nest Coke. The weights are in proportion of approximately 10 to 6; consequently, one should fire by weight and not by bulk. It will require a few more shovels full to get the same weight with coke as with coal. However, a little experimenting will give you valuable information as to the amount of coke to put on your fire to obtain the best results.

CANADIAN MINING INSTITUTE MEETS AT TRAIL OCTOBER 17

Heretofore the annual general meetings of the British Columbia division of the Canadian Institute of Mining and Metallurgy have been held in Vancouver, as being, on the whole, the most convenient centre for gatherings of the kind. A departure is being made this year, however, in the decision to hold a general meeting in Trail, with the dual purpose of enabling Coast members to acquaint themselves with the important mining and metallurgical developments taking place in the Kootenays, and of indicating to Kootenay members and mining men, the interest of the Institute in their concerns and problems. This meeting will be held on Wednesday, Thursday and Friday, October 17, 18 and 19, and a cordial invitation is extended to all mining men, whether they are members or not, to attend.

The program arrangements are in charge of a committee, under the capable chairmanship of Mr. M. E. Purcell, of Rossland, who now announces that a number of papers covering a wide range of subjects of timely interest, will be presented for discussion, including: "A symposium on the mining and treatment of Sullivan Ores," by Messrs S. G. Blaylock, W. M. Archibald, E. G. Montgomery, R. W. Diamond, E. M. Styles, J. Buchanan, Geo. E. Murray, B. A. Stimmel and J. G. Fingland; "Mining and Smelting Operations at Anyox," by Mr. L. R. Clapp; "Recent Mining and Metallurgical Developments at the Britannia," by Mr. W. M. Brewer; "The History and Progress of Mining in the Kootenays," by Mr. S. S. Fowler; "The General Geology and Ore Deposits of the Grand Forks, Greenwood, Osoyoos and Similkameen Mining Divisions," by Mr. P. B. Freeland; "Undiscovered Mines of British Columbia," by Dr. W. L. Uglow; "Small Scale Mining Operations and their Problems," by Mr. A. E. Langley; "The Sulphur Industry," by Mr. F. W. Guernsey ;and "Publicity and the Mining Industry," by Mr. C. M. Campbell.

In addition, visits will be paid to the Trail works, and possibly also to the Rossland mines. Nor has the committee forgotten to provide for entertainment of a lighter sort, and it may be affirmed that the provisions in this respect will prove by no means the least attractive features of the program.

LADIES' GOLF CLUB CLOSES 1923 SEASON

The final closing of the Ladies' Golf Club took place on Wednesday, October 3, at the Club House, when the cups and prizes won for the various competitions held during the year were presented by the President, Mrs. Herchmer, assisted by the Vice President, Miss M. Brown.

During the afternoon, matches were played consisiting of Foursome and Putting. The winners for the day being: Foursome—Mrs. Irvine Mrs. Fisher; Putting—Miss F. Macdonald. Tea was served to members and friends and was in charge of Mrs. Wm. Johnston.

The following is a list of the winners:

Irvine Cup—Won by Mrs. Watson, runnerup, Mrs. Harwood.

Wilson Cup—Won by Mrs. Bishop Wilson; runerup, Mrs. Gates.

Trites Cup—Won by Mrs. Harwood; runnerup, Mrs. Watson.

Wood Cup—Won by Mrs. E. Kirkpatrick; runnerup, Mrs. Gates.

A PIONEER'S EXPERIENCE

In searching through the papers and manuscripts belonging to the late Michael Phillipps, the pioneer who came into the South Country in 1857, Phil. Sheffield, who is acting for the B. C. University, in his research work, ran across a little story written by the late pioneer and published in England about the year 1886. It is very interesting, being a tale of his first trip out over the Canadian Pacific Railway in the Winter of 1885-6, when he returned to England. Following is the story:—

No doubt you read in the English newspapers, late last summer, an announcement of the opening of the Canadian Pacific Railway to the Pacific Coast.

I live in British Columbia, in Kootenay, in the interior, between the mighty Selkirk Range and the Rocky Mountains, on the Western slopes of the latter, about 160 miles south of the railroad; and I proposed paying a visit to England for the winter.

When I read in the Victoria, B. C., and in all the Pacific Coast papers, an account of the opening of the Dominion Railway from the Atlantic to the Pacific, I decided upon taking that route for England. One newspaper, like history, might lie! But when all the newspapers proclaim the joyful event—"The West shakes hands with the East," "The Last Spike driven in the Eagle Pass," could there be a doubt of the practicability of that route? The so-called "Last Spike" was indeed driven in by Mr. Donald Smith, in the presence of a few friends; and also, naively adds the Victoria Chronicle, "the whole thing was performed without any ceremony —quietly." Yes, they were wise in their generation to drive in the "Last Spike" on the quiet; but wiser far would they have been had they drawn a veil over this part of the scene altogether. Was it a fact that the railway was really open; or, if a fact, was it other than a delusive one? For, for how long was the railway open? Sympathy, indeed, would the poor deluded traveller have deserved who attempted to reach the Pacific Coast, by the Canadian Pacific Railway, even a few weeks after the announcement of the opening. The roadbed was not finished; the rails were laid temporarily for the sake of passing over a few distinguished men, and then the whole mountain section was closed up. At this moment, hundreds of miles of railway, from Canmore in the Rocky Mountains to far west of the Eagle Pass, lie buried beneath the snow; and property that cost millions lies unused and idle. Already (in December, 1885) the rails and track have been swept away in many places in the Selkirk Range by devasting snow-slides (avalanches). Today, communication is kept up, and the mail carried by tobogans on this portion of the railway;—sleigh-dogs now replace the locomotive.

(Continued on Page Two)

A PIONEER'S EXPERIENCE

(Continued from Page One)

A deserted house or cabin looks dreary in these mountains, a deserted town more dismal yet; but imagine, if you can, a railway deserted! Hundreds of miles of line abandoned! Signal-boxes, stations, small towns lifeless, and fast being buried beneath the snow, or battered to pieces by fierce mountain storms!

The Railway Company have given out now that they will re-open the line on the 1st of May, 1886, and will then reduce their fares, &c. Impossible! A wild dream! Or if, at an immense expense, they should shovel away the snow, which will then, in the mountains, be from 20 ft. to 30 ft. deep, could they keep the line open, for any practical good, even for a single day? Then the warm weather will have commenced, and the snow have been loosened. Hardly an hour will pass without an avalanche sweeping over some portion of the line, carrying with it the "permanent" way into the ravine below.

I do not myself think that it will ever be possible to keep the railroad open through the Selkirk Range, certainly never during the winter and spring. The Company may make snow-sheds through the entire Range, but can they make sheds strong enough to withstand the snow-slides which, in these mountains, carry trees, huge rocks, and everything along with them, and sweep bare the whole mountain side?

If, as a matter of Imperial or Canadian policy, it was necessary to carry the line so far north, not less than one hundred miles from the United States Boundary, would it not have been better to have gone farther north, and have taken it round the bend of the Columbia River, as was at first proposed, before Major Rogers discovered his supposed pass through the Selkirk Range? To have done this would have increased the length of the railway by nearly forty miles; but, by following the valley of the Columbia, the Selkirk mountains, with all their difficulties and dangers, would have been avoided. Even now, it would hardly cost more to follow the Columbia round from Donald to Eagle Pass (through the Gold Range) than to complete the line and make snow-sheds across the Selkirk.

But let me, in a few short words, describe my own trip to the Atlantic by the Canadian Pacific Railway.

I left Kootenay, on the head waters of the Columbia River, on December 15th, and, four days afterwards, reached the railway at a point where it first strikes the Columbia River, after crossing the Rocky Mountains, and enters the Selkirk Range. Here there is a small town called Golden City. The railroad through the Selkirk, towards the Pacific coast, had long been closed up. An occasional train had, indeed, up to this time crossed the Rocky Mountains and run as far as Donald, fifteen miles north of Golden City; but, beyond this, the line was hopelessly blocked.

I arrived at Golden City on Saturday, just in time for the last train going East, which was taking back all the railway employees who had been discharged for the winter. The railway enters the Rocky Mountains through the canon formed by the Kicking Horse River. For the first ten miles the valley is very narrow, the mountains rising almost perpendicularly on either side of the stream. The railway crosses and recrosses the river many times, and is for miles cut in the mountain side. There are here four tunnels; and it would have been better if there had been more tunnelling, as, in places, the mountain rises many thousands of feet perpendicularly, and has the appearance of actually overhanging the railway. Even the vibrations of a passing train is said at times to bring down large masses of rock, gaining velocity as they descend from the mountain heights, would, if they struck the train, hardly add to the comfort of the passengers.

The railway follows the winding of the Kicking Horse River; and the grade, for the first forty miles, is so gradual that the rise is hardly perceptible.

We passed two small stations, Pallisser and Otter Trail, both of which are now deserted; and obtaining an additional locomotive at Field, another siding, we commenced the ascent of the actual summit. Passing over a very high wooden trestle, the speed of our train soon fell from fifteen to three or four miles an hour, the snorting and puffing of the locomotives shewing with what difficulty the ascent was made. The foremost, one of great size and power, is used solely, I believe, for passing and repassing trains across the summit. Indeed, the grade for eight or ten miles on the western slope, approaching the summit, is steeper far than anything I have ever seen in the way of ordinary railway engineering. After about an hour, a few jerks and tugs threw us all out of our seats, and we came to a standstill. Then followed a few more jerks and tugs, as the locomotives in vain attempted to start us, the wheels slipping round and round without biting the rails.

I got out to have a look around. We were now far up the mountain side, the river appearing but as a silver thread away in the ravine below us. The scenery was wild and grand, and very wintry. Rugged and jagged mountain tops towered far above us in every direction; great tracks were to be seen on the mountain sides everywhere, shewing where avalanches of former years had swept down.

The snow was not so deep as I had expected to have found it, not more than two feet, and less on the actual track, where the locomotives coming over on the previous day had swept some of it away. Up to this time we had had really no winter; usually, at this time of the year, the snow lies from ten to fifteen feet on the summit of the pass, and increases in depth until the beginning of May.

After some delay the locomotives started off by themselves, leaving us in the cars. The drivers must have had considerable difficulty in breaking a track through to the summit, as several hours elapsed before they returned to bring us on, although the distance could not have been more than seven or eight miles. It was now getting late, and the short winter day fast drawing to a close. The train, however, made better time than I had hoped for, considering the steepness of the ascent; and we arrived at Laggan, four miles on the eastern side of the summit, before it was quite dark.

Laggan was the first Rocky Mountain station we had come to which was not absolutely deserted. Here, in the summer time, a spare locomotive is kept for the purpose of helping trains across the summit. The town is composed of a small wooden-frame station, an engine tank, one store, one hotel—I think deserted, and a few shanties.

From Laggan, to the point where the railway clears out of the Rocky Mountains, the line passes down a valley of several miles in width, the descent being very easy.

The next station was Silver City. I do not think anyone lives at this place now, although somebody appears to have made a great but futile effort to found a city here. Not only are there the usual frame buildings, with "saloon," 'store," or "hotel" painted on them, and where, no doubt, the owners carried on a considerable business during the construction of the railway, but there are also a great number of large but half-finished houses, which seemed to speak of a "city" which had fallen into a decline while yet in its babyhood; and saloons, stores, hotels, houses, all were deserted.

