HAMEL, HATTER.

THE Subscriber would respectfully inform his friends and the public in general, that he has removed a part of his Establishment to 27, North Side of King Street, directly opposite Cross Street, and one door below Mr. J. Frost's Shoe Store, where he will be found ready to serve the Public with HATS and CAPS of his *own Manufacture*, made under his inspection, which he feels warranted in saying are equal to any made or sold in this City, as has been proved at the Exhibitions held in this City and Fredericton, and also at Halifax, N. S., from which he received a Certificate of merits under the Seal of that Province.

The business will be conducted as formerly at his old Stand, under the management of his Nephew, D. Magee, a practical Hatter; where the Public will always find a good article, and at a reasonable price.

HEALTH OR, SICKNESS!

CHOOSE BETWEEN THEM.

HOLLOWAY'S PILLS

The Blood furnishes the material of every bone, muscle, gland and fibre in the human frame. When pure, it secures health to every organ it unpoisonedly produces disease. HOLLOWAY'S PILLS operate directly upon the elements of the stream of life, neutralizing the principle of disease, and thus radically curing the malady, whether located in the nerves, the stomach, the liver, the bowels, the muscles, the skin, the brain, or any other part of the system.

USED THROUGHOUT THE WORLD.

HOLLOWAY'S PILLS are equally efficacious in complaints common to the whole human race and in disorders peculiar to certain climates and localities.

ALARMING DISORDERS.

Dyspepsia, and derangement of the liver, the source of infinity and suffering, and the cause of innumerable deaths, yield to these curatives, in all cases, however aggravated; acting as a mild purgative, alternative and tonic; they relieve the bowels, purify the fluids, and invigorate the system and the constitution at the same time.

GENERAL WEAKNESS—NERVOUS COMPLAINTS.

When all stimulants fail, the renovating and bracing properties of these Pills give firmness to the shaking nerves and enfeebled muscles of the victim of general debility.

DELICATE FEMALES.

All irregularities and ailments incident to the delicate and sensitive organs of the sex are removed or prevented by a few doses of these mild, but infallible alteratives. No mother who regards her own or her children's health should fail to have them within her reach.

SCIENTIFIC ENDORSEMENTS.

The London "Lancet," the London "Medical Review," and the most eminent of the faculty in Great Britain, France and Germany, have eulogized the Pills and their inventor.

Holloway's Pills are the best remedy known in the world for the following diseases:

Asthma	Female Complaints	Piles	
Bowel Complaints		Stone and Gravel	
Coughs	Headaches		
Colds	Indigestion	Secondary Symptoms	
Chest Diseases	Influenza		
Costiveness	Inflamation	Venereal Affections	
Dyspepsia	Indward Weakness		
Diarrhœa		Worms, of all kinds.	
Dropsy	Liver Complaints		
Debility			
Fever and Ague	Lowness of spirits		

Sold at the Manufactories of Professor HOLLOWAY, 80, Maiden Lane, New York, and 244 Strand, (near Temple Bar, London,) by all respectable Druggists and Dealers in Medicines throughout the United States and the civilized World, in boxes at 25 cents, 62½ cents, and 1$ each.

☞ There is a considerable saving by taking the larger sizes.

Poetry.

A SONG,

FOR THE ANNIVERSARY OF THE SHUTTING OF THE GATES OF LONDONDERRY.

By the Rev. JOHN GRAHAM, M.A.

AIR—"Auld Langsyne."

FULL many a long wild Winter's night,
And sultry Summer's day,
Are past and gone since James took flight
From Derry walls away.
Cold are the hands that closed that gate,
Against the wily foe,
But here, to Time's remotest date,
Their spirit still shall glow.

So here's a health to all good men—
Now fearless friends are few:
But when we close our gates again,
We'll then be all true blue.

Lord Antrim's men came down yon glen
With drums and trumpets gay;
Our 'Prentice Boys just heard the noise,
And then prepared for play;
While some opposed, the gates they closed,
And joining hand in hand,
Before they wall resolved to fall,
Or for their freedom stand.

When honour calls to Derry walls,
The noble and the brave,
O! he that in the battle falls
Must find a hero's grave.

Then came the hot and doubtful fray,
With many a mortal wound;
While thousands in wild War's array
Stood marshalled all around.
Each hill and plain was strewed with slain,
The Foyle ran red with blood,
But all was vain the town to gain—
Here William's standard stood.

Renowned are those who face their foes,
As men and heroes should;
And let the slave steal to his grave,
Who fears to shed his blood.

The matchless deeds of those who here
Defied the tyrant's frown,
On history's bright rolls appear,
Emblazoned in renown:
Here deathless Walker's faithful word,
Sent hosts against the foe,
And gallant Murray's bloody sword
The gallic chief laid low.

We honour those heroic dead—
Their glorious memory;
May we, who stand here in their stead,
As wise and valaint be.

Oh! sure a heart of stone would melt,
The scenes once here to see—
And witness all our fathers felt,
To make their country free.
They saw they lovely matron's cheek
With want and terror pale—
They heard their child's expiring shriek,
Float on the passing gale!

Yet here they stood, in fire and blood,
As battle raged around;
Resolved to die—till victory
Their purple standard crowned.

The sacred rights these heroes gained,
In many a hard-fought day,
Shall they by us be still maintained,
Or basely cast away?
Shall rebels vile rule o'er our isle,
And call it all their own?
Oh, surely no!—the faithless foe
Must bend before the throne.

Then here's a health to all good men,
To all good men, and true;
And when we close our gates again,
We'll then be all true blue.

Miscellany.

SLAVERY.—Our American neighbours, always is sensative on this tender point, and anxious to extend the market for the sale of "Human Cattle," take it in great dudgeon that British Cruisers board all suspicious looking Vessels, even though bearing the American flag, for the human purpose of putting a stop to this Inhuman, and anti-Christian traffic. They threaten to send out a *privateer*, to *annihilate the British Navy*, for dearing to *insult* "The flag of the Union." Surely Tom Thumb is growing bold, when he talks of attacking a Giant In the plenitude of good nature we would suggest to Brother Jonathen, to first clean his own hearthstone, before he attempts to interfere with his neighbours. We think if he "can fix up things," in California, Texas, Neworleans, and elsewhere he will find as much fighting as he has appetite for.

ANNEXATION.—A State of Main paper has noticed the idea of that state coming in under the Cross of St. George, and becoming a British province, so soon as it is determined on to complete the Canada Trunk line of Rail, to the pacific ocean. Jonathen notwithstanding his bluster occasionally, still remembers and sometimes acknowledges his relationship with Uncle Bull.

