H. ENNIS.

December 6. 264

MONTREAL HIGH SCHOOL,
WITH WHICH IS INCORPORATED THE ROYAL GRAMMAR SCHOOL.

The Classes will be Re-opened on Monday, August 19th, at 11 o'clock, in presence of the Directors, when his Honor Judge McCord will preside, and make an appropriate Address to the Pupils.—Parents and Guardians are invited to attend.

Directors:

Hon. J. Fortier	Robert McKay, Esq
B. H. LeMoine, Esq	Hew Ramsay, Esq
Dr. Crawford	His Honor Judge M'Cord
J. J. Day, Esq	Dr. M'Culloch
D. Davidson, Esq	Wm. Lunn, Esq
Dr. Campbell	D. Torrance, Esq
John Young, Esq	C. Dunkin, Esq

Joseph Savage, Esquire.

David Davidson, Esq., Treasurer.
Hew Ramsay, Esq., Honorary Secretary.

Rector:—H. Aspinwall Howe, Esq., of Trinity College, Dublin.
Second Master:—T. A. Gibson, M. A.
Third Master:—Mr. Hodgen.
French:—M. Montier, Lecturer at McGill College.
Preparatory Department:—Mr. Johnson.

THE SYSTEM of INSTRUCTION is modelled from that pursued in the great Public Schools of England and Scotland, but undue time and attention are not given to the Classics to the prejudice of other branches of Education equally essential.

The COURSE comprises Latin, Greek, English and French Literature, the general Truths of the Christian Religion, the Elements of various branches of Mathematics, Familiar Lectures on Natural Philosophy, Elocution, History, Geography, the use of the Globes, Writing, Arithmetic, and Book-Keeping.

Drawing is added, if required, but there is an extra charge for it.

The year is divided into four Terms.

The First Term commences	August 20th.
The Second do do	November 6th.
The Third do do	February 1st.
The Fourth do do	April 25th.

The FEES, which are payable in advance, are as follows:—

The First and Second Classes,	£2	10	0	per Term
The Third, Fourth and Fifth do	2	0	0	do
Preparatory School	1	5	0	do

and 2s. 6d. per Term for Stationery.

In order to extend the advantages of this School to those who live at a distance, arrangements have been made to receive BOARDERS, to the formation of whose moral character, advancement in learning, and personal comfort, every care and attention will be given.

The Rector's Terms are £50 a Year; those of the First Master at from £35 to £40.

The French Master, also, is prepared to take Boarders on the same terms.

Montreal, August 13, 1850. 181

PROSPECTUS
OF THE
CANADA DIRECTORY.

THE Subscriber proposes to publish, by Subscription, so as to be ready for delivery in the Fall of 1851, or earlier, if possible,

A DIRECTORY OF CANADA,
CONTAINING THE
NAMES OF BUSINESS AND PROFESSIONAL MEN
IN THE
PRINCIPAL CITIES, TOWNS AND VILLAGES OF CANADA,
ARRANGED
1ST, ALPHABETICALLY BY CITIES, TOWNS, AND VILLAGES,
AND
2ND, ALPHABETICALLY BY BUSINESS AND PROFESSIONS IN EACH,
When the place is so large as to make the latter arrangement desirable.

A short description of each Town or Village will also be given, with its distance from the City with which it is most centrally connected, and the Steamboat or Stage late usually charged to reach it, together with such other information relative to the place as may be useful or interesting to the Public.

The Work will be got up in one large octavo volume, printed well, upon good paper, and bound substantially, and will be delivered to Subscribers at 15s. per copy.

As the expenses incurred in travelling and otherwise, to collect information for the Work, will be necessarily great, the following terms have been decided on:—

For inserting the Name and Business in small type	No Charge
For inserting the Name and Business in large type, not exceeding two lines	1s. 3d.
For inserting the Name and Business in large type, not exceeding four lines	2s. 6d.

These rates to be paid at the time the information is received from the parties; but, as an inducement to subscribe for the Work, it has been resolved, that every person ordering a copy, and paying 2s. 6d. at the time of so doing, will be entitled to have four lines inserted without charge, receiving credit for the 2s. 6d. so paid, when the book is delivered.

ADVERTISEMENTS

Will be inserted at the rate of 25s. per Page, when one Page or more is taken, and at the rate of 30s. per Page, when less than one Page is taken.

As the edition of the Canada Business Directory will be a large one, and will circulate extensively, not only in the Province, but in the Commercial Cities of Great Britain and the United States, it will be a most eligible medium of advertising.

Persons in business in the Country and the smaller Towns will find that the appearance of their names in the Canada Business Directory will be of great advantage to them, as in many instances Merchants doing business in the large towns, upon matters of importance; but from the absence of a Work such as the one projected, they are unable to do so, whilst its appearance will at once obviate this difficulty.

It would be almost superfluous to point out the many facilities which such a Work will afford to Merchants in the Cities and Towns, for extending their business connections, and as care will be taken that Copies shall be placed in the Merchants' Exchanges and Reading Rooms of the principal Commercial Cities of Great Britain and the United States, it will be for them, also, the very *best channel of publicity* which has ever been offered in Canada.

The Work is intended to appear in the Fall of 1851, or earlier if possible, and as a guarantee that it will be faithfully carried out, it is, perhaps, sufficient to say, that the information will be collected by the Subscriber, personally, in the principal Cities and Towns, and that it will be printed and published by John Lovell, of Montreal.

Gentlemen desirous of subscribing to, or advertising in, the Work, are respectfully requested to address, post-paid,

ROBERT W. S. MACKAY,
At John Lovell's, St. Nicholas Street.

Montreal, December 27, 1850. 272

THE CARRICK CLUB are prepared to LEASE the LARGE ROOM, in which they perform, for CONCERTS, SOIREES, LECTURES, &c., on the most reasonable terms.

Apply on the Premises, or to

F. S. JUDAH,
Secretary.

Montreal, December 23, 1850. 272

DR. MARSHALL'S CATARRH SNUFF,

A SAFE, certain, and speedy remedy for Headache, Catarrh, Deafness, Sore Eyes, Influenza, &c. For sale by

R. W. REXFORD, McGill Street.

Montreal, November 13, 1850. 255

TURKISH BLACK SALVE.

UNDER THE PATRONAGE OF THE HONORABLE THE EAST INDIA COMPANY.

THIS SALVE, prepared from the original Recipe, procured from a celebrated Turkish Hakim, (physician) of Smyrna, in Asia Minor, and which has obtained an unprecedented celebrity in Great Britain and the East Indies, from the astonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be expected, its popularity has followed it, and its use is becoming general among all classes. The contracted limits of an advertisement necessarily precludes entering into any adequate detail of its merits, but, for the information of the public, it is intended to publish, from time to time, such statements of cures as have or may occur. It has been used for the following complaints with the most complete success:—Sorb in Swollen Glands, Broken Breasts, Whitlows, Swellings, Whitflows, Scalds from Steamboat explosions, or other causes, Burns, Fever Sores, Scrofulous Sores, Sore Nipples, Carbuncles, Scald Head, Gun-shot Wounds, Bruises, Boils, Freshbites, Wens, Chilblains, Ulcerated and Common Sore Throats, and Tonsils. If used in time, it will prevent or cure Cancers, also, Swellings arising from a blow on the Breast, Ring Worm, Felon in the Ends, Broken Chilblains, Gout, Pain in the Chest, Palpitation of the Heart; Complaints in the Liver, Spitting of Blood, Spitting of Blood in the Lungs, Spitting of Blood in the Stomach, Spitting of Blood in the Bowels, Spitting of Blood in the Kidneys, Spitting of Blood in the Bladder; they operate most powerfully on these important organs, and hence are a certain remedy for the following complaints, viz. Spitting of Blood, Difficulty of Breathing, Pain in the Side, Pain in the Back, Pain in the Bowels, Pain in the Kidneys, Pain in the Bladder; they operate most powerfully on these important organs, and hence are a certain remedy for the following complaints, viz. Spitting of Blood, Difficulty of Breathing, Pain in the Side, Pain in the Back, Pain in the Bowels, Pain in the Kidneys, Pain in the Bladder, Inflammation of the Bowels, Inflammation of the Kidneys, Inflammation of the Bladder; they operate most powerfully on these important organs, and hence are a certain remedy for the following complaints, viz. Spitting of Blood, Difficulty of Breathing, Pain in the Side, Pain in the Back, Pain in the Bowels, Pain in the Kidneys, Pain in the Bladder, Inflammation of the Bowels, Inflammation of the Kidneys, Inflammation of the Bladder, Inflammation of the Lungs, Inflammation of the Throat, Inflammation of the Mouth, Inflammation of the Nose, Inflammation of the Ears, Inflammation of the Eyes, Inflammation of the Nipples, Inflammation of the Navel, Inflammation of the Groin, Inflammation of the Joints, Inflammation of the Ankles, Inflammation of the Feet, Inflammation of the Toes, Inflammation of the Fingers, Inflammation of the Nails, Inflammation of the Hair, Inflammation of the Skin, Inflammation of the Flesh, Inflammation of the Blood, Inflammation of the Bones, Inflammation of the Marrow, Inflammation of the Brain, Inflammation of the Heart, Inflammation of the Liver, Inflammation of the Spleen, Inflammation of the Stomach