A few miles further on we came to another station, or rather siding, for there is but a double line of rails for a few hundred yards. There are no buildings; but the words, "Castle Mountain" appear on a board. A singular, massive, towering mountain, standing out from the range, gives, I suppose, its name to the place. Here on your right, travelling East, we had a view of a fine range of ragged, fantastically-shaped peaks.

The last of the Rocky Mountain towns is Canmore, which was to have been the winter terminus of the Canadian Pacific Railway; and here the company have Round Houses; and keep spare locomotives.

We stopped at Canmore for the night, leaving again early in the morning for Calgary, 78 miles distant.

Soon after leaving Canmore, the valley widens out; and grass on the mountain slopes shewed that we were fast approaching the plains. The train now bowled along right merrily, going probably thirty miles an hour, which seemed an immense speed after the tediously slow pace at which we had been travelling whilst crossing the Rocky Mountains. A few minutes more and we looked out on beautiful rolling hills, covered everywhere with luxuriant buffalo grass. This is the charming Bow River Valley. We were fast leaving the timber behind us, there being now only a fringe along the edge of the river. Now and again we passed a homestead or farm; but we saw no sign of snow, although we were far into December .

We arrived at Calgary about noon; and here the train stopped some little time, enabling me to take a walk round the town. Probably it will become a place of some importance at no very distant date.

The town site is perfectly level, and the population about 2000. The Hudson Bay Company have a fine modern store here, in the place of their old fort, Mountain House. About two hundred mounted police are stationed at Calgary; the barracks are about a mile distant from the town.

We made a start again about three o'clock in the afternoon. The Rocky Mountains passed, I thought myself in England. No more trouble now from snow!

The weather, which up to this time had been most beautifully mild, began to change, and before night the thermometer fell to many degrees below zero. The cold must have been much more severe out on the plains than it was near the mountains, as not only was the river frozen, but, a few miles from Calgary, we found ourselves in the midst of snow, running through a snow-covered plain, which stretched in every direction as far as the eye could reach. This was my first night on the cars while in motion; and I did not sleep much, being unaccustomed to the motion and rattle of the train.

Some time during the night we arrived at Medicine Hat, a station far out on the plains. I bestirred myself and began to walk up and down the cars, as the cold had become extreme — 35 degrees below zero — a fierce blizzard from the north-east, after passing over hundreds of miles of unbroken and snow-covered plains, sweeping down upon us with cruel intensity. The cars are most comfortable in ordinary cold weather. There are double glasses to the windows, and a stove at each end of every car; but now the cold and the wind seemed to come in everywhere. In vain did the car attendants and brakesmen poke and throw coal on the stoves; it was impossible to raise the temperature. So cold was it that, even standing close to the stoves, it was almost impossible to keep warm; and only one or two passengers at a time could get near each stove. The stoves appear to have been too much boxed up to give out much heat; but probably this has been done as a precaution against fire in case of the cars upsetting. A little before daylight the engine was uncoupled, and went forward for water, leaving the train standing on the track for hours. There are engine tanks, with a sort of "windmill" arrangement for raising water, at intervals along the line in crossing the plains; and small and solitary landmarks they seemed in the wide expanse of prairie.

On the open plains the wind had swept the snow from the track; and we steamed ahead all day at a fine pace. The cold seemed less formidable by daylight, as the passengers kept moving about, and crowding round the stoves. At a little after six in the evening we arrived at Moose Jaw. The conductor had telegraphed forward stating how many passengers were in the train; and we found a really good dinner ready for us at the Railway Company's hotel. We remained at Moose Jaw about half an hour. By the lights there appeared to be quite a little town. On our return to the platform we found fresh cars, another engine, a new conductor, &c.

The cars are simply superb. The

"His Master's Voice"

Victrola

Galli-Curci Singing the Shadow Dance song—Opera of Dinorah

On "His Master's Voice" Victor Double-sided Red Seal Record No. 6129. On the reverse side Galli-Curci superbly sings "Lucia"—Mad Scene.

To audiences in homes throughout the land, "His Master's Voice" Victrola brings all the entertainment of the world's greatest, most famous artists. Think of it in terms of a great animate theatre—a conservatory of music, through whose welcoming doors your fancy may pass at will.

Based on the same principles which give the human voice or the very finest violin their powers of reproduction—it IS the human voice, it IS the voice of the violin.

Only the living presence of the artist is missing but even this is overcome, for its performance pictures their personalities in a subtle lifelike something — peculiar alone to this marvelous instrument. Combined with "His Master's Voice" Victor Records—it is the singer and his song.

It were just as unthinkable that any instrument could take its place as that someone ELSE could be a Caruso, someone else could substitute for a Galli-Curci, a McCormack or an Elman.

No voice can take the place of "His Master's Voice". Pay it the homage it deserves. Prevent substitution by demanding that the instrument you buy bears our famous trade mark "His Master's Voice" (under the lid). Years of pleasure will repay you for this caution.

Genuine "His Master's Voice" Victrolas from $37.50 to $615.00

Red Seal Records now double-sided. Two selections for practically the price of one. New catalogue listing all double-sided Red Seal Records now ready. It's free.

HIS MASTER'S VOICE, LIMITED

Why "HIS MASTER'S VOICE" VICTROLA *dominates!*

Victrola tone-arms are drawn—not brazed or cast—consequently the sound-waves in passing through them find a perfectly smooth, even passage, the same as they do in a cornet, trumpet, saxophone or other brass instrument. The tone-arms on all types of Victrolas are constructed in exactly the same expensive and effective manner. This is indicative of the superb construction throughout of "His Master's Voice" Victrolas.

Use "His Master's Voice" Victor Tungs-tone Styli Needles. A package of 5 should play over 300 times. We recommend them.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation no less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other causes, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANT ACT

The scope of this Act is enlarged to include all persons joining and serving with his Majesty's Forces. The time within which the heirs or devisees of a diseased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving fofeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits to ten head for settlers, campers or travellers, ul

A PIONEER'S EXPERIENCE

(Continued from Page 2)

crimson velvet cushions, the gilding, chandeliers, and gorgeous fittings, compare strangely with the dingy and confined compartments of an English railway carriage. The cars on all the Canadian and United States railways are between 30 ft. and 40 ft. long; and passengers can pass from one car to another. The sleeping cars are fitted up with lavatory, and, on a small scale, with all the conveniences that are found in the cabin of an Atlantic steamer. West of Winnipeg, during the present winter, there are no emigrant or cheap rates, and only the saloon cars.

The conductor called up all aboard —not that we needed much calling, for the platform was cold, and the cars nice and warm. The stoves were nearly red hot, and not shut in with sheet-iron casing as we had them across the plains from Calgary. Once more we shot out in solitude,—level plain around, and innumerable stars above, but so terribly cold looking. Some time during the night we passed Regina, the new capital of the North-West, where the Lieutenant-Governor, Mr. Dewdney, resides. At Regina are also the head-quarters of the mounted police.

When morning came, we were still steaming away across the level, snow-covered plain.

About midday we arrived at Brandon. All along the railway there are nice farms and houses; though the absence of timber gives them a bare and rather comfortless appearance at this time of the year.

From Brandon, all the way to Winnipeg, there are farms and signs of settlement, passengers getting in and out at numerous small stations at which we stopped.

A young Englishman who resides near Brandon, to whom I was talking, complained of the summer frosts, which much damaged the wheat crops last summer.

About six in the evening we began to pass engine sheds and buildings, which shewed we were coming to a town of some size. In a few minutes we drew up along side of a long platform, which, like all others I had seen on the Canadian Pacific, was quite uncovered. The conductor walked down the cars, and in a quiet but distinct voice repeated "Winnipeg. All change here!" Again, to our disgust, we were turned out into the cold, the next train for the East not leaving until the following evening. And now commenced my experiences of the bores and troubles of civilization, boys, porters, and hotel runners innumerable laying violent hands on me and on my portmanteau.

I had already ascertained the name of the hotel I intended going to from some people who had joined the train at Brandon, so, as soon as I had got clear of the hotel boys, I went, with a number of my fellow passengers, to the Douglas House, which I found sufficienty expensive; though, I believe, it is much cheaper than the hotel belonging to the Railway Company.

I was glad to find myself in a bed which was not moving and shaking about; for, although several nights on the cars, I had not quite got used to the rattle and grinding, which is certainly more fatiguing than the motion on board ship.

Winnipeg is a well laid out town, with some very fine new stone buildings, and is lighted by electricity. So the hotel clerk told me; and I was quite content to take his word for it. The thermometer was 40 degrees below zero, and the wind still blowing. Strange as it may seem, I had no wish whatever to go out into the cold for the purpose of looking at Winnipeg.

I spent the following day, the 23rd, indoors. The wind was sweeping down the wide streets, and rendered anything like a walk for pleasure impossible.

I went down to the railway depot in good time, and took a through ticket to Montreal. From Winnipeg to the Atlantic there are several opposition lines, going south through the United States; and the rates are cheap indeed, compared with those west of Winnipeg.

I decided to continue on by the Canadian Pacific, as not only more direct than going south via St. Paul, Minn., and the U. S. side, but also because there was no change of car all the way to Montreal. The usual time from Winnipeg to Montreal is, under favourable circumstances, four days and nights.

What kind of a country we passed through during the night I do not know. Daylight brought to our view a country differing entirely from the plains through which we had been travelling.

We were now in a rough, broken, woody country. The timber was small, and for a long distance burnt by forest fires, and the hills nowhere rising to the dignity of even low mountains. The snow was getting much deeper as we proceeded.

At eleven o'clock we arrived at Fort William, once a Hudson Bay trading station, now a town; and about half and hour afterwards we reached Port Arthur (Thunder Bay) on Lake Superior, where we stayed for about an hour, changing engines, conductors, and train hands.

The shores of Lake Superior, close on our right, was ice bound, and looked cold and wintry in the extreme.

The train from the East was several days behind time. The telegraph operators could get replies only from White River, about 100 miles ahead. Beyond that place the storm had evidently thrown down the telegraph wires. Where the Atlantic train was, no one knew. The only answers we could get to our inquiries was—"Don't know."

The country along the northern shore of Lake Superior is rough and rocky without grandeur, and not even picturesque, if we except a few views of the Lake itself. Here the engineers of the Company had one of their hardest pieces of work; indeed this portion of the railway has been open only for a few months, passengers to Winnipeg previously going either by the United States lines, or, in the summer, by steamboat on the lakes to Port Arthur, and thence by the Canadian Pacific Railway to Winnipeg.

Passengers who had been over the new portion of the line told me that the road-bed was as yet very rough, and that we should have a good shaking; they also gave it as their opinion that the line was blocked with snow. No one, however, anticipated any serious trouble.

There seemed to be quite a number of shops in Port Arthur. If I had had any idea of what was ahead of us, I should have inspected those shops with greater interest, and have laid in a stock of comforts for the inner man.

A little after 1 p.m. on the 24th of December we steamed out, with a couple of engines to draw us, and went at a fair speed until shortly after dark, when we came to a standstill at some place. There was a siding, with a few cars on it, which were being used as houses by men working on the railway. Huge icicles hanging from the cars ,and deep snow all around, presented anything but a cheerful aspect as we poked our noses out into the cold to try and find out why we were stopping. All we could find out was that there was no answer from the East to telegrams, the wires having come to grief, and that, as there is only a single line of rail, we must stay where we were until we received information of the whereabouts of the Atlantic train. When I got up the next morning we were still standing still. Another tiresome day; and the only answer we could obtain to any inquiry as to when we were likely to start was—"Don't know." "White River," I found out, is the name of this delightful place, where we spent our "Merry Christmas."