SUSPENDED ANIMATION.—In Baltimore, on Friday morning, about two o'clock, a German woman who had been ill for some time was supposed to have died. Her flesh becoming cold and her limbs rigid, she was laid out and prepared for the grave. Those who had the care of her then closed the room and retired to rest. At about 6 o'clock the woman's husband herd some one calling from his wife's room, and on opening the door saw her setting up in bed. She asked why her child, which was crying in another room, was not quieted, and upon the inmates of the house gathering around her she talked to them and drank some wine, a cup of tea and a glass of water.—She had a vague idea of what was going on while they were laying her out, but had not the power to move or speak, and after returning to consciousness asked her husband what they had been doing with her after she fell asleep. She seemed much better than she had for some days, but about 8 o'clock she died.—*State of Maine.*

ATLANTIC TELEGRAPH.—Mr. Samuel Gurney, of London, recently gave an entainment to his associate directors of the Atlantic Telegraph Company and the officers of the United States navy, now in London, to further that undertaking.—Mr. Peabody was among the number, with several of his countrymen interested in promoting the advancement of the two nations. It appears in the course of about a fortnight or three weeks an experiment will be made by running the cable out from the coast of Ireland, a distance of about 600 miles so as to reach the greatest depth that will have to be encountered and to test the general completeness of the machinery. The final starting of the expedition it is hoped will take place about 10th of June, in order that the mid-point of the Atlantic, between Newfoundland and Ireland may be reached on the 15th of June. At that period, there will, in those latitudes, be only about four hours of night; and as a full moon will lend her aid, there will absolutely be no interval of darkness throughout the operation.—*Correspondence of N. Y. Commercial.*

THE NEW YORK HERALD'S OPINION OF THE WAR WITH ENGLAND.

The resolutions introduced in the Senate yesterday, to confer power upon the President to protect the honor of the republic when delay would be incompatible with its dignity, will meet the approbation of the country. The occurrence of a naval war with England at the present time under the provocation caused by the recent flagitious outrages upon our commerce in the port and waters of Cuba, is not far beyond the bounds of probability, but is looked upon by many interests here as a thing eminently desirable in the juncture of affairs.

There has been no time for a long series of years past and will not be for very many to come, when such a war would inflict upon us so little injury and bring so much benefit as now. Our foreign commerce has dwindled down to its minimum point and our domestic trade is stagrant through the effect of the late finicial revulsion. Under the curtailment which our commerce with foreign nations has undergone for the past six months there is probably not one third of the American interests afloat now that there was one year ago.—Owing to the same cause the five million of specie in the country has left the healthy channels of circulation and is in a large degree accumulated as a dead weight in our bank vaults.

If we should now be carried into a naval war with England it would have both a present and prospective effect upon us which would in the aggregate be very advantageous. In a political point of view, it would stop at once all this senseless sectional agitation upon the slavery question. It would for ever settle the tariff discussion, by stopping for a time our revenue from foreign trade and force us at once into the system of direct taxation which we are now able to bear. It would necessiate the immediate construction of a waggon road to California across the shortest route; and if the war continued long enough would build the railroad to the Pacific. It would settle for ever the question of the right of visit upon the ocean and place our flag upon a recognized and permanent footing. It would sweep away the Clayton-Bulwer treaty probably bring Cuba into the Union, solve the question hanging about Central America, abolish the lost remnant of the African Slave Trade and change the entire phase of our foreign affairs by showing practically to the powers of Europe how little need the United States has of their good will.

But it is in its material point of view that it would develope the greatest advantages to this country. Under the double stimulus given to production and trade hereby, the cutting off of our foreign supplies, and the sudden demand by the frederal government for every kind of material, our domestic industry would suddenly start into most active life. Our cotton manufactures would not only have the entire home demand for goods but the supplies of cotton being cut off for England the merchants of all the world would come here—for a time, perhaps under other flags than ours—to buy the produce of our looms. The demand for these would probably increase fourfold within a year and instead of consuming six hundred thousand bales of cotton yearly, we might consume two and a half millions of bales. These would come North, to employ the busy hands of our Northern population, bringing to all of them a vast amount of traffic. Every interest attendant upon the manufacturers and the carrying trade would participate in their prosperity. A similar result would attend the iron trade, with all its vast ramifications; the coal mining interest the machine making, house building, and every other branch of mechanical skill, would experience the same new demand upon it, and even the common labourer would find suddenly on every side a call for his exeitions.

At the same time the necessities of government would give all impetus to the now accumulated specie. Loans would be called for the proceedings of which would be immediately distributed among the mechanics and the laboring classes, for the building of ships, casting of guns, making of clothing preparing of rations, and meeting the thousand requisitions of war; and war prices would at once infuse life and health into every branch of trade. Our merchant marine would be turned into privateers, and the officers and crew come home with pockets full of prize money instead of primage. It would be suddenly discovered that we possess every kind of soil, climate and production within ourselves, and the developement of home industry would become a passion throughout the country. In conjunction with these results, we should cease the continual remittance of our specie abroad, and find employment for it at home; while the twenty or twenty-five millon now annually paid in Europe for interest on loans and bonds would be stopped altogether.

The results to England of a war with the United States would be directly the reverse of all this. While we should experience the same stimulus to our domestic that she did in her war with Russia, with her there would be a falling off in the supply of the staples of industry, and consequently a decrease of employment. Her commerce harrassed upon the ocean her supply of cotton cut off, a cessation of trade and specie ballances from America to supply the drain upon her for her Eastern wars, the payment of the large amount of interest due from his country denied, her cotton mills stopped, their forge fires in part put out, and every branch of her internal trade feeling acutely the withdrawal of the supplies and demands of America, would produce a political revolution in England that would overthow all her aristocratical and oligarchical institutions her political importance would follow the decline of her commercial superiority and her relative position could never be re-placed as it now is.—The United States would acquire a political and industrial preponderence in the world from which she could not be driven for ages.

FROM OUR LONDON CORRESPONDENT.

LONDON, JUNE 5, 1858.