[illegible] but a fast flea of man's fraternity [illegible] it is the cheap correspondence carried [illegible] between all members of the human family. [illegible] a man puts into a newspaper on the other side [illegible] the globe, is on the supposition that it will interest the rest of the family on this continent. As we learn more of our fellow-men, we feel a kindlier interest in them. We rejoice in their prosperity, sympathise in their calamities, and cheer on their struggles for the right and the good. These are now too easily conveyed abroad to allow a man to live like a snail. They enlarge the world to our knowledge and our love. Why is anything made public but on the belief that it will be of interest to many others? Why is it announced in your paper that Isaac and Rebecca were married on a certain day last week, but on the supposition that it will give you pleasure to know it? And when, lower down on the sheet, under that startling word *Death*, your eye runs along, always with apprehension lest it fall on some well known name, and sees that the aged father, the young child, the beloved wife, the sick, the poor, the admired, the honored, and the beautiful are gone, is it not taken for granted that even strangers will heave a sigh for the afflicted, and the world respond in sympathy to the incursions of a common foe? Read in this light, the commonest advertisements which crowd our papers have a kindly odor about them. Say not with a cynical sneer, as though you were doubtful whether there was anything honest in the world, when a store-keeper advertises his wares, that it is all sheer selfishness; for if it is pleasant to one to announce a fresh supply of tallow or wool, hardware or muslins, is it not just as pleasant to some other one who wishes to know it? When a brace of young partners in trade insert their virgin advertisement, informing the world how happy they shall be to wait on customers, can you read it without entering into their fresh hopes and giving them your blessing in their new career? Business advertisements! Waste paper! You know not what you say. Those ships which are to sail to every harbor in the world, those fabrics which have arrived from every commercial mart on earth, this iron from Russia, tea from China, wool from Smyrna, fruit from Malaga, coffee from Cuba, cotton from Georgia, sugar from Louisiana,—do they not preach to us at the corners of the streets, at the entering in of the gates, on our docks, and in our custom-houses and exchanges, sermons on the mutual dependence of mankind?—*Rev. Dr. Adams, of New York, in the Christian Review.*

☞ THE MONTREAL COURIER is published daily during the six business months of the year, viz.,—from the 1st of May to the 1st of November, and the other six months tri-weekly, on Mondays, Wednesdays, and Fridays. Subscription, six dollars per annum, payable in advance.

☞ THE EVENING COURIER (tri-weekly) is published on Monday and Thursday evenings, in time for the Mails, at the low price of THREE DOLLARS per annum, payable in advance.

☞ All LETTERS must be post-paid, or else the postage will be deducted from the amount sent.

☞ VOLUNTARY CORRESPONDENCE solicited from all parts of the Continent of America. If made use of, the person transmitting the information will be liberally remunerated.

THE COURIER.

WEDNESDAY, FEBRUARY 19, 1851.

Arrival of the English Mail.

SAFETY OF THE "ATLANTIC!"—We received yesterday morning two letters from our London Correspondent, the latest of which we publish to-day. The other was sent by the "Atlantic," and afterwards transferred to the "Africa." It will be seen that the "Atlantic" is safe, that vessel having put back into Cork, with the shafts of her engines broken. It is, however, gratifying to think that the fears of those who had beloved relatives on board are at length allayed.

William Kingsford, Esq., formerly Assistant Surveyor to the Corporation of Montreal, and now Engineer on the Hudson River Railroad, has just issued a pamphlet on the history, structure and statistics of Plank Roads in the United States and Canada, which is highly spoken of by several United States papers.

On Saturday evening last, Dr. Gibb delivered a highly interesting lecture before the Addiscoian Literary Society on the Natural History of the Mollusca.

He commenced by making some observations upon the classification of the Animal Kingdom by Cuvier, with modifications by Professor Owen, founded upon the condition of the nervous system, which he stated was the most correct, and strictly applicable to all classes of animals, from the very highest to the lowest in the scale of beings.

He then considered, in a general manner, the Mollusca, termed by Professor Owen the Heteroganglia, from having their ganglia or nervous masses placed unsymmetrically throughout the body, giving the general characters of each of the six classes comprised under this head, together with the derivation of the names of the classes themselves.

The limits of a single lecture would permit of his taking up only two or three classes, and the Cephalopoda first engaged his attention. The animals of this class, he said, were characterised by the possession of fins, or locomotive organs, around the head; whence their name. Of examples, he instanced the various tribes of cuttle fishes without shelly coverings, and those possessing shells, as the Nautilus, the Argonaut, and some others. These he particularly described, and gave a very interesting account of their habits, structure, and natural history, illustrating the subject, as he proceeded, by a number of well executed colored drawings of many of the animals in a magnified state, and showing some very remarkable specimens, one of which particularly attracted our notice,—this year's fine specimen of the Poulpe or Octopus vulgaris, brought from the West India Islands.

The shell extinct animals of this class were next reviewed, including the Ammonites, Belemnites, Turrilites, and other inhabitants of a former epoch, and now extinct.

He then briefly described the class Pteropoda, the animals of which possessed a wing and a foot, and showed drawings of the Clio and Hyalaea as examples.

He mentioned the classes Lamellibranchiata and Gasteropoda, which comprise the large collection of animals inhabiting bivalve and univalve shells, and which constitute the science of Conchology, a knowledge of which, he said, was essential towards the study of Geology. Time would not permit of his considering these two classes, but, as he had referred to the connection between the study of Conchology and Geology, it afforded him an opportunity of saying, that through the able exertions of Mr. Logan, of whom he spoke in the very highest terms of praise, the Geology of this country was becoming daily and constantly unravelled. And in contrast with peculiar pleasure, that the study of the natural sciences was becoming very popular throughout the Province, but especially in this city, where a large number of persons were giving up their attention and particular study to the branches of Geology and Mineralogy. He stated, in conclusion, that the connection of Geology and Conchology with an intelligent Mineral, that to study the one without the other would be almost impossible, and still, to render our knowledge the more perfect, a foundation, grounded upon the study of Chemistry, Mineralogy, and comparative Anatomy, ought not to be omitted.

His Lecture was listened to with much attention, and elicited applause. Owing to the inclemency of the weather, we did not see so large a number present as we could have wished.

A Lecture will be delivered in the Odd Fellows' Hall, this evening (Wednesday), at 8 o'clock, by Mr. Lucy, of Troy, New York. Subject, "A view of some of the most distinguished nations of Europe and America, their relative positions, present and past, with a short dissertation on Ireland's ancient glory and modern depression." Tickets of admission 1s. 3d. Ladies free.

NATURAL HISTORY SOCIETY.—Dr. Gibb will deliver his second lecture on the "*Natural History of the Mammalia*," before this Society, this evening, (Wednesday) at 8 o'clock. He will consider the orders "Insectivora" and "Carnivora," which will be illustrated by plates, and specimens from the museum of the Society. Admission free.

EUROPEAN AFFAIRS.

(FROM OUR OWN CORRESPONDENT.)

LONDON, January 31, 1851.

It is announced that the approaching Session of Parliament will be opened by Her Majesty in person; and that in the Lords the Address, in answer to the Speech from the Throne, will be moved by Lord Ellingham, and seconded by Lord Overstone; whilst in the Commons the same duties will be performed respectively by the Marquis of Kildare, the eldest son of the Duke of Leinster, and Mr. Pets, the eminent builder, who, by the way, is a Dissenter. The commencement of the Legislative labors is generally looked to with interest; there are always plenty of abuses to redress, and errors to recant. Prejudices, opinions, political schemes of all kinds and descriptions, fears, hopes, petitions, threats, hints, claims, prophecies, and demands, multiply during the fleeting recess; and by the time the two Houses are summoned for the despatch of business, the work to be accomplished has become so extensive, that *despatch* is impossible. During the present recess, Parliamentary stock has accumulated most unexpectedly and most extensively. Economies, Theology, Representation, besides a list of minor matters, are all pressing for immediate discussion. Ministers will certainly have their hands full, and never, since their accession to office, have they had less chance of giving anything like general satisfaction than they have in the approaching Session. Their very strength will embarrass them. Their surplus revenue, which is a matter of such sanguine congratulation, is claimed by every one, and thousands are expected to go the length of millions. It is pretty well understood, however, how Sir Charles Wood intends to dispose of his riches. The window tax is at length doomed, and a small house duty is to be substituted, which is calculated to yield about a third of the sum drawn from the window duties. The income tax may be altered in principle, though there is no intimation to that effect; but there is little probability of its being reduced in amount. Financial arrangements, however, if we are to believe generally accredited reports, will be the least of the Whig difficulties. The Papal aggression is the threatening rock a-head, on which it is said the Ministerial bark will split; and some do not hesitate to say that it has split already. At all events, it seems evident enough that very different opinions prevail in the Cabinet on this subject; and after the step which Lord John Russell has already taken regarding it, it is assumed that it must be brought forward by him for discussion in Parliament. In this case, there will, in all likelihood, be such a difference of opinion among the members of the Cabinet, as to lead to the reconstruction of the Ministry; but it may not follow that Lord John and his colleagues will resign. If report is to be credited, the Queen is strongly inclined to support the Premier's view of the question; and the retirement, even of two of the leading members of the Cabinet, may not endanger the stability of the whole. The settlement of the question, however, will soon take place in some way or other, and further speculation is unnecessary. I may as well give you one or two of the last rumors on this subject. One is, that Lord John Russell wants to let things remain as they are at present, avoiding anything in the shape of an *ex post facto* law—that is, letting the twelve Roman Bishops, who are already appointed to Sees in England, remain unmolested, but prohibiting the appointment of any more Popish Bishops in England, even as successors to those who are here already. Her Majesty is said to be opposed to such a measure, as being too partial. Another rumor is, that no Pope's Bulls are to be allowed to be introduced into this country—that no territorial titles are to be assumed without a license from the Crown—and that no Jesuits are to be permitted to reside in England, that is, no open and avowed Jesuits. These measures to be confined to England and Scotland only. That the Papal question will occupy a prominent position in the Queen's Speech, is quite certain. But the great difficulty has been in selecting the precise terms in which it is to be alluded to. Her Majesty is anxious to avoid anything offensive to her Roman Catholic subjects, if possible. The Queen has close personal intimacies, not to say friendships, with many of them; and the fact of there having been, within the last few days, four noblemen of the Orleanist family on a visit to Windsor Castle, all of them devoted and scrupulous Romanists, bears strong testimony to Her Majesty's charitable and benevolent feelings in that respect.