There were apparently only six or seven real passengers on board, though there were also a good many who had passes, who had, I suppose, been employed on the railway during the summer. Of the passengers, nearly all were going either to Ottawa or Montreal, only one besides myself being bound through to England.

Early on the second morning, a message came from Winnipeg directing us to proceed ahead slowly during daylight. The direction to go ahead Slowly savoured of mockery. It was nearly noon before the locomotives were ready to start; and, when our two engines did steam off, with all steam on, they moved us along but at a sorry pace. We took with us a large force of Norwegian navvies, who lived in the stationary cars at White River, and who completely filled up the cars.

In less than half an hour we came to another stand, in a cut which was nearly filled up with snow. Out poured the Norwegians with their wooden shovels; but they were soon in again, their shoe-packs and leggings covered with snow, and their beards a solid mass of ice. After they had thawed themselves a little, they turned out again, and recommenced shovelling away the snow.

After considerable delay, we succeeded in making our way through the first cut, only to get into another a little further on. Night came, and found us fast in a drift, with a light wind blowing, which drifted the snow, filled up the tracks as fast as it was cleared. Our friends, the Norwegians, had frequently to come in to warm themselves, but as frequently did they gallantly return to the charge: each time they came into the cars they preceptibly chilled the atmosphere.

All through the night we could hear the short whistles of the locomotives, as the drivers signalled to one another, so that they might put forth their strength as exactly the same moment. The sound brought back to my mind the dear old home of my boyhood, where I have so often lain awake, listening to the hooting of the owls in the big elm which overshadows what was once my bedroom window.

Daylight found the engine-drivers vainly endeavouring to back out of a bank of snow, as by this time they had quite satisfied themselves that they could not go forward. After many ineffectual attempts, they decided upon reserving their coal and water, as it was now clear that all attempts to extricate the train before the wind went down were useless, the snow drifting into the cut almost as fast as the men shovelled it out; and the men could not work much until the weather moderated. Soon after breakfast, the Norwegians started back to White River, leaving us to our fate. They had no snow-shoes. Although the snow was drifted and packed hard with the wind, occasionally the foot would break through, which made walking without snow-shoes very fatiguing.

Our stock of provisions in the dining car was by no means a large one; but we calculated that within three days we should receive assistance, or at all events a fresh stock of provisions. More than twice that time elapsed, however, without seeing anyone. The conductor could not leave the train without orders; and no one seemed to know exactly what to do.

I had promised to be in England soon after New Year's Day. Christmas had passed, and the New Year had come, but England appeared to be further off than ever.

At the end of the week two dog-sleighs, with voyageurs, arrived from Fort Arthur. A relief train had brought them to within a few miles where we were snowed up. The conductor also received orders to feed the passengers free; but, as nearly everything was already eaten up, we none of us felt much comforted at the strange liberality of the Railway Company.

As the dog-sleighs were going on at once with the mail, I and two of my fellow passengers determined to accompany them. How far we should have to walk none of us at all knew. After a rather hot discussion with the mail agent—that is, a good deal of heat on his part, and perfect good temper on mine—I gained my point that nothing but the letter mail should go forward, and that the dog-sleighs should carry our wrappers and necessary luggage in place of the paper and parcel post.

Early on Sunday morning, January 3rd, we wished those passengers who preferred remaining with the train, Good-bye, and started off. Our party consited of the mail agent, three passengers including myself, one brakesman, and also Narcisse and two other Hudson Bay voyageurs. The conductor, of course, remained with the passengers in the train. How long it was before they were dug out I do not know. Up to the time I left Montreal, they had not arrived; although the line was reported clear and open between Winnipeg and Montreal.

The first day we made about seven miles, the travelling, even behind the dog-sleighs, being a little fatiguing for those who had no snow-shoes.

At night we camped out. We found a number of empty cabins and shanties by the side of the railroad as we journeyed along, which had been used during the construction of the line. We did not, however, go far enough the first day to reach one of these, as some of the party were unused to snow travelling, and were completely tired out. I preferred camping in the open myself, as it was generally more convenient for firewood than round the deserted cabins.

The second day we made a long distance, the snow, excepting in the cuts, being little more than a foot deep. As an old snow-shoe walker, I took my turn in advance, breaking track.

We camped at night at a Section House belonging to the Company. The Section men had not turned out since the storm, but proposed doing so on the following day. The wind had died away; and it was decidedly warmer than it had been for the two previous weeks. The men did not know where the break in the wires was, or how far we should have to go before we should be picked up.

On Thursday, the 7th, we fell in with a party of men from the East, looking for the break in the telegraph wires. We, with true human selfishness, had been picking our footsteps with eyes cast down, without a thought of any but ourselves, and had forgotten all about the telegraph poles alongside of us, and could not give them any information. They looked cheerful at this, and at us, and at the pleasing prospect of the long trudge before them.

It seems to me that, although the Company could not help the storm, and the trains getting blocked, they might, by a little better management, have saved their servants much labour, and the passengers no little discomfort. They should, I think, have been better prepared for so likely an event, in such a region, as a snow-storm.

On Friday we came across a snow-plough, with a couple of engines, in the snow, and off the track. A strong force of men were endeavouring to get them back on to the rails.

The same evening we met the Atlantic Express, which had been the cause of so much uneasiness to the officials we had left behind us. Those in charge did not seem to be in an express hurry, and kindly stopped to have a talk about the weather, and supplied us, moreover, with a small stock of provisions. Notwithstanding our news, as there was a working party on board, they determined to proceed, and assist in getting out the snow-plough and in clearing the track.

Early on Saturday, the 9th January, we arrived at a small station, I think Callander by name; and here ended our walk through the snow of 104 miles, which had taken us seven days to accomplish. After some little delay and telegraphing, an engine and car were dispatched to our rescue, and we were carried on to Chapleau. Here we found a regular passenger train, and proceeded on our journey without further delay. We passed Ottawa in the afternoon, and arrived late at night at Montreal.

During the winter months, owing to the freezing up of the St. Lawence, the vessels of the Canadian Steamship Lines sail from Portland, Me., calling at Halifax for the mails, &c. I found that ther would be no boat leaving Portland until the following Thursday, January 14th.

Waiting even a few days in a strange city, where you know no one, is always tedions, and at six on Tuesday evening I gladly left by the Grand Trunk Railway for Portland. We travelled all night, and arrived at breakfast time at Island Pond, just on the American side. Her the U. S. Custom officials examine the luggage. About one o'clock we arrived at Portland.

On the following morning I went on board the Dominion Steamship "Oregon," which, however, did not sail until nearly four in the afternoon. On the 15th, late at night, we reached Halifax, Nova Scotia, and stayed until noon on the following day, waiting for the last Canadian mail; and twelve days later we arrived at Liverpool.

Let those who have crossed the sea in rough weather during the cold season, and who, like myself, are not good sailors, bear witness to the discomfort of a winter trip across the Atlantic. And I felt it somewhat, after having spent Christmas and the New Year in the snow, and after a Winter Trip on the Canadian Pacific Railway.

Hansen Has Thrown His Crutches Away!

"Tanlac is the only thing I can give any credit for helping me," is the precise statement made, recently by C. B. Hansen, a well known carpenter, 12835 121st St., West Edmonton, Alberta.

"For three years I had rheumatism so bad in my right hip and foot that I couldn't hit a lick of work. In fact, I couldn't get around at all without my cane or crutches. My pain was almost unbearable. I couldn't sleep and got down to a mere shadow of my old self.

"My case was so stubborn that it took a long, hard pull, but Tanlac finally brought me around in fine shape. It gave me a fine appetite and such complete relief from the rheumatism that I put my crutches aside and went back to work. It increased my weight twenty-five pounds and left me feeling like a new man."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Take Tanlac Vegetable Pills.

BARTHELMESS MAKES SPECIAL DRAMA OF "BRIGHT SHAWL"

A picture representing the most ambitious undertaking Richard Barthelmess has yet made for the screen is coming to the Orpheum Theatre on next Wednesday and Thursday.

It is the film version of Joseph Hergesheimer's tremendously popular story, "The Bright Shawl," dealing with the days of Spanish oppression in Cuba. In order to obtain the proper atmosphere, a large part of the story was filmed in Cuba, the balance being made in New York. John S. Robertson, responsible for such productions as "Dr. Jekyl and Mr. Hyde" and "Sentimental Tommy," was the directorial genius behind the camera.

Barthelmess has perhaps the most romantic role of his entire screen career, that of an adventurous young American who takes up the cause of the rebels and incidentally falls in love with the daughter of a rebel leader. The complications which ensue when La Clavel, a Spanish dancer, the favorite of the most despised of Spanish officers, becomes infatuated with the young American, who encourages her so that he may gain information of value to the rebels, are said to make this one of the most absorbing photoplays of a decade.

Supporting the star are Dorothy Gish, as La Clavel, the dancer; Mary Astor, as his screen sweetheart; Anders Randolf, as the Spanish tyrant, Santacilla; Jetta Goudal, as La Pilar, female spy; Andre Beranger, E. G. Robinson, Margaret Seddon, Louis Alberni, William Powell and George Humbert.

"The Bright Shawl" has been filmed on a most elaborate and colorful scale. The screen adaptation was made by Edmund Goulding. Known as a John S. Robertson production, it is presented by Inspiration Pictures through Associated First National as one of the most important photoplays of 1923.

o

To date 881,600 buildings destroyed in Poland during the war have been rebuilt.

The little girl who lives across the street called to see our new baby. She wanted to know what we had named her.

We told her, "Jane."

After seeing a slightly disappointed look on her face I said: "Why, don't you like the name?"

She said: "Well, yes; but it is such a lonesome name."

As many Canadians, who have used it for many years, know, Carnation Milk is just 100 per cent cows' milk, sweet, clean and pure.

Forget your former ideas of tinned milk! Prove for yourself that Carnation is the only milk you need for daily use. Remember, it is twice as rich as whole milk because it contains twice the proportion of cream. Nothing is added, not even sugar. And nothing removed except a part of the water which we evaporate to reduce the bulk and give you a doubly-rich milk in convenient-sized containers. Our sterilizing (heating) process keeps it pure and safe.

Ask your dealer to deliver a supply today and convince yourself.

MADE IN CANADA

Carnation Milk
100 per cent milk —"from Contented Cows"

THE MERCHANTS of the smaller cities and towns are learning that in waging their fight for existence, they must perforce adopt new methods in fighting the mail-order houses and inducing the people to buy-at-home, they must adopt the same methods and fight fire with fire, as the western settler does with prairie and forest fires. The great mail-order houses are the consuming flames which threaten to wipe out many small retail merchants, unless these realizing their danger, take steps to remove the menace. The merchants in Fernie are beginning to realize that they must fight fire with fire, and that to save themselves, they must build a "back-fire."

Advertising is the weapon with which the mail-order houses conduct their warfare on the retail merchants of the small cities and towns. They do their own advertising through their own catalogues and other advertising media. They spend thousand of dollars for advertising and judging from the financial reports of the big mail-order houses in Chicago, advertising must be a pretty paying proposition, from their point of view at least.

The local merchants of Fernie are endeavoring to make it well worth your while to purchase locally, and special inducements are being offered in the varying stores, many of which advertise in the columns of the "Fernie Free Press."