Little except politics is now discussed. Parliament has re-assembled after the Whitsuntide holidays, and is now in full vigour. Debates are animated and divisions plenty. The chief subject since the recess has been Mr. Disraeli's post-prandial speech at Slough—a very clever effusion, intended to take with the country and infinitely amusing; but one which has proved very mischievous to the government instead of helping their cause, and which has greatly hindered public business. Last Friday Lord John Russell tried his hand as a critic of the speech; on Monday Lord Palmerston followed the example; and on Tuesday in the Lords the Earl of Clarendon appeared in the list. Mr. Disraeli has been very clever in his replies to these attacks; and his colleagues in either house, whatever their private opinions may be as to his discretion, have been compelled to support the Chancellor of the Exchequer in all his capers before the eyes of his constituents. ☞

In the Lords the question of the Jews has assumed a new phase. The peers, or a large body of them, appeared at length to be convinced that our respected Hebrew friends must be admitted to parliament, and on Monday night the Earl of Malmesbury and Earl Stanhope added themselves to the number of those recreants who have given up the Newdegate and Spooner theories, and now admit, if not the abstract question, yet the policy of admitting the Jews. To the Earl of Lucan, of all men in the world belongs the credit of making a suggestion which will probably settle this long vexed question. He proposed an amendment in the Oaths bill, by which either House will be able, by a vote, to alter the language of its oaths in the case of any particular member, and leave out the words "on the true faith of a Christain" at their pleasure. The result will certainly not be as suggested, to secure harmony between the two Houses because the Commons will then allow the Jews to sit, while the Lords will exclude them. Such a compromise however will put an end to the chance of a collision between the House of Commons and the Law Courts. This seemed propable, inasmuch as a majority of the lower House were bent on admitting Baron Rothschild in some way—either by a bill or by a resolution, which latter, unless founded on an Act of Parliament, would have been disregarded by Lord Campbell sitting in Westminster Hall. For the present the subject has been postponed, in order that a bill may be introduced in the sense of the Lucanic proposal.

Lord Stanley has been appointed President of the Board of Control, and is succeeded at the Colonial office by Sir Bulwer Lytton. The latter has written an eloquent appeal to his constituents in Hertfordshire, but it is said he will be opposed by a youthful scion of the house of Grosvenor, and in that case his return will be a matter of some doubt. The negotiations with Mr. Gladstone, the object of which was to induce him to take a seat in the Cabinet have failed. Of his own will, the eloquent member for the University would have freely yielded to the seductions of Lord Derby and of office; but his friends over-persuaded him.—In the meantime Mr. G. is not over pleasant in speech as far as Lord Palmerston is concerned, and on Tuesday evening attacked him upon the Suez canal scheme in a way which could not be wholly agreeable to the ex-premier, and was hardly thought respectful or courteous by the House.—Perhaps after all Mr. Gladstone's accession to office, though it would strengthen the ministry oratorically, would really weaken its ranks.

There has been a state prisoner at Westminster. Washington Wilks, publisher and editor of a newspaper at Carlisle, inserted in his journal a personal attack upon Mr. Clive, a member of the House, who had presided over a Committee which had recently given an adverse decision upon a railway scheme of the district. For this high offence and breach of privilege Mr. Wilks was called to the bar, was declared guilty of "a false and scandalous" libel, and was ordered into the custody of the Serjeant at Arms. But in these days a State prisoner is not subjected to the boot or thumb screw, is not often imprisoned in the Tower, and is still less often beheaded on Tower-hill. Instead of all this, he had comfortable rooms in the Palace at Westminster, took walks on the terrace fronting the river, was allowed on Sundays to attend service at the Abbey, to eat and drink (spirits excepted) anything he liked to order, and received the visits of his friends without let or hindrance. After the subject had been several times brought before the House Mr. W. Wilks made a full retraction of the charge, and was ordered to be discharged on payment of the fees; no trifle, by the way.

(TO BE CONTINUED)

☞ A member of the Canada Legislature, recently stated in his place in the House, that

1st.—The distance from Chicago to New York, via the Erie Canal, is 1629 miles. That from Chicago to Quebec, via the Ottawa Route, would be 1051 miles, so that Quebec, in addition to being nearer to Liverpool than New York, would be brought 628 miles nearer than city to the centre of Western commerce, were the Ottawa ship canal constructed.

2nd.—The length of canal between Chicago and New York is, at the smallest calculation, 237 miles, with 77 locks; that between Chicago and Quebec, via the St. Lawrence, only 69 miles, with 51 locks; but the much shorter route between Chicago and Quebec, via the Ottawa, would only require 41½ miles of canal, with 68 locks.

THE RAIL ROAD.—The Cars having commenced running, it is to be hoped, in those "piping times of poverty," that the fares will be put at the lowest possible figure, in order to afford the most humble an opportunity of a trip to the Bush, as well as to induce a large amount of Travel, and as a natural consequence to swell in the agregate the amount of the proceeds.

Julius Thompson, Esq., Manager of the New Brunswick and Canada Railway and Land Company, has published several letters he had written to M. H. Perley Esq., He accuses Mr. Perley with having stated that the said railroad is all a humbug, slightly constructed, &c.; that the trains dare not travel on it more than 12 miles an hour, and that it will take £6,000 per mile to make it substantial. He calls upon Mr. Perley to explain or retract, but that gentleman maintains a "dignified silence," and will do neither.

FOR THE CHRONICLE.

MR. EDITOR, SIR,

In looking over the "Royal Gazette," I find the names of men who have lately been appointed to office by the present Government, with which the public mind are familiar, and while they have received the reward of treachery, and double dealing, may be sure sure that their sins will find them out, and will not go unpunished; although they have received the prize for which they sacrificed their principles of honour, and truth, yet the day is not far distant, when such men, shall be hurled from the position they now occupy, and worthy men appointed in their stead. It is said by Madam rumour, that the Government have got themselves into a fix, in appointing the Sheriff of the City and County of St. John's, having it is said at a time yet fresh in the memory of the people of this Province, made promises and entered into written contracts, with certain men to support them, and who have now pressed the Government for a fulfilment of their engagements. Mr. James A. Harding intending to be remunerated for his trickery, to the late Grey Government, and the valuable services he has rendered the Great Smasher confederation, demanded the Shrievality; there being also several applicants for the office, by men who have similar claims on the Government; but they had only promises made verbally, and easily evaded, but Mr. Harding's screw of a mortgage on the Government has proved a bitter Pill for them to swallow. Mr. James A. Harding has proved himself too shrewd a man, for Fisher Tilley, & Co., and they have found to their cost, that written agreements are not to be trifled with. By the recent appointment a seat in the Assembly of this Province becomes vacant, and now the question is who is the man to fill it. Mr. Lawrence is the man spoken of as a candidate of the Conservative Party, and is one who has already gained the reputation of an intelligent and independant Legislator, and it is to be hoped that the Electors of St. John will not prove recreant to their trust, and be again influenced by either money, promises, or threats, of a Smasher Government. The Liberal Party I have no doubt will fight desperately, despite the errors their chiefs have committed, but their days are numbered, and it is only for the Conservative Party, to give one strong pull, and a pull altogether, and down comes the Smasher structure. The Conservative Party have nothing to fear, if they only prove true to their principles, but I am fearful that there are some who are holding office under the Government, who have not yet been displaced to make room for rampant Smashers, who may be too timid for the times.—Mr. Editor there are a large number of Conservatives in this County, who have votes in St. John and would so glad to record them for Mr. Lawrence, and it is to be hoped their business may call them to St. John on the polling day, of the ensuing election. There is no doubt but every Liberal in the Province who has a vote in St. John, will be up and doing, and preparing for the approaching contest, as it is already talked of here, as a pitched battle between Conservatism and Liberalism, and it is to be hoped that the office holders under Government, in this County who fled from St. John at the last contested election, between Tilley, and Lawrence, fearing Smasher threats, may this time prove themselves to be men who will not sacrifice principle to expediancy.