Another serious subject connected with the Church is the revision of the Book of Common Prayer, which it now appears is determined on. To the Duke of Bedford, it is said, has been committed the task of sketching out the ritual alterations which it is deemed expedient to make—though the revision will not, if it is understood, be confined to ritualism, but will extend to an exclusion of the Athanasian, if not also the Nicene creed, and to the expunction from the Liturgy—especially in the Offices for the administration of the Holy Communion and of Baptism—of all expressions which favor the doctrine of the Transubstantiation party. It is further said that the suggested alterations are to be submitted to a Commission of six Bishops, whose approval, or whose opinion of them, is to be referred to Parliament, when a Bill will be introduced to give them the sanction and authority of law.

Cardinal Wiseman continues to remain quiet, preaching himself, probably, for the two years residence in jail which he is threatened by Government, if the Cardinal is a-[illegible], he will [illegible] mind to submit to a [illegible] insertion for the good of the country, though it is extremely doubtful whether he will be even subjected to the ordeal of a prison. It is, however, better to be prepared and "equal to either fortune," whether freedom or imprisonment, for it is impossible to say to what lengths the Government measure will go.

You will see that letters have been received from the gallant officers composing the expedition in search of Sir John Franklin by way of Behring's Straits. Although no tidings have been received of the missing ships, so far all goes well to secure a thorough examination of the various points where Sir John Franklin may have taken refuge. Captain McClure, in the *Investigator*, proposes to push on to Bank's Land, which, if he accomplishes, he intends thoroughly to examine, and afterwards, if practicable, to get to the southward of Melville Island, and to resume the search along its shores and adjacent islands so long as the navigation can be carried on, wintering in the best place he can find. Next spring, he will despatch parties of his crew, with forty days' provisions, in different directions, in hopes of finding Sir John in some of the small bays and inlets around. Suppose these return without finding anything, and the vessel is liberated on the 1st of August next, he will then push on to Wellington Inlet, assuming that channel communicates with the Polar Sea, and search both its shores, unless he finds that it has been done previously by Captain Austin's party, and endeavor to penetrate in the direction of Jones' Sound, carefully examining every place that is practicable. Should Captain McClure effect all this, and find no traces of the long-missing expedition, he will then reluctantly give up all hopes of finding it, and return to England. I, for the thousandth time, have traced the proposed route on the Admiralty Chart, and coupling the efforts of Captain McClure with those which are being made on the eastern side, whatever may be the result, it will be a proud, however melancholy; satisfaction to the country, and to the relatives of the missing crews, that everything will have been done to avert the cruel fate which may befal them.

The return of the American Mail Steamer *Atlantic*, to Cork, after having proceeded 1800 miles on her outward voyage across the Atlantic, has occasioned a good deal of remark. She broke the shafts of her engines, and, after an ineffectual attempt to make Bermuda, was compelled to put back. I have had my fears for some time past that some serious accident would happen. The two rival Companies, professing the greatest regard for each other, have been fighting in the papers for the last few months, and it was generally predicted that by urging their speed to the uttermost bounds, some serious accident would ensue. The misfortune has cast a shade over the success of the Collins' Line, and the Cunard Packets will again be restored to their former position in the public mind. The passengers by the *Atlantic* are all safe, and one of the British Steamers will take them and the Mail bags—which, by-the-way, will be rather stale—to New York.

The building for the Exhibition is certainly progressing fast towards completion, but the works will not be finished before the middle of February. The painting of the outside of the South transept has commenced, but I cannot say that the effect is such as I see it described. It is a very dingy blue and white, which, perhaps, may look very well when the decorations are complete, but at present it is down-right self-delusion to say "the effect is pleasing." It is, in fact, quite premature to give an opinion upon the decorations when they are only just commenced. The enormous transept is now glazed in, and the reticulated roof, which has the appearance of lace-work, is very novel and beautiful. The building, altogether, is certainly a marvel, considering how rapidly it has been run up. The late high winds are said to have caused a good deal of damage to the glass portion of the edifice. Mr. Paxton's grand idea of free admission to the Exhibition, has given rise to a good deal of comment, and the public feeling is, on the whole, against it. To be sure there is something very dignified in affording the nations of the world free access to the World's Exhibition, but if this advantage is to be purchased by a Parliamentary grant for defraying the immense expenses of the said Exhibition, it is rather too dearly purchased. There is an immense number of people in the country who don't like the Exhibition, or approve of its objects, and who would very naturally object indirectly to pay towards it. The fitness plan seems to be, for those who want to see the Exhibition to pay for it. No doubt nothing would be more agreeable than to allow foreigners the privilege of walking in and out of the Crystal Palace at pleasure, as they do in and out of their own national exhibitions; but Englishmen have a strong antipathy to Government making free with their money for this sort of purpose, and don't like the idea of being taxed even for the sake of the Great Exhibition.

The Victoria Tower of the new Palace at Westminster has been on fire, and damage done to the extent of £100; and if it was not the work of an incendiary, it is difficult to conceive how it originated.

Meetings against the Window Tax are being held in various parts of the Metropolis. A great deal of nonsense is talked, as usual, about "stopping the supplies" in the event of Ministers not yielding to the clamor. But Lord Bentinck, Mr. Stuart, Mr. Williams, and the other gentlemen who repeat so loudly, are silent enough when in the House of Commons. Amidst the general outcry for a reduction of taxation, no one thinks of reducing the National Debt; and yet this ought to have been seen to 20 years ago.

At length Mr. Joseph Hume has commenced the working man's memorial subscription to Sir Robert Peel amounts to £1,450, which is to be applied according to a joint meeting of the Committee and Trustees may determine.

The book post will be extended, after the 1st March next, to the British West Indies, Newfoundland, Gibraltar, Malta, and Hong-Kong, so that any one residing in those Colonies will be able to receive from England any book at the rate of 6d. postage for every half pound weight. In every case the postage will have to be prepaid.

Lord Langdale is about to retire from the Rolls, and will be succeeded by Sir John Romilly, the Attorney-General. This will add another to the already numerous Parliamentary vacancies.

The Obituary includes the names of the Marquis of Northampton, President of the Royal Society, and a nobleman of great scientific attainments; the Marquis of Hastings—an Ensign in the 52nd Foot; Lord Burghersh, the eldest son of the Earl of Westmoreland; Lord Robert Taylour; Lord Dalmeny, the heir presumptive of the Earl of Rosebery; and Field-Marshal Grave, an officer, during years gone past, on the staff on the coast of Africa, who recently returned to Montreal, his native city. This gentleman, we understand, was, by more trifling occurrence, fortunately prevented from embarking in the steamer *Atlantic*, and sent from England in the *Asia*, the week following.