There is no longer to be found the man who does not believe in advertising. Many of the merchants hesitate to do so, fearing the original outlay, and overlooking the all-important fact, that advertising is the life of trade.

When you make your purchases from the merchants of your own city, and of your own country, your money remains in circulation in your district, and you benefit thereby indirectly, but when you buy from outside points, your money leaves home to the detriment of your locality.

Buy-At-Home and help in the legitimate growth of your city. Your city gives you your living, and you owe it to yourself and yours to work for the growth and advancement of the city you call your home, by Buying-at-Home.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

AN ABSOLUTELY honest automobile driver told us the other day that he counted fifty-four small children playing in the streets of Fernie while he was driving around the city. Mothers and fathers are warned every day of the danger in permitting toddling children on the highways and streets. There is hardly an edition of the cosmopolitan papers in which there is not found a story telling of a small child either killed or maimed by a passing machine.

Of course we understand that many drivers are very careless and continually break the traffic laws but we will always have such people to contend with and it is safer to keep the children off the streets and away from danger. Children do not understand, when they are small, the danger of speeding cars and it is up to the parents to take heed.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

THE NEWS published in any newspaper naturally does not please everybody. To produce a newspaper that would gratify the whims and desires of every individual would be a difficult job and would probably result in a newsless journal. Keeping incidents out of the paper or coloring them to suit the viewpoints of certain readers is unfair to the general run of patrons.

The newspapers do not make the news. They make events public after they have happened or chronicle those which are scheduled for the future. They are not responsible for court trials, arrests, bootleg raids, labor conventions, political activities and the other happenings in daily life. It is their duty to publish what has occurred, colorless and free from editorial opinion.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

Another nice thing about being poor is that your friends don't insinuate you are a liar when you say you haven't ten dollars to spare.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

These are stirring times. And you must keep stirring if you expect to have any time at all.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

This back-to-the-farm movement offers no peculiar advantages. You can live right on in town and contrive someway to go broke.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

Bergdoll says he would have come to America if they hadn't tried to kidnap him. So the plot wasn't an utter failure after all.

—o-o-o-o-o-o-o-o-o-o-o-o-o-o-o-o—

The more we hear of championship fights the less we think of them.

ADDITIONAL LOCALS

Mrs. Frank Moses, of Michel, was in town on Tuesday.

W. Owens, of Michel, purchased an Oldsmobile Four from Wm. Johnston this week.

The Premier Mine has paid another quartely dividend, amounting to $400,000.

Wm. Bird, of Blairmore, is in charge of the local affairs of the defunct Home Bank.

Gilbert McTeer made a thirty pound catch of fish on Saturday afternoon last.

Mr. and Mrs. Wilfred Biggs returned on Saturday last from their honeymoon trip to Spokane and Seattle.

A marriage licence was issued this week to William E. May and Margaret Rooney.

A. McTeer, of Calgary, District Manager for the Sun Life, has been in the city all week.

Richard Barthlemess and Dorothy Gish in "The Bright Shawl" at the Orpheum Wednesday and Thursday of next week.

Miss Marguerite McGuire, a student of the Northwestern Business College, Spokane, left on September 29 to resume her studies there.

The Michel & Natal Curling Club has organized for the season. It is expected that at least one hundred members will be enrolled.

Esther Rebekah Lodge will hold a Whist Drive and Dance in the I. O. O. F. Hall on Monday, October 15. Cards 8:30 to 10:30. Dancing 11 to 2. Admission 50c. Whitehouse orchestra. Refreshments.

The people of British Columbia, through the government, have sent the stricken citizens of Japan a gift of $45,000 worth of shingles and lumber. A special warrant was passed for this amount.

A quiet wedding took place on Tuesday morning at the Roman Catholic Church when Michael Pascuzzi and Miss L. Constanzo were united in marriage, the Rev. Father Kennedy officiating.

The engagement of Russel Colton and Miss Clara Cody has been announced. The marriage is expected to take place about the end of the month.

The contractors putting in the water main have a steam shovel at work on the Elk River bottom where the pipe will go under the river. The water is quite low at present and this work should soon be completed.

The city reaped a harvest this week from violators of the Liquor Act, when Louis Zilli, Romano Demonte, Leo Bortolussi, David Pritchard, John McKay, P. Carvetto, Peter Olsen, David Williams and Norman McKay were fined $50 each. W. Phillips was also fined $20 for common assault.

Provincial Constable Mortimer has been appointed Chief Constable for the Cranbrook District. The Cranbrook Courier say: "Two weeks ago he received notification of his appointment to this district and left Pouce Coupe on September 20, travelling 150 miles by auto to Grand Prairie in Alberta. From this point it was necessary to ship his car 500 miles along the south shore of Lesser Slave Lake, over the Smoky River to Smith, aobut 150 miles to Edmonton. From the latter city he continued the balance of his journey by motor all the way, arriving here Sunday night after a ten day journey. In all he covered 1000 miles by car and travelled 500 miles by freight train. Pouce Coupe and White River, Ont., are said to be the coldest places in the world, the mercury last winter reaching 68 below at Pouce Coupe, while White River dropped to the astounding level of 72 below. While doing outpost duty last winter near Pouce Coupe Constable Mortimer was severely frozen and on one occasion was on the verge of collapse."

ONE 50c BOX BROUGHT HEALTH

Years of Constipation Ended By "Fruit-a-tives"

The Wonderful Fruit Medicine

Anyone who suffers with miserable health; who is tortured with Headaches; and who is unable to get any real pleasure out of life; will be interested in this letter of Mrs. Martha de Wolfe of East Ship Harbor, N.S.

Mrs. de Wolfe says, "For years I was a dreadful sufferer from Constipation and Headaches and I was miserable in every way. Nothing in the way of medicine seemed to help me. Then I tried "Fruit-a-tives" and the effect was splendid; and after taking only one box, I was completely relieved and now feel like a new person".

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

COAL CREEK NOTES

Mrs. James Hunter returned home from Kamloops where she has been undergoing treatment during the past two months.

The school boy "leather chasers" journeyed to Fernie on Saturday morning and entertained Fernie school boys by a splendid exhibition of football. Coal Creek proving too good for the Fernites.

Since the visit of Road Superintendent Haynes up here, the gang on the Government road between here and Fernie has been reinforced and much needed repairs are now being attended to.

Owing to the slackness of work, several of our residents have pulled out for fields and pastures new.

The Fred Carmello Co. paid a visit to Coal Creek on Tuesday evening. The Club Hall being taxed to the utmost, "Charley's Aunt" being played. A royal welcome awaits them on their return to this district.

Every day sees the usual crop of job-seekers invading the camp.

The many idle days we are experiencing recently are giving our local nimrods full opportunity of indulging in their hobby.

Sam Proctor is out of hospital and recovering from his injuries sustained through a motor mishap.

Coal Creek added its quota to the candidates for confirmation by the Bishop of the Kootenays at Christ Church, Fernie, on Wednesday evening.

A large band of Indians and squaws passed through the camp on their way to the Flathead during the last week.

Mrs. Kirkwood is ill in the Fernie Hospital.

We are yet a long way from the millenium while people continue to occupy the back seats at church and the front seats at a leg show.

The regular monthly meeting of the Mt. Fernie Chapter I. O. D. E. will be held in the Council Chambers on Saturday, October 13, at 3.30 p.m. A full attendance is requested. Report from annual meeting at Quebec will be read.

The Trinity Temple Pythian Sisters are holding a social evening on Tuesday next, October 16, in the Oddfellows Hall. A cordial invitation is extended to all Sisters and Knights of Pythias and families. Members are entitled to bring a friend and are requested to bring refreshments. Admission free. Ingram's orchestra will supply the music. Social commences at 7 o'clok. Come and have a good time.

All members of the Mount Fernie Chapter I. O. D. E. are asked to attend the regular monthly meeting on Saturday, October 13, in the Council Chambers, City Hall, at 3.30 p.m. Report of our delegate, Mrs. Boynton, of annual meeting of Imperial Order Daughters of the Empire, held in Quebec City, June 11, 1923, will be read.

An announcement made by Hon J. D. MacLean, provincial secretary, is to the effect that following the conference of deputy ministers of education of the four western provinces, the curricula of public schools will be revised. Other important changes, including longer training periods for teachers, also are expected to result from the conference. The text-books of geography, grammar, arithmetic and spelling will be revised and it is expected that each province may manufacture its own text-books. Taken all in all the revisions in the school system are the result of a long period of investigation and a material improvement in general educational methods is anticipated.

WHITE STAR YEAST CAKES
Are Not The
"Just as Good Kind"
THEY ARE THE BEST

The local Masonic Lodge will give a dance on or about October 29.

F. Williams, of the Cranbrook Herald, motored to Fernie on Saturday last.

There will be a general hockey meeting on Monday, Oct. 15, in the 150 All Sports Gym, at 7:30 p.m.

"Hollywood," the big Paramount Special is coming to the Orpheum soon. Don't miss it.

Hartley Wilson has had a radio outfit installed at his residence on Victoria Avenue.

A large delegation from Fernie will attend an Inter-City Rotary Convention in Spokane on November 1.

Mrs. A. Cummings is at Rochester consulting the famous specialists, the Mayo Bros. She expects to be away three weeks.

Customs Excise collections for the month of September, 1923, were $45, 927.03. Collections for same period last year were $67,388.60.

The Lord Bishop of Montreal will give an address tonight in Christ Church. Afterwards a Parochial meeting will be held.

A. Rizzuto has taken over the Kootenay Garage. He has secured the agency for the McLaughlin Cars and will bring in a 1924 model the first of the week.

Don't forget the weekly Saturday night dance at the 150 All Sports Gym. Admission 25c; 10c per dance; ladies free. These dances are becoming very popular.

All hockey players and fans do not want to forget the general hockey meeting on Monday evening next, October 15, in Ingram's 150 All Sports Gym, at 7:30 o'clock.

The weekly sewing meeting of the United Church Ladies' Aid will be held at the home of Mrs. H. A. Wilkes on Tuesday evening, October 16 at 7:30 o'clock.

The regular monthly tea of the United Church Ladies' Aid will be given by Mrs. Cecil Anderson and Mrs. Gurr at the home of Mrs. Anderson, 155 Pellatt Ave., Tuesday afternoon, October 16, from 3:30 to 6.

At the recent examinations in music held in Fernie by Dr. H. C. Perrin, F.R.O. Dean of the Faculty of Music, McGill University, Miss Dorothy McLean headed the list for the whole of Canada, taking highest place in the highest grade.

J. W. Aylward, who for the past six months, has represented the Manufacturers Life Assurance Co. in this district, left Fernie last Monday evening for Lethbridge, where he will assume the general managership of the Northern Life Assurance Co. for Lethbridge and district.

H. J. (Yonge) Rayner, of Fernie, has accepted the challenge issued through the Free Press of last week, by Iron Chamberlain, middleweight champion wrestler of Idaho. It is expected that articles will be signed shortly for a finish match (no time limit) and the match will take place in the 150 All Sports Gym about November 1.

A man named MacDonald, about ten days ago, opened a tailor shop in the Lowden Building, but business not being up to the mark he decamped one night this week taking his stock away with him in a car and leaving a number of anxious creditors. The local police got busy and brought the absconder back, when the matter was adjusted to the satisfaction of creditors and he was allowed to go.