I remain, Yours, &c.,

A CONSERVATIVE.

Gagetown, May, 21, 1858.

THE COMING ELECTION.—We understand, says the last *Constitution*, that strong efforts are being made by the Conservative Party, to induce the Hon. R. L. Hazen, to be a candidate in the coming Election. This *understanding of the Constitution's*, has its origin in "the baseless fabric of a Vision." The editor has evidently been dreaming, as no such Idea has ever yet entered the head, sleeping or waking, of any one of the Conservative Party. The Conservatives not only profess, but practice Liberalism, and ever since Mr. Lawrence was twitted by one of the "Mock Liberals," for being a "vile mechanic," his friends have kept him steadily before the people, and now as then are determined to support no other man. The shallow dodge of the dodger to the contrary notwithstanding. The Conservatives reject no man because he is rich or poor, neither no they adopt them because of their wealth or poverty, not has the silley boast so vantingly set forth by the Smashers at the last Election, *that they could buy the whole of the Conservatives*, has the slightest effect on their steadfastness of purpose. Our man stands out in bold relief; he is ready, but where is the Smasher that will *confront him? Echo answers where!!!*

We would direct attention, to the advertisment of Mr. John C. McIntosh, in another column of this impression, who is *manufacturing* (not importing,) the choicest sweets of life, together with all the various kinds of Bread and Biscuit; we trust that not only Mr. McIntosh, but every other manufacturer, will meet the encouragement due to their enterprise, and take precidence of those who patronage *foreign*, in preferance to *domestic* manufactures.

The great self styled Liberal, came into power in June last, shortly afterwards they appraised, oppressions for Land damages over which the Rail Road is now built. It appears *now*, if we are to believe their own organs, that either from want of ability to make the appraisments, or from the fear in so doing, of damaging their party, they have neglected to perform that duty; and now on the eve of an Election they raise the cry, that if a Conservative is elected they propietors of those lands will get any damages, they chose to make. This is silly, very silly, and unless *they party* are wholy blinded by prejudice, they must know that the most uneducated man in the community will see through this flimsy veil attempted to be thrown over their inefficiency. Their is one consolation however left them, that they must yet cease their "lamentation, mourning, and woe," and by a prompt discharge of their duties, settle the matter, by doing what should have been done long since, by making the assessment, before they are *turned out of office*. Our opinion is that they Track from the obidos to York point *will or should* be abandoned altogether, and the road taken along the edge of the back shore to the breakwater, when the expense complained of would be obviated and a more suitable place be obtained, at less than one quarter of the expense. I that case deepwater wharves to any extent could be built, without interfering with our harbour, which is all required for the ordinary business of the port.

The new iron screw steamer "Lady Head," advertised in this paper aweek or two ago asintended to run from Quebec to the Lower Provinces, left the former place on Tuesday of last week, with upwards of fifty passengers, and reached Shediac on Saturday afternoon. In her progress down, as we learn from the Gleaner, "Lady Head" touched at Gaspe Basin on Thursday morning, Paspebiac, or Bonaventure, the same afternoon, and reached Dalhousie at the head of the Bay of Chaleur, that night. Returning down the other side of this beautiful bay she reached Bathurst on Friday forenoon Chatham or Miramachi, on Saturday morning, and Shediac, as above said, in the evening touching and stopping a few hours at each of these places. We expected to learn from the *Westmorland Times* something further of the progress of the "Lady Head," (in whose success as a new enterprise we feel much interest,) and of her return, but instead it has only a long complaining article about her not coming up to the wharf at Shediac, as the Editor expected, and his consequent inability to get on board.—[Courier.

ACCIDENT.—A serious accident occurred on the Railway near the nine mile station yesterday, by which a man of the name of Pierce got one of his legs so badly hurt as to require amputation.—Pearce was a Policeman on the line, and the accident arose entirely from his own rashness in attempting to get upon the locomotive while it was in motion, after having shifted a switch for it to pass from one line to another.—*E.*

ARRIVAL OF THE KANGAROO AT NEW YORK.
India and China News.

NEW YORK, June 9. The steamer Kangaroo, from Liverpool, May 26, arrived at her dock about 8 o'clock this morning. She reports the steamer Arabia arrived out on the evening of the 23d ult.

Calcutta dates are to April 22. The rebels have been driven from Azinghur with heavy losses. Sir Colin Campbell's staff were marching towards Rohilcund. Sundry successful encounters with the rebels reported.

Lord Elgin and his colleagues were about to leave Shanghae for Teensing. The fleets will follow.

The ship Gourser, bound to New York with tea, was lost on Pratas Shoals. Crew saved.

At Shanghae teas were unchanged. Import market active. Raw silk had advanced.

The Telegraph Fleet would Plymouth on an experimental trip about the 29th ult., and return to that port instead of Queenstown. It is proposed to lay a cable from Placentia Bay, Newfoundland, direct to Portland, Me., on the completion, of the present enterprise.

The trial of the Chalons insurgents resulted in the fine and imprisonment of the majority of the prisoners.

Another Ministerial crisis is anticipated at Madrid.

Gen. Concha asks to be recalled from Cuba on account of ill health.

The French Government had caused excitement by proposing to convert the property of Charitable Institutions into government stock.

The London *Times* says editorially, that the Neapolitan government has distinctly refused compensation to the English engineers, and that there is but one tone which becomes a British Cabinet under such circumstances.—There has been too much delay already, and the time has arrived for immediate satisfaction from the Neapolitan or immediate action by the British government.