—The events in France continue to be of an important nature. The debate on the vote of confidence in the Baroche Ministry lasted four days, the speakers being all leading men of the Assembly,—Berryer, Jules de Lastigne, Thiers, Lamartine, Cavaignac, &c. Ultimately, an amendment, moved by M. De St. Beuve, declaring that the Assembly had not confidence in the Ministry, and avoiding, at the General's own request, all allusion to Changarnier, was carried by a majority of 417 to 286. With this decisive majority, composed of 200 ultra and moderate Republicans, 115 Legitimists, and 100 Orleanists, M. Baroche and his colleagues had no other alternative but to offer their resignations, which, after some hesitation on the part of the President, were received. After a crisis of several days, Louis Napoleon found it, or pretended to find it, impossible to form an Administration from the minority in the recent division; and the efforts of MM. Leon Faucher, Odillon Barrott, Lamartine, and even M. Billault, all successively failed. The President, in this extremity, hit upon the plan of naming an extra-Parliamentary Cabinet. The principal Prefects from the Departments were summoned to Paris, and, with a General, (Randon,) a Rear-Admiral, and one or two business men, were marshalled as a new Cabinet, not a single member having a seat in the Assembly. They presented themselves to the Assembly, their advent being announced in a short, but conciliatory, Message from the President. In this document, the Prince declared, "that the union of the two powers was indispensable to the repose of the country, but as the Constitution has rendered them independent of each other, mutual confidence is the only bond of their harmony." He then goes on to say, "that whilst he shall always respect the rights of the Assembly, he shall maintain intact his own rights. He has in the present juncture formed a Ministry of transition." The Assembly listened to all this in deep silence. The Bonapartists call it a message of love, but, alas! in 24 hours after its delivery, a new coalition had been formed, and a storm of interpellations threatened the new Cabinet from all quarters. The message of peace is, in fact, regarded as an absolute threat to the Assembly. The formation of an extra-Parliamentary Cabinet is considered a subterfuge to avoid the natural consequences of a direct vote of want of confidence, and is, in truth, wholly without precedent in France. Some go so far as to threaten the President with impeachment, as he, in his message, presumes to place himself as a separate independent power as regards the Assembly, which is in direct violation of the Constitution, which makes the Assembly the paramount Sovereign body. The struggle for ascendancy has now assumed a serious form, and every move of the respective parties deepens the interest of the contest. The interpellations, however, made on Monday, in the Chamber, by M. Howyn Franchere, a young Orleanist Representative, ended in smoke. M. de Royer, the Minister of Justice, declared that the present is only a Ministry of transition, and the Assembly separated in agitation, without coming to any trial of strength. Of course the conflict is only deferred until the several parties have agreed on a settled plan of action; but, split as the Assembly is into so many sections, a lasting coalition between the extreme right and the Thiers party, and Mountain, is almost impossible.

The Austrians have entered Lunenburg and Hamburgh, in spite of the protest of the Senate of the free city. It is further stated they intend to occupy Rendsburg. Should it prove true, it will be an additional proof of the folly of the Schleswigers and Holsteiners in having been incited to the late mad and disastrous war. A new transition Government has been appointed for the Duchies, pending the Conferences at Dresden. It is quite evident that Austrian influence predominates in Germany.

Very serious disturbances have broken out in Switzerland, where the Conservatives and Socialists have come to blows; the latter have been put down by the Swiss troops, but it is feared that this outbreak will give Austria and Prussia a pretext for interfering in the affairs of the Republic.

Montreal Dispensary.

At the meeting of the Committee of Management, held last Tuesday, the following Report for the quarter ending 6th February, 1851, having been adopted and approved, was directed to be published for the information of the supporters of the Institution:—

Patients under treatment on 6th Nov., 1850, 15; admitted from 6th Nov., 1850, to 6th Feb., 1851, 116. Of these there have been discharged:—Cured 74; Relieved 12; Dead 3; sent into Hospital 2, and 18 are still under treatment; of the 116, 69 belonged to the Church of Rome, 34 to the Church of England, and 7 were Wesleyans, 9 were sick Subscribers, 4 Sick Charitable Subscribers, and 97 were recommended; 39, or more than one-third, were attended at their own residences.

Their ages were:—Under 2 years, 8; from 2 to 5, 6; from 5 to 20, 23; from 20 to 40, 51; from 40 to 60, 18; over 60, 2.

The diseases treated have been:—Fevers, 6; Diseases of the Digestive Organs, 11; of the Circulatory, 5; of the Respiratory, 21; of the Urinary, 2; of the Nervous System, 5; of the Skin, 22; of the Eye, 7; Rheumatism, 1; Injuries, 3; other Surgical Affections, 17; Female Complaints, 10.

If the above Report be compared with the one of the previous quarter, it will be seen that in each, nearly the same number of individuals have become patients of the Institution, and if the late inclement season be considered, as well as other circumstances, necessarily dependent upon it, whereby patients could not with safety leave their residences, and walk thence some distance to the Dispensary, we may feel surprised that the number is so large as it is, and may not unjustly presume that it would have been still greater, had these external circumstances been more favorable; in which statement we may also see not merely a clear declaration of the demand there is for the Institution, but also an encouraging invitation to continue its usefulness.

GEORGE D. GRIER, M. D., Chairman.
WM. WATSON, M. D., Secretary.

MONTREAL BOTANICAL SOCIETY.—At the last monthly meeting, the Structure dropped of 22 sharps at 20½ per cent. bloom.

MR. Joseph Gardet, of the Commissariat, who has lately received promotion, for voluntary services, during years gone past, on the staff on the coast of Africa, has recently returned to Montreal, his native city. This gentleman, we understand, was, by more trifling occurrence, fortunately prevented from embarking in the steamer *Atlantic*, and sent from England in the *Asia*, the week following.

AMERICAN MECHANICS ON OUR RAILROADS.—A gentleman who formerly resided in Toronto, in a letter from Cincinnati, states that—

"There has been a wonderful excitement got up here among tradesmen and mechanics, relative to the Railroads from Toronto and Hamilton; ties and numbers are preparing to leave this place for either of those cities early in the spring. Whether the expectation of much work and large wages will be realized remains to be proved."

There is a movement in this city at present, to procure a Clergyman of the Irish Presbyterian Church to preside over a congregation of Irish Presbyterians, now forming in this city, and which intends to give him a call to his mission. It appears that at present the Irish Presbyterians in this city are scattered over various congregations, and from early predilections, many of them feel disposed to form themselves into one united body, under the pastoral care of a Minister from their own country.—*Toronto Colonist.*

SEAT OF GOVERNMENT.—A few friends met on Wednesday afternoon, to arrange a requisition to the Mayor to call a public meeting in reference to the threatened removal of the Government. It was agreed that the requisition should be placed in the hands of different persons in each Ward, to procure signatures, and that the requisition, when signed, should be presented to His Worship the Mayor to call a public meeting on as early a day as possible. It is hoped that all the parties to whom papers shall be sent will attend promptly to the business, and that they will receive the assistance of all others willing to aid them in the work. In this matter prompting of any kind would be entirely out of place, as much so as it is along their uncalled for. There is no rousing necessary. The community is aroused already to a sense of the threatened injustice, and they only want an opportunity of meeting together—Whig, Tory, and Radical—Clear Grit, Annexationist, and Independent—or by whatever other name the subdivisions political of the community may be known, to express their views of the threatened injustice.—*Colonist.*

INQUEST.—An Inquest was held on Monday afternoon, before Dr. King, at Peterson's Inn, Bathurst Street, on the body of Daniel Byrd, formerly a private in the 73rd regiment. Deceased was found dead in bed on Sunday morning. It appeared in evidence that deceased had laboured under chronic diarrhœa, which was much aggravated by his having been addicted to intemperance, and that on Saturday he drank a great quantity of whiskey. During the night, the door of his room was open, and a broken pane the snow drifted in upon the bed. His wife was in bed with him, but was unable to help him, from the fact of being equally addicted to drunkenness. The jury returned for verdict:—Death by chronic diarrhœa, aggravated by want of care, intemperance, and exposure to the inclemency of the weather.—*Globe.*

ROBBERY FROM THE ENGINE HOUSE.—A rather novel kind of depredation was committed on Saturday or Sunday night last. Some party or parties entered two Engine Houses in town, and carried off the connecting hose, and other apparatus belonging to the fire engines, thus rendering them entirely useless in the event of a fire. It will be seen by advertisement that the Corporation have offered a reward of 100 dollars for the apprehension of the villains. The British American Fire Company have also offered a reward of £25.—*Ib.*

CANADIAN DEBENTURES.—By the steamer of 18th January, we are happy to notice that Canadian securities are still rising in value in the London market. At the latest dates, Canada 6 per cent. bonds are quoted at 107 @ 107½—or even *and a half per cent. premium!* By the same quotations, United States Federal six per cents. were selling at 102½ @ 105—one particular issue only bringing 108 @ 108½. New York State sixes brought only 104 @ 105. On this side the Atlantic, Canada Debentures are not to be had, and the Banking Bill is likely to be a dead letter, from the impossibility of obtaining the necessary securities. One gentleman assured us the other day he was prepared to purchase Debentures to the extent of $200,000, if he could procure them, and it is said that one of our money Corporations is in treaty for the disposal of $100,000 of these securities at 5 per cent. premium.—*Globe.*

A PAPER FOLDING MACHINE.—This ingenious and useful invention, which was exhibited in Taylor's machine shop, in Hague street, on Saturday afternoon, to a large number of persons, is about six feet long and three feet wide, is capable of folding newspapers in as many folds as may be desired, and can be attached to the press or fed by hand.