The Lord Bishop of Kootenay held Confirmation at the Chrish Church last evening at 8 p.m. A class of 48 candidates was confirmed. There was a large congregation; in addition to the seating capacity of the church, nearly one hundred chairs were utilized. The Bishop spoke from the words: "The Fruits of The Spirit" and pointed out the work of the Holy Spirit in character building. The church was beautifully decorated and the service was most impressive throughout.

EARTH ALWAYS READY TO BUST

(By Clarence Ludlow Brownell M.A., F.R.G.S.)

In the nethermost deeps of the Pacific are vast canyons, gorges in the ocean's bottom, furrows that are the antithese of the wrinkles that mountain ranges represent, and it is in these deeps, where darkness is impenetrable, and eternal, catastrophies such as earthquakes and tidal waves are born.

The recent overwhelming disaster that broke in fury along the whole eastern coast of Japan, originated no doubt, in one of these deeps. Its name is Tuscarora. It is some 200 miles east of the picturesque city of Sendal. It is deep enough to accommodate Mount Everest. It is a constant menace to the Mikado's Empire, and has threatened it with destruction since time immemorial. No one knew where the threats came from until the captain of the U. S. Steamer Tuscarora, back towards the middle of the nineteenth century, discovered the hole in the Pacific's bottom. He was making a chart of submarine geography and came to a place where apparently there was no bottom.

Down he sank his leads, mile after mile. He began to fear that a careless whale had mistaken his sounding machine for another Jonah, had swallowed it, and was asking for more. Eventually, somewhere around the six-mile mark, he found mud. He drew a sample to the surface, clinging to the tallow in the hollow end of one of his sinkers. There was life in this mud, the sort of life that existed billions of years ago, when the whole surface of the earth was water.

If this deep life is associated with duties of any sort, it works under considerable pressure. At a depth of six miles, this pressure is over 1000 tons to the square foot; that is more than seven tons to the square inch, or seven hundred times the pressure the safety valve of most boilers allows.

Such a pressure would drive water through steel. It drives it down through the earth's crust, which is not steel, of course, and probably resists the fearful pressure less effectively than steel would resist it, supposing the steel did not rust.

The late John Milne, F.R.S., thought that the Tuscarora Deep gave the sea access occasionally to the terrific heat of the earth's interior. All occurrences there are beyond man's ken, but hypothetically, he pictured a moment's release of resistence to the pressure of 1000 tons to the square foot. He imagined a rift in the earth's bottom, with an immense volume of water dropping through, and changing instantly into steam. The destructive violence of this vapor would exceed that of any explosive the great war produced. It would displace great acres of the earth's crust, and throw the sea into a tumult. Probably it was this tumult and displacement which wracked the coast of Japan from end to end.

Japan is on the edge of an area of displacement, as is California, Chili, Mexico and Alaska. In fact, there is a considerable depression along the eastern and the western borders of the Pacific that are anything but "pacific" in their performances. Every readjusting of the earth's crust along the California fault, or crack in the crust, means trouble for that state. When the Tuscarora Deep decides to deepen, Dai Nippon had best watch out.

Farther to the south, just east of the Phillipines, the depth of the Pacific is again about six miles, and Fillipinos can tell anyone what earthquakes down there are like. At least, they can relate the happenings of recent visitations.

Japan has earthquakes every day, and "then some" as the phrase is. It averages 500 shakes a year. This year she may have 1000. But most of these quakes are not worth worrying about. They are the merest of surface ripples, such as only delicate instruments, the seismographs that Professor Milne invented, would detect.

The seismograph detects almost incredibly small changes in the earth's surface. Professor Milne's instrument showed distinctly that his house inclined slightly towards the shady side because that side was cooler, and hence the soil was damper and therefore heavier. The weight of the slight amount of moisture on the shady side of the house pulled the house over about a millionth of an inch.

A motor truck half a mile away made the pendulums of the seismographs dance and begin to make records on the broad tape similar to what one used to see in telegraph offices years ago, only wider.

These record machines show the exact movements of a particle of earth during a quake. The path of a particle is astonishing. It pursues all the directions possible in three-dimension space, and possibly other directions about which mere human beings are ignorant. One of Professor Milne's assistants reading the records of the earth particle's route north, south, east, west and up and down, worked out the course mathematically, and bent a wire to fit the specifiactions. This wire looks like anything but a route. A ball of yarn and a kitten could produce a similar model, though possible not as intricate, unless the kitten got inside of it. Nevertheless it is mathematically accurate.

I always think of this tangle when I hear the question, "How does an earthquake feel?"

I do not know how an earthquake feels, but I know how I feel when I am where a quake is; I feel like that tangle. My last experience with an earthquake was in San Francisco, where the seismic disturbance was considerable, and caused a general conflagration that burned 28,000 buildings. In answering a question as to sensations during a shock, Dr. Benjamin Ide Wheeler, president of the University of California, said: "I feel like a mouse, an entirely, utterly insignificant mouse, that a fox terrier was shaking in all directions simultaneously." Dr. Wheeler's description has all the elements of verisimilitude, and is much better than mine.

One wonders how the earth holds together under such varieties of stress and strain. The particles that compose the stuff of which the earth is made have a strong tendency to separate, but a stronger power, which we tall gravity, a power we know nothing about except in its behavior, draws them together.

Professor Milne often said that most people would be looking round for another planet if they knew in any realizing way what sort of a sphere they were on now. He compared it to a boiler with a safety valve on which some mischiefmaker had hung a monkey wrench. "It is ready, and terribly ready, to burst into blazing atoms at any moment," he averred. That would ruin anyone's summer holiday. The stories in the Apocalypse are simple by comparison.

To the universe at large, this would matter little. The moon might miss us, but nothing else, and, besides, there are thousands of millions of suns, off in space each with its planets. There are many more planets than there are fly-specks on the Crystal Palace. If there were one less fly-speck some morning, who would miss it?

But here, we are, and we can not book for another planet just yet. "We must accept conditions and do what we can," says Professor Milne. "Except for the severe shocks, we can do a good deal," he asserts. "There are ways to minimize the hazard of moderate quakes." For instance:

I was dining in the Milne Observatory in Japan one evening. It had been originally built for astronomic work, but had come down to earth when the new Imperial Observatory opened for business. Eight of us were round a very heavy mahogany table. In a glass case in the reception room was a seismograph. We had had our soup and as the fish was coming on, the professor took a look at the instrument. "Let's get under the table," he said. "I smell a 'quake." We were all there with the word "quake" for we had all along had the feeling that in an earthquake observatory we should be ready for anything.

The quake was there too, joggling us and making the things on the table rattle. We had emptied the glasses or there might have been more of a mess. After a couple of minutes we emerged from our emergency retreat, and found the fish first-rate. The 'quake had damaged nothing but our shirt fronts. They were a bit crumpled.

"A table like this offers a haven," said Professor Milne. "I have substantial tables in each room. They are better than an insurance policy in such a country as Japan. Another precaution is a heavy bedstead, with an extra mattress. The bottom of the bed should be a foot and a half above the floor. When the quake comes, roll out and under. There you're safe. The wife and I can do it in two seconds. A little practice makes one proficient. It's a sort of cyclone cellar idea."

I never carried out this suggestion of the professor, for I lived quite in the native Japanes way, sleeping flat on the floor. All I had to roll under was a quilt unless I went outside and rolled under the house.

Japanese houses are without cellars. The whole structure rests on posts at the several corners of the house, and these posts rest on single stones. A little shaking and the posts are off the stones and sink into the soil. Then down somes the house. The only thing I ever sought refuge under was the sky.

The professor told us much about earthquakes that night. He had been studying them for a quarter of a century and had visited all the places that disturbances in recent times had devastated. He had thousands of photographs and tons of thousands of records. He had even built a miniature town on which he could "sic" an earthquake any time he wished, by pressing a button. He exhibited this before the father of the present Mikado and also at the Chicago World's Fair. When the button started things the tiny houses shook and toppled in perfect seismic style.

We learned that when in "Rome do as Romans do" was not to apply to Japan. "If you build a house here," said the professor, "don't do as the Japanese do. They do it all wrong—everything is as it should not be in an earthquake country. To a good healthy earthquake, the Japanese house is a joke." Earthquakes laugh at Japanese houses, and the houses disappear—lost in the mirth.

"In the first place, Japanese houses too high. The centre of gravity should tio high. The sentre of gravity should be on the ground or as near to the ground as possible—not up in the air.

The frame is far too weak, and the beams are mortised half-way through and so are weaker. The beams should be intact. It is much safer to bind them together. There should be a different sort of frame. The cube doesn't resist. It twists apart easily. Timbers inclined at an angle are helpful. I found that inverted V's were good with a ridge pole connecting the points and other connections joining the ends."

"Unless you are right at the centre of disturbance, or the shock is of exceptional severity," continued the professor, "you are pretty safe with a trench around your house. The trench intercepts surface vibrations. The vibrations of a 'quake are on the surface of the ground. Down in a mine, men do not notice 'quakes, though right above their heads their homes may be toppling. This has been the experience in several cases in the silver mines of Nevada, for instance.

"Earth ripples travel quite as the ripples on the surface of a pond after you have thrown a stone in it. Dig a trench four feet deep and you will be immune. I have seen houses resting on rolling foundations, too. The rolling was due to steel shot between the upper and lower layers of the foundation, but I prefer the trench."

o

UNSOLVED MYSTERIES—THE VON HAHNEKE INCIDENT

To those who were close to Wilhelm II. his sudden outbursts of temper and almost maniacal rages during the last eighteen years that he sat upon the throne of Germany were far from the puzzle that they were to the outside world, for they were declared to date back to the fall of 1900, when there occurred that bit of dramatic and secret history which was destined to have such an effect upon the world some fourteen years later.

At that time the Kaiser was troubled with a disease of his left ear and his physicians advised a sea voyage. The small cruiser Iltis was chosen and sailed on what was officially declared to be a "manoeuvre" late in September. On the morning of September 30, or so the story is told by several persons who were on board at the time, Wilhelm awoke with an imperial grouch and sauntered out on deck to wreak his vengeance upon the nearest available object. His eye happened to fall upon Lieutenant von Hahneke, who was drilling a company of sailors nearby, and the German Emporer at once took it upon himself to reprimand the men severely for what he termed their "slovenly appearance" and "neglected discipline."

Von Hahneke stood the rebukes for a few moments in silence, then, turning suddenly, he said: "I beg Your Majesty to step into the cabin. For the sake of discipline, I must see Your Majesty alone."

Wilhelm, amazed, moved off in the direction of his cabin and the lieutenant followed. The moment the door had closed behind them the Kaiser is reported to have demanded: "And what may your lieutenant have to say to me. Be quick. What is the excuse for the piggishness in your company?"

"I am not here to make excuses," retorted von Hahneke. "I asked you to step into the cabin to settle a point of honor. You have insulted me before my men. You have trampled upon my military honor and I want Your Majesty to give me the satisfaction to which I am entitled as a Prussian officer."

"Lieutenant von Hahneke," declared the Kaiser, with his most imperious air, "you will retire to your cabin and await my pleasure. Give up your sword. You are my prisoner."

"Not until you have given me satisfaction,' 'cried the lieutenant, with his hand upraised.