John O'Connell, son of the late Daniel O'Connell, and one of the principal repeal agitators, is dead.

A line of steamers from Galway to America is again projected, and the first steamer, it is tho't, will sail about the 18th June.

INDIA.—The Calcutta mail of April 22 arrived at Alexandria on the 16th May.

At Calcutta, April 21, the produce market was depressed and the stock reduced.

The relief of Azinghur by Sir Edward Lugard is confirmed. The rebels on evacuating the city, were pursued for fifteen miles, and their loss was heavy, while that of the British was light.

Sir Colin Campbell's head-quarters and staff left Cawnpore on the 19th April, and marched by Futtyghur towards Rohilcund.

The rebels, it was believed, still intend to make a stand at Calpee.

Koor Singh was said to be trying to get into the Behar districts. A reward of twenty-five thousand rupees had been offered for his apprehension.

Brigadier Walpole had attacked the fort of Raxiour, in Oude, and lost 100 men killed and wounded, including four officers killed. The Oude Begum was said to be in a fort near Khysabad, with about 3000 adherents.

Brigadier Jones had attacked and dispersed 2000 rebels near Kukul, inflicting a heavy loss and capturing four out of their six guns. Many of the rebels dispersed to their homes.

The Calcutta produce market continued depressed. The demand for imports were steady, and stocks were much reduced. The money market was unchanged. Exchange 2s. 1½d. for credits.

LATEST BY TELEGRAPH.—LONDON, Wednesday morning.—The funds opened yesterday at a decline of 1-8, but subsequently became firmer in consequence of large purchases by leading brokers of government securities, and closed at previous quotations.

The members of the House of Commons, who are liberals from conviction, and not merely so from official connection, or hope of place or promotion, have had a meeting, at which they took steps to act in concert and union for the future, so that they would not be made the tools of any party manœuvers, or be betrayed into serving the purposes of any place hunter, without having advanced any large measures of reform.

The British Government is making large additions to its navy. There are now on the stocks 36 steamships, aggregating 19,650 horse power, and mounting 1,960 guns. The Prince of Wales three decker will mount 131 guns, and the Victoria, 120 guns. Eleven ships of the line, two decklers, will mount 80, 90 or 100, nine frigates, each to mount 50 guns, and to be fitted with screw propellers of 400 to 800 horse power, and two experimental frigates, of 26 guns each, and propelled with 1,600 horse power, are on the stocks, besides several smaller crafts. The whole cost will be some four million pounds sterling."

Arrival of the Asia.

NEW YORK, June 10th.—The Asia arrived this morning. Flour declined 6d and is almost unsaleable. Wheat steadier—5s. 10d. Corn quiet. Sugar heavy and declined 6d a 1s. Tea,—all qualities considerably declined.

The Bank of England returns show a large increase of bullion.

Consols closed on Friday at 97½ to 97⅞.

The general news is unimportant.

Parliament had re-assembled.

The conference between the Lords and Commons on the Jewish Question, indicates that Baron Rothschild will be allowed to take his seat in Parliament.

The Paris Conference was in session, but nothing important has yet transpired.

The London Morning Star says that the editors of the Times, Morning Advertiser, and Morning Post constantly receive invitations to the *soirees* at Cambridge House, and hence their never-failing support of Lord Palmerston.

ARRIVAL OF THE NOVA SCOTIAN.
St. John's, N. F., June 11.

The Canadian screw steamship Nova Scotian, from Liverpool June 2, for Quebec, arrived at the Straits of Belle Isle at five, a. m. yesterday, 10th, and finding the passage blocked with ice, after endeavouring for ten hours to effect a passage through, was obliged to take the southern route. The Nova Scotian has 294 passengers.

In the House of Lords, on the 31st, the order of the day was the consideration of the Commons' reason for disagreeing to the House of Lords' amendment to the Oaths' Bill. The question to insist on the Lords' amendments, after a discussion, was put and carried without a division.

Lord Stanley has been appointed to the India Board. Sir Bulwer Lytton has been appointed Colonial Secretary.

In the House of Commons on the 1st, Mr. Lindsay asked the Government if it was true that United States vessels in the Havana, or in the Western Coast of Africa trade, had been fired into, boarded, search or detained by British cruisers, and if so by what authority or under whose instructions did the commander of those ships so act.

Mr. Fitzgerald said the Government had no official information on the subject,—but had reason to believe the reports had been exaggerated. They were as anxious as the American Government to avoid all cause of complaint, and strict orders had been issued to the officers of the stations to be especially cautious.

The steamships *Niagara* and *Agamemnon* sailed from Plymouth Sound on Saturday for the west coast of Ireland, with the Telegraph Cable on board.

ARRIVAL OF THE EUROPA.

HALIFAX, June, 15.

Europa arrived at half-past 12, p.m.

Passed steamer Persia on the 6th, steering South.

Europa brings troops for 62d and 63d Regts. to Halifax.

There is nothing later from India.

In Parliament Bill for abolishing property qualification of members, was passed, as was the Atlantic Telegraph Bill.

Roebuck gave notice that he would bring Hudson's Bay Company's affairs formally before the House.

The Chancellor of the Exchequer stated that it would be inconvenient to lay the correspondence with the Turkish Government on the Suez Canal before the House.

Disraeli said no rupture of the negotiations with the Emperor of China had taken place.—The Emperor instead of sending to Lord Eglin at Shanghai had sent to him at Canton, but Eigin had then gone North, Elgin's instructions could not be laid before the House, as Government was acting in concert with allies. Government had given Elgin discretionary powers, but they were not aware of his motives in proceeding northward, neither could they say what he had demanded of the Chinese Government.

Mr. Bright remarked that the power of the country was ample to maintain its honour without entangling us in complicated alliances with France, Russia and the United States. He urged Government to bring the matter to a speedy issue. England was now at war with half the human race, and had 150,000 men and 70 ships in the East; and he doubted whether their operations would be attended with the slightest benefits to trade.

Sir J. Pakington said it was intended to reduce the force in the East at the earliest opportunity.

Mr. Fitzgerald stated that the American Government had made grave charges against certain British Officers in boarding American ships. No official report had been received from these officers; but he would say that if occurrences such as those complained of had occured, they would be viewed with the deepest regret by the Government and immediate explanations given. Fullest information should be laid before Parliament; meanwhile orders had been sent to the officer in command of squadron in Cuban waters to make every inquiry into the subject—and the greatest caution and forbearance should be exercised towards vessels bearing American flag.