The papers are carried on tapes, moving horizontally, until they reach a certain point, when a brass rule strikes the sheet from below, at the point in which it is desired to make the fold, forcing it between two diverging rollers, which seize it, and carry it to the next set of rollers, where the same process is again gone through with, and repeated until the paper is delivered, neatly folded, and ready for mailing. The machine can be driven with any speed desired, and will fold more rapidly than any press can print. It can be fed by hand and made to fold from 2,500 to 3,000 papers per hour, according to the skill of the feeder. Each paper is accurately folded, and the machine is so simple that there is no danger of its getting out of order. It has been in use in the Transcript office, in Boston, for some months; and has done during that time all the folding.

The machine is the invention of Mr. E. N. Smith, of Springfield, who is preparing another to fold book work, which will cause a complete revolution in this branch of trade, especially in offices where public documents are printed, as at Washington.—*N. Y. Post.*

A FREE VERSION OF THE BIBLE.—The Governor of Texas, in his late proclamation for Thanksgiving, gives the following quotation from the Bible, which may be new to some, if not all of our readers:—

"In the beautiful and expressive language of the Bible, 'The winter of our discontent is gone; the rain is over and past; the time of the singing of flowers is come, and the voice of the turtle is heard in our land.'"

We have heard of a practice which is said to prevail before Justices of the Peace in the "rural districts," where Bibles are scarce, of swearing witnesses on the next best book to the Bible, which is at hand. The recollection of this usage suggests to us the suspicion, that Governor Bell has been obliged to promote the works of Shakspeare to the place in his library which the Bible ought to occupy. We commend his case to the Bible Society, as one calling for immediate relief.

It is shocking to think of the Governor of a Sovereign State being in such a destitute condition as to be obliged to cite a half-remembered sentence from the Scriptures with a sadly-jumbled one from the bump-backed and misformed Shakspeare.—*New York Post.*

SOMETHING NEW.—A factory has been established at Galveston, by G. Borden, Jr., called the "Meat Biscuit Factory." The meat biscuit is a newly discovered article of food, and highly esteemed on account of its alimentary qualities, and for the length of time it may be preserved. The factory contains an engine of ten horse power, which drives the machinery, consisting of biscuit machines to knead, roll, and cut the dough, a biscuit oven, the patentee the biscuit, and the guillotine for removing the meat, to facilitate the boiling. The Galveston contains the following account of the process of manufacturing the biscuit:—

"There are four wooden cylinders or tubs for boiling the meat; two for boiling the meat, holding 2,200 gallons, will each boil 7,000 lbs. of meat, in twelve to sixteen hours. The other two, for evaporating, will contain some 1,400 gallons each. All the tubs are heated or boiled by steam passing through long coiled iron pipes, supplied at pleasure either from the escape steam from the engine, or direct from the boiler.

"When the meat is so far boiled or macerated that the liquid or broth contains the entire nutriment, the meaty or cotyledonous portions are separated by a simple process of filtering, so that the broth goes into the evaporator pure and free from fibrous matter. It is that component of the meat which is so delicious and nutritious, and which, in its concentrated form, is known as Liebig's Extract of Meat, or Valentine's Meat Juice, or Wyeth's Beef Tea, or Hunter's Beef Tea, or Mott's Beef Tea, or Bell's Beef Tea, or Bell's Beef Tea, or Bell

MONTREAL, 11th February, 1851.

TO MESSRS. DORWIN, MATHEWSON, GAULT, AND OTHERS,

Electors of the St. Ann's Ward of this City:

GENTLEMEN,

I feel myself highly honored by your invitation to become a Candidate, for Election, to represent your Ward in the Council of this City.

Should the Electors think proper to elect me as one of their Councillors, I will endeavor to serve them, as far as my previous engagements will permit.

I have the honor to be,
GENTLEMEN,
With high consideration,
Your very obedient humble servant,
JACOB DEWITT.

MONTREAL, 12th February, 1851.

GENTLEMEN,

I feel highly honored by the reception of your Requisition. I can assure you, it is with much reluctance I come forward, at your request, as a Candidate for civic honors, knowing that a proper discharge of the duty will require much personal sacrifice.

I feel it to be the duty of all who have an interest in the welfare of the City, to share in the administration of its affairs, when required. With that view, I place myself at your disposal, and will endeavor, if returned, to give my attention to the interests of the City, and particularly to St. Ann's Ward.

I have the honor to be,
GENTLEMEN,
Your obedient servant,
WILLIAM RODDEN.

To Messrs. Dorwin, Mathewson, Gault, and others.

February 17, 1851. 296

FOR SALE OR TO LET,

THOSE extensive and well-known PREMISES, No. 109, St. Paul Street, formerly occupied by the late Firm of BARRETT & HAGAN, Hardware Merchants, and now by Messrs. HIBBARDS & Co., and belonging to the Estate of J. T. BARRETT, Esq., including a large and commodious WAREHOUSE in St. Jean Baptiste Street, well adapted for either a Wholesale Hardware or Dry Goods Establishment. Possession given on the 1st May next. For further particulars, enquire of

C. DORWIN,
St. François Xavier Street.

Montreal, February 14, 1851. 294

February 3, 1851. 289

TO LET,

AN excellent STORE in Notre Dame Street. The LIVERY STABLES, (late Robertson's.) Apply to

JOHN LEEMING.

January 27, 1851. 286-3w

P. P. LEVINE,

(LATE OF THE OTTAWA HOTEL, McGILL STREET,)

INFORMS his Friends, and the Public generally, that he has LEASED that Extensive and Commodious Establishment, the "EXCHANGE COFFEE HOUSE," heretofore so favorably known as "GOODENOUGH'S."

The House and Furniture have lately been put in thorough repair, and a Wing added thereto, for the purpose of affording additional accommodation.

His Table will be supplied with the Choice of the Market, his Wines and Liquors unexceptionable.

His extensive Stabling will admit of accommodating far more Horses than at his former Hotel.

Montreal, January 15, 1851. 281

DANCING ACADEMY.

W. P. LEVINE informs his Friends and the Public, that he has RESUMED his CLASSES for DANCING, on MONDAY, WEDNESDAY, and FRIDAY evenings, at the EXCHANGE COFFEE-HOUSE, St. Paul Street.

Families and Schools attended.

Montreal, November 8, 1850. 258

MR. McDONALD begs to intimate to the Young Ladies and Gentlemen of Montreal, that, having completed his arrangements for the Season, his CLASSES will meet on MONDAY, WEDNESDAY, and FRIDAY EVENINGS, at his DANCING ACADEMY, (RIDEAU Rooms,) 49, Notre Dame Street.

A JUVENILE CLASS on Tuesday, Thursday, and Saturday AFTERNOONS, from 4 to 6 o'clk.

Montreal, October 22, 1850. 241

300 SHIRT and COLLAR MAKERS WANTED.

W. C. MILES,
175½, Notre Dame Street.

Sept. 19. 212

WEST WARD.

TO THE ELECTORS OF THE WEST WARD.

GENTLEMEN,—It has afforded me much gratification to learn that the result of the double canvass of the West Ward, which has just been made by Messrs. R. P. ISRAECSON and A. R. STEWART, on behalf of myself and JOHN FISHER, Esq., and by Messrs. J. B. ISRAECSON and G. SMITH, on behalf of myself and H. H. WHITNEY, Esq., is that my name has been almost unanimously placed on both tickets.

If the confidence thus so generally expressed should place me, at the approaching Municipal Election, in the Corporation as one of the Councillors for the West Ward, I beg to assure you that I shall endeavor to promote the interests of the City to the best of my ability.

I have the honor to be,
GENTLEMEN,
Your most obedient servant,
JOHN LEEMING.

Montreal, January 17, 1851. 284

H. H. WHITNEY, ESQ.:

DEAR SIR,—I enclose you a requisition, numerously signed by Voters of the West Ward, begging you to allow yourself, in conjunction with Mr. JOHN LEEMING, to be named as a Candidate for the said West Ward at the next ensuing Municipal Election.

On my own part, I have to inform you, that, in connection with Mr. J. B. ISRAECSON, I have carefully canvassed the Ward, and do not hesitate to affirm, that a majority of the Voters thereto have pledged themselves to support you.

I am,
SIR,
Yours very truly,
GEO. SMITH.

Montreal, 17th January, 1851.

MR. GEO. SMITH:

MY DEAR SIR,—I beg to acknowledge the receipt of your note, and also the requisition accompanying it: in reply, I beg to state that I feel highly honored by the call made on me by so large a number of the Voters of the West Ward, and shall be happy to comply with their request.

With many thanks for the trouble you have taken in the matter, believe me,

DEAR SIR,
Yours very truly,
H. H. WHITNEY.

Montreal, 17th January, 1851.

TO THE ELECTORS OF THE WEST WARD.

GENTLEMEN,—I have just received, through the hands of Mr. GEORGE SMITH, a requisition, numerously signed by Electors of your Ward, requesting me to allow myself to be nominated as a Candidate with Mr. JOHN LEEMING, for the said Ward, at the next Municipal Election. I feel honored at the call so made on me, and have much pleasure in acceding to the wish contained in the said requisition, and assure you, Gentlemen, that if I am elected as your representative in the City Council, no effort on my part shall be wanting to prove that the confidence reposed in me has not been misplaced.