"Shut your mouth, you ———," exclaimed Wilhelm, but he never finished the epithet which he was about to apply, for von Hahneke's right hand swung around in a circle and his clenched first landed squarely upon the Emporer's left ear, felling him to the floor. Then, turning his back upon the man, who lay with the blood streaming from his mouth and ear, von Hahneke rang for the imperial valet, at the same time moving off toward the quarters occupied by the commandant of the cruiser. To him he made a full report of what had happened, and then, walking to the side of the vessel, pressed his revolver against his temple and leaped overboard as he fired.

The incident was hushed up as much as possible at the time, but, to this day, there are many in Germany who attribute the Kaiser's overpowering temper and the fits of rage which were in a large measure responsible for the World War to the blow which is said to have been delivered on the Iltis on that September day in 1900.

STOMACH SUFFERING

disappears as if by magic when Jo-To is used. Gas pains, acid stomach, sour stomach, burning and all after-eating distress relieved in two minutes. All Drug Stores.

WATER NOTICE

Use and Storage

TAKE NOTICE that F. C. Limbocker, whose address is Jaffray, B.C., will apply for a licence to take and use 30 C. F. S. and to store 5 acre feet of water out of Little Sand Creek, which flows South and drains into Big Sand Creek about 1½ miles South of Jaffray. The storage-dam will be located at about 300 feet South of Government Road. The capacity of the reservoir to be created is about 5 acre feet, and it will flood about 1 acre of land, and will be used for power purpose upon the land described as portion of Sub Lot 3 South of Government Road West of Little Sand Creek. This notice was posted on the ground on the 8th day of October, 1923. A copy of this notice and an application thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fernie, B.C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is October 12th, 1923.

F. C. Limbocker, Applicant.

NOTICE TO CREDITORS

Take notice that all persons having claim against the estate of the late Ferris Rahal, who died on the 16th day of May, 1923, are requested to file their claims duly verified with the undersigned, Solicitors for the Administrator, on or before the 31st day of October, 1923, after which date the Administrator wil proceed to distribute and deal with the estate of the said deceased having regard only to such claims as shall then have been filed, or of which the Administrator shall have received notice.

Dated this 27th day of September, 1923.

Herchmer & Mitchell,
Solicitors for the Administrator,
s28|4. John Rahal.

NOTICE OF CANCELLATION OF RESERVE

NOTICE IS HEREBY GIVEN that the reserve covering Lot 12747, Kootenay District, is cancelled.

BASEBALL AVERAGES

In publishing the complete batting, fielding and pitcher's averages of the Coal Co. Baseball Team, of Fernie, for the past season, it might be well to draw a few comparisons with last year's team work for the benefit of the fans. It must be remembered, however, that during the 1923 season the local ball team took part in 24 games this year, exactly double the number played in 1922.

McTeer, although tied by J. Hovan for batting honors, is virtually the leader again this season with .333 as against his .426 of last year. Team batting also dropped considerably in 1923, the average being .278 compared with .318. Of course, the calibre of the opposing pitchers must be taken into consideration, for in the Eastern Section of the League in 1922 the Fernie team had very little opposition and tremendous scores were run up at some of the games. This year the Western Section of the League went out of the district and imported the best possible material obtainable and gave the locals a much harder task.

The team fielding this season, however, shows a marked improvement, the average being .918, compared with .876 in 1922. McTeer also securing the premier position on the fielding table with two errors in a total of 244 chances for a percentage of .992.

The pitching averages will give the fans a fair idea of how the local team compares against their opponents in the various games; the opposing pitcher's average are only of the games against the Coal Co. team and not taking in all their games, we do not wish to cast any reflection on their inability owing to the low average compared to that of the Coal Co. pitchers. Fernie, in 24 games played, won 18 and lost 6, certainly a splendid record for any baseball club. Ault's pitching throughout the season is a wonderful performance. He pitched 21 games and allowed only 136 hits, striking out a total of 193 batters facing him or aproximately 9.2 per game.

A review of past records of the Fernie players show that 1923 has been one of the most successful seasons in the history of baseball in Fernie.

What the headings mean:

G—Games; PO—put outs; A—assists; E—errors; TC—total chances; AB—at bat; R—runs; H—hits; TB—total bases; 2B—two base hits; 3B—three base hits; HR—home runs; SH—sacrifice hits; SB—stolen bases; BB—Base on balls; HP—hit by pitcher; SO—struck out; IP—innings pitched; HB—hit batter; WP—wild pitch; W—won; L—lost.

FEAR

By Walt Mason

"I don't enjoy my motor car," said Charles Adolphus Squires, "although it glitters like a star and has four handsome tires. For always, always as I ride I'm fearing some mishap; into a ditch the bus may slide and spoil my priceless map. The gas I carry may explode as I pursue my way, and strew my fragments down the road and up the verdant brae. I often lie awake at nights and think up grisly scenes, where I collide with other wights, and smash our limousines. I see myself on stretcher borne from scenes of wreck and woe, while creditors stand round and mourn and figure what I owe.' And fear is spoiling countless lives, the fear of dole ahead; like Charles Adolphus when he drives, we fake up things to dread. My neices gambol by my door, they play with old dog Shep; they have no pimple, boil or sore, they're gay and full of pep. And I regard them with a sigh, with tears their sport I view; tomorrow all these girls may die, of mumps or Spanish flu. I have a dwelling, green and grey, the smoothest shack in town; "but storms will ruin it," I say, "or fire will burn it down." I wonder why we look for woe on every coming breeze; I wonder why we don't outgrow such dippy fears as these.

WORLD SERIES BASEBALL

The mighty pole of the veteran "Casey" Stengel, put the Giants again in the lead for the World's Baseball Championship this afternoon, when he landed on one of Jones' benders for a home run, his second in the series; the first breaking the tie in the first game Wednesday when he slashed out a home run in the ninth inning to give the Giants a five-four victory. Thursday afternoon the Yankees had evened up the series by winning four runs to two, "Babe" Ruth playing an important part in the win, swatting out two home runs. Ward, of the Yanks, and E. Meusel, of the Giants, also connecting for homers in this game. In the first three games of the series no less than six home runs have been recorded, and yet all six circuit clouts have came without a runner on bases.

First Game—	R	H	E
Giants	5	8	0
Yankees	4	12	1

Watson, Ryan and Gowdy, Snyder; Hoyt, Bush and Schang.

Second game—	R	H	E
Giants	2	9	2
Yankees	4	10	0

McQuillan, Bentley and Snyder; Pennock and Schang.

Third game—	R	H	E
Giants	1	4	0
Yankees	0	6	1

Batteries — Nehf and Snyder for the Giants; Jones and Schang for the Yankees.

Ist Inning — Giants: Bancroft up; foul, strike 1; foul, strike 2; ball 1; ball 2; Bancroft flied out to Meusel. Groh up; ball 1; Scott fumbled Groh's grounder and the batter was safe. Frisch up; strike 1; foul, strike 2; Frisch flied out to Witt. Young up; strike 1; ball 1; Young lined out to Witt who came in fast to make the catch. No runs, no hits, 1 error.

Yankees: Witt up; Frisch tossed out Witt at first. Dugan up; ball 1; strike 1; ball 2; Bancroft threw out Dugan. Ruth up; the crowd cheered; ball 1; ball 2; strike 1; strike 2; Ruth singled over second. Meusel up; ball 1; strike 1; ball 2; Meusel flied out to his brother. The ball almost went into the left field stands. No runs, 1 hit, no errors.

2nd Inning — Giants: Meusel up; ball 1; strike 1; strike 2; Meusel flied out to brother Bob. Stengel up; strike 1; ball 1; foul, strike 2; Witt took Stengel's fly. Kelly up; ball 1; strike 1; strike 2; foul; ball 2; Kelly sent up a high one to Scott. No runs, no hits, no errors.

Yankees: Pipp up; ball 1; ball 2; ball 3; strike 1; strike 2; Pipp fouled out to Kelly. Ward up; strike 1, ball 1; ball 2; strike 2; foul; ball 3; Ward popped to Snyder. Schang up; ball 1; strike 1; ball 2; foul, strike 2; ball 3; Schang flied to Bancroft. No runs, no hits, no errors.

3rd Innings — Giants: Snyder up; strike 1; ball 1; ball 2; strike 2; Scott took Snyder's hopper and threw him out at first. Nehf up; ball 1; strike 1; foul, strike 2; Nehf fanned. Bancroft up; ball 1; ball 2; Ward threw out Bancroft at first. No runs, no hits, no errors.

Yankees: Scott up; ball 1; Bancroft made a nice stop of Scott's grounder and got him at frist. Jones up; ball 1; ball 2; strike 1; foul, strike 2; Jones struck out. Witt up; strike 1; strike 2; Witt struck out on three pitched balls. No runs, no hits, no errors.

4th Innings—Giants: Groh up; ball 1; strike 1; ball 2; Scott threw out Groh at first. Frisch up; ball 1; Frisch beat out a bunt for the Giants first hit. Young up; strike 1; ball 1; Young flied out to Ruth; Meusel up; ball 1; strike 1; ball 2; foul, strike 2; Meusel flied out to Ruth, who caught the ball near the fence. No runs, 1 hit, no errors.

Yankees: Dugan up; Dugan sent a long hit to right for two bases. Ruth up; ball 1; ball 2; ball 3; ball 4; Babe walked. Meusel up; Meusel hit into a double play, Bancroft to Frisch to Kelly. Pipp up; Frisch threw out Pipp at first. No runs, 1 hit, no errors.

5th Inning — Giants: Stengel up; ball 1; ball 2; ball 3; strike 1; Stengel strolled to first. Kelly up; Kelly hit into a double play, Jones to Scott to Pipp. Snyder up; foul, strike 1; Scott threw out Snyder at first. No runs, no hits, no errors.

Yankees: (Both pitchers were going great guns) Ward up; ball 1; strike 1; ball 2; ball 3; Ward popped a single into left. Schang up; foul, strike 1; ball 1; Schang forced Ward, Groh to Frisch, Scott up; Scott scratched an inflied hit. Jones up; strike 1; Jones hit into a double play, Frisch to Bancroft to Kelly. No runs, 2 hits, no errors.

6th Inning—Giants: Nehf up; Nehf grounded to Pipp unassisted. Bancroft up; strike 1; ball 1; ball 2; ball 3; Bancroft got a base on balls. Groh up; strike 1; ball 1; strike 2; foul; ball 2; foul; foul; Groh fouled out to Dugan. Frisch up; strike 1; foul, strike 2; foul; Frisch singled into right, Bancroft went to second. Young up; ball 1; ball 2; ball 3; strike 1; Ward threw out Young making a nice play of it. No runs, 1 hit, no errors.

Yankees: Witt up; Groh threw out Witt. Dugan up; strike 1; ball 1; ball 2; ball 3; strike 2; foul; Dugan flied out to Young. Ruth up; ball 1; strike 1; ball 2; foul, strike 2; ball 3; Ruth struck out. No runs, no hits, no errors.

7th Innings — Giants: Meusel up; foul, strike 1; Meusel flied out to his brother. Stengel up; strike 1; ball 1; ball 2; Stengel scored on a home run into the right field stands, it was his second home run of the series. Kelly up; ball 1; foul, strike 1; ball 2; foul, strike 2; Kelly flied out to Meusel. Snyder up; Ward tossed out Snyder. 1 run, 1 hit, no errors.