In the Lords Earl Derby intimated that the Gov. General of India was supreme in military as well as in civil matters, and that he had no reason to believe any differences had taken place between Sir Colin Campbell and Lord Eglin.

The Atlantic Telagraph fleet returned to Plymouth from the experimental trip. The experiment of paying out and hauling in the cable in water nearly three miles deep was entirely successful.

The operation of splicing was performed four times, and the cable was payed out at the rate of 7 to 8 knots an hour. Expedition finally starts from Plymouth June 9th or 10th. Government had chartered twenty additional ships to convey troops to India, and it was said that twenty-five thousand, including four cavalry regiments would to be sent out without a moments delay.

Rawson, Sons & Co., of London and Liverpool, with branches in India and China largely engaged in Eastern trade, suspended with liabilities estimated at £700,000 stg. Assets said to be double.

The London Times reiterates its objections against the policy of maintaining a squadron for suppressing the Slave Trade, which has proved so ineffectual for the end in view. It says whatever the rights of the case and however the Americans may be ready to go at present in compliance his peace offer, we cannot but look forward to the day when it will be more disagreeable, and at the same time more unnecessary for the Americans to submit, and a still greater let down to our pride to give way.

The London Post thinks if injury has been sustained, England cannot refuse the reparation demanded by Cass, and calls for such forbearance in the matter complained of as will not endanger the friendly relations between the two countries.

The London Star thinks danger is imminent unless the British Government recedes from its untenable position.

The Daily News regards the affair as a disagreeable one but thinks it is premature to jump at conclusions without knowing both sides of the question; it discredits the reports made by some of the American captains. Some papers attribute a constant hot-water the cantankerous policy of Russel and the slave policy of America.

Government has instructed Post Office authorities to make up a Mail for the Steamer from Galway to New York; and the United States has been invited to despatch a steam Mail by same conveyance.

Rioting was taking place almost nightly in Belfast on a large scale. Places of worship and private houses, had been attacked. Considerable property destroyed. Military and Police engaged quelling the riots.

Tunes' City Article reports the funds dull on Friday. No change in money.

FRANCE.

A copy of a convention is published concluded between the Governments of Costa Rica and Nicaragua on the one part, and M. Felix Belly, acting on behalf of himself & Co. on the other, relative to the concession of an inter-oceanic canal by River San Juan and Lake Nicaragua.—The work is to be commenced in two years, and completed in six, and channel is to admit two of largest ships abreast. The French Government are to have exclusive privilege of keeping two ships of war on waters of route throughout the whole period occupied in construction. Duration of concession is 99 years from opening of canal, and line to be open to all flags at moderate uniform toll. The Times pronounces the scheme impracticable, capital being estimated at ten to fifteen millions sterling.

It was rumoured in Paris that Pelissier had been recalled for exchanging courtesies with the Duke D'Aumal.

ITALY.

Accounts from South of Europe relative to grain crops are not very satisfactory. Yield will be but moderate.

SWEDEN.

The Health of the King of Sweden is so much improved that it is hoped he will in a few weeks resume the direction of affairs.

GREECE.

Insurrectionary movements in Candia said to be extending.

PROTESTANT SCHOOLS IN FRANCE.—The *Debats* published a speech delivered by M. Guizot, in presiding, M. Guizot, presiding. Saturday, April 24, at the annual meeting of the Society for the Encouragement of Primary Instruction amongst the protestants of France. In the course of his address he said—"I have spoken to you of means. I have a few words to say about obstacles. I addressed you on the subject three years ago We had not then, nor have now, any doubts as to the just and friendly intentions of the superior power. All the evil proceeds from either the prejudices the pusillanimity, or the levity of certain local authorities, and from that want of serious respect for the law which is the supreme evil of our country and our time. This evil still exists, gentlemen. It appears even to have increased. The law gives to local authorities the right to oppose the opening of schools in the interest of public morals and order. This right is abused. Under the pretence of morals and the public peace Protestant schools have been interdicted, and even closed, for the sole reason that they are Protestant. We have seen in more than one place Protestant worship recognized, established, practised, but by the side of the open and crowded church there is no school. Parents have been able to worship God according to their faith, but not to bring up their children in their faith. Such an abuse, gentlemen, is clearly contrary to the freedom of worship, to the freedom of primary instruction, to justice, to common sense, and it is the more serious from the fact that we have have had reason to fear that the superior authority considers the local authorities to be independent and sovereign in the matter. That gentlemen, is inadmissible—it is impossible. What! our right in the matter of primary instruction to be at the mercy of a mayor, of a sub-prefect, of a prefect, and we to have no higher appeal to have no power of protesting against such decisions, and the central power to abdicate its own rights while depriving us of ours! Gentlemen, we will not permit such an interpretation of the law, and will unremittingly utter our protests."

W. H. LESTER,
Boitin's Corne

☞ Jerrem Bird.—This gentleman gave his first Grand entertainment on last evening to a very large and fashionable audience. This evening, he gives us a new Programme and his great "Ice Cream Feat." Every body and family must visit this famous Magician, and behold his curious and marvelous Wonders.

☞ Dr. Jordan of Boston, has arrived and taken Rooms at the Rail Road Hotel, where he will be happy to see old friends, and where the sick can consult him free of charge.

☞ We refer our readers attention to the Professional Card of Mr. Wedderburn, in another column. Mr. W. has been duly called to the Bar, and enrolled a Barrister, and is now authorized to practice in all the Courts.

☞ We have received the first number of the *Farmer's Monitor*, published at Indian Town, by John J. Larimer. It is well got up, filled with choice matter, and reflects much credit on the spirited publisher.

Sound Asleep.—Hotspur thought, that altho' Owen Glendower should call spirits from the "vasty deep" it was very doubtful if they would come, even when they were called. Just so is it with our "do nothing" Smashers government.—They have both from the Press, and from the members of the Legislature been frequently called on to inform the people of the Parent Isles, that there is such a place as New Brunswick, but not one penny would they grant for the encouragement of any one willing and able to prepare for publication a work on the subject; and while we find, published in London, "A Key to Canada" "Canada, its present condition and prospects."—"A Canadian Directory for 1857 & 8." "Canada the Land of Hope," &c. &c. &c., not one line in the way of information can be found in the Book Stores of London, on the subject of New Brunswick—its resources—and eligibility for the investment of British capital. The only information ever afforded the public on the subject has been from the pen of patriotic individuals, and at their own proper cost and charge, and for which they dik not even receive the thanks of the Government whose duty it was, and is—hence all that is known in England of this teeming "terra incognita" is that it is—

"Some place, some where far abroad,
"Where Sailors gang to fish for Cod."