I have the honor to be,
GENTLEMEN,
Your obedient servant,
H. H. WHITNEY.

Montreal, 17th January, 1851. 284

ST. LAWRENCE WARD.

MONTREAL, February 6, 1851.

TO ROLLO CAMPBELL, Esq.,

Proprietor of The Pilot.

SIR,

The Undersigned, Electors of St. Lawrence Ward, respectfully invite you to become a Candidate for its representation in the City Council. We pledge our votes, and our best exertions, to secure your return.

We are,
SIR,
Your obedient servants,

A. N. Morin, Speaker Legislative Assembly,	
C. G. Hill,	Thomas Bell,
H. Stearns,	William Kelly,
James Simpson,	James Walker,
Louis De Chastel,	Patrick O'Hare,

M. Killoch,	Patrick Carroll,
John Fraser,	William Barron,
Wm. Malone,	Martin Macdonnell,
Edward Mansfield,	

MONTREAL, February 7, 1851.

GENTLEMEN,

In reply to your communication, I have to say, that I regard the office of City Councillor as very important and honorable.

Having been a resident in Montreal for nearly a quarter of a century, it may be presumed that I am generally acquainted with its affairs, and desirous of forwarding its interests.

Encouraged by your invitation, and by the numerous assurances of support which I have already received, I am induced to declare myself a Candidate for the representation of St. Lawrence Ward.

It is, perhaps, somewhat late to enter into the contest, but I rely on your well-known energy, and entertain a confident persuasion that it will be crowned with success.

Placed by your suffrages in the Council, I shall give my support to all measures calculated to promote the prosperity, sustain the credit, and enhance the reputation of this city.

I am,
GENTLEMEN,
Your obedient servant,
ROLLO CAMPBELL.

To the Hon. A. N. MORIN, M. P. P.,
C. G. HILL, Esq., &c., &c. 288

ST. LAWRENCE WARD.

TO J. B. BRONSDON, Esq.:

WE, the Undersigned, Electors of the St. Lawrence Ward, respectfully solicit that you will accept our nomination of you, as our Representative in the City Council, to fill the vacancy which will occur on the 4th March next; and we hereby, by our signatures, pledge ourselves to record our votes in your favor, and use our influence and exertions to secure your return.

Montreal, January 27, 1851. 288

A. Gunlock,	P. Lignieve,
Thomas Leonard,	John Dunlevy,
Edw. Venner,	Wm. Dunlop,
Michael Maguire,	Hugh Boyd.

GENTLEMEN,

In reply to your Requisition, I beg to place my services at your disposal; and in return pledge myself, if elected as your Representative, to use my best endeavors to secure good and cheap Municipal government.

Accept my thanks for the proffered honor.

I am,
GENTLEMEN,
Your most obedient servant,
J. B. BRONSDON.

To Charles Golden, W. Aitken, M. D., S. C. Bagg, Esqs., and others.

Montreal, January 29, 1851. 288

BRITANNIA

LIFE ASSURANCE COMPANY,

No. 1, Princes Street, Bank, London.

CAPITAL.—ONE MILLION STERLING.

Empowered by Special Act of Parliament, 4 Vict., Chap. 9.

REDUCED RATES OF PREMIUM—HALF CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at *much lower Rates of Premium than those of any other Assurance Company transacting business in Canada.*

The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies.

ERASMUS R. FOSTER,
Resident Director.

London, January 1, 1847.

Detailed Prospectuses, and every necessary information as to the mode of effecting Assurances, may be obtained upon application to

For the Removal and Permanent Cure of all
NERVOUS DISEASES,
And of those Complaints which are caused by an impaired, weakened or unhealthy condition of the
NERVOUS SYSTEM.

This beautiful and scientific application of the mysterious powers of GALVANISM and MAGNETISM, has been pronounced by distinguished physicians, both in Europe and the United States, to be the *most valuable medicinal discovery of the age.*

Dr. CHRISTIE'S GALVANIC BELT
and
MAGNETIC FLUID,

is used with the most perfect and certain success in all cases of

GENERAL DEBILITY,

Strengthening the weakened body, giving tone to the various organs, and invigorating the entire system. Also in FITS, CRAMP, PARALYSIS and PALSY, DYSPEPSIA or INDIGESTION, RHEUMATISM, ACUTE and CHRONIC, GOUT, EPILEPSY, LUMBAGO, DEAFNESS, NERVOUS TREMORS, PALPITATION OF THE HEART, APOPLEXY, NEURALGIA, PAINS in the SIDE and CHEST, LIVER COMPLAINT, SPINAL COMPLAINT, and CURVATURE of the SPINE, HIP COMPLAINT, DISEASES of the KIDNEYS, DEFICIENCY OF NERVOUS and PHYSICAL ENERGY, and all NERVOUS DISEASES, which complaints arise from one simple cause—namely,

A Derangement of the Nervous System.

☞ In NERVOUS COMPLAINTS, Drugs and Medicines *increase the disease*, for they weaken the vital energies of the already prostrated system; while, under the strengthening, life-giving, vitalizing influence of Galvanism, as applied by this beautiful and wonderful discovery, the exhausted patient and weakened sufferer is restored to former health, strength, elasticity and vigor.

The great peculiarity and excellence of

Dr. Christie's Galvanic Curatives,

consists in the fact that they arrest and cure disease by *outward application*, in place of the usual mode of drugging, and physicking the patient, till exhausted Nature sinks hopelessly under the infliction.

They strengthen the whole system, regulate the circulation of the blood, promote the secretions, and restore at the slightest injury under any circumstances. Since their introduction in the United States, only three years since, more than

75,000 Persons

including all ages, classes and conditions, among which were a large number of ladies, who are peculiarly subject to Nervous Complaints, have been

ENTIRELY AND PERMANENTLY CURED,

when all hope of relief had been given up, and everything else described in vain!

To illustrate the use of the GALVANIC BELT, suppose the case of a person afflicted with that bane of civilization, DYSPEPSIA, or any other Chronic or Nervous Disorder. In ordinary cases, stimulants are taken, which, by their action on the nerves and muscles of the stomach, afford temporary relief, but invariably leave the patient in a lower state, and with injured faculties, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyspeptic sufferer, even in the worst symptoms of an attack, and simply tie the Belt around the body, using the Magnetic Fluid as directed. In a short period the insensible perspiration will set on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thence back again to the positive, thus keeping up a continuous Galvanic circulation throughout the system. These are seven cases of DYSPEPSIA are PERMANENTLY CURED. A FEW DAYS IS AMPLY SUFFICIENT TO ERADICATE THE DISEASE OF YEARS.

CERTIFICATES AND TESTIMONIALS

Of the most Undoubted Character,

From all parts of the country could be given, sufficient to fill every column in this paper.

AN EXTRAORDINARY CASE,

which conclusively proves that

"Truth is stranger than Fiction."

CURE OF

Rheumatism, Bronchitis and Dyspepsia.

REV. DR. LANDIS, A CLERGYMAN

of New Jersey, of distinguished attainments and exalted reputation—

SIDNEY, New Jersey, July 12, 1848.

DR. A. H. CHRISTIE—Dear Sir: You wish to know of me what has been the result in my own case, of the application of THE GALVANIC BELT AND NECKLACE. My reply is as follows:

For about *twenty years* I had been suffering from Dyspepsia. Every year the symptoms became worse, nor could I obtain permanent relief from any course of medical treatment whatever. About *fourteen* years since, in consequence of frequent exposure to the weather, in the discharge of my pastoral duties, I became subject to a severe Chronic Rheumatism, which for year after year caused me inexpressible anguish. Further: in the winter of '43 and '44, in consequence of preaching a great deal in my own and various other churches in this region, I was attacked by the Bronchitis, which soon became so severe as to require an immediate suspension of my pastoral labors. My nervous system was now thoroughly prostrated, and my Bronchitis became worse, so that did my Dyspepsia and Rheumatic affection—thus evincing that these disorders were connected with each other through the medium of the Nervous System. In the whole pharmacopœia there seemed to be no remedial agent which could reach and recuperate my Nervous System; every thing that I had tried for this purpose had completely failed. At last I was led by my friends to examine your invention, and though with as very sanguine hopes of their efficacy, I determined to try the effect of the application of the GALVANIC BELT AND NECKLACE, with the MAGNETIC FLUID. This was in June, 1846. To MY GREAT ASTONISHMENT, IN TWO DAYS MY DYSPEPSIA HAD GONE; IN SHORT DAYS I WAS ENABLED TO RESUME MY PASTORAL LABORS, NOR HAVE I MISSED OMITTING A SINGLE SERVICE ON ACCOUNT OF THE BRONCHITIS, AND MY RHEUMATIC AFFECTION HAS ENTIRELY CEASED TO TROUBLE ME. Such is the wonderful and happy result of the experiment.

I have recommended the BELT and FLUID to many who have been likewise suffering from Rheumatic affections. They have tried them, WITH MARVELLOUS RESULTS, I understand, in every case.