Yankees: Meusel up; ball 1; ball 2; strike 1; Meusel flied out to Young. Pipp up; ball 1; ball 2; foul, strike 1; strike 2; ball 3; foul; Pipp got a base on balls. Ward up; Ward forced Pipp, Nehf to Bancroft, to Frisch. Pipp slid into the bag and turned his injured ankle, he rolled over on the ground and the club doctor was called to attend him, the game being halted, Pipp was lifted to his feet and walked to the bench limping badly. The doctor had swather his injured ankle in bandages. Play was resumed. Schang up; Schang singled into left, Ward going to second. Scott up; strike 1; ball 1; Groh took Scott's grounder and touched third. No runs, 1 hit, no errors.

8th Innings—Giants: (Ruth went to first in place of Pipp. Haines went into rightfield) Nehf up; ball 1; Nehf singled into left. Bancroft up; foul, strike 1; ball 1; foul, strike 2; ball 2; Bancroft struck out. Groh up; strike 1; strike 2; ball 1; foul; Groh fanned. Frisch up; Jones tossed out Frisch at first. No runs, 1 hit, no errors.

Yankees: Hoffman batted for Jones ball 1; ball 2; Hoffman popped to Frisch. Witt up; ball 1; Witt got a single through the box. Dugan up; strike 1; ball 1; Dugan forced Witt, Groh to Frisch. Ruth up; ball 1; ball 2; ball 3; foul, strike 1; Ruth walked. Meusel up; Meusel flied out to Stengel. No runs, 1 hit, no errors.

9th Inning—Giants: (Bush went into box for Yankees) Young up; ball 1; foul, strike 1; foul, strike 2; Meusel took Young's foul. Meusel up; ball 1; Meusel sent up a high fly to Scott. Stengel up; Ball 1; Ruth took Stengel's grounder and touched first. No runs, no hits, no errors.

Yankees: Haines up; Strike 1; ball 1; Groh threw out Haines at first. Ward up; strike 1; ball 1; foul, strike 2; foul; ball 2; foul; foul; foul; ball 3; foul; Ward fanned, taking a called strike. The Yanks made a vigorous protest that Snyder had tipped the bat. Nallin would not allow their claim and motioned the Yanks to the bench.

Schang up; Groh threw out Schang. No runs, no hits, no errors.

BURNING STOMACH

Relieved in Two Minutes with

JO-TO

Jo-To relieves gas pains, acid stomach, heartburn, after-eating distress and all forms of indigestion quickly, without harm. All Drug Stores.

NEW LAMP BURNS 94 PER CENT AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. B. Johnson, 579 McDermot Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make $250 to $500 per month.

DOCTORS STATE CASE

To the Public:

We, the undersigned regret appearing in the public press but we believe it necessary in order to correct certain false rumors and to present our side of the controversy in regard to the problem of contract doctors for Gladstone Local Union.

The rumor has been widely known that we, the old doctors, are asking too much, that we are asking for three dollars per month per man, that we are asking an extra amount for each maternity case and that we are asking an extra amount for each operation. We absolutely deny this. We have at no time ever thought of it, much less have we ever expressed such a desire to anyone. What we did expect was exactly what we stated to the Medical Committee of Gladstone Local Union when they first came to us in October, 1922, namely, that we continue with the old contract till April, 1923, or such time as the miners' wages came down, when our contract fee would be correspondingly lowered. The Medical Committee agreed to continue with the old contract for the time being.

From November 1st, 1920, we gave the specialist clause a fair trial and by the end of April, 1921, we were presented with specialist's bills, railway fares and accounts from hospitals in Spokane and Rochester, Minn., to the amount of $1800.00. Because of this and because of our claim that we could not carry the specialist clause, the Medical Committee at that time came into our office, went through our books and were given all the figures including the cost of operating the hospital, which is operated at a loss of from two to five thousand a year, and even our own private incomes and their own judgment was that with the income we had from the mines, we could not possibly carry the specialist clause. Then as a substitute for this clause the extraction of teeth clause was inserted. This we have faithfuly carried out with a cost in 1922 of $990.00.

We had met the Medical Committee of Gladstone Local Union in October, 1922. We did not hear from them again till September, 1923. In the meantime we had each spent hundreds of dolars in post-graduate work and over $2000.00 in improving the hospital, X-Ray, etc. On September 19, or thereabouts, they again came to us with a proposed agreement, which they had asked us to sign without any alteration of any kind, claiming they had no authority to negotiate any changes. We explained that the extraction of teeth clause was adopted about two years ago by a different committee as a substitute for the specialist clause. We also explained that the specialist clause as worded in their proposed agreement, though calling for 50% of the total, placed no limit upon the amount we might be called upon to pay for specialist charges, railway fares or hospital charges but from past experiences we knew it would be very heavy and that we could not conscientiously agree to such an agreement. We also discussed all the other clauses and agreed that in every way we would improve the service at the hospital when possible. We appealed to them for a public meeting where we could state our case and where the men could vote but were refused.

A few days later we approached the Medical Committee and told them that we wished to meet them again. A committee of four men came up with the Secretary and we proceeded to discuss the specialist and other clauses, but were told that they were not here to discuss these clauses, but that they were here to have us sign the proposed agreement as worded. We told them we were willing to meet them more than half-way and again appealed for a public meeting but no agreement was reached.

The next step was the advertisement by the Medical Committee for two doctors for this work calling for applications to be in by October 15th. On October 13th at 10:30 a.m. we sent by registered mail addresed to Thomas Whitehouse, Esq., Sec'y Gladstone Local Union No. 2314, Fernie, a letter with our proposed agreement making application for the position of contract doctors for Gladstone Local Union.

Our proposed agreement contained a specialist clause with a limit placed upon the amount in each contract year. This is necessary as the hospital has never paid running expenses let alone the interest on the debt which is still over ten thousand dollars. Further our individual monthly income was less than $50.00 over the monthly salary we paid assistant doctors last winter.

We only ask fair play.

E. L. Garner.
B. Asselstine.

ESCHWIG'S CAFE AT BRANT, ALTA., HELD UP SUNDAY

BRANT, Alta., Oct. 15.—At about three o'clock Sunday morning two masked men with revolvers entered the Brant Cafe, owned by Wm. Eschwig, and searched the pockets of about thirty men, besides demanding Tom Shin, the proprietor of the Cafe, to open and give them the contents of the money till and all he had in his pockets, which amounted to some five hundred dollars.

After all the men present had their pockets searched the hold-up men left, taking with them money amounting to something like eight hundred dollars. Their farewell words to the men were that if anyone left the restaurant in the next five minutes they would be shot. It was perhaps ten or fifteen minutes before a man left, and in this time the hold-up men had time to make their getaway.

The police were notified and they are on the trail. They feel satisfied they can be located, as they were seen in the Brant district some few days previous to the robbery and a good description of them was given to the police.

—o—

CITY TO PAY DOCTORS' CLAIM

The second regular October meeting of the City Council was held in the Council Chambers Thursday evening, Mayor Henderson occupied the chair, Aldermen Irvine and Graham were absent.

Messrs. Sweeney and Wilson, on behalf of the Loyal Order of Moose invited the Mayor and members of the Council to be present at a Public Meeting of their order to be held in Victoria Hall next Wednesday evening for the purpose of welcoming the General Dictator of the order, George N. Warde, to Fernie. This invitation was accepted and Mayor Henderson requested the members of the Council to be present.

The Council endorsed a resolution passed by the City Council of Nanaimo, requesting the Government to pass legislation which would enable Municipalities to use a portion of the Motor Vehicle Licenses granted to them, for the purpose of aiding ratepayers in the matter of local improvements.

A letter was received from Messrs. Herchmer & Mitchell requesting settlement of the Doctors' claim, settled by Court action recently. A motion was passed authorizing the payment of the amount awarded by the Court.

Applications were received from Public Works Engineer J. C. Brady, requesting blueprints showing all pipe and pole lines belonging to the City now in operation along Provincial Government roads and highways.

The Home Bank situation came up for considerable discussion and the Mayor announced his intention of calling another meeting of the depositors in the Fernie Branch of this Bank, during the early part of next week.

BOXING BOUT OCTOBER 25

The boxing bout which was scheduled to have been fought between Danny MacDonald and Gus Williams on October 10, but was postponed owing to MacDonald suffering from a sprained knee, will now be definitely be staged at the 150 All Sports' Gymnasium on Thursday evening next October 25. Preliminaries, of which there will be four, will start promptly at 9 p.m., the main bout to commence immediately after the conclusion of the last preliminary.

MacDonald has fully recovered from his injury and is now in excellent condition. His opponent, Williams, has been going through strenuous training and is also in tip top form. Both men are strong fighters and in watching them in their work-outs, there is very little to choose between them, both men are two-handed boxers and while not apparently letting themselves out to full extent against their sparring partners, some of the latter in both training quarters have taken considerable punishment.

Both men are confident of victory and are determined to give of their best in the coming encounter so one of the finest boxing exhibitions ever staged in the city is assured.

CREEK PEOPLE ARE HARD HIT

At a special meeting of depositors of the Fernie Branch of the Home Bank of Canada, called by Mr. Bernard Caufield, Superintendent of the Coal Creek Mines, and held in the Coal Creek Club Hall on Tuesday evening, practically every family residing in Coal Creek was represented.

In opening the meeting Mr. Caufield stated that the Coal Creek depositors were not satisfied with the manner in which the interests of the depositors were being handled and that the distress caused by the failure of this financial institution should be given much greater publicity. He pointed out that the case of the Coal Creek depositors was one of the hardest hit in the country. Monies deposited by Coal Creek residents represent meagre savings from wages earned in a hazardous occupation, and in many cases these small savings represent years of labor, self-denial and thrift, to the end that some small measure of protection might be guaranteed in old age. Depositors generally, he added, are not financiers and are compelled to accept the published statements of a bank's security, together with the fact of Government supervision and inspection as a guarantee that their savings are fully protected. No bank is in a position to continue business without the funds and the confidence of its depositors, and a single case of this kind can be made to shake the whole financial fabric. Depositors would certainly be justified in using this as a weapon and in suggesting to all depositors both as individuals and as members of organizations having savings deposits to withdraw these from the banks in which they are now placed and to place them in Post Office Savings, thus making the Government responsible for their security.

He scored the Canadian Bankers' Association heavily on the report that that body have not definitely decided not to assume any responsibility in connection with the Home Bank's affairs. The Minister of Finance, the Hon. W. S. Fielding, also came in for severe criticism upon the statement he is reported to have made in May of this year in the House of Commons, that the depositors in Canadian Banks need have no fear for the safety of their deposits, and in face of the fact that it is reported that the Cabinet as well as the Bankers' Association were aware of the precarious condition of the Home Bank.

He cited three outstanding cases of hardship, brought about by the Home Bank failure, among the Coal Creek depositors. These are worthy of mention, they are:

Peter Dekeyser: Worked in Coal Creek mines for 20 years, some time ago lost his right leg and is now unable to follow his employment through being afflicted with cancer. All his savings in the Home Bank.

Chas. Alstead: Working in the mines for 18 years, now suffering severely with rheumatism. All his savings in the Home Bank.

David Kirkwood: Worked in the mines for 15 years, the only support of his aged mother and ailing sister, now unable to work. All their savings of years, obtained from hard honest labor, gone.