AND OTHER AFFECTIONS OF THE

THROAT AND CHEST.

IN Incipient Consumption, Asthma, and Winter Cough they are unfailing. Being free from every hurtful ingredient, they may be taken *by the most delicate female or the youngest child*; while the Public Speaker and Professional Singer will find them invaluable in allaying the hoarseness and irritation incidental to vocal exertion, and also a powerful auxiliary in the production of melodious enunciation.

Prepared and sold in Boxes and Tins, of various sizes, by THOMAS KEATING, Chemist, &c., No. 79, St. Paul's Church Yard, London. Sold retail by all Druggists in the whole world.

N. B.—To prevent spurious imitations, please to observe that the words "Keating's Cough Lozenges" are engraven on the Government Stamp of each box, without which none are genuine.

IMPORTANT TESTIMONIAL,

34, Wine street, Bristol.

Sir,—It is with much pleasure I have to inform you of the benefit I received from your Lozenges. I was attacked with the typhus fever, during which time I had a violent cough, so that it kept me awake the greater part of the night. A friend persuaded me to try a box of your "COUGH LOZENGES" which I did and am happy to say that with only one box of your valuable compound I was quite free from cough.

You can make what use of this you please, for I think such valuable medicine ought not to go unnoticed.

I remain, Sir, your obedient Servant,

FINE HEAD OF HAIR,

THE BEARD, WHISKERS, AND MUSTACHIOS,

ROWLANDS' MACASSAR OIL

Is now universally known as the only article that can be depended upon for

The Growth, Restoration, and for Improving AND BEAUTIFYING THE HUMAN HAIR,

Proved beyond question by its successful result, for more than HALF A CENTURY past, and when every other specific has failed. It prevents it from falling off or turning grey—strengthens weak hair, cleanses it from Scurf and Dandriff,—and makes it beautifully soft, curly, and glossy. Its operation in cases of baldness is peculiarly active; and in the growth of Whiskers, the Beard, and Mustachios, it is unfailing in its stimulative operation. For Children it is especially recommended, as forming the basis of a beautiful head of hair. Its invaluable properties have obtained the Patronage of Royalty, and the Aristocracy throughout Europe; while the high esteem in which it is universally held, with numerous Testimonials constantly received of its efficacy, offer the best and surest proofs of its merits.—Price 3s. 6d., and 7s.; Family Bottles (equal to four small), 10s. 6d.; and double that size, 21s.

CAUTION.—On the wrapper of each bottle are the words—

ROWLANDS' MACASSAR OIL, &c.,

in white letters, and their signature, "A. ROWLAND and SONS," in Red Ink. Sold at 20, Hatton Garden, London, and by Chemists and Perfumers.

CURTIS ON MANHOOD—SECRECY IN LOVE.

A MEDICAL ESSAY ON NERVOUS AND GENERATIVE DEBILITY.

Just Published, the 77th Thousand, with numerous plates, in a sealed envelope, price 1s., or sent, post-paid by the Author, to any British possession for 1s. 8d.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain Directions for perfect Restoration to Health and Vigour; being a Medical Review of the various forms and modern treatment of Seminal Debility, Impotence, Loss of Mental and Physical Capacity, whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection, &c.; with Observations on a new and successful mode of detecting Spermatorrhœa, and other Urethral Discharges, by Microscopic Examinations; to which are added, Curious and Interesting Cases, with the Author's recipe of a Preventive Lotion.

By J. L. CURTIS, Surgeon, 15, Albemarle-street, Piccadilly, London.

"CURTIS ON MANHOOD.—The professional reputation of the author, combined with his twenty years' experience as medical adviser in the treatment of venereal diseases, fully commits for the important circulation which this popular and admirable medical treatise has obtained."—Sunday Times, 22nd March, 1857.

"CURTIS ON MANHOOD.—It is the duty of all men to study the laws of their nature, to learn that those of their mind. In the pages of this work will be found certain rules for guiding the one and preserving the other."—Morning Advertiser, March 31st, 1857.

"We feel no hesitation in saying, that there is no member of society to whom the book will not be found useful, whether such person be the relation of a parent, preceptor, or adviser general."—Sun, Evening Paper.

Sold also by PIPER & Co., 23, Paternoster-row, London.

A BEAUTIFUL COMPLEXION,

AND SOFT AND FAIR HANDS AND ARMS,

Are fully realized and sustained by the use of

ROWLANDS' KALYDOR,

An Eastern Botanical Preparation, perfectly free from all mineral or mercurial admixture. It is distinguished for its extremely bland, purifying, and soothing effects on the skin; while, by invigorating the pores and relaxing secretory vessels, it promotes a healthy tone, allays every tendency to inflammation, and thus effectually disperses all redness, tan, pimples, spots, freckles, discolorations, and other cutaneous visitations. The radiant bloom it imparts to the cheek, the softness and delicacy which it induces of the hands and arms, its capability of soothing irritation, and removing cutaneous defects, render it indispensable to every toilet.

It obviates all the effects of Climate on the Skin, whether with reference to cold and inclemency, or intense solar heat, and affords immediate relief in cases of sunburn, stings of insects, or incipient inflammation. Gentlemen after shaving will appreciate its soothing and ameliorating properties.

Its purifying and refreshing properties have obtained its selection by Royalty and the Aristocracy of Europe, and it is universally in high repute, from the sultry climes of India, to the frozen realms of the Czar.

Prices, 4s. 6d., and 8s. 6d. per Bottle.

CAUTION.—The words "ROWLANDS' KALYDOR" are on the wrapper of each bottle, and their signature, "A. ROWLAND & SONS" in red ink, at foot. Sold at 20, Hatton Garden, London, and by Chemists and Perfumers.

LANDING ex "Ann Rankine" from London,—150

POETRY.

THE STRUGGLE FOR FREEDOM.

BY J. G. WHITTIER.

Just God! and shall we calmly rest,
The Christian's scorn—the heathen's mirth—
Content to live the lingering jest,
And by-word of a mocking earth?
Shall our own glorious land retain
The curse which Europe scorns to hear?
Shall our own brethren drag the chain
Which not e'en Russia's menials wear?

Up now for Freedom! not in strife
Like that your sterner fathers saw—
The awful waste of human life—
The glory and the guilt of war;
But break the chain—the yoke remove,
And smite to earth oppression's rod,
With those mild arms of truth and love,
Made mighty through the living God!