I am, dear sir, very respectfully yours,
ROBERT W. LANDIS.

DR. CHRISTIE'S GALVANIC NECKLACE

is used for all complaints affecting the Throat or Head, such as Bronchitis, inflammation of the Throat, Nervous and Sick Headache, Deafness of the Head, Neuralgia in the Face, Snoring or Noises in the Ears, Deafness, which is generally Nervous, and that distressing complaint, called Tic Doloreux.

DR. CHRISTIE'S GALVANIC BRACELETS

Are found of great service in cases of Convulsions or Fits, Spasmodic Complaints, and general Nervous Affections of the Head and upper extremities. Also in Palsy and Paralysis, and all diseases caused by a deficiency of generic or Nervous Energy in the limbs or other organs of the body.

Tic Doloureux and Neuralgia.

These dreadful and agonizing complaints are immediately relieved by the application of the GALVANIC BELT, NECKLACE AND FLUID. The Belt diffuses the Electricity through the system; the Necklace has a local effect, and the Fluid acts directly upon the affected parts. In these diseases, the combination of the application NEVER FAILS.

☞ No trouble or inconvenience attends the use of DR. CHRISTIE'S GALVANIC APPLIANCES, and they may be worn by the most feeble and delicate, with perfect ease and safety. They can be worn the entire twenty-four hours, and are highly pleasant and agreeable. They can be sent to any part of the country.

Prices!

The Galvanic Belt,	Three Dollars.
The Galvanic Necklace,	Two Dollars.
The Galvanic Bracelets,	One Dollar Each.
The Magnetic Fluid,	One Dollar.

☞ The articles are accompanied by full and plain directions. Pamphlets with full particulars may be had of the Authorized Agent.

PARTICULAR CAUTION.

☞ Beware of Counterfeits and Worthless Imitations.

ELEGANT AND INVALUABLE ARTICLES FOR THE TOILET.

BOGLE'S HYPERION FLUID,
FOR NURTURING, BEAUTIFYING, AND PRESERVING THE HAIR.

The following Testimonial from Mr. William Lewis, one of the most eminent Professors of Music, will show the estimation in which this valuable preparation is held by the scientific and fashionable portion of the community.

BOSTON, Feb. 15, 1847.

Mr. Wm. Bogle, Sir,—The Hyperion I purchased of you for the hair, has been extensively used in my family, and they give it the decided preference over all other compositions of the kind. It invigorates and beautifies the hair, and cleans the skin of all impurities, without producing any obnoxious deleterious effects, which are so frequently the result of many well-known patented compounds.

WINSLOW LEWIS.

It is an indispensable article for the Ladies, as it keeps the hair in place and curl, and the skin or parting of the hair free from dandruff and scurf. For children, it lays the foundation of a good head of hair.

BOGLE'S AMOLE,
A COMPOUND FOR SHAVING.

This delightful article is totally different and far superior to anything yet invented for shaving. The base of it is derived from the *Amole*, or "soap plant," of California, an article used by the natives of that country for washing; and thus the use of strong alkali, so hurtful to the skin, is avoided. Its vegetable and detergent properties have the purest and most nourishing effects on the skin,—it soothes and allays irritation, and has a fine, thick, creamy lather, which does not dry on the face. It is a decided luxury to be shaved with this incomparable soap. It is done up in elegant style, calculated either for the dressing case of the "rough and ready" traveller, or the toilet of the most fastidious connoisseur.

BALDNESS CURED.

The following is from Seymour F. Barrett, Saratoga Street, East Boston:

EAST BOSTON, Feb. 8, 1847.

Mr. William Bogle,—Dear Sir: For several years past, my wife has been troubled with baldness on the Crown of the head, about six or seven inches in circumference.—After repeated failures of other so-called remedies, and by the advice of friends, she was induced to use your Hyperion as a wash, for the purpose of restoring her lost hair, and I am happy to say that its effect has been to cause the hair to grow all over the part affected. She has used only two bottles, and that very irregularly; had she used it oftener and more regular, I am convinced that the growth of the hair would have been accelerated. I am, Sir, yours respectfully, SUMNER F. BARRETT.

BOGLE'S HEBEAIONA,
FOR REFRESHING AND BEAUTIFYING THE COMPLEXION,

Eradicating Tans, Pimples, and other eruptions of the skin, and rendering it fair, delicate, and blooming. It is equally efficacious in protecting the skin from the hot rays of summer, and freezing blasts of winter, and is the most fragrant and delicious article to be found at the toilet of fashion.

All the above articles have stood the test of the strictest investigation, and are WARRANTED superior to anything yet invented.

WILLIAM BOGLE, Proprietor,
277, Washington St., Boston.

AGENTS FOR CANADA:—Wm. Lyman & Co., Montreal; J. B. Masson, Quebec; R. Love, Toronto.

CHEMICAL CHEWING GUM.

A SUPERIOR PREPARATION OF SPRUCE CHEWING GUM, for removing the Tartar and cleansing and preserving the TEETH; a most admirable article for sweetening the Breath, imparting a delicious fragrance to it, and leaving the Teeth and Gums in a healthy state.

Prepared by CURTIS & PERKINS, Druggists, Sole Proprietors, Bangor, Me.

For Sale by WM. LYMAN & Co., St. Paul Street, and Dr. PICAULT, Notre Dame Street.

Montreal, October 3, 1860. 224

OVERWHELMING TESTIMONIES

OVER HALF A MILLION OF TESTIMONIES have been received by the proprietors of

MCALLISTER'S ALL-HEALING OINTMENT,

From Physicians the most skilful and celebrated, from Counsellors learned in the Law, from Judges of celebrity on the Bench, from Ministers of the Gospel, whose unelevating integrity have made them shining lights in the path of Truth, from enlightened Professors of the Healing Art, and from those of every station, name and degree among mankind—all of which, without one dissenting objection, pronounce this Ointment to be INFALLIBLE in the cure of Tumors, Ulcers, Scrofula, Scrofulous Tumors, Piles, Scrofula, Erysipelas, Chilblains, Tetter, Scald Head, Sore Eyes, Quinsy, Croup, Rheumatism, Broken Breast, Ague in the Face, Corns, &c. It completely restores the INSENSIBLE PERSPIRATION, and by this means opens the avenues by which the same (matter) is expelled, and restores the healthy action of the body—thus is the system cleansed, the blood purified, and the health restored.

It has power to cause all external Sores, Scrofulous Humors, Skin Diseases, and Poisonous Wounds, to discharge their putrid matter, and then heal them, and will certainly be found to be efficient and certain.

DR. LA'MERT

ON THE INFIRMITIES OF YOUTH & MATURITY.
Just Published, 40th Edition, and may be had in French and English, in Sealed Envelope,
2s. 6d. Sterling.

SELF-PRESERVATION:

A MEDICAL TREATISE ON THE PHYSIOLOGY of MARRIAGE, and DISORDERS of YOUTH and MATURITY, usually acquired at an early period of life, which enervate the physical and mental powers, diminish and enfeeble the natural feelings, and extinguish the energies of Manhood—with practical observations on the Treatment of Nervous Debility, and Indigestion, whether arising from those causes, close study, or the Indulgence of Tropical Climates; Local and Constitutional Weakness, Syphilis, and all Diseases and Derangements resulting from Indiscretion,—with Forty Coloured Engravings, illustrating the Anatomy, Physiology, and Diseases of the Reproductive Organs, explaining their structures, uses and functions, and the various injuries that are produced in them.

BY SAMUEL LA'MERT, M. D.,

No. 37, Hedford Square, London.

Doctor of Medicine, Matriculated Member of the University of Edinburgh, Licentiate of Apothecaries' Hall, London, Honorary Member of the London Hospital, Medical Society, &c.

This Work contains an accurate and complete account of the Anatomy and Physiology of the Reproductive Organs, and of their relative conditions in health and disease. Nor are these the sole contents of the Work; the means of escape, as well as the nature of the dangers, are pointed out in plain and intelligible language. It deservedly requires the closest attention and study, for what subject can be of more importance than the preservation of health, and of the physical capabilities of which every man should be possessed. It unfortunately happens that the unhappy victim of excessive indulgence and vicious habits, whether acquired in early life, or from the follies of advanced age, while suffering from their inevitable consequences, generally entertains a fear of applying to a qualified physician for relief. Shame and the dread so frequently, but erroneously, entertained, that these complaints are beyond the reach of art, make restrict him, and prevent the seeking for assistance, where alone it can be procured. In acting thus, he forgets that accurate discrimination in ascertaining the causes of disease, sympathy with the sufferer, and, above all, secrecy, invariably characterize the intelligent and practical physician, and to the medical man, who can show by his possession of the requisite legal qualifications, that he is entitled to esteem and respect in his professional pursuits, the utmost confidence should be extended. Dr LA'MERT has obtained the highest medical honors, as his diplomas testify, and the great extent of his practice for many years, is a guarantee for his professional experience, which has confined almost solely to the treatment of these diseases.