Thomas Uphill, M.L.A. for the Fernie Riding, was called upon and briefly outlined the work which had been done in connection with the Home Bank failure, by the Fernie depositors. He strongly recommended that a campaign should be instituted whereby not only Home Bank depositors, but those who escaped the smash through being depositors in banks other than the Home could be made to join in the movement to compell the Government to see that depositors got one hundred cents on the dollar. He pointed out that Fernie and surrounding districts doing business in the Fernie Branch of the Home Bank were without a doubt the hardest hit in the Dominion of Canada, the loss per capita to the entire population being approximately $200.00

Various other speakers were vehement in their condemnation of the directors and others responsible for the deliberate falsifications of the annual report recently issued to shareholders. Many suggestions were made as to what could be done in bringing the depositors' case before the people who at present were uninterested in the proceedings. One suggestion was that should the depositors not receive one hundred cents on the dollar a campaign be instituted whereby foreign capital would be advised not to invest money in Canada

(Continued on Page Two)

CHIEF SPILLER TO GO TO PRINCE RUPERT

Tremedous shake-ups in the personnel of the British Columbia provincial police have been taking taking place during the past few months and changes are being made all over the Province.

It is only recently that the Headquarters of this body for the Kootenays was transferred from Fernie to Nelson and Inspector Dunwoody was instructed to make his headquarters at Nelson. Following closely upon this change came the announhement that the East Kootenay District, which up to that time had been unedr orders from Fernie Chief Constable's Office, had been divided and Constable Mortimer was promoted to the rank of Chief Constable, with headquarters at Cranbrook, with authority over the Western Section of East Kootenay. The eastern section ramaining under the charge of Chief Constable Spiller of Fernie.

Chief Constable Spiller was notified Wednesday morning that still further changes were to be made and that he would shortly be transferred to Prince Rupert. He wil be relieved at Fernie by Chief Constable Greenwood who is now stationed at Quesnel and Chief Constable Minty will be transferred from Prince Rupert to Quesnel.

Chief Spiller has been in charge of the East Kootenay division of the provincial police with headquarters here for the past four years and has proven himself a most popular and efficient officer.

—o—

COST OF HOSPITAL

To the Editor:

As there has been a great deal of discussion of Fernie Hospital lately, we believe the people of Fernie would appreciate a few actual figures concerning the operation of the Hospital in regard to the Coal Co. contract for 1922. These figures are open to verification by any accountant.

The total amount of all collections from all employees of the Coal Co. in Fernie and Coal Creek, Union members and others, which we received for the twelve months, January 1 to December 31, 1922, was $19,910.50. Of this amount $3318.00 was paid to Dr. Workman at Coal Creek and to the Coal Co. for rent at Coal Creek. $990.00 was paid to the dentists for extraction of teeth for contract patients. This leaves $15,593.50, or a sum of $1299.45 per month.

The total cost of running the hospital last year was $19,001.61. When we say running the hospital, we are not counting interest on investment, interest on hospital debt, or any charge for bookkeeping administration or doctors' services. This is actual cash paid out during 1922 or owing at the end of the year for debts contracted during the year. We might say in this connection that this total is lower than for some years and compares very favorably with other small hospitals in B.C. listed in the annual government report and we think great credit is due Miss Walker for careful administration. As far as medical and surgical supplies are concerned no expense is spared and we procure the best that money can buy. Nurses salaries are good and we have always tried to have the best nurses available. Salaries at the hospital last year were $8895.37. Two night nurses at all times would increase this amount $960.00 per year besides maintenance of nurse.

The total number of patient days last year was 5715. This works out at about $3.33 per day per patient, actual cost. Of these patient days, 2294, or considerably more than one-third were contract patients from the Coal Company contract. Multiply this number by $3.33, the cost per patient day, and you have the actual money expended during the year for hospital accommodation on this contract. This is $7538.02, or $636.50 per month. Deduct this from the above total of $1299.46 per month and you see we have a grand total of $662.96 per month to buy drugs for 850 men, their families and dependents, run an office, perform major operations, make night visits attend all maternity cases and do all other medical and surgical work.

Our books show a total of 1001 office calls for this contract 1136 visits at the homes exclusive of visits to 36 maternity cases, 1294 visits to patients in hosptial, 21 major operations, 43 minor operations and 1434 dressings at the hospital outdoor in 6 months.—Drs. Garner & Asselstine.

THE HOME BANK CRASH

The revelations as set forth by the statement of the curator of the Home Bank are to say the least astounding. In all truth the Home Bank of Canada was not a bank within the meaning of the term, but a jumble of highly speculative real estate and risky commercial ventures disguised under various names. These investments extended over the continent and even beyond included deals in veterans' scrip, railway securities in New Orleans, paper and pulp companies in British Columbia, timber tracts and last but not least a hand in a rum running corporation doing business between Great Britain and the United States. To be fair it must be stated that many of these "assets" were legacies from the old Home Savings and Loan Company, from which the Home Bank sprang, and much of the money lost was due to the endeavors of the Home Bank to save the original sums loaned. In a word it was a case of sending good money after bad, much as was done in the case of the Merchants Bank.

The initial error of the Home Bank management would seem to have been in not meeting the original situation in a business-like manner. That is to say losses were not written off, but were kept on the books as assets when they long ago ceased to be of any value and become liabilities. As a matter of fact the curator's report proves clearly that Mr. H. J. Daly, the Home Bank's president, was not a banker but a promoter, and that the late Col. J. C. Mason, the late general manager, also lacked the necessary qualifications. To various ventures which for the most part turned out very badly the bank had loaned sums totalling upwards of nine million dollars. Of course there will be a partial recovery in this department, how much it will be impossible to determine until the liquidation process is completed, and that will be in all probability a matter of years.

The business of the Home Bank so far as depositors went was largely made up of small savings, and there will necessarily be a great deal of hardship, as according to those who have studied the situation the bank will be indeed fortunate if it is ultimately able to pay to those who have entrusted their money to it fifty cents on the dollar. At the moment there is not twenty-five per cent. available for distribution.

The fact that certain officers and directors of the Home Bank utilized it recklessly for their own financial advancement cannot be denied. However, this is not the time nor the place to discuss that phase of the situation, the courts and the Attorney-General's department will unquestionably do their duty in that respect.

In the meantime it is up to the bankers of this country, and up to the Finance Department at Ottawa, to devise some means whereby precautions may be taken to the end that the Home Bank crash will be the last.—Saturday Night.

o

CREDITORS MEET DEC. 6

TORONTO, Oct. 16.—Home Bank notes to the total of $1,700,000 are to be gathered up in the immediate future and burned. Holders of the notes of that bank are to be allowed to exchange them for other currency in the next few days.

"I am now making arrangements for the redemption of the Home Bank currency," said G. T. Clarkson, interim liquidator of the Home Bank, in an interview today.

A change in the arrangements for the meetings of the shareholders and creditors of the Home Bank provides that these meetings shall be held on separate days. The creditors will meet at Massey Hall on December 6, and the shareholders meet the following day at the same place.

The order made by Mr. Justice Fisher has reached counsel engaged in the liquidation. According to its terms, besides the appointment of permanent liquidators, the order provides for the following:

(a) To approve and confirm any action taken with the approval of this court by the provisional liquidators in borrowing sufficient money to pay an immediate dividend of 25 cents on the dollar to the creditors of the bank.

(b) If such dividend be not paid by the said provisional liquidators, then to authorize the liquidators hereafter appointed to borrow sufficient monies for such purpose.

(c) As a means of dealing with all or any part of the assets of the bank to transfer the same to a realization company or companies, if and when organized, and to authorize the liquidators to carry out such a plan in respect thereof as this court shall approve.

The court has followed up the winding up order by directing that all negotiable securities, other than promissory notes, cheques and bills of exchange held by the Home Bank shall be deposited in a safety deposit vault in the Bank of Commerce and that the monies of the Home Bank shall also be deposited in the Canadian Bank of Commerce.

The provisional liquidators, G. T. Clarkson and I. Weldon, have given security to the extent of $100,000 as required by the court "for the due performance of their duty as provisional liquidators."

Herbert J. Daly, president of the Home Bank, who is ill at his home at Lake Simcoe, is resting easier today, according to his physicians, and his ultimate recovery depends entirely on complete rest, and on that account he is not allowed to see the papers nor is he made aware of current happenings.

o

COAL CREEK PEOPLE HARD HIT

(Continued from Page One)

until more stability was assured in Canadian banks.

Another was that envelopes be ordered with "Withdraw your savings from all Canadian Banks if Home Bank depositors do not get 100 cents on the dollar" printed upon the flap, and these used for all correspondence out of Coal Creek.

The meeting then passed two resolutions which were as follows:

Resolution 1. That this meeting of depositors, resident at Coal Creek, B. C., urge upon the Minister of Finance, the Hon. W. S. Fielding, the necessity for his quickly assuring the depositors;

(a) as to the truth of the statement attributed to him in May last that depositors need have no fear as to the security and safety of the Canadian banks;

(b) as to whether the Government is prepared to accept the responsibility it must morally assume on account of the failure of it's Inspectors to fully protect the interests of depositors;

(c) as to whether it is the intention of the Government to mitigate the doubts and sufferings of the unfortunate, resident in the Dominion, as it has already done in the case of other unfortunates residing abroad, by coming to their assistance financially, and

Be it further Resolved:

That a copy of this resolution be also forwarded to the Hon. Dr. King, Minister of Public Works, and Dominion representative for this constituency, with the request that he press for consideration of this matter by the Minister of Finance and by the Government and for public announcement at the earliest possible date, and that a copy of this resolution be also forwarded to the Hon. John Oliver, Premier of British Columbia, with the request that he immediately make this matter a subject for consideration by the Provincial Government, and that he shall bring all possible pressure to bear upon the Dominion Government to the end that the interests of depositors shall be properly safeguarded and full returns guaranteed.

Resolution 2. That all depositors, resident at Coal Creek, B.C., immediately write to their Dominion and Provincial representatives, giving them as full details as possible concerning their own predicament and urging upon them the necessity for taking immediate action in the matter of reimbursing depositors and the establishing of Government guaranteed banks, and

That in the event satisfactory Government action is not forthcoming within reasonable time, we pledge ourselves to direct our efforts to the end that depositors in other banks, whether individuals or organizations, shall withdraw such deposits and place them in the Post Office Saving's Bank and Government Bonds.

Following the passage of the above resolutions a committe of six were appointed by the meeting and given full powers to carry on the work for the Coal Creek depositors.

o

Hiram Johnson found no chaos in Europe, but in other particulars he found Europe much like America.

The prohibition said to be in force in Constantinople does not prohibit the natives from clipping off the heads of Armenians or Greeks when they are in the humor.

Maude was invited for a week's visit at an aunt's who lived in another town. She had never been away from home without her parents, and knew she would get homesick.

"A Mass of Sores —No Sleep— Unhappy Days"

writes Mrs. Orange Harvey of Danville, Quebec, R. R. 3. "I doctored with doctors until the first of May. Then I got a bottle of D. D. D. AT ONCE MY FACE GOT BETTER. I used half a bottle only and have been entirely well ever since."

Why not see if half a bottle will relieve your case of skin disease, too—on our guarantee that the first bottle will show results or your money back? *Itching stops on the instant.* $1.00 a bottle. Try D. D. D. Soap, too.

D.D.D. THE Lotion for Skin Disease

N. E. SUDDABY—DRUGGIST

TO REMAIN IN ASSOCIATION

At a general meeting held in the Council Chambers of the City Hall on Tuesday evening of last week, the Cranbrook Board of Trade, after considerable discussion, voted the sum of $600.00 to the publicity fund of the South Eastern British Columbia and Southern Alberta Tourist Association.