Down let the shrine of Moloch sink,
And leave no traces where it stood;
Nor longer let its idol drink
His daily cup of human blood:
But rear another altar there,
To truth and love and mercy given,
And freedom's gift and Freedom's prayer
Shall call an answer down from heaven.

COME, LOVELY SPRING.

Come, lovely Spring with all thy flowers,
Primrose, and violet, come;
Sweet verdure, clothe again the bowers,—
Bee let us hear thy hum!
And hearts shall leap, and tongues shall sing,
And welcome forth the new-born Spring.

Thus, e'en as winter storm departs,
Shall all our sorrows go;
There is the spring-time of the heart,
The spirit's general glow:
The sun of Hope, with glorious ray,
Drives all the clouds of Care away.

VARIETY.

A Virginia paper records the marriage of Miss Jane Lemon to Mr. Ebenezer Sweet; whereupon an exchange moralizes as follows:

"How happy the extremes do meet
In Jane and Ebenezer;
She's no longer sour, but *sweet*,
And he's a *Lemon* squeezer!"

PADDY AND THE TURTLE.—In New York a man was carrying a live turtle along the street, when by came an Irishman, followed by a large dog. The countryman tried by gentle words to get the son of Emerald to put his finger into the turtle's mouth but he was too smart for that.

"But," said he, "I'll put my dog's tail in, and see what the baste will do."

He immediately called up his dog, took its tail in his hand and stuck it into the turtle's mouth He had scarcely got it in when Mr. Turtle shut down on the poor dog's tail, and off the latter ran at railroad speed pulling the turtle after him at a more rapid rate than ever it travelled before The countryman thinking that this days work would be thrown away if the animal should run at that rate, turned with a savage look upon the Irishman and exclaimed.

"Call back your dog?"

Paddy put his hands into his pockets, threw his head to one side, winked, and then answered, with a provoking *sang froid*,

"Call back your fish."

A FEAT BY A PRINTER.—At the Plaza (California) Gymnasium last night, a printer by the name of J. H. Moody, working at Whitton, Towne & Co's, pulled fourteen pound weights over the pulleys of a chest box, 25,727 times without stopping to rest. He commenced the feat at half-past nine, and finished at a quarter to two o'clock this morning. He sat with his face to the pulleys and pulled right and left alternately. He would have made more, "pulling up" in a printing office—setting up 25,000 'ems' for instance.

SHORTLY SO.—A man was once relating a story of being on a locomotive that struck a cow standing on the track, and throw her several yards into the field, where she lit squarely upon her feet, with her head towards the train, and strange to say, she wasn't hurt a mite.

"But didn't she looked scared?" inquired a listener.

"Well, I don't know whether she was scared or not, but she looked a good deal discouraged.

THE INTRUDER REBUKED.—Jorrold and some friends were dining in a private room in a tavern. After dinner, the landlord appeared, and having informed the company that the house was partly under repair, and that he was inconvenienced for want of room, requested that a stranger might be allowed to take a chop at seperate table in the apartment. The company assented, and the stranger, a person of common-place appearance, was introduced. He ate his chop in silence; but, having finished his repast, he disposed himself for those forty winks which make the sweetest sleep of gourmants. But the stranger snoared so loudly and inharmoniously that conversation was disturbed. Some gentlemen of the party now jarred glasses, or shuffled upon the floor, determined to arouse the obnoxious sleeper. Aresently the sleeper started from his sleep and to his legs, and shouted to Jerrold, "I know you, Mr. Jerrold; but you shall not make a butt of me!" "Then don't bring your hog's head in here," was the prompt reply.

"Susan can you parse butter?" "Thirtainly thir. Butter ith a common thubthantive, nueter gender, agreeth with buckwheat caketh, and ith governed by thugar,—molateth underthtood."

"Patrick dear, come in and go to bed jist," said the wife of a jolly son of Erin, who had just returned from the fair, in decidedly "how come you so" state. "You must be dreadful tired, shure, wid your long walk."

"Arrah! gid away wid your nonsense," said Pat. "It wasn't the length of the way at all that fatigued me; 'twas the breadth of it!"

A Southern Methodist minister, detailing his experiences on a "certain circuit, counted *twenty-six* children that were named after him, and added that during the year he received as compensation for his labor *thirteen* dollars.

If you wish to increase the size and prominence of your eyes, just keep account of the money you spend foolishly, and add it up at the end of the year.

A German being called upon for a toast, said: "Here ish to the heroes who fit, bleed, and tied to the battle of Punker Hill—of whom I am one."—Drank standing.

A drunken Dutchman, by the name Cain, staggering through the streets one day, was asked if he was the man that slew his brother. "No," said he, "I was the one that got slewed."

THE FORTHCOMING PROVINCIAL EXHIBITION.—Sealed Tenders for the erection of a building at Toronto, chiefly of iriion and glass, are advetised for. The plans may be seen and particulars learned on and and after the 13th inst., at the office of Messrs Fleming and Sheriber, Toronto. Tenders will be received up to noon on Saturday, the 22nd inst.

Both houses of the Legislature of Wisconsin have passed a bill for the re-establishment of capital punishment for the crime of murder in the first degree. A strong reaction appears to have taken place in the minds of the people of the State in relation to this subject. This last action of the Legislature is understood to be in conformity with a general expression of the popular will.

A MEDICAL REVOLUTION!

THE WORLD ASTONISHED.

HOLLOWAY'S OINTMENT,

THE GREAT COUNTER IRRITANT!

The virtue of diseased often makes its way to the internal organs through the pores of the skin. This penetrating Ointment, melting under the hand as it is rubbed in, is absorbed through the same channels, and, reaching the seat of inflammation, promptly and invariably subdues it, whether located in the kidneys, the liver, the lungs, or any other important organ. It penetrates the surface to the interior, through the countless tubes that communicate with the skin as summer rain passes into the fevered earth diffusing its cool and regenerating influence.

SKIN DISEASES & GLANDULAR SWELLINGS.

Every species of exterior irritation is quickly reduced by the anti-inflamatory action of this Ointment. Angry Eruptions, such as Salt Rheum, Erysipelas, Tetter, Ringworm, Scald Head, Nettle Rash, Scabies (or Itch) &c., die out, to return no more under its application. Hospital experience in all parts of the world proves its infallibility in diseases of the skin, the muscles, the joints and the glands.

ULCERS, SORES, AND TUMORS.

*The effect of this unrivaled external remedy upon scrofula, and other cruel ulcers and sores, is almost miraculous. It first discharges