The Work may be had in Montreal, of Messrs. DAWSON; in St. Johns, of H. CREES & Co., price 2s. 6d. Sterling; Halifax, Messrs. MORTON & Co.

December 20. 270

ST. LEON AND CAXTON SPRINGS.

MONTREAL, June 3, 1860.

For the past twelve months I have frequently recommended the Waters of the St. Leon and Caxton Springs, and have formed a favorable opinion of their efficacy as aperients in various derangements and diseases. I have found both Waters well adapted, in the generality of cases, for accomplishing all the purposes of the ordinary saline aperient draughts, over which their bulk and alkaline ingredients give them, for continued use, a superiority.

W. FRASER, M.D.,
Lecturer on the Institutes of Medicine, McGill College.

JOY TO THE BED-RIDDEN.
A VALUABLE DISCOVERY FOR
THE INSTANT CURE OF PAIN.

RADWAY'S READY RELIEF

Cures the worst diseases in Minutes and Hours, and stops the most great pangs of pain in Seconds.

SO quick and efficacious is RADWAY'S READY RELIEF, in stopping pain and curing diseases, that it has frequently relieved the patient, and been pronounced from a bed of sickness in a few hours. It has frequently cured the worst pains of—

Rheumatism	In four hours.
Neuralgia	In twenty minutes.
Tic Doloreux	In ten minutes.
Toothache	In three seconds.
Nervous Headache	In fifteen minutes.
Sour Stomach	In five minutes.
Heart-Burn	In five minutes.
Bowel Complaints	In thirty-five minutes.
Cramps and Sprains	In twenty-five minutes.
Diarrhœa	In one hour.
Inflammation of the Bowels	In thirty minutes.
Local Inflammations	In ten minutes.
Influenza	In twelve hours.
Homeroyds	In ten hours.

Spinal Complaints, Swellings, Bruises, Sores, Wounds, &c., it will remove ten times quicker than any other remedy in use.

LET THOSE WHO SUFFER TRY IT!

It will prove itself in a few minutes. As soon as it is taken internally, or applied externally, its beneficial effects are seen. It is better than all other remedies.

HERE IS THE PROOF.

There is no other remedy that claims to subdue the cruel pangs of pain in seconds, minutes, or even hours. They require the patient to use dose after dose before a favorable change is promised. Not so with Radway's Ready Relief. Its effects are instantaneous; the first dose that is taken; or the first external application, commences its great work of relief from pain.

BEAR IN MIND,

That Radway's Ready Relief will cure either of the above-mentioned Diseases in one-tenth the time it takes any other Remedy to give even Partial Relief.

TAKING COLD.

This sentence is constantly in the mouth of every person, in order to explain certain complaints. Those who use it often, we think, have but a faint idea of its precise meaning. We will offer an explanation, which we believe to be the opinion of a majority of the most learned physicians. A person, for instance, has been over exerting any particular set of muscles—of the throat, from violent speaking—of the loins, by too much stooping or bending, or these or any other part of the body; these parts or muscles are, consequently, weakened and relaxed, and become a fair prey for any disease. The person who has been thus acting, accidentally or otherwise, exposes himself to the cold air, the perspiration immediately ceases, and the blood, which had been but just now circulating rapidly throughout the surface of the body, is repelled inwardly, and is sure to settle in those parts which have been previously wearied and relaxed. Here, then, we have an accumulation of blood, congestion, which gives rise to all the pain and stiffness attendant upon such complaint. When this takes place in the throat, we have what is called Sore Throats; when in the loins, Lumbago or Stiff Back; when in the chest, Pleurisy. We also have it in the shoulder-blade, side, and other parts.

RADWAY'S READY RELIEF,

Taken Internally and applied Externally.

Its first action, when freely applied, is to blunt the acute sensibilities of the nerves, and almost instantly relieves the pain; its secondary action is to excite perspiration, and redden the parts over which it is applied almost to a glow, thereby determining the blood from the injured parts to the surface. In these cases, the READY RELIEF should be applied freely, at the same time saturate the parts with a piece of flannel, and it will be found in every case to give immediate and permanent relief.

N. B.—If convenient, a piece of flannel saturated with the RELIEF, and held or pinned around the parts, does good service.

A BAD COUGH CURED IN TEN MINUTES.

Mr. Rigdon, of Brooklyn, the celebrated Church Singer and Organ-Player, on the night of the 10th of December was attacked with a severe fit of coughing, and was coughed from 9 o'clock until 12 o'clock, P. M., without three minutes intermission. One of the Clerks of Radway & Co., whp sleeps in the next room, got up and gave him a tea-spoonful of the Relief internally, and bathed his throat, neck, and breast, and also saturated a piece of flannel with the Relief, and laid it over his chest. In a few seconds the coughing ceased, he could expectorate freely, and raised with perfect ease. A great sensible relief followed. The Relief immediately quieted the irritation of the throat, and removed the inflammation from the lungs, and gave free action to them, produced a free and copious perspiration of the throat and chest; and in ten minutes he was entirely free from pain, and fell into a sound and pleasant sleep. In the morning he was free from hoarseness and cough, and has not been troubled since. Let every individual who is troubled with a cough, sore throat, influenza, or hoarseness, procure the same plant, and we will warrant them a speedy cure.

LAMENESS

If you have a stiff joint, a wrenched limb, a swelled leg, a bruise, or any thing short of a broken bone, Radway's Ready Relief will cure you at once. The lame have been restored to the free use of their limbs by a few applications of the Relief. The cripple, who has limped from spot to spot upon his crutch, has been relieved of his painful afflictions, and enabled to stand erect, as God designed (ha! Man should stand) by a few times using the Relief.

THE RHEUMATIC,

Who has been bed-ridden for years, shut out from the busy world, and fingered with pain upon a touch of sickness, deprived of the society of friends, and of the pleasures of life, has been raised from a lingering death by the soothing, healing, and pain-relieving influences of Radway's Ready Relief. In all cases of Rheumatism—even the worst cases—one trial of Radway's Ready Relief will prove its superiority over all other remedies in use.

BLEEDING AND BLIND PILES.

Are instantly eased, taking the Ready Relief internally—say a tea-spoonful of the Relief in a table-spoonful of Molasses, and make a Cream of the Relief, by adding to it Sweet Oil, and anoint the parts affected. If the sores are very bad, take a leaf of tobacco, dip it in warm water, then wet it with the Relief and lay it on the sores, you will have immediate relief and a speedy cure.

AGE VERSUS YOUTH.

Radway's Ready Relief renews the vigor of youth in old age. The old man of seventy is invigorated by its strengthening and refreshing effects; it arouses the vital energies to life—the heavy and languid motion of the functions of the body is quickened to a healthy action—and the hitherto dull and stupid old man becomes active and vigorous in old age, and his life prolonged to the full number of his days.

FOR ALL PAINS,

Whether internal or external, take Radway's Relief, or apply it externally, it will relieve pain and cure disease quicker than any remedy.

RHEUMATISM CURED IN TWO HOURS.

Mr. Jones, of Clifton, Va., writes:—A lady in this place has been confined to her room for four months with Rheumatism; she purchased a bottle of Radway's Ready Relief—in two hours she was able to leave the room, and in the evening she walked out.

For Sale by R. W. REXFORD, Dr. PICAULT, and WM. LYMAN & Co., Montreal; Agents: J. B. Massey, Quebec; Hoar & Lay, Toronto.

October, 1850. 225

THIS GALVANIC EMBROCATION is an unparalleled remedy for the Cure of Rheumatism, Acute or Chronic, seated in the Head, Joints or Limbs; The Dyspepsia and Gout, in its severe forms, Palsy, Sciatica, or King's Evil, Spinal and Hip Complaints, Stiffness of the Joints, Lumbago, Neuralgia, Chilblains; Fever Sores, Salt Rheum, Ring Worms, White Swellings, Diseases of the Skin, Erysipelas, Goitre or Thick Neck. It is likewise highly recommended in the most confirmed cases of Scrofula and Scrofulous Affections of the Neck, Affections of the Spine, Mercurial Affections, &c., &c., &c.

It is now generally admitted, by the learned and scientific that the mysterious power called Galvanism, Magnetism, is in fact the principle of Vitality or Life, and that disease in many of its most painful forms is entirely owing to the absence of this Galvanic or Magnetic power in its healthy proportion. It, then, we can readily supply this wonderful power, when it is thus deficient, we supply the grand remedy, disease; and this has been fully and positively ensured by this most wonderful curative discovery, of combining Magnetism or Galvanism with a Fluid which has cost the inventor of this remedy years of study and labor.

There is not an intelligent Physician, who has kept pace with the progress of science, that does not readily approve of the use of the Magnetic power in nervous diseases, and there is scarcely a Medical Journal, either in this country or Europe, which makes its appearance, without the statement of various cases, showing some new effects of these wonderful agents, or corroborating previous experiences of their beneficial use. The inventor of the Galvanic Embrocation has great pleasure in being able to state, that a majority of the most distinguished Physicians of New York constantly recommend this Embrocation to their patients, and have conferred upon it the highest and kindest testimonials of approval and commendation.
